<u>Annex.</u> Reporting instrument and accompanying instructions	143

I. INTRODUCTION

1. On 12 December 1985, the General Assembly adopted resolution 40/91 B, in which, inter alia, it reiterated its recommendation that all Member States should report annually, by 30 April, to the Secretary-General, using the reporting instrument (see annex to the present report), their military expenditures for the latest fiscal year for which data are available. By paragraph 8 of that resolution, the Assembly once again stressed the need to increase the number of reporting States with a view to the broadest possible participation from different geographic regions and representing different budgeting systems.
2. Pursuant to the request of the General Assembly, the Secretary-General, in a note verbale dated 2 January 1987, requested all Member States to submit their reports not later than 30 April 1987.
3. In reply to his note verbale, the Secretary-General has, to date, received reports from 24 countries, 22 of which had used the reporting instrument. These reports are reproduced in section II of the present report. Further replies will be issued as addenda to the present report.

A/42/573
English
Page 4

Explanatory note

Figures in the tables presented below have been reported by participating States *on* the basis of the standard instrument for international reporting of military expenditures. For analytical purposes, the information on military expenditures received in the 24 replies has been computerized, with minor adjustments, to conform to standard statistical practices.

The replies from States are available at the Department for Disarmament Affairs, United Nations Headquarters.

II. REPLIES RECEIVED FROM GOVERNMENTS

ARGENTINA

(Footnotes on following page)

(Footnotes)

Note: The figures indicated are budget estimates.

a/ Under the **competence** of the Federal Ministry of the Interior, not controlled by the **Federal Ministry of Defence**.

b/ Included in column 2.

c/ The **expenses** for the **Austrian United Nations** troops amounted to **\$ 240.4 million** (without **basic salaries** for active personnel) and are **reflected** in column 2.

d/ Included in 1.1.2.

e/ Included in 1.2.5.

f/ Included in 1.2.5.

g/ Included in the budget of the Federal Ministry of Construction and Engineering .

h/ Included in 1 and 2.

In 1986 the Austrian fiscal **breakdown was changed into two categories**, namely, **"personnel"** and **"procurement and operating costs"** . The figures indicated reflect **the new Austrian fiscal classification**. The increase in 1986 of **"procurement and construction"** over the 1985 figures is owing to the fact that partially **costs** for **"operation and maintenance"** were shifted to **"procurement and construction"**.

For comparison, the distribution of expenses according to the old **classification** for column 2 **reads as** follower

1.	OPERATING COSTS	\$ 13 031 million
1.1	Personnel	\$ 8 464 million
1.2	Operations and maintenance	\$ 4 567 million
2.	PROCUREMENT AND CONSTRUCTION	\$ 3 999 million

Part II

1. In order to approximate the opportunity costs of using conscripts in the military sector, the following information is requested:

(a) The average civilian wage rate that the conscripts would have been likely to obtain during the reporting year if they had not been occupied in the military sector.

Answer: 14 x 11,092 Austrian schillings (gross)

If such an estimate is not available, respondents are requested to suggest an average civilian wage rate that may be readily available and that the respondents believe might serve as a reasonable measure of opportunity costs.

(b) The number of man-years devoted by conscripts to military service during the reporting year concerned.

Answer: ...

2. With reference to point (d) of the specific guidelines (see annex), respondents are requested to give below the total amount of military assistance received from abroad during the reporting year. The amount should be given in the same denomination and currency as used in the matrix, preferably converted from foreign currencies to national currency at average annual market or par value exchange rate as reported by the International Monetary Fund.

Answer: ...

3. With reference to points (n) and (a), the requested information should be reported here in the same value terms as used in the matrix. It is requested that total expenditures, at least, and preferably detailed by type of force group as in columns 1 to 12 of the matrix, be reported for the following items:

Depletion of ammunition:

Sales from the military sector of:

(a) Land)	
)	
(b) Real estate other than land)	
)	
(c) Equipment)	Total income S 619 million.
)	
(d) services)	
)	
(e) Other)	

4. Respondents are requested to submit information as to whether statistics of the following kinds would be readily available for the reporting year.

	<u>Available</u>	<u>Answer</u>	<u>Not available</u>
Price index of specific relevance to the military Sector			X
Exports of military equipment			X
Such exports divided by:			
(i) Countries			X
(i i) Regions			X
Imports of military equipment			X
Such imports divided by:			
(i) Countries			X
(i i) Regions			X

5. If a regularly published exchange rate is unavailable, or considered unsuitable for converting military expenditures, respondents are requested to comment on other possible ways for comparing the military expenditures of the responding country with those of other countries.

Average 1986 exchange rate: \$US 1 = S 15.27

Purchasing power parity (as at December 1986) : \$US 1 = S 16.87

Notes:

1. Type of forces

(a) **Columns 6 and 7:** it is not possible at present to make a distinction between support forces and central command.

(b) Column 8: paramilitary forces. The units of the National Gendarmerie meet the definition given in point (c) of the guidelines.

2. Type of costs

(a) The additional information requested in points (i), (k), (l) and (n) of the guidelines is not available.

(b) It is not possible at present to make a distinction between the expenditures under subdivisions 3.1 and 3.2.

Part II

1. (a) Average civilian wage rate that the conscripts would have been likely to obtain during the reporting year if they had not been occupied in the military sector.

Answer: not available.

(b) Number of man-years devoted by conscripts to military service during the reporting year concerned.

Answer: 8 or 10 months.

2. Total amount of military assistance received from abroad during the reporting year.

Answer: nil.

3. Depletion of ammunition: not available.

Sales from the military sector of:

(a) Land)	
)	142.2 million Belgian francs.
(b) Real estate other than land)	
(c) Equipment)	
)	
(d) Services)	not available.
)	
(e) other)	

4. Available or not available for the reporting year:

	<u>Available</u>	<u>Answer</u>	<u>Not available</u>
Price index of specific relevance to the military sector			X
Exports of military equipment			
(i) By country			X
(ii) By region			X
Imports of military equipment			
(i) By country	X		
(ii) By region			X

5. Shadow exchange rate for 1985: \$US 1 = 59.37800 Belgian francs.

Part II

1. In order to approximate the opportunity costs of using conscripts in the military sector, the following information is requested:

(a) The average civilian wage rate that the conscripts would have been likely to obtain during the reporting year if they had not been occupied in the military sector.

Answer: not applicable.

If such an estimate is not available, respondents are requested to suggest an average civilian wage rate that may be readily available and that the respondents believe might serve as a reasonable measure of opportunity costs.

(b) The number of man-years devoted by conscripts to military service during the reporting year concerned.

Answer: not applicable.

2. With reference to point (d) of the specific guidelines (see annex), respondents are requested to give below the total amount of military assistance received from abroad during the reporting year. The amount should be given in the same denomination and currency as used in the matrix, preferably converted from foreign currencies to national currency at average annual market or par value exchange rate as reported by the International Monetary Fund.

Answer: nil.

3. With reference to points (n) and (o), the requested information should be reported here in the same value terms as used in the matrix. It is requested that total expenditures, at least, and preferably detailed by type of force group as in columns 1 to 12 of the matrix, be reported for the following items:

Depletion of ammunition: 140 million per annum,

Sales from the military sector of:

(a) Land

(b) Real estate other than land

(c) Equipment: sales from military

(d) Services: sales are negligible

(e) Other

4. Respondents are requested to submit information as to whether statistics of the following kinds would be readily available for the reporting year.

	<u>Available</u>	<u>Answer</u>	<u>Not available</u>
Price index of specific relevance to the military sector	X		
Exports of military equipment			X
Such exports divided by:			
(i) Countries			X
(ii) Regions			X
Imports of military equipment	X		
Such imports divided by:			
(i) Countries	X		
(ii) Regions	X		

5. If a regularly published exchange rate is unavailable, or considered unsuitable for converting military expenditures, respondents are requested to comment on other possible ways for comparing the military expenditures of the responding country with those of other countries.

Part II

1. In order to approximate the opportunity costs of using conscripts in the military sector, the following information is requested:

(a) The average civilian wage rate that the conscripts would have been likely to obtain during the reporting year if they had not been occupied in the military sector,

Answer: minimum wage = in the capital	¢15.00
minimum wage = in the country	<u>9.00</u>
	<u>¢24.00</u>

Wage per period of time: ¢4,320.00

Currency unit: có len

(b) The number of man-years devoted by conscripts to military service during the reporting year concerned.

Answer: duration of compulsory service: two years

Official troop strength: 39,301

Number of man-years: 78,762

2. With reference to point (d) of the specific guidelines (see annex), respondents are requested to give below the total amount of military assistance received from abroad during the reporting year. The amount should be given in the same denomination and currency as used in the matrix, preferably converted from foreign currencies to national currency at average annual market or par value exchange rate as reported by the International Monetary Fund.

Answer: amount of military assistance received: ¢615 million.

3. With reference to points (n) and (o) of the guidelines:

Depletion of ammunition:

Sales from the military sector of:

(a) Land

(b) Real estate other than land

(a) Equipment

(d) Services

(a) Other

Part II

1. In order to approximate the opportunity costs of using conscripts in the military sector, the following information is requested:

(a) The average civilian wage rate that the conscripts would have been likely to obtain during the reporting year if they had not been occupied in the military sector.

Answer: 3,800 (Pmk).

If such an estimate is not available, respondents are requested to suggest an average civilian wage rate that may be readily available and that the respondents believe might serve as a reasonable measure of opportunity costs.

(b) The number of man-years devoted by conscripts to military service during the reporting year concerned.

Answer: 26,080.

2. With reference to point (d) of the specific guidelines (see annex), respondents are requested to give below the total amount of military assistance received from abroad during the reporting year. The amount should be given in the same denomination and currency as used in the matrix, preferably converted from foreign currencies to national currency at average annual market or par value exchange rate as reported by the International Monetary Fund.

Answer: nil.

3. With reference to points (n) and (o), the requested information should be reported here in the same value terms as used in the matrix. It is requested that total expenditures, at least, and preferably detailed by type of force group as in columns 1 to 12 of the matrix, be reported for the following items:

Depletion of ammunition:	201,500 (x 1,000 Pmk)	land forces	176,500
		naval forces	0,800
		air forces	16,200

sales from the military sector of:

(a) Land)	
)	
(b) Real estate other than land)	
)	
(c) Equipment)	not available.
)	
(d) Services)	
)	
(e) Other)	

4. **Respondents** are **requested** to submit information as to whether **statistics** of the following kinds would **be readily available** for the reporting year.

	<u>Available</u>	<u>Answer</u>	<u>Not available</u>
Price index of specific relevance to the military sector			X
Exports of military equipment			
Such exports divided by:			
(i) Countries			X
(ii) Regions	X		
Imports of military equipment	X		
Such imports divided by:			
(i) Countries			X
(ii) Regions	X		

5. If a regularly published exchange rate is **unavailable, or considered** unsuitable for converting military expenditures, respondents are **requested** to **comment** on **other** possible ways for **comparing** the military **expenditures** of the responding country with those of other **countries**.

Note: The figures given relate to the last year available, i.e., those for the 1987 budget, excluding pensions, expressed in a currency unit that is in keeping with United Nations requests. The terms used are those recommended by the United Nations. The following comments should be noted:

(a) The item "strategic forces" includes expenditure on strategic nuclear forces and prestrategic nuclear arms;

(b) The "paramilitary forces" are represented by the Gendarmerie;

(c) Figures for the items "military assistance" and "civil defence" have not been provided: in the case of the first, because the requisite information does not appear in non-classified budgetary documents; in the case of the second, because this does not concern the Ministry of Defence.

The data required for the answers to part II of the United Nations questionnaire are not available in questions 1, 2 and 3) or are classified (question 41).

GERMAN?!, FEDERAL REPUBLIC OF

[Original: English]

[6 May 1987]

1. As in previous years, the Federal Republic of Germany submits its data on military expenditures on the basis of the **instrument for standardized** international reporting of military expenditures.

2. The Federal Republic of Germany reaffirms its conviction that the United Nations reporting instrument has shown its viability and usefulness in recent years. It continues to believe that Member States that have not yet done so should, as **soon** as possible, participate in the United Nations reporting **system** for military expenditures, which has to be considered as an important means to increase confidence between States and as a valuable first step towards negotiations aimed at agreed and balanced reductions **of military** budgets.

(Notes on following page)

Notes:

1. **1. Personnel**

Excludes service pensions.

2. **1.2.1 (Materials for current use)**

This item contains POL (petrol, oil and lubrication), communal messing and procurement of replacement clothing, medicines and bandages.

3. **3.2.3 (Purchased services)**

This item includes postage, cargo and transport costs, telecommunication charges and general clerical expenses, such as the cost of office materials, printing, etc.

Under the Federal Armed Forces accounting system, travel expenses are staff costs and are included in items 1.1.1 to 1.1.3 (DM 178 million in 1985). Division of these figures into their component parts would require additional investment of time and resources.

4. **1.2.4 (rent costs)**

Rents for immovable property (DM 72 million in 1985) are, with the exception of column 14, included in the maintenance and repair costs for immovable property under item 1.2.2. Separate figures for each of the three services cannot be given.

5. **2.1.2 (Missiles)**

Expenditure on missiles is included under item 2.1.1.

6. **2.1.6 (Artillery) 2.1.7 (Other ordnance)**

Separate figures for military and other ordnance cannot be given. The sum total of these elements is contained under item 2.1.6.

Part II

1. In order to approximate the opportunity costs of using conscripts in the military sector, the following information is requested:

(a) The average civilian wage rate that the conscripts would have been likely to obtain during the reporting year if they had not been occupied in the military sector.

Answer: not applicable.

If such an estimate is not available, respondents are requested to suggest an average civilian wage rate that may be readily available and that the respondents believe might serve as a reasonable measure of opportunity costs.

(b) The number of man-years devoted by conscripts to military service during the reporting year concerned.

Answer: not applicable.

2. With reference to point (d) of the specific guidelines (see annex), respondents are requested to give below the total amount of military assistance received from abroad during the reporting year. The amount should be given in the same denomination and currency as used in the matrix, preferably converted from foreign currencies to national currency at average annual market or par value exchange rate as reported by the International Monetary Fund.

Answer: not applicable.

3. With reference to points (n) and (o), the requested information should be reported here in the same value terms as used in the matrix. It is requested that total expenditures, at least, and preferably detailed by type of force group as in columns 1 to 12 of the matrix, be reported for the following items:

Depletion of ammunition: not available.

Sales from the military sector of:

(a) Land: 15;

(b) Real estate other than land: not applicable;

(c) Equipment: 5;

(d) Services: 1;

(e) Other: 3.

4. **Respondents** are requested to submit information as to whether statistics of the following kinds would be readily available for the reporting year.

	<u>Ava</u> ilable	<u>Answer</u>	<u>Not available</u>
Price index of specific relevance to the military sector			X
Exports of military equipment			X
Such exports divided by:			
(i) Countries			X
(i i) Regions			X
Imports of military equipment			X
Such imports divided by:			
(i) Countries			X
(ii) Regions			X

5. If a regularly published exchange rate is unavailable, or considered unsuitable for converting military expenditures, respondents are requested to **comment** on other possible ways for **comparing** the military expenditures of the responding country with those of other countries.

(Notes on following page)

Notes:

1. 1.1.2. **Military pensions** are included in total under "Support" (6) at the amount of **1,259,698** thousands of **guilders**, as a "surrogate" of pensions fees.
2. 1.2.2. **Major overhauls and modifications** are included in the appropriate "procurements" items.
3. 1.2.4. **Rent costs** are not available.
4. 2.2. The specification asked is not available.
5. 3. Most of the **amounts** for research and development are for technical reasons included in the appropriate "procurement" items.
6. 8. The Netherlands Royal "Marechaussee" (charged with external as well as internal security tasks) is represented under column 5 "Other combat forces". Additional expenditures concerning the "**Marechaussee**" forces are included in the figures presented under **columns 2, 3 and 4**.
7. 9. Figures concerning "**Civil defence**" are included in the **Netherlands'** reply. It is stressed that these figures originate from the budgets of several Ministries.

Part II

1. In order to approximate the opportunity **costs** of using conscripts in the military sector, the following information is requested:

(a) The average civilian wage rate that the conscripts would have been likely to obtain during the reporting year if they had not been occupied in the military sector.

Answer: 23,000 guilders a year.

If such an estimate is not available, respondents are requested to suggest an average civilian wage rate that may be readily available and that the respondents believe might serve as a reasonable measure of opportunity costs.

(b) The number of man-years devoted by conscripts to military service during the reporting year concerned.

Answers 46,155

2. With reference to point (d) of the specific guideline (see annex), respondents are requested to give below the total amount of military assistance received from abroad during the reporting year. The amount should be given in the same denomination and currency as used in the matrix, preferably converted from foreign currencies to national currency at average annual market or par value exchange rate as reported by the International Monetary Fund.

Answer: none.

3. With reference to points (n) and (o), the requested information should be reported here in the same value terms as used in the matrix. It is requested that total expenditures, at least, and preferably detailed by type of force group as in columns 1 to 12 of the matrix, be reported for the following items:

Depletion of **ammunition**:

Sales from the military sector of:

(a) Land)	
)	
(b) Real estate other than land)	
)	
(c) Equipment)	32,500,000 guilders.
)	
(d) Services)	
)	
(e) Other)	

4. Respondents are requested to submit information as to whether statistics of the following kinds would be readily available for the reporting year.

	<u>Available</u>	<u>Answer</u>	<u>Not available</u>
Price index of specific relevance to the military sector	X		
Exports of military equipment			X
Such exports divided by:			
(i) Countries			X
(i i) Regions			X
Imports of military equipment			
Such imports divided by:			
(i) Countries	X		
(i i) Regions	X		

5. If a regularly published exchange rate is unavailable, or considered unsuitable for converting military expenditures, respondents are requested to comment on other possible ways for comparing the military expenditures of the responding country with those of other countries.

Part II

1. In **order** to approximate the opportunity **costs** of using conscripts in the military sector, the following information is requested:

(a) The average civilian wage rate that the conscripts would have **been** likely to obtain during the reporting year if they had not been occupied in the military sector.

Answer: not applicable.

If such an estimate is not available, respondents are **requested** to **suggest** an average civilian wage rate that may be readily available **and** that the **respondents** believe might **serve** as a reasonable **measure** of opportunity **costs**.

(b) The number of man-years devoted by conscripts to military service during the reporting year concerned.

Answer: not applicable.

2. With **reference** to **point** (d) of the **specific guidelines** (see annex), respondents are requested to give below the total amount of military assistance received **from** abroad **during** the reporting year. The amount should be **given** in the **same** denomination and currency **as** used in the matrix, preferably converted from foreign currencies to **national** currency at average annual market or par **value** exchange rate as reported **by** the International Monetary **Fund**.

Answer: nil.

3. With reference to point (n) and (o), the requested **information** should be reported here in the **same** value terms **used** in the matrix. It is requested that total **expenditures**, at **least**, and preferably **detailed** by type of force group as in **columns** 1 to 12 of the matrix, **be** reported for the following **items**:

Depletion of **ammunition**: 67

Sales from the military **sector** of:

(a) **Land**: \$NZ 280

(b) Real estate other than land

(c) **Equipment**: 2,204

(d) **Services**: 2,292

(e) **Other**: 67

4. Respondents are requested to submit information as to whether statistics of the following kinds would be readily available for the reporting year,

	Available	<u>Answer</u>	<u>Not available</u>
Price index of specific relevance to the military sector			X
Exports of military equipment			X
Such exports divided by			
(i) Countries			X
(ii) Regions			X
Imports of military equipment			X
Such imports divided by			
(i) Countries			X
(ii) Regions			X

5. If a regularly published exchange rate is unavailable, or considered unsuitable for converting military expenditures, respondents are requested to comment on other possible ways for comparing the military expenditures of the responding country with those of other countries.

NORWAY

[Original: English]

[8 June 1987]

The following explanatory **comments should be** added to the national report:

Certain simplifications have **been** made owing to difficulties in adapting the source material to the United Nations **matrix**. The **matrix**, however, is filled in as detailed as possible. Figures listed in parentheses are also included in other figures and are therefore **not to be** included in the sum total.

Part I

1. In order to approximate the opportunity costs of using conscripts in the military sector, the following information is requested:

(a) The average civilian wage rate that the conscripts would have been likely to obtain during the reporting year if they had not been occupied in the military sector.

Answer : Nkr 9,200 per month.

If such an estimate is not available, respondents are requested to suggest an average civilian wage rate that may be readily available and that the respondents believe might serve as a reasonable measure of opportunity costs.

(b) The number of man-years devoted by conscripts to military service during the reporting year concerned.

Answer: 23,300.

2. With reference to point (d) of the specific guidelines (see annex), respondents are requested to give below the total amount of military assistance received from abroad during the reporting year. The amount should be given in the same denomination and currency as used in the matrix, preferably converted from foreign currencies to national currency at average annual market or par value exchange rate as reported by the International Monetary Fund.

Answer: Nkr 600 million.

3. With reference to points (n) and (o), the requested information should be reported here in the same value terms as used in the matrix. It is requested that total expenditures, at least, and preferably detailed by type of force group as in columns 1 to 12 of the matrix, be reported for the following items:

Depletion of ammunition:

Sales from the military sector of:

- (a) Land
- (b) Real estate other than land
- (c) Equipment
- (d) Services
- (e) Other

4. *Respondents* are requested to *submit* information as to whether statistics of the following kinds would be readily available for the reporting year.

	<u>Available</u>	<u>Answer</u>	<u>Not available</u>
Price index of specific relevance to the military sector	X		
Exports of military equipment			
Such exports divided by:			
(i) Countries			
(ii) Regions			
Imports of military equipment	X		
Such imports divided by:			
(i) Countries	X		
(ii) Regions			

5. If a regularly published exchange rate is unavailable, or considered unsuitable for converting military expenditures, respondents are requested to comment on other possible ways for comparing the military expenditures of the responding country with those of other countries.

PANAMA

[Original: Spanish]

[29 April 1987]

The Permanent Mission of Panama wishes to point out to the Secretary-General that the Government of Panama has considered it appropriate to include in its report a third part (see part XII below) containing recommendations for improving the reporting instrument.

Instrument for standardized international reporting
of military expenditures

(Actual outlays, current prices)

Country: Panama

Fiscal year: 1 **January-31** December 1986

National currency and unit of measure: balboas (thousands)

(The unit of measure should not exceed one **ten** thousandth of the total military expenditures)

Explanatory notes

1. Costs incurred in respect of personnel are included in the categories and amounts set forth in annex I below. It should be pointed out that the amount of expenditure for social security contributions that are deducted from personnel pay is not included in the budget of the institution responsible for social security in our country. That is because this type of transaction takes place between the central Government and this institution. However, for the purpose of this report, it was considered appropriate to indicate the amount of expenditure chargeable to social security contributions as an integral element under the heading of personnel. In conclusion, a brief explanation is given of the items that make up the subcategory of personnel.

A. Pay

This represents expenditure for basic pay of personnel in fixed or permanent posts.

B. Allowances

These are costs incurred for remuneration additional to pay, authorized in special provisions.

C. Costs of representation

This is remuneration additional to the fixed pay for certain officials by reason of their functions. It is established in accordance with the legal provision which specifies the officials who are entitled to receive this remuneration.

D. Thirteenth month's pay

This is the special increment received by each public servant, consisting of one day's pay for every 12 days or fraction of a day worked during the year.

E. Other personnel services

These represent other costs not included in the above-mentioned categories.

F. Funds earmarked for wages and salaries

These are obligations in respect of wages and salaries which arose in the period in question, but for which payment was deferred to subsequent fiscal periods.

G. Social security contributions

These include the cost of the contributions which the central Government as an employer must pay the institution responsible for social security; they cover social security, educational expenses, occupational hazards and the supplementary fund.

2. With respect to the subcategory "Maintenance and repair", expenditure was incurred for the sole purpose of preserving the assets in question; for this reason the expenditure should not be considered as additional investment.

3. The amount under "Rent costs" includes only the amount incurred under that heading in 1986,

4. From the instructions concerning information to be presented in the columns Under the heading "Military assistance", the following conclusions have been reached:

(a) Column 9 should be filled in by countries receiving military assistance, but information in that column relates to all military assistance provided by those countries to allied forces stationed in their territory)

(b) Column 10 is to be used by countries that provide military assistance to receiving countries;

(c) In columns 1 to 7 information is provided concerning military expenditure financed from notifying country's own resources (Flow f) and military assistance channelled through that country's budget (flow c).

As can be seen, the matrix provides no way of presenting information on military assistance not channelled through the budget of the receiving country. For this reason, we have included table B in order to show the amount of direct military assistance received according to force groups and categories in 1986.

5. See table B below.

6. Does not include the amount received under this heading through direct military assistance.

7. See table B below.

8. Does not include the amount received under this heading through direct military assistance.

9. Does not include the amount received under this heading through direct military assistance.

Table BDirect military assistance, 1986

		(In balboas)
I. AIR FORCE		800 000
Aircraft and engines	800 000	
IX. LAND FORCES		3 252 000
Other ordnance and ground force weapons	1 895 347	
Ammunition	167 467	
Electronics and communications	199 543	
Other	989 643	
III. OTHER CONSTRUCTION		<u>350 000</u>
TOTAL DIRECT MILITARY ASSISTANCE		<u><u>4 402 000</u></u>

Note: This amount is not included in the totals in table A (reporting instrument).

Paramilitary forces

General functions

1. To **plan** and carry out intelligence and counter-intelligence **activities** in order to maintain the internal security of the State.
2. To carry out procedures concerning **the legalization** of **the status** of foreigners **in the country**.
3. To **control the entry** of persons into and their departure *from* the country at frontier posts, ports and airports.
4. To combat drug trafficking.
5. To help preserve the physical integrity, honour and property of all the inhabitants of the national territory.
6. To provide courses and seminars for personnel in basic skills to combat acts of terrorism.

ANNEX I

Personnel expenditures, 1936

		(In balboas)
Wages and salaries		53 371 034
Military personnel	46 754 829	
Paramilitary personnel	5 215 775	
Civilian personnel	1 400 430	
Allowances		5 032 818
Representation expenses		764 875
Thirteenth month's pay		4 334 450
Other personnel services		395 600
Funds earmarked for wages and salaries		33 276
Social security contributions		7 685 429
Employers' share of social security contributions	5 737 386	
Employers' share in respect of occupational hazards	1 120 792	
Employers' share of educational expenses	667 138	
Employers' share of supplementary fund contributions	160 113	
Total personnel expenditures		<u><u>71 617 482</u></u>

ANNEX II

Expenditures for materials for current use, 1986

	(In balboas)
Food	1 910 370
Textiles and clothing	3 774 599
Fuels and lubricants	12 958 205
Paper and cardboard products	97 361
Chemical and related products	96 145
Articles for receptions	7 000
Other sundry products	216 550
Kitchen and dining room equipment	3 789
Sporting and recreational equipment	7 760
Toilet and cleaning equipment	21 100
Medical and laboratory equipment	1 579
Office equipment and supplies	1 182 378
Medical and surgical instruments	632
Other equipment and materials	8 032
Total expenditures for materials for current use	<u>20 285 500</u>

ANNEX III

Maintenance and repair expenditures, 1986

		(In balboas)
Maintenance and repair		958 224
Of buildings	55 100	
Of machinery and other equipment	14 400	
Of furniture and of office equipment	18 124	
Other maintenance expenses	870 600	
Funds earmarked for maintenance and repair		10 935
Construction and repair materials		197 845
Asphalt	4 829	
Cement	4 386	
Wood	35 000	
Plumbing equipment	9 814	
Electrical equipment	24 464	
Met 1 materials	9 450	
Stone and sand	2 886	
Other construction materials	107 016	
Parts		1 586 732
Funds earmarked for parts		6 443
Tools and instruments		7 300
		<hr/>
Total maintenance and repair expenditures		<u>2 767 479</u>

ANNEX IV

Expenditures for purchased services, 1986

		(In balboas)
Basic services		7 156 761
Water	619 286	
Sanitation	17 250	
Electrical energy	3 183 700	
Telecommunications	3 336 525	
Printing and bookbinding		198 600
Transport of individuals and goods.		321 000
Within the country	265 200	
Outside the country	55 800	
Commercial and financial services		1 765 896
Storage	5 500	
Bank commissions and expenses	6 250	
Insurance expenses	1 745 146	
Other commercial and financial services	9 000	
Total expenditures for purchased services		<u>9 442 257</u>

ANNEX V

Other expenditures, 1986

	(In balboas)
Special services	440 000
Rental of electronic equipment	180 495
Rental of office equipment	96 336
Rental of means of transport	104 000
Other rentals	15 030
Incidentals	361 804
Travel allowances	680 451
Total of other expenditures	<u>1 878 116</u>

ANNEX VI

Other procurement expenditures, 1986

		(In balboas)
Means of transport and equipment		1 008 929
Marine	4 000	
Land	1 004 929	
Laboratory equipment		17 359
Office equipment		51 116
Office furniture		100 669
Sundry machinery and equipment		710 600
Total of other procurement expenditures		<u><u>1 888 673</u></u>

Part II

1. In order to approximate the opportunity costs of using conscripts in the military sector, the following information is requested:

(a) The average civilian wage rate that the conscripts would have been likely to obtain during the reporting year if they had not been occupied in the military sector.

Answer: 250 balboas monthly.

If such an estimate is not available, respondents are requested to suggest an average civilian wage rate that may be readily available and that the respondents believe might serve as a reasonable measure of opportunity costs.

(b) The number of man-years devoted by conscripts to military service during the reporting year concerned.

Answer: not available.

2. With reference to point (d) of the specific guidelines (see annex), respondents are requested to give below the total amount of military assistance received from abroad during the reporting year. The amount should be given in the same denomination and currency as used in the matrix, preferably converted from foreign currencies to national currency at average annual market or par value exchange rate as reported by the International Monetary Fund.

Answer: B 4,402,000.

3. With reference to points (n) and (o), the requested information should be reported here in the same value terms as used in the matrix. It is requested that total expenditures, at least, and preferably detailed by type of force group as in columns 1 to 12 of the matrix, be reported for the following items:

Depletion of ammunition: not available.

Sales from the military sector of:

(a) Land: not applicable;

(b) Real estate other than land: not applicable;

(c) Equipment: not applicable;

(d) Services: not applicable;

(e) Other: not applicable.

4. Respondents **are** requested to **submit informat** ion as to whether statistics of the, following kinds would be readily **available** for the reporting year.

	<u>Answer</u>
<u>Available</u>	<u>Not available</u>
Price index of specific relevance to the military sector	X
Exports of military equipment	X
Such exports divided by:	
(i) Countries	
(ii) Regions	
Imports of military equipment	X
Such imports divided by	
(i) Countries	
(ii) Regions	

5. If a regularly published **exchange** rate **is** unavailable, or considered **unsuitable** for converting **military** expenditures, respondents are requested to **comment on other possible** ways for comparing the **military expenditures of the responding country with those of other** countries.

Part III

Recommendations

1. Under the matrix heading "**Resource** costs", the subcategory "Personnel" comprises only three groups; conscripts, **other** military personnel, including **reserves**, and civilian **personnel**. It **seems** reasonable **to** add another row in order to include the **most, important element in this** subcategory, that **is, military** personnel, **In** other words, **the subcategory** "Personnel" should be arranged as follows:

Personnel:

Military personnel

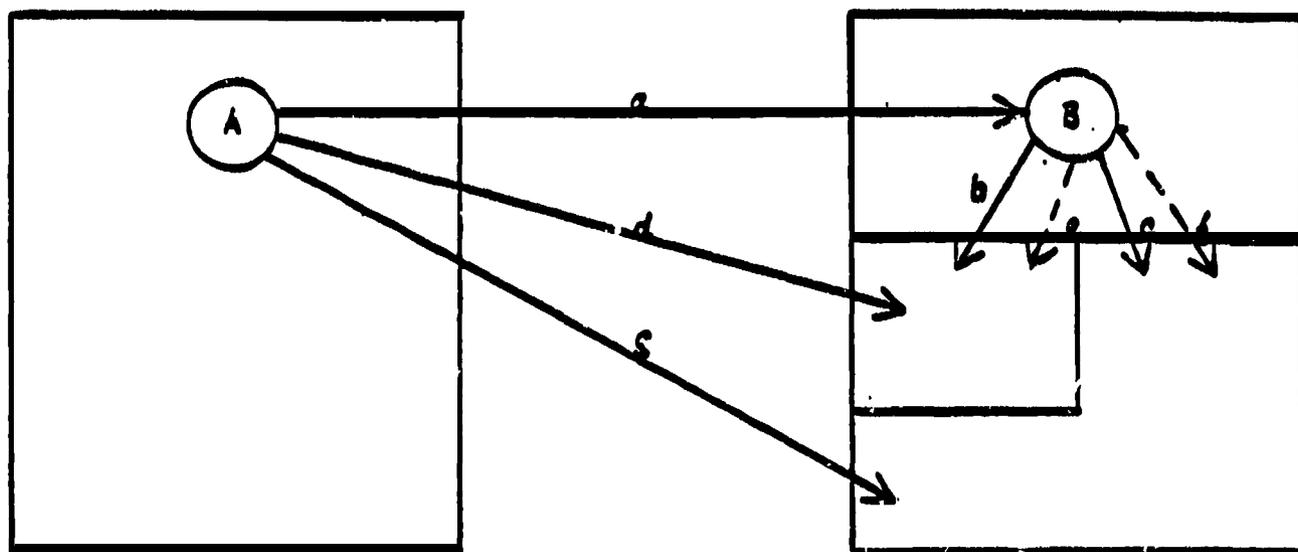

Conscripts

Other military personnel, including **reserves**

Civilian **personnel**

2. With respect to the figure showing the ways which country A may give military assistance to country B, the Government of Panama believes that the alternative should be considered, namely, that the said resources may be given directly, without being channelled through the budget of country B.

Below is the figure showing the proposed alternative:

3. Moreover, the addition of another vertical column should be considered under the matrix heading "Force groups", in the "Military assistance" category, in order to collect information on flow g. That column could be called "Direct military assistance".

ROMAN IA

(Original: English/French)

[4 May 1987]

As is known, in 1986 Romania reduced its arms, armed forces and military expenditures by 5 per cent. The referendum, held on 23 November 1986, approved this new reduction, which will be duly reflected in the next report of Romania on military expenditures in 1986.

Part II

1. In order to approximate the opportunity costs of using conscripts in the military sector, the following information is requested:

(a) The average civilian wage rate that the conscripts would have been likely to obtain during the reporting year if they had not been Occupied in the military sector.

Answer : about 75,000 kronor per year (excluding social costs).

If such an estimate is not available, respondents are requested to suggest an average civilian wage rate that may be readily available and that the respondents believe might serve as a reasonable measure of opportunity costs.

(b) The number of man-years devoted by conscripts to military service during the reporting year concerned.

Answer: about 49,000.

2. With reference to point (d) of the specific guidelines (see annex), respondents are requested to give below the total amount of military assistance received from abroad during the reporting year. The amount should be given in the same denomination and currency as used in the matrix, preferably converted from foreign currencies to national currency at average annual market or par value exchange rate as reported by the International Monetary Fund.

Answer: none.

3. With reference to points (n) and (o), the requested information should be reported here in the same value terms as used in the matrix. It is requested that total expenditures, at least, and preferably detailed by type of force group as in columns 1 to 12 of the matrix, be reported for the following items:

	(2)	(3)	(4)	(13)
Depletion of ammunition:	339	26	23	388

Sales from the military sector of:

(a) Land:				4
(b) Real estate other than land:				15
(c) Equipment:	42		8	59
(d) Services:				
(e) Other:				

4. Respondents are requested to submit information as to whether statistics of the following kinds would be readily available for the reporting year.

	<u>Available</u>	<u>Answer</u>	<u>Not available</u>
Price index of specific relevance to the military sector			X
Exports of military equipment			
Such exports divided by			
(i) Countries			X
(ii) Regions			
Imports of military equipment			
Such imports divided by:			
(i) Countries			X
(ii) Regions	X		

5. If a regularly published exchange rate is unavailable, or considered unsuitable for converting military expenditures, respondents are requested to comment on other possible ways for comparing the military expenditures of the responding country with those of other countries.

UNITED KINGDOM OF GREAT BRITAIN AND NORTHERN IRELAND

[Original: English1

[28 May 1987]

The United Kingdom of Great Britain and Northern Ireland wishes to take this opportunity to reiterate its conviction as to the value of supplying information on military expenditure as a means of increasing confidence and stability between States. Accordingly, it transmits herewith a report on its military expenditure for the year ended 31 March 1986, in the standardized form. It welcomes the fact that this matrix is being completed by an increasing number of States. It continues to hope that countries that have *not* so far done so will be encouraged to take part.

Instrument for standardized international reporting
of military expenditures

(Actual outlays, current prices)

country: United Kingdom of Great Britain and Northern Ireland Fiscal year: 1 April 1985-31 March 1986

National currency and unit of measure: Pounds sterling (millions)

(The unit of measure should not exceed *one* ten thousandth of the total military expenditures]

Notes :

(A) Actual expenditure on the United Kingdom nuclear strategic force is not separately identified by force group or resource cost categories. This expenditure has been included in other categories. However, an annual assessment of the cost of the force is made and estimated expenditure in 1985-1986 is £509 million.

(B) While separately identified, research and development costs are included in the totals of resource categories 1 and 2.

Part II

1. In order to approximate the opportunity costs of using conscripts in the military sector, the following information is requested:

(a) The average civilian wage rate that the conscripts would have been likely to obtain during the reporting year if they had not been occupied in the military sector.

Answer: not applicable.

If such an estimate is not available, respondents are requested to suggest an average civilian wage rate that may be readily available and that the respondents believe might serve as a reasonable measure of opportunity costs.

(b) The number of man-years devoted by conscripts to military service during the reporting year concerned.

Answer: not applicable.

2. With reference to point (d) of the specific guidelines (see annex), respondents are requested to give below the total amount of military assistance received from abroad during the reporting year. The amount should be given in the same denomination and currency as used in the matrix, preferably converted from foreign currencies to national currency at average annual market or par value exchange rate as reported by the International Monetary Fund.

Answer: not applicable.

3. With reference to points (n) and (o), the requested information should be reported here in the same value terms as used in the matrix. It is requested that total expenditures, at least, and preferably detailed by type of force group as in columns 1 to 12 of the matrix, be reported for the following items:

Depletion of ammunition: not available.

Sales from the military sector of:

(a) Land: E23.649 million;

(b) Real estate other than land: E36.451 million;

(c) Equipment: E6.0 million;

(d) Service : not available ;

(e) Other: not available.

4. Respondents are requested to submit information as to whether statistics of the following kinds would be readily available for the reporting year.

	<u>Available</u>	<u>Answer</u>	<u>Not available</u>
Price index of specific relevance to the military sector	x		
Exports of military equipment	x		
Such exports divided by:			
(i) Countries			X
(ii) Regions	x		
Imports of military equipment	x		
Such imports divided by:			
(i) Countries			X
(ii) Regions	x		

5. If a regularly published exchange rate is unavailable, or considered unsuitable for converting military expenditures, respondents are requested to comment on other possible ways for ~~comment~~ comparing the military expenditures of the responding country with those of other countries.

(Footnotes on following page)

(Footnotes)

(This report is assumed to incorporate footnotes a/ through u/ of the matrix as defined in the Instructions accompanying the "Instrument for Standardized International Reporting of Military Expenditures", contained in the annex to United Nations reports on military expenditures reported by States.)

a/ In United States practice, the accounting of military outlays is primarily in terms of the title used in appropriation legislation in the United States Congress, which follows organizational entities of the Armed Forces. Thus, data in column 2 are for Army; column 3, Navy; column 4, Air Force; column 5, Marine Corps; column 6, Defence agencies (including the Office of the Secretary of Defense); column 7, Defence-wide (Defence stock and industrial funds, and miscellaneous defence-wide activities); and column 8, National Guard. Outlay data for column 1 are not readily available, since strategic forces do not constitute a distinct organization but are located in several branches of service. Accounting by major force missions more closely resembling the force groups in this matrix, including strategic, is conducted for the "budget authority" approved by the Congress. For further explanation, see the United States reply for the practical test of the reporting instrument contained in document A/35/479.

b/ Includes economic support fund, not included in reports of years prior to 1985.

c/ Federal outlays by the Federal Emergency Management Agency on civil defence programmes.

d/ Military retirement pay for all forces, shown here in previous submissions to the United Nations, is included in columns 2-5 and 8, respectively, since the 1986 submission.

e/ Includes outlays for procurement.

f/ Outlays under official United States procurement appropriation accounts, except for their personnel compensation component, are assigned in their entirety to the most applicable cells of the United Nations matrix.

g/ Outlays by the Department of Energy on all atomic energy defence activities. In addition to outlays related to weapons and nuclear materials production, includes outlays on naval reactor development and verification and control technology.

h/ Data shown in row 2.2 are outlays under "Military construction" appropriation except for row 2.2, column 7, which is "Family, housing, defense" and "NATO infrastructure". Military construction for the Marine Corps is included in the entry for row 2.2, column 3.

Part II

1. In order to approximate the opportunity **costs** of **using** conscripts in the military **sector, the** following information is **requested:**

(a) The average **civilian** wage rate that **the** conscripts would have been likely to **obtain** during the reporting year if **they had not been occupied in the military sector.**

Answer: not applicable, in the **absence** of conscription. Military compensation is designed to compare **with** civilian.

I f such an estimate is not available, respondents are requested to **suggest** an **average** civilian **wage** rate that **may be** readily available and that the **respondents** believe might serve as a reasonable **measure** of opportunity costs.

(b) **The number of man-years devoted by** conscripts to military service during the report **ing** year concerned.

Answer: none (conscription has not been in practice since 1973).

2. **With** reference to point (d) of the specific guidelines (**see** annex), respondents **are** requested to give below the total **amount** of military assistance received from abroad during the reporting year. The amount should **be** given in the same denomination and currency **as** used in **the matrix**, preferably converted from foreign currencies to national currency at **average** annual market **or par value exchange rate** as reported **by the** International Monetary Fund.

Answer : none.

3. With reference to points **(n) and (o)**, the requested information should **be** reported here in **the same value** terms as **used** in **the matrix**. It is requested that total expenditures, at least, and preferably detailed by **type** of **force** group as in columns 1 to 12 of the matrix, **be** reported for the following **items:**

Depletion of ammunition: not readily available.

Sales from the military sector of:

(a) Land: not readily **ava ilable;**

(b) Real estate other than land: not readily available;

(c) **Equ ipment :** not readily available;

(d) Services: **not** readily **available;**

(e) Other: not readily available.

4. Respondents are requested to submit information as to whether statistics of the following kinds would be readily available for the reporting year.

	<u>Available</u>	<u>Answer</u>	<u>Not available</u>
Price index of specific relevance to the military sector	X		
Exports of military equipment	X		
such exports divided by:			
(i) Countries	X		
(ii) Regions	X		
Imports of military equipment	X		
such imports divided by:			
(i) Countries	X		
(ii) Regions	X		

5. If a regularly published exchange rate is unavailable, or considered unuitable for converting military expenditure, respondents are requested to comment on other possible ways for comparing the military expenditures of the responding country with those of other countries.

Comment: Official or market exchange rates can be very unuitable, particularly where voluntary versus conscription personnel compensation is involved. Purchasing power parities, where available, should be more accurate. They should be calculated specifically for the military sector, particularly for personnel pay.

ANNEX

INSTRUCTIONS

Part I

General guidelines

The reporting instrument is in the form of a matrix whose vertical axis details expenditures by type of resource costs and whose horizontal axis details expenditures by type of force groups. Concerning the resource costs, the matrix has a pyramidal structure in order to permit reporting on different levels of aggregation. The vertical axis consists of three main cost categories, namely (1) operating costs; (2) procurement and construction; (3) research and development. Each of these categories is then disaggregated into different subcategories and most of the subcategories into sub-subcategories. The figure given for each main category should be equal to the sum of its respective subcategories, and the figure given for each subcategory should be equal to the sum of its respective sub-subcategories.

2. It is desirable that data should be reported for all types of force groups and all categories of resource costs at all aggregation levels provided in the matrix. If this is not possible, the available data should be submitted.

3. The figures to be reported should show actual military expenditures of the latest fiscal year for which data are available. The amounts shall be reported in the respondent's national currency and in current prices, that is, in prices prevailing in the reporting year. The unit of measure in which expenditures are reported may be the standard currency unit itself (that is, pound, rial, etc.) or a commonly used multiple number of units. This number, however, should not be larger than one ten thousandth of the total amount of the country's military expenditures. For example, if total military expenditures are 78,453,296 national currency units, the reported amounts may be expressed in units as large as $1/10,000 \times 78,453,296 (= 7,845)$. That is, the report in unit of measure may be expressed in thousandths of currency units.

4. For the sake of uniformity and clarity of presentation, only the following conventional symbols should be used as required:

= nil

N = negligible or less than half of the unit employed

() = provisional

. . = not applicable

... = not available

The use of blanks or symbols other than those listed above should be avoided. If, however, States feel compelled to use blanks or other symbols, they are requested to give clear explanations of their meaning.

5. It is desirable that data should be reported for all types of force groups and all categories of resource costs, at all levels of aggregation provided in the matrix. If it is not possible to present figures representing expenditures for a certain force group due to unavailability of data, it is understood that these expenditures should be included in one or more of the other force groups, or at least in the total. For the same reason, if respondents find it possible to supply data on resource costs only for higher (and not for lower) levels of aggregation, they are requested to present the figures on the level of aggregation they find appropriate.

6. With a view to the further refinement of the reporting instrument, the States are requested to comment upon any technical or other difficulties that they may encounter when filling in the matrix and to recommend such changes of the matrix as they may find advisable. Such comments should be attached to the completed matrix.

Specific guidelines

The following comments and interpretations are related to those items in the matrix that seem to need some special clarifications. The small letters denoting paragraphs correspond to the notes in the matrix. As has already been pointed out in the introduction, respondents are requested to describe the nature of problems of interpretation that may arise when filling in the matrix.

Force groups (column headings)

(a) Strategic forces

Respondents are requested to report their expenditures on strategic nuclear arms by applying the definitions elaborated in the SALT II Treaty. Should these definitions not be applicable, respondents are requested to explain their definitions used. Reported data should include expenditures on all forces or units that are specifically equipped and trained to operate systems for carrying and delivering such arms. Expenditures on other nuclear arms and forces should be reported under the respective branch of the armed forces.

(b) Central support, administration and command (columns 6 and 7)

Columns 6 and 7 should include supporting activities that are common to more than one of the types of forces covered by columns 1 to 5. Column 6 should include all support activities which, in many cases, may be carried out by special common agencies, while expenditures associated with central command and direction of the military forces should be placed in column 7. The latter would include central and regional military staff with authority over more than one type of force, including the Ministry of Defense administrative function.

(c) Paramilitary forces (column 8)

The term paramilitary can apply to a variety of forces. Such forces may be intended to guard the national frontiers, mainly against such activities as illegal migration, smuggling or guerrilla infiltration. In other cases, their chief

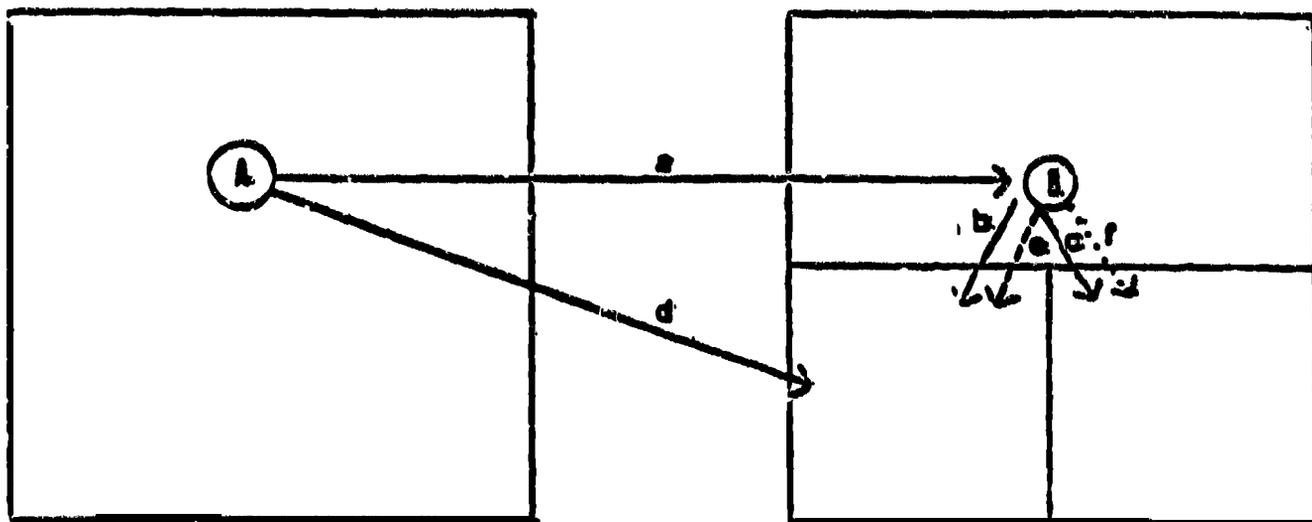

mission is the maintenance of internal security. Such forces may also be usable against an external armed enemy.

For present purposes, it is necessary to identify those elements that should be included in the military sector and those which should not. It seems reasonable to include in paramilitary forces those units, formations, etc., that are organized, equipped and behave in a similar way to the armed forces, and which could carry out combat actions of the same nature in terms of goal, area and results as those performed by the armed forces.

If respondents present figures under this heading, it is requested that a short description of the functions of these forces be attached to the matrix.

3) Military assistance (columns 9, 10 and 11)

Figure showing the ways along which military assistance can be granted

Explanations

Military assistance may be given from one country A to another B (flow a) and channelled through the State budget of the receiving country, either to allied forces stationed on this country's territory (flow b) or to the military sector of the receiving country (flow c).

Military assistance may also be given directly to allied forces stationed on another country's territory without passing through any other country's budget (flow d). (A country's support of its own military forces abroad shall not be reported as military assistance. Such expenditures shall instead be reported in columns 1 to 7.)

Military assistance may finally be given by a country to allied forces stationed on the country's own territory (flow a). Expenditures of country B for its own military forces from its own resources are designated as flow f.

Conclusions

Respondents such as country A are requested to report the sum of the flows a and d, i.e., all their military assistance granted to recipients abroad. This should be done in column 10. Respondents such as country B are requested to report the sum of the flows b and e, i.e., all their military assistance to allied forces stationed on their own territory. This should be done in column 9. The flows c and f, i.e., expenditure for the country's own military forces should accordingly be reported in columns 1 to 7.

There is a risk of double counting in so far as b and c are part of the same flow as a. The same money may thus be reported twice, both by country A and country B. In order to avoid such double counting, all respondents are requested below to report the total amount of military assistance received from abroad, i.e., the sum of the flow a. In cases where a country is both a donor and a recipient of military assistance, it is requested that both columns 9 and 10 be filled in.

Respondents are also requested to report any additional expenditures made in the reporting year by the country specifically for the purpose of supplying troops and equipment for United Nations peace-keeping activities. Those expenditures should be shown in column 11 of the matrix, not of any compensation from external sources.

(e) Civil defence (column 14)

This requirement is intended to apply to expenditures for the protection, by other than customary military means, of civilian populations and facilities against danger of hostilities and disasters. Examples are expenditures on shelters and on plans and preparations for the evacuation and subsequent maintenance of civilians from areas under threat of attack. For an exhaustive definition of civil defence, respondents are referred to article 61 of the Additional Protocol of 1977 to the Geneva Convention of 1949. Reporting on civil defence is a question primarily for countries with strategic forces.

Resource costs (row headings)

(f) Personnel (row 1.1)

As the aim should be to exclude payments for past services, but to include payment for current and future services, the figures should include the direct payments made to personnel as well as other personnel compensation expenditures made by the employer, such as taxes, pension fees and other contributions. If such data are unavailable, expenditures on past services like pensions might serve as a

surrogate, particularly if numbers of personnel remain level. In any event, an explanation of the nature of the data submitted should accompany the report.

(g) Conscripts (row 1.1.2)

The cost of conscripts should be valued in terms of actual payments. In order to approximate the opportunity costs of using conscripts in the military sector, respondents are requested to provide in part II below, information on appropriate average civilian wage rates as well as information on the quantity of civilian labour foregone by the use of conscripts.

(h) Materials for current use (row 1.2.1)

This item should include purchases of food, clothing, petroleum products, training materials (excluding ordnance and ammunition), medical materials, office supplies and the like.

(i) Maintenance and repair (row 1.2.2)

This item should include both contract services for repair and maintenance of equipment and facilities and purchases of parts, materials and tools for repair and maintenance of equipment and facilities.

In some cases, repairs may be intended not only to restore the quality and performance of equipment and facilities, but also to improve the quality or modify the performance. Such activities are to some extent to be regarded as investments. These major modifications and major repairs, containing substantial investment elements, should be reported under the cost categories 2.1 (Procurement) or 2.2 (Construction).

In any case, respondents are requested to describe the procedure chosen and to explain their current accounting practices or rules concerning the possible investment elements in major modification and repair activities. Such comments should be attached to the completed matrix.

(j) Purchased services (row 1.2.3)

This item should include expenditures for various kinds of purchased services, such as travel expenses, postal charges, printing expenses and other.

(k) Rent costs (row 1.2.4)

If capital costs for real estate belonging to the military sector do not result in actual payments, it is desirable that the rent costs to be reported be augmented by adding imputed capital costs. Such capital costs may be estimated by means of appropriate interest rates or rates of depreciation for the reporting year.

(l) Procurement (row 2.1)

A country's military potential depends not only on its procurement of military equipment but also on the rates of depreciation, depletion and retirement. Information of the latter type may not be readily available. It would, however, be highly desirable to obtain such information as is available concerning retirement and average-length-of-service rates for various kinds of equipment. Such information should be attached to the completed matrix. See also note (i) above.

(m) Armoured vehicles (row 2.1.5)

This item should include tanks, armoured personnel carriers and other armoured vehicles.

(n) Ammunition (row 2.1.8)

For the same reasons as mentioned under (l) above, it would be desirable to be able to compare the procurement figures for ammunition with corresponding consumption figures. In order to make this possible, respondents are requested in part II below to supply the latter type of information.

(o) Construction (row 2.2)

The construction of new facilities may often be connected with the acquisition of land. The expenditures of the military sector for the acquisition of land should be reported separately under 2.2.12 (Land) .

(p) Electronic&, etc. (row 2.2.4)

This item should also include communications and related structures and facilities.

(y) Training facilities (row 2.2.7)

This item should include expenditures for construction of fixed installations for training purposes, such as firing ranges, obstacle courses and others.

(r) Warehouses, depots, etc. (row 2.2.8)

This item should also include repair and maintenance facilities.

(s) Shelters (row 2.2.11)

Since it may not be possible to distinguish between fortifications and shelters for military personnel, respondents are requested to report all such costs under 2.2.10 (Fortifications), and to reserve item 2.2.11 (Shelters) for shelters that are constructed mainly for the purpose of protecting the civilian population.

(t) Land (row 2.2.12)

Information on sales of land by the military sector is requested in part II below.

(u) Research and development (row 3)

A distinction between the two subdivisions of this item could be made according to the degree to which research activities are object-oriented, i.e., connected with the creation of a concrete product such as a specific weapon system. Basic and applied but not object-oriented research may accordingly fall under the subdivision 3.1, while mainly object-oriented research would come under the subdivision 3.2 together with the development activities which are regarded as always object-destinated.

Where the respondents find difficulties in dealing with the subcategories, they are requested to make comments along these lines and to attach such comments to the completed matrix.

Part II

1. In order to approximate the opportunity costs of using conscript.8 in the military sector, the following information is requested:

(a) The average civilian wage rate that the conscripts would have been likely to obtain during the reporting year if they had not been occupied in the military sector.

Answer:
(wage per period of time, currency unit)

If such an estimate is not available, respondents are requested to suggest an average civilian wage rate that may be readily available and that the respondents believe might serve as a reasonable measure of opportunity costs.

(b) The number of man-years devoted by conscripts to military service during the reporting year concerned.

Answer: "....."
(number of man-years)

2. With reference to point (d) of the specific guidelines above, respondents are requested to give below the total amount of military assistance received from abroad during the reporting year. The amount should be given in the same denomination and currency as used in the matrix, preferably converted from foreign currencies to national currency at average annual market or par value exchange rate as reported by the International Monetary Fund.

Answer: *....."
(amount)

3. With reference to points (ii) and (a) above, the requested information should be reported here in the same value terms as used in the matrix. It is requested that total expenditures, at least, and preferably detailed by type of force group as in columns 1 to 12 of the matrix, be reported for the following items:

Depletion of ammunition:

Sales from the military sector of:

- (a) Land*
- (b) Real estate other than land
- (c) Equipment
- (d) Services
- (e) Other

4. Respondents are requested to submit information as to whether statistics of the following kinds would be readily available for the reporting year.

	Available	<u>Answer</u>	<u>Not available</u>
Price index of specific relevance to the military sector	<input type="checkbox"/>		<input type="checkbox"/>
Exports of military equipment	<input type="checkbox"/>		<input type="checkbox"/>
Such exports divided by:			
(i) Countries	<input type="checkbox"/>		<input type="checkbox"/>
(ii) Regions	<input type="checkbox"/>		<input type="checkbox"/>
Imports of military equipment	<input type="checkbox"/>		<input type="checkbox"/>
Such imports divided by:			
(i) Countries	<input type="checkbox"/>		<input type="checkbox"/>
(ii) Regions	<input type="checkbox"/>		<input type="checkbox"/>

5. If a regularly published exchange rate is unavailable, or considered unsuitable for converting military expenditures, respondents are requested to comment on other possible ways for comparing the military expenditures of the responding country with those of other countries.
