

General Assembly

Distr.: General
29 August 2018

Original: English

Seventy-third session

Item 150 of the provisional agenda*

Scale of assessments for the apportionment of the expenses of United Nations peacekeeping operations

Implementation of General Assembly resolutions [55/235](#) and [55/236](#)

Report of the Secretary-General

Summary

In its resolution [55/235](#), the General Assembly reaffirmed the general principles underlying the financing of United Nations peacekeeping operations and adopted a new system of adjustments to the scale of assessments for the regular budget to be used in fixing rates of assessment applicable to peacekeeping operations. This system was based on the assignment of each Member State to 1 of 10 contribution levels using, among other criteria, its average per capita gross national product during the period 1993–1998. The Assembly requested the Secretary-General to update the composition of the contribution levels on a triennial basis, in conjunction with the reviews of the scale of assessments for the regular budget, in accordance with the criteria established in the resolution, and to report thereon to the Assembly. Pursuant to that request, the Secretary-General has submitted reports to the General Assembly updating the composition of the contribution levels on a triennial basis, starting with its fifty-eighth session.

At its seventieth session, in its resolution [70/246](#), the General Assembly reaffirmed the principles set out in its resolutions 1874 (S-IV), 3101 (XXVIII) and [55/235](#) and endorsed the updated composition of levels to be applied in adjusting regular budget scale rates to establish Member States' rates of assessment for peacekeeping operations for the period from 2016 to 2018. The Assembly also recognized the need to reform the current methodology for apportioning the expenses of peacekeeping operations and decided to review the structure of the levels during its seventy-third session.

Also by its resolution [70/246](#), the General Assembly requested the Secretary-General to continue to update the composition of the levels on a triennial basis, in conjunction with the regular budget scale of assessment reviews, in accordance with the established criteria, and to report thereon to the Assembly. The present report is

* [A/73/150](#).

submitted in response to that request and provides information on the updating of the composition of contribution levels for peacekeeping operations for the period 2019–2021. Information is provided on changes in the peacekeeping levels of Member States based on average per capita gross national income during the period 2011–2016. These are based on the data used by the Committee on Contributions in reviewing the scale of assessments for the period 2019–2021, which will be considered by the Assembly at its seventy-third session.

Until the General Assembly has adopted a new scale, it will not be possible to determine the corresponding rates of assessment for peacekeeping for the period 2019–2021. Furthermore, any adjustments to the structure of contribution levels for peacekeeping operations, as may be decided upon by the Assembly at its seventy-third session, would also need to be taken into account in determining the rates of assessment for peacekeeping. For illustrative purposes, however, on the basis of the existing structure of contribution levels, annex III shows the peacekeeping rates of assessment corresponding to the scale of assessments for the period 2019–2021 included for information in the report of the Committee on Contributions.

III. Effective rates of assessment for peacekeeping operations, 1 January 2019 to 31 December 2021, based on the results of the application of the methodology used in preparing the scale of assessments for the period 2016–2018 to gross national income data for the period 2011–2016	16

I. Introduction

1. By its resolution 1874 (S-IV), the General Assembly established certain principles to be applied to the financing of peacekeeping operations. Subsequently, by its resolution 3101 (XXVIII), the Assembly made ad hoc arrangements for the financing of the United Nations Emergency Force based on those principles. These arrangements involved basing each Member State's rate of assessment for the Force on its rate of assessment for the regular budget, as adjusted on the basis of its assignment to one of four groups. Member States in groups C and D had their regular budget rates reduced by 80 and 90 per cent, respectively; those in group B paid at the same rate; and the permanent members of the Security Council, assigned to group A, paid the difference pro rata to their rates of assessment for the regular budget. This ad hoc formula was applied subsequently, subject to a number of changes over the years to the membership of groups B, C and D.

2. In its resolution [55/235](#), the General Assembly reaffirmed the principles set out in its resolutions 1874 (S-IV) and 3101 (XXVIII). The Assembly also reaffirmed the following general principles underlying the financing of United Nations peacekeeping operations:

(a) The financing of such operations is the collective responsibility of all States Members of the United Nations and, accordingly, the costs of peacekeeping operations are expenses of the Organization to be borne by Member States in accordance with Article 17, paragraph 2, of the Charter of the United Nations;

(b) In order to meet the expenditures caused by such operations, a different procedure is required from that applied to meet expenditures under the regular budget of the United Nations;

(c) Whereas the economically more developed countries are in a position to make relatively larger contributions to peacekeeping operations, the economically less developed countries have a relatively limited capacity to contribute towards peacekeeping operations involving heavy expenditures;

(d) The special responsibilities of the permanent members of the Security Council for the maintenance of peace and security should be borne in mind in connection with their contributions to the financing of peace and security operations;

(e) Where circumstances warrant, the General Assembly should give special consideration to the situation of any Member States which are victims of, and those which are otherwise involved in, the events or actions leading to a peacekeeping operation.

3. By its resolution [55/235](#), the General Assembly established a new system of adjustments to regular budget scale rates in determining Member States' rates of assessment for peacekeeping operations. The system was based on a number of criteria, including a comparison of the average per capita gross national product (GNP) of each Member State during the six-year base period used for preparing the scale of assessments with the corresponding average for all Member States. These criteria, which were set out in paragraph 10 of resolution [55/235](#), were used to place each Member State in one of 10 levels, from A to J. In that regard, the Assembly decided the following:

(a) Assessment rates for the financing of peacekeeping operations should be based on the scale of assessments for the regular budget of the United Nations, with an appropriate and transparent system of adjustments based on levels of Member States, consistent with the principles outlined above;

(b) The permanent members of the Security Council should form a separate level and, consistent with their special responsibilities for the maintenance of peace and security, should be assessed at a higher rate than for the regular budget;

(c) All discounts resulting from adjustments to the regular budget assessment rates of Member States in levels C through J should be borne on a pro rata basis by the permanent members of the Security Council;

(d) The least developed countries should be placed in a separate level and receive the highest rate of discount available under the scale;

(e) The statistical data used for setting the rates of assessment for peacekeeping should be the same as the data used in preparing the regular budget scale of assessments, subject to the provisions of resolution [55/235](#);

(f) Levels of discount should be created to facilitate automatic, predictable movement between categories on the basis of the per capita gross national product of Member States.

4. In establishing the system, the General Assembly decided, also by its resolution [55/235](#), that Member States would be assigned to the lowest level of contribution with the highest discount for which they were eligible, unless they indicated a decision to move to a higher level. Transitions for 2001–2003 specified by the Assembly in its resolution [55/236](#) would occur in equal increments over the transition period and, after 2001–2003, transition periods of two years would apply to countries moving up by two levels and transition periods of three years would apply to countries moving up by three levels or more. The Assembly requested the Secretary-General to update the composition of the levels on a triennial basis, in conjunction with the regular budget scale of assessment reviews, in accordance with the criteria established above, and to report thereon to the Assembly. Lastly, the Assembly decided that the structure of contribution levels to be implemented from 1 July 2001 would be reviewed after nine years.

5. In its resolution [55/236](#), the General Assembly welcomed decisions by a number of Member States to move voluntarily to higher levels than required under the criteria set out in paragraph 10 of its resolution [55/235](#).

6. In its resolution [61/243](#), the General Assembly recalled its decision in resolution [55/235](#) to review the structure of levels of contribution for peacekeeping operations after nine years and decided to carry out the review at its sixty-fourth session. At that session, the Assembly, in its resolution [64/249](#), reaffirmed the principles set out in its resolutions 1874 (S-IV), 3101 (XXVIII) and [55/235](#). The Assembly also endorsed the updated composition of levels to be applied in adjusting regular budget scale rates to establish Member States' rates of assessment for peacekeeping operations for the period 2010–2012, subject to the provisions of that resolution. In addition, the Assembly recognized the concerns raised by Member States, including Bahrain and the Bahamas, regarding the structure of the levels for the apportionment of the expenses of United Nations peacekeeping operations and decided to review the structure of the levels with a view to a decision, if agreed, no later than at its sixty-seventh session.

7. At its sixty-seventh session, the General Assembly, in its resolution [67/239](#), reaffirmed the principles set out in its resolutions 1874 (S-IV), 3101 (XXVIII) and [55/235](#) and endorsed the updated composition of levels to be applied in adjusting regular budget scale rates to establish Member States' rates of assessment for peacekeeping operations for the period from 2013 to 2015. The Assembly also recognized the need to reform the current methodology for apportioning the expenses of peacekeeping operations and decided to review the structure of the levels during its seventieth session.

8. At its seventieth session, the General Assembly, in its resolution [70/246](#), reaffirmed the principles set out in its resolutions 1874 (S-IV), 3101 (XXVIII) and [55/235](#) and endorsed the updated composition of levels to be applied in adjusting regular budget scale rates to establish Member States' rates of assessment for peacekeeping operations for the period from 2016 to 2018. The Assembly also recognized the need to reform the current methodology for apportioning the expenses of peacekeeping operations and decided to review the structure of the levels during its seventy-third session. By the same resolution, the Assembly requested the Secretary-General to continue to update the composition of the levels on a triennial basis, in conjunction with the regular budget scale of assessment reviews, in accordance with the established criteria, and to report thereon to the Assembly.

9. In previous reports on the implementation of resolutions [55/235](#) and [55/236](#),¹ the Secretary-General outlined his understanding of the provisions of the resolutions and how he intended to carry out his responsibilities under resolution [55/235](#). The present report reflects the understandings outlined in those earlier reports.

II. Composition of levels for the financing of peacekeeping operations

10. The initial composition of the levels used for establishing rates of assessment for peacekeeping operations for the period from 1 July 2001 to 31 December 2003 was listed in the annex to resolution [55/235](#). The permanent members of the Security Council were included in level A. Member States on the list of the least developed countries were included in level J. Specified Member States were included in level C. The placement of other Member States was based on their average per capita GNP during the six-year base period (data for 1993–1998) used for the scale of assessments for 2001–2003 in relation to the average for all Member States. The thresholds applied were set out in the table below paragraph 10 of resolution [55/235](#). The initial placement of Member States in levels B and D to I was based on their average per capita GNP (renamed gross national income (GNI)) for the six-year base period 1993–1998 and the related average of all Member States for that period, which was \$4,797.

11. Since 2001, the scale of assessments has been prepared using two base periods, of six and three years. On the basis of the provisions of resolution [55/235](#) and the practice adopted by the General Assembly for the composition of levels for the period 2001–2003, the Secretary-General has subsequently updated the composition of levels for the periods 2004–2006, 2007–2009, 2010–2012, 2013–2015 and 2016–2018 using the average data on GNI for the six-year base period used by the Committee on Contributions in considering the scale of assessments for those periods.

12. The table below summarizes the base periods and the related average per capita GNI of all Member States that have been used in setting the composition of levels since 2001:

¹ See [A/C.5/55/38](#), [A/C.5/55/38/Add.1](#), [A/58/157](#), [A/58/157/Add.1](#), [A/61/139](#), [A/61/139/Corr.1](#), [A/61/139/Add.1](#), [A/64/220](#), [A/64/220/Add.1](#), [A/67/224](#), [A/67/224/Add.1](#), [A/70/331](#) and [A/70/331/Add.1](#).

<i>Scale period</i>	<i>Six-year base period</i>	<i>Average per capita GNI for all Member States</i>
2001–2003	1993–1998	4 797
2004–2006	1996–2001	5 094
2007–2009	1999–2004	5 518
2010–2012	2002–2007	6 708
2013–2015	2005–2010	8 338
2016–2018	2008–2013	9 861

13. The General Assembly has not so far decided on the elements of the methodology to be used in preparing the scale of assessments for the period 2016–2018. In the absence of specific guidance from the Assembly with regard to the new scale, the Committee on Contributions, at its seventy-eighth session, in 2018, decided to review the scale of assessments for the period 2019–2021 on the basis of its general mandate under rule 160 of the rules of procedure of the Assembly and the provisions of resolutions [58/1](#) and [70/245](#). In doing so, it agreed on certain conclusions and recommendations with regard to the methodology, reviewed the data provided by the Statistics Division for the period 2011–2016, decided that the market exchange rates of a number of Member States should be adjusted and provided, for information, machine scales showing the results of applying to the GNI data for 2011–2016 the methodology used in preparing the scale of assessments for the period 2016–2018.

14. In updating the composition of levels of contribution for peacekeeping operations for the period 2019–2021, the Secretary-General was guided by the provisions of General Assembly resolutions [55/235](#), [55/236](#) and [70/246](#), his understanding of the mandates set out therein as outlined in his earlier reports and the practice adopted by the Assembly in fixing the composition of levels for earlier periods. Accordingly, data for the six-year period 2011–2016 were used in updating the composition of levels for the period 2019–2021, and the corresponding thresholds are shown in annex I to the present report. These are based on the provisions of resolution [55/235](#) and each Member State's average per capita GNI for 2011–2016 in relation to the membership average of \$10,476.

15. In setting out his understanding of the implementation of resolutions [55/235](#) and [55/236](#) (see [A/C.5/55/38](#), paras. 13 and 16), the Secretary-General indicated that, since there were no criteria specified for inclusion in level C, the countries listed under level C in the annex to resolution [55/235](#) would remain in level C at least until the review of the structure of levels at the main part of the sixty-fourth session of the General Assembly. At that session, the Assembly adopted resolution [64/249](#). On the basis of the understanding at the time of the adoption of that resolution, as an exception, the Bahamas and Bahrain were treated as level C contributors for the period 2010–2012.² By its resolution [67/239](#), the Assembly endorsed the updated composition of levels to be applied in adjusting regular budget scale rates to establish Member States' rates of assessment for peacekeeping operations for the period 2013–

² Before the adoption of resolution [64/249](#), the Chair of the Fifth Committee and the President of the General Assembly stated that it was the understanding of the Assembly that, as an exception, the Bahamas and Bahrain would be treated as level C contributors for the scale of assessments for the period 2010–2012. See [A/C.5/64/SR.22](#) and [A/64/PV.68](#).

2015.³ By its resolution [70/246](#), the Assembly endorsed the updated composition of levels to be applied in adjusting regular budget scale rates to establish Member States' rates of assessment for peacekeeping operations for the period 2016–2018.⁴ For the period 2019–2021, the illustrative information set out in the present report reflects level C on the basis of the composition specified in the annex to resolution [55/235](#).

16. On the basis of the above, and prior to the application of any phasing or voluntary movements, Antigua and Barbuda would move down from G to level H, Czechia would move down from level D to level E, Equatorial Guinea would move up from level J to level H (following its graduation from the group of least developed countries), Greece would move down from level B to level D, Latvia would move down from level F to level G, Libya would move down from level G to level I, Nauru would move down from level H to level I, Oman would move down from level B to level E, Palau would move up from level I to level H, Panama would move up from level I to level H, Portugal would move down from level B to level D, Saint Kitts and Nevis would move up from level G to level F, Seychelles would move up from level H to level G, Trinidad and Tobago would move up from level F to level E, Uruguay would move up from level G to level F, and Venezuela would move up from level H to level G.

17. Under the provisions of resolution [55/235](#), the upward movement of Equatorial Guinea is subject to the appropriate transitional period. This has been applied in the manner outlined in the earlier report of the Secretary-General ([A/C.5/55/38](#)) and is reflected in annex II to the present report.

III. Rates of assessment for the financing of peacekeeping operations

18. As reflected in annex II to the present report, the composition of levels of contribution for peacekeeping operations for 2019–2021 has been updated in accordance with the provisions of resolution [55/235](#). The updated composition of levels, subject to adjustments arising from the General Assembly's review of the structure of contribution levels, would be used together with the scale of assessments for 2019–2021 to establish each Member State's peacekeeping rate of assessment. The Assembly will consider the scale of assessments for the period 2019–2021 at its seventy-third session. Until it has adopted a new scale, it will not be possible to determine the corresponding rates of assessment for peacekeeping for the period 2019–2021.

³ At the time of the adoption of General Assembly resolution [67/239](#), the Chair of the Fifth Committee and the President of the General Assembly stated that it was the understanding of the Assembly that, on an exceptional basis for the 2013–2015 scale period only, three countries in level B, the Bahamas, Bahrain and Oman, would be afforded discounts of 7.5 per cent to their assessment rates, that Oman would forgo its transition period and that those discounts would not cause the aggregate assessment rates for countries in level A over the scale period to exceed their aggregate effective rates as contained in annex III to the report of the Secretary-General on the implementation of General Assembly resolutions [55/235](#) and [55/236](#) ([A/67/224](#)). See [A/C.5/67/SR.22](#) and [A/67/PV.62](#).

⁴ At the time of the adoption of General Assembly resolution [70/246](#), the Chair of the Fifth Committee and the President of the General Assembly stated the understanding that, on an exceptional basis for the 2016–2018 scale period only, three countries in level B — the Bahamas, Bahrain and Oman — would be afforded discounts of 7.5 per cent to their assessment rates, that in 2018 only, Saudi Arabia would be afforded a discount of 7.5 per cent to its assessment rate, and that those discounts should be borne on a pro rata basis by the permanent members of the Security Council. See [A/C.5/70/SR.23](#) and [A/70/PV.82](#).

19. For illustrative purposes, however, annex III to the present report shows the peacekeeping rates of assessment (correct to four decimal places) corresponding to the scale of assessments for the period 2019–2021 included for information in the report of the Committee on Contributions ([A/73/11](#), para. 101).

IV. Conclusions

20. The General Assembly may wish to take note of the present report and decide on the structure of levels of contribution for peacekeeping operations and the composition for the period 2019–2021.

Annex I

Peacekeeping levels, based on average per capita gross national income of Member States and other factors

<i>Level</i>	<i>Criterion</i>	<i>Threshold in United States dollars (2019–2021)</i>	<i>Discount (percentage)</i>
A	Permanent members of the Security Council	Not applicable	Premium
B	All Member States, except those covered below and level A	Not applicable	0
C	As listed in the annex to General Assembly resolution 55/235	Not applicable	7.5
D	Member States with per capita GNI less than 2 times the average for all Member States (except level A, C and J contributors)	Under 20,952	20
E	Member States with per capita GNI less than 1.8 times the average for all Member States (except level A, C and J contributors)	Under 18,857	40
F	Member States with per capita GNI less than 1.6 times the average for all Member States (except level A, C and J contributors)	Under 16,762	60
G	Member States with per capita GNI less than 1.4 times the average for all Member States (except level A, C and J contributors)	Under 14,666	70
H	Member States with per capita GNI less than 1.2 times the average for all Member States (except level A, C and J contributors)	Under 12,571	80 (or 70 on a voluntary basis) ^a
I	Member States with per capita GNI less than the average for all Member States (except level A, C and J contributors)	Under 10,476	80
J	Least developed countries (except level A and C contributors)	Not applicable	90

^a Member States in level H* have a discount of 70 per cent.

^a At the time of the adoption of General Assembly resolution 70/246, the Chair of the Fifth Committee and the President of the General Assembly stated the understanding that, on an exceptional basis for the 2016–2018 scale period only, three countries in level B — the Bahamas, Bahrain and Oman — would be afforded discounts of 7.5 per cent to their assessment rates, and that in 2018 only, Saudi Arabia would be afforded a discount of 7.5 per cent to its assessment rate, and that those discounts should be borne on a pro rata basis by the permanent members of the Security Council. See [A/C.5/70/SR.23](#) and [A/70/PV.82](#).

^b Member States that moved voluntarily up to level H paid at 30 per cent of their regular budget, and it is assumed that this will continue.

^c Two-year phasing for Member States moving up.

Annex III

**Effective rates of assessment for peacekeeping operations,
1 January 2019 to 31 December 2021, based on the results of
the application of the methodology used in preparing the
scale of assessments for the period 2016–2018 to gross
national income data for the period 2011–2016^a**
