New York, 2-27 May 2005

Establishment of a nuclear-weapon-free zone in the Middle East

Report submitted by the Islamic Republic of Iran

In accordance with subparagraph 7 of paragraph 16 (regional issues) of the section of the Final Document of the 2000 Review Conference concerning article VII of the Treaty, which deals with steps to promote the achievement of a nuclear-weapon-free zone in the Middle East and the realization of the goals and objectives of the 1995 Resolution on the Middle East, the Islamic Republic of Iran reports the following:

1. Iran first initiated the idea of the establishment of a nuclear-weapon-free zone as an important disarmament measure in the region of the Middle East in 1974, followed by the resolution of the United Nations General Assembly. Since 1980, the General Assembly of the United Nations has annually adopted, by consensus, a resolution on this issue. Continuous adoption of this resolution at the General Assembly is the manifestation of the global support for the promotion of peace, security and stability in the Middle East through the realization of a nuclear-weapon-free zone in the region.
2. As a State Party to the Treaty on the Non-Proliferation of Nuclear Weapons, the Islamic Republic of Iran is fully committed to its international undertakings and believes that this international instrument is the cornerstone of nuclear disarmament and non-proliferation. Universal adherence to this Treaty, in particular in the region of the Middle East, would effectively ensure the establishment of a nuclear-weapon-free zone in the region. At present, Israel is the only non-party to the Treaty on the Non-Proliferation of Nuclear Weapons in the region. Despite repeated calls by the international community demonstrated in the Resolution on the Middle East, adopted by the 1995 Review and Extension Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons, related resolutions of the General Assembly as well as of the IAEA and the Organization of the Islamic Conference (OIC), Israel, confident of the political and military support of the United States, has neither acceded to the Treaty on the Non-Proliferation of Nuclear Weapons, nor placed its unwarranted nuclear facilities under IAEA full-scope safeguards. Israel has not even declared its intention to accede to the Treaty. Israel's clandestine nuclear activities, with the support of the United States, seriously threaten both regional peace and security and endanger the non-proliferation regime.

3. The 2000 Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons reaffirmed the importance of the 1995 Resolution on the Middle East. Owing to the significant provisions of this resolution, the Islamic Republic of Iran and other States in the region truly expect that this resolution will be swiftly implemented, especially by its sponsors, the Russian Federation, the United States of America and the United Kingdom of Great Britain and Northern Ireland, as depositaries of the Treaty on the Non-Proliferation of Nuclear Weapons.

4. Unconditional adherence by Israel to the Treaty on the Non-Proliferation of Nuclear Weapons and conclusion of a full-scope safeguard agreement with the IAEA would, undoubtedly, lead to the early realization of a nuclear-weapon-free zone in the Middle East. Neglecting the commitments undertaken by States parties to the Treaty on the Non-Proliferation of Nuclear Weapons, with the adoption of this important resolution can only embolden Israel to continue to remain a source of threat and instability in the Middle East by flouting the wishes of the international community and remaining outside of the fold of the Treaty on the Non-Proliferation of Nuclear Weapons and the full-scope safeguards regime. In this context, we believe that national reports that do not address the negative implications of Israel's intransigence to join the Treaty on the Non-Proliferation of Nuclear Weapons, like the one presented by Australia in the third session of the Preparatory Committee (NPT/CONF.2005/PC.III/8), are not as effective as they ought to be with regard to the 1995 Resolution on the Middle East.

5. In implementing its obligations under the Treaty on the Non-Proliferation of Nuclear Weapons, and specifically articles II and III of the Treaty, the Islamic Republic of Iran states that all its nuclear facilities are devoted to peaceful purposes and are under the full-scope safeguards of the IAEA. Furthermore, to contribute to the realization of a world free from weapons of mass destruction, particularly in the Middle East, Iran has signed the Comprehensive Test Ban Treaty and the Additional Protocol to its Comprehensive Safeguards Agreement with the IAEA. It has also ratified the Chemical Weapons Convention, Biological Weapons Convention and the 1925 Geneva Protocol. Iran's high record of accession, among the Middle East countries, to the non-proliferation and disarmament instruments is not only a clear manifestation of our firm commitment to the cause of disarmament and non-proliferation, but is also evidence of our dedicated efforts towards the noble goal of a nuclear-weapon-free zone in the Middle East.

6. The Islamic Republic of Iran, in its bilateral and multilateral disarmament dialogues with other States parties to the Treaty, in particular with some nuclear-weapon States and members of the European Union, as well as in the joint statement of 21 October 2003 issued by Iran and the Foreign Ministers of France, Germany and the United Kingdom, has always urged their active contribution towards the establishment of a nuclear-weapon-free zone in the region of the Middle East.

7. The Islamic Republic of Iran is of the firm belief that an agreed plan of action and timetable for the universality of the Treaty on the Non-Proliferation of Nuclear Weapons, especially in the Middle East, should be a top priority on the agenda of all parties to the Treaty on the Non-Proliferation of Nuclear Weapons, in particular nuclear-weapon States. There should be greater pressure on Israel to accede to the Treaty on the Non-Proliferation of Nuclear Weapons, promptly and without conditions, and to place all of its nuclear facilities under the IAEA full-scope

safeguards to pave the way for the long-sought goal of the establishment of a nuclear-weapon-free zone in the Middle East.

8. The Islamic Republic of Iran is of the opinion that, pending the realization of a nuclear-weapon-free zone in the region, no country of the region should develop, produce, test or otherwise acquire nuclear weapons or permit the stationing, on their territories or on territories under their control, of nuclear weapons or nuclear explosive devices, and they should refrain from action that runs counter to both the letter and the spirit of the Treaty on the Non-Proliferation of Nuclear Weapons and other international resolutions and documents relating to the establishment of a nuclear-weapon-free zone in the Middle East.

9. The Islamic Republic of Iran believes that the Conferences to review the Treaty on the Non-Proliferation of Nuclear Weapons have a significant role in the realization of a nuclear-weapon-free zone in the Middle East. The Review Conference of 2005 should establish a subsidiary body under Main Committee II to consider this issue and make concrete recommendations on urgent and practical steps for the implementation of the 1995 Resolution on the Middle East adopted by the 1995 Review and Extension Conference, as well as the Final Document of the 2000 Review Conference.
