

**Third Review Conference of the States Parties to
the Convention on the Prohibition of the Use,
Stockpiling, Production and Transfer of
Anti-Personnel Mines and on Their Destruction**

24 June 2014

Original: English

Maputo, 23 - 27 June 2014

Item 7 of the agenda

Review of the operation and status of the Convention

Draft

**Review of the operation and status of the Convention on the
prohibition of the use, stockpiling, production and transfer of
anti-personnel mines and on their destruction, 2010-2014**

Part VI

Submitted by the President of the Third Review Conference

Annexes

Annex I

States that have expressed their consent to be bound by the Convention

Annex II

Stockpiled anti-personnel mines destroyed and waiting to be destroyed

Table 1
Stockpiled anti-personnel mines reported destroyed by the States Parties since the
Cartagena Summit

<i>State Party</i>	<i>Up to 2009</i>	<i>2010</i>	<i>2011</i>	<i>2012</i>	<i>2013</i>	<i>2014</i>	<i>Up to 2014</i>	<i>Total destroyed</i>

¹⁰ In its report submitted in 2004, Togo indicated that it retains 436 anti-personnel mines under Article 3.

¹¹ In its Article 7 report submitted in 2008, Uruguay indicated that it retains 260 anti-personnel mines under Article 3.

Annex IV

Summary of voluntary information provided by the States Parties on the plans and the actual use of retained anti-personnel mines

At the Cartagena Summit, it was agreed that all States Parties will regularly review the number of anti-personnel mines retained for purposes permitted under Article 3 of the Convention to ensure that it constitutes the minimum number absolutely necessary for these purposes and destroy all those exceeding that number. It was agreed that all States Parties will annually report, on a voluntary basis, on the plans for and the actual use of anti-personnel mines retained, explain any increase or decrease in the number of retained anti-personnel mines.

<i>State Party</i>	<i>Information provided on a voluntary basis on the plans and the actual use of retained anti-personnel mines</i>
Angola	In 2013, Angola reported that it retained 1,304 anti-personnel mines, 1,208 fewer mines than in 2010. Anti-personnel mines retained are used by the Angolan Armed Forces for the purposes of development and training, and mines for instruction have been provided to National Institute for Demining and other different mine action operators to instruct on manual, mechanic and canine systems.
Argentina	Argentina retains 857 anti-personnel mines, 411 fewer mines than in 2009. 635 anti-personnel mines are retained by the Argentinian army and 222 by the Institute of Scientific and Technical Investigation for Defence to use for the “Mine Destruction Systems without Explosives” project.
Australia	Australia retains 1,264 anti-personnel mines, 5,521 fewer mines than in 2009. Australia indicated that it views the retention of anti-personnel mines as essential for Australian Force training requirements, including the destruction and disposal of anti-personnel mines, mine awareness and countermine training and to undertake research into the effects of anti-personnel mines. Stocks are now centralised, with small numbers in ammunition depots throughout Australia to support regional training by Engineer units. Training is primarily conducted by the School of Military Engineering (Sydney, Australia). Stock holdings are regularly reviewed and where stock is not required it is marked for disposal. After the 2013 review, a significant portion of stock was destroyed.
Belarus	Belarus retains 6,022 anti-personnel mines, 8 fewer mines than in 2009.
Belgium	In 2013, Belgium reported that it retained 2,569 anti-personnel, 676 fewer mines than in 2009. Anti-personnel mines are retained for the purpose of education and training of EOD specialists and deminers with live ammunition as well as for demolition exercises in order to reduce the quantities of mines in the Armed Forces possession. In 2011, mines were used for the operational training of the Engineer Combat Unit deminers and to train military former combat units in mine risk education.
Bhutan	Bhutan retains 490 anti-personnel mines, 4,001 fewer mines than in 2007. Anti-personnel mines were used for all officers and troops to be given basic and specialised trainings in mine clearance and the removal of improvised explosive devices.
Bosnia and Herzegovina	In 2013, Bosnia and Herzegovina reported that it retained 1,460 anti-personnel mines, 930 fewer mines than in 2009. Anti-personnel mines were

<i>State Party</i>	<i>Information provided on a voluntary basis on the plans and the actual use of retained anti-personnel mines</i>
a	used for mine detection dog training and training polygons in demining areas.
Brazil	Brazil retains 5,251 anti-personnel mines, 5,731 fewer mines than in 2009. Anti-personnel mines are retained for military training purposes, to allow the Brazilian military armed forces to adequately participate in international demining activities and for the purpose of training in mine detection, clearance and destruction.
Bulgaria	Bulgaria retains 3,557 anti-personnel mines, 125 fewer mines than in 2009.
Cambodia	Cambodia retains INSERT NUMBER anti-personnel mines, INSERT NUMBER fewer mines than in 2009. CLARIFY SITUATION
Canada	Canada retains 1,909 anti-personnel mines, 30 fewer mines than in 2009. Anti-personnel mines are retained to study the effect of blast on equipment, to train soldiers on procedures to defuse live anti-personnel mines and to demonstrate the effect of landmines.
Chile	Chile retains 2,925 anti-personnel mines, 1,158 fewer mines than in 2009. Anti-personnel mines are used to train deminers of the Chilean army and navy in the detection, deactivation, and destruction of anti-personnel mines.
Côte d'Ivoire	In 2013, Côte d'Ivoire reported that it retained 290 anti-personnel mines. Anti-personnel mines retained will be used to train officers of the Côte d'Ivoire Republican Forces and the Gendarmerie Nationale.
Croatia	Croatia retains 5,714 anti-personnel mines, 324 fewer anti-personnel mines than in 2009. Anti-personnel were used during testing and evaluating demining machines on the test polygon in Cerovec, CROMAC-CTDT and by the Training Company of Engineering Regiment in its regular training and education for deminers.
Czech Republic	The Czech Republic retains 2,301 anti-personnel, 242 fewer anti-personnel mines than in 2009. Retained anti-personnel mines were used to train and or educate EOD personnel in mine detection, mine clearance and destruction techniques and for additional courses within the framework of preparation to NATO standards for ISAF operations in Afghanistan.
Denmark	Denmark retains 1,820 anti-personnel mines, 170 fewer anti-personnel mines than in 2009. Anti-personnel mines are retained to be used for research and development by the Danish Defence Research Establishment and to be used for training in mine detection.
Ecuador	Ecuador retains 100 anti-personnel mines, 900 fewer than in 2009. Anti-personnel mines have been used in a training course of the National Demining School and Ecuador plans to use 10 anti-personnel mines each year in training and for potential research.
Eritrea	In 2013, Eritrea indicated that it retained 101 anti-personnel mines, 8 fewer anti-personnel mines than in 2009. Eritrea also indicated that 71 of these anti-personnel mines are inert.
France	France retains 3,958 anti-personnel mines, 186 fewer anti-personnel mines than in 2009.
Germany	Germany retains 1,880 anti-personnel mines, 557 fewer anti-personnel mines than in 2009. Necessary quantities, types and estimated future requirements in terms of retained anti-personnel mines are reviewed on an annual basis.

<i>State Party</i>	<i>Information provided on a voluntary basis on the plans and the actual use of retained anti-personnel mines</i>
	Since the Second Review Conference in 2009, some mines were disassembled for use as inert training mines, others were used for different development programmes in mine protection and clearance and some others were destroyed. In 2013, Germany indicated that the latest review of requirements will lead to an additional destruction of 1,300 anti-personnel mines by the end of 2014.
Greece	Greece retains 6,142 anti-personnel mines, 1,082 fewer anti-personnel mines than in 2009. Anti-personnel mines are retained to train soldiers in mine detection and clearance and in canine detection.
Indonesia	In 2013, Indonesia reported that it retained 2,454 anti-personnel mines, 2,524 fewer anti-personnel mines than in 2009. Retained anti-personnel mines are used as instruction and teaching materials to further enhance the identification, the detection and the destruction of anti-personnel mines.
Iraq	
Ireland	In 2013, Ireland reported that it retained 61 anti-personnel mines, 6 fewer anti-personnel mines than in 2009. The Irish Defence Forces use live anti-personnel mines in the development and validation of mine render safe procedures, in training personnel for these procedures, in testing and validating mechanical mine clearance equipment and in training personnel in the use of such equipment. Minimum metal content mines are used, as required, in the calibration and testing of mine detection equipment.
Italy	Italy retains 628 anti-personnel mines, 61 fewer anti-personnel mines than in 2009. Warfare mines are used for bomb disposals and pioneers training courses.
Japan	Japan retains 1,930 anti-personnel mines, 1,390 fewer anti-personnel mines than in 2009. Mines were and will be used for education and training in mine detection and mine clearance and research and development of mine clearance equipment.
Jordan	Jordan retains 850 anti-personnel mines, 100 fewer anti-personnel mines than in 2009. Mines were used for the purpose of mine detection training for new deminers and mine detection dog teams working on Jordan's northern border demining project.
Mozambique	In 2013, Mozambique reported that it retained 1,363 anti-personnel mines, 600 fewer anti-personnel mines than in 2009. 98 of these mines are inert without explosive and detonators. Three demining operators maintain stocks of anti-personnel mines in Mozambique for the training of deminers and the training and testing of mine detection animals. The Mozambique Defence Forces also retain a stock for training and refresher courses for the Defence Forces Demining Platoon.
Netherlands	The Netherlands retains 1,557 anti-personnel mines, 856 fewer anti-personnel mines than in 2009.
Nicaragua	In 2013, Nicaragua reported that it retained 448 anti-personnel mines, 556 fewer anti-personnel mines than in 2009.
Peru	Peru retains 2,015 anti-personnel mines, 2,032 fewer anti-personnel mines than in 2009.
Portugal	Portugal retains 694 anti-personnel mines, 66 fewer anti-personnel mines than in 2009. Anti-personnel mines are retained and used to train Explosive

<i>State Party</i>	<i>Information provided on a voluntary basis on the plans and the actual use of retained anti-personnel mines</i>
	Ordnance Disposal teams in mine detection, clearance and destruction techniques and to provide basic mine awareness training to military personnel deployed in international missions.
Senegal	Senegal retains 50 anti-personnel mines, 22 more anti-personnel mines than in 2009. 13 of these mines are fuse-less and are retained by HI in their offices for training needs. 13 anti-personnel are retained by MECHEM to be used for training the dog team and 24 anti-personnel were collected during demining operations or extracted from rebel stocks before their destruction are kept for training at the Military Engineering Training School.
Serbia	In 2013, Serbia reported that it retained 3,140 anti-personnel mines, 440 fewer anti-personnel mines than in 2009. Anti-personnel mines retained are planned to be used for personnel training towards possible engagement in United Nations peace operations, protection equipment testing, and mine detectors.
Slovakia	In 2012, Slovakia reported that it retained 1,272 anti-personnel mines, 150 fewer anti-personnel mines than in 2009.
Slovenia	Slovenia retains 361 anti-personnel mines, 2,630 fewer anti-personnel mines than in 2009.
South Africa	South Africa retains 576 anti-personnel mines, 3,960 fewer anti-personnel mines than in 2009.
Spain	In 2013, Spain reported that it retained 1,710 anti-personnel mines, 87 fewer anti-personnel mines than in 2009. Mines have been used for the development of the “Advanced Global System to Eliminate Anti-Personnel Mines” and for demining training courses.
Sweden	Sweden retains 6,235 anti-personnel mines, 1,129 fewer anti-personnel mines than in 2009. The Swedish Armed Forces use anti-personnel mines in mine clearance training carried out at the Swedish Demining and EOD centre, providing the deminer with experience of actually clearing live mines.
Thailand	In 2013, Thailand reported that it retained 3,350 anti-personnel mines, 288 fewer anti-personnel mines than in 2009. In 2012, the Thailand Mine Action Centre and the Royal Thai Army conducted a training programme with this course being an integral part of Thailand’s continuous plan to increase the number of deminers to accelerate mine clearance operations without compromising safety.
Tunisia	Tunisia retains 4,770 anti-personnel mines, 210 fewer anti-personnel mines than in 2009.
Turkey	Turkey retains 14,944 anti-personnel mines, 181 fewer anti-personnel mines than in 2009. Mines have been used during the Partnership for Peace Training Centre Mine and EOD course. There are plans to use a minimum of 700 of these mines for the training of staff to be employed for mine clearance along the Syrian border. In addition, an overall reassessment of the number of mines retained for training purposes was being considered.
Ukraine	In 2013, Ukraine reported that it retained 605 anti-personnel mines. While mines retained by Ukraine between 2009 and 2012 decreased from 211 to 0, Ukraine reported anti-personnel mines retained in 2013.
United	The United Kingdom retains 371 anti-personnel mines, 532 fewer anti-

<i>State Party</i>	<i>Information provided on a voluntary basis on the plans and the actual use of retained anti-personnel mines</i>
Kingdom of Great Britain and Northern Ireland	personnel mines than in 2009. The United Kingdom retains anti-personnel mines with the objective of identifying the anti-personnel mine threat to the United Kingdom Armed Forces, together with maintaining and improving detection, protection, clearance and destruction techniques including for explosive improvised device.
Venezuela (Bolivarian Republic of)	In 2012, Venezuela reported that it retained 4,874 anti-personnel mines, 86 fewer anti-personnel mines than in 2009. Mines are retained for the development of mine detection, clearance and destruction techniques.
Zambia	In 2013, Zambia reported that it retained 907 anti-personnel mines, 1,213 fewer anti-personnel mines than in 2009. Training previously carried out covered mine identification and awareness, minefield marking and layout, detection and destruction techniques for mainly military personnel preparing for United Nations Peace Keeping Operations deployment, combat engineers undergoing mandatory career progression courses, and national and regional military officers undergoing Command and Staff Courses.
Zimbabwe	Zimbabwe retains 450 anti-personnel mines, 100 fewer anti-personnel mines than in 2009.

At the Cartagena Summit, it was agreed that States Parties that have maintained under the provision of Article 3, the same number of anti-personnel mines over periods of years, and have not reported on the use of such mines for permitted purposes or on concrete plans for their use, would be encouraged to report on such use and such plans and to review whether these anti-personnel mines are needed and constitute the minimum number absolutely necessary for permitted purposes and to destroy those that are in excess of this number.

<i>Algeria</i>	<i>Algeria retains 5,970 anti-personnel mines and no change in the quantity of anti-personnel mines retained has been reported since 2010. In 2009, 6,000 anti-personnel mines were reported retained by Algeria and on 20-21 October 2009, 30 mines were used in testing a system to remotely breach minefields.</i>
Bangladesh	In 2013, Bangladesh reported that it retained 12,500 anti-personnel mines and no change in the quantity of anti-personnel mines retained has been reported since 2009.
Benin	In 2008, Benin reported that it retained 16 anti-personnel mines and no new information has been provided since.
Botswana	In 2012, Botswana reported that it retained 1,019 anti-personnel mines and no new information has been provided since.
Burundi	In 2013, Burundi reported that it retained 4 anti-personnel mines and no change in the quantity of anti-personnel mines retained has been reported since 2004.
Cameroon	In 2009, Cameroon reported that it retained 1,885 anti-personnel mines and no new information has been provided since.
Cape Verde	In 2009, Cape Verde reported that it retained 120 anti-personnel mines and no new information has been provided since.
Colombia	Colombia retains 586 anti-personnel mines and no change in the quantity of anti-personnel mines retained has been reported since 2009.

Algeria	<i>Algeria retains 5,970 anti-personnel mines and no change in the quantity of anti-personnel mines retained has been reported since 2010. In 2009, 6,000 anti-personnel mines were reported retained by Algeria and on 20-21 October 2009, 30 mines were used in testing a system to remotely breach minefields.</i>
Congo	In 2009, the Republic of Congo reported that it retained 322 anti-personnel mines no change in the quantity of anti-personnel mines retained has been reported since.
Cyprus	Cyprus retains 500 anti-personnel mines and no change in the quantity of anti-personnel mines has been reported since 2010. In 2009, 1,000 anti-personnel mines were reported retained by Cyprus and 494 anti-personnel mines were destroyed and 6 transferred for purposes permitted by Article 3.
Djibouti	In 2005, Djibouti reported that it retained 2,996 anti-personnel mines and no new information has been provided since.
Ethiopia	In 2012, Ethiopia reported that it retained 303 anti-personnel mines, the same quantity as in 2009, and no new information has been provided since.
Finland	Finland retains 16,500 anti-personnel mines, the same quantity as when it joined the Convention in 2012. Finland indicated that anti-personnel mines in stockpiles will be transferred in yearly bases to training organisations of the Finnish Defence Forces.
Gambia	In 2013, the Gambia reported that it retained 100 anti-personnel mines, the same quantity as in 2010 and no new information has been provided since. Retained anti-personnel mines are in a secured armoury and routine stock checks are conducted. The Gambia Armed Forces is planning to deploy to Mali under ECOWAS and will use the mines during the pre-deployment training.
Guinea-Bissau	In 2011, Guinea Bissau reported that it retained 9 anti-personnel mines, the same quantity as in 2009 and no new information has been provided since.
Honduras	In 2007, Honduras reported that it retained 815 anti-personnel mines and no new information has been provided since.
Kenya	In 2008, Kenya reported that it retained 3,000 anti-personnel mines and no new information has been provided since.
Mali	In 2005, Mali reported that it retained 600 anti-personnel mines and no new information has been provided since.
Mauritania	Mauritania retains 728 anti-personnel mines, the same quantity as in 2009.
Namibia	In 2010, Namibia reported that it retained 1,634 anti-personnel mines, 100 fewer anti-personnel mines than in 2009.
Nigeria	In 2012, Nigeria reported that it retained 3,364 anti-personnel mines, the same quantity as in 2009, and no new information has been provided since.
Romania	In 2013, Romania reported that it retained 2,500 anti-personnel mines, the same quantity as in 2009, and no new information has been provided since. Anti-personnel mines in regular training cycles for EOD personnel and engineers and for specific preparation of troops leaving to operational theatres.
Rwanda	In 2003, Rwanda reported that it retained 101 anti-personnel mines and that these mines had been uprooted from minefields to be retained for training purposes.

<i>Algeria</i>	<i>Algeria retains 5,970 anti-personnel mines and no change in the quantity of anti-personnel mines retained has been reported since 2010. In 2009, 6,000 anti-personnel mines were reported retained by Algeria and on 20-21 October 2009, 30 mines were used in testing a system to remotely breach minefields.</i>
Sudan	Sudan retains 1,938 anti-personnel mines, the same quantity as in 2009.
Tanzania	In 2009, Tanzania reported that it retained 1,780 anti-personnel mines and no new information has been provided since.
Togo	In 2004, Togo reported that it retained 436 anti-personnel mines and no new information has been provided since.
Uganda	In 2012, Uganda reported that it retained 1,764 anti-personnel mines, the same quantity as in 2009, and no new information has been provided since.
Uruguay	In 2008, Uruguay reported that it retained 260 anti-personnel mines and no new information has been provided since.
Yemen	In 2013, Yemen reported that it retained 3,760 anti-personnel mines, the same quantity as in 2009.
