* A/56/150.

** Finalization of the present report was dependent on the receipt of a substantial number of submissions by Governments.

I. Introduction

1. In accordance with General Assembly resolution 46/36 L of 9 December 1991, on transparency in armaments, the Secretary-General, on 1 January 1992, established the United Nations Register of Conventional Arms. In that resolution, the General Assembly called upon all Member States to provide annually data on imports and exports of conventional arms in the seven categories covered under the Register. It also invited Member States, pending the expansion of the Register, to provide to the Secretary-General, along with their annual report on imports and exports of arms, available background information regarding their military holdings, procurement through national production and relevant policies and requested the Secretary-General to record that material and to make it available for consultation by Member States at their request.

2. At its forty-seventh session, the General Assembly, by its resolution 47/52 L of 15 December 1992 on transparency in armaments, called upon all Member States to provide the requested data and information to the Secretary-General by 30 April annually, beginning in 1993, and encouraged Member States to inform the Secretary-General of their national arms import and export policies, legislation and administrative procedures regarding both the authorization of arms transfers and the prevention of illicit transfers, in conformity with paragraph 18 of resolution 46/36 L. In subsequent resolutions, the General Assembly reiterated that request.¹

3. Pursuant to requests by the General Assembly,² the Secretary-General, with the assistance of a group of governmental experts, prepared reports on the continuing operation of the Register and its further development in 1994, 1997 and 2000. Those reports were submitted to the General Assembly at its forty-ninth, fifty-second and fifty-fifth sessions (A/49/316; A/52/316; and A/55/281).

4. By its resolution 49/75 C and by subsequent resolutions,³ the General Assembly decided to keep the scope of and participation in the Register under review and, to that end, requested Member States to provide the Secretary-General with their views on the continuing operation of the Register and its further development and on transparency measures related to weapons of mass destruction. The views of Member States were contained in reports of the Secretary-General on the subject (A/50/276 and Add.1; A/51/300 and Add.1-5; A/52/312 and Corr.1 and 2 and Add.1-4; A/53/334 and Corr.1 and 2 and Add.1 and 2; A/54/226 and Corr.1 and Add.1-6; and A/55/299 and Corr.1 and Add.1-6).

5. At its fifty-fifth session, the General Assembly, by its resolution 55/33 U of 20 November 1999, called upon Member States, with a view to achieving universal participation, to provide the Secretary-General, by 31 May annually, with the requested data and information for the Register, including “nil” reports if appropriate, on the basis of resolutions 46/36 L and 47/52 L and the recommendations contained in the 1997 and 2000 reports of the Secretary-General on the continuing operation of the Register and its further development (A/52/316, para. 64, and A/55/281, para. 94). In addition, the Assembly invited Member States in a position to do so, pending further development of the Register, to provide additional information on procurement from national production and military

¹ Resolutions 48/75 E, 49/75 C, 50/70 D, 51/45 H and 52/38 R.

² Resolutions 47/52 L, 48/75 E, 49/75 C, 50/70 D, 51/45 H, 53/77 V and 54/54 O.

³ Resolutions 50/70 D, 51/45 H, 52/38 R, 53/77 V, 53/77 S and 54/54 O.

holdings, and to make use of the “Remarks” column in the standardized reporting form to provide additional information, such as types or models.

6. By the same resolution, the General Assembly reaffirmed its decision, with a view to the further development of the Register, to keep the scope of and participation in the Register under review, and to that end recalled its request to Member States to provide the Secretary-General with their views on the continuing operation of the Register and its further development and on transparency measures related to weapons of mass destruction. In accordance with paragraph 5 (a) of the resolution, the Secretary-General has received views from Sweden (on behalf of the European Union) and the Syrian Arab Republic. Those views are contained in the annex to the present report.

7. At the same session, the General Assembly, by its resolution 55/33 U of 20 November 2000, requested the Secretary-General, with the assistance of the group of governmental experts to be convened in 2003, on the basis of equitable geographical representation, to prepare a report on the continuing operation of the Register and its further development, taking into account the work of the Conference on Disarmament, the views expressed by Member States and the reports of the Secretary-General on the continuing operation of the Register and its further development, with a view to taking a decision at its fifty-eighth session.

8. By the same resolution, the General Assembly requested the Secretary-General to implement the recommendations contained in the 2000 report of the group of governmental experts on the continuing operation of the Register and its further development (A/55/281). Pursuant to those recommendations, the Secretariat engaged in a number of activities to enhance familiarity with and encourage greater participation in the Register of Conventional Arms. The Department for Disarmament Affairs cooperated with the Governments of Canada and Japan in the holding of an Association of South-East Asian Nations (ASEAN) Regional Forum seminar on transparency in conventional arms, in Phnom Penh, on 21 and 22 February 2001. The United Nations Regional Centre for Peace and Disarmament in Asia and the Pacific organized a conference in Wellington, New Zealand on 29 and 30 March 2001, in cooperation with the Government of New Zealand, at which a session was devoted to the Register of Conventional Arms. The Department for Disarmament Affairs facilitated and participated in a meeting of the Committee on Hemispheric Security of the Organization of American States (OAS), held at OAS headquarters in Washington, D.C., on 4 May 2001. The meeting focused on the Register and the United Nations standardized instrument for reporting military expenditures. The Department also organized an informal meeting of delegates on the Register of Conventional Arms at United Nations Headquarters on 11 October 2000, at which the report of the 2000 group of governmental experts and other matters related to the Register were discussed. In addition, in January 2001, the Department published its periodic Information Booklet, which explains the operation and procedures of the Register of Conventional Arms. In accordance with recommendations of the group of experts (A/55/281, sect. VI, B), to ensure that all relevant information is available electronically, the Department maintains the United Nations Register web site.⁴

⁴ <http://www.un.org/Depts/dda/CAB/register.htm>.

9. The present report is the ninth consolidated report issued by the Secretary-General since the establishment of the Register.⁵ It contains data and information provided by 105 Governments on imports and exports of conventional arms covered under the Register: battle tanks, armoured combat vehicles, large-calibre artillery systems, attack helicopters, combat aircraft, warships, and missiles and missile launchers, for the calendar year 2000. The report includes additional information provided by Governments on procurement from national production and military holdings. The replies received are contained in sections II and IV below. Any additional replies received from Governments will be issued as addenda to the present report.

10. Section III of the present report contains an index of the background information submitted by Governments in accordance with paragraphs 10 and 18 of resolution 46/36 L and paragraph 5 of resolution 47/52 L. The background information is available for consultation at the Department for Disarmament Affairs of the Secretariat.

II. Information received from Governments⁶

11. Information received from Governments is presented in the present section of the report as follows: (a) a complete table listing all the replies received by the Secretary-General, and (b) individual replies of Governments. Where appropriate, the relevant parts of notes verbales are also reproduced.

12. The composite table is provided for ease of reference. As regards the information contained in the table, it should be noted that a “yes” denotes a submission of data regarding imports and/or exports in relation to the seven categories of arms covered by the Register during the reporting period. For the purpose of uniform tabulation, responses by Governments that contained either “nil”, “none”, “0”, a dash (-), or which otherwise indicated that no exports and/or imports in the categories covered by the Register had taken place, are reflected in the tables as “nil” reports. A blank space under data on imports and/or exports in the composite table indicates that no information was provided. In some cases, however, an explanation can be found in the note verbale of the country in question, as indicated above. Only those parts of the standardized forms that contain specific data and notes verbales of Governments providing relevant information are reproduced in part B of this section. Replies in standardized forms or in notes verbales containing “nil” or blank reports are listed in the composite table only.

⁵ The first to seventh reports were issued under the symbols A/48/344 and Corr.1-3 and Add.1-3; A/49/352 and Corr.1 and 2 and Add.1-4; A/50/547 and Corr.1 and Add.1-4; A/51/300 and Add.1-5; A/52/312 and Corr.1 and 2 and Add.1-4; A/53/334 and Corr.1 and 2 and Add.1 and 2; and A/54/226 and Corr.1 and Add.1-6.

⁶ The documents have been reproduced as received. The designations employed do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory or area, or of its authorities.

NOTES

1. Germany applies the departure of equipment from the exporter's territory as criterion for recording her arms transfers.
2. Germany continues to record only transfers of complete equipment, as defined in the seven categories, and not to include transfers of the following items:
 - items that have been demilitarized
 - items transferred for destruction or disposal (especially scrapping)
 - items serving as museum exhibits.

Germany's national report is also available on the Internet at
http://www.auswaertiges-amt.de/www/en/aussenpolitik/friedenspolitik/abr_und_r/index_html.

Peru

Reporting country: Peru

Original language: Spanish

Calendar year: 2000

Background information provided: no

Date of submission: 8 June 2001

At the same time, the Peruvian Mission wishes to specify that the four LST landing ships which the United States listed in its 2000 report as having been imported by Peru are warships actually put into service in 1984 by the Naval Forces of Peru, although their transfer was only recently made official in 2000.

The Permanent Mission of Peru reports that during the year 2000 Peru neither imported nor exported arms that fall under any of the seven categories in the Register.

Armenia**Military holdings and procurement from national production
as of 31 May 2001**

Category	Military holdings	Procurement through national production
I. Battle tanks	110	nil
II. Armoured combat vehicles	146	nil
III. Large calibre artillery systems	229	nil
IV. Combat aircraft	6	nil
V. Attack helicopters	7	nil
VI. Warships	None	nil
VII. Missiles and missile launchers	None	nil

In the 1999 calendar year the number of battle tanks in the Armenian Armed Forces was 105. In the interest of transparency, we consider necessary to inform that during the previous year additional 5 tanks were recovered from various parts retrieved from the scene of clashes. Thus, the actual number of battle tanks is 110. The Republic of Armenia does not consider the subject equipment as transfer once it does not transfer of title or control of the equipment.

In our view, the term "procurement through national production" refers to complete systems within the seven categories of weapons covered by the Register purchased by the Government from suppliers within Armenia. Thus, in the 2000 calendar year, the Republic of Armenia did not procure any weapons defined under the Register through national production.

Australia

VAN HEEMSKERK CLASS KORTENAER CLASS TROMP CLASS KAREL DOORMAN CLASS b) HYDRO SURVEY SHIPS TYDEMAN CLASS BUYSKES CLASS c) AUXILIARIES / REPLENISHMENT AMSTERDAM CLASS POOLSTER CLASS d) LANDING PLATFORM DOCK ROTTERDAM CLASS 2) SUBMARINES WALRUS CLASS	2 4 1 8 1 1 1 1 1 1 4
VII. Missiles and missile launchers	1) DUE TO SECURITY REGULATIONS ONLY THE GRAND TOTAL IS GIVEN	16586

Remarks:

- I. Battle tanks
- 93 x LEOPARD 1 have been exported to Chile.
4 x LEOPARD 1 have been dismantled; hulls without turrets have been exported to Chile.
1 x LEOPARD 1 has been converted into beach armoured recovery vehicle
2 x LEOPARD 1 have been added to historical collections.
1 x LEOPARD 1 has been cannibalized and is used for recovery training purposes
5 x LEOPARD 1 have been cannibalized and are used as ground targets,
9 x LEOPARD 1 hulls are considered to be reassembled into complete battle tanks.
- In its report on calendar year 1999 the Netherlands erroneously notified a military holding of 102 items LEOPARD 1 battle tanks. The correct holding for the year 1999 is 133.
- II. Armoured combat vehicles
- 50 x M-113 C&V have been reduced by severing,
10 x M-113 C&V have been dismantled and the hulls will be used as ground targets,
15 x M-113 C&V have been dismantled and are used as ground targets.
- In its report on calendar year 1999 the Netherlands erroneously notified a military holding of 90 items of XA-188 armoured combat vehicles. The correct holding for the year 1999 is 83, since 7 x XA-188 appeared to be ambulance version.
- III. Large calibre artillery systems
- 1 x BRANDT 120MM MORTAR has been added to a historical collection,
1 x 4.2" MORTAR (ground mounted) has been reduced by severing,
1 x FH-70 has been cannibalized,
1 x M-110 SP how has been added to a historical collection.
- IV. Combat aircraft
- 1 x F-16 has been added to a historical collection,
1 x F-16 has been reduced by severing.
- V. Attack helicopters
- 4 x AH-64D apache have been imported from the United States of America.
6 x AH-64A APACHE have been transferred to the United States of America.
- VI. Warships
- 1x BUYSKES CLASS SURVEY SHIP has been decommissioned,
1x TROMP CLASS FRIGATE has been decommissioned.
- VII. Missiles and missile launchers
- In its report on calendar year 1999 the Netherlands erroneously notified a military holding of 16682 items in the category missiles and missile launchers. The correct holding for the year 1999 is 16,586.

New Zealand

1. This note provides background information to New Zealand's return under the United Nations Conventional Arms Register, as requested by General Assembly resolution 46/36 L.

2. The following information has been submitted in previous years and remains current:

Memorandum of New Zealand's arms exports and import controls and procedures.

3. The following information is attached:

The Government's Defence Policy Framework (This replaces the previously submitted document *The Shape of New Zealand's Defence*, A White Paper, 1997).

Annual Report to Parliament of the New Zealand Defence Force for the year ended 30 June 2000.

Departmental Forecast Report of the New Zealand Defence Force 1 July 2000 - 30 June 2001
Annual Report to Parliament of the New Zealand Ministry of Defence for the year ended 30 June 2000

Departmental Forecast Report of the Ministry of Defence 1 July 2000 - 30 June 2001

Holdings

4. With respect to the seven categories of weapons defined by the United Nations Conventional Arms Register, New Zealand's holdings for the 2000 calendar year are recorded below.

Procurement through national production

5. In the 2000 calendar year New Zealand did not procure through national production any weapons defined under the United Nations Conventional Arms Register.

Definition of transfers

6. International arms transfers involve, in addition to the physical movement of equipment from or into national territory, the transfer of title to and control over equipment. This definition was applied when defining transfers for the purposes of the United Nations Register.

VII. Missiles and missile launchers	121,934	685

Notes:

* Relative to last year's submission (data for calendar year 2000) for United States military holdings, reductions in totals reflect continued downsizing actions. Increases in categories IV and VII reflect better accounting procedures.

Background information

The United States considers that its transfers of military equipment occur at the time ownership title for the equipment is transferred between the United States and another country. The 2001 submission therefore includes equipment whose title was transferred during the 2000 calendar year.

Annex

Views received from Governments in accordance with paragraph 5 (a) of General Assembly resolution 55/33 U

Reply of the European Union to General Assembly resolution 55/33 U, “Transparency in armaments”

1. The General Assembly, in its resolution 55/33 U, “Transparency in armaments”, requested Member States of the United Nations to provide the Secretary-General with their views on the continuing operation of the Register and its further development, and on transparency measures related to weapons of mass destruction.
2. The member States of the European Union consider transparency in armaments an important instrument in building confidence and security between States. The United Nations Register of Conventional Arms is an important and concrete measure in this respect.
3. The Register provides data on international transfers of those categories of conventional arms which are potentially destabilizing when accumulated excessively. It serves to enhance transparency, build confidence and promote better understanding among States. The member States of the European Union are committed to securing the widest possible participation in the Register and improving its effectiveness. In this context, efforts of the Union in support of securing wider participation have shown that only in exceptional cases, is non-participation motivated by disagreement with the concept embodied in the Register as such.
4. All States Members of the United Nations are encouraged to submit data promptly to the Register, including “nil” reports. The Member States of the European Union believe that inclusion of data on military holdings and procurement through national production would make the Register more complete.
5. The member States of the European Union welcome all efforts to further strengthen the role of the Register in the field of conventional arms control. In this context, we welcome the work of the Group of Governmental Experts, which had been given the task of assisting the Secretary-General in the preparation of a report on the Register, and we support the recommendations contained in that report.
6. In this respect, the members of the European Union also welcome the initiative by the United Nations Department for Disarmament Affairs, supported by Germany, Canada and the Netherlands, to organize regional seminars on the United Nations Register of Conventional Arms and on the United Nations standardized reporting system on military expenditures in 2001 and 2002. The aim of these workshops will be to explain the purpose and importance of these United Nations instruments in the field of transparency in armaments. In doing so, these workshops should contribute to the widest possible participation in the Register.
7. The member States of the European Union consider the work of the Conference on Disarmament in the field of transparency in armaments to be of continuing value, and hope that agreement can be reached on a mandate for an ad

hoc committee to study possible further transparency measures and ways in which the Register can be strengthened.

8. The member States of the European Union agree that transparency in armaments is important and that measures aimed at enhancing transparency should be developed. They would point out, however, that measures in the field of conventional arms should be distinguished from those aimed at increased transparency in the field of weapons of mass destruction. If such a distinction is not made, the viability of the Register would be affected and increased participation and transparency jeopardized.

9. The member States of the European Union, for their part, will continue to participate actively in all appropriate forums to discuss transparency measures that could contribute to increased confidence and greater security among all States Members of the United Nations.

10. The member States of the European Union are committed to the effective functioning of the Register and its further development and call upon all States Members of the United Nations to provide the data and information requested.

Reply of the Syrian Arab Republic to General Assembly resolution 55/33 U, “Transparency in armaments”

The Syrian Arab Republic has for some time been voicing its perception of the question of transparency in armaments, embracing as it does its notion of the United Nations Register of Conventional Arms. This notion is clear and well-established, and it is based on a general orientation with respect to international disarmament issues and a particular, regional one that is determined by the specific character of the situation in the Middle East.

The Syrian Arab Republic advocates transparency in armaments as a means of enhancing international peace and security and believes that, in order to be successful, any transparency mechanism must be guided by certain well-defined basic principles: it must be balanced, comprehensive and non-discriminatory, and it must enhance the national, regional and international security of all States in conformity with international law.

The United Nations Register of Conventional Arms represents a first attempt to address the transparency issue at a global level. The problems encountered by the Register, however, confirm the established fact that the scope of the Register must be expanded, because a Register that is limited to seven categories of conventional arms will not meet the security needs of States and will thus not attract universal participation.

The future success of the Register is therefore contingent upon the willingness of the members of the international community to engage in greater transparency and to build greater confidence. Syria affirms the need to expand the scope of the Register, as envisaged in General Assembly resolution 46/36 L, by which the Register was established, to include data on advanced conventional weapons, on weapons of mass destruction and, in particular, nuclear weapons and on advanced technology with military applications. This would represent a more balanced, more comprehensive and less discriminatory instrument that would attract a larger number of regular participants.

The Middle East region represents a special case in this context, and one where the qualitative imbalance in armaments is striking and where transparency and confidence can only be achieved if approached in a balanced and comprehensive way. Applying transparency in the Middle East region to seven categories of conventional weapons while ignoring more advanced, more sophisticated or more lethal armaments, such as weapons of mass destruction and, in particular, nuclear weapons, is an approach that is neither balanced nor comprehensive. It will not yield the desired results, especially since the Register does not take into consideration the existing situation in the Middle East, where Israel continues its occupation of Arab territories, maintains its possession of the most sophisticated and lethal weapons of mass destruction and is still the only State in the region that is not a party to the Treaty on the Non-Proliferation of Nuclear Weapons. It persists in defying repeated appeals from the international community that it should accede to the Treaty and place all of its nuclear facilities under the full-scope safeguards regime of the International Atomic Energy Agency.

The failure of the efforts made to expand the scope of the Register to include other categories of arms, including weapons of mass destruction and, in particular, nuclear weapons, is incompatible with the provisions of General Assembly

resolution 46/36 L, by which the Register was established. This failure indicates the deadlock that has afflicted the operation of the Register and its consequent inadequacy in its present form to function as an effective means of building confidence or as an early-warning mechanism.
