913 (X). Effects of atomic radiation

The General Assembly,

Recognizing the importance of, and the widespread attention being given to, problems relating to the effects of ionizing radiation upon man and his environment,

Believing that the widest distribution should be given to all available scientific data on the short-term and long-term effects upon man and his environment of ionizing radiation, including radiation levels and radio-active "fall-out",

Noting that studies of this problem are being conducted in various countries,

Believing that the peoples of the world should be more fully informed on this subject,

1. *Establishes* a scientific Committee consisting of Argentina, Australia, Belgium, Brazil, Canada, Czechoslovakia, Egypt, France, India, Japan, Mexico, Sweden, the United Kingdom of Great Britain and Northern Ireland, the United States of America and the Union of Soviet Socialist Republics, and requests the Governments of these countries each to designate one scientist, with alternates and consultants as appropriate, to be its representative on this Committee;

2. *Requests* the Committee:

(a) To receive and assemble in an appropriate and useful form the following radiological information furnished by States Members of the United Nations or members of the specialized agencies:

(i) Reports on observed levels of ionizing radiation and radio-activity in the environment;

(ii) Reports on scientific observations and experiments relevant to the effects of ionizing radiation upon man and his environment already under way or later undertaken by national scientific bodies or by authorities of national Governments;

(b) To recommend uniform standards with respect to procedures for sample collection and instrumentation, and radiation counting procedures to be used in analyses of samples;

(c) To compile and assemble in an integrated manner the various reports, referred to in sub-paragraph (a) (i) above, on observed radiological levels;

(d) To review and collate national reports, referred to in sub-paragraph (a) (ii) above, evaluating each report to determine its usefulness for the purposes of the Committee;

(e) To make yearly progress reports and to develop by 1 July 1958, or earlier if the assembled facts warrant, a summary of the reports received on radiation levels and radiation effects on man and his environment together with the evaluations provided for in sub-paragraph (d) above and indications of research projects which might require further study;

(f) To transmit from time to time, as it deems appropriate, the documents and evaluations referred to above to the Secretary-General for publication and dis-

semination to States Members of the United Nations or members of the specialized agencies;

3. *Requests* the Secretary-General to provide the Committee with appropriate assistance in organizing and carrying on its work, and to provide a secretary of the Committee;

4. *Calls upon* all concerned to co-operate in making available reports and studies relating to the short-term and long-term effects of ionizing radiation upon man and his environment and radiological data collected by them;

5. *Requests* the specialized agencies to concert with the Committee concerning any work they may be doing or contemplating within the sphere of the Committee's terms of reference to assure proper co-ordination;

6. *Requests* the Secretary-General to invite the Government of Japan to nominate a scientist, with alternates and consultants as appropriate, to be its representative on the Committee;

7. *Decides* to transmit to the Committee the records of the proceedings of the General Assembly on the present item.

*550th plenary meeting,
3 December 1955.*

914 (X). Regulation, limitation and balanced reduction of all armed forces and all armaments; conclusion of an international convention (treaty) on the reduction of armaments and the prohibition of atomic, hydrogen and other weapons of mass destruction

The General Assembly,

Recalling its resolution 808 (IX) of 4 November 1954, which established the conclusion that a further effort should be made to reach agreement on comprehensive and co-ordinated proposals to be embodied in a draft international disarmament convention providing for:

(a) The regulation, limitation and major reduction of all armed forces and all conventional armaments,

(b) The total prohibition of the use and manufacture of nuclear weapons and weapons of mass destruction of every type, together with the conversion of existing stocks of nuclear weapons for peaceful purposes,

(c) The establishment of effective international control, through a control organ with rights, powers and functions adequate to guarantee the effective observance of the agreed reductions of all armaments and armed forces and the prohibition of nuclear and other weapons of mass destruction, and to ensure the use of atomic energy for peaceful purposes only,

the whole programme to be such that no State would have cause to fear that its security was endangered,

Expressing the hope that efforts to relax international tensions, to promote mutual confidence and to develop co-operation among States, such as the Geneva Conference of the Heads of Government of the four Powers, the Bandung Conference of African and Asian countries and the United Nations tenth anniversary commemorative meeting at San Francisco, will prove effective in promoting world peace,

Desirous of contributing to the lowering of international tensions, the strengthening of confidence between

States, the removal of the threat of war and the reduction of the burden of armaments,

Convinced therefore of the need to continue to seek agreement on a comprehensive programme for disarmament which will promote international peace and security with the least diversion for armaments of the world's human and economic resources,

Welcoming the progress which has been made towards agreement on objectives during the meetings in 1955 of the Sub-Committee of the Disarmament Commission,

Noting that agreement has not yet been reached on the rights, powers and functions of a control system, which is the keystone of any disarmament agreement, nor on other essential matters set out in General Assembly resolution 808 (IX),

Noting also that special technical difficulties have arisen in regard to the detection and control of nuclear weapons material,

Recognizing further that inspection and control of disarmament can best be achieved in an atmosphere which is free of fear and suspicion,

1. *Urges* that the States concerned and particularly those on the Sub-Committee of the Disarmament Commission:

(a) Should continue their endeavours to reach agreement on a comprehensive disarmament plan in accordance with the goals set out in General Assembly resolution 808 (IX);

(b) Should, as initial steps, give priority to early agreement on and implementation of:

(i) Such confidence-building measures as the plan of Mr. Eisenhower, President of the United States of America, for exchanging military blueprints and mutual aerial inspection, and the plan of Mr. Bulganin, Prime Minister of the Union of Soviet Socialist Republics, for establishing control posts at strategic centres,

(ii) All such measures of adequately safeguarded disarmament as are now feasible;

2. *Suggests* that account should also be taken of the proposals of the Prime Minister of France for exchanging and publishing information regarding military expenditures and budgets, of the Prime Minister of the United Kingdom of Great Britain and Northern Ireland for seeking practical experience in the problems of in-

spection and control, and of the Government of India regarding the suspension of experimental explosions of nuclear weapons and an "armaments truce";

3. *Calls upon* the States concerned, and especially those on the Sub-Committee of the Disarmament Commission, to study the proposal of the Prime Minister of France for the allocation of funds resulting from disarmament for improving the standards of living throughout the world and, in particular, in the less-developed countries;

4. *Recommends further* that scientific search should be continued by each State, with appropriate consultation between Governments, for methods that would make possible thoroughly effective inspection and control of nuclear weapons material, having as its aim to facilitate the solution of the problem of comprehensive disarmament;

5. *Suggests* that the Disarmament Commission reconvene its Sub-Committee and that both pursue their efforts to attain the above objectives;

6. *Decides* to transmit to the Disarmament Commission, for its information, the records of the meetings of the First Committee at which the disarmament problem was discussed during the tenth session of the General Assembly, and requests the Disarmament Commission and the Sub-Committee to give careful and early consideration to the views expressed in those documents.

*559th plenary meeting,
16 December 1955.*

915 (X). The question of West Irian (West New Guinea)

The General Assembly,

Having considered the item on the agenda of its tenth session entitled "The question of West Irian (West New Guinea)",

Hoping that the problem will be peacefully resolved,

Noting the joint statement issued by the Governments of Indonesia and the Netherlands on 7 December 1955,

Expresses the hope that the negotiations referred to in the said joint statement will be fruitful.

*559th plenary meeting,
16 December 1955.*
