Tema 10 del programa provisional

**Examen de la aplicación de la Convención
según lo dispuesto en su artículo XII**

**PROPUESTA DE MODIFICACIÓN DEL MODELO DE LOS
FORMULARIOS DE LAS MEDIDAS DE
FOMENTO DE LA CONFIANZA**

Presentada por Suiza

I. OBJETO DEL PRESENTE DOCUMENTO DE TRABAJO

1. Las medidas de fomento de la confianza fueron introducidas en la Segunda Conferencia de Examen de la Convención, celebrada en 1986. En la Tercera Conferencia de Examen, celebrada en 1991, se ampliaron y revisaron los formularios de las medidas de fomento de la confianza. Desde entonces no se han introducido modificaciones ni en el fondo ni en la forma de estas medidas. Durante la Sexta Conferencia de Examen se han examinado las medidas de fomento de la confianza, y la opinión general es que la cuestión merece que se le preste más atención y de manera más global. Suiza tomó nota, además, de las declaraciones formuladas durante la Sexta Conferencia de Examen en el sentido de que los actuales formularios planteaban dificultades técnicas a algunos Estados Partes, por lo que el presente documento se centra específicamente en la modificación del formato de dichos formularios.

2. Suiza considera que si cumplimentar los formularios fuese más sencillo se favorecería el que más Estados Partes presentasen información periódicamente, y aumentaría la calidad, precisión y exhaustividad de esa información. Asimismo, Suiza cree que los formularios propuestos ayudarían a reducir al mínimo las ambigüedades.

3. A fin de ofrecer a los Estados Partes una base para sus deliberaciones en el período previo al inicio de la Séptima Conferencia de Examen, Suiza presenta una serie completa de formularios. Se ha revisado el formato de los formularios teniendo en cuenta también las sugerencias hechas por otros Estados Partes durante esta Conferencia. Aunque se han introducido pequeños cambios de redacción, el contenido de lo acordado en la Tercera Conferencia de Examen se mantiene tal cual.

II. FORMULARIOS PROPUESTOS EN RELACIÓN CON LAS MEDIDAS DE FOMENTO DE LA CONFIANZA

4. Los formularios propuestos que se someten a la consideración de los Estados Partes figuran en los anexos (en inglés únicamente).

Anexo I Formulario 0 (formulario de declaración sobre "nada que declarar" o "nada nuevo que declarar")

Anexo II Formularios 1 a 9 (referentes a las medidas de fomento de la confianza A a G)

Anexo III Instrucciones de uso (donde figuran explicaciones, modalidades y definiciones de referencia, según lo convenido en la Tercera Conferencia de Examen).

III. ACTIVIDADES FUTURAS

5. Suiza alienta a los Estados Partes a someter a consideración los formularios propuestos, a entablar un intercambio de opiniones fructífero, y a aprobar con prontitud las mejoras realizadas en los formularios.

6. Suiza está dispuesta a seguir mejorando los formularios a partir de las observaciones de los Estados Partes, e invita a éstos a comunicar sus opiniones durante el período previo al inicio de la Séptima Conferencia de Examen.

Form 0

**Confidence Building Measures
Nothing to declare or Nothing new to declare**

0. A declaration on Nothing to declare or Nothing new to declare

This Form 0, in accordance with the agreement by States Party to the Convention at the Third Review Conference, contains all declarations on Nothing to declare or Nothing new to declare for the subsequent paragraphs 1 to 9.

In addition it guides through the declaration process and indicates what question needs to be addressed next.

Confidence-Building Measure A: Research centres, laboratories and national biological defence programmes:

1. - Part 1: Research centres and laboratories;
2. - Part 2: National biological defence research and development programmes.

Confidence-building measure B: Outbreaks of infectious diseases and similar occurrences caused by toxins:

3. - Part 1: Background information on outbreaks of reportable infectious diseases;
4. - Part 2: Outbreaks of infectious diseases and similar occurrences that seem to deviate from the normal pattern.

5. Confidence-building measure C: Encouragement of publication of results and promotion of use of knowledge.

6. Confidence-building measure D: Active promotion of contacts.

7. Confidence-building measure E: Legislation, regulations and other measures.

8. Confidence-building measure F: Past activities in offensive and/or defensive biological research and development programmes.

9. Confidence-building measure G: Vaccine production facilities.

**USER MANUAL FOR FILLING IN
SUBMISSION FORMS**

Introduction

1. This user manual is intended to provide the individual(s) tasked with the completion of the CBM Forms with the necessary information to do so in an efficient manner. The manual contains modalities, explanations, definitions and footnotes that are contained in the forms agreed to by the Third and Fourth Review Conferences, respectively.

2. The structure and logic of the revised CBM forms is as follows: Form 0 is the starting point of each annual reporting. Form 0 asks whether there is anything to be declared and, if so, on which of the forms 1 to 9 the information has to be filled in. Forms 1 to 9 then cover the substantive part of the CBM and upon completion will indicate where on Form 0 to continue.

Form 0: A declaration on Nothing to declare or Nothing new to declare

Form 1: Confidence-building Measure A: Research centres, laboratories and national biological defence programmes:

Part 1: Research centres and laboratories.

Form 2: Confidence-Building Measure A: Research centres, laboratories and national biological defence programmes:

Part 2: National biological defence research and development programmes.

Form 3: Confidence-building measure B: Outbreaks of infectious diseases and similar occurrences caused by toxins:

Part 1: Background information on reportable infectious diseases.

Form 4: Confidence-building measure B: Outbreaks of infectious diseases and similar occurrences caused by toxins:

Part 2: Outbreaks of infectious disease and similar occurrences, that seem to deviate from the normal pattern.

Form 5: Confidence-building measure C: Encouragement of publication of results and promotion of use of knowledge.

Form 6: Confidence-building measure D: Active promotion of contacts.

Form 7: Confidence-building measure E: Legislation, regulations and other measures.

Form 8: Confidence-building measure F: Past activities in offensive and/or defensive biological research and development programmes.

Form 9: Confidence-building measure G: Vaccine production facilities.

CONFIDENCE-BUILDING MEASURES

Form 0: Nothing to declare or Nothing new to declare

3. Form 0 asks for Confidence-Building Measures A to G whether the State Party has nothing at all or nothing new to declare.
4. If that is the case for any of the CBMs A to G, it is not necessary to go to the respective form but to continue with the subsequent questions on Form 0. If any question indicates that there is information to be submitted, Form 0 indicates on which of the Forms 1 to 9 the information is to be filled in. Upon completion of any of the Forms 1 to 9, these forms indicate where on Form 0 to continue with the process.
5. The set forms leads through the whole process in an easily understandable way and increase the internal consistency of the compiled set of forms.
6. Question 19 on Form 0 indicates to where the completed Form 0 and any of the Forms 1 to 9 (as applicable) are to be submitted.

CONFIDENCE-BUILDING MEASURE A

Form 1: Part 1: Research centres and laboratories

7. At the Third Review Conference it was agreed that States Parties continue to implement the following:

An exchange of data, including name, location, scope and general description of activities, on research centres and laboratories that meet very high national or international safety standards established for handling, for permitted purposes, biological materials that pose a high individual and community risk or specialize in permitted biological activities directly related to the Convention.

Modalities:

8. The Third Review Conference agreed data should be provided by States Parties on each facility, within their territory or under their jurisdiction or control anywhere, which has any maximum containment laboratories meeting those criteria for such maximum containment laboratories as specified in the 1983 WHO Laboratory Biosafety Manual such as those designated as biosafety level 4 (BL4) or P4 or equivalent standards.

Footnotes to Form 1:

- To the title of Part 1: The containment units which are fixed patient treatment modules, integrated with laboratories, should be identified separately.
- To the name of Facility: Facilities with maximum containment units participating in the national biological defence research and development programme, please fill in name of facility and mark “Declared in accordance with Form 2 (CBM A, part 2 (iii))”.
- To maximum containment units: In accordance with the 1983 WHO Laboratory Biosafety Manual, or equivalent.
(currently valid version is the 2004 WHO Laboratory Biosafety Manual, ISBN 92 4 154650 6 (LC/NLM classification: QY 25) WHO/CDS/CSR/LYO/2004.11)

Form 2: Part 2: National biological defence research and development programmes

9. At the Third Review Conference it was agreed that States Parties are to implement the following:

In the interest of increasing the transparency of national research and development programmes on biological defence, the States Parties will declare whether or not they conduct such programmes. States Parties agreed to provide, annually, detailed information on their biological defence research and development programmes including summaries of the objectives and costs of effort performed by contractors and in other facilities. If no biological defence research and development programme is being conducted, a null report will be provided.

States Parties will make declarations in accordance with the attached forms, which require the information in accordance with Form 2.

CONFIDENCE-BUILDING MEASURE B

Form 3: Part 1: Background information on outbreaks of reportable infectious diseases

Form 4: Part 2: Outbreaks of infectious diseases and similar occurrences that seem to deviate from the normal pattern

10. At the Third Review Conference it was agreed that States Parties continue to implement the following:

An exchange of information on outbreaks of infectious diseases and similar occurrences caused by toxins, and on all such events that seem to deviate from the normal pattern as regards type, development, place, or time of occurrence. The information provided on events that deviate from the norm will include, as soon as it is available, data on the type of disease, approximate area affected, and number of cases.

Modalities:

11. The Third Review Conference agreed the following definition:

An Outbreak or Epidemic is the occurrence of an unusually large or unexpected number of cases of an illness or health-related event in a given place at a given time. The number of cases considered as unusual will vary according to the illness or event and the community concerned.

Furthermore, reference was made to the following definition:

An epidemic of infectious disease is defined as the occurrence of an unusually large or unexpected number of cases of a disease known or suspected to be of infectious origin, for a given place and time. It is usually a rapidly evolving situation, requiring a rapid response. (WHO internal document CDS/Mtg/82.1)

The occurrence in a community or region of cases of an illness, specific health-related behaviour, or other health-related events clearly in excess of normal expectancy. The community or region, and the time period in which the cases occur, are specified precisely. The number of cases indicating the presence of an epidemic will vary according to the agent, size and type of population exposed, previous experience or lack of exposure to the disease, and time and place of occurrence: epidemicity is thus relative to usual frequency of the disease in the same area, among the specified population, at the same season of the year. A single case of a communicable disease long absent from a population or first invasion by a disease not previously recognized in that area requires immediate reporting and full field investigation: two cases of such a disease associated in time and place may be sufficient evidence to be considered an epidemic. (J.M. Last, A Dictionary of Epidemiology, Oxford University Press, New York, Oxford, Toronto, 1983.)

12. The Third Review Conference agreed on the following:

- In determining what constitutes an outbreak States Parties are recommended to take guidance from the above;
- Since no universal standards exist for what might constitute a deviation from the normal pattern, States Parties agreed to utilize fully existing national reporting systems on human diseases as well as animal and plant diseases, where possible, and systems within the WHO to provide annual update, using Form 3, of background information on diseases caused by organisms which meet the criteria for risk groups II, III and IV according to the classification in the 1983 WHO Laboratory Biosafety Manual, the occurrence of which, in their respective areas, does not necessarily constitute a deviation from normal patterns;
- Exchange of data on outbreaks that seem to deviate from the normal pattern is considered particularly important in the following cases:

- When the cause of the outbreak cannot be readily determined or the causative agent is difficult to diagnose (It is understood that this may include organisms made pathogenic by molecular biology techniques, such as genetic engineering);
 - When the disease may be caused by organisms which meet the criteria for risk groups III or IV, according to the classification in the 1983 WHO Laboratory Biosafety Manual;
 - When the causative agent is exotic to a given region;
 - When the disease follows an unusual pattern of development;
 - When the disease occurs in the vicinity of research centres and laboratories subject to exchange of data under item A;
 - When suspicions arise of the possible occurrence of a new disease.
- In order to enhance confidence, an initial report of an outbreak of an infectious disease or a similar occurrence that deviate from the normal pattern should be given promptly after cognizance of the outbreak and should be followed up by annual reports. To enable States Parties to follow a standardized procedure, the Conference has agreed that Form 4 should be used, to the extent information is known and/or applicable, for the exchange of initial as well as annual information.
 - In order to improve international cooperation in the field of peaceful bacteriological (biological) activities and in order to prevent or reduce the occurrence of ambiguities, doubts and suspicions, States Parties are encouraged to invite experts from other States Parties to assist in the handling of an outbreak, and to respond favourably to such invitations.

Footnotes to Form 2:

- To Deviation from normal patterns: This information should be provided in accordance with Form 2 (CBM B, part 1)
- To Causative Agent: It is understood that this may include organisms made pathogenic by molecular biology technique, such as genetic engineering.

CONFIDENCE-BUILDING MEASURE C

Form 5: Encouragement of publication of results and promotion of use of knowledge

13. At the Third Review Conference it was agreed that States parties continue to implement the following:

Encouragement of publication of results of biological research directly related to the Convention, in scientific journals generally available to States parties, as well as promotion of use for permitted purposes of knowledge gained in this research.

Modalities:

14. The Third Review Conference agreed on the following:

- It is recommended that basic research in biosciences, and particularly that directly related to the Convention should generally be unclassified and that applied research to the extent possible, without infringing on national and commercial interests, should also be unclassified.
- States parties are encouraged to provide information on their policy as regards publication of results of biological research, indicating, *inter alia*, their policies as regards publication of results of research carried out in research centres and laboratories subject to exchange of information under item A and publication of research on outbreaks of diseases covered by item B, and to provide information on relevant scientific journals and other relevant scientific publications generally available to States parties.
- The Third Review Conference discussed the question of cooperation and assistance as regards the safe handling of biological material covered by the Convention. It concluded that other international forums were engaged in this field and expressed its support for efforts aimed at enhancing such cooperation.

CONFIDENCE-BUILDING MEASURE D

Form 6: Active promotion of contacts

15. At the Third Review Conference it was agreed that States parties continue to implement the following:

Active promotion of contacts between scientists, other experts and facilities engaged in biological research directly related to the Convention, including exchanges and visits for joint research on a mutually agreed basis.

Modalities:

16. The Third Review Conference agreed on the following:

In order to actively promote professional contacts between scientists, joint research projects and other activities aimed at preventing or reducing the occurrence of ambiguities, doubts and suspicions and at improving international cooperation in the field of peaceful bacteriological (biological) activities, States parties are encouraged to provide information, to the extent possible:

- On planned international conferences, seminars, symposia and similar events dealing with biological research directly related to the Convention;
- On other opportunities for exchange of scientists, joint research or other measures to promote contacts between scientists engaged in biological research directly related to the Convention.

CONFIDENCE-BUILDING MEASURE E

Form 7: Legislation, regulations and other measures

17. At the Third Review Conference the States parties agreed to implement the following:

As an indication of the measures which they have taken to implement the Convention, States parties shall declare whether they have legislation, regulations or other measures:

- (a) to prohibit the development, production, stockpiling, acquisition or retention of microbial or other biological agents, or toxins, weapons, equipment and means of delivery, specified in Article I of the Convention, within their territory or anywhere under their jurisdiction or control;
- (b) in relation to the export or import of micro-organisms pathogenic to man, animals and plants or of toxins in accordance with the Convention;

States parties shall complete the attached form (Form E) and shall be prepared to submit copies of the legislation or regulations, or written details of other measures on request to the United Nations Department for Disarmament Affairs or to an individual State party. On an annual basis States parties shall indicate, also on the attached form, whether or not there has been any amendment to their legislation, regulations or other measures.

Footnote to Form 7:

- To Import and Export of micro-organisms: Micro-organisms pathogenic to man, animals and plants in accordance with the convention.

CONFIDENCE-BUILDING MEASURE F

Form 8: Past activities in offensive and/or defensive biological research and development programmes

18. At the Third Review Conference it was agreed that States Parties:

In the interest of increasing transparency and openness, shall declare whether or not they conducted any offensive and/or defensive biological research and development programmes since 1 January 1946.

CONFIDENCE-BUILDING MEASURE G

Form 9: Vaccine production facilities

19. At the Third Review Conference it was agreed that States Parties:

To further increase the transparency of biological research and development related to the Convention and to broaden scientific and technical knowledge as agreed in Article X, will declare all facilities, both governmental and non-governmental, within its territory or under its jurisdiction or control anywhere, producing vaccines licensed by the State party for the protection of humans.
