Notes

This handbook has been prepared by the UNCTAD secretariat based on the information provided by the Ministry of Foreign Affairs of Japan. It provides a general explanation of Japan's scheme to allow officials and users responsible or involved in GSP issues to gain a better understanding of the scheme.

The handbook is based on the Temporary Tariff Measures Law, the Cabinet Order for Enforcement of the Temporary Tariff Measures Law and the Administrative Rule for Enforcement of the Temporary Tariff Measures Law. The original Japanese language versions of these texts are the sole authoritative versions in the event of a dispute.

The tariff item numbers used in this publication are in accordance with the nomenclature of the International Convention on the Harmonized Commodity Description and Coding System (HS number). The product descriptions found in the lists have been reformulated to help understanding. Readers may wish refer to the Customs Tariff Schedules of Japan, published by the Japan Tariff Association, for further information on tariff item numbers and descriptions of Japanese GSP-eligible products and other products.

Further information on the Japanese GSP scheme is available on the following Ministry of Foreign Affairs of Japan website: **<http://www.mofa.go.jp>**.

Checklist: how to benefit from Japan's GSP

Step 1: Establish the product's tariff classification

- You should establish the correct tariff classification (Tariff Item Number, HS-based) of the product intended for export to Japan.

Step 2: Check the product coverage

- You should find out whether your product is eligible for preference under Japan's GSP scheme.
- To do this, you should examine the product lists of the GSP scheme in relation to the precise tariff classification and product description.

Step 3: Assess the preferential margin

- If your product is eligible for preferential treatment under Japan's GSP scheme, you should assess the preferential margin to determine the price you can offer your buyer/importer.

Step 4: Check ceiling lists

- You should check ceilings which are set annually and understand how they are administered.
- You should check the latest monthly digest of ceilings, which is reported in Japan's Official Gazette, or on the public notice boards at Custom offices.

Step 5: Comply with origin criteria

- You should ensure that your product complies with the origin criteria set by Japan. Each scheme lays down its own origin criteria.

Step 6: Check consignment conditions

- You must ensure that the consignment conditions specified are met.

Step 7: Prepare documentary evidence

- The GSP scheme requires the combined Declaration and Certificate of Origin Form A as documentary evidence. If necessary, additional certificates are also required.

Explanatory notes on Japan's GSP scheme

The Generalized System of Preferences (GSP), based on the agreement reached at UNCTAD, aims at contributing to the economic development of developing countries. GSP provides benefits to developing countries by enabling qualified products to enter the markets of preference, thereby giving reduced or free rates of duty to developed countries.

Japan's GSP started on 1 August 1971 and is effective until 31 March 2011.

1. Beneficiaries

Japan grants preferential tariff treatment under its GSP scheme to 140 developing countries and 15 territories.

Beneficiaries are designated by Cabinet Order from countries/territories requesting for preferential treatment. The latter is subject to meeting the following criteria:

- The beneficiary country or the territory must have a developing economy.
- The territory must have its own tariff and trade system.
- The country or the territory wishes to receive preferential tariff treatment under the GSP scheme.
- The beneficiaries must be prescribed by a Cabinet Order as a country or a territory to which such preferences may appropriately be extended.
- Only beneficiary countries designated as least developed countries (LDCs) in the General Assembly of the United Nations are eligible for special preferential treatment for LDCs.

2. Product coverage (under the GPT treatment)

2.1. Agricultural and fishery products (HS chapters 1-24)

Japan grants General Preferential Tariff (GPT) treatment for selected agricultural and fishery products in 339 items (9-digit base, hereinafter the same).

2.2. Industrial products (HS chapters 25-97)

Preferences are granted for all industrial products, including products covered by preferences are granted only to LDCs, with the exception of products in 118 items.

3. Depth of tariff cuts (GST rates)

3.1. Agricultural and fishery products (HS chapters 1-24)

Various tariff reductions, including duty-free treatment, apply to certain agricultural and fishery products originating in developing country beneficiaries, except LDCs.

3.2. Industrial products (HS chapters 25-97)

All industrial products are in principle given duty-free treatment, with the exception of products for which preferences are granted only to LDCs and some sensitive items for which GPT treatment are limited to the ceiling (78 product groups - 1,264 items), and with GPT treatment is free or set at 20, 40, 60 or 80 per cent of most-favoured-nation (MFN) rates.

4. Ceilings (under the GSP treatment)

4.1. Ceilings

For agricultural and fishery products (HS chapters 1- 24), there are no ceilings.

For industrial products (HS chapters 25-97), there are no ceilings for a number of industrial products. For the rest, GPT imports are allowed until they exceed the ceilings. The ceilings are calculated for each fiscal year for 78 product groups (1,264 items) – each covering products of HS chapter, heading or sub-heading.

4.2. Calculation of ceilings

Ceilings are calculated in the following manner: FY 2000-2010: ceilings = ceiling of the previous FY, multiplied by 1.03.

4.3. Utilization of ceilings

The ceilings for each product group are open for utilization by all preference-receiving countries on an equal footing. No allocation or reservation is made for any individual beneficiary country. After GPT preferential imports exceed the ceiling, GPT treatment shall be suspended, i.e. the MFN rate of duty shall apply. Also, GPT treatment shall partly be suspended for a particular product group with reference to a particular preference-receiving country when GPT imports of products originating in that country exceed a maximum country amount of one-fifth of the total value/quantity of the ceiling.

4.4. Administration of ceilings and maximum country amounts

Ceilings and maximum country amounts are administrated on a first-come-first-served basis subject to monthly control and the MFN rate is applied as of the middle of the following month, i.e. after the ceiling or the maximum country amount has been exceeded.

5. Escape clause

Where increased preferential imports of a product cause, or threaten to cause, damage to a domestic industry, preferential treatment on the product may be suspended temporarily.

6. Graduation of advanced beneficiaries

Advanced beneficiaries are to be excluded from the list of GSP beneficiaries under the annual review. The "graduation" process begins with "partial graduation", if applicable, in order to mitigate its impact on "graduating" economies.

In cases of "partial graduation," a product of a beneficiary country or territory is to be excluded from the GPT-treatment product coverage if : the country or territory in question is classified as a high-income economy in the previous year's World Bank Atlas; if it is not in the World Bank Atlas, the country in question needs to have the same level of GNP (gross national product) per capita; and its exports of the product to Japan exceed 25 per cent of the world's exports of the product to Japan, and at the same time are more than one billion yen.

Each country or territory and product shall be reviewed every year. If any above conditions are not met, preferential tariff treatment shall be given.

Furthermore, as of 1 April 2000, a beneficiary country or territory is to be excluded from the list of GSP beneficiaries if it is classified as a high-income economy in the World Bank Atlas for the previous three years in a row; in the event it is not in the World Bank Atlas, it needs to have the same level of GNP per capita.

When a country or territory which is not the list of GSP beneficiaries is not classified as a high-income economy for three consecutive years, they shall be subject to the GSP scheme if they formulate a request to Japan to apply the GSP beneficiary status to them once again.

7. Competitiveness-focused, product-by-product exclusion

Under the annual review, a product from a developing beneficiary country or territory which is found to be highly competitive in the Japanese market is to be excluded from the GPT-treatment product coverage, when the following criteria are met in the course of two consecutive calendar years: If the imports of a product from a developing beneficiary (except LDCs) to Japan in value term account for more than 50 per cent of its import from the world to Japan, and at the same time amount to over one billion yen.

However, any product that meets such criteria shall not be excluded when it is determined that there is no need to exclude it, considering the existence of domestic output or various impacts on a domestic industry. Also the products in the ceiling product groups, which meet such criteria above, shall not be excluded.

Preferential tariff treatment shall be re-introduced for the products that cannot meet the above criteria in two consecutive calendar years after exclusion.

8. Special preferential treatment for least developed countries (LDCs)

Tariff-free and quota-free are special preferential treatment which are offered to the beneficial LDCs for all products under the GPT treatment and additional products for which preferences are granted only to LDCs.

With regard to the refined copper imported from the Democratic Republic of Congo and Zambia, its preferential tariff rate is free but the ceiling will not be removed until the end of the FY 2005.

9. Rules of origin

In order for goods exported from a preference-receiving country to be eligible for preferential tariff treatment, they must be recognized as originating in that country under the origin criteria of the Japanese GSP scheme, and transported to Japan in accordance with its rules for transportation.

9.1. Rules for transportation (direct consignment)

This rule is to ensure that the goods retain their identity and are not manipulated or further processed in the course of shipment.

- (i) In principle, the goods must be transported directly to Japan without passing through any territory other than the exporting preference-receiving country.
- (ii) However, with regard to goods transported to Japan through the territories of countries other than the exporting preference-receiving country, they are entitled to preferential treatment if:
 - (a) they have not undergone any operations in the transit countries other than trans-shipment or temporary storage exclusively on account of transport requirements, and
 - (b) the trans-shipment or temporary storage has been carried out in a bonded area or any other similar place, under the supervision of the customs authorities of those transit countries.
- (iii) With regard to goods exported from a preference-receiving country, for temporary storage or display at exhibitions, fairs and similar performances in another country, which have been exported by the person who has so exported the goods from another country to Japan, they are entitled to preferential treatment if:
 - (a) the transportation to Japan from the country where the exhibition (etc.) has been held falls under (i) or (ii) above; and
 - (b) the exhibition (etc.) has been held in a bonded area or any other similar place under the supervision of the Customs authorities of that country.

9.2. Origin criteria

Goods are considered as originating in a preference-receiving country if they are wholly obtained in that country.

Goods which have been partially or completely produced from materials or parts imported from other countries, or of unknown origin, are considered as originating in a preference-receiving country if those materials or parts used have undergone sufficient working or processing in that country. As a general rule, working or processing operations will be considered sufficient when the resulting goods is classified under an HS tariff heading (4 digits), other than that covering each of the non-originating materials or parts used in the production.

However, there are two exceptions to this rule. One is that some working or processing will not be considered sufficient when working or processing is actually so simple even if there is a change in the HS heading (see Annex 6, Minimal processes which are not accepted as obtaining original status).

The other is that some goods which are required to satisfy the specific conditions in order to obtain originating status without a change in the HS heading (see Annex 7, List of processed products for which the condition for origin country acknowledgement is specified).

9.3. Use of materials imported from Japan

In application of the origin criteria, the following special treatment will be given to the materials imported from Japan into a preference-receiving country and used in the production of goods to be later exported to Japan (this rule is known as the "Donor Country Content Rule"):

- (i) In the case of the goods produced in a preference-receiving country only from materials imported from Japan, or those produced in a preference-receiving country only from materials wholly obtained in the preference-receiving country and materials imported from Japan, such goods will be regarded as being wholly obtained in that country.
- (ii) Any goods exported from Japan which have been used as part of raw materials or components for the production of any goods produced other than those goods as provided for in the above-mentioned paragraph (i) shall be regarded as wholly obtained in that country.

However, with regard to some products obtained in a preference-receiving country (see Annex 8, List of processed products to which donor country content rule is not applied), special treatment will not be granted.

9.4. Rules of cumulative origin

In the case of the goods produced in Indonesia, Malaysia, the Philippines, Thailand and Vietnam (hereinafter "the five countries"), the five countries are regarded as a single preference-receiving country for the purpose of applying the above-mentioned origin criteria and Preference-giving country content rule.

In detail, the five countries enjoy the following effects when applying the substantial manufacturing standards.

- (i) When calculating the rate of use of materials not originating in the five countries, the goods listed below are treated as having originated in the five countries.
 - (a) All raw materials consisting only of goods originating in the five countries.
 - (b) All raw materials consisting only of goods exported from Japan to the five countries.
 - (c) All raw materials consisting only of the goods prescribed in (a) and (b).
 - (d) If mixed with raw materials from other countries (with the exception of goods exported from Japan), the portion of the raw materials which conform to the provisions of (a) through (c).
- (ii) The goods are qualified to have originated in one of the countries when certain requirements related to the manner they were processed or manufactured are satisfied in all the countries involved in their production.

The origin of goods which are eligible for the preferential tariff treatment according to the rules of cumulative origin is the country that exports the goods to Japan.

To make use of cumulative origin system, Cumulative Working/processing Certificate should be presented to the Customs at the time of import declaration in addition to the Certificate of Origin Form A.

9.5. Documentary evidence (See Annex 9)

(i) Evidence relating to origin of goods:

(a) Documentary requirements for all goods to receive GSP treatment

In order for goods to receive the preferential tariff treatment, a Certificate of Origin (combined declaration and certificate) Form A must be submitted to the Japanese Customs authorities on importation of the goods into Japan. The Certificate shall be issued by the customs authorities (or other competent government authorities of the exporting preference-receiving country or other bodies of that country, such as chambers of commerce, which are registered as the issuers by the Japanese customs authorities) upon application from the exporter when he exports the goods concerned. However, with regard to consignments of customs value not exceeding 200,000 Yen or goods whose

origins are evident (see Annex 9, HS Heading number of products which are exempted from documentary requirements), this Certificate will not be required.

(b) Material imported from Japan

When one or other of the special treatments under the "Preference-giving Country Content Rule" is sought in respect of goods to be exported from a preference-receiving country to Japan, a "Certificate of Materials Imported from Japan" issued by the same competent authorities issuing the Certificate of Origin (Form A) will be required to establish that the materials used in the production of the goods were originally imported from Japan into that country.

(c) Cumulative origin

When one or other of the special treatments under the Rules of Cumulative Origin is sought in respect of goods produced in one of the countries (Indonesia, Malaysia, the Philippines, Thailand and Vietnam), a "Cumulative Working/Processing Certificate" must be submitted, on importation of the goods into Japan, to the Japanese customs authorities, together with a Certificate of Origin (Form A). The Cumulative Working/Processing Certificate shall be issued by the same authorities issuing the Certificate of Origin. The term reference number of the Cumulative Working/Processing Certificate must be entered in Box 4 ("For official use") of the Certificate of Origin.

(ii) Evidence relating to transport

In the case of transportation coming under (ii) or (iii) of the above-mentioned rules for transportation, the following evidence is needed to establish that the transportation was in conformity with the conditions specified respectively:

- (a) a through bill of lading;
- (b) a certification by the Customs authorities or other government authorities of the transit countries; or
- (c) failing these, any other substantiating document deemed sufficient. However, with regard to consignments of Customs value not exceeding 200,000 Yen, this evidence will not be required.

10. Information on preferential imports

The value (or quantity) of preferential imports of each product group is announced monthly in the Official Gazette of Japan.

Australia*	Republic of Belarus	European Union:	Italy	Austria
Canada	Republic of Bulgaria	Belgium	Cyprus	Poland
Japan	Russian Federation	Czech Republic	Latvia	Portugal
New Zealand**		Denmark	Lithuania	Slovenia
Norway		Germany	Luxembourg	Slovakia
Switzerland		Estonia	Hungary	Finland
Turkey		Greece	Malta	Sweden
United States of America***		Spain	Netherlands	United Kingdom
		France		
		Ireland		

Full details of the conditions covering admission to the GSP in these countries are obtainable from the designated authorities in the exporting preference-receiving countries or from the customs authorities of the preference-giving countries listed above. An information note is also obtainable from the UNCTAD secretariat.

II. General conditions

To qualify for preference, products must:

- (a) fall within a description of products eligible for preference in the country of destination. The description entered on the form must be sufficiently detailed to enable the products to be identified by the customs officer examining them;
- (b) comply with the rules of origin of the country of destination. Each article in a consignment must qualify separately in its own right; and,
- (c) comply with the consignment conditions specified by the country of destination. In general, products must be consigned direct from the country of exportation to the country of destination but most preference-giving countries accept passage through intermediate countries subject to certain conditions. (For Australia, direct consignment is not necessary).

III. Entries to be made in Box 8

Preference products must either be wholly obtained in accordance with the rules of the country of destination or sufficiently worked or processed to fulfil the requirements of that country's origin rules.

- (a) Products wholly obtained: for export to all countries listed in Section I, enter the letter "P" in Box 8 (for Australia and New Zealand Box 8 may be left blank).
- (b) Products sufficiently worked or processed: for export to the countries specified below, the entry in Box 8 should be as follows:
 - (1) United States of America: for single country shipments, enter the letter "Y" in Box 8, for shipments from recognized associations of countries, enter the letter "Z", followed by the sum of the cost or value of the domestic materials and the direct cost of processing, expressed as a percentage of the ex-factory price of the exported products; (example "Y" 35% or "Z" 35%).
 - (2) Canada: for products which meet origin criteria from working or processing in more than one eligible least developed country, enter letter "G" in Box 8; otherwise "F".
 - (3) Japan, Norway, Switzerland, Turkey and the European Union; enter the letter "W" in Box 8 followed by the Harmonized Commodity Description and coding system (Harmonized System) heading at the 4-digit level of the exported product (example "W" 96.18).
 - (4) Bulgaria and the Russian Federation: for products which include value added in the exporting preference-receiving country, enter the letter "Y" in Box 8 followed by the value of imported materials and components expressed as a percentage of the fob price of the exported products (example "Y" 45%); for products obtained in a preference-receiving country and worked or processed in one or more other such countries, enter "Pk".
 - (5) Australia and New Zealand: completion of Box 8 is not required. It is sufficient that a declaration be properly made in Box 12.

* For Australia, the main requirement is the exporter's declaration on the normal commercial invoice. Form A, accompanied by the normal commercial invoice, is an acceptable alternative, but official certification is not required.

** Official certification is not required.

*** The United States does not require GSP Form A. A declaration setting forth all pertinent detailed information concerning the production or manufacture of the merchandise is considered sufficient only if requested by the district collector of Customs.

Une note d'information peut également être obtenue du secrétariat de la CNUCED.

II. Conditions générales

Pour être admis au bénéfice des préférences, les produits doivent:

- correspondre à la définition établie des produits pouvant bénéficier du régime de préférences dans les pays de destination. La description figurant sur la formule doit être suffisamment détaillée pour que les produits puissent être identifiés par l'agent des douanes qui les examine;
- satisfaire aux règles d'origine du pays de destination. Chacun des articles d'une même expédition doit répondre aux conditions prescrites; et
- satisfaire aux conditions d'expédition spécifiées par le pays de destination. En général, les produits doivent être expédiés directement du pays d'exportation au pays de destination; toutefois, la plupart des pays donneurs de préférences acceptent sous certaines conditions le passage par des pays intermédiaires (pour l'Australie, l'expédition directe n'est pas nécessaire).

III. Indications à porter dans la case 8

Pour bénéficier des préférences, les produits doivent avoir été, soit entièrement obtenus, soit suffisamment ouverts ou transformés conformément aux règles d'origine des pays de destination.

- Produits entièrement obtenus: pour l'exportation vers tous les pays figurant dans la liste de la section, il y a lieu d'inscrire la lettre "P" dans la case 8 (pour l'Australie et la Nouvelle-Zélande, la case 8 peut être laissée en blanc).
- Produits suffisamment ouverts ou transformés: pour l'exportation vers les pays figurant ci-après, les indications à porter dans la case 8 doivent être les suivantes:
 - Etats Unis d'Amérique: dans le cas d'expédition provenant d'un seul pays, inscrire la lettre "Y" ou, dans le cas d'expéditions provenant d'un groupe de pays reconnu comme un seul, la lettre "Z", suivie de la somme du coût ou de la valeur des matières et du coût direct de la transformation, exprimée en pourcentage du prix départ usine des marchandises exportées (exemple: "Y" 35% ou "Z" 35%);
 - Canada: il y a lieu d'inscrire dans la case 8 la lettre "G" pour les produits qui satisfont aux critères d'origine après ouvroison ou transformation dans plusieurs des pays les moins avancés; sinon, inscrire la lettre "F";
 - Japon, Norvège, Suisse, Turquie et Union européenne: inscrire dans la case 8 la lettre "W" suivie de la position tarifaire à quatre chiffres occupée par le produit exporté dans le Système harmonisé de désignation et de codification des marchandises (Système harmonisé) (exemple "W" 96.18);
 - Bulgarie et Fédération de Russie: pour les produits avec valeur ajoutée dans le pays exportateur bénéficiaire de préférences, il y a lieu d'inscrire la lettre "Y" dans la case 8, en la faisant suivre de la valeur des matières et des composants importés, exprimée en pourcentage du prix fob des marchandises exportées (exemple: "Y" 45%); pour les produits obtenus dans un pays bénéficiaire de préférences et ouverts ou transformés dans un ou plusieurs autres pays bénéficiaires, il y a lieu d'inscrire la lettre "Pk" dans la case 8;
 - Australie et Nouvelle-Zélande: il n'est pas nécessaire de remplir la case 8. Il suffit de faire une déclaration appropriée dans la case 12.

* Pour l'Australie, l'exigence de base est une attestation de l'exportateur sur la facture habituelle. La formule A, accompagnée de la facture habituelle, peut être acceptée en remplacement, mais une certification officielle n'est pas exigée.

** Un visa officiel n'est pas exigé.

*** Les Etats-Unis n'exigent pas de certificat SGP Formule A. Une déclaration reprenant toute information appropriée et détaillée concernant la production ou la fabrication de la marchandise est considérée comme suffisante, et doit être présentée uniquement à la demande du receveur des douanes du district (District collector of Customs).
