## INTRODUCTION

### *Historical background*

1. The Statistical Commission, recognizing the growing need for international trade statistics analysed by broad economic categories, recommended, at its thirteenth session, that data on large economic classes of commodities, distinguishing food, industrial supplies, capital equipment, consumer durables and consumer non-durables, should be compiled for each reporting country and for the world and principal regions to supplement the summary data already compiled on the basis of the sections of the Standard International Trade Classification (SITC).<sup>1</sup>

2. Following this recommendation, the Statistical Office of the United Nations Secretariat prepared a draft classification of international trade by Broad Economic Categories (BEC), which would provide for such a compilation. Successive drafts of the classification were considered by the Statistical Commission at its fourteenth and fifteenth sessions and were referred back to the Statistical Office by the Commission with specific guidelines for further study and consultation. At its sixteenth session, the Commission reviewed a further draft (E/CN.3/408) which had been prepared by the Statistical Office based upon the guidelines of the Commission and the comments of selected countries and international organizations. The Commission was unanimous in considering that the draft classification met the requirements which it had specified at previous sessions and by its resolution 9 (XVI) requested the Secretary-General to publish the classification for international use and as a guideline for national use.<sup>2</sup>

3. The original BEC was defined in terms of divisions, groups, subgroups and basic headings of the *Standard International Trade Classification, Revised*<sup>3</sup> and issued in 1971.<sup>4</sup> The BEC has been revised twice since 1971. The first revision defined BEC in terms of the *Standard International Trade Classification, Revision 2*<sup>5</sup> and was issued in 1976.<sup>6</sup> The second revision defined BEC in terms of the *Standard International Trade Classification, Revision 3*<sup>7</sup> and was issued in 1986.<sup>8</sup> Each of these revisions was prepared and issued in response to requests by the Statistical Commission<sup>9,10</sup> and resolutions adopted by the Economic and Social Council (resolution 1948 (LVIII) of 7 May 1975 and resolution 1985/7 of 28 May 1985). The present revision of the BEC is the third and it is published for technical reasons only, to replace the second revision, in order to provide full details of the SITC, Rev. 3 headings corresponding to BEC categories 41\* and 62\*. These categories were incomplete in the second revision due to the omission of one page. The present revision also incorporates the corrigendum that had been issued to the second revision, and a revised introduction.

### *The classification*

4. The BEC is set out below:

    - 321\* Motor spirit
    - 322\* Other
- 4\* Capital goods (except transport equipment), and parts and accessories thereof
  - 41\* Capital goods (except transport equipment)
  - 42\* Parts and accessories
- 5\* Transport equipment, and parts and accessories thereof
  - 51\* Passenger motor cars
  - 52\* Other
    - 521\* Industrial
    - 522\* Non-industrial
  - 53\* Parts and accessories
- 6\* Consumer goods not elsewhere specified
  - 61\* Durable
  - 62\* Semi-durable

---

<sup>11</sup> The asterisk following each reference to a BEC classification code number is a device to distinguish the BEC classification code number from the numbered sections, divisions and groups of the SITC, Rev. 3, which is used to define the composition of each BEC item.

63\* Non-durable

7\* Goods not elsewhere specified

#### *Description of the classification*

5. The BEC includes nineteen basic categories. The basic categories are those that are not further subdivided in the above listing of the classification, namely, 111\*, 112\*, 121\*, 122\*, 21\*, 22\*, 31\*, 321\*, 322\*, 41\*, 42\*, 51\*, 521\*, 522\*, 53\*, 61\*, 62\*, 63\* and 7\*. Each category of the BEC is defined in terms of divisions, groups, subgroups and basic headings of the SITC, Rev. 3. The categories of the BEC are a rearrangement and aggregation of the basic headings of the SITC, Rev. 3 reflecting the end-uses of the commodities covered by each basic heading. Each SITC, Rev. 3 basic heading is allocated entirely to one BEC category. The allocation is done on the basis of the main end-use of the commodities in each SITC, Rev. 3 basic heading, although it is recognized that many commodities that are traded internationally may be put to a variety of uses.

6. The BEC:

(i) Distinguishes the five categories specified by the Commission at its thirteenth session; namely food, industrial supplies, capital equipment, consumer durables and consumer non-durables;

(ii) Provides separate categories for "fuels and lubricants" and "transport equipment" in pursuance of the Commission's discussions at its fourteenth session,<sup>12</sup> and within these categories includes special subcategories for "motor spirit" and "passenger motor cars";

(iii) Provides within the categories relating to capital goods, a distinction between equipment proper and parts and accessories;

(iv) Provides within the categories for "Food and beverages", "Industrial supplies not elsewhere specified" and "Fuels and lubricants", a distinction between "primary" commodities and "processed" commodities;

(v) Provides within the categories for "Primary food and beverages", "Processed food and beverages" and "Transport equipment" (other than parts and accessories and passenger motor cars), a distinction between commodities for industry and those for household consumption.

#### *Purposes of the classification*

7. The BEC was originally devised mainly for use by the Statistical Office of the United Nations Secretariat for the summarization of data on international trade by large economic classes of commodities (see para. 1 above). In addition, it was designed to serve as a means for converting external trade data compiled on the SITC into end-use categories that are meaningful within the framework of the System of National Accounts (SNA),<sup>13</sup> namely categories approximating the three basic classes of goods in the SNA: capital goods, intermediate goods and consumption goods.<sup>14</sup> Specifically, the subcategories of the BEC can be aggregated to approximate these three classes of goods. This aggregation permits external trade statistics to be considered jointly with other sets of general economic statistics, such as national accounts and industrial statistics, for national, regional or world level economic analysis.

8. The classification was also expected by the Statistical Commission to serve as a guideline for national classifications of imports according to broad economic categories.<sup>15</sup> However, at its sixteenth session, the Statistical Commission "recognized that countries might wish to adapt the classification for national purposes in different ways to meet national requirements,"<sup>16</sup> and concluded that "consequently, the classification was not to be regarded as a

| 7* Goods not elsewhere specified          | (see para. 11 below) |

*The basic classes of goods in the SNA in terms of BEC*

10. The composition of the three basic classes of goods in the SNA in terms of the basic categories of the BEC is shown below:

1. Capital goods

Sum of categories:

41\* Capital goods (except transport equipment)

521\* Transport equipment, industrial

2. Intermediate goods

Sum of categories:

111\* Food and beverages, primary, mainly for industry

121\* Food and beverages, processed, mainly for industry

21\* Industrial supplies not elsewhere specified, primary

22\* Industrial supplies not elsewhere specified, processed

31\* Fuels and lubricants, primary

322\* Fuels and lubricants, processed (other than motor spirit)

42\* Parts and accessories of capital goods (except transport equipment)

53\* Parts and accessories of transport equipment

3. Consumption goods

Sum of categories:

112\* Food and beverages, primary, mainly for household consumption

122\* Food and beverages, processed, mainly for household consumption

522\* Transport equipment, non-industrial

61\* Consumer goods not elsewhere specified, durable

62\* Consumer goods not elsewhere specified, semi-durable

63\* Consumer goods not elsewhere specified, non-durable

11. The above groupings include only 16 of the 19 BEC basic categories as categories 321\* Motor spirit, 51\* Passenger motor cars and 7\* Goods not elsewhere specified, are omitted. Category 321\* Motor spirit and Category 51\* Passenger motor cars are used extensively both for industry and for household consumption. Category 7\* Goods not elsewhere specified, includes among other commodities, a range of military equipment, postal packages and special transactions and commodities not classified according to kind and can be a mix of the SNA classes of goods. These three BEC categories are of particular importance in international trade and of great interest to economists and others studying international flows of commodities. As indicated in paragraphs 16 and 18 below, these commodities were considered to be sufficiently important to warrant establishment in the BEC of separate categories. Users may choose to make their own assignments of these three categories of goods among the basic SNA classes of goods.

### *Description of the categories*

12. The BEC makes provision for the main categories originally requested by the Commission (see paras. 1 and 6 above). In addition, in order to provide elements which enable the construction of aggregates approximately comparable to those for the three basic classes of goods in the SNA, a number of subcategories were established to supplement these main categories. The subcategories reflect the various end-uses of commodities. Some features of the commodity composition of each of the BEC categories are outlined in the following paragraphs.

13. In each of the categories 1\* Food and beverages, 2\* Industrial supplies not elsewhere specified and 3\* Fuels and lubricants, subcategories of primary and processed commodities were established. In general, commodities have been classified as "primary" if they are characteristically products of primary sectors of the economy - i.e., farming, forestry, fishing, hunting, and the extractive industries. In addition, commodities which characteristically are products of other sectors, such as manufacturing are also classified as primary if nearly all the value of the product is contributed by one of the primary sectors of the economy. For example, cotton undergoes physical transformation when ginned, but as almost all the value of ginned cotton derives from the agricultural sector, it is classified in the BEC as a primary commodity, not as a product of the textile industry in which cotton ginning is included in the International Standard Industrial Classification of All Economic Activities (ISIC).<sup>18</sup> Canned and prepared foods, on the other hand, owe much of their value to the food-processing industry and are therefore generally excluded from the primary category in the BEC and are consequently classified as processed. Thus, a commodity is classified as primary if it is a product of farm, forest, fishing and hunting, or of an extractive industry, to whose value transformation has made only a minor contribution. Waste and scrap materials are also classified as primary commodities in the BEC. If a commodity is not defined as primary, it is classified as processed in the BEC.

14. In category 1\* Food and beverages, in order to facilitate analysis in terms of the SNA classes, categories 11\* Primary food and beverages and 12\* Processed food and beverages, were subdivided to provide for commodities "mainly for industry" and "mainly for household consumption". The main or usual end-use of many of the food items in BEC category 1\* Food and beverages, is household consumption, while other food items in that category are used as intermediate goods in industry. For instance, tea is mainly used for household consumption, as are processed canned foods. Wheat, however, is commonly supplied to the milling industry to produce flour, and flour, in turn, is commonly supplied to bakeries to produce bread: therefore, both wheat and flour may be considered as intermediate goods for the food industry. In addition, many food items may in some instances be used for industry, and in other instances for household consumption. In the case of category 11\* Primary food and beverages, the great majority of items are capable of dual use, and the only practicable way of making an assignment between the SNA classes of goods in this category is by adopting conventions. Thus, for example, the conventions are adopted that food grains, when traded internationally, are normally for use by industry, and that fresh fruit and vegetables, when traded internationally, are normally for household consumption. In the case of category 12\* Processed food and beverages, the majority of items can be allocated to an SNA class with greater certainty, but a considerable application of conventions is nevertheless involved in the case of several commodities.

15. In category 2\* Industrial supplies not elsewhere specified, no breakdown beyond primary and processed was called for as the assignment to the SNA classes of goods is entirely to intermediate goods.

16. In category 3\* Fuels and lubricants, the processed component was further subdivided to identify 321\* Motor spirit and 322\* Other processed fuels and lubricants. Motor spirit was separately identified because of its importance as a commodity in trade. It is a commodity commonly used by both industry and consumers, that is, it can be both an intermediate and a consumption good. It is separately identified in the BEC but not allocated to a specific SNA class

---

<sup>18</sup> United Nations publication, Sales No. E.68.XVII.8.

(see para. 11 above). Commodities in categories 31\* Primary fuels and lubricants and 322\* Other processed fuels and lubricants are entirely intermediate goods.

17. Category 4\* Capital goods (except transport equipment), and parts and accessories thereof, is divided into two subcategories in which commodities are classified according to whether their main end-use is as capital goods (41\* Capital goods, excluding transport equipment) or as intermediate goods (42\* Parts and accessories). This category includes machinery, such as electrical generators and computers, and other manufactured goods, such as medical furniture, which are used by industry, government and non-profit private institutions. They are, in fact, producers' goods that are defined in the SNA as part of fixed capital formation and are thus capital goods. Parts and accessories essential to the maintenance of machinery, and unassembled components of machinery, etc. used as supplies to assembling plants, are inputs to industry and are, for this reason, considered as intermediate goods. However, see paragraph 18 below under category 5\* Transport equipment, and parts and accessories thereof, for the treatment of unassembled vehicles.

18. Category 5\* Transport equipment, and parts and accessories thereof covers finished ships, road vehicles, aircraft, railway and tramway rolling stock and their parts and other accessories. In the SNA, the finished commodities are classified as capital goods or as (durable) consumer goods, while parts and accessories are treated as intermediate goods. The category was broken down into 51\* Passenger motor cars, 52\* Other transport equipment (i.e., other than passenger motor cars) and 53\* Parts and accessories. Category 51\* Passenger motor cars was identified as a separate category because of the importance of passenger motor cars in trade. They are commodities commonly used in industry as capital goods or as consumer durables; that is, they can be a capital good or a consumption good. The subcategory is separately identified in the BEC but not allocated to a specific SNA class (see para. 11 above). Most of subcategory 52\* Other transport equipment traded internationally is classified as capital goods, but several items, such as motorcycles and bicycles, are normally used by consumers and consequently are classified as consumption goods. Subcategories 521\* Industrial and 522\* Non-industrial were introduced to cover these. Subcategory 53\* Parts and accessories, is considered as intermediate goods. However, unassembled vehicles (part of SITC headings 781, 782 and 783), which are in fact, input into assembling plants and should be allocated to BEC category 53\*, are classified together with the corresponding assembled vehicles in categories 51\* and 52\* because assembled and unassembled vehicles are classified within the same SITC heading.

19. Category 6\* Consumer goods not elsewhere specified, while fully assignable as consumption goods in the SNA, has three subcategories in the BEC reflecting the durability of consumption goods. Subcategory 61\* Durable consumer goods, includes commodities which have an expected lifetime of more than one year and of a relatively high value, such as refrigerators and washing machines, together with other commodities with a useful life of three years or more; subcategory 62\* Semi-durable consumer goods, includes those which have an expected lifetime of use of more than one year but less than three years and are not relatively of high value; and subcategory 63\* Non-durable consumer goods includes those with an expected lifetime of a year or less.

20. Category 7\* Goods not elsewhere specified includes, among other commodities, a range of military equipment, postal packages and special transactions and commodities not classified according to kind. No subcategories are made for this category in the BEC and it is not assigned to any of the basic classes of the SNA (see para. 11 above).

#### *General remarks*

21. It is proposed that in order to facilitate international comparison by end-use, the 19 categories and the three derived classes of the BEC - capital goods, intermediate goods and consumption goods - be recognized internationally as a useful classification for all commodities traded internationally. They are not intended to interfere with or supersede a classification that is more compatible with the internal statistical system of any country. Countries may wish to utilize the BEC for national purposes as a supplement to existing classifications.

## CLASSIFICATION BY BROAD ECONOMIC CATEGORIES (BEC)

- 1\* Food and beverages
  - 11\* Primary
    - 111\* Mainly for industry

- 723.2 Mechanical shovels, excavators and shovel-loaders, self-propelled
- 723.3 Moving, grading, levelling, scraping, excavating, tamping, compacting, extracting or boring machinery, for earth, minerals or ores, self-propelled, n.e.s.
- 723.4 Construction and mining machinery, n.e.s.
- 724.35 Sewing-machines (other than household-type)
- 724.41 Machines for extruding, drawing, texturing or cutting man-made textile materials
- 724.42 Machines for preparing textile fibres
- 724.43 Textile-spinning, doubling or twisting machines; textile-winding (including weft-winding) or reeling machines
- 724.5 Weaving machines, knitting-machines, stitch-bonding machines and machines for making gimped yarn, tulle, lace, embroidery, trimmings, braid or net and machines for tufting or for making non-wovens; machines for preparing yarns for use on the machines of headings 724.51, 724.52 and 724.53; machines for the manufacture or finishing of felt or non-wovens in the piece or in shapes (including machines for making felt hats); blocks for making hats
- 724.7 Machinery (other than machines of subgroup 775.1) for washing, cleaning, wringing, drying, ironing, pressing (including fusing presses), bleaching, dyeing, dressing, finishing, coating or impregnating textile yarns, fabrics or made-up textile articles; machines for applying the paste to the base fabric or other support used in the manufacture of floor coverings such as linoleum; machines for reeling, unreeling, folding, cutting or pinking textile fabrics
- 724.81 Machinery for preparing, tanning or working hides, skins or leather
- 724.83 Machinery for making or repairing footwear
- 724.85 Machinery for making or repairing articles of hides, skins or leather, other than footwear
- 725.1 Machinery for making pulp of fibrous cellulosic material or for making or finishing paper or paperboard
- 725.2 Other machinery for making up paper pulp, paper or paperboard (including cutting machines of all kinds)
- 726.31 Machinery, apparatus and equipment (other than the machine tools of subgroup 728.1 or group 731) for type-founding or typesetting, for preparing or making printing blocks, plates, cylinders or other printing components
- 726.5 Offset printing machinery
- 726.6 Other printing machinery; machines for uses ancillary to printing
- 726.81 Bookbinding machinery (including book-sewing machines)
- 727.11 Machinery used in the milling industry or for the working of cereals or dried leguminous vegetables (other than farm-type machinery)
- 727.21 Machinery for the extraction or preparation of animal or fixed vegetable fats and oils

- 727.22 Machinery, n.e.s., for the industrial preparation or manufacture of food or drink
- 728.11 Machine tools for working stone, ceramics, concrete, asbestos-cement or like mineral materials or for cold-working glass (other than machines of subgroups 731.1 and 745.1)
- 728.12 Machine tools (including machines for nailing, stapling, gluing or otherwise assembling) for working wood, cork, bone, hard rubber, hard plastics or similar hard materials (other than machines of subgroups 731.1 and 745.1)
- 728.31 Machinery for sorting, screening, separating or washing earth, stone, ores or other mineral substances in solid (including powder or paste) form
- 728.32 Machinery for crushing or grinding earth, stone, ores or other mineral substances in solid (including powder or paste) form
- 728.33 Machinery for mixing or kneading earth, stone, ores or other mineral substances in solid (including powder or paste) form
- 728.34 Machinery for agglomerating, shaping or moulding solid mineral fuels, ceramic paste, unhardened cements, plastering materials or other mineral products in powder or paste form; machines for forming foundry moulds of sand
- 728.4 Machinery and mechanical appliances specialized for particular industries, n.e.s.
- 731 Machine tools working by removing metal or other material
- 733 Machine tools for working metal, sintered metal carbides or cermets, without removing material
- 735.1 Work holders, self-opening die-heads and dividing heads for machine tools; tool holders
- 737.11 Converters, ingot moulds and ladles
- 737.12 Casting machines
- 737.21 Metal-rolling mills
- 737.31 Soldering irons and guns
- 737.32 Other brazing or soldering machines and apparatus
- 737.33 Machines and apparatus for resistance welding of metal, fully or partly automatic
- 737.34 Other machines and apparatus for resistance welding of metal
- 737.35 Machines and apparatus for arc (including plasma-arc) welding of metal, fully or partly automatic
- 737.36 Other machines and apparatus for arc welding of metal
- 737.37 Other machines and apparatus for welding (other those of subgroup 737.4); electric machines and apparatus for hot-spraying of metals or sintered metal carbides
- 737.41 Hand-held blowpipes

- 737.42 Other gas-operated machinery and apparatus
- 737.43 Other machinery and apparatus for welding (other than that of subgroup 737.3)
- 741.21 Furnace burners for liquid fuel
- 741.23 Other furnace burners (including combination burners)
- 741.25 Mechanical stokers, including their mechanical grates, mechanical ash dischargers and similar appliances
- 741.31 Resistance-heated furnaces and ovens, electric
- 741.32 Induction or dielectric furnaces and ovens
- 741.33 Other electric furnaces and ovens
- 741.34 Other induction or dielectric heating equipment
- 741.36 Furnaces and ovens for the roasting, melting or other heat-treatment of ores, pyrites or of metals, non-electric
- 741.37 Bakery ovens (including biscuit ovens), non-electric
- 741.38 Other non-electric furnaces and ovens (including incinerators)
- 741.43 Refrigerating or freezing chests (other than household-type), cabinets, display counters, showcases and similar refrigerating or freezing furniture
- 741.45 Other refrigerating or freezing equipment; heat pumps
- 741.51 Air-conditioning machines, window- or wall-type, self-contained
- 741.55 Other air-conditioning machines
- 741.71 Producer gas or water gas generators, with or without their purifiers; acetylene gas generators and similar water process gas generators, with or without their purifiers
- 741.73 Distilling or rectifying plant
- 741.74 Heat-exchange units
- 741.75 Machinery for liquifying air or other gases
- 741.8 Other machinery, plant and similar laboratory equipment, whether or not electrically heated, for the treatment of materials by a process involving a change of temperature, not being machinery or plant of a kind used for domestic purposes; instantaneous or storage water-heaters, non-electric
- 742.1 Pumps fitted or designed to be fitted with a measuring device
- 742.2 Fuel, lubricating or cooling medium pumps for internal combustion piston engines
- 742.3 Concrete pumps
- 742.4 Reciprocating positive displacement pumps, n.e.s.

- 742.7 Pumps for liquids, n.e.s., and liquid elevators
- 743.1 Air or vacuum pumps, air or other gas compressors, ventilating or recycling hoods (other than cooker hoods) incorporating a fan
- 743.43 Other fans
- 743.5 Centrifuges (including centrifugal driers), n.e.s.
- 743.6 Filtering and purifying machinery and apparatus, for liquids or gases
- 744.11 Self-propelled trucks powered by an electric motor, fitted with lifting or handling equipment
- 744.12 Other self-propelled trucks fitted with lifting or handling equipment
- 744.13 Other works trucks fitted with lifting or handling equipment
- 744.14 Works trucks, electrical, self-propelled, not fitted with lifting or handling equipment
- 744.15 Other self-propelled works trucks, not fitted with lifting or handling equipment; tractors of the type used on railway station platforms
- 744.2 Pulley tackle and hoists (other than skip hoists or hoists of a kind used for raising vehicles); winches and capstans
- 744.3 Ships' derricks; cranes (including cable cranes); mobile lifting frames, straddle carriers and works trucks fitted with a crane
- 744.4 Jacks; hoists of a kind used for raising vehicles
- 744.7 Continuous-action elevators and conveyors, for goods or materials
- 744.8 Lifting, handling, loading or unloading machinery, n.e.s.
- 745.11 Tools for working in the hand, pneumatic
- 745.12 Tools for working in the hand, with self-contained non-electric motor
- 745.21 Dishwashing machines (other than household-type)
- 745.23 Machinery for cleaning or drying bottles or other containers
- 745.27 Other packing or wrapping machinery
- 745.31 Weighing-machinery (excluding balances of the sensitivity of 5 cg or better, personal weighing-machines and household scales), including weight-operated counting and checking machines
- 745.32 Personal weighing-machines (including baby scales); household scales
