Notas

Este manual ha sido preparado por la secretaría de la UNCTAD sobre la base de la información proporcionada por el Ministerio de Relaciones Exteriores del Japón. Proporciona una explicación general del esquema del Japón que ayuda a los funcionarios y usuarios responsables o a quienes participan en cuestiones relacionadas con el SGP a comprenderlo mejor.

Está basado en la Ley de medidas arancelarias temporales, el Decreto del Consejo de Ministros para la aplicación de la Ley de medidas arancelarias temporales y la Disposición administrativa para la aplicación Ley de medidas arancelarias temporales. Las versiones en idioma original japonés de estos textos son las únicas versiones auténticas en caso de controversia.

Los números de las partidas arancelarias utilizados en esta publicación están en conformidad con la nomenclatura del Convenio Internacional sobre el Sistema Armonizado de Designación y Codificación de Mercancías (número del SA). Las descripciones de los productos que figuran en las listas han sido formuladas nuevamente para facilitar la comprensión. Los lectores quizás estimen conveniente consultar el Arancel de Aduanas del Japón, publicado por la Asociación Aduanera del Japón, para obtener más información sobre las partidas arancelarias, sus números y las descripciones de los productos que pueden acogerse al SGP del Japón y de otros productos.

Puede obtenerse información adicional sobre el SGP del Japón en el sitio web del Ministerio de Relaciones Exteriores del Japón: <http://www.mofa.go.jp>.

- A ese efecto, debe examinar las listas de productos del esquema SGP en relación con la clasificación arancelaria precisa y la descripción del producto.

Etapas 3: Evaluar el margen preferencial

- Si su producto puede beneficiarse del trato preferencial con arreglo al esquema del SGP del Japón, debe evaluar el margen preferencial para determinar el precio que usted puede ofrecer a su comprador/importador.

Etapas 4: Verificar las listas de topes

- Debe verificar los topes establecidos anualmente y entender la forma en que se administran.
- Debe verificar la última lista mensual de topes, publicada en la *Gaceta Oficial* del Japón, o en los tableros de anuncios de las oficinas de aduanas.

- Debe cerciorarse de que su producto cumple los criterios de origen establecidos por el Japón. Cada esquema establece sus propios criterios de origen.

Etapas 6: Verificar las condiciones de expedición

- Debe cerciorarse de que se cumplan las condiciones de expedición especificadas.

Etapas 7: Preparar las pruebas documentales

- El esquema SGP exige como prueba documental una declaración y un certificado de origen combinados (Formulario A). De ser necesario, también se exigen otros certificados.

Notas explicativas sobre el esquema SGP del Japón

El Sistema Generalizado de Preferencias (SGP), basado en el acuerdo alcanzado en la UNCTAD, tiene por finalidad contribuir al desarrollo económico de los países en desarrollo. El SGP proporciona beneficios a esos países permitiendo que los productos que reúnan las condiciones ingresen en los mercados de los países que otorgan preferencias (países desarrollados), con tipos de aranceles reducidos o en régimen de franquicia aduanera.

El SGP del Japón se aplica desde el 1º de agosto de 1971 y estará en vigor hasta el 31 de marzo de 2011.

1. Beneficiarios

El Japón otorga un trato preferencial en el marco de su esquema de SGP a 140 países y 15 territorios en desarrollo.

Los beneficiarios son designados por Decreto del Consejo de Ministros entre los países y territorios que solicitan ese trato preferencial, si cumplen los siguientes criterios:

- El país o el territorio beneficiario debe tener una economía en desarrollo;
- El territorio debe tener su propio sistema arancelario y comercial;
- El país o el territorio desea recibir un trato arancelario preferencial en el marco del esquema SGP;
- El país o territorio beneficiario debe figurar en un Decreto del Consejo de Ministros como país o territorio al que se pueda otorgar debidamente esas preferencias;
- Sólo los países beneficiarios designados países menos adelantados (PMA) por la Asamblea General de las Naciones Unidas podrán acogerse al trato preferencial especial reservados para éstos.

2. Productos incluidos (en el Arancel Preferencial General)

2.1 Productos agropecuarios y pesqueros (capítulos 1 a 24 del SA)

El Japón otorga el trato del Arancel Preferencial General a algunos productos agropecuarios y pesqueros de 339 partidas (sobre una base de 9 dígitos, en adelante, igual).

2.2. Productos industriales (capítulos 25 a 97 del SA)

Se otorgan preferencias a todos los productos industriales, incluidos los productos a que se aplican las preferencias concedidas solamente a los PMA, excepto productos de 118 partidas.

3. Magnitud de la reducción arancelaria (tipos del SGP)

3.1. Productos agropecuarios y pesqueros (capítulos 1 a 24 del SA)

Diversas reducciones arancelarias, incluido el régimen de franquicia arancelaria, se aplican a algunos productos agropecuarios y pesqueros originarios de países beneficiarios de desarrollo, con excepción de los PMA.

3.2. Productos industriales (capítulos 25 a 97 del SA)

En principio, a todos los productos industriales se les aplica el régimen de franquicia arancelaria, con excepción de los productos a los cuales sólo se conceden preferencias a los PMA, así como de algunos productos sensibles respecto de los cuales el trato del Arancel Preferencial General se limita al tope (78 grupos de productos - 1.264 partidas), y con un trato del Arancel Preferencial General libre o del 20, el 40, el 60 o el 80% de los tipos arancelarios NMF (nación más favorecida).

4. Topes (régimen SGP)

4.1. Topes

Para los productos agropecuarios y pesqueros (capítulos 1 a 24 del SA), no hay topes.

Para los productos industriales (capítulos 25 a 97 del SA) no hay topes respecto de varios de esos productos. En cuanto al resto, se pueden hacer importaciones en el marco del Arancel Preferencial General hasta que se superen los topes. En el caso de 78 grupos de productos (1.264 partidas), los topes se calculan para cada ejercicio fiscal -cada uno incluye los productos de un capítulo, partida o subpartida del SA.

4.2. Cálculo de los topes

Los topes se calculan de la siguiente manera: para el ejercicio fiscal 2000-2010, los topes son iguales al tope del ejercicio fiscal anterior multiplicado por 1,03.

4.3. Utilización de los topes

Todos los países receptores de preferencias pueden utilizar en pie de igualdad los topes para cada grupo de productos. No se establece ninguna asignación o reserva para ningún país beneficiario. Una vez que las importaciones efectuadas con arreglo al Arancel Preferencial General hayan superado el tope, se suspende el trato preferencial, es decir, que se aplicará el tipo NMF. Asimismo, el trato preferencial se suspenderá parcialmente para un determinado grupo de productos en relación con un determinado país receptor de preferencias si las importaciones de productos originarios de ese país efectuadas en régimen preferencial superan una cantidad máxima para ese país de un quinto del valor total o cantidad total del tope.

4.4. Administración de los topes y cantidades máximas por país

Los topes y las cantidades máximas por país se administran según el orden en que se efectúen las importaciones, con sujeción a un control mensual y se aplica el tipo NMF a partir de la mitad del mes siguiente, es decir, una vez que las importaciones hayan superado el tope o la cantidad máxima del país.

5. Cláusula liberatoria

Cuando el aumento de las importaciones de un producto efectuadas en régimen preferencial causen o amenacen causar un daño a una rama de producción nacional, se podrá suspender temporalmente el régimen preferencial con respecto a ese producto.

6. Exclusión de la lista de beneficiarios con economías desarrolladas

Los beneficiarios con economías desarrolladas se excluirán de la lista de los beneficiarios del SGP con arreglo al examen anual. El proceso de "exclusión" comienza por una "exclusión parcial", cuando proceda, con objeto de reducir sus efectos sobre esas economías "sujetas a exclusión".

En los casos de "exclusión parcial", se excluirá un producto de un país o territorio beneficiario de la lista de productos a los que se otorga el trato preferencial si: el país o el territorio considerados están clasificados como una economía de ingresos elevados en el Atlas del Banco Mundial del año anterior; si no figura en el Atlas del Banco Mundial, el país considerado deberá tener el mismo nivel de PNB por habitante, y sus exportaciones del producto al Japón, superar el 25% de las exportaciones mundiales de ese producto al Japón, y al mismo tiempo, representar más del 1.000 millones de yenes.

Cada país o territorio y producto serán objeto de un examen anual. Si no se cumple ninguna de las condiciones *supra*, se otorgará el trato del arancel preferencial.

Además, a partir del 1º de abril de 2000, un país o territorio beneficiario se excluirá de la lista de los beneficiarios del trato SGP si ha sido clasificado como economía de ingresos elevados en el Atlas del Banco Mundial de los tres años anteriores en forma consecutiva; si no figura en el Atlas del Banco Mundial, deberá tener el mismo nivel de PNB por habitante.

Si un país o territorio que no figura en la lista de los beneficiarios del SGP no ha sido clasificado como economía de ingresos elevados durante tres años consecutivos, será objeto del trato SGP mediante la presentación de una solicitud al Japón para volver a obtener la condición de beneficiario de este trato.

7. Exclusión producto por producto, centrada en la competitividad

En el marco del examen anual, un producto de un país o territorio en desarrollo beneficiario que se considere altamente competitivo en el mercado del Japón será excluido de los productos que se benefician del trato arancelario preferencial, si se cumplen las siguientes condiciones durante dos años civiles consecutivos: si las importaciones de un producto procedente de un beneficiario en desarrollo (con excepción de los PMA) al Japón representa por su valor más

del 50% de sus importaciones mundiales al Japón, y si al mismo tiempo exceden de 1.000 millones de yenes.

Sin embargo, cualquier producto que cumpla esas condiciones no quedará excluido si se determina que su exclusión no es necesaria, teniendo en cuenta la existencia de la producción nacional o los diversos efectos sobre la rama de producción nacional. Asimismo, los productos de los grupos de productos sujetos a un tope que cumplen esas condiciones no serán excluidos.

Se introducirá nuevamente el arancel preferencial para los productos que no pueden cumplir las condiciones *supra* durante dos años civiles consecutivos después de su exclusión.

8. Trato preferencial especial para los países menos adelantados (PMA)

Se ofrece un trato preferencial especial libre de derechos y de contingentes a los PMA beneficiarios para todos los productos incluidos en trato del Acuerdo Preferencial General y los productos adicionales respecto de los cuales sólo se otorgan preferencias a los PMA.

En relación con el cobre refinado importado de la República Democrática del Congo y de Zambia, se aplicará el tipo arancelario preferencial pero no se suprimirá el tope hasta el final del ejercicio fiscal 2005.

9. Normas de origen

Para que los productos exportados desde un país receptor de preferencias puedan beneficiarse del trato arancelario preferencial, deben ser reconocidos como originarios de ese país con arreglo a los criterios de origen del esquema del SGP japonés, y ser transportados al Japón de conformidad con sus normas de transporte.

9.1. Normas de transporte (expedición directa)

Estas normas deben garantizar que los productos conserven su identidad y no sean manipulados o nuevamente transformados durante el transporte.

- i) En principio, los productos deben transportarse directamente al Japón, sin pasar por ningún territorio distinto del país exportador receptor de preferencias.
- ii) No obstante, en lo que respecta a los productos transportados al Japón por territorios distintos del país exportador receptor de preferencias, pueden beneficiarse del trato preferencial si:
 - a) No han sido objeto de ninguna operación en los países de tránsito distinta del trasbordo o almacenamiento temporal exclusivamente debido a las exigencias en materia de transporte; y
 - b) El trasbordo o almacenamiento temporal ha sido realizado en una zona bajo control aduanero u otro lugar similar bajo la supervisión de las autoridades aduaneras de esos países de tránsito;

- iii) Con respecto a los productos exportados desde un país receptor de preferencias para su almacenamiento temporal o presentación en exposiciones, ferias y actividades similares realizadas en otro país, que han sido exportados por la persona que las ha exportado así desde otro país al Japón, pueden beneficiarse del trato preferencial si:
 - a) El transporte al Japón desde el país en que se ha realizado la exposición, o actividad similar, está comprendido en el inciso i) o ii) *supra*; y
 - b) La exposición, o actividad similar, se ha realizado en una zona bajo control aduanero u otro lugar similar bajo la supervisión de las autoridades aduaneras de ese país.

9.2. Criterios de origen

Se considera que los productos son originarios de un país receptor de preferencias si se obtienen enteramente en ese país.

En el caso de productos elaborados total o parcialmente con materiales o piezas importados de otros países, o de origen desconocido, se considera que son originarios de un país receptor de preferencias si los materiales o piezas utilizados han estado sometidos a una manipulación o transformación suficiente en ese país. Por regla general, las operaciones de manipulación o transformación se considerarán suficientes cuando el producto resultante esté clasificado en una partida arancelaria del SA (cuatro dígitos) distinta de la que abarque a cada uno de los materiales o piezas no originarios utilizados en su producción.

Sin embargo, hay dos excepciones a esa regla. Una es que la manipulación o transformación no se considerarán suficientes cuando sean efectivamente muy simples, aunque exista un cambio en la partida del SA (véase el anexo 6, Procedimientos mínimos no aceptados para obtener la condición de originarios).

La otra excepción es la exigencia de que algunos productos reúnan determinadas condiciones para obtener la condición de originarios sin que haya un cambio en la partida del SA (véase el anexo 7, Lista de productos elaborados para los cuales se especifica la condición del reconocimiento del país de origen).

9.3. Utilización de materiales importados del Japón

En cumplimiento de los criterios de origen, se otorgará el siguiente trato especial a los materiales importados del Japón en los países receptor de preferencias y utilizados para la producción de mercancías que se exportarán posteriormente al Japón (norma conocida como "Norma del contenido procedente del país otorgante de preferencias"):

- i) En el caso de las mercancías producidas en un país receptor de preferencias únicamente con materiales importados del Japón, o producidas en un país receptor de preferencias únicamente con materiales enteramente obtenidos en ese país y materiales importados del Japón, se considerará que esos productos se han obtenido enteramente en ese país;

- ii) Todos los productos exportados del Japón que se hayan utilizado como parte de las materias primas o componentes para producir cualesquiera mercancías distintas de las previstas en el párrafo i) *supra* se considerarán como enteramente obtenidos en ese país.

Sin embargo, no se otorgará el trato especial a algunos productos obtenidos en un país receptor de preferencias (véase el anexo 8, Lista de productos elaborados a los que no se aplica la norma del contenido procedente del país otorgante de preferencias).

9.4. Normas de origen acumulativo

En el caso de las mercancías producidas en Indonesia, Malasia, Filipinas, Tailandia y Viet Nam (en adelante "los cinco países"), los cinco países se consideran como un solo país receptor de preferencias a los efectos de la aplicación de los criterios de origen y la norma de contenido procedente del país otorgante de preferencias, mencionados *supra*.

Concretamente, los cinco países se benefician de los siguientes efectos si se aplican las normas sustanciales de fabricación:

- i) Cuando se calcule la tasa de utilización de material no originario de los cinco países, los productos enumerados a continuación se consideran originarios de los cinco países:
 - a) Todas las materias primas que sólo son bienes originarios de los cinco países;
 - b) Todas las materias primas que sólo son bienes exportados del Japón a los cinco países;
 - c) Todas las materias primas que sólo son los productos previstos en a) y b);
 - d) Si hay una mezcla con materias primas de otros países (con excepción de los productos exportados del Japón), la parte de las materias primas que se ajustan a las disposiciones contenidas en a), b) y c);
- ii) Los productos cumplen las condiciones para considerarse originarios de uno de los países cuando ciertos requisitos relativos a la forma en que han sido elaborados o fabricados, se satisfacen en todos los países que intervienen en la producción.

El país originario de los productos que pueden beneficiarse del trato arancelario preferencial según las normas de origen acumulativo es el país que exporta los productos al Japón.

Para utilizar el sistema del origen acumulativo, debe presentarse al servicio aduanero el certificado de manipulación o transformación acumulativa al efectuar la declaración de importación, además del Certificado de origen (Formulario A).

9.5. Pruebas documentales (véase el anexo 9)

i) Pruebas relacionadas con el origen de los productos

a) Requisitos documentales que deben cumplir todos los productos para recibir el trato del SGP

Para que los productos reciban el trato arancelario preferencial, al importar los productos en el país debe presentarse un Certificado de origen (una declaración y un certificado combinados), Formulario A, a las autoridades aduaneras del Japón. El Certificado será expedido por las autoridades aduaneras (u otros organismos públicos competentes del país exportador receptor de preferencias u otras entidades de ese país, como las cámaras de comercio, habilitadas por las autoridades aduaneras japonesas para expedir el certificado) mediante solicitud del exportador cuando éste exporte los productos en cuestión. Sin embargo, para los envíos de un valor aduanero que no exceda de los 200.000 yenes o para los productos cuyos orígenes sean evidentes (véase el anexo 9, número de la partida SA de los productos exentos de requisitos documentales), no se exigirá el Certificado.

b) Materiales importados del Japón

Cuando trate de obtenerse uno de los dos tratos especiales con arreglo a la "norma del contenido procedente del país otorgante de preferencias" respecto de productos que se exportarán de un país receptor de preferencias al Japón, se exigirá un "certificado de materiales importados del Japón" expedido por las mismas autoridades competentes que expiden el Certificado de origen (Formulario A), a fin de determinar que los materiales utilizados en la producción de las mercancías se importaron originalmente del Japón en ese país.

c) Origen acumulativo

Cuando se trate de obtener uno de los dos tratos preferenciales con arreglo a la norma de origen acumulativo respecto de mercancías producidas en uno de los países (Indonesia, Malasia, Filipinas, Tailandia y Viet Nam), al importar los productos en el Japón deberá presentarse a las autoridades aduaneras del Japón un "certificado de manipulación o transformación acumulativa" al importar los productos en el Japón, junto con un Certificado de origen (Formulario A). El certificado de manipulación o transformación acumulativa será expedido por las mismas autoridades que expiden el Certificado de origen. El número de referencia del certificado de manipulación o transformación acumulativa debe inscribirse en la casilla 4 ("sólo para uso oficial") del Certificado de origen.

ii) Pruebas relacionadas con el transporte

En el caso del transporte, que corresponda a los incisos ii) o iii) de las normas de transporte mencionadas, deben presentarse las siguientes pruebas para demostrar que el transporte cumplió las condiciones respectivamente prescritas:

a) Un conocimiento de embarque;

- b) Un certificado expedido por las autoridades aduaneras u otras autoridades competentes de los países de tránsito; o
- c) A falta de esas pruebas, cualquier otro documento justificativo que se considere suficiente. No obstante, con respecto a los envíos de un valor aduanero que no supere los 200.000 yenes, no se exigirá esa prueba.

10. Información sobre las importaciones preferenciales

El valor (o la cantidad) de las importaciones preferenciales de cada grupo de productos se anuncia todos los meses en la *Gaceta Oficial* del Japón.

Australia*	Republic of Belarus	European Union:	Italy	Austria
Canada	Republic of Bulgaria	Belgium	Cyprus	Poland
Japan	Russian Federation	Czech Republic	Latvia	Portugal
New Zealand**		Denmark	Lithuania	Slovenia
Norway		Germany	Luxembourg	Slovakia
Switzerland		Estonia	Hungary	Finland
Turkey		Greece	Malta	Sweden
United States of America***		Spain	Netherlands	United Kingdom
		France		
		Ireland		

Full details of the conditions covering admission to the GSP in these countries are obtainable from the designated authorities in the exporting preference-receiving countries or from the customs authorities of the preference-giving countries listed above. An information note is also obtainable from the UNCTAD secretariat.

II. General conditions

To qualify for preference, products must:

- (a) fall within a description of products eligible for preference in the country of destination. The description entered on the form must be sufficiently detailed to enable the products to be identified by the customs officer examining them;
- (b) comply with the rules of origin of the country of destination. Each article in a consignment must qualify separately in its own right; and,
- (c) comply with the consignment conditions specified by the country of destination. In general, products must be consigned direct from the country of exportation to the country of destination but most preference-giving countries accept passage through intermediate countries subject to certain conditions. (For Australia, direct consignment is not necessary).

III. Entries to be made in Box 8

Preference products must either be wholly obtained in accordance with the rules of the country of destination or sufficiently worked or processed to fulfil the requirements of that country's origin rules.

- (a) Products wholly obtained: for export to all countries listed in Section I, enter the letter "P" in Box 8 (for Australia and New Zealand Box 8 may be left blank).
- (b) Products sufficiently worked or processed: for export to the countries specified below, the entry in Box 8 should be as follows:
 - (1) United States of America: for single country shipments, enter the letter "Y" in Box 8, for shipments from recognized associations of countries, enter the letter "Z", followed by the sum of the cost or value of the domestic materials and the direct cost of processing, expressed as a percentage of the ex-factory price of the exported products; (example "Y" 35% or "Z" 35%).
 - (2) Canada: for products which meet origin criteria from working or processing in more than one eligible least developed country, enter letter "G" in Box 8; otherwise "F".
 - (3) Japan, Norway, Switzerland, Turkey and the European Union; enter the letter "W" in Box 8 followed by the Harmonized Commodity Description and coding system (Harmonized System) heading at the 4-digit level of the exported product (example "W" 96.18).
 - (4) Bulgaria and the Russian Federation: for products which include value added in the exporting preference-receiving country, enter the letter "Y" in Box 8 followed by the value of imported materials and components expressed as a percentage of the fob price of the exported products (example "Y" 45%); for products obtained in a preference-receiving country and worked or processed in one or more other such countries, enter "Pk".
 - (5) Australia and New Zealand: completion of Box 8 is not required. It is sufficient that a declaration be properly made in Box 12.

* For Australia, the main requirement is the exporter's declaration on the normal commercial invoice. Form A, accompanied by the normal commercial invoice, is an acceptable alternative, but official certification is not required.

** Official certification is not required.

*** The United States does not require GSP Form A. A declaration setting forth all pertinent detailed information concerning the production or manufacture of the merchandise is considered sufficient only if requested by the district collector of Customs.

Une note d'information peut également être obtenue du secrétariat de la CNUCED.

II. Conditions générales

Pour être admis au bénéfice des préférences, les produits doivent:

- correspondre à la définition établie des produits pouvant bénéficier du régime de préférences dans les pays de destination. La description figurant sur la formule doit être suffisamment détaillée pour que les produits puissent être identifiés par l'agent des douanes qui les examine;
- satisfaire aux règles d'origine du pays de destination. Chacun des articles d'une même expédition doit répondre aux conditions prescrites; et
- satisfaire aux conditions d'expédition spécifiées par le pays de destination. En général, les produits doivent être expédiés directement du pays d'exportation au pays de destination; toutefois, la plupart des pays donneurs de préférences acceptent sous certaines conditions le passage par des pays intermédiaires (pour l'Australie, l'expédition directe n'est pas nécessaire).

III. Indications à porter dans la case 8

Pour bénéficier des préférences, les produits doivent avoir été, soit entièrement obtenus, soit suffisamment ouverts ou transformés conformément aux règles d'origine des pays de destination.

- Produits entièrement obtenus: pour l'exportation vers tous les pays figurant dans la liste de la section, il y a lieu d'inscrire la lettre "P" dans la case 8 (pour l'Australie et la Nouvelle-Zélande, la case 8 peut être laissée en blanc).
- Produits suffisamment ouverts ou transformés: pour l'exportation vers les pays figurant ci-après, les indications à porter dans la case 8 doivent être les suivantes:
 - Etats Unis d'Amérique: dans le cas d'expédition provenant d'un seul pays, inscrire la lettre "Y" ou, dans le cas d'expéditions provenant d'un groupe de pays reconnu comme un seul, la lettre "Z", suivie de la somme du coût ou de la valeur des matières et du coût direct de la transformation, exprimée en pourcentage du prix départ usine des marchandises exportées (exemple: "Y" 35% ou "Z" 35%);
 - Canada: il y a lieu d'inscrire dans la case 8 la lettre "G" pour les produits qui satisfont aux critères d'origine après ouvroison ou transformation dans plusieurs des pays les moins avancés; sinon, inscrire la lettre "F";
 - Japon, Norvège, Suisse, Turquie et Union européenne: inscrire dans la case 8 la lettre "W" suivie de la position tarifaire à quatre chiffres occupée par le produit exporté dans le Système harmonisé de désignation et de codification des marchandises (Système harmonisé) (exemple "W" 96.18);
 - Bulgarie et Fédération de Russie: pour les produits avec valeur ajoutée dans le pays exportateur bénéficiaire de préférences, il y a lieu d'inscrire la lettre "Y" dans la case 8, en la faisant suivre de la valeur des matières et des composants importés, exprimée en pourcentage du prix fob des marchandises exportées (exemple: "Y" 45%); pour les produits obtenus dans un pays bénéficiaire de préférences et ouverts ou transformés dans un ou plusieurs autres pays bénéficiaires, il y a lieu d'inscrire les lettre "Pk" dans la case 8;
 - Australie et Nouvelle-Zélande: il n'est pas nécessaire de remplir la case 8. Il suffit de faire une déclaration appropriée dans la case 12.

* Pour l'Australie, l'exigence de base est une attestation de l'exportateur sur la facture habituelle. La formule A, accompagnée de la facture habituelle, peut être acceptée en remplacement, mais une certification officielle n'est pas exigée.

** Un visa officiel n'est pas exigé.

*** Les Etats-Unis n'exigent pas de certificat SGP Formule A. Une déclaration reprenant toute information appropriée et détaillée concernant la production ou la fabrication de la marchandise est considérée comme suffisante, et doit être présentée uniquement à la demande du receveur des douanes du district (District collector of Customs).
