## **II. Classification and disposition of the assets of the United Nations Mission in Bosnia and Herzegovina**

2. The process of liquidating the assets of UNMIBH was guided by the following principles and policies contained in United Nations Financial Regulation 5.14:

(a) Equipment in good condition that conforms to established standardization or is considered compatible with existing equipment will be redeployed to other peacekeeping operations or will be placed in reserve to form start-up kits for use by future missions;

(b) Equipment not required for current or future peacekeeping operations may be redeployed to other United Nations activities funded from assessed contributions, provided that there is a demonstrated need for the equipment;

(c) Equipment not required for current or future peacekeeping operations or other United Nations activities funded from assessed contributions but which may be useful for the operations of other United Nations agencies, international organizations or non-governmental organizations will be sold to such agencies or organizations;

(d) Any equipment or property not required or which is not feasible to dispose of in accordance with subparagraphs (a), (b) or (c) above or which is in poor condition will be subject to commercial disposal in accordance with the procedures applicable to other United Nations equipment or property;

(e) Any assets which have been installed in a country and which, if dismantled, would set back the rehabilitation of that country shall be provided to the duly recognized Government of that country in return for compensation in a form to be agreed by the Organization and the Government. This refers in particular to airfield installations and equipment, buildings, bridges and mine-clearing equipment. Where such assets cannot be disposed of in this manner or otherwise, they will be contributed free of charge to the Government of the country concerned. Such contributions require the prior approval of the General Assembly.

3. On the basis of the inventory records as at 31 December 2002, the assets of UNMIBH amounted to an inventory value of \$59,564,700. These assets have been grouped into 16 categories of equipment presented in standard peacekeeping operation budgets: accommodation equipment, air traffic control equipment, communications equipment, data-processing equipment, field defence equipment, generators, medical equipment, miscellaneous equipment, observation equipment, office equipment, petrol tank plus metering equipment, prefabricated buildings, refrigeration equipment, vehicular equipment, water and septic tanks and water purification equipment.
