Original: English

**Conference of the Parties to the Basel Convention
on the Control of Transboundary Movements of
Hazardous Wastes and Their Disposal**
Seventh meeting
Geneva, 25–29 October 2004
Item 6 of the provisional agenda*

**Report on the implementation of the decisions adopted
by the Conference of the Parties at its sixth meeting**

**Consolidated report and analysis of the questionnaires
concerning national classification and control procedures for
wastes listed in Annex IX to the Basel Convention**

Note by the Secretariat

The Secretariat has the honour to present, in the annex to the present note, a consolidated report and analysis prepared by the Secretariat on the questionnaires concerning national classification and control procedures for wastes listed in Annex IX of the Basel Convention.

The appendices to the consolidated report are in English only.

* UNEP/CHW.7/1.

I. Introduction

1. This document is a consolidated report and analysis of questionnaires concerning national classification and control procedures for wastes listed in Annex IX to the Basel Convention.
2. This report includes a compilation of the Parties' responses to:
 - (a) National classification and control procedures questionnaire contained in the following background documents:
 - (i) UNEP/CHW/OEWG/1/INF/5;
 - (ii) UNEP/CHW/OEWG/1/INF/5/Add.1;
 - (iii) UNEP/CHW/OEWG/1/INF/5/Add.2;
 - (iv) UNEP/CHW/OEWG/1/INF/5/Add.3;
 - (v) UNEP/CHW/OEWG/2/INF/5;
 - (vi) UNEP/CHW/OEWG/3/INF/14;
 - (vii) Response from Canada received on 30 June 2004;
 - (b) A European Commission (EC) questionnaire, and;
 - (c) A comparative analysis of the responses to the two sets of questions.
3. While it was not possible to obtain the original European Commission questionnaire or the original responses to it, efforts were made to collect the required information from sources described in the report. The analysis shows very poor consistency between the two sets of responses. This is attributed to the fact that in the two regimes, neither the questions nor the waste lists were identical. The fact of the regulatory nature of the European Commission communication may also be a factor.

II. Background

4. At its sixth meeting, the Conference of the Parties by decision VI/19 adopted a decision containing the following operative paragraphs:
 - "1. *Decides* to adopt the questionnaire concerning the national classification and control procedures for the import of wastes contained in Annex IX (List B wastes) as attached to the present decision (Annex II);
 2. *Requests* the secretariat to distribute the present questionnaire to all Parties and Signatories."
5. At the second session of the Open-ended Working Group (OEWG) in October 2003, in response to an observation by one representative that, as demonstrated by the compilation of Parties' responses to the national classification and control procedures questionnaire contained in background document UNEP/CHW/OEWG/2/INF/5, there were many discrepancies between the answers given in the European Community questionnaire and those provided in the Basel Convention questionnaire, the Working Group agreed that there was a need for future clarification on that issue. The Secretariat was accordingly requested to prepare a compilation and analysis of the responses received on the questionnaires for submission to the Conference of the Parties at its seventh meeting.
6. Replies to the Basel Convention and European Community questionnaires were received from Parties as indicated in table 1.

Table 1: List of parties responding

Party	Basel Convention questionnaire	European Community questionnaire
Algeria	ü	ü
Argentina	ü	ü
Austria	ü	
Bahrain	ü	ü
Bosnia and Herzegovina	ü	ü

Thailand	ü	ü
Turkey	ü	
Ukraine	ü	ü

7. This report has been prepared in response to the request from the Open-ended Working Group to the Secretariat.

III. Tasks

8. Pursuant to the terms of reference for this assignment, the consultant, under the guidance of the Senior Programme Officer (Technical) of the Secretariat of the Basel Convention, was asked to perform the following tasks:

(a) To prepare a Consolidated Report and Analysis of the Questionnaire Concerning National Classification and Control Procedures for the Import of Wastes in Annex IX to the Basel Convention received from Parties;

(b) In the course of the preparation of the above analysis, to prepare a comparative report of the consistencies of these replies with the control procedures as implemented under the

European Union Council Regulation (EEC) No 259/93 of 1 February 1993 on the supervision and control of shipments of waste within, into and out of the European Community;

(c) To consult closely the Secretariat, Parties and the European Commission in the course of preparation of the above tasks.

IV. Procedures

9. The primary source of information was the Secretariat of the Basel Convention, in particular, documents presented to the Open-ended Working Group and the reports of the sessions of the Working Group.

10. Internet searches related to the Basel Convention, the European Union, the European Commission and the Organisation for Economic Cooperation and Development were carried out.

11. In addition, requests for information regarding regulation (EEC) No. 259/93 and related questionnaire, as well as their relationship and interaction with Basel Convention activities, were made to the Bureau of International Recycling in Belgium and the European Commission's Directorate General for Trade. Attempts were also made to contact experts from Germany and Switzerland but were unsuccessful.

12. Based on the research and responses received from the inquiries noted above, this report presents information as follows :

Chapter V A complete compilation of an analysis of the responses to a questionnaire concerning national classification and control procedures for the import of wastes listed in Annex IX to the Basel Convention received from Parties;

Chapter VI A complete compilation of the combined responses to the Basel Convention questionnaire and the regulation (EEC) No. 259/93 questionnaire (as included in the amendments to Council Regulation (EC) No 1420/1999, and Commission Regulation (EC) No 1547/1999). Comparison and comments on any differences in responses to the two questionnaires;

Chapter VII Sources of information for this report.

V. Analysis of questionnaire responses concerning wastes on List B of Annex IX to the Basel Convention

13. All responses provided by Parties to the questionnaire in the circular on national classification and control procedures for the import of wastes contained in Annex IX (List B wastes), were reviewed and compiled. These responses were obtained from UNEP/CHW/OEWG/2/INF/5. The recent response from Canada to the Basel Convention questionnaire has also been included.

14. This information is presented in tables A.1 through A.4. These tables identify each country responding to each of the questions included in boxes 2a, 2b, 2c and 2d of the questionnaire, for each type of B1, B2, B3 and B4 waste. The countries are shown alphabetically. For example, the first entry shows that Algeria, Philippines and Ukraine selected response 2a with respect to waste B1010.

15. These questions, related to information on national classification and control procedures for imports of the Annex IX wastes (List B) applied by each Party, are:

- Box 2.a “Is the specific waste in this line defined as or considered to be hazardous waste by the domestic legislation of your country? If yes, the waste in question is based on paragraph 1(b), article 1 of the Basel Convention defined as hazardous waste for the purpose of the Convention (a so-called “article 1(1)b hazardous waste”). As a consequence the regulations of the Basel Convention must be applied for transboundary movements.”
- Box 2.b “Indicate if there is no control procedure for the import in your country of the specific waste? If there is no control procedure, the waste is not controlled during a transboundary movement and follows the system applicable to normal commercial transactions.”
- Box 2.c “Indicate if the import in your country of the specific waste in this line is subject to the Prior Informed Control (PIC) procedure? This means imports must be notified and are only possible with the consent of the export, transit and import country/ies. (Normally such wastes are nationally defined or considered in your country as “article 1(1)b hazardous waste”. ... However it may be, that:
- a) the specific waste in this line is not considered in your country as an “article 1(1)b hazardous waste”, but nevertheless based on your national regulation imports are controlled (If this is the case, mark box 2.c);
 - b) the specific waste in this line is not considered as an “article 1(1)b hazardous waste” in your country, but nevertheless based on your national regulation imports are prohibited. (If this is the case, don’t mark box 2.c, but mark box 2.d).”
- Box 2.d “Is the import in your country of the specific waste in this line prohibited?”

16. The data contained in tables A1-A4 was sorted for each country (listed alphabetically). This information is presented in tables B.1 through B.4 (appendix B).

17. Responses for B1 wastes (metal and metal bearing waste) are shown in table B.1, responses for B2 wastes (containing principally inorganic constituents, which may contain metals and organic materials) are shown in table B.2, responses for B3 wastes (containing principally organic constituents, which may contain metals and inorganic materials) are shown in table B.3, and responses for B4 wastes (wastes which may contain either inorganic or organic constituents) are shown in table B.4.

18. These tables indicate, for example, that Algeria selected 2a and 2d for its responses to wastes B1010, B1020, B4020 and B4030.

19. Table 2 below presents a summary of tables B1–B4. For example, table 2 shows that Bahrain ticked “no control procedure” for all wastes listed in Annex IX (List B) of the Basel Convention, while Poland ticked “PIC procedures” for B2, B3 and B4 wastes.

Table 2: Basel Convention responses categorized by control procedure

National Classification and Control Procedure for the Import of Wastes Listed in Annex IX (List B) of the Basel Convention	1. Country	1.a Code Waste Type
2.a – Art. 1(1) b waste	Ukraine	All wastes
2.b – No control procedure	Bahrain Canada China Costa Rica Germany Japan Madagascar Republic of Korea Thailand Slovakia Austria Brazil	All wastes B4 wastes All wastes All wastes All wastes All wastes All wastes All wastes All wastes excepting B3010 B1 wastes excepting B1010, B2 wastes, B3 wastes B3 wastes excepting B3060, B3100, B3120, and B3130 B3 wastes excepting B3140
2.c – PIC procedure	Argentina Croatia Hungary Malta Serbia & Montenegro Sri Lanka Poland Austria Bulgaria Czech Republic Latvia Spain	All wastes All wastes All wastes All wastes All wastes All wastes B2 wastes, B3 Wastes, B4 Wastes B4 wastes B4 wastes B4 wastes B4 wWastes
2.d – Import prohibited	Bosnia & Herzegovina Cambodia Cuba Oman Romania	All wastes All wastes All wastes All wastes All wastes excepting B1010 B1020, B2020, B3020, and B3030.

20. The remaining countries, Algeria, Egypt, Finland, the Netherlands, New Zealand, the Philippines, the Republic of Macedonia, Switzerland and Turkey, could not be classified into one particular category.

21. It should also be noted that Algeria, New Zealand, the Philippines and the Republic of Macedonia responded to a limited number (i.e., less than five) of waste categories.

VI. Comparison between the responses to the Basel Convention and regulation (EEC) No. 259/93 questionnaires

22. Shipment of “green list” waste for recovery is generally excluded from the scope of regulation (EEC) N° 259/93, which is based on OECD Decision C(92)39 final. OECD considers that such shipment should not normally present a risk to the environment if recovered properly in the country of destination.

23. The European Commission, however, did not want to impose this point of view on non-OECD countries. Therefore, article 17 of regulation (EEC) N° 259/93 requires the Commission to notify all non-OECD countries of green list waste and to ask them whether they would accept shipments of such waste for recovery without recourse to any particular control procedure or, if this is not the case, that they indicate what control procedures they require or wish to be applied.

24. Having regard to regulation (EEC) No 259/93, the European Commission sent a note verbale to all non-OECD countries, the purpose of which was threefold: (i) to inform these countries of the European Community's new regulations; (ii) to ask for confirmation of the respective positions as outlined in the annexes to both EC and OECD regulations; and (iii) to have an answer from those countries which had not replied earlier.

25. One major point is that the European Community uses the OECD waste lists for its questionnaire, whilst the Basel Convention uses its Annex IX List B for its questionnaire.

26. While it has not been possible to get access to the original European Commission questionnaire, nor to the original individual responses from countries to this questionnaire, clues to the questions asked have been obtained from the amendments to and regulations 1420/1999 and 1547/1999 (based on information provided by the Directorate General – Trade, the Bureau of International Recycling (BIR) and the Official Journal of the European Communities).

27. Further, it appears that the questions were not the same for the two questionnaires, as first, the material lists used in the European Commission questionnaire (annex II to regulation (EEC) 259/93 - the green list of wastes (from OECD and EU)) is not the same in every respect as the Basel Convention Annex IX List B, and second, the control procedure options within the European Union are different than those for the Basel Convention.

28. Using the information provided by BIR, the entire set of responses to the Basel Convention questionnaire, along with the equivalent waste types in the European Union OECD codes, and the responses from the non-OECD countries, are presented in tables C.1–C.20 (appendix C).

29. These tables, each for a different country, show the consistencies and/or the inconsistencies in the responses from the 20 non-OECD countries. Note that only those countries, whose responses to both the Basel Convention and EEC questions were available, were included in these tables and analysis.

30. As an example, table C.1 (Algeria) shows :

Column 1 -	Basel Convention questionnaire responses were available for 3 types of wastes (B1010, B1020, and B4030), for which an “equivalent” EEC type exists. In this case, there was no reply from Algeria;
Column 2 -	Responses were grouped under two control procedures (i.e., 2.a, art. 1(1)b waste, and 2d, import prohibited;
Column 3 -	The corresponding (EEC) 259/93 annex II waste types as per BIR;
Column 4 -	The corresponding OECD waste types as per annex II of the green list of wastes of (EEC) 259/93;
Column 5 -	Non-OECD country responses to Commission or Council regulation questionnaire.

31. The controls presented in regulation (EEC) 259/93 are interpreted in the following manner:

- Amber procedure – Notification with tacit consent;
- Red procedure – Notification with prior informed consent;
- Article 15 procedure – Complex notification procedure.

32. While it is necessary to examine each comparative table in detail to view these consistencies and inconsistencies, the following general comments regarding control procedures are made:

Algeria: Art.1(1)b waste and import prohibited under the Basel Convention; no reply under regulation (EEC) 259/93;

Argentina:	PIC procedure under the Basel Convention; red procedure under regulation (EEC) 259/93;
Bahrain:	No control procedure under the Basel Convention; Ban under regulation (EEC) 259/93;
Bosnia and Herzegovina:	Import prohibited under the Basel Convention; red procedure under regulation (EEC) 259/93;
Brazil:	No control procedure, PIC procedure, and import prohibited under the Basel Convention; no control procedure, red procedure, and ban under regulation (EEC) 259/93;
Bulgaria:	No control procedure, and PIC procedure under the Basel Convention; no control procedure under regulation (EEC) 259/93;
Cambodia:	Import prohibited under the Basel Convention; no reply under regulation (EEC) 259/93;
China:	Import prohibited under the Basel Convention; no control procedure and red procedure under regulation (EEC) 259/93;
Costa Rica:	No control procedure under the Basel Convention; ban under regulation (EEC) 259/93;
Croatia:	PIC procedure, and import Prohibited under the Basel Convention; no control procedure under regulation (EEC) 259/93;
Cuba:	No control procedure, and import prohibited under the Basel Convention; no control procedure and red procedure under regulation (EEC) 259/93;
Egypt:	PIC procedure, and import prohibited under the Basel Convention; no control procedure and ban under regulation (EEC) 259/93;
Madagascar:	No control procedure under the Basel Convention; no control procedure, and red procedure under regulation (EEC) 259/93;
Oman:	Import prohibited under the Basel Convention; no reply under regulation (EEC) 259/93;
Philippines:	Art.1(1)b waste and import prohibited under the Basel Convention; art.15 procedure, and no control procedure under regulation (EEC) 259/93;
Romania:	PIC procedure, and import prohibited under the Basel Convention; art.15 procedure, and ban under regulation (EEC) 259/93;
Serbia and Montenegro	PIC procedure under the Basel Convention; no control procedure under regulation (EEC) 259/93;
Sri Lanka:	PIC procedure under the Basel Convention; no control procedure under regulation (EEC) 259/93;
Thailand:	No control procedure under the Basel Convention; no control procedure, amber procedure and red procedure under regulation (EEC) 259/93;

Ukraine: Art.1(1)b waste under the Basel Convention; red procedure under regulation (EEC) 259/93.

33. It appears that one country, Argentina, is consistent in its responses for both the Basel Convention and regulation (EEC) 259/93 questions. Inconsistencies are found in responses from all other non-OECD countries.

Notes:

* For the countries of Poland and China, responses distributed on February 28, 2004 were used.

1 Some wastes covered by this entry (e.g. hydroxide sludges) are regarded as hazardous (European Waste Code 06 03 13, 06 03 15, 06 04 05) and subject to a PIC Procedure while others (e.g. metal powders) are not.

2 Pending on the particle size (size > 100µm no control procedure applied).

3 Some wastes covered by this entry are not subject to a PIC Procedure (particle size > 100µm, minimum zinc content 45%).

4 Gas evolving skimmings are defined as hazardous waste (European Waste Code 10 03 15) and subject to a PIC Procedure; black dross (EWC 10 03 08) are also defined as hazardous and subject to a PIC Procedure.

5 Some refractory linings are regarded as hazardous (European Waste Code 16 11 01, 16 11 03 16 11 05).

6 Contaminated (e.g. oil containing) catalysts are subject to a PIC Procedure. Some catalysts (not covered by Annex I of the Basel Convention) are regarded as hazardous (European Waste Code 16 08 02).

7 PIC Procedure if they are flammable, piroforic or which in contact with water may yield flammable gases in dangerous quantities.

- 8 Chips and particles of magnesium are Art. 1(1)b waste.
- 9 Cadmium scrap only.
- 10 Zinc ashes are Art. 1(1)b waste.
- 11 Spent catalysts containing inflammable liquids: Art 1(1)b waste.
- 12 Case by case decisions, (e.g. based on limit values, partly classified as hazardous, or controlled under domestic legislation).
- 13 Activated carbon containing genetically modified organisms are Art. 1(1)b waste.
- 14 Plastics containing flame retardants are Art. 1(1)b waste.
- 15 Used single use cameras are considered as WEEE, all of which are exported.
- 16 Import of meat and bone is prohibited.
- 17 The importation of this waste shall be subject to the examination and approval of SEPA.
- 18 The waste thermosetting plastic and the used plastic which has not been treated and washed are prohibited from importing.
- 19 The importation of waste (including noils, yarn waste and garneted stock) of man-made fibers is allowed but shall be subject to the examination and approval of SEPA.
- 20 Applies only to waste (including noils, yarn waste and garneted stock) of man-made, synthetic, and artificial fibres, worn clothing and other worn textiles, used rags, scrap twine, cordage, rope and cables. Remaining is grouped under 2.b.
- 21 Applies only to wine lees, degreas, waste of bones and horn-cores, fish waste, and other wastes from the agro-food industry excluding by-products which meet national and international requirements and standards for human or animal consumption.
- 22 Import for final disposal and for energy recovery is prohibited.
- 23 Skimmings that are flammable or emit, upon contact with water, more than 1 L/kg/hour of flammable gases, are hazardous. Import is controlled.
- 24 Controlled as a "non-listed" waste (i.e. a waste not mentioned in the OECD Decision C(92)39 and EEC 259/93).
- 25 Not controlled if consisting only of metals and alloys.
- 26 If in dispersible form (powder), controlled as a "non-listed waste"; waste selenium in metallic elemental form is considered as a hazardous waste.
- 27 Controlled in OECD Decision C(92)39 and EEC 259/93
- 28 Not controlled: electrical assemblies consisting only of metals and alloys or sorted electronic components which do not contain hazardous substances.
- 29 Certain transition metal catalysts are considered as hazardous waste.
- 30 Under consideration for prohibition.
- 31 Import will be prohibited in the case of lack of recycling capacity, lack of demand for domestic industry, but are controlled under national regulation.
- 32 Non-inert wastes.
- 33 Any person intending to import waste (excluding valuable material) shall procure the permission of the Minister of the Environment.
- 34 The import of the single use camera without batteries is permitted and controlled.
- 35 No control procedure for shipments for recovery if not in dispersible form (powder, sludge, dust or liquid).
- 36 Can be hazardous.
- 37 Import of hazardous and other wastes for final disposal is restricted.
- 38 Not control, follows the system applicable to normal commercial transactions.
- 39 Conflicting responses were found (i.e. 2.b, and 2.c).
- 40 Specified risk material is always subject to PIC Procedure.
- 41 Monomers (solvents) may be hazardous (European Waste Code 14 06 03) and subject to a PIC Procedure. Polymers are covered partly by B3010.
- 42 Gallium.
- 43 Dispersible forms could be controlled as leachate toxic.
- 44 Polymers of styrene are controlled under domestic legislation.

		GA410	2804 50		
B4030	Art. 1(1)b Waste, Import Prohibited	GO050			No Reply

These tables (C.1 - C.20) are interpreted as follows:

Column 1- Basel responses were available for 3 types of wastes (B1010, B1020, and B4030), for which “equivalent” EEC type exists.

In this case there was no reply from Algeria.

Column 2- Responses were grouped under two control procedures (i.e. 2.a: Art. 1(1)b Waste, and 2d : Import prohibited.

Column 3- The corresponding EEC 259/93 Annex II Waste types as per BIR.

Column 4 - The corresponding OECD waste types as per Annex II Green List of Wastes of EEC 259/93.

Column 5 – non-OECD country response to Commission or Council Regulation questionnaire.
