47. In recent years, special attention was paid to improving the complaint mechanisms by potential victims of abuse and respond accordingly. SPtS of Ukraine came to the conclusion that this organizational and legal instrument must meet the absolute principles: independence and impartiality, efficiency, sufficient level of attraction the victim and openness to public scrutiny.

The above is due to the fact that the additional indicator for redistribution accents of activities of the SPtS of Ukraine (at that more attention must be paid) is a practice of the European Court of Human Rights, which is consonant with the shortcomings of the CPT. The analysis of the past 10 years (at the beginning of 2014) suggests that the most systemic disorders on the object of appeal are (totally 43 solutions): improper confinement conditions (29 complainants), inadequate medical care (17 complainants) and ineffective investigation of complaints of ill-treatment (7 complainants).
