Strategic Approach
to International
Chemicals Management

Distr.: General
21 July 2006

Original: English

**African regional meeting on the Strategic Approach
to International Chemicals Management**
Cairo, 11–14 September 2006

Texts of the Strategic Approach to International Chemicals Management (SAICM) and resolutions of the International Conference on Chemicals Management at its first session

Note by the secretariat

The secretariat has the honour to circulate, in the annex to the present note, the texts of the Strategic Approach to International Chemicals Management (SAICM) and the resolutions of the International Conference on Chemicals Management (ICCM) adopted at its first session, for the information of participants in the African regional meeting on SAICM.

Annex

Strategic Approach to International Chemicals Management (SAICM)

SAICM texts comprising the Dubai Declaration
on International Chemicals Management,
the Overarching Policy Strategy
and the Global Plan of Action

Resolutions of the International Conference
on Chemicals Management

At its first session, held in Dubai, United Arab Emirates, from 4 to 6 February 2006, the International Conference on Chemicals Management adopted the Dubai Declaration on International Chemicals Management and the Overarching Policy Strategy. The Conference also recommended the use and further development of the Global Plan of Action as a working tool and guidance document. Together these three documents constitute the Strategic Approach to International Chemicals Management.

The first session of the Conference and the process to develop the Strategic Approach to International Chemicals Management were co-convened by the United Nations Environment Programme (UNEP), the Inter-Organization Programme for the Sound Management of Chemicals (IOMC) and the Intergovernmental Forum on Chemical Safety (IFCS). The participating organizations of IOMC are the Food and Agriculture Organization of the United Nations (FAO), the International Labour Organization (ILO), the Organisation for Economic Co-operation and Development (OECD), the United Nations Environment Programme (UNEP), the United Nations Industrial Development Organization (UNIDO), the United Nations Institute for Training and Research (UNITAR) and the World Health Organization (WHO). Three other organizations, the Global Environment Facility, the United Nations Development Programme (UNDP) and the World Bank, joined the IOMC participating organizations and IFCS in a steering committee established to oversee the Strategic Approach development process. In its resolution 1, the International Conference on Chemicals Management commended the Strategic Approach to the attention of the governing bodies of relevant organizations and encouraged them to endorse or otherwise appropriately acknowledge the Strategic Approach with a view to incorporating its objectives into their programmes of work within their mandates.

UNEP was requested by the Conference to establish and maintain overall administrative responsibility of the SAICM secretariat. UNEP and WHO have lead roles in the secretariat in their respective areas of expertise.

Dubai Declaration on International Chemicals Management

We, the ministers, heads of delegation and representatives of civil society and the private sector, assembled at the International Conference on Chemicals Management in Dubai from 4 to 6 February 2006, declare the following:

1. The sound management of chemicals is essential if we are to achieve sustainable development, including the eradication of poverty and disease, the improvement of human health and the environment and the elevation and maintenance of the standard of living in countries at all levels of development;
2. Significant, but insufficient, progress has been made in international chemicals management through the implementation of chapter 19 of Agenda 21¹ and International Labour Organization Conventions No. 170 on Safety in the Use of Chemicals at Work and No. 174 on the Prevention of Major Industrial Accidents and the Basel Convention on the Control of Transboundary Movements of Hazardous Wastes and Their Disposal, as well as in addressing particularly hazardous chemicals through the recent entry into force of the Rotterdam Convention on the Prior Informed Consent Procedure for Certain Hazardous Chemicals and Pesticides in International Trade and the Stockholm Convention on Persistent Organic Pollutants and the adoption of the Globally Harmonized System for the Classification and Labelling of Chemicals;
3. The private sector has made considerable efforts to promote chemical safety through voluntary programmes and initiatives such as product stewardship and the chemicals industry's Responsible Care programme;
4. Non-governmental public health and environmental organizations, trade unions and other civil society organizations have made important contributions to the promotion of chemical safety;
5. Progress in chemicals management has not, however, been sufficient globally and the environment worldwide continues to suffer from air, water and land contamination, impairing the health and welfare of millions;
6. The need to take concerted action is accentuated by a wide range of chemical safety concerns at the international level, including a lack of capacity for managing chemicals in developing countries and countries with economies in transition, dependency on pesticides in agriculture, exposure of workers to harmful chemicals and concern about the long-term effects of chemicals on both human health and the environment;
7. The global production, trade and use of chemicals are increasing, with growth patterns placing an increasing chemicals management burden on developing countries and countries with economies in transition, in particular the least developed among them and small island developing States, and presenting them with special difficulties in meeting this challenge. As a result, fundamental changes are needed in the way that societies manage chemicals;
8. We are determined to implement the applicable chemicals management agreements to which we are Party, strengthen the coherence and synergies that exist between them and work to address, as appropriate, existing gaps in the framework of international chemicals policy;

¹ *Report of the United Nations Conference on Environment and Development, Rio de Janeiro, 3- 14 June 1992* (United Nations publication, Sales No. E.93.I.8 and corrigenda), vol. I: Resolutions adopted by the Conference, resolution 1, annex II.

9. We commit ourselves in a spirit of solidarity and partnership to achieving chemical safety and thereby assisting in fighting poverty, protecting vulnerable groups and advancing public health and human security;
10. We commit ourselves to respecting human rights and fundamental freedoms, understanding and respecting ecosystem integrity and addressing the gap between the current reality and our ambition to elevate global efforts to achieve the sound management of chemicals;
11. We are unwavering in our commitment to promoting the sound management of chemicals and hazardous wastes throughout their life-cycle, in accordance with Agenda 21 and the Johannesburg Plan of Implementation,² in particular paragraph 23. We are convinced that the Strategic Approach to International Chemicals Management constitutes a significant contribution towards the internationally agreed development goals set out in the Millennium Declaration. It builds upon previous international initiatives on chemical safety and promotes the development of a multi- and cross-sectoral and participatory strategic approach;
12. We therefore adopt the Overarching Policy Strategy, which, together with the present declaration, constitutes our firm commitment to the Strategic Approach and its implementation;
13. We recommend the use and further development of the Global Plan of Action, to address current and ever-changing societal needs, as a working tool and guidance document for meeting the commitments to chemicals management expressed in the Rio Declaration on Environment and Development,³ Agenda 21, the Bahia Declaration on Chemical Safety,⁴ the Johannesburg Plan of Implementation, the 2005 World Summit Outcome⁵ and this Strategic Approach;
14. We are determined to realize the benefits of chemistry, including green chemistry, for improved standards of living, public health and protection of the environment, and are resolved to continue working together to promote the safe production and use of chemicals;
15. We are committed to strengthening the capacities of all concerned to achieve the sound management of chemicals and hazardous wastes at all levels;
16. We will continue to mobilize national and international financing from public and private sources for the life-cycle management of chemicals;
17. We will work towards closing the gaps and addressing the discrepancies in the capacity to achieve sustainable chemicals management between developed countries on the one hand and developing countries and countries with economies in transition on the other by addressing the special needs of the latter and strengthening their capacities for the sound management of chemicals and the development of safer alternative products and processes, including non-chemical alternatives, through partnerships, technical support and financial assistance;
18. We will work towards effective and efficient governance of chemicals management by means of transparency, public participation and accountability involving all sectors of

5 General Assembly resolution 60/1 of 16 September 2005.

- society, in particular striving for the equal participation of women in chemicals management;
19. We will engage actively in partnerships between Governments, the private sector and civil society, including strengthening participation in the implementation of the Strategic Approach by small and medium-sized enterprises and the informal sector;
 20. We stress the responsibility of industry to make available to stakeholders such data and information on health and environmental effects of chemicals as are needed safely to use chemicals and the products made from them;
 21. We will facilitate public access to appropriate information and knowledge on chemicals throughout their life cycle, including the risks that they pose to human health and the environment;
 22. We will ensure that, when information is made available, confidential commercial and industrial information and knowledge are protected in accordance with national laws or regulations or, in the absence of such laws and regulations, are protected in accordance with international provisions. In making information available, information on chemicals relating to the health and safety of humans and the environment should not be regarded as confidential;
 23. We recognize the need to make special efforts to protect those groups in society that are particularly vulnerable to risks from hazardous chemicals or are highly exposed to them;
 24. We are determined to protect children and the unborn child from chemical exposures that impair their future lives;
 25. We will endeavour to prevent illegal traffic in toxic, hazardous, banned and severely restricted chemicals and chemical products and wastes;
 26. We will promote the sound management of chemicals and hazardous waste as a priority in national, regional and international policy frameworks, including strategies for sustainable development, development assistance and poverty reduction;
 27. We will strive to integrate the Strategic Approach into the work programmes of all relevant United Nations organizations, specialized agencies, funds and programmes consistent with their mandates as accorded by their respective governing bodies;
 28. We acknowledge that as a new voluntary initiative in the field of international management of chemicals, the Strategic Approach is not a legally binding instrument;
 29. We collectively share the view that implementation and taking stock of progress are critical to ensuring success and that, in this regard, a stable and long-term fully participatory and multi-sectoral structure for guidance, review and operational support is essential;
 30. We are determined to cooperate fully in an open, inclusive, participatory and transparent manner in the implementation of the Strategic Approach.

Overarching Policy Strategy

I. Introduction

1. The present Overarching Policy Strategy flows from the commitments expressed in the Dubai Declaration on International Chemicals Management developed in the context of the Rio Declaration, Agenda 21 and the Johannesburg Plan of Implementation. The structure of the strategy is as follows:

- I. Introduction
- II. Scope
- III. Statement of needs
- IV. Objectives
 - A. Risk reduction
 - B. Knowledge and information
 - C. Governance
 - D. Capacity-building and technical cooperation
 - E. Illegal international traffic
- V. Financial considerations
- VI. Principles and approaches
- VII. Implementation and taking stock of progress

2. The involvement of all relevant sectors and stakeholders, including at the local, national, regional and global levels, is seen as key to achieving the objectives of the Strategic Approach, as is a transparent and open implementation process and public participation in decision-making, featuring in particular a strengthened role for women. The main stakeholders in the Strategic Approach are understood to be Governments, regional economic integration organizations, intergovernmental organizations, non-governmental organizations and individuals involved in the management of chemicals throughout their life-cycles from all relevant sectors, including, but not limited to, agriculture, environment, health, industry, relevant economic activity, development cooperation, labour and science. Individual stakeholders include consumers, disposers, employers, farmers, producers, regulators, researchers, suppliers, transporters and workers.

II. Scope

3. The Strategic Approach has a scope that includes:
- a. Environmental, economic, social, health and labour aspects of chemical safety,

- b. Agricultural and industrial chemicals, with a view to promoting sustainable development and covering chemicals at all stages of their life-cycle, including in products.¹
4. The Strategic Approach should take due account of instruments and processes that have been developed to date and be flexible enough to deal with new ones without duplicating efforts, in particular the efforts of forums dealing with the military uses of chemicals.

III. Statement of needs

5. A major driving force for the establishment of the Strategic Approach has been the recognition of the growing gaps between the capacities of different countries to manage chemicals safely, the need to improve synergies between existing instruments and processes and the growing sense of urgency regarding the need to assess and manage chemicals more effectively to achieve the 2020 goal articulated in paragraph 23 of the Johannesburg Plan of Implementation.² There is also the need for countries to have more effective governance structures to help make the Strategic Approach a lasting success.

6. Since the United Nations Conference on Environment and Development in Rio de Janeiro in 1992, at which the Rio Declaration and Agenda 21 were adopted, much has been done to improve chemicals management. Regulatory systems have been introduced or strengthened; much more information has been made available about chemicals; many chemicals have been assessed at the national level and internationally; a wide range of risk management measures have been introduced; and new tools such as the Globally Harmonized System of Classification and Labelling of Chemicals and pollutant release and transfer registers have been taken up and developed. New international instruments and programmes have been created. Industry has developed and extended its own programmes to contribute to better chemicals management, and there are now in many countries active and well informed public interest movements promoting awareness and good practices with regard to chemicals. It is, however, recognized that:

- a. The existing international policy framework for chemicals is not completely adequate and needs to be further strengthened;
 - b. Implementation of established international policies is uneven;
 - c. Coherence and synergies between existing institutions and processes are not completely developed and should be further improved;
 - d. There is often limited or no information on many chemicals currently in use and often limited or no access to information that already exists;
 - e. Many countries lack the capacity to manage chemicals soundly at the national, subregional, regional and global levels;
 - f. There are inadequate resources available to address chemical safety issues in many countries, particularly to bridge the widening gap between developed countries on the one hand and developing countries and countries with economies in transition on the other.
7. Risk reduction (including preventing, reducing, remediating, minimizing and eliminating risks) is a key need in pursuing the sound management of chemicals throughout their entire life cycle including, where appropriate, products and articles containing chemicals. It is recognized that:

¹ The Strategic Approach does not cover products to the extent that the health and environmental aspects of the safety of the chemicals and products are regulated by a domestic food or pharmaceutical authority or arrangement.

² A copy of paragraph 23 is set out in the appendix.

- a. Risk assessment and management strategies, supported by improved scientific understanding of the role and behaviour of substances, addressing product life-cycles, are central to achieving risk reduction;
 - b. Risk reduction measures, appropriately informed by scientific methods and consideration of social and economic factors, are needed to reduce or eliminate the harmful effects of chemicals and their inappropriate uses;
 - c. Risk reduction measures need to be improved to prevent the adverse effects of chemicals on the health of children, pregnant women, fertile populations, the elderly, the poor, workers and other vulnerable groups and susceptible environments;
 - d. The development of safer alternatives, including alternatives to chemicals of concern, and affordable sustainable technologies should be accelerated;
 - e. Developing countries and countries with economies in transition need better access to affordable, safer technologies and alternatives, which will also assist in reducing illegal traffic in hazardous chemicals.
8. Knowledge, information and public awareness are basic needs for decision-making for the sound management of chemicals, including products and articles containing chemicals. It is recognized that:
- a. Technological information, the results of hazard and risk assessments, socio-economic methodologies and the tools to develop and apply science-based standards, harmonized risk assessment and management principles are not available to all actors, and the pace of scientific research in these areas needs to be accelerated;
 - b. There is a lack of clear, accessible, timely and appropriate information on chemicals for ready use by local populations.
9. Governance is an important issue that needs to be addressed through a multi-sector and multi-stakeholder approach in pursuing the sound management of chemicals. There is therefore a need to recognize:
- a. That in many countries some stakeholders, particularly women and indigenous communities, still do not participate in all aspects of decision-making related to the sound management of chemicals, a situation which needs to be addressed;
 - b. That implementation of the present international regime for the sound management of chemicals, including binding instruments and other relevant initiatives, is uneven, a situation which needs to be addressed. There are gaps, overlaps and duplication in chemicals management activities and there is a need in many countries for enhanced coherence, consistency and cooperation to ensure efficient and effective use of available resources at the national, regional, and international levels. Many countries have not ratified or implemented regional and global legally binding instruments and other relevant initiatives, addressed gaps in national chemicals regimes or developed national mechanisms for coordinating chemicals activities;
 - c. That the mechanisms used to address the social and economic impacts of chemicals on human health, society and the environment, including liability, compensation and redress, need to be improved in some countries;
 - d. That chemicals issues are only sometimes featured in relevant national policy documents, including development assistance plans or strategies, sustainable development strategies and, as appropriate, poverty reduction strategies;

- e. That there is a need to promote the role of all sectors of civil society and the private sector in the implementation of the Strategic Approach.
10. Capacity-building and technical assistance in relation to all aspects of the sound management of chemicals are among the essential elements for the successful implementation of the Strategic Approach:
- a. The widening gap in capacity between developed countries on the one hand and developing countries and countries with economies in transition on the other should be bridged in order to make progress towards the goal articulated in paragraph 23 of the Johannesburg Plan of Implementation. Some developed countries, however, also face capacity issues in striving to meet this goal;
 - b. There is a need for enhanced cooperation aimed at strengthening the capacities of developing countries and countries with economies in transition for the sound management of chemicals and hazardous wastes and promoting adequate transfer of cleaner and safer technology to those countries.
11. Illegal international traffic in hazardous substances and dangerous products is a pressing problem for many countries, especially for developing countries and countries with economies in transition.
12. One of the challenges that will be faced by many countries, in particular developing countries and countries with economies in transition, in pursuing the goal articulated in paragraph 23 of the Johannesburg Plan of Implementation is to obtain access to the considerable financial and other resources needed to achieve the sound management of chemicals.

IV. Objectives

13. The overall objective of the Strategic Approach is to achieve the sound management of chemicals throughout their life-cycle so that, by 2020, chemicals are used and produced in ways that lead to the minimization of significant adverse effects on human health and the environment. The objective will be achieved, among other ways, through the implementation of activities set out in the Global Plan of Action.

A. Risk reduction

14. The objectives of the Strategic Approach with regard to risk reduction are:
- a. To minimize risks to human health, including that of workers, and to the environment throughout the life cycle of chemicals;
 - b. To ensure that humans and ecosystems and their constituent parts that are especially vulnerable or especially subject to exposure to chemicals that may pose a risk are taken into account and protected in making decisions on chemicals;
 - c. To implement transparent, comprehensive, efficient and effective risk management strategies based on appropriate scientific understanding, including of health and environmental effects, and appropriate social and economic analysis aimed at pollution prevention, risk reduction and risk elimination, including detailed safety information on chemicals, to prevent unsafe and unnecessary exposures to chemicals;
 - d. To ensure, by 2020:

- i. That chemicals or chemical uses that pose an unreasonable and otherwise unmanageable risk to human health and the environment³ based on a science-based risk assessment and taking into account the costs and benefits as well as the availability of safer substitutes and their efficacy, are no longer produced or used for such uses;
 - ii. That risks from unintended releases of chemicals that pose an unreasonable and otherwise unmanageable risk to human health and the environment³ based on a science-based risk assessment and taking into account the costs and benefits, are minimized;
- e. Appropriately to apply the precautionary approach, as set out in Principle 15 of the Rio Declaration on Environment and Development, while aiming to achieve that chemicals are used and produced in ways that lead to the minimization of significant adverse effects on human health and the environment;
- f. To give priority consideration to the application of preventive measures such as pollution prevention;
- g. To ensure that existing, new and emerging issues of global concern are sufficiently addressed by means of appropriate mechanisms;
- h. To reduce the generation of hazardous waste, both in quantity and toxicity, and to ensure the environmentally sound management of hazardous waste, including its storage, treatment and disposal;
- i. To promote the environmentally sound recovery and recycling of hazardous materials and waste;
- j. To promote and support the development and implementation of, and further innovation in, environmentally sound and safer alternatives, including cleaner production, informed substitution of chemicals of particular concern and non-chemical alternatives.

B. Knowledge and information

15. The objectives of the Strategic Approach with regard to knowledge and information are:

- a. To ensure that knowledge and information on chemicals and chemicals management are sufficient to enable chemicals to be adequately assessed and managed safely throughout their life cycle;
- b. To ensure, for all stakeholders:
 - i. That information on chemicals throughout their life cycle, including, where appropriate, chemicals in products, is available, accessible, user friendly, adequate and appropriate to the needs of all stakeholders. Appropriate types of information include their effects on human health and the environment, their intrinsic properties, their potential uses, their protective measures and regulation;

³

Groups of chemicals that might be prioritized for assessment and related studies include: persistent, bioaccumulative and toxic substances (PBTs); very persistent and very bioaccumulative substances; chemicals that are carcinogens or mutagens or that adversely affect, inter alia, the reproductive, endocrine, immune, or nervous systems; persistent organic pollutants (POPs), mercury and other chemicals of global concern; chemicals produced or used in high volumes; those subject to wide dispersive uses; and other chemicals of concern at the national level.

- ii. That such information is disseminated in appropriate languages by making full use of, among other things, the media, hazard communication mechanisms such as the Globally Harmonized System of Classification and Labelling of Chemicals and relevant provisions of international agreements;
- c. To ensure that, in making information available in accordance with paragraph 15 (b), confidential commercial and industrial information and knowledge are protected in accordance with national laws or regulations or, in the absence of such laws or regulations, are protected in accordance with international provisions. In the context of this paragraph, information on chemicals relating to the health and safety of humans and the environment should not be regarded as confidential;
- d. To make objective scientific information available for appropriate integration into risk assessments and associated decision-making relating to chemicals policy, including in relation to assessment of chemical hazards and risks to human health, especially vulnerable sub-populations such as children, and to the environment, particularly vulnerable ecosystems;
- e. To ensure that science-based standards, risk assessment and management procedures and the results of hazard and risk assessments are available to all actors;
- f. To make objective scientific methods and information available to assess the effects of chemicals on people and the environment, particularly through the development and use of indicators;
- g. To accelerate the pace of scientific research on identifying and assessing the effects of chemicals on human beings and the environment, including emerging issues, and to ensure that research and development are undertaken in relation to chemical control technologies, development of safer chemicals and cleaner technologies and non-chemical alternatives and technologies;
- h. To promote implementation of the common definitions and criteria contained in the Globally Harmonized System of Classification and Labelling of Chemicals;
- i. To make widely available, for consideration and implementation, the range of existing risk reduction and other tools from various participating organizations of the Inter-Organization Programme for the Sound Management of Chemicals (IOMC)⁴ such as the Mutual Acceptance of Data system of the Organisation for Economic Co-operation and Development (OECD) and the International Programme on Chemical Safety (IPCS) database on chemical safety information from intergovernmental organizations (INCHEM), in order to promote best practices in chemicals management, harmonization and burden-sharing;
- j. To develop knowledge and information on the estimated current and projected financial and other impacts on sustainable development associated with the unsound management of chemicals of concern on a global basis.

C. Governance

16. The objectives of the Strategic Approach with regard to governance are:

⁴ The participating organizations of IOMC are the Food and Agriculture Organization of the United Nations, the International Labour Organization, the Organisation for Economic Co-operation and Development, the United Nations Environment Programme, the United Nations Industrial Development Organization, the United Nations Institute for Training and Research and the World Health Organization.

- a. To achieve the sound management of chemicals throughout their life cycle by means of appropriate national, regional and international mechanisms, as needed, that are multi-sectoral, comprehensive, effective, efficient, transparent, coherent and inclusive and ensure accountability, taking into account the circumstances and needs of countries, especially developing countries and countries with economies in transition;
- b. To promote the sound management of chemicals within each relevant sector and integrated programmes for sound chemicals management across all sectors;
- c. To provide guidance to stakeholders in identifying priorities for chemicals management activities;
- d. To strengthen enforcement and encourage the implementation of national laws and regulations regarding chemicals management, including those that serve to implement international agreements;
- e. To promote relevant codes of conduct, including those relating to corporate environmental and social responsibility;
- f. To promote close international cooperation among concerned institutions, including among customs services, in different countries for the exchange of relevant information aimed at preventing all illegal international traffic in dangerous chemical products;
- g. To promote and support meaningful and active participation by all sectors of civil society, particularly women, workers and indigenous communities, in regulatory and other decision-making processes that relate to chemical safety;
- h. To ensure equal participation of women in decision-making on chemicals policy and management;
- i. To ensure that national institutional frameworks address the prevention of illegal international traffic in chemicals;
- j. To support coordinated assistance activities at the international level in accordance with the implementation of the Strategic Approach;
- k. To promote mutual supportiveness between trade and environmental policies;
- l. To provide and support enabling frameworks for businesses to develop and improve products that advance the objectives of the Strategic Approach;
- m. To enhance synergies between the activities of Governments, international institutions, multilateral organization secretariats and development agencies in pursuit of the sound management of chemicals;
- n. To enhance cooperation on the sound management of chemicals between Governments, the private sector and civil society at the national, regional and global levels.

D. Capacity-building and technical cooperation

17. The objectives of the Strategic Approach with regard to capacity-building and technical cooperation are:

- a. To increase the capacity for the sound management of chemicals throughout their life cycle in all countries as needed, especially in developing countries and countries with economies in transition;

- b. To narrow the widening gap in capacities between developed countries on the one hand and developing countries and countries with economies in transition on the other hand;
- c. To establish or strengthen partnerships and mechanisms for technical cooperation and the provision of appropriate and clean technology to and among developing countries and countries with economies in transition, maximizing synergies with the Bali Strategic Plan for Technology Support and Capacity-building;
- d. To develop and implement sustainable capacity-building strategies in developing countries and countries with economies in transition and to promote cooperation among all countries;
- e. To promote coordination of and access to information on capacity-building for the sound management of chemicals and to enhance transparency and accountability;
- f. To include capacity-building for the sound management of chemicals as a priority in social and economic development strategies, including national sustainable development strategies, poverty reduction strategy papers and country assistance strategies, and to make chemicals an important part of national policy;
- g. To encourage stakeholders to develop and promote programmes on chemical safety and scientific research and analysis and to assist with capacity-building programmes in developing countries and countries with economies in transition;
- h. To encourage and facilitate appropriate use by developing countries and countries with economies in transition of work already done and chemicals management models already established by other countries and international organizations;
- i. To promote the awareness of donors, multilateral organizations and other relevant actors of the relevance of chemical safety for poverty reduction and sustainable development.

E. Illegal international traffic

18. The objectives of the Strategic Approach with regard to illegal international traffic are:
- a. To prevent illegal international traffic in toxic, hazardous, banned and severely restricted chemicals, including products incorporating these chemicals, mixtures and compounds and wastes;
 - b. To strengthen mechanisms and domestic and regional implementation supporting existing multilateral agreements that contain provisions relating to the prevention of illegal international traffic;
 - c. To promote information sharing and to strengthen the capacity of developing countries and countries with economies in transition at the national and regional levels for the prevention and control of illegal international traffic.

V. Financial considerations

19. The Strategic Approach should reflect national, regional and global efforts to advance the sound management of chemicals recognizing Principle 7 of the Rio Declaration on Environment and Development. The Strategic Approach should call upon existing and new sources of financial support to provide additional resources and should build upon, among other things, the Bali Strategic Plan for Technology Support and Capacity-building. It should also include the mobilization of additional national and international financial resources, including through the Quick Start Programme and other measures set out in this paragraph, to accelerate the

strengthening of capabilities and capacities for the implementation of the Strategic Approach objectives. The extent to which developing countries, particularly least developed countries and small island developing States, and countries with economies in transition can make progress towards reaching the 2020 goal depends, in part, on the availability of financial resources provided by the private sector and bilateral, multilateral and global agencies or donors. Financial arrangements for the Strategic Approach include, among other things:

- a. Actions at the national or sub-national levels to support financing of Strategic Approach objectives, including by:
 - i. Integrating Strategic Approach objectives in relevant programmes, plans and/or strategies at various levels;
 - ii. Assessing current laws, policies and regulations to identify changes that may be needed to advance implementation of the Strategic Approach objectives, including an assessment of funding needs where appropriate;
 - iii. Assessing and where necessary adopting appropriate policies at the national and sub-national levels, which could include economic instruments, that can help to cover the cost of sound chemicals management;
 - iv. Where appropriate, assessing and adopting at the national and sub-national levels economic instruments intended to internalize the external costs of chemicals, bearing in mind that such instruments need careful design, especially in developing countries and countries with economies in transition;
 - v. Governments and other stakeholders exchanging information on experience and studies in the national use of economic instruments and submitting such information to the United Nations Environment Programme (UNEP) to make it broadly available;
- b. Enhancing industry partnerships and financial and technical participation in the implementation of Strategic Approach objectives, including by inviting industry:
 - i. To review and strengthen current voluntary industry initiatives to address the considerable challenges associated with the implementation of Strategic Approach objectives;
 - ii. To develop new initiatives, including in partnership with foundations, academia and non-governmental organizations, for the implementation of Strategic Approach objectives;
 - iii. To provide resources, including in-kind contributions, for the implementation of Strategic Approach objectives, continuing and building upon its initiatives on good corporate social and environmental responsibility;
- c. Integration of the Strategic Approach objectives into multilateral and bilateral development assistance cooperation, including by:
 - i. Developing countries and countries with economies in transition, where necessary with the technical support of donors, considering the integration of Strategic Approach objectives into relevant national documents that influence development assistance cooperation;
 - ii. Donors responding to requests by, and working in partnership with, developing countries and countries with economies in transition by recognizing Strategic Approach objectives as an important element of bilateral aid agency cooperation in support of sustainable development;

- iii. Inviting United Nations specialized agencies, funds and programmes and other intergovernmental organizations to include Strategic Approach objectives within their activities, as appropriate;
- d. Making more effective use of and building upon existing sources of relevant global funding, including by inviting the Global Environment Facility and the Montreal Protocol on Substances that Deplete the Ozone Layer and its Multilateral Fund for the Implementation of the Montreal Protocol within their mandates to consider whether and how they might support implementation of appropriate and relevant Strategic Approach objectives and to report;
- e. Supporting initial capacity-building activities for the implementation of Strategic Approach objectives by establishing a programme to be called the Quick Start Programme. The Programme will contain a voluntary, time-limited trust fund and may include multilateral, bilateral and other forms of cooperation. The trust fund will be administered by UNEP;
- f. Inviting Governments and other stakeholders to provide resources to enable the secretariat of the Strategic Approach to fulfil the tasks set out in paragraph 28, including by:
 - i. Inviting UNEP to arrange for the adaptation and reinforcement of the existing voluntary trust fund to support these tasks;
 - ii. Inviting all countries and regional economic integration organizations to contribute;
 - iii. Inviting the private sector, including industry, foundations and other non-governmental organizations, to also contribute.

VI. Principles and approaches

20. In developing and implementing the Strategic Approach and the Global Plan of Action, Governments and other stakeholders should be guided by:

- a. Principles and approaches in the following:
 - i. Stockholm Declaration on the Human Environment, in particular Principle 22;
 - ii. Rio Declaration on Environment and Development;
 - iii. Agenda 21, in particular chapters 6, 8, 19 and 20;
 - iv. United Nations Millennium Declaration;
 - v. Bahia Declaration on Chemical Safety;
 - vi. Johannesburg Plan of Implementation; and
- b. The following agreements, where applicable to them:
 - i. Montreal Protocol on Substances that Deplete the Ozone Layer;
 - ii. Basel Convention on the Control of Transboundary Movement of Hazardous Wastes and their Disposal;
 - iii. Rotterdam Convention on the Prior Informed Consent Procedure for Certain Hazardous Chemicals and Pesticides in International Trade;

- iv. Stockholm Convention on Persistent Organic Pollutants;
- v. ILO Convention No. 170 concerning safety in the use of chemicals at work.

VII. Implementation and taking stock of progress

21. Institutional arrangements to support implementation and taking stock of progress on the Strategic Approach will include national coordination and, as appropriate, regional processes and, at the international level, a periodic review process facilitated by a secretariat.

22. Implementation of the Strategic Approach could begin with an enabling phase to build necessary capacity, as appropriate, to develop, with relevant stakeholder participation, a national Strategic Approach implementation plan, taking into consideration, as appropriate, existing elements such as legislation, national profiles, action plans, stakeholder initiatives and gaps, priorities, needs and circumstances. Strategic Approach regional implementation plans may be developed, as appropriate, in a similar fashion. Subsequent implementation phases should focus on implementing specific action plans. In parallel, intergovernmental organizations, international financial institutions and private actors are encouraged to support these activities and to consider the development of their own action plans as appropriate. Partnerships among stakeholders should be pursued in support of implementation.

23. To sustain an integrated approach to managing chemicals, each Government should establish arrangements for implementing the Strategic Approach on an inter-ministerial or inter-institutional basis so that all concerned national departmental and stakeholder interests are represented and all relevant substantive areas are addressed. To facilitate communication, nationally and internationally, each Government should designate a Strategic Approach national focal point to act as an effective conduit for communication on Strategic Approach matters, including invitations to participate in meetings and information dissemination. The Strategic Approach national focal point should be a representative of the country's inter-ministerial or inter-institutional arrangements, where such arrangements exist.

24. The International Conference on Chemicals Management (hereafter referred to as the Conference) will undertake periodic reviews of the Strategic Approach. The functions of the Conference will be:

- a. To receive reports from all relevant stakeholders on progress in implementation of the Strategic Approach and to disseminate information as appropriate;
- b. To evaluate the implementation of the Strategic Approach with a view to reviewing progress against the 2020 target and taking strategic decisions, programming, prioritizing and updating the approach as necessary;
- c. To provide guidance on implementation of the Strategic Approach to stakeholders;
- d. To report on progress in implementation of the Strategic Approach to stakeholders;
- e. To promote implementation of existing international instruments and programmes;
- f. To promote coherence among chemicals management instruments at the international level;
- g. To promote the strengthening of national chemicals management capacities;
- h. To work to ensure that the necessary financial and technical resources are available for implementation;
- i. To evaluate the performance of the financing of the Strategic Approach;

- j. To focus attention and call for appropriate action on emerging policy issues as they arise and to forge consensus on priorities for cooperative action;
- k. To promote information exchange and scientific and technical cooperation;
- l. To provide a high-level international forum for multi-stakeholder and multi-sectoral discussion and exchange of experience on chemicals management issues with the participation of non-governmental organizations in accordance with applicable rules of procedure;
- m. To promote the participation of all stakeholders in the implementation of the Strategic Approach.

25. Where appropriate, sessions of the Conference should be held back-to-back with meetings of the governing bodies of relevant intergovernmental organizations in order to enhance synergies and cost-effectiveness and to promote the Strategic Approach's multi-sectoral nature. Sessions of the Conference should be held in 2009, 2012, 2015 and 2020, unless otherwise decided by the Conference.

26. It will be essential that implementation of the Strategic Approach continue effectively between meetings of the Conference, building on its open, multi-stakeholder and multi-sectoral methods. There will be a number of elements for achieving this:

- a. Regional meetings have played a significant role in the development of the Strategic Approach and it will be important to build on this commitment and expertise, taking into account the needs of developing countries, in particular the least developed among them, countries with economies in transition and developed countries. Regional meetings will facilitate input on Strategic Approach activities, preparation for future meetings of the Conference and exchange of regional expertise and exchange of information. As with the Conference itself, such meetings could be held back-to-back with relevant regional or global intergovernmental organization meetings, subject to extrabudgetary funding;
- b. The functions of the regional meetings will include:
 - i. To review progress on implementation of the Strategic Approach within the regions;
 - ii. To provide guidance on implementation to all stakeholders at a regional level;
 - iii. To enable technical and strategic discussions and exchange of information to take place;
- c. The implementation of the Strategic Approach will depend in significant part on the activities of relevant intergovernmental organizations. In order to help ensure that these activities are coordinated properly, IOMC should continue to perform a coordinating function for intergovernmental organization activities and work programmes.

27. The Conference should have a bureau with functions in accordance with the rules of procedure.

28. The functions to be performed by the secretariat will be:

- a. To facilitate meetings and intersessional work of the Conference, as well as regional meetings, with maximum multi-stakeholder participation, and to disseminate the reports and recommendations of the Conference;

- b. To report to the Conference on implementation of the Strategic Approach by all participants;
- c. To promote the establishment and maintenance of a network of Strategic Approach stakeholders at the national, regional and, in the case of intergovernmental and non-governmental organizations, international levels;
- d. To facilitate the development and dissemination of guidance materials to support implementation of the Strategic Approach by stakeholders;
- e. To provide guidance to stakeholders in the initiation of project proposals;
- f. To provide information clearing-house services such as provision of advice to countries on implementation of the Strategic Approach, referral of requests for information to relevant sources, and facilitation of access to information and expertise in support of specific national actions;
- g. To ensure that recommendations from the Conference are conveyed to relevant global and regional organizations and institutions;
- h. To promote the exchange of relevant scientific and technical information;
- i. To establish and maintain a working relationship with participating organizations of IOMC in order to draw upon their sectoral expertise.

29. The Executive Director of UNEP will be requested to establish the Strategic Approach secretariat. UNEP and the World Health Organization (WHO) will take lead roles in the secretariat in their respective areas of expertise in relation to the Strategic Approach, with UNEP assuming overall administrative responsibility. The Strategic Approach secretariat will be co-located with the UNEP chemicals and waste cluster in Geneva, and take full advantage of existing synergies. In order to reflect the multi-sectoral nature of the Strategic Approach, the secretariat will work in coordination and/or cooperation with the participating organizations of IOMC and UNDP, as well as with other intergovernmental organizations, as appropriate. The secretariat will report to the Conference.

Appendix to the Overarching Policy Strategy

Text of paragraph 23 of the Johannesburg Plan of Implementation

The Johannesburg Plan of Implementation is a key political commitment underlying the SAICM Overarching Policy Strategy. In the Plan, it was agreed that “governments, relevant international organizations, the private sector and all major groups should play an active role in changing unsustainable consumption and production patterns.” This would include the actions at all levels set out in paragraph 23 of the Plan:

“23. Renew the commitment, as advanced in Agenda 21, to sound management of chemicals throughout their life cycle and of hazardous wastes for sustainable development as well as for the protection of human health and the environment, inter alia, aiming to achieve, by 2020, that chemicals are used and produced in ways that lead to the minimization of significant adverse effects on human health and the environment, using transparent science-based risk assessment procedures and science-based risk management procedures, taking into account the precautionary approach, as set out in principle 15 of the Rio Declaration on Environment and Development, and support developing countries in strengthening their capacity for the sound management of chemicals and hazardous wastes by providing technical and financial assistance. This would include actions at all levels to:

“(a) Promote the ratification and implementation of relevant international instruments on chemicals and hazardous waste, including the Rotterdam Convention on Prior Informed Consent Procedures for Certain Hazardous Chemicals and Pesticides in International Trade so that it can enter into force by 2003 and the Stockholm Convention on Persistent Organic Pollutants so that it can enter into force by 2004, and encourage and improve coordination as well as supporting developing countries in their implementation;

“(b) Further develop a strategic approach to international chemicals management based on the Bahia Declaration and Priorities for Action beyond 2000 of the Intergovernmental Forum on Chemical Safety by 2005, and urge that the United Nations Environment Programme, the Intergovernmental Forum, other international organizations dealing with chemical management and other relevant international organizations and actors closely cooperate in this regard, as appropriate;

“(c) Encourage countries to implement the new globally harmonized system for the classification and labelling of chemicals as soon as possible with a view to having the system fully operational by 2008;

“(d) Encourage partnerships to promote activities aimed at enhancing environmentally sound management of chemicals and hazardous wastes, implementing multilateral environmental agreements, raising awareness of issues relating to chemicals and hazardous waste and encouraging the collection and use of additional scientific data;

“(e) Promote efforts to prevent international illegal trafficking of hazardous chemicals and hazardous wastes and to prevent damage resulting from the transboundary movement and disposal of hazardous wastes in a manner consistent with obligations under relevant international instruments, such as the Basel Convention on the Control of Transboundary Movements of Hazardous Wastes and Their Disposal;

“(f) Encourage development of coherent and integrated information on chemicals, such as through national pollutant release and transfer registers;

“(g) Promote reduction of the risks posed by heavy metals that are harmful to human health and the environment, including through a review of relevant studies, such as the United Nations Environment Programme global assessment of mercury and its compounds.”

Global Plan of Action

Executive summary

Introduction

1. The Global Plan of Action of the Strategic Approach to International Chemicals Management has been structured into work areas and associated activities that may be undertaken voluntarily by stakeholders in order to pursue the commitments and objectives expressed in the Dubai Declaration on International Chemicals Management and the Overarching Policy Strategy. These reaffirm the commitment expressed at the World Summit on Sustainable Development in the Johannesburg Plan of Implementation that by 2020 chemicals are used and produced in ways that lead to the minimization of significant adverse effects on human health and the environment.⁵ The plan should be regarded as a guidance document to be reviewed, as appropriate, and the activities should be considered and implemented, as appropriate, by stakeholders during the implementation of the Strategic Approach, according to their applicability.
2. The present executive summary aims to give policy-makers a brief overview of the structure of the Global Plan of Action and the list of actions that can be undertaken to achieve the objectives of the Strategic Approach. Within the Global Plan of Action, possible work areas and their associated activities, actors, targets and timeframes, indicators of progress and implementation aspects are grouped according to five categories of objectives contained in the Overarching Policy Strategy of the Strategic Approach, namely, risk reduction, knowledge and information, governance, capacity-building and technical assistance and illegal international traffic. These objectives are discussed in sections A to E of the present executive summary. Cross-cutting measures that appear under more than one objective are discussed in section F, entitled "Improved general practices".
3. Three tables follow this executive summary. Table A provides a summary list of the work areas and the numbers of the possible activities associated with them. Table B lists the work areas together with the possible activities associated with them and suggested actors, targets and timeframes, indicators of progress and implementation aspects, set out in five separate sections corresponding to the five categories of objectives listed in paragraph 2 above. Although each work area is listed under a single principal category in the summary table A, it may appear under several objectives in the detailed table B. The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach. However, stakeholders might find them useful in their implementation of the relevant activities. A table listing acronyms and abbreviations used in table B is appended as well.
4. Participants in the process to develop the Strategic Approach were unable to conclude their discussions on a number of activities, as reflected in table C of document SAICM/ICCM.1/4, which can be found at the website <http://www.chem.unep.ch/saicm>. Bearing in mind that the Global Plan of Action is an evolving tool to assist in achieving the objectives of the Strategic Approach, stakeholders may wish to discuss these items. In the period between the first and second sessions of the International Conference on Chemicals Management, activities such as regional meetings could be pursued.
5. The various categories of objectives, together with their corresponding work areas, are closely interconnected. Thus, numerous risk reduction actions are needed to protect human health and the environment from the unsound management of chemicals. A large number of these risk reduction actions will need to be supported by extensive improvements in our knowledge and information on chemicals, governance arrangements (including institutional coordination, regulatory frameworks and public policy) in all sectors involved with chemicals, and general

⁵ *Report of the World Summit on Sustainable Development, Johannesburg, South Africa, 26 August- 4 September 2002* (United Nations publication, Sales No. E.03.II.A.I. and corrigendum) chap. I, resolution 2, annex.

practices associated with the sound management of chemicals throughout their life-cycles. Furthermore, meaningful and timely capacity-building and technical assistance in support of the actions of developing countries and countries with economies in transition are essential to making substantive improvements in reducing the risks to human health and the environment caused by the unsound management of chemicals.

6. The Global Plan of Action also serves as guidance to all stakeholders at the global, regional, national and local levels, including when assessing the current status of their actions in support of the sound management of chemicals and identifying priorities to address gaps in such management. It is emphasized that priorities and timeframes will differ among countries, reflecting, for instance, the current state of chemicals management and the capacity to carry out a given measure in a given country. It is anticipated that Governments and other stakeholders will adopt flexible programmes to build and sustain adequate and comprehensive capabilities for the sound management of chemicals consistent with national circumstances and the Strategic Approach objectives.

7. In general, priority should be given to activities which:

- a. Focus on narrowing the gap between developed countries on the one hand and developing countries and countries with economies in transition on the other hand in their capacities for the sound management of chemicals;
- b. Facilitate the implementation of existing agreements and work areas;
- c. Target issues not currently addressed in existing agreements and work areas;
- d. Ensure that, by 2020:
 - i. Chemicals or chemical uses that pose an unreasonable and otherwise unmanageable risk to human health and the environment⁶ based on a science-based risk assessment and taking into account the costs and benefits as well as the availability of safer substitutes and their efficacy are no longer produced or used for such uses;
 - ii. The risks from unintended releases of chemicals that pose an unreasonable and otherwise unmanageable risk to human health and the environment² based on a science-based risk assessment and taking into account the costs and benefits are minimized;
- e. Target chemicals that pose unreasonable and unmanageable risks;
- f. Promote the generation of adequate science-based knowledge on health and environmental risks of chemicals and make it available to all stakeholders.

8. For many of the work areas, it is important to work in a concerted manner in order to be most effective. It is therefore critical for all stakeholders to take appropriate cooperative action on global priorities. These include, among others:

- a. Integrating chemicals issues into the broader development agenda, including the development of plans for prioritization of action in consultation with stakeholders, including vulnerable groups;

⁶ Groups of chemicals that might be prioritized for assessment and related studies include: persistent, bioaccumulative and toxic substances (PBTs); very persistent and very bioaccumulative substances; chemicals that are carcinogens or mutagens or that adversely affect, inter alia, the reproductive, endocrine, immune or nervous systems; persistent organic pollutants (POPs); mercury and other chemicals of global concern; chemicals produced or used in high volumes; chemicals subject to wide dispersive uses; and other chemicals of concern at the national level.

- b. Promoting ratification and implementation of relevant existing international conventions on health, safety, occupational health and safety and environment;
- c. Encouraging implementation of existing internationally recognized standards, tools and approaches for environment and health and protection from chemicals, such as the Globally Harmonized System of Classification and Labelling of Chemicals and pollutant release and transfer registers;
- d. Promoting reduction of risks from mercury and other chemicals of global concern so that they are minimized;
- e. Encouraging the reduction of the quantity and toxicity of hazardous wastes;
- f. Promoting efforts to prevent illegal traffic in chemicals and hazardous waste;
- g. Promoting greater coordination among regional and national centres and other stakeholders in order to address the whole spectrum of issues regarding chemicals and hazardous waste;
- h. Promoting alternatives in order to reduce and phase out highly toxic pesticides;
- i. Promoting capacity-building, education and training and information exchange on sound management of chemicals for all stakeholders;
- j. Promoting voluntary industry initiatives and product stewardship in all relevant industries;
- k. Promoting the phase-out of lead in gasoline;
- l. Promoting the remediation of contaminated areas.

A. Measures to support risk reduction

9. Under the risk reduction objective, work areas aimed at protecting human health and the environment would include the development of action plans to address priority concerns in relation to groups with specific vulnerabilities. Examples of measures to safeguard the health of women and children are the minimization of chemical exposures before conception and through gestation, infancy, childhood and adolescence. Occupational health and safety for workers would be promoted through measures such as the establishment of national inspection systems and implementation of adequate occupational health and safety standards to minimize workplace hazards from chemicals. Groups of chemicals that might be prioritized for assessment and related studies, such as for the development and use of safe and effective alternatives, include: persistent, bioaccumulative and toxic substances (PBTs); very persistent and very bioaccumulative substances; chemicals that are carcinogens or mutagens or that adversely affect, inter alia, the reproductive, endocrine, immune or nervous systems; persistent organic pollutants (POPs); mercury and other chemicals of global concern; chemicals produced or used in high volumes; chemicals subject to wide dispersive uses; and other chemicals of concern at the national level. Minimization of hazardous wastes would be enhanced by national planning and policies, awareness-raising and protection of handlers, while contaminated sites would be subject to identification and remediation. Pollution prevention measures would include the phasing out of lead in gasoline. Capacities to deal with poisonings and other chemical incidents would be strengthened.

B. Strengthening knowledge and information

10. Measures to strengthen knowledge and information would include improved education, training and awareness-raising activities aimed at those who may be exposed to toxic substances at any stage in the life cycle of chemicals and the generation and dissemination of data on the hazards of all chemicals in commerce, taking account of legitimate commercial confidentiality

needs. Among other measures in this area would be stepped-up monitoring of the impacts of chemicals on health and the environment, harmonized risk assessments, efforts to implement the Globally Harmonized System of the Classification and Labelling of Chemicals, and the development and publication of national pollutant release and transfer registers.

C. Governance: strengthening of institutions, law and policy

11. Central to the Strategic Approach's governance objectives would be measures to review national legislation in order to ratify and implement existing international agreements dealing with chemicals and hazardous wastes, such as the Basel Convention on the Control of the Transboundary Movement of Hazardous Wastes and their Disposal, the Rotterdam Convention on the Prior Informed Consent Procedure for Certain Hazardous Chemicals and Pesticides in International Trade, the Stockholm Convention on Persistent Organic Pollutants, the International Labour Organization conventions on the protection of workers and measures to improve coordination and synergies with respect to chemical safety policy and activities at the national and international levels. Another core area would be measures to ensure the participation of all stakeholders, including women in particular, in the management of the life cycle of chemicals. Measures to integrate chemicals management into strategies for development assistance, sustainable development and poverty reduction papers would be important to underpin the more effective direction of resources to chemical safety activities. Other measures under the governance category would include the development of systems for emergency preparedness and response in the case of chemical accidents, the consideration of chemical use in protected areas, training in liability and compensation schemes in relation to damage to human health and the environment caused by the production and use of chemicals and action to prevent and detect illegal trafficking of chemicals and hazardous wastes.

D. Enhancing capacity-building

12. Capacity-building measures include training of personnel in order to provide the necessary skills to support the systematic implementation of the Strategic Approach at the local, national and regional levels in a coordinated way and across the full range of chemical safety needs, including strategic planning, risk assessment and management, testing and research and control of illegal traffic. Use would be made of information-exchange mechanisms on capacity-building in order to ensure coordination.

E. Addressing illegal international traffic

13. Actions at the national, regional and global levels are needed to prevent and detect illegal trafficking of chemicals and hazardous wastes, including efforts towards the more effective application of international conventions relating to transboundary movements of chemicals and hazardous waste.

F. Improved general practices

14. The list of work areas contains a number of activities to improve general chemicals management practices, such as the development and implementation of cleaner production methods in accordance with best available techniques and best environmental practices. Similarly, better agricultural methods, including the use of non-chemical alternatives, would be promoted. Measures associated with improved corporate social and environmental responsibility for the safe production and use of products would include the further development and implementation of voluntary initiatives such as industry's Responsible Care programme and the International Code of Conduct on the Distribution and Use of Pesticides of the Food and Agriculture Organization of the United Nations.

Table A. Possible work areas and their associated activities

| WORK AREA | ACTIVITY |
|---|----------------------------------|
| Assessment of national chemicals management to identify gaps and prioritize actions | 1, 165, 207 |
| Human health protection | 2–6 |
| Children and chemical safety | 7–10, 150–153, 245–246 |
| Occupational health and safety | 11–21, 138–149, 255 |
| Implementation of the Globally Harmonized System of Classification and Labelling of Chemicals (GHS) | 22, 99–101, 168, 248–250 |
| Highly toxic pesticides – risk management and reduction | 23–30, 114–117 |
| Pesticide programmes | 31 |
| Reduced health and environmental risks of pesticides | 32–42 |
| Cleaner production | 43–46, 118, 238–242 |
| Remediation of contaminated sites | 47–48, 243 |
| Lead in gasoline | 49, 156, 244 |
| Sound agricultural practices | 50–53, 158–160 |
| Persistent, bioaccumulative and toxic substances (PBTs); very persistent and very bioaccumulative substances; chemicals that are carcinogens or mutagens or that adversely affect, inter alia, the reproductive, endocrine, immune or nervous systems; persistent organic pollutants (POPs) | 54–56 |
| Mercury and other chemicals of global concern; chemicals produced or used in high volumes; chemicals subject to wide dispersive uses; and other chemicals of concern at the national level | 57–60, 157 |
| Risk assessment, management and communication | 61–67, 127–137, 247 |
| Waste management (and minimization) | 68–73, 161–162, 258–262, 272–273 |
| Formulation of prevention and response measures to mitigate environmental and health impacts of emergencies involving chemicals | 74–79, 237 |
| Research, monitoring and data | 80–87 |
| Hazard data generation and availability | 88–97 |
| Promotion of industry participation and responsibility | 98, 189–192 |
| Information management and dissemination | 102–113, 256 |
| Life cycle | 119–123 |
| Pollutant release and transfer register (PRTs) – creation of national and international registers | 124–126, 177–180 |
| Education and training (public awareness) | 154–155 |
| Stakeholder participation | 163–164 |
| Implementation of integrated national programmes for the sound management of chemicals at the national level in a flexible manner | 166–167 |
| International agreements | 169–176 |
| Social and economic considerations | 181–188, 257 |
| Legal, policy and institutional aspects | 193–198 |
| Liability and compensation | 199 |
| Stock-taking on progress | 200–201 |
| Protected areas | 202–203, 253–254 |
| Prevention of illegal traffic in toxic and dangerous goods | 204, 263–271 |
| Trade and environment | 205, 251–252 |
| Civil society and public interest non-governmental organization (NGO) participation | 206 |
| Capacity-building to support national actions | 208–236 |

Table B. List of possible work areas and their associate activities, actors, targets/timeframes, indicators of progress and implementation aspects¹

| WORK AREAS ADDRESSING RISK REDUCTION (OBJECTIVE 1) | | | | | |
|---|--|--|--|--|--|
| Work area | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| Assessment of national chemicals management to identify gaps and prioritize actions | 1. Develop national profiles and implement action plans for sound management of chemicals. | National Governments Research centres IOMC (UNEP, FAO, WHO, UNIDO, UNITAR, UNDP) Trade unions NGOs | 2006–2010 | National profiles including action plans are developed. | Interagency and multi-stakeholder committees created to assist the development of national profiles |
| Human health protection | 2. Fill gaps in abilities to access, interpret and apply knowledge. | Industry National Governments Research centres IOMC (WHO, OECD) Trade unions | 2006–2020 (deliverables to be set for each SAICM review period) | Gaps in abilities have diminished. | Improved availability of information on the hazards, risks and safe use of chemicals (including those in manufactured products), in forms relevant to end users, and improved use of existing risk assessments |
| | 3. Develop and use new and harmonized methods for risk assessment. | IOMC (WHO, OECD) National Governments | 2006–2020 (deliverables to be set for each SAICM review period) | New and harmonized methods for risk assessment are developed. | Methods for assessment of dose-response relationships and risks to vulnerable groups, in particular children, pregnant women and fertile people, the elderly and the poor; new tools for risk assessment |
| | 4. Develop better methods and criteria for determining the impact of chemicals on human health (and thereby on the economy and sustainable development), for setting priorities for action, for the detection of chemicals and for monitoring the progress of SAICM. | IOMC (WHO, OECD) Research centres | 2006–2020 (deliverables to be set for each SAICM review period) | Better methods and criteria to determine impacts of chemicals are developed. Chemicals and human health are included in the development assistance agenda. | Usable at the country level Means of determining human health impacts of policy decisions |

1

A list of the acronyms and abbreviations used in this table is set out following the table.

2

Actors in bold are the principle actors.

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING RISK REDUCTION (OBJECTIVE 1) | | | | | |
|--|---|--|--|---|--|
| Work area | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| | 5. Build capacities of countries to deal with poisonings and chemical incidents. | National Governments Regional organizations IOMC (UNEP, WHO) | 2006–2020 (deliverables to be set for each SAICM review period) | The number of countries with capacity to deal with poisoning and chemicals incidents has increased. | An integrated approach to establishment and strengthening of poisons centres and surveillance, alert and response mechanisms for chemical incidents Technical cooperation on a regional basis |
| | 6. Include a range of preventive strategies. | National Governments IOMC (WHO) | 2006–2020 (deliverables to be set for each SAICM review period) | A range of preventive strategies is included internationally, regionally and nationally. | Education and awareness-raising Capacity building in risk communication |
| Children and chemical safety | 7. Develop guidance materials to assist in the preparation of initial national assessments of children's environmental health and the identification of priority concerns; develop and implement action plans to address those priority concerns. | IOMC (UNEP, ILO, WHO, UNIDO, OECD) UNICEF National Governments Stakeholders Regional organizations NGOs | 2006–2010 | Initial national assessments of children's environmental health and chemical safety are undertaken in all countries. Action plans are prepared and are in use. | Guidance for assessments |
| | 8. Establish needed infrastructure for research that will reduce uncertainty in risk assessment. | National Governments IOMC (UNEP, ILO, WHO, UNIDO, OECD, UNDP) | 2006–2010 | Infrastructure is established. | Collection of additional toxicological data on endpoints of particular relevance to children, i.e., in utero or post-natal development and growth, and data that would help identify or quantify the extent to which children are exposed to chemicals of concern Trained researchers |
| | 9. Develop mechanisms to share and disseminate information that can be used to reduce uncertainty in risk assessment. | IOMC (UNEP, ILO, WHO, UNIDO, OECD, UNDP) NGOs IFCS | 2006–2010 | Mechanisms are developed. | |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING RISK REDUCTION (OBJECTIVE 1) | | | | | |
|--|--|---|-------------------|--|---|
| Work area | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| | 10. Eliminate as a priority any child labour that involves hazardous substances. | IOMC (ILO) National Governments Trade unions, NGOs | 2006–2010 | The number of countries with legislation prohibiting child labour involving hazardous substances has increased. The capacity to implement and enforce such legislation has improved in all countries. The number of countries that have ratified the ILO convention on child labour has increased. | Model legislation |
| Occupational health and safety | 11. Develop harmonized data elements on occupational health and safety for recording relevant workplace data in company-specific databases. | IOMC (ILO, WHO) National Governments Trade unions Industry | 2006–2010 | Harmonized data elements for recording relevant workplace data are developed. | ILO Global Strategy on Occupational Safety and Health Standards and guidance |
| | 12. Consider legislation to protect the health of workers and the public, covering the entire spectrum of work situations in which chemicals are handled, including such sectors as agriculture and health. | National Governments IOMC (ILO) Trade unions Industry | 2006–2010 | Legislation is fully implemented in all relevant sectors. | Guidance developed on implementation |
| | 13. Develop a system of health and environmental impact assessment in chemicals handling and incorporate it in occupational safety and health programmes. | IOMC (ILO, WHO) National Governments Trade unions Industry NGOs | 2006–2010 | Health and environmental impact assessments are made part of OHS programmes in all countries. | ILO Global Strategy on Occupational Safety and Health |
| | 14. Develop, enhance, update and implement ILO safe work standards, ILO guidelines on occupational safety and health management system (ILO-OSH 2001) and other non-binding guidelines and codes of practice, including those particular to indigenous and tribal populations. | IOMC (ILO) National Governments Trade unions Industry | 2006–2010 | ILO safe work standards and guidelines are implemented in all countries. Other non-binding guidelines and codes of practice to promote sound chemicals management are identified, documented and implemented. Indigenous and tribal practices are identified, documented and implemented. | ILO Global Strategy on Occupational Safety and Health Availability of implementable methodologies Updating of legislation |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING RISK REDUCTION (OBJECTIVE 1) | | | | | |
|--|--|---|-------------------|---|--|
| Work area | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| | 15. Develop national occupational safety and health policies containing specific text on chemicals management, with a clear emphasis on preventive measures, requiring that workplace risk assessments and hazard prevention measures be carried out based on the recognized hierarchy of prevention and control measures. | National Governments Trade unions Industry IOMC (ILO, WHO) NGOs | 2006–2010 | Occupational health and safety policies refer specifically to chemicals in all countries. National occupational health and safety policies which emphasize preventive measures are developed and implemented in all countries. | ILO Global Strategy on Occupational Safety and Health Incorporation of the needs of workers in small and medium-sized enterprises, the informal sector, migrant workers, undocumented workers and undocumented migrant workers, the self-employed, wage workers and vulnerable groups, including children, young persons, women and the elderly in addressing risk reduction programmes for chemical safety in the workplace Guidance material |
| | 16. Establish integrated programmes for all public health and safety practitioners and professionals, with an emphasis on identification, assessment and control of occupational chemical risk factors in all workplaces (such as industrial, rural, business and services). | IOMC (ILO, FAO, WHO, UNIDO, UNITAR) National Governments Trade unions Industry NGOs | 2006–2010 | Integrated programmes for all public health and safety practitioners and professionals, with an emphasis on identification, assessment and control of occupational chemical risk factors, are established and implemented in all countries. | ILO Global Strategy on Occupational Safety and Health Training institutions and material |
| | 17. Promote exchange of information on successful experiences and projects related to chemical occupational safety and health. | IOMC (ILO, FAO, WHO, UNIDO, UNITAR) National Governments Trade unions Industry NGOs | 2006–2010 | Systems for information exchange are established in every country. | ILO Global Strategy on Occupational Safety and Health Infrastructure |
| | 18. Develop and disseminate chemical safety data sheets to assist enterprises in protecting their workers. | National Governments IOMC (WHO) Industry Trade unions | 2006–2010 | Safety data sheets are developed and disseminated. | Training of professionals Infrastructure for dissemination of safety data sheets |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING RISK REDUCTION (OBJECTIVE 1) | | | | | |
|---|---|--|-------------------|---|---|
| Work area | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| | 19. Avoid worker exposure through technical measures where possible; provide appropriate protective equipment; improve the acceptance of wearing protective equipment and stimulate further research on protective equipment to be used under hot and humid conditions. | National Governments IOMC (FAO) Industry Trade unions | 2005–2010 | The number of cases of occupational diseases and accidents shows a constant declining trend. Research on protective equipment gives practicable results. | Awareness-raising for employers and employees Building of technical capacity |
| | 20. Protect workers from chemicals causing asbestosis, other asbestos-related diseases and occupational cancers, those chemicals included in the Rotterdam Convention because of their occupational risks and other hazardous chemicals based on their occupational health risks. | National Governments Trade unions Industry | 2005–2010 | The number of cases of asbestosis and other asbestos-related diseases and occupational cancers shows a constant declining trend. | Awareness-raising for employers and employees. Legislation |
| | 21. Develop guidance on a harmonized approach to the setting of occupational exposure limits. | IOMC (ILO, FAO, WHO, UNIDO, UNITAR) Trade unions | 2006–2010 | Guidance is developed. | Establishment of working groups internationally and nationally |
| Implementation of GHS | 22. Establish roles and responsibilities of employers, employees, chemical suppliers and Governments in the implementation of GHS. | IOMC (ILO, FAO, WHO, UNITAR, OECD) National Governments Industry Trade unions | 2007 | Roles and responsibilities of employers, employees, chemical suppliers and Governments in the implementation of GHS are established and disseminated in all countries. | International initiative: UNITAR/ILO GHS Capacity-building programme Model legislation |
| Highly toxic pesticides – risk management and reduction | 23. Encourage full implementation of the FAO International Code of Conduct on the Distribution and Use of Pesticides. | National Governments IOMC (FAO) Industry (CropLife International) NGOs | 2006–2010 | The number of countries that have adopted the FAO International Code of Conduct on the Distribution and Use of Pesticides has increased. Implementation strategies for the FAO International Code of Conduct are developed and implemented in all countries. | FAO awareness-raising on the Code of Conduct Life-cycle approach to pesticide management at the national level |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING RISK REDUCTION (OBJECTIVE 1) | | | | | |
|--|---|---|-------------------|---|--|
| Work area | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| | 24. Give appropriate priority to pest and pesticide management in national sustainable development strategies and poverty reduction papers to enable access to relevant technical and financial assistance, including appropriate technology. | National Governments Agriculture industry (CropLife International) IOMC (FAO) Trade unions, NGOs | 2006–2010 | National sustainable development strategies and poverty reduction papers have incorporated pest and pesticide management as a priority component, thus enabling access to relevant technical and financial assistance in all countries. | National financial resources Model framework |
| | 25. Base national decisions on highly toxic pesticides on an evaluation of their intrinsic hazards and anticipated local exposure to them. | National Governments IOMC (FAO) | 2006–2010 | Hazard evaluations of all highly toxic pesticides are undertaken in all countries. Exposure assessments are undertaken under local conditions in all countries. | National financial resources Methodology Need to take into account common conditions of use and the need to reduce risks |
| | 26. Prioritize the procurement of least hazardous pest control measures and use best practices to avoid excessive or inappropriate supplies of chemicals. | National Governments Agriculture industry (CropLife International) Trade unions IOMC (FAO) | 2006–2010 | National and industrial procurement policies include the purchase of the least hazardous pest control measures in all countries. Use of best available techniques is given high priority in all countries. | Procurement policies Best available techniques |
| | 27. Promote development and use of reduced-risk pesticides and substitution for highly toxic pesticides as well as effective and non-chemical alternative means of pest control. | Agriculture industry (CropLife International) IOMC (FAO) National Governments Trade unions Farmer organizations NGOs | 2011–2015 | Use of highly toxic pesticides is reduced in all countries. Use of non-chemical control measures is promoted in all countries. Use of reduced-risk pesticides is promoted in all countries. | Alternatives available. Local experience in use of pesticides Sensitization of users of pesticides Non-chemical control methods |
| | 28. Distinguish programmes that have achieved cost effective, significant and sustainable risk reductions from those which have not and incorporate evaluation mechanisms and measures of progress in future programmes. | IOMC (UNEP, FAO, WHO, OECD, UNDP, World Bank) | 2006–2010 | Programmes that have achieved significant and sustainable risk reductions are documented and disseminated. | OECD risk reduction programmes in the use of pesticides |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING RISK REDUCTION (OBJECTIVE 1) | | | | | |
|--|--|---|-------------------|---|--|
| Work area | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| | 29. Promote integrated pest and integrated vector management. | IOMC (UNEP, FAO, WHO, OECD, UNDP, World Bank) National Governments Trade unions NGOs | 2006–2010 | Integrated pest and integrated vector management are practised in all countries and are included in national agricultural and health strategies. | Model legislation Agricultural extension services Training institutions and material |
| | 30. Encourage industry to extend product stewardship and to withdraw voluntarily highly toxic pesticides which are hazardous and cannot be used safely under prevalent conditions. | National Governments IOMC (UNEP, FAO, WHO, UNIDO, OECD, UNDP, World Bank) Trade unions Industry (CropLife International) | 2006–2010 | Voluntary product stewardship initiatives are introduced in all countries. Voluntary withdrawals of highly toxic chemicals are undertaken. Presence of highly toxic chemicals on the market is reduced. | Industry initiatives |
| Pesticide programmes | 31. Establish pesticide management programmes to regulate the availability, distribution and use of pesticides and, where appropriate, consider the FAO Code of Conduct on the Distribution and Use of Pesticides. | National Governments IOMC (FAO) | 2006–2010 | Regulation of availability, distribution and use of pesticides is put in place in all countries. | National legislation Technical capacity |
| Reduced health and environmental risks of pesticides | 32. Implement a pesticide registration and control system which controls risks from the initial point of production/formulation to the disposal of obsolete products or containers. | National Governments IOMC (FAO, UNEP, UNDP, World Bank) | 2010–2015 | Pesticide registration and control systems are implemented in all countries. | National legislation Technical capacity |
| | 33. Review pesticides available on the market to ensure their use in accordance with approved licenses. | National Governments IOMC (FAO) | 2011–2015 | All countries ensure that pesticides on the market are used in accordance with approved licenses. | National legislation Technical capacity |
| | 34. Establish health surveillance programmes. | National Governments IOMC (ILO, FAO, WHO) Trade unions | 2006–2010 | Health surveillance programmes are put in place. | Training of workers to recognize symptoms of pesticide poisonings |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING RISK REDUCTION (OBJECTIVE 1) | | | | | |
|--|---|--|-------------------|--|--|
| Work area | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| | 35. Establish poisoning information and control centres and systems for data collection and analysis. | National Governments Medical institutions IOMC (WHO) | 2006–2010 | Poisoning information and control centres are established. | Infrastructure Technical capacity |
| | 36. Provide extension and advisory services and farmer organizations with information on integrated pest management strategies and methods. | IOMC (FAO) Trade unions Farmer organizations | 2006–2010 | Information on integrated pest management is distributed to farmer organizations and extension services. | Infrastructure for information exchange Awareness-raising |
| | 37. Ensure proper storage conditions for pesticides at the point of sale, in warehouses and on farms. | National Governments Industry Trade unions Farmer organizations IOMC (FAO) | 2007–2015 | Pesticides are stored properly in all countries. | Awareness-raising |
| | 38. Establish a programme to monitor pesticide residues in food and the environment. | National Governments IOMC (UNEP, FAO, WHO) | 2006–2010 | Programmes for monitoring pesticide residues are put in place in all countries. | Laboratory capacity Technical capacity |
| | 39. Make less toxic pesticides available for sale and use. | Industry IOMC (FAO) | 2006–2010 | Less toxic pesticides are available in all countries. | Awareness-raising |
| | 40. License and sell pesticide products in containers that are ready to use, unattractive for re-use, inaccessible to children and labelled with clear, unambiguous directions that are understandable for local users. | National Governments Industry IOMC (FAO) | 2006–2010 | Only ready-to-use containers are licensed or sold. Pesticide products are labelled with clear instructions for use. | Legislation Awareness-raising |
| | 41. Ensure that agricultural workers are appropriately trained in safe application methods and that personal protections are sufficient to allow the safe use of products. | IOMC (FAO) Trade unions Farmer organizations Agricultural extension services | 2006–2010 | Agricultural workers are trained in safe application of pesticides. | Training programmes Infrastructure for training |
| | 42. Promote the availability and use of personal protective equipment. | Industry Trade unions IOMC (FAO) Farmer organizations | 2006–2010 | Availability and use of personal protective equipment is promoted. | Awareness-raising |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING RISK REDUCTION (OBJECTIVE 1) | | | | | |
|--|--|--|-------------------|---|---|
| Work area | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| Cleaner production | 43. Encourage sustainable production and use and promote the transfer, implementation and adoption of pollution prevention policies and cleaner production technologies, in particular best available techniques and best environmental practices (BAT/BEP). | IOMC (UNEP, ILO, FAO, WHO, UNIDO, OECD, UNDP, World Bank) National Governments Industry National cleaner production centres Trade unions NGOs academia | 2011–2015 | Mechanisms to encourage sustainable production and use and the transfer of appropriate clean technologies are established in all countries. Implementation of BAT/BEP is promoted. | Establishment of national cleaner production centres BAT/BEP |
| | 44. Promote the development and use of products and processes that pose lesser risks. | Industry Trade unions IOMC (UNEP, ILO, FAO, WHO, UNIDO, OECD, UNDP, World Bank) Basel Convention Secretariat | 2011–2015 | Systems for evaluating risks and criteria for substitution are established. A list of alternatives and their properties is published and disseminated to assist in decision-making. List of substituted hazard chemicals is published and disseminated. | Development of methodology UNIDO project: Regional Network on Safe Pesticide Production and Information for Asia and the Pacific (RENPAI) Alternative chemicals |
| | 45. Incorporate the concept of pollution prevention in policies, programmes and activities on chemicals management. | National Governments Trade unions NGOs IOMC (UNEP, ILO, FAO, WHO, UNIDO, OECD, UNDP, World Bank) | 2011–2015 | Pollution prevention is incorporated in all chemical management initiatives. Pollution prevention initiatives are implemented. | Training institutions and material |
| | 46. Support the further development and adoption of FAO and WHO specifications on pesticides. | National Governments IOMC (UNEP, ILO, FAO, WHO, UNIDO, OECD, UNDP, World Bank) NGOs | 2006–2010 | FAO/WHO specifications on pesticides are developed and adopted in all countries. | Model legislation |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING RISK REDUCTION (OBJECTIVE 1) | | | | | |
|--|--|---|-------------------|---|---|
| Work area | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| Remediation of contaminated sites | 47. Identify contaminated sites and hotspots and develop and implement contaminated site remediation plans to reduce risks to the public and to the environment. | IOMC (FAO, ILO, UNIDO, UNDP, World Bank) Basel Convention Secretariat National Governments Private sector NGOs | 2010–2020 | Contaminated site remediation plans are developed for all contaminated sites in all countries. | African Stockpiles Programme Model legislation |
| | 48. Ensure the remediation of contaminated sites, including those caused by accidents. | National Governments Industry | 2016–2020 | Mandatory remediation of contaminated sites is included in national legislation in all countries. Contingency plans for handling accidents involving chemicals are put in place. | Model legislation |
| Lead in gasoline | 49. Eliminate lead in gasoline. | National Governments IOMC (UNEP, WHO, UNIDO, UNDP, World Bank) GEF Industry | 2006–2010 | Lead in gasoline is eliminated. | Model legislation Import decisions under Rotterdam Convention on tetraethyl and tetramethyl lead |
| Sound agricultural practices | 50. Develop schemes for integrated pest management. | IOMC (UNEP, ILO, FAO, WHO, UNDP, World Bank) | 2006–2010 | Schemes are developed. | Technical expertise Infrastructure for dissemination of information Awareness-raising |
| | 51. Provide training in alternative and ecological agricultural practices, including non-chemical alternatives. | IOMC (UNEP, ILO, FAO, WHO, UNDP, World Bank) National Governments Research and accredited training institutions Industry Trade unions NGOs | 2006 –2010 | Training programmes in alternative and ecological agricultural practices including non-chemical alternatives are developed for all countries. | Methodologies and techniques |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

|--|---|--|-------------------|--|--|
| Work area | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| | 55. Prioritize for assessment and related studies groups of chemicals posing an unreasonable and otherwise unmanageable risk for human health and the environment, which might include: persistent bioaccumulative and toxic substances, (PBTs); very persistent and very bioaccumulative substances; chemicals that are carcinogens or mutagens or that adversely affect, inter alia, the reproductive, endocrine, immune or nervous system; and persistent organic pollutants (POPs). | Industry National Governments Trade unions IOMC (UNEP, FAO, WHO, UNIDO, UNITAR, OECD, UNDP, World Bank) | 2016–2020 | Groups of chemicals posing an unreasonable and otherwise unmanageable risk for human health and the environment, which might include persistent bioaccumulative and toxic substances (PBTs); very persistent and very bioaccumulative substances; chemicals that are carcinogens, mutagens or that adversely affect, inter alia, the reproductive, endocrine, immune or nervous systems; and persistent organic pollutants (POPs), are prioritized for assessment and related studies. | Risk assessment methodology Training |
| | 56. Articulate an integrated approach to chemicals management taking into account multilateral environmental agreements and strategies that target a broad spectrum of chemicals. | National Governments Trade unions NGOs Industry IOMC (UNEP, FAO, WHO, UNIDO, UNITAR, OECD, UNDP, World Bank) Basel Convention Secretariat | 2016–2020 | An integrated approach to chemicals management is developed and implemented in all countries. | Model legislation Training Industry initiatives Development and promotion of reformulations and substitutions |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING RISK REDUCTION (OBJECTIVE 1) | | | | | |
|--|--|---|-------------------|--|---|
| Work area | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| Mercury and other chemicals of global concern; chemicals produced or used in high volumes; those subject to wide dispersive uses; and other chemicals of concern at the national level | 57. Promote reduction of the risks posed to human health and the environment, especially by lead, mercury and cadmium, by sound environmental management, including a thorough review of relevant studies such as the UNEP global assessment of mercury and its compounds. | National Governments NGOs Industry IOMC (UNEP, WHO, UNIDO, UNITAR, OECD, UNDP, World Bank) | 2006–2015 | Risks posed by chemicals that are harmful to human health and the environment, especially lead, mercury and cadmium, are reduced in all countries. Relevant studies are identified and documented. A review of relevant studies is carried out and the results published and disseminated. Environmentally sound technologies for reduction of risks associated with lead, especially for small recycling enterprises, are put in place and are in use. | Risk assessment methodology Training available |
| | 58. Consider the need for further action on mercury, considering a full range of options, including the possibility of a legally binding instrument, partnerships and other actions (based on UNEP Governing Council decision 23/9). | IOMC (UNEP, UNIDO) (Cleaner production centres) | 2005–2008 | Further action on mercury is taken. | Analysis of options Technical capacity |
| | 59. Take immediate action to reduce the risk to human health and the environment posed on a global scale by mercury in products and production processes (based on UNEP Governing Council decision 23/9). | IOMC (UNEP, UNIDO) (Cleaner production centres) | 2005–2010 | Further action is taken. | Legislation |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING RISK REDUCTION (OBJECTIVE 1) | | | | | |
|--|--|--|-------------------|--|---|
| Work area | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| | 60. Consider the review of scientific information, focusing especially on long-range environmental transport, to inform future discussions on the need for global action in relation to lead and cadmium, to be presented to the Governing Council at its twenty-fourth session in 2007 (based on UNEP Governing Council decision 23/9). | IOMC (UNEP) National Governments | 2007 | Necessary actions are initiated. | Assessment of the need for global action |
| Risk assessment, management and communication | 61. When assessing risk to the general population, consider whether certain segments of the population (i.e., children, pregnant women) have differential susceptibility or exposure. | IOMC (UNEP, ILO, WHO, UNIDO, UNITAR, OECD, UNDP, World Bank) National Governments | 2006–2010 | An assessment of whether children and pregnant women have differential susceptibility is carried out. | Evaluation of whether additional risk management actions are needed on a chemical-by-chemical basis |
| | 62. Implement warning systems with regard to the risks posed by the production, use or disposal of chemicals. | IOMC (WHO) | 2011–2015 | Warning systems with regard to the risks posed by the production, use or disposal of chemicals are established in all regions. | Design Location Management |
| | 63. Apply science-based approaches, including those from among existing tools from IOMC organizations on, inter alia, test guidelines, good laboratory practices, mutual acceptance of data, new chemicals, existing chemicals, tools and strategies for testing and assessment. | National Governments NGOs IOMC (UNEP, OECD) | 2006–2010 | Science-based approaches are used in decision-making in all countries. | Sufficient number of scientists Training and education in science Awareness-raising |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING RISK REDUCTION (OBJECTIVE 1) | | | | | |
|--|---|---|-------------------|--|---|
| Work area | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| | 64. Encourage the development of simplified and standardized tools for integrating science into policy and decision-making relating to chemicals, particularly guidance on risk assessment and risk management methodologies. | National Governments NGOs IOMC (UNEP, ILO, FAO, WHO, UNIDO, UNITAR, OECD, UNDP, World Bank) | 2006–2010 | Simplified and standardized tools for integrating science into policy are developed and implemented in all countries. A framework for integrating standardized tools into policy is developed and is in use. | Sufficient number of scientists Training and education in science Awareness-raising Appropriate policies |
| | 65. Establish knowledge on risk assessment procedures, building on existing products such as those generated by OECD, including, inter alia, guidance on the OECD High Production Volume Chemicals hazard assessments, (Quantitative Structure Activity Relationship ((Q)SAR) Analysis, review of pesticide hazards and fate studies, emission exposure scenario documents, information exchange and coordination mechanisms. | IOMC (UNEP, ILO, FAO, WHO, UNIDO, UNITAR, OECD, UNDP, World Bank) | 2006–2010 | Knowledge on risk assessment procedures is increased. | Awareness-raising Infrastructure for dissemination of information |
| | 66. Establish programmes for monitoring chemicals and pesticides to assess exposure. | National Governments | 2006–2015 | Monitoring programmes are established. | Technical capacity Regional cooperation |
| | 67. Apply life-cycle management approaches to ensure that chemicals management decisions are consistent with the goals of sustainable development. | National Governments Industry | 2006–2010 | Life-cycle management approaches are applied. | Appropriate policies Awareness-raising |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING RISK REDUCTION (OBJECTIVE 1) | | | | | |
|--|--|---|-------------------|---|--|
| Work area | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| Waste management (and minimization) | 68. Facilitate the identification and disposal of obsolete stocks of pesticides and other chemicals (especially PCBs), particularly in developing countries and countries with economies in transition. | Basel Convention Secretariat, BCRCs, Stockholm Convention Secretariat, IOMC (ILO, FAO, WHO, UNIDO, OECD, UNDP, World Bank) Montreal Protocol National Governments Industry Trade unions NGOs | 2006–2020 | All obsolete stocks of pesticides and other chemicals are identified and disposed of. | Africa Stockpiles Programme Methodology Identification of stockpiles of other chemicals Demonstration and promotion of appropriate destruction technologies |
| | 69. Establish and implement national action plans with respect to waste minimization and waste disposal, taking into consideration relevant international agreements and by using the cradle-to-cradle and cradle-to-grave approaches. | National Governments BCRCs Trade unions NGOs | 2011–2015 | National action plans with respect to waste minimization and waste disposal are developed and implemented in all countries. | Model action plans Training |
| | 70. Prevent and minimize hazardous waste generation through the application of best practices, including the use of alternatives that pose less risk. | Industry IOMC (UNEP, ILO, FAO, WHO, UNIDO, OECD, UNDP, World Bank) Basel Convention Secretariat National cleaner production centres Trade unions NGOs | 2016–2020 | Alternatives are identified and introduced. | Assessment methodology Training Development and promotion of safer alternatives |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING RISK REDUCTION (OBJECTIVE 1) | | | | | |
|--|--|--|-------------------|---|---|
| Work area | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| | 71. Implement the Basel Convention and waste reduction measures at source and identify other waste issues that require full cradle-to-cradle and cradle-to-grave consideration of the fate of chemicals in production and at the end of the useful life of products in which they are present. | Industry BCRCs National cleaner production centres IOMC (ILO, FAO, WHO, UNIDO, OECD, UNDP, World Bank) Montreal Protocol Trade unions NGOs | 2006–2010 | Waste reduction measures at source are implemented in all chemical plants. The Basel Convention is implemented in all countries. | Training Awareness-raising Development and promotion of best available techniques |
| | 72. Carry out measures that will inform, educate and protect waste handlers and small-scale recyclers from the hazards of handling and recycling chemical waste. | National Governments Trade unions NGOs IOMC (ILO) Basel Convention Secretariat United Nations Disaster Assessment and Coordination Team Unit | 2006–2010 | Measures to inform, educate and protect waste handlers and small-scale recyclers are carried out. | Particular attention to waste pickers and other actors in the informal recycling sector Infrastructure for dissemination of information Awareness-raising |
| | 73. Promote waste prevention and minimization by encouraging production of reusable/recyclable consumer goods and biodegradable products and developing the infrastructure required. | National Governments National cleaner production centres IOMC (UNEP, ILO, FAO, WHO, UNIDO, OECD, UNDP, World Bank) Basel Convention Secretariat Industry Trade unions NGOs | 2006–2015 | Mechanisms to encourage production of reusable/recyclable consumer goods and biodegradable products are in place in all countries. | National cleaner production centres Information on successful initiatives Eco-design |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

|---|--|---|---------------------|---|--|
| Work areas | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| | 89. Generate and share information detailing the inherent hazards of all chemicals in commerce, giving priority to hazard information for those chemicals that have the greatest potential for substantial or significant exposures. | National Governments Industry Trade unions IOMC (UNEP, ILO, FAO, WHO, UNITAR, OECD) NGOs Professional organizations such as farmer organizations | 2008 | Hazard data is generated and made available on all chemicals in use in a country. | GHS OECD High Production Volume Chemicals Programme Existing hazard information should be systematically identified, collected, validated and shared to avoid duplicative testing. For the generation of new information, advancements in hazard identification and other relevant approaches that reduce the use of animals for toxicity testing should be applied. Use appropriate measures, where necessary according to each country's own situation, to promote the timely generation of hazard information. When implementing the activity, priority should be given to hazard information for those chemicals that have greatest potential for substantial or significant exposures. |
| | 90. Establish national priorities for information generation for chemicals that are not produced in high volumes. | National Governments Trade unions NGOs Professional organizations, e.g., farmer organizations IOMC (WHO) | 2006–2010 and later | National priorities for information generation for chemicals that are not produced in high volumes are established in each country. | National experts National budgets Use of production/import volume inventories of chemicals in commerce and collection or generation of other relevant information such as information on significant exposure |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING KNOWLEDGE AND INFORMATION (OBJECTIVE 2) | | | | | |
|---|--|---|-------------------|---|---|
| Work areas | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| | 91. Encourage the use of IPCS health and safety cards (international chemical safety cards, or ICSCs) | National Governments IOMC (UNEP, ILO, FAO, WHO, UNITAR, OECD) Trade unions NGOs Professional organizations such as farmer organizations | 2006–2010 | IPCS health and safety cards are used. | Availability in appropriate languages |
| | 92. Agree to time frames for industry, in cooperation and coordination with other stakeholders, to generate hazard information for high-production volume chemicals not addressed under existing commitments. | Industry IOMC (UNEP, ILO, UNITAR, OECD) | 2006–2010 | Time frames are agreed for industry to generate hazard information for high-production volume chemicals not addressed under existing commitments. | OECD High Production Volume Chemicals programme |
| | 93. Promote the establishment of generally applicable guidelines on the respective roles, responsibilities and accountabilities of Governments, producing and importing enterprises and suppliers of chemicals concerning the generation and assessment of hazard information. | National Governments Industry Trade unions IOMC (UNEP, ILO, FAO, UNITAR, OECD) | 2006–2010 | GHS is implemented. | |
| | 94. Further harmonize data formats for hazard information. | National Governments Industry IOMC (UNEP, ILO, WHO, UNITAR, OECD, UNDP) Basel Convention Secretariat | 2006–2010 | GHS is implemented. Harmonized data formats are developed and are in use. | Training |
| | 95. Establish recommendations on tiered approaches to addressing screening information requirements for chemicals that are not produced in high volumes. | IOMC (UNEP, ILO, UNITAR, OECD) Industry | 2006–2010 | Tiered approaches to addressing screening information requirements for chemicals that are not produced in high volumes are established. | Training |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING KNOWLEDGE AND INFORMATION (OBJECTIVE 2) | | | | | |
|---|--|---|-------------------|---|---|
| Work areas | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| | 96. Identify possible approaches for prioritization for such chemicals that are not necessarily based on production volume but, e.g., build on significant exposures. | IOMC (UNEP, ILO, FAO, WHO, UNITAR, OECD) Industry Trade unions | 2006–2010 | Approaches to prioritization of chemicals for hazard generation are developed. | Technical capacity |
| | 97. Ensure that each pesticide is tested by recognized procedures and test methods to enable a full evaluation of its efficacy, behaviour, fate, hazard and risk, with respect to anticipated conditions in regions or countries where it is used. | Industry | | Recognized procedures and test methods are established. | Testing facilities to verify quality and contents of pesticides offered for sale |
| Promotion of industry participation and responsibility | 98. Encourage industry to generate new science-based knowledge, building on existing initiatives. | National Governments IOMC (FAO, UNIDO, UNITAR, OECD, UNDP) Industry | 2006–2010 | Mechanisms are established in all countries for using new information generated by industry. New science-based knowledge is developed and is being used. | OECD chemical programme Global industry forums UNIDO programme for all industries |
| GHS | 99. Establish information management systems for hazard information. | National Governments Industry | 2006–2008 | Information systems are established. | International initiative OECD initiative on increasing generation of hazard data |
| | 100. Prepare safety data sheets and labels. | Industry | 2006–2008 | GHS is implemented. | Responsible Care Information in appropriate languages |
| | 101. Complete GHS awareness-raising and capacity-building guidance and training materials (including GHS action plan development guidance, national situation analysis guidance and other training tools) and make them available to countries. | Industry Trade unions NGOs IOMC (ILO, WHO, UNITAR) | 2007 | All countries have prepared implementation strategies for GHS. | Awareness-raising activities Sharing of the results of pilot projects Development of a roster of GHS experts who can provide support on training and capacity-building activities on the application of GHS classification, labelling, and safety data sheets |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING KNOWLEDGE AND INFORMATION (OBJECTIVE 2) | | | | | |
|---|---|--|-------------------|--|---|
| Work areas | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| Information management and dissemination | 102. Establish arrangements for the timely exchange of information on chemicals, including what is necessary to overcome barriers to information exchange (e.g., providing information in local languages). | National Governments Industry | 2006–2015 | Stakeholders have access to information in local languages in all countries. | GHS Use of article 14 of the Rotterdam Convention to facilitate information exchange on toxicology, ecotoxicology and safety |
| | 103. Consider establishing a clearing-house for information on chemical safety to optimize the use of resources. | IOMC (UNEP, ILO, FAO, WHO, UNITAR, OECD, UNDP) Industry | 2006–2010 | A clearing-house for information on chemical safety is established. | Determination of feasibility |
| | 104. Ensure that all Government officials from developing countries and countries with economies in transition responsible for chemicals management have access to the Internet and training in its use. | National Governments IOMC (UNEP) | 2006–2010 | All Government officials from developing countries and countries with economies in transition responsible for chemicals management have access to the Internet and are trained in its use. | Infrastructure Training |
| | 105. Eliminate barriers to information exchange for the sound management of chemicals in order to enhance communication among national, subregional, regional and international stakeholders. | National Governments IOMC (UNEP, ILO, FAO, WHO, UNITAR, OECD, UNDP) | 2006–2010 | All stakeholders have access to information on the sound management of chemicals. | INFOCAP Elimination of barriers to information exchange |
| | 106. Strengthen the exchange of technical information among the academic, industrial, governmental and intergovernmental sectors. | Academia National Governments | 2011–2015 | Exchange of technical information among the academic, industrial, governmental and intergovernmental sectors occurs freely. | Infrastructure |
| | 107. Establish procedures to ensure that any hazardous material put into circulation is accompanied, at a minimum, by appropriate and reliable safety data sheets which provide information that is easy to access, read and understand, taking into account GHS. | National Governments Industry Trade unions | 2008 | GHS is implemented. | OECD High Production Volume Chemicals Programme Responsible Care Information in appropriate languages |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING KNOWLEDGE AND INFORMATION (OBJECTIVE 2) | | | | | |
|---|---|---|-------------------|--|---|
| Work areas | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| | 108. Articles and products containing hazardous substances should all be accompanied by relevant information for users, work-places and at disposal sites. | National Governments Industry | 2006–2015 | All stakeholders have access to information. | Guidance to be developed Information available in appropriate languages |
| | 109. Improve the information base, including via electronic media such as the Internet and CD ROMs, in particular in developing countries, ensuring that information reaches appropriate target groups to enable their empowerment and ensure their right to know. | National Governments IOMC (UNEP, OECD) Trade unions | 2011–2015 | All stakeholders have access to information. | Infrastructure |
| | 110. Include a range of preventive strategies, education and awareness-raising and capacity-building in risk communication. | National Governments Industry Trade unions | 2011–2015 | Risk reduction and communication systems are established in all countries. | Model legislation Training in risk reduction |
| | 111. For all chemicals in commerce, appropriate information detailing their inherent hazards should be made available to the public at no charge and generated where needed with essential health, safety and environmental information made available. Other information should be available according to a balance between the public's right to know and the need to protect valid confidential business information and legitimate proprietary interests. | National Governments Industry IOMC (UNEP, ILO, WHO, UNITAR, OECD) | 2008 | GHS is implemented. | Model legislation Establishment of an international repository on hazard data (essential health, safety and environmental information) that will be accessible free of charge Accessibility of other information, balancing the public's right to know and the need to protect valid confidential business information and legitimate proprietary interests |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING KNOWLEDGE AND INFORMATION (OBJECTIVE 2) | | | | | |
|---|---|--|-------------------|---|---|
| Work areas | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| | 112. Undertake awareness-raising for consumers, in particular by educating them on best practices for chemical use, about the risks that the chemicals they use pose to themselves and their environment and the pathways by which exposures occur. | National Governments Industry NGO | 2006–2015 | Consumer awareness-raising programmes are put in place in all countries. | |
| | 113. Establish information-exchange mechanisms on contamination in border areas. | National Governments | 2006–2010 | Mechanisms for exchange of information are established. | Infrastructure |
| Highly toxic pesticides risk management and reduction | 114. Improve access to and use of information on pesticides, particularly highly toxic pesticides, and promote alternative safer pest control measures through networks such as academia. | Rotterdam Convention Secretariat IOMC (UNEP, ILO, FAO, WHO, OECD, UNDP, World Bank) Montreal Protocol NGOs Trade unions/labour Industry Stockholm Convention Secretariat Academia | 2006–2010 | Information on pesticides, particularly highly toxic pesticides, and alternative safer pest control measures is available to all stakeholders. | Rotterdam Convention Stockholm Convention Databases |
| | 115. Encourage and facilitate exchange of information, technology and expertise within and among countries by both the public and private sectors for risk reduction and mitigation. | National Governments IOMC (UNEP, FAO, OECD) | 2006–2015 | Systems for exchange of information, technology and expertise within and among countries by both the public and private sectors for risk reduction and mitigation are established in all countries. | Infrastructure |
| | 116. Facilitate access to research results related to alternative pest control (both chemical and non-chemical) and crop protection measures by pesticide users, those exposed to pesticides and extension services. | National Governments IOMC (UNEP, FAO) Industry Trade unions NGOs | 2006–2015 | Research results related to alternative pest control (both chemical and non-chemical) and crop protection measures by pesticide users, those exposed to pesticides and extension services are accessible to stakeholders. | System to exchange information |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

|---|--|--|-------------------|---|------------------------------------|
| Work areas | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| | 125. Use PRTRs tailored to variable national conditions as a source of valuable environmental information for industry, Governments and the public and as mechanisms to stimulate reductions in emissions. | National Governments NGOs IOMC (UNEP, UNIDO, UNITAR, OECD, UNDP) | 2011–2015 | All stakeholders have access to PRTR information. Emissions are reduced in all countries. | Infrastructure |
| | 126. Develop manuals and implementation guides to explain in a simple form the benefits provided by a registry and the steps necessary to develop one. | IOMC (UNEP, UNIDO, UNITAR, OECD, UNDP) | 2011–2015 | Manuals and implementation guides are developed. | Availability of technical capacity |
| Risk assessment, management and communication | 127. Manufacturers, importers and formulators should assess data and provide adequate and reliable information to users. | National Governments Industry | 2008 | Manufacturers, importers and formulators fulfil responsibilities to assess their products and inform users. | |
| | 128. Responsible public authorities should establish general frameworks for risk assessment procedures and controls. | National Governments | 2011–2015 | Risk assessment procedures and control systems are established in all countries. | Training |
| | 129. Carry out hazard evaluations in accordance with the requirements of harmonized health and environmental risk assessments, including internationally recommended methodologies. | National Governments IOMC (WHO) | 2008 | GHS is implemented. | Availability of technical capacity |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING KNOWLEDGE AND INFORMATION (OBJECTIVE 2) | | | | | |
|---|---|---|-------------------|---|---|
| Work areas | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| | 130. Harmonize principles and methods for risk assessment, e.g., methods for vulnerable groups, for specific toxicological endpoints such as carcinogenicity, immunotoxicity, endocrine disruption and ecotoxicology, for new tools. | IOMC (UNEP, ILO, FAO, WHO, UNIDO, UNITAR, OECD, UNDP) | 2016–2020 | Risk assessment methodologies are harmonized for specific target groups. | Harmonization of terminology used in hazard and risk assessment Use of molecular epidemiology, clinical and exposure data and scientific advances in toxicogenomics and methods relevant to real-life exposures, e.g., aggregate/cumulative exposures, use of simple analytical methods for in-field exposure assessment |
| | 131. Address gaps in the development of new tools for risk assessment, harmonization of risk assessment methods, better methods to estimate the impacts of chemicals on health in real-life situations and the ability to access, interpret and apply knowledge on risks. | IOMC (UNEP, ILO, FAO, WHO, UNIDO, UNITAR, OECD, UNDP) | 2016–2020 | Appropriate risk assessment tools are developed and used. | Technical capacity |
| | 132. Address gaps in the study of chemical exposure pathways and opportunities for pathway intervention (e.g., in food production). | IOMC (UNEP, ILO, FAO, WHO, UNIDO, UNITAR, OECD, UNDP) Industry | 2016–2020 | Information on chemical exposure pathways and opportunities for pathway intervention are available. | Research capacity |
| | 133. Further develop methodologies using transparent science-based risk assessment procedures and science-based risk management procedures, taking into account the precautionary approach. | National Governments IOMC (UNEP, ILO, FAO, WHO, UNIDO, UNITAR, OECD, UNDP) NGOs | 2016–2020 | Methodologies for risk management are available in all countries. | Availability of trained professionals |
| | 134. Compare assessments of alternative products and practices to ensure that they do not pose larger risks. | National Governments IOMC (UNEP, ILO, FAO, WHO, UNIDO, UNITAR, OECD, UNDP) | 2016–2020 | A system of comparative evaluation of chemical products is established in all countries. | Availability of trained professionals |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING KNOWLEDGE AND INFORMATION (OBJECTIVE 2) | | | | | |
|---|---|---|-------------------|--|------------------------|
| Work areas | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| | 135. Fill gaps in abilities to access, interpret and apply knowledge (e.g., improve availability of information on the hazards, risks and safe use of chemicals, in forms relevant to end users, and improve use of existing risk assessments). | National Governments Industry NGOs IOMC (UNEP, WHO) | 2006–2010 | All stakeholders have access to information on chemicals. | GHS |
| | 136. Develop common principles for harmonized approaches for performing and reporting health and environmental risk assessments. | Research centres IOMC (UNEP, ILO, FAO, WHO, UNIDO, UNITAR, OECD, UNDP) | 2011–2015 | Harmonized methodology for risk assessments is available. | Infrastructure |
| | 137. Improve understanding of the impact of natural disasters on releases of harmful chemicals and resulting human and wildlife exposures, as well as possible measures to mitigate them. | National Governments NGOs IOMC (WHO) | 2011–2015 | Studies are undertaken to improve understanding of the impact of natural disasters on releases of harmful chemicals and resulting human and wildlife exposures. Results are disseminated to relevant decision makers. Mitigation measures are developed and implemented. | |
| Occupational safety and health | 138. Establish a means of developing and updating internationally evaluated sources of information on chemicals in the workplace by intergovernmental organizations, in forms and languages suitable for use by workplace participants. | IOMC (ILO, WHO, UNIDO, OECD, UNDP) National Governments Trade unions/labour Industry NGOs | 2006–2010 | Means of developing and updating internationally evaluated sources of information on chemicals in the workplace by intergovernmental organizations, in forms and languages suitable for use by workplace participants, are established in all countries. | GHS |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING KNOWLEDGE AND INFORMATION (OBJECTIVE 2) | | | | | |
|---|--|---|-------------------|---|--|
| Work areas | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| | 139. Promote research on the development of appropriate protective equipment. | National Governments Industry Trade unions | 2006–2010 | Research and development of appropriate protective gear is carried out in all countries. Appropriate protective equipment is available in all countries. | ILO Global Strategy on Occupational Safety and Health Research institutions |
| | 140. Make information on workplace chemicals from intergovernmental organizations readily and conveniently available at no charge to employers, employees and Governments. | National Governments Industry Trade unions NGOs | 2006–2008 | Mechanisms to make IGO information on chemicals readily available are established in all countries. | Infrastructure GHS |
| | 141. Strengthen global information networks in the sharing, exchange and delivery of chemical safety information (e.g. ILO, WHO, INFOCAP). | IOMC (ILO, FAO, WHO, UNIDO, OECD, UNDP) Basel Convention Secretariat Trade unions | 2006–2010 | Existing global networks are identified and links are strengthened. | Necessary infrastructure |
| | 142. Promote the establishment of ILO SafeWork programmes at the national level and the ratification and implementation of ILO conventions 170, 174 and 184. | IOMC (ILO) National Governments Industry Trade unions | 2006–2010 | ILO Conventions 170, 174 and 184 are ratified and implemented by all countries and ILO SafeWork programmes are established in all countries. | ILO conventions Capacity-building |
| | 143. Implement an integrated approach to the safe use of chemicals in the workplace by establishing new mechanisms for expanding and updating ILO conventions related to hazardous substances and linking them to various other actions such as those associated with codes, information dissemination, enforcement, technical cooperation, etc. | IOMC (ILO) National Governments Industry Trade unions | 2006–2010 | ILO conventions related to hazardous substances are updated and linked to other related initiatives. | ILO conventions Capacity-building |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

|---|---|--|-------------------|--|--|
| Work areas | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| | 148. Eliminate workplace hazards posed by chemicals through simple, practical methods, in particular chemical control banding. | IOMC (ILO, FAO, WHO, UNIDO, OECD, UNDP) National Governments Industry Trade unions | 2006–2020 | Workplace hazards due to chemicals are eliminated. | ILO conventions and strategies |
| | 149. Establish the right of employees to refuse to work in hazardous environments if they are not provided with adequate and correct information about hazardous chemicals to which they are exposed in their work environment and about appropriate ways in which to protect themselves. | IOMC (ILO) National Governments Industry Trade unions NGOs | 2006–2010 | The right of employees to refuse to work in hazardous environments is established in all countries. | Model legislation Information in appropriate languages |
| Children and chemical safety | 150. Promote education and training on children's chemical safety. | IOMC (ILO, WHO, OECD, UNICEF, Regional organizations National Governments Stakeholders Trade unions NGOs Academia | 2006–2010 | Government officials and key stakeholders are trained on children's chemical safety. | Availability of training programmes on children's chemical safety Sharing of experience |
| | 151. Promote the use of comparable indicators of children's environmental health as part of a national assessment and prioritization process for managing unacceptable risks to children's health. | National Governments Industry IOMC (ILO, WHO, OECD, UNDP) NGOs | 2006–2010 | A harmonized approach to data collection, research, legislation and regulations and the use of indicators of children's environmental health is established. | Model legislation |
| | 152. Consider potential enhanced exposures and vulnerabilities of children when setting nationally acceptable levels or criteria related to chemicals. | National Governments IOMC (ILO, WHO, OECD, UNDP) Trade unions NGOs | 2011–2015 | Potential enhanced exposures and vulnerabilities of children are considered when setting nationally acceptable levels or criteria related to chemicals. | Model legislation |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING KNOWLEDGE AND INFORMATION (OBJECTIVE 2) | | | | | |
|--|--|---|-------------------|---|--|
| Work areas | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| | 153. Develop broad strategies specifically directed to the health of children and young families. | National Governments IOMC (WHO) Trade unions | 2011–2015 | National strategies specifically directed to the health of children and young families are put in place in all countries. | Technical capacity available |
| Education and training (public awareness) | 154. Incorporate chemical safety and especially understanding of the labelling system of GHS into school and university curricula. | IOMC (UNEP, ILO, WHO, UNIDO, UNITAR, UNDP) Basel Convention Secretariat National Governments Training institutions Media institutes Trade unions NGOs | 2011–2015 | Chemical safety is included in school and university curricula in all countries. | Availability of training material |
| | 155. Provide appropriate training and sensitization on chemical safety for those exposed to chemicals at each stage from manufacture to disposal (crop growers, industries, enforcement agents, etc.). | National Governments Trade unions NGOs IOMC (UNEP) Basel Convention Secretariat National agricultural extension services | 2011–2015 | All relevant officials are trained in chemical safety. | Training institutions Training of trainers |
| Lead in gasoline | 156. Undertake research into alternative additives. | Industry Research centres | 2006–2010 | Lead in gasoline is phased out in all countries. | Research centres Possibilities for information on alternatives provided by the Rotterdam Convention website |
| Mercury and other chemicals of global concern; chemicals produced or used in high volumes; chemicals subject to wide dispersive uses; and other chemicals of concern at the national level | 157. Undertake research into alternatives for other lead-based products. | Industry Academia | 2006–2010 | Alternatives to lead are used in products. Improved technologies for small-scale recycling industries are in place and used. | Technical and scientific capacity |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING KNOWLEDGE AND INFORMATION (OBJECTIVE 2) | | | | | |
|---|--|---|-------------------|---|--|
| Work areas | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| Sound agricultural practices | 158. Undertake research on and implement better agricultural practices, including methods that do not require the application of polluting or harmful chemicals. | Agriculture industry National Governments IOMC (UNEP, ILO, FAO, WHO, UNDP, World Bank) Trade unions/labour NGOs Research centres International agricultural research centres (CGIAR centres and others) and national agricultural research systems | 2011–2015 | Better agricultural practices, including methods that do not require the application of chemicals, are identified and implemented in all countries. | Model legislation Agricultural extension services Training institutions and material |
| | 159. Establish ecologically sound and integrated strategies for the management of pests and, where appropriate, vectors for communicable diseases. | Agriculture Industry National Governments IOMC (UNEP, ILO, FAO, WHO, UNDP, World Bank) Trade unions/labour NGOs | 2011–2015 | Integrated strategies for the management of pests are established and implemented in all countries. | Model legislation Agricultural extension services Training institutions and material |
| | 160. Promote information exchange on alternative and ecological agricultural practices, including on non-chemical alternatives. | IOMC (UNEP, ILO, FAO, WHO, OECD, UNDP, World Bank) National Governments Research and accredited training institutions Industry Trade unions NGOs | 2006–2010 | Information exchange mechanisms on alternative and ecological agricultural practices are developed in all countries. | Training |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING KNOWLEDGE AND INFORMATION (OBJECTIVE 2) | | | | | |
|---|---|--|-------------------|---|--------------------------------------|
| Work areas | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| Waste management (and minimization) | 161. Implement information, education and communication packages on the sound management of chemicals, targeting key stakeholders including waste handlers and recyclers. | National Governments IOMC (UNEP, ILO, FAO, WHO, UNIDO, OECD, UNDP, World Bank) Montreal Protocol Basel Convention Secretariat Trade unions NGOs | 2006–2010 | Effective and sustained information, education and communication activities on sound management of chemical waste are carried out. | Training |
| | 162. Support research on best practices in waste management resulting in increased waste diversion and recovery and reduced chemical hazards for health and the environment. | National Governments NGOs IOMC (UNEP, ILO, FAO, WHO, UNIDO, OECD, UNDP, World Bank) Basel Convention Secretariat | 2006–2010 | Best practices in waste management to increase waste diversion and recovery and to reduce chemical hazards are identified, documented and disseminated. | Research Dissemination |
| Stakeholder participation | 163. Undertake awareness-raising and preventive measures campaigns in order to promote safe use of chemicals. | IOMC (UNEP) NGOs Media institutes Industry Trade unions NGOs | 2006–2020 | All stakeholders are informed of chemical safety issues. | Information in appropriate languages |
| | 164. Work to ensure broad and meaningful participation of stakeholders, including women, at all levels in devising responses to chemicals management challenges and in regulatory and decision-making processes that relate to chemical safety. | National Governments Industry Trade unions NGOs IOMC | 2006–2010 | All stakeholders including women at all levels are involved in devising responses to chemicals management challenges and in regulatory and decision-making processes that relate to chemical safety in all countries. | Model legislation |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING GOVERNANCE (OBJECTIVE 3) | | | | | |
|---|---|---|-------------------|--|---|
| Work areas | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| Assessment of national chemicals management to identify gaps and prioritize actions | 165. Have in place multi-sectoral and multi-stakeholder mechanisms to develop national profiles and priority actions. | National Governments Industry Trade unions NGOs IOMC (UNITAR, UNDP) | 2006–2010 | All countries have mechanisms in place. | Interagency and multi-stakeholder committees |
| Implementation of integrated national programmes for the sound management of chemicals at the national level in a flexible manner | 166. With regard to the implementation of national programmes: Develop comprehensive national profiles; Formalize inter-ministerial and multi-stakeholder coordinating mechanisms on chemicals management issues, including coordination of national Government and multi-stakeholder positions in international meetings; Develop national chemical safety policies outlining strategic goals and milestones towards reaching the Johannesburg Summit 2020 goal; Develop national chemicals safety information exchange systems; Develop national strategies to mobilize national and external resources and to raise the importance placed on chemicals management within national sustainable development frameworks; Develop policies of systematic stakeholder involvement, bringing synergies from related initiatives on chemicals management. | National Governments All Stakeholders IOMC (UNEP, UNITAR, UNDP) Basel Convention Secretariat | 2006–2010 | All countries have developed integrated national programmes for the sound management of chemicals. | National poverty eradication and development plans Regional cooperation, experience and best practices Participation of relevant ministries and stakeholders in coordination mechanisms Technical capacity |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING GOVERNANCE (OBJECTIVE 3) | | | | | |
|--|---|--|-------------------|---|---|
| Work areas | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| | 167. Support efforts to implement an integrated approach to the safe use of chemicals at the workplace by establishing effective mechanisms for following up and updating information on international instruments related to hazardous substances. | IOMC (ILO) National Governments Industry and workers | 2010 | Effective follow-up mechanisms are put in place. | ILO guidance |
| GHS | 168. Review national legislation and align it with GHS requirements. | National Governments IOMC (ILO, FAO, UNITAR) | 2006–2010 | GHS is implemented in all countries. | Model legislation |
| International agreements | 169. Promote ratification and implementation of all relevant international instruments on chemicals and hazardous waste, encouraging and improving partnerships and coordination (e.g., Stockholm Convention, Rotterdam Convention, Basel Convention, ILO conventions and IMO conventions related to chemicals such as the TBT Convention) and ensuring that necessary procedures are put into place. | National Governments International convention secretariats | 2006–2010 | All conventions are ratified or comparable measures are put in place and implemented in all countries. | Model legislation Funds for ratification and implementation and resources for designated national authorities and focal points |
| | 170. Establish or strengthen coordination, cooperation and partnerships, including coordination among institutions and processes responsible for the implementation of multilateral environmental agreements at the international, national and local levels, in order to address gaps in policies and institutions, exploit potential synergies and improve coherence. | Secretariats of multilateral environmental agreements National Governments IOMC Montreal Protocol | 2006–2010 | Institutional coordination is strengthened and reporting requirements are streamlined for all conventions. Plans for exploiting potential synergies at all levels among international organizations involved in chemicals management are established. | Clustering of secretariats Inter-ministerial plans for cooperation Awareness-raising among Government representatives on governing bodies of intergovernmental organizations of the need for inter-agency coherence |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING GOVERNANCE (OBJECTIVE 3) | | | | | |
|--|--|---|-------------------|--|---|
| Work areas | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| | 171. Consider approaches to facilitate and strengthen synergies and coordination between chemicals and waste conventions, including by developing common structures. | Secretariats of multilateral environmental agreements National Governments | 2006–2010 | | |
| | 172. Consider evaluating the possibilities and potential benefits of using the Basel and/or Stockholm Convention ways and means for waste management and disposal of wastes of reclaimed ozone-depleting substances regulated under the Montreal Protocol. | Secretariats of multilateral environmental agreements National Governments | 2006–2010 | | |
| | 173. Develop pilot projects to pursue implementation of coordination between the national focal points of chemicals-related multilateral environmental agreements (Rotterdam, Stockholm and Basel Conventions and Montreal Protocol) to achieve synergies in their implementation. | National focal points IOMC | 2006–2010 | Pilot projects are carried out. Results are published. | Terms of reference |
| | 174. Address gaps at the domestic level in implementation of existing laws and policy instruments promulgated in the context of national environmental management regimes, including with respect to meeting obligations under international legally binding instruments. | National Governments Secretariats of multilateral environmental agreements | 2006–2010 | Gaps are identified in all countries. Strategies to fill gaps are put in place. | Guidance on criteria for the identification of gaps |
| | 175. Ensure coherence with the proposed Bali Strategic Plan for Technology Support and Capacity-building. | National Governments IOMC (UNEP) | 2006–2010 | Coherence with the Bali Strategic plan is achieved. | |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING GOVERNANCE (OBJECTIVE 3) | | | | | |
|--|--|---|-------------------|--|---|
| Work areas | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| | 176. Promote, when necessary, the further development of international agreements relating to chemicals. | National Governments IOMC (UNEP) | 2006–2010 | Agreement is reached on development of further international agreements relating to chemicals. | Assessment of need for further international agreements |
| PRTRs – creation of national and international registers | 177. Establish the required framework for creating national PRTRs. | National Governments Stockholm Convention Secretariat IOMC (UNEP, UNIDO, UNITAR, OECD, UNDP) UNECE Industry | 2011–2015 | A framework for creating national PRTRs is established and PRTRs are implemented in all countries. | Model legislation |
| | 178. Promote a political consensus in favour of public access to national environmental information. | IOMC (UNEP, UNIDO, UNITAR, OECD, UNDP) | 2006–2010 | Public access to national environmental information is improved. | Awareness-raising |
| | 179. Manage information dissemination from PRTRs so that risks are communicated in a timely and accurate fashion without unduly alarming the public. | IOMC (UNEP, UNIDO, UNITAR, OECD, UNDP) National Governments NGOs | 2006–2010 | Mechanisms for the dissemination of timely and accurate information from PRTRs are developed. | Infrastructure |
| | 180. Promote harmonization of environmental performance requirements in the context of international trade. | IOMC (UNEP, UNIDO, UNITAR, OECD) | 2006–2010 | Harmonized environmental performance requirements are developed. | |
| Social and economic considerations | 181. Establish the capacity to collect and analyse social and economic data. | National Governments IOMC Trade unions/labour NGOs | 2011–2015 | Social and economic data are collected in all countries. | Methodology |
| | 182. Consider and apply approaches to the internalization of the costs to human health, society and the environment of the production and use of chemicals, consistent with Principle 16 of the Rio Declaration. | National Governments IOMC | 2011–2015 | Studies of internalization of costs are carried out in all countries. | Training of scientists UNEP |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING CAPACITY-BUILDING AND TECHNICAL COOPERATION (OBJECTIVE 4) | | | | | |
|---|--|--|-------------------|--|--|
| Work areas | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| | 226. Strengthen technical capacity and availability of technology (including technology transfer). | IOMC (UNEP, FAO, UNIDO, UNDP) BCRCs National Governments | 2006–2010 | Technical capacity is developed in all countries. Steps to improve available technology are taken in all countries. Only appropriate technology is transferred to developing countries and countries with economies in transition. | Needs assessment on technical capacity Evaluation of existing technologies Availability of safe technologies Training |
| | 227. Strengthen mechanisms for reporting and consolidating information necessary to produce baseline overviews that will help determine domestic management priorities and gaps (e.g., PRTRs and inventories), taking into account industry reporting initiatives. | National Governments Research institutions IOMC (UNEP, ILO, FAO, WHO) BCRCs Industry Trade unions NGOs | 2006–2010 | Multi-stakeholder mechanisms for reporting and consolidating information necessary to produce baseline overviews are established in all countries. | Methodologies and protocols Training |
| | 228. Develop infrastructure to redress the lack of accreditation bodies and accredited and reference laboratories with capacity to sample environmental and human matrices and foodstuffs. | National Governments IOMC (UNEP, FAO, UNIDO) Industry | 2006–2010 | Accredited and reference laboratories are established at the regional and national levels. | Standards Training |
| | 229. Establish the necessary training and infrastructure for undertaking the necessary testing of chemicals for their management across their life cycle. | National Governments IOMC (UNEP, ILO, FAO, WHO, UNITAR) Trade unions | 2006 –2010 | Training institutions and chemical testing laboratories are established in all countries. | Standards Training |
| | 230. Develop training programmes in risk assessment and management-related health techniques and communication. | National Governments IOMC (UNEP, ILO, FAO, WHO, UNITAR) Trade unions | 2006–2010 | Training programmes in risk assessment and management are established in all countries. | Risk assessment and management methodologies Training |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING CAPACITY-BUILDING AND TECHNICAL COOPERATION (OBJECTIVE 4) | | | | | |
|---|---|---|-------------------|--|---|
| Work areas | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| | 231. Address training needed to develop capacity in legislative approaches, policy formulation, analysis and management. | National Governments IOMC (UNEP, ILO, FAO, WHO, UNITAR, UNDP) Trade unions | 2006–2010 | Training needs assessments in legislative approaches, policy formulation, analysis and management are undertaken in all countries. | Model legislation Training |
| | 232. Provide training in the application of relevant liability and compensation mechanisms. | National Governments IOMC (UNEP, ILO) Trade unions NGOs | 2006–2010 | Training in the application of liability and compensation mechanisms is provided in all countries. | Model legislation Liability and compensation methodologies and models Training APPEL programme |
| | 233. Provide training in emergency response. | National Governments IOMC (UNEP, FAO, WHO) Industry Trade unions | 2006–2010 | Training in emergency response is provided in all countries. | Model legislation Availability of emergency methodologies Training |
| | 234. Provide the necessary technical training and financial resources for national Governments to detect and prevent illegal traffic in toxic and dangerous goods and hazardous wastes. | IOMC (UNEP, FAO, UNITAR) Basel Convention Secretariat National Governments Industry | 2006–2015 | Training and financial resources for national Governments to detect and prevent illegal traffic in toxic and dangerous goods and hazardous wastes are provided to all countries that require it. The capacity of countries to detect and prevent illegal traffic in toxic and dangerous goods and hazardous waste is improved. | Training Detection and prevention methodologies |
| | 235. Outline specific capacity-building measures for each region. | IOMC (UNEP, ILO, FAO, WHO) BCRCs National Governments Industry Trade unions NGOs | 2006–2010 | Specific capacity-building measures are identified in all regions. | Methodologies Training |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING CAPACITY-BUILDING AND TECHNICAL COOPERATION (OBJECTIVE 4) | | | | | |
|---|--|--|-------------------|--|---|
| Work areas | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| | 236. Develop tools to assist industry to provide simplified chemicals information to Government and individual users. | Industry National Governments | 2006–2010 | Tools for the provision of simplified information are developed. | Infrastructure |
| Formulation of preventive and response measures to mitigate environmental and health impacts of emergencies involving chemicals | 237. Establish and strengthen poison control centres to provide toxicological information and advice; develop relevant clinical and analytical toxicological facilities according to the needs identified and resources available in each country. | National Governments IOMC (WHO) | 2006–2010 | Poison control centres are established and strengthened and clinical and analytical toxicological facilities are established in all countries, according to needs and available resources. | WHO poison centre initiative |
| Cleaner production | 238. Provide training in cleaner production techniques. | IOMC (UNEP, UNIDO) National Governments Research institutions National cleaner production centres | 2006–2010 | Training in cleaner production techniques is provided in all countries | Availability of methodologies Training |
| | 239. Consider means to control the transboundary movement of dirty technologies. | IOMC (UNEP, UNIDO) National Governments Industry | 2006–2010 | Mechanisms for preventing transboundary movement of dirty technologies are developed in all countries. | Model legislation Training |
| | 240. Clearly define needs with respect to training of trainers. | National Governments Industry IOMC (UNEP) | 2006–2010 | Instructors' training needs are clearly defined. | Availability of technical capacity |
| | 241. Design clear and simple manuals and guides on practical measures to assess production methods and implement improvements. | IOMC (UNEP, UNIDO) | 2006–2010 | Clear and simple manuals and guides are designed. | Availability of technical capacity |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING CAPACITY-BUILDING AND TECHNICAL COOPERATION (OBJECTIVE 4) | | | | | |
|---|---|---|-------------------|---|--|
| Work areas | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| | 242. Promote the transfer of technology and knowledge for cleaner production and manufacture of alternatives. | National Governments IOMC (UNEP, FAO, WHO, UNIDO, UNDP, World Bank) GEF NGOs Trade unions Industry | | | |
| Remediation of contaminated sites | 243. Establish infrastructure for analyzing and remediating contaminated sites. Provide training in rehabilitation approaches. Develop capacity to rehabilitate contaminated sites. Develop remediation techniques. Increase international cooperation in the provision of technical and financial assistance to remedy environmental and human health effects of chemicals caused by chemical accidents, mismanagement, military practices and wars. | IOMC (UNEP, FAO, WHO, UNIDO, UNDP) GEF Regional bodies (Basel Convention regional training centres) National Governments Accredited training institutions Industry Trade unions | 2011–2015 | Infrastructure for analysing and remediating contaminated sites is established in all countries. Training programmes in rehabilitation of contaminated sites are developed and implemented in all countries. International technical and financial assistance is provided to developing countries and countries with economies in transition. | Model legislation Inventory and assessment of contaminated sites Remediation techniques and approaches Training |
| Lead in gasoline | 244. Develop capacity to identify alternatives to lead in gasoline, establish the necessary infrastructure for analysing gasoline and upgrade the infrastructure needed to introduce unleaded gasoline. | IOMC (UNEP, UNIDO) Regional bodies National Governments Industry | 2006–2010 | Infrastructure for analysing gasoline is established in all countries. | Model legislation Methodologies available Training |
| Children and chemical safety | 245. Develop mechanisms to facilitate collaborative national and international research and shared technology. | IOMC (ILO, WHO) UNICEF Regional organizations National Governments Research organizations | 2006–2010 | Mechanisms to facilitate collaborative national and international research and shared technologies are developed. | Availability of methodologies Training |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING CAPACITY-BUILDING AND TECHNICAL COOPERATION (OBJECTIVE 4) | | | | | |
|---|--|---|-------------------|--|--|
| Work areas | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| | 246. Establish needed infrastructure for research into the impact of exposure to chemicals on children and women. | IOMC (ILO, WHO) UNICEF National Governments Stakeholders Trade unions Regional organizations | 2006–2010 | Research on the impact of exposure to chemicals on children and women is undertaken. | Research centres |
| Risk assessment, management and communication | 247. Establish accredited testing facilities for chemicals. | Industry ILAC National Governments | 2016–2020 | Accredited testing facilities for chemicals are established in all regions. | Accreditation systems Financial resources Training UNEP APELL UNEP PRTR programmes |
| Implementation of GHS | 248. Establish accredited testing facilities to undertake testing of hazard characteristics of chemicals for classification and verification of label information. | National Governments | 2011–2015 | Accredited testing facilities for GHS purposes are established at least in all economic regions. | ILAC extension of accreditation systems to all regions |
| | 249. Promote training in hazard classification. | National Governments IOMC (WHO, FAO, OECD, UNITAR) Industry Trade unions NGOs | 2006–2010 | Multi-stakeholder training programmes on hazard classification are developed and implemented in all countries. | Availability of criteria for hazard classification Training |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING CAPACITY-BUILDING AND TECHNICAL COOPERATION (OBJECTIVE 4) | | | | | |
|---|--|--|-------------------|--|--|
| Work areas | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| | 250. Make available sufficient financial and technical resources to support national and regional GHS capacity-building projects in developing countries and countries with economies in transition. | IOMC (FAO, UNITAR, OECD) GEF | 2006–2010 | Sufficient financial and technical resources to support national and regional GHS capacity-building projects in developing countries and countries with economies in transition are available. | Availability of national GHS capacity-building programmes Sharing of results of UNITAR pilot projects |
| Trade and environment | 251. Provide training on links between trade and environment, including needed negotiating skills. | IOMC (UNEP, UNITAR) WTO National Governments Accredited training institutions | 2006–2010 | Training programmes in links between trade and environment, including needed negotiating skills, are developed in all countries. | Availability of methodologies Training |
| | 252. Encourage cooperation between secretariats of multilateral trade and multilateral environmental agreements in development of programmes and materials to enhance mutual understanding of the rules and disciplines in the two areas among Governments, intergovernmental institutions and other stakeholders. | IOMC (UNEP, FAO, UNITAR) | 2006–2010 | Cooperation is increased. | Discussion at meetings of conferences of parties |
| Protected areas | 253. Provide training in the concept of protected areas. | National Governments IOMC (UNDP) Regional organizations Trade unions NGOs | 2006–2010 | Training programmes in the concept of protected areas are developed in each country. | Methodologies Training |
| | 254. Undertake capacity-building in identifying and monitoring biological indicators. | IOMC (UNDP) National Governments | 2011–2015 | The number of trained personnel has increased and laboratory facilities are in place. | |
| Occupational health and safety | 255. Promote the necessary training and capacity-building for all people involved directly and indirectly with chemical use and disposal. | IOMC (ILO, FAO, WHO) National Governments Trade unions Industry | 2006–2010 | Training capacity is in place. | ILO Global Strategy on Occupational Safety and Health |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING CAPACITY-BUILDING AND TECHNICAL COOPERATION (OBJECTIVE 4) | | | | | |
|---|--|---|-------------------|--|--|
| Work areas | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| Information management and dissemination | 256. Develop and enhance the capacity to acquire, generate, store, disseminate and access information, including INFOCAP. | IOMC (ILO, UNEP, UNITAR) National Governments NGOs Trade unions/labour | 2006–2010 | All countries have the capacity to generate data and make it available to stakeholders. | Necessary infrastructure in place Ability to interpret and apply knowledge Training Awareness-raising |
| Social and economic considerations | 257. Establish the capacity to undertake social and economic impact assessment. | National Governments IOMC (OECD) | 2011–2015 | Research institutions are established in all countries. | Training of scientists |
| Waste management | 258. Implement capacity-building programmes on waste minimization and increased resource efficiency, including zero waste resource management, waste prevention, substitution and toxic use reduction, to reduce the volume and toxicity of discarded materials. | National Governments IOMC (FAO, WHO, UNIDO, UNITAR, UNDP) NGOs Basel Convention Secretariat BCRCs Trade unions | 2006–2010 | Programmes are executed to assist national/local authorities to develop zero waste resource management. | Provision of expertise, information Transfer of knowledge required for reduction of volume and toxicity of discarded material |
| | 259. Develop national and local capacities to monitor, assess and mitigate chemical impacts of dumps, landfills and other waste facilities on human health and the environment. | IOMC (UNEP, WHO, UNIDO, UNDP) National Governments Trade unions NGOs | 2006–2010 | Essential technical and other skills are developed for monitoring, assessing and mitigating chemical problems for dumps, landfills and other waste facilities. | Provision of assistance including training and equipment through assistance programmes |
| | 260. Undertake training programmes for preventing the exposure of waste handlers and recyclers, particularly waste scavengers, to hazardous chemicals and waste. | National Governments Trade unions NGOs Basel Convention Secretariat BCRCs IOMC (ILO) | 2006–2010 | Training programmes addressing the chemical safety needs of waste handlers and recyclers are implemented. | Technical assistance Training |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING CAPACITY-BUILDING AND TECHNICAL COOPERATION (OBJECTIVE 4) | | | | | |
|---|--|--|-------------------|---|---|
| Work areas | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| | 261. Train customs officials to detect illegal transboundary movements of waste. | National Governments WCO BCRCs | 2006–2010 | Customs officials are trained to detect illegal transboundary movements of waste. | Training |
| | 262. Implement demonstration projects on waste minimization and efficient resource management in different countries with bilateral or multilateral support. | IOMC (UNEP, FAO, UNIDO, UNDP) BCRCs National Governments Trade unions NGOs | 2006–2010 | Zero waste demonstration projects are identified, supported and carried out. | Infrastructure Trained professionals |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING ILLEGAL TRAFFIC (OBJECTIVE 5) | | | | | |
|--|--|---|-------------------|--|--|
| Work areas | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| Prevention of illegal traffic in toxic and dangerous goods | 263. Promote with WCO the dissemination and use of customs risk profiles and material safety sheets as official means of identifying probable cases of illegal traffic. | National Governments WCO | 2006–2010 | Harmonized tariff codes developed by WCO for chemicals regulated in terms of international instruments are implemented in all countries. | WCO harmonized tariff codes Training Cooperation with WCO |
| | 264. Address the matter of resources and operational mechanisms for technical and financial assistance for developing countries and countries with economies in transition, either directly or through a relevant regional organization. | SAICM financial mechanism | 2006–2010 | A reliable and sustainable financing mechanism is in place. | Availability of funds Development of criteria for accessing funds |
| | 265. Assess the extent and impact of illegal traffic at the international, regional, subregional, and national levels. | National Governments Regional organizations, e.g., COMESA, AU, EAC, SADC, etc. | 2006–2010 | An assessment of the extent of illegal traffic is undertaken. | Clarification of the definition of illegal international traffic |
| | 266. Expand the level of coordination and cooperation among all stakeholders. | National Governments Trade unions NGOs International actors | 2006–2010 | Coordination among all stakeholders is enhanced in all countries. | Awareness-raising |
| | 267. Address how international conventions related to the sound management of chemicals and national laws may be more effectively applied to the transboundary movement of toxic and hazardous chemicals. | National Governments IFCS Rotterdam and Basel convention secretariats Trade unions NGOs | 2006–2010 | Mechanisms to control transboundary movement of toxic and hazardous chemicals are in place. | |

The columns dealing with suggested actors, targets and timeframes, indicators of progress and implementation aspects were not fully discussed and sufficient time was not available to achieve agreement during the process to develop the Strategic Approach.

| WORK AREAS ADDRESSING ILLEGAL TRAFFIC (OBJECTIVE 5) | | | | | |
|---|--|---|-------------------|--|---|
| Work areas | Activities | Actors ² | Targets/Timeframe | Indicators of progress | Implementation aspects |
| | 268. Promote efforts to prevent illegal international trafficking of toxic and hazardous chemicals and to prevent damage resulting from their transboundary movement and disposal. | National Governments IFCS WCO IGOs | 2006–2010 | Enforcement mechanisms are in place. Illegal trafficking of toxic and hazardous chemicals is reduced. | Provision of training and required equipment Legislation in place |
| | 269. Promote the adoption by intergovernmental organizations of decisions on the prevention of illegal international traffic in toxic and hazardous products. | IGOs | 2006–2010 | Intergovernmental organizations have adopted decisions on the prevention of illegal international traffic in toxic and hazardous products. | Chemical conventions Availability of information on extent of illegal traffic Capacity at the national level to implement control systems |
| | 270. Train customs, agricultural and health officials to detect illegal toxic hazardous chemicals. | National Governments | 2006–2010 | Customs, agricultural and health officials are trained to detect illegal toxic and hazardous chemicals. | |
| | 271. Create a global information network, including early warning systems, across international borders, especially at the regional level. | Interpol National Governments WCO WTO Trade unions NGOs | 2011–2015 | An information network, including early warning systems, is established for all regions. | Type of early warning system identified |
| Waste management | 272. Strengthen national strategies for prevention, detection and control of illegal transboundary movements of waste. | National Governments BCRCs Basel Convention Secretariat Industry Trade unions NGOs | 2006–2010 | Strengthened strategies are in place. | Provision of training and required equipment |
| | 273. Promote efforts to prevent illegal traffic of waste. | National Governments Basel Convention Secretariat Industry Trade unions NGOs | 2006–2010 | Illegal transboundary movements of waste are reduced. | Legislation Availability of trained professionals |

Resolutions

Adopted by the International Conference on Chemicals Management at its first session, Dubai, United Arab Emirates, 4-6 February 2006

I/1. Implementation arrangements

The Conference,

Having adopted the Dubai Declaration on International Chemicals Management and Overarching Policy Strategy and encouraged the use and further development of the Global Plan of Action for the Strategic Approach to International Chemicals Management (hereinafter referred to as the "Strategic Approach"),

Having incorporated implementation provisions within the text of the Overarching Policy Strategy of the Strategic Approach,

Wishing to highlight the common dedication of the participants at the Conference to cooperating in achieving high standards for health and environmental protection and taking advantage of the diversity that each of them brings to the Strategic Approach process,

Acknowledging that the participants come from many different geographical regions with different experiences, ideas and mechanisms for approaching chemicals management and that such diversity should be allowed to serve common goals and that all efforts and experiences should offer new lessons for facing the problems that affect all humankind,

Considering that arrangements are essential to implement expeditiously the Strategic Approach, to protect human health and the environment and to reach the Johannesburg Plan of Implementation¹ goal that, by 2020, chemicals are used and produced in ways that minimize significant adverse effects on human health and the environment,

Recalling decisions SS.VII/3 of 15 February 2002, 22/4 IV of 7 February 2003 and 23/9 II of 25 February 2005 of the Governing Council of the United Nations Environment Programme on the development of a strategic approach to international chemicals management, as endorsed by the World Summit on Sustainable Development in September 2002 and the United Nations World Summit² in September 2005,

1. *Calls on* all stakeholders, including Governments, intergovernmental and non-governmental organizations, regional economic integration organizations, representatives of civil society and the private sector, to take appropriate action to achieve the objectives set forth in the Strategic Approach;
2. *Encourages* Governments to focus their initial implementation work on those activities that will facilitate a prompt start in efforts to achieve the Johannesburg Plan of Implementation 2020 goal and the objectives set forth in the Strategic Approach, such as by continuing to facilitate existing international chemicals management priorities and considering additional efforts that are needed to develop a national Strategic Approach implementation plan, including the building of appropriate capacities and institutional arrangements, taking into consideration, as appropriate, existing priorities and elements;
3. *Commends* the Strategic Approach to the attention of the governing bodies of relevant intergovernmental organizations and encourages them to endorse or otherwise

¹ Plan of Implementation of the World Summit on Sustainable Development, para. 23 (*Report of the World Summit on Sustainable Development, Johannesburg, South Africa, 26 August–4 September 2002* (United Nations publication, Sales No. E.03.II. A.1 and corrigendum), chap I, resolution 2, annex).

² General Assembly resolution 60/1 of 6 September 2005, para. 56 (k).

appropriately acknowledge the Strategic Approach with a view to incorporating its objectives into their programmes of work within their mandates and to report thereon to the International Conference on Chemicals Management;

4. *Encourages* non-governmental organizations and the private sector to support implementation of the Strategic Approach at the national, regional and global levels, including through partnerships with Governments, intergovernmental organizations, regional economic integration organizations and other stakeholders;
5. *Invites* the Executive Director of the United Nations Environment Programme to convene further sessions of the International Conference on Chemicals Management, working in collaboration with the participating organizations of the Inter-Organization Programme for the Sound Management of Chemicals, the United Nations Development Programme and other intergovernmental organizations and bearing in mind that, where appropriate, sessions of the Conference should be held back-to-back with meetings of the governing bodies of relevant intergovernmental organizations in order to enhance synergies and cost-effectiveness and to promote the Strategic Approach's multi-sectoral nature;
6. *Calls on* Governments to designate national Strategic Approach focal points and to communicate the details of the focal points to the Strategic Approach secretariat referred to in paragraphs 11 and 12, below, as soon as possible;
7. *Calls on* non-governmental participants to designate Strategic Approach focal points and communicate the details of the focal points to the Strategic Approach secretariat referred to in paragraphs 11 and 12, below, as soon as possible;
8. *Recommends* that intersessional work be promoted through, among other things, the holding of regional meetings, the designation of regional Strategic Approach focal points and the communication of the details of those focal points to the Strategic Approach secretariat referred to in paragraphs 11 and 12, below, as soon as possible;
9. *Encourages* Governments and regional economic integration organizations with more advanced programmes to provide financial and technical assistance, including training, to other Governments, in particular those of least developed countries and small island developing States, through appropriate action at the national or regional level, in developing their infrastructure and capacity to meet the objectives set forth in the Strategic Approach;
10. *Encourages* Governments to give appropriate priority to chemicals management issues in their national sustainable development strategies and poverty reduction strategy papers;
11. *Requests* the Executive Director of the United Nations Environment Programme to establish and assume overall administrative responsibility for the Strategic Approach secretariat and to co-locate it with the chemicals and wastes cluster of the United Nations Environment Programme in Geneva;
12. *Invites* the Executive Director of the United Nations Environment Programme and the Director General of the World Health Organization to provide appropriate staff and other resources in accordance with the indicative budget and staffing provisions in tables 1 (budget) and 2 (staff) of the present resolution within available resources to enable their organizations to take lead roles in the secretariat in their respective areas of expertise in relation to the Strategic Approach and invites all Governments, other intergovernmental organizations and non-governmental organizations, including the private sector, to provide voluntary extrabudgetary resources in support of the secretariat in the fulfilment of its functions;
13. *Welcomes* the offer of the United Nations Environment Programme to provide a Professional staff member of the Strategic Approach secretariat at the P-5 level and a potential offer from the World Health Organization to provide a Professional staff member of the Strategic Approach secretariat at the P-4 level, subject to approval by the World

Health Assembly, from regular programme resources as contributions to the staffing foreseen in table 2;

14. *Invites* the Executive Director of the United Nations Environment Programme, in cooperation with the participating organizations of the Inter-Organization Programme for the Sound Management of Chemicals and the United Nations Development Programme, to facilitate the development of the Quick Start Programme to be established pursuant to resolution I/4 of the Conference to support the strengthening of capabilities and capacities for the implementation of the Strategic Approach and promote the full and effective participation of developing countries and countries with economies in transition in the further work of the Strategic Approach;
15. *Urges* Governments, regional economic integration organizations, intergovernmental organizations and non-governmental organizations to make contributions to the voluntary trust fund established by the United Nations Environment Programme to support Strategic Approach implementation activities under the Quick Start Programme.

I/2. Tribute to the Government of the United Arab Emirates

The Conference,

Having met in Dubai from 4 to 6 February 2006 at the gracious invitation of the Government of the United Arab Emirates,

Convinced that the efforts made by the Government of the United Arab Emirates and by the authorities of the Emirate and city of Dubai in providing facilities, premises and other resources contributed significantly to the smooth and successful conduct of the proceedings,

Deeply appreciative of the courtesy and hospitality extended by the Government of the United Arab Emirates and the Emirate and city of Dubai to the members of the delegations, observers and the secretariat of the United Nations Environment Programme attending the Conference,

Expresses its sincere gratitude to the Government of the United Arab Emirates, to the Zayed International Prize for the Environment and to the authorities of the Emirate and city of Dubai and, through them, to the people of United Arab Emirates, for the cordial welcome which they accorded to the Conference and to those associated with its work and for their contribution to the success of the Conference.

I/3. Intergovernmental Forum on Chemical Safety

The Conference,

Recognizing the unique, multifaceted and significant role which the Intergovernmental Forum on Chemical Safety has played in the area of sound chemicals management at the international, regional and national levels,

1. *Invites* the Forum to continue its important role in providing an open, transparent and inclusive forum for discussing issues of common interest and also new and emerging issues, and to continue to contribute through this to the implementation of the Strategic Approach to International Chemicals Management and the work of other chemicals-related international organizations and institutions;
2. *Requests* the Strategic Approach secretariat to establish and maintain a working relationship with the Forum in order to draw upon its expertise.

I/4. Quick Start Programme

The Conference,

Having incorporated financial considerations within the text of the Overarching Policy Strategy of the Strategic Approach to International Chemicals Management, including a Quick Start Programme supporting initial capacity-building activities for the implementation of Strategic Approach objectives,

Welcomes the prompt launching of the implementation of the Strategic Approach;

Decides to establish a Quick Start Programme for the implementation of Strategic Approach objectives building upon the outcomes of the International Conference on Chemicals Management and the Bali Strategic Plan for Technology Support and Capacity-building;

Also decides that the objective of the Quick Start Programme is to support initial enabling capacity-building and implementation activities in developing countries, least developed countries, small island developing States and countries with economies in transition;

Calls for the Quick Start Programme to include a United Nations Environment Programme trust fund and multilateral, bilateral and other forms of cooperation;

Invites Governments in a position to do so, regional economic integration organizations, intergovernmental organizations, the private sector, including industry, foundations, non-governmental organizations and other stakeholders, to contribute to the Programme;

Adopts the strategic priorities and institutional arrangements for the Quick Start Programme as set out in appendix I to the present resolution;

Invites the Executive Director of the United Nations Environment Programme to establish a voluntary, time-limited Quick Start Programme Trust Fund to provide seed-money to support the objectives of the Programme in accordance with the terms of reference set out in appendix II to the present resolution;

Also invites Governments in a position to do so, regional economic integration organizations, the private sector including industry, foundations and non-governmental organizations and other stakeholders, to contribute to the Quick Start Programme Trust Fund;

Invites the representatives of participating organizations of the Inter-Organization Programme for the Sound Management of Chemicals and the United Nations Development Programme to form a Trust Fund Implementation Committee for projects financed by the Quick Start Programme Trust Fund;

Decides to establish the Quick Start Programme Executive Board, consisting of two government representatives of each of the United Nations regions and all the bilateral and multilateral donors and other contributors to the Programme;

Requests the Strategic Approach secretariat to facilitate meetings of the Trust Fund Implementation Committee and the Quick Start Programme Executive Board;

Decides that, at each session of the International Conference on Chemicals Management, two national Government representatives of each United Nations region will be appointed to the Quick Start Programme Executive Board for the intersessional period;

Welcomes the contributions to the Programme already offered by Belgium, Norway, South Africa, Spain, Sweden, Switzerland and the United Kingdom of Great Britain and Northern Ireland.

APPENDIX I

Strategic approach to international chemicals management: strategic priorities and institutional arrangements for the Quick Start Programme

A. Objective

1. Building upon the outcomes of the International Conference on Chemicals Management and the Bali Strategic Plan for Technology Support and Capacity-building, the objective of the Quick Start Programme is to support activities to enable initial capacity-building and implementation in developing countries, least developed countries, small island developing States and countries with economies in transition consistent with their national priorities for the implementation of the Strategic Approach objectives as set out in section IV of the Overarching Policy Strategy.

B. Overall approach

2. The Quick Start Programme for the Strategic Approach will take fully into account the characteristics of the Strategic Approach process and its institutional arrangements. It will build upon the Bali Strategic Plan for Technology Support and Capacity-building and facilitate environmentally sound chemicals management. The Programme should help to identify and pave the way for activities that can be assisted by the private sector, including industry, and other non-governmental organizations and through bilateral and multilateral cooperation, for example technical assistance and the sharing of knowledge and experience. The programme will seek to enhance synergies with processes initiated under relevant chemicals and wastes multilateral environmental agreements. While aimed primarily at the country level, the Programme should allow for, and encourage, regional and global approaches.

C. Strategic priorities for the Quick Start Programme

3. The Quick Start Programme should mobilize resources for national priority initial enabling activities in keeping with the work areas set out in the strategic objectives of section IV of the Overarching Policy Strategy, in particular:

- a. Development or updating of national chemical profiles and the identification of capacity needs for sound chemicals management;
- b. Development and strengthening of national chemicals management institutions, plans, programmes and activities to implement the Strategic Approach, building upon work conducted to implement international chemicals-related agreements and initiatives;
- c. Undertaking analysis, interagency coordination, and public participation activities directed at enabling the implementation of the Strategic Approach by integrating – i.e., mainstreaming – the sound management of chemicals in national strategies, and thereby informing development assistance cooperation priorities.

4. Further operational guidance on these strategic priorities will be provided by the Executive Board as required.

D. Financial resources to support the Programme's activities

5. The Programme will invite bilateral and multilateral public and private cooperation and national government financing. It will benefit from a voluntary, time-limited Quick Start Programme Trust Fund administered by the United Nations Environment Programme.

E. Programme implementation

6. Activities financed through bilateral and multilateral cooperation will be implemented in accordance with the arrangements made by participants in that cooperation.

7. Activities financed by the Quick Start Programme Trust Fund will be implemented in accordance with the project management arrangements approved by the Trust Fund Implementation Committee.

F. Governance and reporting

8. The Executive Board will have two co-chairs, one from the regional representatives and one from the donors, elected annually, and will develop and adopt its rules of procedure and will be supported by the Strategic Approach secretariat. The Executive Board will take its decisions by consensus, pending the adoption of its rules of procedure.

9. The Executive Board will meet annually, back to back with another relevant meeting, to review progress under the Programme on the basis of reports from the Trust Fund Implementation Committee and Programme participants, as well as other relevant information provided to them on implementation of the programme.

10. Reports presented to the Executive Board will be made publicly available by the Strategic Approach secretariat.

11. The Executive Board will provide operational guidance on the implementation of the strategic priorities of the Quick Start Programme and advise on other relevant matters as required.

12. The Executive Board will report to the International Conference on Chemicals Management at its second and third sessions on the implementation of the Quick Start Programme.

APPENDIX II

Terms of reference of the Quick Start Programme Trust Fund of the Strategic Approach to International Chemicals Management

A. Administering organization

1. The Executive Director of the United Nations Environment Programme is invited to establish and manage the Quick Start Programme Trust Fund of the Strategic Approach to International Chemicals Management. The Strategic Approach secretariat will provide administrative support to the Quick Start Programme Trust Fund. This Trust Fund shall be separate from the existing Trust Fund used for the expenses of the Strategic Approach secretariat and the inter-governmental process.

B. Objective

2. The Quick Start Programme Trust Fund will provide seed money to support the objective and strategic priorities of the Programme.

C. Time limit

3. The Quick Start Programme Trust Fund will be open to receive voluntary contributions for five years from the date it is established by the Executive Director. Funds may be disbursed for a maximum of seven years from that date.

D. Sources of financing

4. Contributions shall be encouraged from Governments, regional economic integration organizations, the private sector, including industry, foundations, other non-governmental organizations and other stakeholders.

E. Eligibility rules

5. Developing countries and countries with economies in transition will be eligible for support. Approval of projects meeting the objectives outlined in section IV of the Overarching Policy Strategy will take into account geographic and sectoral balance considerations and pay particular attention to urgent needs and the requirements of least developed countries and small island developing States.

6. Project proposals may be presented by Strategic Approach participating Governments that have endorsed or given other appropriate formal recognition of and support for the Strategic Approach, through the relevant Governments. Project proposals must contain full justification for the amount sought.

7. On an exceptional basis and having regard to the resources and administrative capacity available, representatives of civil society networks participating in the Strategic Approach shall also be eligible to present project proposals, subject to endorsement by the countries hosting the projects.

8. Quick Start Programme Trust Fund allocations should be limited to \$50,000-\$250,000 per project proposal, including administration fees not to exceed 13 per cent of a project's value.

F. Project assessment and approval

9. The participating organizations of the Inter-Organization Programme for the Sound Management of Chemicals and the United Nations Development Programme may provide technical assistance in the development of project proposals, upon request by project proponents.

10. Project proposals will be country-driven and will be submitted to the Strategic Approach secretariat and screened for completeness and eligibility.

11. Screened projects will be submitted by the Strategic Approach secretariat to the Trust Fund Implementation Committee for appraisal and approval.

12. Independent monitoring and evaluation and reporting on project implementation to the Trust Fund Implementation Committee will be the responsibility of project proponents.

G. Guidance by the Executive Board

13. The regional representatives and those donors of the Executive Board who have contributed to the Trust Fund will meet during the annual meeting of the Executive Board to consider the operation of the Quick Start Programme Trust Fund. They will review reports from the Trust Fund Implementation Committee on project execution and from the Executive Director of UNEP on the financial resources and administration of the Quick Start Programme Trust Fund and provide guidance and take decisions thereon.

14. The Executive Board will report to the International Conference on Chemicals Management at its second and third sessions on the operations of the Trust Fund.

H. Accounts and audit

15. The accounts and financial management of the Quick Start Programme Trust Fund shall be subject to the internal and external audit process of the United Nations. Accounts for the Trust Fund shall be presented to the Executive Board as soon as possible after the financial period is closed and shall also be considered by the International Conference on Chemicals Management.
