Draft resolution I

United Nations Conference on the Midterm Comprehensive Review of the Implementation of the Objectives of the International Decade for Action, “Water for Sustainable Development”, 2018–2028

The General Assembly,

Recalling its resolution [71/222](#) of 21 December 2016, by which it proclaimed the period from 2018 to 2028 the International Decade for Action, “Water for Sustainable Development”,

Recalling also its resolution [73/226](#) of 20 December 2018 on the midterm comprehensive review of the implementation of the International Decade for Action, “Water for Sustainable Development”, 2018–2028,

Recalling further Economic and Social Council resolutions 1980/67 of 25 July 1980 on international years and anniversaries and 1989/84 of 24 May 1989 on guidelines for international decades in economic and social fields and General Assembly resolutions [53/199](#) of 15 December 1998 and [61/185](#) of 20 December 2006 on the proclamation of international years,

Reaffirming its resolution [70/1](#) of 25 September 2015, entitled “Transforming our world: the 2030 Agenda for Sustainable Development”, in which it adopted a comprehensive, far-reaching and people-centred set of universal and transformative Sustainable Development Goals and targets, its commitment to working tirelessly for the full implementation of the Agenda by 2030, its recognition that eradicating poverty in all its forms and dimensions, including extreme poverty, is the greatest global challenge and an indispensable requirement for sustainable development, its commitment to achieving sustainable development in its three dimensions – economic, social and environmental – in a balanced and integrated manner, and to building upon the achievements of the Millennium Development Goals and seeking to address their unfinished business,

Reaffirming also the sustainable development goals and targets related to water resources and sanitation, including those contained in the 2030 Agenda for Sustainable Development, and determined to achieve the goal of ensuring the availability and sustainable management of water and sanitation for all and other related goals and targets,

Emphasizing that water is critical for sustainable development and the eradication of poverty and hunger, that water, ecosystems, energy, food security and nutrition are linked and that water is indispensable for health, well-being and human development, including the empowerment of women, and a vital element of achieving the Sustainable Development Goals and other relevant goals in the social, environmental and economic fields,

Noting with concern that the world is not on track to achieve water-related Sustainable Development Goals and targets at the global level by 2030 at the current rate of progress, which has a tremendous impact on human well-being and on the three dimensions of sustainable development,

Recognizing that the coronavirus disease (COVID-19) pandemic demonstrates that it is crucial that safe and affordable drinking water, and adequate and equitable sanitation and hygiene are available, accessible and affordable to all, which is essential to global efforts towards strengthening and achieving universal health coverage, further recognizing that the public health threats of water-borne diseases, pollution and the health impacts of water-related disasters remain imminent, emphasizing in that regard that ecosystem health and human health should be addressed holistically, and recalling that the human rights to safe drinking water and sanitation are derived from the right to an adequate standard of living and are inextricably related to the right to the highest attainable standard of physical and mental health, as well as the right to life and human dignity,

Noting with concern that climate change is one of the factors that can exacerbate the global water stress and the need for climate adaptation strategies to address water issues, and acknowledging that disasters, many of which are exacerbated by climate change and are increasing in frequency and intensity, significantly impede progress towards sustainable development,

Acknowledging that integrated disaster risk-informed water resource management is necessary for successful disaster preparedness and disaster risk reduction, and recalling the commitment to step up efforts on all fronts to tackle desertification, land degradation, erosion and drought, biodiversity loss and water scarcity, which are seen as major environmental, economic and social challenges for global sustainable development,

Recognizing that water-related issues, including the relevant Sustainable Development Goals and targets, need to be better reflected in the agendas of the General Assembly and the Economic and Social Council,

Reaffirming that the high-level political forum on sustainable development, convened under the auspices of the General Assembly and the Economic and Social Council, has a central role in overseeing the follow-up and review of the implementation of the 2030 Agenda at the global level,

Recognizing synergies between the 2030 Agenda, the Addis Ababa Action Agenda,¹ the Paris Agreement adopted under the United Nations Framework Convention on Climate Change² and the Sendai Framework for Disaster Risk Reduction 2015–2030,³

Emphasizing that the achievement of the water-related goals and targets would contribute to the successful implementation of the New Urban Agenda,⁴ the Paris Agreement, the Sendai Framework for Disaster Risk Reduction, the SIDS Accelerated Modalities of Action (SAMOA) Pathway,⁵ the Convention on Biological Diversity⁶ and the United Nations Convention to Combat Desertification in Those Countries Experiencing Serious Drought and/or Desertification, Particularly in Africa,⁷

Recalling the political declaration of the high-level political forum on sustainable development, convened under the auspices of the General Assembly,⁸ which recognizes the urgent need to accelerate action on all levels and by all stakeholders, in order to fulfil the vision and Goals of the 2030 Agenda,

¹ Resolution [69/313](#), annex.

Recalling also the launch of the ambitious and accelerated response to reach our common vision by 2030, and the pledge to make the coming decade one of action and delivery for sustainable development,

Taking note of the *United Nations World Water Development Report 2020*, the outcome document of the High-level Panel on Water, entitled “Making every drop count: an agenda for water action”, the *Sustainable Development Goal 6 Synthesis Report on Water and Sanitation*, the outcomes and Ministerial Declaration of the eighth World Water Forum, held in Brasilia from 18 to 23 March 2018, the outcomes of the United Nations special thematic sessions on water and disasters, the outcomes of the Budapest Water Summit in 2019 and the Sustainable Development Goal 6 Global Acceleration Framework,

Noting with concern the findings contained in the special reports of the Intergovernmental Panel on Climate Change entitled *Global Warming of 1.5°C* and *The Ocean and Cryosphere in a Changing Climate*,

Taking note of the Final Declaration,⁹ the Co-Chairs’ summary¹⁰ and the Call for Action and Partnerships of the High-level International Conference on the International Decade for Action “Water for Sustainable Development”, 2018–2028, co-organized by the Government of Tajikistan and the United Nations, held in Dushanbe from 20 to 22 June 2018,

3. If the question arises whether a matter is one of procedure or of substance, the presiding President of the Conference shall rule on the question. Except as provided in rule 44, the Conference may vote by show of hands, except that a representative may request a roll call, which shall then be taken in the English alphabetical order of the names of the States participating in the Conference, beginning with the delegation whose name is drawn by lot by the presiding President. The name of each State shall be called in all roll calls, and its representative shall reply "yes", "no" or "abstention".
2. When the Conference votes by mechanical means, a non-recorded vote shall replace a vote by show of hands and a recorded vote shall replace a roll call. Permission to speak on the motion shall be accorded to only two representatives in favour of and to two opposing the division. Rule 42

Order of voting on amendments

When an amendment is moved to a proposal, the amendment shall be voted on first. When two or more amendments are moved to a proposal, the Conference shall vote first on the amendment furthest removed in substance from the original proposal and then on the amendment next furthest removed therefrom, and so on, until all the amendments have been put to the vote. Where, however, the adoption of one amendment necessarily implies the rejection of another amendment, the latter shall not be put to the vote. If one or more amendments are adopted, the amended proposal shall then be voted upon.

Rule 43

Order of voting on proposals

1. If two or more proposals, other than amendments, relate to the same question, they shall, unless the Conference decides otherwise, be voted on in the order in which they were submitted. The Conference may, after each vote on a proposal, decide whether to vote on the next proposal.
2. Revised proposals shall be voted on in the order in which the original proposals were submitted, unless the revision substantially departs from the original proposal. In that case, the original proposal shall be regarded as withdrawn and the revised proposal shall be treated as a new proposal.
3. A motion requiring that no decision be taken on a proposal shall be put to the vote before a decision is taken on the proposal in question.

Rule 44

Stressing the need, in the implementation of the 2030 Agenda, to benefit from and build on experiences, success stories, best practices, challenges and the lessons learned from the previous agreements on sustainable development,

Stressing also the importance of overcoming silos and seeking innovative and coordinated approaches in integrating the three dimensions of sustainable development, and in this regard taking note of the actions and initiatives implemented by the United Nations system entities,

Stressing further the need to determine gaps, obstacles, synergies and challenges in the implementation of commitments and instruments in the sustainable development field, in a coherent and integrated manner, and with a view to pursuing and achieving policy coherence as well as identifying new opportunities and emerging challenges for international cooperation on the path towards sustainable development,

Reaffirming the 2030 Agenda for Sustainable Development, the Addis Ababa Action Agenda of the Third International Conference on Financing for Development,⁸ the Paris Agreement adopted under the United Nations Framework Convention on Climate Change,⁹ the New Urban Agenda¹⁰ and the Sendai Framework for Disaster Risk Reduction 2015–2030,¹¹ as well as major outcome documents in relation to countries in special situations,

Noting with great concern the threat to human health, safety and well-being caused by the coronavirus disease (COVID-19) pandemic, as well as the severe disruption to societies and economies and the devastating impact on lives and livelihoods, and that the poorest and most vulnerable are the hardest hit by the pandemic, reaffirming the ambition to get back on track to achieve the Sustainable Development Goals by designing sustainable and inclusive recovery strategies to accelerate progress towards the full implementation of the 2030 Agenda and to help to reduce the risk of future shocks, and recognizing that the COVID-19 pandemic requires a global response based on unity, solidarity and renewed multilateral cooperation,

Noting with concern that COVID-19 has exacerbated existing challenges in the international community's efforts, especially for developing countries, to implement sustainable consumption and production, and may further reverse progress towards the attainment of the Sustainable Development Goals, including Sustainable Development Goal 12, and therefore stressing the importance of promoting sustainable consumption and production in the context of sustainable and inclusive recovery strategies,
