## Seventy-first session

Agenda item 134

### Programme budget for the biennium 2016-2017

## Pattern of conferences

### Report of the Advisory Committee on Administrative and Budgetary Questions

#### I. Introduction

1. The Advisory Committee on Administrative and Budgetary Questions has considered the report of the Secretary-General on the pattern of conferences (A/71/116). In addition, the Committee had before it the report of the Committee on Conferences for 2016 (A/71/32), which includes the text of a draft resolution on the pattern of conferences in annex I. During its consideration of the report, the Committee met with representatives of the Secretary-General, who provided additional information and clarification, concluding with written responses received on 14 October 2016.

2. The report of the Secretary-General on the pattern of conferences is submitted pursuant to General Assembly resolution 70/9 and other relevant mandates, and contains information on matters relating to meetings management; documentation and publications; translation and interpretation; technology; and staffing.

#### II. Meetings management

##### Utilization of conference-servicing resources and facilities

3. In paragraphs 12 to 30 of his report, the Secretary-General provides an overview of the utilization of conference-servicing resources and facilities. Over a reporting cycle of six years and based on a core sample of bodies meeting in Geneva, Nairobi, New York and Vienna, the overall utilization rate for meetings with interpretation averaged 84.5 per cent, as follows: 85 per cent in 2015; 86 per cent in 2014; 82 per cent in 2013; 84 per cent in 2012; and 85 per cent in 2011 and 2010. According to the Secretary-General, improvements were achieved through continued efforts to work closely with the secretariats of calendar bodies, which

---

\* Reissued for technical reasons on 4 November 2016.

resulted in fewer cancellations and a lower number of minutes lost as a result of late starts or early meeting conclusions. The Committee notes that, from 2010 to 2015, the overall utilization rate for meetings with interpretation from a core sample of bodies meeting in the four duty stations has remained above the benchmark factor of 80 per cent. **In this regard, the Advisory Committee trusts that efforts will continue to increase utilization rates.**

4. The Advisory Committee recalls its past requests that future budget submissions include information on utilization factors based on actual occupancy against existing meeting capacity for all Secretariat conference facilities at the four duty stations (see A/70/432, paras. 4 and 5, and A/69/527, para. 5). Upon request, the Committee was provided with tables showing the actual occupancy as measured vis-à-vis existing meeting capacity by duty station (see annex I). **The Advisory Committee recommends that the General Assembly request the Secretary-General to include this information in all future reports on the pattern of conferences.**

5. In this connection, the Advisory Committee was informed that statistics<sup>1</sup> had been calculated on the basis of 251 annual working days per year for Geneva, Nairobi, New York and Vienna and on the basis of 208 annual working days for the Economic Commission for Africa (ECA). Upon further enquiry, the Committee was informed that the calculation for ECA took into consideration additional elements, such as national and religious holidays and the regular low seasons for conferencing, as well as differences in calendar systems, which reduced the statistical basis to 208 annual working days. The Committee was furthermore informed that the Secretariat was developing a utilization methodology which would be applicable to all four duty stations, as well as ECA. **The Advisory Committee trusts that the calculation method to be used in the new utilization methodology will be based on the same number of annual working days in each duty station, so as to ensure reliable and comparable statistics for all duty stations.**

#### **Integrated global management rule**

6. The Secretary-General indicates that savings in connection with the integrated global management rule have decreased in 2015 owing to fewer meetings held away from established headquarters and to a change in the formula, which now includes such elements as staff replacement costs and daily subsistence allowance. Notional savings from the application of the rule therefore decreased to \$950,373 in 2015, from \$1.7 million in 2014 and \$1.3 million in 2013. **The Advisory Committee looks forward to receiving information on efficiencies achieved under the integrated global management rule once comparative figures under the new formula are established.**

#### **Accessibility services**

7. In paragraphs 40, 65 and 66 of his report, the Secretary-General provides an overview of activities and initiatives related to the accessibility to conference

---

<sup>1</sup> The Committee was informed that the methodology used to compile statistics on the actual utilization of conference room capacity across duty stations considered that there are approximately 21 working days per month: 365 days per year minus 104 days for weekends and 10 days for official holidays equals 251 working days.

services and facilities. These include an Official Document System (ODS) improvement project aimed at offering various accessibility features on mobile devices; the provision of sign-language interpretation services and real-time speech-to-text captioning at meetings; and the provision of Braille embossing and documentation in New York through the Accessibility Centre. The Advisory Committee also notes that the accessibility guide to the Human Rights Council for persons with disabilities is available online.<sup>2</sup> Upon enquiry, the Advisory Committee was informed that digital audio and visual transmission and recordings of meetings are available to facilitate the provision of closed captioning for meetings, sign-language interpretation and content for speech-to-text technologies.

8. In this connection, the Advisory Committee was informed, upon enquiry, that the report of the Secretary-General entitled “Towards the full realization of an inclusive and accessible United Nations for persons with disabilities” (A/71/344 and Corr.1) covers accessibility issues as they relate to: human resources; the physical facilities of United Nations premises, conference services and facilities; information and documentation; and options for improving accessibility in general. In that report, the Secretary-General proposes, inter alia, the harmonization of the working conditions and hiring of sign-language interpreters across duty stations and undertaking outreach activities to increase the available pool of International Sign interpreters; the utilization of a real-time speech-to-text captioning service for participants with hearing loss and deafness; the conduct of an awareness-raising campaign among Member States and other potential contributors about the role of the accessibility centres and opportunities; and the inclusion of accessibility improvements in future facility enhancements at the United Nations Office at Vienna and the United Nations Office at Nairobi. In paragraph 87 of the aforementioned report, the Secretary-General indicates that the implementation of the goals for an accessible United Nations will be initiated within available resources and that it is his intention to keep Member States informed of the progress achieved and, if a need for additional resources arises, to present proposals in that respect to the General Assembly.

**9. The Advisory Committee is of the view that the initiatives presented in the report of the Secretary-General entitled “Towards the full realization of an inclusive and accessible United Nations for persons with disabilities” may have administrative and budgetary implications and trusts that requirements in this connection, if any, will be submitted for the consideration of the Fifth Committee of the General Assembly at the appropriate time.**

10. The Advisory Committee was also informed that efforts are being made to further enhance the assistive information and communications technology in the Accessibility Centre in New York, which was established through a donation from the Government of the Republic of Korea. The Committee was informed that the Accessibility Centre offers services for persons with disabilities, including delegates and other stakeholders, such as the borrowing of equipment for use in meetings and Braille print embossing of documents and statements for visually impaired delegates. The Committee was also informed that the maintenance of equipment and training of staff members involved in the activities of the Centre are currently provided by the Government of the Republic of Korea. In order to reach out to

---

<sup>2</sup> See [www.ohchr.org/Documents/HRBodies/HRCouncil/AccessibilityGuideHRC.pdf](http://www.ohchr.org/Documents/HRBodies/HRCouncil/AccessibilityGuideHRC.pdf).

potential contributors to the Fund, the Secretariat has set up a multipurpose trust fund which includes accessibility as a main goal and is considering a fundraising/information campaign, with a view to creating opportunities for Member States to provide financial and in-kind contributions to support accessibility initiatives, projects and services. **The Advisory Committee welcomes the voluntary contribution made available by the Government of the Republic of Korea for the establishment and maintenance of the Accessibility Centre in New York. The Committee encourages the Secretary-General to increase his efforts to broaden the donor base in support of accessibility initiatives.**

### **III. Matters relating to documentation, publication and workflow**

11. Matters relating to documents management, including with respect to workload-sharing, the simultaneous distribution of documents and multilingualism, and document digitization are described in paragraphs 8, 31-49 and 78 of the report of the Secretary-General.

#### **Workload**

12. The Secretary-General notes that the installation of the following electronic workflow applications at Geneva, Nairobi, New York and Vienna was completed in 2015: eLUNa, a computer-assisted translation tool; Tapta4UN, a statistical machine translation tool; Document Storage, a repository of bilingual parallel texts; and eRef, an automated referencing tool. Upon enquiry, the Advisory Committee was informed that eLUNa has the capability to automatically identify previous translations and to recognize United Nations terminology, and that it functions together with Tapta4UN, which has the ability to propose draft sentences. The Secretary-General also notes that these measures have resulted in changes to existing language functions and that, therefore, the Secretariat intends to pilot the reprofiling of such functions in New York so as to adapt to these changes. **The Advisory Committee trusts that information on the results of the pilot project will be presented in the report of the Secretary-General on the pattern of conferences during the seventy-second session of the General Assembly.**

13. On a related matter, the Secretary-General describes the outposting of five staff from the French Translation Service in New York to Vienna for a pilot period of two years, beginning in the third quarter of 2016, and that the arrangement would not only help to address the vacancy rate in the Service, but also generate cost efficiencies as a result of the lower staffing costs in Vienna. The Secretary-General also indicates that this initiative may also facilitate overnight processing thanks to the time difference and increase the mobility of language staff, while upholding quality and preserving the institutional memory of the Service. **The Advisory Committee welcomes this initiative and requests that a status update on the experience gained from the pilot of outposting staff from New York to Vienna, including the future applicability to other duty stations and to other official United Nations languages, with an emphasis on quality control, be presented in the report of the Secretary-General on the pattern of conferences during the seventy-second session of the General Assembly.**

14. The Advisory Committee has repeatedly requested, but did not receive, data, disaggregated by language section, on the actual workload of revisers, with respect to previous years as well as for the year 2015. **The Advisory Committee expects that the Secretary-General will provide information on the actual workload of revisers for the six translation services to the General Assembly at the time of its consideration of the present report. Furthermore, the Advisory Committee recommends that the General Assembly request the Secretary-General to provide the aforementioned information, as a matter of routine, in future reports on the pattern of conferences.**

### **Multilingualism**

15. The Secretary-General indicates that the simultaneous distribution of documents is considered one of the pillars of multilingualism and that, in 2015, the compliance rate in New York reached 100 per cent, in Nairobi 95 per cent, in Vienna 72 per cent, and in Geneva 66 per cent. Reasons for the non-simultaneous distribution were technical problems or instructions from intergovernmental bodies, submitting departments and offices that, on occasion, some language versions should be issued before the others were ready. **The Advisory Committee recalls that the General Assembly emphasized the paramount importance of the equality of the six official languages of the United Nations and trusts that the Secretary-General, in accordance with the request of the Assembly, will continue to ensure full parity among the six official languages and to report thereon to the Assembly as a matter of routine in his subsequent reports (see [A/70/432](#), para. 11, and resolution [70/9](#), paras. 55 and 57).**

16. The Secretary-General indicates in paragraph 8 of his report that the Under-Secretary-General for General Assembly and Conference Management, in her capacity as Coordinator for Multilingualism, is developing a policy framework to direct and secure progress in the field of multilingualism and that these efforts will be reported to Member States separately under the multilingualism agenda item. The Advisory Committee was informed that a vacant P-4 regular budget post had been loaned to perform functions related to multilingualism and that the position had been filled temporarily, effective 1 October 2016. The Committee was further informed that the Department would seek to establish a dedicated post of Public Information and Multilingualism Coordinator (P-4) in the context of the proposed programme budget for the biennium 2018-2019. **The Advisory Committee will provide its comments on any proposal put forth in the context of the proposed programme budget for section 2 for the biennium 2018-2019.**

### **Digitization**

17. The report of the Secretary-General indicates that the Department of Public Information and the Department for General Assembly and Conference Management continued to collaborate to increase the online access to historical United Nations documents. As of April 2016, a total of 384,860 documents had been digitized, catalogued and made available online, representing 12.8 per cent of the 3 million documents identified as important and in urgent need of digitization. From here on, the Secretary-General proposes to include the digitization of United Nations documents in his annual report to the Committee on Information, with all future

updates to be reported under the agenda item entitled “Questions relating to information” rather than under the item entitled “Pattern of conferences”.

18. **The Advisory Committee recommends approval of the Secretary-General’s proposal to include future updates on the digitization project under the agenda item entitled “Questions relating to information” and trusts that the transfer of operational responsibilities, including a handover, for the project will be conducted in a timely manner. The Advisory Committee recalls its previous recommendation on the matter, including that the General Assembly, in its resolution [69/250](#), had requested the Secretary-General to expedite the process of the digitization of important older United Nations documents, in particular those that had been identified as particularly important and in urgent need of digitization. The Committee also recalls that, in its resolution [70/9](#), the General Assembly requested the Secretary-General to take all measures necessary to ensure that the digitization of key documents is completed in a timely manner.**

19. **The Advisory Committee welcomes the funding made available by the State of Qatar for the digitization project, including the third phase from 1 April 2016 to 31 March 2017. In this connection, the Committee recalls the request of the General Assembly that the Secretary-General seek additional voluntary contributions for the digitization of important older United Nations documents (see resolution [70/9](#), para. 88).**

#### **IV. Matters relating to translation, interpretation and staffing**

20. Matters relating to translation and interpretation, including related staffing matters, are addressed in the report of the Secretary-General (see [A/71/116](#), paras. 50-64) and the report of the Committee on Conferences (see [A/71/32](#), paras. 30-35).

##### **Outreach efforts to identify language staff and succession planning**

21. The Secretary-General indicates that efforts continue to expand outreach to, and recruitment from, underrepresented regions through new partnerships in sub-Saharan Africa and Latin America and to reach potential language candidates through the use of social media and tools for remote meeting, training and testing. Specifically, the Secretary-General indicates that social media were used to encourage French-speaking language professionals in Africa to participate in the language competitive examination for French translators held in July 2015, and to reach potential candidates in Latin America for the language competitive examination for Spanish translators held in 2016. With regard to the waiving of the requirement for candidates to have at least three official languages to increase the candidate pool from underrepresented countries, the Advisory Committee notes that the matter was recently discussed by the Committee on Conferences (see [A/71/32](#), chap. VI, para. 33).

22. The Secretary-General indicates that positive feedback was received in the language competitive examinations for English translators/précis-writers and for English editors held in July 2015 and that, following the pilot, the feasibility of expanding remote testing will be analysed. Upon enquiry, the Advisory Committee

was informed that the Spanish Translation Service was piloting a fully remote written examination and oral assessment, using a web-based platform designed for that purpose. In addition, a social media campaign was used to encourage candidates in Latin America and the Caribbean to apply. The Committee was also informed that the preliminary pilot results show that remote testing would be operationally feasible and that it was expected that all future language examinations would be conducted remotely.

23. The Secretary-General also indicates that outreach to educational institutions is continuing, for example, with the agreement between the European Union and the United Nations Office at Nairobi to support the Pan-African Masters Consortium in Interpretation and Translation (PAMCIT) in an effort to create a network of universities acting as centres of excellence in Africa to teach interpretation and translation. Upon enquiry, with respect to outreach activities, the Advisory Committee was informed that contacts with partner universities were continuing, for example, with universities in Beirut and Cairo. Furthermore, a PAMCIT curriculum harmonization workshop and a “training of trainers” workshop for translators was planned for March 2017.

24. The Advisory Committee emphasizes the link between reaching qualified candidates through outreach efforts and succession planning and was informed, upon enquiry, that succession planning targets of the language services were being met through collaboration with the established network of universities, as well as through professional associations and other organizations that promote multilingualism.

**25. The Advisory Committee welcomes the efforts to promote outreach programmes, which is in line with the request of the General Assembly to introduce innovative methods, including through partnerships with Member States, relevant international organizations and language institutions in all regions, and to continue to identify outreach opportunities, in order to ensure the continued availability of high-quality professional language services in the six official languages of the United Nations (see resolution 70/9, paras. 112 and 119).**

**26. The Advisory Committee welcomes the efforts made with respect to remote testing and looks forward to a further update on this initiative in the context of the Secretary-General’s next report on the pattern of conferences. With respect to succession planning, the Advisory Committee recalls its observations regarding the importance of outreach initiatives, including expansion of the network of universities in this connection, and trusts that efforts in this respect will continue unabated (see A/70/432, para. 15).**

27. With respect to the cost parameters for the production of a United Nations document and for the interpretation into the six official United Nations languages, the Advisory Committee was, upon enquiry, provided with detailed information on such costs in 2016 (see annex II). With respect to interpretation costs, the Committee was informed that the related costs were calculated on a daily basis, i.e., not on the basis of the number of meetings.

**28. Subject to its comments and recommendations in the paragraphs above, the Advisory Committee recommends that the General Assembly take note of the report of the Secretary-General.**

## Annex I

## Detailed information

## New York: January-August 2016

<i>Room</i>	<i>Standard meeting capacity (Jan-Aug)</i>	<i>Actual occupancy (number of meetings held)</i>	<i>Utilization rate (percentage)</i>

*Note:* For budgetary and statistical purposes, the Economic Commission for Africa is also calculating the conference rooms' actual utilization levels each year against the existing full-capacity baseline. In order to effectively address the question and concerns raised by the Committee, a unified methodology has to be agreed upon and put in place that would be applicable to all conference facilities concerned, taking each duty station's specificities into account, as well as the appropriate business model being adopted.

**Economic Commission for Africa: capacity of facilities**

<i>Room</i>	<i>Capacity</i>
Conference Room 1	864
Conference Room 2	474
Conference Room 3	115
Conference Room 4	115
Conference Room 5	115
Conference Room 6	115
Caucus Room 1	30
Caucus Room 2	20
Caucus Room 3	20
Caucus Room 6	20
Caucus Room 7	20
Caucus Room 8	20
Caucus Room 9	20
Caucus Room 10	24
Caucus Room 11	55
Large Briefing Room	60
Small Briefing Room	44

## Annex II

### Cost parameters for the production of one United Nations document in 2016

	<i>New York</i>		<i>Geneva</i>		<i>Vienna</i>		<i>Nairobi</i>	
	<i>8,500 words, 26 pages</i>	<i>10,700 words, 32 pages</i>						
Cost of one document <sup>a</sup>	\$37 600	\$47 000	\$36 300	\$45 200	\$29 800	\$37 300	\$29 900	\$37 700

<sup>a</sup> The cost of processing one document includes costs related to translation, revision, text-processing and editing, printing and distribution.
