INSTRUCTIONS

Part I I

1. In order to approximate the opportunity costs of using conscripts in the military sector, the following information is **requested**:

(a) The average civilian wage rate that the conscripts would have been likely to obtain during the reporting year if they had not been occupied in the military sector.

Answer: Not applicable, in the **absence** of conscription. Military compensation **is designed to compete** with *civilian.

If such an estimate is not available, respondents are requested to suggest an average civilian wage rate that may **be readily available** and that the respondents believe might serve as a reasonable measure of opportunity costs.

(b) The number of man-years **devoted by conscripts** to military service during the reporting year concerned.

Answer : None (conscription **has not been** in-practice' since 1973).

2. With reference to point (d) **of the specific guidelines** (see A/43/567, annex II), respondents are requested **to give below the total** amount of military assistance received from abroad during the reporting year. The **amount should be given in the same denomination and currency** as 'used in the **matrix, preferably converted from foreign currencies to national currency at** average annual market or par value exchange rate **as reported by the** International Monetary Fund.

Answer : None .

3. With reference to points (n) and (o) above (**ibid.**), the **requested information** should be reported here in the same **value terms as used** in the matrix. It is requested that total expenditures, **at least, and preferably detailed by type of force group** as in columns 1 to 12 of the matrix, be reported for the following items:

Depletion of ammunition: Not readily available.

Sales from the military sector of:

(a) Land: Not readily available.

(b) Real estate other than land: Not readily available.

(c) Equipment: Not readily available.

(d) Services: Not readily **available**.

(e) Other: Not readily available.

4. Respondents are requested to submit information as to whether statistics of the following kinds would be readily available for the reporting year.

	<u>Available</u>	<u>Answer</u>	<u>Not available</u>
Price index of specific relevance to the military sector	x		
Exports of military equipment	X		
Such exports divided by:			
(i) Countries	X		
(ii) Regions	X		
Imports of military equipment	X		
Such imports divided by:			
(i) Countries	X		
(ii) Regions	X		

5. If a regularly published exchange rate is **unavailable**, or considered unsuitable for converting **military** expenditures, respondents are requested to comment on other possible ways for comparing the military expenditures of the responding country with those of other countries.

Comment: official or **market** exchange rates can be very unsuitable, particularly where voluntary versus conscription personnel compensation is involved. Purchasing-power parities, where available, should be **more** accurate. They should be calculated specifically for the military sector, particularly for personnel pay.
