I. Mandate performance

- 1. The mandate of the United Nations Transitional Administration in East Timor (UNTAET) was established by the Security Council in its resolution 1272 (1999). The mandate for the performance period was extended by the Council in its resolutions 1338 (2001) and 1392 (2002) until, respectively, 31 January 2002 and 20 May 2002. The successor mission to UNTAET, the United Nations Mission of Support in East Timor (UNMISET), was established by the Council in its resolution 1410 (2002). For the period from 20 May to 30 June 2002, UNMISET was financed from the unencumbered balances of UNTAET at 20 May 2002.
- 2. The Transitional Administration was mandated to help the Security Council achieve an overall objective, namely, to ensure the long-term stability and security of East Timor.
- 3. Within this overall objective, the Transitional Administration, during the performance report period, has contributed to a number of accomplishments by delivering related key outputs, as shown in the frameworks below.
- 4. The frameworks represent an improvement in objective-setting. The 2001/02 budget did not include standard frameworks for planned results, which would have been the baseline against which performance would have been measured and reported. Therefore, the Mission performance data for 2001/02 are presented in a transitional format showing the actual accomplishments and outputs for which information was available against generic indicators and output types rather than against a baseline.

Subtotal	30 000.0
Total	58 626.0

III. Analysis of variances¹

	Variance	
Military observers	\$321.8	6.5%

- 5. The unutilized balance was attributable mainly to savings realized under travel for emplacement, rotation and repatriation of military observers as a result of a lower than anticipated average travel cost charged at \$1,863 per trip instead of \$2,250.
- 6. The unutilized balance was also attributable to the lower actual average number of deployed military observers (117) than budgeted average (120) during the period under review.

	Variance	
Military contingents	\$3,449.6	2.4%

7. The unutilized balance resulted primarily from lower costs for emplacement, rotation and repatriation of military personnel. Both the number of trips and the average cost per trip were reduced during the reporting period. The number of trips was reduced from budgeted 7,939 to 6,792; the average cost per trip was reduced from \$1,200 to \$1,150 by using low-cost charter planes where possible.

	Variance	
Civilian Police	\$1,020.1	2.4%

8. The unutilized balance was due largely to the lower actual average Civilian Police strength of 1,099 during the reporting period, compared to the budgeted average strength of 1,218.

	Variance	
Formed police units	\$525.9	12.6%

9. The unutilized balance was attributable primarily to the lower actual average formed police strength of 220 during the reporting period, compared to the budgeted average strength of 240.

	Variance	
International staff	\$613.2	0.6%

10. The unutilized balance was due mainly to savings under international staff salaries as a result of the international posts filled at lower grade/step levels.

¹ Resource variance amounts are expressed in thousands of United States dollars.

	Variance	Variance	
National staff	\$1,978.8	25.3%	

11. The unutilized balance resulted mainly from the average common staff cost per person at \$374 per year rather than at \$900 budgeted for the period under review.

	Variance	
United Nations Volunteers	(\$2,459.5)	(12.2%)

12. The major part of the additional requirement represented the costs of services during the previous period charged against the financial period under review.

	Variance	
General temporary assistance	(\$94.3)	(13.6%)

13. The additional requirement was due mainly to the fact that the planned contracts for security and cleaning services were not available at reasonable rates and therefore daily paid staff continued to be employed at a higher than budgeted cost.

	Variand	e
Consultants	(\$131.0)	(16.7%)

14. The additional requirement resulted mainly from the hiring of 29 consultants for an average of three and a half months each in the areas of serious crimes, judicial affairs and prison management, and public information.

	Variance	
Facilities and infrastructure	(\$816.3)	(3.1%)

15. The shortfall was attributable mainly to the additional costs for fuel to run the United Nations and contingent-owned generators longer than expected owing to the intermittent and unreliable supply of local electricity.

	Variance	!
Ground transportation	(\$2,082.4)	(38.1%)

16. The additional requirement was due mainly to the increased use of heavy vehicles, which consumed more petrol, oil and lubricants, to carry supplies of rations and water for contingents as a result of the non-availability of barges for heavy naval transportation for four months during contract negotiations with the proposed contractor.

	Variance	
Air transportation	\$3,567.4	6.6%

17. The unutilized balance was largely a result of the reduction in hours flown by helicopters from 12,060 to 11,810.

	Variance	
Naval transportation	\$197.6	27.8%

18. The unutilized balance was attributable mainly to the fact that the proposed barges, which were to be used for heavy lift capability to remote areas of the Mission, were not available for four months during contract negotiations with the proposed contractor (see para. 16).

	Variance	Variance		
Communications	\$484.1	5.0%		

19. The unutilized balance was due mainly to the completion of Electronic Support Section repair workshops within UNTAET. The workshops absorbed the large range of repairs of communications equipment that otherwise would have been contracted out at higher cost.

	Variance	
Information technology	(\$179.5)	(26.0%)

20. The additional requirement was a result of the acquisition of equipment for two unbudgeted information technology projects for the period under review. The projects completed were the installation of a tape library for data back-up and additional network servers to facilitate the migration of data from UNTAET to UNMISET and to make possible the installation of new applications.

_	Variance	
Medical	(\$451.1)	(6.6%)

21. The major part of the additional requirement represented medical bills for two members of the Peacekeeping Force who suffered extensive injuries during the performance of their duties, thus requiring lengthy hospitalization.

	Variance	
Miscellaneous supplies, services and equipment	(\$4,961.7)	(17.6%)

22. The additional requirement is due largely to the higher than expected freight and related costs in connection with the repatriation of an engineering plant from two troop-contributing Governments.

IV. Actions to be taken by the General Assembly

- 23. The actions to be taken by the General Assembly in connection with the financing of UNTAET and UNMISET are:
- (a) A decision on the treatment of the unencumbered balance of \$942,000 with respect to the period from 1 July 2001 to 30 June 2002;
- (b) A decision on the treatment of other income and adjustments for the period ended 30 June 2002, amounting to \$20,680,000 from interest income (\$7,625,000), other/miscellaneous income (\$1,642,000) and savings on or cancellation of prior-period obligations (\$11,413,000).
