## Sixty-eighth session

### Second Committee

Agenda item 19 (i)

#### **Sustainable development: sustainable mountain development**

**Argentina, Guatemala, Italy and Peru: draft resolution**

#### **Sustainable mountain development**

*The General Assembly,*

*Recalling* its resolutions [55/189](#) of 20 December 2000, [57/245](#) of 20 December 2002, [58/216](#) of 23 December 2003, [59/238](#) of 22 December 2004, [60/198](#) of 22 December 2005, [62/196](#) of 19 December 2007, [64/205](#) of 21 December 2009 and [66/205](#) of 22 December 2011,

*Reaffirming* chapter 13 of Agenda 21 and all relevant paragraphs of the Plan of Implementation of the World Summit on Sustainable Development (“Johannesburg Plan of Implementation”), in particular paragraph 42 thereof, as the overall policy frameworks for sustainable development in mountain regions,

*Reaffirming also* the outcome document of the United Nations Conference on Sustainable Development, entitled “The future we want”, inter alia the commitments concerning the sustainable development of mountains,

*Recognizing* that the benefits derived from mountain regions are essential for sustainable development and that mountain ecosystems play a crucial role in providing water resources to a large portion of the world’s population,

*Recognizing also* that fragile mountain ecosystems are particularly vulnerable to the adverse impacts of climate change, deforestation and forest degradation, land use change, land degradation and natural disasters, and that mountain glaciers around the world are retreating and getting thinner,

*Acknowledging* that despite the progress that has been made in promoting the sustainable development of mountain regions and the conservation of mountain ecosystems, including their biodiversity, poverty, food insecurity, social exclusion and environmental degradation are still high,

*Noting* the International Partnership for Sustainable Development in Mountain Regions (“Mountain Partnership”), launched during the World Summit on Sustainable Development, with benefits from the committed support of 52 countries,

one intergovernmental organization and 15 organizations from major groups, as an important multi-stakeholder approach to addressing the various interrelated dimensions of sustainable development in mountain regions,

1. *Takes note* of the report of the Secretary-General;<sup>1</sup>
2. *Urges* States to redouble their efforts to adopt a long-term vision and holistic approaches by incorporating mountain-specific policies into national sustainable development strategies and poverty reduction plans;
3. *Calls for* greater efforts by States, all stakeholders and the international community towards the conservation of mountain ecosystems and the preservation of the well-being of their local populations, taking into account the extent of the current challenges they face and bearing in mind the increased economic, social and environmental costs that inaction might represent for countries and societies;
4. *Expresses its deep concern* at the number and scale of natural disasters and their increasing impact in recent years, which have resulted in massive loss of life and long-term negative social, economic and environmental consequences for vulnerable societies throughout the world, in particular in mountain regions, especially those in developing countries, and urges the international community to take concrete steps to support national and regional efforts to ensure the sustainable development of mountains;
5. *Encourages* States to develop and improve disaster risk management and resilience strategies in mountain areas to cope with such extreme events and impacts of climate change and deforestation as rockfalls, avalanches, glacial lake outburst floods and landslides;
6. *Calls for* the further development of climate change adaptation and mitigation strategies that take into account the specific situation of mountain environments and communities, and the integration of those strategies into the national adaptation programmes of action process of the United Nations Framework Convention on Climate Change;
7. *Underlines* the fact that action at the national level is a key factor in achieving progress in sustainable mountain development, welcomes its steady increase in recent years with a multitude of events, activities and initiatives, and invites the international community to support the efforts of developing countries to develop and implement strategies and programmes, including, where required, enabling policies and laws for the sustainable development of mountains, within the framework of national development plans;
8. *Encourages* the further undertaking of multi-stakeholder and transboundary initiatives at the national and regional levels, such as those supported by the Food and Agriculture Organization of the United Nations, the United Nations Development Programme, the United Nations Environment Programme, the United Nations Educational, Scientific and Cultural Organization, the World Bank and the Global Environment Facility, the regional development banks, and international organizations in Africa, Asia, Europe, the Middle East and Latin America, to enhance sustainable development in mountain regions;

---

<sup>1</sup> A/68/307.

9. *Stresses* that indigenous peoples, traditions and knowledge, including in the field of medicine, are to be fully considered, respected and promoted in development policy, strategies and programmes in mountain regions, and underlines the need to promote the full participation and involvement of mountain communities in decisions that affect them and to integrate indigenous knowledge, heritage and values in all development initiatives;

10. *Welcomes* decision X/30 adopted by the Conference of the Parties to the Convention on Biological Diversity at its tenth meeting, in which the parties noted with appreciation the progress made by the Global Mountain Biodiversity Assessment, and invites parties, other Governments and stakeholders to take specific actions for the conservation, sustainable use and benefit-sharing of mountain biological diversity;

11. *Welcomes* the growing contribution of sustainable tourism initiatives in mountain regions as a way to enhance environmental protection and socioeconomic benefits to local communities, and the fact that consumer demand is increasingly moving towards responsible and sustainable tourism;

12. *Notes* that public awareness needs to be raised with respect to the positive and unaccounted economic benefits that mountains provide not only to highland communities but also to a large portion of the world's population living in lowland areas, and underlines the importance of enhancing the sustainability of ecosystems that provide essential resources and services for human well-being and economic activity and of developing innovative means of financing for their protection;

13. *Urges* Member States to increase efforts to address poverty, food security and nutrition, social exclusion and environmental degradation in mountain areas, so as to improve the lives of the local communities and contain their abandonment of and migration from those areas, which is detrimental to the conservation of watershed and other vital ecosystem services and the preservation of sustainable uses of mountain resources;

14. *Encourages* Member States to collect at the local, national and regional level, as appropriate, disaggregated scientific data on mountain areas through systematic monitoring, including of trends of progress and change, based on relevant criteria, to support interdisciplinary research programmes and projects and to improve decision-making and planning;

15. *Encourages* all relevant entities of the United Nations system, within their respective mandates, to further enhance their constructive efforts to strengthen inter-agency collaboration to achieve more effective implementation of the relevant chapters of Agenda 21, including chapter 13, and paragraph 42 and other relevant paragraphs of the Johannesburg Plan of Implementation, and the relevant paragraphs of the outcome document of the United Nations Conference on Sustainable Development, entitled "The future we want", taking into account the need for the further involvement of the United Nations system, in particular the Food and Agriculture Organization of the United Nations, the United Nations Environment Programme, the United Nations University, the United Nations Development Programme, the United Nations Educational, Scientific and Cultural Organization and the United Nations Children's Fund, as well as international financial institutions and other relevant international organizations;

16. *Notes with appreciation*, in this context, the International Convention for the Protection of the Alps, which promotes constructive new approaches to the integrated, sustainable development of the Alps;

17. *Recognizes* that mountain ranges are usually shared among several countries, and in this context encourages transboundary cooperation approaches where the States concerned agree to the sustainable development of mountain ranges and information-sharing in this regard;

18. *Encourages* States and all stakeholders to consider mountain-related issues in the elaboration of the sustainable development goals and the post-2015 United Nations development agenda;

19. *Requests* the Secretary-General to report to the General Assembly at its seventieth session on the implementation of the present resolution under the sub-item entitled “Sustainable mountain development” of the item entitled “Sustainable development”.
