Sixty-second session

Item 90 (b) of the provisional agenda*

Reduction of military budgets

Objective information on military matters, including transparency of military expenditures

Report of the Secretary-General

Summary

The present report contains information received from Member States on their military expenditures for the latest fiscal year for which data are available. The Secretary-General has, to date, received reports from 69 Governments. The report also describes activities in which the Secretariat was engaged to enhance familiarity with and encourage greater participation in the United Nations standardized instrument for reporting military expenditures.

I. Introduction

1. The General Assembly, in operative paragraph 1 of its resolution 60/44, called upon all Member States to report annually, by 30 April, to the Secretary-General their military expenditures for the latest fiscal year for which data were available, using, preferably and to the extent possible, the reporting instrument as recommended in its resolution 35/142 B or, as appropriate, any other format developed in conjunction with similar reporting on military expenditures to other international or regional organizations, and encouraged Member States that had no information to submit nil returns.

2. By operative paragraphs 5 (b), (f) and (g) of its resolution 60/44, the General Assembly requested the Secretary-General, within available resources, to circulate annually the reports on military expenditures as received from Member States; to promote international and regional/subregional symposiums and training seminars to explain the purpose of the United Nations system for the standardized reporting of military expenditures and to give relevant technical instructions; and to report on experiences gained during such symposiums and training seminars.

3. In operative paragraph 6 (b) of the same resolution, the General Assembly encouraged Member States to provide the Secretary-General, in time for deliberation by the General Assembly at its sixty-second session, with their views and suggestions on ways and means to strengthen and broaden participation in the standardized reporting system, including necessary changes to its content and structure. In accordance with that request, the Secretary-General has received views from the European Union. Those views are contained in the annex to the present report.

4. On 29 January 2007, a note verbale was sent to Member States requesting them to submit their reports no later than 30 April 2007. The replies received are reproduced in section III below. Additional replies received from Member States will be issued as addenda to the present report.

II. Action taken

5. Owing to the non-availability of extrabudgetary assistance, the Office for Disarmament Affairs was unable to organize seminars and/or workshops to enhance familiarity with and encourage greater participation in the United Nations standardized instrument for reporting military expenditures. Within available resources, however, the Office distributed background information on the progress of the United Nations standardized reporting instrument at the Seventh Conference of Ministers of Defence of the Americas, held in Managua, from 1 to 5 October 2006, and contributed a written presentation to the plenary session of the Hemispheric Security Committee of the Organization of American States, which was held in Washington, D.C., on 1 December 2006. In addition, the Office for Disarmament Affairs engaged in informal consultations with Member States with a view to achieving a high level of participation in the United Nations standardized reporting instrument.

III. Replies received from Governments

Explanatory note

6. To date, the Secretary-General has received reports from 69 Governments. In most cases, Governments have reported the figures in the tables presented below on the basis of the United Nations standardized instrument for reporting military expenditures. The information on military expenditures received has been computerized, with minor adjustments, to conform to standard statistical practices.

7. The originals of the replies from States are available through the Office for Disarmament Affairs. The annual reports and other relevant information on the standardized instrument for reporting military expenditures are available electronically on the Office's website at <http://disarmament.un.org/cab/milex.html>.

Footnotes:

1: Artillery and Ammunition are considered inventory and have previously been included in Material for Current Use. For 05-06, the consumption of Explosive Ordnance has been split out and classified as ammunition.

2: Procurement information has been provided by the DMO from the Major Capital Equipment Program except for Ammunition which is based on inventory consumption.

3: Construction information has been sourced from analysis of the information provided in the Capital Facilities Program as described in the 2005-06 Annual Report.

4: Although Military Assistance is provided to multiple nations, the only one provided with direct financial assistance is Papua New Guinea.

General Information:

1: Information for the compilation of this return has been sourced from the 2005-06 Defence and DMO published financial statements.

2: Differences between totals and the summation of lines relate to rounding.

3: The Total Expenditures figure differs from numbers published in the Defence Income Statement because some items including Depreciation, Amortization and Asset Write Downs have been excluded but Capital Investments have been included.

Annex I

Views received from Governments in accordance with paragraph 6 (b) of General Assembly resolution 60/44

Germany (on behalf of the European Union)

[Original: English]

[27 April 2007]

1. In paragraph 6 (b) of its resolution 60/44, the General Assembly requested Member States of the United Nations to provide the Secretary-General with their views and suggestions on ways and means to strengthen and broaden participation in the standardized reporting system, including necessary changes to its content and structure.
2. The Member States of the European Union consider objective information on military matters, including transparency of military expenditures, as an essential element for building transparency and confidence between States worldwide. Thus, the reporting system on military expenditures can help to relieve international tension and therefore contribute to conflict prevention.
3. National reports submitted in accordance with resolution 60/44 provide important data on expenditures incurred on personnel operations and maintenance, procurement and construction, and research and development. The detailed information may facilitate agreed and balanced reductions in military expenditures. The Member States of the European Union are committed to supporting universal participation in the reporting system. They are convinced that the widest possible participation in the reporting system is necessary to enhance transparency and confidence-building as well as mutual understanding between States.
4. The Member States of the European Union welcome the fact that participation has increased almost steadily since the instrument started operation in 1981, reaching its highest annual numbers in 2002 and 2006 with 82 national submissions. This indicates the growing understanding among United Nations Member States on the important role of transparency on military expenditures.
5. All Member States of the United Nations are encouraged to participate annually in the standardized reporting system and to submit the data on time and in conformity with the general and specific guidelines for reporting military expenditures to the United Nations standardized instrument. Member States that are unable to provide detailed information should at least use the simplified reporting form, which seeks only aggregate data on personnel, operations and procurement.
6. The Member States of the European Union welcome all efforts to further strengthen and broaden participation in the standardized reporting system. Objective information on military matters, including transparency of military expenditures, is important, and measures aiming at strengthening and broadening participation should be developed. To this aim a report on the operation and further development of the Standardized Instrument for Reporting Military Expenditures, taking into account the views expressed by Member States on the subject, would be welcome. The report should be prepared by a group of governmental experts on the basis of equitable geographical representation.

7. The Member States of the European Union for their part will continue to participate actively in all appropriate forums and to discuss transparency on military expenditures as a means to contribute to increased overall transparency and confidence among all Member States of the United Nations.
