United Nations A/57/310

Distr.: General 15 August 2002

Original: English

Fifty-seventh session
Item 120 of the provisional agenda*
Human resources management

Consultants and individual contractors

Report of the Secretary-General**

Summary

The present report, which covers consultants and individual contractors during 2001, is submitted pursuant to General Assembly resolution 53/221 of 7 April 1999, in which the Secretary-General was requested to report on consultants hired by the United Nations during the preceding year.

During the 2001 reporting period, the Integrated Management Information System (IMIS) Release III, was still being installed at certain offices away from Headquarters. As a result, some of the data on which the present report is based was collated from legacy systems for the earlier part of the reference period and from IMIS during the latter part. Since the two data collection systems are incompatible in significant ways, issuance of the present report was delayed owing to the extra time needed to account for changes in data gathering methodology and the need to validate aggregated data. Now that the IMIS Release III implementation has been completed for 2001 at the eight major duty stations away from Headquarters, this problem is not expected to recur for 2002 data.

^{*} A/57/150

^{**} The submission of the present report was delayed in order to obtain data from offices away from Headquarters.

- 1. The General Assembly, in section VIII, paragraph 4, of its resolution 53/221 of 7 April 1999, requested the Secretary-General to continue to submit an annual report to the Assembly on consultants hired by the United Nations during the preceding year, with an indication of their functions. The present report also responds to requests made by the General Assembly in resolution 51/226, section VI, paragraph 7, and by the Advisory Committee on Administrative and Budgetary Questions (see A/51/533, para. 44, and A/53/691, sect. III, para. 15).
- 2. For the 2001 reporting period, data on consultants and individual contractors is available in the database of the Integrated Management Information System (IMIS). However, the deployment schedule of IMIS Release III (finance) in offices away from Headquarters in 2001 did not provide for coverage for a full 12 months in all duty stations. As a result, it has not been possible to present IMIS-based comparable information on a worldwide basis. For example, at the Economic and Social Commission for Asia and the Pacific (ESCAP), IMIS data covered 10 months in 2001, but at the United Nations Office at Nairobi, IMIS covered only six months. The existing Paradox database maintained by the Office of Human Resources Management has therefore continued to combine the available IMIS data with data obtained directly from overseas duty stations. This problem should not recur for the 2002 reporting period.
- 3. For the reporting year 2001, a systematic collection of occupational data has been prepared for the purpose of this exercise. It is based on the United Nations common system denominator, the Common Classification of Occupational Groups (CCOG).
- 4. The present report records all engagements with a starting date in 2001. The duration of contracts and the fees paid to consultants and individual contractors are presented for the entire contractual period, even in those cases where the work involved extended beyond 2001. In the same manner, contracts that had begun before 2001 are not included, even if they continued into that year.
- 5. A comparison with the 2000 recalibrated data reveals an increase in numbers of both consultants (246 or 8 per cent) in 2001 and individual contractors (183 or 13.9 per cent). The number of days worked by consultants in 2001 as compared with 2000 has increased (by 20.8 per cent), as has the number of days worked by individual contractors (39.2 per cent increase). The average contract duration for consultants in 2001 has increased by 12.5 days and for individual contractors by 22 days (not all days in a contract period need be workdays). The total number of consultants and individual contractors as compared with 2000 data shows a 9.8 per cent increase. There is a 7.5 per cent increase in the number of contracts, a 27.7 per cent increase in days worked and an 11.9 per cent increase in fees in 2001 as compared with 2000.
- 6. Combined expenditures in 2001 on consultants (\$36.6 million) and individual contractors (\$10.3 million) amounted to \$46.9 million. Since 2000, total fees have increased by \$3.4 million (10.3 per cent) for consultants and by \$1.4 million (16.6 per cent) for individual contractors. In 2001, the average daily cost was \$114.60 for a consultant and \$56.90 for an individual contractor. Compared with 2000, the average daily cost for a consultant in 2001 was \$10.90 less, and \$11.90 less for an individual contractor.

- 7. Table 1 (see annex) summarizes the number of persons engaged and the number of contracts by type for 2001. It indicates the number of women engaged, as well as work performed by former staff and also shows the educational levels and performance evaluations for consultants and individual contractors. In 2001, a total of 3,300 persons were engaged as consultants. Of that number, 886 persons (26.8 per cent) were women, 47 were retirees, 37 were non-retired former staff aged 60 years or over and 149 were non-retired former staff under age 60. A total of 4,204 contracts were issued for consultants during the year. In 2001, there were 1,497 persons engaged as individual contractors for a total of 2,939 contracts. Just over half (758) of the individual contractors were women, 22 were retirees, 27 were non-retired former staff members aged 60 years or over and 82 were non-retired former staff under age 60. Activities by consultants during the year totalled 10,726 personmonths (97.5 days work per consultant on average) and those by individual contractors totalled 6,034 person-months (121 days work per contractor on average).
- Table 2 (see annex) summarizes the number of persons engaged, the number of contracts awarded, the total number of days worked and total fees, by nationality and contract type, for 2001. Consultants were engaged from 156 countries (four countries more than in 2000); 19 countries accounted for 51.8 per cent of all consultants engaged (Argentina, Australia, Brazil, Canada, Chile, China, Ethiopia, Finland, France, Germany, India, Italy, Kenya, the Netherlands, the Russian Federation, Sweden, Switzerland, the United Kingdom of Great Britain and Northern Ireland and the United States of America). For individual contractors, engagements were from 116 countries (nine countries more than in 2000): in this category, 11 countries accounted for more than two thirds (66.5 per cent) of all engagements (Argentina, Canada, Chile, China, Egypt, Ethiopia, France, Lebanon, Spain, the United Kingdom and the United States). In terms of fees for consultants, nationals from 19 countries accounted for nearly two thirds (64.1 per cent) of the total expenses (Argentina, Australia, Brazil, Canada, Chile, China, Ethiopia, Finland, France, Germany, India, Italy, Kenya, the Netherlands, the Russian Federation, Sweden, Switzerland, the United Kingdom and the United States). For individual contractors, engagements from 11 countries accounted for over two thirds (71.2 per cent) of fees (Argentina, Canada, Chile, China, Ethiopia, France, Kenya, Lebanon, Spain, the United Kingdom and the United States).
- 9. Table 3 (see annex) shows a breakdown of the purpose of engagement of consultants and individual contractors. With consultants, the main purposes of engagement, worldwide, related to administrative services (19.8 per cent), advisory services (14.9 per cent), programme implementation (7.5 per cent) and special analytical studies (5 per cent), among others. For individual contractors, the bulk of engagements related to administrative services (28.2 per cent), the preparation of meetings (3.2 per cent) and to training activities (2.6 per cent).
- 10. Table 4 (see annex) shows the engagement of consultants and individual contractors in terms of the occupational groups that are codified in the Common Classification of Occupational Groups by job family level. With consultants, international trade economists constitute the largest occupational group and comprise 281 persons (3.9 per cent of all occupations). Other occupational groups that are strongly represented among consultants include economists (235 persons, 3.3 per cent), public administration specialists (171 persons, 2.4 per cent), international law specialists (97 persons, 1.3 per cent), political scientists (89 persons, 1.2 per cent) and sociologists (86 persons, 1.2 per cent). For individual

- contractors, the largest occupational group represented is translators and revisers (256 persons, 3.6 per cent). Other relevant groups are contractors for support related work (213 persons, 3 per cent), teachers (195 persons, 2.7 per cent), surveyors (168 persons, 2.3 per cent) and public information related contractors (134 persons, 1.9 per cent).
- 11. Table 5 (see annex) summarizes information on the duration of contracts that began in 2001. The bulk of the contracts were for less than three months (63.7 per cent of the consultants and 67 per cent of the individual contractors). The duration of another 21.9 per cent of consultant contracts and of another 26.8 per cent of individual contractor contracts lasted between three and six months, while 14.4 per cent of consultants and 1.2 per cent of individual contractors had a contract that continued beyond six months, but less than 24 months.
- 12. Table 6 (see annex) summarizes the time actually worked for contracts that commenced in 2001. Just under half of all consultant engagements (44.5 per cent) and of all contractor engagements (45.9 per cent) were for less than one month; 22 per cent of consultant contracts and 17.9 per cent of individual contractor contracts were between one and three months; and 33.5 per cent of consultant contracts and 36 per cent of contractor engagements extended beyond three months up to six months.
- 13. Table 7 (see annex) sets out the use of consultants and individual contractors by department, gender, level of education, duration of contract and evaluation of performance. The departments and offices that made the most use of consultants and individual contractors in 2001 were the Economic Commission for Latin America and the Caribbean (ECLAC) at 20.2 per cent, the Economic Commission for Africa (ECA) at 11.7 per cent, the United Nations Conference on Trade and Development (UNCTAD) at 9 per cent, the Department of Economic and Social Affairs at 8.5 per cent, ESCAP at 5.7 per cent, the United Nations Office at Geneva at 5.8 per cent, and the United Nations Office at Nairobi at 4.1 per cent. All seven entities were more dominant with regard to consultants alone, where they accounted for nearly two thirds (65 per cent) of all persons engaged. The difference in terms of gender between the use of consultants and that of individual contractors did not change much in 2001. Among consultants, women represented 27.1 per cent of persons engaged (compared to 28.2 per cent in 2000), whereas among individual contractors, their representation rose slightly to just over gender parity (50.6 per cent).
- 14. In terms of the educational level of consultants and individual contractors, the 2001 data show that over a third (35.3 per cent) of the persons held a second university degree and over a quarter (20.1 per cent) held a first university degree. More than 29.4 per cent of the persons held an advanced university degree and 6.3 per cent had no university degree. A majority of performance evaluations, 88 per cent, were either good or excellent, with only 2.2 per cent reflecting an acceptable or unsatisfactory performance. In respect of the remainder, performance data is not available.
- 15. Table 8 (see annex) shows fees paid to consultants and individual contractors by source of funding. Data on expenditures are derived from IMIS for Headquarters departments and offices and from individual updates submitted by offices away from Headquarters. In 2001, a total of \$46.9 million was paid in fees to consultants and individual contractors from all sources of funds: this was \$4.96 million more than in 2000 (an overall increase of 11.8 per cent). As indicated in paragraph 6 above,

consultants were paid \$36.6 million (23.9 per cent from the regular budget and 76.1 per cent from extrabudgetary sources) and individual contractors were paid \$10.3 million (49.7 per cent from the regular budget and 50.3 per cent from extrabudgetary sources). Fees paid to consultants engaged by the United Nations Conference on Trade and Development (UNCTAD), the Department of Economic and Social Affairs, the United Nations Office at Nairobi and the Economic Commission for Africa were mainly for technical cooperation projects. The figure for the regional commissions — the Economic Commission for Africa, the Economic Commission for Europe, the Economic Commission for Latin America and the Caribbean, the Economic and Social Commission for Asia and the Pacific, and the Economic and Social Commission for Western Asia — was 14.8 per cent. Over three quarters of the total fees paid to individual contractors in 2001 were accounted for by the Department of Public Information, the Economic Commission for Africa, UNCTAD, the United Nations Office at Nairobi, the United Nations Office at Geneva and the Department of Management.

- 16. Table 9 (see annex) presents aggregate data for each duty station on institutional contractors engaged in 2001. Institutional or corporate contractors are institutions that provide goods or services to the United Nations on a contractual basis (see ST/AI/327). The total expenditure was \$25.5 million in 2001. The \$10 million increase (66 per cent as compared with 2000) can be attributed in part to the improved recording of these types of contracts in IMIS (particularly at Headquarters) and to the inclusion this year of data from the International Tribunal for the Former Yugoslavia. In 2001, 234 more institutional contractors (73.4 per cent) were engaged than in 2000, for 442 more contracts. The largest increases in numbers of contractors, numbers of contracts and duration and expenditure of contracts were at Headquarters, the Economic Commission for Africa, the International Criminal Tribunal for Rwanda, UNCTAD, the United Nations Office at Geneva (including ECE) and the United Nations Office at Nairobi.
- 17. Pursuant to the request of the General Assembly in its resolution 55/258 of 14 June 2002, and in its decision 56/460 of 24 December 2001, and as indicated in the report of the Secretary-General (A/56/834), a study was undertaken by the Secretariat on the question of geographical representation of consultants and individual contractors. The Secretary-General submitted his report on this study to the Committee for Programme and Coordination at its forty-second session (see E/AC.51/2002/3).

Definitions

Professional, managerial and technical work: This group includes occupations concerned with the theoretical or practical aspects of such fields of human endeavour as art, science, engineering, education, medicine, law, business and economics and administrative, managerial and technical work. Most of these are occupations that require substantial academic preparation, usually at the university level.

Support work related to professional, managerial and technical occupations: This group includes occupations concerned with recording, compiling, reviewing and processing data; classifying, filing, retrieving and updating publications, correspondence and other reference materials; providing information; transmitting mail and messages; coordinating meetings and inspections; and carrying out other duties in accordance with established practices and procedures in support of occupations responsible for the management, creation, analysis and presentation of plans and programmes. The occupations included in the support group may also involve the performance of technical work in a specific subject area where practical application rather than theoretical knowledge is required.

Production, service and transport work: This group includes occupations concerned with operating equipment; providing transport services; providing protection against crime, fire and accidents; providing food services; storing, distributing and accounting for materials; fabricating, erecting, installing, paving, painting, repairing and similarly working on structures or structural parts; and using manufactured components and assemblies to produce products. Many of these occupations require the application of the knowledge and physical skills of a craft or trade.

Total	562	854	2 234	25 581

Notes

- 1: Institutional or corporate contractors are institutions or corporations that provide goods or services to the United Nations on a direct contractual basis (ST/AI/327 of 23 January 1985).
- 2: New York/Headquarters includes all Departments and Offices in New York.
- 3: UNOG includes ECE.
- 4: UNOV includes ODCCP.
