<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> informational session for 152 permanent missions in Vienna covering the six official languages.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> language day celebrations of all six official languages.				

## Subprogramme 3 Documentation services

### Objective

1.18 The objective, to which this subprogramme contributes, is to ensure efficient and effective multilingual deliberation and decision-making processes of intergovernmental and expert bodies and conferences of the United Nations and other Vienna-based international organizations.

### Deliverables

1.19 Table 1.9 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 1.9

## **Programme 2**

### **Political affairs**

#### **Department of Political and Peacebuilding Affairs**

##### **Overall orientation**

##### **Mandates and background**

2.1 The Department of Political and Peacebuilding Affairs is responsible for all Secretariat matters related to the prevention, management and resolution of conflicts at the global level. The Department is the lead entity of the United Nations for good offices, political analysis, mediation, electoral assistance, peacebuilding support and political guidance as they relate to the Organization's efforts towards, inter alia, preventive diplomacy, peacemaking, peacebuilding and sustaining peace. The Department oversees the work of missions under its responsibility, including special envoys and regional offices. It also provides support to peace operations in the areas of mediation, electoral assistance and peacebuilding, as well as to resident coordinators working in complex political situations. It provides substantive support and secretariat services to the Security Council and its subsidiary bodies, as well as to relevant subsidiary organs of the General Assembly, including the Special Committee on the Situation with regard to the Implementation of the Declaration on the Granting of Independence to Colonial Countries and Peoples and the Committee on the Exercise of the Inalienable Rights of the Palestinian People. The Department also provides strategic, substantive and technical support to the work of the Peacebuilding Commission, manages the Peacebuilding Fund on behalf of the Secretary-General and draws together the expertise of the United Nations system to facilitate coherent system-wide action in support of peacebuilding and sustaining peace.

2.2 The mandate derives from the Charter of the United Nations and the priorities established in relevant General Assembly resolutions and decisions, including resolution [46/232](#), in which the Assembly established the Department of Political Affairs, and more recently resolution [72/262](#) C, in which the Assembly established the Department of Political and Peacebuilding Affairs. The proliferation of the number and intensity of conflicts over the past few years and their immense human and material cost confirms the importance of conflict prevention and resolution through inclusive political solutions, peacebuilding and sustaining peace.

##### **Strategy and external factors for 2022**

2.3 The Department has global responsibility for political and peacebuilding issues and manages a spectrum of tools and engagements across the conflict continuum to ensure a coherent and effective approach to conflict prevention and resolution, electoral assistance, peacebuilding and sustaining peace. The Department will take into account the evolving nature of conflicts, including the emergence of new threats, in formulating specific strategies, in particular comprehensive regional strategies, to prevent conflict and sustain peace. Given its global mandate for conflict prevention and peacemaking, the Department will play a lead role within the United Nations in formulating and implementing comprehensive regional strategies that address cross-boundary issues, in cooperation with regional and subregional organizations.

2.4 In order to achieve these goals, the Department will rely on its expertise at Headquarters and its network of field presences, in particular special political

missions, including regional offices, and liaison presences with regional and other organizations. Greater coherence and effectiveness in the formulation of comprehensive regional strategies is being achieved as a result of the restructuring of the United Nations peace and security architecture, including the single political-operational regional structure shared by the Department of Political and Peacebuilding Affairs and the Department of Peace Operations, which has also enabled better transition planning, for example, in the drawdown of peacekeeping operations, by integrating political and operational responsibilities. The integration of the Peacebuilding Support Office into the Department of Political and Peacebuilding Affairs has strengthened the interaction between the Department and the single political-operational structure on the one hand, and the Peacebuilding Commission and the Peacebuilding Fund on the other. In terms of increased synergies and cooperation in the context of conflict prevention, conflict resolution, peacebuilding and sustaining peace, and building on sustained work over the years to strengthen cooperation with field presences, the reforms provide a clear and strengthened entry point for collaboration with the United Nations development system at large and allow the peace and security pillar to intensify the provision of day-to-day advice and support for empowered resident coordinators and country teams in responding to specific country challenges. These forms of collaboration continue to deepen and benefit transition settings, in particular.

2.5 The Department will continue to provide advice and substantive services to the Security Council, its subsidiary organs and the Military Staff Committee; assist and support the Peacebuilding Commission; provide advice and substantive support to the Special Committee on the Situation with regard to the Implementation of the Declaration on the Granting of Independence to Colonial Countries and Peoples, as well as to other relevant intergovernmental bodies; and continue to provide support to the Committee on the Exercise of the Inalienable Rights of the Palestinian People in its deliberations and the implementation of its annual programmes of work.

2.6 For 2022, the Department's planned deliverables and activities reflect the known and anticipated challenges related to the coronavirus disease (COVID-19) pandemic that are being faced by Member States. The Department will continue to provide political analysis, electoral technical assistance, the preparation of draft reports of the Secretary-General and the deployment of good offices initiatives on behalf of the Secretary-General. Specific examples of such planned deliverables and activities include: (a) redoubling efforts by the Department to improve its ability to support Member States remotely in dealing with the additional challenges and stress caused by the pandemic in conflict-affected settings; (b) adapting the induction workshops for incoming members of the Security Council to further enhance the experience of participants by working with the presenters of the workshop to ensure that presentations are adaptable to a virtual format; (c) strengthening the technological capabilities of the Department by exploring tools and platforms to obtain verifiable and official information to inform the Special Committee on the Situation with regard to the Implementation of the Declaration on the Granting of Independence to Colonial Countries and Peoples when considering the situation in the Non-Self-Governing Territories; and (d) undertake more advance planning and offer workshops with a flexible delivery modality on the women and peace and security agenda in the Arab region in the context of special political missions, to strengthen and enhance the relationship between the United Nations and the League of Arab States. The support provided to Member States on issues related to COVID-19 is expected to contribute to planned results for 2022, as described under subprogrammes 1, 3, 4 and 7.

2.7 With regard to cooperation with other entities at the global, regional, national and local levels, under Chapter VIII of the Charter, the Department, through its special political missions and its liaison offices, continues to strengthen partnerships with

regional and other organizations in the field of peace and security. Under the United Nations-World Bank Partnership Framework for Crisis-Affected Situations, the Department also works to strengthen partnerships with the World Bank and other international financial institutions to make international engagement in crisis-affected situations more coherent, effective and sustainable. The Peacebuilding Support Office serves as the secretariat to the Partnership Framework, enabling a cross-pillar approach with all United Nations system entities concerned and offering advisory support to field presences in some 40 contexts. The Department will continue the Humanitarian-Development-Peacebuilding and Partnership Facility to support field teams' joint data, analysis and operational collaboration with the World Bank Group. The Department is also expanding its partnerships with other relevant actors, including civil society, in particular in support of women and young people.

2.8 With regard to inter-agency coordination and liaison, the Department will continue to participate in the Executive Committee established by the Secretary-General. The Department also chairs a number of inter-agency task forces to coordinate and increase the coherence of United Nations system engagement in specific countries or regions, in line with entities' mandates, as well as various thematic inter-agency mechanisms. The Peacebuilding Fund, by nature a cross-pillar tool of financial support, will continue to work with and through agencies, funds and programmes in-country and at Headquarters.

2.9 With regard to the external factors, the overall plan for 2022 is based on the following planning assumptions:

- (a) Unity among Member States, in particular the Security Council, including in critical situations in which the United Nations is engaged;
- (b) Existence of entry points for United Nations engagement to mitigate tensions and prevent conflict;
- (c) Commitment of the parties to a conflict to engaging in a process towards the peaceful settlement of disputes.

2.10 With regard to the COVID-19 pandemic, the programme plan is based on the assumption that the proposed deliverables and activities for 2022 will be feasible to implement. However, if the pandemic were to continue to have an impact on the planned deliverables and activities, they would be adjusted during 2022 within the scope of the overall objectives, strategies and mandates. Any such adjustments would be reported as part of the programme performance information.

2.11 The Department integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, the Department issued its most recent policy on women and peace and security in June 2019. The policy builds on good practices across the Department and special political missions and is intended to ensure that key priorities are integrated into the daily work of the Department and special political missions. These priorities, in line with the mandates entrusted to the Organization in the area of women and peace and security, encompass gender-sensitive political and conflict analysis, promoting the inclusion of women in all peacemaking, peace-sustaining and peacebuilding efforts, and their participation in electoral and political processes. The policy also addresses such issues as preventing and assessing conflict-related sexual violence and post-conflict planning and financing. For example, for subprogramme 2, Electoral assistance, result 3, related to the increase in the average percentage of women in parliaments in countries receiving United Nations electoral assistance, reflects the fact that gender is systematically mainstreamed into all United Nations electoral assistance activities.

2.12 With regard to disability inclusion, in line with the United Nations Disability Inclusion Strategy, the Department will implement the Strategy with a view to reinforcing an organizational culture that respects the human rights and supports the inclusion of persons with disabilities; further advancing the disability inclusion in strategic planning and management, knowledge and information management, and staff career development; and addressing the barriers to accessibility in the workplace and in the performance of functions. In addition, the Department also fosters engagement with government counterparts and civil society organizations to promote the inclusivity of political processes, which also encompasses addressing the needs of people with disabilities.

### **Impact of COVID-19 on programme delivery**

2.13 During 2020, the COVID-19 pandemic had an impact on the planned deliverables and activities of the Department. The impact included a reduction in meetings and training events, some of which were held virtually while others had to be cancelled or postponed. Similarly, substantive servicing of the work of the Security Council, its subsidiary bodies and other intergovernmental bodies, including various political engagements, were carried out through virtual meeting platforms or hybrid settings. Some electoral missions had to be cancelled. Specific examples of the impact are provided under all subprogrammes. The change in approach and/or the cancellation of planned deliverables and activities also had an impact on the expected results for 2020, as described in the programme performance under all subprogrammes.

2.14 At the same time, however, some planned deliverables and activities were modified during 2020, and new activities added, within the overall scope of the objectives of the subprogrammes, in order to support Member States on issues related to the COVID-19 pandemic. Those modifications included support for the call of the Secretary-General for a global ceasefire through remote and virtual means and support for Member States that conducted elections in 2020 on specific measures aimed at mitigating the risks of COVID-19 to voters, candidates and electoral officials. A “fast track” of the Humanitarian-Development-Peacebuilding and Partnership Facility to support resident coordinators in their engagement on COVID-19 with the World Bank was created and requests for up to \$50,000 to fund remote or local consultancies were approved in as little as 24 hours to support the alignment of United Nations and World Bank efforts and facilitate conflict-sensitive recovery planning. These activities contributed to results in 2020, as described in the programme performance under subprogrammes 1–3, 5 and 6.

### **Legislative mandates**

2.15 The list below provides all mandates entrusted to the programme.

#### *Charter of the United Nations*

Articles 33 and 99

#### *General Assembly resolutions*

46/232	Revitalization of the United Nations Secretariat
72/262 C	Special subjects relating to the programme budget for the biennium 2018–2019 (subsection III)

#### *Security Council resolution*

2171 (2014)

## Deliverables

2.16 Table 2.1 lists all cross-cutting deliverables, by category and subcategory, for the period 2020–2022.

Table 2.1

### Cross-cutting deliverables for the period 2020–2022, by category and subcategory

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>3</b>	<b>3</b>	<b>3</b>	<b>3</b>
1. Meetings of the Fifth Committee	1	1	1	1
2. Meetings of the Committee for Programme and Coordination	1	1	1	1
3. Meetings of the Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
<b>C. Substantive deliverables</b>				
<b>Good offices:</b> good offices and preventive diplomacy; high-level diplomatic missions and meetings, including jointly with regional and subregional organizations; and support for field operations, including provision of mediation support.				
<b>Consultation, advice and advocacy:</b> consultations with representatives of Member States, regional and subregional organizations and civil society organizations; and strategic coordination meetings with relevant partners.				
<b>Fact-finding, monitoring and investigation missions:</b> strategic review/assessment missions.				
<b>Databases and substantive digital materials:</b> databases on international peace and security issues.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> exhibits; manuals, guides and other communications products about the work of the Department.				
<b>External and media relations:</b> statements on behalf of the Secretary-General; notes to correspondents; and press releases, communiqués and other communications products about the work of the Department.				

## Evaluation activities

2.17 The self-evaluation on United Nations transitions, completed in 2020, has guided the programme plan for 2022.

2.18 The findings of the self-evaluation referenced above have been taken into account for the proposed programme plan for 2022. For example, this has led to enhanced and more tailored coordination mechanisms, at Headquarters and in the field, to handle transitions from one United Nations configuration to another.

2.19 An external evaluation on improving the gender-sensitivity of the Department's analyses is planned for 2022.

## Programme of work

### Subprogramme 1

#### Prevention, management and resolution of conflicts

#### Objective

2.20 The objective, to which this subprogramme contributes, is to advance the prevention, management and resolution of conflicts by peaceful means.

## Strategy

2.21 To contribute to the objective, the subprogramme will support the pacific settlement of disputes, under Chapter VI of the Charter, through the use of the tools of preventive diplomacy, peacemaking, peacebuilding and sustaining peace. In utilizing those tools, the subprogramme will work in close cooperation with a wide array of actors, in particular regional and subregional organizations, including under Chapter VIII of the Charter. The subprogramme's strategy embodies the recognition that political solutions are a key requirement for durable peace.

2.22 The subprogramme promotes a more effective and cohesive response to help to prevent, mitigate, manage and resolve conflicts by: (a) responding in a timely manner to conflict situations; (b) providing timely and accurate information, analysis and policy options; (c) formulating recommendations on measures that could be undertaken by the United Nations system; (d) making available and providing substantive and technical support to the good offices of the Secretary-General, including through formal mediation, where appropriate; (e) providing substantive, political and technical support to the Secretary-General in the discharge of his functions and in his relationships with Member States; (f) enhancing the capacity of regional and subregional organizations; (g) providing substantive support and guidance to special political missions; (h) strengthening the Department's capacity, expertise and partnerships with other United Nations and subregional, regional and international organizations in order to address peace and security challenges more effectively; (i) undertaking monitoring and evaluating the impact and the cost-effectiveness of key conflict prevention and mitigation initiatives; (j) developing coherent strategies for crisis prevention and peacebuilding, linking diplomatic, security, humanitarian and development efforts by the United Nations system and other international and regional actors; (k) enhancing political and operational links with subprogramme 6, Peacebuilding Support Office (to this end, the subprogramme will work closely with other relevant parts of the United Nations system); and (l) empowering women in peacebuilding and mediation efforts.

2.23 The above-mentioned work is expected to result in the improved capacity and capability of Member States to identify, prevent and address conflict situations.

## Programme performance in 2020

2.24 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Global ceasefire call by the Secretary-General to stop all conflicts

2.25 By upending lives and economies, challenging community relations and undermining trust in the very institutions meant to address its fallout, the COVID-19 pandemic has exacerbated inequality and fostered misinformation and hate speech, ultimately creating new flashpoints for tension and increased risks of instability. The impact of COVID-19 on women and young people, as well as other populations suffering from marginalization, has been disproportionate. This includes the loss of employment and income and the dramatic escalation in gender-based and domestic violence. Young women and men are also at risk of being left behind in education and economic opportunities. The pandemic has hindered diplomatic action and complicated United Nations peacemaking efforts. Meanwhile, it has also exacerbated existing fragilities and amplified the prevention challenge. To respond to this challenge, the subprogramme actively supported the call of the Secretary-General, first made on 23 March 2020, for a global ceasefire, by providing technical and

political support to Member States and parties to conflict in reaching ceasefire/political agreements in Libya, Ukraine, the South Caucasus and elsewhere. The subprogramme also provided technical support to special political missions and other United Nations presences in support of the call of the Secretary-General by helping to liaise with and between the missions, in order to amplify and promote his global appeal for a halt in fighting.

2.26 Specifically, the subprogramme provided direct support to the Libyan political dialogue, in particular in terms of the process designed to facilitate the inclusive, virtual participation of Libyans in the discussions and the selection process of the new interim authorities.

*Progress towards the attainment of the objective, and performance measure*

2.27 The above-mentioned work contributed to the objective, as demonstrated by the signing of a ceasefire agreement by the Libyan parties on 23 October 2020, followed by the 5+5 Joint Military Commission's work on operationalizing the ceasefire agreement and establishment of a ceasefire monitoring mechanism. The Libyan Political Dialogue Forum met in Tunis, which led to the selection of the interim authorities that committed themselves to holding national elections on 24 December 2021 (see table 2.2).

Table 2.2

**Impact of COVID-19 on subprogramme delivery**

2.28 Owing to the impact of COVID-19 during 2020, the subprogramme changed the approach to its core activities, such as mediation support, political analysis and partnerships with regional organizations, and had to cancel a number of training events that could not be carried out in person. Similarly, political engagements and political analysis were carried out through the extensive use of remote means and virtual engagements.

**Planned results for 2022**

2.29 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

**Result 1: comprehensive regional strategies<sup>1</sup>****Programme performance in 2020**

2.30 The subprogramme supported the development and implementation of regional strategies in close coordination with other United Nations entities and in consultation with relevant counterparts, including Member States, regional and subregional organizations and international financial institutions. The subprogramme also made progress in the implementation of such strategies, including by coordinating the implementation and the cooperation by United Nations system entities, for example, pertaining to the Horn of Africa and in the Great Lakes region. Specifically, the subprogramme continued to support the regional efforts towards promoting enhanced coordination with regional mechanisms through its support for the Office of the Special Envoy of the Secretary-General for the Great Lakes Region, such as the Expanded Joint Verification Mechanism of the International Conference on the Great Lakes Region and national disarmament, demobilization and reintegration commissions. Concurrently, the subprogramme continued to support the efforts by the Office to promote the effective functioning of the Great Lakes Judicial Cooperation Network and the strengthening of the rule of law in the region. Initiatives were taken to support the implementation of the Nairobi Declaration on Justice and Good Governance adopted by the ministers of justice of the States members of the International Conference in May 2019. The Nairobi Declaration included specific recommendations for action at the national and regional levels towards ensuring the full respect for human rights and the rule of law. A series of virtual workshops and consultations strengthened the capacities of national human rights institutions, including through the development of national road maps tailored to the needs of each participating country, to enable them to better fulfil their mandates.

2.31 The above-mentioned work contributed to deepened implementation of comprehensive regional strategies, including the adoption of 12 national road maps on human rights and the rule of law, leading to greater harmonization of action by regional and subregional organizations and other stakeholders in the Great Lakes region, which met the planned target, reflected in the proposed programme budget for 2020.

**Proposed programme plan for 2022**

2.32 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will deepen the development and operationalization of current strategies and develop new ones. The expected progress is presented in the performance measure below (see table 2.3).

Table 2.3  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>

<sup>1</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 3)).

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
	comprehensive regional strategies for a number of regions or subregions	on human rights and the rule of law, leading to greater harmonization of action by regional and subregional organizations and other stakeholders in the Great Lakes region	to greater harmonization of action by regional and subregional organizations and other stakeholders	action by regional and subregional organizations and other stakeholders

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: enhanced peace and security cooperation<sup>2</sup>**

### **Programme performance in 2020**

2.33 The subprogramme has worked to ensure a holistic approach across the entire range of political and peacebuilding engagements across the globe. These efforts have supported and driven three transitions in different contexts, where the different tools at the disposal of the Department have been deployed in an integrated manner. Such transitions, in the form of the United Nations presence on the ground, have recently been undertaken in Haiti (initiated in 2019) and Guinea-Bissau and the Sudan (both initiated in 2020). The subprogramme also advanced the integration of political analysis into peacebuilding programming and vice versa. For example, in the context of Guinea-Bissau, the subprogramme supported the United Nations Office for West Africa and the Sahel during the transition that led to the closure of the United Nations Integrated Peacebuilding Office in Guinea-Bissau and the transfer of the United Nations presence in the country to the office of the resident coordinator, while the Security Council entrusted the Special Representative of the Secretary-General and Head of the United Nations Office for West Africa and the Sahel with the good offices role of the Secretary-General for the country.

2.34 The above-mentioned work contributed to the transition in Guinea-Bissau, with the adaptation of the regional work to the new United Nations presence in the country, which met the planned target of the implementation of comprehensive regional strategies formulated, leading to greater harmonization of action by regional and subregional organizations and other stakeholders, reflected in the programme budget for 2021.

### **Proposed programme plan for 2022**

2.35 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will build on lessons learned to plan and carry out future transitions, as well as to continue to accompany the three transitions mentioned above. The expected progress is presented in the performance measure below (see table 2.4).

<sup>2</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

Table 2.4  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Endorsement of the reform proposal by the General Assembly and transitional steps towards the implementation of new structures	Discussions by external actors, such as regional and subregional organizations, with United Nations entities on comprehensive regional strategies for a number of regions or subregions	Transition in Guinea-Bissau with the adaptation of the regional work to the new United Nations presence in the country, leading to greater harmonization of action by regional and subregional organizations and other stakeholders	Transitions from one field configuration to another are carried out within the timing indicated by the Security Council and in a coordinated and integrated manner	Transitions from one field configuration to another are carried out within the timing indicated by the Security Council and in a coordinated and integrated manner

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: reduced threats to peace and security

#### Proposed programme plan for 2022

2.36 The COVID-19 pandemic has hindered diplomatic action and complicated peacemaking efforts across the globe. It has not, for the most part, affected the underlying dynamics of armed conflicts. However, by exacerbating existing realities, it has amplified the prevention challenge. Overlapping health, socioeconomic, political and humanitarian aspects of the pandemic could potentially derail fragile peace processes and conflict prevention initiatives owing to restrictions on travel and in-person contact. In the framework of the call of the Secretary-General for a global ceasefire, in 2020, the subprogramme deployed and intensified its engagement with requesting Member States and parties to provide increased support for peacemaking efforts, including through the deployment of mediation experts to support processes in Libya and the Sudan, among others.

#### *Lessons learned and planned change*

2.37 The lesson for the subprogramme was that the COVID-19 pandemic restrictions on travel and in-person contact limited the effectiveness of the Department, which faced challenges in providing sufficient support to Member States and relevant parties in preventing, managing and resolving conflicts. In applying the lesson, the subprogramme will increase its focus on building the capacities of Member States to engage and negotiate remotely. The subprogramme will redouble its efforts to improve its ability to remotely support Member States in dealing with the additional challenges and stress caused by the pandemic in conflict-affected settings. These efforts will focus specifically on developing sound political analysis and providing technical support to political processes. In addition, the subprogramme will focus on informing peacebuilding programming on mitigating risks for instability in conflict-affected areas.

*Expected progress towards the attainment of the objective, and performance measure*

2.38 This work is expected to contribute to the objective, as demonstrated by increased opportunities for Member States to prevent, manage and resolve conflict through access to virtual tools and remote modalities to prevent, manage and resolve conflict (see table 2.5).

Table 2.5

**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)</i>	<i>2022 (planned)</i>
—	—	The Libyan Political Dialogue Forum was held	Improved transitional justice process in Colombia	Increased opportunities for Member States to prevent, manage and resolve conflict through access to virtual tools and remote modalities to prevent, manage and resolve conflict

**Legislative mandates**

2.39 The list below provides all mandates entrusted to the subprogramme.

*Charter of the United Nations*

Articles 33 and 99

*General Assembly resolutions*

10. Seminars, training events and academic meetings on advancing preventive diplomacy, peacemaking and peacebuilding	195	178	195	195
<b>C. Substantive deliverables</b>				
<b>Good offices:</b> good offices and preventive diplomacy; high-level diplomatic missions and meetings, including jointly with more than 20 regional organizations; and support for 22 special political missions, including provision of mediation support.				
<b>Consultation, advice and advocacy:</b> consultations with representatives of Member States from all regions, international and regional organizations and civil society organizations; and strategic coordination meetings with relevant partners.				
<b>Fact-finding, monitoring and investigation missions:</b> strategic review/assessment missions.				
<b>Databases and substantive digital materials:</b> updated databases on international peace and security issues.				
<b>D. Communication deliverables</b>				
<b>External and media relations:</b> statements on behalf of the Secretary-General; notes to correspondents; and press releases, communiqués and other communications products about the work of the Department.				

## **Subprogramme 2**

### **Electoral assistance**

#### **Objective**

2.41 The objective, to which this subprogramme contributes, is to strengthen the existing capacity of requesting Member States to organize and conduct inclusive, transparent and peaceful elections that enjoy public confidence and that contribute to stability and security, especially in transitional and post-conflict situations.

#### **Strategy**

2.42 To contribute to the objective, the subprogramme will continue to provide timely responses to requests from Member States for United Nations electoral assistance. The assistance is provided upon request from Member States or pursuant to a mandate from the General Assembly or the Security Council and is mostly of a technical nature. The provision of assistance involves deploying technical experts and various types of electoral missions to assist the requesting Member States in various phases of their electoral processes. United Nations technical support to electoral processes in requesting Member States usually includes technical advice on designing and establishing election management bodies, designing or reforming electoral frameworks and systems, voter education and voter registration activities, and the participation of women, young people and persons with disabilities in electoral and political processes. It also encompasses partnerships and capacity development support to regional organizations, including co-organizing (with regional partner organizations) training events for Member States in various regions on key electoral matters, such as gender and elections; enhancing the credibility and integrity of electoral processes; and preventing electoral violence. The subprogramme will also update existing internal policies and develop new United Nations electoral policy directives to ensure consistency, coordination and coherence within the United Nations system on electoral assistance activities, and will maintain and further strengthen the United Nations single electoral roster of experts and the electoral institutional memory.

2.43 The subprogramme plans to support Member States on issues related to COVID-19 by continuing to adapt to new conditions, as necessary, and by enhancing its COVID-19-related electoral support to Member States, where necessary. This will include enhancing voter education and awareness-raising activities to support relevant COVID-19-related mitigation elements and supporting electoral officials in ensuring the safety of voters and other relevant stakeholders, in particular on election day, while preserving the integrity of the electoral process.

2.44 The above-mentioned work is expected to result in:

- (a) Strengthened election management bodies;
- (b) More effective electoral frameworks and systems;
- (c) Enhanced voter education and voter registration activities;
- (d) Increased participation of women, young people, persons with disabilities and marginalized groups in electoral and political processes;
- (e) Peaceful and inclusive elections and more credible electoral processes.

2.45 The planned support on issues related to COVID-19 is expected to result in enabling Member States to conduct safe elections with minimized COVID-19-related risks to voters, electoral officials and candidates, while preserving the integrity of the electoral process.

## Programme performance in 2020

2.46 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### A more inclusive and diverse electoral roster

2.47 The subprogramme, as mandated by the General Assembly in its resolution [74/158](#), maintains and manages the United Nations single electoral roster of experts, who can be deployed to United Nations electoral field operations rapidly, when required. Notwithstanding the outbreak of the COVID-19 pandemic and its challenges, the subprogramme adopted mitigation measures, including through organizing virtual interview panels, and successfully conducted its roster campaign to expand the electoral roster and increase its diversity in terms of gender, geography and language. This initiative strengthened and diversified the pool of experts who are pre-screened and will be ready to deploy in support of the electoral processes in Member States requesting assistance.

#### *Progress towards the attainment of the objective, and performance measure*

2.48 The above-mentioned work contributed to the objective, as demonstrated by a 21 per cent increase in the availability of experts on the roster and a 25 per cent increase in the availability of female experts on the roster, to undertake electoral field operations (see figure 2.I).

Figure 2.I

**Performance measure: number of experts, including female experts, available on the United Nations single electoral roster**

### Impact of COVID-19 on subprogramme delivery

2.49 Owing to the impact of COVID-19 during 2020, the subprogramme had to change the approach, postpone, reschedule or cancel some electoral missions, as well as a number of regional capacity development initiatives and electoral training sessions. In this regard, several needs assessment missions were postponed or cancelled. These missions are required in advance of providing support to Member States to assess their needs and provide recommendations and parameters for United Nations electoral assistance. The subprogramme adapted and utilized alternative arrangements, including desk reviews and enhanced remote support, to ensure continuity in the delivery of its mandate and support for Member States. These

changes, although not optimal in terms of maximum results, enabled the subprogramme to ensure continued delivery of services to requesting Member States in 2020. These changes had an impact on the programme performance in 2020, as specified in result 2 below.

2.50 At the same time, however, the subprogramme identified new and modified activities to support Member States on issues related to the COVID-19 pandemic, within the overall scope of its objectives, namely, by assisting Member States that conducted elections in 2020 in specific measures aimed at mitigating the risks of COVID-19 to voters, candidates and electoral officials. Those activities included, among others, enhanced voter education and awareness-raising activities on COVID-19-related matters and providing some electoral commissions with the materials, training and equipment necessary to ensure the safety of voters, candidates and electoral officials, in particular on election day.

## **Planned results for 2022**

2.51 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: increased capacity of Member States in conducting peaceful, inclusive and genuine elections<sup>3</sup>**

#### **Programme performance in 2020**

2.52 The subprogramme provided technical electoral support to 53 Member States during 2020. The subprogramme assisted those Member States in building public confidence in their electoral administration and in the electoral process itself, highlighting elections as part of the broader and inclusive political process. Where appropriate and as requested, the subprogramme also assisted Member States in creating a conducive environment for holding peaceful and credible elections through good offices and support for political dialogue, facilitation and mediation, often in collaboration with regional and subregional entities or other actors. The subprogramme also developed and updated a number of system-wide electoral assistance policies, following consultations with a wide range of United Nations entities, including policies on the conduct of United Nations personnel in and around electoral sites and on supporting the prevention of election-related violence.

2.53 The above-mentioned work contributed to reaching 97 per cent of cases in which Member States received an electoral assistance mission within four weeks of approval by the United Nations Focal Point for Electoral Assistance Activities, which exceeded the planned target of 96 per cent, reflected in the proposed programme budget for 2020. The subprogramme also supported 22 elections and referendums that took place in 2020 in an overall peaceful manner.

#### **Proposed programme plan for 2022**

2.54 The subprogramme will continue the work related to the planned result, in line with its mandate. To further contribute to progress towards the objective, the office will continue to provide timely, coordinated and effective response to requests from Member States for United Nations electoral assistance within the specified time frame. The expected progress is presented in the performance measure below (see figure 2.II).

---

<sup>3</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 3)).

Figure 2.II

**Performance measure: percentage of cases in which Member States receive an electoral assistance mission within four weeks of approval by the United Nations Focal Point for Electoral Assistance Activities (annual)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: increased capacity of Member States to conduct inclusive, transparent and peaceful elections and increased support to regional organizations<sup>4</sup>**

### **Programme performance in 2020**

2.55 The subprogramme has provided capacity development support to partner regional organizations, including the African Union and the League of Arab States, in further enhancing their electoral units. The subprogramme also maintained its support for platforms for electoral capacity-building, institutional memory and knowledge-sharing at the global level. They included the ACE Electoral Knowledge Network and the Building Resources in Democracy, Governance and Elections project. These are knowledge and training tools for electoral officials and practitioners around the world. The United Nations and other partners in these initiatives have contributed actively to updating and implementing them on a regular basis.

2.56 The above-mentioned work contributed to 10 specific activities aimed at supporting regional organizations and their Member States, as well as the global electoral initiatives, which did not meet the target of 13 regional electoral capacity development initiatives in which regional organizations and their Member States participate, reflected in the programme budget for 2021. The outbreak of the COVID-19 pandemic had an impact on the planned deliverables and activities of the subprogramme in this area. The impact included the postponement of at least three in-person regional capacity development initiatives to beyond 2020.

### **Proposed programme plan for 2022**

2.57 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to progress towards the objective, the subprogramme, in partnership with relevant regional organizations, will conduct at least two regional training sessions, as well as a number of other capacity development initiatives, for Member States in various parts of the world on key electoral topics such as gender and elections, election observation and the prevention of electoral violence. The subprogramme will also undertake new initiatives to further enhance cooperation with partner regional organizations and provide capacity development support to regional organizations,

<sup>4</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

including through the promotion of South-South and triangular cooperation. The expected progress is presented in the performance measure below (see figure 2.III).

Figure 2.III

**Performance measure: number of regional electoral capacity development initiatives in which regional organizations and their member States participate (annual)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: increased participation of women in electoral and political processes**

#### **Proposed programme plan for 2022**

2.58 The global average percentage of women in parliaments continues to fall far short of the gender balance highlighted in the Beijing Declaration and Platform for Action. Promoting women's political and electoral participation is one of the key guiding principles for United Nations electoral assistance activities, and United Nations technical support has contributed to a steady increase in women's participation and representation over the past several years. All of the more than 50 United Nations electoral support projects in the field contain strong gender components, and many regional training sessions that the subprogramme organizes for Member States, in partnership with regional organizations, are focused on sharing experiences and good practices in promoting the political and electoral participation of women. The challenges posed by the COVID-19 pandemic affected all people across the globe, but it had even more negative impacts on more vulnerable groups and women and highlighted the continued efforts needed to address the inequalities of the past, which were further exacerbated by the pandemic.

#### *Lessons learned and planned change*

2.59 The lesson for the subprogramme was that there are opportunities for enhanced coordination of efforts among all United Nations entities involved in supporting the electoral processes of Member States. In applying the lesson, the subprogramme will ensure enhanced coordination and division of responsibilities among various United Nations entities providing support and advice to Member States, including to promote women's participation. In some contexts, there are opportunities to capitalize on an individual entity's expertise in promoting women's participation as voters, electoral officials and candidates.

#### *Expected progress towards the attainment of the objective, and performance measure*

2.60 This work is expected to contribute to the objective, as demonstrated by an overall increase in the percentage of women in parliaments in the countries receiving United Nations electoral assistance (see figure 2.IV).

Figure 2.IV

**Performance measure: women in parliaments in countries receiving United Nations electoral assistance (cumulative)**

(Percentage)

**Legislative mandates**

2.61 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolution*

74/158

Strengthening the role of the United Nations in enhancing periodic and genuine elections and the promotion of democratization

**Deliverables**

2.62 Table 2.7 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 2.7

**Subprogramme 2: deliverables for the period 2020–2022, by category and subcategory**

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	–	–	1	–
1. Report of the Secretary-General on strengthening the role of the United Nations in enhancing the effectiveness of the principle of periodic and genuine elections and the promotion of democratization	–	–	1	–
<b>Substantive services for meetings</b> (number of three-hour meetings)	–	–	1	–
2. Substantive servicing of the plenary of the General Assembly	–	–	1	–
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	26	28	26	30
3. Coordination of and support for the deployment of international election observers at the request of Member States and other organizations	1	1	1	1
4. Projects on electoral assistance to Member States	25	27	25	29

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>Seminars, workshops and training events</b> (number of days)	<b>19</b>	<b>9</b>	<b>19</b>	<b>20</b>
5. Training events and workshops for electoral administrators and staff at the regional and national levels on key electoral matters including gender and elections, elections and violence and election observation	19	9	19	20
<b>Technical materials</b> (number of materials)	<b>5</b>	<b>5</b>	<b>5</b>	<b>6</b>
6. Technical guidelines and reference materials on electoral processes, the electoral legal framework and the organization and administration of elections	5	5	5	6
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> technical support to at least 50 Member States annually through the design and implementation of electoral projects aimed at developing or enhancing the capacity of national electoral authorities, in particular in the areas of electoral systems and frameworks, gender mainstreaming, voter registration and electoral operations; and advice on the establishment and enhancement of electoral databases for at least 2 regional organizations.				
<b>Fact-finding, monitoring and investigation missions:</b> at least 60 electoral missions, including needs assessment missions to formulate system-wide responses to Member States requesting assistance in the conduct of their elections; and technical, advisory, review and other types of missions to provide support to electoral processes in Member States requesting United Nations electoral support.				
<b>Databases and other substantive digital materials:</b> up-to-date United Nations single electoral roster of experts; and updated records on the provision of electoral assistance for preserving United Nations institutional memory.				

### Subprogramme 3 Security Council affairs

#### Objective

2.63 The objective, to which this subprogramme contributes, is to ensure the effective discharge by the Security Council of its responsibility for the maintenance of international peace and security.

#### Strategy

2.64 To contribute to the objective, the subprogramme will continue to ensure the full, complete and timely execution of the Security Council's programme of work, as well as the timely and accurate issuance of official documentation for and by the Council. To that end, the subprogramme will first and foremost assist the monthly presidency of the Council in carrying out the official functions of the office, and provide procedural and substantive advice to the President of the Council, Council members and other Member States regarding the conduct of meetings and Council activities. Furthermore, it will ensure the timely and accurate publication and transmittal of the Council's outcomes and other documents, as well as the correspondence that it receives from the Secretariat, Member States and entities. It will also continue to coordinate the scheduling and administering of formal and informal meetings. This will be accomplished through applying the established procedural guidelines and practices, and the expeditious circulation and coordination of the editing, translation and issuance of those documents, where applicable.

2.65 The subprogramme will also support the Security Council's subsidiary bodies, including sanctions and non-sanctions committees, and working groups. This includes support for the Council and its subsidiary bodies in the design and implementation of sanctions regimes. In addition, the subprogramme will provide substantive and administrative support to the sanctions monitoring groups, teams and panels established by the Council, to facilitate their in-depth and credible monitoring of

sanctions implementation and violations. The subprogramme will furthermore engage with the broader United Nations system and Member States to enhance the effective functioning of sanctions committees, as well as to promote deeper understanding and implementation of Council sanctions. In this regard, the subprogramme will continue to organize annual induction training sessions for incoming Chairs and members of sanctions committees; immediately disseminate the United Nations Security Council Consolidated List to Member States, the United Nations system, other regional and international organizations and the private sector following the adoption of Council and sanctions committee listing and de-listing decisions, and support the timely establishment of expert panels.

2.66 The subprogramme will also provide to Member States specialized research and analysis regarding the practice and procedures of the Security Council. These will be provided through publications, such as the *Repertoire of the Practice of the Security Council*, the *Highlights of Security Council Practice* and other information and data resources on specific areas of practice of the Council. All research and analysis products will be made available online to Member States through the Council's website. The subprogramme will also continue to provide secretariat support to the Council's Informal Working Group on Documentation and Other Procedural Questions, including by providing procedural and substantive advice to the Chair and other Council members. The subprogramme will also respond to specific requests for research and advice from Member States and will convene dedicated information sessions, upon request.

2.67 The above-mentioned work is expected to result in:

- (a) The Security Council being fully supported by the Secretariat to fulfil its responsibilities under the Charter of the United Nations;
- (b) The Security Council and its sanctions committees being fully supported in implementing targeted sanctions;
- (c) Member States having better access to resources and information concerning the Security Council, allowing them to be more informed about its proceedings, being best equipped to participate in the work of the Council and being able to contribute to the implementation of its decisions.

## **Programme performance in 2020**

2.68 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Operations of the Security Council during the COVID-19 pandemic safeguarded**

2.69 The COVID-19 pandemic caused significant interruptions to the workflow of the Security Council and its subsidiary bodies owing to the inability to convene formal meetings at Headquarters. Following an agreement reached among Council members in mid-March 2020 on extraordinary and provisional working methods, the subprogramme assisted in the development and launch of a new virtual meeting platform for Council members, which was subsequently complemented by a separate platform to enable simultaneous interpretation into all six official languages. Special procedures were also implemented to allow for the remote adoption of draft resolutions and other Council decisions.

2.70 The subprogramme also assisted Security Council sanctions monitoring groups, teams and panels in conducting their consultations remotely, and in late 2020

facilitated the resumption of travel, where conditions allowed. In continuing its support to the Council in the design and implementation of sanctions regimes, the subprogramme completed the four mandated assessments through virtual consultations.

2.71 The subprogramme also adapted the presentation of the *Repertoire of the Practice of the Security Council* to reflect the adjusted working methods of the Security Council in a remote setting. The subprogramme also included elements related to the Council's remote work in the *Repertoire* and the *Highlights of Security Council Practice*, with a view to preserving the institutional memory and historical records for the benefit of the Council and the wider United Nations membership.

*Progress towards the attainment of the objective, and performance measure*

2.72 The above-mentioned work contributed to the objective, as demonstrated by the increase during 2020, in both the total number of queries/research requests and the average number of monthly queries that the subprogramme addressed. This illustrates how Member States continued to seek the expertise and wide-ranging support provided by the subprogramme, notwithstanding the impact of the COVID-19 pandemic (see figure 2.V).

Figure 2.V

**Performance measure: annual number of queries or research requests addressed**

**Impact of COVID-19 on subprogramme delivery**

2.73 Owing to the impact of COVID-19 during 2020, the subprogramme changed the approach by which it delivers substantive services in support of the work of the Security Council and its subsidiary bodies, including the use of virtual meeting platforms for meetings, the completion of mandated assessments of sanctions measures through virtual consultations and adapting the format of specific publication deliverables to reflect the adjusted working methods of the Council. These changes had an impact on the programme performance in 2020, as specified in result 1 below.

2.74 At the same time, however, the subprogramme identified new activities to support Member States on issues related to the COVID-19 pandemic, within the overall scope of its objectives, including the introduction of a new section on the website on the videoconferences of the Security Council and their outcomes. The modified deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

## Planned results for 2022

2.75 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: first port of call on all Security Council matters for Council members and beyond<sup>5</sup>**

#### **Programme performance in 2020**

2.76 Under the conditions created by the COVID-19 pandemic and in line with the aim of maintaining its support, as well as policy and procedural advice to Security Council members and Member States, the subprogramme introduced a new section on the Council's website on the videoconferences of the Council and their outcomes. Given that the inability of the Council to convene in person rendered the implementation of the provisional rules of procedure and the issuance of official meeting records difficult, the new section on the website enabled Council members and Member States to find all information regarding the Council's extraordinary and temporary working methods, written meeting records and meeting outcomes.

2.77 The subprogramme organized sanctions training for Security Council members and non-Council Member States, to encourage the implementation of United Nations sanctions and to improve the understanding and knowledge of practitioners, both within and outside the United Nations system, on the United Nations sanctions architecture. Some activities were completed early in 2020 and others were delivered in a virtual format. However, owing to COVID-19, some planned sanctions training for Member States was postponed.

2.78 During 2020, the subprogramme further improved on its ability to provide Security Council members with enhanced and diversified knowledge products. In this regard, the subprogramme continued its development of iSCAD+ to enhance its data collection and visualization of information on meetings, documentation and historical records for the future use of Council members and the wider United Nations membership. In strengthening its research and advisory role, the subprogramme launched five interactive dashboards in 2020 featuring data sets pertaining to the relevant activities and practice of the Council. The publication of those products on the Council's website and their promotion through social media accounts of the programme provided the Council, the wider United Nations membership and the interested public with user-friendly research and information tools containing key data.

2.79 The above-mentioned work contributed to an average engagement time on the Security Council website of 2:10 minutes, which exceeded the planned target of 1:20 minutes, reflected in the proposed programme budget for 2020.

#### **Proposed programme plan for 2022**

2.80 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to adapt its delivery to the conditions under which the Security Council conducts its work in order to provide the most adequate policy and procedural advice. The subprogramme will operationalize iSCAD+ for the use of enhanced data knowledge products to support the Council's deliberations. The expected progress is presented in the performance measure below (see figure 2.VI). The increase

<sup>5</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 3)).

in the engagement time on the Council's website reflects users interacting for longer on the site and viewing relevant content for their needs and interests.

Figure 2.VI

**Performance measure: engagement time on the Security Council website**

(Minutes)

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

**Result 2: Council members receive timely information on the implementation of sanctions measures<sup>6</sup>**

**Programme performance in 2020**

2.81 The subprogramme has continued to establish expert panels in a timely manner to assist the Security Council and its sanctions committees in the continuous monitoring of sanctions implementation. In this regard, the subprogramme maintained regular outreach to Member States, including for the recruitment of specific expert panels, as well as alerting them to general opportunities. The subprogramme continued to update and maintain a list of pre-screened, qualified individuals who expressed an interest in joining an expert panel through the maintenance of a roster of experts. The subprogramme also continued to prioritize adequate gender and geographic representation, taking into account Council resolution 2467 (2019), by which the Council encouraged the Secretary-General to ensure that expert panels included members with dedicated sexual violence and gender expertise, where mandated.

2.82 The above-mentioned work contributed to 100 per cent of expert panel proposals received by sanctions committees within two weeks of the renewal of a mandate, or within six weeks of the establishment of a new mandate, which met the planned target, reflected in the programme budget for 2021.

**Proposed programme plan for 2022**

2.83 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to conduct outreach to Member States, update and maintain the roster of experts, and seek to ensure gender and geographic balance in the composition of expert panels. The expected progress is presented in the performance measure below (see figure 2.VII).

<sup>6</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

Figure 2.VII

**Performance measure: expert panel proposals received by sanctions committees within two weeks of the renewal of a mandate or within six weeks of the establishment of a new mandate**

(Percentage)

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: enhanced annual induction workshop for incoming members of the Security Council**

#### **Proposed programme plan for 2022**

2.84 A key priority for the subprogramme is building the capacity of incoming members of the Security Council. Since 2016, the subprogramme has held annual induction workshops that are intended to provide delegates of the incoming members with an overview of the practices and working methods of the Council and its subsidiary bodies, familiarize them with the wide range of support provided to Council members by the subprogramme and introduce them to teams across the programme that engage with the Council on matters related to its agenda. The subprogramme has since received consistently positive feedback from the participants in the workshops.

#### *Lessons learned and planned change*

2.85 The lesson for the subprogramme was that there was a need to modify the contents of the workshop to ensure that they were better focused on the requirements of the participants, as well as the need to adapt the workshop to ensure effective delivery through a virtual format during the COVID-19 pandemic. In applying the lesson, the subprogramme will continue to explore ways to further enhance the experience of participants in the workshop by reaching out to incoming Council members during the planning stages to determine their areas of interest and working with the presenters of the workshop to ensure that presentations are more interactive, as well as adaptable to a virtual format.

#### *Expected progress towards the attainment of the objective, and performance measure*

2.86 This work is expected to contribute to the objective, as demonstrated by the high degree of satisfaction expressed by participants in the induction workshop for incoming Security Council members (see figure 2.VIII).

Figure 2.VIII

**Performance measure: degree of satisfaction expressed by participants in the annual induction workshop for incoming Security Council members**

(Percentage)

Note: Percentage represents number of participants who responded “Excellent” “Good” or “Satisfactory” in their overall assessment of the workshop. Totals might not equal 100 per cent owing to rounding off.

<sup>a</sup> Planned figures for 2021 and 2022 denote combined totals of “Excellent”, “Good” or “Satisfactory” ratings.

**Legislative mandates**

2.87 The list below provides all mandates entrusted to the subprogramme.

*Charter of the United Nations*

Articles 1, 7, 12 (2), 15, 24, 28, 29, 30, 41, 45, 46, 47 and 50

*Provisional rules of procedure of the Security Council**General Assembly resolutions*

686 (VII)	Ways and means for making the evidence of customary international law more readily available	75/244 75/140	Pattern of conferences Report of the Special Committee on the Charter of the United Nations and on the Strengthening of the Role of the Organization
55/222	Pattern of conferences		

*Security Council resolutions and notes by the President of the Security Council*

*Monthly letters from the President of the Security Council on working methods during COVID-19 (starting from March 2020)*

*Resolutions pertaining to the establishment and mandates of subsidiary organs created by the Council under the terms of Article 29 of the Charter of the United Nations, including:*

751 (1992)	1970 (2011)
1267 (1999)	1988 (2011)
1373 (2001)	1989 (2011)
1518 (2003)	2048 (2012)
1533 (2004)	2127 (2013)
1540 (2004)	2140 (2014)
1591 (2005)	2206 (2015)
1636 (2005)	2253 (2015)
1718 (2006)	2374 (2017)
1904 (2009)	S/2017/507

Note by the President of the Security Council of 30 August 2017

## Deliverables

2.88 Table 2.8 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 2.8

### Subprogramme 3: deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>54</b>	<b>54</b>	<b>54</b>	<b>54</b>
1. Notifications by the Secretary-General under Article 12 (2) of the Charter of the United Nations	1	1	1	1
2. Lists of communications from private individuals and non-governmental bodies pursuant to paragraph A of the appendix to the provisional rules of procedure of the Security Council	1	1	1	1
3. Summary statement by the Secretary-General on matters of which the Security Council is seized and of the stage reached in their consideration (weekly addenda)	52	52	52	52
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>510</b>	<b>513</b>	<b>400</b>	<b>400</b>
4. Meetings of the Security Council and its subsidiary bodies and related deliberations, including support to the issuance of resolutions, presidential statements, press statements and other outcomes/decisions of the Council and its subsidiary bodies	510	513	400	400
<b>B. Generation and transfer of knowledge</b>				
<b>Seminars, workshops and training events</b> (number of days)	<b>6</b>	<b>8</b>	<b>4</b>	<b>8</b>
5. Orientation of new Security Council members with respect to the evolving practices, procedures and working methods of the Council and its subsidiary organs	6	8	4	8
<b>Publications</b> (number of publications)	<b>2</b>	<b>1</b>	<b>2</b>	<b>2</b>
6. <i>Repertoire of the Practice of the Security Council</i>	1	1	1	1
7. Volume of <i>Resolutions and Decisions of the Security Council</i>	1	–	1	1
<b>Technical materials</b> (number of materials)	<b>104</b>	<b>109</b>	<b>109</b>	<b>124</b>
8. Tailored research for Member States on Security Council practice and procedure, current and historic	75	87	80	95
9. Compendium of mandates relating to active peacekeeping and special political missions authorized by the Security Council	1	1	1	1
10. Compendium of Security Council mandates and reports to the Council	12	5	12	12
11. Compendium of mandates relating to cross-cutting issues; women, peace and security; children in armed conflict; and protection of civilians in armed conflict	3	3	3	3
12. <i>Highlights of Security Council Practice</i>	1	1	1	1
13. Monthly statistics of Security Council deliberations	12	12	12	12

### C. Substantive deliverables

**Consultation, advice and advocacy:** substantive support, consultation, advice and advocacy to the Security Council in the preparation of the report of the Security Council for the General Assembly.

**Fact-finding, monitoring and investigation missions:** missions of the Security Council and the Chairs of its subsidiary organs to countries or regions in connection with matters of which the Council is seized; and assessments of sanctions regimes, including recommendations for adjustment to measures, as and when mandated by the Council.

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
--------------------------	-----------------	----------------	-----------------	-----------------

**Databases and substantive digital materials:** updated and maintained Security Council Affairs Division database of Council procedures, practices and working methods, including data on the 200-plus public meetings convened annually, covering approximately 50 agenda items; updated and maintained roster of experts for Council subsidiary bodies, and the United Nations Security Council Consolidated List of sanctions in all official languages provided to Member States, the private sector and other stakeholders; and interactive dashboards on mandates of peacekeeping operations and special political missions, and cross cutting issues on the agenda of the Council.

#### D. Communication deliverables

**Digital platforms and multimedia content:** updated and maintained website of the Security Council and its subsidiary bodies in all official languages provided for Member States and the wider public; and social media posts linking the activities of the Council to relevant constitutional and procedural aspects captured in the *Repertoire of the Practice of the Security Council*.

## Subprogramme 4 Decolonization

### Objective

2.89 The objective, to which this subprogramme contributes, is to promote the decolonization process in accordance with the Charter and relevant resolutions of the General Assembly of the 17 Non-Self-Governing Territories so as to bring about the complete eradication of colonialism.

### Strategy

2.90 To contribute to the objective, the subprogramme will continue to provide substantive support to the Special Committee on the Situation with regard to the Implementation of the Declaration on the Granting of Independence to Colonial Countries and Peoples and the Fourth Committee, including the preparation of parliamentary documents, Secretariat working papers and mandated reports of the Secretary-General, and the submission of information for inclusion in the annual report of the President of the Economic and Social Council on the implementation of the Declaration by the specialized agencies and the international institutions associated with the United Nations.

2.91 The subprogramme will also continue to provide advice, briefing materials and substantive support to the meetings, annual regional seminars and visiting missions of the Special Committee, as well as meetings of other intergovernmental bodies (Fourth Committee and Economic and Social Council), in close coordination with the Department for General Assembly and Conference Management. The subprogramme will also continue to maintain contact with the representatives of the Non-Self-Governing Territories and United Nations agencies, funds and programmes to advance its mandate and work with the Department of Global Communications, the Department for General Assembly and Conference Management and the Office of Information and Communications Technology in disseminating information on decolonization, including through the enhancement of the United Nations and decolonization website.

2.92 The subprogramme plans to support Member States on issues related to COVID-19 by providing the Special Committee with comprehensive information on the ongoing impact of COVID-19 in the Non-Self-Governing Territories, as part of its annual working papers, pursuant to Article 73 *e* of the Charter and relevant General Assembly resolutions.

2.93 The above-mentioned work is expected to result in:

- (a) Advancement of specific proposals to bring about an end to colonialism;

(b) Development and finalization of constructive programmes of work on a case-by-case basis for the decolonization of the Non-Self-Governing Territories.

2.94 The planned support on issues related to COVID-19 is expected to result in more timely and informed decision-making by the Special Committee when considering the situation in the Non-Self-Governing Territories.

## Programme performance in 2020

2.95 Programme performance in 2020 includes the below result that emerged during 20Article 7320, as well as programme performance presented under results 1 and 2 below.

### Enhanced awareness of decolonization

2.96 The subprogramme continued its work related to the United Nations decolonization website, which enabled relevant stakeholders and the general public to remain apprised of the Organization's ongoing work on decolonization. This became even more significant following the COVID-19 pandemic and its impact on the activities of the Special Committee.

2.97 To enhance awareness on decolonization, especially United Nations activities regarding and commitments to eradicating colonialism as one of its priorities since 1945, in October 2020, the subprogramme launched on the website a seven-minute animation video to reach a global audience. This video was also released on social media platforms and United Nations Television and Video. For the production of the video, the subprogramme undertook the preparation of the concept note and research and development of the narrative, terms of reference and scope. In line with the mandate on multilingualism and accessibility, the translated versions in the other five official languages are scheduled to be produced in due course.

2.98 Furthermore, the subprogramme was able to reach the Non-Self-Governing Territories and relevant stakeholders who wished to actively engage with the Special Committee, usually through its seminars and sessions, by continuously updating the website in all six official languages.

### *Progress towards the attainment of the objective, and performance measure*

2.99 The above-mentioned work contributed to the objective, as demonstrated by the Member States, the Non-Self-Governing Territories, relevant stakeholders and the general public having access to the decolonization animation video and the enhanced reach of decolonization work through a dissemination campaign of the video. Following this, the website registered a new record of 27,700 users in October, which is double the number of users in October in the previous year (see table 2.9).

Table 2.9  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
—	Member States, the Non-Self-Governing Territories, relevant stakeholders and the general public had access to enhanced content and features on the United Nations decolonization website, including	Member States, the Non-Self-Governing Territories, relevant stakeholders and the general public have access to the decolonization animation video and the enhanced reach of decolonization work

	infographics (“Decolonization: the annual cycle”, “The Special Committee on Decolonization” and “The Fourth Committee”)	through a dissemination campaign of the video  Following this, the website registered a new record of 27,700 users in October, which is double the number of users in October in the previous year

### **Impact of COVID-19 on subprogramme delivery**

2.100 Owing to the impact of COVID-19 during 2020, the subprogramme had to adopt a virtual and hybrid approach in servicing the bureau meetings of the Special Committee, wherein decisions were made to postpone its regional seminar and cancel its substantive session, and of the Economic and Social Council, Fourth Committee and General Assembly meetings. Furthermore, adjustments were made in supporting the work of the Special Committee, namely, in the drafting of the resolutions included in the annual report of the Special Committee, which was considered by way of the silence procedure. In this regard, the subprogramme had to rely on verifiable external and official sources online to obtain up-to-date information regarding the Non-Self-Governing Territories following the cancellation of the seminar and sessions. The subprogramme also implemented a staff rotation system to provide continuous support to in-person meetings, as necessary and in line with Headquarters health and safety measures. These changes had an impact on the programme performance in 2020, as specified in result 1 below.

### **Planned results for 2022**

2.101 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: enhanced dissemination of information<sup>7</sup>**

#### **Programme performance in 2020**

2.102 The subprogramme has continuously worked to update and enhance the United Nations decolonization website in compliance with the mandate on the dissemination of information and multilingualism, producing interactive content (“Timeline: historical overview” and “Trust Territories that have achieved self-determination”) and an animation video on decolonization (“United Nations and decolonization: past to present”). The subprogramme also worked with the Office of Information and Communications Technology on the implementation of the website’s upgrade in line with the updated branding guidelines of the Department of Global Communications. Furthermore, the subprogramme collaborated with the Department to update the brochure entitled “Ten frequently asked questions on the United Nations and decolonization”, which has been made available on the website in high-resolution format for printing and educational purposes.

2.103 The above-mentioned work contributed to 112,767 users having gained access to the United Nations decolonization website by 31 December 2020, which did not

<sup>7</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 3)).

meet the target of 248,957 users having gained access to the website, reflected in the proposed programme budget for 2020. This may be attributed to the postponement and cancelation of the activities of the Special Committee, brought about by the COVID-19 pandemic. Notwithstanding new interactive and audiovisual content, with limited activities in 2020, users were less inclined to frequently refer to the website for additional information related to those activities.

### Proposed programme plan for 2022

2.104 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will ensure continued updates and further enhancement and promotion of the website through other available digital technologies, including data visualization tools and social media platforms. The expected progress is presented in the performance measure below (see figure 2.IX).

Figure 2.IX

**Performance measure: number of users of the United Nations decolonization website**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 2: increased number of specialized agencies and international institutions associated with the United Nations providing information on the Non-Self-Governing Territories<sup>8</sup>

#### Programme performance in 2020

2.105 The subprogramme has proactively engaged and followed up with specialized agencies and international institutions associated with the United Nations regarding its request for information on support provided to Non-Self-Governing Territories.

2.106 The above-mentioned work contributed to the receipt of information from 11 entities, which did not meet the target of 13 United Nations entities and international organizations that provide information on the Non-Self-Governing Territories, reflected in the programme budget for 2021. While there was a 60 per cent increase compared with 2019 in the number of responses received by the subprogramme, as reported by the President of the Economic and Social Council (E/2020/52/Rev.1, para. 4), some entities indicated, in accordance with past years, that they did not have any information to submit on the issue. Consequently, their responses could not be counted as a contribution.

<sup>8</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

### Proposed programme plan for 2022

2.107 The subprogramme will continue the work related to the planned result, in line with its mandate. To further contribute to progress towards the objective, the subprogramme will provide specialized agencies and international institutions associated with the United Nations with further guidance regarding the information requested on support provided to Non-Self-Governing Territories, especially in the context of the ongoing impact of the COVID-19 pandemic. The expected progress is presented in the performance measure below (see figure 2.X).

Figure 2.X

**Performance measure: annual number of United Nations entities and international organizations that provide information on the Non-Self-Governing Territories**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: diversified and comprehensive information on the Non-Self-Governing Territories, including on the impact of the COVID-19 pandemic

#### Proposed programme plan for 2022

2.108 Annual working papers prepared by the subprogramme inform the deliberations of the Special Committee when it examines the political, economic and social situation in the Non-Self-Governing Territories. The working papers are prepared on the basis of the information provided by administering Powers, pursuant to Article 73 *e* of the Charter, and drawing from all available published and official sources, in line with General Assembly resolutions. This contributes to rich and informed discussions, which form the basis of the Committee's recommendations to the Assembly.

#### *Lessons learned and planned change*

2.109 The lesson for the subprogramme was the importance of digital readiness in supporting the work of the Special Committee. The COVID-19 pandemic resulted in the cancellation of the Committee's seminar and session, which, in turn, prevented the Non-Self-Governing Territories from providing first-hand, up-to-date information on their conditions, including on the decolonization process. This highlighted the need for other diversified and official sources that would best inform the Committee when considering the situation in the Non-Self-Governing Territories. In applying the lesson, the subprogramme will continue to strengthen its technological capabilities by exploring other tools and platforms in obtaining verifiable and official information, in order to enable the Committee to fulfil its mandate effectively.

*Expected progress towards the attainment of the objective, and performance measure*

2.110 This work is expected to contribute to the objective, as demonstrated by the Special Committee having access to a more comprehensive picture of the long-term impact of COVID-19 and assistance provided by the administering Powers to affected Non-Self-Governing Territories, through specific additional information in the working papers (see table 2.10).

Table 2.10

**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
—	—	—	The Special Committee has access to diversified and comprehensive information on the situation in the Non-Self-Governing Territories, including on the impact of COVID-19 and the assistance provided by the administering Powers to affected Territories to reduce the impact of COVID-19 and support the recovery	The Special Committee has access to a more comprehensive picture of the long-term impact of COVID-19 and assistance provided by the administering Powers to affected Non-Self-Governing Territories

**Legislative mandates**

2.111 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolutions*

1514 (XV)	Declaration on the granting of independence to colonial countries and peoples	75/105	Offers by Member States of study and training facilities for inhabitants of Non-Self-Governing Territories
1541 (XV)	Principles which should guide Members in determining whether or not an obligation exists to transmit the information called for under Article 73 <i>e</i> of the Charter	75/106 75/107 75/108	Question of Western Sahara Question of American Samoa Question of Anguilla
75/102	Information from Non-Self-Governing Territories transmitted under Article 73 <i>e</i> of the Charter of the United Nations	75/109 75/110	Question of Bermuda Question of the British Virgin Islands
75/103	Economic and other activities which affect the interests of the peoples of the Non-Self-Governing Territories	75/111 75/112 75/113	Question of the Cayman Islands Question of French Polynesia Question of Guam
75/104	Implementation of the Declaration on the Granting of Independence to Colonial Countries and Peoples by the specialized agencies and the international institutions associated with the United Nations	75/114 75/115 75/116 75/117	Question of Montserrat Question of New Caledonia Question of Pitcairn Question of Saint Helena

75/118	Question of Tokelau	75/122	Implementation of the Declaration on the Granting of Independence to Colonial Countries and Peoples
75/119	Question of the Turks and Caicos Islands		
75/120	Question of the United States Virgin Islands	75/123	Fourth International Decade for the Eradication of Colonialism
75/121	Dissemination of information on decolonization		

*Economic and Social Council resolution*

2021/2	Support to Non-Self-Governing Territories by the specialized agencies and international institutions associated with the United Nations

<sup>a</sup> A dispute exists between the Governments of Argentina and the United Kingdom of Great Britain and Northern Ireland concerning sovereignty over the Falkland Islands (Malvinas).

## Subprogramme 5 Question of Palestine

### Objective

2.113 The objective, to which this subprogramme contributes, is to ensure the effective and efficient implementation of the programme of work of the Committee on the Exercise of the Inalienable Rights of the Palestinian People to promote the realization of the inalienable rights of the Palestinian people.

### Strategy

2.114 To contribute to the objective, the subprogramme will organize Committee and Bureau meetings, events in observance of the International Day of Solidarity with the Palestinian People, and other activities, events and international meetings. In addition, the subprogramme will liaise and cooperate with civil society and parliamentarians. The subprogramme will also develop and expand the digital advocacy of the Committee, including the Committee's website and its social media channels, and the document collection of the United Nations Information System on the Question of Palestine. Lastly, the subprogramme will, in its implementation of the Committee's capacity-building activities, prioritize training in strategic communications and diplomatic protocol.

2.115 The subprogramme plans to support Member States on issues related to COVID-19 by holding public events, live-streamed on United Nations Television and Video and social media channels, that focus on the impact of the COVID-19 pandemic in the Occupied Palestinian Territory and the recovery from it. This would include advocacy to address the lingering effects of the pandemic on the Palestinian population under occupation, especially on ensuring the availability of vaccines and treatments and on reviving economic activity. Among the participants, it is expected that there would be representatives of intergovernmental organizations, Member States, parliaments and civil society.

2.116 The above-mentioned work is expected to result in:

(a) Mobilization of the diplomatic community in support of the realization of the two-State solution and a just, comprehensive and lasting solution to the question of Palestine in all its aspects;

(b) Member States, the media and the public being more informed about the work of the Committee to promote the realization of the inalienable rights of the Palestinian people;

(c) Stronger institutional capacity of the Government of the State of Palestine in areas such as strategic communications and diplomatic protocol training, to contribute to the realization of the legitimate rights of the Palestinian people.

### **Programme performance in 2020**

2.117 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

#### **Expanded reach of advocacy and enhanced awareness-raising of the rights of the Palestinian people during the COVID-19 pandemic**

2.118 The Committee implements its mandate, promoting the realization of the inalienable rights of the Palestinian people, through the holding of in-person events on various aspects of the question of Palestine. The COVID-19 pandemic prevented such activities from being realized throughout most of 2020. The subprogramme adapted by developing logistics and procedures for virtual events. It converted existing formats to virtual platforms, such as the annual United Nations Forum on the Question of Palestine and the United Nations-Organization of Islamic Cooperation International Conference on the Question of Jerusalem, and developed new ones, such as a public engagement of the Committee's Bureau with the Prime Minister of the State of Palestine, an event with Palestinian civil society actors on the impact of the pandemic in the occupied Palestinian territory and a panel discussion with parliamentarians from South Africa, the United States of America and the European Union.

2.119 The subprogramme also engaged and collaborated with the Department for Global Communication to promote and ensure the broadcast of all public Committee meetings and events on United Nations Television and Video and United Nations social media channels.

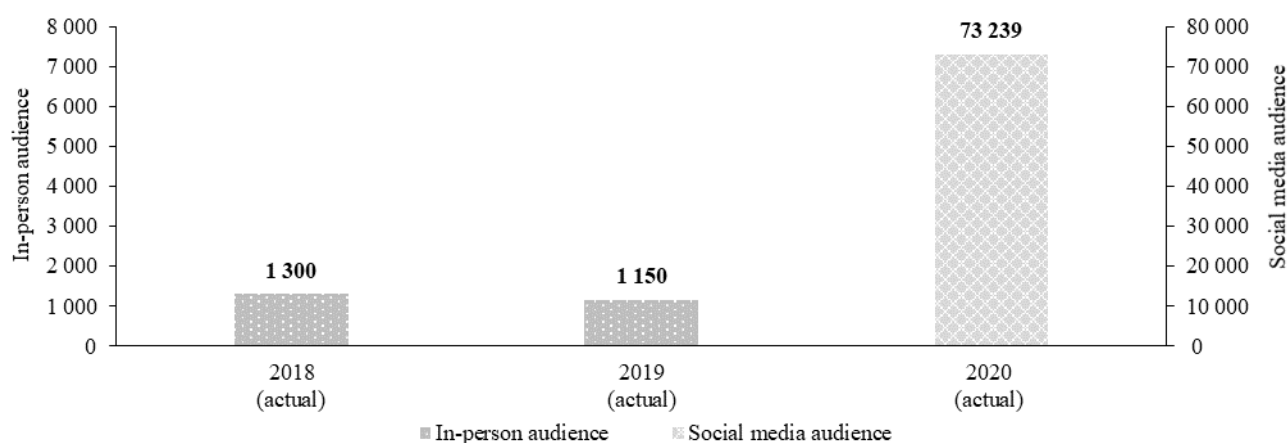

#### *Progress towards the attainment of the objective, and performance measure*

2.120 The above-mentioned work contributed to the objective, as demonstrated by the increased audiences at public Committee meetings and events and the dissemination of Committee messages through key social media multipliers. Historically, in-person meetings have drawn 200 to 400 participants, including a very limited online viewership. In 2020, the conversion to virtual meetings, live-streamed and featured on social media, coupled with robust social media outreach by the subprogramme, resulted in an increasing overall viewership of 850 to 17,500 viewers per meeting. In total, the virtual events reached an audience of 73,239 (see figure 2.XI).

Figure 2.XI

**Performance measure: annual attendance at meetings and events of the Committee on the Exercise of the Inalienable Rights of the Palestinian People**

### Impact of COVID-19 on subprogramme delivery

2.121 Owing to the impact of COVID-19 during 2020, the subprogramme changed its approach and all Committee meetings were convened in a virtual format. All in-person international conferences, delegation visits and capacity-building activities involving travel were cancelled. In their stead, the subprogramme organized two virtual Committee meetings, three virtual Bureau Meetings, one virtual Bureau retreat, six virtual public events (panel discussions) and three virtual capacity-building training sessions. The annual observance of the International Day of Solidarity with the Palestinian People, which included participation by the Secretary-General, the President of the General Assembly and the President of the Security Council, was also done through a virtual format. The cancellation of conferences and delegation visits to Member States had a negative impact on the Committee's ability to reach out to specific countries and regions, as had been planned. Capacity-building for the Palestinian Government on strategic communications had to be postponed because of the clients' request that this be conducted as an in-person, closed-door activity. These changes had an impact on the programme performance in 2020, as specified in result 1 below.

2.122 At the same time, however, the subprogramme identified modified activities to support Member States on issues emerging during the COVID-19 pandemic, within the overall scope of its objectives, namely, the provision of substantive and technical advice to the Committee on raising awareness among Member States and the public on the impact of the pandemic on the Palestinian people under occupation, including through two public virtual events on the impact of the pandemic in the occupied Palestinian territory, statements of the Committee Chair to the Security Council and the annual report of the committee to the General Assembly. The modified deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

### Planned results for 2022

2.123 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### Result 1: enhanced strategic communications capacity of the Palestinian Government<sup>9</sup>

2.124 The subprogramme has implemented an effective English writing course and two leadership courses for staff of the Palestinian Government on leadership in crisis and women's leadership. Owing to the COVID-19 pandemic, the subprogramme reformulated the programme, adapting it to a virtual training format. The subprogramme also continued its evaluation of training, receiving positive evaluations from trainees, notwithstanding the new, unfamiliar format.

2.125 The above-mentioned work contributed to 86 Palestinian government staff who, following the training, will go on to work in the fields related to strategic communications, which met the planned target, reflected in the proposed programme budget for 2020.

#### Proposed programme plan for 2022

2.126 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will facilitate workshops aimed at strengthening the capacity of Palestinian government officials to develop a communications strategy for the State of Palestine. Furthermore, the subprogramme will facilitate communications training for new diplomats and officials in the State of Palestine in 2022. The expected progress is presented in the performance measure below (see table 2.12).

Table 2.12  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Absence of training on strategic communications and international conventions by the subprogramme	Officials participate in training organized by the subprogramme	Additional 86 Palestinian government staff who, following the training, have gone on to work in fields related to strategic communications with stronger, effective English writing skills and stronger communication and leadership skills during crisis situations, such as the COVID-19 pandemic	Evaluation of the effectiveness of the training and a training-of-trainers programme on strategic communications to ensure sustainability and continuity	Palestinian communications strategy developed and approved by the Palestinian Government

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

<sup>9</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 3)).

**Result 2: enhancing the Committee's social media presence<sup>10</sup>****Programme performance in 2020**

2.127 The subprogramme has implemented a social media strategy, as requested by the Committee, including the creation of new content for social media and a historical calendar utilized to provide context to current developments related to the question of Palestine.

2.128 The above-mentioned work contributed to enhanced outreach to new international audiences and an increase in engagement and followers in the social media channels of the Committee in 2020, including harnessing multilingualism on social media, resulting in the increase in the number of Twitter impressions (views) from a low of 10,000 per month early in 2020 to a high of 168,000 per month at the end of 2020, which met the planned target, reflected in the programme budget for 2021.

**Proposed programme plan for 2022**

2.129 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will implement a reformulated social media strategy mobilizing the diplomatic community, influencers and the public, and leveraging new social media platforms. The expected progress is presented in the performance measure below (see table 2.13).

Table 2.13  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Measures to ensure a more robust coverage of the Committee's activities on its social media accounts are implemented, e.g. daily posts on accounts	Improvement in engagement and the reach of the Committee's social media posts by beginning to implement best practices	Enhanced outreach to new international audiences and an increase in engagement and followers in the social media channels of the Committee in 2020, including harnessing multilingualism on social media, resulting in the increase in the number of Twitter impressions (views) from a low of 10,000 per month in early 2020 to a high of 168,000 per month at the end of 2020	Enhanced impact is achieved through the implementation of a reinvigorated communications strategy and the resulting strengthened engagement of the Committee with the general public	Strengthened digital advocacy on the question of Palestine among Committee membership, the diplomatic community and other influencers

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

<sup>10</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

### **Result 3: advancement of the Committee's vision and more effective promotion of the rights of the Palestinian people**

#### **Proposed programme plan for 2022**

2.130 The General Assembly established the Committee in 1975 pursuant to its resolution 3376 (XXX), with a mandate to advise the Assembly on a programme to enable the Palestinian people to exercise their inalienable rights. The Assembly annually renews the Committee mandate and uses the occasion to assess the usefulness and effectiveness of the services that the subprogramme provides as the secretariat of the Committee and on the implementation of the Committee's programme of work. The subprogramme launched the first client survey in 2020 to assess the satisfaction of Committee members and observers with services provided by the secretariat to enable the Committee to implement its mandate effectively and efficiently. The Committee welcomed the opportunity to provide timely feedback on the work of the subprogramme and the support received, and the subprogramme is reviewing the implementation of the recommendations of the survey.

#### *Lessons learned and planned change*

2.131 The lesson for the subprogramme was that there was increased demand to support regular adjustments to the Committee's programme of work in response to evolving developments on the question of Palestine, and to incorporate the views and perspectives of Committee members to enhance the effectiveness of the subprogramme as the Committee secretariat. In applying the lesson, the subprogramme will regularly conduct client surveys to gauge the overall satisfaction of Committee members and generate information and data to assess the alignment of the work with evolving developments, the expectations of the Committee on the question of Palestine and the effectiveness of its support for the Committee, with a view to making timely adjustments to the subprogramme's support and workplan. Furthermore, as the Committee conducts outreach in support of efforts by the international community to resume negotiations on the question of Palestine, the subprogramme aims to increase members' satisfaction with support provided by drawing on survey recommendations about the undertaking of more virtual delegation visits and enable broader participation of civil society organizations in engagement activities through virtual platforms.

#### *Expected progress towards the attainment of the objective, and performance measure*

2.132 This work is expected to contribute to the objective, as demonstrated by more effective promotion of the realization of the inalienable rights of the Palestinian people, and a high level of Committee satisfaction with subprogramme support for the implementation of the programme of work's outreach to Member States (see table 2.14).

Table 2.14

13. Studies and information notes on the Committee and the Division for Palestinian Rights, and selected aspects of the question of Palestine	2	2	2	2
<b>C. Substantive deliverables</b>				
<b>Fact-finding, monitoring and investigation missions:</b> fact-finding/needs assessment mission(s) to the State of Palestine.				
<b>Databases and substantive digital materials:</b> updated and maintained the Division's databases of over 2,000 experts and some 1,500 non-governmental organizations working on the question of Palestine.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> International Day of Solidarity with the Palestinian People and other special events at the discretion of the Committee reaching all Member States and the public at large; annual Palestinian exhibit or cultural event in connection with the International Day of Solidarity at United Nations Headquarters reaching all Member States and the public at large; briefings for United Nations officials, visitors, non-governmental organizations and others; and information-sharing, outreach efforts and participation in meetings of civil society.				
<b>External and media relations:</b> communiqués, press statements, press conferences and other communication materials for the media and other external entities before, during and after the Committee's activities.				
<b>Digital platforms and multimedia content:</b> updated and maintained website of the subprogramme/Committee and its social media accounts.				
<b>Library services:</b> updated and maintained United Nations Information System on the Question of Palestine website for the public at large.				

## Subprogramme 6 Peacebuilding Support Office

### Objective

2.135 The objective, to which this subprogramme contributes, is to strengthen the effective role of the Peacebuilding Commission in bringing attention to peacebuilding needs, convening key actors and proposing peacebuilding strategies; and to strengthen country and region-owned and -led peacebuilding efforts and United Nations system-wide coherence on the ground through the Peacebuilding Fund, and strengthen partnerships with international financial institutions in support of efforts to build and sustain peace.

## Strategy

2.136 To contribute to the objective, the subprogramme will organize visits of the Chair of the Peacebuilding Commission, provide technical and substantive advice in the organization of meetings of the Commission and advance partnerships between the Commission and international financial institutions and regional and subregional organizations, including through dedicated discussions and visits.

2.137 Through the Peacebuilding Fund, an important cross-pillar financing instrument, the subprogramme will also work with and through agencies, funds and programmes, as well as civil society partners in-country and at Headquarters, to support peacebuilding programmes, prioritizing transition contexts, subregional and cross-border contexts and the empowerment of women and young people.

2.138 The subprogramme will also spearhead policy development related to peacebuilding and lead relevant coordination and integration mechanisms within the United Nations system, as well as between the United Nations and the World Bank and other international financial institutions. For example, the subprogramme is going to continue to build on the 2017 United Nations-World Bank Partnership Framework for Crisis-Affected Situations, the joint United Nations-World Bank 2018 study entitled *Pathways for Peace: Inclusive Approaches to Preventing Violent Conflict* and the new World Bank Group Strategy for Fragility, Conflict, and Violence (2020–2025).

2.139 The subprogramme plans to support Member States on issues related to COVID-19, including by providing continued technical and substantive advice in the organization of meetings of the Peacebuilding Commission that address the peacebuilding impact of COVID-19, and through the Peacebuilding Fund, working with agencies, funds and programmes to adjust ongoing programmes and welcoming specific programme proposals to mitigate any continued violent conflict risks from the pandemic and support conflict-sensitive recovery efforts.

2.140 The above-mentioned work is expected to result in:

- (a) A deeper commitment, enhanced partnerships and greater coherence across the United Nations system, with Member States and regional and international partners, including international financial institutions, in support of sustaining peace;
- (b) More synergistic, coordinated and effective support, including through improved joint analysis, planning and programming, to national peacebuilding priorities;
- (c) Improved alignment of policy responses for peacebuilding needs on the ground, with increased involvement of international financial institutions;
- (d) Joint efforts with Member States, regional and international partners, including international financial institutions, prioritizing transition contexts, subregional and cross-border contexts, and women and youth empowerment.

## Programme performance in 2020

2.141 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Expanded geographic scope of engagement to build and sustain peace

2.142 The expanded geographic scope of engagement to build and sustain peace, a trend since 2016, evidences the subprogramme's technical and substantive support for the Peacebuilding Commission, providing an effective forum for countries to discuss their peacebuilding priorities, opportunities and challenges, and the work of the subprogramme in expanding the reach of the Peacebuilding Fund as a tool to build and sustain peace in conflict-affected communities. Notwithstanding significant COVID-related challenges, in respect to the Fund, the subprogramme worked with and through agencies, funds and programmes and civil society partners in-country and at Headquarters to support peacebuilding programmes, keeping pace with its commitments in 2020. The Fund introduced a process for new peacebuilding country-level strategic frameworks at the outset of a new five-year eligibility cycle, which will drive cohesion and establish benchmarks for achieving meaningful results for conflict-affected communities. In 2020, the Fund invested approximately \$30 million in 15 new projects in 10 countries towards climate security. Furthermore, the subprogramme conducted four Fund portfolio evaluations in 2019 (Central African Republic, Côte d'Ivoire, Mali and Somalia) and six in 2020 (Burkina Faso, Guatemala, Kyrgyzstan, Liberia, Madagascar and the Niger).

2.143 For example, the Secretary-General granted eligibility renewal for the Peacebuilding Fund for Somalia. The Peacebuilding Commission, supported by the subprogramme, also renewed its engagement in support of peacebuilding in Somalia. At the request of the Federal Government of Somalia, following the renewal of eligibility to the Fund, the Commission met in December 2020 to discuss the country's peacebuilding priorities and challenges. The Commission discussed the country's national development plan and national reconciliation framework, as well as the Somali women's charter, encouraging progress in anchoring them among Somali stakeholders, and shifting to a long-term perspective on Somalia's peacebuilding and State-building process. The Commission committed itself to helping to mobilize international support for national peacebuilding priorities and to supporting efforts to identify solutions to some of the intractable challenges to peace in Somalia. The Commission expressed its readiness to explore opportunities to support the implementation of the national reconciliation framework, and in that regard emphasized the vital role of women in peacebuilding in Somalia.

#### *Progress towards the attainment of the objective, and performance measure*

2.144 The above-mentioned work contributed to the objective, as demonstrated by Somalia's renewed engagement with the Peacebuilding Commission and approval of eligibility to utilize the Peacebuilding Fund for longer-term peacebuilding efforts in Somalia (see table 2.16).

Table 2.16

eligibility

### **Impact of COVID-19 on subprogramme delivery**

2.145 Owing to the impact of COVID-19 during 2020, the subprogramme changed the approach for organizing Peacebuilding Commission meetings, as well as implementing peacebuilding programmes in various conflict-affected situations. The subprogramme supported the Commission during 2020 by introducing an online forum and adapted country and regional discussions to respond to the impact of COVID-19. During most of 2020, visits of the Chair and other members of the Commission to countries and regions of focus for the Commission were not possible owing to the pandemic. The subprogramme intensified its engagement with the United Nations development system on its socioeconomic response framework for COVID-19 and advocated to ensure that responses were conflict-sensitive and enhanced social cohesion. The Peacebuilding Fund also reacted quickly in response to COVID-19 in 2020, working with resident coordinators, agencies, funds and programmes and other partners to understand emerging risks and opportunities, adjusting ongoing programmes and welcoming specific proposals to mitigate violent conflict risks from the COVID-19 pandemic. Nearly half of all Fund-supported programmes required adjustments, while the Fund received an increasing number of targeted proposals as partners identified new peacebuilding needs to address divisions and tensions fuelled by the pandemic or the economic downturn as a result of confinement measures.

2.146 At the same time, however, the subprogramme modified planned deliverables and identified new activities to support Member States on issues related to the COVID-19 pandemic, within the overall scope of its objectives. For example, the Peacebuilding Fund committed \$3.2 million to fill knowledge gaps on the link between climate change and conflict and to facilitate the joint identification of innovative countermeasures in the low-lying atoll nations of Kiribati, Marshall Islands and Tuvalu. The subprogramme also created a “fast track” of the Humanitarian-Development-Peacebuilding and Partnership facility to support resident coordinators in their engagement on COVID-19 with the World Bank. Requests for up to \$50,000 to fund remote or local consultancies were approved in as little as 24 hours to support alignment of United Nations and World Bank efforts and facilitate conflict-sensitive recovery planning. A first wave of fast-track grants, for example, supported the mapping of risks faced by populations in north and north-east Kenya and in the Diffa and Tillabéri regions of the Niger; conflict-sensitive United Nations-World Bank recovery planning in Sierra Leone; and an assessment of the pandemic’s impact on social cohesion and community acceptance in Togo. In respect of the Peacebuilding Commission, the subprogramme modified planned deliverables to support the Commission in creating space for national and regional leaders, in peacebuilding contexts under its consideration, to share their experiences and seek support for efforts to build back better from the pandemic. Building on a series of engagement on the topic throughout the year in collaboration with the Economic and Social Council and the Security Council, the subprogramme, in collaboration with the Department of Economic and Social Affairs, organized the annual joint Economic and Social Council-Peacebuilding Commission meeting, held on 19 November, on the theme of “Fostering global solidarity and conflict-sensitive responses to COVID-19 and its socio-economic impact”. The event promoted coordinated and coherent action by the international community, with an emphasis on financing for sustainable

development and peacebuilding in conflict-affected countries. Members of the Economic and Social Council and the Commission stressed the need for nationally led and inclusive responses to the pandemic, based on the principle of global solidarity and in recognition of the important role of South-South and triangular cooperation in combatting its impact.

## **Planned results for 2022**

2.147 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: more coherent and inclusive engagement to build and sustain peace<sup>11</sup>**

#### **Programme performance in 2020**

2.148 The subprogramme has continued the work related to peacebuilding and sustaining peace, in line with its mandate, and promoted the enhancement of coordination and coherence on the responses to sustain peace in conflict-affected situations with challenging humanitarian, peace, security and development situations and a large number of operational actors, playing its role as a “hinge” across the United Nations system. This has been achieved through: the technical and substantive advice in the organization of meetings of the Peacebuilding Commission supporting engagements in 15 country- and region-specific contexts, drawing together a range of diverse actors; the work of the Peacebuilding Fund in driving coordination and coherence across United Nations actors; and the subprogramme’s convening of the peacebuilding strategy group (at the Assistant Secretary-General level), comprised of entities from across the United Nations system engaged in peacebuilding, for the purpose of policy coordination, substantive input into the 2020 report of the Secretary-General on peacebuilding and sustaining peace and the 2020 peacebuilding architecture review. Feedback collected from representatives of Member States and other stakeholders who engaged with the Commission in 2020 showed that, with the subprogramme’s support, the Commission had fostered more inclusive and effective responses to peacebuilding challenges in those contexts. Examples include supporting the efforts of Liberia to restore macroeconomic stability and provide a foundation for sustainable growth, in particular in view of the COVID-19 pandemic, and to sustain peace in the context of the constitutional referendum and senatorial elections. The subprogramme also supported the Commission in reviewing its gender strategy and in adopting a strategic action plan on young people and peacebuilding. The subprogramme’s support for a unique form of engagement by the Commission in Colombia with women former combatants and survivors in January 2020 and for an innovative form engagement by the Commission in the Great Lakes region designed by women in the region in June 2020 are examples of successful mainstreaming of gender dimensions of peacebuilding into the Commission’s country-specific and regional activities. The subprogramme identified, invited and supported briefers, including from regional and subregional organizations and international financial institutions, in their attendance at Commission meetings. The subprogramme, in collaboration with the single shared regional political-operational structure, produced political analysis and strategy for programming and Commission meetings. Political analysis and strategy were formulated to facilitate the United Nations system’s and

---

<sup>11</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 3)).

international coherence and leveraged the entire spectrum of United Nations interventions in support of Member States seeking to build or sustain peace.

2.149 The above-mentioned work contributed to a greater proportion of non-United Nations system briefers informing the Peacebuilding Commission (proportion of non-United Nations briefers was approximately 60 per cent of all briefers in 2020, which is a 50 per cent increase compared with 2019), which met the planned target, reflected in the proposed programme budget for 2020.

2.150 The above-mentioned work also contributed to enhanced programming and informed discussions of the Commission through comprehensive political analysis and strategy by the single regional political, operational structure, and the Peacebuilding Fund, working with and through agencies, funds and programmes, invested approximately \$170 million in 39 countries, which met the planned target, reflected in the proposed programme budget for 2020.

### Programme performance plan for 2022

2.151 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will, among other things, provide technical and substantive advice in the organization of meetings of the Peacebuilding Commission, manage the Peacebuilding Fund and support policy coordination, to promote enhanced coordination and coherence of responses to sustain peace in conflict-affected situations with challenging humanitarian, peace, security and development situations and a large number of operational actors. The expected progress is presented in the performance measure below (see table 2.17).

Table 2.17  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Wide array of international actors supporting peacebuilding and sustaining peace efforts, with limited joint analysis, strategy and coherence of engagement; use of political analysis and strategy for programming and Commission meetings that require collaboration but remain distinct	Widening constituency of international actors supporting peacebuilding and sustaining peace efforts, increasingly encompassing civil society organizations and increasingly undertaking joint analysis and coherent action; use of political analysis and strategy for programming and Commission meetings that are produced within the single regional political-operational structure	Greater proportion of non-United Nations system briefers informed the Commission (proportion of non-United Nations briefers was 60 per cent in 2020, which is a 50 per cent increase compared with 2019)  Enhanced programming and informed discussions of the Commission through comprehensive political analysis and strategy by the single regional political operational structure	Comprehensive constituency of international actors supporting peacebuilding and sustaining peace efforts, including in the context of the response to COVID-19, encompassing regional organizations, international financial institutions and civil society organizations with the capacity to gain access to remote areas, informed by joint analysis, strategy and coherent engagement; use of	Comprehensive constituency of international actors supporting peacebuilding and sustaining peace efforts, including in the context of the response to COVID-19, encompassing regional organizations, international financial institutions and civil society organizations with the capacity to gain access to remote areas, informed by joint analysis, strategy and coherent engagement

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
		The Peacebuilding Fund, working with and through agencies, funds and programmes, invested approximately \$170 million in 39 countries	political analysis and strategy for programming and Commission meetings that are produced within the single regional political, operational structure and help to enhance United Nations system and international coherence and to leverage the entire spectrum of United Nations interventions in support of Member States seeking to build or sustain peace	

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: continued attention to and resourcing for electoral and peacebuilding needs amid severe security and humanitarian challenges<sup>12</sup>**

### **Programme performance in 2020**

2.152 In 2020, the Peacebuilding Fund continued to support, through its investment and programmatic guidance (both technical and substantive) to United Nations agencies, funds and programmes, the implementation of the Political Agreement for Peace and Reconciliation (APPR-RCA) between the Government of and 14 rebel groups in the Central African Republic in order to support an environment conducive to the planned electoral process. The formation of the special mixed units battalion of the north-west defence zone, comprised of ex-combatants, was officially completed on 13 May 2020, with a graduation ceremony in the presence of the President. A total of 265 elements of the defence and internal security forces and 355 former elements of armed groups, including 29 women, were trained. Support for partners in the justice and transitional justice sector promoted the adoption and implementation of the justice sector policy for the period 2020–2024, the law on legal aid and the law on the Commission on Truth, Justice, Reparation and Reconciliation. Through the investment and programmatic guidance of the Peacebuilding Fund, a national communication strategy on the Political Agreement was finalized and implemented, in which national radio and television and partner radio stations increased focus on programmes sensitive to peacebuilding and social cohesion, and training for 622 leaders of women's and youth organizations on the content of the Political Agreement was given.

2.153 In addition, the Peacebuilding Commission, guided technically and substantively by the subprogramme, convened several meetings throughout the year on key peacebuilding priorities, namely, increasing international attention on and

<sup>12</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

support for the 2020–2021 elections (advocating for resource needs to be met), the implementation of the National Peacebuilding and Recovery Plan and its rule of law components and supporting coherent action by the international community to meet the country's peacebuilding needs. Those meetings informed the written advice adopted and sent by the Commission to the Security Council ahead of the renewal of the mandate of the United Nations Multidimensional Integrated Stabilization Mission in the Central African Republic with the aim of ensuring continued focus on the country's peacebuilding needs.

2.154 The above-mentioned work contributed to enhanced international attention on and resources in support of the Central African Republic electoral process for 2020–2021, progress by national stakeholders on the Political Agreement to support an environment conducive to the planned electoral process, and informed advice from the Peacebuilding Commission to the Security Council on mission mandate renewal, which met the planned target, reflected in the programme budget for 2021.

### **Proposed programme plan for 2022**

2.155 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will further enhance international attention on and resources in support of the successful conclusion by the Central African Republic of the 2020–2021 electoral process and its aftermath, including through the subprogramme's support for meetings of the Peacebuilding Commission, visits of the Chair, and continued support for the preparation of written advice to the Security Council ahead of the renewal of the mandate of the United Nations Multidimensional Integrated Stabilization Mission in the Central African Republic, as agreed by the Commission. The expected progress is presented in the performance measure below (see table 2.18).

Table 2.18  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Implementation of the National Peacebuilding and Recovery Plan 2017–2021 begins	Enhanced international attention to and resources in support of the peacebuilding priorities of the Central African Republic after the signing of the Political Agreement for Peace and Reconciliation on 6 February 2019	Enhanced international attention to and resources in support of the Central African Republic electoral process for 2020–2021  Progress by national stakeholders on the Political Agreement for Peace and Reconciliation to support an environment conducive to the planned electoral process	Enhanced international attention to and resources in support of the successful conclusion by Central African Republic of the 2020–2021 electoral process	Peacebuilding gains are sustained, the Political Agreement for Peace and Reconciliation is adhered to and progress on achieving the Sustainable Development Goals continues, notwithstanding challenges due to COVID-19

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
		Informed advice from the Peacebuilding Commission to the Security Council on mission mandate renewal		

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: more attention on and resourcing for transition between United Nations configurations amid peacebuilding challenges**

#### **Proposed programme plan for 2022**

2.156 While transitions of special political missions and peacekeeping operations bear opportunities to consolidate peace gains and benefit from shifting aid modalities, they are at higher risk of conflict relapse in countries that have experienced cycles of violence in the past. The Peacebuilding Fund ensures that a large share of its investment supports countries undergoing these transitions, especially when United Nations configurations change, in order to generate momentum for peacebuilding strategies and international support, including through close collaboration with the Peacebuilding Commission and other stakeholders, leading to improved coherence and sequencing of aid instruments. The Fund and attention by the Commission has helped to address transition financing gaps, providing more predictability for partner countries and the United Nations while preparing the ground for longer-term financing to start. The Fund's replenishment conference early in 2021 generated \$439 million in commitments and pledges for the Fund's 2020–2024 strategy, a 25 per cent increase in contributions received compared with the previous three years. A total of 92 Member States were represented at the conference. The Chair of the Commission also engaged with its Organizational Committee to drive contributions from all its members.

#### *Lessons learned and planned change*

2.157 The lesson for the subprogramme was that, while donor contributions to the Peacebuilding Fund for 2020 grew slightly, demand for Fund support continued to grow rapidly. In 2020, the Peacebuilding Support Office revised downward available investment, which resulted in notably fewer resources for important transitions settings such as Guinea-Bissau, Haiti and the Sudan. In applying the lesson, the subprogramme will enhance its fundraising endeavours to ensure additional resourcing of transitions between United Nations configurations, and the subprogramme will highlight the importance of financing for peacebuilding at all appropriate opportunities. The subprogramme will also enhance synergies between the work of the Peacebuilding Commission when discussing transition settings and the work of the Fund, for example, utilizing meetings of the Commission to highlight the work of the Fund and encourage further resourcing in these settings. It will remain important to plan ahead to anticipate funding gaps during transitions through the alignment of the Fund's investment plan in transition settings.

*Expected progress towards the attainment of the objective, and performance measure*

2.158 This work is expected to contribute to the objective, as demonstrated by increased funding for transitions of United Nations configurations, with 25 per cent of Peacebuilding Fund funding dedicated to mission transitions, and enhanced international awareness of mission transition settings, to address financing gaps during transitions, providing more predictability for partner countries and the United Nations while preparing the ground for longer-term financing (see table 2.19).

Table 2.19

**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
—	22 per cent of Peacebuilding Fund funding dedicated to mission transitions	18 per cent of Peacebuilding Fund funding dedicated to mission transitions	25 per cent of Peacebuilding Fund funding dedicated to mission transitions	Increased funding for transitions of United Nations configurations  25 per cent of Peacebuilding Fund funding dedicated to mission transitions  Enhanced international awareness of mission transition settings, to address financing gaps during transitions, providing more predictability for partner countries and the United Nations while preparing the ground for longer-term financing

**Legislative mandates**

2.159 The list below provides all mandates entrusted to the programme.

*General Assembly resolutions*

60/180	The Peacebuilding Commission	72/262 C	Special subjects relating to the programme budget for the biennium 2018–2019
60/287	The Peacebuilding Fund	72/276	Follow-up to the report of the Secretary-General on peacebuilding and sustaining peace
63/282	The Peacebuilding Fund		
70/262	The Review of the Peacebuilding Architecture	75/201	Review of the United Nations peacebuilding architecture
72/199	Restructuring of the United Nations peace and security pillar		

*Security Council resolutions*

1645 (2005)	2282 (2016)
1646 (2005)	2413 (2018)
1947 (2010)	2558 (2020)
2250 (2015)	

**Deliverables**

2.160 Table 2.20 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 2.20

**Subprogramme 6: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>3</b>	<b>3</b>	<b>2</b>	<b>3</b>
1. Report of the Peacebuilding Commission for the General Assembly and the Security Council	1	1	1	1
2. Report of the Secretary-General on the Peacebuilding Fund for the General Assembly	1	1	1	1
3. Report of Secretary-General on peacebuilding and sustaining peace	1	1	–	1
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>55</b>	<b>55</b>	<b>54</b>	<b>55</b>
4. Meetings of the Peacebuilding Commission	50	50	50	50
5. Meetings of the Peacebuilding Commission on the preparations for the 2020 review of the peacebuilding architecture	2	2	–	–
6. Joint meetings of the Peacebuilding Commission with the General Assembly, Security Council and the Economic and Social Council	3	3	4	3
<b>B. Generation and transfer of knowledge</b>				
<b>Seminars, workshops and training events</b> (number of days)	<b>4</b>	<b>4</b>	<b>3</b>	<b>1</b>
7. Induction training of new members of the Peacebuilding Commission	–	–	1	1
8. Regional training to prospective recipients including Ministries and other United Nations stakeholders, on the Peacebuilding Fund as a tool for peacebuilding	4	4	2	1
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> guidance and advice to country-level and regional recipients of funding from the Peacebuilding Fund on priority setting and programming; promotion of partnerships in the form of regular dialogue, operational and strategic cooperation between the United Nations and the World Bank, the International Monetary Fund, and other international financial institutions; promotion of partnerships and exploration of avenues of cooperation with regional and subregional organizations, civil society organizations, think tanks, academia and the private sector on peacebuilding issues; strategic guidance and advice in support of the delivery of the mandate of the Peacebuilding Commission and the formulation and delivery of the priorities and the workplan of the Peacebuilding Commission; information-sharing, guidance and strategic advice to Member States, the United Nations system and key stakeholders on policy issues related to the implementation of the sustaining peace framework; policy support and advice to members of the Peacebuilding Commission and Peacebuilding Fund donors and recipient Governments on peacebuilding and sustaining peace, gender-responsive peacebuilding, and young people and peacebuilding; allocation of more than \$150 million to approximately 40 countries annually to peacebuilding projects from the Peacebuilding Fund; and policy support, advice and technical guidance on young people, peace and security to Member States, the United Nations system and other key stakeholders.				
<b>D. Communication deliverables</b>				
<b>External and media relations:</b> press statement of the Peacebuilding Commission; and 6 partner newsletters.				
<b>Digital platforms and multimedia content:</b> content for the Peacebuilding Commission and Peacebuilding Fund websites and social media platforms; and multimedia content, including short videos and animations highlighting the results and impact on the ground for the website and social media platforms.				

## **Subprogramme 7**

### **Cooperation between the United Nations and the League of Arab States**

#### **Objective**

2.161 The objective, to which this subprogramme contributes, is to strengthen cooperation between the United Nations and the League of Arab States.

#### **Strategy**

2.162 To contribute to the objective, the subprogramme will continue to identify areas of work of joint interest and strengthen relationships with the League of Arab States through the pursuit of the common goals and objectives of it and the United Nations. The subprogramme also plans to revitalize activities affected by the COVID-19 crisis and move forward on expanding the relationship, which will contribute to efforts by Member States to make progress on achieving Sustainable Development Goal 16 and their commitments to building effective, accountable and inclusive institutions at all levels. The subprogramme will continue to promote the Charter of the United Nations, in particular Chapter VIII. In addition, the subprogramme will work to deliver capacity-building exercises and staff exchanges and increase channels of communication.

2.163 The above-mentioned work is expected to result in:

- (a) Enhanced partnership and expanded outreach with the League of Arab States in the area of international peace and security, including conflict prevention, peacemaking and peacebuilding;
- (b) Improved capacity of the League of Arab States on conflict prevention, peacemaking and peacebuilding, upon request;
- (c) Improved coordination with the League of Arab States on cooperation activities.

#### **Programme performance in 2020**

2.164 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

##### **Safeguarding diplomatic engagement on peace and security during the COVID-19 pandemic**

2.165 The subprogramme continued to build relationships with the League of Arab States, most notably through virtual meetings held with the International Organizations Department of the League. In addition, the subprogramme successfully arranged contact between the League of Arab States and United Nations senior officials on a number of topics, including regional peace and security mandates, such as with respect to Lebanon, Libya, the Syrian Arab Republic and the Middle East peace process. The subprogramme co-hosted the multidimensional poverty meeting between the United Nations and the League of Arab States in January 2020.

##### *Progress towards the attainment of the objective, and performance measure*

2.166 The above-mentioned work contributed to the objective, as demonstrated by the agreement between the United Nations and the League of Arab States to establish a follow-up committee to map ongoing efforts by the various entities towards

eradicating multidimensional poverty, assess status and track progress, including through continued work on the Arab strategic framework for the eradication of multidimensional poverty (see table 2.21).

Table 2.21

**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>
—	—	United Nations and League of Arab States agree to establish a follow-up committee to map ongoing efforts by various entities towards eradicating multidimensional poverty, assess status and track progress, including through continued work on the Arab strategic framework for the eradication of multidimensional poverty

**Impact of COVID-19 on subprogramme delivery**

2.167 Owing to the impact of COVID-19 during 2020, the subprogramme made the transition from in-person to virtual contact. The Head of the United Nations liaison office to the League of Arab States could not attend the League's Ministerial Council as an observer (in accordance with usual practice) because it was a closed virtual meeting. Significantly, the United Nations-League of Arab States biennial general cooperation meeting was postponed to 2021, and, with the exception of the sectoral meeting on multidimensional poverty that was held in January 2020, substantive staff exchanges between the United Nations and the League of Arab States and a workshop on crisis management were postponed. These changes had an impact on the programme performance in 2020, as specified in result 1 below.

**Planned results for 2022**

2.168 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

**Result 1: opening of the liaison office and enhancing engagement activities<sup>13</sup>****Programme performance in 2020**

2.169 The subprogramme held in-person introductory meetings with relevant departments and directorates of the League of Arab States with direct bearing on both political and peacebuilding affairs and peacekeeping, to gain a broader understanding of the work of the League. The subprogramme held meetings with representatives of the permanent missions to the League of Arab States in Cairo. The Head of the United Nations liaison office to the League of Arab States built a stakeholder network to enhance cooperation between the United Nations and the League. The Head of the liaison office also facilitated several meetings for Special Representatives and Special Envoys of the Secretary-General with the League of Arab States, contributing directly to United Nations-League of Arab States cooperation on special political missions. Furthermore, the subprogramme provided coordination between United Nations entities

<sup>13</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 3)).

undertaking projects and the League of Arab States and contributed to planning exercises with United Nations agencies, funds and programmes, which resulted in more coherent United Nations engagement and a better understanding of the range of cooperation activities between the Organization and the League of Arab States.

2.170 The above-mentioned work contributed to deepened strategic ties between the United Nations and the League of Arab States, which met the planned target, reflected in the proposed programme budget for 2020.

2.171 In addition, the above-mentioned work also contributed to limited capacity-building activities, such as a staff exchange on disarmament, which did not meet the target of building of capacity towards the objectives of early action on preventing violent conflict, support for national and regional capacities for facilitation and dialogue, and easy and rapid deployability of United Nations good offices, reflected in the proposed programme budget for 2020. Owing in large part to COVID-19, capacity-building activities were also postponed.

### Proposed programme plan for 2022

2.172 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will strengthen existing communications, hold several interdepartmental meetings, provide capacity-building and staff exchanges, and build on high-level engagement, especially in the area of peace and security through existing special political missions in the region. The expected progress is presented in the performance measure below (see table 2.22).

Table 2.22

### Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
The United Nations and the League of Arab States agree to establish a liaison office	The liaison office is established and there are improved consultations and information-sharing between the United Nations and the League of Arab States	<p>Deepened strategic ties between the United Nations and the League of Arab States</p> <p>Meetings of Special Representatives and Special Envoys of the Secretary-General with the League of Arab States, contributing directly to the United Nations-League of Arab States cooperation on special political missions</p> <p>Staff exchange on disarmament</p>	Implementation of first initiatives in the areas of deepening of strategic dialogue, conduct of joint analysis, building of capacity towards the objectives of early action on preventing conflict, support for national and regional capacities for facilitation and dialogue, and easy and rapid deployability of United Nations good offices	Strengthened institutional relations and cooperation between the United Nations and the League of Arab States, especially in the area of peace and security, through existing special political missions in the region

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

**Result 2: enhanced peace and security cooperation<sup>14</sup>****Programme performance in 2020**

2.173 The Secretary-General made cooperation with regional organizations to prevent conflict and sustain peace a priority. Enhanced peace and security cooperation between the United Nations and the League of Arab States remained a priority for the efforts of the Department of Political and Peacebuilding Affairs to strengthen collaboration with regional and subregional organizations. The United Nations and the League of Arab States collaborated on addressing global and regional challenges by deepening strategic dialogue, including through the retreat of the Secretary-General for regional organizations and attendance of the League of Arab States at several Security Council meetings. The liaison office facilitated dialogue and served as an institutionalized dialogue mechanism between the United Nations and the League of Arab States in pursuit of the common goals and objectives of the two organizations. It assisted in organizing and conducting joint workshops, meetings, seminars and training activities. It worked with League of Arab States counterparts to identify potential areas of support from the United Nations for capacity development and exchange of expertise and best practices.

2.174 The above-mentioned work contributed to a strengthened relationship and a common approach to issues and increased high-level engagement, which met the planned target, reflected in the programme budget for 2021.

**Proposed programme plan for 2022**

2.175 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will enhance cooperation in accordance with the two organizations' priorities to develop collaborative activities in the form of meetings between the two organizations, consultations, training programmes and workshops, representation, liaison, staff exchanges, joint programmes and support for the aims of the Security Council in increasing engagement with the League of Arab States, including through a desk-to-desk dialogue. The expected progress is presented in the performance measure below (see table 2.23).

Table 2.23

**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
General Assembly establishes liaison presence	Opening and staffing of the United Nations liaison office to the League of Arab States	Strengthened relationship and a common approach to issues and increased high-level engagement	Implementation of first initiatives in the areas of deepening of strategic dialogue, conduct of joint analysis, building of capacity towards the objectives of early action on preventing violent conflict, support for national and regional capacities for facilitation and	Strengthened institutionalization of dialogue between the United Nations and the League of Arab States in pursuit of the common goals and objectives of the two organizations
General cooperation meeting held				

<sup>14</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
			dialogue, and easy and rapid deployability of United Nations good offices	Deepening of exchanges that leverage institutional knowledge of the two organizations

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: advancement of the women and peace and security agenda and strengthened institutional relations**

#### **Proposed programme plan for 2022**

2.176 Advancing the women and peace and security agenda draws on key elements and priority actions of the subprogramme and is a way of providing resources to build the foundation for the establishment of a stronger and more effective network of women peacemakers and peacebuilders in the region. The President of the Security Council, in a statement dated 29 January 2021 ([S/PRST/2021/2](#)), welcomed the efforts of the League of Arab States to implement resolution [1325 \(2000\)](#) and relevant subsequent resolutions, including through the development of a regional action plan for women and peace, and security, and encouraged the United Nations and the League to further promote the implementation of the women and peace and security agenda.

#### *Lessons learned and planned change*

2.177 The main lesson for the subprogramme was that, owing to COVID-19, it could not rely solely on in-person engagements and that it should continue to strengthen virtual and alternative modalities for engagement while simultaneously pursuing meetings in-person, where necessary. In applying the lesson, the subprogramme will undertake more advance planning on meeting modalities to strengthen and enhance the bilateral relationship. For example, the subprogramme and the special political missions, and in consultation with the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women), will offer workshops, with flexible delivery modalities, based on the experience and work of the United Nations on the women and peace and security agenda in the Arab region in the context of special political missions. In addition, the subprogramme will continue to build on the successful linkages with the United Nations and the League of Arab States to strengthen consultations and collaboration between the League and special political missions with a view to enhancing the inclusion of the women and peace and security agenda into their work, including by increasing the meaningful and effective participation of women in peacemaking, peacebuilding and conflict prevention.

#### *Expected progress towards the attainment of the objective, and performance measure*

2.178 This work is expected to contribute to the objective, as demonstrated by improved regional capacities for women's meaningful and effective participation in peacemaking, peacebuilding and conflict prevention in the Arab region (see table 2.24).

Table 2.24

**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
—	—	—	Enhanced stakeholder awareness and understanding of the women and peace and security agenda through engagement with special political missions in the Arab region	Improved regional capacities for women's effective and meaningful participation in peacemaking, peacebuilding and conflict prevention in the Arab region

## Office of the United Nations Special Coordinator for the Middle East Peace Process

### Overall orientation

#### Mandates and background

2.181 The Office of the United Nations Special Coordinator for the Middle East Peace Process is responsible for serving as the Organization's focal point for the Middle East peace process, for ensuring the coordinated work of the United Nations system for an adequate response to the needs of the Palestinian people and for mobilizing financial, technical and economic assistance. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including Assembly resolutions [48/213](#) and [49/88](#) and Security Council resolutions [1860 \(2009\)](#) and [2334 \(2016\)](#). The unresolved Israeli-Palestinian conflict adds to the prevalent instability in the Middle East and continues to threaten international peace and security. As violence and tensions continue to simmer in Gaza and the rest of the Occupied Palestinian Territory, the Office continues to engage diplomatically to mitigate tangible security threats and prevent armed conflict, address the humanitarian and development challenges and engage the parties and the international community with a view to making political progress towards a two-State solution.

### Programme of work

#### Objective

2.182 The objective, to which the Office contributes, is to achieve a comprehensive, just and lasting resolution to the Israeli-Palestinian conflict based on the two-State solution and to improve the socioeconomic conditions of the Palestinian people.

#### Strategy

2.183 To contribute to the objective, the Office will intensify engagement with regional and international actors, including through the Middle East Quartet. It will also increase its engagement with the parties to take specific steps to improve their economic relations, to facilitate critical infrastructure and assistance projects on the ground and avoid unilateral actions that could undermine the resumption of negotiations. The Office will also continue its preventive diplomacy efforts, in particular in Gaza. It will continue to urge the parties to uphold their obligations under United Nations resolutions and international law, including reporting to the Security Council on resolution [2334 \(2016\)](#), in which the Council called for the cessation of all settlement-related activities by Israel. The Office will also continue to advocate improved relations between Israel and the Palestinian Authority with respect to economic cooperation and policy changes in Area C of the occupied West Bank. The Office will further engage all parties to reduce movement and access restrictions to Gaza and work with political, religious and community leaders to prevent violence, incitement to violence and other provocative actions and rhetoric on the ground.

2.184 The Office will support efforts to re-establish Palestinian national unity and encourage Palestinian parties to overcome outstanding differences in line with Egyptian-led intra-Palestinian reconciliation efforts. The Office will support the Palestinian Authority in advancing its State-building agenda and strengthening its institutions, including the Palestinian Legislative Council, its economy and public

service delivery. The Office will also encourage both the Government of Israel and the Palestinian Authority to update their economic relations. The Office will continue to coordinate the delivery of assistance programmes that respond to short-, medium- and long-term development needs in the West Bank and Gaza. The Office will also continue to engage with relevant international and regional development institutions to coordinate fundraising and priority-setting, and improve humanitarian and economic conditions, including through interventions endorsed by the Ad Hoc Liaison Committee for the Coordination of the International Assistance to Palestinians.

2.185 For 2022, the Office's planned deliverables and activities reflect the known and anticipated challenges related to COVID-19 that are being faced by Member States. Such planned deliverables and activities include working with the Palestinian and Israeli authorities, the United Nations country team, international partners, civil society and all relevant interlocutors to support the recovery from the socioeconomic consequences of COVID-19 in the West Bank and Gaza, including through strengthening health systems, improving social protection and supporting small- and medium-sized enterprises.

2.186 The above-mentioned work is expected to result in:

- (a) Advancing meaningful negotiations aimed at resolving the Israeli-Palestinian conflict on the basis of the two-State solution and internationally recognized parameters on the final status issues;
- (b) Preventing armed conflict and the continued implementation of a comprehensive conflict prevention package;
- (c) Easing the impact of the closures of Gaza on its inhabitants;
- (d) Reducing future Palestinian humanitarian needs and accelerating sustainable development outcomes, including the recovery from COVID-19;
- (e) Advancing intra-Palestinian reconciliation and reuniting Gaza and the occupied West Bank under a single, legitimate and democratic Palestinian national authority;
- (f) Advancing effective Palestinian governance based on the rule of law, notwithstanding political and fiscal constraints.

### **External factors for 2022**

2.187 With regard to the external factors, the overall plan for 2022 is based on the following planning assumptions:

- (a) The two-State solution remains viable, in line with relevant United Nations resolutions and bilateral agreements;
- (b) All parties retain the political will to maintain a ceasefire in Gaza and support de-escalation efforts led by the Office;
- (c) Israeli and Palestinian interlocutors and regional and international stakeholders continue to engage in meaningful dialogue and cooperation with the Office and the United Nations country team in the performance of their functions;
- (d) There is adequate political support from Member States and financial support from donors;
- (e) The security situation in the area is favourable, including in Gaza, to allow for the implementation of humanitarian and development programmes;

(f) There is positive progress towards Palestinian national unity and reconciliation;

(g) The parties begin to take tangible steps to improve the situation on the ground, as outlined in the recommendations of the Quartet report of 1 July 2016 (S/2016/595, annex).

2.188 With regard to the COVID-19 pandemic, the programme plan is based on the assumption that the proposed deliverables and activities for 2022 will be feasible to implement. However, if the pandemic were to further have an impact on the planned deliverables and activities, they would be adjusted during 2022 within the scope of the overall objectives, strategies and mandates. Any such adjustments would be reported as part of the programme performance information.

2.189 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, the Office continues to strive to engage more systemically with women and youth groups in its outreach to civil society, in order to support the integration of a gender perspective in peacebuilding and development efforts at the grassroots level and in support of the implementation of Security Council resolution 1325 (2000). The Office encourages and supports greater membership, contribution and participation of women in Palestinian institutions.

2.190 With regard to cooperation with other entities at the global, regional, national and local levels, as the only Quartet envoy based on the ground, the Special Coordinator represents the Secretary-General in the Quartet, promoting greater information-sharing and coordination among international and regional partners. The Office will continue to promote the Quartet's role in helping to re-establish meaningful negotiations on final status issues, in line with relevant United Nations resolutions and bilateral agreements. The Office will remain an active participant in the Ad Hoc Liaison Committee and will continue to coordinate with other Committee members, including the International Monetary Fund and the World Bank, to ensure the efficacy of the forum in recommending tangible actions to both parties. Lastly, the Office will strive to maintain the multilateral cooperation established with other international partners in its coordination of the response to the COVID-19 pandemic in the West Bank and Gaza.

2.191 With regard to inter-agency coordination and liaison, the Office leads the coordination of the more than 20 United Nations resident and non-resident agencies, funds and programmes in responding to the development and humanitarian needs of the Palestinian people. This leading role encompasses facilitating inter-agency collaboration to maximize impact through meetings of the United Nations country team, identifying opportunities for joint programming and actively promoting and participating in sectoral and thematic working groups. The Office coordinates with regional United Nations entities, for example, the regional Development Coordination Office, the regional offices of United Nations agencies, funds, and programmes, and the Economic and Social Commission for Western Asia, to leverage available expertise and identify opportunities for collaboration.

## **Evaluation activities**

2.192 A self-evaluation to assess the effectiveness and relevance of the Office's consultations with the relevant parties in its efforts to establish an environment conducive to the return to negotiations to resolve the Israeli-Palestinian conflict, including the associated management controls, is planned for 2022.

## Programme performance in 2020

2.193 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Reduced humanitarian and socioeconomic impact of the COVID-19 pandemic in the Occupied Palestinian Territory**

2.194 The COVID-19 pandemic created a public health emergency for Palestinians, which resulted in a sharp erosion in their humanitarian and development situations. This emergency was further compounded by a breakdown in Israeli-Palestinian coordination from May through November 2020, which threatened both the viability of Palestinian institutions and the progress on socioeconomic development achieved in the past two decades. The Office worked intensively to create the conditions necessary for an effective international and national response to the pandemic.

2.195 The Office also met continuously with Palestinian and Israeli authorities to facilitate deliveries of medical and humanitarian items to Gaza and the West Bank, including with the relevant authorities in Gaza, to strengthen the Palestinian Government's overall response to the pandemic. During the halt in Israeli and Palestinian coordination from May to November 2020, efforts intensified as the Office helped the United Nations country team to assume responsibility for facilitating the importation of critical health and humanitarian items into the Occupied Palestinian Territory, as well as for processing patient referrals out of Gaza. The Office, through the Special Coordinator and Deputy Special Coordinator, also met regularly with and briefed donors in order to mobilize emergency support. Through its good offices and consultations with regional and local actors, the Office advocated the resumption of coordination between Israel and the Palestinian Authority in private meetings, public statements and written reports. For example, the need for the resumption of coordination was a key message of the report submitted to the Ad Hoc Liaison Committee in June 2020 and of the socioeconomic report issued in November 2020. The Office also worked to maintain calm in Gaza. Both the resumption of coordination and calm in Gaza were necessary conditions for effectively addressing the pandemic and its socioeconomic impact. The Office also reoriented its analytic reports to the Ad Hoc Liaison Committee and quarterly socioeconomic reports to include the socioeconomic impact of COVID-19 on the State of Palestine. Those reports provided the United Nations and its national, regional and international partners with detailed and precise policy options for responding to the emergency.

### *Progress towards the attainment of the objective, and performance measure*

2.196 The above-mentioned work contributed to the objective, as demonstrated by the increase in the number of truckloads of humanitarian deliveries into Gaza. In 2020, these included medical supplies of more than 171,000 COVID-19 polymerase chain reaction tests; approximately 7 million infection protection and control items; 95 ventilators; 40 oxygen concentrators; 75 patient monitors; and 37 intensive care unit beds and 86 other patient beds, distributed across both the West Bank, including East Jerusalem, and Gaza (see figure 2.XII). The Office's contribution toward its objectives was also evidenced by the resumption of coordination between Israel and the State of Palestine and the subsequent transfer of \$1.1 billion in revenue to the Palestinian Authority in December 2020, compared with none during the period from May to November 2020, which have and will continue to improve the Palestinian public health response to COVID-19 and accelerate the socioeconomic recovery across the Occupied Palestinian Territory.

Figure 2.XII

**Performance measure: humanitarian deliveries (number of truckloads) into Gaza (annual)**

### **Impact of COVID-19 on programme delivery**

2.197 During 2020, the COVID-19 pandemic had an impact on the planned deliverables and activities of the Office. The Special Coordinator was unable to engage in face-to-face discussions with fellow members of the Middle East Quartet and other regional and international partners, including for the Ad Hoc Liaison Committee, which moved to a virtual format. While the Office could not conduct in person two planned civil society workshops focused on peacebuilding, the workshops were held virtually. Moreover, the Office's planned social media campaign had to be suspended owing to the shift in focus from political to health and COVID-19-related matters. Overall, owing to the changing circumstances resulting from COVID-19, in-person political outreach and coordination were drastically scaled down and engagement was conducted predominantly by telephone or by virtual means. Given the complexity of much of the subject matters discussed with interlocutors, changing to a virtual format presented numerous challenges. The Office's role in coordinating the delivery of assistance and critical support to the Palestinian people and Palestinian authorities increased significantly. The assistance included mobilizing international and donor support to respond to the pandemic; negotiating continued access to the West Bank and Gaza; ensuring coordination between Israeli and Palestinian authorities and international agencies to support COVID-19 response measures; and supporting the Palestinian Government in mitigating and recovering from the longer-term socioeconomic impacts. To these ends, the Special Coordinator and Deputy Special Coordinator have continuously engaged virtually with donors and with the relevant Israeli and Palestinian authorities, including in person when conditions permitted. The Deputy Special Coordinator chaired weekly COVID-19 task force meetings, met with partners and donors multiple times per month and worked directly with the Palestinian Prime Minister's Office on the integrated response.

2.198 At the same time, however, the Office identified modified activities, within the overall scope of the objectives of the programme, on issues related to the COVID-19 pandemic. Reflecting the acute emergency, the Office modified its quarterly socioeconomic reports and its biannual reports to the Ad Hoc Liaison Committee to focus on the socioeconomic impact of the pandemic, and increased its meetings, donor outreach and coordination with the parties. The modified deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

2.199 Reflecting the importance of continuous improvement and responding to evolving needs of Member States, the Office will mainstream lessons learned and best practices related to the adjustments and adaptation of its programme owing to the COVID-19 pandemic. One such lesson learned was the challenges of holding virtual meetings. While the reach of meetings and number of participants could increase owing to the use of videoconferencing technology, that advantage was offset by more limited confidentiality, a lack of critical networking opportunities for participants, and

the absence of side conversations that further advance common positions. Meetings often required for delicate and complex discussions were done virtually, which were not favoured by many interlocutors in the Occupied Palestinian Territory, especially in Gaza. These challenges persist for delivering training or capacity-building, where civil society actors are sometimes less inclined to participate fully through virtual modalities. In applying the lesson, the Office will carefully assess the merits of virtual technology for specific planned activities, including hybrid delivery to leverage reach while maintaining advantages of in-person engagement.

## **Planned results for 2022**

2.200 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: improving the situation in Gaza and advancing peace efforts<sup>15</sup>**

#### **Programme performance in 2020**

2.201 The Office focused on improving the situation on the ground in Gaza and contributed to preserving a political horizon to end the Israeli-Palestinian conflict on the basis of a two-State solution. The Special Coordinator repeatedly used his good offices role to de-escalate tensions between armed groups in Gaza and Israel. The Office also supported de-escalation efforts through coordination of expanded efforts by the United Nations country team to deliver a package of critical humanitarian and economic interventions for Gaza endorsed by the Ad Hoc Liaison Committee. Furthermore, the Office, with its partners, intensified efforts to fundraise more effectively by demonstrating the link between investment in humanitarian and development interventions and sustainable long-term results. Lastly, the Office enhanced the project management capacity of the United Nations in Gaza by providing expertise dedicated to unblocking political barriers, including the easing of movement and access restrictions.

2.202 The above-mentioned work contributed to the increase in the regular availability of electricity in Gaza from an average of 8 hours per day in 2019 to an average of 12.67 hours per day in 2020, which met the planned target of an increase in the availability of electricity in Gaza, reflected in the proposed programme budget for 2020.

2.203 The above-mentioned work also contributed to the de-escalation of tensions on several occasions and the prevention of a major outbreak of hostilities between Israel and armed groups in Gaza, while allowing for a return to calm understanding between the parties, which did not meet the target of a full return to the 2014 ceasefire arrangements between Israel and Gaza, reflected in the proposed programme budget for 2020. The planned 2020 target could not be met because the challenging dynamics that characterized the political environment did not provide an environment conducive to the return to the 2014 ceasefire arrangements, including the persistent lack of intra-Palestinian unity and measures imposed by the Palestinian Authority on Gaza, the enduring closure regime imposed by Israel on Gaza, the humanitarian situation and continued militant activity, and the energy supply remaining inadequate.

#### **Proposed programme plan for 2022**

2.204 The Office will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards this objective, the Office will

---

<sup>15</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 3)).

continue to engage with all sides to return to the 2014 ceasefire arrangements, alleviate the suffering of the population in Gaza, protect civilians and accelerate socioeconomic recovery. The expected progress is presented in the performance measure below (see table 2.26).

Table 2.26  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Availability of electricity in Gaza for 7.3 hours per day on average; and no formal understanding reached on improving the situation in Gaza and preventing an escalation between Israel and Gaza	Increase in the availability of electricity in Gaza; and advancement of discussions with all concerned parties to return to the 2014 ceasefire arrangements between Israel and Gaza	Increase in the availability of electricity in Gaza to an average of 12.67 hours per day, de-escalation of tensions on several occasions, and prevention of a major outbreak of hostilities between Israel and armed groups in Gaza, while allowing a return to calm understanding between the parties	Consistent power supply for more than 8 hours per day; and maintenance of the 2014 ceasefire arrangements between Israel and Gaza	Consistent power supply for more than 15 hours per day; and maintenance of the 2014 ceasefire arrangements between Israel and Gaza

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: establish an environment conducive to the return to negotiations to resolve the Israeli-Palestinian conflict<sup>16</sup>**

### **Programme performance in 2020**

2.205 The Office has carried out good offices work on behalf of the Secretary-General, including to prevent a broad escalation of conflict between Israel and armed groups in Gaza and maintain relative stability in Gaza. The Office engaged with the Palestinian Authority, Israel and key international partners to implement a package of critical humanitarian and economic interventions for Gaza endorsed by the Ad Hoc Liaison Committee.

2.206 The Office also supported intra-Palestinian reconciliation and continued to work to deliver its programmes throughout the Occupied Palestinian Territory, including the provision of technical assistance to the Palestinian Central Elections Commission. Furthermore, the Office continued to underscore that the continuing policy of settlement construction and expansion, the demolition and seizure of Palestinian-owned structures, continued violence, incitement and militant activity served only to impede efforts to achieve a negotiated solution to the conflict.

2.207 The above-mentioned work contributed to the preparedness of the Central Elections Commission for the Palestinian elections, which met the planned target, reflected in the programme budget for 2021.

<sup>16</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

2.208 The above-mentioned work also contributed to limiting the growth in the average unemployment rate in Gaza to 46.6 per cent in 2020, which did not meet the target to keep the unemployment rate in Gaza below 45 per cent, reflected in the programme budget for 2021. The planned 2020 target could not be met owing primarily to the economic impact of the COVID-19 pandemic and the resulting public health restrictions, including on economic activity. Additional results on the ceasefire and electricity are reflected under result 1 above.

### Proposed programme plan for 2022

2.209 The Office will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the Office will engage with a wide range of interlocutors, including civil society, the Middle East Quartet and at the international and regional level, to urge Israeli and Palestinian leaders to take concrete steps to create the conditions for the resumption of negotiations that will end the conflict and resolve all final status issues; strengthen its advocacy in support of the launching of negotiations between the parties to resolve the conflict; and increase the visibility of its activities. The expected progress is presented in the performance measure below (see table 2.27).

Table 2.27  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
		Central Elections Commission is prepared for the Palestinian elections	Palestinian legislative and presidential elections take place	Palestinian Legislative Council and the President exercise their functions in line with their mandates
			Reunification of Gaza and the West Bank	Gaza and the West Bank unification is strengthened under a single, democratic, national government
Unemployment rate in Gaza at 52 per cent	Unemployment rate in Gaza at 46 per cent	Unemployment rate in Gaza at 46.6 per cent	Unemployment rate in Gaza below 42 per cent	Unemployment rate in Gaza below 42 per cent

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: revitalization of the broader peace process and strengthening the Palestinian State-building agenda

#### Proposed programme plan for 2022

2.210 The Israeli-Palestinian political context continues to evolve amid significant regional and international developments, some of which may positively influence the prospects for establishing a two-State solution and ending the occupation that started in 1967. The Office has been actively engaged in pursuit of these objectives through the Special Coordinator's efforts to reinvigorate the Middle East Quartet and support Palestinian State-building efforts, its institutions and economy, notwithstanding

severe political and fiscal challenges. This has included, among other things, increasing the frequency of virtual Quartet envoy meetings and efforts to establish a meaningful dialogue between Israelis, Palestinians and regional partners.

*Lessons learned and planned change*

2.211 The lesson for the Office was that the Office must remain strongly engaged in Middle East Quartet efforts to facilitate negotiations, including by adjusting to the evolving regional developments. In applying the lesson, the Office will enhance its engagement with Quartet members and key regional partners, including through virtual and in-person meetings, and promote proposals that stimulate progress towards the goal of a negotiated resolution of the conflict. In support of the Palestinian State-building agenda, the Office will continue to deliver its programmes throughout the Occupied Palestinian Territory, through its engagement with the donor community, the Palestinian Authority, the Government of Israel, the international community and local authorities, as well as civil society. Furthermore, the Office will continue to engage with Israeli, Palestinian and international actors on ways to mitigate the impact of the COVID-19 crisis on Palestinian households and accelerate the socioeconomic recovery.

*Expected progress towards the attainment of the objective, and performance measure*

2.212 This work is expected to contribute to the objective, as demonstrated by joint proposals from the Quartet and the formulation of strategies, together with Arab and international partners, in conjunction with the parties, aimed at establishing a meaningful political process that will achieve a negotiated two-State solution based on United Nations resolutions, international law and prior agreements (see table 2.28).

Table 2.28

**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
—	—	Envoys of the Middle East Quartet explore the possibilities of advancing Israeli-Palestinian peace and discussing the most recent developments on the ground	Envoys of the Middle East Quartet and Arab and international partners identify concrete steps to address socioeconomic challenges and bring the parties back to the path of meaningful negotiations	Formulation of joint proposals from the Quartet and the formulation of strategies, together with Arab and international partners, in conjunction with the parties, aimed at establishing a meaningful political process that will achieve a negotiated two-State solution

**Legislative mandates**

2.213 The list below provides all mandates entrusted to the programme.

*General Assembly resolutions and decisions*

<a href="#">48/213</a>	Assistance to the Palestinian people	<a href="#">75/24</a>	The Syrian Golan
<a href="#">49/88</a>	Middle East peace process	<a href="#">75/99</a>	The occupied Syrian Golan
<a href="#">75/22</a>	Peaceful settlement of the question of Palestine	<a href="#">75/126</a>	Assistance to the Palestinian people

#### D. Communication deliverables

**Outreach programmes, special events and information materials:** facilitation of the exchange of information and developing partnerships with 80 civil society organizations, as well as academic institutions and non-governmental organizations, and further outreach to civil society organizations in Israel and the Occupied Palestinian Territory to enhance their interaction with and understanding of the Office's vision and activities.

**External and media relations:** maintenance of a database of more than 1,100 subscribers, in addition to some 150 local, regional and international media outlets (more than 500 media personnel); press conferences in the presence of 35 key international media outlets (television, radio and print); and online public statements and press releases (UNSCO website and social media platforms) and dissemination to more than 1,500 individuals, including diplomatic missions, civil society organizations, think tanks and media personnel.

**Digital platforms and multimedia content:** up-to-date content for the Office's website, intranet and social media platforms, including an organizational Twitter account and a Special Coordinator Twitter account, which contain all publications and serve as key platforms for receiving and disseminating information for internal/external stakeholders, including the interested public and partners.

## United Nations Register of Damage Caused by the Construction of the Wall in the Occupied Palestinian Territory

### Overall orientation

#### Mandates and background

2.215 The United Nations Register of Damage Caused by the Construction of the Wall in the Occupied Palestinian Territory is responsible for recording, in documentary form, the damage caused to all natural and legal persons concerned as a result of the construction of the wall by Israel in the Occupied Palestinian Territory, including in and around East Jerusalem. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolution [ES-10/17](#).

2.216 Since 2008, when the Office of the Register of Damage became operational and commenced outreach and claim intake in the Occupied Palestinian Territory, work has been completed in 267 of 271 communities located along the completed constructed section of the wall, touching the lives of more than 1.5 million Palestinians in the West Bank, and work is in progress in the remaining communities. More than two terabytes of impartial and verified information documents the material losses sustained by the Palestinian people. Once completed, the Register of Damage may serve as a catalyst in support of the Israeli-Palestinian peace process.

### Programme of work

#### Objective

2.217 The objective, to which the Office of the Register of Damage contributes, is to establish and maintain a Register of Damage Caused by the Construction of the Wall in the Occupied Palestinian Territory, thus contributing to the protection of the legal rights of the Palestinian people affected by the construction of the wall.

## Strategy

2.218 To contribute to the objective, the Office will focus on the processing and review of the previously collected but not processed claims, of which there are more than 30,000. In addition, the Office will continue its outreach and claim intake activities in the Occupied Palestinian Territory in relation to public resource claims and residual claims of natural persons. The General Assembly, in its resolution [ES-10/17](#), called for the Register of Damage to remain open for registration for the duration of existence of the wall in the Occupied Palestinian Territory, including in and around East Jerusalem (para. 9). The Office will therefore continue its claim intake and outreach activities in the Occupied Palestinian Territory by maintaining a presence, and should there be additional claims owing to the continued construction and/or rerouting of the wall, the Office will address this issue in accordance with its mandate. Furthermore, the Office will continue to streamline the process of rectifications of incomplete and deficient claims. The work of the Office will help Member States to make progress towards achieving Sustainable Development Goal 16, through promoting the rule of law at the national and international levels and ensuring equal access to justice for all.

2.219 The above-mentioned work is expected to result in:

- (a) Increased number of and continued efficiency in processing of claims, leading to a reduction in the gap between collected and unprocessed claims;
- (b) Increased number of institutional, residual and potential new claimants;
- (c) Reduced turnaround time in obtaining rectifications of incomplete or deficient claims.

## External factors for 2022

2.220 With regard to the external factors, the overall plan for 2022 is based on the following planning assumptions:

- (a) There is political will and cooperation on the part of all parties concerned;
- (b) Extrabudgetary resources are available for maintaining a needed presence on the ground;
- (c) The overall security situation in the West Bank and the region does not adversely affect stability, thus rendering it impossible to carry out the mandate of the Register of Damage.

2.221 With regard to the COVID-19 pandemic, the programme plan is based on the assumption that the proposed deliverables and activities for 2022 will be feasible to implement. However, if the pandemic were to continue to have an impact on the planned deliverables and activities, they would be adjusted during 2022 within the scope of the overall objectives, strategies and mandates. Any such adjustments would be reported as part of the programme performance information.

2.222 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, in the course of the outreach campaign, all female mayors and Chairs of local councils are invited to training events organized by the Office. In addition, consultations will be conducted with local women's committees in all communities in which outreach and claim intake activities are planned. The Office will continue to pay special attention to informing potential

female claimants of the possibility of and requirements for submitting claim forms and will provide them with assistance and guidance in the preparation of their claims.

2.223 With regard to disability inclusion, in line with the United Nations Disability Inclusion Strategy, the Register of Damage will continue to make special arrangements for the intake of claims from claimants with disabilities. These arrangements include on-site support of claimants, which allows claimants with disabilities to file their claims without having to travel.

2.224 With regard to inter-agency coordination and liaison, the Office cooperates closely with the United Nations Office for Project Services, which is the key provider of logistical, human and financial resources services in the implementation of outreach and claims collection activities funded by extrabudgetary resources. In addition, the Office benefits from close cooperation with the Department of Political and Peacebuilding Affairs and the Office for the Coordination of Humanitarian Affairs.

### **Programme performance in 2020**

2.225 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

#### **Enhanced rectification process to complete deficient collected claims**

2.226 As at 31 December 2020, 72,218 claim forms had been collected. The Office put a strong emphasis on resolving outstanding rectifications of deficient or incomplete claims received. That process included contacting claimants or local authorities by telephone and encrypted e-mail and advising on missing information and outstanding documentation and data, whereby a major part of the rectification work is now performed from the Register of Damage office in Vienna. While that activity was also affected by the reduced ability to conduct rectifications on the ground owing to repeated lockdowns relating to the COVID-19 pandemic, it contributed to achieving the objective of the Office by ensuring that claims were complete and met all formal requirements.

#### *Progress towards the attainment of the objective, and performance measure*

2.227 The above-mentioned work contributed to the objective, as demonstrated by the number of rectifications conducted by the Office (see figure 2.XIII).

Figure 2.XIII

#### **Performance measure: total number of claims rectified (annual)**

**Impact of COVID-19 on programme delivery**

2.228 During 2020, the COVID-19 pandemic had an impact on the planned deliverables and activities of the Office. The impact included the Office not being able to hold meetings of the Board of the Register of Damage in Vienna in view of travel restrictions. The Board meets in person owing to confidentiality requirements. Hence, while virtual meetings with the Board were held to discuss strategy and its annual progress report to the General Assembly, the Board was unable to review claims and decide on the inclusion of processed damage claims into the Register. In addition, the impact of COVID-19 and the ensuing restrictions in the Occupied Palestinian Territory resulted in fewer claims being collected. Scanning of claim forms and including them into the database of the Register could take place only at a reduced level owing to the lockdown. The translation and review of claims was temporarily affected owing to the need to set up for the first time a secure and confidential offline system that would allow the staff of the Office to process the least complex claims remotely during the lockdown, as a business continuity measure. Outreach activities continued through alternative means such as by telephone and videoconference. Lastly, the planned training of mayors and other officials of affected communities had to be postponed owing to travel restrictions. In lieu of planned in-person training of mayors and other officials of affected communities in the Occupied Palestinian Territory, the Office has been developing virtual training for mayors and other officials with a focus on potential claimants of public claims. This one-on-one training was rolled out as a pilot initiative in the fourth quarter of 2020.

2.229 New ways of claims processing were identified and successfully operationalized, where feasible. In full consideration of confidentiality requirements, the Office developed and rolled out offline solutions where confidential data are stored in a physical, encrypted data carrier, which enabled its staff to process claims remotely in the most secure manner. The exchange of data is a physical direct transfer that allowed translators and reviewers to process collected claims, notwithstanding the lockdown and other COVID-19-related restrictions, thus reducing the number of unreviewed claims. In addition, the annual progress report of the Board of the Register of Damage to the General Assembly was completed on time by means of virtual meetings with the members of the Board. These changes had an impact on the programme performance in 2020, as specified in results 2 and 3 below.

2.230 Reflecting the importance of continuous improvement and responding to the evolving needs of Member States, the programme will consider and mainstream lessons learned and best practices related to the adjustments and adaptation of its programme owing to the COVID-19 pandemic. Specific examples of lessons learned include leveraging videoconferencing in the context of outreach activities. Previous years' practice of the Register of Damage was to conduct capacity-building for Palestinian local Palestinian mayors and other officials to inform them of the requirements to fill in claim forms. Given the political and domestic security situation that also affects the movement of local Palestinians within the governorates in different locations, this training usually took place in Aqabah, Jordan. However, given the COVID-19 situation and the restriction on movement, as well as to ensure the continuation of providing partners with the assistance needed to complete public resources damage claims, the Office initiated targeted virtual training, conducted from Vienna, to address each community separately. While the format may not fully replace in-person training in future, it is being considered as a complementary tool to increase the outreach and capacity-building efforts towards the Office's beneficiaries.

## Planned results for 2022

2.231 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: gradual reduction of the backlog of the unreviewed collected claims<sup>17</sup>**

#### **Programme performance in 2020**

2.232 As at 31 December 2020, 72,218 claim forms had been collected. In line with General Assembly resolution [ES-10/17](#), the Board of the Register of Damage is to meet at least four times annually in Vienna to review and decide on the inclusion of claims into the Register. The physical presence of the Board members ensures that the confidentiality requirements are being met and that the integrity of the process is maintained. Owing to the travel restrictions caused by the COVID-19 pandemic, physical Board meetings were not possible. Virtual Board meetings to decide on the inclusion of processed claims could not be held, given that a process to maintain the confidentiality and safety of data still has to be developed.

2.233 However, the review and processing of claims by the Office of the Register of Damage continued throughout the reporting period. Consequently, a substantial number of claims are ready for the Board to decide on.

2.234 The above-mentioned circumstances contributed to no claims being decided, which did not meet the planned target of 4000 claims, reflected in the proposed programme budget for 2020.

#### **Proposed programme plan for 2022**

2.235 The Office will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the Office and the Board of the Register of Damage will resume the processing and review of and the taking of a decision on at least 3,200 damage claims in 2022. The reason for the expected decrease in decided claims by the Board is the increased complexity of claims, as further shown in result 3 below. The expected progress is presented in the performance measure below (see figure 2.XIV).

<sup>17</sup> As reflected in the proposed programme budget for 2020 ([A/74/6 \(Sect. 3\)](#)).

Figure 2.XIV

**Performance measure: number of claims decided upon by the Board of the Register of Damage, 2018–2022**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: reduction of the backlog of the unreviewed collected claims<sup>18</sup>**

### **Programme performance in 2020**

2.236 The Office has, notwithstanding the restrictions resulting from the COVID-19 pandemic, continued with the processing and legal review of claims, thus decreasing the number of unreviewed claims and reducing the gap between collected and unreviewed claims.

2.237 The above-mentioned work contributed to a reduction in the gap between unreviewed and collected claims to 32,215, which did not meet the target of reducing the number of unprocessed claims to 30,760, reflected in the programme budget for 2021. The higher number of claims to be reviewed by the Office is attributable to the lockdown and ensuing restrictions, which disrupted the work of the Office substantially, and a larger number of claims collected in 2020 (1,201 claims) than projected (1,000 claims).

### **Proposed programme plan for 2022**

2.238 The Office will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the Office will undertake the processing of at least 3,200 claims in 2022, which will reduce the number of unreviewed claims to 27,015, which takes into consideration an estimated 500 new claims collected in 2021 and 2022. The expected progress is presented in the performance measure below (see figure 2.XV).

<sup>18</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

Figure 2.XV

**Performance measure: Register of Damage number of unreviewed claims**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: enhanced process for complex claims considered**

#### **Proposed programme plan for 2022**

2.239 The Office of the Register of Damage increased the focus on processing of more complex claims, including on stand-alone claims and complex public resource and employment claims, which require a lengthier review than needed for, for example, claims by several heirs for the same loss(es). The process included the scanning, translation, rectification and legal review of collected claims for further submission to the Board for final decision on the inclusion in the Register. By reviewing a larger group of employment claims (tripling the number of employment claims reviewed in 2020, compared with 2019), for example, the Office identifies claim scenarios that require further decisions by the Board on eligibility and evidence and the development of related guidelines. As noted in paragraph 2.232 above, owing to the travel restrictions caused by the COVID-19 pandemic, in-person Board meetings were not possible in 2020, resulting in no claims being decided.

#### *Lessons learned and planned change*

2.240 The lesson for the Office was that, owing to the increased complexity of claims that the Office received and the additional time needed for the processing and review of such claims, the previously projected target of 4,000 claims per year is no longer sustainable. In applying the lesson, the Office will channel existing capacities within the Register of Damage towards the processing of claims. For example, other staff in the Office will, in addition to performing their regular duties, provide regular assistance in claims-processing, translation, preliminary review, filing and other duties. Furthermore, the Office will enhance database features related to complex claims, to facilitate decision-making by the Board. Notwithstanding the above strategy and the fact that the Office is seeking further ways to optimize the process while safeguarding its integrity, the Register will need to revise the number of claims processed by the Office annually to 3,200 claims, as from 2022.

#### *Expected progress towards the attainment of the objective, and performance measure*

2.241 This work is expected to contribute to the objective, as demonstrated by approval of improved guidelines by the Board covering 80 per cent of the employment loss scenarios identified to date (see table 2.30).

Table 2.30  
Performance measure<sup>a</sup>

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
—	204 employment claims decided by the Board	—	The Board will decide on 80 per cent of employment claims presented for its decision	Approval of improved guidelines by the Board covering 80 per cent of the employment loss scenarios identified to date

<sup>a</sup> Using employment claims as an example.

## Legislative mandates

2.242 The list below provides all mandates entrusted to the programme.

### General Assembly resolution

ES-10/17	Establishment of the United Nations Register of Damage of Damage Caused by the Construction of the Wall in the Occupied Palestinian Territory
----------	---

## Deliverables

2.243 Table 2.31 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

<b>Outreach programmes, special events and information materials:</b> public awareness programme to inform the affected Palestinian natural and legal persons of the possibility of and the requirement for filing damage claims for registration, including the production of posters and leaflets for distribution to affected Palestinians.				

## United Nations Office to the African Union

### Overall orientation

#### Mandates and background

2.244 The United Nations Office to the African Union was established on 1 July 2010 pursuant to General Assembly resolution [64/288](#). The Office integrated the former United Nations Liaison Office at Addis Ababa, the African Union Peacekeeping Support Team and the United Nations planning team for the African Union Mission in Somalia (AMISOM), as well as the support elements of the Joint Support and Coordination Mechanism of the African Union-United Nations Hybrid Operation in Darfur.

2.245 The mandate of the Office is to enhance the partnership between the United Nations and the African Union in the area of peace and security; provide coordinated and consistent United Nations advice to the African Union on long-term capacity-building and short-term operational support matters; and streamline the United Nations presence in Addis Ababa to enhance coherence and efficiency in delivering United Nations assistance to the African Union. In its resolutions [2033 \(2012\)](#), [2167 \(2014\)](#), [2320 \(2016\)](#), [2378 \(2017\)](#) and [2457 \(2019\)](#), the Security Council called upon the United Nations to strengthen the cooperation between the United Nations and the African Union, including in the areas of mediation, capacity-building and, in particular, the operationalization of the African Peace and Security Architecture and implementation of the Silencing the Guns initiative.

2.246 The Office seeks to take effective collective measures for the prevention and removal of threats to peace and the suppression of acts of aggression or other breaches of the peace, and to achieve by peaceful means, and in conformity with the principles of justice and international law, adjustment or settlement of international disputes or situations which might lead to a breach of the peace, as stipulated in Article 1 of the Charter of the United Nations. In that connection, the Office works to strengthen collaboration with the African Union in addressing threats to peace and security, consistent with Chapter VIII of the Charter.

2.247 The Office's main areas of work are to: (a) further develop and implement the strategic partnership between the United Nations and the African Union in the area of peace and security; and (b) partner with the African Union in efforts to enhance capacities to jointly address challenges to peace and security in Africa. The Office provides an improved mechanism for cooperation at the regional level, primarily with the African Union and subregional organizations throughout Africa. The Office seeks to build a common United Nations-African Union understanding of the causes and drivers of conflicts and potential conflicts, from which collaborative initiatives to prevent, manage and resolve conflicts can be developed. The Office works closely with United Nations peacekeeping operations and special political missions on the

continent and, in so doing, enhances United Nations peace and security relations with the African Union. Furthermore, the Office provides support to United Nations good offices initiatives in southern and eastern Africa, in coordination with the African Union and the respective subregional organizations. The Office works with the African Union to develop and implement joint approaches to preventing and addressing conflicts in Africa, and to ensure greater collaboration between the African Union and the various United Nations field missions throughout the continent.

2.248 The Office seeks to consolidate the partnership with the African Union in the planning and management of peace operations and the development of institutional capacities to strengthen the partnership in initiatives geared towards preventing, managing and resolving conflicts. To consolidate a “One United Nations” approach in the partnership with the African Union in peace and security, the Office coordinates its work with other United Nations entities, in particular through opportunities and interest-based coalitions. The Office also participates in the mechanisms based in Addis Ababa that coordinate donors and other partners.

## **Programme of work**

### **Objective**

2.249 The objective, to which the Office contributes, is to strengthen the United Nations-African Union partnership for peace and security in Africa.

### **Strategy**

2.250 To contribute to the objective, the Office will support the implementation of the priorities of the African Peace and Security Architecture, including its linkages with the African Governance Architecture, namely: conflict prevention; crisis/conflict management; post-conflict reconstruction and peacebuilding; strategic security issues; and coordination and partnership. As part of its overall strategy, the Office builds on a strong existing relationship between the United Nations and the African Union and on continued consultation with key partners on important political and operational priorities. As part of its strategic and operational plans, the Office will engage with the African Union at the senior and operational levels through the United Nations-African Union annual conference, the United Nations-African Union Joint Task Force on Peace and Security and desk-to-desk meetings, in order to ensure coordination and coherence between the two organizations and to review and monitor progress on the implementation of the Joint United Nations-African Union Framework for Enhanced Partnership in Peace and Security. The Office will also continue to support the Secretary-General, the Deputy Secretary-General and the Special Representative of the Secretary-General to the African Union and Head of the United Nations Office to the African Union in their participation in African Union summits so that they can engage with African Union member States and articulate United Nations positions in the context of the Joint Framework. The Office will continue to facilitate consultations, including as Co-Chair with the African Union, in the biannual meeting of the Peace and Security Cluster of the Regional Coordination Mechanism for Africa on the renewed United Nations-African Union Partnership on Africa’s Integration and Development Agenda 2017–2027. In addition, the Office will support engagements by Member States, including the annual joint consultative meeting of the Security Council and the African Union Peace and Security Council and the meetings of the political counsellors of the Committee of Experts of the two Councils. The Office will regularly engage the policy organs of the African Union, including the Peace and Security Council and the Permanent Representatives

Committee, through both formal and informal interactions. The Office will also maintain regular interactions on thematic and country-specific situations and seek to develop a common understanding and, where possible, a common position, so as to build on mutual interests. The Office will work to strengthen coordination mechanisms among United Nations entities and other key partners, such as the regional economic communities, regional mechanisms and the European Union.

2.251 It is recognized that threats to peace and security in Africa are evolving and have become more complex. It is therefore essential that collaboration extend to the regional economic communities and regional mechanisms. The areas of focus for the Office are to strengthen strategic coherence throughout the conflict cycle in tandem with the African Union, the regional economic communities and the regional mechanisms; strengthen strategic coordination and partnership throughout the conflict cycle; increase operational synergies; and provide support in addressing ongoing conflicts in Africa. Actions will include operationalizing components of the African Peace and Security Architecture through activities carried out primarily with the African Union Commission, including African Union-authorized operations such as the Multinational Joint Task Force on Boko Haram, the Joint Force of the Group of Five for the Sahel, the Regional Cooperation Initiative for the Elimination of the Lord's Resistance Army and AMISOM. With the support of United Nations Headquarters, the Office will continue to work towards strengthening the capacities of the African Union in critical areas of expertise, thus enabling the African Union to plan and manage its ongoing and future peace operations. In the process, the Office will work closely with various other partners and United Nations entities, while participating in relevant coordination mechanisms to enhance cohesion in efforts to support and collaborate with the African Union. The Office will continue to contribute to implementing the Joint United Nations-African Union Framework for Enhanced Partnership in Peace and Security, as agreed by the Secretary-General of the United Nations and the Chairperson of the African Union Commission. The action plans for the Office are focused on support for the following strategic priorities, as set out in the Joint Framework: preventing and mediating conflict and sustaining peace; responding to conflict, including through peace support operations; addressing root causes of conflict; enhancing the partnership between the United Nations, the African Union, the regional economic communities and the regional mechanisms; and ensuring continuous partnership review. Those areas are all implemented within the context of strengthening human rights compliance.

2.252 In addition, the Office will continue to lead or support coordination mechanisms with United Nations entities and other key partners to ensure synergy and coherence in delivering assistance to the African Union. The Office will also prioritize strengthening collaboration with the African Union in advancing the implementation of Security Council resolution [1325 \(2000\)](#) on women and peace and security. The Office will continue to support the strengthening of the mediation capacity of the African Union, including through support for the deployment of mediation experts of the Network of African Women in Conflict Prevention and Mediation (FemWise-Africa) to Côte d'Ivoire, Libya and Mali. Efforts would also be focused on the inclusion of women in all aspects of conflict prevention, conflict management and conflict resolution, including support for training and rostering of female officers in peace support operations and in addressing root causes of conflict.

2.253 Furthermore, the Office will undertake various initiatives to build the institutional capacities of the African Union Commission to prevent, manage and respond to conflicts affecting the African continent, as well as to address root causes perpetuating conflicts. To that end, the Office will provide technical expertise and strategic advice and support to address threats to peace and security. Collaboration with all African Union entities will take into consideration the terms of the Joint

United Nations-African Union Framework for Enhanced Partnership in Peace and Security, Agenda 2063: The Africa We Want and other policy documents.

2.254 The Office plans to work with the African Union and the regional economic communities and regional mechanisms to support States members of the African Union on issues related to the coronavirus disease (COVID-19) pandemic by enhancing efforts to address the peace and security impact of the pandemic through conflict prevention, mediation and good offices initiatives.

2.255 The above-mentioned work is expected to result in:

(a) Strengthened capacity of the African Union, the African Union Commission, the regional economic commissions and the regional mechanisms with regard to conflict prevention, management and resolution;

(b) Synergized collaboration in addressing threats to peace and security and the root causes of conflicts in the region and on the continent.

## **External factors for 2022**

2.256 With regard to external factors, the overall programme plan for 2022 is based on the following assumptions:

(a) There is continued political will and commitment among the United Nations and the African Union in promoting cooperation with regional and subregional organizations in peace and security;

(b) Extrabudgetary funding is available;

(c) The African Union has the necessary human and financial capacity to effectively deliver on mandates to address peace and security challenges in Africa.

2.257 With regard to the COVID-19 pandemic, the programme plan is based on the assumption that the proposed deliverables and activities for 2022 will be feasible to implement. However, if the pandemic were to continue to have an impact on the planned deliverables and activities, they would be adjusted during 2022 within the scope of the overall objectives, strategies and mandates. Any such adjustments would be reported as part of the programme performance information.

2.258 The Office integrates gender and youth perspectives in its operational activities, deliverables and results, as appropriate. For example, the Office will support the integration of gender in all areas of its work; assist with harmonizing and streamlining United Nations and African Union efforts to institutionalize gender-responsive policymaking and programming; increase the equal participation, representation and full involvement of women in preventive diplomacy, mediation and sustaining peace, including through the provision of support to FemWise-Africa and the African Women Leaders Network; enhance the mainstreaming of the women and peace and security agenda in joint activities with the African Union Commission and the Intergovernmental Authority on Development in preventing and addressing conflict and peacebuilding, including through conducting capacity-building activities; set up a gender focal point system; and develop a standardized gender mainstreaming manual for the African Union. The Office will also support the efforts of the African Union and the regional economic communities and regional mechanisms to mainstream gender in sustaining peace initiatives through capacity-building in the rule of law sector, principally in security sector reform, in disarmament, demobilization and reintegration and in mine action. The Office will also work with the African Union, regional economic communities, regional mechanisms and Member States to build the capacity of women leaders in countries emerging from conflict or in transition, through training and mentorship programmes. The Office will

also support the implementation of the Continental Framework for Youth, Peace and Security of the African Union, including the priority activities identified in the ten-year implementation plan for the Continental Framework (2020–2029). The Continental Framework is the outcome of six subregional consultations that were supported by the Office in 2019.

2.259 With regard to cooperation with other entities, in its support to the African Union, the Office will engage as necessary with various issue-based coalition working groups to promote a coordinated United Nations approach in the partnership with the African Union Commission. The Office will continue to maintain effective relationships with a variety of partners, including external partners and stakeholders, while providing technical and expert advice and support in peace and security on the continent. Collaboration with all entities will take into consideration the context of Agenda 2063 of the African Union and other African policy documents, as well as the 2030 Agenda for Sustainable Development. The Office will maintain effective relationships, interaction and coordination with the Commission and the African Union Peace and Security Council, as well as all other structures within the African Peace and Security Architecture. Furthermore, as part of efforts to support continental unity, integration and goals, the Office will continue collaborating with the regional economic communities and regional mechanisms on a continual basis, while providing technical and expert advice. In cooperation with partners, the Office will further maintain regular interactions on thematic and country-specific situations and will seek common positions for the United Nations and the African Union to build on mutual interests, while ensuring that coordination mechanisms between United Nations entities and other key partners such as the European Union, regional economic communities and regional mechanisms are enhanced, so as to ensure synergy in collaboration and in supporting the Commission.

## **Evaluation activities**

2.260 The evaluation of the Norwegian project (2017–2020), completed in 2020, has guided the programme plan for 2022.

2.261 The findings of the evaluation referenced above have been taken into account for the proposed programme plan for 2022. For example, because of its relevance to the United Nations, the African Union and other stakeholders, the Norwegian project was extended for the period 2020–2022. In view of the capacity-related challenges at the African Union Commission, it was recommended that, for the subsequent phases of the project, one dedicated focal point at the operational level be embedded at the Department of Political Affairs, Peace and Security of the Commission, to facilitate the effective and efficient implementation of project activities, including the writing and keeping of project reports for the main beneficiary of the project.

2.262 A self-evaluation of extrabudgetary projects managed by the Office is planned for 2022.

## **Programme performance in 2020**

2.263 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Strengthened political engagement between the United Nations and the African Union**

2.264 The Office works to further strengthen the strategic partnership with the African Union to seek solutions to the increasingly complex and dynamic peace and

security challenges in Africa. The United Nations and the African Union have comparative advantages and leverage that are more effective when deployed in a complementary and mutually reinforcing manner.

2.265 The Office has strengthened political engagements with African Union organs; supported closer collaboration between the Security Council and the Peace and Security Council and between the United Nations Secretariat and African Union Commission; supported joint conflict prevention and mediation initiatives and provided a range of capacity-building support to the African Union. The Office also briefed the Peace and Security Council, thus facilitating opportunities for frequent interactions between the two organizations, and supported joint field missions conducted by senior officials from the Commission and the Secretariat.

*Progress towards the attainment of the objective, and performance measure*

2.266 The above-mentioned work contributed to the objective, as demonstrated by a strengthened African Union-United Nations partnership to promote the peace and security agenda in Africa (see table 2.32).

Table 2.32

**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
Expanded scope of the African Union-United Nations partnership to address peace, security and development challenges	Enhanced support in conflict prevention and mediation and support for the youth and peace and security agenda	Strengthened African Union-United Nations partnership through the joint implementation of the Silencing the Guns initiative, the African Union theme of the year and the women and peace and security agenda

**Impact of COVID-19 on programme delivery**

2.267 During 2020, the COVID-19 pandemic had an impact on the planned deliverables and activities of the Office. The impact included fewer formal briefings and informal interactions between the Office and African Union organs, such as the Peace and Security Council, due to limitations of working virtually. The annual desk-to-desk meeting was postponed to 2021. Scheduled joint assessment missions with the African Union for AMISOM in Somalia and the Multinational Joint Task Force in the Lake Chad Basin could not take place due to COVID-19 travel restrictions. Because of the public health challenge, the Office engaged in more frequent virtual joint horizon scanning meetings with the African Union to support early warning and conflict prevention, as well as virtual meetings to promote engagement for policy development. However, virtual interactions have limitations with regard to building working relationships, and technological challenges due to internet connectivity interruptions in Ethiopia and other countries on the continent further affected programme delivery. In addition, certain aspects for which personal interaction is essential, such as joint assessments and some operational activities, could not be finalized online. These changes had an impact on the programme performance in 2020, as specified under results 1 and 2 below.

2.268 At the same time, however, the Office identified activities to support Member States on issues related to COVID-19 within the overall scope of its objectives, namely, the provision of advice and support to the African Union Commission in developing security plans for implementing the COVID-19 joint continental strategy

and assistance with the formulation of guidelines for troop- and police-contributing countries participating in peace support operations to ensure protection from COVID-19 transmission.

## **Planned results for 2022**

2.269 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: strengthening the African Peace and Security Architecture<sup>19</sup>**

#### **Programme performance in 2020**

2.270 The Office has continued to support the strengthening of the African Peace and Security Architecture pillars. This includes support for the work of the Peace and Security Council through regular engagement in its formal meetings and informal discussions, the facilitation of engagements with other United Nations field presences and Headquarters and the facilitation of coordination meetings with the Security Council. The Office also supported the mediation capacity of the African Union through the Panel of the Wise, FemWise-Africa and the African Union Mediation Support Unit. The Office also supported the operationalization of the Peace Fund by participating in the meetings and retreats as an ex officio member of the Board of Trustees and by providing technical advice on the implementation of the rules and regulations for the governance of the Fund. The Office also continued to work closely with the Peace and Security Council, including by providing briefings at formal meetings and engaging in informal discussions and by facilitating monthly coordination meetings with the Security Council. The Office supported the African Union in developing the capacity of the civilian, police and military standby capabilities of the African Standby Force by enabling them to deploy in operations on the continent. Technical advice and expertise to the African Union Commission was provided virtually, while some joint predeployment assessments continued, as permitted, in between COVID-19 lockdowns. The Office also played a lead role in the development of standing operating procedures and directives on the deployment and management of resources and assets in African Union peace support operations.

2.271 The above-mentioned work contributed to the strengthening of African Peace and Security Architecture mechanisms, including: the adoption by the Board of Trustees of the Peace Fund of the rules and regulations for the governance of the Fund; the adoption of the peace support operations doctrine by the Specialized Technical Committee on Defence, Safety and Security; the approval by the African Union Commission of a standardized police predeployment training package and enhanced capabilities of African Union personnel deployed and/or preparing to deploy to field missions, which exceeded the planned target reflected in the proposed programme budget for 2020.

#### **Proposed programme plan for 2022**

2.272 The Office will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, and in response to recent developments, the Office will continue to support the work of the Peace and Security Council by facilitating the monthly coordination meetings with the Security Council, participation in its meetings and capacity-building to support the subsidiary

<sup>19</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 3)).

committees of the Peace and Security Council. The Office will also work to strengthen African Union early warning and mediation capacity and provide technical advice for the effective management and operation of the Peace Fund, in addition to participating in meetings of the Board of Trustees as an ex officio member. The Office is committed to continue providing required technical advice and expertise to the African Union Commission to strengthen its mechanisms so it can manage all authorized African Union peace support operations, including financing through the Peace Fund. The expected progress is presented in the performance measure below (see table 2.33).

Table 2.33

**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Joint declaration signed, paving the way to the Peace Fund	Operationalization of modalities for the Peace Fund	<p>Rules and regulations for the governance of the Peace Fund adopted by the Board of Trustees of the Fund</p> <p>Peace support operations doctrine adopted by the Specialized Technical Committee on Defence, Safety and Security</p> <p>Standardized police predeployment training package approved by the African Union Commission</p> <p>Enhanced capabilities of African Union personnel deployed or preparing to deploy to field missions</p>	Fully operational governance architecture of the Peace Fund, in line with adopted rules and regulations	<p>Implementation of projects funded by the Peace Fund, in line with adopted rules and regulation</p> <p>Mediation services of the African Union fully operational and further deployments of FemWise-Africa mediators</p>

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: enhanced capacity of the African Union Mission in Somalia, leveraging a new coordination mechanism<sup>20</sup>**

### **Programme performance in 2020**

2.273 The Office supported the African Union Commission in developing the capacity of AMISOM civilian, police and military components to undertake their mandate successfully. The Office helped the African Union to undertake four police predeployment verification and/or assessment missions and participated in two AMISOM quarterly assessment missions and three capacity-building coordinating meetings and/or workshops.

2.274 The above-mentioned work contributed to the advancement of the Somalia transition plan, geared towards the handing over of security responsibilities to the Somali security forces, which met the planned target of the finalization of security arrangements for elections and the further reduction of insurgencies in population centres, reflected in the programme budget for 2021.

### **Proposed programme plan for 2022**

2.275 The Office will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the Office will continue supporting the African Union in implementing the Somalia transition plan and the process towards the handover of greater security responsibilities to Somali authorities. The Office will also contribute to efforts to enhance AMISOM operational capability in further degrading Al-Shabaab and with regard to post-elections security requirements and any other State-building activities in Somalia. The expected progress is presented in the performance measure below (see table 2.34).

Table 2.34  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Ongoing development of the Transition Plan that led to the 2018–2021 concept of operations review	Implementation of phase I of the Transition Plan and reconfiguration of AMISOM, including the drawdown	Finalization of security arrangements for elections to be overseen by Somali security forces, with insurgencies further reduced in population centres	Effective AMISOM assistance towards successful elections in Somalia, leveraging the new coordination mechanism	Election security is maintained and a government elected, with post-election security maintained

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 3: strengthened African Governance Architecture**

### **Proposed programme plan for 2022**

2.276 The African Governance Architecture is the overarching African Union framework for promoting and sustaining democracy, governance and human rights in Africa. It is the overall political and institutional coordination framework that complements the African Peace and Security Architecture, which addresses the peace

<sup>20</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

and security agenda of the African Union. Through the two frameworks, the African Union acknowledges that democratic governance, peace and security are interrelated and mutually reinforcing imperatives. The Office has been working with the African Union, the regional economic communities and regional mechanisms and Member States to promote and sustain democracy, good governance and human rights in Africa. The Office has also worked with other United Nations entities to establish a human rights framework with the African Union and will continue to support work in this area.

*Lessons learned and planned change*

2.277 The lesson for the Office was that there is increased demand to strengthen collaboration with the African Union in conflict prevention, governance and the strengthening of State institutions and in initiatives to sustain peace through capacity building. In applying the lesson learned, the Office will strengthen its support for the African Governance Architecture through joint analysis, programmes and initiatives and by facilitating closer collaboration between policy organs, so that those initiatives are able to support conflict prevention, provide assistance to countries emerging from conflict and address the root causes of conflict. In addition, the Office will strengthen coordination with other United Nations entities that work with the African Union on peace and security matters, through the Regional Coordination Platform and opportunities and interest-based coalitions.

*Expected progress towards the attainment of the objective, and performance measure*

2.278 This work is expected to contribute to the objective, as demonstrated by the implementation of African Union governance, democratization and human rights instruments at the regional and national levels (see table 2.35)

Table 2.35

**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)</i>	<i>2022 (planned)</i>
Strengthened African Union-United Nations collaboration through support for African Governance Architecture instruments	Enhanced triangular cooperation between the African Union, the United Nations and the regional economic communities and regional mechanisms in peace, security, governance and human rights issues	Conclusion of an African Union-United Nations human rights framework	Strengthened African Union capacity on governance, democratization and human rights, in particular related to human security, greater continental solidarity and collective action in responding to such common challenges as pandemics or epidemics, natural disasters and climate change	Implementation of African Union governance, democratization and human rights instruments at the regional and national levels

**Legislative mandates**

2.279 The list below provides all mandates entrusted to the Office.

*General Assembly resolutions*

<a href="#">52/220</a>	Questions relating to the proposed programme budget for the biennium 1998–1999	<a href="#">65/274</a> ; <a href="#">67/302</a>	Cooperation between the United Nations and the African Union
<a href="#">60/268</a>	Support account for peacekeeping operations	<a href="#">71/270</a>	Review of the United Nations Office to the African Union
<a href="#">64/288</a>	Financing of the United Nations Office to the African Union		

*Security Council resolutions*

<a href="#">1744 (2007)</a>	<a href="#">2167 (2014)</a>
<a href="#">1769 (2007)</a>	<a href="#">2320 (2016)</a>
<a href="#">1772 (2007)</a>	<a href="#">2378 (2017)</a>
<a href="#">1863 (2009)</a>	<a href="#">2457 (2019)</a>
<a href="#">2033 (2012)</a>	

**Deliverables**

2.280 Table 2.36 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 2.36

15. Peace and security-related policies and guidelines in support of the implementation of the African Peace and Security Architecture and conflict prevention, management and resolution	2	3	2	2

#### C. Substantive deliverables

**Consultation, advice and advocacy:** good offices, information and advice, in collaboration with the African Union Commission, provided to five regional economic communities and regional mechanisms on the development and harmonization of the African Peace and Security Architecture; technical advice, expertise and support, including on human rights, provided to the African Union and/or three regional economic communities and regional mechanisms in areas relating to the planning, management and sustainment of peace support operations; interaction with and advice provided to the African Union and/or five regional economic communities and regional mechanisms on the concepts and guidance documents in relation to the African Standby Force; support provided to the African Union Commission in the promotion of common training standards for the African Union and three regional economic communities, including advice on best practices and lessons learned; advice provided to the African Union Partners Group to develop a strategy for multidimensional support by the partners for African Union initiatives; consultation and advice on country and regional early warning contexts to the United Nations-African Union horizon scanning teams; advice provided to African Union civilian and force generation processes on the implementation of the mandate of the peace support operations of the African Union and the regional economic communities and regional mechanisms; and advice and advocacy services provided to the Open-ended Group of Friends of the United Nations-African Union partnership.

**Fact-finding, monitoring and investigation missions:** support for the African Union in terms of mediation, good offices and conflict prevention missions; and regional visits for conflict analysis and early intervention.

#### D. Communication deliverables

**Outreach programmes, special events and information materials:** International Youth Day, Africa Day, International Day of United Nations Peacekeepers and International Day of Peace; and information materials, flyers, roll-up banners, infographic documents.

**External and media relations:** publications of e-newsletter; and press conferences and press releases on the activities of the Office.

**Digital platforms and multimedia content:** up-to-date content for the website and social media platforms; curating of online photograph database showcasing United Nations-African Union partnership activities; and a twice-monthly podcast series on women and peace and security in Africa, reaching a wide audience across the continent, including partners in the African Union, the regional economic communities and regional mechanisms, academic and research institutions, continental women-led organizations, youth, media and the wider public.

## Office of Counter-Terrorism

### Overall orientation

### Mandates and background

2.281 Pursuant to General Assembly resolution [71/291](#), the Office of Counter-Terrorism is responsible for five main functions: providing leadership for the General Assembly counter-terrorism mandates entrusted to the Secretary-General for action

across the United Nations system; enhancing coordination and coherence across the United Nations system to ensure the balanced implementation of the four pillars of the United Nations Global Counter-Terrorism Strategy; strengthening delivery of United Nations counter-terrorism capacity-building assistance to Member States; improving the visibility of, and advocacy and resource mobilization for, United Nations counter-terrorism efforts; and ensuring that due emphasis is placed on counter-terrorism across the United Nations system and that the work on preventing violent extremism is firmly rooted in the Strategy. The General Assembly also recognized the important work of the United Nations Counter-Terrorism Centre within the Office.

2.282 The United Nations Global Counter-Terrorism Strategy (General Assembly resolution [60/288](#)) is composed of four pillars, in the form of measures to: address the conditions conducive to the spread of terrorism; prevent and combat terrorism; build States' capacity to prevent and combat terrorism and to strengthen the role of the United Nations system in that regard; and ensure respect for human rights for all and the rule of law as the fundamental basis of the fight against terrorism. The mandate of the Office derives from the priorities established in the Strategy and subsequent review resolutions adopted by the General Assembly, including resolution [72/284](#), and other relevant General Assembly and Security Council resolutions, including Security Council resolution [2395 \(2017\)](#).

2.283 To complete the reform of the United Nations counter-terrorism architecture and further strengthen coherence and coordination in the counter-terrorism work of the Organization, in December 2018, the Secretary-General launched the United Nations Global Counter-Terrorism Coordination Compact, for which the Office acts as secretariat. The Compact has been signed by 40 United Nations entities, as well as the International Criminal Police Organization (INTERPOL), the World Customs Organization and the Inter-Parliamentary Union. With the Office as their secretariat, the Compact entities work jointly through a coordination committee, chaired by the Under-Secretary-General for Counter-Terrorism, and eight inter-agency working groups aligned with the four pillars of the Strategy. The Compact promotes action-oriented collaboration within the United Nations system, and serves as a platform for joint programming, coherent monitoring and evaluation, and facilitation of joint resource mobilization and outreach to donors. This enhanced cooperation and coherence supports the Secretary-General's "all-of-United Nations" approach.

## **Programme of work**

### **Objective**

2.284 The objective, to which the Office contributes, is to prevent and counter terrorism in all its forms and manifestations, as well as violent extremism as and when conducive to terrorism, in compliance with international law.

### **Strategy**

2.285 To contribute to the objective, the Office will continue to provide leadership for the General Assembly counter-terrorism mandates entrusted to the Secretary-General for action across the United Nations system, convene high-level regional conferences to follow up on the outcomes of the United Nations High-level Conference of Heads of Counter-Terrorism Agencies of Member States, held in 2018, and the first United Nations Global Congress of Victims of Terrorism, to be held in 2021, and provide a platform for Member States to exchange information, expertise

and resources, develop partnerships and collectively address a range of critical counter-terrorism issues.

2.286 In addition, the Office will continue to enhance coordination and coherence across the United Nations Global Counter-Terrorism Coordination Compact entities to promote the balanced implementation by Member States of the four pillars of the United Nations Global Counter-Terrorism Strategy and other relevant General Assembly and Security Council resolutions, including by strengthening the response to technical assistance needs identified by the Counter-Terrorism Committee Executive Directorate and to requests made by various Member States.

2.287 Furthermore, the Office will continue to provide technical assistance to Member States, upon request, including through knowledge transfer and the development and implementation of capacity-building assistance in an integrated manner across the four pillars of the United Nations Global Counter-Terrorism Strategy, through its United Nations Counter-Terrorism Centre, its Special Projects and Innovation Branch and its programme coordination. The Office will continue to extend its presence in the field in order to enhance coordination, facilitate the delivery of capacity-building programmes and reinforce resource mobilization activities with donors, which will result in more effective and efficient delivery of technical capacity-building assistance to Member States.

2.288 The Office will continue to strengthen the capacity of Member States to ensure respect for human rights and the rule of law while countering terrorism, in accordance with the fourth pillar of the United Nations Global Counter-Terrorism Strategy. The Office will also continue to support parliamentarians and strengthen its outreach to civil society organizations, including youth organizations and women's organizations, so as to promote a "whole-of-society" approach to preventing and countering terrorism and violent extremism conducive to terrorism. The Office will continue to facilitate South-South cooperation through the exchange of expertise among countries in the global South in order to respond to the specific challenges faced by those countries.

2.289 The above-mentioned work is expected to result in:

- (a) Multilateral cooperation, partnerships with Member States and regional organizations and the inclusion of civil society and private sector stakeholders related to countering terrorism and violent extremism conducive to terrorism;
- (b) Enhanced capacity of Member States in implementing relevant General Assembly and Security Council resolutions related to countering terrorism and violent extremism conducive to terrorism;
- (c) Policy leadership and enriched policy discourse on preventing and countering the evolving threat of terrorism and violent extremism conducive to terrorism;
- (d) In requesting Member States, integration of human rights norms and standards into relevant measures taken in the context of preventing and countering terrorism and violent extremism conducive to terrorism.

## **External factors for 2022**

2.290 With regard to the external factors, the overall plan for 2022 is based on the following planning assumptions:

- (a) Member States will continue to request support from the United Nations in preventing and countering terrorism and violent extremism conducive to terrorism;

(b) Extrabudgetary resources for capacity-building support for Member States will be available;

(c) Member States, supported by the Office of Counter-Terrorism, will grant the necessary official approvals and access to enable implementation and delivery of this support.

2.291 With regard to the COVID-19 pandemic, the programme plan is based on the assumption that the proposed deliverables and activities for 2022 will be feasible to implement. However, if the pandemic were to continue to have an impact on the planned deliverables and activities, they would be adjusted during 2022 within the scope of the overall objectives, strategies and mandates. Any such adjustments would be reported as part of the programme performance information.

2.292 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate. The Office completed the preparation of its gender policy and action plan, which will ensure that the appropriate mechanisms are in place to prevent and counter terrorism and violent extremism conducive to terrorism, grounded in sound gender analysis, and will ensure that the policy, programme and operational functions of the Office are gender responsive.

2.293 The Office is committed to the implementation of the United Nations Disability Inclusion Strategy in its programmes and operations. To promote the employment of persons with disabilities, proactive efforts will be undertaken to strengthen outreach to applicants with disabilities and to raise awareness on disability inclusion among existing staff and personnel. The Office is also considering actions to strengthen inclusion and engagement of persons with disabilities in its programmes.

2.294 With regard to cooperation with other entities at the global, regional, national and local levels, the Office cooperates with the Global Counterterrorism Forum, specialized international organizations and regional organizations such as the African Union, the Collective Security Treaty Organization, the Commonwealth of Independent States Anti-Terrorism Center, the Council of Arab Ministers of the Interior, the European Union, the League of Arab States, the North Atlantic Treaty Organization, the Organization for Security and Cooperation in Europe, the Organization of Islamic Cooperation and the Regional Anti-Terrorist Structure of the Shanghai Cooperation Organization. The Office has developed partnership frameworks and memorandums of understanding with various regional organizations to support joint approaches and collaboration to promote the implementation of the United Nations Global Counter-Terrorism Strategy and regional counter-terrorism strategies, in recognition of the regional drivers and enablers of terrorism.

2.295 With regard to inter-agency coordination and liaison, the Office leads the United Nations Global Counter-Terrorism Coordination Compact, which includes 43 member or observer entities. The Compact comprises eight working groups specialized in priority areas relating to preventing and countering terrorism and violent extremism conducive to terrorism, aligned with the four pillars of the United Nations Global Counter-Terrorism Strategy. The Office also implements its inter-agency coordination through memorandums of understanding and programmatic agreements with other United Nations entities. Its liaison officers in the field also contribute to better coordination of counter-terrorism efforts at the country level where they are located. This role contributes to strengthening the achievement of results and impact and to enhancing the efficient use of resources. Beyond its coordination role, the Office advocates an approach that prioritizes joint programming with other United Nations partners to maximize the use of resources and deliver more coherent and expert capacity-building activities, including in the field, in close coordination with the resident coordinator system.

## Evaluation activities

2.296 The following evaluations and self-evaluations completed in 2020 have guided the programme plan for 2022:

- (a) Self-evaluation of the project, Prevention of Violent Extremism through Youth Empowerment in Jordan, Libya, Morocco and Tunisia;
- (b) External evaluation of the United Nations Counter-Terrorism Centre Five-Year Programme (2016–2020).

2.297 The findings of the evaluation and self-evaluation referenced above have been taken into account for the programme plan for 2022. The major recommendations stemming from the self-evaluation involved the need to design a sound theory of change, including performance monitoring tools, to guide the remaining duration of the project. Corrective action was undertaken through the reconstruction of the theory of change and the establishment of a performance monitoring framework that reflected achievement against planned targets. The evaluation of the United Nations Counter-Terrorism Centre Five-Year Programme resulted in recommendations to strengthen the results culture in the Office and undertake outcome monitoring of projects and programmes. The evaluation also led to the recommendation that the next results framework should include a clear statement of the expected impact of the Centre and its contribution to the implementation of the United Nations Global Counter-Terrorism Strategy by Member States. The Centre is currently developing its programme of work and has commenced the process of developing a programme theory that will incorporate the aforementioned recommendations.

2.298 The following evaluations and self-evaluations are planned for 2022:

- (a) Evaluation of selected projects and programmes to assess the results and impact of the capacity-building assistance and support provided by the Office to Member States;
- (b) Meta-synthesis of selected evaluation reports on programmes and projects implemented by United Nations entities in the field of preventing and countering terrorism and violent extremism conducive to terrorism.

## Programme performance in 2020

2.299 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Countering the financing of terrorism

2.300 Security Council resolution [2462 \(2019\)](#) serves as a call by the international community on the importance of countering the financing of terrorism and provides a mandate for the Office to take a leading role in coordinating and supporting international efforts on suppressing the ways and methods by which terrorists raise, move, store and use financial resources.

2.301 As part of its mandated activities, and in line with Security Council resolutions, the United Nations Counter-Terrorism Centre, which serves as the main capacity-building arm of the Office, expanded its work on countering the financing of terrorism by developing the Global Programme on Detecting, Preventing and Countering the Financing of Terrorism as a direct response to the call issued in Council resolution [2462 \(2019\)](#). The Programme was built upon previous projects that were focused on specific terrorism financing topics, such as the freezing of assets, preventing kidnapping for ransom and protecting the non-profit sector from terrorist abuse.

2.302 In 2020, workshops and engagements were conducted in 10 different Member States in Europe, Asia and Africa, with close to 500 participants from more than 20 Member States, including representatives from national agencies, international organizations, civil society and relevant private sector entities covering a range of topics related to countering the financing of terrorism, from cryptocurrencies and financial intelligence-sharing to national risk assessments. The Global Programme on Detecting, Preventing and Countering the Financing of Terrorism brings together the mandates and expertise of key entities, including: the Counter-Terrorism Committee Executive Directorate, on national needs identification; the United Nations Office on Drugs and Crime (UNODC), on legislative and operational improvements; INTERPOL, on law enforcement; and the Office of Information and Communication Technology, on the development of technological products aimed at assisting financial intelligence units in fulfilling their responsibilities effectively and in a timely manner.

2.303 In one instance, building on its provision of capacity-building support, the Office worked in close partnership with a Member State to provide in-country assistance and extensive and targeted capacity-building support to identify and resolve policy, legislative and technology challenges. In particular, the support provided to the aforementioned Member State included technical advice for developing national legislation on asset freezing. The Office also supports the development of publications in local languages to strengthen coherent understanding by various national agencies going forward.

2.304 Furthermore, in 2020, with the onset of COVID-19, there were concomitant risks and a need to protect non-profit and civil society organizations from abuse by terrorism financiers. The pandemic caused humanitarian challenges, which increased reliance on non-profit organizations supporting communities under stress. That increased role could potentially attract the interest of terrorists, who might use non-profit organizations for fundraising. In response, the existing focus of the Global Programme on Detecting, Preventing and Countering the Financing of Terrorism with regard to protecting non-profit organizations from terrorist abuse, in line with Financial Action Task Force recommendation 8, was recalibrated to prioritize capacity-building in this area. For example, two workshops were conducted, one in May and one in August 2020, in partnership with a Member State, on the topic of protecting the non-profit sector from terrorist abuse.

*Progress towards the attainment of the objective, and performance measure*

2.305 The above-mentioned work contributed to the objective, as demonstrated by one Member State being removed from the “grey list” of the Financial Action Task Force, for increased monitoring, and the adoption by one Member State of national legislation on asset freezing.

2.306 The above-mentioned work also contributed to the objective, as demonstrated by the expansion and advancement of the capacity of 30 Member States to identify challenges and comprehensively target the safeguarding of humanitarian space and the non-profit sector from terrorist abuse (see table 2.37).

Table 2.37  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
Strengthened capacity of 10 Member States in Africa and Asia to identify and comprehensively target appropriate terrorist designations so as to commence asset freezing	<p>Legislation adopted by one Member State, in accordance with agreed international practice to counter financing of terrorism</p> <p>Strengthened and enhanced capacity of 20 additional Member States in Africa, Asia and Europe in new thematic areas, targeting, in particular, the safeguarding of financial systems from terrorist abuse</p>	<p>One Member State removed from the Financial Action Task Force “grey list”, for increased monitoring</p> <p>Adoption of national legislation on asset freezing by one Member State</p> <p>Expansion and advancement of the capacity of 30 Member States in Africa, Asia and Europe, in new thematic areas, to identify challenges and comprehensively target the safeguarding of humanitarian space and the non-profit sector from terrorist abuse</p>

#### Impact of COVID-19 on programme delivery

2.307 During 2020, the COVID-19 pandemic had an impact on planned deliverables and in-person activities of the Office. The impact included the postponement of the second counter-terrorism week in New York, including the meeting of the General Assembly for the seventh biennial review of the United Nations Global Counter-Terrorism Strategy, the second United Nations High-level Conference of Heads of Counter-Terrorism Agencies of Member States and the first United Nations Global Congress of Victims of Terrorism. The Office was able to organize one regional high-level conference in February 2020 but had to postpone other such events to 2021 or 2022, subject to the evolution of the pandemic.

2.308 The impact also included the cancellation of a large number of in-person technical assistance workshops, conferences and technical missions. While the Office could switch to the use of virtual platforms in many cases, doing so required a change in implementation modality. It was also found that virtual means did not allow for the same depth of engagement with beneficiaries of the Office’s technical assistance. COVID-19 restrictions made the advancement of field-level country programmes very challenging. The United Nations Counter-Terrorism Centre modified its focus to establish cooperation frameworks with such key partners as the Office of the United Nations High Commissioner for Human Rights, the Office of Rule of Law and Security Institutions and the Counter-Terrorism Committee Executive Directorate.

2.309 The Office organized a virtual counter-terrorism week, from 6 to 10 July 2020, under the overarching theme of “Strategic and Practical Challenges of Countering Terrorism in a Global Pandemic Environment”, with over 1,000 participants from 134 Member States, 40 United Nations entities, 47 international and regional organizations, 88 civil society organizations and the private sector. The Office and its partners adjusted the delivery of capacity-building programmes, such as the United Nations Countering Terrorist Travel Programme, by developing and implementing a remote assessment methodology, organizing online workshops and developing its first online training course.

2.310 Furthermore, the International Day of Remembrance of and Tribute to the Victims of Terrorism commemoration event was held online, which enabled more

parties to attend the event, including the Secretary-General and victims of terrorism from countries that are often underrepresented at events.

2.311 At the same time, however, the Office identified modified activities within the overall scope of the objectives of the programme, in order to support Member States on issues related to the COVID-19 pandemic. The Office addressed the emerging impact of the pandemic in its capacity-building programmes, for instance on border security and management and strategic communications to prevent and counter violent extremism conducive to terrorism.

2.312 Reflecting the importance of continuous improvement and responding to the evolving needs of Member States, the Office will mainstream lessons learned and best practices related to the adjustments to and adaptation of its programme owing to the COVID-19 pandemic. Specific examples of best practices include the use of remote assessment methodologies, which the Office is broadening across its capacity-building programmes, and the use of online platforms to facilitate information exchange, collaboration and the development of expert communities. Specific examples of lessons learned include the impacts, both technical and substantive, of planning and timelines, due to the complex nature of holding events online, and that mixed modalities of training delivery are beneficial for better engagement by participants. In applying best practices and lessons learned and in accordance with feedback from the beneficiaries, the Office will continue to transform capacity building activities including online preparatory work with beneficiaries, followed by targeted workshop delivery and with targeted coaching to be followed up which will help the learning outcomes be more sustainable.

## **Planned results for 2022**

2.313 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: keeping terrorists from the skies<sup>21</sup>**

#### **Programme performance in 2020**

2.314 The Office continued the work to prevent and counter terrorism by supporting Member States in countering the travel of terrorists and assisted countries in building their capacity to identify, monitor and investigate terrorism suspects and their movements across borders. The Office continued to lead and coordinate the implementation of the Countering Terrorist Travel Programme in collaboration with the Counter-Terrorism Committee Executive Directorate, UNODC, the Office of Information and Communications Technology, the International Civil Aviation Organization and INTERPOL. The Office undertook seven deep-dive assessments of confirmed beneficiary Member States in 2020. Deep-dive assessments are gap analysis exercises aimed at identifying areas for technical assistance in implementing the Programme. Such assessments determine a State's existing level of implementation and enable the Travel Programme to produce a road map for the Member State, in which it sets out steps for implementation. The Programme has conducted a cumulative 10 deep-dive assessments since 2019.

2.315 Reflecting a change in approach and an evolution of the planned activities, in response to emergent needs of Member States, the performance measure has been

<sup>21</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 3)).

updated. The above-mentioned work contributed to Member States having access to road maps in 2020. The road maps provide Member States with a suite of tailored recommendations for implementing their national programmes, underpinned by international best practices, to identify, monitor and investigate terrorism suspects and their movements across borders.

### Proposed programme plan for 2022

2.316 The Office will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the Office will assist countries in building their capacity to identify, monitor and investigate terrorism suspects and their movements across borders. The Office will conduct at least eight deep-dive assessments per year under the Countering Terrorist Travel Programme in 2021 and 2022. The expected progress is presented in the performance measure below (see figure 2.XVI).

Figure 2.XVI

**Performance measure: total number of Member States having received road maps (cumulative)**

### Result 2: detection and countering of terrorists' travel through the use of travel data<sup>22</sup>

#### Programme performance in 2020

2.317 The Office has continued with ongoing implementation, in beneficiary Member States, of the four pillars of work (legal, operational, carrier engagement and technical assistance) under the Countering Terrorist Travel Programme. The Office also added a maritime component to address threats related to passengers within the maritime domain, by analysing and identifying the specific legal, operational, industry-related and technical requirements in the context of maritime transportation. Furthermore, the Office developed a suite of training materials and began online training with selected beneficiary Member States. Working with Member States, the Office has obtained official confirmation of participation in the Programme by 39 Member States, developed implementation road maps for 7 countries and signed agreements with each of the five implementing partners of the Programme.

2.318 The above-mentioned work contributed to 8 Member States and the Caribbean Community, on behalf of its 15 member States, benefiting from the deployment of the goTravel software and starting the implementation process for the Countering Terrorist Travel Programme, which met the planned target of 23 Member States, reflected in the programme budget for 2021.

<sup>22</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

### Proposed programme plan for 2022

2.319 The Office will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the Office will support expanding the number of beneficiary Member States under the Countering Terrorist Travel Programme and implementation under the four pillars, including through online training, e-learning developments, training of trainers and increased use of the Programme's pool of experts, so that by the end of 2022, tangible progress is expected, which would be demonstrated by at least 29 Member States implementing the areas of support, namely: amending legislation; establishing passenger information units; engaging with private partners, including carriers; and receiving technical support for installing and using the goTravel software. The expected progress is presented in the performance measure below (see figure 2.XVII).

Figure 2.XVII

**Performance measure: total number of Member States implementing the Countering Terrorist Travel Programme (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: improved security of major sporting events and prevention of violent extremism conducive to terrorism through sports and its values

#### Proposed programme plan for 2022

2.320 The Office's three-year (Jan 2020–Dec 2022) Global Programme on Security of Major Sporting Events and Promotion of Sport and Its Values as a Tool to Prevent Violent Extremism combines two distinct but complementary pillars. The Office leads and coordinates the implementation of its global sport and security programme in collaboration with the United Nations Alliance of Civilizations, the United Nations Interregional Crime and Justice Research Institute and the International Centre for Sport Security.

2.321 The Office established a network of national focal points for its two programmatic pillars. The network includes representatives from the ministries of internal affairs, intelligence or public safety and/or security and the ministries of social affairs, physical education, sport or youth of Member States, forming two distinct communities of direct interlocutors for national-level engagement within programmatic activities. The national focal points actively support the exchange of good practices, information, expertise and experience across the network. The national focal points advise and orient the development, dissemination and use of technical assistance provided by the Office, with the aim of achieving strengthened

preparedness and capacity in the field of security for major sporting events and better integrating sport values-based initiatives within national and regional action plans for preventing violent extremism conducive to terrorism.

2.322 In addition, in November 2020, the Office launched a call for proposals aimed at awarding grants to approximately 10 civil society organizations for the implementation of community-level projects on sport values for preventing violent extremism conducive to terrorism. The initiative is aimed at awarding grants, by the United Nations Interregional Crime and Justice Research Institute, to support community-level efforts to prevent violent extremism by the third quarter of 2021, the overall goal being to strengthen United Nations engagement and cooperation with civil society, with a particular focus on youth-led organizations, while supporting the delivery of innovative projects and disseminating lessons learned on how to make full use of the power of sport and its social values as a tool to prevent violent extremism conducive to terrorism. In all, 440 civil society organizations from 51 countries submitted concept notes in applying for the grants. In January 2021, 54 shortlisted civil society organizations from 31 countries were invited to submit final project proposals by the end of March 2021. In response to the high number of applications received, the Office will seek to mobilize additional funds to launch a second call for proposals by the end of 2021. The national focal points helped to disseminate the call for proposals in 2020.

*Lessons learned and planned change*

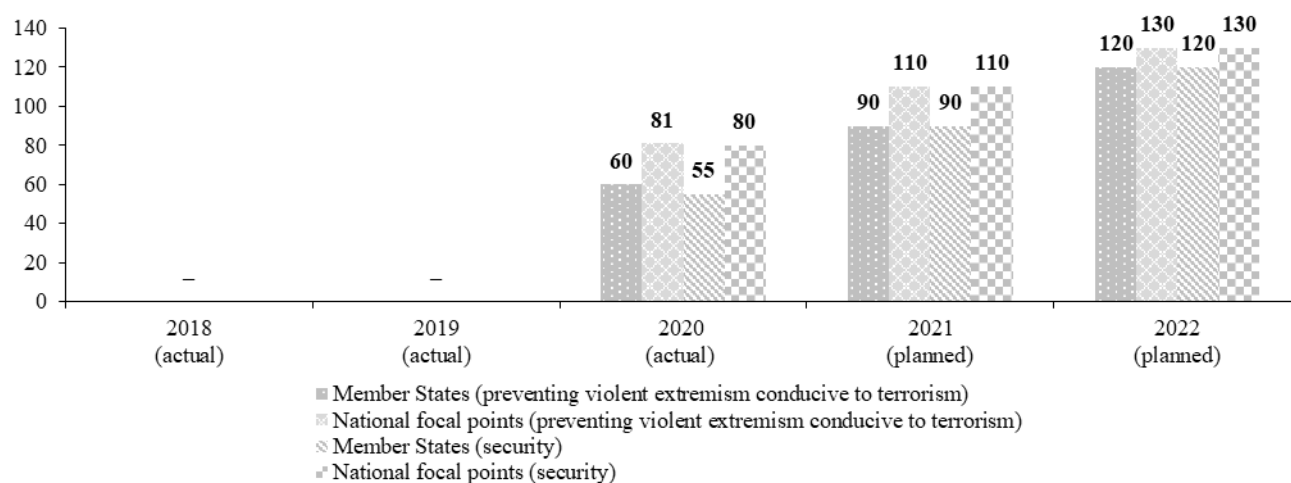

2.323 The lesson for the Office was that liaising with United Nations resident coordinators was important for the nomination of national focal points, the process for which was managed electronically through the permanent missions of Member States to the United Nations, so as to elicit a response in consultation with the capitals. In applying the lesson, the Office will further leverage the local support of resident coordinators in the future, in order to further support the nomination process and to achieve broad and balanced geographical representation of Member States across the network of national focal points.

*Expected progress towards the attainment of the objective, and performance measure*

2.324 This work is expected to contribute to the objective, as demonstrated by an increase in the number of national focal points nominated, which will help in orienting the development, dissemination and use of technical assistance provided by the Office and its partners (see figure 2.XVIII).

Figure 2.XVIII

**Performance measure: total number of Member States and national focal points for the two programmatic pillars of the global sport and security programme (cumulative)**

## Legislative mandates

2.325 The list below provides all mandates entrusted to the Office.

### General Assembly resolutions

60/288; 62/272; 64/297	United Nations Global Counter-Terrorism Strategy	71/291	Strengthening the capability of the United Nations system to assist Member States in implementing the United Nations Global Counter-Terrorism Strategy
64/235	Institutionalization of the Counter-Terrorism Implementation Task Force		
66/10	United Nations Counter-Terrorism Centre	72/165	International Day of Remembrance of and Tribute to the Victims of Terrorism
66/282; 68/276; 70/291; 72/284	The United Nations Global Counter-Terrorism Strategy Review	73/305	Enhancement of international cooperation to assist victims of terrorism
70/254	Secretary-General's Plan of Action to Prevent Violent Extremism		

### Security Council resolutions

2368 (2017)	2462 (2019)
2395 (2017)	2482 (2019)
2396 (2017)	

## Deliverables

2.326 Table 2.38 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 2.38

**United Nations Office of Counter-Terrorism: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>4</b>	<b>5</b>	<b>3</b>	<b>2</b>

10. Briefings to the Advisory Board of the United Nations Counter-Terrorism Centre	4	3	4	4
<b>B. Generation and transfer of knowledge</b>				
<b>Seminars, workshops and training events</b> (number of days)	<b>249</b>	<b>193</b>	<b>257</b>	<b>284</b>
11. High-level conference on issues relating to counter-terrorism	2	—	2	—
12. Regional conferences on technical issues relating to counter-terrorism	4	2	12	4
13. Capacity-building training and workshops on technical thematic issues	243	191	243	280
<b>Technical materials</b> (number of materials)	<b>5</b>	<b>3</b>	<b>5</b>	<b>5</b>
14. Reports, handbooks and papers on lessons learned, best practices and thematic topics in implementing the United Nations Global Counter-Terrorism Strategy	5	3	5	5
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> advocacy initiatives, including missions and other consultations with Member States on global, regional and national priorities and strategies.				
<b>Databases and substantive digital materials:</b> maintenance of the United Nations Global Counter-Terrorism Coordination Platform, launched in March 2020 by the Office of Counter-Terrorism, to connect approximately 800 focal points from 43 United Nations Global Counter-Terrorism Coordination Compact entities and 130 Member States.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> special commemorative events, promotional materials, brown bag meetings, side events and exhibitions.				
<b>External and media relations:</b> communiqués, press statements, press conferences and other engagement with media.				
<b>Digital platforms and multimedia content:</b> content for social media platforms, including the United Nations Office of Counter-Terrorism website and Twitter.				

## Programme 3

### Disarmament

#### Legislative mandates

3.1 The list below provides all mandates entrusted to the programme.

##### *General Assembly resolutions and decisions*

<a href="#">S-10/2</a>	Final Document of the Tenth Special Session of the General Assembly	<a href="#">68/33</a>	Women, disarmament, non-proliferation and arms control
<a href="#">59/95</a>	Improving the effectiveness of the methods of work of the First Committee	<a href="#">74/303</a>	Revitalization of the work of the General Assembly
<a href="#">62/272</a>	The United Nations Global Counter Terrorism Strategy		

##### *Security Council resolutions*

<a href="#">1325 (2000)</a>	<a href="#">1977 (2011)</a>
<a href="#">1540 (2004)</a>	<a href="#">2055 (2012)</a>
<a href="#">1673 (2006)</a>	<a href="#">2117 (2013)</a>
<a href="#">1810 (2008)</a>	<a href="#">2118 (2013)</a>
<a href="#">1887 (2009)</a>	

## Programme of work

### Subprogramme 1

#### Multilateral negotiations and deliberations on disarmament and arms limitation

#### Objective

3.2 The objective, to which this subprogramme contributes, is to advance multilateral negotiations and deliberations on agreements on disarmament, arms limitation and non-proliferation in all its aspects and to provide support, as required by States parties, to the existing multilateral agreements in those areas.

#### Deliverables

3.3 Table 3.1 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 3.1

**Subprogramme 1: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>333</b>	<b>207</b>	<b>282</b>	<b>187</b>
1. Documents, verbatim records and reports of the Conference on Disarmament	86	78	86	86
2. Report of the Secretary-General to the General Assembly on the United Nations Disarmament Fellowship, Training and Advisory Services Programme	1	1	–	1
3. Documents of the Group of Governmental Experts to further consider nuclear disarmament verification issues	–	–	2	3
4. Documents of the Meeting of States Parties (2021 and 2022) to the Convention on the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on Their Destruction	50	32	32	32
5. Documents of the Meetings of States Parties and the Ninth Review Conference to the Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on Their Destruction	30	–	80	–
6. Documents of the Meetings of Experts of the Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on Their Destruction	76	10	–	–
7. Documents of the Meeting of the High Contracting Parties to the Convention on Certain Conventional Weapons, of the annual conferences of its Amended Protocol II and Protocol V and of the Group of Governmental Experts on Emerging Technologies in the Area of Lethal Autonomous Weapons Systems	60	33	62	45
8. Documents of the 2020 Review Conference and Meetings of the States Parties to the Convention on Cluster Munitions	30	53	20	20
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>175</b>	<b>60</b>	<b>232</b>	<b>190</b>
9. Consultations and meetings of the Conference on Disarmament	95	29	95	95
10. Meetings of the Group of Governmental Experts to further consider nuclear disarmament verification issues	–	–	22	22
11. Meetings of the States Parties (2021 and 2022) to the Convention on the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on Their Destruction	10	10	10	10
12. Meetings of States Parties and Ninth Review Conference to the Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on Their Destruction	8	–	44	–
13. Meetings of Experts of the Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on Their Destruction	16	–	–	–
14. Meetings of the High Contracting Parties to the Convention on Certain Conventional Weapons, the annual conferences of its Amended Protocol II and Protocol V, meetings of the Group of Governmental Experts on Emerging Technologies in the Area of Lethal Autonomous Weapons Systems, the Group of Experts of the High Contracting Parties to Amended Protocol II and the Meeting of Experts on Protocol V	36	15	55	55
15. Meetings of States Parties (2021 and 2022) and 2020 Review Conference of the Convention on Cluster Munitions	10	6	6	8
<b>Conference and secretariat services for meetings</b> (number of three-hour meetings)	<b>175</b>	<b>60</b>	<b>232</b>	<b>190</b>
16. Consultations and meetings of the Conference on Disarmament	95	29	95	95
17. Meetings of the Group of Governmental Experts to further consider nuclear disarmament verification issues	–	–	22	22

18. Meetings of the States Parties (2021 and 2022) to the Convention on the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on Their Destruction	10	10	10	10
19. Meetings of States Parties and Ninth Review Conference to the Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on Their Destruction	8	—	44	—
20. Meetings of Experts of the Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on Their Destruction	16	—	—	—
21. Meetings of the High Contracting Parties to the Convention on Certain Conventional Weapons, the annual conferences of its Amended Protocol II and Protocol V, meetings of the Group of Governmental Experts on Emerging Technologies in the Area of Lethal Autonomous Weapons Systems, the Group of Experts of the High Contracting Parties to Amended Protocol II and the Meeting of Experts on Protocol V	36	15	55	55
22. Meetings of States Parties (2021 and 2022) and 2020 Review Conference of the Convention on Cluster Munition	10	6	6	8
<b>Documentation services for meetings</b> (thousands of pages)	<b>10.6</b>	<b>14.4</b>	<b>10.6</b>	<b>10.6</b>
23. Editing of parliamentary documentation for all meetings serviced by the subprogramme	10.6	14.4	10.6	10.6
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>6</b>	<b>7</b>	<b>8</b>	<b>7</b>
24. Projects in support of the Biological Weapons Convention	6	7	8	7
<b>Seminars, workshops and training events</b> (number of days)	<b>70</b>	<b>—</b>	<b>70</b>	<b>70</b>
25. United Nations Disarmament Fellowship, Training and Advisory Services Programme	70	—	70	70
<b>Technical materials</b> (number of materials)	<b>1</b>	<b>—</b>	<b>1</b>	<b>—</b>
26. Technical guides on submission of confidence-building measures and on national implementation of the Biological Weapons Convention	1	—	1	—
<b>C. Substantive deliverables</b>				
<b>Databases and substantive digital materials:</b> databases relating to annual national reports on compliance, Protocol V and Amended Protocol II to the Convention on Certain Conventional Weapons, explosive remnants of war under Protocol V to the Convention, articles 7 and 8 (9) of the Convention on the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on Their Destruction, and article 7 of the Convention on Cluster Munitions; electronic reporting system for the confidence-building measures and the cooperation and assistance database of the Biological Weapons Convention; update and maintenance of website relating to the Conference on Disarmament, the Geneva Branch of the Office for Disarmament Affairs, including web pages on financial matters, fissile material, the Biological Weapons Convention, the Convention on Certain Conventional Weapons, the Convention on the Prohibition of Military or Any Other Hostile Use of Environmental Modification Techniques, the Convention on Cluster Munitions and the Anti-Personnel Landmines Convention, the United Nations Disarmament Fellowship, Training and Advisory Services Programme and the Group of Governmental Experts to further consider nuclear disarmament verification issues.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> briefings and outreach materials (physical and digital) on disarmament, arms limitation and non-proliferation to the Geneva-based permanent missions and governmental, non-governmental and civil society organizations; further strengthening of digital tools to improve national reporting and compliance (Biological Weapons Convention and Convention on Certain Conventional Weapons).				
<b>Digital platforms and multimedia content:</b> interactive web pages on financial issues in support of conventions serviced by the subprogramme; digital tools to improve national reporting and compliance.				

## Subprogramme 2 Weapons of mass destruction

### Objective

3.4 The objective, to which this subprogramme contributes, is to promote and support the efforts for disarmament and non-proliferation in all its aspects of nuclear weapons and all other weapons of mass destruction and their means of delivery and to assist Member States, at their request, in supporting existing treaties and mandates related to weapons of mass destruction.

### Deliverables

3.5 Table 3.2 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 3.2

#### Subprogramme 2: deliverables for the period 2020–2022, by category and subcategory

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>235</b>	<b>45</b>	<b>29</b>	<b>199</b>
1. Reports of and notes by the Secretary-General to the General Assembly on nuclear and chemical weapons	9	12	9	9
2. Reports and documents for the 2020 (tenth) Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons	205	33	–	71
3. Reports and documents for the Conference on the Establishment of a Middle East Zone Free of Nuclear Weapons and Other Weapons of Mass Destruction	20	–	20	20
4. Reports and documents for the fourth Conference of Nuclear-Weapon-Free Zones and Mongolia	1	–	–	–
5. Reports and documents for the Preparatory Committee for the 2025 Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons	–	–	–	70
6. Reports and documents for the First Meeting of States Parties to the Treaty on the Prohibition of Nuclear Weapons	–	–	–	29
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>136</b>	<b>46</b>	<b>60</b>	<b>94</b>
7. Meetings of the First Committee	25	18	25	25
8. Meetings of the Disarmament Commission	15	0	15	15
9. Plenary meetings of the high-level plenary meeting to commemorate and promote the International Day for the Total Elimination of Nuclear Weapons	2	2	2	2
10. High-level plenary meeting to commemorate and promote the International Day against Nuclear Tests	2	1	2	2
11. Pre-session consultations and meetings of the 2020 (tenth) Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons	76	25	–	–
12. Meetings of the Conference and the Bureau of the Conference on Facilitating the Entry into Force of the Comprehensive Nuclear-Test-Ban Treaty	–	–	2	–
13. Meetings of the fourth Conference of Nuclear-Weapon-Free Zones and Mongolia	2	–	–	–
14. Meetings of the Conference on the Establishment of a Middle East Zone Free of Nuclear Weapons and Other Weapons of Mass Destruction	14	–	–	10

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
15. Pre-session consultations and meetings for the First Meeting of States Parties to the Treaty on the Prohibition of Nuclear Weapons	–	–	–	10
16. Pre-session consultations and meetings for the Preparatory Committee for the 2025 Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons	–	–	14	30
<b>B. Generation and transfer of knowledge</b>				
<b>Seminars, workshops and training events</b> (number of days)	<b>30</b>	<b>12</b>	<b>24</b>	<b>35</b>
17. Workshops to identify lessons learned from the Organisation for the Prohibition of Chemical Weapons-United Nations Joint Investigative Mechanism	3	3	–	–
18. Intersessional meetings of the Conference on the Establishment of a Middle East Zone Free of Nuclear Weapons and Other Weapons of Mass Destruction	4	1	4	6
19. Meetings and training courses for the Secretary-General's Mechanism for Investigation of Alleged Use of Chemical and Biological Weapons on chemical weapons investigations and updating the roster of experts	17	8	20	29
20. Regional meetings and thematic seminars in preparation for the 2020 (tenth) Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons	6	–	–	–
<b>C. Substantive deliverables</b>				
<b>Good offices:</b> outreach by the Secretary-General and the High Representative for Disarmament Affairs on the disarmament and non-proliferation of weapons of mass destruction; briefings by the High Representative to the Security Council on the implementation of resolution <a href="#">2118 (2013)</a> .				
<b>Consultation, advice and advocacy:</b> impartial technical, substantive and procedural advice provided to Member States; expert participation in seminars, workshops and conferences convened by Member States and civil society; speeches and other outreach by the Secretary-General, the High Representative for Disarmament Affairs, and other Weapons of Mass Destruction Branch members.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> production of ad hoc publications; final report of the Office for Disarmament Affairs project to identify lessons learned from the OPCW-United Nations Joint Investigative Mechanism; fact sheets on weapons of mass destruction disarmament and associated treaties; convening of side events at relevant United Nations conferences; convening of ad hoc conferences.				
<b>Digital platforms and multimedia content:</b> updating of Office for Disarmament Affairs website and social media platforms related to weapons of mass destructions issues; dedicated website for enhanced coordination and cooperation among nuclear-weapon-free zones; new website for the tenth Review Conference of the Treaty on the Non-Proliferation of Nuclear Weapons.				

## Subprogramme 3 Conventional arms

### Objective

3.6 The objective, to which this subprogramme contributes, is to advance greater mutual confidence and transparency among Member States in the field of conventional arms and facilitate their efforts in deliberations on the regulation and limitation of conventional weapons, taking into account the legitimate needs of States for self-defence.

### Deliverables

3.7 Table 3.3 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 3.3

**Subprogramme 3: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>13</b>	<b>7</b>	<b>7</b>	<b>14</b>
1. Reports of the Secretary-General to the General Assembly on conventional arms, arms transfers, military expenditures, small arms and light weapons, disarmament and development	7	7	6	7
2. Report of the Secretary-General to the Security Council on small arms and light weapons	–	–	1	–
3. Report and other documents on the Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects	6	–	–	6
4. Report of the Group of Governmental Experts on the United Nations Register of Conventional Arms	–	–	–	1
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>69</b>	<b>28</b>	<b>39</b>	<b>69</b>
5. Meetings of the First Committee	25	18	25	25
6. Meetings of the Group of Governmental Experts on the United Nations Register of Conventional Arms	–	–	10	30
7. Meetings of the Group of Governmental Experts on Ammunition	30	10	–	–
8. Meeting of the Seventh Biennial Meeting of States to Consider the Implementation of the United Nations Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects and the International Instrument to Enable States to Identify and Trace, in a Timely and Reliable Manner, Illicit Small Arms and Light Weapons under the Programme of Action on Small Arms	14	–	–	–
9. Meeting of the Eighth Biennial Meeting of States to Consider the Implementation of the United Nations Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects and the International Instrument to Enable States to Identify and Trace, in a Timely and Reliable Manner, Illicit Small Arms and Light Weapons under the Programme of Action on Small Arms	–	–	–	10
10. Informal consultations among Member States further to the Eighth Biennial Meeting of States under the Programme of Action on Small Arms	–	–	4	4
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>–</b>	<b>–</b>	<b>–</b>	<b>1</b>
11. Competency training and test on the International Ammunition Technical Guidelines	–	–	–	1
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> briefings to delegates on United Nations transparency instruments (Register of Conventional Arms and United Nations Report on Military Expenditures) and briefings further to the Eighth Biennial Meeting of States under the Programme of Action on Small Arms; meetings of the UN SaferGuard Technical Review Board.				
<b>D. Communication deliverables</b>				
<b>Digital platforms and multimedia content:</b> websites, with more than 1 million unique visits annually, and social media, with a combined reach of more than 20,000 followers; ongoing updates to and maintenance of integrated conventional arms information platforms and online reporting systems related to global reported arms trade, military expenditures, military confidence-building measures and implementation of the Programme of Action on Small Arms available for use in voluntary reporting by all Member States; and the SaferGuard programme on ammunition.				

## Subprogramme 4 Information and outreach

### Objective

3.8 The objective, to which this subprogramme contributes, is to increase awareness, understanding and knowledge of Member States and the public on disarmament issues.

### Deliverables

3.9 Table 3.4 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 3.4  
Subprogramme 4: deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>40</b>	<b>16</b>	<b>17</b>	<b>17</b>
1. Reports of the Secretary-General, transmitting views of Member States to the General Assembly on: environmental norms in the context of disarmament and arms control; the promotion of multilateralism; the United Nations study on disarmament and non-proliferation education; the United Nations Disarmament Information Programme; the role of science and technology; advancing responsible State behaviour in cyberspace	28	6	6	6
2. Report of the Secretary-General on the work of the Advisory Board on Disarmament Matters (including pre-session, in-session and post-session documents)	12	10	10	10
3. Report of the Secretary-General on the work of the Group of Governmental Experts on Advancing Responsible State Behaviour in Cyberspace in the Context of International Security	—	—	1	—
4. Progress report of the open-ended working group on security of and in the use of information and communications technologies 2021–2025	—	—	—	1
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>54</b>	<b>30</b>	<b>26</b>	<b>32</b>

7. Meetings of the Group of Governmental Experts on Advancing Responsible State Behaviour in Cyberspace in the Context of International Security	20	10	14	—
8. Meetings of the open-ended working group on security of and in the use of information and communications technologies 2021–2025	—	—	—	20
<b>B. Generation and transfer of knowledge</b>				
<b>Seminars, workshops and training events</b> (number of days)	<b>1</b>	<b>1</b>	<b>1</b>	<b>1</b>
9. Training of teachers on disarmament and non-proliferation	1	1	1	1
<b>Publications</b> (number of publications)	<b>8</b>	<b>12</b>	<b>8</b>	<b>8</b>
10. Publications on disarmament, including the <i>United Nations Disarmament Yearbook</i> , Occasional Papers and other serialized and non-serialized publications	8	12	8	8
<b>C. Substantive deliverables</b>				
<b>Databases and substantive digital materials:</b> database on the status of disarmament and arms regulation agreements, disarmament reference library, e-documents library and online repository of publications of the Office for Disarmament Affairs.				

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> pamphlets, brochures, publicity kits, guides, posters, disarmament fact sheets; disarmament activities of the Messenger of Peace; organization of participation of non-governmental organizations in multilateral disarmament conferences and in special events; symposiums and panel discussions on disarmament issues, in particular disarmament and non-proliferation education; briefings for visitors and outside groups on disarmament; meetings on disarmament and non-proliferation education and teacher training; and audiovisual resources, including films, events and exhibits on matters promoting disarmament and non-proliferation.				
<b>External and media relations:</b> opinion pieces placed in international, national and thematic journals.				
<b>Digital platforms and multimedia content:</b> website of the Office for Disarmament Affairs; website on disarmament education; website of the initiative of the Secretary-General, Securing Our Common Future: An Agenda for Disarmament; online version of the Office for Disarmament Affairs updates; and Youth4Disarmament web platform, UNODA Meetings Place website and the <i>United Nations Disarmament Yearbook</i> website.				

## Subprogramme 5 Regional disarmament

### Objective

3.10 The objective, to which this subprogramme contributes, is to enhance global disarmament and international peace and security through regional disarmament efforts and initiatives.

### Deliverables

3.11 Table 3.5 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 3.5

#### Subprogramme 5: deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	5	5	5	5
1. Reports of the Secretary-General to the General Assembly on the United Nations regional centres for peace and disarmament; the strengthening of security and cooperation in the Mediterranean region; and confidence-building measures in the regional and subregional context	5	5	5	5
<b>Substantive services for meetings</b> (number of three-hour meetings)	1	1	1	1
2. Meetings of the First Committee	1	1	1	1
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	25	14	25	25
3. Projects on effective small arms control, including physical security and stockpile management	15	8	15	15
4. Projects on the implementation of General Assembly resolution 65/69 on women, disarmament, non-proliferation and arms control	6	3	6	6
5. Projects on peace and disarmament education, including projects for young people, with an emphasis on the Sustainable Development Goals	4	3	4	4

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>Seminars, workshops and training events</b> (number of days)	<b>84</b>	<b>78</b>	<b>84</b>	<b>84</b>
6. Seminars, workshops and training and capacity-building events on small arms and light weapons	50	44	50	50
7. Seminars, workshops and training and capacity-building events on the non-proliferation of weapons of mass destruction and the implementation and universalization of non-proliferation instruments and relevant Security Council resolutions	30	30	30	30
8. International conferences on disarmament, non-proliferation and arms control	4	4	4	4
<b>Publications</b> (number of publications)	<b>2</b>	<b>2</b>	<b>2</b>	<b>2</b>
9. Substantive publications and/or manuals on disarmament, non-proliferation and arms control	2	2	2	2

#### C. Substantive deliverables

**Consultation, advice and advocacy:** substantive, technical and legal advice as well as training on the effective implementation of relevant instruments in accordance with Security Council and General Assembly mandates upon request by Member States, regional and subregional organizations and civil society organizations in Africa, Asia and the Pacific, and Latin America and the Caribbean.

#### D. Communication deliverables

**Outreach programmes, special events and information materials:** production and dissemination on the Office's website of fact sheets on the work of the regional centres and liaison office in Vienna; outreach events for youth and gender groups and other stakeholders.

**Digital platforms and multimedia content:** update and maintenance of website, with more than 500,000 unique visits annually, and of social media accounts, with a combined reach of more than 11,000 followers.

## Programme 4

### Peacekeeping operations

### Department of Peace Operations

#### Legislative mandates

4.1 The list below provides all mandates entrusted to the programme, which is also guided in its functions related to peacekeeping operations by the mandates entrusted to specific missions by the Security Council.

#### *General Assembly resolutions*

<a href="#">49/37</a> ; <a href="#">74/277</a>	Comprehensive review of the whole question of peace-keeping operations in all their aspects	<a href="#">70/262</a> <a href="#">72/199</a>	Review of the peacebuilding architecture Restructuring of the United Nations peace and security pillar
<a href="#">58/296</a>	Administrative and budgetary aspects of the financing of the United Nations peacekeeping operations	<a href="#">74/80</a>	Assistance in mine action
<a href="#">61/279</a> ; <a href="#">65/290</a>	Strengthening the capacity of the United Nations to manage and sustain peacekeeping operations		

#### *Security Council resolutions*

2. Letters from the Secretary-General to the President of the Security Council	33	20	20	20
3. Oral briefings to the Security Council on peacekeeping issues	46	37	38	38
<b>B. Generation and transfer of knowledge</b>				
<b>Seminars, workshops and training events</b> (number of days)	<b>18</b>	<b>1</b>	<b>13</b>	<b>13</b>
4. Workshops for heads of political components of peacekeeping operations	5	—	5	5
5. Workshops for regional and subregional political strategies for peacekeeping in the Middle East	3	—	3	3
6. Workshops for regional and subregional political strategies for peacekeeping in Africa	10	1	5	5
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> Expert advice and information on relevant aspects of peacekeeping operations to approximately 120 troop- and police-contributing countries; consultations with/among 5 regional organizations to promote regional peacekeeping capacities expanded in context of specific operations; and expert advice to at least 120 permanent missions to the United Nations, the Bretton Woods institutions, 13 international and regional governance and security organizations and non-governmental organizations on peacekeeping issues.				

## Subprogramme 2

### Military

### Objective

4.4 The objective, to which the subprogramme contributes, is to maintain international peace and security through the effective performance of military components of peacekeeping operations.

### Deliverables

4.5 Table 4.2 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 4.2

**Subprogramme 2: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>B. Generation and transfer of knowledge</b>				
<b>Seminars, workshops and training events</b> (number of days)	<b>131</b>	<b>72</b>	<b>164</b>	<b>178</b>
1. Training events with senior military personnel for predeployment induction and post-appointment briefings and intensive orientation	48	26	48	44
2. Training events for command post-exercise for the Force headquarters	5	5	13	25
3. Training events on the development, revision and implementation of new military policies and guidance materials	20	15	25	25
4. Training events on military gender issues for peacekeeping operations	10	7	25	25
5. Training events to improve situational awareness and strengthen the performance of uniformed military components, targeting operational and tactical leadership (heads of military components, sector commanders and Force chiefs of staff and infantry battalion commanders)	20	7	25	35
6. Training events on peacekeeping-intelligence/information gathering and analysis	28	12	24	24
7. Training events on the management of weapons and ammunition	–	–	4	–
<b>Technical materials</b> (number of materials)	<b>91</b>	<b>103</b>	<b>93</b>	<b>106</b>
8. Strategic analysis reports on significant operational developments in peacekeeping operations and on evolving conflict areas	40	52	40	40
9. Reports on force headquarters evaluation	–	–	–	2
10. Strategic military plans for new or significantly adjusted peacekeeping operations	4	10	4	6
11. Updated threat assessments reports	13	9	13	12
12. Reports on operational requirements and troop-contributing country capabilities and recommendations prepared after predeployment, assessment and operational advisory visits	20	17	20	20
13. Reports on military skills validation training	–	–	–	10
14. Monthly reports on the deployment of military forces, observers and headquarters staff with emphasis on actions to achieve gender balance	12	12	12	12
15. Policies, guidance materials and standard operating procedures related to the military components of peacekeeping operations	2	3	4	4
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> briefings to 120 troop-contributing countries and Military Staff Committee on all military aspects of peacekeeping operations; strategic discussion with 10 Member States and 3 regional organizations on military aspects of peace negotiations, agreements, peacekeeping operations and strategic and operational planning; maintenance of an organized surge capacity comprising key nucleus of military staff/support team of up to 14 seconded military officers, for a possible deployment to new and existing missions for up to 90 days.				
<b>Databases and substantive digital materials:</b> updated information on pledged units registered in the Peacekeeping Capability Readiness System by 60 troop-/police- contributing countries; development of a military performance management system.				

## Subprogramme 3

### Rule of law and security institutions

#### Objective

4.6 The objective, to which the subprogramme contributes, is to strengthen the rule of law and security sector governance to contribute to the maintenance of international peace and security in countries where peacekeeping operations and special political missions deploy and where otherwise authorized, or requested by the Member State, in full compliance with the Charter of the United Nations.

#### Deliverables

4.7 Table 4.3 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 4.3  
Subprogramme 3: deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>13</b>	<b>16</b>	<b>17</b>	<b>18</b>
1. Briefings to Member States that are both mission/field- and police-specific	12	12	13	14
2. Briefing to Member States on mine action matters	1	4	4	4
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>22</b>	<b>30</b>	<b>24</b>	<b>33</b>
3. Project on police thematic expertise, including on planning and police reform to missions/the field	3	3	3	3
4. Predeployment visits to Member States on police requirements and capacity and resource needs	5	5	5	5
5. Technical support for the development and management of programmes in support of justice and corrections systems	2	2	2	2
6. Assessment missions of mine action <sup>a</sup> (technical and advisory support to field missions and Member States)	3	3	3	3
7. Deployment of humanitarian mine action assets	1	–	1	1
8. Provision of coordination support for risk education in mine action programmes	5	14	5	14
9. Donor-funded, multi-stakeholder projects to advance security sector reform policies and strategies	3	3	3	3
10. Technical assistance visits on disarmament, demobilization and reintegration and community violence reduction	–	–	2	2
<b>Seminars, workshops and training events</b> (number of days)	<b>63</b>	<b>47</b>	<b>63</b>	<b>63</b>
11. Seminars for police-contributing countries on the national selection mechanisms for the readiness, deployment and training of police personnel and units	47	47	47	47
12. Training for future heads of police components	6	–	6	6
13. Trainings/workshops for justice and corrections practitioners, including predeployment training for corrections officers	10	–	10	10

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>Publications</b> (number of publications)	<b>1</b>	<b>1</b>	<b>1</b>	<b>1</b>

<b>Technical materials</b> (number of materials)	<b>21</b>	<b>23</b>	<b>20</b>	<b>23</b>
15. Policy guidance to national authorities on disarmament, demobilization and reintegration and community violence reduction	3	3	3	3
16. Technical materials on the implementation of disarmament, demobilization and reintegration and community violence reduction	3	3	2	4
17. Strategic police capability studies, police operational plans, standard operating procedures and concepts of operations for police components	6	6	6	6
18. Policies, guidelines and manuals on policing for police-contributing countries, United Nations police and national authorities	4	4	4	4
19. Guidance and strategic support or lessons learned reports to strengthen assistance in justice and corrections areas	1	1	1	1
20. Policies, standards and guidance on security sector reform, including defence sector reform, to strengthen assistance to national security sector reform processes	3	3	3	3
21. Technical materials for Member States, mine action programmes/field operations on issues related to mine action	1	3	1	2

#### C. Substantive deliverables

**Consultation, advice and advocacy:** consultations with and expert advice to 22 Member States to strengthen the capacities of national police services and other law enforcement entities; consultations with 47 Member States groupings, regional organizations and specialized institutions on policing; strategic consultations with 35 Member States on disarmament, demobilization and reintegration and community violence reduction, including with the Group of Friends of Disarmament, Demobilization and Reintegration; strategic policy and technical advice to 20 Member States to build the capacity of national authorities and local partners on mine action; expert advice to facilitate consensus-building on security sector reform options and modalities in “sustaining peace” contexts; consultations with and expert advice to mobilize coordinated and integrated Member States and related partner support for national justice and corrections efforts, including through the global focal point arrangement.

**Databases and substantive digital materials:** updated information on pledged formed police units registered in the Peacekeeping Capability Readiness System and other personnel matters in the computerized human resources system.

#### D. Communication deliverables

**Digital platforms and multimedia content:** digital and social media content on activities of the subprogramme.

<sup>a</sup> Mine action may include clearance of landmines and explosive remnants of war, security, management and destruction of weapons and ammunition stockpiles, and/or mitigation of threats from improvised explosive devices.

## Subprogramme 4 Policy, evaluation and training

### Objective

4.8 The objective, to which the subprogramme contributes, is to enhance the performance and effectiveness of peacekeeping operations.

### Deliverables

4.9 Table 4.4 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 4.4

**Subprogramme 4: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>1</b>	<b>1</b>	<b>1</b>	<b>1</b>
1. Report of the Secretary-General on the implementation of the recommendations of the Special Committee on Peacekeeping Operations	1	1	1	1
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>38</b>	<b>37</b>	<b>38</b>	<b>38</b>
2. Meetings of the Special Committee on Peacekeeping Operations	34	33	34	34
3. Meetings of the Fourth Committee	4	4	4	4
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects) <sup>a</sup>	<b>7</b>	<b>7</b>	<b>7</b>	<b>7</b>
4. Technical cooperation projects to provide thematic policy support in the areas of protection of civilians, child protection, civil affairs, conflict-related sexual violence, policy planning, partnerships and force generation	7	7	7	7
<b>Seminars, workshops and training events</b> (number of days)	<b>452</b>	<b>402</b>	<b>488</b>	<b>421</b>
5. Provision of strategic guidance, training-of-trainers and assistance to curriculum development and delivery, training methodology, materials and training gap identification to Member States, regional peacekeeping training and policy institutions, and field missions	378	382	419	365
6. Development and delivery of senior leadership, management and administration programmes for civilian and uniformed personnel from field missions and supporting offices, Member States and regional organizations	58	14	53	45
7. Workshops for mission thematic advisers and focal points for knowledge-sharing and training on cross-cutting peacekeeping issues	10	5	10	10
8. Workshops for the European Union and its Member States on a rotational system in support of United Nations peacekeeping operations	6	1	6	1
<b>Technical materials</b> (number of materials)	<b>34</b>	<b>32</b>	<b>38</b>	<b>38</b>
9. Policy papers, standard operating procedures, technical reports, lessons learned reports and training materials for Member States and field missions	30	28	34	34
10. Reports on capability requirements for United Nations peacekeeping operations	4	4	4	4
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> briefings and presentations to Member States and regional groups on peacekeeping issues; expert advice to permanent missions to the United Nations, the Bretton Woods institutions, international and regional organizations and non-governmental organizations on peacekeeping issues.				
<b>Databases and substantive digital materials:</b> update and maintenance of the Peacekeeping Capability Readiness System, the TCC/PCC knowledge management system, the policy and practice database and the peacekeeping resource hub accessible to all Member States.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> knowledge management newsletter sent to 15,000 staff; training newsletters sent to 120 troop- and police-contributing countries and their training institutions.				

<sup>a</sup> Revised to include extrabudgetary funded projects.

## Peacekeeping missions

### United Nations Truce Supervision Organization

#### Legislative mandates

4.10 The list below provides all mandates entrusted to the United Nations Truce Supervision Organization.

#### *Security Council resolutions*

50 (1948)	Cessation of hostilities in Palestine	73 (1949)	Armistice Agreements concluded by the parties involved in the conflict in Palestine
54 (1948)	Situation in Palestine		

#### Objective

4.11 The objective, to which the mission contributes, is to ensure adherence to the Armistice Agreements of 1949 and related agreements.

#### Deliverables

4.12 Table 4.5 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 4.5  
Deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>B. Generation and transfer of knowledge</b>				
<b>Seminars, workshops and training events</b> (number of days)	<b>12</b>	<b>3</b>	<b>14</b>	<b>16</b>
1. Seminars Analysis Team	2	2	2	2
2. Seminars (requested by Member States and international organizations)	10	1	12	14
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> liaison with national authorities in Egypt, Israel, Jordan, Lebanon and the Syrian Arab Republic to assess stability/security conditions, regional trend effects, potential disturbances among the parties and on peacekeeping areas of operation, and with the 27 troop-contributing countries, other Member State representatives and United Nations operations and organizations in the mission area; liaison and coordination with national officers in Egypt, Israel, Jordan, Lebanon and the Syrian Arab Republic and with local government officials, community leaders, international interlocutors, United Nations operations and country offices.				
<b>Fact-finding, monitoring and investigation missions:</b> daily observations, mobile patrols, reporting and investigations; mobile monitoring patrols and area familiarization training patrols.				
<b>E. Enabling deliverables</b>				
<b>Administration:</b> weekly, monthly and annual situation reports; analytical assessment and thematic reports and briefings; quarterly update briefs on each mandate country; tactical operational reports, including daily operational reports, incident reports and investigation reports; management and coordination of inter-mission support agreements with the Office of the Special Coordinator for the Middle East Peace Process and Personal Representative of the Secretary-General to the Palestine Liberation Organization and the Palestinian Authority, the United Nations Interim Force in Lebanon (UNIFIL) and the United Nations Disengagement Observer Force (UNDOF); and monthly induction training of incoming military observers prior to deployment to UNDOF and UNIFIL.				

# United Nations Military Observer Group in India and Pakistan

## Legislative mandates

4.13 The list below provides all mandates entrusted to the United Nations Military Observer Group in India and Pakistan (UNMOGIP).

### *Security Council resolutions*

39 (1948)	Establishment of the United Nations Commission for India and Pakistan to investigate and mediate the dispute	307 (1971)	Observation of a durable ceasefire and cessation of hostilities in Jammu and Kashmir
47 (1948)	Restoration of peace and order in Jammu and Kashmir and the holding of a plebiscite		

## Objective

4.14 The objective, to which UNMOGIP contributes, is to ensure that developments pertaining to ceasefire violations along the line of control are monitored in accordance with the mandate of UNMOGIP as contained in Security Council resolution [307 \(1971\)](#).

## Deliverables

4.15 Table 4.6 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 4.6  
Deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Substantive services for meetings</b> (number of three-hour meetings)	12	5	12	12

<b>C. Substantive deliverables</b>				
<b>Databases and substantive digital materials:</b> document filing and archiving system connectivity.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> outreach and advocacy through advertisements, brochures and peace caravans.				
<b>External and media relations:</b> media engagement.				
<b>Digital platforms and multimedia content:</b> website development/enhancement.				

## **Programme 5**

### **Peaceful uses of outer space**

#### **Overall orientation**

##### **Mandates and background**

5.1 The Office for Outer Space Affairs is responsible for advancing international cooperation in space activities. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolutions [1472 A \(XIV\)](#) and [74/82](#), on international cooperation in the peaceful uses of outer space, [75/69](#), on transparency and confidence-building measures in outer space activities, as appropriate, and [75/92](#), on the continuity of the work of the Committee on the Peaceful Uses of Outer Space and its subsidiary bodies, as appropriate.

5.2 The core functions of the Office are: (a) serving as the secretariat of the Committee on the Peaceful Uses of Outer Space and its subsidiary bodies (resolution [1472 A \(XIV\)](#)), as the executive secretariat of the International Committee on Global Navigation Satellite Systems and its Providers' Forum (resolutions [61/111](#) and [64/86](#)) and as the secretariat of the Space Mission Planning Advisory Group (resolution [71/90](#)); (b) implementing the United Nations Programme on Space Applications (resolutions [2601 \(XXIV\)](#) and [37/90](#)) and the Programme on the Platform for Space-based Information for Disaster Management and Emergency Response (UN-SPIDER) (resolution [61/110](#)); (c) maintaining the Register of Objects Launched into Outer Space (resolutions [1721 B \(XVI\)](#) and [3235 \(XXIX\)](#)); and (d) discharging the responsibilities of the Secretary-General under the United Nations treaties and principles on outer space and related resolutions (resolutions [2222 \(XXI\)](#), [2345 \(XXII\)](#), [2777 \(XXVI\)](#), [3235 \(XXIX\)](#), [34/68](#), [37/92](#), [41/65](#), [47/68](#), [59/115](#) and [62/101](#)).

5.3 New technologies and the increasing number of actors are rapidly changing the structure and content of space activities. The Office will implement the programme in this increasingly complex environment, which, combined with the relevance of space science and technology and their applications for achieving the goals of the global agenda, as well as the need to ensure the long-term sustainability of outer space activities, are the main drivers of the responsibilities of the Office under the programme.

#### **Programme of work**

##### **Objective**

5.4 The objective, to which this programme contributes, is to strengthen international cooperation in the conduct of space activities for peaceful purposes and advance the use of space science and technology and their applications.

##### **Strategy**

5.5 To contribute to the objective, the Office for Outer Space Affairs will continue to work with Member States to promote cooperation in the peaceful uses of outer space, particularly through substantive secretariat services to the Committee on the Peaceful Uses of Outer Space, the Scientific and Technical Subcommittee, the Legal Subcommittee and their working groups, among which is the Working Group on the Long-term Sustainability of Outer Space Activities. The Working Group, under a five-

year workplan, will be guided by the following framework: (a) identifying and studying challenges and considering possible new guidelines for the long-term sustainability of outer space activities; (b) sharing experiences, practices and lessons learned from the voluntary national implementation of the adopted guidelines; and (c) raising awareness and building capacity, in particular among emerging space nations and developing countries. The Committee on the Peaceful Uses of Outer Space serves as the principal forum for continued institutionalized dialogue on issues related to the implementation and review of the guidelines. The Office would also support and provide services to the International Committee on Global Navigation Satellite Systems and its Providers' Forum and the Space Mission Planning Advisory Group.

5.6 The Office also plans to work with Member States, inter- and non-governmental entities and other partners to implement specific initiatives and activities to advocate for the responsible use of outer space, including through: (a) the implementation of the international regime governing space activities; (b) the registration of space objects launched into outer space; (c) space debris mitigation; (d) transparency and confidence-building measures in outer space activities as appropriate; and (e) civil satellite-based positioning, navigation, timing and value added services, which will help Member States make progress towards ensuring a more safe, secure and sustainable outer space.

5.7 The Office will, in line with its mandate, deliver workshops, seminars, training courses, technical advisory missions and initiatives and provide support and other services to assist States with: (a) building or enhancing their capacities in areas such as space law and policy, space sustainability, climate change, environmental monitoring, natural resources management, global health, satellite communications, space weather, space exploration, astronomy, search and rescue, disaster risk reduction and global navigation satellite systems; (b) promoting and enhancing knowledge-sharing; (c) supporting institution-building efforts; and (d) developing collaborative platforms to increase the number of countries, in particular developing countries, that make use of space-based solutions to accelerate the achievement of the Sustainable Development Goals.

5.8 The Office also plans to continue supporting the regional centres for space science and technology education, established by and affiliated with the United Nations, located in Africa (Morocco and Nigeria), Asia and the Pacific (China and India), Latin America and the Caribbean (Brazil and Mexico) and Western Asia (Jordan), which, inter alia, deliver education and training in one or more of the following disciplines: remote sensing and geographic information systems; meteorological satellite applications; satellite communications and geopositioning systems; space and atmospheric science; and global navigation satellite systems.

5.9 The Office will further continue to raise awareness on the work of the Committee on the Peaceful Uses of Outer Space, the activities and initiatives of the Office and on the benefits of space activities, especially with regard to achieving sustainable development, by: (a) organizing outreach activities, including the commemoration of historical milestones, international days and other celebrations; and (b) developing and issuing publications, papers, information materials and training media.

5.10 For 2022, the Office's planned deliverables and activities reflect strengthened approaches which incorporate lessons from the coronavirus disease (COVID-19) pandemic. Such planned deliverables and activities include assistance and capacity development on the use of space technologies to address resilient recovery efforts, increasing the development of online courses and training materials and making greater use of national experts, when possible, to ensure continuity of services.

5.11 The above-mentioned work is expected to result in:

- (a) Greater understanding, acceptance and application of the international legal regime governing outer space activities;
- (b) Greater access to space, and strengthened capacity of countries, in particular developing countries, in using science and technology and related applications, especially with regard to achieving sustainable development;
- (c) Enhanced cooperation and greater compatibility and interoperability of global navigation satellite systems;
- (d) Greater understanding, access and capacity to use all types of space-based information and services to support disaster risk reduction and emergency response;
- (e) Strengthened cooperative relationships and the forging of new partnerships to maximize the effective use of resources, and identify new ways and means to make space capabilities more readily available to all users.

## **External factors for 2022**

5.12 With regard to the external factors, the overall plan for 2022 is based on the planning assumption that stakeholders are able and willing to continue supporting the Office for Outer Space Affairs in implementing the programme, including the execution of the activities in the anticipated framework, and in responding to the needs arising from the rapidly changing structure and content of space activities.

5.13 With regard to the COVID-19 pandemic, the programme plan is based on the assumption that the proposed deliverables and activities for 2022 will be feasible to implement. However, if the pandemic were to continue to have an impact on the planned deliverables and activities, they would be adjusted during 2022 within the scope of the overall objectives, strategies and mandates. Any such adjustments would be reported as part of the programme performance information.

5.14 With regard to cooperation with other entities at the global, regional, national and local levels, the Office will, in line with its mandate, continue to leverage its established partnerships with governmental, intergovernmental and non-governmental organizations, including space agencies, industry, academia, institutions and other space-related entities, to explore avenues and pursue new opportunities to increase its capability to meet the growing demand for support to strengthen the capacity of countries, in particular developing countries, in using space science and technology and their applications. The Office will also pursue cooperative relationships, including with the private sector, to identify new mechanisms for providing access to space and bringing the benefits of space to everyone. In this regard, the Office will enhance transparency in its programme activities and regularly inform the Committee on the Peaceful Uses of Outer Space of the project being implemented and of its partnerships with space agencies, governmental and non-governmental organizations and the private sector.

5.15 With regard to inter-agency coordination and liaison, the Office will continue to lead the Inter-Agency Meeting on Outer Space Activities (UN-Space), which promotes coordination and cooperation among the participating entities. Through that mechanism, the Office will work to increase coherence and synergies in the space-related work of entities of the United Nations system, including through the establishment of bilateral engagements on specific topics of mutual interest.

5.16 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate, as demonstrated by the launch in 2020, on the

occasion of the International Day of Women and Girls in Science, of the Space4Women platform, a dedicated website to promote women's empowerment in space and advocate for greater awareness and the importance of science, technology, engineering and mathematics (STEM) education. The platform also includes a mentorship programme where professionals of diverse backgrounds and geographic regions who work in the space sector can work with mentees to inspire, guide and encourage women and girls to pursue STEM careers. The Office also instituted a set of guidelines for its staff to apply to increase the participation of women in its events and activities, which will continue to be mainstreamed in future events and activities.

5.17 The Office will further seek to integrate disability inclusion in its programme of activities, and work with specialized associations and agencies, including by engaging decision makers, to facilitate and assist initiatives that target inclusivity in space science and enhance the prospects of careers in STEM for disabled persons.

### **Evaluation activities**

5.18 No self-evaluations were completed in 2020. The self-evaluation of the Beijing Office of UN-SPIDER was initiated in the latter half of 2020 and will be completed in 2021, and the findings are expected to be integrated into the annual workplan and strategy of the Beijing Office for the period 2021–2024.

5.19 A self-evaluation of the information technology and communications needs of the Office aimed towards consolidating its websites, databases and portals to ensure alignment with the United Nations policies and guidelines on website rationalization and compliance is planned for 2022.

### **Programme performance in 2020**

5.20 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

#### **Greater access to capacity development during the pandemic**

5.21 Among the core functions of the Office is the annual delivery of a number of activities, services and initiatives to assist interested Member States, upon their request, particularly developing countries, in developing greater capacity in space science and technology and their applications. The Office, confronted with the unexpected and significant disruption to well-established working methods and operations brought on by the COVID-19 pandemic, adapted and sought executable solutions to deliver on its commitments. This included shifting selected activities into an online format, such as the series on space law and policy, the workshop on the use of space applications for climate action and the World Space Forum, which served to foster dialogue and an exchange of good practices and strengthened partnerships and inter-agency collaboration. Virtual modalities expanded the reach of the selected activities to a greater number of participants and facilitated more flexible delivery approaches to advance more tailored and specific opportunities for learning based on specific needs.

5.22 The Office also developed and implemented new activities that were delivered virtually, including a series of webinars on space economy, and a series of training meetings dedicated to supporting teams and participants from developing countries in applying for future opportunities under the Access to Space for All initiative. Furthermore, the Office worked with relevant stakeholders, including the Regional Centre for Space Science and Technology Education in India, to fast-track the

development and launch of an online training course on the use of geospatial applications for disaster risk management.

*Progress towards the attainment of the objective, and performance measure*

5.23 The above-mentioned work contributed to the objective, as demonstrated by 2,282 participants in virtual events compared with 1,161 and 557 participants at in-person events held in 2019 and 2018, respectively (see figure 5.I).

Figure 5.I

**Performance measure: annual number of participants in events**

**Impact of COVID-19 on programme delivery**

5.24 During 2020, the COVID-19 pandemic had an impact on the planned deliverables and activities of the Office for Outer Space Affairs. The impact included: (a) the cancellation of the sessions of two intergovernmental bodies, namely the Legal Subcommittee and the Committee on the Peaceful Uses of Outer Space; (b) the postponement of the International Committee on Global Navigation Satellite Systems and its Providers' Forum; (c) the postponement of the Inter-Agency Meeting on Outer Space Activities (UN-Space) and the related open forum; and (d) in coordination with the host governments of the activities, the postponement (beyond 2020) of selected seminars, workshops, training events, fellowship opportunities and technical advisory missions that could not be provided using other means or delivered online. These included the postponement of two opportunities that had been prepared to support teams selected from two developing countries to undertake hyper- and microgravity research and experiments. Wherever practical, the Office reconfigured seminars, workshops and training events to allow for their delivery online and provided technical and legal advisory services through webinars and other online means. In addition, the Office developed national capacity in the use of space-based solutions for disaster risk reduction and emergency response by embedding two locally recruited experts in the disaster management institutions of their respective countries as an alternative to transporting a team of experts to those countries. The Office also delivered a series of webinars on space economy, conducted online meetings to support applicants from developing countries with the preparation of their applications for the opportunities available under the Access to Space for All initiative, and delivered massive open online courses on the use of geospatial applications for disaster risk management. These changes had an impact on the programme performance in 2020, as specified under result 2 below.

5.25 At the same time, however, the Office identified new opportunities and modified planned activities to support Member States on issues related to the COVID-19

pandemic, within the overall scope of the objective of the programme. The Office created a COVID-19 emergency response overview page on the UN-SPIDER knowledge portal to provide a one-stop platform that showcased examples of the contributions of space technologies to addressing COVID-19, published by government agencies, international and regional organizations, academia, civil society and the private sector. The collection of resources was complemented with a dedicated webinar on “Space4Health”. The modified and new deliverables contributed to results in 2020, as specified in the emerging result above.

5.26 Reflecting the importance of continuous improvement and responding to the evolving needs of Member States, the programme will mainstream lessons learned and best practices related to the adjustments to and adaptation of its programme owing to the COVID-19 pandemic. Specific examples of its build back better model include the execution of workshops and training activities in selected subject areas by virtual means, such as the series implemented in 2020 on space economy. Furthermore, the Office will develop, and host online, more training materials and other education media to extend such opportunities to a greater number of participants in a greater number of countries.

## **Planned results for 2022**

5.27 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: access to space for all<sup>1</sup>**

#### **Programme performance in 2020**

5.28 The Office has continued to support interested Member States, upon their request, in strengthening their capacity to use space science and technology and related applications, especially with regard to increasing their domestic satellite development capability. The Office, in partnership with the launch provider, identified the next team under the programme, constituting the first beneficiary selected from a regional intergovernmental organization, and provided continuous technical support to those Member States that are building their first small satellite prior to the satellite being handed over to the provider for launch. Furthermore, in 2020 the Office extended the partnership agreement, which allowed the opportunities under the programme to continue through 2024, and consequently published the announcement of one more opportunity for interested Member States to develop their first satellite under the auspices of the United Nations.

5.29 The above-mentioned work contributed to Guatemala successfully concluding the development of its first satellite in 2019 and placing it into Earth’s orbit in 2020. The launch of the satellite brought the total number of developing countries acquiring domestic satellite development capability and launching their first satellite under this partnership to two, which did not meet the planned target of three reflected in the proposed programme budget for 2020. The planned 2020 target was not met owing to the need to identify a new launch window to allow for additional time to technically prepare the satellite.

<sup>1</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 6)).

### Proposed programme plan for 2022

5.30 The Office will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective and in response to recent developments, the Office's work will evolve to take into account the need to provide more support to the teams that have been successful in securing an opportunity under the programme, and to allow for more time for testing and determining the technical readiness of the small satellites being developed in order to better align the handover period of the satellite to the provider in time for the identified launch period. The expected progress is presented in the updated performance measure below (see figure 5.II).

Figure 5.II

**Performance measure: total cumulative number of developing countries to have launched their first satellite into outer space**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 2: increasing access to space<sup>2</sup>

#### Programme performance in 2020

5.31 The Office has continued efforts to increase access to space by offering opportunities to countries to develop the capacity to build and launch a small satellite, and to undertake hypergravity and microgravity experiments. The Office organized a series of online events dedicated to each of those opportunities to support interested participants and teams in the preparation of successful applications by providing technical advice and showcasing good practices from previous beneficiaries. Furthermore, the Office, together with its launch partner, announced the selection of three additional teams to fly their experiments in orbit, worked to establish and renew partnerships with stakeholders to expand services to Member States and undertook outreach and advocacy activities to ensure the responsible conduct of space activities and the registration of space objects launched into outer space, and to provide support on space law and policy for new space actors.

5.32 The above-mentioned work contributed to a total of five Member States gaining access to space by 2020, which did not meet the target of eight reflected in the programme budget for 2021. Owing to COVID-19 travel restrictions, two of the teams selected to undertake hypergravity and microgravity research could not take

<sup>2</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

advantage of the available opportunities. The rescheduling of the launch of the first satellite built by Guatemala from 2019 to 2020 further affected the planned result.

### Proposed programme plan for 2022

5.33 The Office will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the Office will continue working to expand the range of opportunities for developing countries to undertake cutting-edge research, including operating a payload on a space station or receiving telescopes and training to observe the universe. The expected progress is presented in the performance measure below (see figure 5.III).

Figure 5.III

**Performance measure: total cumulative number of Member States gaining access to space**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: a more secure global navigation satellite systems spectrum

#### Proposed programme plan for 2022

5.34 The advantages of satellite-based positioning, navigation and timing services are widespread, ranging from enabling precision agriculture to providing precise timing used for automated teller machine transactions and reliable navigation for the take-off and landing of aircraft. Global navigation satellite systems signals are, however, vulnerable to interference, including from television stations, mobile phone networks and jamming and spoofing devices, making prudent spectrum management (i.e., the management of frequencies) a priority to ensure that the services reliant on those signals continue to be seamlessly available. The Office, as executive secretariat to the International Committee on Global Navigation Satellite Systems, provides services and supports multilateral discussions and coordination on issues relating to global navigation satellite systems, and organizes regional workshops, training courses and technical seminars on the use of technologies related to those systems, including on the protection of the global navigation satellite system spectrum from harmful interference.

#### *Lessons learned and planned change*

5.35 The lesson for the Office as the executive secretariat to the International Committee on Global Navigation Satellite Systems was the need to support its activities in fostering greater awareness and understanding of the need to protect the

spectrum, efforts at both the international and national levels to minimize signal errors and maximize the performance of global navigation satellite system receivers for more reliable positioning and timing, which, together with Earth observation, contribute to the achievement of the Sustainable Development Goals. In applying the lesson, the Office will include in its portfolio of capacity-building activities a greater focus on promoting and facilitating more discussion among experts and regulators, including from developing countries, on spectrum protection, interference detection and mitigation. The Office will further work to develop education materials and other information on the protection of global navigation satellite systems signals that can be disseminated broadly and integrated into the education curricula available to the United Nations-affiliated regional centres for space science and technology education.

*Expected progress towards the attainment of the objective, and performance measure*

5.36 This work is expected to contribute to the objective, as demonstrated by 124 specialists provided with access to training in global navigation satellite systems spectrum protection and interference detection and mitigation (see figure 5.IV).

Figure 5.IV

**Performance measure: total cumulative number of specialists provided with access to training in global navigation satellite systems spectrum protection and interference detection and mitigation**

## Legislative mandates

5.37 The list below provides all mandates entrusted to the programme.

*General Assembly resolutions*

1472 A (XIV)	International cooperation in the peaceful uses of outer space	2601 (XXIV)	International cooperation in the peaceful uses of outer space
1721 B (XVI)	International cooperation in the peaceful uses of outer space	2777 (XXVI)	Convention on International Liability for Damage Caused by Space Objects
2222 (XXI)	Treaty on Principles Governing the Activities of States in the Exploration and Use of Outer Space, including the Moon and Other Celestial Bodies	3234 (XXIX)	International cooperation in the peaceful uses of outer space
		3235 (XXIX)	Convention on Registration of Objects Launched into Outer Space
2345 (XXII)	Agreement on the Rescue of Astronauts, the Return of Astronauts and the Return of Objects Launched into Outer Space	34/68	Agreement Governing the Activities of States on the Moon and Other Celestial Bodies
2453 (XXIII)	International cooperation in the peaceful uses of outer space	37/90	Second United Nations Conference on the Exploration and Peaceful Uses of Outer Space

37/92	Principles Governing the Use by States of Artificial Earth Satellites for International Direct Television Broadcasting	69/283	Sendai Framework for Disaster Risk Reduction 2015–2030
41/65	Principles Relating to Remote Sensing of the Earth from Outer Space	70/1	Transforming our world: the 2030 Agenda for Sustainable Development
47/68	Principles Relevant to the Use of Nuclear Power Sources in Outer Space	72/78	Declaration on the fiftieth anniversary of the Treaty on Principles Governing the Activities of States in the Exploration and Use of Outer Space, including the Moon and Other Celestial Bodies
54/68	Third United Nations Conference on the Exploration and Peaceful Uses of Outer Space		
59/2	Review of the implementation of the recommendations of the Third United Nations Conference on the Exploration and Peaceful Uses of Outer Space	72/79	Consideration of the fiftieth anniversary of the United Nations Conference on the Exploration and Peaceful Uses of Outer Space
59/115	Application of the concept of the “launching State”	73/6	Fiftieth anniversary of the first United Nations Conference on the Exploration and Peaceful Uses of Outer Space: space as a driver of sustainable development
61/110	United Nations Platform for Space-based Information for Disaster Management and Emergency Response	74/115	International cooperation on humanitarian assistance in the field of natural disasters, from relief to development
61/111; 64/86; 71/90; 74/82	International cooperation in the peaceful uses of outer space	75/36	Reducing space threats through norms, rules and principles of responsible behaviours
62/101	Recommendations on enhancing the practice of States and international intergovernmental organizations in registering space objects	75/92	Continuity of the work of the Committee on the Peaceful Uses of Outer Space and its subsidiary bodies
65/271	International Day of Human Space Flight	75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system
68/74	Recommendations on national legislation relevant to the peaceful exploration and use of outer space		

*Conference of the Parties to the United Nations Framework Convention on Climate Change decisions*

1/CP.21 Adoption of the Paris Agreement

## Deliverables

5.38 The table below lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

### Deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>95</b>	<b>66</b>	<b>90</b>	<b>90</b>
1. Reports to the Committee on the Peaceful Uses of Outer Space, including its Scientific and Technical and Legal Subcommittees	95	66	90	90
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>74</b>	<b>27</b>	<b>62</b>	<b>62</b>
2. Meetings of the Fifth Committee	1	1	1	1
3. Meetings of the Committee for Programme and Coordination	1	1	1	1
4. Meetings of the Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
5. Meetings of the Fourth Committee and its Working Group of the Whole on the agenda item entitled “International cooperation in the peaceful uses of outer space”	3	3	3	3

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
6. Meetings of the Committee on the Peaceful Uses of Outer Space, including its Scientific and Technical and Legal Subcommittees	58	20	56	56
7. Intersessional consultations of the Working Group on the "Space2030" Agenda	10	—	—	—
8. Intersessional consultations on the Bureau for the Working Group on Long-term Sustainability of Outer Space Activities	—	1	—	—
<b>Conference and secretariat services for meetings</b> (number of three-hour meetings)	<b>14</b>	<b>4</b>	<b>14</b>	<b>14</b>
9. Executive secretariat services to the International Committee on Global Navigation Satellite Systems and its Providers' Forum	10	—	10	10
10. Secretariat services to the Space Mission Planning Advisory Group	4	4	4	4
<b>B. Generation and transfer of knowledge</b>				
<b>Seminars, workshops and training events</b> (number of days)	<b>42</b>	<b>40</b>	<b>54</b>	<b>76</b>
11. Workshops and technical advisory meetings on space law and policy and other legal aspects of space activities, including for new space actors	3	8	3	15
12. Seminars, workshops, training events and research opportunities on space science and technology and their applications	20	14	24	24
13. Training events and courses on the use of space technology in disaster management	11	11	19	30
14. World Space Forum	4	2	4	3
15. Panels and meetings on space for women	3	5	3	3
16. Open forum for Member States and United Nations entities on the use of space technology	1	—	1	1
<b>Publications</b> (number of publications)	<b>5</b>	<b>1</b>	<b>5</b>	<b>8</b>
17. Publications on the work and activities of the Office and the Committee on the Peaceful Uses of Outer Space	5	1	5	8
<b>Technical materials</b> (number of materials)	<b>39</b>	<b>55</b>	<b>54</b>	<b>59</b>
18. Information furnished in accordance with the United Nations treaties and principles on outer space	4	8	4	4
19. Information furnished in accordance with the Convention on Registration of Objects Launched into Outer Space and General Assembly resolution 1721 B (XVI)	35	47	50	55

### C. Substantive deliverables

**Consultation, advice and advocacy:** normative support to Working Group C (on information dissemination and capacity-building) of the International Committee on Global Navigation Satellite Systems; expert advice, technical assistance and advisory support and services to Member States, at their request, on: (a) registration of more than 1,200 space objects launched into outer space; (b) space science and technology and their applications; (c) educational and operational activities of the six regional centres for space science and technology education affiliated with the United Nations; (d) the use of space-based information in disaster management plans and policies and in the implementation of disaster risk management activities in approximately four Member States; and (e) space-based information to end users to support emergency and humanitarian response in at least five developing countries; long-term fellowship opportunities in the field of space science and technology and related applications; massive online open courses; normative support to the Space4Women network, which has global reach and geographic diversity; and provision of secretariat services to the annual session (2 days) of UN-Space.

**Databases and substantive digital materials:** updating and maintenance of the following websites and databases: (a) Register of Objects Launched into Outer Space; (b) information furnished in accordance with United Nations treaties and principles on outer space; (c) Office for Outer Space Affairs website and related databases; (d) UN-SPIDER knowledge portal; (e) the International Committee on Global Navigation Satellite Systems portal; (f) the Space4Water portal; (g) the Space Solutions Compendium; (h) the Space4Women website; (i) the Space Sustainability website; and (j) the National Space Law collection.

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

#### **D. Communication deliverables**

**Outreach programmes, special events and information materials:** exhibits showcasing the benefits of space technology; presentations to Member States, intergovernmental organizations and non-governmental entities on the work of the United Nations in outer space activities; promotional, educational and information materials for public awareness-raising to showcase the work of the Committee of the Peaceful Uses of Outer Space, United Nations space activities and the Office; and celebrations of achievements and other anniversaries relating to outer space.

**External and media relations:** press releases and press conferences on work of the Office and the Committee on the Peaceful Uses of Outer Space and its subsidiary bodies and selected areas of the Office.

## **Programme 6**

### **Legal affairs**

#### **Overall orientation**

##### **Mandates and background**

6.1 The Office of Legal Affairs is responsible for providing a unified central legal service for the Organization; represents the Secretary-General in legal conferences and in judicial proceedings; performs substantive and secretariat functions for organs involved in public international law, including the General Assembly and its Sixth Committee (Legal Committee), the International Law Commission and the United Nations Commission on International Trade Law (UNCITRAL), as well as for the General Assembly plenary meetings concerning oceans and the law of the sea; and performs the depositary functions of the Secretary-General for multilateral treaties and the functions of registration and publication of treaties conferred on the Secretariat in Article 102 of the Charter of the United Nations. The structure and main functions of the Office are described in Secretary-General's bulletin [ST/SGB/2021/1](#).

6.2 The mandate derives from Articles 13, 102, 104, 105 and other relevant provisions of the Charter, as well as the priorities established in relevant General Assembly resolutions, including resolution [13 \(I\)](#) of 13 February 1946, as the central legal service for the Organization (including funds and programmes and treaty bodies institutionally linked to the Organization). The Office of Legal Affairs discharges mandates from the priorities established in relevant Assembly resolutions and decisions, including resolution [2205 \(XXI\)](#), by which the Assembly established UNCITRAL to further the progressive harmonization and unification of the law of international trade, with the Office's International Trade Law Division acting as its secretariat, and resolution [68/70](#), on oceans and the law of the sea, by which the Assembly established the Office as focal point of UN-Oceans. Furthermore, the Secretary-General of the United Nations has appointed the Under-Secretary-General for Legal Affairs and United Nations Legal Counsel as Secretary-General of the Intergovernmental Conference on an international legally binding instrument under the United Nations Convention on the Law of the Sea on the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction and, pursuant to resolution [73/292](#), Special Adviser on oceans and legal matters to the Presidents of the United Nations Conference to Support the Implementation of Sustainable Development Goal 14: Conserve and sustainably use the oceans, seas and marine resources for sustainable development.

##### **Strategy and external factors for 2022**

6.3 The relevance of the services of the Office of Legal Affairs has grown in an increasingly interconnected world in which international law is the foundation for Member States to interact and cooperate in achieving their common goals. Now in its seventy-fifth year, the Office continues to respond to the needs of its stakeholders and beneficiaries with a specialized legal skill set, institutional memory, credibility and neutrality, while delivering on a diverse and complex mandate.

6.4 In the current challenging context, the Office of Legal Affairs will continue to respond to the increasing demand for legal services from the Secretariat and other United Nations organs, including through the provision of advice on questions relating to the interpretation and application of international law instruments and on general questions of public international law, to ensure that legal considerations are

an integral part of the Organization's operations and the effective functioning of its principal and subsidiary organs. The Office will continue to respond in an agile manner to new types of requests concerning legal and procedural issues to ensure business continuity of various United Nations intergovernmental bodies during the pandemic.

6.5 The Office of Legal Affairs will continue to support Member States in the implementation of the 2030 Agenda for Sustainable Development, including in the circumstances created by the coronavirus disease (COVID-19), and be a key partner in the United Nations system efforts to advance the decade of action and delivery for sustainable development.

6.6 The Office of Legal Affairs will also continue to contribute to the development of international justice and accountability and support with legal advice the reform initiated by the Secretary-General.

6.7 The Office of Legal Affairs will further continue to contribute to the efforts to combat sexual exploitation and abuse, whether committed by United Nations personnel or by non-United Nations security forces operating under a United Nations mandate, and it assumes an important role in the Organization's action to improve its response to allegations of such behaviour and in its efforts to hold accountable personnel who have engaged in sexual exploitation and abuse.

6.8 The Office of Legal Affairs will continue to maximize the protection of the legal interests of the Organization and minimize its legal liabilities. The Office will continue to advise on the legal aspects arising from United Nations operational activities, including from its peacekeeping, special political and other missions, while also providing legal services for resolving disputes of a private law character involving the operations of the Organization, its subsidiary bodies and organs or its separately administered funds and programmes.

6.9 The Office of Legal Affairs will also continue to support the progressive development and codification of international law and the conclusion of legal instruments resulting in the promotion of universal respect for international law, including by continuing to serve as the secretariat of the Sixth Committee, as well as by providing specialized support and advice to the International Law Commission, the Special Committee on the Charter of the United Nations and on the Strengthening of the Role of the Organization, other special or ad hoc committees and diplomatic conferences in their consideration and formulation of legal instruments. The strategy of the Office will continue to strengthen the dissemination of international law through training programmes the United Nations Audiovisual Library of International Law and major legal publications.

6.10 The Office of Legal Affairs will further continue to support processes related to oceans and the law of the sea and the increased participation of States in, and effective implementation and application of, the United Nations Convention on the Law of the Sea and its implementing agreements, as well as the implementation of the ocean-related Sustainable Development Goals, in particular by providing secretariat functions to oceans-related processes of the General Assembly and the Commission on the Limits of the Continental Shelf. The Office will also continue to deliver expanded capacity-building activities on that topic, including by focusing on meeting the capacity-building needs of developing countries and by relying, when possible, on information and communications technology.

6.11 The Office of Legal Affairs will continue to promote harmonized and modernized substantive private law rules to govern international commercial transactions, in particular by ensuring the widespread adoption and use of those rules, strengthening technical cooperation and promoting the participation of developing

countries in the law-making activities of UNCITRAL. The Office will support Member States in the preparation of universally acceptable legislative and non-legislative texts (treaties, model laws, legislative guides and recommendations), ensuring quality and consistency in the provision of that support and using delivery mechanisms that take COVID-19 restrictions into account, as necessary.

6.12 The Office of Legal Affairs will intensify the use of technological tools and other means to maximize the delivery of its work related to treaties and treaty actions through its dedicated website, and maintain cooperation with Member States, specialized agencies, United Nations programmes and offices, treaty bodies and other entities on the law of treaties to promote and ensure wider knowledge of the law of treaties, thereby preventing issues of interpretation and implementation of treaty provisions by contracting States.

6.13 For 2022, the planned deliverables and activities of the Office of Legal Affairs reflect strengthened approaches that incorporate lessons learned from the COVID-19 pandemic. Such planned deliverables and activities include providing support to ensure business continuity and, when possible, adapt capacity-building programmes both in delivery and focus to contribute to global recovery efforts. Specific examples of planned deliverables and activities are provided under subprogrammes 2 (General legal services provided to United Nations organs and programmes), 3 (Progressive development and codification of international law), 4 (Law of the sea and ocean affairs) and 5 (Progressive harmonization, modernization and unification of the law of international trade). The support provided to Member States on issues related to COVID-19 is expected to contribute to planned results for 2022, as described under subprogramme 5.

6.14 With regard to cooperation with other entities at the global, regional, national and local levels, the Office of Legal Affairs will continue to enable the International Law Commission to exchange knowledge, experience and ideas with the President of the International Court of Justice, the African Union Commission on International Law, the Inter-American Juridical Committee, the Asian-African Legal Consultative Organization and the Committee of Legal Advisers on Public International Law of the Council of Europe, as well as with the networks of legal advisers of United Nations agencies and funds and programmes. Through the Division for Ocean Affairs and the Law of the Sea, the Office will also continue to cooperate with States, bodies established under the United Nations Convention on the Law of the Sea, international financial institutions, donor agencies, intergovernmental organizations, non-governmental organizations (NGOs) and natural and juridical persons in the field of law of the sea and ocean governance. Through the International Trade Law Division, the Office will continue to cooperate with States, international financial institutions, donor agencies, intergovernmental organizations, NGOs and natural and juridical persons in the field of international trade law.

6.15 With regard to inter-agency coordination and liaison, the Office of Legal Affairs has been appointed by the General Assembly in its resolution [68/70](#) as focal point of UN-Oceans, the inter-agency coordination mechanism on oceans and coastal issues within the United Nations system. UN-Oceans currently has 29 members, including competent international organizations, specialized agencies, United Nations programmes, regional commissions, the secretariats of conventions and the International Seabed Authority. In addition, in implementing General Assembly resolution [2205 \(XXI\)](#), on the establishment of UNCITRAL, the Office coordinates the work of organizations dealing with international trade law and encourages cooperation among them.

6.16 With regard to the external factors, the overall plan for 2022 is based on the following planning assumptions:

(a) Extrabudgetary resources are available, allowing the Office of Legal Affairs to respond to the increased demand for its services and complement the programme budget;

(b) Principal and subsidiary organs of the United Nations continue to request legal advice as a main component of the decision-making process, and the volume of requests is expected to continue at elevated levels, as was experienced in 2020 when the pandemic began;

(c) Specific mandates related to international trade law, oceans and law of the sea and others are renewed or confirmed by the competent intergovernmental bodies.

6.17 With regard to the COVID-19 pandemic, the proposed programme plan is based on the assumption that the proposed deliverables and activities for 2022 will be feasible to implement. However, if the pandemic were to continue to have an impact on the planned deliverables and activities, they would be adjusted during 2022 within the scope of the overall objectives, strategies and mandates. Any such adjustments would be reported as part of the programme performance information.

6.18 The Office of Legal Affairs integrates a gender perspective in its operational activities, deliverables and results, as appropriate, including through permanent interaction with the gender focal points in each division.

6.19 The Office of Legal Affairs integrates disability inclusion in its operational activities, deliverables and results, as appropriate. Through the work of its subprogrammes, the Office follows through its focal point all directives of the United Nations Disability Inclusion Strategy.

## **Programme performance in 2020**

### **Impact of COVID-19 on programme delivery**

6.20 During 2020, the COVID-19 pandemic had an impact on the planned deliverables and activities of the Office of Legal Affairs, notably the cancellation or postponement of meetings of intergovernmental processes and expert bodies, conferences hosted by or under the auspices of the United Nations and seminars, workshops and training events to be held by the Office. Specific examples of the impact are provided under subprogrammes 1, 3, 4, 5 and 6. The change in approach of planned deliverables and activities also had an impact on the expected results for 2020, as described in the programme performance under subprogrammes 1, 4 and 5.

6.21 At the same time, however, some planned deliverables and activities were modified and new activities were identified during 2020, within the overall scope of the objectives of the subprogrammes, in order to support Member States on issues related to the COVID-19 pandemic. Those modifications and new activities included analyses and advice to Member States and United Nations intergovernmental bodies, including the General Assembly and the Security Council, with regard to novel legal and procedural questions; support for Member States in the identification of solutions to ensure the business continuity of intergovernmental bodies during the pandemic, including considerable efforts undertaken to enable consultations through virtual platforms or by correspondence; comprehensive advice to United Nations Secretariat departments, other entities of the United Nations system and Member States to address the legal implications of hosting events at United Nations Headquarters and in connection to measures undertaken in response to the pandemic; the holding of events to engage with Member States in support of their responses to COVID-19; and recovery efforts and the provision of remote workshop and training materials to a wider audience. Specific examples of the new or modified activities are provided

under subprogrammes 1, 2, 3, 4 and 5. The new or modified deliverables and activities contributed to results in 2020, as described in the programme performance under subprogrammes 1, 2, 3, 4 and 5.

6.22 Reflecting on the importance of continuous improvement and responding to the evolving needs of Member States, the Office of Legal Affairs will continue to mainstream lessons learned and best practices emerging from the adjustments and adaptation of its programme to the COVID-19 pandemic by continuing to explore alternatives to certain in-person capacity-building activities. This will be done taking into consideration the fact that, in view of the experience of and feedback from participants, some in-person capacity-building programmes cannot be replaced by activities conducted online, in particular the training programmes under the United Nations Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law. The circumstances created by COVID-19 restrictions did, however, lead to the development of certain interim measures, such as the preparation of a self-paced online learning curriculum, which was distributed to all applicants for the aforementioned training programmes. The Office will also continue to disseminate the self-paced curriculum widely as part of its build back better approach, including to future candidates whose applications have not been successful.

## Legislative mandates

6.23 The list below provides all mandates entrusted to the programme.

### *Charter of the United Nations*

Article 13

Article 102

Article 98

### *General Assembly resolutions*

13 (I) Organization of the Secretariat

## Deliverables

6.24 Table 6.1 lists all cross-cutting deliverables, by category and subcategory, for the period 2020–2022.

Table 6.1

<b>B. Generation and transfer of knowledge</b>				
<b>Seminars, workshops and training events</b> (number of days) <sup>a</sup>	<b>2</b>	<b>4</b>	<b>2</b>	<b>4</b>
10. Workshops on international law generally	2	4	2	4
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> advice and legal opinions in the context of the participation of the Legal Counsel in the Senior Management Group, the Executive Committee and other ad hoc groups.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> speeches and presentations by the Legal Counsel to Member State representatives, international organizations and academic and civil society organizations regarding the work of the Office of Legal Affairs and issues of public international law, the law of the sea and international trade law; promotion and leadership of the annual treaty event during the opening plenary meeting of the General Assembly session; and events to promote international law in New York, including the American Bar Association Day and International Law Weekend.				
<b>E. Enabling deliverables</b>				
<b>Internal justice and oversight:</b> representation of the Secretary-General before the United Nations Appeals Tribunal and advice on administrative law of the Organization.				
<b>Legal services:</b> legal advice, opinions and services to all principal and subsidiary organs of the United Nations, as detailed in the subprogrammes, on privileges and immunities, public international law, humanitarian law, international human rights law and the amicable settlement of disputes; administrative law of the Organization; claims arising from operational activities of the Organization; procurement activities; and the Organization's accountability measures and the areas of oceans and law of the sea, treaty law and international trade law.				

<sup>a</sup> Deliverables 12–14 adopted in the programme budget for 2021 (see [A/75/6/Add.1](#), table 6.1) are reflected in the present report under subprogramme 3.

## Evaluation activities

6.25 The Office of Legal Affairs will continue to strengthen its monitoring and evaluation functions, mainly through its Evaluation and Strategic Planning Unit and the Evaluation Working Group established within the Office. The adoption of a new evaluation policy, new standard operating procedures and the participation as observer in the United Nations Evaluation Group will continue to strengthen evaluation efforts.

6.26 For 2022, the programme is planning to undertake a self-evaluation of the provision, under subprogramme 1, of legal support in the processes related to negotiation and conclusion of host country and other agreements concluded during the relevant reporting period, in line with its mandate, in particular the provision of legal advice on provisions relating to privileges and immunities in those agreements.

## **Programme of work**

### **Subprogramme 1**

#### **Provision of legal services to the United Nations system as a whole**

##### **Objective**

6.27 The objective, to which this subprogramme contributes, is to ensure respect for, and adherence to, public international law, and the development of international justice and accountability.

##### **Strategy**

6.28 To contribute to the objective, the subprogramme will provide legal advice on questions relating to the interpretation and application of the Charter, legal agreements and United Nations resolutions, rules and regulations, as well as on general questions of public international law, including international human rights law, international humanitarian law and international criminal law. The subprogramme will also provide advice to the United Nations and United Nations-assisted criminal tribunals and their oversight bodies, as well as to other international accountability mechanisms, including on their founding arrangements, statutes, terms of reference and rules of procedure, and on the functions of the Secretary-General thereunder.

6.29 The above-mentioned work is expected to result in:

- (a) A uniform and consistent practice of the law and, subsequently, in the effective functioning of the principal and subsidiary organs of the United Nations in accordance with international law;
- (b) The protection of the privileges and immunities of the United Nations;
- (c) The effective functioning of the United Nations and United Nations-assisted international criminal tribunals and other international accountability mechanisms and their oversight bodies;
- (d) The appointment and reappointment of the principals of the United Nations and United Nations-assisted international criminal tribunals and other international accountability mechanisms;
- (e) Cooperation with the International Criminal Court.

##### **Programme performance in 2020**

6.30 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

##### **Legal and procedural support for business continuity measures that enabled decision-making by intergovernmental bodies**

6.31 In order to address the unprecedented situation created by the COVID-19 pandemic, which prevented intergovernmental bodies from meeting in person, novel legal and procedural questions were addressed so that intergovernmental bodies might continue to conduct their business and make necessary decisions within the limitations posed by the pandemic. The subprogramme provided assistance to the President of the General Assembly, the President of the Economic and Social Council and chairs and bureaux of other intergovernmental bodies so that they might continue to

exchange views, for example, through the holding of informal meetings on a virtual platform. Legal guidance on possible ways and methods to allow for the adoption of certain essential decisions and the holding of elections without an in-person meeting was provided, and various options were identified and put forward for further consideration. With respect to decision-making, the Assembly, the Economic and Social Council and the Security Council adopted procedures to allow for decisions to be adopted by correspondence. In the case of elections, where a secret ballot was needed, at the request of the President of the General Assembly, the Secretariat presented a non-paper entitled “Possible options for elections by the General Assembly without plenary meetings during the COVID-19 pandemic”. The Assembly adopted a procedure for holding elections by secret ballot without a plenary meeting during the pandemic (decision 74/557 of 29 May 2020). The subprogramme also advised on changes to certain procedures for the holding of elections by secret ballot during in-person meetings, consistent with the rules of procedure of the Assembly, such as changes to the distribution and casting of ballots, so that social distancing could be maintained at all times to minimize the spread of COVID-19.

6.32 The subprogramme was also involved in outlining possible options to allow for voting on draft resolutions and decisions by the General Assembly without a plenary meeting. The Secretariat was requested by the President of the General Assembly to prepare a non-paper on the matter. The document, entitled “Decision-making of the General Assembly by a vote (excluding elections) without a plenary meeting during the coronavirus disease (COVID-19) pandemic” was circulated by the President to Member States on 23 April 2020.

*Progress towards the attainment of the objective, and performance measure*

6.33 The above-mentioned work contributed to the objective, as the support provided facilitated the ability of the General Assembly and the Economic and Social Council, and their subsidiaries, to adopt essential and time-sensitive resolutions and decisions, even when in-person meetings were not taking place owing to the pandemic. Exchange of views were generally undertaken in virtual meetings which were informal in nature. The work also contributed to the holding in June 2020, without a plenary meeting, of the elections of five non-permanent members of the Security Council, 18 members of the Economic and Social Council and the President of the General Assembly of the seventy-fifth session of the Assembly (see table 6.2).

Table 6.2  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
—	—	Legal and procedural support for business continuity measures that enabled intergovernmental bodies to adopt essential and time-sensitive resolutions and decisions and the holding in June 2020, without a plenary meeting, of elections of five non-permanent members of the Security Council, 18 members of the Economic and Social Council and the President of the General Assembly of the seventy-fifth session of the Assembly

**Impact of COVID-19 on subprogramme delivery**

6.34 Owing to the impact of COVID-19 during 2020, the subprogramme supported United Nations intergovernmental bodies, through the presiding officers, on issues related to COVID-19. The subprogramme responded to new types of requests for legal and procedural support from various United Nations intergovernmental bodies, including the General Assembly and the Economic and Social Council, to address the unprecedented situation created by the COVID-19 pandemic, which prevented the intergovernmental bodies from meeting in person, and in relation to ensuring business continuity during the pandemic. This involved addressing, analysing and advising on novel legal and procedural questions and supporting Member States in identifying a way forward so that critical business might continue, including through the holding of virtual meetings and the identification of possible alternative methods of decision-making. Field missions were cancelled, including a mission to Cambodia for the negotiation of an agreement on the residual functions of the Extraordinary Chambers in the Courts of Cambodia, a meeting of the Management Committee of the Special Tribunal for Lebanon in The Hague and a meeting of field legal advisers of peace operations, while others were held virtually, necessitating more preparatory work, written exchanges and virtual meetings to achieve a similar result.

6.35 The subprogramme also provided further support on issues related to COVID-19, within the overall scope of its objectives, in the form of comprehensive legal advice to the various departments of the United Nations Secretariat, to other United Nations system entities and to Member States to address the legal implications of the pandemic with respect to the hosting of United Nations events and large international conferences and forums. This included the provision of legal advice on privileges and immunities and related issues with regard to measures taken in response to the pandemic and medical evacuation arrangements. Various modifications to the standard provisions of host country agreements were developed to mitigate the legal risks and implications of events scheduled for 2021 and 2022. The new deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

**Planned results for 2022**

6.36 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

**Result 1: creating the authorizing environment for the reinvigorated resident coordinator system<sup>1</sup>****Programme performance in 2020**

6.37 The subprogramme continued extensive work related to the negotiation and conclusion of host country agreements for the new resident coordinator offices, in line with its mandate.

6.38 The above-mentioned work contributed to the conclusion of 59 host country agreements, which did not meet the planned target of the signing of all 149 host country agreements reflected in the programme budget for 2020. The COVID-19 pandemic, which has had a severe impact on most host countries, appears to have been a major contributing factor in that regard.

---

<sup>1</sup> As reflected in the programme budget for 2020 (A/74/6/Add.1).

### Proposed programme plan for 2022

6.39 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to liaise and negotiate with host countries to ensure that the necessary legal framework is in place for resident coordinators. The expected progress is presented in the performance measure below (see table 6.3).

Table 6.3  
Performance measure

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Absence of host country agreements for reinvigorated resident coordinator system	Negotiation and conclusion of host country agreements	Further negotiation and conclusion of 59 host country agreements	Signing of all host country agreements that were not finalized in 2020	Negotiation and conclusion of additional host country agreements

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 2: host country agreement for the Fifth United Nations Conference on the Least Developed Countries<sup>2</sup>

#### Programme performance in 2020

6.40 As a result of the postponement of the Fifth United Nations Conference on the Least Developed Countries, substantive negotiations on the host country agreement were not undertaken in 2020 and are expected to take place in 2021. A virtual planning mission took place from 23 to 25 November 2020.

6.41 The work of the subprogramme did not meet the planned target of the Government of Qatar and the subprogramme agreeing on the legal provisions of the host country agreement for the holding of the Fifth United Nations Conference on the Least Developed Countries, reflected in the programme budget for 2021. The Conference was postponed owing to the COVID-19 pandemic and, by its resolution [74/232 B](#), the General Assembly decided to reschedule it and to hold it from 23 to 27 January 2022.

### Proposed programme plan for 2022

6.42 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective and in response to recent developments, the subprogramme will assist with the drafting and negotiations of the host country agreement for the Fifth United Nations Conference on the Least Developed Countries and with legal and procedural matters arising before and during the Conference, including servicing of the Credentials Committee of the Conference during the Conference. The subprogramme will also assist, as needed, in the meeting of its intergovernmental preparatory committee. The subprogramme will also continue to assist substantive offices in the drafting and negotiations of host country agreements, including for other large-scale conferences away from Headquarters, in accordance with the subprogramme's mandate and legal requirements for the conclusion of such host country agreements. The expected progress is presented in the updated performance measure below (see table 6.4).

<sup>2</sup> As reflected in the programme budget for 2021 ([A/75/6/Add.1](#)).

Table 6.4  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
–	General Assembly decides to hold the Fifth United Nations Conference on the Least Developed Countries in Doha from 21 to 25 March 2021	Negotiations on and planning of the Fifth United Nations Conference on the Least Developed Countries in Doha with host country, despite challenges caused by COVID-19	Signature of the host country agreement allowing for full participation by all participants in the Fifth United Nations Conference on the Least Developed Countries in Doha	Fifth United Nations Conference on the Least Developed Countries is held in Doha from 23 to 27 January 2022 Member States hosting of other large-scale conferences away from Headquarters based on host country agreements negotiated

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: conclusion of a framework for the completion of the work of the Extraordinary Chambers in the Courts of Cambodia, including with regard to the drawdown of activities and the residual functions requiring performance**

#### **Proposed programme plan for 2022**

6.43 In a letter to the Secretary-General dated 21 September 2018, the Steering Committee for the United Nations Assistance to the Khmer Rouge Trials requested the Secretariat to undertake consultations with the Extraordinary Chambers in the Courts of Cambodia and the Government of Cambodia in order to begin developing a framework for the completion of the work of the Extraordinary Chambers and identify residual functions, if any, that would need to be performed following the completion of its mandate, and to submit its report by 30 June 2019. The General Assembly made a similar request to the Secretary-General in its resolution [73/279](#) A of 22 December 2018, and reiterated it in its resolution [74/263](#) of 27 December 2019. In its resolution [75/257](#) of 31 December 2020, the Assembly requested the Secretary-General to continue consultations with the Government of Cambodia in order to finalize, for consideration by the Assembly, a proposed framework for the completion of the work of the Extraordinary Chambers, including with regard to the drawdown of activities and the residual functions requiring performance. The subprogramme undertook the requested consultations and provided its report to the Steering Committee on 28 June 2019. Subsequently, the subprogramme held working-level discussions with the Government of Cambodia on the identified possible residual functions and the necessary transitional arrangements proposed in the report.

#### *Lessons learned and planned change*

6.44 The lesson for the subprogramme was that there was a strong demand to continue consultations and finalize the framework for the completion of the work of the Extraordinary Chambers in the Courts of Cambodia virtually, as the situation created by the COVID-19 pandemic limited the possibility of conducting an in-person

mission to Cambodia. In applying the lesson, the subprogramme will continue to schedule and hold its consultations virtually, where possible and appropriate.

*Expected progress towards the attainment of the objective, and performance measure*

6.45 This work is expected to contribute to the objective, as demonstrated by the conclusion of the framework for the completion of the work of the Extraordinary Chambers in the Courts of Cambodia, including with regard to the drawdown of activities and the residual functions requiring performance, in the format of an addendum and other supplementary arrangements (see table 6.5).

Table 6.5  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
Adoption of General Assembly resolution <a href="#">73/279</a> A of 22 December 2018, in which the Assembly requested the Secretary-General to undertake consultations with the Extraordinary Chambers in the Courts of Cambodia and the Government of Cambodia, in order to begin developing a framework for the completion of the work of the Extraordinary Chambers, and to identify residual functions, if any	<p>Progress on consultations with the Government of Cambodia is reported to Member States (<a href="#">A/74/359</a>, para. 27)</p> <p>The Steering Committee of the United Nations Assistance to the Khmer Rouge Trials receives a report on the consultations undertaken</p> <p>Adoption of General Assembly resolution <a href="#">74/263</a> of 27 December 2019, in which the Assembly noted the steps taken by the Secretary-General to develop a framework for the completion of the work of the Extraordinary Chambers and the identification of possible residual functions, and requested the Secretary-General to expedite the finalization of the framework</p>	<p>Identification by the Government of Cambodia and the United Nations of possible residual functions and necessary transitional arrangements for the Extraordinary Chambers</p> <p>Adoption of General Assembly resolution <a href="#">75/257</a> of 31 December 2020, in which the Assembly requested the Secretary-General to continue consultations with the Government of Cambodia in order to finalize, for consideration by the Assembly, a proposed framework for the completion of the work of the Extraordinary Chambers</p>	The General Assembly approves a framework for the completion of the work of the Extraordinary Chambers, and a draft addendum to the 2003 Agreement	<p>Conclusion of the framework for the completion of the work of the Extraordinary Chambers</p> <p>Implementation of the addendum, including through the conclusion of supplementary arrangements</p>

## Legislative mandates

6.46 The list below provides all mandates entrusted to the subprogramme.

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
18. Annual meeting of the legal advisers and legal liaison officers of the United Nations offices, funds and programmes, specialized agencies and related and other organizations and field legal advisers and officers	7	7	7	7

#### C. Substantive deliverables

**Consultation, advice and advocacy:** legal advice to and consultation with the General Assembly, the Security Council and the Main Committees of the Assembly on constitutional, institutional and procedural questions; legal advice to and consultation with the six United Nations funds and programmes on privileges and immunities; legal advice to and consultation with three United Nations-assisted international criminal tribunals and their oversight bodies; consultation with the 15 specialized agencies of the United Nations system on legal issues; and consultation with the International Criminal Court on cooperation matters.

#### D. Communication deliverables

**Outreach programmes, special events and information materials:** speeches and presentations by the Legal Counsel to Member State representatives, international organizations and academic and civil society organizations regarding the work of the Office of Legal Affairs and issues of public international law; and events to promote international law in New York, including those of the American Bar Association.

#### E. Enabling deliverables

**Legal services:** legal advice to and support for the Secretariat and the funds and programmes on privileges and immunities and public international law, including humanitarian law, international human rights law and the pacific settlement of disputes; legal advice to and support for one United Nations criminal tribunal and its oversight body and other international accountability mechanism; legal advice to and support for approximately 12 peacekeeping and 38 special political missions; liaison with the International Court of Justice and fulfilment of the responsibilities of the Secretary-General under the Statute of the Court; legal advice to and support for four Secretariat offices and four other entities and bodies on disarmament, sanctions and security; legal advice to 18 United Nations entities on the interpretation and enforcement of the Relationship Agreement between the United Nations and the International Criminal Court.

## Subprogramme 2 General legal services provided to United Nations organs and programmes

### Objective

6.48 The objective, to which this subprogramme contributes, is to maximize the protection of the legal interests of the Organization and to minimize its legal liabilities.

### Strategy

6.49 To contribute to the objective, the subprogramme will advise on accountability measures, including on internal sanctions and external enforcement action and liaison with national authorities. It will advise on the legal aspects arising from United Nations operational activities, including its peacekeeping, humanitarian and other missions. It will also represent the Secretary-General and advise on matters in the system for the administration of justice of the Organization and on administrative and management issues. It will assist the Organization, its organs or its separately administered funds and programmes by providing legal advice on procurement and substantive contracts and on operational and technical assistance activities of those entities.

6.50 The subprogramme will also provide legal services for resolving disputes of a private law character involving the operations of the Organization, its organs or its funds and programmes and represent the Secretary-General before the United Nations Appeals Tribunal in cases involving those entities.

6.51 The subprogramme plans to support the Organization and its principal and subsidiary organs on issues related to COVID-19 by responding to requests for urgent legal advice arising from the COVID-19 pandemic.

6.52 The above-mentioned work is expected to result in:

- (a) The full maintenance of the status, legal rights and privileges and immunities of the Organization;
- (b) The reduction of actual legal liability of the Organization.

## Programme performance in 2020

6.53 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Continuity of business operations during the COVID-19 pandemic through timely legal and business-critical legal support

6.54 The subprogramme is part of the Organization's central legal service, which provides legal services to all principal and subsidiary organs of the United Nations, including United Nations offices and departments, peacekeeping and special political missions, funds and programmes and regional commissions. The subprogramme has undertaken new activities on issues related to COVID-19, within the overall scope of its objective. The subprogramme provided critical and timely legal advice to address the unique needs created by the pandemic. This included advising on the legal aspects of business continuity, such as support for medical evacuation and strengthening testing and treatment response capacities worldwide. Additional services were provided to ensure the availability of accurate and targeted information about the pandemic and public health measures and to support the Organization's humanitarian response to the pandemic.

#### *Progress towards the attainment of the objective, and performance measure*

6.55 The above-mentioned work contributed to the objective, as demonstrated by the business continuity of the Organization, despite the operational impact of the pandemic on the Organization (see table 6.7).

Table 6.7  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
—	—	Business continuity of the Organization, despite the operational impact of the COVID-19 pandemic on the Organization

## Planned results for 2022

6.56 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

**Result 1: reduction of actual legal liability of other claims<sup>3</sup>****Programme performance in 2020**

6.57 The subprogramme developed a suite of model *de minimis* contracts for use by managers conducting procurement of low-value, low-risk requirements. These model contracts provide managers with simplified documents to contract with vendors effectively and efficiently, while maximizing the protection of the legal interests of the Organization and minimizing its legal liabilities.

6.58 The above-mentioned work contributed to the use of model contracts for *de minimis* requirements of goods and services by managers, who also provided feedback on those models, and subsequently assisted in reducing the legal liabilities of the Organization, which met the planned target of model contracts for *de minimis* requirements of goods and services used by managers and of feedback received, reflected in the programme budget for 2020.

**Proposed programme plan for 2022**

6.59 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will include the development of new model contracts with a view to maximizing the protection of the legal interests of the Organization and minimizing its legal liabilities. The expected progress is presented in the performance measure below (see table 6.8).

Table 6.8  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Absence of model contracts for <i>de minimis</i> requirements of goods and services	Development of model contracts for <i>de minimis</i> requirements of goods and services in consultation with managers	Model contracts for <i>de minimis</i> requirements of goods and services used by managers and feedback received	Strengthened contracts following revisions made on the basis of experience gained from the use of such model contracts	Managers have access to new model contracts that will maximize the protection of the legal interests of the Organization and minimize its legal liabilities

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

**Result 2: continued reduction of actual legal liability of the Organization<sup>4</sup>****Programme performance in 2020**

6.60 The subprogramme provided legal services for resolving disputes of a private law character involving the operations of the Organization, its subsidiary bodies and organs. Furthermore, the subprogramme provided timely and effective legal advocacy and support for these entities. This work included reviewing and providing comments or advice, written and oral, and negotiating with claimants and their lawyers on contractual and other private law claims. When required, the subprogramme

<sup>3</sup> As reflected in the programme budget for 2020 (A/74/6/Add.1).

<sup>4</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

represented the Organization in arbitral proceedings to resolve claims in a manner that minimized the Organization's legal liabilities.

6.61 The above-mentioned work contributed to resolving mainly commercial disputes of a private law character involving the operations of the Organization, which originally totalled an aggregate amount of \$76,292,539, for \$26,862,639, thereby resulting in actual liability of 35 per cent of the amounts originally claimed, which met the planned target of actual legal liability being no more than 35 per cent of original amounts claimed, reflected in the programme budget for 2021. In addition, successful appeals by the subprogramme to the United Nations Appeals Tribunal resulted in a reduction by \$78,910 of compensations awarded by the United Nations Dispute Tribunal.

#### **Proposed programme plan for 2022**

6.62 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to provide timely and effective legal advocacy and support to the above-mentioned entities, including negotiating with claimants and their lawyers and representing the Organization in arbitral proceedings to resolve claims in a manner that minimizes the Organization's legal liabilities. The expected progress is presented in the performance measure below (see figure 6.I).

Figure 6.I

**Performance measure: actual legal liability of the Organization against amounts originally claimed against the Organization<sup>a</sup>**

(Percentage)

<sup>a</sup> Only claims resolved in any given calendar year by way of settlement negotiations, arbitral proceedings and closure owing to claimants not pursuing further their claims against the Organization are included.

<sup>b</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: improved efficiency in finalizing partnership agreements**

#### **Proposed programme plan for 2022**

6.63 The subprogramme has been assisting Secretariat units and offices at and away from Headquarters and in funds and programmes, regional commissions and other subsidiary organs in the drafting, negotiation and review of various partnership agreements with Member States, civil society and the private sector, in support of Sustainable Development Goal 17 (Strengthen the means of implementation and revitalize the Global Partnership for Sustainable Development).

*Lessons learned and planned change*

6.64 The lesson for the subprogramme was that often similar questions and concerns arise when concluding such partnerships. In applying the lesson, the subprogramme will develop guidance materials on the legal aspects of entering into partnerships with Member States, civil society and the private sector entities, which would address certain legal issues common to all substantive offices, such as the manner in which the United Nations name and emblem ought to be used and other intellectual property rights issues, as well as liability and financial arrangements.

*Expected progress towards the attainment of the objective, and performance measure*

6.65 This work is expected to contribute to the objective of finalizing partnership agreements in a timely manner by making guidance materials on common legal issues available to maximize the protection of the legal interests of the Organization and minimize its legal liabilities (see table 6.9).

Table 6.9  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
—	—	—	Pilot guidance materials on select common legal issues available to all substantive offices	Increased access to guidance materials on legal issues common to partnership agreements

**Legislative mandates**

6.66 The list below provides all mandates entrusted to the subprogramme.

*Charter of the United Nations*

Article 104

Article 105

*General Assembly resolutions*

22 (I)	Privileges and immunities of the United Nations	70/112	Administration of justice at the United Nations
62/63	Criminal accountability of United Nations officials and experts on mission		

**Deliverables**

6.67 Table 6.10 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 6.10

**Subprogramme 2: deliverables for the period 2020–2022, by category and subcategory***Category and subcategory***E. Enabling deliverables**

**Internal justice and oversight:** legal services to all principal and subsidiary organs of the United Nations, including to all United Nations offices and departments, all peacekeeping and special political missions, all regional commissions and all funds and programmes, consisting of representing the Secretary-General before the United Nations Appeals Tribunal; advice on administrative law of the Organization; representing the Organization before arbitral tribunals and advice on claims arising from the operational activities of the Organization; advice on procurement activities and the preparation and negotiation of substantial contracts for the acquisition of goods or services for United Nations operations; advice on the Organization's accountability measures in relation to internal sanctions and external enforcement actions against United Nations officials, experts on mission and third parties for fraud, corruption and other wrongdoing; advice on development, technical and humanitarian assistance activities, including partnerships with the private sector; and advice to all peacekeeping and special political missions on logistical and other support arrangements with Governments, other international organizations, partners and United Nations entities, including on the establishment of boards of inquiry, participation in peacekeeping-related standing committees and training, and the development of policies, reports, framework agreements, guidelines and standard operating procedures.

**Subprogramme 3****Progressive development and codification of international law****Objective**

6.68 The objective, to which this subprogramme contributes, is to develop, codify and advance knowledge of international law progressively.

**Strategy**

6.69 To contribute to the objective, the subprogramme will continue to provide substantive support to the Sixth Committee, the International Law Commission, the Special Committee on the Charter of the United Nations and on the Strengthening of the Role of the Organization, other special or ad hoc committees and diplomatic conferences in their consideration and formulation of legal instruments, by assisting in the conduct of proceedings, rendering legal advice, preparing draft texts of legal instruments, resolutions and decisions and preparing background documents, analytical studies and reports. The subprogramme will continue to provide legal bodies of the General Assembly with assistance when considering the use by States of the procedures envisaged under the relevant resolutions of the Assembly.

6.70 The subprogramme will also continue to implement the mandates of the United Nations Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law, established by the General Assembly. This includes the planning, organization and conduct of four in-person training programmes, namely, the International Law Fellowship Programme and the United Nations Regional Courses in International Law for Africa, for Latin America and the Caribbean and for Asia-Pacific; the further development, dissemination and maintenance of the Audiovisual Library of International Law, a virtual training and research centre accessible free of charge on the Internet; and the preparation and dissemination of major legal publications and of information on the legal work of the United Nations.

6.71 The subprogramme plans to support Member States by assisting the bureaux of the bodies that the subprogramme services in devising and implementing working methods and work programmes that ensure business continuity.

6.72 The above-mentioned work is expected to result in:

- (a) The smooth deliberations of legislative and legal bodies, the conclusion of draft legal instruments and the promotion of universal respect for international law;
- (b) The wider appreciation of international law and an increased number of individuals trained to gain an understanding of it;
- (c) The International Law Commission advancing its study on sea level rise in relation to international law.

## Programme performance in 2020

6.73 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Safeguarded deliberations of the Sixth Committee during restrictions to in-person meeting resulting from the COVID-19 pandemic

6.74 The subprogramme serves as the secretariat of the Sixth Committee of the General Assembly, which traditionally holds its annual session in October and November. In 2020, there was a significant risk that constraints on the holding of meetings at United Nations Headquarters as a consequence of the COVID-19 pandemic might affect the ability of the Sixth Committee to hold and conclude its annual session. The subprogramme supported the Bureau of the Committee in devising and implementing a work programme designed to ensure business continuity while taking into account the concerns and preferences of delegations. In several instances, this involved implementing new working methods, on an exceptional basis, as well as relying on information and communications technology.

#### *Progress towards the attainment of the objective, and performance measure*

6.75 The above-mentioned work contributed to the objective, as demonstrated by the conclusion of the consideration of all agenda items allocated to the Sixth Committee despite ongoing constraints on the convening of in-person meetings arising as a consequence of the sanitary and health-related measures implemented in the light of the COVID-19 pandemic (see table 6.11).

Table 6.11

#### Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
Concluded consideration of all agenda items allocated to the Sixth Committee under normal working conditions	Concluded consideration of all agenda items allocated to the Sixth Committee under normal working conditions	Concluded consideration of all agenda items allocated to the Sixth Committee despite ongoing restrictions resulting from the COVID-19 pandemic

### Impact of COVID-19 on subprogramme delivery

6.76 Owing to the impact of COVID-19 during 2020, the subprogramme had to cancel certain activities under the Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law, namely, the in-person training programmes. In exploring alternatives to in-person programmes, the lack of Internet connectivity for certain beneficiaries, the multiple time zones to

accommodate and the few hours that could be used for training raised significant challenges. Twelve lecture recordings of the Audiovisual Library of International Law were cancelled in New York owing to COVID-19, as well as an off-site recording session. The Library team was unable to upload new content on the Library website as it did not have access to the remote server for several months for cybersecurity reasons. Likewise, the subprogramme was affected by the postponement of the 2020 session of the International Law Commission resulting from the impact of COVID-19. The subprogramme identified modified activities to provide some form of capacity-building until the in-person programmes could safely resume. For example, applicants to the cancelled training programmes were provided with a self-paced remote learning curriculum developed by the subprogramme as an interim means of capacity-building. Such modified activities confirmed that the in-person format could not be replaced. The importance of exchanges taking place during the training programmes was underscored by the Advisory Committee on the United Nations Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law at its fifty-fifth session, on 9 October 2020.

## **Planned results for 2022**

6.77 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: reaching a wider audience interested in international law<sup>5</sup>**

#### **Programme performance in 2020**

6.78 The subprogramme continued the work related to the teaching, dissemination and wider appreciation of international law, in line with its mandate, and undertook initiatives to help audiences to increase their access to and knowledge of core topics of international law.

6.79 The above-mentioned work contributed to increased accessibility to and knowledge of international law by a wider audience of beneficiaries, which met the planned target of the use of miniseries of lectures addressing core topics of international law in video and podcast format, reflected in the programme budget for 2020. Miniseries on topics of international law, such as “Diplomatic and consular relations”, “International human rights law” and “Law of State responsibility”, were added to the Audiovisual Library of International Law in 2020 in both video and audio formats.

#### **Proposed programme plan for 2022**

6.80 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will support teaching, dissemination and wider appreciation of international law through the continued expansion of the miniseries, thereby contributing to further increased accessibility and knowledge of international law. The expected progress is presented in the performance measure below (see table 6.12).

---

<sup>5</sup> As reflected in the programme budget for 2020 (A/74/6/Add.1).

Table 6.12  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Absence on the website of the Audiovisual Library of International Law of easily accessible modules on introductory international law topics for users with limited knowledge	Development and production of miniseries of lectures addressing core topics of international law	Use of miniseries of lectures addressing core topics of international law in video and podcast format, contributing to increased accessibility and knowledge of international law by a wider audience	Expansion of the miniseries of lectures on core topics of international law in terms of the subject matter addressed, thereby contributing to further increased accessibility and knowledge of international law	Expansion of the miniseries of lectures on core topics of international law in terms of the subject matter addressed, thereby contributing to further increased accessibility and knowledge of international law

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: information relating to international law accessed by more than half a million people<sup>6</sup>

### Programme performance in 2020

6.81 The subprogramme has a mandate to disseminate information relating to international law, in particular the activities of the legal bodies serviced by it. This is undertaken through the preparation of a number of publications, issued in hard copy, including the *United Nations Juridical Yearbook*, the *United Nations Legislative Series*, the *Reports of International Arbitral Awards*, the *Summaries of the Judgments, Advisory Opinions and Orders of the International Court of Justice*, the *Yearbook of the International Law Commission*, *The Work of the International Law Commission*, the *Repertory of Practice of United Nations Organs* and the official records of various diplomatic conferences of plenipotentiaries convoked by the General Assembly to negotiate multilateral treaties.

6.82 The activities of the subprogramme in the dissemination of information related to international law have also moved online through the establishment and expansion of more than 20 websites. In addition to the Audiovisual Library of International Law, the subprogramme maintained dedicated websites for the publications listed above and for all of the legal bodies for which it serves as the secretariat, including the Sixth Committee, the International Law Commission and the Special Committee on the Charter of the United Nations and on the Strengthening of the Role of the Organization. While the websites are intended primarily for use by Member States and entities of the United Nations system, they also provide the general public, in particular academia, with information on the activities of the Organization in the progressive development and codification of international law. All the websites contain extensive information and were designed as research tools by including, for example, full-text search capability and links to documents in all official languages of the United Nations (to the extent available). By providing anyone with Internet access the ability to research the work of the legal bodies of the United Nations, the subprogramme seeks to enhance accessibility to information about, and knowledge of, international law.

<sup>6</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

6.83 The above-mentioned work contributed to attaining the objective of advancing knowledge of international law, as evidenced by 638,000 individual website end users, which exceeded the planned target of 590,000 individual website end users, reflected in the programme budget for 2021.

#### **Proposed programme plan for 2022**

6.84 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to maintain and expand its various websites with the goal of continuing to increase the number of individual end users. The expected progress is presented in the performance measure below (see figure 6.II).

Figure 6.II

#### **Performance measure: number of individual end users of websites (annual)**

(Thousands of users)

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: advancement of the International Law Commission's study on sea level rise in relation to international law**

#### **Proposed programme plan for 2022**

6.85 In line with its mandate to support the progressive development of international law and its codification, the subprogramme will assist the International Law Commission with advancing knowledge and understanding of the possible legal effects of sea level rise under international law, which is critical to global efforts to combat this aspect of climate change and to mitigate its consequences, in particular for small island developing States and States with low-lying coastal areas. The subprogramme has provided the Co-Chairs of the International Law Commission Study Group with research material and assistance relevant to consideration of the possible legal effects on the baselines of States, the outer limits of their maritime spaces measured from the baselines and their maritime boundaries.

#### *Lessons learned and planned change*

6.86 The lesson for the subprogramme was the need to enhance its internal expertise on the complex implications of sea level rise for international law. In applying that lesson, the subprogramme will continue to strengthen its substantive knowledge of the applicable legal and policy questions, in particular those applicable to rules under

international law concerning statehood and the protection of persons. In doing so, the subprogramme will provide further research material and assistance to the Co-Chairs of the International Law Commission Study Group, in line with its mandate. This will enable the Group to advance its study in 2022 to cover also issues related to statehood, which may emerge as a consequence of sea level rise, and the protection of persons displaced by sea level rise.

*Expected progress towards the attainment of the objective, and performance measure*

6.87 This work is expected to contribute to the objective, as demonstrated by the advancement in the International Law Commission's study of issues related to statehood, which may emerge as a consequence of sea level rise, and the protection of persons displaced by sea level rise (see table 6.13).

Table 6.13

**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
—	—	Co-Chairs of the International Law Commission Study Group have access to research material for consideration of the possible protection of persons	Identification by the International Law Commission of focus areas on implications of sea level rise	Advancement in the International Law Commission's study of issues related to statehood and the protection of persons displaced by sea level rise

## Legislative mandates

6.88 The list provides all mandates entrusted to the subprogramme.

*General Assembly resolutions*

174 (II)	Establishment of an International Law Commission	75/132	Criminal accountability of United Nations officials and experts on mission
487 (V)	Ways and means for making the evidence of customary international law more readily available	75/133	Report of the United Nations Commission on International Trade Law on the work of its fifty-third session

<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> lectures, briefings and technical assistance, upon request, on public international law.				
<b>Digital platforms and multimedia content:</b> websites, including those pertaining to the Sixth Committee, the International Law Commission, the Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law and the publications prepared by the subprogramme; development, updates and maintenance of the online Audiovisual Library of International Law, which provides high-quality training to an unlimited number of individuals and institutions around the world.				

## Subprogramme 4

### Law of the sea and ocean affairs

#### Objective

6.90 The objective, to which this subprogramme contributes, is to strengthen the law of the sea for the peaceful use of the oceans and for their conservation and sustainable use, and as the basis for national, regional and global action and cooperation in the marine sector.

#### Strategy

6.91 To contribute to the objective, the subprogramme will continue to provide expert advice to States and international organizations on the law of the sea and ocean affairs, in particular with respect to the United Nations Convention on the Law of the Sea of 1982, the Agreement for the Implementation of the Provisions of the United Nations Convention on the Law of the Sea of 10 December 1982 relating to the Conservation and Management of Straddling Fish Stocks and Highly Migratory Fish Stocks of 1995 and the work of the General Assembly on oceans and the law of the sea and sustainable fisheries.

6.92 The subprogramme will continue to support, in particular, sustainable fisheries-related cooperative activities among States and other entities. The subprogramme will also continue to provide services to the Commission on the Limits of the Continental Shelf. The subprogramme will carry out expanded capacity-building activities (fellowships, training courses, workshops) in collaboration with relevant stakeholders.

6.93 The above-mentioned work is expected to result in:

(a) The effective implementation by States of those instruments and an increased number of States parties to the Convention and its implementing agreements;

(b) Enhanced cooperation and coordination among stakeholders on ocean and coastal issues leading to enhanced conservation and sustainable use of the oceans and their resources;

(c) A better understanding of the legal regime for the oceans and the enhanced human resource capacity of Member States, in particular developing countries, to implement that regime effectively.

## **Programme performance in 2020**

6.94 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Advancement in the development of an international legally binding instrument under the United Nations Convention on the Law of the Sea on the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction**

6.95 In the light of the unprecedented rate of continued loss of marine biodiversity and the impacts of unsustainable practices on the marine environment and its resources, the General Assembly initiated in 2005 a process to study issues relating to the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction. This process led to the decision of the Assembly, in 2017, to convene an intergovernmental conference on an international legally binding instrument under the United Nations Convention on the Law of the Sea on the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction (resolution [72/249](#)).

6.96 The subprogramme continued to support the work of the conference in 2018 and 2019 during an organizational meeting and three sessions, in particular the development of an instrument under the Convention, by, inter alia, assisting its President and delegations in preparing draft texts of an agreement, assisting with reports to the plenary from facilitators of established informal working groups to ensure transparency, providing inputs to the statements by the President, including proposals for a way forward, preparing reference compilations, including article-by-article compilations of textual proposals, and otherwise facilitating the work of delegations, thus enabling them to advance their discussions and the overall goals of the conference during the intersessional period.

6.97 While the General Assembly decided to postpone the fourth session of the conference scheduled in 2020 owing to the COVID-19 pandemic (decision 74/543), the subprogramme serviced virtual meetings and consultations convened by the President of the Conference, including meetings of the Bureau, to prepare an intersessional programme of work. The subprogramme also organized and serviced intersessional forums and assisted the facilitators of the informal working groups in identifying key questions for discussions.

### *Progress towards the attainment of the objective, and performance measure*

6.98 The above-mentioned work contributed to the objective, as demonstrated by Member States having access to a revised draft text of an agreement and the compilation of textual proposals for consideration at the fourth session. Furthermore, the work also contributed to positive feedback from Member States on the working sessions and the compilation and drafting of revisions of the text of an agreement (see table 6.15).

Table 6.15  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
Member States, delegations and other relevant stakeholders have access to all information related to the conference	Member States and delegations have access to a comprehensive paper with proposals (more than 700 pages), and the understanding of the issues by Member States is advanced by developing a first draft of the text of an agreement	Member States have access to a revised draft text of an agreement, and textual proposals are compiled for consideration at the fourth session  Positive feedback from Member States on the working sessions and compilation and drafting of revisions to the text of an agreement

### Impact of COVID-19 on subprogramme delivery

6.99 Owing to the COVID-19-related postponement of the fourth session of the intergovernmental conference on an international legally binding instrument under the United Nations Convention on the Law of the Sea on the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction and of the twenty-first meeting of the United Nations Open-ended Informal Consultative Process on Oceans and the Law of the Sea, the subprogramme had to cancel in-person processes planned in support of those meetings and, in the case of the intergovernmental conference, made extensive efforts to support alternative intersessional dialogues. The pandemic also affected the development of the second *World Ocean Assessment* by 2020, which depended on in-person expert activities, and planned related awareness-raising activities. The development of the Assessment was carried forward by less effective and efficient virtual processes requiring additional logistical support by the subprogramme. Furthermore, owing to the pandemic, the subprogramme postponed planned in-person capacity-building activities and deferred fellowships. The subprogramme enabled consultations through virtual platforms or by correspondence and assisted Member States, members of the Commission on the Limits of the Continental Shelf and experts in the use of other web-based working methods to ensure the timely delivery of mandated activities. Planned in-person activities to raise awareness of the forthcoming launch of the second Assessment and to strengthen the ocean science-policy interface were replaced by a series of online activities, including a science-policy literacy campaign and a webinar. Planned technical cooperation activities were transitioned to online modes of delivery, including virtual consultations, workshops and trainings. Regarding capacity-building activities, two online training programmes were delivered for participants selected for the in-person fellowships in 2020 and to a broader audience of ocean experts. Those changes had an impact on the programme performance in 2020, as specified in results 2 and 3 below.

6.100 At the same time, however, the subprogramme identified new activities to support Member States on issues related to the COVID-19 pandemic, within the overall scope of its objectives, namely, the Group of Experts of the Regular Process for Global Reporting and Assessment of the State of the Marine Environment, including Socioeconomic Aspects incorporated research results in the second *World Ocean Assessment* regarding the implications of the COVID-19 pandemic for human uses of the ocean, especially in relation to maritime industries. One of the online training programmes was aimed at increasing the participants' understanding of the impacts of and responses to the pandemic in the context of law of the sea and ocean affairs, as a first step towards the development of resilience strategies. The

implementation of a project to assist States in developing ocean economy and trade strategies was also adjusted to include activities on the impacts of the pandemic on ocean governance, livelihoods and broader blue economy value chains. The new deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

## **Planned results for 2022**

6.101 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: strengthen the science-policy interface by developing the second *World Ocean Assessment*<sup>7</sup>**

#### **Programme performance in 2020**

6.102 The subprogramme continued to provide substantive and conference services support to the Ad Hoc Working Group of the Whole on the Regular Process for Global Reporting and Assessment of the State of the Marine Environment, including Socioeconomic Aspects, the Bureau, the Group of Experts, the Pool of Experts and the writing teams on their work related to the development of the second *World Ocean Assessment*. The subprogramme also provided substantive and technical support for the review of the Assessment, including a peer review by experts, followed by a review by States during which more than 3,000 written comments were received and shared with the Group of Experts. The subprogramme continued to provide secretariat support in relation to editing, translation and desktop publishing and started online activities to raise awareness of the Assessment, strengthening the science-policy interface.

6.103 The above-mentioned work contributed to the completion of the second *World Ocean Assessment*, which the General Assembly, in its resolution [75/239](#), welcomed and approved the summary of and which will result in strengthening the science-policy interface, which will further support the sustainable and integrated ocean management. This did not meet the target of the publication of the second *World Ocean Assessment*, reflected in the programme budget for 2020, owing to the delays in finalizing its draft caused by the impact of the COVID-19 pandemic on some members of the Group of Experts and writing teams.

#### **Proposed programme plan for 2022**

6.104 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will provide support for the development of brief documents outlining specific policy-relevant information from the second *World Ocean Assessment*, as they may relate to and support other ocean-related intergovernmental processes. The subprogramme will further develop and start the implementation of a capacity-building programme to strengthen the science-policy interface at the national, regional and global levels. The subprogramme will continue to develop and implement an outreach and engagement strategy, in line with the decision of the Ad Hoc Working Group and the lessons learned from the second cycle. The expected progress is presented in the performance measure below (see table 6.16).

---

<sup>7</sup> As reflected in the programme budget for 2020 ([A/74/6/Add.1](#)).

Table 6.16  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Constitution of the Pool of Experts and writing teams, and organization of regional workshops	Preparation and peer review of the chapters of the second <i>World Ocean Assessment</i>	Completion of the second <i>World Ocean Assessment</i> ; approval of its summary by the General Assembly, resulting in a strengthened science-policy interface	First year of the third cycle of the Regular Process, for the period 2021–2025; start of work on the third <i>World Ocean Assessment</i>	Member States have access to documents outlining policy-relevant information from the second <i>World Ocean Assessment</i> , and States have increased opportunities to develop capacity in strengthening the science-policy interface

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: progress in making global fisheries sustainable<sup>8</sup>

### Programme performance in 2020

6.105 The subprogramme facilitated intensive consultations among Member States dealing with assessing the impact of the pandemic on sustainable fisheries processes. Notwithstanding the fifteenth round of informal consultations of States parties to the Fish Stocks Agreement, both the review on bottom fishing and the resumed Review Conference on the Fish Stocks Agreement were postponed to 2022. The subprogramme completed a range of preparatory work for the above-mentioned processes, including the issuance of a report on bottom fishing and the development of preliminary documents for the resumed Review Conference. The subprogramme provided input to capacity-building activities aimed at improving the sustainability of global fisheries through the improved implementation of the international legal regime for fisheries.

6.106 The above-mentioned work contributed to countries and regional fisheries management organizations and arrangements continuing preparations for the resumption of the Review Conference, which did not meet the planned target of countries and regional fisheries management organizations finalizing preparations for the new session of the Review Conference, reflected in the programme budget for 2021, owing to the COVID-19 situation and the postponement of the resumed Review Conference to 2022. The questionnaires to be compiled by States and regional fisheries management organizations and arrangements to inform the drafting of a report of the Secretary-General were not distributed. In spite of the postponement, the subprogramme continued to assist States by facilitating consultations by correspondence and thus contributed to the development of an agreement on the draft agenda and draft organization of work for the Conference.

### Proposed programme plan for 2022

6.107 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective and in response to recent developments, the subprogramme's work will evolve to include the

<sup>8</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

preparation, convening and substantive follow-up to the resumed Review Conference and the facilitation of the review by the General Assembly of its resolutions addressing the impacts of bottom fishing on vulnerable marine ecosystems and the long-term sustainability of deep-sea fish stocks. The expected progress is presented in the updated performance measure below (see table 6.17).

Table 6.17  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
Countries commit to considering becoming party to the Fish Stocks Agreement (three further ratifications in 2018) and implementing Review Conference recommendations	Countries and regional fisheries management organizations and arrangements continue to review and implement recommendations; the General Assembly decides to hold a new session of the Review Conference in 2021	Countries and regional fisheries management organizations make progress on the preparations for the new session of the Review Conference; Member States have access to a report of the Secretary-General on the impacts of bottom fishing on vulnerable marine ecosystems and the long-term sustainability of deep-sea stocks	Countries and regional fisheries management organizations and arrangements receive and begin compiling questionnaires regarding the implementation of the recommendations of the Review Conference held in 2016; countries consider the implementation of an ecosystem approach to fisheries management in the context of the informal consultations of the States parties to the Fish Stocks Agreement	The Review Conference reviews the implementation by States and regional fisheries management organizations and arrangements of the 111 recommendations adopted in 2016 on the basis of a report of the Secretary-General and adopts further recommendations on the enhanced implementation of the Fish Stocks Agreement, as necessary; the Assembly undertakes a review on the impacts of bottom fishing on vulnerable marine ecosystems and the long-term sustainability of deep-sea fish stocks

### Result 3: improved capacity for sustainable and integrated ocean governance

#### Proposed programme plan for 2022

6.108 Expanding capacity-building activities for developing States to meet the increased need for assistance to fully implement the Convention, the Fish Stocks Agreement and related instruments, as well as to benefit from the sustainable development of the oceans and seas and participate fully in related global and regional forums, is one of the primary mandates of the Secretary-General reflected in annual General Assembly resolutions. The impacts of the pandemic further highlighted the importance of capacity-building in assisting States and intergovernmental organizations with realizing the potential of the oceans and seas to achieve a sustainable and resilient recovery. The subprogramme has provided a range of needs-based and mutually reinforcing activities, including technical cooperation projects, fellowships, workshops, advice, outreach programmes, special events and

information materials. These cover various relevant fields, including: (a) the Convention, the Fish Stocks Agreement and related instruments, as well as other mandated processes; (b) ocean affairs, including best practices, and national adaptations; (c) the 2030 Agenda and its Sustainable Development Goals; (d) sustainable ocean-based economies; and (e) oceans and climate change.

#### *Lessons learned and planned change*

6.109 The lesson for the subprogramme was that capacity-building activities generate more relevant and lasting impacts when tailored to identified needs, guided by the aim to increase local ownership, and adopting a multi-stakeholder approach. In applying the lesson, the subprogramme will work with national partners and intensify its efforts to ensure that capacity-building activities are guided by identified needs and it will aim to increase local ownership and a multi-stakeholder approach in every step. The subprogramme will also develop strategic medium- and long-term partnerships with relevant stakeholders, including its partners within and outside the United Nations system, to explore, as far as practicable, synergies among activities towards the joint development and implementation of capacity-building activities. Lastly, as a result of the postponement of planned in-person capacity-building activities and the deferral of fellowships caused by the COVID-19 pandemic, the importance of effectively using online modes of delivery, including virtual consultations, workshops and trainings, has come to the fore. The subprogramme will further develop and implement additional virtual capacity-building activities, while recognizing that in-person activities offer a more effective and impactful mode of delivery.

#### *Expected progress towards the attainment of the objective, and performance measure*

6.110 This work is expected to contribute to the objective, as demonstrated by improved regional and national capacity to implement the Convention regime and establish and implement ocean governance measures. Improved capacity enables States to establish and implement sustainable and integrated ocean governance measures, including through the adoption or revision of national legislation, policies and mechanisms, and effective and informed participation in relevant international negotiations (see table 6.18).

Table 6.18  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
States have access to new programmes and additional in-person training opportunities enhancing their understanding of ocean governance, including linkages between the Convention and the Sustainable Development Goals, as well as informed participation in the Preparatory Committee on an international legally binding	States have access to additional training opportunities to improve their capacity to develop and implement national strategies for the development of ocean-based economic sectors within the Convention framework	States have access to new projects and additional technical assistance and virtual training opportunities to enhance their understanding and mitigation of the implications of the COVID-19 pandemic on oceans and the law of the sea, as well as to increase accessibility and knowledge-sharing by a wider audience	States take action, for example through policies, to reinforce local ownership  States have access to new and additional multi-stakeholder training opportunities (both in person and online) to enhance their identified capacity needs to respond to emerging issues pertaining to oceans and the law of the sea, including by	Improved regional and national capacity to implement the Convention regime and establish and implement ocean governance measures. Improved capacity enables States to establish and implement sustainable and integrated ocean governance measures, including through the adoption or revision of national legislation,

instrument under the United Nations Convention on the Law of the Sea on the conservation and sustainable use of marine biological diversity beyond areas of national jurisdiction and the related intergovernmental conference			reinforcing local ownership	policies and mechanisms, and effective and informed participation in relevant international negotiations

## Legislative mandates

6.111 The list below provides all mandates entrusted to the subprogramme.

### *United Nations Convention on the Law of the Sea*

Articles 16 (2), 47 (9), 63 (2), 64, 75 (2), 76 (9), 84 (2), 116–119, 287 (8), 298 (6), 312, 313 (1) and 319 (1) and (2)

Annex II: articles 2 (2) and (5) and 6 (3)

Annex V: articles 2 and 3 (e)

Annex VI: article 4 (4)

Annex VII: article 2 (1)

Annex VIII: article 3 (e)

### *Agreement for the Implementation of the Provisions of the United Nations Convention on the Law of the Sea of 10 December 1982 relating to the Conservation and Management of Straddling Fish Stocks and Highly Migratory Fish Stocks*

Articles 26 (1) and 36

### *General Assembly resolutions*

37/66	Third United Nations Conference on the Law of the Sea	72/249	International legally binding instrument under the United Nations Convention on the Law of the Sea on the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction
49/28	Law of the Sea		
52/26; 55/7; 60/30; 63/111; 64/71; 65/37 A and B; 67/78; 68/70; 69/245; 73/124; 74/19; 75/239	Oceans and the law of the sea	73/125; 74/18; 75/89	Sustainable fisheries, including through the 1995 Agreement for the Implementation of the Provisions of the United Nations Convention on the Law of the Sea of 10 December 1982 relating to the Conservation and Management of Straddling Fish Stocks and Highly Migratory Fish Stocks, and related instruments
54/33	Results of the review by the Commission on Sustainable Development of the sectoral theme of “Oceans and seas”: international coordination and cooperation	73/292	2020 United Nations Conference to Support the Implementation of Sustainable Development Goal 14: Conserve and sustainably use the oceans, seas and marine resources for sustainable development
70/1	Transforming our world: the 2030 Agenda for Sustainable Development		
71/312	Our ocean, our future: call for action		

## Deliverables

6.112 Table 6.19 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 6.19

### Subprogramme 4: deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>29</b>	<b>37</b>	<b>28</b>	<b>32</b>
1. Reports for the General Assembly on oceans and the law of the sea and on sustainable fisheries	3	2	2	2
2. Report on the work of the Ad Hoc Working Group of the Whole of the General Assembly on the Regular Process for Global Reporting and Assessment of the State of the Marine Environment, including Socioeconomic Aspects	1	2	–	1
3. Documentation for the intergovernmental conference, under the auspices of the United Nations, to consider the recommendations of the Preparatory Committee on the elements and to elaborate the text of an international legally binding instrument under the United Nations Convention on the Law of the Sea on the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction	3	3	–	–
4. Documentation for meetings of the United Nations Open-ended Informal Consultative Process on Oceans and the Law of the Sea	2	1	2	2
5. Documentation for the Meeting of the States Parties to the United Nations Convention on the Law of the Sea	11	23	7	8
6. Documentation for the Commission on the Limits of the Continental Shelf	5	3	5	5
7. Report on the consultations of States parties to the Agreement for the Implementation of the Provisions of the United Nations Convention on the Law of the Sea of 10 December 1982 relating to the Conservation and Management of Straddling Fish Stocks and Highly Migratory Fish Stocks	1	–	1	1
8. <i>Second World Ocean Assessment</i>	1	2	–	–
9. Report of the Secretary-General on actions taken by States and regional fisheries management organizations and arrangements in response to relevant paragraphs of General Assembly resolutions 64/72, 66/68 and 71/123, on sustainable fisheries, addressing the impacts of bottom fishing on vulnerable marine ecosystems and the long-term sustainability of deep-sea fish stocks	1	–	–	1
10. Summary of the workshop to discuss the implementation of relevant paragraphs of General Assembly resolutions 64/72, 66/68 and 71/123, on sustainable fisheries, addressing the impacts of bottom fishing on vulnerable marine ecosystems and the long-term sustainability of deep-sea fish stocks	1	1	–	1
11. Documentation for the Review Conference on the Agreement for the Implementation of the Provisions of the United Nations Convention on the Law of the Sea of 10 December 1982 relating to the Conservation and Management of Straddling Fish Stocks and Highly Migratory Fish Stocks	–	–	11	11
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>671</b>	<b>375</b>	<b>603</b>	<b>649</b>
12. Meetings of the General Assembly (informal consultations and plenary meetings)	38	24	32	32
13. Consultations of States parties to the Fish Stocks Agreement	4	–	4	4
14. Meetings relating to the Regular Process for Global Reporting and Assessment of the State of the Marine Environment, including Socioeconomic Aspects	34	63	–	38
15. Intergovernmental conference on an international legally binding instrument under the United Nations Convention on the Law of the Sea on the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction	20	18	–	–

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
16. Meetings of States Parties to the United Nations Convention on the Law of the Sea	10	85	10	10
17. Meetings of the Commission on the Limits of the Continental Shelf and its subcommissions	550	185	538	542
18. Intergovernmental workshop to discuss implementation of relevant paragraphs of General Assembly resolutions 64/72, 66/68 and 71/123, on sustainable fisheries, addressing the impacts of bottom fishing on vulnerable marine ecosystems and the long-term sustainability of deep-sea fish stocks	4	—	—	4
19. Meetings of the United Nations Open-ended Informal Consultative Process on Oceans and the Law of the Sea	10	—	8	8
20. Preparatory meeting for the United Nations Open-ended Informal Consultative Process on Oceans and the Law of the Sea	1	—	1	1
21. Review Conference on the Fish Stocks Agreement	—	—	10	10
<b>Conference and secretariat services for meetings</b> (number of three-hour meetings)	<b>544</b>	<b>220</b>	<b>498</b>	<b>542</b>
22. Meetings relating to the Regular Process for Global Reporting and Assessment of the State of the Marine Environment, including Socioeconomic Aspects	34	63	—	38
23. Meetings of the subcommissions of the Commission on the Limits of the Continental Shelf	510	157	498	504
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>5</b>	<b>7</b>	<b>6</b>	<b>7</b>
24. Hamilton Shirley Amerasinghe Memorial Fellowship on the Law of the Sea	1	1	1	1
25. United Nations-Nippon Foundation of Japan Fellowship Programme for Human Resources Development and Advancement of the Legal Order of the World's Oceans	1	1	1	1
26. United Nations-Nippon Foundation Sustainable Ocean Programme	1	1	1	1
27. Evidence-based and policy-coherent oceans economy and trade strategies project (eleventh tranche of the United Nations Development Account)	1	1	1	1
28. Project for Somali legislators and technical officials on the development of an effective legal framework for the governance of the maritime zones of Somalia and the sustainable development of its resources in conformity with the United Nations Convention on the Law of the Sea and related instruments (project 89 under the trust fund to support initiatives of States to counter piracy off the coast of Somalia)	1	1	1	—
29. Project for the promotion of the implementation of the United Nations Convention on the Law of the Sea and its implementing agreements and the 2030 Agenda for Sustainable Development in the context of ocean affairs and the law of the sea (funded by the Norwegian Agency for Development Cooperation)	—	1	1	1
30. Project for the promotion of the implementation of the United Nations Convention on the Law of the Sea and its implementing agreements with a focus on maritime boundaries (Government of Saudi Arabia)	—	1	—	1
31. Ocean governance capacity-building training programme (in collaboration with the World Bank and the International Seabed Authority)	—	—	—	1
<b>Seminars, workshops and training events</b> (number of days)	<b>5</b>	<b>2</b>	<b>7</b>	<b>33</b>
32. Workshops, seminars and training events on oceans and the law of the sea	5	2	7	33
<b>Publications</b> (number of publications)	<b>4</b>	<b>7</b>	<b>4</b>	<b>4</b>
33. Publications on the law of the sea	4	7	4	4
<b>Technical materials</b> (number of materials)	<b>1</b>	<b>1</b>	<b>1</b>	<b>1</b>
34. Technical brochures on the law of the sea	1	1	1	1

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
--------------------------	-----------------	----------------	-----------------	-----------------

### C. Substantive deliverables

**Consultation, advice and advocacy:** expert advice and programmes of assistance to States and international organizations on the law of the sea and ocean affairs, in particular the United Nations Convention on the Law of the Sea and the Fish Stocks Agreement; advice and assistance to all Member States, upon request, in relation to the work of the General Assembly on oceans and the law of the sea and sustainable fisheries, including with respect to the preparation of draft resolutions under the agenda item on oceans and the law of the sea; support for the implementation by Member States of the oceans-related Sustainable Development Goals in the 2030 Agenda; and strengthening of inter-agency cooperation, in particular through UN-Oceans.

**Databases and substantive digital materials:** geographic information system for the deposit of charts and geographical coordinates; and legal web-based information in relation to maritime zones.

### D. Communication deliverables

**Outreach programmes, special events and information materials:** publicly accessible materials, briefings and events to promote a better understanding of the United Nations Convention on the Law of the Sea and the Fish Stocks Agreement, and the work of the General Assembly on oceans and the law of the sea and sustainable fisheries, and organization of events and other outreach activities to commemorate World Oceans Day.

**Digital platforms and multimedia content:** up-to-date content on the law of the sea and ocean affairs distributed through web portals and websites.

**Library services:** specialized reference collection and bibliographic database on the law of the sea and ocean affairs.

### E. Enabling deliverables

**Information and communications technology:** maintenance of specialized geographic information system software packages and related licences, maintenance of a repository of geospatial data and information.

## Subprogramme 5 Progressive harmonization, modernization and unification of the law of international trade

### Objective

6.113 The objective, to which this subprogramme contributes, is to further the progressive harmonization and unification of the law of international trade.

### Strategy

6.114 To contribute to the objective, the subprogramme will serve as the secretariat to the United Nations Commission on International Trade Law (UNCITRAL), provide member States with working papers, draft reports and draft substantive private law rules on international trade and give advice on and assistance in intergovernmental negotiations. The subprogramme will coordinate those activities with equivalent activities of other international organizations in accordance with the UNCITRAL mandate and propose that UNCITRAL recommend the use or adoption of relevant instruments from other organizations.

6.115 The subprogramme will also provide technical assistance and capacity-building to Governments, including diagnostic assessments, implementation guidance and interpretative materials, as well as training activities and advice on the enactment of UNCITRAL texts in national law.

6.116 The subprogramme plans to support Member States on issues related to COVID-19 by studying disruptions to international trade and global supply chains that occurred during the pandemic and response measures, with a particular focus on micro-, small and medium-sized enterprises. Further to the webinar series described below, UNCITRAL requested the subprogramme to consider UNCITRAL instruments

in that context and to research and explore possible future legislative development to meet the challenges identified. The work will include research, the exchange of experiences and the submission of reform options to the Member States for consideration.

6.117 The above-mentioned work is expected to result in:

- (a) Well-informed, transparent and inclusive deliberations;
- (b) Governments agreeing on substantive private law rules governing international trade and their reflection in universally acceptable instruments;
- (c) The availability of additional instruments to harmonize and unify international trade law;
- (d) Increased government use and adoption of UNCITRAL instruments in national law and increased legal decisions on those instruments;
- (e) Increased treaty actions, enactments and legal decisions on UNCITRAL texts.

6.118 The planned support on issues related to COVID-19 is expected to result in:

- (a) The availability of additional UNCITRAL instruments for use in mitigating the economic impacts of the COVID-19 pandemic;
- (b) Tools to encourage resilience in international trade.

### **Programme performance in 2020**

6.119 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

#### **Enhanced capacity to use UNCITRAL materials to support economic recovery from the COVID-19 pandemic**

6.120 Harmonizing and unifying international trade law includes the adoption of international instruments and securing their effective use and implementation at the national level, necessitating that Governments understand the instrument benefits, policies and national implementation requirements. UNCITRAL notes and expresses its appreciation for the subprogramme's activities to support the use and implementation of all legislative texts developed and adopted by UNCITRAL (see, for example, [A/75/17](#), part one, paras. 19 and 66). The subprogramme generally addresses this need through the in-person provision of practical tools, which was prevented by the COVID-19 pandemic. The subprogramme sought to raise awareness on the role of and build capacity to use the UNCITRAL instruments in assisting Governments in their responses to the pandemic and economic recovery efforts by organizing a series of interactive webinars between 8 and 16 July 2020, in conjunction with the fifty-third session of UNCITRAL ([A/75/17](#), part one, paras. 11 (b) (ii) and 107), using 12 conference hours originally intended for that session. In addition to UNCITRAL delegates, there were 2,336 registrations for the webinars, with an active daily participation of approximately 250 participants. Since then, the virtual panel series has been viewed 1,438 times on the UNCITRAL social media channels.

6.121 The subprogramme also held over 50 additional online and interactive webinars in 2020, to deliver practical tools enabling an effective understanding of existing UNCITRAL instruments, including the United Nations Convention on Contracts for the International Sale of Goods and its use as a model in the domestic context, and transparency requirements in investor-State dispute settlement under the

United Nations Convention on Transparency in Treaty-based Investor-State Arbitration during the UNCITRAL Latin American and Caribbean Days 2020.<sup>9</sup> Furthermore, the subprogramme produced nine podcasts and posted 15 videos on social media to explain common implementation and interpretation issues and provide practice guidelines. The podcasts have been listened to 932 times and the videos have been viewed 4,814 times.

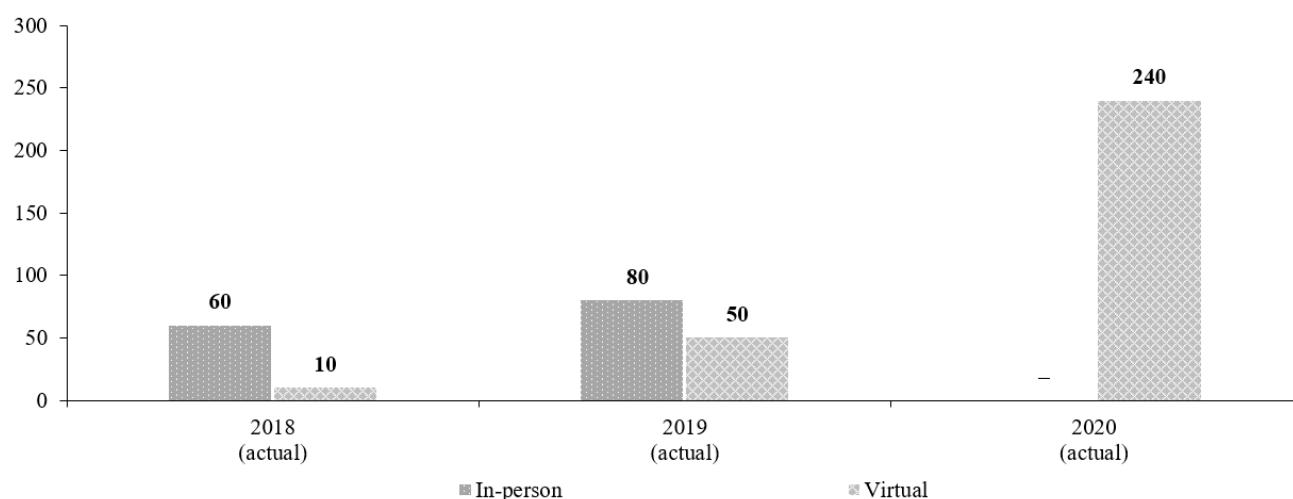

*Progress towards the attainment of the objective, and performance measure*

6.122 The above-mentioned work contributed to the objective, as demonstrated by equipping government officials, judges, adjudicators, academics and legal practitioners with the tools and enhanced capacity to use UNCITRAL texts to: implement robust legal frameworks necessary to revitalize commercial activity and global trade; interpret UNCITRAL instruments appropriately, thus allowing the effective use of those instruments in practice; and mitigate the social and economic dislocation caused by the COVID-19 pandemic (see figure 6.III).

Figure 6.III

**Performance measure: number of experts with enhanced capacity in using UNCITRAL materials (annual)**

(Numbers in hundreds)

**Impact of COVID-19 on subprogramme delivery**

6.123 Owing to the impact of COVID-19 during 2020, the work of the subprogramme was interrupted by the cancellation of five sessions of UNCITRAL working groups in the first half of 2020, while six working group sessions in the second half of 2020 had to be conducted in hybrid format (in which meeting hours were required to be reduced, which curtailed time for deliberations and adopting decisions). A total of 210 working group conference hours was lost. The first part of the fifty-third session of UNCITRAL, from 6 to 17 July 2020, was held virtually, with some meetings cancelled and others required to operate with reduced hours, curtailing time for deliberations and decision-making and resulting in a loss of 42 conference hours. The second part of the session was held from 14 to 18 September 2020, in hybrid format, with a further loss of 10 conference hours (as a result of the requirement for such meetings to be held with reduced hours). As a result, the session did not deliberate on legislative texts and

<sup>9</sup> UNCITRAL noted and expressed its appreciation at its fifty-third session for the approach and activities as regards those conventions (A/75/17, part one, paras. 19, 65–67, 91 and 92).

the planned adoption of two instruments. Coordination, technical assistance and capacity-building activities to support UNCITRAL texts were conducted online, rather than in-person, and some activities for which online delivery was not possible were postponed. The subprogramme facilitated inclusive and equal participation in the UNCITRAL and working group sessions through an online platform, which allowed the sessions to be held virtually and in hybrid format in all official languages; and by developing and implementing procedures for those sessions, including silence procedures for adopting decisions. The subprogramme also delivered technical support to Member States participating in the sessions and engaged in consultation procedures to advance the development of UNCITRAL instruments and possible future legislative development. Those changes had an impact on the programme performance in 2020, as specified in result 3 below.

6.124 At the same time, however, the subprogramme identified new activities to support Member States on issues related to the COVID-19 pandemic, within the overall scope of its objectives, namely, the holding of a series of events to engage with States on the use of UNCITRAL instruments to assist them in their responses to the pandemic and recovery efforts. The new deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

## **Planned results for 2022**

6.125 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: enforcing commercial obligations across borders<sup>10</sup>**

#### **Programme performance in 2020**

6.126 The subprogramme encouraged States to sign, ratify and implement the United Nations Convention on International Settlement Agreements Resulting from Mediation, as envisaged by UNCITRAL in 2019 ([A/74/17](#), para. 122), by participating in online activities and bilateral discussions (in English, French and Spanish) with government officials to explain the terms of the Convention and to provide details of the ratification process. The subprogramme also participated in online events with legal practitioners and the business community, promoting an effective understanding of how the Convention and UNCITRAL texts supported commercial activity, including the usefulness of mediation in the context of the COVID-19 pandemic and economic recovery.

6.127 The above-mentioned work contributed to: the ratification of the Convention by six States in 2020 (Belarus, Ecuador, Fiji, Qatar, Saudi Arabia and Singapore) and its signature by two States (Ghana and Rwanda), resulting in the Convention entering into force on 12 September 2020, which exceeded the planned target of the first ratifications of the Convention reflected in the programme budget for 2020; and the launch of the Singapore Mediation Academy, which met the planned target reflected in the programme budget for 2020.

#### **Proposed programme plan for 2022**

6.128 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the

---

<sup>10</sup> As reflected in the programme budget for 2020 ([A/74/6/Add.1](#)).

subprogramme will continue the above-described activities to encourage further ratifications of the Convention and broaden its effectiveness, and to provide member States and other stakeholders with access to practical tools to allow the settlement of commercial disputes through mediation, including through the Singapore Mediation Academy. The expected progress is presented in the performance measure below (see table 6.20).

Table 6.20  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
United Nations Convention on International Settlement Agreements Resulting from Mediation adopted	Initiation of dialogue between Member States on technical assistance and capacity-building, including on the establishment of national mediation centres	Convention ratified by six States and signed by two other States  Launch of the Singapore Mediation Academy in September 2020	Entry into force of the Convention and launch of further mediation academies	Further ratifications of the Convention, and availability of tools to allow for the settlement of commercial disputes through mediation

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: reforms to investor-State dispute settlement through development of multiple solutions<sup>11</sup>**

### **Programme performance in 2020**

6.129 The subprogramme held intersessional regional meetings in developing countries to exchange experiences and views on the agenda for reform of investor-State dispute settlement and prepare for deliberations in UNCITRAL Working Group III (Investor-State Dispute Settlement Reform), and prepared detailed studies of multiple reform options, including one procedural option and another structural option that could be developed as parallel work streams. Furthermore, the subprogramme implemented agreed ways of working between sessions of Working Group III, including consultations among delegates and observer delegations from international organizations, outreach activities to raise awareness and ensure transparency and inclusivity in the process despite the pandemic and resulting constraints. Topics included dispute prevention and mitigation, means of alternative dispute resolution, treaty interpretation by States parties, reflective loss and shareholder claims, a code of conduct for adjudicators and the development of a multilateral instrument on investor-State dispute settlement reform.

6.130 The above-mentioned work contributed to the consideration by Working Group III of certain reform options and work streams that would allow the development of parallel solutions, which did not meet the target of the Working Group III considering multiple reform options, reflected in the programme budget for 2021. Discussions on one aspect of the work, the form of UNCITRAL instrument to implement agreed reform options, remain to be completed. The first deliberations on the reform options were to be held during the session of Working Group III scheduled in April 2020, which was cancelled as a result of the COVID-19 pandemic. The following session, in October 2020, was held in a hybrid format. The online tools

<sup>11</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

developed by the Secretariat allowed for online participation in the session, and the procedures for deliberations were recognized by delegates as transparent, multilingual and inclusive. Nonetheless, conference hours available for deliberations were reduced from 30 hours to 20 hours. In addition, while the informal consultations and described outreach activities ensured transparency and allowed for the participation of States at all levels of development, the fact that they were held in one language, mainly English, limited inclusivity by making it more difficult for certain delegations (in particular from some regions with a high proportion of developing countries) to participate fully. Those factors resulted in delays in the preparation of a working and resourcing plan towards reform of investor-State dispute settlement within the anticipated time frame and did not allow for the expected progress to be made in developing multiple reform options.

### **Proposed programme plan for 2022**

6.131 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will develop a work and resourcing plan, including the steps needed to build consensus on the development of legal instruments addressing the identified reform options, and on the form of instrument through which they will be implemented. The expected progress is presented in the performance measure below (see table 6.21).

Table 6.21  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Working Group III addresses the first and second parts of its mandate, on the identification of concerns in the field of investor-State dispute settlement and whether those concerns justify a reform of investor-State dispute settlement	Working Group III commences deliberations on possible reform options and on developing a project schedule for reform options in parallel	Working Group III considers multiple reform options	Working Group III continues to develop reform options and reaches consensus on certain reform options	Working Group III continues to develop reform options and build consensus on the legal instruments to be developed in respect of each option and in respect of the implementation of the overall reform

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: greater legal certainty for the use of artificial intelligence and automation in commercial transactions**

#### **Proposed programme plan for 2022**

6.132 Developments in digital technology, such as artificial intelligence, machine-learning algorithms and automation, are transforming trade, including through the use of online platforms, and in forming and performing contracts. These developments can also support economic recovery from the COVID-19 pandemic in all regions and may expand market access in developing countries. The UNCITRAL existing international instruments allow for the use of digital technology in commerce, most recently the Model Law on Electronic Transferable Records. To allow UNCITRAL to

carry out its central and coordinating role within the United Nations system in addressing legal issues related to the digital economy and digital trade, in close association with the approach to artificial intelligence governance and ethics highlighted by the Secretary-General in his Road Map for Digital Cooperation of 2020 (A/74/821 and A/75/17, part two, para. 72), the subprogramme started to compile information on relevant legal issues (A/73/17, para. 253 (b)). A series of regional events highlighted the need for additional harmonized legal rules to allow for the use of artificial intelligence, automation and other digital tools, which could help to bridge the digital divide. The subprogramme also developed a workplan to address those legal issues, including the appraisal of existing instruments and the finalization of a “taxonomy” of priority topics as a map to guide the preparation of future instruments (A/74/17, para. 210, and A/75/17, part two, para. 76). The subprogramme also commenced the development of a priority list of legal issues to be considered by UNCITRAL, such as artificial intelligence and automation (A/75/17, part two, para. 16 (f)).

#### *Lessons learned and planned change*

6.133 The lesson for the subprogramme was that there was strong demand from developing country delegations for participating in the development of instruments and that additional steps were needed to support the universal applicability of UNCITRAL instruments. In applying the lesson, the subprogramme will build on the experience gained during the holding of virtual and hybrid sessions of UNCITRAL and its working groups to ensure inclusive and equal participation in UNCITRAL sessions, consultation procedures and outreach activities, irrespective of the medium used for such participation.

#### *Expected progress towards the attainment of the objective, and performance measure*

6.134 This work is expected to contribute to the objective, as demonstrated by UNCITRAL Working Group IV (Electronic Commerce) commencing deliberations on priority legal issues related to the digital economy and the development of a consensus among States through that Working Group on the elements of a sound and harmonized legal and regulatory framework for digital trade and electronic transactions, which is key to infusing trust in that type of trade, in particular in developing countries. Such a framework will remove obstacles to and foster opportunities for trade and economic development consistent with Sustainable Development Goal 8 (Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all), while also promoting the development of digital infrastructure and the uptake of digital technology consistent with Goal 9 (Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation) (see table 6.22).

Table 6.22

#### C. Substantive deliverables

**Consultation, advice and advocacy:** expert advice on international trade law.

**Databases and substantive digital materials:** CLOUT (an online database on case law on UNCITRAL texts); Transparency Registry (an online repository for the publication of information and documents in treaty-based investor-State arbitration); online e-learning modules on international trade law; online materials, such as presentations, to raise awareness and understanding of UNCITRAL texts; and other databases requested by States.

#### D. Communication deliverables

**Outreach programmes, special events and information materials:** brochures, flyers and information kits on UNCITRAL; lectures to groups of legal and other practitioners, academics and law students; colloquiums on international trade law; international commercial law moot court competitions; commemoration events; and international law congresses.

**External and media relations:** press releases related to UNCITRAL meetings and other important events (e.g., accession by States to UNCITRAL texts and issuance of publications).

**Digital platforms and multimedia content:** up-to-date content for UNCITRAL website.

**Library services:** up-to-date and relevant content in the UNCITRAL Law Library.

<sup>a</sup> With the exception of two working group sessions held at the beginning of 2020, all sessions were held virtually, and meetings were reduced from three to two hours.

## Subprogramme 6 Custody, registration and publication of treaties

### Objective

6.137 The objective, to which this subprogramme contributes, is to ensure the transparency of the international treaty framework, wider knowledge of the law of treaties and broader participation in multilateral treaties concluded under the auspices of the United Nations and deposited with the Secretary-General.

### Strategy

6.138 To contribute to the objective, the subprogramme will undertake the registration and publication of approximately 2,000 treaties and treaty actions each year under Article 102 of the Charter and will provide timely and accurate information relating to deposited treaties, registered treaties and related actions through the electronic dissemination of treaty-related information on the online United Nations Treaty Collection and the publication of the United Nations *Treaty Series*. The

subprogramme will also provide legal assistance and advice to States, specialized agencies, United Nations programmes and offices, treaty bodies and other entities on the law of treaties, including final clauses of treaties, the depositary practice of the Secretary-General and the registration and publication of treaties. Such assistance would be provided in particular during the negotiation of multilateral treaties and through the holding of capacity-building seminars at Headquarters and at the national and regional levels, as well as through the elaboration of topical reference publications. Lastly, the subprogramme will fulfil the depositary functions of the Secretary-General in respect of more than 600 multilateral treaties and hold and conduct treaty events, including during the high-level week of the annual session of the General Assembly.

6.139 The above-mentioned work is expected to result in:

- (a) Improved access to treaties deposited with the Secretary-General and related treaty actions, including information on their status, and to treaties and related treaty actions submitted for registration and publication with the Secretariat;
- (b) The prevention of issues of interpretation and implementation of final clauses of multilateral treaties by contracting States and enhanced familiarity and understanding by States of the technical and legal aspects of participating in the multilateral treaty framework and registering treaties;
- (c) The entry into force of multilateral treaties deposited with the Secretary-General and the universal participation of States in such treaties.

## **Programme performance in 2020**

6.140 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Entry into force of three multilateral treaties deposited with the Secretary-General**

6.141 Throughout 2020, three multilateral treaties deposited with the Secretary-General met the requirements for their entry into force, namely, the United Nations Convention on International Settlement Agreements Resulting from Mediation, the Treaty on the Prohibition of Nuclear Weapons and the Framework Agreement on Facilitation of Cross-border Paperless Trade in Asia and the Pacific.

6.142 The subprogramme provided legal advice and services to negotiating States through the different stages of the negotiation, adoption and entry into force of the aforementioned treaties. Prior to their adoption, the subprogramme provided legal advice to the negotiating States during the negotiation process, including the review of the final clauses of the draft treaties from the perspective of the law of treaties and of the depositary practice of the Secretary-General of the United Nations. In particular, legal advice was provided on provisions on entry into force, amendment procedure, reservations, withdrawal, relation of the treaty provisions with other agreements, the role of the depositary and the role of administrative bodies.

6.143 The three multilateral treaties that met the requirements for entry into force in 2020 had been highlighted by the Secretary-General at the annual treaty events organized by the subprogramme in 2017, 2018 and 2019. The subprogramme also organized specific ceremonies during the referred annual treaty events, such as the 2018 and 2019 ceremonies on the Treaty on the Prohibition of Nuclear Weapons, during which 18 States signed the Treaty and 10 States deposited instruments of ratification.

6.144 In 2020, the subprogramme continued to review and process treaty actions in connection with the aforementioned multilateral treaties, including the holding of eight ceremonies of signature and the processing of 26 instruments of consent to be bound.

*Progress towards the attainment of the objective, and performance measure*

6.145 The above-mentioned work contributed to the objective, as demonstrated by the entry into force of three multilateral treaties deposited with the Secretary-General in the areas of commercial arbitration and mediation, disarmament and international trade and development (see table 6.24).

Table 6.24

**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
The United Nations Convention on International Settlement Agreements Resulting from Mediation is adopted. Thirteen States sign and 17 States deposit instruments of consent to be bound by the Treaty on the Prohibition of Nuclear Weapons or the Framework Agreement on Facilitation of Cross-border Paperless Trade in Asia and the Pacific	Sixty-two States sign and 16 States deposit instruments of consent to be bound by the United Nations Convention on International Settlement Agreements Resulting from Mediation, the Treaty on the Prohibition of Nuclear Weapons or the Framework Agreement on Facilitation of Cross-border Paperless Trade in Asia and the Pacific	Eight States sign and 26 States deposit instruments of consent to be bound by the United Nations Convention on the International Settlement Agreements Resulting from Mediation, the Treaty on the Prohibition of Nuclear Weapons or the Framework Agreement on Facilitation of Cross-border Paperless Trade in Asia and the Pacific. The conditions for the entry into force of the three multilateral treaties were met

**Impact of COVID-19 on subprogramme delivery**

6.146 Owing to the impact of COVID-19 during 2020, the subprogramme could not organize the annual treaty event, which takes place on the margins of the high-level week of the General Assembly and relies on the presence of Heads of States and Governments and ministers for foreign affairs in New York. Owing to the pandemic, the general debate during the opening segment of the Assembly was held virtually, having an impact on the holding of the event. The subprogramme also changed the mode of delivery of the two annual seminars on treaty law and practice at United Nations Headquarters from in-person to virtual. In those circumstances, the subprogramme took that opportunity to propose one seminar in French, in addition to English. The virtual seminars confirmed that in-person capacity-building programmes could not be easily replaced by virtual means, which do not allow for the same level of exchanges among participants and Treaty Section staff.

**Planned results for 2022**

6.147 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

## Result 1: bringing transparency in the international treaty framework into the twenty-first century<sup>12</sup>

### Programme performance in 2020

6.148 The subprogramme assisted Member States in their review of the regulatory framework for the registration and publication of treaties under Article 102 of the Charter provided under General Assembly resolution [73/210](#). In particular, the subprogramme conducted broad consultation with Member States on the review of the regulations to give effect to Article 102 and prepared a report of the Secretary-General providing information on the practice of registration and publication of treaties and possible options to review the regulations to give effect to Article 102, taking into account outstanding issues identified by Member States ([A/75/136](#)). During consideration of the agenda item by the Sixth Committee at the seventy-fifth session of the Assembly, the subprogramme gave a briefing to delegations on the report of the Secretary-General and assisted members of the Committee throughout the consultation process.

6.149 The above-mentioned work contributed to the enhancement of wider knowledge of the law of treaties and of the practice of the Secretariat with respect to the registration and publication of treaties under Article 102 of the Charter. It also contributed to the identification of outstanding issues by Member States and to the determination of possible options for reviewing the regulations to give effect to Article 102, which did not meet the planned target of adoption by Member States of a new regulatory framework that would improve and facilitate the performance by Member States of their obligation to register treaties, reflected in the programme budget for 2020. In its resolution [75/144](#) of 15 December 2020, the General Assembly decided to defer consideration of proposals on the regulations to its seventy-sixth session, taking into account the limitations on meetings within the United Nations premises imposed as precautionary measures to contain the spread of COVID-19.

### Proposed programme plan for 2022

6.150 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to provide information on the law of treaties and on the practice of the Secretariat with respect to the registration and publication of treaties and assist Member States in their review of the regulations to give effect to Article 102 during consideration of the agenda item “Strengthening and promoting the international treaty framework” at the seventy-sixth session of the General Assembly. The expected progress is presented in the performance measure below (see table 6.25).

Table 6.25  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Absence of an updated regulatory framework for the registration and publication of treaties under Article 102 of the Charter, as noted	Consultations between Member States on the various options to further review the regulations to give effect to Article 102 of the Charter	Consideration by the Sixth Committee of a report of the Secretary-General providing information on the practice of	Consideration by the Sixth Committee of proposals by Member States with regard to the General Assembly regulations to give	Implementation of an updated regulatory framework for the registration and publication of treaties under Article 102

<sup>12</sup> As reflected in the programme budget for 2020 ([A/74/6/Add.1](#)).

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
in General Assembly resolution <a href="#">73/210</a>		registration and publication of treaties and possible options to review the regulations to give effect to Article 102, taking into account outstanding issues identified by Member States	effect to Article 102 of the Charter	

<sup>a</sup> The proposed change from the programme budget for 2021 takes into account a decision of the General Assembly to defer consideration of proposals on the regulations to its seventy-sixth session, taking into account the limitations on meetings within the United Nations premises as precautionary measures aimed at containing the spread of COVID-19 (resolution [75/144](#), para. 12).

## **Result 2: modern technology solutions available to Member States to enhance the transparency of the international treaty framework<sup>13</sup>**

### **Programme performance in 2020**

6.151 The subprogramme provided information to Member States on the development of an online registration tool to facilitate the submission of treaties for registration in the report of the Secretary-General on the review of the regulations to give effect to Article 102 of the Charter ([A/75/136](#)) and during the consideration of that report by the Sixth Committee at the seventy-fifth session. The subprogramme also made progress in the development of a prototype online treaty submission system.

6.152 The above-mentioned work contributed to the consideration by the Sixth Committee of proposals by Member States for a possible novel online treaty submission system, which met the planned target of consideration by that Committee of possible updates to the regulations to give effect to Article 102 of the Charter, concerning, in particular, proposals by Member States for such a system, reflected in the programme budget for 2021. In 2020, the possibility of developing such a system was considered by the Sixth Committee at the seventy-fifth session of the General Assembly. Consequently, in its resolution [75/144](#) of 15 December 2020 on strengthening and promoting the international treaty framework, the Assembly noted that most submissions of treaties for registration were in electronic format, and encouraged the Secretary-General to develop, in consultation with and on the basis of feedback from Member States and within existing resources, an online treaty registration system to facilitate submissions of treaties for registration, as an additional option to the existing ways of submission in electronic or hard-copy format.

### **Proposed programme plan for 2022**

6.153 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to develop, on the basis of feedback from Member States and within existing resources, an online treaty registration system to facilitate submissions of treaties for registration. The expected progress is presented in the performance measure below (see table 6.26).

<sup>13</sup> As reflected in the programme budget for 2021 ([A/75/6/Add.1](#)).

Table 6.26  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Update by the General Assembly of its regulations to give effect to Article 102 of the Charter to provide for electronic submission of treaties and treaty-related actions	Consultations between Member States on outstanding issues regarding the regulations to give effect to Article 102 of the Charter, including on the role of technology in the registration of treaties	The General Assembly encourages the Secretary-General to develop a novel online treaty submission system	Development of an online treaty registration system to facilitate submissions of treaties for registration	Further development, in consultation with and on the basis of feedback from Member States, of an online treaty registration system to facilitate submissions of treaties for registration

<sup>a</sup> The proposed change from the programme budget for 2021 takes into account a decision of the General Assembly to defer consideration of proposals on the regulations to its seventy-sixth session, taking into account the limitations on meetings within the United Nations premises as precautionary measures aimed at containing the spread of COVID-19 (resolution 75/144, para. 12).

### Result 3: enhanced access to information available to Member States on the United Nations Treaty Collection website

#### Proposed programme plan for 2022

6.154 In the discharge of the depositary functions of the Secretary-General under multilateral treaties pursuant to Article 98 of the Charter, the subprogramme maintains an online electronic treaty database providing information on the latest participation status of States in more than 600 multilateral treaties deposited with the Secretary-General, including all signatures, ratifications, acceptances, approvals and accessions thereof. The dissemination of such information, which is presented for each multilateral treaty on a status page accessible through the United Nations Treaty Collection website (<https://treaties.un.org>), ensures the transparency of the international treaty framework and broader participation in multilateral treaties concluded under the auspices of the United Nations.

#### *Lessons learned and planned change*

6.155 The lesson for the subprogramme was that the electronic treaty database does not allow for a readily available consolidated report on the status of participation of a specific State in all multilateral treaties deposited with the Secretary-General. Such reports are often requested by States, for instance in connection with the annual treaty event. Their preparation constitutes a time-consuming task requiring the review of multiple depositary notifications. In applying the lesson and in order to improve its data presentation and reporting options, the subprogramme will continue to enhance its electronic treaty database. This particular challenge will be addressed through the development of a data dashboard allowing consolidated reports, in a graphical format, on the participation status of individual States in all multilateral treaties deposited with the Secretary-General.

#### *Expected progress towards the attainment of the objective, and performance measure*

6.156 This work is expected to contribute to the objective, as demonstrated by the increased transparency of the international treaty framework and the broadening of the participation of States in multilateral treaties deposited with the Secretary-General (see table 6.27).

Table 6.27  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
—	—	—	Member States have access to information regarding participation in each multilateral treaty deposited with the Secretary-General, through the United Nations Treaty Collection website	Increased transparency of the international treaty framework and broadening of the participation of States in multilateral treaties deposited with the Secretary-General by providing access to the data dashboard on participation in multilateral treaties

## Legislative mandates

6.157 The list below provides all mandates entrusted to the subprogramme.

### *Charter of the United Nations*

#### Article 98

#### Article 102

### *General Assembly resolutions*

23 (I)	Registration of treaties and international agreements	55/2	United Nations Millennium Declaration
24 (I)	Transfer of certain functions, activities and assets of the League of Nations	56/77; 58/73; 60/19; 62/62; 68/110	United Nations Programme of Assistance in the Teaching, Study, Dissemination and Wider Appreciation of International Law
97 (I)	Registration and publication of treaties and international agreements: regulations to give effect to Article 102 of the Charter of the United Nations	62/70; 70/118	The rule of law at the national and international levels
364 (IV); 482 (V)	Registration and publication of treaties and international agreements	62/272	The United Nations Global Counter-Terrorism Strategy
33/141	Registration and publication of treaties and international agreements pursuant to Article 102 of the Charter of the United Nations	63/128	The rule of law at the national and international levels
51/158	Electronic treaty database	64/179	Strengthening the United Nations Crime Prevention and Criminal Justice Programme, in particular its technical cooperation capacity
52/153; 54/28	United Nations Decade of International Law	73/210; 75/144	Strengthening and promoting the international treaty framework

## Deliverables

6.158 Table 6.28 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 6.28

**Subprogramme 6: deliverables for the period 2020–2022, by category and subcategory**

<b>Databases and substantive digital materials:</b> depositary notifications on treaty actions (signature, acceptance, approval, ratification, accession, succession, reservation, objection, declaration, etc.) and formalities (amendment, correction, entry into force, etc.) regarding multilateral treaties deposited with the Secretary-General; original of treaties and certified true copies of treaties deposited with the Secretary-General; certificates of registration and other registration documents regarding treaties and treaty actions registered and filed and recorded by Member States and other entities; and updating and maintenance of the United Nations Treaty Collection database.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> annual treaty event during the opening session of the General Assembly and special treaty events dedicated to a particular treaty deposited with the Secretary-General.				
<b>Digital platforms and multimedia content:</b> up-to-date content for the Treaty Section website.				
<b>E. Enabling deliverables</b>				
<b>Legal services:</b> legal advice to and support for United Nations offices, departments and regional commissions on the law of treaties, depositary practice and the registration of treaties.				

## Independent Investigative Mechanism for Myanmar

### Overall orientation

#### Mandates and background

6.159 The Independent Investigative Mechanism for Myanmar is responsible for collecting, consolidating, preserving and analysing evidence of the most serious international crimes and violations of international law committed in Myanmar since 2011, and preparing files that can be shared with national, regional or international courts or tribunals to facilitate fair and independent criminal proceedings. The mandate derives from the priorities established in Human Rights Council resolutions [39/2](#), [42/3](#) and [43/26](#). It also includes close and timely cooperation with the International Criminal Court and the International Court of Justice. The mandate is further elaborated in the Mechanism’s terms of reference, as transmitted by the

Secretary-General to the President of the General Assembly ([A/73/716](#)) and in a letter addressed to the President of the Human Rights Council.

6.160 The creation of the Mechanism was welcomed by the General Assembly in its resolution [73/264](#). The Human Rights Council, in its resolution [42/3](#), welcomed the entry into operation of the Mechanism on 30 August 2019 and called upon the United Nations to ensure that the Mechanism was afforded the necessary support and resources it needed in terms of staffing, location and operational freedom so it could deliver as effectively as possible on its mandate. The Assembly, in its resolution [75/238](#), further called upon the United Nations to ensure that the Mechanism was afforded the flexibility that it needed in terms of staffing, location and operational freedom so that it could deliver as effectively as possible on its mandate.

## **Programme of work**

### **Objective**

6.161 The objective, to which the Mechanism contributes, is to ensure accountability of perpetrators and justice for victims of the most serious international crimes and violations of international law committed in Myanmar since 2011.

### **Strategy**

6.162 To contribute to the objective, the Mechanism will build upon its strategy for 2021 and continue to implement its programme and activities in a four-pronged manner.

6.163 The Mechanism will continue to collect and analyse information regarding situations, incidents, persons and entities in accordance with its mandate, including by interviewing witnesses and conducting open-source investigations. Investigations will be prioritized on the basis of substantive and operational criteria, including the scale, nature, manner of commission and impact of the crimes; the degree of responsibility of alleged perpetrators; the prospect of an investigation that meets international standards; and the likelihood of a court or tribunal taking jurisdiction over the crime or crimes in question. Based on these investigations, the Mechanism will prepare case files in relation to the individuals responsible for such crimes and violations.

6.164 The Mechanism will continue to consolidate and preserve the collected material in its electronic database while ensuring the integrity of the evidence and the appropriate chain of custody. The Mechanism will also ensure that the database is equipped with up-to-date digital hardware and security software.

6.165 The Mechanism will continue to share materials and case files with national, regional or international courts or tribunals in accordance with its mandate. The Mechanism will also continue to cooperate with any ongoing or future proceedings by national, regional or international courts or tribunals, including the International Criminal Court and the International Court of Justice.

6.166 The Mechanism will continue to implement its communications and public outreach strategy to explain its mandate, strategies and outputs to relevant stakeholders, in particular to witness and victim groups. The Mechanism will continue to use various communication tools, including its website, social media and a periodic bulletin, to communicate effectively with relevant stakeholders.

6.167 The above-mentioned work is expected to result in:

- (a) The collection and preservation, by an independent and impartial entity, of information that can be shared with national, regional or international courts or tribunals in relation to the most serious international crimes and violations of international law committed in Myanmar since 2011;
- (b) The initiation of fair and independent criminal proceedings in national, regional or international courts or tribunals in relation to the aforementioned crimes;
- (c) Greater understanding of the Mechanism's mandate, work and expected results by all relevant stakeholders, including victims and the general public, in particular inside Myanmar.

## **External factors for 2022**

6.168 With regard to the external factors, the overall plan for 2022 is based on the following planning assumptions:

- (a) Relevant Member States will allow the Mechanism to conduct activities within their territories;
- (b) National, regional or international tribunals or courts have, or may in the future have, jurisdiction over the crimes within the Mechanism's mandate, and the relevant authorities may request the sharing of information from the Mechanism.

6.169 With regard to the COVID-19 pandemic, the proposed programme plan is based on the assumption that the proposed deliverables and activities for 2022, including travel arrangements, will be feasible to implement. However, if the pandemic were to further have an impact on the planned deliverables and activities, they would be adjusted during 2022 within the scope of the overall objectives, strategies and mandates. Any such adjustments would be reported as part of the programme performance information.

6.170 With regard to cooperation with other entities at the global, regional national and local levels, the Mechanism continues to engage with civil society, NGOs and business enterprises to seek relevant information and ensure support for the implementation of its mandate. Such information and support are sought from a diverse range of entities, regardless of their ethnic, religious or political affiliations or loyalties.

6.171 With regard to cooperation with Member States, the Mechanism continues to engage with States, as well as intergovernmental organizations, that may have relevant information and/or may be involved in legal proceedings, in accordance with the Mechanism's mandate. The cooperation of Member States remains particularly important for the Mechanism's investigative activities, including with regard to access to crime sites and the conduct of interviews of witnesses in a manner that ensures their security and privacy.

6.172 With regard to inter-agency coordination and liaison, the Mechanism continues to consult with international courts and other international accountability mechanisms to learn from their experiences and best practices. The Mechanism coordinates with these entities, in particular in the areas of information technology systems and data management, witness protection and support, and witness interviews. The Mechanism also continues to cooperate with other United Nations entities working on issues relating to Myanmar.

6.173 The Mechanism continues to integrate a gender perspective into its policies, activities and deliverables, as appropriate. In that regard, the Mechanism is continuing

to incorporate the tackling of sexual and gender-based crimes into all of its activities, including by ensuring that victims who engage with the Mechanism are provided appropriate protection and support measures to prevent them from being further harmed or traumatized.

6.174 With regard to disability inclusion, the Mechanism will review and specifically examine the United Nations Disability Inclusion Strategy with a view to further advancing disability inclusion, and will include mitigating measures to overcome any challenges while operationalizing the Strategy. The new premises and office layout of the Mechanism were designed to enable the access and inclusion of persons with disabilities, and the Mechanism will ensure that the management of its facilities will further advance disability inclusion to facilitate easy access to and use of them by such persons.

### **Evaluation activities**

6.175 The following self-evaluations completed in 2020 have guided the proposed programme plan for 2022:

- (a) Self-evaluation on the security of the internal and external communications of Mechanism personnel;
- (b) Self-evaluation on the effectiveness of the Mechanism's communication and public outreach strategy through a survey of civil society organizations.

6.176 The findings of the self-evaluations referenced above have been taken into account for the proposed programme plan for 2022. For example, the Mechanism will continue to issue bulletins and maintain its website to facilitate effective communication with stakeholders.

6.177 The following self-evaluations are planned for 2022:

- (a) Self-evaluation on the sharing of information with third parties;
- (b) Self-evaluation on the effectiveness of the Mechanism's communication and public outreach strategy.

### **Programme performance in 2020**

6.178 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

#### **Expansion of open-source information related to serious international crimes and violations of international law committed in Myanmar since 2011**

6.179 Given the proliferation of information relevant to the Mechanism's mandate from publicly available sources, as well as the increasing use by national and international courts of open-source investigations, the Mechanism identified the need for open-source investigation capacity in the early stages of developing its strategy. In 2020, the Mechanism increasingly focused on collecting information from open sources and used the latest open-source investigation tools and technology.

#### *Progress towards the attainment of the objective, and performance measure*

6.180 The above-mentioned work contributed to the objective, as demonstrated by the expansion of the total volume of information items collected for potential sharing with national, regional and international courts and other third parties, in line with the Mechanism's mandate (see figure 6.IV).

Figure 6.IV

**Performance measure: total volume of information items collected for potential sharing**

(Gigabytes)

### Impact of COVID-19 on programme delivery

6.181 During 2020, the COVID-19 pandemic had an impact on the planned deliverables and activities of the Mechanism. The impact included pandemic-related travel restrictions that delayed travel to meet with relevant interlocutors outside the duty station, and the cancellation of other planned travel to consult with Member States on the support and approval necessary for activities on their territory and to meet in person with victims and other stakeholders to facilitate better understanding of the Mechanism's work. For instance, the Mechanism was hindered in its ability to obtain the agreement of relevant parties for the provision of information. The Mechanism thus placed greater emphasis during this period on identifying potential information sources and contacting them, where possible, by secure electronic means. The changes had an impact on the programme performance in 2020, as specified in results 1 and 2 below.

6.182 Travel-related restrictions also contributed to the Mechanism's decision to use videoconferencing technology, which proved useful in many instances, to contact potential information sources and arrange for the collection of information. However, the use of such technology was deemed inappropriate for other interlocutors, such as witnesses, as it was not possible when conducting remote interviews to ensure that witnesses were not subjected to undue influence by those nearby. Remote interviews were further deemed to pose high risks to witness safety and security and could also undermine the integrity of the Mechanism's investigations and lead to legal challenges in any future legal proceedings. In addition, many interlocutors had very limited or no Internet access. For those reasons, the Mechanism decided to postpone interviews with witnesses until travel is again possible.

6.183 Reflecting the importance of continuous improvement and responding to evolving needs, the Mechanism will mainstream lessons learned and best practices related to the adjustments to and adaptation of its programme owing to the COVID-19 pandemic. Specific examples of best practices include the continued emphasis on open-source investigations as a key component of the investigation strategy, through the use of, for example, video footage and photos uploaded to the Internet, posts on social media platforms and geospatial imagery, and communication with potential information sources through secure electronic means. This was also in keeping with the increasing use of open-source investigations by national and international courts.

## Planned results for 2022

6.184 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### Result 1: cooperative frameworks for the collection, preservation and storage of information, documentation and evidence<sup>14</sup>

#### Programme performance in 2020

6.185 The Mechanism initiated discussions with Member States, intergovernmental organizations, United Nations system entities and civil society actors on the development and conclusion of cooperative frameworks for the collection, preservation and storage of information. These frameworks facilitate the Mechanism's work by enabling: (a) the provision of information to the Mechanism; (b) the provision of logistical support to the Mechanism; and/or (c) the conduct of the Mechanism's activities within Member States' territories.

6.186 The above-mentioned work contributed to the Mechanism advancing extensive negotiations and concluding 12 cooperative arrangements, which met the planned target of the agreement of parties to cooperative frameworks for the collection, preservation and storage of information, documentation and evidence, as reflected in the programme budget for 2020.

#### Proposed programme plan for 2022

6.187 The Mechanism will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the Mechanism will continue its efforts in negotiating and concluding additional frameworks. The expected progress is presented in the performance measure below (see table 6.29).

Table 6.29  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Adoption of Human Rights Council resolution <a href="#">39/2</a>	Initiation of dialogue with parties	Agreement of parties to 12 cooperative arrangements on access to information, documentation and evidence	Access to sources of information, documentation and evidence	Agreement of additional parties to cooperative arrangements on access to, and sharing of, information, documentation and evidence

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

<sup>14</sup> As reflected in the programme budget for 2020 ([A/74/6/Add.1](#)).

**Result 2: collection and consolidation of information, documentation and evidence of serious international crimes and violations of international law committed in Myanmar since 2011<sup>15</sup>**

**Programme performance in 2020**

6.188 The Mechanism undertook an assessment of the information in its possession, in particular the materials from the independent international fact-finding mission on Myanmar, in order to determine the gaps in its information. On the basis of this assessment, the Mechanism developed a strategy on the collection of additional information, including through the monitoring of ongoing developments in Myanmar, the utilization of open sources and the issuance of formal requests for information to a variety of entities. The Mechanism engaged extensively with existing and potential information sources to address confidentiality and consent issues.

6.189 Although there were some delays in early 2020, the Mechanism established its electronic database to securely store, consolidate and preserve the information that it collects. As part of its efforts with regard to information security, the Mechanism acquired equipment and hardware to enable encryption and restrict administrative controls.

6.190 The above-mentioned work contributed to an increase in the number and volume of information items processed for potential sharing (see figure 6.V). The previous performance measure reflected in [A/75/6/Add.1](#) is reported in table 6.29 above.

**Proposed programme plan for 2022**

6.191 The Mechanism will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the Mechanism will scale up open-source investigations, identify new sources of information, interview witnesses and monitor ongoing events in Myanmar. The expected progress is presented in the performance measure below (see figure 6.V).

Figure 6.V

**Performance measure: number and volume of information items processed for potential sharing**

(Number of items and gigabytes)

<sup>15</sup> As reflected in the programme budget for 2020 ([A/74/6/Add.1](#)).

### **Result 3: availability of case file evidence packs and analytical documents for sharing with relevant entities**

#### **Proposed programme plan for 2022**

6.192 In order to facilitate criminal proceedings in national, regional or international courts or tribunals, the Mechanism collated and analysed information that it has collected for potential sharing with competent investigative, prosecutorial or judicial authorities. On the basis of its analysis, the Mechanism determined that information needs to be well organized, collated into coherent files pertaining to a specific situation, incident or person/entity, and tied together by clear analysis, to ensure, to the best extent possible, that the information will be useful to investigative, prosecutorial or judicial authorities. The Mechanism has continued to develop its analytical capacity to conduct in-depth analyses of the substantial information in its possession.

#### *Lessons learned and planned change*

6.193 The lesson for the Mechanism was that, in compiling its information and analysis for sharing, it was crucial that the information dealt with specific events, situations or persons/entities, with clear and well-defined parameters. In applying the lesson to ensure that each case file that it develops is specific and of a manageable size, the Mechanism will produce packs for sharing, containing supporting information and analysis, in response to the requests of relevant entities in the relevant criminal or legal proceedings. The Mechanism will collate its information and analysis into future case files in a coherent and practical manner, so as to maximize the usefulness and benefit of such files for future recipients.

#### *Expected progress towards the attainment of the objective, and performance measure*

6.194 This work is expected to contribute to the objective, as demonstrated by the availability of more information and case files that can be shared for use in national, regional or international courts or tribunals, in line with the Mechanism's mandate. The continuous growth of the database and the use of state-of-the-art analytical tools will enhance the Mechanism's ability to share relevant materials and files, as and when requested, as evidenced by the increasing number of information items processed for analysis (see figure 6.VI).

Figure 6.VI

**Performance measure: number of case file evidence packs and analytical documents available for sharing**

## Legislative mandates

6.195 The list below provides all mandates entrusted to the Mechanism.

### General Assembly resolutions

<a href="#">73/264</a>	Situation of human rights in Myanmar	<a href="#">75/238</a>	Situation of human rights of Rohingya Muslims and other minorities in Myanmar
------------------------	--------------------------------------	------------------------	---

### Human Rights Council resolutions

<a href="#">39/2</a> ; <a href="#">42/3</a>	Situation of human rights of Rohingya Muslims and other minorities in Myanmar	<a href="#">46/21</a> ; <a href="#">43/26</a>	Situation of human rights in Myanmar
---	---	---	--------------------------------------

## Deliverables

6.196 Table 6.30 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 6.30

### Independent Investigative Mechanism for Myanmar: deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>2</b>	<b>2</b>	<b>2</b>	<b>2</b>

<b>C. Substantive deliverables</b>				
<b>Fact-finding, monitoring and investigation missions:</b> investigation missions to collect information, documentation and evidence of the most serious international crimes and violations of international law committed in Myanmar since 2011, including by taking statements from victims and witnesses.				
<b>Consultation, advice and advocacy:</b> consultations with more than 30 entities, including Member States and civil society organizations, about the Mechanism.				
<b>Databases and substantive digital materials:</b> database to consolidate, organize, preserve, verify and analyse relevant information and evidence.				

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
--------------------------	-----------------	----------------	-----------------	-----------------

#### D. Communication deliverables

**Outreach programmes, special events and information materials:** meetings and conferences with relevant stakeholders, in particular civil society organizations, to raise awareness about the Mechanism's mandate and activities; and development of information materials about the Mechanism and its work for general dissemination and of material tailored to specific audiences in relevant languages.

**External and media relations:** holding of press conferences and media interviews; participation in panels and events; and provision of briefings to the diplomatic and academic communities on the progress of the Mechanism's work.

**Digital platforms and multimedia content:** update of the Mechanism's website.

## International, Impartial and Independent Mechanism to Assist in the Investigation and Prosecution of Persons Responsible for the Most Serious Crimes under International Law Committed in the Syrian Arab Republic since March 2011

### Overall orientation

#### Mandates and background

6.197 The Mechanism is responsible for assisting in the investigation and prosecution of persons responsible for the most serious international crimes committed in the Syrian Arab Republic since March 2011. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolution [71/248](#), as further elucidated in the Mechanism's terms of reference (see [A/71/755](#), annex). The Mechanism has a responsibility to support criminal accountability, and its work relates to both supporting ongoing investigations and prosecutions being conducted by other actors, and building case files to be shared with courts or tribunals which currently, or may in the future, have jurisdiction over those crimes.

### Programme of work

#### Objective

6.198 The objective, to which the Mechanism contributes, is to achieve accountability for the most serious international crimes committed in the Syrian Arab Republic since March 2011.

#### Strategy

6.199 To contribute to the objective, the Mechanism will continue to build the central repository through existing or new cooperation agreements. The Mechanism will also continue to analyse evidence within the framework of its structural investigations and in response to requests for assistance from eligible jurisdictions. In addition, the Mechanism will build criminal case files through the analysis of evidence in its possession, pursuing lines of inquiry and conducting the investigations required to fill evidentiary gaps. Furthermore, the Mechanism will share information, evidence, analytical documents, expertise and/or case files with national, regional or

international courts and tribunals that have jurisdiction over these alleged crimes. The Mechanism will further develop and implement its victim- and survivor-centred approach and integrate a focus on sexual and gender-based crimes and crimes against children throughout its work. The Mechanism will also continue to promote an integrated approach to justice and accountability through effective dialogue and coordination, including with criminal justice actors, civil society and other United Nations actors, which will help Member States to make progress towards the achievement of Sustainable Development Goals 5 (Achieve gender equality and empower all women and girls) and 16 (Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels).

6.200 The above-mentioned work is expected to result in:

- (a) The storage of crucial evidence of alleged crimes in a central repository, available for collation and distribution to requesting parties;
- (b) Strengthened investigations, prosecutions and trials by jurisdictions with competence over the alleged crimes within the Mechanism's mandate;
- (c) Greater accessibility to justice and gender equality;
- (d) The strengthening of the broadest possible range of justice initiatives compatible with the Mechanism's mandate.

## **External factors for 2022**

6.201 With regard to the external factors, the overall plan for 2022 is based on the following planning assumptions:

- (a) Parties will provide information and evidence in various formats for inclusion in the central repository, necessitating storage capabilities and resources for the ongoing tagging of information and evidence;
- (b) Relevant materials on chemical weapons usage compiled by the Organisation for the Prohibition of Chemical Weapons-United Nations Joint Investigative Mechanism will continue to be made available.

6.202 With regard to the COVID-19 pandemic, the proposed programme plan is based on the assumption that the proposed deliverables and activities for 2022 will be feasible to implement. However, if the pandemic were to continue to have an impact on the planned deliverables and activities, they would be adjusted during 2022 within the scope of the overall objective, strategies and mandates. Any such adjustments would be reported as part of the programme performance information.

6.203 The Mechanism integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, the Mechanism continues to incorporate a gender perspective into its evidentiary strategies in order to avoid bias that results in the inaccurate recording of harm experienced by females; to ensure that due attention is paid to sexual violence crimes against males; and to diversify evidentiary sources to account for different gender perspectives.

6.204 With regard to disability inclusion, the Mechanism will review and specifically examine the United Nations Disability Inclusion Strategy with a view to further advancing disability inclusion, and will include mitigating measures to overcome any challenges while operationalizing disability inclusion.

6.205 With regard to cooperation with other entities at the global, regional national and local levels, the Mechanism will continue to cooperate with competent

jurisdictions, international organizations, Syrian and international civil society organizations and individuals, utilizing a variety of cooperation frameworks.

6.206 With regard to inter-agency coordination and liaison, the Mechanism will continue to cooperate with other United Nations entities working on issues related to the Syrian Arab Republic, including the Independent International Commission of Inquiry on the Syrian Arab Republic, in accordance with its mandate.

### **Evaluation activities**

6.207 The self-evaluation of the workflows of all sections in respect of the integration of a gender analysis into the Mechanism's core activities, pursuant to the gender strategy, is planned for 2022.

### **Programme performance in 2020**

6.208 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

#### **Increased access to a collection of high evidentiary value**

6.209 The Mechanism was confronted with challenges related to the intake and analysis of certain evidentiary materials, owing to their volume, variety and complexity. In response, it implemented new technologies to improve the automatic extraction and translation of text from scanned documents, which has significantly enhanced the searchability of evidentiary materials and helped to ensure faster, more robust and more accurate analytical processes.

6.210 The Mechanism tested this approach on one exceptionally challenging and voluminous collection of materials of high evidentiary value and it yielded successful results. The Mechanism will apply this technology-assisted review technique to other document collections in its central repository to enable the more thorough review of larger evidence collections, facilitating the identification of valuable evidence more quickly. The increased accessibility of these important collections will allow the Mechanism to provide more comprehensive responses to requesting parties.

#### *Progress towards the attainment of the objective, and performance measure*

6.211 The above-mentioned work contributed to the objective, as demonstrated by the significant improvement in the effectiveness of optical character recognition technology applied to a large collection of documents, resulting in more comprehensive responses shared with competent jurisdictions.

Table 6.31  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
—	Evidentiary information shared with competent jurisdictions	More comprehensive evidentiary information shared with competent jurisdictions in an effective manner

**Impact of COVID-19 on programme delivery**

6.212 During 2020, the COVID-19 pandemic had an impact on the planned deliverables and activities of the Mechanism. The impact included the postponement of missions that required face-to-face contact in order to cultivate relationships with relevant sources, investigate and collect information and evidence of international crimes in the Syrian Arab Republic. Similarly, face-to-face consultations with key stakeholders, including civil society actors, and planned visits from national war crimes units to identify relevant evidence in the Mechanism's database, were postponed. These changes had an impact on the programme performance in 2020, as specified under result 1 below.

6.213 Reflecting the importance of continuous improvement and responding to evolving needs, the Mechanism will mainstream lessons learned and best practices related to the adjustments to and adaptation of its programme owing to the COVID-19 pandemic. Specific examples of lessons learned include the continued refinement and adjustment of its analytical workflows to accommodate changes in its evidence collection and processing plans, as well as its continued remote working arrangements, which permitted progress on the development of a foundation for its case files. In addition, the Mechanism will facilitate the secure processing of evidence in altered circumstances and will continue to refine its technical capabilities to better support remote work.

**Planned results for 2022**

6.214 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

**Result 1: domestic investigations and prosecutions supported by expansion and diversification of the evidence collection<sup>16</sup>****Programme performance in 2020**

6.215 The Mechanism continued to develop its capacity to build the central repository by negotiating cooperation frameworks permitting the collection of materials from different stakeholders. In response to the COVID-19 pandemic, the Mechanism strengthened its capacity to collect information and evidence remotely and to access information and evidence online. The Mechanism also identified gaps in its evidence collection that it is proactively seeking to fill, in line with its mandate.

6.216 The above-mentioned work contributed to the registration of 57 sources of information and evidence, which did not meet the planned target of 69 available sources of data reflected in the programme budget for 2020. The target was not met mainly owing to operational restrictions imposed as a result of the COVID-19 pandemic.

**Proposed programme plan for 2022**

6.217 The Mechanism will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the Mechanism will identify and register high-value sources that can provide information and evidence capable of filling key gaps in the Mechanism's central repository and supporting domestic prosecutions. The expected progress is presented in the performance measure below (see figure 6.VI).

---

<sup>16</sup> As reflected in the programme budget for 2020 (A/74/6/Add.1).

Figure 6.VI

**Performance measure: number of available data sources (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: mixed-format analysis<sup>17</sup>**

### **Programme performance in 2020**

6.218 The Mechanism continued to collect information and evidence in multiple formats, including documents, videos, digital images and audio recordings. The Mechanism also made progress in using advanced computational methods to analyse large quantities of materials. In addition, it continued to enhance its in-house capacity to work with multiple evidence formats through the acquisition of relevant technology, the development of related standard operating procedures and, where required, technical training.

6.219 The above-mentioned work contributed to the review of 9,406 evidentiary records for the purpose of responding to requests for assistance made by competent authorities in relevant jurisdictions, which exceeded the planned target of 5,000 evidentiary records reflected in the programme budget for 2021.

### **Proposed programme plan for 2022**

6.220 The Mechanism will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the Mechanism will continue to develop its capacity to collect, preserve and review evidence in diverse formats through the acquisition and development of necessary technologies and the improvement of operating procedures, and by undertaking the necessary technical training. The expected progress is presented in the performance measure below (see figure 6.VII).

<sup>17</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

Figure 6.VII

**Performance measure: number of evidence collection records shared (annual)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: improved integration of gender perspectives throughout the Mechanism's substantive work to facilitate inclusive justice**

#### **Proposed programme plan for 2022**

6.221 In line with its terms of reference, the Mechanism has developed and is scaling up the implementation of a comprehensive gender strategy in order to enhance the integration of gender perspectives in its substantive work, in support of the justice efforts of competent jurisdictions now and in the future.

#### *Lessons learned and planned change*

6.222 The lesson for the Mechanism was that proactive and effective guidance in the form of standard operating procedures and other guidelines, analytical tools and strategy frameworks, as well as training sessions and expert consultations, are required to adequately and effectively integrate gender perspectives into its substantive work. In applying the lesson, the Mechanism will develop additional specialized gender-related products, such as tailored support, training, guidelines and analytical tools to better integrate gender perspectives into its substantive work. It can thereby ensure that the Mechanism accurately represents the gendered nature and impact of crimes in the Syrian Arab Republic, as well as the diverse perspectives of victims and survivors of these crimes.

#### *Expected progress towards the attainment of the objective, and performance measure*

6.223 This work is expected to contribute to the objective, as demonstrated by 18 specialized gender-related products available immediately or in the future for provision to external entities requesting the Mechanism's input into or assistance with justice efforts and activities related to sexual and gender-based crimes in the Syrian context and engagement with victims and survivors of such crimes (see figure 6.VIII).

Figure 6.VIII

**Performance measure: number of specialized products available to external entities integrating a gender perspective (annual)**

### List of mandates

6.224 The list below provides all mandates entrusted to the Mechanism.

#### General Assembly resolutions

<a href="#">71/248</a>	International, Impartial and Independent Mechanism to Assist in the Investigations and Prosecutions of Persons Responsible for the Most Serious Crimes under International Law Committed in the Syrian Arab Republic since March 2011	<a href="#">75/193</a>	Situation of human rights in the Syrian Arab Republic
------------------------	---	------------------------	---

### Deliverables

6.225 Table 6.32 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 6.32

**International, Impartial and Independent Mechanism to Assist in the Investigation and Prosecution of Persons Responsible for the Most Serious Crimes under International Law Committed in the Syrian Arab Republic since March 2011: deliverables for the period 2020–2022, by category and subcategory**

<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>5</b>	<b>6</b>	<b>4</b>	<b>4</b>
2. Meetings of the General Assembly	2	2	1	1
3. Meetings of the Fifth Committee	1	2	1	1
4. Meetings of the Committee for Programme and Coordination	1	1	1	1
5. Meetings of the Advisory Committee on Administrative and Budgetary Questions	1	1	1	1

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>B. Generation and transfer of knowledge</b>				
<b>Seminars, workshops and training events</b> (number of days)	<b>87</b>	<b>3</b>	<b>5</b>	<b>6</b>
6. Lausanne workshops on collaboration strategies between NGOs in the Syrian Arab Republic and the Mechanism	2	1	2	2
7. Workshops for civil society actors in the Syrian Arab Republic to build their capacity to be actors for accountability there	4	1	2	2
8. Training of members of war crimes units in the use of the Mechanism's evidence system to facilitate their identification and analysis of evidence of international crimes	80	—	—	—
9. Annual meeting with victims' representatives from NGOs to engage as part of its victim-centred approach	1	1	1	2
<b>Technical materials</b> (number of materials)	<b>50</b>	<b>60</b>	<b>71</b>	<b>87</b>
10. Document containing a compilation of information and evidence of international crimes, including in response to requests for assistance submitted to the Mechanism by prosecuting authorities	32	34	50	50
11. Documents containing a compilation of analysis of evidence of international crimes, for sharing with relevant authorities	15	25	19	35
12. Case files (in whole or in part) regarding individual criminal responsibility for specific international crimes, ready for sharing with relevant authorities which have jurisdiction to prosecute international crimes committed in the Syrian Arab Republic	3	1	2	2
<b>C. Substantive deliverables</b>				
<b>Fact-finding, monitoring and investigation missions:</b> more than 15 missions to identify and meet sources and potential witnesses and collect evidence to fill existing gaps in the Mechanism's central repository; and/or build case file(s) for national, regional or international jurisdictions that will prosecute international crimes committed in the Syrian Arab Republic since March 2011.				
<b>Consultation, advice and advocacy:</b> consultations with national judicial authorities from more than 15 countries to facilitate their identification and analysis of evidence of international crimes in the Mechanism's central repository, and further cooperation in support of national investigations and prosecutions; consultations with civil society, including a broad range of victim and survivor communities, to improve their understanding about accountability processes, their engagement with the Mechanism and the Mechanism's understanding of contextual factors and accountability priorities.				
<b>Databases and substantive digital materials:</b> central repository of evidence of crimes committed in the Syrian Arab Republic since March 2011 that can facilitate criminal law prosecutions in appropriate jurisdictions, now or in the future.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> periodic bulletins on the Mechanism's work distributed to some 200 NGOs and other entities; information and "frequently asked questions" pamphlets/leaflets for general dissemination; background papers containing information about the Mechanism; and meetings to raise awareness among United Nations partners of the Mechanism's mandate and activities.				
<b>External and media relations:</b> holding of press conferences and interviews; participation in panels and events; and provision of briefings to the diplomatic and academic communities on the progress of the Mechanism's work.				
<b>Digital platforms and multimedia content:</b> online content on the Mechanism's website.				

## Programme 7

### Economic and social affairs

#### Legislative mandates

7.1 The list below provides all mandates entrusted to the programme.

##### *General Assembly resolutions*

47/190	Report of the United Nations Conference on Environment and Development	69/151	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly
47/191	Institutional arrangements to follow up the United Nations Conference on Environment and Development

13. High-level political forum on sustainable development: global workshops on the preparation for voluntary national reviews and sharing of experiences in implementing the Sustainable Development Goals in the context of the high-level political forum	3	4	3	3
14. High-level political forum on sustainable development: regional workshop on the preparation of voluntary national reviews in the context of the high-level political forum	5	1	5	5
15. High-level political forum on sustainable development: seminars, workshops and other events related to the preparation of the high-level political forum	4	4	4	4
<b>Technical materials</b> (number of materials)	<b>23</b>	<b>14</b>	<b>10</b>	<b>12</b>
16. Studies on the implementation of the quadrennial comprehensive policy review	17	9	3	6
17. Studies and materials on issues related to the Economic and Social Council	1	1	2	1
18. Studies and materials on issues related to the high-level political forum, including on the voluntary national reviews	4	4	4	4
19. Studies and materials on issues related to the Committee on Non-Governmental Organizations	1	—	1	1

**C. Substantive deliverables**

**Consultation, advice and advocacy:** support to all Member States for informal consultations on resolutions of the General Assembly and the Economic and Social Council, including the follow-up resolutions on the implementation of the Assembly resolution on the quadrennial comprehensive policy review of United Nations system operational activities for development (quadrennial comprehensive policy review); support for the informal consultations on the ministerial declarations of the Council and the high-level political forum on sustainable development as well as informal consultations on the reports of the Committee on Non-Governmental Organizations; provide briefings to all Member States on sustainable development issues and processes; provide expert advice and support to United Nations intergovernmental bodies, notably the Assembly, the Council and the high-level political forum, to enable them to deliver on their mandates. Keep civil society, NGOs, major groups and other stakeholders informed of the work of the Assembly, the Council and the high-level political forum; support meetings of major

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
groups and other stakeholders to prepare the high-level political forum; conduct inter-agency briefings involving more than 50 United Nations system entities in the preparations of meetings/sessions of the Council and the Assembly, the high-level political forum; lead departmental substantive preparation of meetings of inter-agency coordination mechanisms, including the 31-member United Nations System Chief Executives Board for Coordination, its High-level Committee on Programmes, the 36 members of the United Nations Sustainable Development Group and the 55-member Executive Committee on Economic and Social Affairs Plus; collaborate with the Development Coordination Office to monitor the implementation of the funding compact, including by providing advice and data; collaborate with the Executive Office of the Secretary-General, the Development Coordination Office and other divisions within the Department of Economic and Social Affairs on the preparation of the annual report on United Nations system-wide results towards the achievement of the Sustainable Development Goals; and provide information, analysis and advice to senior United Nations officials (Secretary-General, Deputy Secretary-General, Under-Secretary-General for Economic and Social Affairs, Assistant Secretary-General for Economic Development and Chief Economist and Assistant Secretary-General for Policy Coordination and Inter-Agency Affairs).				
<b>Databases and substantive digital materials:</b> materials for the high-level political forum on sustainable development in support of Member States and other participants (United Nations system entities, major groups and other stakeholders); a paperless committee system used to manage official documentation of the 19-member Committee on Non-Governmental Organizations; integrated information and communications technology platforms accessed globally by some 5,000 NGOs in consultative status with the Economic and Social Council; an indicator framework to monitor the implementation of the quadrennial comprehensive policy review used by all Member States; data on the funding of United Nations operational activities for development; data on the funding compact agreed to by Member States and the United Nations development system in 2019; and a database on voluntary national reviews.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> materials on the work of the Economic and Social Council and the high-level political forum on sustainable development available to all Member States; external communication to all Member States and the general public through, among others, social media platforms, multimedia and press information, in collaboration with the Department of Global Communications; and webinars for some 5,000 NGOs in consultative status with the Council on participation in Council bodies and United Nations activities.				
<b>Digital platforms and multimedia content:</b> update and maintenance of web pages of the subprogramme, including pages for the Economic and Social Council and the high-level political forum on sustainable development, webcasts of the Council and the high-level political forum, and the Civil Society Network website.				

## Subprogramme 2

### Inclusive social development

#### Objective

7.4 The objective, to which this subprogramme contributes, is to strengthen international cooperation in the area of social development and promote greater social inclusion and well-being for all.

#### Deliverables

7.5 Table 7.2 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 7.2

<b>Technical materials</b> (number of materials)	<b>7</b>	<b>5</b>	<b>7</b>	<b>7</b>
19. Outcome documents of expert groups on various social issues	7	5	7	7
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> assessment, analysis and evaluation of all Member States' socioeconomic situations and normative, policy and administrative frameworks in relation to the social dimensions of sustainable development and the Sustainable Development Goals; and provision of briefings/expert advice to more than 40 Member States on sustainable development issues, including on high-level bilateral consultations and intergovernmental meetings, while promoting exchange of good practices, advice and advocacy to advance evidence-based policies.				

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> special events, including commemorations of international days on specific social groups and various social issues; and policy briefs and communication activities to promote advancement of social development with a global reach.				
<b>External and media relations:</b> briefings, press conferences and press releases on various social issues.				
<b>Digital platforms and multimedia content:</b> electronic, audio and video messaging on ageing, cooperatives, disability, family, indigenous issues, young people, sport for development and peace and various other issues, with the subprogramme's webpages accessed by more than 200,000 users annually.				

## Subprogramme 3 Sustainable development

### Objective

7.6 The objective, to which this subprogramme contributes, is to accelerate the implementation of the Sustainable Development Goals, targets and commitments, in accordance with the internationally agreed development goals, including those contained in the 2030 Agenda for Sustainable Development, and the commitments in the Addis Ababa Action Agenda.

### Deliverables

7.7 Table 7.3 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 7.3

#### Subprogramme 3: deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>14</b>	<b>14</b>	<b>12</b>	<b>12</b>
1. Documents for the General Assembly	8	7	8	8
2. Documents for the high-level political forum on sustainable development	5	7	3	3
3. Documents for the multi-stakeholder forum on science, technology and innovation for the Sustainable Development Goals	1	–	1	1
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>87</b>	<b>113</b>	<b>84</b>	<b>92</b>
4. Meetings of the General Assembly	45	59	42	42
5. Meetings of the Economic and Social Council	6	3	6	4
6. Meetings of the high-level political forum on sustainable development	30	50	30	32
7. Meetings of the multi-stakeholder forum on science, technology and innovation for the Sustainable Development Goals	4	–	4	4
8. Meetings of the independent group of scientists for the <i>Global Sustainable Development Report</i>	2	1	2	10

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>7</b>	<b>11</b>	<b>6</b>	<b>5</b>
9. Projects on various topics of sustainable development (water, energy, sustainable transport, sustainable consumption and production, stakeholder engagement, small island developing States partnerships, micro-, small and medium-sized enterprises, etc.)	7	11	6	5
<b>Seminars, workshops and training events</b> (number of days)	<b>125</b>	<b>67</b>	<b>100</b>	<b>100</b>
10. Training seminars and/or workshops for and with national policymakers in developing countries and small island developing States with economies in transition, with a view to strengthening national capacities in all areas of sustainable development	125	67	100	100
<b>Publications</b> (number of publications)	–	–	–	–
11. <i>Global Sustainable Development Report</i>	–	–	–	–
<b>Technical materials</b> (number of materials)	<b>4</b>	<b>19</b>	<b>3</b>	<b>8</b>
12. Sustainable development in action: voluntary commitments and multi-stakeholder partnerships for sustainable development	1	1	1	–
13. Summary reports on progress gaps and challenges in the implementation of resolution 67/215, in which the General Assembly declared 2014–2024 the United Nations Decade of Sustainable Energy for All	1	1	1	–
14. Progress report on multi-stakeholder partnerships for small island developing States	1	1	1	–
15. Publications on the 2030 Agenda for Sustainable Development	1	16	–	8
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> inter-agency coordination in the area of sustainable development, such as UN-Water (2 annual in-person meetings), UN-Energy (1 annual in-person meeting complemented by virtual meetings), UN-Oceans (2 annual meetings), the inter-agency coordination group on small island developing States (3 to 4 annual in-person meetings); and briefings/expert advice to Member States on sustainable development issues, including high-level bilateral consultations and intergovernmental meetings, training courses and materials related to stakeholder engagement in the 2030 Agenda follow-up and review and on multi-stakeholder partnerships in support of the Sustainable Development Goals.				
<b>Databases and substantive digital materials:</b> maintenance of the databases, accessible by the public, on voluntary initiatives, small island developing States, partnerships, voluntary commitments made during the United Nations Conference to Support the Implementation of Sustainable Development Goal 14, Sustainable Development Goal good practices, the database on the United Nations system achievement of the Goals, Sustainable Development Goal acceleration actions, the Technology Facilitation Mechanism, UN-Energy, harmony with nature and other topics of sustainable development.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> special meetings and side events on sustainable development issues during major United Nations conferences at Headquarters or elsewhere; and the publication of the <i>Natural Resources Forum</i> .				
<b>Digital platforms and multimedia content:</b> maintenance of the Sustainable Development Knowledge Platform, which has an average number of 30,000 visits per day.				

## Subprogramme 4 Statistics

### Objective

7.8 The objective, to which this subprogramme contributes, is to advance the global statistical and geospatial information system in order to produce high-quality, easily accessible comparable national statistics and geospatial information systems for policymakers and other users at the national and international levels.

## Deliverables

7.9 Table 7.4 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

43. Technical materials on demographic and social statistics	2	2	2	2
44. Technical materials on environmental statistics and geospatial information	3	11	3	4
45. Technical materials on Sustainable Development Goals and cross-cutting statistical areas	17	22	17	24

#### C. Substantive deliverables

**Consultation, advice and advocacy:** consultation and advice on economic, demographic and social, and environmental statistics and geospatial information, Sustainable Development Goal indicators and cross-cutting statistical areas; and briefings/expert advice to Member States on sustainable development issues, including high-level bilateral consultations and intergovernmental meetings.

**Databases and substantive digital materials:** databases on economic, demographic and social, and environmental statistics and geospatial information, Sustainable Development Goal indicators and cross-cutting statistical areas, with data for more than 200 statistical territories (includes countries and areas).

#### D. Communication deliverables

**Outreach programmes, special events and information materials:** outreach, events and information materials on economic, demographic and social, and environmental statistics and geospatial information, Sustainable Development Goal indicators and cross-cutting statistical areas.

## Subprogramme 5 Population

### Objective

7.10 The objective, to which this subprogramme contributes, is to strengthen the international community's capacity to effectively address current and emerging population issues and to integrate the population dimension into the international development agenda.

## Deliverables

7.11 Table 7.5 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 7.5

10. <i>World Fertility and Family Planning: Highlights</i>	1	1	–	1
11. <i>World Population Ageing: Highlights</i>	–	1	–	–
12. <i>World Population Policies: Highlights</i>	–	–	1	–
13. <i>Population Megatrends</i>	1	–	1	1
14. Questionnaire for the thirteenth United Nations Inquiry among Governments on Population and Development	1	1	–	1
<b>Technical materials</b> (number of materials)	<b>12</b>	<b>12</b>	<b>12</b>	<b>12</b>
15. Major data sets on population topics	2	2	2	2
16. Sustainable Development Goal indicator data sets	3	3	3	3
17. Reports of expert group meetings on population topics	3	3	3	3
18. Technical papers on population topics	4	4	4	4
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> briefings for and consultations with Member States for the Commission on Population and Development; and briefings/expert advice to Member States on population and sustainable development issues, including high-level bilateral consultations and intergovernmental meetings.				
<b>Databases and substantive digital materials:</b> databases and data sets on population topics.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> booklets, fact sheets, wall charts and information kits on population topics; and special events on population topics.				
<b>External and media relations:</b> press conferences, press releases and social media content related to the Commission on Population and Development; press releases or social media content to support the launch of 3 major publications or data sets; and responses to requests from Member States, the media, United Nations entities and other stakeholders.				
<b>Digital platforms and multimedia content:</b> interactive data visualizations or other Internet content on population topics.				

## Subprogramme 6 Economic analysis and policy

### Objective

7.12 The objective, to which this subprogramme contributes, is to facilitate the reaching of intergovernmental agreement on the economic policies and actions necessary at the national and international levels to improve long-term development prospects by strengthening the international debate on new and emerging economic development issues and challenges and on the world economic situation.

### Deliverables

7.13 Table 7.6 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 7.6

**Subprogramme 6: deliverables for the period 2020–2022, by category and subcategory**

### C. Substantive deliverables

**Consultation, advice and advocacy:** consultations on the work of the Group of Friends on Financing the Sustainable Development Goals; consultations on financing sustainable development and the Goals to members of civil society organizations, the private sector, including the Global Investors for Sustainable Development Alliance, academia, foundations and other entities of the United Nations system; and briefings/expert advice to Member States on sustainable development issues, including high-level bilateral consultations and intergovernmental meetings.

### D. Communication deliverables

**External and media relations:** press releases on its annual work, including: Economic and Social Council forum on financing for development follow-up; biennial Development Cooperation Forum high-level meeting, event on financing for sustainable development multi-stakeholder consultations on financing for development; work of the Committee of Experts on International Cooperation in Tax Matters; Sustainable Development Goal Investment Fair; launch of the *Financing for Sustainable Development Report*; and implementation of the Global Investors for Sustainable Development Alliance.

**Digital platforms and multimedia content:** Op-eds and blogs; websites of the Financing for Sustainable Development Office, such as the financing for sustainable development homepage, the Inter-Agency Task Force on Financing for Development online annex, the website of the Development Cooperation Forum, the website of the Committee of Experts on International Cooperation in Tax Matters, the website of the Global Investors for Sustainable Development Alliance and the integrated national financing frameworks knowledge platform.

## Programme 8

### **Least developed countries, landlocked developing countries and small island developing States**

#### **Overall orientation**

#### **Mandates and background**

8.1 The Office of the High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States is responsible for advocating for, supporting, mobilizing, coordinating and reporting on the implementation of the programmes of action for the least developed countries, landlocked developing countries and small island developing States, as well as the achievement of other internationally agreed goals, including the Sustainable Development Goals. As the consequences of the coronavirus disease (COVID-19) pandemic unfold across the world, it becomes more evident that not all countries are able to fight this disease with the same means and vigour, provide the same level of social protection for their citizens who lose jobs and incomes, support small businesses, and build back better and stronger. Least developed countries, landlocked developing countries and small island developing States are disproportionately affected by the negative impact of COVID-19 but have the least capacity to address the consequences of the pandemic. More than before, the crisis displays the extreme vulnerability of these three groups of countries and the need for continued and stronger international attention, action and support. The mandate of the Office of the High Representative therefore becomes all the more important. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolution [56/227](#), whereby the Assembly decided to establish the Office of the High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States; resolution [65/280](#), whereby the Assembly endorsed the Istanbul Declaration and the Programme of Action for the Least Developed Countries for the Decade 2011–2020; resolution [69/15](#), whereby the Assembly endorsed the SIDS Accelerated Modalities of Action (SAMOA) Pathway; and resolution [69/137](#), whereby the Assembly endorsed the Vienna Declaration and the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024.

8.2 The 2030 Agenda for Sustainable Development (General Assembly resolution [70/1](#)) supports the implementation of the three programmes of action – namely, the Istanbul Programme of Action, the Vienna Programme of Action and the Samoa Pathway – all of which are integral to the Agenda. Furthermore, in the 2030 Agenda it is indicated that, in the context of the global follow-up and review processes of the Agenda, effective linkages should be made with the follow-up and review arrangements of all relevant United Nations conferences and processes, including those on the least developed countries, landlocked developing countries and small island developing States.

#### **Strategy and external factors for 2022**

8.3 The year 2022 constitutes an important milestone in the work of the Office of the High Representative in support of the most vulnerable countries. The COVID-19 pandemic threatens the hard-won but mixed progress made by least developed countries, landlocked developing countries and small island developing States in the implementation of their programmes of action and the 2030 Agenda. The pandemic

has also resulted in a new array of challenges to the implementation of the programmes, while aggravating existing ones.

8.4 As those countries are expected to start recovering from the effects of COVID-19, the international community is expected to agree, in January 2022, on a renewed global compact to advance the sustainable development of least developed countries, for the last decade of implementation of the 2030 Agenda. As the implementation of this new compact begins, the two other constituencies of the Office of the High Representative – landlocked developing countries and small island developing States – and their development partners will also enter the last mile of their journey towards the target date by which they committed to overcome disadvantages associated with their geographical locations, the structure of their economies and their ever-increasing exposure to climate change. The pace of progress during the first and last miles of their programmes of action will therefore determine whether or not these countries and their development partners meet their development aspirations, including the Sustainable Development Goals.

8.5 In view of the above challenges, the Office of the High Representative will forge broad and durable partnerships, including within the United Nations system and outside the system, for the advancement of sustainable development in least developed countries, landlocked developing countries and small and island developing States. Cognizant of the importance of the involvement of youth in the implementation and follow up to the programmes of action for least developed countries, landlocked developing countries and small island developing States, the enhanced cooperation with the Office of the Secretary-General's Envoy on Youth to foster the involvement, participation and input of youth in intergovernmental negotiations and official United Nations processes. The Office of the High Representative will also step up efforts aimed at producing data-driven analysis, taking advantage of new tools, including machine learning techniques. The knowledge and data generated by the Office of the High Representative will inform its advocacy and outreach and capacity-building activities. As part of its advocacy mandate, the Office of the High Representative will raise awareness, mobilize support and build consensus. The key audiences will continue to be built both in the most vulnerable countries, as well as in partner countries and in regional and global organizations and forums. The Office of the High Representative will also mobilize resources to ensure that least developed countries, landlocked developing countries and small island developing States participate in the process and have their voices heard in global deliberations. These resources will also enable the representatives from the most vulnerable countries to benefit from capacity-building activities, peer-learning and the exchange of best practices, all on thematic areas relevant to the Sustainable Development Goals and to building resilience in the aftermath of the COVID-19 pandemic.

8.6 For 2022, the planned deliverables and activities of the Office of the High Representative reflect the known and anticipated challenges related to the COVID-19 pandemic that are being faced by Member States. Such planned deliverables and activities include knowledge generation, advocacy, capacity-building, and intergovernmental support and consensus building, all aimed at supporting the efforts of least developed countries, landlocked developing countries and small island developing States to build back better and increase their resilience in the face of multiple shocks. Specific examples of such planned deliverables and activities are provided under subprogramme 1, Least developed countries and include analytical materials and facilitation of peer-learning on poverty eradication and structural transformation, and capacity-building on graduation and smooth transition; under subprogramme 2, Landlocked developing countries and include substantive backstopping support to the group of landlocked developing countries, and analytical

and advocacy materials along with capacity-building on the priorities of the Vienna Programme of Action; and under subprogramme 3, Small island developing States and include advocacy activities for enhanced support and increased resources for small island developing States in addressing the impact of COVID-19, facilitation of collaborative partnerships, especially between those States and the private sector; and peer learning and the exchange of best practices through the small island developing States national focal points network.

8.7 The mainstreaming of the new programme of action for least developed countries and acceleration of the implementation of the programmes of action for landlocked developing countries and small island developing States, in synergy with the 2030 Agenda and other global frameworks, will be at the core of the cooperation between the Office of the High Representative and other entities at the global, regional, national and local levels. The forums through which this cooperation will take place include the national focal points networks of the three groups of countries, similar networks of resident coordinator and the inter-agency consultative groups for least developed countries, landlocked developing countries and small island developing States.

8.8 Comprised of government representatives, the networks of national focal points for least developed countries, landlocked developing countries and small island developing States, to which the Office of the High Representative will provide substantive secretariat support, will serve as an interface between the global and regional processes and national policy formulation, implementation, monitoring and review. By acting as a facilitator and a convener of the meetings of these networks, the Office will enable members of networks to remain engaged at a time when the sharing of information, lessons learned and best practices on building back better in the context of the COVID-19 pandemic and its aftermath is more important than ever.

8.9 The Office of the High Representative will carry out similar functions for the resident coordinator networks for the three groups of countries. These networks will help promote mainstreaming of the programmes of action into the United Nations strategic plans and the United Nations Sustainable Development Cooperation Framework along with supporting resident coordinators to engage with Member States on the ground on specific issues relating to the least developed countries, landlocked developing countries and small island developing States.

8.10 The inter-agency consultative groups for least developed countries, landlocked developing countries and small island development States, of which the Office of the High Representative is a convener, will guide inter-agency coordination and liaison at the regional and global levels. The groups provide platforms where United Nations entities and other international organizations exchange information not their work on the most vulnerable countries, strengthen coordination of their activities and mount joint inter-agency activities.

8.11 With regard to the external factors, the overall plan for 2022 is based on the following planning assumptions:

(a) The security and political situation in least developed countries, landlocked developing countries and small island developing States and in their surrounding regions is conducive to the implementation of the three programmes of actions, namely, the new programme of action for the least developed countries for the decade 2021–2030, the Vienna Programme of Action and the Samoa Pathway;

(b) Continued international support measures in the areas of development finance, market access, technology and technical assistance are made available by their development partners to support these countries.

8.12 With regard to the COVID-19 pandemic, the proposed programme plan is based on the assumption that the proposed deliverables and activities for 2022 will be feasible to implement. However, if the pandemic were to continue to have an impact on the planned deliverables and activities, they would be adjusted during 2022 within the scope of the overall objectives, strategies and mandates. Any such adjustments would be reported as part of the programme performance information.

8.13 The Office of the High Representative continues to mainstream disability inclusion and the rights and development of persons with disabilities into its programme of work and will continue to mainstream inclusion in its reports, following the example of the annual flagship publication, the State of the Least Developed Countries in 2020, that included a dedicated section on the impacts of the COVID-19 pandemic on persons with disabilities. The Office is also promoting consultations with organizations of persons with disabilities, including in the preparations for the upcoming Conference on the Least Developed Countries in 2022, with the aim to raise awareness about the needs and priorities of persons with disabilities living in least developed countries, landlocked developing countries and small island developing States and to promote disability inclusion in the implementation of the three programmes for action for the least developed countries, landlocked developing countries and small island developing States.

8.14 The Office of the High Representative also integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, results in subprogrammes 1 and 2 reflect gender-related aspects.

## **Programme performance in 2020**

### **Impact of COVID-19 on programme delivery**

8.15 During 2020, the COVID-19 pandemic had an impact on the planned deliverables and activities of the Office. The Office of the High Representative has made necessary adjustments both on the modalities and on the content of its programme delivery so as to be responsive to the needs of least developed countries, landlocked developing countries and small island developing States in the context of COVID-19. The Office generated all mandated parliamentary documentation except that pertaining to the Fifth United Nations Conference on Least Developed Countries, which was postponed to 2022. The content of all the reports accounts for the impact of the COVID-19 pandemic and the need for increased support for the most vulnerable countries so that they can build back better. The Office of the High Representative also continued to provide much of the planned substantive backstopping support to least developed countries, landlocked developing countries, and small and island developing States in inter-agency and inter-governmental deliberations that have been conducted through virtual means. Deliverables that are difficult to conduct virtually, either because the beneficiaries live in different time zones or lack broadband connectivity or both, were postponed.

8.16 At the same time, however, some planned deliverables and new activities were identified during 2020, within the overall scope of the objectives of the subprogrammes, in order to support Member States on issues related to the COVID-19 pandemic. The Office of the High Representative contributed to fostering dialogues on the global responses to the COVID-19 pandemic, as they relate to the three groups of countries. In addition to providing substantive inputs to the formulation of the United Nations Secretariat's response to the pandemic, the Office has facilitated a series of briefings between the three groups and the Deputy Secretary-General and other officials from the United Nations development system. These meetings were opportunities for the representatives of the United Nations system to inform the three

groups of countries on ongoing efforts at the national, regional and global levels and to hear from them how they could be better supported. Also, upon request, the Office has assisted least developed countries and landlocked developing countries in formulating their positions on COVID-19, in the form of group statements, along with joint positions by the Office and other United Nations entities. This support also extends to the intergovernmental negotiations on the General Assembly resolution on COVID-19.

8.17 Reflecting the importance of continuous improvement and responding to the evolving needs of Member States, the Office of the High Representative will mainstream lessons learned and best practices related to the adjustments to and adaptation of its programme owing to the COVID-19 pandemic. On the one hand, convening events through virtual means has enabled the Office to reach a wider audience and to increase the number of stakeholders, especially in partner countries where the majority of the population has access to broadband connectivity. This provides an opportunity for increased awareness of special challenges and priorities of the most vulnerable countries. On the other hand, participants based in least developed countries, landlocked developing countries and small island developing States have been relatively disadvantaged as they face various constraints, including limited broadband connectivity, as well as time differences. Further, holding of virtual deliberations came at the cost of limited possibilities for networking and side discussions, which are important means to advance the development agenda of the three groups of countries. Building on these lessons, the Office will opt for modalities of delivery of peer-learning activities that build on the advantages of virtual and in-person interactions while minimizing their respective shortcomings.

## Legislative mandates

8.18 The list below provides all mandates entrusted to the programme.

### *General Assembly resolutions*

56/227	Third United Nations Conference on the Least Developed Countries	70/294	Political Declaration of the Comprehensive High-level Midterm Review of the Implementation of the Istanbul Programme of Action for the Least Developed Countries for the Decade 2011–2020
59/311	International Meeting to Review the Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States	74/3	Political declaration of the high-level meeting to review progress made in addressing the priorities of small island developing States through the implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway
65/280	Programme of Action for the Least Developed Countries for the Decade 2011–2020		
69/15	SIDS Accelerated Modalities of Action (SAMOA) Pathway		
69/137	Programme of Action for Landlocked Developing Countries for the Decade 2014–2024	74/15	Political Declaration of the High-level Midterm Review on the Implementation of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024
70/1	Transforming our world: the 2030 Agenda for Sustainable Development		

## Deliverables

8.19 Table 8.1 lists all cross-cutting deliverables, by category and subcategory, for the period 2020–2022.

Table 8.1

**Cross-cutting deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>6</b>	<b>9</b>	<b>7</b>	<b>7</b>
1. Meetings of the groups of least developed countries, landlocked developing countries and small island developing States	3	6	4	4
2. Meetings of the Fifth Committee	1	1	1	1
3. Meetings of the Committee for Programme and Coordination	1	1	1	1
4. Meetings of the Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
<b>B. Generation and transfer of knowledge</b>				
<b>Publications</b> (number of publications)	–	–	<b>1</b>	<b>1</b>
5. Thematic reports of the Office of the High Representative	–	–	1	1
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> briefing for all Member States on issues pertaining to all three subprogrammes.				
<b>Databases and substantive digital materials:</b> building and maintenance of databases on topics of relevance to Member States, including but not limited to the ongoing response to the COVID-19 pandemic and achievement of goals under the various programmes of action.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> strategic communications materials supporting global outreach campaigns, campaigns and other materials supporting common agendas, especially the Sustainable Development Goals.				
<b>External and media relations:</b> press releases, media briefings and targeted interviews with select media.				
<b>Digital platforms and multimedia content:</b> development of the website of the Office of the High Representative, reflecting key thematic priorities and support events, providing a platform for research, analysis and opinion on major themes.				

**Evaluation activities**

8.20 The evaluation of the Office of the High Representative, completed in 2020, has guided the programme plan for 2022.

8.21 The findings of the evaluation referenced above have been taken into account for the proposed programme plan for 2022. For example, the Office of the High Representative has developed an office-wide advocacy and communication strategy, as recommended in the evaluation. This strategy has informed the choice, content and modalities of delivery of advocacy and communication-related deliverables contained in the proposed programme plan for 2022. Also, the Office has leveraged knowledge management in producing its deliverables.

8.22 An evaluation of the project entitled “Strengthening productive capacity in least developed countries through providing an enabling environment for investment in sustainable energy development” is planned for 2022.

## **Programme of work**

### **Subprogramme 1 Least developed countries**

#### **Objective**

8.23 The objective, to which this subprogramme contributes, is to strengthen policies to eradicate poverty in the least developed countries and accelerate structural transformation of their economies; and to ensure effective graduation from the least developed country category.

#### **Strategy**

8.24 To contribute to the objective, the subprogramme will continue to provide support to Member States in their intergovernmental processes related to the priorities of least developed countries, including by leading the preparations for the Fifth United Nations Conference on the Least Developed Countries and supporting the implementation of its outcome. The subprogramme also plans to prepare analytical materials on how to address the specific challenges of the least developed countries and will facilitate related exchanges of experiences and peer learning on critical enablers to poverty eradication and structural transformation. The subprogramme will continue its advocacy activities related to resource mobilization for sustainable development in the least developed countries. The subprogramme will therefore support Member States in making progress towards achieving the Sustainable Development Goals.

8.25 The subprogramme will continue to provide support to countries graduating from the least developed countries category through workshops and technical support on establishing consultative mechanisms with development partners and preparing smooth transition strategies. The subprogramme will continue to facilitate peer learning, as graduating countries can benefit from the experience of countries that have already graduated.

8.26 The subprogramme plans to support Member States on issues related to COVID-19 by providing policy advice relevant to least developed countries towards building back better and enhancing resilience, including support for building partnerships.

8.27 The above-mentioned work is expected to result in:

(a) Enhanced capacity by the least developed countries to accelerate progress towards reaching the Sustainable Development Goals and other internationally agreed development goals, including the goals of the outcome of the Conference on the Least Developed Countries;

(b) Enhanced capacity of graduating countries with respect to a smooth transition out of the least developed country category.

8.28 The planned support on issues related to the COVID-19 pandemic is expected to result in enhanced preparedness for future shocks through mainstreaming of a new programme of action for least developed countries.

## Programme performance in 2020

8.29 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Improved Internet access in least developed countries

8.30 Information and communications technology (ICT), which is reflected in target 9.c of the Sustainable Development Goals, can advance the competitiveness of countries and enhance the personal lives of users, especially in the context of the COVID-19 pandemic. However, the digital divide remains wide. In 2019, 87 per cent of individuals in developed countries used the Internet, compared with 19 per cent in least developed countries, with even less users among women (13.9 per cent).

8.31 The subprogramme supported the working group on vulnerable countries of the Broadband Commission for Sustainable Development in 2017 and 2018, which was chaired by the Under-Secretary-General and High Representative. Two regional meetings were organized on broadband connectivity, where the need to leverage investment in broadband Internet to advance development was flagged. Industry leaders held networking meetings with government officials, which facilitated partnership building. Case studies on Cambodia, Rwanda, Senegal and Vanuatu were shared to generate knowledge and share best practices.

8.32 The subprogramme also contributed to the Broadband Commission working groups in 2020, including the working group on the digital infrastructure moonshot for Africa, chaired by the World Bank, which intends to double Internet connectivity in Africa by 2021; and a school connectivity project chaired by the United Nations Children's Fund (UNICEF) and the International Telecommunication Union, leading to the launch of the Giga initiative, which will initially advise six least developed countries on the best possible technical solutions to provide schools with connectivity, and to equip these countries with the required infrastructure to support future digital development needs, in partnership with the industry. Recent references to the connectivity issues in least developed countries include the report entitled *The State of Broadband 2020: Tackling Digital Inequalities – A Decade for Action* and various outcomes of the Broadband Commission. Internet connectivity activities were undertaken by the international community in several least developed countries. The members of the Broadband Commission called for improved connectivity and networks, "including for vulnerable populations in least developed countries" in response to the COVID-19 pandemic. The analytical work of the subprogramme provided support for the Chair of the Group of the Least Developed Countries for his contributions to the Global Connectivity Implementation Plan. As a result, in the Secretary-General's Road Map for Digital Cooperation it was recognized that least developed countries are the least connected; and least developed countries called upon their development partners to make available the financial resources and expertise in this respect in the 2020 Ministerial Declaration of the Least Developed Countries.

### *Progress towards the attainment of the objective, and performance measure*

8.33 The above-mentioned work contributed to the objective, as demonstrated by the enhanced commitment from multiple stakeholders to support least developed countries towards the goal of achieving universal connectivity, as the share of Internet users in least developed countries has risen from 5.5 per cent in 2010 to 19.1 per cent in 2019, and the involvement of least developed countries in designing a Global Connectivity Implementation Plan, which aims to ensure that every person has safe and affordable access to the Internet by 2030 (see table 8.2).

Table 8.2  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
Activities of the Broadband Commission for Sustainable Development increased the knowledge of least developed countries and their partners on how to leverage investment in broadband for national development and building partnerships for example, between ICT industry leaders and Governments of least developed countries	Three least developed countries initiate discussions with potential investors on digital investment	<ul style="list-style-type: none"> <li>• Enhanced commitment from multiple stakeholders to support least developed countries towards the goal of achieving universal connectivity</li> <li>• Involvement of least developed countries in designing a Global Connectivity Implementation Plan, which aims to ensure that every person has safe and affordable access to the Internet by 2030</li> </ul>

### Impact of COVID-19 on subprogramme delivery

8.34 Owing to the impact of COVID-19 during 2020, Member States decided to postpone to 2021 the inter-governmental preparatory meetings, at the regional and global levels, for the Fifth United Nations Conference on the Least Developed Countries. Preparations for some of these meetings had been at an advanced stage. Together with the continuation of the COVID-19 pandemic and given the sequential nature of the preparatory process, this also led to the need to reschedule the Conference itself, originally planned for March 2021 as established by the General Assembly in its resolution [74/232 B](#).

8.35 At the same time, however, the subprogramme identified additional deliverables and modified existing ones so as to respond to requests for support from Member States in developing policies to reduce the negative effects of the COVID-19 pandemic, namely fostering dialogue on global responses to the specific needs of least developed countries to combat the spread of the virus and its devastating health, social and economic impacts. The subprogramme supported the least developed countries group in the formulation of its position paper on COVID-19, advocating for a comprehensive support package. It also facilitated a virtual briefing to the least developed countries by the Deputy-Secretary-General, as well as a series of webinars, providing information on policy options and available support with involvement of various stakeholders. The workshop for national focal points of least developed countries was held virtually, with the participation of resident coordinators, and offered a platform for peer learning and exchanges on country responses to the pandemic. The theme of the next state of the least developed countries report was reconceptualized to focus on the multifaceted impact of the COVID-19 pandemic on the least developed countries and ways to enhance their resilience. In addition, the subprogramme held some of the planned meetings in virtual format owing to travel restrictions, including the annual ministerial meeting of the least developed countries.

### Planned results for 2022

8.36 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

## **Result 1: United Nations system support for graduation of least developed countries extended<sup>1</sup>**

### **Programme performance in 2020**

8.37 The subprogramme has continued to ensure better coordinated United Nations system support to graduating least developed countries, in line with its mandate. The subprogramme convened three sessions of the inter-agency task force on graduation of least developed countries, including one session dedicated to the Solomon Islands, in close cooperation with the resident coordinator, crafting a common programme of work to assist the Government in the formulation of a smooth transition strategy. The subprogramme also collaborated with the secretariat of the Committee for Development Policy in supporting a meeting on graduation in Lao People's Democratic Republic. Furthermore, it provided policy advice and assistance to Vanuatu (which graduated on 4 December 2020), which led to the adoption of General Assembly resolution [75/128](#), inviting development partners to provide full support to the implementation of the Vanuatu smooth transition strategy.

8.38 The above-mentioned work contributed to one least developed country having prepared a smooth transition strategy and one having started preparing such strategy, which partially met the planned target of at least two least developed countries having prepared such strategy reflected in the proposed programme budget for 2020.

### **Proposed programme plan for 2022**

8.39 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will support the elaboration of options for strengthening support measures for graduating countries that Member States may consider. The expected progress is presented in the performance measure below (see table 8.3).

Table 8.3  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021(planned)<sup>a</sup></i>	<i>2022 (planned)</i>
The least developed countries currently scheduled for graduation have not completed smooth transition strategies	Least developed countries scheduled for graduation begin preparations for smooth transition strategies, supported by United Nations agencies	One least developed country prepared a smooth transition strategy and one having started preparing such strategy	Graduating and graduated countries share experiences and lessons learned	Member States adopt strengthened support measures for graduating countries

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

<sup>1</sup> As reflected in the proposed programme budget for 2020 ([A/74/6 \(Sect. 10\)](#)).

## **Result 2: a new global framework to boost sustainable development progress in those countries that are lagging the most behind<sup>2</sup>**

### **Programme performance in 2020**

8.40 The subprogramme has modified its approach and strategy to adapt to the unprecedented circumstances brought by the COVID-19 pandemic to the work of the United Nations. The major intergovernmental preparatory meetings at regional and global level that had been planned in 2020 in the lead up to the Fifth United Nations Conference on Least Developed Countries had to be postponed. Pursuant to General Assembly resolution 74/232 B, the meetings have been rescheduled to 2021 and the Conference to 2022. The subprogramme in 2020 developed partnership plans to ensure broad-based and inclusive multi-stakeholder participation in the preparatory process for the Conference, in partnership with the Inter-Parliamentary Union, Least Developed Countries Watch, the Envoy of the Secretary-General on Youth and the Qatar Foundation for Education, Science and Community Development, in cooperation with the United Nations system and other organizations, including through virtual briefings, with active participation of private sector and civil society representatives.

8.41 The above-mentioned work contributed to the participation of multi-stakeholder partners in the preparatory meetings for the conference, which met the planned target reflected in the programme budget for 2021.

### **Proposed programme plan for 2022**

8.42 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will support and facilitate effective partnerships with various stakeholders. The expected progress is presented in the performance measure below (see table 8.4).

Table 8.4  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Member States adopt General Assembly resolution 73/242, deciding to convene the Fifth United Nations Conference on Least Developed Countries	Member States adopt General Assembly resolution 74/232, in which they call for the effective participation of all relevant stakeholders in the Conference	Multi-stakeholder partners participated in the preparatory meetings for the Conference	Adoption of a new action-oriented programme of action for the least developed countries that reflects the views of all stakeholders	Member States implement effective partnerships with various stakeholders

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

<sup>2</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

### **Result 3: accelerated progress towards sustainable development through the implementation of a new programme of action for least developed countries**

#### **Proposed programme plan for 2022**

8.43 Before the COVID-19 pandemic, least developed countries had been making some progress in implementing the priority areas of the Istanbul Programme of Action, which has since been jeopardized. Multiple crises remain prevalent among them and risk derailing progress towards sustainable development with high and recently increasing poverty and gender inequality.

8.44 COVID-19 has also significantly affected productive capacity and trade and reduced gross domestic product growth. Together with the widening fiscal deficit and the drop of foreign direct investments and remittances in most of the least developed countries, as well as resulting unsustainable debt levels, it is expected that the effects of COVID-19 will jeopardize progress towards sustainable development for years to come.

8.45 COVID-19 also exacerbated the serious capacity and institutional constraints many of the Governments of the least developed countries were facing to integrate the Istanbul Programme of Action and other internationally agreed development goals into their national planning and budget systems.

8.46 The subprogramme has engaged with Member States and relevant stakeholders, including the United Nations system, to prepare for the Fifth United Nations Conference on Least Developed Countries, which is expected to agree on an ambitious programme of action supporting least developed countries in their efforts to embark on building back better and increase resilience towards future shocks.

#### *Lessons learned and planned change*

8.47 The lesson for the subprogramme was that, according to a report on United Nations system support to the least developed countries, enhanced coherence and prioritization could help the United Nations being more effective on the ground. It recommends that special needs of least developed countries should be mainstreamed into strategic plans and integrated into the annual work programmes of the United Nations system and other international organizations, in accordance with their respective mandates. In applying the lesson, the subprogramme will intensify its collaboration with other United Nations entities. The subprogramme will support the Secretary-General in convening a United Nations system high-level event during the conference, with a view to ensuring the full mobilization of the United Nations system in support of the least developed countries. The subprogramme will also focus its efforts on enhancing coordination of the system support for the least developed countries, including prioritization of the least developed countries in programmes of work and enhanced technical support to overcome their challenges in implementing the new programme of action for least developed countries to be adopted as an outcome of the Conference on Least Developed Countries. A specific focus will be on gender mainstreaming as one of the core enablers of sustainable development.

#### *Expected progress towards the attainment of the objective, and performance measure*

8.48 This work is expected to contribute to the objective, as demonstrated by 10 least developed countries mainstreaming the new programme of action into their development plans with support from the United Nations system. The mainstreaming is expected to strengthen policies to eradicate poverty and accelerate structural transformation (see table 8.5).

Table 8.5  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
–	Inter-agency meetings held to mobilize United Nations agencies to support implementation of the Istanbul Programme of Action and the preparations of the Fifth United Nations Conference on Least Developed Countries	Report on United Nations support to least developed countries published, recommending mainstreaming and prioritization of such support	Contributions of United Nations agencies in preparatory process for the Fifth United Nations Conference on Least Developed Countries, analysing challenges and making commitments for enhanced support to least developed countries	Ten least developed countries mainstreaming the new programme of action into their development plans with support from the United Nations system

## Legislative mandates

8.49 The list below provides all mandates entrusted to the subprogramme.

### General Assembly resolution

74/232 Follow-up to the Fourth United Nations Conference on the Least Developed Countries

### Economic and Social Council resolution

2020/16 Programme of Action for the Least Developed Countries for the Decade 2011–2020

## Deliverables

8.50 Table 8.6 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 8.6  
Subprogramme 1: deliverables for the period 2020–2022, by category and subcategory

18. Report on progress towards the graduation of the least developed countries (electronic)	–	–	–	1
19. Reports on the implementation of specific areas of the new programme of action for the least developed countries	–	–	–	4
20. Thematic think pieces and background notes on key issues relating to the least developed countries (electronic)	8	8	4	8

**C. Substantive deliverables**

**Consultation, advice and advocacy:** provision of substantive support to the Group of Least Developed Countries; briefing of all Member States on the work of the Office of the High Representative and of the Technology Bank for the Least Developed Countries; advice on the implementation of the Programme of Action for the Least Developed Countries; provision of substantive advice for the meetings of the High-Level Committee on Programmes and the United Nations System Chief Executives Board for Coordination; support the work of the Broadband Commission and participation in meetings to advocate for support towards the least developed countries.

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
--------------------------	-----------------	----------------	-----------------	-----------------

#### D. Communication deliverables

**Outreach programmes, special events and information materials:** promotional materials on the global outreach campaign raising awareness of and accountability of Member States and other stakeholders towards the Programme of Action arising from the Fifth United Nations Conference on the Least Developed Countries; communications campaigns on upcoming graduations, advocating for enhanced smooth transition measures.

**External and media relations:** press releases and press conferences on issues relating to the least developed countries; editorial opinions (op-eds) ensuring that least developed countries issues are at the forefront of international development discourse.

**Digital platforms and multimedia content:** online information on issues relating to the least developed countries; information campaign (including videos, infographics and other social media material) on progress achieved in the Programme of Action for Least Developed Countries; and a web page on the Fifth United Nations Conference on the Least Developed Countries, providing information on its outcome for all Member States and other relevant stakeholders.

## Subprogramme 2 Landlocked developing countries

### Objective

8.51 The objective, to which this subprogramme contributes, is to strengthen policies and capacities to improve the connectivity of landlocked developing countries, with the aim of supporting their sustainable development, reduce their trade transaction costs, increase their regional cooperation and increase their regional, subregional and global trade and strengthen their institutions and social and environmental protection; and to increase structural transformation in landlocked developing countries for sustainable development.

### Strategy

8.52 To contribute to the objective, the subprogramme will continue to provide support to Member States in their intergovernmental processes, including extending evidence-based substantive support to landlocked developing countries in the context of their group meetings, in line with the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024, the 2030 Agenda, the Agenda 2063: The Africa We Want and the Paris Agreement. The subprogramme will also undertake analytical work related to the priorities of the Vienna Programme of Action, the outcome of which will inform both the backstopping support, as well as capacity-building and advocacy activities. Furthermore, the subprogramme will organize capacity-building activities, facilitate the exchange of experiences and peer learning among landlocked developing countries and transit developing countries on the priorities for action of the Vienna Programme of Action. The subprogramme will also continue its advocacy activities for enhanced international support towards the implementation of the Vienna Programme of Action and of the Political Declaration of its High-level Midterm Review and of the 2030 Agenda. The subprogramme will also coordinate and monitor the effective implementation of the road map for accelerated implementation of the Vienna Programme of Action.

8.53 The subprogramme will also continue to provide substantive support to landlocked developing countries, including through analytical reports and workshops, to facilitate interaction with relevant international organizations and the private sector, to encourage experience-sharing and peer learning among Member States and to strengthen inter-agency coordination and the coherence of implementation at the national, regional and global levels and the effective implementation of the road map.

8.54 The subprogramme plans to support Member States on issues related to COVID-19 by undertaking analytical work on the impact of COVID-19 on landlocked developing countries, integrating COVID-19 in the work addressing the priority areas of the Vienna Programme of Action, promoting sharing experiences between landlocked developing countries, as well as advocating for enhanced support towards recovery.

8.55 The above-mentioned work is expected to result in:

(a) Increased support towards landlocked developing countries from the international community, including the United Nations system, to address the needs and challenges arising from landlockedness;

(b) Increased adoption by landlocked developing countries of initiatives to enhance transit and trade facilitation;

(c) Enhanced capacity of landlocked developing countries to devise and formulate policies that promote structural changes in their economies.

8.56 The planned support on issues related to COVID-19 is expected to result in enhanced capacity of landlocked developing countries to formulate policies that foster recovery and build their resilience.

## **Programme performance in 2020**

8.57 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Enhanced transit and trade to landlocked developing countries during COVID-19**

8.58 The introduction of cross-border restrictions aimed at combating the spread of COVID-19 by neighbouring countries affected the smooth flow of imported essential goods and services to landlocked developing countries, including medical and pharmaceutical products and food. In response, the subprogramme enhanced its advocacy activities calling on transit developing countries and landlocked developing countries to keep borders open, facilitate transit and increase transparency on trade related measures introduced during the COVID-19 pandemic.

8.59 The subprogramme coordinated the preparation of a joint United Nations call for smooth transit and transport facilitation to and from landlocked developing countries and a joint statement with the World Customs Organization on facilitating trade and transit during the COVID-19 pandemic. The subprogramme also provided substantive support in drafting the landlocked developing countries call for action on COVID-19, as well as the outcome of the annual ministerial meeting of landlocked developing countries. The statements and outcome of the ministerial meeting encouraged landlocked developing countries and transit countries to keep cross-border transport networks for goods and supply chains open, while protecting the safety of transport workers and citizens, and called on governments and border and customs agencies to work together to simplify, facilitate and fast-track clearance of critical medical equipment and basic goods such as food to landlocked developing countries. The subprogramme advocated for enhanced cross-border collaboration and strengthening of regional cooperation between landlocked developing countries and transit countries during the COVID-19 pandemic.

*Progress towards the attainment of the objective, and performance measure*

8.60 The above-mentioned work contributed to the objective, as demonstrated by two Member States adopting initiatives to facilitating trade and transit during COVID-19 (see table 8.7). For example, Nepal's customs formed a quick response team to ensure that essential goods were cleared within two hours and Bhutan implemented zero contact clearance procedures and release consignments with minimal interference.

Table 8.7  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
—	—	Two Member States adopted initiatives to facilitating trade and transit during COVID-19

**Impact of COVID-19 on subprogramme delivery**

8.61 Owing to the impact of COVID-19 during 2020, the subprogramme postponed the delivery of training aimed at building the capacity of the landlocked developing countries to prepare bankable infrastructure projects for improving transport connectivity for landlocked developing countries under the technical cooperation project on the strengthening of the participation of landlocked developing countries in relevant regional and bilateral cooperation frameworks and their accession to international conventions, and corridor development. These changes resulted in a delay in landlocked developing countries accessing financing for infrastructure development.

8.62 At the same time, however, the subprogramme identified new and modified activities to support Member States on issues related to COVID-19, within the overall scope of its objectives. The subprogramme provided substantive support to landlocked developing countries on consultations on their group position on COVID-19, and also supported their bureau and ambassadorial meetings. The subprogramme also coordinated the preparation of a joint United Nations call for smooth transit and transport facilitation to and from landlocked developing countries that included the United Nations Conference on Trade and Development, the Economic and Social Commission for Asia and the Pacific, the Economic Commission for Africa, the Economic Commission for Latin America and the Caribbean and the Economic Commission for Europe. The subprogramme also prepared a joint statement with the World Customs Organization on facilitating trade and transit during the COVID-19 pandemic. The pandemic led to the virtual organization of the Inter-Agency Consultative Group Meetings on the preparation of the road map for accelerated implementation of the Vienna Programme of Action which was adopted at the ministerial meeting of landlocked developing countries. The subprogramme prepared an analysis on the effects of the COVID-19 pandemic that was included in the report of the Secretary-General on the implementation of the Vienna Programme of Action ([A/75/285](#)). The subprogramme also held several events virtually and integrated the focus on COVID-19 at those events. The new and modified deliverables contributed to results in 2020, as specified in the result 1 below.

## Planned results for 2022

8.63 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: accelerating the connectivity of landlocked developing countries<sup>3</sup>**

#### **Programme performance in 2020**

8.64 The subprogramme has continued its work related to supporting landlocked developing countries and transit countries to improve connectivity and trade facilitation. The subprogramme had to adjust its planned activities and support in the light of the outbreak of the COVID-19 pandemic. Instead of planned capacity-building activities for landlocked developing countries and transit countries, the subprogramme focused on facilitating sharing experiences on effective solutions to enhance connectivity of landlocked developing countries and on the adoption and implementation of simplified and harmonized international trade procedures. Furthermore, the subprogramme used its advocacy and coordination role to promote international action to ensure smooth transit and transport facilitation to and from landlocked developing countries in the light of the measures taken to contain the spread of COVID-19.

8.65 The above-mentioned work contributed to the adoption and implementation of simplified and harmonized international trade procedures by two landlocked developing countries, which partially met the planned target of at least two landlocked developing countries having prepared bankable road infrastructure projects that are ready for investment and adopting and implementing simplified and harmonized international trade procedures reflected in the proposed programme budget for 2020. The COVID-19 pandemic resulted in challenges in planning and providing the capacity-building activities for landlocked developing countries and transit countries towards developing bankable road infrastructure projects. Despite those challenges, Turkmenistan ratified six international agreements and protocols regulating international transport in Eurasia and Lao People's Democratic Republic deposited its instrument of ratification of Intergovernmental Agreement on Dry Ports.

#### **Proposed programme plan for 2022**

8.66 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will undertake capacity-building activities, in cooperation with other United Nations entities, regional and international organizations, to scale up best practices in developing bankable infrastructure projects and corridor development and other solutions to increase the connectivity of landlocked developing countries. The expected progress is presented in the performance measure below (see table 8.8).

<sup>3</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 10)).

Table 8.8  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Landlocked developing countries have indicated an interest in capacity-building on developing bankable infrastructure projects and on the adoption and implementation of simplified and harmonized international trade procedures	Landlocked developing countries undertake capacity-building, on the development of bankable infrastructure projects and on the adoption and implementation of simplified and harmonized international trade procedures	Two landlocked developing countries have adopted and implemented simplified and harmonized international trade procedures	At least two tangible initiatives on transit, trade facilitation, corridor development and structural economic transformation are implemented by landlocked developing countries and transit countries	At least two landlocked developing countries have prepared bankable infrastructure projects that are ready for investment or implemented other transit and trade facilitation solutions to increase connectivity

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: enhanced transit to facilitate greater trade potential for landlocked developing countries<sup>4</sup>

### Programme performance in 2020

8.67 The subprogramme prepared a report that raised awareness among landlocked developing countries on best practices to develop enabling instruments to support corridor functions and for infrastructure development, trade and transport facilitation. The subprogramme also coordinated the preparation of a joint United Nations call for smooth transit and trade and transport facilitation to and from landlocked developing countries during the COVID-19 pandemic. The subprogramme also prepared a report on improved transport connectivity to landlocked developing countries during the COVID-19 pandemic.

8.68 The above-mentioned work contributed to the adoption of General Assembly resolution [75/233](#) and the adoption of three tangible initiatives on transit, trade facilitation and structural economic transformation that are being implemented by landlocked developing countries and transit countries which met the planned target reflected in the programme budget for 2021. The initiatives include the digitalization of export procedures by Paraguay, in 2020, to facilitate the faster movement of goods; and some landlocked developing countries implemented measures to fast-track the clearance of goods, for example in Botswana and Eswatini.

### Proposed programme plan for 2022

8.69 The subprogramme will continue the work related to the planned result, in line with its mandate. contribute to further progress towards the objective, the subprogramme will be undertaking advocacy activities, substantive analytical work, and building capacity of landlocked developing countries on enhancing transit, transport connectivity and trade facilitation during the COVID-19 era. The expected progress is presented in the performance measure below (see table 8.9).

<sup>4</sup> As reflected in the programme budget for 2021 ([A/75/6/Add.1](#)).

Table 8.9  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Member States express interest in addressing transit challenges and call for rapid ratification and implementation of the World Trade Organization Agreement on Trade Facilitation	Member States ratify the World Trade Organization Agreement on Trade Facilitation and call upon all members that have not yet done so to ratify the Agreement	<ul style="list-style-type: none"> <li>Member States adopt General Assembly resolution <a href="#">75/233</a></li> <li>Adoption of three tangible initiatives on transit, trade facilitation and structural economic transformation that are being implemented by landlocked developing countries and transit countries</li> </ul>	Member States adopt new initiatives to improve transit, trade facilitation and structural transformation	Increased number of Member States that report increased implementation of trade facilitation measures under the World Trade Organization Agreement on Trade Facilitation

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: better coordinated United Nations support to landlocked developed developing countries

#### Proposed programme plan for 2022

8.70 Building on the momentum created by the midterm review of the Vienna Programme of Action, landlocked developing countries requested the Secretary-General to develop a road map for the remaining five years of the Vienna Programme of Action to accelerate its implementation. The subprogramme led the coordination of the United Nations and other international organizations in the development of the road map in 2020. The road map identified initiatives that require dedicated and urgent focus, including transit, trade and transport facilitation; energy and ICT; structural transformation; cooperation between landlocked developing countries and transit countries; means of implementation, climate change, COVID-19 and gender equality.

#### *Lessons learned and planned change*

8.71 The lesson for the subprogramme was that the Office of the High Representative needed to step up its efforts to coordinate United Nations support for the Vienna Programme of Action so that landlocked developing countries can fully reap the benefits associated with increased coherence and synergies. In applying the lesson and in order to foster the impact of United Nations support to the landlocked developing countries, the subprogramme will work with other United Nations agencies to advance the road map for accelerated implementation of the Vienna Programme of Action. This will entail stronger engagement with the offices of resident coordinators, joint capacity-building activities, common advocacy awareness-raising campaigns and joint analytical and substantive products, which will inform policy making and inter-governmental outcomes. The subprogramme will

also partner with relevant organizations, including regional commissions, the United Nations Conference on Trade and Development, the World Trade Organization, the World Customs Organization, the World Bank and regional development banks, to facilitate coordinated and coherent implementation of the Vienna Programme of Action as well as to enhance monitoring and reporting of implementation of activities of the road map.

*Expected progress towards the attainment of the objective, and performance measure*

8.72 This work is expected to contribute to the objective, as demonstrated by the number of Member States who implement at least five new initiatives on transit, transport, trade facilitation, energy and ICT development, and structural economic transformation included in the road map (see table 8.10).

Table 8.10  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
–	Member States call upon the United Nations system to provide support to accelerate the implementation of the Vienna Programme of Action (General Assembly resolution <a href="#">74/15</a> )	Member States request the Secretary-General to prepare a road map on coordinated United Nations support to the implementation of the Vienna Programme of Action	Member States implement at least two new initiatives included in the road map	Member States implement at least five new initiatives contained in the road map, including on transit, transport, trade facilitation, energy and ICT development, and structural economic transformation

## Legislative mandates

8.73 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolutions*

<a href="#">69/137</a>	Vienna Declaration and Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024	<a href="#">74/15</a>	Political Declaration of the High-level Midterm Review on the Implementation of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024
<a href="#">70/1</a>	Transforming our world: the 2030 Agenda for Sustainable Development		
<a href="#">73/243</a> ; <a href="#">74/233</a> ; <a href="#">75/228</a>	Follow-up to the second United Nations Conference on Landlocked Developing Countries		

## Deliverables

8.74 Table 8.11 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 8.11

**Subprogramme 2: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>1</b>	<b>1</b>	<b>1</b>	<b>1</b>
1. Reports to the General Assembly, including on the implementation of the Vienna Programme of Action for landlocked developing countries for the Decade 2014–2024	1	1	1	1
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>35</b>	<b>38</b>	<b>35</b>	<b>39</b>
2. Formal meetings and informal consultations of the Second Committee of the General Assembly	13	14	13	15
3. Meetings of the high-level political forum on sustainable development of the Economic and Social Council	2	2	2	2
4. Annual ministerial meetings of the landlocked developing countries and consultations on outcomes thereof, and other ministerial meetings	10	10	10	10
5. Meetings of the Group of Landlocked Developing Countries	10	12	10	12
6. Expert group meeting on thematic issues (structural economic transformation, sustainable development, trade facilitation measures, COVID-19 and other relevant issues for landlocked developing countries)	–	–	–	2
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>3</b>	<b>2</b>	<b>3</b>	<b>3</b>
7. Project on the enhancement of the analytical capacity of the International Think Tank for Landlocked Developing Countries	1	1	1	1
8. Project on the enhancement of the role of the private sector in the implementation of the Vienna Programme of Action, trade facilitation and structural transformation	1	1	1	1
9. Project on the strengthening of the participation of landlocked developing countries in relevant regional and bilateral cooperation frameworks and their accession to international conventions, and corridor development	1	–	1	1
<b>Seminars, workshops and training events</b> (number of days)	<b>3</b>	<b>2</b>	<b>4</b>	<b>7</b>
10. Round-table discussion on capacity-building	1	1	1	1
11. Workshop for national focal points of landlocked developing countries	–	–	–	1
12. Panel discussion on best practices	1	1	1	1
13. Events on capacity-building, best practices and thematic areas in line with the 2030 Agenda for Sustainable Development and other United Nations practices, including COVID-19, energy, ICT, infrastructure, Sustainable Development Goal 14, climate change and desertification	1	–	2	4
<b>Technical materials</b> (number of materials)	<b>5</b>	<b>5</b>	<b>4</b>	<b>4</b>
14. Reports on thematic issues and indicators of the Vienna Programme of Action and the 2030 Agenda for Sustainable Development	2	2	2	2
15. Reports on thematic development issues in landlocked developing countries	3	3	2	2

**C. Substantive deliverables**

**Consultation, advice and advocacy:** substantive support to the Group of Landlocked developing Countries; briefings to 32 landlocked developing countries, 34 transit countries and 28 development partners on the work of the Office of the High Representative; side events promoting the implementation of the 2030 Agenda for Sustainable Development and the Vienna Programme of Action; substantive advice to 32 United Nations country teams and other United Nations organizations to ensure synergy and coherence in the implementation and monitoring of, and follow-up to, the Vienna Programme of Action and the 2030 Agenda at the national and regional levels; and preparation of landlocked developing countries-specific inputs to United Nations system-wide monitoring and follow-up frameworks for the 2030 Agenda.

**Databases and substantive digital materials:** database of indicators for landlocked developing countries.

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

**D. Communication deliverables**

**Outreach programmes, special events and information materials:** promotional materials on the global outreach campaign for landlocked developing countries.

**External and media relations:** press releases and press conferences on issues relating to landlocked developing countries.

**Digital platforms and multimedia content:** updating and maintenance of online information on issues relating to landlocked developing countries; and maintenance of the subprogramme's web pages.

## Subprogramme 3

### Small island developing States

#### Objective

8.75 The objective, to which this subprogramme contributes, is to increase sustainable economic, social and environmental resilience in small island developing States.

#### Strategy

8.76 To contribute to the objective, the subprogramme will advocate for the special case of small island developing States in achieving sustainable development; mobilize increased resources for those States in priority areas; provide more structured support for the facilitation of collaborative partnerships, especially between those States and the private sector; strengthen coherence and coordination at the national, regional and global levels, including by providing more structured support to the small island developing States national focal points network; and increase coordination between United Nations entities supporting those States.

8.77 The subprogramme plans to support Member States on issues related to COVID-19 by integrating COVID-19 recovery into the work on the implementation of the Samoa Pathway, facilitating the sharing of experiences between small island developing States, advocating for enhanced support and increased resources in addressing the impact of COVID-19, and ensuring the coherence of the support provided by the United Nations system for recovery efforts at the national, regional and global levels.

8.78 The above-mentioned work is expected to result in strengthened international support measures aimed at enabling small island developing States to implement the Samoa Pathway, the Paris Agreement and other priorities of those States for sustainable development.

8.79 The planned support on issues related to COVID-19 is expected to result in enhanced access to finance for small island developing States through the strengthening and development of tailored policy tools.

#### Programme performance in 2020

8.80 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Improved access for small island developing States to regional and global platforms for coordinated support**

8.81 The United Nations prepared a comprehensive response to COVID-19 and its impacts, which included a coordinated health response, and addressed the socioeconomic aspects of the crisis. The subprogramme organized virtual regional meetings with national focal points of small island developing States to share experiences and best practices on the response to the COVID-19 pandemic and on mainstreaming the Samoa Pathway and the Sustainable Development Goals into national development processes, in line with the principle of building back better. During the meetings, participants from the Pacific and the Caribbean discussed the COVID-19 response frameworks of the United Nations in their respective regions and identified ways to improve access to regional and global platforms for coordinated technical support and financial and other resources, with a focus on, among other things, health, climate change, disaster risk reduction, reducing unemployment and promoting gender equality and the empowerment of women and girls. The 2020 meeting of national focal points from countries in the Atlantic, Indian Ocean and South China Sea region benefited from these discussions and allowed for the exploration of ways to create or enhance access to regional platforms for the United Nations COVID-19 response. The meeting served to lay the foundation for strengthened coordination in the Atlantic, Indian Ocean and South China Sea region, which lacks a single coordinating mechanism.

#### *Progress towards the attainment of the objective, and performance measure*

8.82 The above-mentioned work contributed to the objective, as demonstrated by the fact that all 38 small island developing States benefited from the United Nations response to COVID-19 at the regional and global levels, including technical support and financial resources (see table 8.12).

Table 8.12  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
The small island developing States national focal points network is established and inaugurated on the margins of the interregional preparatory meeting for the midterm review of the Samoa Pathway	The small island developing States national focal points network holds its second meeting, which adopts its terms of reference	All 38 small island developing States benefit from the United Nations response to COVID-19 at the regional and global levels, including technical support and financial resources

### **Impact of COVID-19 on subprogramme delivery**

8.83 Owing to the impact of COVID-19 during 2020, the subprogramme changed the approach to the meetings of small island developing States national focal points and the Small Island Developing States Global Business Network Forum. For the small island developing States national focal points, the subprogramme organized three separate virtual meetings, by region – the Pacific region, the Caribbean region and the Atlantic, Indian Ocean and South China Sea region – instead of its usual practice of holding one meeting with all national focal points, owing to the significant time differences between the regions. The fact that separate meetings were held meant that harmonization of multi-regional issues was limited, and discussions on business network opportunities diverged widely. The Forum was divided into two parts, with thematic webinars held in 2020 and an in-person session planned for 2021. These

changes had an impact on programme performance in 2020, as specified under result 1 below.

8.84 At the same time, however, the subprogramme identified new and modified activities to support Member States on issues related to COVID-19, within the overall scope of its objectives. The subprogramme focused on the preparation of a report on development finance in small island developing States, in which account was taken of the impact of COVID-19 and the need for increased support for small island developing States. The report was a more immediate priority for the small island developing States than the other technical materials planned, and it informed their engagement in the Financing for Development in the Era of COVID-19 and Beyond process. The publication of the other technical materials was postponed to 2021. The subprogramme also convened or supported meetings of the small island developing States national focal points, the Inter-agency Consultative Group on Small Island Developing States and the Steering Committee on Partnerships for Small Island Developing States, and held consultations on the multi-country office review, all including a focus on COVID-19 response and recovery in small island developing States. The meetings served to facilitate a more coherent, tailored and effective United Nations system response in small island developing States. The subprogramme also held several events virtually and integrated the focus on COVID-19 in them. They included a meeting on debt risks in small island developing States on the margins of the Financing for Development in the Era of COVID-19 and Beyond process, which allowed for the development and consideration of responses and pathways to recovery specific to small island developing States. The new and modified deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

## **Planned results for 2022**

8.85 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: strengthened private sector engagement on oceans<sup>5</sup>**

#### **Programme performance in 2020**

8.86 The subprogramme, in partnership with the World Ocean Council, convened a preparatory webinar for the Small Island Developing States Global Business Network Forum in November 2020 to enhance the private sector network and expertise of the Small Island Developing States Global Business Network and the Small Island Developing States Partnership Framework, insofar as they relate to oceans, in support of small island developing States. Furthermore, the subprogramme partnered with small island developing States on activities to increase the engagement of the private sector in the area of oceans, including in the context of the Small Island Developing States Partnership Framework.

8.87 The above-mentioned work contributed to 5 new Small Island Developing States Global Business Network ocean-related partnerships, which did not meet the planned target of 10 new partnerships reflected in the proposed programme budget for 2020. The planned target for 2020 could not be met owing to the impact of COVID-19, which included the postponement of the United Nations Conference to Support the Implementation of Sustainable Development Goal 14, the “Our Ocean” Conference and the in-person Small Island Developing States Global Business Network Forum.

---

<sup>5</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 10)).

As a result, there were limited opportunities to network and engage the private sector in the establishment of the ocean-related partnerships envisaged for this period.

### Proposed programme plan for 2022

8.88 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will implement a road map of activities related to the Small Island Developing States Global Business Network in 2022, with the aim of facilitating the establishment of more private sector partnerships with small island developing States to support the achievement of Sustainable Development Goal 14. The expected progress is presented in the performance measure below (see the figure below).

### Performance measure: total number of Small Island Developing States Global Business Network ocean-related partnerships (cumulative)

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: enhanced coordination and coherence of the United Nations system to support the implementation of the Samoa Pathway<sup>6</sup>

### Programme performance in 2020

8.89 The subprogramme has facilitated intergovernmental consultations to inform the final recommendations of the Secretary-General on the implementation of the multi-country office review, including a focus on the United Nations COVID-19 response framework in small island developing States.

8.90 The above-mentioned work contributed to the adoption of General Assembly resolution [74/297](#), which met the planned target of Member States agreeing to enhanced United Nations support with enhanced alignment with national priorities and the Samoa Pathway through the implementation of the multi-country office review, reflected in the programme budget for 2021.

### Proposed programme plan for 2022

8.91 The subprogramme will continue the work related to the planned result, as outlined in General Assembly resolution [74/297](#), and in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue

<sup>6</sup> As reflected in the programme budget for 2021 ([A/75/6/Add.1](#)).

to facilitate transparent and inclusive consultations with all countries concerned throughout and after the implementation phase, for regular monitoring, reporting and follow-up with regard to the multi-country office review. The expected progress is presented in the performance measure below (see table 8.13).

Table 8.13

**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Stakeholders participate in the regional and interregional preparatory meetings for the midterm review of the Samoa Pathway, calling for, inter alia, increased coordination among the national, regional and global levels to address issues relating to small island developing States	Small island developing States strongly express a need for more targeted support in the context of the midterm review of the Samoa Pathway	Adoption of General Assembly resolution <a href="#">74/297</a>	Increased number of small island developing States that have communicated the establishment or operationalization of an integrated policy, strategy or plan related to climate change, climate resilience and greenhouse gas emissions	Small island developing States review the implementation of the multi-country office review, with a view to further enhancing tailored United Nations support, including strengthened policy support related to climate change, climate resilience and greenhouse gas emissions

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: enhanced access to finance for small island developing States through the strengthening and development of policy tools**

#### **Proposed programme plan for 2022**

8.92 The need for enhanced access for small island developing States to concessional financing has been widely recognized as necessary to achieve the 2030 Agenda. In the political declaration of the high-level midterm review of the Samoa Pathway, adopted in 2019, Heads of State and Government, Ministers and High Representatives recognized the need to devise methodologies to better account for the complex and diverse realities of middle-income countries. Furthermore, they noted the need to analyse possible measures to expand eligibility for finance through exceptions and multidimensional assessments. In 2020, in the context of the Financing for Development in the Era of COVID-19 and Beyond process, small island developing States reiterated the need for policy tools to improve their access to the financing necessary to address a growing liquidity and debt crisis. In December 2020, the General Assembly adopted resolution [75/215](#), in which it called upon the Secretary-General to provide recommendations on the development of a multidimensional vulnerability index for small island developing States, including on its potential finalization and use.

#### *Lessons learned and planned change*

8.93 The lesson for the subprogramme was that fragmented initiatives to address extreme shocks such as those caused by the COVID-19 pandemic can preclude the

delivery of focused and workable solutions for small island developing States in regard to gaining access to financing, largely owing to their middle- and high-income status. Targeted, more flexible measures that take full account of the unique and evolving circumstances of small island developing States are needed to help them to better respond to the multiple crises that they face. In applying the lesson, the subprogramme will, starting in 2021, coordinate the work of the United Nations on responding to the mandate to provide concrete recommendations on the development of a multidimensional vulnerability index. Such an index could potentially inform the modalities for the delivery of targeted development finance, technical assistance and other international support measures to small island developing States, with a view to enabling them to better withstand extreme shocks, such as pandemics, and build sustainable economic, social and environmental resilience. Continuing in 2022, the subprogramme will advocate for more widespread adoption and use of improved measures in favour of small island developing States in relevant forums, thereby allowing for quantifiable benefits for small island developing States.

*Expected progress towards the attainment of the objective, and performance measure*

8.94 This work is expected to contribute to the objective, as demonstrated by strengthened international support measures to enable small island developing States to better withstand extreme shocks and build sustainable economic, social and environmental resilience (see table 8.14).

Table 8.14

**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
—	In the political declaration of the midterm review of the Samoa Pathway, the need to devise methodologies to better account for the complex and diverse realities of small island developing States was recognized	The General Assembly adopted resolution <a href="#">75/215</a> , in which it called upon the Secretary-General to provide recommendations on the development of a multidimensional vulnerability index for small island developing States, including on its potential finalization and use	The General Assembly considers the recommendations on a multidimensional vulnerability index to be provided by the Secretary-General in his report on the implementation of resolution <a href="#">75/215</a>	Strengthened international support measures to enable small island developing States to better withstand extreme shocks and build sustainable economic, social and environmental resilience

**Legislative mandates**

8.95 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolutions*

59/311	International Meeting to Review the Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States	73/228; 74/217; 75/215	Follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States
69/15	SIDS Accelerated Modalities of Action (SAMOA) Pathway		
72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system	74/3	Political declaration of the high-level meeting to review progress made in addressing the priorities of small island developing States through the implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway
72/307	Modalities for the high-level review of the SIDS Accelerated Modalities of Action (SAMOA) Pathway		

**Deliverables**

8.96 Table 8.15 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> substantive events to provide support to 38 small island developing States and 3 regional and 5 global entities; briefings to 38 Member States on the work of the Office; advocacy in appropriate forums for the special case of small island developing States in achieving sustainable development.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> campaigns on matters relating to small island developing States and sustainable development, including dissemination of materials for advocacy for the special case of small island developing States in achieving sustainable development.				
<b>External and media relations:</b> press releases and press appearances on issues relating to small island developing States, as well as ongoing engagement with journalists in small island developing States on relevant United Nations processes and activities.				
<b>Digital platforms and multimedia content:</b> updating and maintenance of online information on issues relating to small island developing States and maintenance of the subprogramme's web pages, including, specifically, support for the preparatory processes for the fourth International Conference on Small Island Developing States.				

## **Programme 9**

### **United Nations system support for the African Union's Agenda 2063: The Africa We Want – strategic partnership for progress towards implementation**

#### **Commitment to the subsequent implementation plans of Agenda 2063**

#### **Overall orientation**

##### **Mandates and background**

9.1 The Office of the Special Adviser on Africa is responsible for ensuring a coherent and integrated approach for United Nations support for Africa and addressing the gaps; following up on the implementation of all relevant global summit and conference outcomes of the United Nations related to Africa; coordinating and guiding the preparation of Africa-related reports and inputs; initiating reports on critical issues affecting Africa; monitoring the implementation of commitments made towards Africa's development, and coordinating global advocacy in support of the New Partnership for Africa's Development, currently subsumed in Agenda 2063: The Africa We Want. The Economic Commission for Africa (ECA) is responsible for promoting the economic and social development of its member States. Fostering regional integration and promoting international cooperation for Africa's development, ECA is mandated to operate at the regional and subregional levels to harness resources and bring them to bear on Africa's priorities. To enhance its impact, ECA places a special focus on collecting up-to-date and original regional statistics in order to ground its policy research and advocacy on clear objective evidence; promoting policy consensus; providing meaningful capacity development; and providing advisory services in key thematic fields. The Department of Global Communications raises international awareness of the economic, political and social situation in Africa, as well as of the efforts made by Africa, the United Nations and the international community to promote the economic recovery and sustainable development of the region in pursuit of the goals of the New Partnership for Africa's Development (NEPAD) and the achievement of the Sustainable Development Goals. The mandates of the Office of the Special Adviser, ECA and the Department of Global Communications derive from the priorities established in relevant resolutions and decisions, including General Assembly resolutions [32/197](#), [57/7](#), [57/300](#), [61/296](#) and [66/293](#) and Economic and Social Council resolutions [671 \(XXV\) A](#) and 1998/46.

9.2 In view of the impact of the coronavirus disease (COVID-19) pandemic on health systems, social protection structures, employment, education and other areas critical for Africa's development, there is a critical need for enhanced coordination and advocacy efforts in order to ensure that the planning and implementation of programmes and projects to address the impact of COVID-19 are aligned with Agenda 2063 and with the priorities established by the African Union and African countries for a strong recovery. Despite the challenges, the COVID-19 pandemic provides an opportunity to build forward and build better and accelerate the implementation of the 2030 Agenda during the decade of action. This will require strong analytical and monitoring capacities that can sharply focus on identifying key policies and programmes with a multiplying effect that contribute decisively to Africa's development.

## Strategy and external factors for 2022

9.3 The COVID-19 pandemic has demonstrated that no country is ready to overcome the challenges of the future on its own. It has created an opportunity to promote a change of paradigm in the international multilateral system, an opportunity that is particularly relevant for Africa. To this end, a new narrative is needed, a narrative that reflects and strengthens Africa's role as a key stakeholder and vital player in the global arena, with its success stories and best practices to share. A narrative that brings to the global debate issues that are key for Africa's development, such as illicit financial flows, industrialization, trade, agricultural self-sufficiency, jobs, digital economy, education and youth. A narrative of Africa and from Africa, to be fully embraced within the United Nations and beyond. The strategy of the programme is aimed at promoting this new narrative.

9.4 The implementation of the programme's strategy will be guided by the vision of an international system working coherently to support Africa to progressively fulfil its potential as a continent of hope, opportunities and prosperity. In order to transform this vision into a reality, the programme has a strategic mission: to advocate for Africa at the global and regional levels by mobilizing the United Nations system, African Member States, international partners, civil society and the private sector around the transformative vision of the African Union in support of the joint implementation of the 2030 Agenda and Agenda 2063 on the continent, building on strong partnerships, innovation and strategic foresight.

9.5 In order to fulfil this mission, the Office of the Special Adviser on Africa, ECA and the Department of Global Communications will promote, within the United Nations, a positive and realistic discourse about Africa by, among other things, managing data and knowledge, disseminating parliamentary and flagship reports, policy briefs, fact sheets, speeches and other documents produced by the Secretariat; organizing major events and programmes to highlight African priorities and increase awareness about, and respect for, key African institutions, initiatives and frameworks. Beyond the United Nations, the voice of the Special Adviser on Africa will be leveraged as a tool to challenge outdated, often distorted and stereotypical views about the continent and help reshape the narrative towards a more balanced perspective that reflects the African reality and serves as an agent of positive change.

9.6 The three entities will promote this new narrative through coordinated and complementary action in policy analysis, research and development; advocacy; communications; global and regional coordination; monitoring and evaluation, and support for Member States. A strategic agenda has been developed in consultation with the African Group and other stakeholders to guide the programme activities around six cluster areas identified as key for Africa's development owing to their multiplying impact: financing for development; achieving sustainable development to deliver durable peace; governance, resilience and human capital; science, technology and innovation; and industrialization, the demographic dividend and trade, with a focus on the African Continental Free Trade Area; and sustainable energy and climate change. Taking into account the crucial role of the African youth for the continent's development, special focus will be given to promoting youth-focused policies and proposals under each cluster area and, particularly, when addressing human capital and the demographic dividend.

9.7 For 2022, the planned deliverables and activities of the Office of the Special Adviser on Africa, ECA and the Department of Global Communications reflect the known and anticipated challenges related to COVID-19 that are being faced by Member States. Such planned deliverables and activities include enhanced coordination efforts to ensure a coherent and integrated response by the United

Nations system; policy briefs and analysis, external communication and advocacy. Specific examples of such planned deliverables and activities are provided under all three subprogrammes. The support provided to Member States on issues related to COVID-19 is expected to contribute to planned results for 2022, as described under all three subprogrammes.

9.8 With regard to cooperation with stakeholders and other entities at the global, regional, national and local levels, the three entities that implement the programme will continue to work closely with African Member States and African Union institutions as their main partners, in particular with the African Union Commission, the African Union Development Agency-NEPAD, the regional economic communities, the African Peer Review Mechanism Secretariat and the African Capacity Building Foundation, among others. In addition, the Office of the Special Adviser on Africa, ECA and the Department of Global Communications will continue to promote partnerships with an array of Member States, international organizations, civil society, the private sector, academia, think tanks, the African diaspora and other external stakeholders to enhance common approaches and synergies in their efforts to support Africa's development in the key areas identified in the programme's strategy. The Office of the Special Adviser on Africa will lead cooperation efforts at the global level under subprogramme 1, while ECA will lead cooperation at the regional, national and local levels under subprogramme 2.

9.9 With regard to inter-agency coordination and liaison, the interdepartmental task force on African affairs will continue to be strengthened as a key forum for consultation, strategic coordination and coherence among United Nations entities across all pillars of their work on Africa. The task force plays an important role in supporting the Secretary-General's and the system's engagement with Africa. The Office of the Special Adviser on Africa, as the task force secretariat, has taken renewed steps, working with member entities of the task force, to organize its work of the task force in a more systematic, structured and impactful manner, and to avoid duplications with other existing coordination mechanisms. In particular, the Office of the Special Adviser on Africa and ECA are working closely with the United Nations Development Programme (UNDP) and the resident coordinator system to ensure complementarity between the strategic coordination promoted through the task force and the operational coordination at the regional and national level promoted through the Regional Collaborative Platform for Africa and the United Nations country teams. The Office of the Special Adviser on Africa and the United Nations Office to the African Union are also coordinating their activities so that there is no overlap between their efforts.

9.10 With regard to the external factors, the overall plan for 2022 is based on the following planning assumptions:

- (a) African countries significantly realign their priorities towards building forward and building better;
- (b) International partners continue to support Africa's sustainable development through financial contributions, technical support and the adoption of policy frameworks that support African ownership and empowerment;
- (c) The partnership between the United Nations and the African Union is further strengthened through the continued implementation of the Joint United Nations-African Union Framework for Enhanced Partnership in Peace and Security, the African Union-United Nations Framework for the Implementation of Agenda 2063 and the 2030 Agenda for Sustainable Development and the African Union-United Nations Framework on Human Rights;

(d) International organizations and partners are committed to the implementation of multi-stakeholder projects and programmes in support of the implementation of the 2030 Agenda, Agenda 2063, NEPAD and the priorities of the African Union and African countries;

(e) United Nations entities actively engage in the revitalized interdepartmental task force on African affairs;

(f) Member States actively participate in the Africa Dialogue Series and other policy development and advocacy activities;

(g) External stakeholders and potential partners, including media organizations, academic institutions, civil society organizations and creative communities, continue to engage with the programme priorities.

9.11 With regard to the COVID-19 pandemic, the programme plan is based on the assumption that the proposed deliverables and activities for 2022 will be feasible to implement. However, if the pandemic were to further impact on the planned deliverables and activities, they would be adjusted during 2022 within the scope of the overall objectives, strategies and mandates. Any such adjustments would be reported as part of the programme performance information.

9.12 The Office of the Special Adviser on Africa, ECA and the Department of Global Communications integrate a gender perspective in their programmatic activities, deliverables and results, as appropriate. For example, the Office of the Special Adviser on Africa incorporates a gender perspective in all the analytical and policy documents it produces, with a particular focus on the relevance of peace, security and development issues for women and girls' empowerment and, as part of its advocacy activities, it organizes specific events focusing on the realization of human rights for women and the challenges that women face in their efforts to promote their countries' inclusive sustainable development. The Office also actively participates in and co-organizes side events on gender equality and women's empowerment issues with its strategic partners during the annual sessions of the Commission on the Status of Women held at Headquarters. Under subprogramme 2, a gender perspective will continue to be mainstreamed across the subprogramme's activities in respect of the development and delivery of United Nations support for the implementation of the priorities of the African Union and the African Union Development Agency, including the push for sex-disaggregated statistics and through the regional coordination efforts. Lastly, under subprogramme 3, the Department of Global Communications promotes gender equality and women's empowerment by producing and disseminating communications products, including through *Africa Renewal* platforms, that focus on women and gender equality and by promoting a balanced presence of women and men in all of its multimedia products, promotional campaigns and events. The Department also works to counter gender stereotypes and discrimination against women by offering a wide range of alternative perspectives and making sure that women's voices are given prominence in its products, communication campaigns and events.

9.13 The programme will be guided by the United Nations Disability Inclusion Strategy in promoting, through its activities and policy recommendations, proposals that specifically promote the inclusion of people with disabilities, as well as in taking the necessary measures to increase the accessibility of its products and events.

## Programme performance in 2020

### Impact of COVID-19 on programme delivery

9.14 During 2020, the COVID-19 pandemic had an impact on the planned deliverables and activities of the Office of the Special Adviser on Africa. This included the cancellation of some advocacy events, field missions and expert group meetings, as well as the reorientation of other events and workshops as virtual meetings. Specific examples of the impact are provided under all subprogrammes. The change in the approach and cancellation of planned deliverables and activities also had an impact on the expected results for 2020, as described in the programme performance under subprogramme 3.

9.15 At the same time, however, some planned deliverables and activities were modified, and some new activities were introduced during 2020, within the overall scope of the objectives of the subprogrammes, in order to support Member States on issues related to the COVID-19 pandemic. Those modifications and new activities included advocacy events and coordination efforts. Specific examples of the modified and new activities are provided under all subprogrammes. The modified and new deliverables and activities contributed to results in 2020, as described in the programme performance under all subprogrammes.

9.16 Recognizing the importance of continuous improvement, the need for flexibility and nimbleness in the face of unforeseen circumstances and evolving needs of Member States, the programme will draw on the lessons learned and best practices from the COVID-19-related adaptation of its programme in 2020. Specific examples of lessons learned include the use of virtual platforms for events as an opportunity to reach out to broader audiences and, consequently, increase the impact of the advocacy activities and communication products, as well as a more flexible approach to programme planning in order to adapt to emerging circumstances. For example, in 2022, subprogrammes 1, 2 and 3 will continue to increase their use of digital platforms, including by holding, whenever possible, hybrid (virtual and in-person) meetings and events.

### Legislative mandates

9.17 The list below provides all mandates entrusted to the programme.

#### *General Assembly resolutions*

32/197	Restructuring of the economic and social sectors of the United Nations system	63/1	Political declaration on Africa's development needs
57/2	United Nations Declaration on the New Partnership for Africa's Development	69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development (Addis Ababa Action Agenda)
57/7	Final review and appraisal of the United Nations New Agenda for the Development of Africa in the 1990s and support for the New Partnership for Africa's Development	70/1	Transforming our world: the 2030 Agenda for Sustainable Development
57/300	Strengthening of the United Nations: an agenda for further change	74/301	New Partnership for Africa's Development: progress in implementation and international support
61/296	Cooperation between the United Nations and the African Union		

*Security Council resolutions*

1197 (1998)	Support for regional and subregional initiatives on Africa and strengthening of coordination between the United Nations and regional and subregional organizations in the area of conflict prevention and maintenance of peace	2033 (2012)	United Nations-African Union cooperation
		2282 (2016)	Review of the United Nations peacebuilding architecture
		2457 (2019)	Silencing the Guns in Africa

*Economic and Social Council resolutions*

671 (XXV) A	Establishment of an Economic Commission for Africa	2020/23	Progress in the implementation of General Assembly resolution 71/243 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system
1998/46	Further measures for the restructuring and revitalization of the United Nations in the economic, social and related fields		

**Deliverables**

9.18 Table 9.1 lists all cross-cutting deliverables, by category and subcategory, for the period 2020–2022.

Table 9.1

**Cross-cutting deliverables for the period 2020–2022, by category and subcategory**

7. Policy brief on Africa's sustainable development	—	—	—	1

**Evaluation activities**

9.19 The following evaluations and self-evaluations completed in 2020 have guided the programme plan for 2022:

- (a) Office of Internal Oversight Services (OIOS) evaluation of the programme;
- (b) Self-evaluation on the report-drafting process under subprogramme 1.

9.20 The findings of the evaluations and self-evaluations referred to above have been taken into account for the programme plan for 2022. For example, the establishment of an executive direction and management component in the programme ensures the Special Adviser's overall accountability, as recommended by OIOS. The realignment of the

communications function in the Office of the Special Adviser on Africa will promote complementarities with the Department of Global Communications. Increased coordination among the subprogrammes has resulted in enhanced synergies among planned activities, in particular in the implementation of the subprogrammes' highlighted results. Under subprogramme 1, on the basis of the self-evaluation on the report drafting process, the Office of the Special Adviser on Africa will be able to produce an increased number of deliverables, owing to the maximization of its analytical work.

9.21 Further to the deployment of a planning, monitoring and evaluation function in the Office of the Under-Secretary-General, a self-evaluation on all activities of subprogramme 1 is planned for 2022.

## **Programme of work**

### **Subprogramme 1**

#### **Coordination of global advocacy of and support for the New Partnership for Africa's Development**

### **Objective**

9.22 The objective, to which this subprogramme contributes, is to advance effective implementation of the 2030 Agenda for Sustainable Development and Agenda 2063 through coherent, integrated and effective United Nations system engagement, global advocacy and strategic partnership with African Member States and the African Union.

### **Strategy**

9.23 To contribute to the objective, the subprogramme will support the efforts of the Secretary-General to increase the coordination and coherence of the United Nations system in its support for Africa, in particular by acting as the focal point for the African Union Development Agency-NEPAD and Agenda 2063 at Headquarters, coordinating the inter-departmental task force on African affairs, and monitoring the United Nations system's support for Africa's sustainable development. To this end, the Office of the Special Adviser on Africa will further build up its posture and capacities in areas such as planning, monitoring and evaluation in order to be able to promote strategic planning and programming in the United Nations system in Africa in accordance with the priorities of African Union and African Member States as enshrined in Agenda 2063 and the first 10-year implementation plan.

9.24 The subprogramme also plans to further provide policy advice based on trend and foresight analysis on critical and emerging issues affecting Africa, as well as to continue to support African Member States in their participation in intergovernmental processes and provide assistance in intergovernmental deliberations on issues related to Africa's sustainable development. To this end, the Office will significantly enhance its capacity to perform horizon scanning and analyse emerging trends, challenges and opportunities across all areas of Africa's economic, political and social development, in particular through the improvement of its data management capacities.

9.25 In addition, the subprogramme will develop and implement communication and global advocacy strategies in coordination with subprogramme 3 to establish a global advocacy platform in support of NEPAD and Agenda 2063 that mobilizes global opinion through all channels of communication, celebrates Africa and contributes to the promotion of a new narrative.

9.26 The subprogramme will finalize the operationalization and strengthening of the United Nations monitoring mechanism through its enhanced data management and analysis capacities, which will lead to continuous tracking of the commitments to and support for the implementation of the 2030 and 2063 Agendas with clear benchmarks, indicators and, when appropriate, proposed corrective measures, which will contribute to enhanced compliance and mutual accountability in the implementation of commitments towards Africa's development.

9.27 The subprogramme plans to support Member States on issues related to COVID-19 by further enhancing strategic coordination within the United Nations system to help ensure coherent and integrated support for building forward and building better in Africa that aligns with the priorities of African Member States and the African Union as enshrined in Agenda 2063. Furthermore, the subprogramme will develop and implement a partnerships and technical cooperation strategy aimed at promoting strategic partnerships with African Member States and African Union institutions and leveraging United Nations knowledge and capacities through technical cooperation with United Nations agencies, funds and programmes around flagship initiatives and projects.

9.28 The work described above is expected to result in:

- (a) A more coherent and integrated approach by the United Nations system support for Africa;
- (b) Strengthened cooperation between the United Nations system and the African Union and other African institutions and increased complementarity of the activities of the United Nations and the African Union in support of the implementation of the 2030 Agenda and Agenda 2063;
- (c) Enhanced capacity within the United Nations system and the wider international community to provide a more integrated response to challenges impacting Africa's development that takes into account and addresses existing gaps;
- (d) Stronger alignment of intergovernmental discussions with the priorities of African countries and the African Union and increased integration of African perspectives in global debates and decisions;
- (e) Greater accountability of stakeholders;
- (f) Increased awareness and understanding by the international community of the African Union perspective and the realities and priorities of African countries.

9.29 The planned support on issues related to COVID-19 is expected to result in a swifter recovery that contributes to changing the paradigm and building forward and building better.

## **Programme performance in 2020**

9.30 Programme performance in 2020 includes the result described below, which emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Enhanced coordination in response to Africa's emerging needs**

9.31 In response to the COVID-19 outbreak, the Office of the Special Adviser on Africa convened the interdepartmental task force on African affairs to identify the gaps in the United Nations system's response to the crisis and to promote United Nations coherence through consultations at the strategic level. The subprogramme organized nine meetings of the interdepartmental task force on African affairs at the

working and principals levels during 2020 to facilitate strategic discussions on the United Nations system response to COVID-19. The task force recommended that the Africa United Nations Knowledge Hub for COVID-19, developed by ECA, be sustained, strengthened and updated with more relevant information and content, including on health and stigmatization as a result of COVID-19 in Africa. In December, members of the task force conducted an analysis of the strengths, weaknesses, opportunities and threats (SWOT) of the United Nations response in order to take stock and prepare for building forward and building better.

9.32 The subprogramme also led and coordinated the preparation of a policy brief of the Secretary-General on the impact of COVID-19 in Africa, highlighting the risks that the pandemic posed to African Member States and providing recommendations. Furthermore, the subprogramme, in coordination with subprogramme 3, facilitated the adoption of common messaging for the members of the interdepartmental task force on African affairs in order to support the implementation of the policy brief.

*Progress towards the attainment of the objective, and performance measure*

9.33 The work described above contributed to the objective, as demonstrated by an increased awareness at the global level of the impact of COVID-19 in Africa through the development of an overarching United Nations narrative on COVID-19 in Africa (see table 9.2). The increase in joint products issued by the interdepartmental task force on African affairs served to revitalize the task force as an impact-focused tool to promote United Nations coordination on critical and emerging issues affecting Africa. This enhanced coordination benefited African countries by ensuring that the support that they received from United Nations entities at a critical time was comprehensive and avoided duplications.

Table 9.2  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
—	—	Increased awareness at the global level of the impact of COVID-19 in Africa through an overarching United Nations narrative on COVID-19 in Africa

**Impact of COVID-19 on subprogramme delivery**

9.34 Owing to the impact of COVID-19 during 2020, the subprogramme had to cancel or postpone some of its deliverables and programmatic activities at the early stages of the pandemic. For instance, the Africa-focused events that the Office programmed during the Commission on the Status of Women and the Economic and Social Council youth forum had to be cancelled owing to the COVID-19 pandemic, and a panel discussion that the Office was to organize during the Africa regional review of the Istanbul Programme of Action was postponed to 2021. Later, the Office was able to organize planned events, most notably by switching from in-person to virtual meetings. Among such examples is the Africa Dialogue Series 2020, held in May, and Africa Day at the high-level political forum, as well as a workshop and an advocacy event on illicit financial flows in December.

9.35 At the same time, the subprogramme identified additional activities to support Member States on issues related to COVID-19, within the overall scope of its objectives, namely the coordination of the writing of the Secretary-General's policy brief on the impact of COVID-19 in Africa and the development of an integrated

SWOT analysis on the United Nations response, conducted through the interdepartmental task force on African affairs. The additional deliverables contributed to results in 2020, as specified in the emerging result above.

## **Planned results for 2022**

9.36 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: delivering coherently and effectively for Africa's peace and development<sup>1</sup>**

#### **Programme performance in 2020**

9.37 The subprogramme, in partnership with the Permanent Observer Mission of the African Union and various United Nations entities, has continued to convene the Africa Dialogue Series annually as a major forum for global advocacy and policy discussion on Africa linking the different areas of work of the United Nations in Africa. As in the previous year, the Africa Dialogue Series 2020 was organized in May, on the African Union theme of the year. However, as part of the Office's response to the COVID-19 pandemic, it reoriented the approach and format of the Africa Dialogue Series 2020 and convened it virtually under the theme: "COVID-19 and silencing the guns in Africa: challenges and opportunities". Furthermore, the subprogramme continued to provide regular briefings to the three elected States of the Security Council regarding the socioeconomic conditions of countries on the agenda of the Security Council, with a particular focus on the impact of COVID-19.

9.38 The work described above contributed to the Africa Dialogue Series as a fully functional, inclusive and interactive forum for a broad range of stakeholders, where they share experiences and help fine-tune a coherent approach to re-establishing peace and security in the Sahel region and promoting up-to-date evidence-based policy decisions by all stakeholders, which met the planned targets in the proposed programme budget for 2020.

9.39 The work described above did not meet the target of providing access to Member States to enhanced and cutting-edge data on the allocation and flow of commitments through the United Nations monitoring mechanism, allowing the international community to eliminate major duplications and overlaps and speed up delivery where it is needed most, in the proposed programme budget for 2020. This target was not met as the plan for the operationalization of the monitoring mechanism was refocused in line with the Secretary-General's data strategy and to take into account also the OIOS evaluation.

#### **Proposed programme plan for 2022**

9.40 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will deepen its analysis regarding the impact of public service delivery and sustainable development in the achievement of durable peace, in particular through the Office of the Special Adviser on Africa research network and its reporting responsibilities. It will also enhance its advocacy efforts, including by launching specific policy campaigns in partnership with the African Union and other United Nations entities. For example, in 2021 the Office will launch, in partnership with the World Food Programme, an initiative to promote home-grown school feeding in

<sup>1</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 11)).

Africa, as a programme that not only impacts positively on the health, nutrition and education levels of African children, but also helps to promote prosperity, stability and social cohesion in local communities. In 2022, this initiative will seek to establish strategic partnerships with African Member States and institutions for the design and implementation of home-grown school feeding programmes in Africa. In 2022, the subprogramme will also complete the operationalization of the United Nations monitoring mechanism, establish a procedure for the follow-up of the recommendations stemming from its advocacy platform, most notably the Africa Dialogue Series, and bridge the gap between academia and practitioners, promoting continuous engagement through the Office's activities. The expected progress is presented in the performance measure (see table 9.3).

Table 9.3  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
No access by stakeholders to knowledge network  Africa Dialogue Series: access by stakeholders to inaugural series highlighting key policy issues facing Africa from the lens of the linkages between sustainable development, peace and security	Access by Member States to limited data on the pledges and delivery of financial commitments made to bring about peace and development in the Sahel region  Stakeholders use the knowledge network established by the Office of the Special Adviser to share information and synthesized summaries addressing social, developmental and security-related vulnerabilities of the Sahel region  Africa Dialogue Series: stakeholders use the Series as an interactive policy dialogue platform for cutting-edge thinking on the efforts of the United Nations and the international community on the Sahel region	Up-to-date evidence-based policy decisions by all stakeholders  Africa Dialogue Series: the Series is fully functional as an inclusive and interactive forum for a broad range of stakeholders, where they share experiences and help fine-tune a coherent approach to re-establishing peace and security in the Sahel region	United Nations monitoring mechanism: implementation of the new methodology  Up-to-date evidence-based policy decisions by all stakeholders  Africa Dialogue Series: the Series continues to be a critical analytical global advocacy tool aligned with the themes of the African Union and issues of relevance to Africa's peace, security, human rights and sustainable development. The Series enhances the visibility of these issues and contributes to solutions based on key turning points, such as Africa Day and the General Assembly debate on Africa's development	Member States access continuous data and information that enable ongoing tracking of commitments through the United Nations monitoring mechanism  Member States have access to updated information on the implementation of recommendations stemming from the Africa Dialogue Series  Increased number of African countries establish school feeding programmes or broaden the scope of existing programmes

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at the point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: amplified African voices at intergovernmental processes<sup>2</sup>

### Programme performance in 2020

9.41 The subprogramme organized the third Africa Day at the high-level political forum on sustainable development, on the theme “Leveraging digital technology in the context of COVID-19: an inclusive, healthy, resilient and peaceful Africa”, in July, in partnership with the African Union, ECA, the African Institute for Economic Development and Planning and UNDP. In December, the subprogramme organized two events on the issue of illicit financial flows: a workshop on “Silencing the Guns Beyond 2020: Addressing Illicit Financial Flows and the Sahel” and a high-level virtual panel on the African Union “Silencing the Guns” initiative: the role of illicit financial flows in fuelling instability in Africa. The subprogramme was however unable to implement the other activities that had been programmed under this result owing to the COVID-19 outbreak, which prevented specific discussions focused on women and youth, which are two key constituencies that need to be specifically targeted and mobilized in order to harness the potential of the demographic dividend in Africa to promote sustainable development.

9.42 The work described above contributed to 16 African countries participating in voluntary national review, which met the planned targets in the proposed programme budget for 2021.

9.43 The work described above also contributed to the inclusion of African countries’ perspectives in official forums and conferences to advance the effective implementation of the 2030 Agenda and Agenda 2063 through coherent, integrated and effective United Nations system engagement and partnership with African Member States.

### Proposed programme plan for 2022

9.44 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective and in response to recent developments, the subprogramme’s work will evolve to promote, in partnership with the United Nations Conference on Trade and Development (UNCTAD), the United Nations Office on Drugs and Crime (UNODC), the African Union and other relevant entities, the inclusion of issues in intergovernmental deliberations on financing for development that are aligned with the interests of African countries and contribute to their empowerment and ownership over their financial resources, such as illicit financial flows, remittances or the role of credit rate agencies. The subprogramme also plans to hold a multi-stakeholder meeting to discuss the role of credit-rating agencies and ways to reduce biased and non-objective ratings. The expected progress is presented in the updated performance measure (see table 9.4).

Table 9.4  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
10 African countries participated in voluntary national reviews	17 African countries participated in voluntary national reviews	16 African countries participated in voluntary national reviews	20 African countries participate in voluntary national reviews	Member States discuss proposed framework to address the impact

<sup>2</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect. 11)).

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
		African countries' perspectives are included in official forums and conferences to advance the effective implementation of the 2030 Agenda and Agenda 2063 through coherent, integrated and effective United Nations system engagement and partnership with African Member States	Member States and stakeholders consider the study on impact of illicit financial flows in Africa Member States and stakeholders consider the analysis on bottlenecks in remittances regulation Increased awareness of Member States and stakeholder of the role of credit-rating agencies	of illicit financial flows on Africa Member States consider the road map to address remittances bottlenecks

### **Result 3: the role of digitization and the African Continental Free Trade Area for building forward and building better**

#### **Proposed programme plan for 2022**

9.45 In 2019, only 16,100 of the over 3 million patent applications in the world originated in Africa and less than 19 per cent of the patents originating in Africa were from residents. This is due to intellectual property-related barriers that limit the granting of patents and, particularly, medical patents to products of African origin, which negatively impacts access to vital medicines on the continent. Africa accounts for over 25 per cent of the pharmaceutical market but produces only 2 per cent of the drugs it consumes. The continent imports over \$14 billion worth of drugs, many of which are produced using African plant varieties. At a time when the world is increasingly discussing universal health care as part of the response to COVID-19 and a more integrated approach to the 2030 Agenda, strong intellectual property protections are hindering African populations' access to critical medicines and adequate health services and, consequently, undermining the continent's human capital potential.

9.46 During 2020, the subprogramme had to adapt its programmatic activities and support for African countries owing to the COVID-19 pandemic. Taking into account its mandate to promote the interests and perspectives of African countries and the African Union in intergovernmental deliberations, the subprogramme adopted a cross-cutting approach to the response, leveraging its different advocacy activities to assess and discuss how the response to COVID-19 in Africa could benefit from ongoing support being provided in other areas. For example, the reorientation of the Africa Dialogue Series 2020 showcased how efforts in the area of peace and security could support the response to a health crisis. Furthermore, Africa Day at the high-level political forum underscored the fundamental contribution that digitization and innovation can provide to strengthen Africa's resilience and promote sustainable development in Africa.

#### *Lessons learned and response*

9.47 The lesson for the subprogramme was that health is an instrumental component of human capital and, as such, it is impacted by progress in other development areas and, at the same time, it can also positively impact them. Consequently, human capital

and, more specifically, health, needs to be placed at the core of policymaking in Africa, because investing in health also means promoting African industrialization, empowering African countries by reducing their dependence on drugs originating outside the continent and patents, and strengthening Africa's integration, particularly taking into account the entry into force of the African Continental Free Trade Area. In applying the lesson, the subprogramme will increase its focus on health issues, in particular, on the interface between health and technology and the way in which digitization and the Free Trade Area can be leveraged to overcome the existing intellectual property barriers and contribute to reducing Africa's dependence on foreign drugs through the implementation of the Pharmaceutical Manufacturing Plan for Africa. The subprogramme will develop, in cooperation with key global and regional partners, an initiative to support African innovators in the patent application process, including through the development of digital solutions and advocacy efforts. The subprogramme will take the opportunity of the increased use of technology and digitization as part of the response to COVID-19 to promote digital solutions that facilitate patent application processes in African countries and reduce costs. In order to achieve the expected result, the Office will leverage its coordination mandate and its academic research network to bring together relevant United Nations entities, such as the World Intellectual Property Organization, and African organizations, such as the African Regional Intellectual Property Organization and the Pan-African Intellectual Property Organization, with academic and research institutes in order to identify the main hurdles faced by African researchers, particularly from the health sector, and specific solutions to simplify the patenting of their work. Furthermore, through its advocacy mandate, the Office will promote the implementation of those solutions, in cooperation with its partners, by organizing policy discussions with African Member States and seeking the support of Africa's development partners.

*Expected progress towards the attainment of the objective, and performance measure*

9.48 This work is expected to contribute to the objective, as demonstrated by the increase in the number of patent applications in Africa by African residents (see figure 9.I).

Figure 9.I

**Performance measure: annual number of patent applications in Africa by African residents**

**Legislative mandates**

9.49 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolutions*

53/92	Causes of conflict and the promotion of durable peace and sustainable development in Africa	66/293	A monitoring mechanism to review commitments made towards Africa's development
57/296	Causes of conflict and the promotion of durable peace and sustainable development in Africa	74/301	New Partnership for Africa's Development: progress in implementation and international support

12. Factsheets	—	—	—	6

#### C. Substantive deliverables

**Consultation, advice and advocacy:** Advice on strengthened consultation and strategic level coordination with African Union institutions and consultations on annual results-oriented workplan for the interdepartmental task force on African affairs; Evidence-based and data-driven advice and policy proposals provided to United Nations leadership and African Member States, including monthly briefs focusing on trends, foresight and policy analysis, as well as the organization of quarterly briefings and the production of materials in support of the participation of African Member States in intergovernmental processes; advocacy activities focused on the prioritization of policy proposals aimed at supporting Africa's transformational agenda, aiming at an audience of at least 200 participants (government and academia) for each advocacy event.

**Databases and substantive digital materials:** online knowledge repository with digital copies of the Office's work in at least four official languages of the United Nations; establishment of a permanent, updated and accessible database linked to the United Nations monitoring mechanism; data on United Nations action in Africa made available to complement the Office's reporting mandate; database of African think tanks and non-governmental organizations accessible to stakeholders.

#### D. Communication deliverables

**Outreach programmes, special events and information materials:** awareness-raising events, toolkits and pamphlets on key issues impacting Africa's sustainable development.

**External and media relations:** press releases, press conferences and media dialogues on issues related to Africa's sustainable development, peace and security and human rights in Africa.

**Digital platforms and multimedia content:** original products for distribution through social media in at least four official languages of the United Nations weekly; development of original webstories and diverse for the Office's website in at least four official languages of the United Nations on a monthly basis; multimedia documents in all United Nations official languages; incorporation of full accessibility standards to communication and multimedia deliverables issued by the Office.

## Subprogramme 2

### Regional coordination of and support for the New Partnership for Africa's Development

#### Objective

9.51 The objective, to which this subprogramme contributes, is to accelerate the integrated implementation of Agenda 2063 and the 2030 Agenda for Sustainable Development through United Nations system-wide coherence and collaboration and to enhance capacities of African Union organs and agencies at the regional and subregional levels, in particular the African Union Commission, the African Union Development Agency-NEPAD and the regional economic communities.

#### Strategy

9.52 To contribute to the objective, the subprogramme will promote and strengthen joint planning and implementation through the vehicles of the regional collaborative platform and conduct policy research and analysis on key African Union priorities and provide technical assistance and advisory services within the framework of Agenda 2063 and the 2030 Agenda, taking into account the United Nations-African Union cooperation frameworks and the African Union strategic priorities. In this regard, a major area of work will be on promoting tools for identifying and promoting coherence

between development, peace and security and human rights, where appropriate, into policies and strategies of selected African Union organs and agencies.

9.53 The subprogramme also plans to conduct targeted studies on transboundary issues relevant to Africa's regional transformation and integration drive. The support for regional economic communities and intergovernmental organizations will be carried out in collaboration with the subregional offices and subprogrammes of ECA. The findings of the policy research and analysis and of transboundary studies will be disseminated at regional and subregional intergovernmental and high-level stakeholder platforms targeting, among others, stakeholders, decision- and policymakers and development practitioners of the five subregions of Africa.

9.54 The subprogramme will collaborate with UNDP and the regional Development Coordination Office in the promotion of coherence in United Nations system-wide support for the African Union and support for resident coordinators and United Nations country teams in the implementation of activities towards the realization of Agenda 2063 and the 2030 Agenda. The subprogramme working with the Office of the Special Adviser on Africa and the Department of Global Communications will continue to support the African Union Development Agency-NEPAD in the context of continental priorities and Africa's development agenda.

9.55 The work described above is expected to result in:

- (a) Enhanced United Nations system-wide collaboration at the regional level towards the realization of the 2030 Agenda;
- (b) Increased and more effective United Nations support for the African Union and its development priorities as reflected in Agenda 2063;
- (c) Enhanced capacity of member States to develop and implement their national development priorities.

9.56 The planned support on issues related to COVID-19 is expected to result in the promotion of coordinated action and support on Africa's initiatives and responses to COVID-19 in addressing the crisis and recovery challenges of the pandemic.

## **Programme performance in 2020**

9.57 Programme performance in 2020 includes the result described below, which emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Pooled procurement of COVID-19 vaccines**

9.58 The subprogramme was instrumental in supporting the United Nations development system and partners, including the African Union Commission, in fast-tracking the implementation of the regional pharmaceutical pooled procurement project and launched the African Medical Supplies Platform – a digital platform enabling African countries to purchase certified medical equipment with increased cost-effectiveness and transparency. In support of an effective COVID-19 response, the regional pharmaceutical pooled procurement, the Platform, was supported in sourcing critically needed supplies in response to the pandemic.

#### *Progress towards the attainment of the objective, and performance measure*

9.59 This work contributed to the objective, as demonstrated by the ordering of 670 million of doses of COVID-19 vaccines through the African Medical Supplies Platform (see figure 9.II), which is an example of the benefits of the African

Continental Free Trade Area for member States through economies of scale and scope and price reductions.

Figure 9.II

**Performance measure: COVID-19 vaccines ordered through the African Medical Supplies Platform**

(Millions of doses)

**Impact of COVID-19 on subprogramme delivery**

9.60 Owing to the impact of COVID-19 during 2020, the subprogramme experienced constraints in its pace and scope of implementation as face-to-face meetings, workshops and training sessions planned could not take place in those formats. The subprogramme had to develop innovative solutions, including the deployment of digital means of implementation.

9.61 At the same time, however, the subprogramme identified new activities to support Member States on issues related to COVID-19, within the overall scope of its objectives, namely the pharmaceuticals pooled procurement programme leading to the pooled procurement of COVID-19 vaccines. The new deliverables contributed to results in 2020, as specified in the emerging result above.

**Planned results for 2022**

9.62 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

**Result 1: implementation of joint workplans with United Nations agencies, funds and programmes and the African Union: working together to deliver for Africa<sup>3</sup>**

**Programme performance in 2020**

9.63 The subprogramme drafted the report on United Nations system-wide support for the African Union and its NEPAD Programme, in which it highlighted progress on the implementation of the joint work plans of the United Nations agencies for 2020. The subprogramme, through its analytical, advocacy and convening functions, brought together United Nations system partners such as UNCTAD, the Food and Agriculture Organization of the United Nations (FAO) and the World Trade Organization (WTO) to support the ratification of the African Union African Continental Free Trade Area. The

<sup>3</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 11)).

subprogramme also took the lead in helping member States to develop and validate national strategies for utilizing the Free Trade Area. The United Nations system in Africa also took part in assessing progress on the implementation of the road map, convened stakeholder meetings, conducted capacity development exercises and proposed the development of a number of resolutions and decisions in support of the African Union theme of the year “Silencing the guns: creating a conducive environment for Africa’s development”, an initiative aimed at taking stock of progress on the implementation of the road map aimed at ending all wars, civil conflicts, gender-based violence and armed conflicts and preventing genocide in the region.

9.64 The subprogramme also coordinated stakeholders in advancing joint policies and strategies, for instance the strategy on support for the implementation of the African Union road map on the African Union 2020 theme of the year “Silencing the guns” and the communication strategy for the Joint Labour Migration Programme. The capacity development efforts undertaken by the subprogramme in 2020 included the following: an executive-level capacity development programme; the strengthening of analysis and planning for the achievement of Sustainable Development Goals 1 and 2 in Eastern Africa; support for countries in the harmonization of Agenda 2063 and the 2030 Agenda performance indicator framework for the Malabo Declaration on Accelerated Agricultural Growth and Transformation for Shared Prosperity and Improved Livelihoods; support for countries on mainstreaming forced displacement into the African Union 2020 theme “Silencing the guns”; guidelines for member States on the development of bilateral labour migration agreements; and the strengthening of national health systems for evidence-based decisions/policy-making on HIV/AIDS and sexual and reproductive health and reproductive rights, as agreed in accordance with the Programme of Action of the International Conference on Population and Development and the Beijing Declaration and Platform for Action.

9.65 The work described above contributed to an increase in the number of joint policies to eight and an increase in the number of joint capacity-development initiatives to nine, which exceeded the planned target of five joint policies and seven capacity-development initiatives in the proposed programme budget for 2020.

#### **Proposed programme plan for 2022**

9.66 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue its work on enhancing system-wide coherence under the Regional Collaborative Platform for Africa architecture towards the realization of the 2030 Agenda. More effective support will continue to be provided to the African Union, as will better strategic support for the resident coordinators and United Nations country teams in promoting national development priorities. Collaboration with the Office of the Special Adviser on Africa and the Department of Global Communications will be enhanced in support of the African Union Development Agency-NEPAD in its key priority areas as part of advancing Agenda 2063. The expected progress is presented in the performance measure (see figure 9.III).

Figure 9.III

**Performance measure: number of joint policies and capacity-development initiatives with United Nations agencies, funds and programmes and the African Union (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target has been carried forward from the proposed programme budget for 2021 and reflects best estimates at the point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: ensure coherent and integrated support in the United Nations support to the implementation of Agenda 2063 and the 2030 Agenda<sup>4</sup>**

### **Programme performance in 2020**

9.67 In 2020, the subprogramme initiated four subregional studies on the linkages among development, peace and security, human rights and humanitarian affairs by first holding an inception meeting with stakeholders including the Office of the Special Adviser on Africa and the Office for the Coordination of Humanitarian Affairs, which led to the development of terms of reference. To this end the subprogramme held an expert group meeting on the subregional studies, with a focus on consolidating the comments and strengthening the conflict prevention focus, and discussed the need to promote coherence between these pillars in policies, where appropriate.

9.68 The work described above contributed to a consensus reached by regional experts, the African Union Commission and the regional economic communities on a methodology to enhance integrated policies and strategies of African Union organs and agencies for the implementation of Agenda 2063 and the 2030 Agenda for the subregional studies, which met the planned target reflected in the approved programme budget for 2021.

### **Proposed programme plan for 2022**

9.69 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will develop mainstreaming guidelines for the linkages to ensure increased effectiveness and impact, especially with regard to conflict prevention in development and humanitarian assistance. The expected progress is presented in the performance measure (see table 9.6).

<sup>4</sup> As reflected in the approved programme budget for 2021 ([A/75/6/Add.1](#)).

Table 9.6  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
	Countries agree to analyse the Joint United Nations-African Union Framework for Enhanced Partnership in Peace and Security, the African Union-United Nations Framework for the Implementation of Agenda 2063 and the 2030 Agenda for Sustainable Development and the seven strategic priorities of the African Union to promote an integrated approach in the implementation of Agenda 2063 and the 2030 Agenda	African Union Commission and the regional economic communities reaching a consensus on methodology to enhance integrated policies and strategies of African Union organs and agencies for the implementation of Agenda 2063 and the 2030 Agenda for the subregional studies	Adoption of a road map to enhance integrated approaches in the implementation of the 2030 Agenda and Agenda 2063 in policies and strategies of at least two African Union organs and agencies	At least one policy and one strategy of the African Union organs and agencies promote an integrated approach for the implementation of the 2030 Agenda and Agenda 2063

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target has been carried forward from the approved programme budget for 2021 and reflects best estimates at the point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: the role of digitization and the African Continental Free Trade Area for building forward and building better**

#### **Proposed programme plan for 2022**

9.70 The Africa Continental Free Trade Area was launched on 1 January 2021. The Free Trade Area is one of the African Union priority initiatives, which stands to benefit all countries by increasing intra-Africa trade. Throughout 2020 and 2021, the subprogramme, jointly with ECA, has supported countries in ratifying the Free Trade Area. Member States that have already ratified the agreement were assisted in producing national strategies for harnessing the benefits of the Free Trade Area.

#### *Lessons learned and planned change*

9.71 The lesson for the subprogramme was the importance of digital platforms for disseminating information on initiatives and collecting data and identifying fruitful initiatives through the ratification and national strategy development. More needs to be done in order to promote industrialization, the creation of tradeable complete manufactured products and to ease the conduct of business through e-commerce. In applying the lesson, the subprogramme will promote programmes and projects that contribute towards making the African Continental Free Trade Area beneficial for all countries and ensure that all initiatives have a digital component. Through the Africa

Regional Collaborative Platform opportunity and issue-based coalitions, the subprogramme will promote the utilization of the Free Trade Area by identifying and piloting regional value chains involving three or more member States to create tradeable products and will promote the creation of additional continental online trading markets for the products. In particular, the subprogramme plans to promote the establishment of an e-commerce platform, which will also reflect the data and statistics on trade.

*Expected progress towards the attainment of the objective, and performance measure*

9.72 This work is expected to contribute to the objective, as demonstrated by an increase in the percentage of intra-Africa trade as a percentage of total trade (see figure 9.IV)

Figure 9.IV

**Performance measure: share of intra-African trade in the total trade of Africa**

(Percentage)

## Legislative mandates

9.73 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolutions*

32/197	Restructuring of the economic and social sectors of the United Nations system	71/254	Framework for a Renewed United Nations-African Union Partnership on Africa's Integration and Development Agenda 2017–2027
61/296	Cooperation between the United Nations and the African Union		
70/1	Transforming our world: the 2030 Agenda for Sustainable Development	71/320; 73/335	New Partnership for Africa's Development: progress in implementation and international support

*Economic and Social Council resolutions*

671 (XXV) A	Establishment of an Economic Commission for Africa	2020/23	Progress in the implementation of General Assembly resolution 71/243 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system
1998/46	Further measures for the restructuring and revitalization of the United Nations in the economic, social and related fields		

## Deliverables

9.74 Table 9.7 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 9.7

### Subprogramme 2: deliverables for the period 2020–2022, by category and subcategory

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>3</b>	<b>3</b>	<b>1</b>	<b>4</b>
1. Report on United Nations support for the African Union and its NEPAD programme to the Conference of African Ministers of Finance, Planning and Economic Development	1	1	—	1
2. Report of the annual session of the Regional Coordination Mechanism for Africa (expert body)	1	1	—	—
3. Report of the retreat of clusters of the Regional Coordination Mechanism for Africa and subregional coordination mechanisms (expert body)	1	1	—	—
4. Report on capacity development related to Agenda 2063 and the 2030 Agenda	—	—	1	1
5. Report of the annual session of the Regional Collaborative Platform for Africa (expert body)	—	—	—	1
6. Report of the retreat of Opportunity and Issues Based Coalitions of the Regional Collaborative Platform (expert body)	—	—	—	1
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>12</b>	<b>2</b>	<b>8</b>	<b>18</b>
7. Annual session of the Regional Coordination Mechanism for Africa	4	1	—	—
8. Annual session of the Africa-Regional Collaborative Platform	—	—	—	2
9. Session of the subregional coordination mechanisms	4	—	—	—
10. African Union-United Nations meetings	—	—	—	4
11. Annual retreat of the Regional Coordination Mechanism for Africa and subregional coordination mechanisms	4	—	—	—
12. Annual retreats/meetings of the Africa-Regional Collaborative Platform	—	1	—	8
13. Meetings on capacity development and partnerships related to Agenda 2063 and the 2030 Agenda	—	—	8	4
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>1</b>	<b>—</b>	<b>1</b>	<b>2</b>
14. Fellowship on the linkages among development, peace and security, and human rights <sup>a</sup>	1	—	1	—
15. Technical cooperation project on the African Union Development Agency-NEPAD partnership	—	—	—	1
<b>Seminars, workshops and training events</b> (number of days)	<b>—</b>	<b>—</b>	<b>4</b>	<b>6</b>
16. Workshop on collaboration in the Africa-Regional Collaborative Platform	—	—	—	2
17. Workshops on capacity development and partnerships related to Agenda 2063 and the 2030 Agenda	—	—	4	4
<b>Publications</b> (number of publications)	<b>4</b>	<b>6</b>	<b>3</b>	<b>5</b>
18. Progress report of Regional Coordination Mechanism for Africa clusters	1	1	—	—
19. Progress report of the Africa-Regional Collaborative Platform Opportunity and Issues Based Coalitions	—	—	—	1
20. Progress report of subregional coordination mechanisms	1	1	—	—

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
21. Progress report of the Africa-Regional Collaborative Platform on the implementation of African Union-United Nations Frameworks and initiatives	—	—	—	1
22. Publication on topics specific to the work of the Regional Coordination Mechanism for Africa	1	—	—	—
23. Publication on topics specific to the work of the Africa-Regional Collaborative Platform	—	4	—	1
24. Publication on Agenda 2063 and the 2030 Agenda	—	—	1	1
25. Publications on topics related to African Union organs and agencies	1	—	2	1
<b>Technical materials</b> (number of materials)	<b>2</b>	<b>1</b>	<b>4</b>	<b>4</b>
26. Report on progress on decisions of the Africa-Regional Collaborative Platform	—	1	—	1
27. Web-based information on the work of the subprogramme	—	—	1	1
28. Guidelines and policy papers	2	—	3	2
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> advisory services, upon request, by ECA member States, the African Union Commission, the African Union Development Agency-NEPAD and the six regional economic communities; advocacy on capacity-building support for the African Union in the context of United Nations-African Union frameworks.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information material:</b> launch of publications; promotional materials.				
<b>Digital platforms and multimedia content:</b> website with up-to-date content on the work of the subprogramme.				

<sup>a</sup> The unit of measurement used for the fellowship programme under this subcategory is the number of fellows, instead of the number of projects fellows will work on at ECA.

### Subprogramme 3

#### Public information and awareness activities in support of the New Partnership for Africa's Development

#### Objective

9.75 The objective, to which this subprogramme contributes, is to achieve the informed understanding and engagement of a global audience in support of the economic, political and social development of Africa.

#### Strategy

9.76 To contribute to the objective, the subprogramme will develop global comprehensive editorial plans on priority issues affecting Africa, including generating support in Africa and beyond for the African Union Development Agency-NEPAD and Agenda 2063 and for the achievement of the 2030 Agenda for Sustainable Development, as well as in support of the work of the Office of the Special Adviser on Africa and ECA and their advocacy strategies. This is under the umbrella of the strategy of the Africa Section of the Department of Global Communications, which supports a shift to a digital focus, and in line with the new Global Communications Strategy. The aim is also to ensure that such plans are implemented in coordination with the rest of the Department of Global Communications, the United Nations Communications Group, the Regional Collaborative Platform for Africa and the United Nations system as a whole.

9.77 Activities will include producing external communications content, including through the Africa Renewal digital platforms, background notes, media advisories and other public information for use by external media, both African and international, and the provision of external communications support to the Office of the Special Adviser on Africa. Select content will be produced or translated into languages including French, Kiswahili and Chinese.

9.78 The work described above is expected to result in enhanced awareness of key thematic issues of the African Union Development Agency-NEPAD and other issues related to economic recovery and sustainable development in Africa.

## **Programme performance in 2020**

### **Credible information in a pandemic and “infodemic”**

9.79 The current ongoing “infodemic” – an avalanche of misinformation, fake news and far-reaching rumours – has been exacerbated during the COVID-19 pandemic. In particular with regard to the disease, media and other information distributors were seeking credible information about COVID-19, how to stop its spread and the efforts that were under way to tackle the disease. To achieve the informed understanding and engagement of a global audience in support of the economic, political and social development of Africa, and in particular the continental and United Nations response to COVID-19, the subprogramme increased its COVID-19-related advocacy content, which is offered free of charge to 275 media institutions and platforms on the continent and beyond. The content included interviews with United Nations and African Union experts and officials such as the directors of the World Health Organization Regional Office for Africa and the Africa Centres for Disease Control and Prevention, the Chief Executive Officer of the African Union Development Agency-NEPAD and the Secretary-General of the African Continental Free Trade Area Secretariat; an op-ed by the Deputy Secretary-General on United Nations support for countries to respond and build back better; and a campaign to celebrate health-care workers on the COVID-19 frontline in Africa. The subprogramme further amplified the United Nations Verified campaign, aimed at addressing misinformation, and featured efforts by the main pan-African broadcaster, MultiChoice, which is a collaborator of the initiative. The content consistently featured advocacy messages on addressing the pandemic.

9.80 As part of a broader United Nations effort, the subprogramme also supported the African Union theme for 2020, “Silencing the guns: creating a conducive environment for Africa’s development”, and the associated campaign “Silencing the guns by 2020” by producing articles and social media content to raise awareness of the campaign and provide factual information about activities taking place, including during Africa Amnesty Month in September. The subprogramme also amplified the Secretary-General’s various calls for a global ceasefire to enable countries to respond to COVID-19, as well as to address gender-based violence, which saw an increase due to the pandemic. As part of the campaign, the subprogramme also provided external communications support to subprogramme 1 for the Africa Dialogue Series 2020, which had the theme “COVID-19 and silencing the guns in Africa: challenges and opportunities”. This included media advisories, outreach to journalists and United Nations information centres and social media coverage. Fourteen articles produced during the year on “Silencing the guns” were published by 65 media outlets in 12 countries, including Ethiopia, Ghana, Kenya and Nigeria. The United Nations was a leading voice in supporting the African Union in promoting the campaign using the #SilencingtheGuns hashtag.

*Progress towards the attainment of the objective, and performance measure*

9.81 This work contributed to the objective as demonstrated by the republishing of *Africa Renewal* articles 1,700 times in both English and French in more than 530 media outlets (including as Modern Ghana, The Will Nigeria, Bulawayo24, Nation Media Group, Trade Law Centre (TRALAC), CNBC, MSN.com, Flipboard and Medium) in 43 countries around the world (these including Botswana, Ethiopia, France, Germany, Ghana, Kenya, Morocco, Namibia, Nigeria, Poland, Switzerland, Thailand, United Arab Emirates, Uganda, the United Kingdom of Great Britain and Northern Ireland, the United States of America and Zimbabwe). The articles were focused on priority issues related to the continent, specifically on the following: the impact of COVID-19 and the response; the “Silencing the guns” campaign; gender equality and women’s empowerment, youth and climate change (see figure 9.V).

Figure 9.V

**Performance measure: annual number of *Africa Renewal* articles republished in media and online platforms globally**

**Impact of COVID-19 on subprogramme delivery**

9.82 In response to the pandemic, the subprogramme identified new activities to support Member States on issues related to COVID-19, within the overall scope of its objectives. The subprogramme reorganized its work, with content shifting focus to Africa’s response to the pandemic, and proactively coordinated with key partners – the Office of the Special Adviser on Africa, the African Union, the African Union Development Agency-NEPAD and ECA. The subprogramme specifically conducted interviews with United Nations and African Union officials on continent-wide efforts to ramp up COVID-19 testing, the socioeconomic impact of the pandemic and efforts by institutions and individuals to produce masks and sanitizers, sensitize people on the pandemic, tackle misinformation and address the fears of the public. The subprogramme’s plan to support the African Union “Silencing the guns by 2020” campaign was also used to promote the Secretary-General’s call for a global ceasefire to fight COVID-19. Unable to physically produce and distribute hard copies of the *Africa Renewal* magazine, the subprogramme substantially increased its digital content production. The new activities and deliverables contributed to results in 2020, as specified in the emerging result above.

**Planned results for 2022**

9.83 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the

programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### Result 1: *Africa Renewal* goes digital<sup>5</sup>

#### Programme performance in 2020

9.84 The subprogramme continued to increase its digital channels in 2020, accelerated by the inability to print and distribute physical print copies of the *Africa Renewal* magazine. The subprogramme produced more news-related and multimedia content on a regular basis and curated a monthly e-newsletter to help drive online traffic to the website ([un.org/Africarenewal/](http://un.org/Africarenewal/)). The subprogramme also introduced an audio option for select articles online as an additional way to reach audiences, in particular in Africa. The Department of Global Communications also ran an online campaign on *Africa Renewal* platforms to celebrate health-care workers who are on the COVID-19 frontline. The 15 individuals featured came from countries including Angola, Botswana, Cameroon, Egypt, the Gambia, Kenya, Namibia, Nigeria, Sierra Leone and the Sudan.

9.85 The work described above contributed to 4.5 million visitors to the *Africa Renewal* website, which exceeded the target of 2,750,000 visitors to the *Africa Renewal* website in the proposed programme budget for 2020.

9.86 Furthermore, the work described above also contributed to an increasing number of pageviews of the website by 66.8 per cent, from 1,506,373 in 2019 to 2,513,301 in 2020. The subprogramme is using page views, rather than number of site visits, as the updated performance measure, as they are a more detailed and accurate measure of how users interact with the *Africa Renewal* website.

#### Proposed programme plan for 2022

9.87 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will focus on sharpening the website's information architecture, to improve the user experience, and increasing audio options, including podcasts, as a way to take advantage of the digital transformation on the continent while helping to bridge the digital divide. The expected progress is presented in the performance measure (see figure 9.VI).

Figure 9.VI

Performance measure: annual number of page views of the *Africa Renewal* website

<sup>5</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 11)).

## Result 2: highlighting Africa's challenges and priorities in a digital and multilingual world<sup>6</sup>

### Programme performance in 2020

9.88 The subprogramme focused in 2020 on changing its content production in view of the COVID-19 pandemic, in order to fulfil its mandate, resulting in more *Africa Renewal* stories published online in English and French and select content translated into two additional languages: Kiswahili and Chinese. In 2020, the subprogramme increased the number of Kiswahili articles from 26 in 2019 to 33. The number of articles translated into Chinese dropped from 31 in 2019 to 24 owing to the pandemic-related temporary closure of the partner university that assists with translation. At the same time, efforts were initiated towards a new social media strategy to accompany the subprogramme's editorial direction.

9.89 The work described above contributed to 211,387 combined followers on the *Africa Renewal* Facebook and Twitter accounts, which did not meet the planned target of 214,000 in the proposed programme budget for 2021, mainly owing to the subprogramme's focus on quickly shifting and ramping up production of more COVID-19 content, which was offered to media houses for republishing.

### Proposed programme plan for 2022

9.90 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will increase its engagement with social media influencers, academic institutions, creative communities and other stakeholders as amplifiers of *Africa Renewal* social media content. The subprogramme will also collaborate more closely with the main United Nations social media team on a social media strategy that is fit for purpose in the evolving context. The expected progress is presented in the performance measure (see figure 9.VII).

Figure 9.VII

**Performance measure: number of followers of the *Africa Renewal* social media accounts (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target has been carried forward from the proposed programme budget for 2021 and reflects best estimates at the point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

<sup>6</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect. 11)).

### **Result 3: the role of digitalization and the African Continental Free Trade Area for building forward and building better**

9.91 The COVID-19 pandemic had a severe impact on the economies of Africa. At the same time, while global value chains were disrupted, Governments and people across the continent used digital technology to innovate. They created much-needed products and delivered services, information, social assistance and payments, including as part of stimulus packages. In 2020, the Global System for Mobile Communications (GSMA), in its report “The Mobile Economy Sub-Saharan Africa 2020” stated that Africa is expected to reach 600 million unique mobile subscribers by 2025. This, combined with the digitalization efforts of the recently launched trading under the African Continental Free Trade Area, will accelerate the continent’s structural and digital transformation plans, making it easier to communicate, trade and access services online, including those provided in the context of COVID-19 recovery, for example booking a vaccination appointment online.

9.92 Taking into account its objective to achieve the informed understanding and engagement of a global audience in support of the economic, political and social development of Africa, the subprogramme in 2020 prioritized its coverage of the COVID-19 response innovations, as well as the then-upcoming African Continental Free Trade Area as a driver of socioeconomic recovery. The subprogramme covered stories of innovations in Africa, including the use of telehealth in Nigeria, and profiled a Kenyan biomedical engineering student who created a mechanical ventilator and a Sierra Leonean technologist who developed an app to assist with contact tracing. The articles also showcased different homegrown online campaigns to tackle misinformation such as the United Nations Educational, Scientific and Cultural Organization (UNESCO) #DontGoViral campaign, which started in Uganda, #DefyHate in South Sudan and the effort of the United Nations Verified campaign collaborator, pan-African broadcaster MultiChoices with its Talent Factory content production. At the same time, the subprogramme published and amplified several interviews and articles with the Secretary-General of the Free Trade Area Secretariat on digital innovations or solutions as a force for trade, the acting Executive Director of the International Trade Centre on innovation needed for small business to survive COVID-19 impact and how a strong intellectual property regime in the Free Trade Area context will help drive growth.

#### *Lessons learned and planned change*

9.93 The lesson for the subprogramme was that digitalization in Africa will not only help address the health-related aspects of the pandemic but will also be a driver of the continent’s socioeconomic recovery. In applying the lesson, the subprogramme will increase its focus on showcasing both institutional and individual solutions-focused content on these themes.

#### *Expected progress towards the attainment of the objective, and performance measure*

9.94 This work is expected to contribute to the objective, as demonstrated by the increase in the number of individual profiles, stories, op-eds and articles published on people in Africa specifically engaged in digital solutions for health and for trade in the context of the African Continental Free Trade Area. In 2020, the subprogramme covered nine of these stories across its platforms (see figure 9.VIII).

Figure 9.VIII

**Performance measure: annual number of *Africa Renewal* articles published with a focus on digitalization**

## Legislative mandates

9.95 The list below provides all mandates entrusted to the subprogramme.

### General Assembly resolutions

54/232	Implementation of the first United Nations Decade for the Eradication of Poverty	57/7	Final review and appraisal of the United Nations New Agenda for the Development of Africa in the 1990s and support for the New Partnership for Africa's Development
54/234	The causes of conflict and the promotion of durable peace and sustainable development in Africa	60/109 B	Questions relating to information: United Nations public information policies and activities

## Deliverables

9.96 Table 9.8 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 9.8

**Subprogramme 3: deliverables for the period 2020–2022, by category and subcategory**

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>B. Generation and transfer of knowledge</b>				
<b>Publications</b> (number of publications)	<b>12</b>	<b>18</b>	<b>6</b>	<b>24</b>
1. <i>Africa Renewal</i> magazine	6	—	6	—
2. <i>Africa Renewal</i> curated e-newsletter	6	18	—	24
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> partnerships with over 200 editors and writers in major media houses in Africa and other countries, education institutions, civil society organizations and creative communities to republish and amplify <i>Africa Renewal</i> content for wider distribution and dissemination; external communications efforts, including the annual Africa Dialogue Series, the Commission on the Status of Women, the Economic and Social Council youth forum, the General Assembly and African Union flagship events; contributions to the work of the Regional Collaborative Platform and the interdepartmental task force on African affairs; publicity in support of international, regional and local initiatives and campaigns that foster or have an impact on Africa's economic and social development.				

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<p><b>External and media relations:</b> media round tables; content tailored to specific media outlets interested in Africa's development for syndication or citation and interested in including relevant information on United Nations support for Africa in their own materials; international, regional and local initiatives and campaigns that foster or have an impact on Africa's economic and social development; public information material, including media advisories.</p> <p><b>Digital platforms and multimedia content:</b> digital products and written and audio content for digital platforms, including websites, social media accounts, e-newsletters, audio content, mobile phone apps and social media accounts.</p>				

## Programme 10

### Trade and development

#### Overall orientation

##### Mandates and background

10.1 The United Nations Conference on Trade and Development (UNCTAD) is responsible for assisting developing countries, as reflected in paragraph 10 of the Nairobi Maafikiano, and countries with economies in transition in integrating beneficially into the global economy in support of inclusive and sustainable growth and development. UNCTAD was established to promote an inclusive global economy by informing national and international policies while giving due consideration to the needs and interests of developing countries. As stated in the Nairobi Maafikiano: “The important role of UNCTAD will be strengthened as the focal point in the United Nations for the integrated treatment of trade and development and interrelated issues in the areas of finance, technology, investment and sustainable development.” The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including the quadrennial sessions of UNCTAD, in particular the principal functions of the Conference outlined in section II, paragraph 3, of General Assembly resolution 1995 (XIX). In the face of a complex set of trade and development challenges, UNCTAD has been called upon to focus its resources to help developing countries build productive capacities, address widening technological and digital divides, ensure sound macroeconomic management and advise Governments on financing for development, addressing illicit financial flows and providing technical assistance on debt issues. UNCTAD support aimed at developing the capacity of Governments to formulate and implement policies for sustainable development will also continue to be provided through the implementation of the regular programme of technical cooperation and United Nations Development Account projects.

##### Strategy and external factors for 2022

10.2 In order to achieve its objectives, UNCTAD works through three interrelated pillars: (a) it conducts high-quality and evidence-based research and policy analysis that feed national, regional and international policies with the aim of generating inclusive and sustainable development under the principle of leaving no one behind; (b) it provides technical cooperation based on such analysis to all developing countries, with a particular focus on the least developed countries, landlocked developing countries and small island developing States, other structurally weak and vulnerable small economies, and countries in conflict and post-conflict situations; and (c) it brings member States together through its intergovernmental machinery to build consensus on policies that allow developing countries to maximize the opportunities of globalization and economic integration, as well as to address cross-cutting economic, social and environmental challenges.

10.3 In the context of deepening interdependence among all countries, UNCTAD will maintain its unique orientation and commitment to development through the three pillars, while remaining responsive and accountable to all member States. UNCTAD addresses interrelated issues essential to all countries in attaining sustainable and equitable growth and development and this requires extensive cross-fertilization and cooperation across UNCTAD subprogrammes on areas such as South-South cooperation, investment and the digital economy, with due consideration for the increasing impact of these subjects on global trade and development.

10.4 UNCTAD will continue to support member States in the implementation of the 2030 Agenda for Sustainable Development, in which the interrelationship between sustainable development and trade, finance, investment and technology is recognized. UNCTAD is also custodian of eight Sustainable Development Goal indicators at the global level and actively contributes to the monitoring and implementation of a wide range of Goals, with its main contributions to Goals 8, 9, 10 and 17, and with important contributions to Goals 2, 5, 12, 15 and 16. In addition, UNCTAD will continue to contribute to the Inter-Agency and Expert Group on Sustainable Development Goal Indicators, supporting monitoring of and follow-up to the means of implementation of the 2030 Agenda. UNCTAD subprogramme activities are also aligned with other relevant agendas, including the agreed outcome of the Fifth United Nations Conference on the Least Developed Countries, Agenda 2063 of the African Union, the Beijing Declaration and Platform for Action, the Addis Ababa Action Agenda of the Third International Conference on Financing for Development, the Programme for the Further Implementation of Agenda 21 and the outcomes of the World Summit on Sustainable Development and of the United Nations Conference on Sustainable Development, as well as the Monterrey Consensus of the International Conference on Financing for Development, the outcomes and the Declaration of Principles and the Plan of Action of the World Summit on the Information Society, the Sendai Framework for Disaster Risk Reduction 2015–2030, the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024, the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States and the SIDS Accelerated Modalities of Action (SAMOA) Pathway, along with the results of the twenty-fifth and previous sessions of the Conference of the Parties to the United Nations Framework Convention on Climate Change.

10.5 Along with the global agendas, UNCTAD will strive in particular to ensure the implementation of mandates resulting from and reinforced by its fifteenth session, which is planned to be held in 2021 in Bridgetown. The session will be an important moment for member States to come together to discuss recent developments and long-term trends in the area of trade and development and interrelated issues in the areas of finance, technology, investment and sustainable development and to take stock of the achievements, and the shortfalls, of the first half decade of implementation of the Sustainable Development Goals.

10.6 Enhancing its efficiency, effectiveness, transparency and accountability, UNCTAD will continue efforts to build a culture of results-based management across UNCTAD, through training and guidance, and will increase internal capacity for collecting and reporting data on results.

10.7 For 2022, UNCTAD planned deliverables and activities reflect known and anticipated challenges related to the coronavirus disease (COVID-19) that are being faced by member States. Such planned deliverables and activities include supporting debt sustainability and exploring novel approaches to liquidity support for developing countries; measuring and combating illicit financial flows to increase fiscal space in developing countries; adjusting investment policies, investment facilitation efforts and international investment agreements in the light of the changing global production networks catalysed by the pandemic; supporting entrepreneurs, including women and those in vulnerable situations, and groups that have suffered from lockdowns and the economic recession; supporting trade policies, trade and environment policies and competition policies in response to the pandemic; helping to make trade facilitation, maritime shipping, customs authorities and transport networks more resilient to the effects of the pandemic; supporting the digital readiness of developing countries with an eye to bridging the widening digital divides that have been further exacerbated by the pandemic; and supporting the building of productive capacities in least developed

countries, landlocked least developing countries and small island developing States, other structurally weak and vulnerable small economies, and countries in conflict and post-conflict situations that have been hardest hit by the pandemic. Specific examples of such planned deliverables and activities are provided under all subprogrammes. The support provided to member States on issues related to COVID-19 is expected to contribute to planned results in 2022, as described under all subprogrammes.

10.8 With regard to cooperation with other entities at the global, regional, national and local levels, UNCTAD will continue to combine its expertise with the reach and in-country presence of partners in order to maximize the impact provided to beneficiaries. UNCTAD is actively engaged with the United Nations development system reform process, serves as reviewer for projects of the Joint Sustainable Development Goal Fund and supports integrated national financing frameworks. UNCTAD is also part of a task team on enhanced collaboration with eight resident coordinator offices to develop clear entry points and mechanisms for the agile, effective and efficient engagement of UNCTAD and other non-resident agencies and specialized agencies at the country level. UNCTAD has also advocated for the stronger engagement of non-resident agencies in COVID-19 response mechanisms so that its expertise can more quickly turn into solutions at the country level. In addition, UNCTAD has concluded partnership agreements with various international organizations and non-governmental organizations (NGOs), academic institutions and private sector entities. It will continue to enhance partnership mechanisms with the private sector by enhancing its due diligence guidelines, drawing from the experiences of the United Nations Global Compact.

10.9 With regard to inter-agency coordination and liaison, UNCTAD participates actively in the United Nations System Chief Executives Board for Coordination and its subsidiary bodies. As one of the five major institutional stakeholders of the financing for development follow-up process, UNCTAD is leading inter-agency dialogue on monitoring and accountability of the means for the implementation of targets through the dedicated follow-up to the Addis Ababa Action Agenda commitments, with a particular focus on its trade, finance, investment and technology dimensions. UNCTAD contributes to the Inter-Agency Task Force on Financing for Development and continues to lead the United Nations Inter-Agency Cluster on Trade and Productive Capacity in “delivering as one” operational activities at the country level, in collaboration with 14 other entities. UNCTAD is also part of the steering committee for the multi-partner trust fund for the socioeconomic response to the COVID-19 pandemic and actively contributes to the United Nations network of economists, the United Nations task team on COVID-19 response and the Task Force on the Digital Financing of the Sustainable Development Goals. UNCTAD is also one of the lead agencies of the Group of Friends on Financing the Sustainable Development Goals Initiative on Financing for Development in the Era of COVID-19 and Beyond, led by Canada and Jamaica, and is leading the cluster on finance and technology. In response to the COVID-19 pandemic, UNCTAD partnered with WHO on a three-year project, which will continue in 2022, to respond to the urgent call to boost the local production of essential medicines in developing countries and joined forces with the five United Nations regional commissions in a new project to help developing countries deal with trade and transport challenges resulting from the pandemic and facilitate the flow of goods and services, while containing the spread of the coronavirus.

10.10 With regard to external factors, the overall plan for 2022 is based on the following planning assumptions:

(a) Up-to-date and accurate economic and financial information and data at the country and regional levels continue to be available and cooperation continues with relevant entities on the production of statistics;

(b) Extrabudgetary funding continues to be available for technical cooperation programmes, and conditions and capacities exist in member States to adopt and implement policies and strategies;

(c) There is political will to achieve consensus in intergovernmental meetings;

(d) There is an agreed outcome of the fifteenth session of UNCTAD, which is planned to be held in Bridgetown in 2021, that reaffirms the existing work programme and there is an agreed outcome of the Twelfth Ministerial Conference of the World Trade Organization (WTO);

(e) There is an agreed outcome of the Fifth United Nations Conference on the Least Developed Countries, which is planned to be held in Doha in January 2022.

10.11 With regard to the COVID-19 pandemic, the programme plan is based on the assumption that the proposed deliverables and activities in 2022 will be feasible to implement and will be in line with the outcome of the fifteenth session of UNCTAD. However, if the pandemic were to further have an impact on the planned deliverables and activities, they would be adjusted in 2022 within the scope of the overall objectives, strategies and mandates. Any such adjustments would be reported as part of the programme performance information.

10.12 UNCTAD integrates a gender perspective in its operational activities, deliverables and results, as appropriate and in line with its mandate and gender mainstreaming strategy. In 2022, UNCTAD will continue to strengthen the capacity of member States to design and implement trade policies that allow women to benefit from the opportunities arising from international trade. In the context of the pandemic, UNCTAD has been active in analysing the gender impact of the pandemic and advocating for policy responses that are not gender-blind, including gender-equal responses to save economies, focusing on women working in tourism industries at risk in small island developing States; the future for women, small-scale and informal cross-border traders when borders close; and how to leverage digital solutions to harness the potential of informal cross-border trade. UNCTAD will also continue its pioneering work on trade and sex-disaggregated statistics and measuring the different ways that women and men experience the impacts of trade. Based on the framework it has developed, UNCTAD will provide practical guidance to member States on how to compile the necessary statistics that allow a full picture of the gender impact of trade to be obtained.

10.13 In line with the United Nations Disability Inclusion Strategy, UNCTAD will continue to support the advancement of disability inclusion in both its programmatic work, by ensuring the participation and inclusion of those in vulnerable situations, and its operational activities, in close collaboration with the United Nations Office at Geneva. While access by member State delegates and participants to UNCTAD meetings organized at the headquarters facilities is managed and ensured by the United Nations Office at Geneva, in line with the existing Secretariat policy and guidance on disability, for meetings that are serviced outside the duty station, such as the quadrennial ministerial conference, UNCTAD ensures, through its host country agreements, that all venues and conference facilities are accessible to persons with disabilities.

## Programme performance in 2020

### Impact of COVID-19 on programme delivery

10.14 During 2020, the COVID-19 pandemic had an impact on the planned deliverables and activities of UNCTAD. The impact included changing the approach and the format of certain planned meetings and activities from in-person to virtual and postponement of others to after 2020. Specific examples of this impact included, most importantly, the postponement of the fifteenth session of UNCTAD, including its preparatory meetings and related publications. Other pandemic-related postponements to 2021 included the Multi-year Expert Meeting on Commodities and Development, the sessions of the Investment, Enterprise and Development Commission and the Trade and Development Commission, the World Investment Forum and its related meetings and the session of the Intergovernmental Group of Experts on Financing for Development.

10.15 Nevertheless, to engage with member States and a broad range of audiences, UNCTAD was able to quickly adapt its working methods and changed its approach by moving to online platforms. Despite the pandemic, UNCTAD was able to use its convening power and organize over 120 webinar sessions to bring various stakeholders to debate, exchange experiences, identify best practices and develop global standards with regard to the most pressing issues. Due to the change in approach and necessary adjustments, meetings of the Bureau of the UNCTAD Trade and Development Board, the Commission on Science and Technology for Development and many other thematic expert meetings and webinars, covering a broad range of issues, such as investment promotion, competition policy and consumer protection and biotrade, were all organized virtually. The oceans economy event was replaced by a webinar organized with partners on World Oceans Day, while the virtual eCommerce Week 2020 attracted over 2,000 participants from 134 countries from civil society, academia, the scientific community and the technology industry. The change in approach and the postponement or even cancellation of some planned deliverables and activities also had an impact on the expected results for 2020, as described in the programme performance under all subprogrammes.

10.16 At the same time, however, some planned deliverables and activities were modified, and some new activities were identified during 2020, within the overall scope of the objectives of the subprogrammes, in order to support member States on issues related to the COVID-19 pandemic. With more than 75 analytical publications, commentaries and news items on COVID-19, UNCTAD contributed to analysing and understanding the socioeconomic impact of the pandemic and providing policy recommendations for a better recovery, including with regard to the need for debt relief, increased global liquidity and a global health plan for developing countries. Furthermore, the UNCTAD report entitled *Impact of the COVID-19 Pandemic on Trade and Development: Transitioning to a New Normal*, published in November 2020, benchmarked the expectations of UNCTAD for what a better recovery should comprise, by providing a road map for recovery that requires an overdue and opportune shift in the structure of global trade and cooperation. Specific examples of such modified and new activities are provided under all subprogrammes. The new deliverables and activities contributed to results in 2020, as described in the programme performance under all subprogrammes.

10.17 Reflecting the importance of continuous improvement and responding to the evolving needs of member States, the programme will mainstream lessons learned and best practices related to the adjustment and adaptation of its programme owing to the COVID-19 pandemic. Specific examples of best practices and lessons learned were identified in the areas of research and analysis, as well as technical cooperation. Since

the start of the pandemic, UNCTAD has been closely monitoring its effects on manufacturing, trade, foreign direct investment and economic growth and has provided updates to member States in a timely manner on the economic implications of different policy options and financial challenges facing developing countries in particular. At the same time, in the area of technical cooperation and capacity-building, UNCTAD has adapted to the priorities of different countries in their responses to the pandemic, and also in their recovery plans, by identifying mitigation- and recovery-related UNCTAD programmes that can help to address critical challenges during the pandemic. For the future, UNCTAD will continue to harness the lessons learned and best practices in the areas of research and analysis, and technical cooperation.

## Legislative mandates

10.18 The list below provides all mandates entrusted to the programme.

### *General Assembly resolutions*

1995 (XIX)	Establishment of the United Nations Conference on Trade and Development as an organ of the General Assembly	72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system
63/204	Report of the twelfth session of the United Nations Conference on Trade and Development	73/241	International migration and development
63/303	Outcome of the Conference on the World Financial and Economic Crisis and Its Impact on Development	73/243	Follow-up to the second United Nations Conference on Landlocked Developing Countries
66/288	The future we want	73/245	Promotion of sustainable tourism, including ecotourism, for poverty eradication and environment protection
67/226	Quadrennial comprehensive policy review of operational activities for development of the United Nations system	73/246	Implementation of the Third United Nations Decade for the Eradication of Poverty (2018–2027)
68/219	Role of the United Nations in promoting development in the context of globalization and interdependence	73/291	Buenos Aires outcome document of the second High-level United Nations Conference on South-South Cooperation
69/137	Programme of Action for Landlocked Developing Countries for the Decade 2014–2024	74/200	Unilateral economic measures as a means of political and economic coercion against developing countries
69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development (Addis Ababa Action Agenda)	74/202	International financial system and development
70/1	Transforming our world: the 2030 Agenda for Sustainable Development	74/207	Follow-up to and implementation of the outcomes of the International Conferences on Financing for Development
70/133	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly	74/228	Role of the United Nations in promoting development in the context of globalization and interdependence
72/234	Women in development	74/239	South-South cooperation
		75/203	International trade and development

### *United Nations Conference on Trade and Development reports*

TD/442, TD/442/Corr.1 and TD/442/Corr.2	Report of the United Nations Conference on Trade and Development on its twelfth session	TD/500/Add.1	Report of the United Nations Conference on Trade and Development on its thirteenth session: the Doha Mandate
		TD/519/Add.2	Report of the United Nations Conference on Trade and Development on its fourteenth session: Nairobi Maafikiano

## Deliverables

10.19 Table 10.1 lists all cross-cutting deliverables, by category and subcategory, for the period 2020–2022.

Table 10.1

### Cross-cutting deliverables for the period 2020–2022, by category and subcategory

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>9</b>	<b>9</b>	<b>10</b>	<b>10</b>
1. Documents and conference room papers prepared for the Trade and Development Board	1	1	1	1
2. Reports on the follow-up to the major United Nations conferences and summits in the areas of UNCTAD expertise	1	1	1	1
3. Reports on matters requiring action by the Trade and Development Board in relation to the fifteenth session of UNCTAD	1	1	1	1
4. Conference room papers or working papers prepared for the Working Party on the Programme Plan and Programme Performance	4	4	4	4
5. Overview of the external evaluations of UNCTAD programmes and projects: report by the Secretary-General of UNCTAD	1	1	1	1
6. Synthesis of the five subprogramme evaluations and update on the status of implementation of recommendations	–	–	–	–
7. Report on the external evaluation of an UNCTAD subprogramme	–	–	1	1
8. Review of the technical cooperation activities of UNCTAD and their financing: report by the Secretary-General of UNCTAD	1	1	1	1
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>28</b>	<b>74</b>	<b>28</b>	<b>107</b>
9. Meetings of the Trade and Development Board, including annual, special and executive sessions of the Board and its subsidiary bodies	26	59	26	92
10. Meetings of the Working Party on the Programme Plan and Programme Performance	2	12	2	12
11. Meetings of the Advisory Committee on Administrative and Budgetary Questions	–	1	–	1
12. Meetings of the Fifth Committee	–	1	–	1
13. Meetings of the Committee for Programme and Coordination	–	1	–	1
<b>B. Generation and transfer of knowledge</b>				
<b>Seminars, workshops and training events</b> (number of days)	<b>9</b>	<b>24</b>	<b>9</b>	<b>24</b>
14. Ad hoc expert discussions to generate and transfer knowledge on topics to be determined by the Secretary-General of UNCTAD, in consultation with member States	3	3	3	3
15. Public symposium with civil society and member States to generate and transfer knowledge in connection with the work programme of UNCTAD, subject to further consideration and decision by the Trade and Development Board	1	2	1	2
16. Raúl Prebisch lecture to transfer knowledge on topical trade and development issues	1	1	1	1
17. Geneva multi-stakeholder dialogues to share and transfer knowledge on topical international trade and development issues	1	1	1	1
18. High-level events with UNCTAD special advisers and advocates to contribute to transferring knowledge	1	2	1	2
19. Cabinet meeting to share and transfer knowledge on the coordination of national development strategies oriented towards sustainable development	1	1	1	1
20. Civil society and youth networking events to share and transfer knowledge, including online networking discussions	1	14	1	14

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>Technical materials</b> (number of materials)	<b>12</b>	<b>7</b>	<b>10</b>	<b>11</b>
21. Policy briefs on trade and development issues to generate and transfer knowledge	1	—	1	—
22. Reports on evaluations of United Nations Development Account projects and of external evaluations required by contribution agreements	10	4	8	8
23. Secretary-General opinion pieces	1	3	1	3

#### C. Substantive deliverables

**Databases and substantive digital materials:** UNCTAD annual report, UNCTAD civil society database and civil society electronic alerts and UNCTAD Youth Network, reaching an audience in excess of 30,000 at the corporate level.

#### D. Communication deliverables

**Outreach programmes, special events and information materials:** “UNCTAD at a Glance”; outreach programmes; special events; civil society outreach activities; regional outreach materials; press kits, media briefs and flyers for flagship publications; news briefs and opinion pieces; public information materials on UNCTAD (including brochures, posters and folders); and specialized information sessions for students, more than 6,000 delegates, academics and youth visiting UNCTAD and, upon request, in other locations, including online outreach.

**External and media relations:** press conferences, including by the Secretary-General and the Deputy Secretary-General; press releases and information notes about UNCTAD; and web-based news briefs.

**Digital platforms and multimedia content:** UNCTAD website and its web pages and social media applications containing information about UNCTAD; meetings and events; documents; publications, including policy briefs, blogs, reviews, reports and press and public information materials, including information on evaluation; and podcasts, attracting some 2 million visitors per year, with 5.4 million page views.

## Evaluation activities

10.20 The following evaluations completed in 2020 have guided the proposed programme plan for 2022:

- (a) Informal cross-border trade for the empowerment of women, economic development and regional integration in Eastern and Southern Africa (United Nations Development Account-funded project 1617J);
- (b) Fostering the development of “green” exports through voluntary sustainability standards in Asia and the Pacific (United Nations Development Account-funded project 1617AI);
- (c) Trade and agricultural policies to support small-scale farmers and enhance food security (United Nations Development Account-funded project 1617I);
- (d) Strengthening statistics on international trade in services for countries of the West African Economic and Monetary Union (project funded by the Union).

10.21 The findings of the evaluations and self-evaluations referenced above have been taken into account for the programme plan for 2022. For example, one evaluation found strong evidence that women informal cross-border traders who participated in UNCTAD micro-level schemes had acquired new knowledge and that they would use their new skills towards constructive ends, as evidenced under result 1 under subprogramme 3. In particular, the evaluation noted that the combination of skill sets had targeted created mutually reinforcing gains so that the women cross-border traders now had skills to accumulate profits and save, allowing them to diversify, expand or invest in value-adding elements and thereby move closer to the formal economy. Following the evaluation of an intervention on investment promotion, the active involvement of private sector entities and outward investment agencies is now solicited under a follow-up intervention, in alignment with a recommendation from the evaluation and which can be observed under subprogramme 2. Finally, a recurrent

recommendation from a number of evaluations to strengthen gender mainstreaming in the work of UNCTAD had resulted in a stronger focus on gender equality objectives in the results framework of the e-commerce and the digital economy programme, including the actions undertaken by women digital entrepreneurs, and the number of communities established that foster digital entrepreneurship among women, which is presented under subprogramme 4 as one of the planned results.

10.22 The following evaluations are planned for 2022:

- (a) Evaluation of subprogramme 1: globalization, interdependence and development;
- (b) Evaluation of subprogramme 2: investment and enterprise (to be presented in 2023);
- (c) Eight evaluations of completed projects.

## **Programme of work**

### **Subprogramme 1**

#### **Globalization, interdependence and development**

#### **Objective**

10.23 The objective, to which this subprogramme contributes, is to advance inclusive and sustainable development, sustained growth, full employment and decent work for all through evidence-based economic policies and strategies at the national, regional and international levels and to achieve progress towards a durable solution to the debt problems of developing countries, as well as poverty eradication in developing countries, especially the least developed countries, including through North-South cooperation, complemented but not substituted by South-South and triangular cooperation.

#### **Strategy**

10.24 To contribute to the objective, the subprogramme will continue to identify specific needs and measures arising from the interdependence of trade, finance, investment, technology and macroeconomic policies, from the point of view of their effects on development through its three pillars, namely research and policy analysis, consensus-building and technical cooperation. The subprogramme also plans to support developing countries in their efforts to formulate development strategies and practical policy options and recommendations at all levels, which will help member States meet the challenges of globalization and of achieving the Sustainable Development Goals. The subprogramme will continue to provide high-quality and timely statistics, which will support the efforts of developing countries to develop their national statistical systems by providing technical assistance and capacity-building programmes. Furthermore, the subprogramme will continue to promote stronger cooperation at all levels of the interplay between successful development finance strategies, debt sustainability and effective debt management, including through the provision of important contributions on debt and debt sustainability and on addressing systemic issues for the report of the Inter-Agency Task Force on Financing for Development. The subprogramme will also focus on the challenges to short and long-term debt sustainability in developing countries and on sustainable domestic and international financial resource mobilization for development, which will help member States to make progress towards the achievement of Sustainable

Development Goals 16 and 17 and facilitate progress on debt and development finance issues. In addition, the subprogramme will provide technical assistance, training and support for developing countries. Furthermore, the subprogramme will continue to undertake research and analysis on trends and prospects for closer cooperation and integration among developing countries. The subprogramme will also provide technical assistance and disseminate best practices, training and support for developing countries.

10.25 In responding to the mandates given by the General Assembly in its resolutions [74/10](#), on the Committee on the Exercise of the Inalienable Rights of the Palestinian People, and [74/117](#), on assistance to the Palestinian people, the subprogramme will continue to provide advisory services and research and analysis to support the Palestinian people, in line with paragraph 55 (dd) of the Nairobi Maafikiano.

10.26 The subprogramme plans to support member States on issues related to COVID-19 by continuing its work, through its three pillars, on identifying how the international financial architecture can work for development, including on issues of debt, and by analysing specific ways in which South-South cooperation can promote post-pandemic recovery and build resilience in developing countries.

10.27 The above-mentioned work is expected to result in:

- (a) An increased understanding of the coherence between international economic rules, practices and processes and national policies and development strategies;
- (b) Strengthened linkages between economic and development policies and decision-making and improvements in the compilation and dissemination of the official statistics of member States;
- (c) Strengthened national capacities for effective debt management;
- (d) An increase in the understanding of developing countries of the global economic environment and of policy choices for inclusive and sustained development.

10.28 The planned support on issues related to COVID-19 is expected to result in increased understanding at the international level of the needs of developing countries, in particular on debt issues, to allow them to reach growth levels conducive to achieving the Sustainable Development Goals, and enhanced South-South cooperation through provision to developing countries of policy tools for dealing with the social and economic effects of the pandemic.

## **Programme performance in 2020**

10.29 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Advancement of the ability of developing countries to respond to the COVID-19 pandemic and to sustain recovery and build resilience by augmenting their policy space in the multilateral system**

10.30 The world economy experienced a deep recession in 2020 amid a still unchecked pandemic. Moving forward requires a plan for global recovery, one that can return even the most vulnerable countries to a position stronger than before the recession. Without a change of direction in policy, the next 10 years will be a lost decade for growth, development, employment, the environment and economic and social justice. The subprogramme provided extensive analysis of the development

challenges caused by the pandemic, focusing on the vulnerabilities of developing countries in the face of the pandemic and the economic shock and on the necessary immediate response measures, including at the multilateral level, and policy tools for better recovery. In *Trade and Development Report 2020: From Global Pandemic to Prosperity for All – Avoiding Another Lost Decade*, the subprogramme focused on policy mistakes that should be avoided to allow developing countries to regain ground lost as a result of the pandemic and highlighted that a combination of precarious work conditions, high levels of debt distress and insufficient fiscal and policy space limited their options to respond to shocks of any kind. The report recommended a set of multilateral measures to transform the global recession into a global recovery, including a plan for health recovery funded through increased official development assistance commitments, providing a more dedicated framework for building future resilience. The analysis was complemented by a policy brief entitled “Topsy-turvy world: net transfer of resources from poor to rich countries” that looked at financial vulnerabilities in developing countries and the limitations they faced in mobilizing domestic financial resources to respond to the pandemic at the required scale, and at the main drivers of the net transfer of financial resources to the developed world, including illicit financial flows from developing countries.

*Progress towards the attainment of the objective, and performance measure*

10.31 The above-mentioned work contributed to the objective, as demonstrated by advancement of financing for development issues in international forums through the launch of the Initiative on Financing for Development in the Era of COVID-19 and Beyond under the leadership of Canada and Jamaica and through the launch of the United Nations research road map for the COVID-19 recovery (see table 10.2).

Table 10.2

**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
—	Increased awareness among member States of the continuing imbalances in the global economy provided by the analysis contained in <i>Trade and Development Report 2019</i> and the subprogramme’s analysis warning that the international community must do more to help developing countries meet the Sustainable Development Goals	Advancement of financing for development issues in international forums through the launch of the Initiative on Financing for Development in the Era of COVID-19 and Beyond under the leadership of Canada and Jamaica and through the launch of the United Nations research road map for the COVID-19 recovery, in which the subprogramme’s work has particular relevance for pillar 4 (Macroeconomic policies and multilateral collaboration) and its research priority on “What lessons from past economic crises can inform the design of national, regional and global recovery strategies?”

**Impact of COVID-19 on subprogramme delivery**

10.32 Owing to the impact of COVID-19 in 2020, the subprogramme cancelled training activities for developing country policymakers held every year in Wuhan, China. Furthermore, pandemic-related travel restrictions affected the

subprogramme's participation in Paris Club meetings. Due to physical distancing measures, there was a marked drop in interactions with representatives of member States in both Geneva and New York (the latter being particularly affected due to travel restrictions), such as participation in the Economic and Social Council forum on financing for development follow-up process in New York. At the same time, the subprogramme changed its approach and replaced physical meetings with virtual meetings, such as the online launch of the industrialization strategy of Mauritius, jointly organized with the Government of that country. Furthermore, the session of the Intergovernmental Group of Experts on Financing for Development scheduled to be held in the last quarter of 2020 was postponed to January 2021. These changes had an impact on programme performance in 2020, as specified in result 1.

10.33 At the same time, however, the subprogramme identified both new and modified activities to support member States on issues related to COVID-19, within the overall scope of its objectives, including policy and technical discussions held with policymakers and think tanks on topics focused on the economic impacts of the pandemic and a change of focus and themes in the subprogramme's research and analysis to address the impact of COVID-19 on developing countries and policy responses needed to assist them in coping with the related shock. Thus, the subprogramme's *Trade and Development Report 2020* focused on the effects of the pandemic, calling on the international community to collectively chart a new path that led from recovery to a more resilient, more equal and more environmentally sustainable world in line with the ambition of the 2030 Agenda. Moreover, in the area of debt and finance, the subprogramme's analysis emphasized the escalating debt problem in developing countries, warned that some countries' debts might become unsustainable and called for securing access to financial services for vulnerable people during the pandemic, debt relief, increased global liquidity and a global health plan for developing countries, providing intellectual leadership to the high-level events of the Initiative on Financing for Development in the Era of COVID-19 and Beyond organized by the United Nations system under the leadership of Canada and Jamaica throughout 2020. The 2020 edition of the "In focus" section of the UNCTAD *SDG Pulse* annual online update looked at COVID-19 from a statistical perspective, examining the measurement challenges associated with the pandemic itself, the different policy actions adopted by Governments and the impact on employment by gender. The new and modified deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

## Planned results for 2022

10.34 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: a methodology to measure illicit financial flows – improving the prospects for sustainable development<sup>1</sup>**

#### **Programme performance in 2020**

10.35 The subprogramme published a conceptual framework for the statistical measurement of illicit financial flows in partnership with the United Nations Office on Drugs and Crime (UNODC) in October 2020. The framework was presented in numerous online forums, including the Pan-African Conference on Illicit Financial

<sup>1</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 12)).

Flows and Taxation in November, the tenth session of the Conference of the Parties to the United Nations Convention against Transnational Organized Crime in October and an Asia-Pacific Stats Café on illicit financial flows hosted by the Economic and Social Commission for Asia and the Pacific in October. The subprogramme also continued its work in the task force on the statistical measurement of illicit financial flows, which includes the International Monetary Fund (IMF), the Organisation for Economic Co-operation and Development (OECD) and UNODC, as well as several member States. Furthermore, the subprogramme has tentatively selected six methodologies to be tested in 2021 in selected countries in Africa, in close partnership with the Economic Commission for Africa. These methodologies were presented to the task force in December 2020.

10.36 The above-mentioned work contributed to building the capacities of countries for a more accurate estimate of illicit financial flows, which did not meet the target of inclusion of the new methodology in the balance of payments statistics of nine participating countries in Africa reflected in the proposed programme budget for 2020. Due to ongoing pandemic-related travel restrictions, it was not possible to travel to selected countries and interact with the national authorities on the ground. Given the sensitivity of the topic and the wide array of national authorities required to be involved in this activity, such as national statistical offices, customs authorities, tax authorities and trade ministries, it was agreed that it would not be possible to replace personal meetings with virtual ones.

#### **Proposed programme plan for 2022**

10.37 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective and in response to recent developments, the subprogramme's work will evolve and, after the testing of the six methodologies in the task force in 2021, those methodologies will be finalized and published in 2022. The subprogramme will then test them in nine countries in Africa. COVID-19 mitigation plans are being considered to determine whether capacity development can be delivered online. The expected progress is presented in the updated performance measure below (see table 10.3).

**Table 10.3**  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Absence of methodology and reliable statistics on illicit financial flows in balance of payments statistics	Availability of a methodology for measuring illicit financial flows in balance of payments statistics	Increased capacities of countries for a more accurate estimate of illicit financial flows	Nine participating countries start using the new methodology in balance of payments statistics	Member States have access to six finalized methodologies with regard to measuring illicit financial flows

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: improving industrial policy and fostering regional value chains in Southern Africa<sup>2</sup>**

### **Programme performance in 2020**

10.38 The subprogramme has undertaken several activities that have contributed to making progress towards strengthening the regional integration and coordination of industrial policy in the Southern African Development Community (SADC) region. The subprogramme, inter alia, organized a series of workshops with the specific objective of strengthening industrial policy capacity and facilitating policy dialogue. Specific attention was given to the key sectors previously identified by the subprogramme, together with Southern African Governments: agroprocessing, mining machinery and energy provision. Preliminary impact evaluation suggests that the joint efforts that led to the identification of the policies and the preparation of the workshops supported the strengthening of regional integration and coordination. This is borne out by the adoption of an official outcome document by the countries participating in the initiative in support of the policy options identified. Concrete regional initiatives and policies adopted included a regional trading platform for agricultural commodities exchanges to improve access to markets and management of agricultural risk, and harmonization of technical standards to guarantee the interoperability of electrical equipment and devices. The subprogramme has been carrying out a series of follow-up activities aimed at improving the industrial policy strategic framework in Mauritius, upon request by that country, where the new Industrial Policy Strategic Plan was launched in 2020, and facilitating the development of specific value chains, in particular in agroprocessing and energy sectors, in Mozambique and the United Republic of Tanzania. This will be complemented by an analysis of the key structural challenges posed by the COVID-19 pandemic to the economies of the region and analysis of the most effective policy responses.

10.39 The above-mentioned work contributed to the identification of at least three sectors (agroprocessing, mining machinery and energy provision) in which regional value chains can be established and relevant stakeholders identified, brought together and presented to several SADC countries and to private sector companies, which met the planned target of identifying sectors in which regional value chains could be established and bringing together relevant stakeholders reflected in the proposed programme budget for 2021.

### **Proposed programme plan for 2022**

10.40 The subprogramme will continue the work related to the planned result, in line with its mandate. Due to the fact that the above-mentioned specific activities under this planned result were implemented in the framework of a project that ended in December 2020, the subprogramme will not be able to continue with a similar performance measure for 2022. To contribute to further progress towards the objective, the subprogramme's work will evolve to include research and capacity-building activities to support countries in improving industrial policies and their implementation, including in regions outside of the SADC region, subject to resource availability. The expected progress is presented in the performance measure below (see table 10.4).

<sup>2</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

Table 10.4  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Request made to UNCTAD to support the SADC industrialization strategy and develop proposals to operationalize a common regional industrial policy that includes regional value chains	Initial proposals developed for a regional industrial policy of several SADC countries	At least three sectors identified (agroprocessing, mining machinery and energy provision) in which regional value chains can be established and relevant stakeholders identified, brought together and presented to several SADC countries and to private sector companies	Increased engagement of the private sector in economic policy discussions and expanded cross-border activities of firms in the region	Increased capacities of developing countries to formulate and implement industrialization strategies

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: advancement of analysis and policy proposals for monitoring the debt situation of developing countries

#### Proposed programme plan for 2022

10.41 With depressed economic activity through most of 2020 and a likely slow recovery in 2021, servicing existing external debt obligations will present a challenge for many developing countries. The subprogramme has analysed these issues in several publications, including the *Trade and Development Report 2020* and the UNCTAD report *Impact of the COVID-19 Pandemic on Trade and Development: Transitioning to a New Normal*, as well as the report prepared by the secretariat of UNCTAD on external debt sustainability and development ([A/75/281](#)). The subprogramme also published a special follow-up to the *Trade and Development Report 2019* entitled “From the great lockdown to the great meltdown: developing country debt in the time of COVID-19”, outlining how the pandemic combined a deep supply shock arising from wide-ranging and prolonged lockdowns of entire economies which required both developed and developing country Governments to borrow to finance economic and social programmes to assist their populations during lockdowns and, for developing countries, a more severe shock to their sovereign external debt positions as a result of their already fragile positions over the past few years. As a result, the special follow-up to the *Trade and Development Report 2019* called for coordinated debtor country action to proactively shape future international agendas and stated that agreements on developing country debt relief and restructuring were urgently needed. Furthermore, the subprogramme’s work supported the advancement of policy proposals by developing country representatives, including by the Prime Minister of Pakistan, who proposed a global initiative on debt relief and stated, in communications with the UNCTAD secretariat, that the initiative had been inspired, inter alia, by the subprogramme’s analysis on debt presented in the *Trade and Development Report 2020* and the special follow-up to the *Trade and Development Report 2019*.

*Lessons learned and planned change*

10.42 The lesson for the subprogramme was that in extraordinary situations such as the pandemic, there was increased demand from the international community for the timely receipt of updates on the economic implications of different policy options and for diverse analysis of macroeconomic and financial challenges facing developing countries in particular. In applying the lesson, the subprogramme will issue follow-ups to its research, similar to the April 2020 update to the *Trade and Development Report*, in situations in which the global macroenvironment has experienced a major shock that warrants such activities. In 2020, the feedback received from member States and from civil society on the relevance of these types of activity was extremely positive and the subprogramme has demonstrated its capacity to swiftly update its research to reflect new and emerging economic realities.

*Expected progress towards the attainment of the objective, and performance measure*

10.43 This work is expected to contribute to the objective, as demonstrated by diminished risk and severity of debt issues in developing countries through the proposal of multilateral measures for debt alleviation and a fairer debt rescheduling framework, with at least 30 developing countries continuing to build their debt management capacity (see table 10.5).

Table 10.5  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
—	Developing countries are provided with analysis of the current challenges to their debt sustainability and a platform for discussion on improving the global debt restructuring mechanism	Debt issues and policy measures are advanced through proposals and initiatives by representatives of developing countries, including through a global initiative on debt relief for developing countries proposed by the Prime Minister of Pakistan based on the subprogramme's work as presented in the <i>Trade and Development Report 2020</i>	Debt issues are further advanced in international forums through the organization of an international debt conference with the participation of representatives from at least 40 countries and international institutions to discuss further measures for debt relief	The risk and severity of debt issues in developing countries are diminished through the proposal of multilateral measures for debt alleviation and a fairer debt rescheduling framework, with at least 30 developing countries continuing to build their debt management capacity

**Legislative mandates**

10.44 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolutions*

66/188	Addressing excessive price volatility in food and related financial and commodity markets	75/126 75/205	Assistance to the Palestinian people External debt sustainability and development
72/227	Role of the United Nations in promoting development in the context of globalization and interdependence	75/206	Promotion of international cooperation to combat illicit financial flows and strengthen good practices on assets return to foster sustainable development
74/205	Financial inclusion for sustainable development	75/225	Towards a new international economic order
75/20	Committee on the Exercise of the Inalienable Rights of the Palestinian People		

**Deliverables**

10.45 Table 10.6 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 10.6

**Subprogramme 1: deliverables for the period 2020–2022, by category and subcategory**

30. Paper on illicit financial flows prepared and submitted to the Second Committee upon the request of member States	–	1	–	–
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> advisory services to policymakers, including on domestic resource mobilization, structural transformation, growth policy (Group of 20), debt renegotiation at the Paris Club, financial instability, debt sustainability and statistical capacity in the area of trade and development.				
<b>Databases and substantive digital materials:</b> UNCTAD financial database; world economic macro-level modellers database; UNCTAD statistical data centre, with approximately 250,000 users, 500,000 sessions, and 8 million page views annually; and financial stress and debt sustainability indicators.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> lectures and presentations on external debt, development finance and macroeconomic and development policy issues; and electronic newsletters and brochures on the Debt Management and Financial Analysis System and the Virtual Institute.				
<b>External and media relations:</b> press releases, press conferences and interviews, including on developing country debt and external financing, South-South cooperation and regional integration and assistance to the Palestinian people.				
<b>Digital platforms and multimedia content:</b> Debt Management and Financial Analysis System; Virtual Institute; and UNCTADstat.				

## Subprogramme 2 Investment and enterprise

### Objective

10.46 The objective, to which this subprogramme contributes, is to advance inclusive growth and sustainable development through investment and enterprise development for productive capacity-building, economic diversification and job creation.

### Strategy

10.47 To contribute to the objective, the subprogramme will continue to assist member States through research, policy analysis and technical assistance to design and implement active policies at both the national and international levels, ensuring enhanced investment and entrepreneurship for sustainable development. This will help member States to make progress towards achieving the Sustainable Development Goals, particularly Goals 1, 8, 10 and 17, as well as all other Goals, through the scaling up of the mobilization of public and private finance towards Goal-related sectors. The subprogramme will also monitor, assess and analyse regional and global trends and prospects in international investment and prepare the annual *World Investment Report* and other analytical publications on international investment for development. The subprogramme will also conduct reviews of national investment policies and will backstop policy dialogue on the international investment agreement regime and support and design new international investment agreements that are better aligned with nationally and internationally agreed development objectives. The subprogramme will also advise Governments on investment promotion, business facilitation and innovative financing for the Sustainable Development Goals, including through stock exchanges and institutional funds. Furthermore, the subprogramme will also help member States enhance the international competitiveness of their enterprises through enterprise policies aimed at stimulating enterprise development, as well as by promoting best practices in corporate social responsibility and accounting and reporting. In addition, the subprogramme will also foster dialogue and an exchange of best practices related to investment and enterprise development issues through consensus-building mechanisms and the World Investment Forum.

10.48 The subprogramme plans to support member States on issues related to COVID-19 by providing an assessment of the impact of the pandemic on investment, global value chains and enterprise development, as well as policy advice, frameworks and tools during the recovery phase and beyond.

10.49 The above-mentioned work is expected to result in:

- (a) Increased capacity of developing countries in their efforts to close the gaps related to Sustainable Development Goals investment;
- (b) Improved ability of countries to address key and emerging issues related to investment and investment policies that promote development, including issues related to international investment agreements and their development dimension;
- (c) Additional resources leveraged and channelled towards global investment development objectives;
- (d) Enhanced understanding of enterprise development issues and ability to boost productive capacity, inclusive growth and sustainable development through enterprise development policies;

(e) Increased awareness of member States of policies, innovations and tools aimed at gaining traction and driving investment for sustainable development, resulting from increased dialogue and an exchange of best practices.

10.50 The planned support on issues related to COVID-19 is expected to result in mitigating the effect of the pandemic on the ability of member States to attract and benefit from investment for development and in fostering the recovery of their private sector.

## Programme performance in 2020

10.51 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Monitoring and mitigating the effects of the pandemic on investment and enterprise development

10.52 The COVID-19 pandemic is likely to have a dramatic effect on the global economy and will have a significant impact on development finance, including global foreign direct investment flows, which are forecast to decrease by up to 45 per cent in developing countries. The subprogramme has been monitoring the impact of the pandemic on investment and private sector development, as well as the implications for development. The subprogramme focused on research and policy analysis to help mitigate the impact of the pandemic, producing analyses of data, trends and investment issues to facilitate decision-making and policymaking. The subprogramme also strengthened its capacity-building programmes, allowing for the continuity of businesses, for instance, through the provision of electronic government platforms and fostering the resilience of public and private sector stakeholders. Furthermore, the subprogramme promoted the exchange of best practices among member States to improve understanding of the impact of the COVID-19 pandemic on investment and enterprise development and of related recovery policies.

#### *Progress towards the attainment of the objective, and performance measure*

10.53 The above-mentioned work contributed to the objective, as demonstrated by the increased number of member States availing themselves of the online tools revised and provided by the UNCTAD programme on investment and enterprise development. These online tools also enabled member States to mitigate the effect of the COVID-19 pandemic in 2020 (see figure 10.I).

Figure 10.I

**Performance measure: total number of member States using online tools developed by the United Nations Conference on Trade and Development (cumulative)**

### **Impact of COVID-19 on subprogramme delivery**

10.54 Owing to the impact of the COVID-19 pandemic in 2020, the subprogramme postponed a number of meetings to 2021, such as those related to the fifteenth session of UNCTAD, including preparatory meetings, the twelfth session of the Investment, Enterprise and Development Commission and several meetings related to the World Investment Forum. The subprogramme also changed its approach to delivering workshops, resulting in an increase in the number of webinars, including on investment promotion and facilitation aimed at supporting investment promotion agencies in dealing with the economic recession, and on entrepreneurship to support small and medium-sized enterprises and entrepreneurship in the aftermath of the COVID-19 pandemic.

10.55 At the same time, however, the subprogramme identified both new and modified activities to support member States on issues related to COVID-19, within the overall scope of its objective and mandates, namely, by focusing its research and policy analysis on the impact of the pandemic on investment and enterprise development, providing targeted assistance for recovery plans and fostering the exchange of best practices among countries. For instance, the *World Investment Report 2020* examined the evolution of international production and global value chains, analysed the latest developments in new policy measures for investment promotion, facilitation and regulation around the world and provided an update on investment treaties and their reform. The *Global Investment Trends* series provided regular analysis of the impact of the pandemic on global foreign directed investment and global value chains and information on investment policy responses to the pandemic. The subprogramme also provided in-depth analysis of investment in the Sustainable Development Goals, reviewed global progress and proposed possible courses of action. This resulted in reformulated deliverables regarding the facilitation of the intergovernmental process and expert bodies, as the subprogramme coordinated the response of the United Nations system in the area of external financing and job growth and provided substantive backstopping for the summit and ministerial meetings on financing for development in the era of COVID-19 and beyond. The modified and new deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

### **Planned results for 2022**

10.56 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: a favourable and enabling environment for investing in the Sustainable Development Goals<sup>3</sup>**

#### **Programme performance in 2020**

10.57 The subprogramme has continued to assist member States in catalysing investment in support of sustainable development and in sectors related to the Sustainable Development Goals. In particular, the subprogramme continued to review global investment trends in key Goal-related sectors, including foreign direct investment and project finance, updating the data presented in the first *Sustainable Development Goals Investment Trends Monitor*, issued in 2019. Although progress on investment in the Goals is now evident across 6 out of 10 Goal-related sectors, overall

<sup>3</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 12)).

growth is falling well short of requirements. In responding to the need for a more systematic approach to mainstream the Goals into national investment policy frameworks and the international investment agreements regime, the subprogramme presented a set of six policy packages aimed at spurring further private sector investment in the Goals. The subprogramme also provided capacity-building assistance to member States aimed at mainstreaming the Goals into their investment policies and continued to provide concrete recommendations for the promotion and advancement of investment in sustainable development, including through the development of pipelines of bankable projects aimed at attracting investment in Goal-related sectors and bankable Goal-related projects. The subprogramme also partnered with other institutions to facilitate the scaling up of pharmaceutical manufacturing capacities in developing countries to diversify their production and contribute to their global manufacturing capacity, and continued to promote investment in the Goals through global platforms, such as satellite events of the World Investment Forum.

10.58 The above-mentioned work contributed to 82 per cent of beneficiaries of UNCTAD assistance reporting on the successful implementation of recommendations, strategies and policies aimed at attracting investment in Goal-related sectors, which exceeded the planned target of 80 per cent reflected in the proposed programme budget for 2020.

#### **Proposed programme plan for 2022**

10.59 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to support member States in mainstreaming the Goals into their investment and private sector development strategies. The expected progress is presented in the performance measure below (see table 10.7).

**Table 10.7**  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Countries reporting gaps in awareness, understanding and implementation capacity among policymakers and investment practitioners on investment policies and instruments to attract investment in Sustainable Development Goals-relevant sectors	Frameworks and tools on attracting investment in Sustainable Development Goal-relevant sectors start being used by beneficiaries	Eighty-two per cent of beneficiaries from UNCTAD assistance report on the successful implementation of recommendations, strategies and policies aimed at attracting investment in sectors relevant to the Sustainable Development Goals	Eighty per cent of beneficiaries of UNCTAD assistance reporting on the successful implementation of recommendations, strategies and policies aimed at attracting investment in Sustainable Development Goals-relevant sectors (the number of beneficiary countries over the year to increase)	Eighty-five per cent of beneficiaries of UNCTAD assistance reporting on the successful implementation of recommendations, strategies and policies aimed at attracting investment in Sustainable Development Goals-relevant sectors (the number of beneficiary countries to increase over the year)

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: an investment chain to bridge the Sustainable Development Goal financing gap<sup>4</sup>**

### **Programme performance in 2020**

10.60 The subprogramme has broadened its global investment chain approach, which engages the entire spectrum of investment-development stakeholders. This includes policymakers and investment treaty negotiators, investment promotion agencies, central banks, stock exchanges and sovereign wealth fund managers, as well as multinational enterprises, small and medium-sized enterprises, family businesses and special economic zones and the upstream and downstream of the investment chain, with the objective of bridging the financing gap for the Sustainable Development Goals. The subprogramme engaged in several initiatives aimed at enabling a reorientation of financial markets to fully integrate sustainability, creating new Goal-related investment compacts and changing the business mindset. These included engaging in a new institutional investment workstream, carrying out research and policy analysis on how sustainable finance and long-term institutional investment can be leveraged to contribute to a more sustainable and inclusive economy and launching a new framework that can be used by institutional investors and asset managers to act on sustainability in line with their operational models and strategic priorities. Furthermore, the subprogramme launched a family business for sustainable development initiative to further mobilize firms to embed sustainability in their business strategies and serve as a model for galvanizing business uptake of support for the Goals. The initiative's family business sustainability pledge was signed by 280 family businesses to promote a more purpose-driven business model and developed a full set of sustainability indicators for family businesses.

10.61 The above-mentioned work contributed to 668 individual investment stakeholders adhering to UNCTAD principles and recommendations, which exceeded the planned target of 651 reflected in the proposed programme budget for 2021.

### **Proposed programme plan for 2022**

10.62 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to broaden and engage the entire spectrum of investment-development stakeholders and mobilize them for investing in the Goals. The expected progress is presented in the performance measure below (see figure 10.II).

<sup>4</sup> As reflected in the programme budget for 2021 ([A/75/6/Add.1](#)).

Figure 10.II

**Performance measure: total number of individual investment stakeholders adhering to United Nations Conference on Trade and Development principles and recommendations**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: investment and enterprise development for recovery and resilience**

#### **Proposed programme plan for 2022**

10.63 Despite some progress in specific Sustainable Development Goal-related sectors, global investment remains far from the target of bridging the Goal-related investment gap. Furthermore, the COVID-19 pandemic could have a substantial impact on Goal-related investment given the restrictions on cross-border capital flows in developing countries. Preliminary research by the subprogramme suggests that there could be a risk that progress made in Goal-related investment in the past few years might be undone.

#### *Lessons learned and planned change*

10.64 The lesson for the subprogramme was that the perfect storm of economic, social and political shocks generated by the pandemic proved to have significant implications in a longer-term context of transformation for international production and triggered increased demand by member States for customized advisory services. This made the subprogramme realize the importance of its advisory services in the context of COVID-19 pandemic and required the subprogramme to work with its partners and member States to assess the financial needs deriving from the pandemic and to contribute to the effort to mobilize new resources necessary for recovery, while promoting investment and enterprise frameworks conducive to inclusive and sustainable reconstruction. In applying the lesson, the subprogramme will aim to foster new forms of partnerships and sustainability-themed financial instruments to mobilize new resources in support of pandemic recovery and sustainable development.

#### *Expected progress towards the attainment of the objective, and performance measure*

10.65 This work is expected to contribute to the objective, as demonstrated by the increased number of public and private sector stakeholders, including sustainability-themed funds, reporting the integration of UNCTAD tools related to investment for sustainable development, such as the Investment Policy Framework for Sustainable Development and the guidance on core indicators, into their activities (see figure 10.III).

Figure 10.III

**Performance measure: total number of stakeholders integrating United Nations Conference on Trade and Development tools related to investment for sustainable development developed by the subprogramme into their activities (cumulative)**

## Legislative mandates

10.66 The list below provides all mandates entrusted to the subprogramme.

### General Assembly resolutions

<a href="#">75/207</a>	Promoting investments for sustainable development	<a href="#">75/211</a>	Entrepreneurship for sustainable development
------------------------	---	------------------------	--

## Deliverables

10.67 Table 10.8 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 10.8

### Subprogramme 2: deliverables for the period 2020–2022, by category and subcategory

### C. Substantive deliverables

**Consultation, advice and advocacy:** advisory services to developing countries, including on formulating policies to attract foreign direct investment for development; statistics and analysis on international investment, including responsible investment; advisory services to all member States, upon request, including on national policies and international investment agreements and sustainable development, as well as investment promotion and facilitation, intellectual property rights, entrepreneurship and enterprise development and business facilitation, including with a focus on the most vulnerable groups, accounting and reporting standards; and advocacy and advisory services to some 200 investment promotion agencies, special economic zones and other stakeholders in the global investment chain and EMPRETEC centres with a specific focus on the impact of the pandemic on investment and enterprise development, especially in the light of the Sustainable Development Goals and Agenda 2030 and ways to facilitate resilience and recovery.

**Databases and substantive digital materials:** databases on foreign direct investment, national policies and international investment agreements.

### D. Communication deliverables

**External and media relations:** International Standards of Accounting and Reporting updates; EMPRETEC newsletters and newsletters on responsible investment; World Investment Forum report reaching more than 6,000 participants; booklets; and newflashes.

**Digital platforms and multimedia content:** Global Enterprise Registration portal; and Investment Policy Hub, with in excess of 150,000 users annually.

### **Subprogramme 3**

#### **International trade and commodities**

#### **Objective**

10.68 The objective, to which this subprogramme contributes, is to ensure that international trade and commodities are an engine for prosperity, inclusiveness and sustainable development through the participation of all member States.

#### **Strategy**

10.69 To contribute to the objective, the subprogramme will continue to promote the implementation of relevant measures and policies by developing countries to support better integration of and realization of the benefits from the international trading system through the mechanisms of the three main pillars of the work of UNCTAD (research and analysis; consensus-building; and technical cooperation), including through the provision of contributions on international trade as an engine for development to the report of the Inter-Agency Task Force on Financing for Development, *The Sustainable Development Goals Report*, *World Tariff Profiles* and the *World Economic Situation and Prospects*. The subprogramme will continue to support trade and the trade-related decision-making of developing countries to better deal with the impacts of subsidies, tariffs and non-tariff measures, helping them to make progress towards achieving Goal 17. Further, the subprogramme will continue to enhance the implementation of measures by member States to integrate beneficially into the international trading system at the regional and international levels, including by providing tailored interventions to countries in their engagement in different phases of negotiations, providing analysis to facilitate the evaluation of alternative scenarios and assisting national officials at all stages of the WTO accession process. In addition, the subprogramme plans to provide capacity-building support for commodity-dependent developing countries to address trade and development problems associated with the commodity economy, including commodity dependence. Furthermore, the subprogramme will promote the design and implementation of trade, environment and sustainable development objectives and creative economic strategies and enhance the adoption, improvement and enforcement of national and regional competition and consumer protection legislation, through the provision of best practices, guidelines and peer reviews, which will help member States make progress towards Sustainable Development Goals 8, 10, 12, 14, 15 and 17. Furthermore, the subprogramme will continue to act as the focal point for gender mainstreaming in trade policies, strengthening the capacity of member States to design and implement trade policies that allow women to benefit more from the opportunities arising from international trade through specific country and region-based activities and helping them make progress towards Goals 1, 5, 8 and 17.

10.70 The subprogramme plans to support member States on issues related to COVID-19 by continuing to monitor and analyse the effects of the global pandemic on manufacturing and international trade, including by providing specific policy recommendations for a better recovery in specific sectors, such as the global tourism industry and the oceans economy. The subprogramme also plans to support countries in identifying the set of measures and actions most appropriate to addressing key economic sectors affected by COVID-19, including through market studies and competition impact assessments of incentives and exemptions. The subprogramme will continue to address the gender perspective of the recovery of trade from the pandemic, given that the negative outcomes of economic crises disproportionately

affect women and girls, increasingly so when the crises are also related to public health.

10.71 The above-mentioned work is expected to result in:

- (a) Streamlining of non-tariff measures and, where appropriate, the elimination or reduction of non-tariff measures in international trade, including unilateral measures, where they may act as unnecessary trade barriers, and strengthened trade and trade-related decision-making by developing countries;
- (b) More countries achieving positive development outcomes in relation to increased trade integration and activity;
- (c) Improved capacity to seize opportunities emerging from commodity trade and enhanced international and regional cooperation;
- (d) More countries adopting, revising or implementing competition and consumer protection legislation and institutional frameworks;
- (e) Member States harnessing opportunities related to trade in environmentally preferable products, including the biotrade and creative industries, and increasing capacities to assess the economic potential of ocean-based sectors and devise integrated sustainable use and trade action plans;
- (f) Improvements in the capacity of member States to identify and address gender-specific trade barriers and gender-specific obstacles on the supply side.

10.72 The planned support on issues related to COVID-19 is expected to result in mitigating the effect of the pandemic on the ability of member States to benefit from international trade and in fostering the recovery of the trade sectors.

## **Programme performance in 2020**

10.73 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Enhanced services sectors of developing countries**

10.74 For many years, UNCTAD has been emphasizing the importance for developing countries of strengthening and diversifying their service sectors. While services, in particular infrastructure services, improve value addition in other economic sectors, promote employment and facilitate trade in manufacturing and agriculture, many Governments in developing countries, including least developed countries and economies in transition, face challenges in identifying and addressing the services-related needs of the domestic economy. The work of the subprogramme on services policy reviews provides policymakers from developing countries with a comprehensive list of policy options to enhance their services sectors, covering multiple sectors and quantified to provide policymakers with a sound basis on which to formulate or reformulate strategies and policies related to the development of their services sectors in general or of specific subsectors. Since services sectors on which developing economies and the least developed economies are dependent, such as tourism, hospitality and care services, have been significantly affected by the pandemic, services policy reviews play an important role in the recovery process, particularly in developing countries that aim to diversify their services sectors away from traditional personal services and towards services necessary for increasing productivity and competitiveness in manufacturing sectors. In 2020, several services policy reviews concerning countries in Africa, such as Lesotho, Morocco, Rwanda

and Uganda, as well as the Economic Community of West African States (ECOWAS) region, provided useful means of engaging with member States on their intended services commitments that were scheduled to be presented to the African Union by the end of 2020. In 2020, the subprogramme undertook a services policy review for the ECOWAS region. This comprehensive review addressed 13 sectors, including banking and other financial services, insurance and insurance-related services, telecommunications services, road transport services, air transport services, tourism services and energy services, and made 79 services sector-specific recommendations covering them. The review for ECOWAS, the first exercise of its kind conducted for a regional economic organization, had been endorsed by the ECOWAS ministerial conference held in December 2019, along with an ECOWAS services market blueprint for action to be achieved by 2030.

*Progress towards the attainment of the objective, and performance measure*

10.75 The above-mentioned work contributed to the objective, as demonstrated by the strengthened capacity of 23 developing countries, including 15 in the ECOWAS region, to implement specific services policy measures and actions on the ground to adapt their national services trade in a rapidly evolving trading environment and post-pandemic recovery period, as a result of services policy reviews (see table 10.9).

Table 10.9

**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
Member States have an increased understanding of the importance of service economies through analysis and capacity-building activities provided by the subprogramme	Services policy reviews available for member States in the ECOWAS region to implement specific services policy measures and actions on the ground, to adapt their national services trade	23 developing countries equipped to initiate updates of existing services policies, including 15 member countries of ECOWAS that were equipped with policy options and recommendations in seven services sectors (energy, accounting, legal, architectural, cultural, education and construction and related engineering) presented in the services policy reviews provided by the subprogramme

**Impact of COVID-19 on subprogramme delivery**

10.76 Owing to the impact of the COVID-19 pandemic in 2020, the subprogramme postponed or cancelled a number of deliverables, including meetings and technical assistance events, along with publications related to those events. Due to the postponement of the fifteenth session of UNCTAD to 2021, most related meetings of the subprogramme were accordingly postponed. Further, the Multi-Year Expert Meeting on Commodities and Development scheduled to be held in October 2020 was postponed to 2021, along with the relevant publication outputs, due to concerns about connectivity problems in developing countries that would prevent them from effectively participating in a virtual meeting. Where possible, the subprogramme changed the approach and format of capacity-building activities and events to an online format, including thematic expert meetings and webinars on competition policy and consumer protection, as well as events on biotrade and the oceans economy, the latter of which was replaced by a webinar organized with partners on World Oceans Day.

10.77 At the same time, however, the subprogramme identified both new and modified activities to support member States on issues related to COVID-19, within the overall scope of its objectives. The subprogramme produced several analysis pieces to highlight the impacts of the pandemic on specific sectors or economies, such as the services sector, women and vulnerable groups, the oceans economy, competition and consumer policies, restrictive trade practices in personal protective equipment markets and the tourism industry, highlighting the vulnerabilities of many developing countries to such shocks and outlining appropriate policy recommendations. “Global trade update 2020”, issued quarterly to present trends and short-term forecasts for world trade, provided preliminary forecasts of global trade, depending on how the pandemic might evolve, and gave special attention to pandemic-related medical supplies (personal protective equipment, disinfectants, diagnostic kits, oxygen respirators and other related hospital equipment). The subprogramme also analysed the salience of commodities in the merchandise trade of Commonwealth members and estimated the impact of pandemic-induced trade disruptions on commodities exports to five main markets: Australia, China, the United Kingdom of Great Britain and Northern Ireland, the United States of America and the European Union.

## **Planned results for 2022**

10.78 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: unleashing the potential of women informal cross-border traders<sup>5</sup>**

#### **Programme performance in 2020**

10.79 In response to a request from three member countries (Malawi, United Republic of Tanzania and Zambia) involved in activities related to women cross-border traders during the 2016–2019 period, the subprogramme launched, in October 2020, a new set of activities devoted to training women involved in informal and/or small-scale cross-border trade on entrepreneurship development and on trade rules and customs procedures. This work is part of the global initiative towards post-pandemic recovery for the micro-, small and medium-sized enterprises sector. Activities are being replicated at the same borders covered by the previous intervention, since the overall initiative is aimed at providing an immediate response in the context of the COVID-19 situation. Furthermore, the pilot training programme delivered at six border areas in Malawi, the United Republic of Tanzania and Zambia is expected to be replicated at other border posts and possibly in a different region, building on its positive results.

10.80 The above-mentioned work contributed to the shift of women traders from informal to formal trade channels to conduct cross-border trade activities and encouraged the formalization of businesses, as a precondition for diversifying and expanding businesses and moving from subsistence to sustainability. Of the 147 women traders who participated in the training activities, the majority confirmed that the knowledge acquired during the training about border rules and procedures and rights and obligations made them more confident to cross borders (99 per cent), which contributed to their intention and ability to formalize their businesses (98 per cent). This met the planned target of having more than half of the women trained able to

<sup>5</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 12)).

take steps to switch to formal trade channels and have a good understanding of how to scale up and/or diversify their businesses reflected in the proposed programme budget for 2020.

### Proposed programme plan for 2022

10.81 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will expand its training activities on entrepreneurship development and on traders' rights and obligations devoted to women informal and/or small-scale cross-border traders to other borders in sub-Saharan Africa and possibly other developing regions. The expected progress is presented in the performance measure below (see table 10.10).

Table 10.10  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Lack of awareness by women informal traders about border procedures, documentation requirements and rights and obligations, and lack of basic entrepreneurial skills	Increased awareness by women traders about border procedures, documentation requirements and rights and obligations, and increased knowledge of basic entrepreneurial skills. Benefits also to customs officers attending training on trade rules and procedures	144 out of 147 women trained have gained the ability to formalize their businesses and understanding of how to scale up and/or diversify their businesses	At least two more countries in sub-Saharan Africa express interest in replicating the approach and implementing the training programme for women in informal cross-border trade	At least two more countries in sub-Saharan Africa or in other developing regions take steps to replicate the approach and implement the training programme for women in informal cross-border trade

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 2: oceans economy – supporting small island developing States and coastal developing countries in realizing economic benefits from the sustainable use of marine resources<sup>6</sup>

#### Programme performance in 2020

10.82 In the process of supporting small island developing States and coastal developing countries, UNCTAD and the Division for Ocean Affairs and the Law of the Sea organized a total of 12 stakeholder and validation dialogue field missions for 261 participants, of which 42 per cent were women, over the past three years. In 2020, UNCTAD also organized four online multilateral conferences dedicated to assessing challenges to and opportunities for the oceans economy brought about by the COVID-19 pandemic, the potential of oceans-related biotrade, impacts on human settlements and coastal tourism, and trade in plastics, sustainability and development. This was complemented by a stakeholder workshop on tuna value chains, organized

<sup>6</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

in Barbados in early 2020, and online training on experiences with the use of traceability systems and collective trademarks, organized for Costa Rica.

10.83 The above-mentioned work contributed to increased capacity in member States to formulate national oceans economy and trade strategies, including the production of the oceans economy and trade strategy of Belize and Costa Rica, with a focus on developing an action plan to enable sustainable trade in the tuna, spiny lobster, queen conch and coastal fish value chains, which exceeded the planned target of increased capacity in member States to formulate national oceans economy and trade strategies reflected in the proposed programme budget for 2021.

#### **Proposed programme plan for 2022**

10.84 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will organize the fourth Oceans Forum on Trade-related Aspects of Sustainable Development Goal 14 to identify actions and realign efforts for progress and compliance with the trade-related targets of Goal 14 in the light of the post-pandemic scenario, and will continue to assist member States in developing their oceans economy and trade strategies. The subprogramme also plans to develop at least two oceans-related biotrade value chain assessments for selected species and a regional action plan by 2022. The expected progress is presented in the performance measure below (see table 10.11).

Table 10.11  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Member States have an increased understanding of the importance of national oceans economy and trade strategies, including as a result of the second Oceans Forum on Trade-related Aspects of Sustainable Development Goal 14	Member States have increased interest and are better supported in formulating national oceans economy and trade strategies, including as a result of the United Nations Trade Forum	Member States have increased their capacities to formulate national oceans economy and trade strategies as a result of the subprogramme's activities, including two member States (Belize and Costa Rica) which formulated such a strategy	At least two member States adopt national oceans economy and trade strategies	Member States identify actions and realign efforts for progress and compliance with trade-related targets of Sustainable Development Goal 14 as a result of the Fourth Oceans Forum and at least two blue biotrade value chain assessments for selected species and a regional action plan are developed by the subprogramme

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: tearing down trade barriers – transparent and streamlined regulations for sustainable development**

#### **Proposed programme plan for 2022**

10.85 Non-tariff measures, including technical regulations and traditional trade policy instruments, constitute a high cost for traders. Such costs are estimated to be about three to four times higher than those of tariffs and disproportionately affect low-income countries and small and medium-sized enterprises. The use of non-tariff measures was prominent during the COVID-19 pandemic, as a number of temporary measures were put in place by over 140 countries in pursuit of both non-trade and trade-related objectives. Key goals were related to safeguarding public health, as well as to economic concerns. A global challenge for traders is non-transparent and non-coordinated regulations. Transparency in non-tariff measures already reduces transaction costs significantly. During the COVID-19 pandemic, such measures have often been introduced in an uncoordinated fashion and without informing trade partners accordingly. Regulatory streamlining and cooperation reduce the costs further without compromising non-trade public policy objectives. Requirements that have to be met by traders are not easily accessible and regulations are often not coordinated within and between countries. Without work to address these new non-tariff measures, along with those already in place, such measures may prove to be significant barriers to any post-pandemic recovery. In responding to this, the subprogramme has developed an international classification of non-tariff measures jointly with seven international organizations (Food and Agriculture Organization of the United Nations, IMF, International Trade Centre, OECD, United Nations Industrial Development Organization, World Bank and WTO), allowing for systematic collection and dissemination of data on such measures for policymakers and traders, a precondition for trade information portals, efficient streamlining and regulatory cooperation. This was complemented by online and face-to-face training courses aimed at raising awareness about and enhancing capacity to deal with such measures. The more that up-to-date data on such measures are made available and awareness is raised among policymakers, the greater the request for transparency and the usage of data on non-tariff measures in trade portals will be. To assist in this regard, the subprogramme has been developing three relevant portals for different user groups.

#### *Lessons learned and planned change*

10.86 The lesson for the subprogramme was that regular updates of data on non-tariff measures and sustainability of the transparency initiative require the subprogramme to frequently reach out and interact with Governments and government officials. Previously, data on non-tariff measures were collected from publicly available official sources, often with little interaction with the Governments issuing the regulations. The downside of this approach was that countries were not updated regularly when external funding was not available. In applying the lesson, the subprogramme will seek stronger interactions with Governments, including by requesting their formal commitment to nominate focal points.

#### *Expected progress towards the attainment of the objective, and performance measure*

10.87 This work is expected to contribute to the objective, as demonstrated by an increased number of users, primarily government officials, researchers and traders, of data on non-tariff measures in trade portals (see table 10.12).

Table 10.12  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
Growing awareness among member States of the high trade costs of non-tariff measures and the potential of transparency and regulatory coordination and cooperation	Increased awareness among member States of the importance of non-tariff measures for international trade. Development and improvement of non-tariff measures data portals to facilitate access to information on such measures collected by the subprogramme, specifically for developing countries	Increased use of the information published on non-tariff measures on trade portals, with 13,000 total users registered	Increased use of the information published on non-tariff measures on trade portals, with at least 1,500 additional users registered (14,500 in total)	Increased use of the information published on non-tariff measures on trade portals, with at least 2,000 additional users registered (16,500 in total)

## Legislative mandates

10.88 The list below provides all mandates entrusted to the subprogramme.

### General Assembly resolutions

35/63	Restrictive business practices	74/204	Commodities
70/186	Consumer protection	74/216	Implementation of Agenda 21, the Programme for the Further Implementation of Agenda 21 and the outcomes of the World Summit on Sustainable Development and of the United Nations Conference on Sustainable Development
71/312	Our ocean, our future: Call for action		
74/7	Necessity of ending the economic, commercial and financial embargo imposed by the United States of America against Cuba		
74/198	International Year of Creative Economy for Sustainable Development, 2021		

## Deliverables

10.89 Table 10.13 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 10.13

**Subprogramme 3: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>22</b>	<b>15</b>	<b>21</b>	<b>20</b>
1. Reports to the General Assembly on international trade and development and world commodity trends and prospects	1	1	2	1

36. Trade-related aspects of the <i>Sustainable Development Goals Report</i>	1	1	1	1
37. Report of the United Nations Forum on Sustainability Standards	1	1	—	1
38. Training modules on topics in international trade negotiations	3	3	2	2

### C. Substantive deliverables

**Consultation, advice and advocacy:** advisory services on trade-related decision-making provided to five member States and two regional South-South economic integration groupings, integration into the global economy and participation in regional and multilateral trade agreements, integration of trade concerns into national trade and services policies, cooperation and partnerships for inclusive growth and sustainable development, trade and gender, developing competition and consumer protection frameworks, trade and environment issues and creative economy potential for sustainable development.

**Databases and substantive digital materials:** World Integrated Trade Solution and Trade Analysis and Information System, accessed by more than 15,000 users annually.

### D. Communication deliverables

**Outreach programmes, special events and information materials:** United Nations Forum on Sustainability Standards; Global Commodities Forum; multi-stakeholder meeting on commodities and development; Global Services Forum; Non-Tariff Measures Week; BioTrade Congress; event on trade and gender; event on illicit trade reaching an audience of more than 300 people; event on the creative economy; lectures and exhibits on issues related to the work of the subprogramme; newsletters on the Generalized System of Preferences and on UNCTAD work on competition and consumer protection; brochures and flyers on trade and gender and on commodity policy research and implementation and projects; and booklets and fact sheets related to the work of the subprogramme.

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
--------------------------	-----------------	----------------	-----------------	-----------------

**External and media relations:** press releases and op-ed pieces.

**Digital platforms and multimedia content:** proceedings of meetings conducted by the subprogramme; online training course on non-tariff measures completed by approximately 300 people annually; interactive tools related to national competition and consumer protection laws, commercial diplomacy and dispute settlement; UNCTAD, WTO and International Trade Centre website on trade-related Sustainable Development Goals and indicators; electronic version of the model law on competition; and teaching package on trade and gender.

<sup>a</sup> The deliverable “UNCTAD, Department of Economic and Social Affairs of the Secretariat and regional commissions reports *World Economic Situation and Prospects*” was removed, as it represented a contribution by UNCTAD to the output of another programme, as opposed to an UNCTAD output.

## Subprogramme 4 Technology and logistics

### Objective

10.90 The objective, to which this subprogramme contributes, is to harness innovation and technology, including e-commerce and the digital economy, improve trade logistics and increase human capacities for inclusive and sustainable trade and development in developing countries and economies in transition.

### Strategy

10.91 To contribute to the objective, the subprogramme will foster international policy dialogue and consensus-building, carry out research and analysis and provide technical assistance and capacity-building in the areas of technology and logistics for development. In doing so, the subprogramme will maximize synergies and cross-fertilization, building complementarities across the different issues in its portfolio of activities. In the area of science and technology, the subprogramme will foster consensus-building and policy dialogue through its work as the secretariat of the Commission on Science and Technology for Development and its contribution to the Technology Facilitation Mechanism. It will carry out research and analysis on science, technology and innovation for development through its flagship publication *Technology and Innovation Report*, as well as other reports analysing policy options in science, technology and innovation for development, including the chapter on science, technology and innovation of the report of the Inter-Agency Task Force on Financing for Development. With regard to technical assistance and capacity-building, the subprogramme will deliver science, technology and innovation policy reviews, support the implementation of technology assessment and foresight exercises in developing countries and provide inputs to the inter-agency task team on science, technology and innovation for the Sustainable Development Goals of the Technology Facilitation Mechanism.

10.92 With regard to e-commerce and the digital economy, the subprogramme will foster international policy dialogue and consensus-building. This will include activities in relation to the Intergovernmental Group of Experts on E-commerce and the Digital Economy and the annual eCommerce Week, in addition to facilitation of the intergovernmental process pertaining to those issues. The subprogramme will also carry out research and analysis on e-commerce and the digital economy and development, including through the flagship publication *Digital Economy Report* and other reports analysing major trends and policy options in developing countries. In addition, the subprogramme will respond to a rapidly growing number of requests for

capacity-building and technical assistance in the field of e-commerce and the digital economy from developing countries, in particular least developed countries. This will include preparing Rapid eTrade Readiness Assessments, assisting in the development of national e-commerce strategies and legal frameworks on e-commerce and undertaking the statistical measurement of e-commerce and the digital economy, as well as coordinating the multi-stakeholder eTrade for All initiative and managing the eTrade for Women initiative.

10.93 In the area of trade logistics, which covers trade facilitation, customs automation and transport, including maritime transport and port management, the subprogramme will foster international policy dialogue and consensus-building by servicing the intergovernmental machinery of UNCTAD on these issues and by contributing to the deliberations of other specialized forums, including at the regional level. It will also carry out research and analysis on trade facilitation and transport and development, including through the flagship publication *Review of Maritime Transport* and other research products analysing data, trends, challenges, legislative frameworks and policy options for developing countries to improve transport, trade facilitation and trade logistics. In addition, the subprogramme will provide technical assistance and capacity-building in the areas of trade facilitation, including customs automation and modernization through the Automated System for Customs Data (ASYCUDA), transport, including maritime transport, transit corridors and port management, and associated legislative issues. In doing so, the subprogramme will continue to address specific trade logistics challenges affecting small island developing States and landlocked countries. Finally, the subprogramme will deliver targeted training and capacity-building activities to relevant stakeholders and government experts in trade and related areas of finance, technology, investment and sustainable development. This includes the delivery of regional and Geneva-based courses on key issues on the international economic agenda and the Training Development in the Field of International Trade (TrainForTrade) programme, which is aimed at reinforcing the human capacities in developing countries on various aspects of trade and development policies, such as port management, trade statistics and other issues, including digital identity for e-commerce.

10.94 The subprogramme plans to support member States on issues related to COVID-19 by increasingly focusing on the impact of the pandemic, adaptation policy measures and economic recovery in the field of technology and logistics for development. This work will include identifying and disseminating good practices to keep trade logistics operational while containing the spread of the coronavirus, including by determining how the pandemic may transform the trade logistics and transport sector in the long term and helping developing countries to adapt accordingly. With regard to science, technology and innovation, its work will include researching and sharing policy options for protecting against and recovering from the pandemic, including in relation to the impact of the pandemic on e-commerce and the digital economy, and policies to promote e-commerce for mitigation and recovery.

10.95 The above-mentioned work is expected to result in:

- (a) Improved knowledge and improved international consensus on emerging challenges and good practices in science, technology and innovation policies for development;
- (b) The implementation of the outcomes of the World Summit on the Information Society and the implementation of the Technology Facilitation Mechanism;
- (c) Increased capacities of member States to harness science, technology and innovation to support their national development strategies;

(d) Increased consensus on and awareness of key trends and challenges in the digital economy for development;

(e) Strengthened capacity in developing countries and least developed countries to implement policies that harness the digital economy for development objectives, including in terms of integrating women and vulnerable groups into e-commerce and the digital economy;

(f) Enhanced trade logistics that connect beneficiary countries to international markets in a more resilient and sustainable way, while enhancing transparency and efficiency in trade, including through ASYCUDA;

(g) Improved capacity to implement trade facilitation and transport measures for sustainable development;

(h) Increased capacity of developing countries to assess, analyse and formulate policies on important issues related to the macroeconomy, trade, investment and technology, including information and communications technology, for development;

(i) Increased capacity of developing countries to plan and implement trade and development policies that are more inclusive and sustainable.

10.96 The planned support on issues related to COVID-19 is expected to result in:

(a) Enhanced capacities of beneficiary countries and improved policies in the fields of technology and trade logistics, resulting in increased resilience to pandemics and other shocks, as well as accelerated recovery from the economic impact of COVID-19;

(b) Increased understanding and capacities to mitigate the impact of pandemics through technology solutions, including e-commerce, and more resilient trade logistics in developing countries;

(c) Enhanced capacities of member States to leverage technology and trade logistics for accelerated recovery.

## **Programme performance in 2020**

10.97 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Improved resilience of trade logistics during the COVID-19 pandemic**

10.98 With the outbreak of the COVID-19 pandemic, countries resorted to strict measures to contain the spread of the coronavirus at borders, seaports and airports. This greatly hindered the movement of goods, including essential food items and medicines. As part of the rapid response measures, the subprogramme offered its support and expertise in trade logistics and transit, with a special focus on least developed countries, landlocked developing countries and small island developing States, through the adoption of a coherent approach addressing complementary subsectors of trade logistics. In close dialogue with its networks of practitioners in the field, the subprogramme developed a 10-point action plan identifying best practices and recommendations in trade facilitation, representing a package of trade facilitation response measures to the COVID-19 pandemic. These recommendations were complemented by concrete steps on the ground aimed at building the capacity of member States to facilitate remote working, physical distancing and paperless environments, in order to provide uninterrupted services at borders. The subprogramme developed guidelines and provided capacity-building for customs administrations to adapt the use of ASYCUDA during the pandemic and in post-pandemic economic

recovery, and surveyed more than 100 ASYCUDA-user customs administrations to provide more tailored assistance in the specific context of the pandemic. The subprogramme also developed guidelines on best practices in port management against pandemics, disseminated through the Port Management Programme network across 60 countries, and investigated the impact of COVID-19 on maritime trade, producing near real-time data for the maritime sector to facilitate decision-making on economic policies. It also supported the preparation of a call for action to Governments to facilitate crew changeovers and remove unnecessary regulatory obstacles to maritime transport during and after the COVID-19 pandemic, including in the recovery phase and beyond. Finally, the subprogramme led the development of a “One United Nations” response to improving trade and transport facilitation connectivity during pandemics, bringing together expertise in trade facilitation and transport from across the Secretariat, including the five United Nations regional commissions.

*Progress towards the attainment of the objective, and performance measure*

10.99 The above-mentioned work contributed to the objective, as demonstrated by the use and adoption of the above guidelines and recommendations by member States during the pandemic, which has ensured the continuation of trade flows, the resilience of trade logistics, the prioritization of medical products and other essential goods in transit at borders, the reduction of duties on such goods and the increased use of electronic payments at customs to reduce the risk of the spread of the coronavirus associated with physical interactions. Other evidence includes the adoption of General Assembly resolution [75/17](#) on international cooperation to address challenges faced by seafarers as a result of the COVID-19 pandemic to support global supply chains, in which the Assembly, following negotiations facilitated by Indonesia, which is a key global supplier of maritime labour, urged Member States to designate seafarers and other marine personnel as key workers, and requested the Secretary-General, in collaboration with the International Maritime Organization (IMO), the International Labour Organization (ILO) and UNCTAD, as well as other relevant entities of the United Nations system, to inform the General Assembly at its seventy-sixth session through the IMO report on the crew changes situation during the COVID-19 pandemic based on the work of the Seafarer Crisis Action Team and through a dedicated section of the UNCTAD *Review of Maritime Transport*. The resolution contributed to solving a global crewing crisis affecting over 2 million seafarers. The impact of the work on trade facilitation is also evidenced by the enhanced capacity of a wide range of stakeholders that participated in the Empowerment Programme for National Trade Facilitation Committees, including with regard to how to mitigate the negative impacts of the pandemic on trade facilitation (see table 10.14).

**Table 10.14**  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>
Member States have access to tailored support at the national level in identifying their particular trade logistics needs, including the provision of relevant analysis and research; an intensive dedicated professional capacity-building programme for the members of national trade facilitation committees and their secretariats through the Empowerment Programme	Member States are supported to manage and adapt to the fast-evolving trends that are shaping trade patterns and defining the operating landscape of the overall trade logistics sector, in a holistic, efficient and effective manner  Member States have utilized research and analytical work, consensus-	Member States are addressing the pandemic-related challenges in trade logistics by using and adapting a set of holistic guidelines and recommendations developed by the subprogramme, covering the entire spectrum of trade logistics sectors, and ensuring the continuation of trade flows, including by addressing the challenges faced by over 2 million

2018 (actual)	2019 (actual)	2020 (actual)
for National Trade Facilitation Committees; support for port communities in developing countries in delivering more efficient and competitive port management services to increase trade flows, through the TrainForTrade Port Management Programme; and the integrated customs management system ASYCUDA	building activities and technical assistance and capacity-building initiatives, focused in particular on building regulatory and institutional capacities, to develop and strengthen policies, promote technical skills and expertise, and, ultimately, to increase their preparedness to face major shocks of any kind	seafarers as a result of the COVID-19 pandemic to support global supply chains through the adoption of General Assembly resolution <a href="#">75/17</a>

### Impact of COVID-19 on subprogramme delivery

10.100 Owing to the impact of COVID-19 in 2020, the subprogramme had to postpone some activities and several intergovernmental meetings, including the multi-stakeholder forum on science, technology and innovation for the Sustainable Development Goals, the sessions of the Investment, Enterprise and Development Commission and the Trade and Development Commission and meetings of the Working Group on Measuring E-commerce and the Digital Economy, as well as all technical notes and materials related to these meetings. Also, due to the fact that the programme of the Trade and Development Board of UNCTAD was modified to allow for discussions on the impact of COVID-19, specific sessions on science, technology and innovation and on digitalization were cancelled. At the same time, the subprogramme changed the approach to intergovernmental and multi-stakeholder meetings from an in-person to a virtual format, including meetings of the Commission on Science and Technology for Development, eCommerce Week and the Multi-year Expert Meeting on Transport, Trade Logistics and Trade Facilitation. These events featured dedicated sessions on COVID-19 and participants at the session of the Commission on Science and Technology for Development issued a call for technology solutions for tackling the pandemic and its impacts to be shared with developing country members. Other activities were organized online in the area of trade facilitation and in the context of the TrainForTrade and ASYCUDA programmes. The pandemic also affected the implementation of several technical assistance activities, including the delivery of regional courses on key issues on the international economic agenda, which had to be postponed to 2021 as they rely heavily on on-site face-to-face interactions and networking among beneficiaries. Planned e-commerce strategies were delayed due to the pandemic, as some workshops with Governments and other stakeholders had to be postponed. In the area of trade facilitation and transport, the number of seminars, workshops and training events was also reduced due to the pandemic since the shifting of activities online often entailed a regional grouping of planned national-level events. These changes had an impact on the programme performance in 2020, as specified in result 1 below.

10.101 At the same time, however, the subprogramme identified both new and modified activities to support member States on issues related to COVID-19, within the overall scope of its objective. The subprogramme prepared guidelines, surveys, policy briefs and other reports on the impact of the pandemic and on ways to achieve a better recovery and improve resilience through science, technology and innovation and e-commerce. The subprogramme's research on e-commerce and the digital economy and technology highlighted the need for technology solutions in dealing with the pandemic and its impacts, showing the facilitating role of digital solutions and how e-commerce has helped countries to cope with the pandemic, while stressing the need to bridge existing digital divides. Through its analysis, the subprogramme also advocated for the protection of science, technology and innovation funding

during and after the COVID-19 pandemic and explored the role of science and technology policies in COVID-19 recovery. Moreover, the subprogramme's survey of e-commerce companies and third-party platforms highlighted several key obstacles and potential remedying policy measures related to addressing the impact of the COVID-19 pandemic in developing countries. In the area of trade logistics, including trade facilitation, customs automation, maritime transport and port management, the subprogramme developed a large and coherent package of mutually reinforcing adaptation measures to reduce the spread of the coronavirus while ensuring that critical goods could move unimpeded. The new and modified deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

## **Planned results for 2022**

10.102 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: boosting digital readiness in developing countries<sup>7</sup>**

#### **Programme performance in 2020**

10.103 In 2020, the subprogramme continued its work aimed at enhancing the capacities of developing countries to harness the evolving digital economy, taking into consideration different levels of preparedness across countries. With seven new Rapid eTrade Readiness Assessments conducted in 2020 (Benin, Côte d'Ivoire, Iraq, Malawi, Mali, the Niger and the United Republic of Tanzania), the programme has now completed a total of 26 assessments. These assessments provided up-to-date diagnostics of how least developed countries and other developing countries can harness the potential of the digital revolution for e-commerce, trade and development. At the same time, through the assessments, the subprogramme identified specific needs and critical weaknesses of the national e-commerce ecosystems and proposed concrete actions for Governments to improve the situation. To accelerate the implementation of recommendations contained in the Rapid eTrade Readiness Assessments, a detailed mapping exercise to take stock of achievements to date and to identify the next steps was undertaken. In addition, the subprogramme delivered a report surveying the impact of the pandemic on e-commerce and identifying adequate policy responses, which drew on the networks and national capacities created in countries in the context of the Rapid eTrade Readiness Assessments. The subprogramme also continued to develop the eTrade for All and eTrade for Women initiatives. The eTrade for All initiative saw the inclusion of two new partners (the Commonwealth Secretariat and ILO) and supported the organization of eCommerce Week 2020, held in a virtual format, with 2,000 participants from 130 countries. In 2020, the Rapid eTrade Readiness Assessments contributed to actions related to infrastructure development (Burkina Faso, Samoa and Zambia), the development of national e-commerce strategies (Benin, Cambodia, Myanmar and Zambia) and the development or introduction of privacy and data protection regulations (Madagascar and Nepal), as well as measures in support of digital payment solutions (Lao People's Democratic Republic, Togo and Uganda) and the establishment of an e-commerce consortium in Senegal. In some regions, including those represented by ECOWAS, the East African Community and the Pacific Islands Forum, the assessments also served as a basis for developing regional e-commerce policies. In addition, close dialogue with donors resulted in more support for the subprogramme's work on

<sup>7</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 12)).

e-commerce and the digital economy and consideration of the expansion of the digital dimension in development assistance strategies.

10.104 The above-mentioned work contributed to specific actions undertaken by 12 countries, using the Rapid eTrade Readiness Assessments as a basis for elaborating e-commerce strategies and policies, reforming the legal and regulatory framework for e-commerce and improving their interministerial coordination and multi-stakeholder dialogues, which met the planned target reflected in the proposed programme budget for 2020.

### Proposed programme plan for 2022

10.105 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will complement assistance to national Governments with closer involvement at the regional level, thereby fostering intraregional trade and integration through e-commerce and digital trade. In addition, the subprogramme will continue its work on increasing the involvement of women digital entrepreneurs in national and regional policy dialogue and on improving the availability of statistics. The expected progress is presented in the performance measure below (see table 10.15).

Table 10.15  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Divides between and within countries in terms of readiness to participate in and benefit from e-commerce and the digital economy	Availability of information and tools through a multitrack approach of research and analysis, policy dialogue and technical cooperation, including the launch of new network of women in e-commerce	Twelve countries used the Rapid eTrade Readiness Assessments as a basis for elaborating e-commerce strategies and policies, reforming the legal and regulatory framework for e-commerce and improving their interministerial coordination and multi-stakeholder dialogues	Increased implementation of recommendations by member States of UNCTAD Rapid eTrade Readiness Assessments, and a growing community of women digital entrepreneurs trained under the UNCTAD eTrade for Women initiative	Increased awareness of the role of e-commerce and the digital economy in at least three regional economic communities; enhanced involvement of women digital entrepreneurs in 15 national and regional policy dialogues in 5 regions; and new initiatives implemented by 4 Governments to collect statistics on e-commerce and the digital economy for improved availability of statistics through UNCTAD assistance

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: strengthened capacity of developing countries to comply with international and regional trade facilitation rules and standards<sup>8</sup>**

### **Programme performance in 2020**

10.106 The subprogramme has continued to assist in the implementation of trade facilitation reforms at both national and regional levels in alignment with the WTO Agreement on Trade Facilitation by improving the capacities of the national trade facilitation committees to fulfil their obligations under the Agreement. The subprogramme also developed a regional approach in assisting regional economic communities to implement regional protocols related to regional value chains and intraregional trade. This was implemented with the East African Community, the Economic Community of Central African States, the Caribbean Community and the Pacific Islands Forum in the case of the Pacific Agreement on Closer Economic Relations (PACER) Plus. The subprogramme also provided a rapid response to the pandemic-related needs of the national trade facilitation committees and the stakeholders involved in the logistics supply chain by developing new online training modules and information technology tools such as the reform tracker and trade information portals to enhance the coordination, monitoring and evaluation of the implementation of trade facilitation reforms. Furthermore, rapid response guidelines and advisory services on trade facilitation and health were provided to help improve coordination between administrations in charge of trade, customs and health and were disseminated using the trade information portals.

10.107 The above-mentioned work contributed to improving the capacities of 32 national trade facilitation committees to identify their national implementation obligations under the Agreement on Trade Facilitation, which exceeded the planned target of 13 national trade facilitation committees being assisted by UNCTAD in identifying their national implementation obligations with regard to the WTO Agreement on Trade Facilitation, reflected in the programme budget for 2021.

### **Proposed programme plan for 2022**

10.108 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to work with national trade facilitation committees and regional economic communities. So far, the subprogramme has secured resources to support the work of 10 national trade facilitation committees in 2022. However, it will continue to engage with development partners to raise support to increase the number of beneficiary countries and regional entities covered, while ensuring the sustainability of ongoing projects. In doing so, the subprogramme will further increase its focus on the post-pandemic recovery and on building regional supply chains in trade logistics, based on the linkages between trade facilitation and technology. The expected progress is presented in the performance measure below (see figure 10.IV).

<sup>8</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

Figure 10.IV

**Performance measure: number of national trade facilitation committees assisted by the United Nations Conference on Trade and Development in identifying their national implementation obligations with regard to the Agreement on Trade Facilitation of the World Trade Organization (annual)**

<sup>a</sup>To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: women digital entrepreneurs empowered to build a more inclusive digital economy**

#### **Proposed programme plan for 2022**

10.109 While digital technologies can be an enabler of women's economic empowerment, significant obstacles remain, including with regard to cultural norms, gender biases, lack of participation in decision-making processes, unequal access to the Internet, lower levels of digital skills and limited access to finance. Launched in 2019, the eTrade for Women initiative seeks to empower women digital entrepreneurs across developing and emerging economies and generate more inclusive digital ecosystems. To achieve its objectives, the subprogramme has partnered with seven influential women digital leaders from different regions and appointed them as eTrade for Women advocates, to act as role models and strive to make an impact beyond simply economic concerns. As part of their role, the advocates engaged in various multi-stakeholder policy dialogues at several high-level regional and global forums in 2020. Under the leadership of the respective eTrade for Women advocate in a given region, the initiative organized three targeted masterclasses in 2020 to increase women entrepreneurs' competencies and networks and is in the process of establishing eTrade for Women communities across the regions to contribute to local ecosystems. In addition, as a result of the masterclass networks, cross-border business opportunities have started to emerge between participants, laying the groundwork for more integrated digital ecosystems at the regional level.

#### *Lessons learned and planned change*

10.110 The lesson for the subprogramme was that multi-stakeholder and multisectoral platforms can support development and changes in policies and regulations. For example, bringing together policymakers at all levels, from national to local, including women entrepreneurs, can help develop a holistic and complementary understanding of the specific needs of small and medium-sized digital businesses and women digital entrepreneurs. In applying the lesson, the subprogramme will strengthen dialogues between policymakers and women entrepreneurs at all levels and will build an increased understanding of the specific needs of small and medium-sized digital businesses. The subprogramme will help

facilitate the interface between business, women entrepreneurs and policymakers to help inform decision makers in developing appropriate policy and regulatory responses. The subprogramme will build on lessons learned in the context of the COVID-19 pandemic, during which digital micro-, small and medium-sized enterprises, including many women-led businesses, have played a critical role in adapting to the challenges brought about by the pandemic.

*Expected progress towards the attainment of the objective, and performance measure*

10.111 This work is expected to contribute to the objective, as demonstrated by the improved business and leadership skills of 200 women digital entrepreneurs participating in eTrade for Women activities (see table 10.16).

Table 10.16  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
—	Increased awareness of Governments and the private sector regarding the role of eTrade for Women advocates in building a more inclusive digital economy	Improved business and leadership skills of 50 women digital entrepreneurs participating in eTrade for Women activities	Improved business and leadership skills of a cumulative total of 100 women digital entrepreneurs participating in eTrade for Women activities, including the eTrade for Women advocates, to lead dialogues with policymakers on digital transformation. Establishment of eTrade for Women communities across regions	Improved business and leadership skills of a cumulative total of 200 women digital entrepreneurs participating in eTrade for Women activities. At least four eTrade for Women communities active across regions

## Legislative mandates

10.112 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolutions*

60/252	World Summit on the Information Society	73/17	Impact of rapid technological change on the achievement of the Sustainable Development Goals and targets
69/213	Role of transport and transit corridors in ensuring international cooperation for sustainable development	74/229	Science, technology and innovation for sustainable development
69/283	Sendai Framework for Disaster Risk Reduction 2015–2030	75/17	International cooperation to address challenges faced by seafarers as a result of the COVID-19 pandemic to support global supply chains
70/125	Outcome document of the high-level meeting of the General Assembly on the overall review of the implementation of the outcomes of the World Summit on the Information Society	75/202	Information and communications technologies for sustainable development
72/212	Strengthening the links between all modes of transport to achieve the Sustainable Development Goals		

*Economic and Social Council resolutions*

2015/26	Assessment of the progress made in the implementation of and follow-up to the outcomes of the World Summit on the Information Society	2020/12	Assessment of the progress made in the implementation of and follow-up to the outcomes of the World Summit on the Information Society
		2020/13	Science, technology and innovation for development

**Deliverables**

10.113 Table 10.17 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 10.17

**Subprogramme 4: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>25</b>	<b>10</b>	<b>22</b>	<b>21</b>

### C. Substantive deliverables

**Consultation, advice and advocacy:** eCommerce Week, which is a multi-stakeholder forum organized over five days, with approximately 1,500 participants, over 200 speakers from more than 130 countries, in at least 50 substantive sessions; multi-stakeholder forum on science, technology and innovation for the Sustainable Development Goals; sessions of the UNCTAD Advisory Group on Strengthening Training Capacity and Human Resource Development; and advisory services on science, technology and innovation policies for development, policy and practical aspects of e-commerce and the digital economy for development, measuring e-commerce and the digital economy, transport policies and international legal instrument standards and rules related to the facilitation of international trade, transport and transport security for port operators and the eTrade for All initiative.

**Databases and substantive digital materials:** UNCTAD platform for learning and capacity-building managed by the TrainForTrade programme, which trains approximately 1,500 beneficiaries per year; TrainForTrade; port performance statistics platform; online repository on national trade facilitation committees; Global Cyberlaw Tracker; online e-learning modules for the courses on key issues on the international economic agenda, with some 200 participants annually; online platform for sustainable freight transport; and eTrade for All online platform, with more than 80,000 users in 2020.

### D. Communication deliverables

**Outreach programmes, special events and information materials:** newsletters on ASYCUDA, eTrade for All (with over 2,000 subscribers) and transport and trade facilitation (with over 5,000 subscribers); brochures, flyers and information kits.

**External and media relations:** press releases, press briefings, interviews, press conferences and news items related to the issuance of major publications under the subprogramme and the organization of important events.

**Digital platforms and multimedia content:** TrainForTrade public website, with more than 30,000 views annually; Commission on Science and Technology for Development website; ASYCUDA website, with more than 60,000 views annually; website on paragraph 166 of the Bangkok Plan of Action, with more than 95,000 views annually; and online platforms for innovation policy learning.

<sup>a</sup> UNCTAD proposes to merge items 23 and 24 starting in 2022, in order to consolidate the number of activities in the same area from 2022 onwards. The total revised number of events in 2022 is estimated at 300. From 2022 onwards, UNCTAD proposes that item 23 be called “TrainForTrade face-to-face and online training and capacity-building events for trade and development”.

## Subprogramme 5 Africa, least developed countries and special programmes

### Objective

10.114 The objective, to which this subprogramme contributes, is to enhance the effective integration of Africa, the least developed countries and other groups of countries in special situations (landlocked developing countries, small island developing States and other structurally weak, vulnerable and small economies) into the global economy through fostering structural transformation, reducing vulnerabilities and developing domestic productive capacities in the targeted groups.

## Strategy

10.115 To contribute to the objective, the subprogramme will continue its research and technical cooperation activities to diversify the export and productive structures of the above-mentioned countries, including through contributions to several reports of the Secretary-General to the General Assembly, including the reports on the implementation and follow-up of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024; the agreed outcome of the Fifth United Nations Conference on Least Developed Countries; and the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States. The subprogramme will also continue to translate the policy guidance and recommendations emanating from research and analysis work into pragmatic and targeted technical cooperation programmes. In addition, the subprogramme will play an advocacy role in promoting consensus in the international development community regarding the policy measures that best address the development problems of the above groups of countries, including at the multilateral level, through the identification of new issues and approaches, training and capacity-building workshops, as well as greater interaction with research institutes in least developed countries and with development partners. The subprogramme will continue to strengthen efforts to provide domestic policy support and capacity-building to the targeted groups derived from its innovative research, advisory services and technical support. Through its research work, the subprogramme will also increase the availability of strategic policy-based options aimed at enhancing domestic productive capacities and facilitate their implementation through the development of demand-driven technical cooperation and programmatic support within its areas of expertise. Furthermore, the subprogramme will broaden its country-based technical support to include aspects such as national strategies for the development of productive capacities and structural transformation, rules of origin, enhanced market access and preference utilization, value addition in strategic products and geographical indications, which will help member States, in particular least developed countries and other groups of countries in special situations, to make progress towards the achievement of Sustainable Development Goals 9 and 17.

10.116 The subprogramme plans to support member States on issues related to COVID-19 by repurposing some of its planned research work to account for the socioeconomic impact of COVID-19 on economies in target countries in order to facilitate specific policy responses in the short, medium and long term. The subprogramme will also adapt its technical cooperation to account for pandemic-related domestic shocks with a view to supporting Governments in policy design and implementation. Where relevant, the subprogramme will adapt or expand its methodological approach to research and technical cooperation and will design and implement specific ad hoc surveys to evaluate the effects of COVID-19 in the respective groups of countries.

10.117 The above-mentioned work is expected to result in:

- (a) Greater structural transformation and inclusive growth in least developed countries and other groups of countries in special situations at the domestic level;
- (b) Improved development policy formulation and implementation capacities.

10.118 The planned support on issues related to COVID-19 is expected to result in countries having greater capacities to develop and implement specific policy responses focusing on their productive capacities to account for current and future pandemic-related shocks, reduce exposure to external shocks and build resilience.

## Programme performance in 2020

10.119 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Safeguarding the graduation prospects of least developed countries despite the COVID-19 pandemic

10.120 The countries that the Committee for Development Policy found to be pre-eligible for graduation from the least developed country category in 2018 have all experienced socioeconomic setbacks related directly to the COVID-19 pandemic and indirectly to the economic recession in developed countries. The subprogramme updated the General Assembly-mandated vulnerability profiles to provide graduation-eligible least developed countries with a clear indication of how the current shock has affected their graduation prospects and their resilience-building and structural transformation efforts. The profiles were originally submitted to inform the 2018 recommendations of the Committee for Development Policy in relation to the least developed countries that met the graduation thresholds for the first time. As part of the continuous monitoring of those countries' performance, the profiles have been updated and will prove crucial in facilitating the Committee's decision on whether or not to confirm its 2018 graduation recommendations. In preparing the enhanced profiles, the subprogramme has leveraged use of the new UNCTAD productive capacities index to assess the relative strengths and weaknesses of eligible least developed countries with regard to addressing the identified challenges and impacts of the pandemic. In addition, two specific studies on the possible impact of the loss of trade preferences due to graduation and the related erosion of trade preferences have been carried out for Cambodia and Myanmar.

#### *Progress towards the attainment of the objective, and performance measure*

10.121 The above-mentioned work contributed to the objective, as demonstrated by the provision of enhanced vulnerability profiles to selected eligible least developed countries, as well as four specific impact studies on the socioeconomic effects of the pandemic in Angola, Bhutan, Timor-Leste and Vanuatu (table 10.18).

Table 10.18  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
Three least developed country member States found eligible for graduation for the first time have their socioeconomic conditions and systemic trade and development vulnerabilities assessed and made available to the Committee for Development Policy in the form of country-specific vulnerability profiles	Least developed country member States found eligible for graduation have their socioeconomic conditions and vulnerabilities continuously monitored, utilizing a robust methodology and analytical framework	Least developed country member States found eligible for graduation have access to updated analysis of the effect of the pandemic on their economies and targeted policy guidance in the form of revised vulnerability profiles, which are made available to the Committee for Development Policy, along with country-specific impact studies

#### Impact of COVID-19 on subprogramme delivery

10.122 Owing to the impact of COVID-19 in 2020, the subprogramme postponed planned activities, including preparatory meetings in advance of the fifteenth session of UNCTAD, workshops on trade-related issues relevant to least developed countries,

such as rules of origin, duty-free and quota-free market access and activities related to the Enhanced Integrated Framework, and capacity-building activities planned for several landlocked developing countries on fostering productive capacities and structural transformation. The subprogramme rescheduled planned face-to-face workshops, training and capacity-building activities in targeted countries, where possible, and leveraged available technical tools to continue to provide training and advisory services through digital platforms. Furthermore, the subprogramme changed its approach and modified activities under the United Nations Development Account project on services trade in Africa, implemented jointly with ECA, to include an analysis of the impact of the pandemic at the national and regional levels, focusing on specific services sectors and country case studies. These changes had an impact on the subprogramme's performance in 2020, as specified in result 2 below.

10.123 At the same time, however, the subprogramme identified both new and modified activities to support member States on issues related to COVID-19, within the overall scope of its objective, namely by expanding its research focus and technical cooperation strategies. For example, *The Least Developed Countries Report 2020* included a new chapter in which the socioeconomic impact of the pandemic on the economies and societies of least developed countries was analysed and targeted policy recommendations were provided to those countries' policymakers. In addition, the subprogramme expanded business analysis of the impact of the pandemic on selected services value chains in Africa and further prepared an ad hoc assessment of Africa-specific development outcomes in relation to growth, food security, illicit financial flows and the achievement of the Sustainable Development Goals, as well as trade and fiscal revenue. The modified and new deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

## Planned results for 2022

10.124 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### Result 1: building productive capacities for economic transformation<sup>9</sup>

#### Programme performance in 2020

10.125 The subprogramme has designed and developed a programmatic approach to structural transformation focused on benchmarking and building productive capacities in least developed countries, landlocked developing countries and other structurally weak and vulnerable economies, aimed at the diversification of their economies and their fuller participation in international trade. Through this work, the subprogramme, as encouraged by the Economic and Social Council in paragraph 6 of its resolution [2017/29](#), aims to measure progress in and identify obstacles to the development of productive capacities in targeted countries. The subprogramme has also enabled vulnerable countries to determine their starting and optimal positions with regard to the development of productive capacities so that they are able to identify the practical steps to be taken and the areas in which targeted policies are most needed. This work included the creation of a sound methodology to calculate the UNCTAD productive capacities index and the calculation of indices for least developed countries and landlocked developing countries. Furthermore, the subprogramme strengthened the institutional capacities of beneficiary countries to promote economic transformation

<sup>9</sup> As reflected in the proposed programme budget for 2020 ([A/74/6 \(Sect. 12\)](#)).

and resilience-building efforts by training national statistical experts in the methodology for producing and analysing the productive capacities index. In addition, the subprogramme published a practical manual on how to build and utilize productive capacities in Africa and the least developed countries and produced topical reports on productive capacities for targeted countries. The index will be made publicly available to all member States and interested users, to track development progress and identify areas of comparative strengths and weaknesses in the development, maintenance and use of productive capacities. The ample evidence base provided by the index enables beneficiary Governments to design and implement more targeted policies to support productive capacity development and monitor progress towards these results.

10.126 The above-mentioned work contributed to building the capacity of national Governments in least developed countries and landlocked developing countries in Africa and Asia to understand the importance of productive capacities for structural transformation, apply the UNCTAD methodology for calculating the productive capacities index, evaluate the results of the index and design policies for addressing gaps in their productive capacities. Analysis based on the index has been incorporated into the revised vulnerability profiles for Bangladesh, Bhutan, the Lao People's Democratic Republic, Myanmar, Timor-Leste and Vanuatu, which exceeded the planned target of implementation of the productive capacity index by landlocked developing countries, reflected in the proposed programme budget for 2020, as it was extended to some non-landlocked least developed countries.

### Proposed programme plan for 2022

10.127 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will train national policymakers, private sector actors and relevant civil society groups in the development challenges and vulnerabilities faced by beneficiary countries and in policy alternatives to build and strengthen productive capacities, applying the productive capacities index for national policy formulation and monitoring progress towards the achievement of structural transformation. The expected progress is presented in the performance measure below (see table 10.19).

Table 10.19  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Absence of benchmarking on productive capacities	Availability of a methodology for calculating a productive capacity index	Implementation of the UNCTAD productive capacities index, including through its inclusion in the vulnerability profiles of some landlocked developing countries and non-landlocked least developed countries	Productive capacity index calculated for all countries, realizing its policy relevance	Five beneficiary countries to design and implement policies for productive capacity development using the analysis in the productive capacities index and related technical assistance and advisory services

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: building economic resilience in the least developed countries<sup>10</sup>**

### **Programme performance in 2020**

10.128 The subprogramme has continued to support least developed countries in their efforts to economically diversify their production structures in order to achieve graduation with momentum out of the least developed country category and enhance their regional and multilateral integration efforts, which has contributed to enhancing their understanding of their vulnerabilities and the need to diversify their economic structures in order to build resilience. This support included the subprogramme's contribution to the diversification of the economy of Angola, through the implementation of the European Union-UNCTAD joint programme for Angola: Train for Trade II. That was achieved through targeted technical assistance and capacity-building activities aimed at strengthening entrepreneurial capacity and emerging economic activities in the green economy in the context of sustainable development and poverty eradication, and creative industries. Due to pandemic-related restrictions, the subprogramme participated in several virtual dissemination events and exchanges with the respective national resident coordinators, private sector actors and relevant government officials, including in Angola, Bangladesh, Haiti, the Lao People's Democratic Republic and Myanmar.

10.129 The above-mentioned work contributed to enhancing awareness of the need for economic resilience in the least developed countries, but did not meet the planned target of 27 least developed countries experiencing a reduction in their export concentration index, reflected in the proposed programme budget for 2021. The least developed countries have been adversely affected by pandemic-related shocks twice: first, directly through the impact on their medical systems and their capacity to respond to the immediate health crisis and, second, through related effects from reduced trade, falls in commodity prices (primarily oil), lockdown measures in developed and neighbouring countries, falling investment levels and reduced remittances. This has resulted in decreased economic output and activities, resulting in a reconcentration of exports, as well as greater unemployment and higher poverty rates.

### **Proposed programme plan for 2022**

10.130 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue its research and technical assistance work in least developed countries so that they can build resilience by diversifying their productive structures. The expected progress is presented in the performance measure below (see figure 10.V).

<sup>10</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

Figure 10.V

**Performance measure: total number of least developed countries experiencing a reduction in their export concentration index (annual)**

<sup>a</sup> The performance measure for 2020 is estimated, as actual data for 2020 was not available at the time of publication.

<sup>b</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: improved participation of African countries in regional and global value chains**

#### **Proposed programme plan for 2022**

10.131 With adequate support to coordinate the implementation of the WTO Agreement on Trade Facilitation, African countries, and landlocked developing countries in particular, could enhance their integration into regional and global value chains and address the trade and development challenges they face. African countries, and landlocked developing countries in particular, struggle to put in place effective trade facilitation measures. These countries could significantly boost their exports and reduce bottlenecks affecting their regional and international trade exchanges through enhanced trade and transport logistics, lower non-tariff barriers and reduced delays and uncertainty along major corridors, including through their transit neighbours. Building on its expertise and long-standing technical assistance in the field of regional and multilateral trade negotiations, in particular in customs matters, as well as its expertise in transit, transport and trade facilitation negotiations in the context of the West Africa Trade Facilitation Programme, the subprogramme has been supporting the accrual of benefits for African least developed countries and landlocked developing countries arising from regional and global value chains, as well as supporting implementation of the African Continental Free Trade Area.

#### *Lessons learned and planned change*

10.132 The lesson for the subprogramme was that the coordination of transit strategies and the creation and implementation of an inter-State coordination mechanism across neighbouring countries are vital for the insertion of African countries into regional and global value chains, which contributes to their structural transformation. In applying the lesson, the subprogramme will enhance cooperation at the national level in beneficiary countries between the different government and other actors involved, including ministries of commerce, transport and planning, as well as chambers of commerce and other private sector actors (e.g., carriers and shippers). It will further facilitate regular exchanges among neighbouring countries on the above issues. An improvement in inter-State trade facilitation and transport logistics would help reduce border delays and uncertainties along the major corridors and could lead the beneficiary countries to boost their regional and international exports and better position themselves in regional and global value chains.

*Expected progress towards the attainment of the objective, and performance measure*

10.133 This work is expected to contribute to the objective, as demonstrated by an increase in inter-State trade in the three beneficiary countries (Benin, Burkina Faso and the Niger) as a result of increased dialogue between the members of the interministerial working group to formulate and implement a road map for a functional inter-State transit programme; as well as greater coordination of transport logistics within countries and implementation of a functional inter-State transit programme at the border, which will facilitate commercial exchanges and reduce the cost and time to trade (see table 10.20).

Table 10.20  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
–	Recognition by the ministries of commerce, transport and planning, chambers of commerce and private sector actors of the need for a transit and transport coordination mechanism due to UNCTAD raising awareness of the issue	Raising awareness among the beneficiary countries through the established interministerial working group to the benefits arising from implementation of the regional convention on transit (ECOWAS Convention relating to Inter-States Road Transit of Goods) and the WTO Agreement on Trade Facilitation	Inventory of existing protocols for inter-State road transit in Benin, Burkina Faso and the Niger and validation by the beneficiary countries, through the established interministerial working group, of a road map for a functional inter-State transit programme	Increase in inter-State trade between the three beneficiary countries (Benin, Burkina Faso and the Niger) resulting from UNCTAD policy guidance and advisory support made available for the coordinated implementation of inter-State transit and transport policies

## Legislative mandates

10.134 The list below provides all mandates entrusted to the subprogramme.

### *General Assembly resolutions*

67/221	Smooth transition for countries graduating from the list of least developed countries	69/217	Follow-up to and implementation of the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States
68/18	Graduation of countries from the least developed country category		
68/225	Specific actions related to the particular needs and problems of landlocked developing countries: outcome of the International Ministerial Conference of Landlocked and Transit Developing Countries and Donor Countries and International Financial and Development Institutions on Transit Transport Cooperation	74/3	Political declaration of the high-level meeting to review progress made in addressing the priorities of small island developing States through the implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway
69/15	SIDS Accelerated Modalities of Action (SAMOA) Pathway		

74/15	Political Declaration of the High-level Midterm Review on the Implementation of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024	75/227	Follow-up to the Fourth United Nations Conference on the Least Developed Countries
74/234	Implementation of the Third United Nations Decade for the Eradication of Poverty (2018–2027)		

*Economic and Social Council resolutions*

2017/29	Report of the Committee for Development Policy on its nineteenth session	2019/8	Report of the Committee for Development Policy on its twenty-first session
2018/27	Report of the Committee for Development Policy on its twentieth session		

## Deliverables

10.135 Table 10.21 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 10.21

**Subprogramme 5: deliverables for the period 2020–2022, by category and subcategory**

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>

<b>Seminars, workshops and training events</b> (number of days)	<b>19</b>	<b>17</b>	<b>18</b>	<b>25</b>
10. Workshops on trade issues relevant to least developed countries, including on duty-free and quota-free market access, diagnostic trade integration study and post-diagnostic trade integration study and trade activities under the Enhanced Integrated Framework and structural transformation and progress towards post-least developing country status	14	13	14	14
11. Workshops on the implementation of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024, the SIDS Accelerated Modalities of Action (SAMOA) Pathway, issues of thematic or sectoral relevance to landlocked developing countries, the Istanbul Programme of Action for the Least Developed Countries for the Decade 2011–2020, the agreed outcome of the Fifth United Nations Conference on the Least Developed Countries, and trade and poverty	3	2	3	9
12. Workshops on matters relevant to development in the least developed countries and in Africa	2	2	1	2
<b>Publications</b> (number of publications)	<b>9</b>	<b>8</b>	<b>10</b>	<b>12</b>
13. <i>The Least Developed Countries Report</i> and its overview	2	2	2	2
14. <i>Economic Development in Africa Report</i>	1	1	1	1
15. Report on building and measuring productive capacities	1	1	–	1
16. Report on enhancing coherence between trade and industrial strategies for poverty alleviation in Africa and a special issues paper on Africa	1	1	1	1
17. Research and analytical studies on duty-free and quota-free market access and rules of origin	1	1	1	1
18. Lessons learned on geographical indications and related analysis for least developed countries	1	1	2	1
19. Sectoral, statistical and thematic issues of interest for landlocked developing countries: policy implications for the implementation of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024 and the Sustainable Development Goals	1	1	2	1
20. Challenges faced by least developed countries in terms of achieving the Sustainable Development Goals and actions to take in the context of the final appraisal of the Istanbul Programme of Action for the Least Developed Countries for the Decade 2011–2020	1	–	1	–
21. Research papers on economic development issues in least developed countries and Africa	–	–	–	4
<b>Technical materials</b> (number of materials)	<b>4</b>	<b>4</b>	<b>6</b>	<b>8</b>
22. Research papers on trade and poverty	2	2	2	2
23. Research papers on trade and development in vulnerable economies, including small island developing States	2	2	2	4
24. Enhanced Integrated Framework-related publications, including on transit, transport and trade facilitation	–	–	2	2

### C. Substantive deliverables

**Consultation, advice and advocacy:** advisory services to ministries of trade, transport and planning on the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024 and to national statistical offices on measuring productive capacities for landlocked developing countries; advisory services on smooth transition strategies for graduating and graduated least developed countries; advisory services on trade and development issues for small island developing States, landlocked developing countries and African countries; advisory services on trade issues relevant to least developed countries, including duty-free and quota-free market access, to least developed countries and the Enhanced Integrated Framework; consultations on UNCTAD activities in support of the New Partnership for Africa's Development; and consultations with United Nations partner agencies and African countries for the implementation of the Third Industrial Development Decade for Africa.

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
--------------------------	-----------------	----------------	-----------------	-----------------

#### D. Communication deliverables

**Outreach programmes, special events and information materials:** lectures on issues related to least developed countries and African development, globalization, development strategies and policy coherence for the benefit of member States, targeting a minimum of 100 combined participants; and policy briefs related to *The Least Developed Countries Report* and the *Economic Development in Africa Report*.

**External and media relations:** press releases on *The Least Developed Countries Report* and the *Economic Development in Africa Report*, opinion pieces on salient policy recommendations from the flagship reports and other topical research, press conferences on *The Least Developed Countries Report* and the *Economic Development in Africa Report* and interviews on research results and policy proposals.

## International Trade Centre

### Overall orientation

#### Mandates and background

10.136 The International Trade Centre (ITC) is responsible for the business aspects of trade development, as the joint technical cooperation agency of the United Nations and the World Trade Organization (WTO). The mandate derives from the priorities established by the contracting parties to the General Agreement on Tariffs and Trade (GATT) on 19 March 1964 and the General Assembly on 12 December 1967 (Assembly resolution [2297 \(XXII\)](#)). Since 1 January 1968, ITC has operated under the joint auspices of GATT/WTO and the United Nations. In its resolution 1819/LV of 9 August 1973, the Economic and Social Council reaffirmed the Centre's mandate as the focal point for technical assistance and cooperation activities for trade promotion within the United Nations system of assistance for developing countries.

10.137 In the context of the 2030 Agenda for Sustainable Development, Member States explicitly recognized trade as a key engine for sustainable and inclusive economic growth and poverty eradication. Under Sustainable Development Goal 8, to promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all, the 2030 Agenda includes a specific target to increase Aid for Trade support. Under Goal 17, the targets of an open, rules-based, transparent and fair trading system and a significant increase in exports from developing countries are specified.

10.138 In December 2019, the General Assembly reiterated this position in its resolution [74/201](#), against a backdrop of trade tensions, lower global investment and threats to multilateralism. The target beneficiaries of ITC – micro-, small and medium-sized enterprises that make up 99 per cent of the world's companies and form the economic backbone of any community – are particularly vulnerable to the costly consequences of the above-mentioned developments for their businesses.

## **Programme of work**

### **Subprogramme 6**

#### **Operational aspects of trade promotion and export development**

##### **Objective**

10.139 The objective, to which this subprogramme contributes, is to enhance inclusive and sustainable growth and development through trade and international business development for micro-, small and medium-sized enterprises in developing countries, especially the least developed countries, and countries with economies in transition, through increased business capacities of those enterprises to trade and through a conducive business environment and strengthened institutional ecosystems for those enterprises.

##### **Strategy**

10.140 To contribute to the objective, the subprogramme will provide advisory services, training and awareness-building to enterprises, business support institutions and government agencies in areas that are key to the international competitiveness of micro-, small and medium-sized enterprises. Services provided to enterprises will include capacity-building in the areas of market analysis, value addition, quality improvement and environmental sustainability, e-commerce, marketing and access to finance and investment. The subprogramme also will facilitate business matchmaking through fairs and business-to-business meetings and through digital tools and online platforms, including those with a focus on women, youth and sustainability. ITC will employ its innovative approaches to create market knowledge and new market linkages for micro-, small and medium-sized enterprises, for example, through the ecomConnect and #FastTrackTech initiatives, which digitally connect enterprises to foreign markets, and the “Alliances for Action” approach, which develops business and public-private partnerships in specific value chains. The ITC SheTrades, youth employment and ethical fashion initiatives will continue to bring women-owned businesses, youth entrepreneurs and artisan and farmer communities across the globe to regional and international markets and to local support structures.

10.141 The subprogramme will also provide services to policymakers, as well as national, subnational and regional business support institutions, and support consensus-building, action-planning and decision-making processes that foster the growth and internationalization of enterprises. The subprogramme will facilitate a systematic approach for micro-, small and medium-sized enterprises to voice their experience of regulatory and procedural trade obstacles to policymakers and other stakeholders. It will also support analysis and understanding in business support institutions of the costs and benefits of different policy, strategy or regulatory options, so that they can provide considered inputs to discussions and advocate for their client enterprises. Furthermore, the subprogramme will strengthen business support institutions, including trade and investment promotion agencies, chambers of commerce, sector associations, women’s business groups, cooperatives, incubators and technical and vocational training providers, in improving the services they offer to micro-, small and medium-sized enterprises. Through tailored advisory services, assessments and workshops, ITC will guide and support the institutions through a process of change, which will include improved governance, strategy, performance measurement and connections to other parts of the business support ecosystem; product and service design, including for specific groups, such as women and youth; and new service areas, such as enterprise support in mitigating environmental risks

and becoming more climate-resilient. The subprogramme will continue to promote the benefits of a universal, rules-based, open, predictable, inclusive, non-discriminatory and equitable multilateral trading system under WTO. It will further develop its provision of comprehensive trade and market information and analytical tools such as the ITC Sustainability Map, which includes information on voluntary sustainability standards and compliance requirements.

10.142 The subprogramme plans to support Member States on issues related to the coronavirus disease (COVID-19) pandemic by participating in the implementation of the socioeconomic response plans of the United Nations. ITC will also offer globally accessible trade intelligence that addresses specific information gaps related to the COVID-19 pandemic faced by decision makers. Its advisory services will be aimed at creating and sustaining the resilience of micro-, small and medium-sized enterprises, to open new trade channels, strengthen existing ones and help improve access by micro-, small and medium-sized enterprises to digital tools that support competitiveness and trade.

10.143 The above-mentioned work is expected to result in:

(a) Micro-, small and medium-sized enterprises becoming better integrated into regional and international value chains that generate business transactions, sustainable jobs and higher incomes, especially for those at the base of the pyramid, women and youth;

(b) Improved managerial and operational performance of the business support institutions, as well as improvement of their combined performance in providing useful services to micro-, small and medium-sized enterprises as part of a supporting ecosystem;

(c) Government decision makers being better informed about options for new or improved inclusive trade-related policies, strategies and regulatory frameworks that contribute to a conducive environment for micro-, small and medium-sized enterprises to participate in international trade;

(d) Enhanced ability of micro-, small and medium-sized enterprises to develop their sustainable business practices, as well as increased awareness among policymakers, producers and businesses on topics related to trade, market potential and sustainable business practices.

10.144 The planned support on issues related to COVID-19 is expected to result in:

(a) Micro-, small and medium-sized enterprises adapting their business operations to become more resilient to external shocks while maintaining or enhancing their competitiveness;

(b) Decision makers at the enterprise, institutional and government level having the necessary information on trade opportunities and challenges, including the effect of the COVID-19 pandemic on markets.

## **External factors for 2022**

10.145 With regard to the external factors, the overall plan for 2022 is based on the following planning assumptions:

(a) Extrabudgetary resources will remain stable and largely earmarked for interventions in the focus countries of ITC operations (the least developed countries, landlocked developing countries, small island developing States, small vulnerable economies, economies in vulnerable situations, conflict-affected countries and sub-Saharan African countries);

(b) Countries in which ITC delivers large programmes will maintain political, economic and social conditions that allow for the implementation of development initiatives;

(c) The international trade and investment environments do not deteriorate significantly compared with 2020.

10.146 With regard to the COVID-19 pandemic, the subprogramme's plan is based on the assumption that the proposed deliverables and activities for 2022 will be feasible to implement. However, if the pandemic were to further have an impact on the planned deliverables and activities, they would be adjusted during 2022 within the scope of the overall objectives, strategies and mandates. Any such adjustments would be reported as part of the programme performance information.

10.147 With regard to cooperation with other entities at the global, regional national and local levels, ITC will maintain and develop its partnerships with the private sector, civil society, academia and international entities to advance the 2030 Agenda. In view of evaluation findings, special attention will be given to business support organizations in programme countries, both as programme beneficiaries and as multipliers in the outreach to micro-, small and medium-sized enterprises. Furthermore, ITC will continue to contribute to the implementation of the African Continental Free Trade Area and WTO ministerial declarations, in particular the Agreement on Trade Facilitation, and the current discussions on e-commerce, investment facilitation, women and trade, and micro-, small and medium-sized enterprises and trade.

10.148 With regard to inter-agency coordination and liaison, ITC will continue to work closely with other United Nations agencies, including through membership in the United Nations Sustainable Development Group. As a non-resident agency, ITC is adjusting its operations to fully support the United Nations reform process and contribute to United Nations regional and country teams where its expertise meets the priorities of national Governments. ITC will closely collaborate with the United Nations Conference on Trade and Development and WTO, and engage in projects related to micro-, small and medium-sized enterprise and trade development with selected partners. ITC will be active in multi-agency initiatives that facilitate sustainable and inclusive trade for micro-, small and medium-sized enterprises, for example, through a new initiative with the High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States. A number of such initiatives are envisaged with partners like the United Nations Capital Development Fund, the International Labour Organization, the Enhanced Integrated Framework, United Nations regional commissions and the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women).

10.149 ITC integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, the subprogramme has a specific initiative that is entirely focused on the economic empowerment of women: SheTrades, which leads a set of actions that increase gender equality in trade. Among them is the "SheTrades call to action", which mobilizes funding and partnerships to bring women to markets, through seven transformative actions at the levels of policy, institutions and micro-, small and medium-sized enterprises.

10.150 With regard to disability inclusion, ITC will be guided by the United Nations Disability Inclusion Strategy. It will implement actions to comply with the Strategy's 15 performance indicators, and will address disability inclusion in its next strategic planning process.

## Evaluation activities

10.151 The following evaluations completed in 2020 have guided the subprogramme plan for 2022:

- (a) 2020 annual evaluation synthesis report (meta-evaluation of 2019 evaluation findings);
- (b) Evaluation of the performance of ITC in trade and market information.

10.152 The findings of the evaluations referenced above have been taken into account for the proposed subprogramme plan for 2022. For example, ITC uses its annual evaluation synthesis reports to provide an overview of findings and critical lessons learned from internal and external evaluations conducted during the year. Those lessons inform the quality review criteria that ITC uses in its project approval process and inform project management. The key theme of the 2020 report was “Achieving the bottom line: relevant, agile and innovative”. Overall, findings indicate that ITC projects are well aligned with the mandate and results framework of ITC, with good practices in gender and equity results through trade. Sustainability of results is supported by in-country business support institutions. Long-term engagement, detailed country knowledge and good exit strategies foster ownership and trust among ITC partners and beneficiaries. Opportunities for improvement were identified in several areas of project and programme delivery to enhance the effectiveness of mainstreaming cross-cutting themes, strengthen linkages to long-term objectives and improve monitoring and evaluation data. In response, ITC will invest in more extensive mainstreaming of gender, youth, environment and social responsibility elements in its projects and programmes, and will work on enhancing the capacities of projects for utilizing theories of change, simplification and harmonization of the monitoring and evaluation corporate systems. Finally, ITC will be enhancing sustainability and coordination, including through increased engagement in United Nations Sustainable Development Cooperation Frameworks.

10.153 The following evaluations are planned for 2022:

- (a) 2022 annual evaluation synthesis report (meta-evaluation of the 2021 evaluation findings);
- (b) One evaluation at the corporate level;
- (c) One evaluation of an ITC programmatic approach;
- (d) One large project evaluation.

## Programme performance in 2020

10.154 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **More small businesses able to withstand the socioeconomic effects of COVID-19 through the “Growth for rural advancement and sustainable progress” initiative in Pakistan**

10.155 In Pakistan, the COVID-19 pandemic resulted in lockdowns and closures, slowing down the economy and threatening livelihoods, especially in the agribusiness sector. At the outset of the pandemic, the subprogramme, upon request, engaged in the United Nations socioeconomic impact assessment and response plan for Pakistan.

It conducted several targeted micro-, small and medium-sized enterprise competitiveness surveys to assess the situation and needs of Pakistani exporters that had been heavily hit by the pandemic, to support and complement the Government's response.

10.156 The subprogramme responded by coordinating delivery of €1.1 million of rapid response assistance with its implementing partner, the Food and Agriculture Organization of the United Nations; provincial partners; and government partners. The rapid response was built on five pillars: (a) fostering applications by micro-, small and medium-sized enterprises to available financing schemes; (b) providing critical inputs for such enterprises to enable continuity of operations and support the proper functioning of the value chains; (c) supporting investment in safety and hygiene; (d) establishing a matching grant facility to support market development for micro-, small and medium-sized enterprises; and (e) supporting the formulation of policy measures related to commercial and agribusiness development.

*Progress towards the attainment of the objective, and performance measure*

10.157 The above-mentioned work contributed to the objective, as demonstrated by farmers and micro-, small and medium-sized enterprises benefiting from the subprogramme's COVID-19 response in Pakistan, to ensure continuity of their operations and increase competitiveness and climate resilience in value chains or through catalysing access to finance (see table 10.22).

Table 10.22  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
—	—	Beneficiaries in Balochistan and Sindh, including 114 micro-, small and medium-sized enterprises, 74 members of market committees and over 4,000 women farmers in Balochistan, ensured continuity of their operations and increased competitiveness, including through value-chain strengthening, climate-resilient practices and access to finance

**Impact of COVID-19 on programme delivery**

10.158 During 2020, the COVID-19 pandemic had an impact on the planned deliverables and activities of the subprogramme. The impact included a change in the ITC approach to delivery to integrate hybrid and remote modalities for providing technical assistance. The postponement of several on-site events, such as the World Export Development Forum, was among the negative effects on the activities of the subprogramme. The subprogramme also expanded its offering of online, free courses through its SME Trade Academy. These changes had an impact on programme performance in 2020, as specified in results 1 and 2 below.

10.159 At the same time, however, the subprogramme identified new activities to support Member States on issues related to the COVID-19 pandemic, within the overall scope of its objectives. Those activities included repositioning of its global public goods offering, multiple publications and the addition of content to its global

public goods databases to address the increased new information and trade intelligence needs of beneficiaries. For example, the ITC flagship *SME Competitiveness Outlook* was one of the first flagship publications to address the consequences of the COVID-19 pandemic for micro-, small and medium-sized enterprises globally, and accompanying country profiles served as a component of its COVID-19 response. The modified and new deliverables contributed to results in 2020, as specified in the emerging result above.

10.160 Reflecting the importance of continuous improvement and responding to the evolving needs of Member States, ITC will mainstream lessons learned and best practices related to the adjustments to and adaptation of its subprogramme owing to the COVID-19 pandemic. Specific examples of lessons learned include that the successful continuation of planned interventions during countries' lockdown periods depended very much on the Internet access and e-readiness of beneficiaries. Business deals – which the subprogramme aims to catalyse – are a matter of confidence in the market and market partners. Their conclusion is highly dependent on the possibility of on-site visits to company premises or on displaying samples of the goods to prospective buyers. Close coordination with stakeholders, beneficiaries, funders and partners allowed ITC to agree on contingency plans and alternative modalities to ensure continued delivery of its projects. Looking forward, ITC will continue to harness the lessons learned in the area of remote facilitation of business deals in its interventions.

## **Planned results for 2022**

10.161 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed subprogramme plans and therefore show both the subprogramme performance in 2020 and the proposed subprogramme plan for 2022. Result 3 is a new planned result.

### **Result 1: the Gambia invests in jobs for young people through entrepreneurship and trade<sup>11</sup>**

#### **Programme performance in 2020**

10.162 From 2018 to 2020, the ITC youth empowerment project supported the Gambia in tackling the root causes of youth unemployment and constraints on the competitiveness of enterprises, narrowing the gaps in young people's skills, knowledge and opportunities and raising awareness of the dangers of irregular migration.

10.163 The above-mentioned work contributed to creating and/or improving at least 2,000 jobs for youth, which did not meet the planned target of 4,000 reflected in the proposed programme budget for 2020. This was mainly due to the COVID-19 pandemic, which had a significant impact on job creation as micro-, small and medium-sized enterprises globally, including in the Gambia, have struggled to retain their employees and create new employment opportunities.

10.164 Furthermore, the above-mentioned work contributed to increased awareness among 165,000 Gambian youth about business and job opportunities, as evidenced through analysis of the audiences of media campaigns and of youth participants in programme activities. This exceeded the target of 100,000 reflected in the proposed programme budget for 2020.

---

<sup>11</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 13)).

### Proposed programme plan for 2022

10.165 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will prioritize supporting youth entrepreneurs and established micro-, small and medium-sized enterprises in increasing their business resilience and taking advantage of new opportunities that have emerged during the pandemic, as well as working with value chains, such as the tourism sector. The expected progress is presented in the performance measure below (see figure 10.VI).

Figure 10.VI

**Performance measure: total number of Gambian youth with increased awareness of business and job opportunities and total number of jobs created/improved through trade (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 2: South-South trade and investment creates growth opportunity for micro-, small and medium-sized enterprises from East African countries<sup>12</sup>

#### Programme performance in 2020

10.166 The subprogramme has worked on enabling the participation of East and Southern African institutions and companies in South-South value chains in order for them to benefit from new market linkages and investments, fostering value addition and job creation. The subprogramme has also continued to provide remote and hybrid coordination, advisory services and training to its partners in the field, such as investment promotion agencies and trade associations, which in return contributed to a rebound in support for South-South negotiation and completion of ongoing trade and investment deals in the second half of 2020 in key sectors, such as agribusiness, light manufacturing, technology and services. Furthermore, the subprogramme launched a report, entitled “Designing for impact: South-South trade and investment”, showcasing how to design and implement effective South-South trade and investment programmes, with a focus on knowledge exchange and technology transfer, based on a sustainable and inclusive approach and taking into account the effects of the COVID-19 pandemic.

<sup>12</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

10.167 The above-mentioned work contributed to facilitation of a cumulative \$138 million of South-South trade and investment deals, including deals related to the production of personal protective equipment in response to the COVID-19 pandemic, which did not meet the planned target of \$155 million reflected in the proposed programme budget for 2021. The underperformance was due to COVID-19, which had a negative impact on micro-, small and medium-sized enterprises and South-South investment decisions, and also caused the cancellation of multiple on-site business matchmaking events, slowing down identification of new business and investment leads.

#### **Proposed programme plan for 2022**

10.168 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will build on the lessons learned, in particular on new modalities of virtual and hybrid investment facilitation, scaling of outreach to smallholder farmers and generation and transfer of new tools and knowledge, especially those related to productivity increases, environmental sustainability and inclusiveness. The expected progress is presented in the performance measure below (see figure 10.VII).

Figure 10.VII

**Performance measure: total amount of trade investments facilitated by the International Trade Centre's South-South trade and investment programme (cumulative)**

(Millions of United States dollars)

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

#### **Result 3: increased demand for trade intelligence as a global public good, enabling decisions for global trade recovery**

##### **Proposed programme plan for 2022**

10.169 The need and demand for increased accessibility of trade-related data has soared as a result of the impact of the COVID-19 pandemic and, in response, the subprogramme has launched a COVID-19 dashboard – a real-time tracker of COVID-19-related trade measures – in its Market Access Map. The subprogramme also adjusted its operations during the pandemic to retain momentum in assisting policymakers and business support institutions to create transformational agendas and

achieve development through trade, and in helping micro-, small and medium-sized enterprises navigate through a quickly changing landscape of COVID-19-related trade measures.

#### *Lessons learned and planned change*

10.170 The lesson for the subprogramme was to recognize the need to scale up and diversify its range of offerings within the suite of global public goods, as the business environment is becoming more and more complex. This included not only rapid response through COVID-19-related content, but also the leveraging of a range of customized products for the benefit of the Member States that are likely to benefit from stronger regional integration, and thus need trade information to identify new market opportunities. In applying the lesson, the subprogramme will increasingly invest in its global public good suite to: (a) make it more compatible with devices such as mobile phones and tablets; (b) further tailor its competitive intelligence solutions in line with the demands of Member States and business support institutions; and (c) expand the scope of covered information such as trade and regulations in services.

#### *Expected progress towards the attainment of the objective, and performance measure*

10.171 This work is expected to contribute to the objective, as demonstrated by the growth of total users of the ITC global public goods offering to 1,225,000 users and the cumulative international trade and investment transactions catalysed through that offering to \$1.093 billion by 2022 (see figure 10.VIII).

Figure 10.VIII

**Performance measure: total number of users of and total volume of transactions facilitated by the International Trade Centre's global public goods offering (cumulative)**

#### **Legislative mandates**

10.172 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolutions*

2297 (XXII)	International Trade Centre	74/228	Role of the United Nations in promoting development in the context of globalization and interdependence
64/189; 66/186	Unilateral economic measures as a means of political and economic coercion against developing countries	74/231	Development cooperation with middle-income countries
64/216; 66/215	Second United Nations Decade for the Eradication of Poverty (2008–2017)	74/235	Women in development
64/220; 66/218; 74/238	Operational activities for development of the United Nations system	75/202	Information and communications technologies for sustainable development
64/222	Nairobi outcome document of the High-level United Nations Conference on South-South Cooperation	75/203	International trade and development
		75/207	Promoting investments for sustainable development
66/288	The future we want	75/208	Follow-up to and implementation of the outcomes of the International Conferences on Financing for Development
67/213	Report of the Governing Council of the United Nations Environment Programme on its twelfth special session and the implementation of section IV.C, entitled “Environmental pillar in the context of sustainable development”, of the outcome document of the United Nations Conference on Sustainable Development	75/211	Entrepreneurship for sustainable development
		75/213	Promoting sustainable consumption and production patterns for the implementation of the 2030 Agenda for Sustainable Development, building on Agenda 21
69/15	SIDS Accelerated Modalities of Action (SAMOA) Pathway	75/215	Follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States
69/283	Sendai Framework for Disaster Risk Reduction 2015–2030		Disaster risk reduction
69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development (Addis Ababa Action Agenda)	75/216	Protection of global climate for present and future generations of humankind
70/1	Transforming our world: the 2030 Agenda for Sustainable Development	75/217	Implementation of the Convention on Biological Diversity and its contribution to sustainable development
71/243; 75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system	75/219	Towards a New International Economic Order
71/279	Micro-, Small and Medium-sized Enterprises Day	75/225	Follow-up to the Fourth United Nations Conference on the Least Developed Countries
72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system	75/227	Follow-up to the second United Nations Conference on Landlocked Developing Countries
		75/228	Promotion of sustainable tourism, including ecotourism, for poverty eradication and environment protection
73/195	Global Compact for Safe, Orderly and Regular Migration	75/229	Implementation of the Third United Nations Decade for the Eradication of Poverty (2018–2027)
73/291	Buenos Aires outcome document of the second High-level United Nations Conference on South-South Cooperation	75/230	Industrial development cooperation
74/198	International Year of Creative Economy for Sustainable Development, 2021	75/231	South-South cooperation
74/204	Commodities	75/234	

*Economic and Social Council resolutions*

1819 (LV)	United Nations export promotion programmes	2020/9	Mainstreaming a gender perspective into all policies and programmes in the United Nations system
-----------	--	--------	--

*World Trade Organization ministerial declarations and decisions*

WT/MIN (01)/DEC/1	Doha Ministerial Declaration	WT/MIN (13)/DEC	Bali Ministerial Declaration
WT/MIN (05)/DEC	Doha Work Programme: Ministerial Declaration	WT/MIN (15)/DEC	Nairobi Ministerial Declaration
WT/MIN (11)/W/2	Elements for political guidance	WT/MIN (17)/DEC	Joint Declaration on Trade and Women's Economic Empowerment

**Deliverables**

10.173 Table 10.23 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 10.23

**Deliverables for the period 2020–2022, by category and subcategory**

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
--------------------------	-----------------	----------------	-----------------	-----------------

### C. Substantive deliverables

**Consultation, advice and advocacy:** customized support to policymakers, trade support institutions and enterprises to address the international competitiveness challenges for micro-, small and medium-sized enterprises in developing countries and countries with economies in transition, to facilitate public-private dialogue on improvements to the business environment and to ensure that trade supports inclusive and sustainable development; advisory services to disadvantaged groups among micro-, small and medium-sized enterprises, such as women and youth-owned enterprises, on improving their productive capacity and market access; advisory and advocacy services for policymakers and business support institutions on how to consider the needs of micro-, small and medium-sized enterprises and disadvantaged groups in their service offer; and advocacy that allows for the systematic inclusion such enterprises and disadvantaged groups in policy and strategy processes.

**Databases and other substantive digital materials:** maintenance and development of databases and other online tools to make global trade more transparent and facilitate market access and business and policy decisions. Databases cover trade flows, tariffs and non-tariff measures, export potential, procurement opportunities, rules of origin, private standards and knowledge on sustainable trade and youth and women entrepreneurship. They include the SheTrades database with over 20,000 registered women entrepreneurs, “SheTrades Outlook”, the ITC “SME trade academy”, the Ye! community and platform (with over 20,000 young entrepreneurs), and the Trade Maps suite of tools (Market Access Map, Trade Map, Standards Map, Investment Map, Global Trade Helpdesk, Export Potential Map, Procurement Map, Trade Strategy Map and Sustainability Map), which attracts over 1 million users annually.

### D. Communication deliverables

**Outreach programmes, special events and information materials:** special events, including the World Export Development Forum, SheTrades Global, the Trade for Sustainable Development Forum, the world trade promotion organizations network conference and awards; the *International Trade Forum* magazine, with over 100,000 online views per year; Micro-, Small and Medium-sized Enterprises Day; newsletters on trade-related subjects for over 10,000 recipients; and information materials and outreach, including on export strategy, trade support networks and capacities, entrepreneurship, skills and export development opportunities, world trade trends, the multilateral trading system, regional integration, technical regulations and standards for export, and trade and the Sustainable Development Goals.

**Digital platforms and multimedia content:** design, updating and maintenance of websites and social media accounts, including the ITC website, with over 4 million views a year; dedicated websites and active social media presence engaging sustainable micro-, small and medium-sized enterprises, women entrepreneurs and youth, with over 100,000 combined followers of social media accounts.

**Library services:** on-demand services for ITC clients related to trade information; and provision of online updates on trade-related publications to trade support institutions from developing countries.

## Programme 11

### Environment

#### Overall orientation

#### Mandates and background

11.1 The United Nations Environment Programme (UNEP) is responsible for leading and coordinating action on environmental matters within the United Nations system. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolution [2997 \(XXVII\)](#), and by the Governing Council of UNEP in its decision 19/1. That decision set out the Nairobi Declaration on the Role and Mandate of the United Nations Environment Programme, which the Assembly subsequently endorsed in 1997 in the annex to its resolution [S-19/2](#) and further reaffirmed by its resolutions [53/242](#), in 1999, and [66/288](#) and [67/213](#), in 2012. Member States recognize the importance of the environmental dimension to the successful implementation of the 2030 Agenda for Sustainable Development. Within its mandate, UNEP will support Member States by providing strategic direction towards the achievement of environmental sustainability, while contributing to a balanced integration of the economic, social and environmental dimensions of sustainable development. Acknowledging the integrated nature of the challenges that countries face (e.g. gender equality, income inequality, social exclusion and lack of environmental safeguards), UNEP will play a critical role in catalysing the fulfilment of the commitments and action that drive transformational change for sustainable development.

#### Strategy and external factors for 2022

11.2 The medium-term strategy for the period 2022–2025 contains a vision of UNEP as supporting Member States in developing and implementing policies, strategies and programmes to strengthen the environmental dimension of the 2030 Agenda, but with a forward-looking 2050 perspective on planetary sustainability. The strategy depends on recognition of the existence of three planetary crises: climate change, biodiversity loss and pollution (see decision 5/2). The strategy outlines a set of transformative shifts to target the drivers of these crises. The strategy also maps out the actions needed to reshape consumption and production patterns towards more sustainable and equitable models that contribute to the UNEP vision for planetary sustainability, human health and well-being. The aim of the programme for 2022 is to focus on how UNEP can meet current and future expectations, while continuing to deliver on the promises made to Member States in 2012 through the United Nations Conference on Sustainable Development and its outcome document, entitled “The future we want” (General Assembly resolution [66/288](#)). It demonstrates the significant role of UNEP in supporting countries’ efforts to build their capacity to deliver on their environmental goals and commitments under international agreements.

11.3 Through the strategy, UNEP places the three planetary crises of climate change, biodiversity loss and pollution at the heart of its work. UNEP will tackle those crises through transformative multi-stakeholder actions that target the root causes and drivers of those crises. The aims of the strategy are to enable UNEP to make a deeper and broader impact that can underpin positive social and economic outcomes, while reducing vulnerabilities in support of sustainable development. UNEP will ensure that science remains at the centre of all decision-making processes, including on emerging issues, and that the environmental rule of law continues to improve global environmental governance, closely aligned with the multilateral environmental

agreements for which it provides the secretariats and the direction set by the 2030 Agenda. The United Nations Environment Assembly adopted decision 5/2 on 23 February 2021, in which it approved the medium-term strategy for the period 2022–2025 and the programme of work and budget for the biennium 2022–2023. The decision was designed to realign the programmatic work of UNEP within its existing mandate to optimize its crucial role as a global substantive and normative environmental organization that services Member States, while addressing the interconnectedness of the above-mentioned planetary crises, stepping up the delivery of the thematic core areas and enabling the transformation necessary to reach a sustainable future. The internal reconfiguration of UNEP is aimed at tackling the three planetary crises through three thematic subprogrammes (Climate action, Nature action and Chemicals and pollution action), two foundational subprogrammes (Science policy and Environmental governance) and two enabling subprogrammes (Finance and economic transformations, and Digital transformations). The aim of the foundational subprogrammes is to step up the delivery of the thematic core areas of work, in close alignment with the multilateral environmental agreements and the direction set by the 2030 Agenda. The aim of the enabling subprogrammes is to accelerate systemic interventions to shift global economic systems towards more sustainable modes, while leveraging the power of digital technologies. Current subprogramme 2, Resilience to disasters and conflicts, will no longer be a stand-alone subprogramme and its activities will be mainstreamed into the other subprogrammes. The reporting on the performance of that subprogramme in 2020 is presented in the annex to part A. Accordingly, the updated structure of UNEP is reflected in the proposed programme plan for 2022. Specifically, the changes are as follows:

- (a) **Subprogramme 1:** the renaming of the subprogramme from Climate change to Climate action;
- (b) **Subprogramme 2:** the discontinuation of current subprogramme 2, Resilience to disasters and conflicts, as a stand-alone subprogramme and the mainstreaming of its activities into the other subprogrammes, and the establishment in its place of a new subprogramme 2, Digital transformations in supporting environmental action, that will function as an enabling subprogramme within the existing mandates of UNEP;
- (c) **Subprogramme 3:** the renaming of the subprogramme from Healthy and productive ecosystems to Nature action;
- (d) **Subprogramme 4:** no change;
- (e) **Subprogramme 5:** the renaming of the subprogramme from Chemicals, waste and air quality to Chemicals and pollution action;
- (f) **Subprogramme 6:** the renaming of the subprogramme from Resource efficiency to Finance and economic transformations;
- (g) **Subprogramme 7:** the renaming of the subprogramme from Environment under review to Science policy.

11.4 For 2022, the UNEP planned deliverables and activities reflect the known and anticipated challenges related to the coronavirus disease (COVID-19) pandemic that are being faced by Member States. Such planned deliverables and activities include facilitating access to finance, technology and innovative solutions to help countries to build more resilient and inclusive economies and technology in a post-COVID-19 world, in particular by: using climate strategies, such as a fiscal stimulus, as the blueprint for COVID-19 recovery; closing the digital divide; improving understanding of biodiversity and health linkages to enhance science-based decision-making; providing tailored policy advice to Member States, the secretariats of

multilateral environmental agreements and implementing partners; improving waste management systems; and developing policy recommendations on building back better. Specific examples of planned deliverables and activities are provided under subprogrammes 1, 2, 3, 4, 5 and 6. The support provided to Member States on issues related to COVID-19 is expected to contribute to planned results for 2022, as described under subprogrammes 1, 2, 3, 4, 5 and 6.

11.5 With regard to cooperation with other entities at the global, regional, subregional, national and local levels, UNEP will continue raising ambitions and promoting leadership through advocacy and a normative and standard-setting approach. UNEP will support Member States through transformative strategic partnerships that deliver sustainable solutions, integrating health, education, poverty reduction, and economic and social well-being. Its partnership with the secretariats of multilateral environmental agreements will remain pivotal to securing stronger synergies and enhancing the impact of the work of the respective parties. UNEP will encourage non-governmental stakeholders, including the private sector and the finance community, to increase investment in renewable energy and improve environmental sustainability. Within the context of these partnerships, actions are aimed at ensuring deeper delivery and making a broader impact in support of sustainable development, while strengthening the ability of countries to rapidly respond to the environmental impacts of disasters and conflicts.

11.6 With regard to inter-agency coordination and liaison, UNEP has the overall responsibility for leading and coordinating the response on environmental issues within the United Nations system. Through the United Nations Environment Management Group, UNEP will catalyse international action to enhance the coherence of environmental sustainability strategies and provide more visibility to partnership initiatives. UNEP will use the opportunity provided by the United Nations development system reform to empower the United Nations to address global environmental crises. UNEP will also leverage this opportunity to enhance its guiding role, raise ambitions, and accelerate and scale up progress towards the Secretary-General's decade of action to deliver the Sustainable Development Goals. UNEP will continue to focus on ensuring that its work is well reflected and embedded in the new generation of United Nations country teams and the reinvigorated resident coordinator system through active engagement with the Development Coordination Office and to leverage its work and expertise at the regional, subregional and country levels. UNEP will integrate the priorities of the multilateral environmental agreements into these processes to enable the United Nations system to respond to environmental issues in a coordinated manner.

11.7 With regard to the external factors, the overall plan for 2022 is based on the following planning assumptions:

- (a) The continued expansion of effective partnerships and networks continuing to set the direction of science-based environmental policies for countries and major implementing agencies;
- (b) The ability of local and national approaches to be scaled up at the regional, subregional and global levels to ensure a systemic impact;
- (c) The continued availability of extrabudgetary funding, enabling countries to make the transition to sustainable development.

11.8 With regard to the COVID-19 pandemic, the proposed programme plan is based on the assumption that the proposed deliverables and activities for 2022 will be feasible to implement. However, if the pandemic were to continue to have an impact on the planned deliverables and activities, they would be adjusted during 2022 within

the scope of the overall objectives, strategies and mandates. Any such adjustments would be reported as part of the programme performance information.

11.9 UNEP integrates a gender perspective into its operational activities, deliverables and results, as appropriate. UNEP will work to fully implement Environment Assembly resolution 4/17 on promoting gender equality and the human rights and empowerment of women and girls in environmental governance. UNEP will fully support Member States in their achievement of Sustainable Development Goal 5 in the context of the environment, calling for women's full and effective participation and equal opportunities for leadership at all levels of environmental decision-making. UNEP will continue to operationalize gender and human rights dimensions and non-discrimination issues in programme and project design to ensure that gender equality and human rights perspectives are fully embedded and integrated into its operational activities, deliverables and results, as appropriate.

11.10 To contribute to a safe and fit-for-purpose physical environment at its headquarters in Nairobi, UNEP supports the United Nations Office at Nairobi with the implementation of the United Nations Disability Inclusion Strategy. In addition to full respect for human rights and the programming principle of leaving no one behind, UNEP is paying increasing attention to the situation of persons with disabilities, such as by sensitizing their needs and concerns in its programme and project design and implementation and tailoring its projects to fit the conditions and needs of local communities. Addressing the concerns and needs of persons with disabilities is particularly relevant when supporting climate change-related early warning systems or in projects that deal with environmental disasters and conflicts. UNEP will continue to reinforce the promotion and protection of the rights of persons with disabilities through its safeguard risk screening and mitigation procedure.

## **Programme performance in 2020**

### **Impact of COVID-19 on programme delivery**

11.11 During 2020, the COVID-19 pandemic had an impact on the planned deliverables and activities of UNEP, as it had to move towards alternative forms of consultations, decision-making processes and capacity-building initiatives, using a range of innovative approaches. This included the organization of virtual meetings, accompanied by pre-recorded presentations and/or preparatory online sessions. Many of the scheduled meetings and conferences were held successfully, as demonstrated by the seventh session of the annual subcommittee meeting of the Committee of Permanent Representatives and the discovery session with Member States on the UNEP medium-term strategy for the period 2022–2025, held in May 2020. However, owing to logistical implications, such as live interpretation into six languages, accreditation and the consideration of draft decisions and resolutions, many intergovernmental meetings and conferences of the parties meetings have been postponed until in-person meetings can be held. A specific example is the fifth session of the United Nations Environment Assembly, on the theme “strengthening actions for nature to achieve the Sustainable Development Goals”, which is to be held in two parts: a first session was held in February 2021, which enabled a restricted number of delegates and staff members to focus on administrative, budgetary and procedural decisions at United Nations Headquarters, while other delegates and staff members participated virtually. A second resumed session is scheduled for February 2022, which will be for in-depth substantive discussions that require in-person negotiations. The change in approach and the cancellation or postponement of planned deliverables and activities have also had an impact on the expected results for 2020, as described in the programme performance under subprogrammes 1, 4, 5 and 6.

11.12 At the same time, however, some planned deliverables and activities were adjusted during 2020, within the overall scope of the objectives of the subprogrammes, in order to support Member States on issues related to the COVID-19 pandemic. On account of travel restrictions and an increasing need for capacity-building workshops and hands-on training and guidance, UNEP had to change its approach regarding support on the ground. New activities included the provision of support to Member States, staff members and other end users by covering COVID-19 aspects in advice, publications, outreach, advocacy and other products and services. UNEP is also implementing a COVID-19 response building block strategy and has involved stakeholders in the development of a road map for recovery. As part of this response plan, UNEP examined how to move global environmental governance forward. The modified deliverables and activities contributed to results in 2020, as described in the programme performance under subprogrammes 3, 4, 5 and 6.

11.13 Reflecting the importance of continuous improvement and responding to the evolving needs of Member States, UNEP will mainstream lessons learned and best practices related to the adjustments to and adaptation of its programme owing to the COVID-19 pandemic. Specific examples of lessons learned and best practices include capitalizing on virtual engagement with partners from their capitals and from countries that do not have diplomatic representation in Nairobi to drive efficacy, reduce greenhouse gas emissions and broaden collaboration. UNEP and the secretariats of the multilateral environmental agreements have been reviewing the legal, logistical and environmental implications of modernizing methods of environmental governance and multilateralism and have been able to retain the most important principles and practices of intergovernmental meetings. This is specified in subprogramme 4.

## Legislative mandates

11.14 The list below provides all mandates entrusted to the programme.

### *General Assembly resolutions*

2997 (XXVII)	Institutional and financial arrangements for international environmental cooperation	67/213	Report of the Governing Council of the United Nations Environment Programme on its twelfth special session and the implementation of section IV.C, entitled “Environmental pillar in the context of sustainable development”, of the outcome document of the United Nations Conference on Sustainable Development
47/190	Report of the United Nations Conference on Environment and Development		
S-19/2	Programme for the Further Implementation of Agenda 21		
53/242	Report of the Secretary-General on environment and human settlements	67/251	Change of the designation of the Governing Council of the United Nations Environment Programme
65/2	Outcome document of the High-level Review Meeting on the Implementation of the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States	68/99	Strengthening of international cooperation and coordination of efforts to study, mitigate and minimize the consequences of the Chernobyl disaster <sup>1</sup>
66/288	The future we want		

<sup>1</sup> Legislative mandate of subprogramme 2, Resilience to disasters and conflicts, which is proposed to be mainstreamed, as outlined in paragraph 11.3 above.

68/215	Report of the Governing Council of the United Nations Environment Programme on its first universal session and the implementation of section IV.C, entitled “Environmental pillar in the context of sustainable development”, of the outcome document of the United Nations Conference on Sustainable Development	74/118 74/121 74/208 74/213	Strengthening of the coordination of emergency humanitarian assistance of the United Nations <sup>1</sup> Policies and programmes involving youth Oil slick on Lebanese shores <sup>1</sup> Cooperative measures to assess and increase awareness of environmental effects related to waste originating from chemical munitions dumped at sea
70/1	Transforming our world: the 2030 Agenda for Sustainable Development		
71/243	Quadrennial comprehensive policy review of operational activities for development of the United Nations system	74/216	Implementation of Agenda 21, the Programme for the Further Implementation of Agenda 21 and the outcomes of the World Summit on Sustainable Development and of the United Nations Conference on Sustainable Development
72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system	74/222	Report of the United Nations Environment Assembly of the United Nations Environment Programme
72/310	New Partnership for Africa’s Development: progress in implementation and international support	74/229	Science, technology and innovation for sustainable development
72/311	Implementation of the recommendations contained in the report of the Secretary-General on the causes of conflict and the promotion of durable peace and sustainable development in Africa	74/230 75/151	Culture and sustainable development Implementation of the outcome of the World Summit for Social Development and of the twenty-fourth special session of the General Assembly
73/238	The role of the international community in the prevention of the radiation threat in Central Asia	75/215	Follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States
73/254	Towards global partnerships: a principle-based approach to enhanced cooperation between the United Nations and all relevant partners		
74/52	Observance of environmental norms in the drafting and implementation of agreements on disarmament and arms control <sup>1</sup>	75/216 75/218	Disaster risk reduction <sup>1</sup> Implementation of the United Nations Convention to Combat Desertification in Those Countries Experiencing Serious Drought and/or Desertification, Particularly in Africa
74/81	Effects of atomic radiation		
74/115	International cooperation on humanitarian assistance in the field of natural disasters, from relief to development <sup>1</sup>	75/222	Combating sand and dust storms

*Governing Council of the United Nations Environment Programme decisions*

SS.XI/2	United Nations Environment Programme support for Haiti: strengthening environmental response in Haiti <sup>1</sup>	24/11 26/15	Intensified environmental education for achieving sustainable development Strengthening international cooperation on the environmental aspects of emergency response and preparedness <sup>1</sup>
19/1	Nairobi Declaration on the Role and Mandate of the United Nations Environment Programme	27/2	Implementation of paragraph 88 of the outcome document of the United Nations Conference on Sustainable Development
23/7	Strengthening environmental emergency response and developing disaster prevention, preparedness, mitigation and early-warning systems in the aftermath of the Indian Ocean tsunami disaster <sup>1</sup>	27/11	State of the environment and contribution of the United Nations Environment Programme to meeting substantive environmental challenges
23/11	Gender equality in the field of the environment (para. 10)		

*United Nations Environment Assembly resolutions and decisions*

1/1	Ministerial outcome document of the first session of the United Nations Environment Assembly of the United Nations Environment Programme	2/19	Midterm review of the fourth Programme for the Development and Periodic Review of Environmental Law (Montevideo Programme IV)
1/4	Science-policy interface	2/20	Proposed medium-term strategy for 2018–2021 and programme of work and budget for 2018–2019
1/8	Ecosystems-based adaptation		
1/10	Different visions, approaches, models and tools to achieve environmental sustainability in the context of sustainable development and poverty eradication	2/22	Review of the cycle of the United Nations Environment Assembly of the United Nations Environment Programme
1/11	Coordination across the United Nations system in the field of the environment, including the Environment Management Group	2/24	Combating desertification, land degradation and drought and promoting sustainable pastoralism and rangelands
1/12	Relationship between the United Nations Environment Programme and multilateral environmental agreements	2/25	Application of Principle 10 of the Rio Declaration on Environment and Development in the Latin America and Caribbean Region
1/13	Implementation of Principle 10 of the Rio Declaration on Environment and Development	3/1	Pollution mitigation and control in areas affected by armed conflict or terrorism <sup>1</sup>
1/16	Management of trust funds and earmarked contributions	3/2	Pollution mitigation by mainstreaming biodiversity into key sectors
1/17	Amendments to the Instrument for the Establishment of the Restructured Global Environment Facility	3/3	Contributions of the United Nations Environment Assembly to the high-level political forum on sustainable development
2/1	Amendments to the rules of procedure	3/4	Environment and health
2/2	Role and functions of the regional forums of ministers of the environment and environment authorities	3/5	Investing in innovative environmental solutions for accelerating the implementation of the Sustainable Development Goals
2/3	Investing in human capacity for sustainable development through environmental education and training	3/6	Managing soil pollution to achieve sustainable development
2/4	Role, functions and modalities for United Nations Environment Programme implementation of the SAMOA Pathway as a means of facilitating achievement of the Sustainable Development Goals	3/8	Preventing and reducing air pollution to improve air quality globally
		3/9	Eliminating exposure to lead paint and promoting environmentally sound management of waste lead-acid batteries
2/5	Delivering on the 2030 Agenda for Sustainable Development	3/10	Addressing water pollution to protect and restore water-related ecosystems
2/6	Supporting the Paris Agreement	3/11	Implementation of paragraph 88 (a)–(h) of the outcome document of the United Nations Conference on Sustainable Development, entitled “The future we want”
2/13	Sustainable management of natural capital for sustainable development and poverty eradication	4/1	Programme of work and budget for the biennium 2020–2021
2/15	Protection of the environment in areas affected by armed conflict	4/3	Sustainable mobility
2/16	Mainstreaming of biodiversity for well-being	4/6	Marine plastic litter and microplastics
2/17	Enhancing the work of the United Nations Environment Programme in facilitating cooperation, collaboration and synergies among biodiversity-related conventions	4/14	Sustainable nitrogen management
		4/17	Promote gender equality, and the human rights and empowerment of women and girls in environmental governance
2/18	Relationship between the United Nations Environment Programme and the multilateral environmental agreements for which it provides the secretariat	4/18	Poverty environment Nexus
		4/19	Mineral resource governance
		4/20	Fifth Programme for the Development and Periodic Review of Environmental Law (Montevideo V): delivering for people and the planet

4/21	Implementation plan “Towards a pollution-free planet”	4/23	Keeping the world environment under review: enhancing the United Nations Environment Programme science-policy interface and endorsement of the Global Environment Outlook
4/22	Implementation and follow up of United Nations Environment Assembly resolutions		

## Deliverables

11.15 Table 11.1 lists all cross-cutting deliverables, by category and subcategory, for the period 2020–2022.

Table 11.1

### Cross-cutting deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Conference and secretariat services for meetings</b> (number of three-hour meetings)	<b>3</b>	<b>3</b>	<b>4</b>	<b>4</b>
1. Meetings of the United Nations Environment Assembly	–	–	1	1
2. Meetings of the Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
3. Meetings of the Committee for Programme and Coordination	1	1	1	1
4. Meetings of the Fifth Committee	1	1	1	1
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects) <sup>a</sup>	<b>2</b>	<b>2</b>	<b>4</b>	<b>2</b>
5. Projects to assess environmental risks from disasters and conflicts <sup>a</sup>	1	1	2	1
6. Projects on institutional and legal frameworks to improve national and local preparedness to mitigate environmental risks from disasters and conflicts <sup>a</sup>	1	1	2	1
<b>Publications</b> (number of publications)	<b>3</b>	<b>3</b>	<b>4</b>	<b>3</b>
7. Publications on disaster risk reduction, preparedness assessments and road maps <sup>a</sup>	2	2	2	2
8. UNEP medium-term strategy for the period 2022–2025	–	–	1	–
9. UNEP annual report	1	1	1	1
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> advice to humanitarian and military actors on environmental footprint reduction. <sup>a</sup>				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> expert advice to Member States and international partners, upon request, on the monitoring and implementation of strategies to enhance environmental risk reduction, environmental emergency response and environmental recovery and to make progress towards the achievement of the Sustainable Development Goals. <sup>a</sup>				

<sup>a</sup> Deliverables of subprogramme 2, Resilience to disasters and conflicts, which is proposed to be mainstreamed, as outlined in paragraph 11.3 above.

## Evaluation activities

11.16 The following evaluations and self-evaluations completed in 2020 have guided the programme plan for 2022:

- (a) Biennial Evaluation Synthesis Report 2018–2019, which summarizes performance trends and highlights key implementation lessons from 60 evaluations completed during the biennium;

(b) Twenty-one evaluations of completed projects, including on greenhouse gas reduction and energy efficiency, ecosystems and biodiversity, biosafety, chemicals management, reducing climate change impacts, capacity-building and technical assistance, and international environmental law, as well as an evaluation of the Strategic Cooperation Agreement under the European Union Thematic Programme for Environment and Sustainable Management of Natural Resources including Energy;

(c) Evaluation of subprogramme 7, Science policy.

11.17 The findings of the evaluations and self-evaluations referenced above have been taken into account for the proposed programme plan for 2022. In response to recommendations in these evaluations and self-evaluations and key findings from the Office of Internal Oversight Services evaluation of UNEP in 2019, UNEP embarked upon a transformation process to improve its operational efficiency, enhance the quality of its impact and results, and provide better support to Member States. On the basis of this programme-wide strategic process, UNEP will continue to strengthen collective accountability at all levels to enhance the delivery of its programme of work. UNEP also plans to further align its deliverables to the Sustainable Development Goals and enhance its effectiveness in monitoring the Secretary-General's reforms and gender mainstreaming.

11.18 The following evaluations and self-evaluations are planned for 2022:

(a) Twenty evaluations of completed projects on climate action, nature action, chemicals and pollution action, science policy, environmental governance and the green economy in the context of sustainable development and poverty eradication;

(b) Evaluation of subprogramme 1, Climate action.

## **Programme of work**

### **Subprogramme 1**

#### **Climate action**

#### **Objective**

11.19 The objective, to which this subprogramme contributes, is to advance the transition of countries to low-emission economic development and increase their adaptation and resilience to climate change.

#### **Strategy**

11.20 To contribute to the objective, the subprogramme will support countries with the development of policies and standards, promote investment in clean energy and improve the global rate of energy efficiency, which will help Member States to make progress towards the achievement of Sustainable Development Goal 7. The subprogramme also plans to continue helping countries to implement gender-sensitive policies that achieve quantifiable carbon, social and environmental benefits, including through the reduction of emissions from deforestation and forest degradation, which helps Member States to make progress towards the achievement of Goals 5 and 15. The subprogramme will also continue building countries' technical capacity to integrate ecosystem-based management into their national adaptation plans, put in place institutional arrangements to coordinate such plans and access climate change adaptation finance for implementing such plans, thereby helping Member States to make progress towards the achievement of Goals 13 and 15. In addition, the

subprogramme will continue to collaborate with the private sector in constructive and result-oriented partnerships that leverage climate finance and scale up the ambitions and impacts of climate action globally, which will help Member States to make progress towards the achievement of targets under Goals 13 and 17.

11.21 The subprogramme plans to support Member States on issues related to COVID-19 by advocating, and providing evidence and technical support for, the use of climate strategies, such as a fiscal stimulus, in the context of sustainable COVID-19 recovery.

11.22 The above-mentioned work is expected to result in:

(a) Countries lowering their emissions of greenhouse gases and other pollutants by reducing energy intensity and demand in sectors such as lighting, appliances, equipment, buildings and transport;

(b) The increased capacity of countries to capitalize on investment opportunities that reduce greenhouse emissions from deforestation and forest degradation with adequate social and environmental safeguards;

(c) The increased capacity of countries to institutionalize, implement and monitor their national adaptation plans;

(d) Member States making use of innovative models to enhance financing for sustainable investments and the dissemination of low-emission and low-carbon technologies that help to significantly reduce greenhouse gas emissions, promote access to energy and enhance productive energy use.

11.23 The planned support on issues related to COVID-19 is expected to result in an increase in low-emission investment as a result of countries using climate strategies as the blueprint for COVID-19 recovery, as specified in more detail under result 3 below.

## **Programme performance in 2020**

11.24 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Increased investment in clean energy**

11.25 Clean energy is crucial to limiting global warming to well below 2°C and pursuing efforts to limit temperature increases to 1.5°C compared with pre-industrial levels. The subprogramme, through the Seed Capital Assistance Facility, co-financed clean energy projects aimed at increasing the availability of investment for early-stage low-emission projects.

11.26 The subprogramme also supported countries and regions in adopting clean and energy-efficient products through projects and partnerships such as the United for Efficiency initiative. Furthermore, the subprogramme produced publications, such as the *Global Trends in Renewable Energy Investment* report to provide insights, guidance and policy recommendations to increase renewable energy investment.

### *Progress towards the attainment of the objective, and performance measure*

11.27 The above-mentioned work contributed to the objective, as demonstrated by the investment of \$169 million in clean energy, which represents a 69 per cent increase compared with 2019. This increment was achieved through partnerships with United for Efficiency and the Seed Capital Assistance Facility (see figure 11.I).

Figure 11.I

**Performance measure: sustainable energy investments catalysed by the United Nations Environment Programme and its partnerships (cumulative)**

(Millions of United States dollars)

### Impact of COVID-19 on subprogramme delivery

11.28 Owing to the impact of COVID-19 during 2020, the subprogramme postponed approximately one fifth of its planned activities under the United Nations Collaborative Programme on Reducing Emissions from Deforestation and Forest Degradation in Developing Countries programme beyond 2020. This stymied the advancement of programme countries towards the achievement of Goal 13.

11.29 At the same time, however, the subprogramme identified new and modified activities to support Member States on issues related to the COVID-19 pandemic, within the overall scope of its objectives, namely: (a) advocacy for sustainable COVID-19 recovery through the rechannelling of a fiscal stimulus to climate strategies such as nationally determined contributions and national adaptation plans; (b) the leveraging of “building back better” efforts to help countries to adopt solutions to lower greenhouse gas emissions; and (c) the inclusion of sections on impacts related to COVID-19 in UNEP flagship reports, such as the *Emissions Gap Report 2020* and the *Adaptation Gap Report 2020*. The *Emissions Gap Report 2020* includes analysis of reduction of emissions due to reduced economic activity, while the *Adaptation Gap Report 2020* includes insights into the sustainable recovery options available for climate change adaptation in the post-COVID-19 world.

### Planned results for 2022

11.30 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

#### Result 1: increased climate ambition<sup>2</sup>

##### Programme performance in 2020

11.31 The subprogramme supported countries and regions to formulate and implement climate strategies through its initiatives, such as the Climate and Clean Air Coalition to Reduce Short-lived Climate Pollutants and the Climate Technology Centre and Network. The subprogramme also produced three flagship reports that link

<sup>2</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 14)).

climate science with policy and include recommendations to countries on areas in which climate ambitions could be increased.

11.32 The above-mentioned work contributed to 48 countries adopting or implementing low-emission development plans, which exceeded the planned target of 40 countries reflected in the proposed programme budget for 2020.

### **Proposed programme plan for 2022**

11.33 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will support countries to create ambitious climate-related development plans guided by science and enhance their participation in the enhanced transparency framework for action and support of the Paris Agreement. The expected progress is presented in the performance measure below (see figure 11.II).

Figure 11.II

**Performance measure: total number of countries that have adopted or implemented low-emission development plans (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 2: electric mobility: raising the ambition through a global electric mobility programme<sup>3</sup>**

#### **Programme performance in 2020**

11.34 The subprogramme launched the global electric mobility programme to support countries transitioning to low-emission mobility. Under this programme, country projects were developed to enhance the development of electric mobility frameworks and programmes. The subprogramme also implemented projects and provided technical assistance to countries and cities in the Latin American and Caribbean region through the Movilidad Eléctrica en América Latina (MOVE) initiative to promote the uptake of sustainable mobility.

11.35 The above-mentioned work contributed to two countries implementing soot-free bus fleet programmes, with the support of the global electric mobility programme, which met the planned target reflected in the programme budget for 2021.

<sup>3</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

### Proposed programme plan for 2022

11.36 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue working on the country programmes and will expand the coverage of national plans and strategies for transitioning to electric mobility. The expected progress is presented in the performance measure below (see table 11.2).

Table 11.2  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Five countries shift to low-sulfur diesel and adopt vehicle emission standards	Launch of the global electric mobility programme and commitment by 29 countries to develop comprehensive national and/or city electric mobility projects	Two countries develop soot-free bus fleet programmes, with the support of the global electric mobility programme	Four countries develop fiscal incentives for electric vehicles, with the support of the global electric mobility programme	Four additional countries develop fiscal policies for electric vehicles, with the support of the regional hubs of the global electric mobility programme

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: improved low-emission investment by leveraging climate strategies as the blueprint for COVID-19 recovery

#### Proposed programme plan for 2022

11.37 Countries are providing a fiscal stimulus in support of COVID-19 recovery efforts. To date, a large share of the funds of each fiscal stimulus have been projected to increase emissions and carbon-intensive processes, which is not compatible with the pathway for keeping temperature rises below 2°C, as described in the *Emissions Gap Report 2020* and the *Production Gap Report 2020*. Therefore, countries have requested support to align their recovery efforts with climate strategies and leverage low-emission and low-carbon options. The subprogramme supported countries to identify and address these options as part of their COVID-19 recovery efforts.

#### *Lessons learned and planned change*

11.38 The lesson for the subprogramme was that there was a high demand for support by Member States related to climate investment in the context of the COVID-19 fiscal stimulus. In particular, the alignment of the fiscal stimulus with climate strategies offers an opportunity to enable countries to achieve their climate commitments, such as nationally determined contributions under the Paris Agreement. In applying the lesson, the subprogramme will support raising awareness on how climate strategies offer sustainable COVID-19 recovery options. In addition, the subprogramme will support countries to develop projects channelling the COVID-19 fiscal stimulus into climate investments.

*Expected progress towards the attainment of the objective, and performance measure*

11.39 This work is expected to contribute to the objective, as demonstrated by the investment of \$250 billion in indicators on climate finance. With UNEP support, countries and institutions are expected to invest an additional \$50 billion of climate finance assets in clean energy and energy efficiency by 2022 (see figure 11.III).

Figure 11.III

**Performance measure: total financial assets invested in the low-emission mandate (cumulative)**

(Billions of United States dollars)

## Legislative mandates

11.40 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolutions*

69/225	Promotion of new and renewable sources of energy	74/219	Protection of global climate for present and future generations of humankind
73/230	Effective global response to address the impacts of the El Niño phenomenon	74/225	Ensuring access to affordable, reliable, sustainable and modern energy for all

*Governing Council of the United Nations Environment Programme decisions*

27/10	Climate Technology Centre and Network
-------	---------------------------------------

## Deliverables

11.41 Table 11.3 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 11.3

**Subprogramme 1: deliverables for the period 2020–2022, by category and subcategory**

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects (number of projects)</b>	<b>3</b>	<b>3</b>	<b>3</b>	<b>3</b>
1. Projects on mitigation and adaptation technologies through the Climate Technology Centre and Network	3	3	3	3

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>Publications</b> (number of publications)	<b>6</b>	<b>6</b>	<b>6</b>	<b>6</b>
2. Publications on renewable energy, energy efficiency and the energy sector	3	3	3	3
3. Publications (assessments and tools) on adaptation and resilience	3	3	3	3
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> expert advice to some 20 countries on climate matters, including South-South cooperation, ecosystem-based adaptation, climate financing, the United Nations Framework Convention on Climate Change, short-lived climate pollutants, low-emission development, renewable energy and energy efficiency, and the Warsaw Framework for REDD-plus.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> press conferences, side events, content on social media platforms and goodwill ambassador outreach and communication on adaptation to and mitigation of climate change, and the benefits of reducing emissions from deforestation and forest degradation, reaching an audience in excess of 1 million.				

## Subprogramme 2

### Digital transformations in supporting environmental action

#### Objective

11.42 The objective, to which this subprogramme will contribute, is to advance the use of data and analytics on environmental issues to allow more effective policies, decisions, actions and investments by Member States and the private sector towards the achievement of the targets of the Sustainable Development Goals related to climate, nature and pollution, and of relevant multilateral environmental agreements.

#### Strategy

11.43 To contribute to the objective, the subprogramme will support and scale up environmental change through an effectively governed and inclusive data architecture and digital ecosystem for the planet. Through its enabling role, the subprogramme will leverage digital transformations to digitize scientific knowledge and democratize its availability across the three thematic subprogrammes of UNEP. Digital tools will be used strategically to enable, accelerate and amplify impact, as well as to bring more transparency to knowledge about the state of the planet, in line with the Secretary-General's Road Map for Digital Cooperation ([A/74/821](#)), the Data Strategy of the Secretary-General for Action by Everyone, Everywhere and the System-wide Road Map for Innovating United Nations Data and Statistics ([CEB/2020/1/Add.1](#)). The subprogramme will initiate partnerships with public and private sector actors to harness data, digital technologies and computational sustainability, in order to help Member States to amplify and accelerate deeper structural transformations, with a view to driving markets, value chains, consumer behaviours and decision-making towards the achievement of environmental sustainability outcomes. Based on digital norms and governance frameworks, integrated data sets and analysis will be used to produce actionable, real-time and predictive insights, contributing to the automatic monitoring of global, national and local progress towards key targets of the Sustainable Development Goals related to climate, biodiversity and pollution and relevant internationally agreed frameworks, including multilateral environmental agreements. The subprogramme will also work with key stakeholders to improve digital literacy and use digital platforms to enable further public participation in decision-making, open innovation and citizen science. These planned activities will

help Member States to make progress towards the implementation of the targets under Goals 9, 16 and 17.

11.44 The subprogramme plans to support Member States on issues related to COVID-19 by providing normative support, upon request, on how to close the digital divide through the use of information and communications technologies procured in accordance with sustainability standards.

11.45 The above-mentioned work is expected to result in:

(a) The increased capacity of Member States to monitor the world environmental situation through the adoption of a global data architecture, governance framework, safeguards and standards for environmental and climate data and related digital public goods;

(b) Member States having the increased ability to predict and address future environment-related risks through the development of big data platforms that can measure the increasing convergence of environmental, climate stress and disaster vulnerability over space and time, as well as offering predictive analytics and an early warning system;

(c) Accelerated adoption of low-emission and low-carbon behaviours, lifestyles and products by consumers and citizens, through increased carbon emissions transparency, digital eco-labelling and digital nudging, including through e-commerce platforms and digital games;

(d) Identification and scaled adoption of digital technologies by Member States to support the conservation, sustainable use and equitable benefit-sharing of biodiversity;

(e) The improved capacity of Member States and other stakeholders to consider and develop policies, using digital transformations to achieve environmental outcomes.

11.46 The planned support on issues related to COVID-19 is expected to result in reduced environmental impacts, e-waste and carbon emissions arising from the procurement and installation of digital infrastructure used to bridge the digital divide as part of COVID-19 economic recovery efforts.

## **Planned result for 2022**

11.47 The planned result for 2022 is a new planned result.

### **Use of data and data analytics to amplify and accelerate contributions to achieving the Sustainable Development Goals**

#### **Proposed programme plan for 2022**

11.48 Digitalization is sweeping the planet, changing the economy, societies, institutions and even humanity. But it is not a prerequisite that this occurs in an inclusive, equitable or sustainable manner. In 2019, the High-level Panel on Digital Cooperation reported that digital transformation has implications for all 17 Goals and their 169 targets. Digital transformations in supporting environmental action, as an enabling subprogramme, will support Member States and the other UNEP subprogrammes to adopt digital technologies that amplify and accelerate their contributions to achieving targets related to climate, nature and pollution within the framework of the Goals and across relevant multilateral environmental agreements.

*Lessons learned and planned change*

11.49 The lesson for UNEP was that, while it has been adopting various digital transformation approaches in its programme of work for the past decade, there was an ongoing need to adopt a digital transformation approach that could consolidate UNEP data and platforms into a digital ecosystem. In applying the lesson, the subprogramme will address this challenge by adopting and helping to implement a global environmental data strategy aligned with the Secretary-General's data strategy. This will be done by building a state-of-the-art platform, the World Environment Situation Room, that consolidates planetary data, and by working with end users, Member States and the private sector to ensure that these data drive policymaking and decision-making in terms of investment, supply chains and consumer behaviours. In addition, this will enhance the analytical capabilities of UNEP to integrate environmental and climate trends, risks and opportunities into the common country assessments of United Nations country teams.

*Expected progress towards the attainment of the objective, and performance measure*

11.50 This work is expected to contribute to the objective, as demonstrated by the increased number of flagship partnerships established with major digital platforms and the increased integration of environmental and sustainability data, metrics, norms and values into digital platforms, filters and algorithms, to inform and facilitate effective decision-making and policymaking by Member States and the private sector, in order to incentivize sustainable products, behaviours and lifestyles (see table 11.4).

Table 11.4  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
—	—	—	—	Five flagship partnerships established with major digital platforms as a step towards ensuring the universal availability of consolidated planetary data, to facilitate effective decision-making and policy development for Member States and the private sector

**Legislative mandates**

11.51 The list below provides all mandates entrusted to the subprogramme.

*United Nations Environment Assembly resolutions*

4/23	Keeping the world environment under review: enhancing the United Nations Environment Programme science-policy interface and endorsement of the Global Environment Outlook
------	---

*Governing Council of the United Nations Environment Programme decisions*

23/1, sect. I	Implementation of decision SS.VII/1 on international environmental governance: Bali Strategic Plan for Technology Support and Capacity-building
---------------	---

**Deliverables**

11.52 Table 11.5 lists all deliverables, by category and subcategory, for 2022 that are expected to contribute to the attainment of the objective stated above.

Table 11.5

**Subprogramme 2: deliverables for 2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Substantive services for meetings</b> (number of three-hour meetings)	—	—	—	<b>13</b>
1. Meetings on the development of a global environmental data strategy and digital cooperation framework	—	—	—	6
2. Meetings on the development of the World Environment Situation Room and identification of transformative applications	—	—	—	6
3. Meetings on the development and implementation of the environmental action plan for the Secretary-General's Road Map for Digital Cooperation	—	—	—	1
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	—	—	—	<b>1</b>
4. Technical support in using the World Environment Situation Room for digital transformation	—	—	—	1
<b>Seminars, workshops and training events</b> (number of days)	—	—	—	<b>4</b>
5. Digital transformation for environmental sustainability – national training	—	—	—	4
<b>Publications</b> (number of publications)	—	—	—	<b>1</b>
6. Identification of digital technologies that can help to speed and scale up global actions towards targets related to climate, nature and pollution	—	—	—	1
<b>Technical materials</b> (number of materials)	—	—	—	<b>1</b>
7. Technical guidance on minimizing the environmental, climate and e-waste footprint of information and communications technologies	—	—	—	1
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> consultation events with at least 50 Member States and other entities, including from the United Nations system and stakeholders, on the global environmental data strategy and on integration methods for environmental data and analytics to support digital platforms, files and algorithms; advice to some 10 Member States and stakeholders on strengthening the adoption of data and digital transformation to achieve national climate, nature and pollution targets; advice to more than 10 Member States and stakeholders on using digital platforms and tools to enhance public participation in decision-making, open innovation and citizen science.				

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>D. Communication deliverables</b>				
<b>Digital platforms and multimedia content:</b> thematic web page; social media, multimedia video and audio content.				
<b>E. Enabling deliverables</b>				
<b>Information and communications technology:</b> consolidation of UNEP data and digital infrastructure (modules) into a publicly accessible platform and dashboards.				

## Subprogramme 3

### Nature action

#### Objective

11.53 The objective, to which this subprogramme contributes, is to strengthen the capacity of countries to manage marine, freshwater and terrestrial ecosystems through an integrated approach for maintaining and restoring their biodiversity and long-term functioning and ensuring the supply of ecosystem goods and services.

#### Strategy

11.54 To contribute to the objective, the subprogramme will continue to advance cooperation with Member States, regional entities and other partners, including the United Nations Educational, Scientific and Cultural Organization and the Food and Agriculture Organization of the United Nations (FAO), to institutionalize the health and productivity of marine, freshwater and terrestrial ecosystems in national education systems, including through the integration of the ecosystem approach in the curricula of national education institutions and frameworks, which will help Member States to make progress towards the achievement of Sustainable Development Goals 4 and 13. The subprogramme will also improve knowledge-sharing among countries and other non-governmental sectoral partners within the scope of existing transboundary cooperation frameworks by promoting the uptake and use of knowledge products, such as scenarios, spatial plans, trade-off analyses and ecosystem-based sectoral monitoring systems, disseminating publications and conducting normative work, which will help Member States to make progress towards targets under Goals 2, 6, 14 and 15. In collaboration with development banks, the financial sector and ministries of planning and finance, among other partners, the subprogramme plans to raise awareness on how to include the ecosystem approach in public and private economic decision-making. This work is expected to help Member States to make progress towards the achievement of Goals 12, 15 and 17. The subprogramme will also provide technical assistance to Member States through the mainstreaming of best practices and the development of gender-sensitive tools that link environmental change with its economic consequences, including for pilot testing of the System of Environmental-Economic Accounting, a statistical system that measures the mutual reinforcing impact of the environment and the economy, which will help Member States to make progress in the measurement of all of the Goals.

11.55 The subprogramme plans to support Member States on issues related to COVID-19 by improving understanding of biodiversity and health linkages and strengthening the capacity of countries to manage and reduce risks for both human and ecosystem health, and to integrate ecosystems and biodiversity in national and international public health decision-making through science-based approaches.

11.56 The above-mentioned work is expected to result in:

(a) More coherent and cross-sectoral participation and cooperation among countries worldwide, including at the transboundary level, for the management and effective monitoring of marine, freshwater and terrestrial ecosystems;

(b) The creation of an enabling environment for embedding ecological considerations into the financial decision-making of public and private sector entities at multiple levels (global, regional, subregional and national);

(c) The development of updated national plans for natural capital accounting by countries.

11.57 The planned support on issues related to COVID-19 is expected to result in the enhanced capacity of countries to manage and reduce risks to both human and ecosystem health and an improved understanding of the global impact of the pandemic on ecosystems.

### **Programme performance in 2020**

11.58 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

#### **Strengthened science-policy interface to mitigate the impacts of the COVID-19 pandemic on ecosystems and biodiversity**

11.59 Ecosystems and biodiversity play a critical role in the achievement of sustainable development but, if not managed well, can pose a threat to planetary stability and human well-being. Addressing the degradation of ecosystems and rapid biodiversity loss requires enhanced knowledge of the value and role of biodiversity and ecosystem services. With the outbreak of COVID-19, the subprogramme supported Member States in the development of policy recommendations that strengthen the science-policy interface and mitigate the impacts of the COVID-19 pandemic on ecosystems and biodiversity. In response to the need for information on the dimension of the impact of COVID-19 on ecosystems, the subprogramme is assessing the status of existing environmental safety systems and measures in order to suggest programmes for enhancing national systems for biosafety and biosecurity.

11.60 The subprogramme, in collaboration with the African Elephant Fund, also supported Member States in mobilizing emergency resources for improving the security of vulnerable elephant populations, in particular those that are under risk from the escalation of poaching and the decline in law enforcement capacity due to the increased impacts of COVID-19 restrictions.

#### *Progress towards the attainment of the objective, and performance measure*

11.61 The above-mentioned work contributed to the objective, as demonstrated by the increased number of countries that undertook policy implementation in the management of marine, freshwater and terrestrial ecosystems (see figure 11.IV).

Figure 11.IV

**Performance measure: total number of countries that undertook policy implementation in the management of marine, freshwater and terrestrial ecosystems (cumulative)**

### **Planned results for 2022**

11.62 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

#### **Result 1: taking the fight against marine litter to the next level<sup>4</sup>**

##### **Programme performance in 2020**

11.63 The subprogramme continued to work with countries on the prevention and control of marine litter, including through campaigns and by raising awareness of the key threats posed by litter to marine biodiversity and ecosystems. The subprogramme also initiated a scientific assessment to update existing knowledge on sources, pathways and hazards of marine litter, including plastic litter and microplastics. Through awareness-raising campaigns, scientific assessments and reinforced partnerships, the subprogramme enhanced knowledge of the key threats, sources and impacts of marine litter.

11.64 The above-mentioned work contributed to an additional 44 countries making commitments to reduce marine litter in 2020, bringing the total number of countries that had made such commitments to 107, which exceeded the planned target of 100 countries reflected in the proposed programme budget for 2020.

##### **Proposed programme plan for 2022**

11.65 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue with ongoing activities related to the Global Partnership on Marine Litter, including by supporting the development of regional and national action plans and through the Clean Seas campaign. The expected progress is presented in the performance measure below (see figure 11.V).

<sup>4</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 14)).

Figure 11.V

**Performance measure: total number of Governments that have made commitments to reduce marine litter (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: Global Peatlands Initiative for the restoration, conservation and sustainable management of peatlands<sup>5</sup>**

### **Programme performance in 2020**

11.66 The subprogramme has continued to strengthen the capacities of countries to manage global peatlands ecosystems, including through the finalization of the global peatlands assessment concept and the elaboration of the process for engaging with countries, academics and partners under the Global Peatlands Initiative. Owing to the COVID-19 pandemic, the global launch workshop for the global peatlands assessment was postponed, however, important meetings and events were held online. In collaboration with the Water Institute at the University of Waterloo, Canada, the subprogramme conducted three formative workshops for the Canadian global peatlands assessment as a case study. In addition, the subprogramme supported Member States to gather information on peatlands researchers around the world in order to complete the contact database of researchers for the global peatlands assessment.

11.67 The above-mentioned work contributed to Canada beginning to engage in the development of a baseline picture of the state of global peatlands, which met the planned target of countries beginning to engage in the development of a baseline picture of the state of global peatlands reflected in the programme budget for 2021.

### **Proposed programme plan for 2022**

11.68 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will increasingly engage with countries and partners to produce and endorse the global peatlands assessment and initiate the further development of a global peatlands inventory. The expected progress is presented in the performance measure below (see table 11.6).

<sup>5</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

Table 11.6  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021(planned) <sup>a</sup>	2022 (planned)
Brazzaville declaration on peatlands is adopted to promote better management and conservation of the Cuvette Centrale peatlands in the Congo Basin	Member States adopt United Nations Environment Assembly resolution 4/16 on the conservation and sustainable management of peatlands	An active Canadian peatlands research network is established for engagement in the development of a baseline picture of the state of global peatlands	Countries and Global Peatlands Initiative partners endorse the global peatlands assessment and initiate the development of a global peatlands inventory	Countries and Global Peatlands Initiative partners endorse the global peatlands assessment and initiate the development of a global peatlands inventory

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: lowering the risk of future pandemics and health crises by strengthening environmental considerations of human and animal health

#### Proposed programme plan for 2022

11.69 The COVID-19 pandemic has highlighted the inextricable links between human health, animal health and ecosystem health. Strengthening the environmental considerations in the human and animal health sectors is therefore a critical aspect of reducing the risk and impact of current and future health threats. The report *Preventing the Next Pandemic: Zoonotic Diseases and How to Break the Chain of Transmission*, input for which was provided by the subprogramme, provided science-based policy recommendations to Member States for reducing the risk of zoonotic spillover. Considering that UNEP has recently been invited to become a full member of the global One Health alliance,<sup>6</sup> the subprogramme has conducted extensive expert consultations with Member States to inform the development of a comprehensive intervention on One Health aimed at addressing multiple environmental dimensions of health, taking into consideration that the conception of the One Health approach needs further discussion.

#### *Lessons learned and planned change*

11.70 The lesson for the subprogramme was that targeted support by the subprogramme to address emerging health threats requires systemic, multisectoral approaches that integrate environmental and health knowledge and expertise in multiple sectors, including food systems, infrastructure development, forestry, land use planning, and domestic and international trade. In applying the lesson, the subprogramme will hold a series of consultations with State and non-State partners to develop evidence-based guidance and operationalize a multisectoral approach. It is expected that this will support Member States in building back better, by enhancing

<sup>6</sup> The One Health approach, supported by UNEP, is a cross-cutting and systemic approach to health, based on the fact that human health and animal health are interdependent and linked to the health of the ecosystems in which they coexist. UNEP is excited to deepen its collaboration and strengthen the environmental dimensions of the One Health approach with the tripartite collaboration of members from the World Health Organization, FAO and the World Organization for Animal Health.

their national systems for better readiness for prevention, early detection and rapid response to zoonotic pathways and risks.

*Expected progress towards the attainment of the objective, and performance measure*

11.71 This work is expected to contribute to the objective, as demonstrated by the number of subnational, national and international entities that committed to incorporating environmental and health considerations into their planning and operations (see figure 11.VI).

Figure 11.VI

**Performance measure: total number of subnational, national and international entities that committed to incorporating environmental considerations into the One Health approach (cumulative)**

## Legislative mandates

11.72 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolutions*

65/161	Convention on Biological Diversity	74/18	Sustainable fisheries, including through the 1995 Agreement for the Implementation of the Provisions of the United Nations Convention on the Law of the Sea of 10 December 1982 relating to the Conservation and Management of Straddling Fish Stocks and Highly Migratory Fish Stocks, and related instruments
68/205	World Wildlife Day		
68/232	World Soil Day and International Year of Soils		
72/306	Implementation of the United Nations Decade of Action on Nutrition (2016–2025)		
73/124	Oceans and the law of the sea	74/215	Agricultural technology for sustainable development
73/229	Towards the sustainable development of the Caribbean Sea for present and future generations	74/221	Implementation of the Convention on Biological Diversity and its contribution to sustainable development
73/251	World Pulses Day	74/224	Harmony with Nature
73/343	Tackling illicit trafficking in wildlife	74/227	Sustainable mountain development
		74/242	Agriculture development, food security and nutrition

*Governing Council of the United Nations Environment Programme decisions*

26/14	Global Environment Monitoring System/Water Programme	27/3	International water quality guidelines for ecosystems
26/16	Promoting South-South cooperation on biodiversity for development	27/4	Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services
		27/6	Oceans

*United Nations Environment Assembly resolutions*

1/9	Global Environment Monitoring System/Water Programme (GEMS/Water)	4/12	Sustainable management for global health of mangroves
2/10	Oceans and seas	4/13	Sustainable coral reefs management
2/14	Illegal trade in wildlife and wildlife products	4/15	Innovations in sustainable rangelands and pastoralism
4/10	Innovation on biodiversity and land degradation	4/16	Conservation and sustainable management of peatlands

**Deliverables**

11.73 Table 11.7 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 11.7

**Subprogramme 3: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>

<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> meetings of the open-ended working group on the post-2020 global biodiversity framework, supporting Member States in the development of the post-2020 global biodiversity framework.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> outreach campaigns on an ecosystem-based approach and nature-based solutions and on the United Nations Decade on Ecosystem Restoration, intended for Member States, private companies, civil society organizations and the public.				

## **Subprogramme 4**

### **Environmental governance**

#### **Objective**

11.74 The objective, to which this subprogramme contributes, is to ensure that countries achieve environmental policy coherence and abide by strong legal and institutional frameworks that increasingly implement environmental goals in the context of sustainable development at the global, regional and national levels.

#### **Strategy**

11.75 To contribute to the objective, the subprogramme will continue to facilitate relevant meetings and intergovernmental processes at the global, regional and national levels involving Governments, other United Nations entities, inter-agency mechanisms and regional ministerial forums through the provision of information management products, technical support and advisory services on environmental law and policy. Furthermore, the subprogramme will support the coherent implementation of the multilateral environmental agreements operating in similar clusters. The subprogramme will also promote the uptake of environmentally sound practices across the United Nations system through the provision of policy advice. The subprogramme also plans to invest in the development and dissemination of knowledge management tools and the delivery of training and technical assistance, including from a gender-sensitive perspective, as well as communication activities, through innovative tools and initiatives, such as the United Nations Information Portal on Multilateral Environmental Agreements, and the Programme for the Development and Periodic Review of Environmental Law (Montevideo Programme). This work is expected to help Member States to make progress towards the achievement of targets under Sustainable Development Goals 1, 5 and 16. Furthermore, the subprogramme will continue to mainstream the lessons learned through the implementation of programmes that have built strong ties with national institutions, including on poverty and the environment, and through cooperation with United Nations country teams to replicate and scale up interventions. This work is also expected to help Member States to make progress towards the achievement of Goal 17.

11.76 The above-mentioned work is expected to result in:

(a) The increased efficiency of Member States in environmental policymaking processes leading to coherent and science-based policies, including through concerted action by Member States on international environmental issues, in particular, on issues arising as a result of resolutions of the United Nations Environment Assembly, similar intergovernmental processes, and/or the implementation of decisions of the governing bodies of multilateral environmental agreements;

(b) Improved governance and partnerships with major groups and stakeholders in the development of synergistic national programmes, as well as increased integration of the environment into national and subnational planning and budgeting processes on sustainable development.

11.77 The planned support on issues related to COVID-19 is expected to result in the increased capacity of Member States to develop new policies for addressing negative environmental impacts associated with the COVID-19 pandemic.

## Programme performance in 2020

11.78 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Sustained momentum on global environmental issues by modernizing international environmental governance**

11.79 The COVID-19 pandemic provided an opportunity for the subprogramme to reassess its traditional way of work and the future of environmental governance. Areas to be addressed under this assessment included everyday office operations, activities implementation, budget implications, resource mobilization, partnerships and communication. The subprogramme reviewed legal, logistical, environmental and political implications for modernizing environmental governance to ensure that UNEP and the multilateral environmental agreements that it supports sustain momentum on global environmental governance and UNEP priorities. As a result of these considerations, the subprogramme developed and presented to Member States a study on solutions, options, opportunities and barriers for accelerating the transition to multilateralism in a virtual setting. This work was done in coordination with several offices of UNEP and the secretariats of the multilateral environmental agreements.

#### *Progress towards the attainment of the objective, and performance measure*

11.80 The above-mentioned work contributed to the objective, as demonstrated by the immediate shift to and continued organization of virtual meetings to help Member States to mitigate the threat of delayed environmental governance processes. The bureaux of intergovernmental meetings, consisting of representatives of Member States, now meet online regularly.<sup>7</sup> Recently, the 150th meeting of the UNEP Committee of Permanent Representatives was held virtually. The multilateral environmental agreements also successfully moved ahead virtually, as demonstrated by the twelfth meeting of the Open-Ended Working Group of the Basel Convention on the Control of Transboundary Movements of Hazardous Wastes and Their Disposal in June 2020 (see figure 11.VII).

<sup>7</sup> The 150th meeting of the Committee of Permanent Representatives was held on 30 April 2020; subcommittee meetings of the Committee were held in April and July 2020; the joint preparatory retreat of the bureaux of the United Nations Environment Assembly and of the Committee of Permanent Representatives was held on 9 June 2020; the meeting of the Open-ended Working Group of the Parties to the Montreal Protocol on Substances that Deplete the Ozone Layer was held from 14 to 16 July 2020; meetings of the bureau of the ad hoc open-ended expert group on marine litter and microplastics were held in July 2020; and the first informal substantive consultation meetings on General Assembly resolution [73/333](#) were held on 21 and 22 July 2020.

Figure 11.VII

**Performance measure: total number of environment-related decisions adopted by Member States in multilateral forums (cumulative)**

### **Impact of COVID-19 on subprogramme delivery**

11.81 Owing to the impact of COVID-19 during 2020, the subprogramme postponed events and meetings requiring physical technical support, which resulted in delayed project implementation and requests for project extensions beyond 2020.

11.82 At the same time, however, some planned deliverables and activities were modified to support Member States on issues related to the COVID-19 pandemic, within the overall scope of its objectives, namely, the temporary repositioning of project focus, which allowed support to be provided for the environmental dimension of the United Nations socioeconomic response and recovery plans, and the review of environmental health policies with the aim of mainstreaming them into other sectors. Furthermore, the subprogramme and UNEP, at the corporate level, had to be agile in reacting to the pandemic in order to provide much-needed technical assistance, publications on the interlinkages between the environment and health and/or research on conducting virtual meetings. This included contributions to the emergency phase, such as the development of guidelines on medical waste management and legislative approaches to the management of medical waste. These modified deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

### **Planned results for 2022**

11.83 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: strengthened environmental law implementation<sup>8</sup>**

#### **Programme performance in 2020**

11.84 In line with the strategic response of UNEP to the COVID-19 pandemic, the subprogramme contributed to enhancing the readiness of States to handle legal aspects of the additional medical waste caused by the pandemic, in particular by providing guidance to Member States on emergency policy actions to be taken to address increasing waste as a result of the pandemic and on the establishment of legal and institutional bases for improved responsiveness to future waste-related

<sup>8</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 14)).

emergencies. This information has been supplemented by a fact sheet, available in Arabic, Chinese, English, French, Russian, Spanish, Hindi and Portuguese, containing a comparative analysis of measures adopted on waste management during the pandemic.

11.85 In addition, the subprogramme increased the awareness of lawmakers and monitored the environmental impacts of the legal and regulatory measures that they took in response to the COVID-19 pandemic, such as legislative and regulatory measures that may have both positive and negative impacts on environmental protection. Moreover, a publication was released in December 2020 in which practical approaches for an environmentally sustainable economic recovery were highlighted, including examples at the national and regional levels.

11.86 Furthermore, the subprogramme strengthened the efforts of countries in the Latin American region and advanced climate change action, electric mobility and energy efficiency through the provision of legal advice and the development of three model laws under the framework of a memorandum of understanding between UNEP and the Latin American and Caribbean Parliament, which were approved by the Parliament's Commission on the Environment and Tourism. The model laws, on climate change and food security, electric mobility, and energy efficiency, are expected to be considered at the next regular Assembly of the Parliament.

11.87 The above-mentioned work contributed to 38 countries with enhanced institutional capacity and legal frameworks to enforce environmental legislation as a result of UNEP support, which met the planned target reflected in the proposed programme budget for 2020.

#### **Proposed programme plan for 2022**

11.88 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue supporting countries in developing and implementing the environmental rule of law, and in related capacities, to address internationally agreed environmental goals. The expected progress is presented in the performance measure below (see figure 11.VIII).

Figure 11.VIII

**Performance measure: total number of countries with enhanced institutional capacity and legal frameworks to enforce environmental legislation (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: leaving no one behind: more countries engage in financial shifts to deliver on the poverty-environment nexus<sup>9</sup>

### Programme performance in 2020

11.89 The subprogramme has developed, as part of the Poverty-Environment Action for Sustainable Development Goals (2018–2022) project, eight full-fledged country projects incorporating objectives related to the environment and natural resources. The subprogramme also developed five technical assistance projects in consultation with national partners and countries to: (a) develop tools that support budgeting and financing for marine and inland water resources in the Asia-Pacific region; (b) increase regional priorities and investments in climate- and gender-sensitive agriculture in sub-Saharan Africa; (c) deepen sustainable finance facilities in Indonesia by integrating the environment and poverty into budget processes; (d) influence climate, environmental and budgeting expenditures and optimize revenue collection and benefit-sharing mechanisms among peoples and persons and those in vulnerable situations, in order to promote environmental sustainability in the United Republic of Tanzania; and (e) strengthen existing sustainable approaches in South Africa, while also promoting dialogue among key actors involved in the Sustainable Development Goals and the implementation of nationally determined contributions under the Paris Agreement so that States can reduce national emissions and adapt to the impacts of climate change.

11.90 The above-mentioned work contributed to two countries mainstreaming poverty and environmental sustainability in their national policies, plans, regulations or budgets while shifting public and private finance investment options towards poverty eradication and environmental sustainability, which did not meet the target of seven countries reflected in the programme budget for 2021. The target could not be met because the subprogramme took longer than anticipated to satisfactorily launch the project. As a consequence, an internal review was conducted of the UNEP partnership approval process. Implementation of the recommendations resulting from that review is expected to make the project approval process nimbler in the future.

### Proposed programme plan for 2022

11.91 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will work at the global, subregional, regional and national levels to integrate environmental goals into sustainable development plans, strategies, policies, action plans or budgeting processes. The expected progress is presented in the performance measure below (see table 11.8).

Table 11.8  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021(planned) <sup>a</sup>	2022 (planned)
Countries begin mainstreaming poverty and environment considerations into national processes, with a stronger focus on finance and	Countries adopt United Nations Environment Assembly resolution 4/18 on the poverty-environment nexus, which emphasizes	Two countries mainstream poverty and environmental sustainability in their national policies, plans, regulations or budgets while	Two countries mainstream poverty and environmental sustainability in their national policies, plans, regulations or budgets while	Six additional countries mainstream poverty and environmental sustainability in their national policies, plans, regulations or

<sup>9</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

2018 (actual)	2019 (actual)	2020 (actual)	2021(planned) <sup>a</sup>	2022 (planned)
investment aligned with the Sustainable Development Goals with the support of the Poverty-Environment Action for Sustainable Development Goals initiative	the need for countries to shift public and private finance investment options towards poverty eradication and environmental sustainability	shifting public and private finance investment options towards poverty eradication and environmental sustainability	shifting public and private finance investment options towards poverty eradication and environmental sustainability	budgets while shifting public and private finance investment options towards poverty eradication and environmental sustainability

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: improved coherence of environmental policies by building environmental law capacity**

#### **Proposed programme plan for 2022**

11.92 Strong environmental laws and institutions are essential for planetary health, nature, pandemic recovery and resilience. They underpin the successful implementation of any environmental goal, policy or commitment, including the 2030 Agenda and the Goals. The subprogramme has conducted its environmental law activities through sequential 10-year periodic reviews under the Programme for the Development and Periodic Review of Environmental Law (Montevideo Programme). The work on environmental law carried out by UNEP includes, but is not limited to: (a) the development of framework laws and sectoral environmental laws in several countries, as well as of model laws, such as the Model Law and Guidance for Regulating Lead Paint; (b) the strengthening of environmental institutions, including the ministry of environment and environmental protection authorities in several countries, through training events and on-demand publications on emergent environmental issues; (c) improvement of the capacity of various legal stakeholders, in particular the judiciary, including through the development of information tools, guidance material and effective models for the development and implementation of environmental law and through the sharing of good practices and lessons learned; (d) the development and advancement of new measures in legislation that contribute to environmental protection in many countries, in line with national circumstances; (e) the recognition and elaboration of linkages between human rights and the environment at both the international and national levels; and (f) enhanced synergies in the implementation of multilateral environmental agreements. The current iteration is the fifth Programme for the Development and Periodic Review of Environmental Law (Montevideo Programme V), which was adopted by the United Nations Environment Assembly in March 2019. The intergovernmental programme covering the period from January 2020 to December 2029, is designed to guide the identification and implementation of priority actions in the field of environmental law to be undertaken by UNEP in collaboration with other relevant actors.

#### *Lessons learned and planned change*

11.93 The lesson for the subprogramme was that there was an increased demand by Member States for normative products and tools to enhance and develop environmental law capacity and strengthen policy coherence, such as the law and climate change toolkit, which is an online and open database providing Member States with access to legislation from around the world related to climate change, including both overarching climate change laws and sectoral legislation. The tools and digital

resources developed by UNEP in that regard are used for technical cooperation in implementing the wider programme to advance the environmental rule of law at cross-cutting levels, in particular in the environmental policy development of Member States. In applying the lesson, the subprogramme developed digital coherence platforms, such as the law and environment assistance platform,<sup>10</sup> that bridged the policy coherence and environmental law capacity gap. That tool allows Member States to directly request technical support from UNEP and partners, while providing a comprehensive and searchable knowledge base of relevant environmental legislation, cases, model laws and other guidance products.

*Expected progress towards the attainment of the objective, and performance measure*

11.94 This work is expected to contribute to the objective, as demonstrated by the increased number of digital resources on environmental law to which Member States have access, including relevant environmental legislation, cases, model laws, legislative toolkits and environmental law guidance products. The work is also expected to increase the awareness of Member States about efforts to combat environmental problems and increase the capacity of Member States in policy development on environmental law through access to best practices and success stories in one or more environmental fields (see figure 11.IX).

Figure 11.IX

**Performance measure: access of Member States to digital resources on environmental law (cumulative)**

(Number of digital resources)

## Legislative mandates

11.95 The list below provides all mandates entrusted to the subprogramme.

*Governing Council of the United Nations Environment Programme ministerial declarations and decisions*

SS.VI/1	Malmö Ministerial Declaration	SS.XII/3	International environmental governance
SS.VII/4	Compliance with and enforcement of multilateral environmental agreements	25/11	Environmental law
SS.VIII/1, sect. II	Implementation of decision SS.VII/1 on international environmental governance: strengthening the scientific base of the United Nations Environment Programme	27/5	Coordination across the United Nations system, including the Environment Management Group
SS.XI/5	Environmental law	27/9	Advancing justice, governance and law for environmental sustainability

<sup>10</sup> Examples of such tools include the law and environment assistance platform and the United Nations Information Portal on Multilateral Environmental Agreements ([www.informea.org/en](http://www.informea.org/en)).

## United Nations Environment Assembly resolutions

6. Global reports on environmental law	4	15	8	8
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> expert advice to approximately 15 Member States, upon request, on the monitoring and implementation of multilateral environmental agreements, legislative strategies and frameworks to counter environmental degradation resulting from climate change and environmental crime and make progress towards the Sustainable Development Goals.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> the United Nations Information Portal on Multilateral Environmental Agreements, which provides access to nearly 500 treaties, over 12,000 decisions made by governing bodies, over 9,000 national plans and reports, and a large body of laws, court decisions, and other documents and literature, with over 150,000 users; and the e-learning platform of the portal, which has over 20,000 registered users from 190 countries.				

## Subprogramme 5

### Chemicals and pollution action

**Objective**

11.97 The objective, to which this subprogramme contributes, is to advance the sound management of chemicals and waste and improve air quality at all levels in order to achieve a healthier environment and better health for all.

## Strategy

11.98 To contribute to the objective, the subprogramme will continue to work with Governments, the private sector and civil society within the framework of relevant multilateral environmental agreements and the broader international chemicals and waste agenda by providing technical advice, policy support and capacity-building to develop and implement policies, strategies, legislation and action plans on sound chemicals and waste management, including, but not limited to, mercury, persistent organic pollutants, ozone-depleting substances and lead, as well as on waste prevention and the sound management of electronic and other forms of waste. This work will be carried out at the global, regional, subregional, national and subnational levels.

11.99 The subprogramme will also provide technical and advisory support to Governments, in particular regarding the identification of national emissions sources and the building of institutional capacity to develop and use air quality assessments with publicly accessible monitoring data and information. Furthermore, the subprogramme will support Governments in the development of policies, standards and legal, regulatory, fiscal or institutional frameworks and mechanisms for the reduction of air pollutants. This is expected to help Member States to make progress towards the achievement of targets under Sustainable Development Goals 3, 7 and 11. The subprogramme will also continue to support awareness-raising efforts on the importance of air quality, in particular through the “BreatheLife” campaign, which encourages Governments to work for cleaner air by raising awareness and implementing new solutions.

11.100 The subprogramme plans to support Member States on issues related to COVID-19 by improving waste management systems and strengthening capacities to soundly manage medical and household waste, while also enhancing the overall understanding of the global impact of the COVID-19 pandemic on pollution, including marine litter.

11.101 The above-mentioned work is expected to result in:

(a) An increased number of countries adopting and implementing policies and legal, institutional or fiscal strategies and mechanisms for the sound management of chemicals and waste, as well as enhanced non-governmental action and involvement by industry and civil society organizations to advance the broader international chemicals and waste agenda;

(b) A reduction in the release of pollutants to the environment, leading to a reduced burden on the environment and human health;

(c) An improved ability of countries to identify national emissions sources and develop targeted solutions to reduce air pollution;

(d) An increase in the development and adoption of air quality policies, as well as the enhanced deployment of good practices or technologies and the consideration of alternatives, including low-emission and low-carbon transport solutions, such as walking, cycling and electric mobility;

(e) The increased capacity of countries to communicate about air quality in an understandable way and to make air quality data and other relevant information publicly available.

11.102 As specified in more detail in result 3 below, the planned support on issues related to COVID-19 is expected to result in the enhanced capacity of countries to deal with the surge in waste related to the COVID-19 pandemic in an environmentally sound manner and an improved understanding of the global impact of the pandemic on pollution.

## Programme performance in 2020

11.103 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Sound management of chemicals and waste associated with COVID-19 for better health and less hazardous pollution

11.104 Chemicals play a critical role in sustainable development but, if not managed well, they can pose a threat to people and the planet. Optimizing human health and environmental outcomes requires the sound management of chemicals and waste. With the outbreak of COVID-19, the subprogramme launched a rapid-response initiative to provide technical assistance and support for raising awareness about the pollution-related dimensions of the pandemic. This was done through the development and dissemination of fact sheets on the promotion of the sound management of chemicals and waste, with a focus on the short and long-term health implications of response actions, including open burning and dumping of potentially infectious waste related to COVID-19.

11.105 The subprogramme also strengthened the science-policy interface for chemicals and pollution by initiating a study on issues of concern, with the aim to better inform policymakers.

#### *Progress towards the attainment of the objective, and performance measure*

11.106 The above-mentioned work contributed to the objective, as demonstrated by the increased number of countries that took measures on the sound management of chemicals and/or on the implementation of multilateral environmental agreements and the Strategic Approach to International Chemicals Management, evidenced by the nine additional countries that updated their national implementation plans aimed at protecting human health and the environment from exposure to persistent organic pollutants (see figure 11.X).

Figure 11.X

**Performance measure: total number of countries that updated their national implementation plans aimed at protecting human health and the environment from exposure to persistent organic pollutants (cumulative)**

### Impact of COVID-19 on subprogramme delivery

11.107 In response to the pandemic, the subprogramme modified activities to support Member States on issues related to COVID-19, within the overall scope of its objectives, namely, technical assistance and awareness-raising to meet the immediate demand for guidance on how to deal with the impact of COVID-19 to protect people

and the environment. The new deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

## **Planned results for 2022**

11.108 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: strengthened pollution action to protect people and the planet<sup>11</sup>**

#### **Programme performance in 2020**

11.109 The subprogramme has catalysed action by civil society to promote sound management of chemicals and waste through the Global Alliance to Eliminate Lead Paint, for which UNEP and the World Health Organization jointly provide the secretariat. Under this voluntary partnership, the subprogramme, in collaboration with civil society partners, raised awareness of the negative health impacts of exposure to the lead in paint, as well as providing expertise and advice on establishing legal limits on lead paint. The subprogramme also developed guidance to build the capacity necessary to set up an integrated health and environment observatory surveillance and information management system that will enable African countries to establish evidence-based policies and make sustainable decisions on the sound management of chemicals and the related disease burden. Furthermore, under the UNEP Global Mercury Partnership, the subprogramme engaged civil society to minimize the amount of mercury released into the air, water and land, and to assist with the effective implementation of the Minamata Convention on Mercury.

11.110 The above-mentioned work contributed to 36 civil society organizations having taken action on improving chemicals management, which exceeded the planned target of 30 civil society organizations reflected in the proposed programme budget for 2020.

#### **Proposed programme plan for 2022**

11.111 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will catalyse action by civil society and other stakeholders on pollution prevention and control, such as through awareness-raising, public communications, monitoring efforts and education. The expected progress is presented in the performance measure below (see figure 11.XI).

---

<sup>11</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 14)).

Figure 11.XI

**Performance measure: total number of civil society organizations that have taken action on improving chemicals management (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: stepping up worldwide efforts to advance the sound management of waste<sup>12</sup>**

### **Programme performance in 2020**

11.112 The subprogramme has supported countries with the development of waste management strategies. The subprogramme also specifically provided guidance on plastic pollution and marine litter prevention and control. Furthermore, the subprogramme continued to build waste management capacity by promoting the inclusion of that topic in university curricula.

11.113 The above-mentioned work contributed to 25 countries implementing policies on the prevention and sound management of waste, which exceeded the planned target of 22 countries reflected in the programme budget for 2021.

### **Proposed programme plan for 2022**

11.114 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will assist countries in developing and/or implementing policies, strategies and mechanisms to prevent or reduce waste, and to ensure the environmentally sound treatment or disposal of waste, including from disaster- or conflict-related environmental emergencies. The expected progress is presented in the performance measure below (see figure 11.XII).

<sup>12</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

Figure 11.XII

**Performance measure: total number of countries implementing policies on the prevention and sound management of waste (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: strengthened waste and wastewater management systems to prevent and minimize waste and pollution associated with COVID-19**

#### **Proposed programme plan for 2022**

11.115 The COVID-19 pandemic has had negative environmental impacts on waste and the proper handling of waste, which is also critical to preventing the further spread of the virus. In addition to the soaring demand for masks and other personal protective equipment, some countries reported that the amount of plastic waste, especially plastic packaging, has increased by 15 per cent because of increased food deliveries. Furthermore, evidence suggests that populations with underlying illnesses caused by air pollution are more vulnerable to COVID-19. The subprogramme supported informed decision-making as part of the UNEP rapid response to the COVID-19 pandemic, responding quickly to information requests by Member States. This included the publication of a series of fact sheets on the environmental dimension of COVID-19 waste management, as well as other environmental factors relevant to the COVID-19 response (e.g. the role of air pollution and the risks of using certain chemicals), thereby reducing the amount of pollution caused by the surge in waste associated with COVID-19.

#### *Lessons learned and planned change*

11.116 The lesson for the subprogramme was that previous studies relevant to addressing urgent information requests by Member States, such as those related to environmentally sound technologies for the treatment of health-care waste, were challenging to track down because such highly technical and relevant publications were not included in the knowledge repository in the context of the pandemic. By further improving the internal knowledge management system, the challenge of ensuring timely identification of and access to past knowledge can be addressed, in order to provide targeted support more effectively and rapidly to stakeholders on the environmental dimension of waste management in the context of the pandemic. In applying the lesson, the subprogramme will work towards an online repository of the Organization's relevant pollution-related publications. Furthermore, the subprogramme will deliver a series of webinars and develop model legislation and policy guidance to help countries institutionalize their response to the pandemic, thereby supporting them in building back better by strengthening their waste and wastewater management systems and improving their resilience.

*Expected progress towards the attainment of the objective, and performance measure*

11.117 This work is expected to contribute to the objective, as demonstrated by the number of countries that strengthened their medical and household waste and wastewater management systems (see figure 11.XIII).

Figure 11.XIII

**Performance measure: total number of countries that strengthened their medical and household waste and wastewater management systems (cumulative)**

## Legislative mandates

11.118 The list below provides all mandates entrusted to the subprogramme.

### *General Assembly resolutions*

74/212 International Day of Clean Air for blue skies

### *Governing Council of the United Nations Environment Programme decisions*

SS.IX/1	Strategic Approach to International Chemicals Management	SS.XII/5	Enhancing cooperation and coordination within the chemicals and wastes cluster
SS.XII/4	Consultative process on financing options for chemicals and wastes	24/4	Prevention of illegal international trade
		25/5	Chemicals management, including mercury
		27/12	Chemicals and waste management

### *United Nations Environment Assembly resolutions*

1/5	Chemicals and waste	4/6	Marine plastic litter and microplastics
1/6	Marine plastic debris and microplastics	4/7	Environmentally sound management of waste
1/7	Strengthening the role of the United Nations Environment Programme in promoting air quality	4/8	Sound management of chemicals and waste
2/11	Marine plastic litter and microplastics	4/9	Addressing single-use plastic products pollution
3/7	Marine litter and microplastics		

## Deliverables

11.119 Table 11.10 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 11.10

**Subprogramme 5: deliverables for the period 2020–2022, by category and subcategory**

<b>Publications</b> (number of publications)	<b>1</b>	<b>1</b>	<b>1</b>	<b>1</b>
3. Global assessment of the state of and trends in laws, regulations and fiscal policies for sound chemicals and waste management	1	1	1	1
<b>Technical materials</b> (number of materials)	<b>3</b>	<b>3</b>	<b>4</b>	<b>4</b>
4. Technical reports on status, trends and related risks and improvements in chemicals and waste management at various scales	1	1	2	2
5. Technical guidance on action plans related to air quality at various scales, in particular at the subnational, national and regional levels	2	2	2	2
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> advice to five countries on environmental practices and waste management, and to five countries and stakeholders on policymaking, standards and strategy development.				
<b>Fact-finding, monitoring and investigation missions:</b> missions conducted in three countries, with a focus on status and trends relating to chemicals management, waste management and air quality, including on marine litter and other forms of pollution.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> outreach programmes, campaigns and information materials disseminated to Governments, private companies, civil society organizations and the public to increase awareness on marine and other forms of pollution, sound chemicals management and action to improve air quality.				

## Subprogramme 6

### Finance and economic transformations

#### Objective

11.120 The objective, to which this subprogramme contributes, is to advance the transition by countries and businesses to sustainable development through multiple pathways, including the uptake of green economy in the context of sustainable development and poverty eradication, the adoption of sustainable consumption and production patterns and the decoupling of economic activity from unsustainable resource use and environmental impact, while improving human well-being.

#### Strategy

11.121 To contribute to the objective, the subprogramme will continue to deliver country assessments, promote the uptake of policy planning and implementation tools, and convene knowledge platforms that will enable policymakers and businesses to actively pursue sustainable pathways. The subprogramme will continue to draw on the capacity of UNEP to generate and disseminate knowledge and its extensive network of partners in the public and private sectors, including the financial sector, as well as civil society and academia. The subprogramme also plans to promote

sustainable patterns of consumption and production with the aim of reducing climate impacts, biodiversity loss and pollution, through policy recommendations on the green economy in the context of sustainable development and poverty eradication, on sustainable finance and on business practices and tools and knowledge that allow consumers to make informed choices. The subprogramme will promote sustainable lifestyles and consumption patterns through educational and awareness-raising campaigns and initiatives that respond to generational and gender-specific roles and the needs of consumers. In addition, the subprogramme will support Governments and subnational governments to strengthen institutional capacities and implement national development plans, policies and/or action plans; and will support businesses to adopt and implement sustainable management and cleaner production practices, as well as increasingly to invest in sustainable technologies. This work will help Member States to make progress towards the achievement of targets under Sustainable Development Goals 1, 4, 5, 7, 8, 9, 11, 12, 13 and 17.

11.122 The subprogramme plans to support Member States on issues related to COVID-19 by developing policy recommendations on building back better and strengthening the capacities of State and non-State partners (including industry and civil society) to integrate environmental sustainability and sustainable patterns of consumption and production into their decision-making approaches, including with regard to sustainable finance, trade and infrastructure.

11.123 The above-mentioned work is expected to result in:

(a) Integrated sustainable development pathways, including sustainable consumption, and the production and implementation of policies and frameworks on inclusive green economy in the context of sustainable development and poverty eradication, resulting in improved resource efficiency and human well-being and reduced ecological and material footprints;

(b) Private sector actors, including in the financial sector, improving their approaches to environmental sustainability, including through sustainable consumption, production and investment, to create sustainable and more inclusive markets and economies;

(c) Public, private and individual consumers having access to, and increasingly consuming and demanding, sustainable goods and services through sustainable consumption decisions and lifestyles.

11.124 The planned support on issues related to COVID-19 is expected to result in building back better, specifically by accelerating sustainable consumption and production.

## **Programme performance in 2020**

11.125 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Sustainable consumption through sustainable procurement**

11.126 Societies underpin one of the three pillars of sustainable development. The subprogramme supported Governments to be better informed about sustainable public procurement practices and to make choices which contribute to progress towards Goal 12.

11.127 The subprogramme also developed and delivered evidence-based impactful messages and technical support for Governments to adopt sustainable public procurement approaches. These approaches have gained momentum during the COVID-19 pandemic, with enhanced interest from Member States to build back better.

*Progress towards the attainment of the objective, and performance measure*

11.128 The above-mentioned work contributed to the objective, as demonstrated by the increased number of countries implementing sustainable public procurement policies to enhance sustainable consumption (see figure 11.XIV).

Figure 11.XIV

**Performance measure: total number of countries implementing sustainable public procurement policies (cumulative)**

**Impact of COVID-19 on subprogramme delivery**

11.129 Owing to the impact of COVID-19 during 2020, the subprogramme had to change its approach to the conduct of country-level activities. As global travel restrictions prevented staff from undertaking planned field visits, capacity-building workshops, policy advisory and technical training sessions and, where possible, meetings, training and other events were conducted online. This allowed the continuation of work and of projects involving the sharing of information, the organization of dialogue, and the dissemination of knowledge products.

11.130 At the same time, however, the subprogramme identified new activities to support Member States on issues related to the COVID-19 pandemic, within the overall scope of its objectives, namely the alignment of each Government's work with its policy priorities in the context of COVID-19 and the proactive exploration of opportunities to mainstream approaches centred on the inclusive green economy in the context of sustainable development and poverty eradication and on sustainable consumption and production in national economic stimulus packages and recovery plans. These deliverables, including COVID-19 related policy briefs, joint webinars and online events, contributed to results in 2020, as specified in the emerging result for 2020 above.

**Planned results for 2022**

11.131 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

## **Result 1: countries on a pathway to sustainable development<sup>13</sup>**

### **Programme performance in 2020**

11.132 The subprogramme has supported seven additional countries in transitioning towards sustainable development. In addition, during the COVID-19 pandemic, the subprogramme responded rapidly to requests by Member States related to COVID-19 and building back better, through the provision of policy recommendations, webinars, online workshops and knowledge products. The subprogramme also contributed to several United Nations policy briefs on COVID-19, such as on employment and on fiscal policies. Policies can play a key role in the recovery efforts of Member States, such as by removing inefficiencies in public expenditures and raising additional fiscal revenues that can be directed towards immediate COVID-19 relief measures while supporting medium- to long-term investment and planning for a more sustainable, resilient and inclusive future. Furthermore, the subprogramme built the capacity of developing countries through South-South cooperation to promote green economies in the context of sustainable development and poverty eradication. For example, the subprogramme provided a forum for countries from the Association of Southeast Asian Nations (ASEAN) region to share their experiences on national-level initiatives for transitioning to resource-efficient, low-emission, low-carbon and socially inclusive economies.

11.133 The above-mentioned work contributed to 32 countries having implemented green economy policies in the context of sustainable development and poverty eradication, which exceeded the planned target of 29 countries reflected in the proposed programme budget for 2020.

### **Proposed programme plan for 2022**

11.134 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective and in response to recent developments, the subprogramme's work will evolve to include a focus on specific finance and economic transformation policies needed to accelerate sustainable patterns of consumption and production in support of outcomes related to climate, nature and chemicals and pollution. The expected progress is presented in the updated performance measure below (see figure 11.XV).

<sup>13</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 14)).

Figure 11.XV

**Performance measure: total number of countries that have implemented green economy policies in the context of sustainable development and poverty eradication (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: accelerating progress towards sustainable consumption and production<sup>14</sup>**

### **Programme performance in 2020**

11.135 The subprogramme's work has been strongly influenced by the impact of the COVID-19 pandemic on industries and value chains, in particular on micro-, small and medium-sized enterprises. In response to requests by Member States, the subprogramme developed and provided information, tools and policy recommendations to promote the uptake of more sustainable consumption and production practices. This was done across several high-impact value chains, including plastics, textiles, building and construction, food, and mining. The subprogramme also supported the public, private and financial sectors in leading the shift to more sustainable business practices, which resulted in 38 organizations promoting new sustainability actions. Of those organizations, eight stakeholders of the building and construction value chain engaged in the promotion of more sustainable solutions, thereby achieving the Concrete Sustainability Council certification through collaboration facilitated by the One Planet network programme. Furthermore, with the launch of the Global Life Cycle Assessment Data Access network, the subprogramme has improved access to life cycle data.

11.136 The above-mentioned work contributed to 31 countries adopting and implementing sustainable consumption and production frameworks, policies and/or action plans, which met the planned target reflected in the proposed programme budget for 2021.

### **Proposed programme plan for 2022**

11.137 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective and in response to recent developments, the subprogramme's work will evolve to include support to businesses for finance and economic transformations through alliances, principles, practices, standards and frameworks, established or adopted with UNEP support to enhance environmental sustainability. The expected progress is presented in the updated performance measure below (see figure 11.XVI).

<sup>14</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

Figure 11.XVI

**Performance measure: total number of countries adopting and implementing sustainable consumption and production frameworks, policies and action plans (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: making finance and economies more inclusive, sustainable and resilient**

#### **Proposed programme plan for 2022**

11.138 Unsustainable management and consumption of resources remains an ongoing challenge and the impact of the COVID-19 pandemic necessitates renewed and holistic policy changes to ensure the achievement of the agreed sustainable consumption and production targets of the Sustainable Development Goals. The subprogramme developed policy recommendations and guidance on sustainable, inclusive and resource-smart recovery that will help to stimulate growth and create jobs and prosperity for all, while reducing pressures on the planet.

#### *Lessons learned and planned change*

11.139 The lesson for the subprogramme was that there was increased demand from Member States for support on the implementation of an approach that is more focused on finance and economic transformations in order to accelerate changes to address challenges that the world is facing related to the climate, nature loss and pollution, and to support efforts to build back better. In applying the lesson, the subprogramme will collaborate and support public, private and consumer constituencies with enhanced science-based and digital delivery. That would meet Member States' demands for a more focused approach in which timelier, more accessible and sector-relevant online information are used to inform decision-making that facilitates finance and economic transformations. One example of such efforts is the ongoing research and science-policy analysis related to sustainable resource management, in collaboration with partners such as the International Resource Panel, that can contribute to addressing the underlying causes of biodiversity loss.

#### *Expected progress towards the attainment of the objective, and performance measure*

11.140 This work is expected to contribute to the objective, as demonstrated by the number of outcome-level sustainable consumption and production activities reported by countries in reporting on Goal 12 in their voluntary national reports (see figure 11.XVII).

Figure 11.XVII

**Performance measure: number of outcome-level sustainable consumption and production activities reported by countries in reporting on Sustainable Development Goal 12 in their voluntary national reports (annual)**

## Legislative mandates

11.141 The list below provides all mandates entrusted to the subprogramme.

### *General Assembly resolutions*

74/209	International Day of Awareness of Food Loss and Waste	75/229	Promotion of sustainable tourism, including ecotourism, for poverty eradication and environment protection
74/214	Sustainable tourism and sustainable development in Central Asia		

### *Governing Council of the United Nations Environment Programme decisions*

27/7	Work by the United Nations Environment Programme on sustainable consumption and production	27/8	Green economy in the context of sustainable development and poverty eradication
------	--	------	---

### *United Nations Environment Assembly resolutions*

2/8	Sustainable consumption and production	4/2	Promoting sustainable practices and innovative solutions for curbing food loss and waste
2/9	Prevention, reduction and reuse of food waste	4/4	Addressing environmental challenges through sustainable business practices
4/1	Innovative pathways to achieve sustainable consumption and production	4/5	Sustainable infrastructure

## Deliverables

11.142 Table 11.11 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 11.11

**Subprogramme 6: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>

4. Seminars and training events on resource efficiency	15	15	15	–
5. Seminars and training events on finance and economic transformation approaches	–	–	–	15
<b>Publications</b> (number of publications)	<b>5</b>	<b>5</b>	<b>5</b>	<b>3</b>
6. Publications on resource efficiency, the green economy in the context of sustainable development and poverty eradication, and sustainable consumption and production	5	5	5	–
7. Publications on finance and economic transformation approaches	–	–	–	3
<b>Technical materials</b> (number of materials)	<b>10</b>	<b>10</b>	<b>10</b>	<b>10</b>
8. Technical materials, assessments, tools and methodologies on the green economy in the context of sustainable development and poverty eradication	5	5	5	–
9. Assessments, tools and methodologies on sustainable consumption and production	5	5	5	–
10. Technical materials on finance and economic transformation approaches	–	–	–	10
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> on sustainable lifestyles, resource efficiency, the green economy in the context of sustainable development and poverty eradication, sustainable consumption and production, and finance and economic transformations; meetings of the International Resource Panel, with the participation of steering committee members from 20 Member States; and meetings of the 10-Year Framework of Programmes on Sustainable Consumption and Production Patterns/One Planet network.				
<b>Databases and substantive digital materials:</b> global material flows database, life cycle database, sustainable consumption and production clearing house database and Green Growth Knowledge Platform.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> on the One Planet network, sustainable lifestyles, the green economy in the context of sustainable development and poverty eradication, ministerial meetings and the United Nations Environment Assembly.				

## Subprogramme 7

### Science policy

#### Objective

11.143 The objective, to which this subprogramme contributes, is to strengthen the capacity of Governments and non-government actors to access, generate and use quality environmental data and analysis and to sustain a strengthened science-policy interface that generates evidence-based environmental assessments, identifies emerging environmental issues and fosters relevant policy action at the global, regional and national levels, including for the achievement of the environment-related Sustainable Development Goals.

## Strategy

11.144 To contribute to the objective, the subprogramme will continue to keep the world environmental situation under review and strengthen the interface between science and policymaking across the sustainable development agenda. The subprogramme will deliver scientifically credible and unbiased data, information and knowledge, and will provide policy-relevant analysis and policy recommendations to catalyse and accelerate solutions and actions for the environment, based on a continuous review of the global status and trends. The subprogramme will reach beyond the environmental community and make the case for putting the environment at the centre of economic and social decision-making. Through gender-sensitive partnerships across all geographical areas, involving Governments and non-governmental organizations, the business and scientific communities, and citizens, the subprogramme will aim to be a catalyst of systemic and transformative shifts that can drive progress towards the aspirations of achieving the 2030 Agenda. The subprogramme will pursue broad stakeholder engagement as a critical step in enhancing societal understanding, acceptance and uptake of its scientific analysis and serve as a knowledge broker that builds consensus on existing and emerging environmental issues through platforms and networks, such as the Science-Policy-Business Forum on the Environment, the International Resource Panel, the World Adaption Science Programme and the One Planet network.

11.145 In addition, the subprogramme will continue to provide analytical research, increase awareness on the environmental dimension of sustainable development and build capacity for measuring, monitoring and reporting on the environmental dimension of the Goals. This will help Member States to integrate common methods for tracking and measuring the environment-related Goals, including in their national processes, in particular, Goals 6, 12, 13, 14, 15 and 17. To that end, the subprogramme will continue to capitalize on its collaboration with the Statistical Commission and the five regional commissions.

11.146 The above-mentioned work is expected to result in:

- (a) The increased availability of scientific environmental data to countries and other stakeholders, provided by the World Environment Situation Room;
- (b) A more coherent approach to harmonizing country data, tracking progress and science-based environmental policymaking within and among countries;
- (c) The increased capacity of countries to measure progress towards and implement the Goals and to increase policy coherence for the integration of national sustainable development plans and other internationally agreed environmental goals.

## Programme performance in 2020

11.147 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Timely environmental data to enhance evidence-led policymaking

11.148 Science is fundamental to the role of UNEP as the leading global environmental authority that sets the global environmental agenda, promotes the coherent implementation of the environmental dimension of sustainable development within the United Nations system and serves as an authoritative advocate for the global environment. The Secretary-General, in his 2018 report on progress towards

the Sustainable Development Goals (E/2018/64), highlighted the importance of the availability of high-quality, timely and disaggregated data for evidence-based decision-making and for ensuring accountability for the implementation of the 2030 Agenda. By using the World Environment Situation Room platform, the subprogramme handled: (a) earth observation data from in situ stations, remote sensors and field measurements; (b) statistics data from reporting, censuses and other surveys; and (c) geospatial data from models and interpolated data. At the national, regional, subregional and global levels, the consistent, reliable, and up-to-date data provided guidance for research, the preparation of assessments and the development of regional and global approaches to sustainable development.

11.149 The subprogramme also facilitated the transformation of automatically processed data into products such as images, maps, graphs and tables in a user-friendly format through the use of geospatial analytical software. The data kept stakeholders informed about the state and trends of the environment, supported and enabled the implementation of the environmental dimension of the 2030 Agenda, supported the United Nations country teams in common country analyses, and facilitated policy action and the allocation of funds.

*Progress towards the attainment of the objective, and performance measure*

11.150 The above-mentioned work contributed to the objective, as demonstrated by the continued increase in the access to and use of the “community of practice” platforms<sup>15</sup> by Member States and stakeholders (see figure 11.XVIII).

Figure 11.XVIII

**Performance measure: total number of community of practice platforms used to increase the transfer of scientific knowledge and the exchange of information among Member States and stakeholders (cumulative)**

### Planned results for 2022

11.151 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

<sup>15</sup> Community of practice portals bring active practitioners together to consider environmental challenges and potential solutions in a topic or domain of human endeavour. Communities of practice support people and Member States, build policymaking capability, reduce the duplication of work and lead to better practices.

### **Result 1: stepping up support through a strengthened science-policy interface<sup>16</sup>**

11.152 The subprogramme has made progress on adapting scientific assessment outcomes for wider audiences. By simplifying the language of the recommendations of scientific assessments, the subprogramme reached various sectors of society, addressing the prevailing knowledge gap and enhancing science-based policymaking decisions for a broader group of stakeholders. The subprogramme also continued to capitalize on existing networks of scientists to investigate emerging issues. Furthermore, the subprogramme reported data on Sustainable Development Goals 6, 12, 14, 15 and 17 to the Statistics Division.

11.153 The above-mentioned work contributed to 85 countries using shared information system principles to report on global environmental goals, including the Sustainable Development Goals and their targets, which did not meet the planned target of 86 countries reflected in the proposed programme budget for 2020. Owing to the COVID-19 pandemic, many meetings and/or workshops were postponed, as many countries faced challenges with Internet connectivity.

### **Proposed programme plan for 2022**

11.154 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective and in response to recent developments, the subprogramme's work will evolve to include multiple stakeholders and/or other supporting agencies. The aim is to support Member States to address the digital divide and create accessibility, in order to strengthen capacity development in the science-policy interface. The expected progress is presented in the updated performance measure below (see figure 11.XIX).

Figure 11.XIX

**Performance measure: total number of countries using shared information system principles to report on global environmental goals, including the Sustainable Development Goals and their targets (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 2: towards more ambitious climate action through science-based decision-making<sup>17</sup>**

#### **Programme performance in 2020**

11.155 The subprogramme raised \$47,403,174 to enhance climate information and knowledge services for resilience in five Pacific island countries: Cook Islands,

<sup>16</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 14)).

<sup>17</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

Marshall Islands, Niue, Palau and Tuvalu. The project is aimed at: (a) strengthening observations, monitoring, modelling and prediction of climate and climate impacts on ocean areas and islands; (b) improving community preparedness, response capabilities and resilience to climate risks; and (c) enhancing regional knowledge management and cooperation for climate services and multi-hazard early warning services. The subprogramme continued to support the production of the *Emissions Gap Report*, which highlights the state of global emissions gaps, and also prepared advocacy and outreach material that supported policy action to help mitigate climate change and improve social adaptability.

11.156 The above-mentioned work contributed to 15 Member States engaging in the development of the *Emissions Gap Report* through the country data vetting process, which met the planned target of 15 reflected in the programme budget for 2021.

### Proposed programme plan for 2022

11.157 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective and in response to recent developments, the subprogramme's work will evolve to include policy suggestions on industrial emissions-reducing technologies, coupled with the net benefits of collective climate actions. The expected progress is presented in the updated performance measure below (see figure 11.XX).

Figure 11.XX

**Performance measure: total number of countries engaged in the development of the *Emissions Gap Report* through the country data vetting process (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: scientific knowledge harnessed to address interlinked environmental challenges and their impact on socioeconomic well-being

#### Proposed programme plan for 2022

11.158 The science-policy subprogramme brings to life the latest scientific evidence and analysis on the state of the world environment to enhance the focus on new scientific knowledge and its implications with regard to environmental policy for policymakers, decision makers and the public at large. However, its 2019 evaluation highlighted the subprogramme's limited utility among the other subprogrammes and stakeholders. In response, UNEP, in its medium-term strategy, based its action on the analysis of prevailing and credible science to step up the delivery of its core area of work: mitigation of and adaption to climate change, the halting of the degradation of nature and pollution control. In addition, the subprogramme has started reaching

beyond the environmental community to advocate placing the environment at the centre of economic and social decision-making. Through partnerships among all relevant stakeholders, including other United Nations agencies, society, Governments and non-governmental organizations, the business community and citizens, the subprogramme has started catalysing science-informed transformative shifts, such as by providing maps, analytics, policy briefs and forecasts of environmental patterns, that can drive progress towards the aspirations of the 2030 Agenda and help to address climate change challenges, and in the development of different policies on nature degradation and test technologies for pollution control.

#### *Lessons learned and planned change*

11.159 The lesson for the subprogramme was that science should not be used in isolation, but rather as a purposeful tool to increase knowledge about urgent environmental issues and the integrated nature of science with social and economic well-being. Scientific knowledge can increase the wider awareness of interlinked challenges and bring about potential solutions for decision makers, practitioners and other stakeholders. In applying the lesson, the subprogramme will leverage the global environment assessment dialogue by securing better consistency and mutually beneficial comparability among science knowledge-sharing platforms, such as the Intergovernmental Panel on Climate Change, the Intergovernmental Science-Policy Platform on Biodiversity and Ecosystem Services, the Global Environment Outlook, the International Resource Panel, the *Global Sustainable Development Report* and other processes. This process will also add value to the preparation and delivery of coherent and consistent messages that can inform international negotiations and decisions under the multilateral environmental agreements, as well as global environmental platforms, such as the United Nations Environment Assembly.

#### *Expected progress towards the attainment of the objective, and performance measure*

11.160 This work is expected to contribute to the objective, as demonstrated by the increased influence of science-based policymaking decisions, including in United Nations Environment Assembly resolutions, that are anchored on the subprogramme's production of scientific assessments. Such decisions account for more than 10 per cent of all decisions adopted in the United Nations Environment Assembly (see figure 11.XXI).

Figure 11.XXI

**Performance measure: total number of decisions in the United Nations Environment Assembly influenced by science-based policymaking (cumulative)**

## Legislative mandates

11.161 The list below provides all mandates entrusted to the subprogramme.

### *General Assembly resolutions*

71/313 Work of the Statistical Commission  
pertaining to the 2030 Agenda for  
Sustainable Development

### *Governing Council of the United Nations Environment Programme decisions*

SS.VIII/1, sect. II	Implementation of decision SS.VII/1 on international environmental governance: strengthening the scientific base of the United Nations Environment Programme	SS.XII/6 25/1, sect. II	World environmental situation Implementation of decision SS.VII/1 on international environmental governance: strengthening the scientific base of the United Nations Environment Programme
SS.X/5	Global Environment Outlook: environment for development		

### *United Nations Environment Assembly ministerial declarations and decisions*

Decision 3/1	Extension of the delivery date for the sixth Global Environment Outlook report	UNEP/EA.4/HLS.1	Ministerial declaration of the United Nations Environment Assembly at its fourth session: innovative solutions for environmental challenges and sustainable consumption and production
--------------	--	-----------------	--

## Deliverables

11.162 Table 11.12 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 11.12

### **Subprogramme 7: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>2</b>	<b>2</b>	<b>9</b>	<b>9</b>
1. Projects on keeping the environment under review	1	1	6	6
2. Projects on supporting the implementation of the Sustainable Development Goals	1	1	3	3
<b>Seminars, workshops and training events</b> (number of days)	<b>2</b>	<b>2</b>	<b>–</b>	<b>2</b>
3. Seminar on keeping the environment under review	2	2	–	2
<b>Publications</b> (number of publications)	<b>1</b>	<b>1</b>	<b>1</b>	<b>2</b>

5. Technical materials on early warning and assessments	1	5	3	3
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> consultation with some 20 Member States and other entities and stakeholders on methodology development and capacity development in the area of data collection methodologies relating to the Sustainable Development Goals; advice to at least 20 Member States and stakeholders on strengthening the science-policy interface; and advice to at least 20 Member States and stakeholders on implementing national environmental information systems.				

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>Databases and substantive digital materials:</b> World Environment Situation Room; Online Access to Research in the Environment; and Global Environment Monitoring System/Air Programme.				
<b>D. Communication deliverables</b>				
<b>Digital platforms and multimedia content:</b> web pages, attracting some 10,000 visitors annually; multimedia material and audio, video and social media content on the scientific work of UNEP, which are utilized by Member States, stakeholders and the public on open data platforms.				

## Annex

### Programme performance for 2020<sup>1</sup>

#### Subprogramme 2

#### Resilience to disasters and conflicts

11.A.1 Programme performance in 2020 includes programme performance presented under results 1 and 2, as well as result 3, which emerged during 2020.

#### Result 1: state-of-environment reports<sup>2</sup>

11.A.2 The subprogramme has continued work related to supporting Member States with knowledge products that facilitate the sound management of natural resources, in line with its mandate, through the provision of state-of-environment reports on post-conflict recovery and sound environmental governance. The subprogramme also expanded this support with the release of a report on the state of the environment and outlook for the Government of the Sudan, enhancing the availability of actionable environmental data to policymakers.

11.A.3 The above-mentioned work contributed to the development of state-of-environment reports for post-conflict recovery and sound environmental governance, which met the planned target of three countries that have developed state-of-environment reports reflected in the proposed programme budget for 2020 (see figure 11.A.I).

Figure 11.A.I

**Performance measure: total number of countries that have developed state-of-environment reports (cumulative)**

#### Result 2: enhanced United Nations action on disaster-related environmental crises<sup>3</sup>

11.A.4 The subprogramme has provided advisory and technical support to the new resident coordinator system of the United Nations in countries affected by disasters and conflicts, contributing to the enhanced delivery mechanism, in line with the United Nations reform process and the strengthening of the resident coordinator system, creating opportunities to exponentially increase the ability to provide core environmental expertise and support services to a larger number of Member States.

<sup>1</sup> As outlined in paragraph 11.3 of the present report, the programme presented for the United Nations Environment Programme reflects a realignment of the programme structure for 2022. For that reason, programme performance information for 2020 for subprogramme 2, Resilience to disasters and conflicts, which will no longer be a stand-alone subprogramme as of 2022, is included in the present annex.

<sup>2</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 14)).

<sup>3</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

New support provided includes advisory and technical assistance in the Horn of Africa and the Sahel.

11.A.5 The above-mentioned work contributed to eight ongoing projects meeting requests for environmental risk reduction, response and recovery support made by Member States through United Nations resident coordinators, special missions and country offices, which exceeded the planned target of seven reflected in the programme budget for 2021 (see figure 11.A.II).

Figure 11.A.II

**Performance measure: number of ongoing projects meeting requests for environmental risk reduction, response and recovery support made by Member States through United Nations resident coordinators, special missions and country offices (annual)**

### **Result 3: supporting the pandemic response**

11.A.6 The subprogramme has adapted its capacity to support the global response of the United Nations, international partners and Member States to the coronavirus disease (COVID-19) pandemic. The capacity of the subprogramme was harnessed to deliver and support global remote webinar training and capacity-building. Three new online training sessions for relevant stakeholders were established following the outbreak of the pandemic. The training helped partners and stakeholders to integrate the environmental dimensions, such as environmentally safe waste management, into planning their COVID-19 response.

#### *Progress towards the attainment of the objective, and performance measure*

11.A.7 The above-mentioned work contributed to the objective, as demonstrated by the conduct of a global training event on COVID-19 and waste management that drew 1,300 participants from 135 countries; a webinar for the Asia-Pacific region that drew 450 participants from 46 countries; and a global webinar on COVID-19 and environmental emergencies that drew 1,500 participants from 150 countries (see figure 11.A.III).

Figure 11.A.III

**Performance measure: total number participants in online training sessions (cumulative)**

## Deliverables

11.A.8 The table below lists all deliverables, by category and subcategory, for 2020 and 2021 that contributed and are expected to contribute to the attainment of the objective.

### Subprogramme 2: deliverables for 2020 and 2021, by category and subcategory<sup>a</sup>

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	2	2	4	–
1. Projects to assess environmental risks from disasters and conflicts	1	1	2	–
2. Projects on institutional and legal frameworks to improve national and local preparedness to mitigate environmental risks from disasters and conflicts	1	1	2	–
<b>Publications</b> (number of publications)	2	2	2	–
3. Publications on disaster risk reduction, preparedness assessments and road maps	2	2	2	–
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> advice to humanitarian and military actors on environmental footprint reduction.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> expert advice to Member States from all regions and to international partners, upon request, on the monitoring and implementation of strategies to enhance environmental risk reduction, environmental emergency response and environmental recovery and to make progress towards the Sustainable Development Goals.				

<sup>a</sup> The deliverables are also included in table 11.1 of the programme performance information.

## Programme 12

### Human settlements

#### Overall orientation

##### Mandates and background

12.1 The United Nations Human Settlements Programme (UN-Habitat) is responsible for sustainable urbanization and human settlements in the United Nations system. It supports Member States in the development of sustainable cities and human settlements through its normative and operational work at the global, regional, national and local levels. UN-Habitat also leads and coordinates the monitoring of and reporting on global progress in the implementation of the New Urban Agenda and Sustainable Development Goal 11. The mandate derives from priorities established by General Assembly resolutions and decisions, including resolution [3327 \(XXIX\)](#), by which the Assembly established the United Nations Habitat and Human Settlements Foundation, and resolution [32/162](#), by which the Assembly established the United Nations Centre for Human Settlements (Habitat). The Assembly, through its resolution [56/206](#), transformed it to the United Nations Human Settlements Programme (UN-Habitat), effective 1 January 2002. The Assembly, through its resolution [73/239](#), established a new governance structure for the Programme, consisting of the universal UN-Habitat Assembly, the 36-member Executive Board and the Committee of Permanent Representatives.

12.2 The Programme's support is aimed at developing the capacity at all levels of government and other key stakeholders to formulate and implement policies, plans and concrete activities for sustainable urban development through the implementation of the regular programme of technical cooperation and United Nations Development Account projects.

##### Strategy and external factors for 2022

12.3 Globally, 56 per cent of the population lives in cities. This share is expected to rise to 70 per cent by 2050, continuing to make urbanization one of the most significant trends of the twenty-first century. Regional and sociopolitical disparities continue to influence who benefits from urbanization. However, some 90 per cent of urban growth is taking place in less developed regions, where it is largely unplanned and capacities and resources are most constrained, while in other parts of the world many cities are experiencing negative growth and shrinking populations. Unplanned urban growth fuels the expansion of informal settlements and slums, resulting in an increase in urban poverty, inequality and lack of adequate and affordable housing. Globally, more than 1.6 billion people live in inadequate housing and more than 1 billion live in slums and informal settlements. Of significance to the programme of work are the estimated 763 million internal migrants and 224 million international migrants in 2019, most of whom live in urban areas, often under difficult conditions.

12.4 High levels of inequality and exclusion are persistent trends in urban areas; income inequality has increased in urban areas for more than two thirds of the world's population since 1980. This widening gap means that some 2.9 billion people are living in cities, both in the developed and the developing world, where income inequalities are more pronounced than they were a generation ago. Cities are also hot spots for environmental and energy challenges, accounting for 60 to 80 per cent of global energy consumption, 70 per cent of global carbon emissions and more than 70 per cent of resource use. The urban poor, living in risk-prone and underserved

areas, suffer the worst consequences of climate change-related disasters and natural and human-made crises and conflicts. The coronavirus disease (COVID-19) pandemic has exacerbated the systemic inequalities that exist across territories and urban areas, where the urban poor are disproportionately affected due to crowded and underserved environments. While urban areas have been the epicentre of the pandemic, this has equally demonstrated that cities are hubs of resilience and innovation. UN-Habitat will prioritize tailored approaches to fight the pandemic and support cities to build back better.<sup>1</sup> Through technical cooperation, cities will be assisted in designing and implementing action plans to protect marginalized communities and strengthen participatory community engagement. Local governments will continue to be supported to accelerate the digital transformation in local governance as part of dedicated COVID-19 responses. Supporting citywide and spatially targeted approaches will contribute to improving living conditions in all settlements and reducing disadvantages in specific locations. Support will be provided to local governments to invest in social, economic, institutional and financial innovations for a sustained socioeconomic recovery. Partnerships will catalyse support for cities in building more resilient budgets and fiscal frameworks in support of local service delivery and local economic development. UN-Habitat will support cities in reshaping urban planning solutions that are more sustainable and integrated, supported by innovation and technology to become healthier and more resilient.

12.5 The strategy of UN-Habitat for delivering the programme plan in 2022 continues to be driven by the strategic plan for the period 2020–2023, which has proven robust in responding to the COVID-19 pandemic. The plan enables the organization to advance its innovative, delivery-focused and partnership-oriented model of operation. Its recently developed organizational structure makes UN-Habitat a dynamic, fit-for-purpose organization for delivering the four interconnected subprogrammes of the strategic plan for the period 2020–2023, which was approved by the UN-Habitat Assembly at its first session, in May 2019.

12.6 In addition, UN-Habitat flagship programmes are proving to be vehicles to fast-track integration between the normative and operational work of UN-Habitat, scaling the impact of the organization. In 2022, UN-Habitat will primarily focus on the following flagship programmes:

(a) “Sustainable Development Goals Cities” (SDG Cities). Supporting Member States in achieving the Sustainable Development Goals is the main goal of all four subprogrammes. This flagship programme is designed to advance the overall implementation of the Goals at the local level by supporting cities in developing and implementing transformative projects designed to maximize the progress of Member States towards achieving the Goals;

(b) “RISE-UP: resilient settlements for the urban poor”. This flagship programme will be implemented mainly by subprogrammes 1 and 3 by leveraging large-scale investment to build urban adaptation and climate resilience in global hotspots of vulnerability and also address issues of spatial inequality;

(c) “Inclusive cities: enhancing the positive impacts of urban migration”. This flagship programme will mainly respond to subprogrammes 1 and 4 by supporting local and national authorities in creating inclusive and non-discriminatory urban environments for all people;

(d) Two other flagship programmes, on “inclusive, vibrant neighbourhoods and communities” and “people-centred smart cities”, will be mainstreamed across the four subprogrammes, strengthening links across the outcomes of the strategic plan. In

<sup>1</sup> See General Assembly resolution [69/283](#) on the Sendai Framework for Disaster Risk Reduction 2015–2030.

addition, a normative and capacity-building approach to strengthen the agency-wide operationalization of digital transformation in sustainable urbanization contexts will be implemented.

12.7 In 2022, the programme will continue to streamline social inclusion as a process and outcome to address cross-cutting issues relating to older persons, children, people with disabilities, gender and youth. UN-Habitat will strengthen its programmatic approach to leaving no one behind by focusing on the spatial dimension of exclusion and the self-reinforcing mechanisms of marginalization, thereby assisting Governments in providing basic services, housing and public goods in the most deprived areas of cities. UN-Habitat thematic areas of resilience and urban safety will be cross-cutting in guiding frameworks, tools and capacity-building materials, setting standards, proposing norms and principles, and sharing good practices on social inclusion issues. Global networks such as the Global Land Tool Network, the Global Water Operators' Partnerships Alliance, the Resilient Cities Network, the Global Network on Safer Cities, the Global Network of Urban Planning and Design Labs and the Global Network of Public Space will be systematically engaged to develop and test these tools.

12.8 To better meet the needs of Member States and to engage a wider audience, UN-Habitat will strengthen capacity-building initiatives, digitization of tools and virtual e-learning programmes. The UN-Habitat capacity-building strategy for the implementation of the Sustainable Development Goals and the New Urban Agenda, adopted by its Executive Board in 2020, provides a clear framework to fill the institutional and operational gap within UN-Habitat for greater coordination, coherence and monitoring of results and to improve the delivery of capacity-building services to Member States and local governments, as well as other key urban stakeholders, for greater impact and resource efficiency. Some of the first results, including an illustrated handbook on the New Urban Agenda, along with an online course, have been launched to expand its implementation.

12.9 UN-Habitat will continue to build on its experience of implementing large-scale programmes and projects at the local, national and regional levels to guide technical cooperation work and ensure that it has a demonstrable impact on the lives of beneficiaries. Over the years, UN-Habitat has developed a wide range of diverse projects, focused in large part on integrated programming for sustainable urbanization, as well as activities ranging from crisis response to post-disaster and post-conflict reconstruction and rehabilitation.

12.10 In its catalytic role as a knowledge hub and partner convenor, UN-Habitat will carry out advocacy, communication and outreach activities across the four subprogramme themes and mobilize public and political support. It will continue to make maximum use of advocacy and knowledge platforms, including its own website, the Urban Agenda Platform and key global meetings such as the World Urban Forum, World Cities Day and World Habitat Day, regional ministerial conferences and the 2022 high-level meeting of the General Assembly on the implementation of the New Urban Agenda.

12.11 As a focal point for sustainable urbanization and human settlements, UN-Habitat will continue to monitor and report on global conditions and trends and provide evidence for policymaking. For 2022, UN-Habitat will prepare the second quadrennial report on the progress made in the implementation of the New Urban Agenda, in close collaboration with other United Nations entities and development partners. The programme will also prepare the second synthesis report for Goal 11 and other urban Sustainable Development Goals, to be presented at the high-level political forum on sustainable development. These reports will be supported by reporting guidelines for Member States and other stakeholders, a dedicated global

online Urban Agenda Platform, a new global urban monitoring framework, an agreed operational definition of urban areas, specialized tools for spatial analysis and the re-establishment of the Urban Indicators Programme. Progress will be made in 2022 in the deployment of technologies for data collection and analysis, visualization and management of information. The use of the City Prosperity Index, and its adaptation to a global monitoring framework, will serve in the implementation of the Sustainable Development Goals cities flagship programme to assist in the realization of Sustainable Development Goals in cities and the preparation of voluntary local reviews.

12.12 For 2022, UN-Habitat planned deliverables and activities reflect known and anticipated challenges related to the COVID-19 pandemic that are being faced by Member States. Such planned deliverables and activities include: (a) assisting Governments in supporting increased access to water and sanitation and adequate housing; (b) advocating for the prevention of evictions; and (c) measuring and reducing spatial vulnerability; and (d) preparing urban planning strategies and local resilience programmes. Specific examples of such planned deliverables and activities are provided under the four subprogrammes. The global database produced by UN-Habitat in partnership with CitiIQ provides data on 1,500 cities, and analyses the initial conditions of the cities, their response capacity and the incidence of infection and death. The spatial vulnerability index for COVID-19 and a global report on the state of cities with dedicated policy recommendations will serve to support technical interventions. These data and knowledge, combined with normative and operational work adjusted to respond to the pandemic from a short- and long-term perspective, provide opportunities for cities and Member States to address structural inequalities and prepare for social and economic recovery. The UN-Habitat programme of work for 2022 will focus all efforts of the different subprogrammes and deploy advisory services, innovative solutions, and knowledge packages to support Member States in the fight against COVID-19 and other pandemics.

12.13 With regard to cooperation with other entities at the global, regional, national and local levels, UN-Habitat will build on its close cooperation with international and regional organizations and other regional actors, such as the Organisation for Economic Co-operation and Development, the World Bank, the European Union and regional development banks.

12.14 With regard to inter-agency coordination and liaison, UN-Habitat will continue to play a key role in supporting efforts by Member States to develop policies, frameworks and actions that enhance the transformative value of urbanization and maximize city responses to the COVID-19 pandemic. This will be done through collaboration with local and regional governments and their associations and city networks, the Department of Economic and Social Affairs, the United Nations regional economic and social commissions, the Cities Alliance and partnerships and coalitions with grass-roots organizations, foundations, international financial institutions, the private sector and academia. UN-Habitat will continue to strengthen its strategic partnerships with other United Nations agencies. To support Member States in developing innovative policies and actions that promote inclusive and sustainable economic growth, employment and decent work for all, particularly women and young people, UN-Habitat will collaborate with the Food and Agriculture Organization of the United Nations, the International Fund for Agricultural Development, the International Labour Organization (ILO), the International Organization for Migration (IOM), the United Nations Industrial Development Organization, the International Telecommunication Union, the United Nations Capital Development Fund, the United Nations Conference on Trade and Development, the United Nations Innovation Network, technology companies, “smart city” associations, innovation hubs, academia and other organizations.

12.15 To mainstream environmental sustainability into urban development, UN-Habitat will collaborate with the United Nations Environment Programme (UNEP), climate funds, the urban climate knowledge and innovation communities and organizations focusing on resilience, such as the United Cities and Local Government and ICLEI-Local Governments for Sustainability initiatives. To implement the Greener Cities Partnership, UN-Habitat will collaborate with the secretariat of the United Nations Framework Convention on Climate Change to develop national climate action plans and with the United Nations Office for Disaster Risk Reduction, the World Bank, the European Union and the United Nations Development Programme (UNDP) to develop frameworks for joint financing mechanisms and to harmonize the implementation of the Sendai Framework for Disaster Risk Reduction 2015–2030. UN-Habitat will collaborate with the Office of the United Nations High Commissioner for Refugees, UNDP, IOM, the United Nations Office for Disaster Risk Reduction, the World Food Programme (WFP), the Mayors Migration Council and the Resilient Cities Network to integrate sustainable urban development into resilience and humanitarian response, and with the United Nations Office on Drugs and Crime (UNODC) to promote safety in public spaces. UN-Habitat will collaborate with the World Health Organization (WHO) and the United Nations Children's Fund (UNICEF) on the monitoring of water and sanitation and on mainstreaming the New Urban Agenda into UN-Water and UN-Energy. UN-Habitat will also collaborate with the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women) to promote gender equality and ensure that projects benefit women and girls.

12.16 UN-Habitat will continue to work closely with the Department of Economic and Social Affairs and the regional economic and social commissions to serve as a knowledge platform and the global first port of call for data and knowledge on cities, towns and rural settlements. Given that cities play a vital role in realizing the sustainable urban development agenda, UN-Habitat will reenergize its partnerships with local authorities and their associations and city networks in the context of national policies. Furthermore, the Programme will fully support municipal efforts in the local achievement and monitoring of the Sustainable Development Goals and the implementation of the New Urban Agenda through work on policy, legislation, governance, planning and design, and financing mechanisms. It will also collaborate with the Resident Coordinator system to improve the efficiency and effectiveness of operational activities at the country level, supporting common country assessments and the formulation of the United Nations Sustainable Development Cooperation Framework.

12.17 With regard to external factors, the overall plan for 2022 is based on the following planning assumptions:

- (a) Adequate unearmarked extrabudgetary resources are available to implement the planned work and produce the deliverables;
- (b) Country make commitments to the New Urban Agenda and the 2030 Agenda for Sustainable Development;
- (c) Ongoing requests are received from national and local governments for policy advice and technical support from UN-Habitat in the development and implementation of their urban policies, plans and strategies;
- (d) Urban indicators, data and information are used to formulate policies, with adequate mechanisms available for impact monitoring and the assessment of city performance;
- (e) Social, political and macroeconomic stability continues in the areas in which UN-Habitat and partners will be implementing programmes and projects.

12.18 With regard to the COVID-19 pandemic, the programme plan is based on the assumption that the proposed deliverables and activities for 2022 will be feasible to implement. However, if the pandemic were to continue to have an impact on the planned deliverables and activities, they would be adjusted during 2022 within the scope of the overall objectives, strategies and mandates. Any such adjustments would be reported as part of the programme performance information.

12.19 UN-Habitat mainstreams a gender perspective in its operational activities, deliverables and results, as appropriate, with guidance from its Advisory Group on Gender Issues. For example, one of the 2022 planned results for subprogramme 1 demonstrates the aim of UN-Habitat interventions to support Member States with policy, legislation, planning and financing instruments to implement integrated, inclusive and gender-responsive land and housing policies that improve tenure security for all, and continue the work related to strengthened land rights for men and women in the Arab world.

12.20 UN-Habitat integrates disability inclusion in its operational activities, deliverables and results as appropriate. Through the work of its subprogrammes, UN-Habitat is working with its partners to develop a disability inclusion strategy in line with the one released by the Secretary-General in 2019. Following the establishment of agreements with memorandums of understanding with the World Blind Union and World Enabled, UN-Habitat is also developing guidelines for disability inclusion by enhancing the environmental and social safeguards framework that is applied to all projects, to be socially inclusive, including disability inclusion as an integral part of each project presented for approval.

## **Programme performance in 2020**

### **Impact of COVID-19 on programme delivery**

12.21 During 2020, the COVID-19 pandemic had an impact on the planned deliverables and activities of UN-Habitat. The impact included adjusting support to national and local authorities, as well as local communities, by shifting from face-to-face meetings and technical advisory missions to virtual and/or hybrid meetings. UN-Habitat progressively moved towards alternative forms of gatherings and consultations, using virtual meeting platforms, and remote technical support, combining local consultants with remote virtual advisory services. Specific activities related to technical cooperation projects were delayed or postponed due to severe international travel restrictions as a result of the COVID-19 pandemic. Specific examples of the impact are provided under all four subprogrammes. The change in approach of planned deliverables and activities also had an impact on the expected results for 2020, as described in the programme performance under subprogrammes 1, 2 and 3.

12.22 At the same time, however, some planned deliverables and activities were modified, and new activities were identified during 2020, within the overall scope of the objectives of the subprogrammes, in order to support Member States on issues related to the COVID-19 pandemic. Those included modifications and new activities at the normative level: contributions to the policy brief by the Secretary-General on COVID-19 in an urban world and to “A United Nations framework for the immediate socio-economic response to COVID-19”, the preparation of the *Cities and Pandemics: Towards a More Just, Green and Healthy Future* report and several technical guidelines to support the response to COVID-19 under the UN-Habitat COVID-19 response plan. At the operational level, UN-Habitat adjusted its programming to help respond to the pandemic through its COVID-19 response plan and partnered with United Cities and Local Government to facilitate a series of live

learning sessions, facilitating north-south and south-south exchange on COVID-19 response. Specific examples of the modified and new activities are provided under all four subprogrammes. The modified and new deliverables and activities contributed to results in 2020, as described in the programme performance under subprogrammes 1, 2 and 3.

12.23 Reflecting the importance of continuous improvement and responding to the evolving needs of Member States, the programme will mainstream lessons learned and best practices related to the adjustments to and adaptation of its programme owing to the COVID-19 pandemic. Specific examples of lessons learned include the continuation of virtual meeting modalities where possible for expert group meetings, which allows for broader participation, and complementing the existing tools of UN-Habitat with online digital learning companions to expand its outreach.

## Legislative mandates

12.24 The list below provides all mandates entrusted to the programme.

### *General Assembly resolutions*

3327 (XXIX)	Establishment of the United Nations Habitat and Human Settlements Foundation	71/256	New Urban Agenda
34/114	Global report on human settlements and periodic reports on international cooperation and assistance on human settlements	72/146	Policies and programmes involving youth
		72/234	Women in development
		75/212	United Nations Conference on the Midterm Comprehensive Review of the Implementation of the Objectives of the International Decade for Action, "Water for Sustainable Development", 2018–2028
53/242	Report of the Secretary-General on environment and human settlements		
55/2	United Nations Millennium Declaration		
S-25/2	Declaration on Cities and Other Human Settlements in the New Millennium	75/221	Ensuring access to affordable, reliable, sustainable and modern energy for all
56/206	Strengthening the mandate and status of the Commission on Human Settlements and the status, role and functions of the United Nations Centre for Human Settlements (Habitat)	75/224	Implementation of the outcomes of the United Nations Conferences on Human Settlements and on Housing and Sustainable Urban Development and strengthening of the United Nations Human Settlements Programme (UN-Habitat)
70/1	Transforming our world: the 2030 Agenda for Sustainable Development		

### *UN-Habitat Assembly resolutions and decisions*

1/1	United Nations Human Settlements Programme strategic plan for the period 2020–2023	1/4	Achieving gender equality through the work of the United Nations Human Settlements Programme to support inclusive, safe, resilient and sustainable cities and human settlements
1/2	United Nations System-Wide Guidelines on Safer Cities and Human Settlements	1/5	Enhancing urban-rural linkages for sustainable urbanization and human settlements
1/3	Enhancing capacity-building for the implementation of the New Urban Agenda and the urban dimension of the 2030 Agenda for Sustainable Development	Decision 1/3	Arrangements for the transition towards the new governance structure of the United Nations Human Settlements Programme

*Executive Board decisions*

2019/1	Implementation of the strategic plan for the period 2014–2019 and the strategic plan for the period 2020–2023, and approval of the work programme and budget for 2020	2020/4	Financial, budgetary and administrative matters of the United Nations Human Settlements Programme
2019/2	Financial, budgetary and administrative matters of the United Nations Human Settlements Programme	2020/5	Implementation of normative and operational activities of the United Nations Human Settlements Programme, including resolutions and decisions of the United Nations Habitat Assembly, and reporting on the programmatic activities of the Programme in 2020 and the implementation of subprogrammes, flagship programmes and technical cooperation activities
2019/3	Implementation of normative and operational activities of the United Nations Human Settlements Programme, including the resolutions and decisions of the United Nations Human Settlements Assembly		
2020/3	Implementation of the strategic plan for the period 2014–2019, the strategic plan for the period 2020–2023, approval of the draft work programme and draft budget for 2021, implementation by the United Nations Human Settlements Programme of the reform of the development system and management of the United Nations, and alignment of the planning cycles of the Programme with the quadrennial comprehensive policy review process		

*Governing Council resolutions*

19/4	Cooperation between the United Nations Human Settlements Programme and the United Nations Environment Programme	24/11	Promoting sustainable urban development by creating improved economic opportunities for all, with special reference to youth and gender
19/11	Strengthening the United Nations Habitat and Human Settlements Foundation	24/13	Country activities by the United Nations Human Settlements Programme
20/6	Best practices, good policies and enabling legislation in support of sustainable urbanization and the attainment of internationally agreed development goals	25/1	Contribution of the United Nations Human Settlements Programme to the post-2015 development agenda in order to promote sustainable urban development and human settlements
20/16	Enhancing the involvement of civil society in local governance		
21/3	Guidelines on decentralization and strengthening of local authorities	25/2	Strengthening national ownership and operational capacity
21/7	Sustainable public-private partnership incentives for attracting large-scale private-sector investment in low-income housing	25/6	International guidelines on urban and territorial planning
22/9	South-South cooperation in human settlements	25/7	United Nations Human Settlements Programme governance reform
23/3	Support for pro-poor housing	26/4	Promoting safety in cities and human settlements
23/10	Future activities by the United Nations Human Settlements Programme in urban economy and financial mechanisms for urban upgrading, housing and basic services for the urban poor	26/5	Regional technical support on sustainable housing and urban development by regional consultative structures
		26/6	World Urban Forum
24/5	Pursuing sustainable development through national urban policies	26/9	Human settlements development in the Occupied Palestinian Territory
24/7	Making slums history: a worldwide challenge		

*Economic and Social Council resolutions*

2003/62	Coordinated implementation of the Habitat Agenda	2020/7	Affordable housing and social protection systems for all to address homelessness
2017/24	Human settlements	2020/9	Mainstreaming a gender perspective into all policies and programmes in the United Nations system

## Deliverables

12.25 Table 12.1 lists all cross-cutting deliverables, by category and subcategory, for the period 2020–2022.

Table 12.1

### Cross-cutting deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned <sup>a</sup>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	–	–	2	2
1. UN-Habitat inputs to reports of the Secretary-General and other United Nations system-wide documents	–	–	1	1
2. Implementation of the outcome of the United Nations Conference on Housing and Sustainable Urban Development (Habitat III) and strengthening of the United Nations Human Settlements Programme (UN-Habitat): report of the Secretary-General	–	–	1	1
<b>Substantive services for meetings</b> (number of three-hour meetings)	6	12	7	17
3. Meetings of the governing bodies (UN-Habitat Assembly, Executive Board and Committee of Permanent Representatives)	3	9	4	12
4. Meeting of the Committee for Programme and Coordination	1	1	1	1
5. Meeting of the Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
6. Meeting of the Fifth Committee	1	1	1	1
7. General Assembly high-level meeting on the review of the implementation of the New Urban Agenda	–	–	–	2
<b>B. Generation and transfer of knowledge</b>				
<b>Publications</b> (number of publications)	5	2	6	5
8. UN-Habitat flagship reports	4	1	5	2
9. <i>World Cities Report</i>	1	1	2	1
10. Second quadrennial report on the implementation of the New Urban Agenda	–	–	–	1
11. UN-Habitat annual report	1	1	1	1

<sup>a</sup> The 2022 planned deliverables, to be funded from the Foundation's non-earmarked fund, have been adjusted downward, taking into account the resources approved by the Executive Board of \$10.0 million for 2021 and a budget ceiling figure of \$12.0 million in 2022, as shown in table 15.14 of the proposed programme budget for 2022 (A/76/6 (Sect. 15)).

## Evaluation activities

12.26 The following self-evaluations completed in 2020 have guided the proposed programme plan for 2022:

- (a) Impact evaluation of the UN-Habitat housing approach on adequate, affordable housing and poverty reduction;
- (b) Final evaluation of the implementation of UN-Habitat strategic plan for the period 2014–2019;
- (c) Midterm evaluation of the municipal governance support programme, 2015–2021;
- (d) Midterm evaluation of the Accelerating climate action through the promotion of Urban Low Emission Development Strategies (Urban-LEDS II) project;
- (e) End-of-project evaluation of the Fostering the tenure and resilience of Palestinian communities through spatial economic planning intervention in area C project;
- (f) End-of-project evaluation of the making cities sustainable and resilient project (2016–2020).

12.27 The findings, lessons and recommendation of the self-evaluations referenced above have been taken into account for the programme plan for 2022 and informed the implementation of the strategic plan for the period 2020–2023. For example, on the basis of recommendations from the final evaluation of the strategic plan for the period 2014–2019, an inventory of normative tools is in development to facilitate the costing of methods used and strengthen linkages between normative and operational programming and learning within the organization. This is supported by the Umoja integrated planning, management and reporting tool, which is to be rolled out in 2021 and will contribute to strengthening processes and systems for integrated outcome-focused design, monitoring and reporting by tracking project outputs and outcomes, tools and linkages to the strategic plan. Further, UN-Habitat has built a network of focal points at the country level to strengthen its engagement in the common country analysis process in 15 selected countries and promote sustainable urbanization in relation to the United Nations reform process.

12.28 Based on recommendations stemming from the impact evaluation of the housing approach of UN-Habitat, concerted efforts were made to advance the role of housing in the UN-Habitat portfolio. For example, housing was a theme of the Urban October 2020 Housing for All Campaign (#Housing4All), strengthening linkages with other UN-Habitat programmes and national and international partners. Moving forward, UN-Habitat is reviewing the operationalization of the right to adequate housing, including by developing a monitoring and reporting framework, and revising the position of UN-Habitat on and methods related to the governance and management of adequate housing. This has become all the more important in the light of the COVID-19 pandemic.

12.29 The following self-evaluations are planned for 2022:

- (a) Evaluation of the impact and outcomes of the eleventh session of the World Urban Forum;
- (b) Evaluation of two country programmes;
- (c) Six evaluations of projects that close in 2022;
- (d) Two thematic self-evaluations.

## **Programme of work**

### **Subprogramme 1**

#### **Reduced spatial inequality and poverty in communities across the urban-rural continuum**

#### **Objective**

12.30 The objective, to which this subprogramme contributes, is to reduce inequality between and within communities, and to reduce poverty in communities across the urban-rural continuum through increased and equal access to basic services, sustainable mobility, accessible and safe public space, increased and secure access to land, adequate and affordable housing and effective human settlements growth and regeneration.

#### **Strategy**

12.31 To contribute to the objective, the subprogramme will develop and disseminate toolkits, standards and technical guidelines to Member States, and engage partner cities in policy dialogues, peer-to-peer support, the sharing of best practices, training sessions and other capacity-building initiatives to strengthen institutional and managerial capacity towards improved access to and the efficiency, quality, reliability and sustainability of basic services, such as water, sanitation and energy, and the provision of sustainable mobility and public space in order to mitigate and adapt to climate change and reduce environmental impacts, such as air and water pollution. In the area of waste management, the subprogramme will continue to expand its Waste Wise Cities campaign, which focuses on mobilizing national and local governments to commit to improving their waste management practices and resource efficiency through rethinking, reducing, reusing and recycling materials and waste before and after consumption, UN-Habitat will also support national and local authorities in building capacity to use frontier technologies to improve the provision and management of basic services for all. This work helps Member States make progress towards achieving the Sustainable Development Goals, in particular Goals 1, 6, 7, 11, 12 and 14.

12.32 The subprogramme will provide Member States with policy, legislation, planning and financing instruments to implement integrated and inclusive and gender-responsive land and housing policies that improve tenure security for all, provide adequate, affordable housing and prevent unlawful forced evictions. The subprogramme will advocate for the implementation of sustainable building codes, regulations and sustainability certification tools for the housing sector while contributing to an urban energy transition. This work helps Member States make progress towards achieving Goals 1, 2, 5, 11 and 15.

12.33 The subprogramme will also provide technical assistance to national and local governments to develop specific integrated plans, policies, technical guidelines and toolkits in line with the International Guidelines on Urban and Territorial Planning and principles of sustainable urbanization. The subprogramme will provide technical assistance to national and local governments and cities seeking to develop specific bankable, catalytic and pilot urban interventions. It will support partner cities in institutionalizing different approaches on urban regeneration through the development of specific plans, policies, technical guidelines and toolkits. The subprogramme will provide guidance on how planning for urban expansion and regeneration can contribute to climate mitigation and adaptation and make urban

growth more inclusive. This work helps Member States make progress towards achieving Goal 11.

12.34 The subprogramme will continue to support Member States on issues related to COVID-19 by supporting national and local governments on recovering from COVID-19 in cities and human settlements by disseminating toolkits, best practices and technical guidelines for addressing the structural inequalities exposed by the pandemic. The subprogramme will scale up access to basic and social services, sustainable mobility and safe public space, in particular in urban slums and informal settlements and for people in vulnerable situations, focus more on the need for adequate and affordable housing and the prevention of unlawful evictions and develop more integrated and inclusive urban development programming, integrating, for instance, health in urban and territorial planning and ensuring proximity to jobs and basic services and infrastructure.

12.35 The above-mentioned work is expected to result in:

- (a) Improved quality, accessibility, inclusion and safety of public spaces for all in urban areas;
- (b) An increased number of people living in adequate and affordable housing and strengthened capacities of policymakers to implement sustainable land governance systems;
- (c) The transformation and regeneration of dilapidated urban areas into social and economically inclusive areas that offer improved quality of life to inhabitants.

## **Programme performance in 2020**

12.36 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Transformed cities and communities through safe, inclusive and accessible public spaces**

12.37 Public space represents a vital element of urban efficiency, mobility and social interaction. Public spaces are diminishing and are unequally distributed due to unplanned development, inadequate street networks, overcrowding, encroachment, poor maintenance and privatization. These factors contribute to public spaces often being inaccessible to large sections of society. The challenge of inadequate public spaces compounds spatial inequalities and specifically harms the urban poor and marginalized communities. Cities and towns struggle to identify relevant, locally based approaches to co-create and implement public space interventions at different scales and to maintain those spaces. The COVID-19 crisis has also highlighted how public spaces represent a key lifeline for marginalized populations and an important asset for deploying emergency measures, facilitating the delivery of essential services and hosting well-spaced activities to enable recreation. Active in 88 cities, the subprogramme provided advice and technical support to cities and local governments worldwide on all dimensions of public space enhancement, from assessment to creation and management. For example, the subprogramme has developed tools and partnerships to undertake citywide public space assessments, implemented site-specific assessments in over 41 cities in 2020 and worked on both individual sites (26 in 2020) and citywide strategies (11 in 2020). The subprogramme encourages, women, children, youth, older persons and persons with disabilities to participate in the public space design processes by using tailored tools to reimagine and co-create their surroundings. In India, the United Arab Emirates and South Africa, the subprogramme

engaged persons with disabilities to design public spaces to improve their accessibility and provide disability-friendly spaces while ensuring safety through providing spaces for all, supporting multifunctionality and amenities such as lighting. Through this process, the subprogramme engaged 6,750 citizens in participatory planning and 470 citizens in digital workshops, and trained 560 people on public space assessments.

12.38 The subprogramme also supported 10 cities in their COVID-19 recovery through capitalizing on public spaces as opportune places to restore livelihoods, increase accessibility to essential services and improve the well-being of those in vulnerable situations. These projects addressed a variety of challenges, such as decongestion and digitization of local markets, increasing hygiene and sanitation in slums, creating livelihood opportunities and raising awareness through culture and art. The project engaged 6,230 people in 88 workshops. The implementation of these small interventions enabled cities to slowly reopen and allowed communities to regain confidence in being out in the public realm and using public spaces safely for economic and social purposes. Furthermore, the subprogramme enabled local and national governments to embrace the potential of public spaces as flexible and resilient spaces during emergencies and crisis and understood the need to adopt policies and regulations and invest in scaling up interventions at the city level.

*Progress towards the attainment of the objective, and performance measure*

12.39 The above-mentioned work contributed to the objective, as demonstrated by 972,787 people in 88 cities who have access to safe and inclusive public spaces through public space interventions (see figure 12.1).

Figure 12.1

**Performance measure: total number of beneficiaries in 88 cities with access to safe and inclusive public spaces through public space interventions (cumulative)**

**Impact of COVID-19 on subprogramme delivery**

12.40 Owing to the impact of COVID-19 during 2020, the subprogramme cancelled planned in-person events, including seminars, training sessions, workshops and conferences as of the second quarter of 2020. On some occasions, these events were postponed until further notice or conducted remotely, utilizing the application of online conferencing tools. Considerable progress in the utilization of information and communications technology tools for the organization of urban planning sessions with stakeholder engagement processes was achieved. The adjustment to new working modalities had an impact on the programme performance in 2020, as specified in result 3 below.

12.41 At the same time, however, the subprogramme identified new and modified activities to support Member States on issues related to the COVID-19 pandemic, within the overall scope of objectives and within the margins of projects funded from extrabudgetary resources, namely, technical advisory services and infrastructure solutions in order to enhance access to hygiene facilities, including access to safe drinking water and the extension of water supply to the most vulnerable communities, particularly in urban slums and informal areas. A particular emphasis was placed on expanding livelihood opportunities, particularly for households headed by women, and introducing sustainable management modalities for newly created infrastructure and service provision. In particular, the subprogramme supported the mainstreaming of housing and basic urban services as interventions highlighted in national-level socioeconomic impact assessments and recovery strategies at the country and city levels, as well as advised ongoing programme activities in this regard to adapt to COVID-19 response and recovery. Moreover, the subprogramme supported the development of an implementation tool for local authorities on leading local adaptation to COVID-19 in informal settlements. The modified deliverables contributed to results in 2020, as specified in the emerging result above.

## **Planned results for 2022**

12.42 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: Strengthened land rights for men and women in the Arab world<sup>2</sup>**

#### **Programme performance in 2020**

12.43 The subprogramme has continued to support the work done by partners and other land actors in the Arab region by establishing partnerships and formalizing collaboration with eight organizations in the region. The subprogramme also held one partnership-building event with champions based in the region. Furthermore, the subprogramme conducted two capacity development events, on monitoring land governance and land tenure security in the Arab region (Middle East subregion) and on the role of civil society organizations in land governance in the Arab region.

12.44 The above-mentioned work contributed to eight institutions involved in land administration in the Arab States implementing inclusive and gender-sensitive normative products on land as tools to develop their research and curricula with support from UN-Habitat, which exceeded the planned target of six institutions reflected in the proposed programme budget for 2020.

#### **Proposed programme plan for 2022**

12.45 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue the capacity development, as well as the knowledge- and partnership-building, in the region. The expected progress is presented in the updated performance measure below (see table 12.2).

<sup>2</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 15)).

Table 12.2  
Performance measure

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Two institutions involved in land administration in the Arab States implementing inclusive and gender-sensitive land tools and approaches	Four institutions involved in land administration in the Arab States implementing inclusive and gender-sensitive land tools and approaches	Eight institutions involved in land administration in the Arab States implementing inclusive and gender-sensitive land tools and approaches	Eight institutions involved in land administration in the Arab States implementing inclusive and gender-sensitive land tools and approaches	Both men and women in eight cities benefit from more comprehensive institutional support from land sector organizations, leading to the acquisition of stronger tenure security

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: inclusive, vibrant neighbourhoods and communities<sup>3</sup>

### Programme performance in 2020

12.46 The subprogramme created new partnerships, established legal agreements and mobilized resources to start the development of comprehensive guidelines and tools to support Member States in the areas of spatial inequality reduction, urban regeneration, participatory planning and socioeconomic recovery. Furthermore, the subprogramme acted as an umbrella programme to provide technical assistance to ongoing urban regeneration and socioeconomic projects in Asia, Africa, the Arab States and Latin America and the Caribbean.

12.47 The above-mentioned work contributed to the adoption of urban regeneration policies by 8 cities, which did not meet the planned target of 15 cities reflected in the proposed programme budget for 2021. Several more cities seeking support could not be assisted. The reprioritization of local governments in their efforts to respond to the COVID-19 pandemic caused a delay in the roll-out of activities and the establishment of partnerships of the subprogramme. Also, the lack of specific extrabudgetary funding for the subprogramme made the implementation dependent on successful resource mobilization from national and local governments on a case-by-case basis.

### Proposed programme plan for 2022

12.48 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will expand the number of governments and cities supported as part of this result, develop normative outputs related to urban regeneration and socioeconomic recovery and mobilize additional resources from a larger pool of stakeholders to develop concrete urban regeneration projects based on the normative knowledge and lessons developed from the expertise of UN-Habitat. It is expected that socioeconomic recovery after the COVID-19 pandemic could result in an increased uptake of urban regeneration activities to increase local resilience and

<sup>3</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

improve overall local socioeconomic conditions. The expected progress is presented in the performance measure below (see figure 12.II).

Figure 12.II

**Performance measure: total number of cities adopting urban regeneration policies with support from the United Nations Human Settlements Programme (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: increased access to basic services, sustainable mobility and slum upgrading programmes to strengthen community resilience to pandemics such as COVID-19 in slums and informal settlements**

#### **Proposed programme plan for 2022**

12.49 Increasing access to water, sanitation, mobility, waste management and energy services for the 700 million urban dwellers currently unserved will play a key role in making cities and human settlements inclusive, safe, resilient and sustainable, as envisioned in Sustainable Development Goal 11. The COVID-19 pandemic highlighted the essential role of basic services in strengthening community preparedness, response and recovery in slums and informal settlements, where the lack of such services makes simple public health interventions such as the regular washing of hands extremely difficult. By 2020, the subprogramme had supported Member States in increasing access for 2.7 million people in slums and informal settlements in 39 countries, strengthening community resilience to pandemics such as COVID-19.

#### *Lessons learned and planned change*

12.50 The lesson for the subprogramme was the need to focus more on the development, field testing and dissemination of slum upgrading and urban basic services-related tools and technical guidelines that may be used by various actors and players to implement slum upgrading and basic services programmes. There was also a need for continuous monitoring, learning and documentation of the subprogramme outcomes and impacts. In applying the lesson, the subprogramme will strengthen global advocacy, networking and preparation of tools and technical guidelines on slum upgrading and urban basic services. In 2022, the subprogramme plans to support slum upgrading and urban basic services projects to promote a healthy living environment. Assessments will be undertaken in selected cities to highlight inequities in access to water and sanitation, energy, mobility and solid waste management services. Importance will be given to extending adequate water, sanitation, clean energy, public transport and waste management services in slums and informal settlements. The

focus of the work will be on those left behind, including the needs of women, youth and other persons in vulnerable situations, such as the elderly and people with disabilities, highlighting for example, the principles of inclusive design to ensure access to basic services. Focus will also be on strengthening governance and building the capacity of local governments and service providers for effective delivery of urban basic services.

*Expected progress towards the attainment of the objective, and performance measure*

12.51 This work is expected to contribute to the objective, as demonstrated by 3.1 million people in slums and informal settlements in 45 countries having access to basic services, strengthening community resilience to pandemics such as COVID-19 (see figure 12.III).

Figure 12.III

**Performance measure: total number of people in slums and informal settlements in 45 countries with access to basic services (cumulative)**

(Millions)

## Legislative mandates

12.52 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolutions*

42/146	Realization of the right to adequate housing	74/141	The human rights to safe drinking water and sanitation
67/291	Sanitation for All		
69/213	Role of transport and transit corridors in ensuring international cooperation for sustainable development	74/237	Eradicating rural poverty to implement the 2030 Agenda for Sustainable Development
		74/299	Improving global road safety

*Governing Council resolutions*

21/8	Africa fund/financing mechanism on slum prevention and upgrading	23/8	Third United Nations conference on housing and sustainable urban development
21/9	Women's land and property rights and access to finance	23/17	Sustainable urban development through expanding equitable access to land, housing, basic services and infrastructure
21/10	Strengthening the Habitat and Human Settlements Foundation: experimental financial mechanisms for pro-poor housing and infrastructure	24/2	Strengthening the work of the United Nations Human Settlements Programme on urban basic services
23/4	Sustainable urban development through access to quality urban public spaces	24/9	Inclusive national and local housing strategies to achieve the Global Housing Strategy paradigm shift

## Deliverables

12.53 Table 12.3 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 12.3

### Subprogramme 1: deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned <sup>a</sup>
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>32</b>	<b>22</b>	<b>50</b>	<b>36</b>
1. Projects on urban basic services: mobility, water and sanitation, energy and solid waste management and safe, inclusive and accessible public space	13	9	15	12
2. Project on development of national and local policies on urban heritage, historical landscape and culture	1	1	1	1
3. Pilot projects on housing, slum upgrading, innovative financing for housing and land readjustment and on integrated urban and territorial renewal and regeneration	9	6	12	8
4. Projects on land tenure security, land-based financing and implementation of the Secretary-General's guidance note on land and conflict	–	–	10	7
5. Projects for integrated urban and territorial planning and on developing and implementing effective planning laws	6	4	9	6
6. Projects supporting urban monitoring, evidence-based policies for crime prevention and on community safety and social cohesion in cities and human settlements	3	2	3	2
<b>Seminars, workshops and training events</b> (number of days)	<b>51</b>	<b>37</b>	<b>79</b>	<b>49</b>
7. Workshops and training sessions on urban basic services: mobility, water and sanitation, energy and solid waste management	21	15	29	20
8. Workshops and training sessions on slum upgrading, housing, heritage in urban development, regeneration and urban growth, urban design governance, public space, Global Network of Urban Planning and Design Labs and crime prevention and urban safety	13	9	20	12
9. Global and regional training workshops on land, housing, slum upgrading, housing studios and practitioner labs	5	4	7	5
10. Technical workshops on monitoring the Sustainable Development Goals and the New Urban Agenda	4	3	2	1
11. Training sessions on policy, planning and design, governance, legislation and finance and data collection	8	6	14	8
12. Training sessions on land and conflict and on land tenure, governance and financing; and expert group meetings on urban land governance in the Arab States region	–	–	7	3
<b>Publications</b> (number of publications)	<b>2</b>	<b>2</b>	<b>3</b>	<b>3</b>
13. Publication on low emission options for sustainable mobility	1	1	–	–
14. Global report: <i>Transforming One Billion Lives – Improved Living Conditions and Sustainable Urbanization – The Challenge of Slums and Informal Settlements in 2020</i> (follow-up to publication from 2003)	1	1	–	–
15. Land tenure and land degradation	–	–	1	1
16. Global report on land governance	–	–	1	1
17. Publication on affordable and sustainable housing	–	–	1	1

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned <sup>a</sup>
<b>Technical materials</b> (number of materials)	–	8	19	11
18. Innovative finance mechanisms for rental, cooperative, incremental housing and land readjustment schemes to reduce urban poverty	–	2	–	–
19. Compendium of policies, plans, good practices and experiences on city planning, urban regeneration, heritage conservation and extension	–	2	2	1
20. Best practices, guides, standards and case studies on increased and equal access to basic services, sustainable mobility and public space	–	2	2	2
21. Report on policies, plans and legislation for improved safety, particularly for urban youth, women and children	–	1	–	–
22. Guide for land management and spatial plans for poverty reduction and spatial equality	–	–	2	1
23. Guidelines on the right to adequate housing and prevention of homelessness among those in vulnerable situations, including migrants	–	1	2	1
24. Guide series for innovative land, legal and financial mechanisms in relation to conservation and regeneration	–	–	1	1
25. Toolkits, housing profiles and technical guides for city leaders on planning, on managing and implementing affordable and sustainable housing and on slum upgrading programmes	–	–	4	2
26. Series of guides and tools to improve land management and tenure security	–	–	2	1
27. Guidelines and handbooks on slum upgrading solutions	–	–	3	2
28. Neighbourhood planning guidelines on participation and inclusive regeneration	–	–	1	–

#### C. Substantive deliverables

**Consultation, advice and advocacy:** technical advice to all requesting Member States on reporting, monitoring and implementation of the New Urban Agenda and the Sustainable Development Goals, including advisory services on Goal reporting, data collection, analysis and monitoring of indicators, namely on Goal targets and indicators 11.1, 11.3.1, 11.3.2 and 11.7.1, leveraging the New Urban Agenda online platform and incorporating best practices; advisory services to 22 Member States on the right to adequate housing and tenure security for those in vulnerable situations, housing policies, urban law reform and compliance for regeneration and urban growth as well as effective regeneration and growth management through: inclusive territorial and urban planning and design, inclusive and participatory governance, public space design and management, design labs, planned city extensions, city infill and heritage preservation; technical advice on urban regeneration and heritage conservation, urban land administration and management to different stakeholders (United Nations agencies, national and local governments, non-governmental organizations, grassroots organizations); activities to strengthen partnerships and existing networks.

**Databases and substantive digital materials:** Upon request, data collection on land-related global commitments along the rural-urban nexus and online solutions to tackle issues on urban basic services, sustainable mobility, energy, water and sanitation, solid waste management, housing, urban air quality and climate change mitigation; integrated and open digital platforms on urban safety, heritage, regeneration, urban growth; awareness-raising materials and information databases on cultural heritage and identity for urban dwellers, the Global Urban Indicators database and UrbanLex – Urban Law database; the New Urban Agenda online platform.

#### D. Communication deliverables

**Outreach programmes, special events and information materials:** advocacy materials, brochures, leaflets and profiles featuring the work of the subprogramme; networks to disseminate information, including the Global Network of Public Space with some 100 members; in partnership with the municipality of Dubai, United Arab Emirates, sponsorship of Best Practices Award in Urban Regeneration and Public Spaces (case studies published/articles); social media advocacy provided on women's empowerment, youth empowerment and disability-friendly cities, especially with regard to urban regeneration and public space; communication materials on urban land governance and management; partnerships and cross-learning activities (the Global Land Tool Network) for achieving sustainable urbanization.

**External and media relations:** media kits, press releases, web stories and social media updates and, upon request, events with 500 participants, 20 non-governmental organizations and 50 cities on slum upgrading, urban renewal, public space and affordable and adequate housing, urban land governance and management, partnerships and cross-learning activities with partner organizations.

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned <sup>a</sup>
<b>Digital platforms and multimedia content:</b> maintenance of social media accounts to enhance information on urban basic services, public space, sustainable mobility, land, slum upgrading, housing and regeneration; multimedia content, including video documentaries, infographics, presentations and webinars; start-up version of a global database of urban plans.				

<sup>a</sup> The 2022 planned deliverables, to be funded from the Foundation's non-earmarked fund, have been adjusted downward, taking into account the resources approved by the Executive Board of \$10.0 million for 2021 and a budget ceiling figure of \$12.0 million in 2022, as shown in table 15.14 of the proposed programme budget for 2022 (A/76/6 (Sect. 15)).

## Subprogramme 2

### Enhanced shared prosperity of cities and regions

#### Objective

12.54 The objective, to which this subprogramme contributes, is to enhance the shared prosperity of cities and regions through improved spatial connectivity and productivity, increased and equitably distributed locally generated revenue and expanded deployment of frontier technologies and innovation.

#### Strategy

12.55 To contribute to the objective, the subprogramme will support Member States and other partners in enhancing the contribution made by urbanization to productivity and inclusive economic development through the formulation of national urban policies and related legal, financial and implementation frameworks integrated into whole-of-government planning, policy and financing frameworks; knowledge transfer; capacity-building; and the development of tools on urban and rural territorial planning and design. This work helps Member States make progress towards achieving the Sustainable Development Goals, in particular Goal 1 and Goal 11.

12.56 The subprogramme will also provide technical assistance and capacity-building and advisory services to cities with regard to developing participatory budgeting approaches and optimizing local revenue systems through data collection and the development of municipal databases, sharing case studies on revenue optimization and participatory approaches and developing guidelines on local revenue generation. In addition, it will explore and realize additional opportunities to leverage private sources of capital to achieve sustainable urban development. Emphasis will be placed on using frontier technology to increase the efficiency of urban management and digitizing revenue systems and performance monitoring. This work will help Member States make progress towards achieving Sustainable Development Goal 8 on decent work and economic growth.

12.57 Furthermore, the subprogramme will strengthen the capacity of national and local governments to effectively procure, test and implement frontier technologies and innovations such as sensor networks, machine-to-machine communication, artificial intelligence, virtual and augmented reality, geographic information systems, remote sensing and big data processing and visualization, while supporting their digital transition. This work will support Member States in making progress towards achieving Sustainable Development Goal 9 on industry, innovation and infrastructure.

12.58 The subprogramme plans to support Member States on issues related to COVID-19 by providing a territorial framework for socioeconomic recovery from COVID-19, climate action and safeguarding the environment and biodiversity; ensuring that economic recovery measures support sustainable urban recovery that

helps drive poverty eradication, economic growth, climate action and progress towards the achievement of the Sustainable Development Goals; and placing a stronger focus on the recovery of locally generated revenue (including land-based financing) as a way to help alleviate the socioeconomic impact of COVID-19.

12.59 The above-mentioned work is expected to result in:

(a) Balanced territorial development and better-connected human settlements, while contributing to improved social inclusivity, poverty reduction and climate action;

(b) The enactment by local authorities of institutional and legal reforms conducive to the generation of additional financial resources, including through public-private partnerships and land-based revenue and financing tools;

(c) Strengthened capacity of cities to address inequalities and bridge social, spatial and digital divides.

12.60 The planned support on issues related to COVID-19 is expected to result in improved data on urban COVID-19 hotspots and local responses and improved living standards for the most vulnerable through the provision of clean water supplies, handwashing stations, education and communication materials and protective equipment.

## **Programme performance in 2020**

12.61 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented in results 1 and 2 below.

### **National urban policies as a driver for sustainable urban development**

12.62 As the world continues to urbanize rapidly, harness urbanization, mitigate its negative externalities and promote an urban paradigm shift, there is a need for a coordinated approach and clear policy direction. National urban policies have been identified as one of the key tools for Governments in promoting sustainable development that cuts across urban, peri-urban and rural areas and support the achievement of the New Urban Agenda and the Sustainable Development Goals. National urban policies were adopted by the Statistical Commission as an indicator for target 11.a of the Sustainable Development Goals in 2020.

12.63 The subprogramme has also been developing normative tools to accompany urban policy development to better address issues including urban-rural linkages, climate change, sustainable mobility, migration, public spaces, green and smart cities and housing. These tools include the following technical materials: *Mainstreaming Urban-Rural Linkages in National Urban Policies*; *Monitoring and Evaluating National Urban Policy: A Guide*; *National Urban Policies: Driving Public Space Led Urban Development*; *Developing National Urban Policies: Ways Forward to Green Smart Cities*.

### *Progress towards the attainment of the objective, and performance measure*

12.64 The above-mentioned work contributed to the objective, as demonstrated by the fact that 55 countries developed national urban policies (see figure 12.IV).

Figure 12.IV

**Performance measure: total number of countries developing national urban policies (cumulative)**

### **Impact of COVID-19 on subprogramme delivery**

12.65 Owing to the impact of COVID-19 during 2020, the subprogramme cancelled several planned in-person events, including seminars, training sessions, workshops and conferences, and in some cases held them remotely. These changes had an impact on programme performance in 2020, as specified in result 1 below.

12.66 At the same time, however, the subprogramme identified new and modified activities to support Member States on issues related to COVID-19, within the overall scope of its objectives, including deploying its Data and Analytics Unit, previously focused on the implementation of the City Prosperity Initiative, to develop a methodology for rapid mapping of COVID-19 vulnerability, impact and responses in cities and implementing it in over 1,500 cities for the UN-Habitat COVID-19 response; and tailoring its national urban policy demonstration projects to COVID-19 response and recovery.

### **Planned results for 2022**

12.67 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: innovation driving city transformation and sustainable development: the City Prosperity Initiative<sup>4</sup>**

#### **Programme performance in 2020**

12.68 The subprogramme has utilized the capacity of the City Prosperity Initiative to guide decision-making in 550 cities by establishing linkages between data, knowledge and policy actions. The subprogramme also worked with 60 United Nations and development partners to develop a global United Nations system-wide Urban Monitoring Framework to track changes concerning the urban Sustainable Development Goals and support voluntary local reporting, for adoption by the Statistical Commission and the Inter-Agency and Expert Group on Sustainable Development Goal Indicators. Furthermore, the subprogramme adapted the initiative to provide rapid spatial analysis of urban vulnerability and city responses to

<sup>4</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 15)).

COVID-19, having developed a methodology to integrate intra-urban inequality analysis in pandemic tracking.

12.69 The above-mentioned work contributed to 550 cities using the City Prosperity Initiative, which did not meet the planned target of 700 cities reflected in the proposed programme budget for 2020, since team capacity was deployed to respond to the newly emerging COVID-19 crisis. However, the subprogramme tracked the development of voluntary local reviews and carried out spatial analyses of COVID-19 vulnerability and responses in over 1,500 cities.

### Proposed programme plan for 2022

12.70 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective and in response to recent developments, the subprogramme's work will evolve to include the implementation of the Urban Monitoring Framework in the context of the Sustainable Development Goal Cities initiative and to support voluntary local reviews. The expected progress is presented in the updated performance measure below (see figure 12.V).

Figure 12.V

**Performance measure: total number of cities using the City Prosperity Initiative and the Urban Monitoring Framework (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: strengthened capacities of cities to accelerate the implementation of the Sustainable Development Goals by linking evidence-based policies to investments<sup>5</sup>

### Programme performance in 2020

12.71 The subprogramme launched the Sustainable Development Goal Cities global flagship programmes during the World Urban Forum in 2020. The subprogramme also mobilized collaboration with international local government institutions, academic institutions, private entities and investors committed to the implementation of the Goals. Furthermore, the subprogramme developed approaches and digitalized tools that enable large-scale participation of cities in the flagship programmes; the digital toolkit will include data and strategic planning tools, local capacity diagnostic tools,

<sup>5</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

e-learning tools and a city investment portal. These will support cities in relation to connecting data, planning, Sustainable Development Goal project preparation and related financing.

12.72 The above-mentioned work contributed to 425 cities using the Sustainable Development Goal Cities initiative urban indicator and monitoring platform, which met the planned target reflected in the programme budget for 2021.

### **Proposed programme plan for 2022**

12.73 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to develop digitalized data, develop capacity diagnostic and training tools and build a Cities Investment Portal and advisory service, as key components of a systematized backbone for large-scale implementation; advance partnerships with key global stakeholders; implement far-reaching communications and advocacy efforts; and onboard national groupings of cities. The expected progress is presented in the performance measure below (see figure 12.VI).

Figure 12.VI

**Performance measure: total number of cities using the Sustainable Development Goal Cities initiative urban indicator and monitoring platform (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: a people-centred approach to urban innovation, digital technologies, smart cities and urbanization processes adopted by cities**

#### **Proposed programme plan for 2022**

12.74 Cities are hubs for open technological and social innovation. Smart cities play an increasing role in urban development (see *World Cities Report 2020*), which was recognized in the ministerial declaration of the UN-Habitat Assembly entitled “Innovation for better quality of life in cities and communities: accelerated implementation of the New Urban Agenda towards the achievement of the Sustainable Development Goals”, adopted in 2019. In order to use smart technologies to accelerate the achievement of the urban-related Sustainable Development Goals and a better quality of life for all, cities need to shift from a supply-driven to a needs-based approach to smart technologies and innovation and strengthen access to digital technologies and inclusion in order to leave no one behind. The subprogramme has supported the development of people-centred smart cities strategies, starting in Kigali, and carried out research into the potential for challenge-driven innovation to make

cities healthy, thriving and climate-neutral. The subprogramme launched the Climate Smart Cities Challenge, an open call to city governments and agencies around the world to join an open competition aimed at stimulating and scaling up innovative means of reducing greenhouse gas emissions in cities while creating other social benefits. It also established the United Nations Innovative Technology Accelerator for Cities in Hamburg, with the support of the Government of Germany, to demonstrate the power of digital technologies to solve urban challenges. The subprogramme will continue advancing a people-centred approach to urban innovation and digital transformation for resilient, safe, inclusive and sustainable urbanization processes.

#### *Lessons learned and planned change*

12.75 The lesson for the subprogramme was that it needed to better support the strategic and proactive role of local and national governments in harnessing innovation, digital technologies and smart cities to advance sustainable urban development. In applying the lesson, the subprogramme will support cities in developing people-centred smart city strategies aligned with efforts to implement the New Urban Agenda and achieve the Sustainable Development Goals. This will include establishing appropriate multi-level governance frameworks and ensuring that technologies and innovation directly contribute to improved urban environments and raise the quality of life, including in marginalized communities. Additionally, the subprogramme will build on the Climate Smart Cities Challenge and support challenge-driven innovation to generate innovative solutions to new and pre-existing challenges faced in urban areas, including in the context of COVID-19 recovery and pandemic preparedness.

#### *Expected progress towards the attainment of the objective, and performance measure*

12.76 This work is expected to contribute to the objective, as demonstrated by the implementation of digital transformation, smart city strategies and innovations that address the digital divide by 20 local authorities (see table 12.4).

Table 12.4  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)</i>	<i>2022 (planned)</i>
Rwanda implements a smart cities masterplan	Member States at the UN-Habitat Assembly note the potential of frontier technologies and innovation for sustainable urban development	10 cities benefit from a flagship programme on people-centred smart cities	10 local governments adopt people-centred digital transformation and smart city strategies that address the digital divide  10 countries implement urban innovation challenges	20 local authorities implement digital transformation and smart city strategies and benefit from innovations addressing the digital divide

#### **Legislative mandates**

12.77 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolutions*

71/327	The United Nations in global economic governance	75/176	The right to privacy in the digital age
--------	--	--------	---

*Governing Council resolutions*

19/4	Cooperation between the United Nations Human Settlements Programme and the United Nations Environment Programme	24/3	Inclusive and sustainable urban planning and elaboration of international guidelines on urban and territorial planning
------	---	------	--

*UN-Habitat Assembly resolution*

1/5	Enhancing urban-rural linkages for sustainable urbanization and human settlements
-----	---

**Deliverables**

12.78 Table 12.5 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 12.5

**Subprogramme 2: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned<sup>a</sup></i>
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>37</b>	<b>28</b>	<b>50</b>	<b>29</b>

7. National cities report	1	1	2	2

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned <sup>a</sup>
<b>Technical materials</b> (number of materials)	<b>21</b>	<b>22</b>	<b>30</b>	<b>11</b>
8. Technical materials on spatial connectivity, urban planning and design, metropolitan planning, urban and rural linkages, action planning, urban and territorial planning and national urban policies	7	9	10	5
9. Technical materials on spatial productivity, local economic development, urban and municipal finance, financing urban basic services and infrastructure	7	7	10	3
10. Technical materials on frontier technologies and innovation, best practices, legal and governance frameworks and prosperity indices for sustainable urban development and implementation of the New Urban Agenda and the Sustainable Development Goals	7	6	10	3

#### C. Substantive deliverables

**Consultation, advice and advocacy:** advisory services and technical assistance to 20 Member States on national urban policy, territorial development, urban-rural linkages, metropolitan development, preparation of local economic development plans and strategies and on improving local revenue generation; use of frontier technologies, innovations and development of solutions; urban law reform, compliance and community contracting, urban prosperity, including the use of the Urban Monitoring Framework, and monitoring of the Sustainable Development Goals.

**Databases and substantive digital materials:** national urban policy database, compendium of urban-rural linkages case studies and global municipal database.

#### D. Communication deliverables

**Outreach programmes, special events and information materials:** [www.urbanpolicyplatform.org](http://www.urbanpolicyplatform.org); content for social media coverage, brochures, leaflets and profiles on national urban policy, urban-rural linkages, metropolitan development, territorial development, urban monitoring and reporting, basic services, mobility and public space; fourth International Conference on National Urban Policy, second International Forum on Urban-Rural Linkages; private-sector focused engagement frameworks reaching an audience of 2,000.

<sup>a</sup> The 2022 planned deliverables, to be funded from the Foundation's non-earmarked fund, have been adjusted downward, taking into account the resources approved by the Executive Board of \$10.0 million for 2021 and a budget ceiling figure of \$12.0 million in 2022, as shown in table 15.14 of the proposed programme budget for 2022 (A/76/6 (Sect. 15)).

## Subprogramme 3 Strengthened climate action and improved urban environment

### Objective

12.79 The objective, to which this subprogramme contributes, is strengthened climate action and improved urban environments through reducing greenhouse gas emissions and improving air quality, improving resource efficiency and protecting ecological assets, and the effective adaptation of communities and infrastructure to climate change.

### Strategy

12.80 To contribute to the objective, the subprogramme will provide technical support for the development of low-emission city development that addresses emerging climate risks, adaptation investments, and basic service provision and the integration of low-emission development and air quality strategies into urban mobility, public space and urban development strategies. The subprogramme will provide assistance to selected Member States through knowledge transfer, capacity-building, policy advice and peer-to-peer engagement in regional initiatives on sustainable approaches to urban climate action. The subprogramme plans to broaden its engagement with Member States to scale up the urban dimension of nationally determined contributions and national adaptation plans, while strengthening the

evidence base. This work helps Member States make progress towards achieving Sustainable Development Goals 1, 11 and 13.

12.81 The subprogramme will promote nature-based solutions to climate action for urban and peri-urban environmental protection, restoration and green public spaces. The subprogramme will also strengthen resource efficiency by promoting integrated solid waste management and by addressing marine plastic litter reduction. The subprogramme will also promote the development of energy- and resource-efficient standards for buildings and the integration of energy and resource efficiency principles into country-specific building and planning codes. This work helps Member States make progress towards achieving Sustainable Development Goals 6, 7, 8, 11, 12, 13, 14 and 15.

12.82 The subprogramme will also provide assistance with regard to the formulation of policy and legislation, urban planning and design, multilevel governance and financing instruments through its flagship programme entitled “RISE-UP: resilient settlements for the urban poor”, which focuses on mobilizing investments to address climate resilience issues affecting the poor and marginalized communities in cities. It will further support the implementation of global adaptation initiatives aimed at improving the enabling environment for adaptation investments in urban infrastructure and communities, such as the National Adaptation Plan Global Support Programme, the Nationally Determined Contributions Partnership, which contributes to the implementation of the Paris Agreement on climate change and in which countries specify their emissions reduction and adaptation targets for the period up to 2030, and the Least Developed Countries Expert Group. This work helps Member States make progress towards achieving Sustainable Development Goals 9, 11 and 13.

12.83 The subprogramme plans to support Member States on issues related to COVID-19 by highlighting technologies, processes and investment opportunities, as part of its normative work, which will support sustainable COVID-19 recovery opportunities and an integrated approach to socioeconomic development, climate and health resilience. The subprogramme will also integrate such guidance in its technical advisory services.

12.84 The above-mentioned work is expected to result in:

- (a) Strengthened capacities of partner cities and Member States to plan for, invest in and monitor city-level climate action;
- (b) Multidimensional climate action and urban environment planning by partner cities that preserves, regenerates and restores urban biodiversity and reduces air and water pollution;
- (c) The mobilization of investments for adaptation to climate change at the national and subnational levels.

12.85 The planned support on issues related to COVID-19 is expected to result in:

- (a) Increased capacities of partner cities and Member States to develop sustainable COVID-19 recovery plans that can attract funding;
- (b) More climate- and pandemic-resilient cities, human settlements and communities.

## **Programme performance in 2020**

12.86 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented in results 1 and 2 below.

### **Integrated climate and COVID-19 response plans**

12.87 Cities and local governments are at the forefront of the COVID-19 response, while for many local governments, climate change remains the most pressing long-term challenge. In line with the policy brief by the Secretary General on COVID-19 in an urban world, cities have started to develop integrated climate change and COVID-19 response plans.

12.88 The subprogramme supported five cities in the Philippines in updating their climate change action plans to align climate change mitigation measures with sustainable recovery opportunities and climate resilience actions with a COVID-19 response that ensures that community members in vulnerable situations are supported. Furthermore, the subprogramme disseminated early results through an investment forum, to attract funding for the initiatives, and through a series of webinars attended by officials from nearly 100 local governments.

#### *Progress towards the attainment of the objective, and performance measure*

12.89 The above-mentioned work contributed to the objective, as demonstrated by the integration of the COVID-19 response into the plans and selected climate projects of five cities in the Philippines (see table 12.6).

Table 12.6  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>
Development of city-wide climate change action plans in five cities	Prioritized climate projects developed and prepared for finance	COVID-19 response integrated into the plans and selected climate projects of five cities in the Philippines

### **Impact of COVID-19 on subprogramme delivery**

12.90 Owing to the impact of COVID-19 during 2020, the implementation of numerous large-scale climate change programmes started up to six months late, and the rate of implementation was slower as a result of lockdowns or other movement restrictions; examples include projects in the Comoros, the Lao People's Democratic Republic, Madagascar, Malawi and Mozambique. In countries with very severe international travel restrictions, project implementation all but halted; for example, project advisers have not been allowed to travel to Solomon Islands since March 2020 and some project components could not be implemented with local capacities only. These changes had an impact on the programme performance in 2020, as specified in results 1 and 2 below.

12.91 At the same time, however, the subprogramme identified new activities to support Member States on issues related to COVID-19, within the overall scope of its objectives, namely supporting sustainable recovery and addressing socioeconomic vulnerabilities affected by climate change and COVID-19. This included contributing to socioeconomic response plans at the city and national levels by leveraging climate change analyses as well as organizing seminars and workshops with mayors and local government officials. The modified deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

## Planned results for 2022

12.92 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: Strengthened adaptation to climate change and other shocks: Solomon Islands<sup>6</sup>**

#### **Programme performance in 2020**

12.93 The subprogramme has continued to support the Government of Solomon Islands, the Honiara City Council and communities in five informal settlement areas in the development and implementation of community climate change action plans. The subprogramme also supported the national and local governments in the analysis of the socioeconomic impact of COVID-19 on these five communities. Furthermore, the subprogramme supported the national Government in its spatial and institutional analysis of COVID-19 and the compounded impacts of climate change.

12.94 The work above did not contribute to any additional informal settlement implementing community-level resilience action, which did not meet the planned target of five settlements reflected in the proposed programme budget for 2020. The planned target for 2020 could not be fully met as infrastructure projects have not yet commenced owing to the complete closure of the border as a result of COVID-19.

#### **Proposed programme plan for 2022**

12.95 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will accelerate implementation once the COVID-19 situation allows and, in the meantime, will work more closely with increased national expertise that will be built through virtual support. In 2022, the subprogramme will implement community resilience initiatives such as activities related to community infrastructure and sustainable and resilient livelihoods. The expected progress is presented in the performance measure below (see figure 12.VII).

<sup>6</sup> As reflected in the proposed programme budget for 2020 ([A/75/6 \(Sect. 15\)](#)).

Figure 12.VII

**Performance measure: number of informal settlements that have implemented community-level resilience action (annual)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: accelerated climate action in 16 cities and eight countries around the world<sup>7</sup>**

### **Programme performance in 2020**

12.96 The subprogramme has supported 16 cities in Bangladesh, Brazil, Colombia, Indonesia, India, the Lao People's Democratic Republic, Rwanda and South Africa in progressing through the steps of their city climate action planning, including through the development of 15 new or updated greenhouse gas inventories and 13 new or updated climate risk and vulnerability assessments. The subprogramme also supported capacity-building and training efforts, including peer-to-peer exchange between cities in Rwanda and South Africa and between cities in Indonesia and the Lao People's Democratic Republic. Furthermore, the subprogramme supported the vertical integration and enhanced the multilevel governance of these local efforts through the release of a guide entitled "Enhancing nationally determined contributions through urban climate action", as well as country-level advisory services for improved multilevel governance.

12.97 The above-mentioned work contributed to eight cities enacting legal frameworks for low-emission development strategies that are partially in draft form and have not yet been adopted by local governments, which did not meet the target of 10 cities enacting such frameworks reflected in the proposed programme budget for 2020. The frameworks are comprehensive in nature and cover sectoral low-emission development strategies in building and construction, energy systems, transport and land use. COVID-19 lockdowns disrupted the participatory process for drafting the climate strategies and action plans. A project extension agreed by the donor reflects this reality and allows for the draft legal frameworks to be completed before September 2021.

### **Proposed programme plan for 2022**

12.98 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to support the Lao People's Democratic Republic in the implementation of policies and plans with an emphasis on sustainable and resilient

<sup>7</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect. 15)).

recovery. It also plans to identify a new set of cities in Mexico where policy support will be provided. Other opportunities to deliver city-level climate action support will be explored. The expected progress is presented in the performance measure below (see figure 12.VIII).

Figure 12.VIII

**Performance measure: total number of cities enacting legal frameworks for low-emission development strategies with support from the United Nations Human Settlements Programme (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: participatory urban resilience action in Southern Africa**

#### **Proposed programme plan for 2022**

12.99 In sub-Saharan Africa, the critical situation arising from multiple increasingly extreme weather-related hazards caused by climate change, combined with extraordinarily rapid urbanization, a lack of adequate infrastructure and the risks associated with health emergencies, including pandemics, requires an urgent response. The hazards and vulnerabilities faced by urban areas transcend national boundaries and are shared by cities in multiple countries. Capacity-building activities were carried out to promote cooperation and sustainable and resilient urbanization in Southern, East and West Africa. Participatory urban resilience planning using the city resilience action planning tool (CityRAP) methodology was implemented in 10 cities across seven countries (Comoros, Ethiopia, Malawi, Mozambique, South Africa, Zambia and Zimbabwe). With regard to normative work, a regional assessment on urban vulnerability and resilience was conducted in the 16 States members of the Southern African Development Community (SADC). The subprogramme has been supporting the affected urban settlements in the region through efforts at different levels of government to foster better community-led participatory climate-related resilience planning, coordination, response, preparedness and adaptation. The subprogramme facilitated the regional and subregional exchange of knowledge among national and local authorities and academic institutions from different SADC countries.

#### *Lessons learned and planned change*

12.100 The lesson for the subprogramme was that it needed to better support multi-country coordination to strengthen the links between the regional, national and city levels. In addition, smaller secondary cities in Southern Africa hold the key to building urban resilience in the region, given their rapid urban growth and limited resources. In applying the lesson, the subprogramme will take a dual approach,

improving regional coordination for an effective trickle-down effect of policies and regulations and promoting a bottom-up approach in which participatory resilience and climate adaptation planning in secondary cities inform planning at the national and regional levels through cross-fertilization and the exchange of best practices, including with regard to the design and implementation of resilient infrastructure. In 2022, the subprogramme will expand its support to Member States in relation to the implementation of climate and pandemic resilience plans in two additional cities and will further support regional efforts across the 16 SADC countries to build capacity on local-level disaster risk reduction and climate change adaptation policies.

*Expected progress towards the attainment of the objective, and performance measure*

12.101 This work is expected to contribute to the objective, as demonstrated by 18 distinct resilience action frameworks developed in sub-Saharan Africa (see figure 12.IX).

Figure 12.IX

**Performance measure: total number of distinct resilience action frameworks developed in sub-Saharan Africa (cumulative)**

## Legislative mandates

12.102 The list below provides all mandates entrusted to the subprogramme.

### *General Assembly resolutions*

63/217	Natural disasters and vulnerability	74/219	Protection of global climate for present and future generations of humankind
67/263	Reliable and stable transit of energy and its role in ensuring sustainable development and international cooperation	75/216	Disaster risk reduction
69/225	Promotion of new and renewable sources of energy	75/218	Implementation of the United Nations Convention to Combat Desertification in Those Countries Experiencing Serious Drought and/or Desertification, Particularly in Africa
73/228	Follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States	75/219	Implementation of the Convention on Biological Diversity and its contribution to sustainable development

### *Governing Council resolutions*

19/4	Cooperation between the United Nations Human Settlements Programme and the United Nations Environment Programme	22/3	Cities and climate change
------	---	------	---------------------------

## Deliverables

12.103 Table 12.7 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated.

Table 12.7

### Subprogramme 3: deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned <sup>a</sup>
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects (number of projects)</b>	<b>28</b>	<b>24</b>	<b>32</b>	<b>15</b>
1. Demonstration projects on improving urban air quality, the urban environment, climate change mitigation, and increased access to low-carbon and low-emission basic services, more sustainable infrastructure and buildings	4	4	4	2
2. Improved policies, legal instruments, plans and strategies for better urban air quality, the urban environment, climate change mitigation and low-carbon and low-emission basic services and greener infrastructure and buildings	2	2	3	1
3. Demonstration projects on resilience-building and adaptation of communities and infrastructure to climate change, and disaster risk reduction	10	10	11	6
4. Improved policies, legal instruments, plans and strategies for effective adaptation of communities and infrastructure to climate change, informed by participatory processes, assessments of local vulnerabilities and innovative data collection (i.e., remote sensing) and processing	5	5	6	3
5. Demonstration projects on urban environmental management and restoration, biodiversity protection, circular economy and ecosystem services	4	2	4	1
6. National, regional and local policies, plans and strategies for improved urban resource management and efficiency, including circular economy, efficient use of urban land, service provision and sustainable water and waste management, and promotion of cleaner energy and energy efficiency	3	1	4	2
<b>Seminars, workshops and training events (number of days)</b>	<b>93</b>	<b>57</b>	<b>100</b>	<b>38</b>
7. Seminars, workshops and training events leading to enhanced awareness and capacity of partners and those in vulnerable situations (e.g., in informal settlements) to plan for, manage and act on climate change mitigation, air quality and low-carbon and low-emission basic services	30	16	35	10
8. Seminars, workshops and training events leading to strengthened capacities of UN-Habitat partners to plan for, manage and act on effective adaptation of communities and infrastructure to climate change	55	33	55	25
9. Seminars, workshops and training events leading to enhanced understanding of sustainable city models and their application, sustainable infrastructure and green-blue urban planning.	4	4	5	—
10. Training on environment and climate dimensions (air quality, water, sanitation, waste management) and Sustainable Development Goal monitoring in urban areas	4	4	5	3
<b>Publications (number of publications)</b>	<b>2</b>	<b>2</b>	<b>3</b>	<b>3</b>
11. Publication on climate change mitigation and air quality	1	1	1	1
12. Publication on effective adaptation of communities of slums and other marginalized communities in urban neighbourhoods, and infrastructure, to climate change	1	1	1	1
13. Publication on improved low-carbon and low-emission urban services and resource efficiency (e.g., focusing on technological innovation)	—	—	1	1

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned <sup>a</sup>
<b>Technical materials</b> (number of materials)	<b>9</b>	<b>9</b>	<b>12</b>	<b>5</b>
14. Series or set of technical materials on improved resource efficiency and protection of ecological assets, including sectoral materials	2	2	2	1
15. Series of technical materials on climate change mitigation and air quality	2	2	3	1
16. Series or set of non-recurrent case studies on climate action, basic services or environment in human settlements	2	2	3	1
17. Series of non-recurrent compilations of national, regional and local guidelines, plans, coordination mechanisms and strategies on climate action, the urban environment, ecosystems and biodiversity, blue-green networks, ecological assets and ecosystem services	1	1	2	1
18. Series of technical materials on improved low-carbon and low-emission urban services, resource efficiency and (electric) mobility solutions and infrastructure (including monitoring)	2	2	2	1

#### C. Substantive deliverables

**Consultation, advice and advocacy:** advisory services to 16 Member States on reducing urban greenhouse gas emissions to achieve climate change mitigation and adaptation, improving air quality and low-carbon and low-emission urban services, improving resource efficiency and protecting ecological assets.

**Databases and substantive digital materials:** databases on urban climate- or environment-relevant subjects, and substantive digital materials (i.e., simulations) on reduced greenhouse gas emissions and improved air quality; improved resource efficiency and protection of ecological assets, effective adaptation of communities and infrastructure to climate change.

#### D. Communication deliverables

**Outreach programmes, special events and information materials:** on reduced greenhouse gas emissions and improved air quality; improved resource efficiency and protection of ecological assets; effective adaptation of communities and infrastructure to climate change with the aim of reaching an audience of 6 million.

**External and media relations:** articles on reduced greenhouse gas emissions and improved air quality, improved resource efficiency and protection of ecological assets and effective adaptation of communities and infrastructure to climate change.

**Digital platforms and multimedia content:** websites and social media and multimedia content on reduced greenhouse gas emissions and improved air quality, improved resource efficiency and protection of ecological assets and effective adaptation of communities and infrastructure to climate change.

<sup>a</sup> The 2022 planned deliverables, to be funded from the Foundation's non-earmarked fund, have been adjusted downward, taking into account the resources approved by the Executive Board of \$10.0 million for 2021 and a budget ceiling figure of \$12.0 million in 2022, as shown in table 15.14 of the proposed programme budget for 2022 (A/76/6 (Sect. 15)).

## Subprogramme 4 Effective urban crisis prevention and response

### Objective

12.104 The objective, to which this subprogramme contributes, is to enhance urban crisis prevention and response. This is done through promoting social integration and inclusive communities as well as improved living standards and the inclusion of migrants, refugees, internally displaced persons and returnees, and enhancing resilience of the built environment and infrastructure.

### Strategy

12.105 To contribute to the objective, the subprogramme will support Member States in implementing strategies and actions to increase social integration and safety in public spaces through in-country comprehensive, participatory and inclusive

operational programmes responding to crises affecting all members of the community, including those in vulnerable situations; and implement fit-for-purpose land administration towards the achievement of tenure security for all in crisis-affected areas. The subprogramme also plans to support implementation by Member States of inclusive, evidence-based, sustainable recovery approaches, such as the Programme's "People's Process", a community-based planning and management process that fosters social integration, inclusiveness and transition to sustainable development, in line with the principle of "leaving no one behind" and the aim of building back better. The focus will be on elements that have a catalytic impact when integrated into broader efforts of the United Nations community in relation to promoting stability and sustaining peace, strengthening social cohesion and building resilient cities and communities, which will help Member States to make progress towards achieving target 11.b of the Sustainable Development Goals. The subprogramme will continue to focus on supporting local actors as key players in increasing social cohesion between communities and reducing discrimination and xenophobia with full respect for human rights in urban crisis situations. In addition, the subprogramme will complement efforts made under subprogramme 2 to increase local revenue by improving tenure security and ensuring that increased local revenue is managed locally and in a way that strengthens social integration and inclusive communities. This work helps Member States make progress towards achieving Sustainable Development Goals 9, 11 and 16.

12.106 The subprogramme also plans to prioritize improved living standards and the inclusion of migrants, refugees, internally displaced persons and returnees. The subprogramme will provide urban crisis-response expertise and support integrated urban development strategies that address the needs of both host communities and the displaced, seeking to overcome both chronic and acute vulnerabilities. It will also provide expertise regarding the planning of camps as future urban extensions, in prioritized crises, and incorporate adequate urban planning standards and tenure arrangements that are suitable for the eventual transformation of camps into neighbourhoods. It will increase the focus of UN-Habitat on overcoming land-related challenges that are drivers of conflict, including by providing support in relation to housing, land and property rights in humanitarian and development contexts and advancing fit-for-purpose land administration towards the achievement of tenure security for all in crisis-affected areas. This will be done through further mobilizing United Nations efforts as set out by the Secretary-General's guidance note on land and conflict. The subprogramme will also tailor the Programme's normative guidance and operational support in urban displacement contexts, within the framework of the flagship programme "Inclusive cities: enhancing the positive impacts of urban migration", in coordination and close cooperation with United Nations agencies and other key actors, and advance synergies between the humanitarian, development and peace pillars. This work helps Member States make progress towards achieving Sustainable Development Goals 1, 5, 8, 10 and 11.

12.107 The subprogramme will continue to develop evidence-based local disaster risk reduction and resilience strategies in line with the Sendai Framework for Disaster Risk Reduction and implement disaster risk reduction and resilience strategies. The subprogramme will further develop and improve urban profiling and urban-specific recovery frameworks, tools and approaches, supporting local implementation and mobilizing networks of urban stakeholders and complementing work led by the World Bank, the European Union and UNDP at the national level. This work helps Member States make progress towards achieving Sustainable Development Goals 9, 11, 13 and 16.

12.108 The subprogramme plans to support Member States on issues related to COVID-19 by working with cities and informal settlements within cities, through both normative and operational activities, to increase their resilience to a broad range

of threats, including health emergencies, and by working towards the inclusion of urban recovery in national COVID-19 recovery strategies.

12.109 The above-mentioned work is expected to result in:

(a) An increased proportion of the population in crisis-affected communities engaging in local decision-making with regard to reconstruction projects and improved social inclusion, strengthened land tenure and improved access to adequate housing and basic services in fragile situations;

(b) An increased number of cities where refugees, migrants, internally displaced persons, returnees and host communities have access to secure tenure, sustainable basic services and social services, adequate housing, safety and security;

(c) The reduction of multidimensional risks and increased protection for those in vulnerable situations in cities.

12.110 The planned support on issues related to COVID-19 is expected to result in strengthened systems for analysis and decision-making concerning resilient infrastructure at the city level, particularly in crisis settings.

## **Programme performance in 2020**

12.111 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented in results 1 and 2 below.

### **Strengthened urban response to COVID-19**

12.112 COVID-19 has presented a global existential threat, which has proven to be most complex in densely populated urban areas. Density in and of itself is not the problem or the cause of this threat; rather, the threat results from a wide range of historic and current socioeconomic deprivations and a basic lack of appropriate access to urban services. The subprogramme's response was aligned with and contributed to the three pillars of the health response of the United Nations system. In coordination with WHO, and based on experience gained from the Ebola crisis in West Africa, the subprogramme shared its expertise on data analysis, urban analysis and health guidance in urban settings. For the global humanitarian response, the subprogramme actively participated in the Inter-Agency Standing Committee mechanisms, making a particular effort to raise the visibility of urban COVID-19 threats and response priorities. The subprogramme also participated in the coordinated inter-agency Global Humanitarian Response Plan for COVID-19 and provided country-level contributions in relation to shaping the global narrative on the impact of the pandemic in urban areas. The subprogramme also contributed actively to the United Nations framework for the immediate socioeconomic response to COVID-19 by co-leading on pillar 5 (social cohesion and community resilience). In addition, UN-Habitat took a lead role in contributing to the Secretary-General's policy brief on COVID-19 in an urban world, in collaboration with UNDP, the Department of Economic and Social Affairs, UNEP, UNICEF, UNODC, ILO, WHO, the Office of the United Nations High Commissioner for Human Rights and the regional commissions.

12.113 The subprogramme also developed a policy and programming framework to define the thematic scope of the COVID-19 response. This framework was used by Headquarters and regional offices to ensure the strategic alignment and complementarity of urban response programmes and projects. From rapid response to longer-term recovery, the subprogramme has supported the overall response in 37 countries and more than 250 cities, benefiting 6.8 million people. The subprogramme's important work in slums and informal settlements was a vital

component of the response to COVID-19. Furthermore, the subprogramme prepared a response plan to support 64 countries through over 100 projects and raised or reprogrammed \$25 million, mainly for informal settlements. For example, in “Somaliland”, the subprogramme facilitated access to water for vulnerable communities to prevent the spread of COVID-19, supplying clean water to internally displaced persons in two settlements on the outskirts of Hargeysa. In relation to the national urban policy programme of Myanmar, the subprogramme developed an emergency response project to combat COVID-19 in an informal settlements project in Yangon. In the Philippines, the subprogramme opened two satellite markets and several mobile stores around Marawi City to improve access to food, engage communities in small business and inform communities about recovery strategies.

*Progress towards the attainment of the objective, and performance measure*

12.114 This above-mentioned work contributed to the objective, as demonstrated by the development and adaptation of projects and programmes to address COVID-19 in urban environments and informal settlements in 262 beneficiary cities in 37 countries. It reached 6.8 million individual beneficiaries through 71 projects involving more than 250 partners (see table 12.8).

Table 12.8  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
—	—	71 projects with a focus on mitigating the impact of COVID-19 in 262 beneficiary cities in 37 countries, reaching 6.8 million individual beneficiaries

**Impact of COVID-19 on subprogramme delivery**

12.115 Owing to the impact of COVID-19 during 2020, the subprogramme changed its approach to capacity-building and training activities for local communities, as well as to its engagement with national and local authorities, by moving from face-to-face to virtual or hybrid meetings. Global travel restrictions effectively stopped all planned capacity development missions, field trips and fact-finding, as well as the deployment of staff to duty stations.

12.116 At the same time, however, the subprogramme identified new activities to support Member States on issues related to COVID-19, within the overall scope of its objectives, namely contributing its urban expertise in the context of the development of the Global Humanitarian Response Plan, the United Nations framework for the immediate socioeconomic response to COVID-19 and the Secretary General’s policy brief on COVID-19 in an urban world. Further, UN-Habitat developed its COVID-19 policy and programme framework, identifying global, regional and country-level action plans, focusing on support for local governments, urban profiling and data mapping, improvements to water and sanitation in informal settlements, and awareness-raising with regard to the COVID-19 threat. The Programme’s internal emergency funds of \$1.3 million supported projects benefiting 5 million people in 145 cities in 13 countries, including Brazil, Ghana, Iraq, Kenya, Lebanon, Mexico, Mozambique, Myanmar, the Philippines and the Syrian Arab Republic. In Mosul, Iraq, in collaboration with WHO, UN-Habitat developed guidelines for managing COVID-19 risks at construction sites in order to facilitate return-to-work policies for

reconstruction projects. The guidelines were disseminated to contractors and partners, and the resumption of the Programme's activities in Mosul resulted in the provision of shelter and livelihood opportunities for disadvantaged communities. The new deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

## **Planned results for 2022**

12.117 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: rehabilitation and shelter recovery for vulnerable families in Mosul, Iraq<sup>8</sup>**

#### **Programme performance in 2020**

12.118 The subprogramme addressed the urban crisis in Iraq by scaling up its housing rehabilitation efforts in three liberated governorates and, in particular, in the city of Mosul. Shelter interventions contributed to the sustainable return of some 2,500 Mosul residents who had been displaced and affected by the conflict with Islamic State in Iraq and the Levant. The subprogramme also embarked on the participatory redesign and rehabilitation of Yarmuk Park, the largest public open space in western Mosul, as an integral component of its ongoing area-based urban recovery programming. Furthermore, the subprogramme has been promoting a "build back better" approach that embraces the adoption of greener technologies, including renewable energy, passive design, recycling of debris and the use of materials sourced and produced in Iraq.

12.119 The above-mentioned work contributed to the rehabilitation of 356 war-damaged houses in the target neighbourhoods of Shifa', Sikak, Matahin and Maghrib, in parallel to the upgrading of water, sanitation and hygiene infrastructure in Shifa', and the creation of sport facilities and greening in Yarmuk Park, which met the planned target reflected in the proposed programme budget for 2020. The newly built multipurpose sports grounds provide a powerful tool for strengthening social ties and networks, overcoming mistrust and reaching across political divides and ethnic and religious differences, particularly among disenfranchised young people that have grown up in an environment of intolerance and conflict.

#### **Proposed programme plan for 2022**

12.120 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will lead the drafting of a participatory recovery plan for the Old City of Mosul, in partnership with the United Nations Educational, Scientific and Cultural Organization (UNESCO). The expected progress is presented in the performance measure below (see table 12.9).

<sup>8</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 15)).

Table 12.9  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Absence of nationally owned coordination mechanism and lack of large humanitarian response for the reconstruction of Mosul in order to guide recovery and rehabilitation work of beneficiary returnees for the 600 rehabilitated houses	Establishment of nationally owned coordination mechanism for the reconstruction of Mosul in order to guide recovery and rehabilitation work; rehabilitation of damaged houses and construction of new homes undertaken simultaneously	Return of 356 families to rehabilitated war-damaged houses in the neighbourhoods of Shifa', Sikak, Matahin and Maghrib, following rehabilitation  Sport facilities and green spaces for local neighbourhoods at Yarmuk Park	Improved access to adequate housing and basic services by returnees and vulnerable community members; long-term development and peacebuilding challenges are addressed through measures such as protection of housing, land and property rights and facilitation of mediation to resolve disputes among community members	Progress on the rehabilitation of the Old City of Mosul following the launch of a participatory recovery plan in partnership with UNESCO

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: inclusive cities: enhancing the positive impacts of urban migration<sup>9</sup>

### Programme performance in 2020

12.121 Migrants and displaced persons (including internally displaced persons) are increasingly residing in and moving towards urban areas. The rapid influx of additional inhabitants to cities due to human-made or natural hazards puts stress on urban systems and affects service provision as well as the availability of adequate housing, infrastructure and livelihood opportunities. The subprogramme has worked in multiple regions to support Member States facing major migration or displacement-related challenges. In 2020, this included the development of urban spatial profiles in Latin America, the Arab States/Middle East and North Africa region, Africa and Asia; workshops to build local capacity in using participatory planning to increase social cohesion; the drafting of recommendations and guidance documents; and the provision of technical advisory services to advance area-based, cross-sectoral, multi-stakeholder, multilevel governance approaches to migrant inclusion in cities. The subprogramme contributed to strengthening the synergies between the humanitarian, development, and peace pillars, as the subprogramme's objective is to improve the lives of urban refugees, migrants and internally displaced persons, while also supporting host communities, through the promotion of area-based, whole-of-government and whole-of-society approaches. Furthermore, the subprogramme's work in urban crisis contexts ranged from spatial and participatory data collection (urban profiling) for evidence-based decision-making to policy recommendations, capacity-building and pilot project implementation. Building upon experiences from

<sup>9</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

countries such as Iraq, Lebanon and Somalia, teams in different countries developed master plans and regeneration projects, including planned city extensions and the upgrading of underserved neighbourhoods inhabited by the urban poor and other persons in vulnerable situations.

12.122 The above-mentioned work contributed to supporting 96 cities in applying participatory planning methodologies through participatory data collection and consultations with all relevant stakeholders and to fostering increased social cohesion between migrant, displaced and host communities, which met the planned target reflected in the proposed programme budget for 2021. Interventions aimed at improving the standard of living of all people in cities and communities, for example, through increased access to basic, social and urban services, land tenure security and housing, were based on participatory processes and verifiable urban data.

### **Proposed programme plan for 2022**

12.123 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to work to support governments at all levels in advancing human rights in the inclusion of migrants and displaced people in cities. Work will be undertaken to focus its activities on developing integrated and inclusive projects (including research, spatial data collection and analysis, review and recommendations for policy environments, training, guidance and advisory services and advocacy at the global level) that support the improvement of the living conditions of people in vulnerable situations. The expected progress is presented in the performance measure below (see figure 12.X).

Figure 12.X

**Performance measure: total number of cities applying participatory planning methodologies (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: a new approach to strengthen city resilience**

#### **Proposed programme plan for 2022**

12.124 With more than 50 per cent of the world's population living in urban areas, and a projected increase to 70 per cent by 2050, challenges in cities are increasing daily. These include internal stresses, such as the limited capacity of service providers to provide basic services such as water to the inhabitants of a city, as well as external shocks such as natural disasters that could potentially disrupt the functioning of a city. The subprogramme's City Resilience Global Programme works through a multi-hazard, multi-stakeholder and multisectoral approach to building resilient cities,

taking into consideration the complexities of urban systems. A recent example of the success of this approach has been the response of cities to the COVID-19 pandemic, for which the subprogramme provided mayors with support in relation to evidence-based decision-making on the basis of city-based data collection, analysis and diagnosis and the development by municipality personnel of technically actionable recommendations, using City Resilience Global Programme approaches, tools and indicators. The City Resilience Global Programme methodology has been calibrated in a broad range of completely different city settings in order to make sure that it is adaptable to different contextual and cultural realities, where resources and capacities may vary greatly.

#### *Lessons learned and planned change*

12.125 The lesson for the subprogramme was that regardless of the context and diversity of challenges in any given city, the main urban systems, elements and basic infrastructure needed are similar. Therefore, the need for a flexible conceptual framework such as the City Resilience Global Programme that maps out challenges, shocks and stresses and includes relevant actors across the urban landscape is of critical importance. In applying the lesson, the subprogramme will support cities in automating urban systems data while contextualizing that data to take into account different stakeholders and specific challenges or shocks. The subprogramme will also respond to increasing requests from cities to build their resilience to potential shocks.

#### *Expected progress towards the attainment of the objective, and performance measure*

12.126 This work is expected to contribute to the objective, as demonstrated by the growing number of cities adopting and investing in the City Resilience Global Programme methodology. This will increase by two cities in the programme period, and the subprogramme will develop tools in parallel that will provide increased upscaling capacity and support the production of policies and guidelines for national and local authorities (see figure 12.XI).

Figure 12.XI

**Performance measure: total number of cities implementing the City Resilience Global Programme (cumulative)**

#### **Legislative mandates**

12.127 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolutions*

64/292	The human right to water and sanitation	73/150	Assistance to refugees, returnees and displaced persons in Africa
67/291	Sanitation for All		
69/280	Strengthening emergency relief, rehabilitation and reconstruction in response to the devastating effects of the earthquake in Nepal	73/230	Effective global response to address the impacts of the El Niño phenomenon
69/283	Sendai Framework for Disaster Risk Reduction 2015–2030	74/115	International cooperation on humanitarian assistance in the field of natural disasters, from relief to development
73/139; 74/118	Strengthening of the coordination of emergency humanitarian assistance of the United Nations	74/160	Protection of and assistance to internally displaced persons

*Governing Council resolutions*

20/17	Post-conflict, natural and human-made disaster assessment and reconstruction	26/2	Enhancing the role of UN-Habitat in urban crisis response
23/18	Natural disaster risk reduction, preparedness, prevention and mitigation as a contribution to sustainable urban development		

**Deliverables**

12.128 Table 12.10 lists all deliverables, by category and subcategory, for the period 2020–2022 that are expected to contribute to the attainment of the objective stated above.

Table 12.10

**Subprogramme 4: deliverables for the period 2020–2022, by category and subcategory**

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned <sup>a</sup>
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>28</b>	<b>23</b>	<b>31</b>	<b>19</b>

11. Technical materials on enhanced resilience of the built environment and infrastructure	3	2	3	2

### C. Substantive deliverables

**Consultation, advice, and advocacy:** advisory services to 15 Member States on urban crisis mitigation and response and on enhancing urban resilience to multi-hazard threats, including crises related to migration and displacement.

### D. Communication deliverables

**Outreach programmes, special events and information materials:** brochures, campaigns and events on inclusion in cities, social cohesion, resilience-building, access to adequate housing, land tenure security, basic urban services and economic opportunities for all in urban crisis contexts.

**Digital platforms and multimedia content:** providing content for and maintaining social media accounts (Twitter, Facebook, Instagram, Trello, LinkedIn, YouTube or similar), blogs and websites will advance the subprogramme's messaging and communication with regard to the social and economic inclusion of migrants, refugees, internally displaced persons and returnees in urban crisis contexts; messages and multimedia content will be shared through six partners, including Cities Alliance, the Centre for Mediterranean Integration, the global networks for the implementation of the global compact for refugees and the Global Compact for Safe, Orderly and Regular Migration, and the Global Knowledge Partnership on Migration and Development.

<sup>a</sup> The 2022 planned deliverables, to be funded from the Foundation's non-earmarked fund, have been adjusted downward, taking into account the resources approved by the Executive Board of \$10.0 million for 2021 and a budget ceiling figure of \$12.0 million in 2022, as shown in table 15.14 of the proposed programme budget for 2022 ([A/76/6 \(Sect. 15\)](#)).

## **Programme 13**

### **International drug control, crime and terrorism prevention and criminal justice**

#### **Overall orientation**

#### **Mandates and background**

13.1 The United Nations Office on Drugs and Crime (UNODC) is responsible for supporting Member States in making the world safer from drugs, crime and terrorism, with a view to promoting security and justice for all. The mandate derives from the priorities established in relevant United Nations conventions and General Assembly resolutions, including Assembly resolutions [45/179](#), [46/152](#) and [46/185](#) C. The thematic focus areas of the Office range from combating transnational organized crime to strengthening drug use prevention and treatment and care for drug use disorders; from promoting alternative development to preventing and combating corruption; and from crime prevention and criminal justice reform to terrorism prevention. The work of the Office is grounded in a series of international instruments for which the Office acts as guardian and advocate. They include the three international drug control conventions, the United Nations Convention against Corruption, the United Nations Convention against Transnational Organized Crime and the Protocols thereto, the 19 international conventions and protocols against terrorism and the United Nations standards and norms in crime prevention and criminal justice. In 2021, transnational organized crime, including illicit drug trafficking, and terrorism continued to pose major threats to security, development and good governance around the world. Corruption, cybercrime, the use of new technologies, including artificial intelligence, for criminal purposes, as well as crime affecting the environment, particularly unregulated and illegal plundering of non-renewable resources and trafficking in endangered species of flora and fauna, are linked to State fragility and undermine the rule of law. The illicit cultivation, manufacture and consumption of and trafficking in drugs and psychotropic substances and the diversion of their precursors remain a risk to the health, dignity and hopes of millions of people. They lead to the loss of human life and the depletion of social cohesion and capital. UNODC support aimed at addressing these challenges, facilitating multilateral cooperation and developing the capacity of Governments to formulate and implement coherent policies for sustainable development, while mainly funded through extrabudgetary resources, will also continue to be provided through the implementation of the regular programme of technical cooperation and Development Account projects.

#### **Strategy and external factors for 2022**

13.2 As a United Nations entity whose mandates span the three pillars of the United Nations, namely peace and security, development and human rights, the Office assists Member States in their fight against crime in all its dimensions, including transnational organized crime, in countering the world drug problem, in combating corruption and in preventing international terrorism.

13.3 UNODC does so through three broad, interconnected and mutually supportive work streams:

(a) Normative work, including policy advocacy and legislative assistance to promote the ratification and implementation of the relevant international treaties and the provision of secretariat and substantive services to the treaty-based, governing

and other Member State-driven bodies that help to identify areas of focus, challenges, responses and commitments in relevant mandate areas relating to drugs, crime and counter-terrorism;

(b) Research and policy support work to expand the evidence base, as well as its interface with the policymaking processes at the national, regional and global levels, through increased knowledge and understanding of drug and crime issues;

(c) Technical cooperation to enhance the capacity of Member States and other stakeholders to counteract illicit drugs, crime and terrorism at the national, regional and global levels through the Office's extensive field network and headquarters.

13.4 The 2030 Agenda for Sustainable Development, the Ministerial Declaration on Strengthening Our Actions at the National, Regional and International Levels to Accelerate the Implementation of Our Joint Commitments to Address and Counter the World Drug Problem, adopted in 2019, and the outcome document of the special session of the General Assembly on the world drug problem, held in 2016, have highlighted the importance of the Office's mandate areas. In addition, the Commission on Crime Prevention and Criminal Justice and the Commission on Narcotic Drugs have provided a platform for sharing expertise and experiences in the areas of crime prevention and criminal justice and of drug control. The mandates emanating therefrom have provided an impetus for the Office to integrate its programmes into broader initiatives across the United Nations system that will, in turn, foster greater national ownership and sustainability.

13.5 The Office will leverage its role as an impartial knowledge broker to identify innovative and effective ways to prevent crime from impeding sustainable well-being. Research and analysis will play a fundamental role in better identifying, understanding and shaping responses to drug and crime challenges. The Office will do so by contributing to common country analyses which will help to shape the United Nations Sustainable Development Cooperation Frameworks at the national level that will be delivered under the leadership of empowered resident coordinators. The analysis generated in-house will also provide the evidence base for development of UNODC programmes rooted in mandates provided by its governing bodies, as well as the Mechanisms for the Review of Implementation of the United Nations Convention against Corruption and the United Nations Convention against Transnational Organized Crime.

13.6 The focus of the Office will be sharpened to specifically address the nodal links between drug use, drug trafficking, transnational organized crime, illicit financial flows, corruption and terrorism, within the broader framework of the increased well-being of people. The delivery of field support and strengthening of UNODC capacity in key thematic areas will contribute to addressing the interlinkages between UNODC mandates and the 2030 Agenda. In addition, improved cross-cutting fundamental roles will help to ensure the inclusion of solid theories of change and effective results-based management in planning, monitoring and reporting.

13.7 For 2022, the Office's planned deliverables and activities reflect the known and anticipated challenges related to the coronavirus disease (COVID-19) pandemic that are being faced by Member States. Such planned deliverables and activities include producing knowledge, operational guidance and tools to support Member States in mitigating drug, crime and corruption challenges which have a potential to slow down COVID-19 recovery; organizing meetings on the impact of COVID-19 on matters related to drugs and crime in the framework of UNODC intergovernmental bodies; and strengthening the ability of criminal justice systems to prepare for, respond to and recover from crisis. Where relevant, the Office will also support implementation of the COVID-19 socioeconomic response plans, the Global Humanitarian Response

Plan for COVID-19 and the COVID-19 Strategic Preparedness and Response Plan in close coordination with the World Health Organization (WHO), the Office for Coordination of Humanitarian Affairs, the Development Coordination Office, the United Nations Development Programme (UNDP) and respective United Nations country teams. Specific examples of such planned deliverables and activities are provided under subprogrammes 5, 6, 8 and 9. The support provided to Member States on issues related to COVID-19 is expected to contribute to planned results for 2022, as described under subprogramme 6 and component 2 of subprogramme 9.

13.8 With regard to cooperation with other entities at the global, regional, national and local levels, UNODC is working with Member States and United Nations sister agencies and other relevant stakeholders to help Member States to better understand the nature of the challenges they face and to design coherent programmes and policies to make progress towards the implementation of the 2030 Agenda and the achievement of the Sustainable Development Goals. The Office will continue to actively support Member States on issues related to Goal 16. In addition, UNODC has been implementing programmes with an array of international organizations, including the African Union, the Association of Southeast Asian Nations, the Caribbean Community, the Commonwealth of Independent States, the Economic Community of West African States (ECOWAS), the Economic Cooperation Organization, the Council of Europe, the League of Arab States, the Organization of American States, the Organization for Security and Cooperation in Europe, the Shanghai Cooperation Organization and the Southern African Development Community, to enhance common approaches.

13.9 With regard to inter-agency coordination and liaison, UNODC has established various joint projects and coordination groups that involve other entities of the United Nations system and independent international organizations. They include gender equality and women's empowerment (United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women)); drug prevention, treatment and rehabilitation (WHO); law enforcement (International Criminal Police Organization (INTERPOL)); border management (World Customs Organization); corruption (UNDP); trafficking in persons and smuggling of migrants (International Organization for Migration, Office of the United Nations High Commissioner for Refugees and Inter-Agency Coordination Group against Trafficking in Persons); terrorism prevention (Office of Counter-Terrorism of the Secretariat and entities cooperating in connection with the United Nations Global Counter-Terrorism Coordination Compact); access to justice for children (United Nations Children's Fund); urban safety governance (United Nations Human Settlements Programme); and ensuring coherence in the collection of statistics pertaining to its mandates (Statistics Division of the Department of Economic and Social Affairs of the Secretariat). The Office remains an active co-sponsor of the Joint United Nations Programme on HIV/AIDS (UNAIDS) and is the substantive leader in the area of HIV prevention, treatment and care among people who use drugs and in prison settings. In addition to working together, the Office and its partners are demonstrating to external audiences, through advocacy, publications and digital communications, the support provided by the United Nations system to advance the achievement by Member States of the Sustainable Development Goals.

13.10 With regard to the external factors, the overall plan for 2022 is based on the following planning assumptions:

(a) Extrabudgetary resources, including more funding for fundamental roles through core resources as part of the funding compact, continue to be available, allowing the Office to support Member States in combating transnational organized

criminal networks, which are constantly evolving in nature and scope, and their links to corruption and the weakening of State structures;

(b) Member States recognize, in their policies, programmes and budgets, that challenges related to security, justice and the rule of law must be addressed as part of an integrated, nationally owned effort to implement the 2030 Agenda;

(c) International financial institutions, the United Nations system and other multilateral organizations highlight the importance of strengthening fiscal governance and preventing the leakage of public funds in order to sustainably address issues under the UNODC mandate and implement the 2030 Agenda in a holistic manner;

(d) Member States share real-time and other operational data with their counterparts across borders to conduct effective, intelligence-led responses to dismantle organized criminal networks.

13.11 With regard to the COVID-19 pandemic, the proposed programme plan is based on the assumption that the proposed deliverables and activities for 2022 will be feasible to implement. However, if the pandemic were to continue to have an impact on the planned deliverables and activities, they would be adjusted during 2022 within the scope of the overall objectives, strategies and mandates. Any such adjustments would be reported as part of the programme performance information.

13.12 With regard to disability inclusion, in line with the United Nations Disability Inclusion Strategy, the Office developed and launched an action plan, covering 2021 and 2022, with a view to incorporating disability inclusion into its policies, planning, programmes and operations. The action plan mirrors the Strategy and includes 15 indicators in four core areas: leadership, strategic planning and management; inclusiveness; programming; and organizational culture.

13.13 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate, in pursuance of the coherent and coordinated implementation of global commitments on gender equality and the empowerment of women. It will do so through the United Nations Office at Vienna/UNODC Strategy and Action Plan for Gender Equality and the Empowerment of Women (2022–2025), which will continue to provide a framework for coherence and guides the Office's support to Member States for the achievement of the 2030 Agenda and, specifically, Goal 5, on achieving gender equality and empowering all women and girls. A corporate-level evaluation of the implementation of the United Nations Office at Vienna/UNODC Strategy and Action Plan for Gender Equality and the Empowerment of Women (2018–2021) will be completed in 2021. The evidence and results of the evaluation will inform the second phase of implementation of gender equality commitments, scheduled to begin in 2022. A dedicated Gender Team is located in the Office of the Director General/Executive Director to coordinate the implementation of the renewed Strategy and is supported by an organization-wide network of gender strategy focal points.

13.14 With the enhanced focus on gender-related results, UNODC has strengthened the integration of gender aspects in its mandated areas of work. The Office will consider the gender-related implications of emergency situations, such as the ongoing COVID-19 pandemic. UNODC will implement and advocate for measures that address the differentiated needs of women, men, boys and girls, particularly those who also experience disadvantages on the basis of age, race, income level, geographic location, migration status, disability, health status and other characteristics.

## Programme performance in 2020

### Impact of COVID-19 on programme delivery

13.15 During 2020, the COVID-19 pandemic had an impact on the planned deliverables and activities of the Office. The impact included the postponement of various meetings and events, including the Fourteenth United Nations Congress on Crime Prevention and Criminal Justice, which was postponed from April 2020 to March 2021, as well as a shift in approach from in-person meetings, seminars, workshops and training events to virtual or hybrid formats. Specific examples of the impact are provided under all subprogrammes. The changes in planned deliverables and activities also had an impact on the expected results for 2020, as described in the programme performance under subprogrammes 1, 5, 6, 7 and 8 and component 1 of subprogramme 9.

13.16 At the same time, however, some planned deliverables and activities were modified, and some new activities were identified during 2020, within the overall scope of the objectives of the subprogrammes, in order to support Member States on issues related to the COVID-19 pandemic. Those modifications and new activities included the development and dissemination of up-to-date support in the form of policy briefs, guidance notes and operational advice on various issues under the UNODC mandate aimed at supporting Member States in their response to COVID-19; the development of virtual methodologies to be used by Member States to meet critical needs; research and analysis on the impact of COVID-19 on drugs, organized crime, trafficking in persons and smuggling of migrants; as well as the urgent procurement and supply of personal protective equipment or medical supplies to meet the needs of Member States, particularly in law enforcement offices and prisons, and for people who use drugs. Specific examples of the new and modified activities are provided under all subprogrammes. The new and modified deliverables and activities contributed to results in 2020, as described in the programme performance under subprogrammes 3, 4, 5, 6, 7 and 8 and component 2 of subprogramme 9.

13.17 Reflecting the importance of continuous improvement and responding to the evolving needs of Member States, the Office will mainstream lessons learned and best practices related to the adjustments to and adaptation of its programmes owing to the COVID-19 pandemic. Specific examples of lessons learned include the understanding that offering meetings in a hybrid format strengthens remote participation in the meetings of Commission on Narcotic Drugs and its subsidiary bodies, the Commission on Crime Prevention and Criminal Justice, the United Nations Congress on Crime Prevention and Criminal Justice and the standing open-ended working group on improving the governance and financial situation of the United Nations Office on Drugs and Crime, and therefore supports the participation of delegations not represented in Vienna or unable to travel. However, the servicing of virtual or hybrid meetings across all of the UNODC mandate areas requires more staff resources and adds an extra layer of technical and organizational work compared with in-person meetings. Furthermore, intergovernmental meetings requiring interpretation services are even more costly, as they imply additional costs for remote interpretation platforms.

### Legislative mandates

13.18 The list below provides all mandates entrusted to the programme.

#### *Conventions*

- Single Convention on Narcotic Drugs of 1961 as amended by the 1972 Protocol
- Convention on Psychotropic Substances of 1971

- United Nations Convention against Illicit Traffic in Narcotic Drugs and Psychotropic Substances of 1988
- United Nations Convention against Transnational Organized Crime and the Protocols thereto
- Protocol to Prevent, Suppress and Punish Trafficking in Persons, Especially Women and Children, supplementing the United Nations Convention against Transnational Organized Crime
- Protocol against the Smuggling of Migrants by Land, Sea and Air, supplementing the United Nations Convention against Transnational Organized Crime
- Protocol against the Illicit Manufacturing of and Trafficking in Firearms, Their Parts and Components and Ammunition, supplementing the United Nations Convention against Transnational Organized Crime
- United Nations Convention against Corruption

### *General Assembly resolutions*

S-30/1	Our joint commitment to effectively addressing and countering the world drug problem	72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system
62/272, 64/297	The United Nations Global Counter-Terrorism Strategy		
64/182, 74/178, 75/198	International cooperation to address and counter the world drug problem <sup>1</sup>	73/183	Enhancing the role of the Commission on Crime Prevention and Criminal Justice in contributing to the implementation of the 2030 Agenda for Sustainable Development
66/282, 68/276, 70/291, 72/284	The United Nations Global Counter-Terrorism Strategy Review		
70/1	Transforming our world: the 2030 Agenda for Sustainable Development	74/306	Comprehensive and coordinated response to the coronavirus disease (COVID-19) pandemic
70/266	Political Declaration on HIV and AIDS: On the Fast Track to Accelerating the Fight against HIV and to ending the AIDS Epidemic by 2030	75/196	Strengthening the United Nations crime prevention and criminal justice programme, in particular its technical cooperation capacity

### *Commission on Crime Prevention and Criminal Justice resolutions*

28/4	Budget for the biennium 2020–2021 for the United Nations Crime Prevention and Criminal Justice Fund
------	---

### *Commission on Narcotic Drugs resolutions*

62/9	Budget for the biennium 2020–2021 for the Fund of the United Nations International Drug Control Programme
------	---

### *Commission on Narcotic Drugs statements and declarations*

Ministerial Declaration on Strengthening Our Actions at the National, Regional and International Levels to Accelerate the Implementation of Our Joint Commitments to Address and Counter the World Drug Problem	Joint Ministerial Statement of the 2014 high-level review by the Commission on Narcotic Drugs of the implementation by Member States of the Political Declaration and Plan of Action on International Cooperation towards an Integrated and Balanced Strategy to Counter the World Drug Problem
---	---

<sup>1</sup> Particular reference is made to the Political Declaration and Plan of Action on International Cooperation towards an Integrated and Balanced Strategy to Counter the World Drug Problem (see E/2009/28-E/CN.7/2009/12, chap. I.C).

## Deliverables

13.19 Table 13.1 lists all cross-cutting deliverables, by category and subcategory, for the period 2020–2022.

Table 13.1

### Cross-cutting deliverables for the period 2020–2022, by category and subcategory

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>3</b>	<b>3</b>	<b>3</b>	<b>3</b>
1. Meetings of the Fifth Committee	1	1	1	1
2. Meetings of the Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
3. Meetings of the Committee for Programme and Coordination	1	1	1	1
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>2</b>	<b>2</b>	<b>2</b>	<b>2</b>
4. Projects related to gender equality	1	1	1	1
5. Projects related to the independent evaluation function	1	1	1	1
<b>Seminars, workshops and training events</b> (number of days)	<b>6</b>	<b>5</b>	<b>5</b>	<b>6</b>
6. Food-for-thought sessions related to gender equality	4	3	4	4
7. Conference on gender equality	1	1	—	1
8. Side events on topics related to gender equality	1	1	1	1
<b>Technical materials</b> (number of materials)	<b>19</b>	<b>22</b>	<b>19</b>	<b>22</b>
9. Guidance note and other tools on issues related to gender equality	1	7	1	6
10. Independent, joint and system-wide evaluations and synthesis studies	17	14	17	15
11. Evaluation tools, methodologies and approaches	1	1	1	1
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> advisory services for multilateral efforts in the fields of drug control, crime prevention, anti-corruption, and terrorism prevention and cooperation with Member States, intergovernmental organizations and civil society, as applicable, including at the regional level; advocacy of drug control, crime prevention, anti-corruption and terrorism prevention issues with Member States and civil society through speaking engagements, conferences, information dissemination, media activities, raising public awareness and representation of the Secretary-General at international events and forums, as appropriate.				
<b>Databases and substantive digital materials:</b> UNODC web-based evaluation application.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> evaluation briefs, webinars and annual reviews.				
<b>Digital platforms and multimedia content:</b> website with updated content.				

## Evaluation activities

13.20 The following evaluations completed in 2020 have guided the programme plan for 2022:

- (a) Independent in-depth evaluations:
  - (i) Independent in-depth evaluation of the regional programme for South-East Asia and country programmes for Indonesia, Myanmar and Viet Nam (subprogrammes 1, 2, 3, 4 and 5; status: finalized);

- (ii) Independent in-depth evaluation of the Global Programme for the Implementation of the Doha Declaration: Towards a Culture of Lawfulness (subprogramme 3; status: finalized);
- (iii) Independent in-depth midterm evaluation of the Global Maritime Crime Programme (subprogramme 5; status: finalized);
- (iv) Independent in-depth midterm evaluation of the Global Firearms Programme: countering illicit arms trafficking and its links to transnational organized crime and terrorism (subprogramme 1; status: ongoing);
- (v) Independent in-depth final cluster evaluation of UNODC programming in West and Central Asia (subprogrammes 1, 2, 3, 4, 5 and 6; status: ongoing);
- (vi) Independent in-depth evaluation of the global programme to prevent and combat corruption through effective implementation of the United Nations Convention against Corruption in support of Sustainable Development Goal 16 (subprogramme 3; status: ongoing);
- (vii) Independent in-depth final evaluation of the Global Programme on Terrorism Prevention (subprogramme 4; status: ongoing);
- (viii) Independent corporate evaluation of the United Nations Office at Vienna/UNODC Strategy and Action Plan for Gender Equality and the Empowerment of Women (subprogrammes 1, 2, 3, 4, 5, 6 and 7; status: ongoing);
- (ix) Independent in-depth midterm cluster evaluation of treating drug dependence and its health consequences and the UNODC-WHO Joint Programme on Drug Dependence Treatment and Care (subprogramme 2; status: initial stage);
- (b) Independent evaluations of the following UNODC projects (subprogrammes 1, 2, 3, 5 and 6):
  - (i) Evidence-based policies for improved community safety in Latin American and African Cities (finalized);
  - (ii) Support to the ECOWAS Regional Action Plan to Address the Growing Problem of Illicit Drug Trafficking, Organized Crime and Drug Abuse in West Africa (finalized);
  - (iii) Fisheries crime initiative “FishNET” – a joint project implemented under the Global Programme for Combating Wildlife and Forest Crime and the Container Control Programme (finalized);
  - (iv) Support to the work of the Conference of the Parties to the United Nations Convention against Transnational Organized Crime (finalized);
  - (v) Technical assistance to Mexico in the implementation of the Protocol to Prevent, Suppress and Punish Trafficking in Persons, Especially Women and Children, supplementing the United Nations Convention against Transnational Organized Crime (finalized);
  - (vi) Global Programme for Combating Wildlife and Forest Crime (finalized);
  - (vii) Action on measuring and assessing organized crime in the western Balkans (finalized);
  - (viii) Arab Initiative to Build National Capacities to Combat Human Trafficking in the Arab Countries (finalized).

13.21 The findings of the evaluations referenced above, the evaluation meta-synthesis 2017–2018 and the innovative crime prevention meta-synthesis (2020), as well as other synthesized evaluation products, have been taken into account for the programme plan for 2022. For example, in the biennial meta-synthesis, the need was highlighted for the strengthened integration of human rights and gender equality in the design, planning, implementation and reporting of UNODC projects and programmes. In this context, a good practice identified through evaluation is the continuous effort by UNODC to advocate for awareness with national partners on the needs of the most-at-risk populations in Central Asia. Furthermore, the need for improved results-based management, including more systematic collection of programme performance data, was identified in the biennial meta-synthesis. As a result of the above-referenced evaluations, subprogrammes within UNODC will continue to strengthen the approach to gender equality.

13.22 The following evaluations are planned for 2022:

- (a) Selected areas in UNODC subprogrammes;
- (b) Selected regions and countries in line with UNODC programming;
- (c) Independent evaluations covering various subprogrammes and regions and at a corporate level.

13.23 UNODC recognizes that accountability through evaluation is even more imperative during a crisis. In 2022, UNODC will further invest in independent, gender-responsive, utilization-focused, corporate-level evaluations translating its strategy into concrete evidence- and evaluation-based strategic decisions in the response to drugs, crime and terrorism. The UNODC Independent Evaluation Section will contribute to building national evaluation capacity, while working on high-level joint evaluation products and services, in line with directives of the Sustainable Development Goals and United Nations reforms.

## **Programme of work**

### **Subprogramme 1**

#### **Countering transnational organized crime**

##### **Objective**

13.24 The objective, to which this subprogramme contributes, is to prevent and combat transnational organized crime and illicit trafficking.

##### **Strategy**

13.25 To contribute to the objective, the subprogramme will continue to promote international cooperation among relevant authorities within Member States, regional entities and other partners, through global, regional and interregional initiatives. The subprogramme will also continue promoting adherence to and implementation of the international drug control conventions and the United Nations Convention against Transnational Organized Crime and the Protocols thereto. The subprogramme will continue supporting the work of the Conference of the Parties to the United Nations Convention against Transnational Organized Crime, including supporting the Mechanism for the Review of the Implementation of the Convention and the Protocols thereto. This will be achieved by assisting States parties to participate successfully in the review process, both as countries under review and reviewers, in accordance with

the tasks assigned to the secretariat in the procedures and rules for the functioning of the Mechanism and subject to the existence of the required resources. The subprogramme will also continue its normative and operational work in countering emerging and evolving crimes, such as cybercrime, trafficking in cultural property, and wildlife crime and crime affecting the environment. In its resolution 74/247, the General Assembly decided to establish an open-ended ad hoc intergovernmental committee of experts, representative of all regions, to elaborate a comprehensive international convention on countering the use of information and communications technologies for criminal purposes. Through the subprogramme, UNODC will serve as the secretariat for the ad hoc intergovernmental committee and will support Member States in preparation for its sessions. In its resolution 75/282, the Assembly approved the modalities for the work of the Ad Hoc Committee to Elaborate a Comprehensive International Convention on Countering the Use of Information and Communications Technologies for Criminal Purposes.

13.26 The subprogramme will also continue to provide tailored technical assistance to Member States. The subprogramme will continue to build the capacities of central authorities and other criminal justice actors in international cooperation in criminal matters and act as a facilitator of mutual legal assistance requests through its support to international judicial cooperation networks and to individual Member States, particularly in trafficking cases. This work will help Member States to make progress towards Sustainable Development Goal 16.

13.27 The subprogramme will continue to promote the interdiction of contraband and support post-seizure criminal justice cooperation along drug trafficking routes aimed at disrupting the organized crime groups behind them. In so doing, the subprogramme will link Governments, the international community, civil society, the private sector and other actors, and implement effective and targeted capacity-building in developing countries to support national plans to implement all the Sustainable Development Goals, including through North-South, South-South and triangular cooperation. Moreover, it will proactively promote the use of special investigative techniques against drug trafficking and in related organized crime investigations, which will help Member States in making progress towards relevant Sustainable Development Goals, including Goals 5, 8, 10, 15, 16 and 17.

13.28 The subprogramme will continue to support Member States in their application of the Human Trafficking, Smuggling of Migrants and Firearms Protocols. In the case of the latter, the subprogramme will support legislative and policy development aimed at reducing the illicit manufacture of and trafficking in firearms, their parts, components and ammunition, deliver training on the investigation and prosecution of firearms trafficking and related offences and support global data collection and analysis on firearms trafficking to build an evidence base for strategic decisions at the policy and operational levels.

13.29 The above-mentioned work is expected to result in:

(a) Increased international cooperation to prevent, investigate and prosecute transnational organized crime and new and emerging crimes, and strengthened institutional and legislative capacity to do so, through, among other things, the Implementation Review Mechanism process;

(b) Reduced trafficking in drugs, firearms and other contraband as a result of increased international cooperation and the dismantling of greater numbers of organized criminal groups.

## Programme performance in 2020

13.30 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Promotion of the identification and referral of human trafficking cases in Malawi

13.31 Every year, thousands of men, women and children fall into the hands of traffickers, in their own countries and abroad. Almost every country in the world is affected by trafficking in persons, as the country of origin, transit or destination for victims. The subprogramme has been supporting partner countries, including Malawi, in strengthening their response to trafficking in persons. The subprogramme supported the establishment of inter-agency coordination bodies to increase identification and referral of trafficking victims. In addition, the subprogramme provided training to front-line law enforcement officers on the application of the Trafficking in Persons Act: Regulations and Standard Operating Procedures and National Referral Mechanism, following a request from the Ministry of Homeland Security. Furthermore, the subprogramme developed a specialized training curriculum for the Malawi Police Service related to trafficking in persons, including victim identification, and supported national data collection and analysis efforts. The subprogramme contributed to the identification of 228 victims (77 adults, 61 male and 16 female, and 151 children) in Malawi between December 2018 and March 2020.

#### *Progress towards the attainment of the objective, and performance measure*

13.32 The above-mentioned work contributed to the objective, as demonstrated by the prosecution of four individuals for trafficking in persons in the first quarter of 2020 in Malawi (see table 13.2).

Table 13.2  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
New project on trafficking in persons launched with the Government of Malawi	Enhanced capacities of frontline law enforcement officers to apply the Trafficking in Persons Act: Regulations and Standard Operating Procedures and National Referral Mechanism	The prosecution of four individuals for trafficking in persons in the first quarter of 2020 in Malawi

### Impact of COVID-19 on subprogramme delivery

13.33 Owing to the impact of COVID-19 during 2020, the subprogramme adjusted the dates of the seventh session of the Working Group on Firearms and delivered all intergovernmental meetings in virtual format or in a hybrid format that allowed one delegate per delegation to be physically present, with the duration of meetings reduced from three to two hours. The subprogramme also postponed the organization of arms collection campaigns planned for 2020. Furthermore, as decided by the General Assembly, the organizational session of the ad hoc committee established by the Assembly in its resolution [74/247](#) was postponed to 2021. In addition, the subprogramme modified its comprehensive training and mentoring activities delivered to port control units to an online format. Training and mentoring activities for law

enforcement authorities and prosecutors related to the trafficking and misuse of firearms, trafficking in persons and smuggling of migrants were also adapted and delivered remotely. Some of these changes had an impact on the programme performance in 2020, as specified in result 1 below.

13.34 At the same time, however, the subprogramme identified new activities to support Member States on issues related to the COVID-19 pandemic, within the overall scope of its objectives, namely the issuance of several policy briefs on the impact of COVID-19 on organized crime, including a thematic brief on the impact of the COVID-19 pandemic on trafficking in persons. The subprogramme developed this guidance based on rapid stocktaking as a measure to address the implications of the pandemic and assist Member States to adapt and continue the collective mission of protecting victims of trafficking and preventing and combating this crime. The brief, which includes concrete recommendations for action, has been translated into six languages (Arabic, English, French, Portuguese, Russian and Spanish).

## **Planned results for 2022**

13.35 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: crime in a box – cocaine smuggling<sup>2</sup>**

#### **Programme performance in 2020**

13.36 The subprogramme has been providing support to the Government of Colombia for the establishment of additional port control units. The subprogramme had to adjust its planned activities and support in light of the outbreak of COVID-19. Instead of the planned in-person capacity-building activities on the identification and inspection of high-risk shipments for all 10 newly established port control units, the subprogramme focused its training activities on the central profiling and targeting centre and five port control units. In addition, the subprogramme piloted global online training with customs and other law enforcement authorities in partner countries to share first-hand information about drug trafficking activities between countries and regions. To date, 185 online training sessions have been completed, with 1,925 officers trained online.

13.37 The above-mentioned work contributed to the signing of memorandums of understanding with four countries in the Latin America and the Caribbean region, including Colombia, and the operation of five port control units in that country, which did not meet the target of the signing of memorandums of understanding with four countries in the region and the operation of 10 port control units in the country, reflected in the proposed programme budget for 2020. The challenge and difficulties posed by COVID-19 prevented the functioning of the customs contingent of the port control units and caused a delay in the roll-out of the training curriculum for customs officers.

#### **Proposed programme plan for 2022**

13.38 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will further adjust its training curriculum to deliver virtual workshops on risk management, supply chain security and trade facilitation in seaports, and

<sup>2</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 16)).

initiate a three-year mentorship programme to ensure information-sharing and cooperation between new and already established units. The expected progress is presented in the performance measure below (see table 13.3).

Table 13.3

**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Colombia meets with Container Control Programme officials to discuss the activities for future implementation of the Programme in the country	Colombia signs an agreement to become a Container Control Programme participating country and agrees to begin initial implementation activities	Memorandums of understanding with four countries in the Latin America and Caribbean region, including Colombia, are signed and five port control units are operational in the country	The new port control units are fully functional and successfully preventing the movement of illicit goods across borders	Seizures of cocaine are made by the port control units, preventing the movement of illicit goods across borders

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time, before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

**Result 2: mainstreaming digital forensic evidence<sup>3</sup>****Programme performance in 2020**

13.39 The subprogramme has continued to provide digital forensic evidence capacity-building to Member States. This has included the provision of hardware and software, the training of analysts, investigators and judges and mainstreaming new capabilities into “business as usual” responses. In addition to providing targeted capacity-building to the Digital Forensics Unit established at the request of a Member State, the subprogramme expanded its services to ensure that countries’ operational capabilities lead to strengthened international cooperation, as countries with the same capabilities can cooperate with each other in a proportionate, legal, accountable and swift manner.

13.40 The above-mentioned work contributed to an increase in the knowledge and capacity of the Digital Forensics Unit for handling digital evidence, which met the planned target reflected in the proposed programme budget for 2021.

**Proposed programme plan for 2022**

13.41 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will deploy a specialist counter-cybercrime prosecution mentor to West Africa to ensure that the national authorities of the countries in the region receive tailored and specialized assistance. The expected progress is presented in the performance measure below (see table 13.4).

<sup>3</sup> As reflected in the proposed programme budget for 2021 ([A/75/6 \(Sect.16\)](#) and [A/75/6 \(Sect. 16\)/Corr.1](#)).

Table 13.4  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
UNODC works closely with requesting Member State in delivering training and mentoring to address the technical and legal challenges posed by new technologies and devices	National police force and UNODC collaborate to set up the first digital forensics laboratory to respond to the country's specific needs	Increase in the knowledge and capacity of the Digital Forensics Unit for handling digital evidence	National police forces are able to analyse digital media for over 2,000 criminal cases per year	National police forces and prosecutors in West Africa analyse digital media use in criminal cases

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

**Result 3: harmonized legislative and institutional frameworks and enhanced international cooperation and evidence-based approaches in line with the Firearms Protocol**

**Proposed programme plan for 2022**

13.42 The subprogramme has promoted adherence to and implementation of the United Nations Convention against Transnational Organized Crime, its supplementing Firearms Protocol and related global and regional instruments on firearms and supported the harmonization of legislative frameworks in order to facilitate judicial cooperation and prevent organized criminal groups from exploiting legal loopholes to conduct their activities. Through its support for policy and legislative development and evidence-based criminal justice responses, including enhanced South-South and cross-regional cooperation through its community of practitioners and its operational actions, the subprogramme has contributed to Member States' efforts to counter illicit arms trafficking and related crimes.

*Lessons learned and planned change*

13.43 The lesson for the subprogramme was that it needed to provide additional support in the form of legislative assistance to enhance legislative and institutional frameworks to respond to illicit firearms manufacturing and trafficking, in line with the Firearms Protocol. The subprogramme also needs to provide additional support in the form of legislative assistance to enhance legislative and institutional frameworks to respond to illicit firearms manufacturing and trafficking, in line with relevant international and regional instruments. In applying the lesson, the subprogramme will conduct assessments of national legislative frameworks, upon request, and provide legislative assistance that will lead to the adoption of adequate legislative and institutional frameworks, in line with the Firearms Protocol. Through a variety of operation-oriented initiatives and actions, such as tailored training programmes, mentoring and support for cooperation platforms, the subprogramme will also enhance criminal justice capacity and promote more direct cross-border cooperation and information exchange among practitioners and prosecutors, to counter illicit firearms trafficking and enhance the understanding and monitoring of its illicit flows.

*Expected progress towards the attainment of the objective, and performance measure*

13.44 This work is expected to contribute to the objective, as demonstrated by 20 Member States adopting legislative and institutional frameworks in line with the Firearms Protocol and relevant instruments (see figure 13.I).

Figure 13.I

**Performance measure: number of Member States that have adopted legislative and institutional frameworks in line with the Firearms Protocol and relevant instruments (cumulative)**

**Legislative mandates**

13.45 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolutions*

46/152	Creation of an effective United Nations crime prevention and criminal justice programme	72/192; 73/184	Follow-up to the Thirteenth United Nations Congress on Crime Prevention and Criminal Justice and preparations for the Fourteenth United Nations Congress on Crime Prevention and Criminal Justice
65/227	Realignment of the functions of the United Nations Office on Drugs and Crime and changes to the strategic framework	72/195	Improving the coordination of efforts against trafficking in persons
66/177	Strengthening international cooperation in combating the harmful effects of illicit financial flows resulting from criminal activities	73/146	Trafficking in women and girls
68/186	Strengthening crime prevention and criminal justice responses to protect cultural property, especially with regard to its trafficking	73/185	The rule of law, crime prevention and criminal justice in the context of the Sustainable Development Goals
71/1	New York Declaration for Refugees and Migrants	73/187, 74/247	Countering the use of information and communications technologies for criminal purposes
71/211; 72/198; 74/178	International cooperation to address and counter the world drug problem	74/173	Promoting technical assistance and capacity-building to strengthen national measures and international cooperation to combat cybercrime, including information-sharing
71/322; 73/189	Strengthening and promoting effective measures and international cooperation on organ donation and transplantation to prevent and combat trafficking in persons for the purpose of organ removal and trafficking in human organs	74/174	Countering child sexual exploitation and sexual abuse online
72/1	Political declaration on the implementation of the United Nations Global Plan of Action to Combat Trafficking in Persons	75/196	Strengthening the United Nations crime prevention and criminal justice programme, in particular its technical cooperation capacity
		75/282	Countering the use of information and communications technologies for criminal purposes

*Economic and Social Council resolutions*

2017/18

Implementation of the United Nations  
Global Plan of Action to Combat  
Trafficking in Persons

2019/23

Combating transnational organized crime  
and its links to illicit trafficking in precious  
metals and illegal mining, including by  
enhancing the security of supply chains of  
precious metals*Commission on Crime Prevention and Criminal Justice resolutions*

25/1

Preventing and combating trafficking in  
human organs and trafficking in persons for  
the purpose of organ removal

27/4

Strengthening measures against trafficking  
in persons

26/4

Strengthening international cooperation to  
combat cybercrime

27/5

International cooperation against trafficking  
in cultural property

27/2

Preventing and combating trafficking in  
persons facilitated by the criminal misuse of  
information and communications technologies

28/2

Countering the smuggling of commercial  
goods in cases falling within the scope of  
the United Nations Convention against  
Transnational Organized Crime

27/3

Improving the protection of children against  
trafficking in persons, including by addressing  
the criminal misuse of information and  
communications technologies

28/3

Strengthening regional and international  
cooperation in crime prevention and  
criminal justice responses to illicit  
trafficking in wildlife*Conference of the Parties to the United Nations Convention against Transnational Organized Crime*

8/1

Enhancing the effectiveness of central  
authorities in international cooperation in  
criminal matters to counter transnational  
organized crime

9/1

Establishment of the Mechanism for the  
Review of the Implementation of the  
United Nations Convention against  
Transnational Organized Crime and the  
Protocols thereto

8/2

Mechanism for the review of the  
implementation of the United Nations  
Convention against Transnational  
Organized Crime and the Protocols thereto

9/2

Enhancing and ensuring the effective  
implementation of the Protocol against the  
Illicit Manufacturing of and Trafficking in  
Firearms, Their Parts and Components and  
Ammunition, supplementing the United  
Nations Convention against Transnational  
Organized Crime

8/3

Strengthening the implementation of the  
Protocol against the Illicit Manufacturing of  
and Trafficking in Firearms, Their Parts and  
Components and Ammunition, supplementing  
the United Nations Convention against  
Transnational Organized Crime

8/4

Implementation of the provisions on  
technical assistance of the United Nations  
Convention against Transnational  
Organized Crime**Deliverables**

13.46 Table 13.5 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 13.5

**Subprogramme 1: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>32</b>	<b>32</b>	<b>15</b>	<b>32</b>
1. Documents of the Conference of the Parties to the Convention against Transnational Organized Crime and the Protocols thereto and its working groups	32	32	15	32
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>26</b>	<b>26</b>	<b>15</b>	<b>26</b>
2. Meetings of the Conference of the Parties, including meetings of its working groups	26	26	15	26
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>12</b>	<b>12</b>	<b>12</b>	<b>12</b>
3. Technical cooperation projects to prevent and combat transnational organized crime	3	3	3	3
4. Technical cooperation projects to prevent and combat trafficking in illicit goods	4	4	4	4
5. Technical cooperation projects to prevent and combat trafficking in persons and the smuggling of migrants	2	2	2	2
6. Technical cooperation projects to prevent and combat cybercrime and money-laundering	3	3	3	3
<b>Publications</b> (number of publications)	<b>3</b>	<b>3</b>	<b>3</b>	<b>3</b>
7. Publications on organized crime and illicit trafficking	3	3	3	3
<b>Technical materials</b> (number of materials)	–	<b>4</b>	–	–
8. Technical materials related to COVID-19 and organized crime	–	4	–	–
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> advisory services on accession to the United Nations Convention against Transnational Organized Crime and the Protocols thereto for at least 15 remaining non-parties to those instruments; advisory services on legislative implementation of the instruments for at least 20 States parties; ongoing advocacy on the implementation of the instruments for all 190 States parties. Provision of similar services to at least 5 Member States and the International Narcotics Control Board in relation to the three drug control conventions.				
<b>Databases and substantive digital materials:</b> maintenance of the SHERLOC (Sharing Electronic Resources and Laws on Crime) platform, containing over 10,000 annotated legislative excerpts and more than 3,000 case summaries covering 15 crime types.				

**Subprogramme 2****A comprehensive and balanced approach to counter the world drug problem****Objective**

13.47 The objective, to which this subprogramme contributes, is to ensure comprehensive and balanced responses to the world drug problem through integrated demand reduction and related measures, supply reduction and related measures, and enhanced international cooperation.

**Strategy**

13.48 To contribute to the objective, the subprogramme will continue to promote rights-based, public-health-focused and gender-responsive approaches that are grounded in the principles of the Charter of the United Nations and are in line with scientific evidence. The subprogramme will assist Member States, upon request, in establishing and/or expanding drug use prevention approaches and services and drug dependence treatment, as well as the care and rehabilitation of people with drug use disorders. The subprogramme will also assist Member States, upon request, in

establishing and/or expanding HIV/AIDS prevention, treatment and care, and support services for people who use drugs, including for people who inject drugs and people in prison and other closed settings. In addition, it will assist Member States, upon request, in establishing and/or expanding the access to and availability of controlled medicines, while preventing their non-medical use. Progress in each of these areas will be accomplished through advocacy; the provision of technical assistance, capacity-building, regional strategic planning sessions, support for policy development, expert group consultations and conferences; the provision of standards and operational guidelines based on science and evidence; and the development and dissemination of manuals, toolkits, reports and issue papers based on science and evidence.

13.49 The subprogramme will also contribute to the objective by working to reduce the illicit supply of drugs. It will achieve this through its support to global, regional and interregional cooperation in countering drug trafficking by promoting the exchange of criminal intelligence and promoting multilateral operations that target international criminal organizations involved in drug trafficking, while working in synergy with subprogramme 1, and including enhanced and better coordinated technical assistance in accordance with the principle of shared responsibility. It will also build the capacity of national counterparts to detect, interdict, investigate and prosecute drug-related offences, to strengthen maritime, air and land border control, and to identify and dismantle drug trafficking networks. In addition, in coordination with subprogramme 1, the subprogramme will promote the network of law enforcement (police, customs, specialized drug law enforcement agencies and others) training institutions to stimulate the exchange of best practices and training curricula, methodologies and materials. This work will help Member States to make progress towards the achievement of Sustainable Development Goals 3, 4, 5, 10 and 16.

13.50 The subprogramme will also assist Member States, upon request, in building and strengthening the resilience of communities characterized by marginalization, poverty, insecurity and insufficient rule of law, by promoting sustainable livelihoods to reduce illicit cultivation of drug crops through alternative development, including, where appropriate, preventive alternative development. The subprogramme will continue to support the production of high-quality consumable goods, such as coffee, saffron and cacao, which can be sold for a premium price, in cooperation with the private sector and in line with Sustainable Development Goals 1 and 8. Progress in this area will be achieved through collaboration with relevant actors, including the United Nations country teams and other multilateral organizations; the provision of technical assistance to Member States to promote coherent policy and institutional responses; the enhancement of national health and justice systems and their responses; and the implementation of operational programmes to counter illicit cultivation of drug crops and drug trafficking.

13.51 The subprogramme plans to support Member States on issues related to COVID-19 by enhancing online capacity-building opportunities and expanding the collaborative sharing of data, research and best practices via online platforms, thus allowing national stakeholders to adapt their skills to the pandemic situation. It will also explore alternate means of supporting essential services, such as treatment for substance use disorder and health-related consequences, such as HIV, thereby ensuring the continuity of services for people who have drug use disorders, in the community and in prison settings, as well other vulnerable circumstances. Finally, it will endeavour to support basic infrastructure provision and market access for alternatives to the illicit cultivation of drug crops, thus maintaining livelihoods in marginalized communities.

13.52 The above-mentioned work is expected to result in:

- (a) Increased access to quality health-care services that include evidence-based interventions in the areas of drug abuse prevention, drug dependence treatment, HIV/AIDS prevention, treatment and care, and access to controlled medicines, while preventing their non-medical use;
- (b) Increased quality of life and diversified, licit, sustainable income for families in rural areas affected by illicit cultivation of drug crops;
- (c) Joint and coordinated work by law enforcement authorities to track and dismantle networks engaging in drug production and trafficking.

### **Programme performance in 2020**

13.53 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

#### **Service providers access support to implement integrated drug demand reduction, HIV prevention and alternative development**

13.54 The subprogramme promoted drug demand reduction efforts in line with the latest research and scientific evidence through the creation of international standards and guidance documents that were translated into curricula to be taught at the higher education level and as ongoing professional development. One example of this is the universal prevention curriculum, which was delivered in line with the UNODC-WHO International Standards on Drug Use Prevention.

13.55 The subprogramme continued to work with key stakeholders at the national level to ensure consistent implementation in educational settings. Owing to the COVID-19 pandemic, in-person delivery could not take place, necessitating the use of a hybrid format with the materials transitioned to electronic platforms. The subprogramme also produced immediate infographic guidance on the needs of people with drug use disorder and how to ensure the continuity of drug treatment services for them, on HIV service provision for people who use drugs in the context of COVID-19, and on COVID-19 prevention and control for people in prison. On the basis of that guidance, UNODC facilitated a series of country and regional webinars for decision makers and stakeholders in each of these three thematic areas. Additional material with a focus on drug use prevention, in particular parenting under COVID-19 and other guidance to keep children safe, has also been developed. Guidance was also provided to Member States to highlight the critical importance of sufficient access to and availability of controlled medicines for patients during a global pandemic. All materials have been translated into multiple languages.

#### *Progress towards the attainment of the objective, and performance measure*

13.56 The above-mentioned work contributed to the objective, as demonstrated by the continued provision of services, by drug abuse and HIV prevention, treatment and care service providers, to people who use drugs and people in prison settings, during the COVID-19 pandemic (see table 13.6).

Table 13.6  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
Enhanced knowledge and skills of professionals and policymakers in drug demand reduction, HIV service provision and alternative development	Enhanced capacity of policymakers, health-care workers, civil society partners and other key stakeholders in three regions in drug demand reduction, HIV service provision and alternative development	Continued provision of services, by drug abuse and HIV prevention, treatment and care service providers, to people who use drugs and people in prison settings, during the COVID-19 pandemic

### Impact of COVID-19 on subprogramme delivery

13.57 Owing to the impact of COVID-19 during 2020, the subprogramme shortened or postponed proposed meetings, training and capacity-building for key stakeholders associated with field and regional activities related to the prevention of drug use, the treatment and rehabilitation of drug use disorders and services for the prevention, treatment and care of HIV, as primary counterparts in ministries of health and other health partners prioritized available resources around the COVID-19 situation. UNODC also shifted capacity-building activities, whenever possible, to online forums, as travel was limited. In relation to supply reduction, the subprogramme cancelled planned in-person training and mentoring events for port control units, air cargo control units and joint airport interdiction task forces in participating Member States. Online training events were developed and substituted to ensure continuity of delivery against the objective. In addition, a planned port assessment mission to Malawi was postponed as a result of COVID-19.

13.58 At the same time, however, the subprogramme created and disseminated numerous guidance documents to assist Member States, key stakeholders and beneficiaries to support sustained, science-driven and safe service delivery during the COVID-19 pandemic to vulnerable persons, such as people who use drugs and people with drug use disorders, who are in prison and who have HIV and/or hepatitis C. The subprogramme organized the delivery of counselling and psychosocial therapy by phone and other remote means for parents and others with drug use disorders. The new deliverable contributed to results in 2020, as specified in the emerging result for 2020 above.

### Planned results for 2022

13.59 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### Result 1: addressing drug use, drug use disorders and related consequences in Africa<sup>4</sup>

#### Programme performance in 2020

13.60 The subprogramme has continued to conduct training for policymakers on alternatives to conviction or punishment for drug offences and to build the capacity of national partners in the Kenyan prison service to provide treatment and care, in line with the International Standards for the Treatment of Drug Use Disorders and Treatnet, a training package designed to assist Member States in their efforts to

<sup>4</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 16)).

improve the quality of drug treatment services by increasing the level of knowledge and skills of professionals working in the field of drug use disorders.

13.61 The subprogramme also piloted evidence-based programmes for families to prevent drug use and other risky behaviours, including during the COVID-19 pandemic, among children and youth, in particular in Côte d'Ivoire, Nigeria and the United Republic of Tanzania. Furthermore, the Office supported Nigeria in strengthening its national drug control system to ensure access to controlled medicines, while preventing non-medical use. Moreover, the subprogramme held a virtual meeting, in conjunction with the African Union and the Inter-American Drug Abuse Control Commission, which was attended by over 250 health and justice professionals and policymakers, on alternatives to incarceration or punishment.

13.62 The above-mentioned work contributed to the adoption by Member States in receipt of UNODC assistance of concrete measures to provide alternatives to conviction or punishment and improved access to HIV services for people who use drugs, including those in contact with the criminal justice system, in line with national guidelines and based on international standards, which met the planned target reflected in the proposed programme budget for 2020.

### Proposed programme plan for 2022

13.63 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective and in response to recent developments, the subprogramme's work will evolve to include a wider geographical focus, expanding the provision of support in the areas of drug demand reduction, HIV services and health services for those in contact with the criminal justice system to other Member States in Africa. The expected progress is presented in the updated performance measure below (see table 13.7).

Table 13.7  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Insufficient provision of HIV services in the community and measures on alternatives to conviction or punishment for people who use drugs and lack of continuity of HIV services between the community and prisons	Improved access to HIV services and alternatives to conviction or punishment measures for people who use drugs, including those in contact with the criminal justice system	Adoption by Member States in receipt of UNODC assistance of alternatives to conviction or punishment measures and improved access to HIV services for people who use drugs, including those in contact with the criminal justice system, in line with national guidelines and based on international standards	Implementation by Member States in receipt of UNODC assistance of concrete measures to provide alternatives to conviction or punishment and improved access to HIV services for people who use drugs, including those in contact with the criminal justice system, in line with national guidelines and based on international standards	Increased access to drug demand reduction, HIV and health services for people who use drugs, including those in contact with the criminal justice system

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

**Result 2: a balanced, integrated drug demand reduction and supply reduction approach to be applied by selected countries in Africa<sup>5</sup>**

**Programme performance in 2020**

13.64 In the context of strategies promoting a balanced and integrated approach to both demand and supply reduction, the subprogramme conducted an assessment of interdiction capacities in the Luanda seaport in Angola, with a view to future activities there, including the establishment of a multi-agency port control unit. Prior to the travel restrictions imposed as a result of the COVID-19 pandemic, the subprogramme also carried out two training activities with port control and air cargo control units in Mombasa, Kenya, and Kampala in February 2020. Training sessions then shifted mostly to online formats, with a total of 39 online activities and 1 hybrid activity in Angola, Kenya, Mozambique, Namibia, Uganda and the United Republic of Tanzania. After travel restrictions were partly eased, five mentoring activities were conducted on-site in Kenya, Mozambique and the United Republic of Tanzania.

13.65 The above-mentioned work contributed to the strengthening of relevant air and port control units in Angola, Kenya, Mozambique, Namibia, Uganda and the United Republic of Tanzania, as part of the integrated programmes that also address drug demand reduction and HIV prevention, treatment and care, which met the planned target of selected countries piloting integrated services related to drug demand reduction, reflected in the proposed programme budget for 2021. As an illustration of the success of such initiatives, the Air Cargo Control Unit at Jomo Kenyatta International Airport in Nairobi made 11 separate seizures of controlled drugs during their training phase, including heroin, cocaine, khat, MDMA (ecstasy), ketamine, methamphetamine and morphine sulfate. All the efforts to counter drug trafficking described above are provided through integrated programmes that also implement demand reduction activities.

**Proposed programme plan for 2022**

13.66 The subprogramme will continue the work related to the planned result, in line with its mandate, to include, in particular, assessments, training and mentoring activities with port and air cargo control units. In addition, the subprogramme will continue activities in the area of drug demand reduction, such as those highlighted above. It will also step up support relating to increasing access to controlled drugs for medical purposes, while preventing diversion and non-medical use, in line with its mandate. The expected progress is presented in the performance measure below (see table 13.8).

Table 13.8  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Relevant authorities increase their knowledge of standards and guidelines for effective drug	Relevant authorities strengthen their capacity to provide a continuum of care to drug users	Relevant air and port control units in Angola, Kenya, Madagascar, Mozambique, Namibia, Uganda and the United Republic of	Increased number of countries with integrated services across the continent	Increased number of countries with strengthened supply and demand reduction responses, with a focus on increasing access to controlled drugs and

<sup>5</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect. 16) and A/75/6 (Sect. 16)/Corr.1).

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
demand reduction responses		Tanzania are strengthened as part of the integrated programmes that also address drug demand reduction and HIV prevention, treatment and care		preventing their diversion

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: national drug demand reduction programmes follow quality standards**

#### **Proposed programme plan for 2022**

13.67 At the national level, drug prevention strategies range from printing leaflets to warn young people about the danger of drugs, with little or no resulting behavioural change, to prevention interventions based on science. Scientific evidence indicates that working with families, schools and communities can ensure that children and young people, especially the most marginalized and poor, have the opportunity to grow and stay safe and healthy into adulthood and old age. The subprogramme has been promoting drug demand reduction efforts in line with the latest research and scientific evidence through the creation and regular updating of international standards and technical guidance documents, in collaboration with WHO, and by facilitating the exchange of best practices. These materials are used by national-level policymakers and practitioners and have contributed to an increase in knowledge and healthy behaviours in the community.

#### *Lessons learned and planned change*

13.68 The lesson for the subprogramme was the importance of supporting the implementation of national-level quality standards in order to ensure the transition from knowledge about drug demand reduction to sustainable health practices. In applying the lesson, the subprogramme will utilize existing international standards and technical guidance documents that are regularly updated to support requesting Member States in the development and implementation of national quality standards in drug demand reduction. This will allow for standardization of the process of selecting effective prevention strategies and measuring progress, while ensuring that prevention practitioners are highly qualified.

#### *Expected progress towards the attainment of the objective, and performance measure*

13.69 This work is expected to contribute to the objective, as demonstrated by three additional countries initiating programmes to develop or implement national quality standards programmes each year (see figure 13.II).

Figure 13.II

**Performance measure: number of additional countries initiating programmes to develop or implement national quality standards each year**

## Legislative mandates

13.70 The list below provides all mandates entrusted to the subprogramme.

### Conventions

Single Convention on Narcotic Drugs of 1961 as amended by the 1972 Protocol

United Nations Convention against Illicit Traffic in Narcotic Drugs and Psychotropic Substances of 1988

Convention on Psychotropic Substances of 1971

### General Assembly resolutions

<a href="#">S-20/2</a>	Political Declaration	<a href="#">72/197</a>	Promoting the implementation of the United Nations Guiding Principles on Alternative Development and related commitments on alternative development and regional, interregional and international cooperation on development-oriented, balanced drug control policy addressing socioeconomic issues
<a href="#">S-26/2</a>	Declaration of Commitment on HIV/AIDS		
<a href="#">49/168</a>	International action to combat drug abuse and illicit production and trafficking		
<a href="#">59/160</a>	Control of cultivation of and trafficking in cannabis		
<a href="#">60/179</a>	Providing support to Afghanistan with a view to ensuring effective implementation of its Counter-Narcotics Implementation Plan	<a href="#">73/2</a>	Political declaration of the third high-level meeting of the General Assembly on the prevention and control of non-communicable diseases
<a href="#">60/262</a>	Political Declaration on HIV/AIDS		
<a href="#">65/277</a>	Political Declaration on HIV/AIDS: Intensifying Our Efforts to Eliminate HIV/AIDS	<a href="#">73/25</a>	International Day of Education
<a href="#">67/186</a>	Strengthening the rule of law and the reform of criminal justice institutions, particularly in the areas related to the United Nations system-wide approach to fighting transnational organized crime and drug trafficking	<a href="#">73/142</a>	Inclusive development for and with persons with disabilities
		<a href="#">73/144</a> ; <a href="#">74/124</a>	Follow-up to the twentieth anniversary of the International Year of the Family and beyond
		<a href="#">73/155</a>	Rights of the child
<a href="#">67/193</a> ; <a href="#">69/201</a> ; <a href="#">70/182</a>	International cooperation against the world drug problem	<a href="#">73/164</a> ; <a href="#">74/164</a>	Combating intolerance, negative stereotyping, stigmatization, discrimination, incitement to violence and violence against persons, based on religion or belief
<a href="#">69/200</a> ; <a href="#">70/181</a>	Special session of the General Assembly on the world drug problem to be held in 2016	<a href="#">73/177</a>	Human rights in the administration of justice
<a href="#">71/211</a> ; <a href="#">72/198</a> ; <a href="#">73/192</a> ; <a href="#">74/178</a>	International cooperation to address and counter the world drug problem	<a href="#">73/249</a> ; <a href="#">74/239</a>	South-South cooperation

73/301	Commemoration of the thirtieth anniversary of the adoption of the Convention on the Rights of the Child	74/143	Torture and other cruel, inhuman or degrading treatment or punishment
74/20	Global health and foreign policy: an inclusive approach to strengthening health systems	74/170	Integrating sport into youth crime prevention and criminal justice strategies
74/121	Policies and programmes involving youth	74/274	International cooperation to ensure global access to medicines, vaccines and medical equipment to face COVID-19
74/126	Improvement of the situation of women and girls in rural areas	75/196	Strengthening the United Nations crime prevention and criminal justice programme, in particular its technical cooperation capacity
74/137	A global call for concrete action for the elimination of racism, racial discrimination, xenophobia and related intolerance and the comprehensive implementation of and follow-up to the Durban Declaration and Programme of Action		

*Economic and Social Council resolutions and decisions*

1993/40	Implementation of measures to prevent the diversion of precursor and essential chemicals to illicit manufacture of narcotic drugs and psychotropic substances	2010/20	Support for the development and implementation of an integrated approach to programme development at the United Nations Office on Drugs and Crime
1999/30	Review of the United Nations International Drug Control Programme: strengthening the United Nations machinery for international drug control within the scope of the existing international drug control treaties and in accordance with the basic principles of the Charter of the United Nations	2017/20	Promoting the implementation of the United Nations Guiding Principles on Alternative Development and related commitments on alternative development and regional, interregional and international cooperation on development-oriented, balanced drug control policy addressing socioeconomic issues
2001/14	Prevention of diversion of precursors used in the illicit manufacture of synthetic drugs	Decision 2009/250	Proposed amendment to the Single Convention on Narcotic Drugs of 1961 as amended by the 1972 Protocol
2003/32	Training in precursor control, countering money-laundering and drug abuse prevention	Decision 2009/251	Frequency and duration of the reconvened sessions of the Commission on Narcotic Drugs and the Commission on Crime Prevention and Criminal Justice
2003/36	Establishment of national networks to counter money-laundering in the framework of national and international drug control plans	Decision 2011/259	Joint meetings of the reconvened sessions of the Commission on Narcotic Drugs and the Commission on Crime Prevention and Criminal Justice
2004/35	Combating the spread of HIV/AIDS in criminal justice pretrial and correctional facilities	Decision 2013/249	Report of the Commission on Narcotic Drugs on its fifty-sixth session and provisional agenda for its fifty-seventh session
2005/14	Model bilateral agreement on the sharing of confiscated proceeds of crime or property covered by the United Nations Convention against Transnational Organized Crime and the United Nations Convention against Illicit Traffic in Narcotic Drugs and Psychotropic Substances of 1988	Decision 2015/237	Report of the Commission on Narcotic Drugs on its reconvened fifty-seventh session
2005/28	Frequency of meetings of Heads of National Drug Law Enforcement Agencies, Europe	Decision 2015/238	Report of the Commission on Narcotic Drugs on its fifty-eighth session and provisional agenda for its fifty-ninth session
2007/9	The need for a balance between demand for and supply of opiates used to meet medical and scientific needs	Decision 2016/246	Report of the Commission on Narcotic Drugs on its fifty-ninth session and provisional agenda for its sixtieth session
2009/6; 2013/11; 2015/2	Joint United Nations Programme on HIV/AIDS (UNAIDS)	Decision 2017/241	Preparations for the sixty-second session of the Commission on Narcotic Drugs in 2019
2009/23	Support for the development and implementation of the regional programmes of the United Nations Office on Drugs and Crime	Decision 2017/242	Report of the Commission on Narcotic Drugs on its sixtieth session and provisional agenda for its sixty-first session

*Commission on Narcotic Drugs resolutions and decisions*

44/14	Measures to promote the exchange of information on new patterns of drug use and on substances consumed	51/14	Promoting coordination and alignment of decisions between the Commission on Narcotic Drugs and the Programme Coordinating Board of the Joint United Nations Programme on HIV/AIDS
46/2	Strengthening strategies regarding the prevention of human immunodeficiency virus/acquired immunodeficiency syndrome in the context of drug abuse	52/1	Promoting international cooperation in addressing the involvement of women and girls in drug trafficking, especially as couriers
47/1	Optimizing integrated drug information systems		
47/2	Prevention of HIV/AIDS among drug users	52/3	International support to States in East Africa in their efforts to combat drug trafficking
48/2	Strengthening the drug programme of the United Nations Office on Drugs and Crime and the role of the Commission on Narcotic Drugs as its governing body	52/4	Progress made towards strengthening international support for States in West Africa in their efforts to combat drug trafficking
48/11	Strengthening international cooperation to prevent the illicit manufacture of and trafficking in narcotic drugs and psychotropic substances by preventing the diversion and smuggling of precursors and essential equipment in the context of Project Prism, Operation Purple and Operation Topaz	52/7	Proposal concerning quality evaluation of the performance of drug analysis laboratories
		52/8	Use of pharmaceutical technology to counter drug-facilitated sexual assault ("date rape")
		52/9	Strengthening measures against the laundering of assets derived from drug trafficking and related offences
48/12	Expanding the capacity of communities to provide information, treatment, health care and social services to people living with HIV/AIDS and other blood-borne diseases in the context of drug abuse and strengthening monitoring, evaluation and reporting systems	52/10	Strengthening interregional cooperation among the States of Latin America and the Caribbean and the States of West Africa in combating drug trafficking
49/3	Strengthening systems for the control of precursor chemicals used in the manufacture of synthetic drugs	52/11	Follow-up to the Ministerial Conference on Illicit Drug Trafficking, Transnational Organized Crime and Terrorism as Challenges for Security and Development in the Caribbean
49/4	Responding to the prevalence of HIV/AIDS and other blood-borne diseases among drug users	52/12	Improving the collection, reporting and analysis of data to monitor the implementation of the Political Declaration and Plan of Action on International Cooperation towards an Integrated and Balanced Strategy to Counter the World Drug Problem
50/2	Provisions regarding travellers under medical treatment with internationally controlled drugs		
50/5	Identifying sources of precursors used in illicit drug manufacture		
50/10	Prevention of diversion of drug precursors and other substances used for the illicit manufacture of narcotic drugs and psychotropic substances	53/1	Promoting community-based drug use prevention
		53/2	Preventing the use of illicit drugs within Member States and strengthening international cooperation on policies of drug abuse prevention
50/11	International cooperation in preventing the illegal distribution of internationally controlled licit substances via the Internet	53/4	Promoting adequate availability of internationally controlled licit drugs for medical and scientific purposes while preventing their diversion and abuse
51/9	The need for a balance between demand for and supply of opiates used to meet medical and scientific needs		
51/11	Links between illicit drug trafficking and illicit firearms trafficking	53/5	Strengthening regional cooperation between Afghanistan and transit States and the contribution of all affected countries to counter-narcotics efforts, based on the principle of common and shared responsibility

53/6	Follow-up to the promotion of best practices and lessons learned for the sustainability and integrity of alternative development programmes and the proposal to organize an international workshop and conference on alternative development	54/14	Measures to support African States in their efforts to combat the world drug problem
		54/15	Promotion of international cooperation to assist the States most affected by the transit of drugs
53/8	Strengthening international cooperation in countering the world drug problem focusing on illicit drug trafficking and related offences	55/1	Promoting international cooperation in responding to the challenges posed by new psychoactive substances
53/9	Achieving universal access to prevention, treatment, care and support for drug users and people living with or affected by HIV	55/2	Promoting programmes aimed at the treatment, rehabilitation and reintegration of drug-dependent persons released from prison settings
53/10	Measures to protect children and young people from drug abuse	55/3	One hundredth anniversary of the International Opium Convention
53/11	Promoting the sharing of information on the potential abuse of and trafficking in synthetic cannabinoid receptor agonists	55/5	Promoting strategies and measures addressing specific needs of women in the context of comprehensive and integrated drug demand reduction programmes and strategies
53/12	Strengthening systems for the control of the movement of poppy seeds obtained from illicitly grown opium poppy crops	55/6	Developing an international electronic import and export authorization system for licit trade in narcotic drugs and psychotropic substances
53/13	Use of “poppers” as an emerging trend in drug abuse in some regions		
53/15	Strengthening international cooperation and regulatory and institutional frameworks for the control of substances frequently used in the manufacture of narcotic drugs and psychotropic substances	55/7	Promoting measures to prevent drug overdose, in particular opioid overdose
		55/8	Follow-up to the Plan of Action on International Cooperation towards an Integrated and Balanced Strategy to Counter the World Drug Problem with respect to the development of strategies on special marketing regimes for alternative development, including preventive alternative development
54/2	Promoting international cooperation to prevent drug-affected driving		
54/3	Ensuring the availability of reference and test samples of controlled substances at drug testing laboratories for scientific purposes		
54/4; 55/4	Follow-up on the proposal to organize an international workshop and conference on alternative development	55/9	Follow-up on measures to support African States in their efforts to combat the world drug problem
54/5	Promoting rehabilitation- and reintegration-oriented strategies in response to drug use disorders and their consequences that are directed at promoting health and social well-being among individuals, families and communities	55/10	Promoting evidence-based drug prevention strategies and policies
		55/12	Alternatives to imprisonment for certain offences as demand reduction strategies that promote public health and public safety
54/6	Promoting adequate availability of internationally controlled narcotic drugs and psychotropic substances for medical and scientific purposes while preventing their diversion and abuse	56/4	Enhancing international cooperation in the identification and reporting of new psychoactive substances
		56/6	Intensifying the efforts to achieve the targets of the 2011 Political Declaration on HIV and AIDS among people who use drugs, in particular the target to reduce HIV transmission among people who inject drugs by 50 per cent by 2015
54/8	Strengthening international cooperation and regulatory and institutional frameworks for the control of precursor chemicals used in the illicit manufacture of synthetic drugs	56/7	Promoting the development and use of the international electronic import and export authorization system for licit international trade in narcotic drugs and psychotropic substances
54/11	Improving the participatory role of civil society in addressing the world drug problem		
54/12	Revitalization of the principle of common and shared responsibility in countering the world drug problem		
54/13	Achieving zero new infections of HIV among injecting and other drug users		

56/8	Promoting initiatives for the safe, secure and appropriate return for disposal of prescription drugs, in particular those containing narcotic drugs and psychotropic substances under international control	57/6 57/7	Education and training on drug use disorders Providing sufficient health services to individuals affected by substance use disorders during long-term and sustained economic downturns
56/9	Strengthening of the principle of common and shared responsibility as the basis for guiding international action in combating the world drug problem with a comprehensive and balanced approach	57/8	Raising awareness and strengthening international cooperation in combating drug trafficking, which, in some cases, misuses activities related to opium poppy seeds for illicit purposes, also produced from illicit opium poppy crops
56/10	Tools to improve data collection to monitor and evaluate the implementation of the Political Declaration and Plan of Action on International Cooperation towards an Integrated and Balanced Strategy to Counter the World Drug Problem	57/9	Enhancing international cooperation in the identification and reporting of new psychoactive substances and incidents involving such substances
56/12	Preparations for the high-level review of the implementation by Member States of the Political Declaration and Plan of Action on International Cooperation towards an Integrated and Balanced Strategy to Counter the World Drug Problem	57/10 57/11	Preventing the diversion of ketamine from legal sources while ensuring its availability for medical use Strengthening and expanding international cooperation to counter the threats posed by illicit production and manufacturing, trafficking and abuse of drugs in the Greater Mekong subregion
56/13	Precursors: raising awareness on the diversion in international trade of non-scheduled substances for use as alternatives to scheduled substances in the illicit manufacture of narcotic drugs and psychotropic substances	58/2	Supporting the availability, accessibility and diversity of scientific evidence-based treatment and care for children and young people with substance use disorders
56/14	Strengthening international cooperation in addressing the non-medical use and abuse, the illicit manufacture and the illicit domestic and international distribution of tramadol	58/3	Promoting the protection of children and young people, with particular reference to the illicit sale and purchase of internationally or nationally controlled substances and of new psychoactive substances via the Internet
56/15	Follow-up to the Plan of Action on International Cooperation towards an Integrated and Balanced Strategy to Counter the World Drug Problem with respect to the development of strategies on voluntary marketing tools for products stemming from alternative development, including preventive alternative development	58/4 58/5	Promoting the implementation of the United Nations Guiding Principles on Alternative Development Supporting the collaboration of public health and justice authorities in pursuing alternative measures to conviction or punishment for appropriate drug-related offences of a minor nature
56/16	Enhancing international cooperation to strengthen efforts in West Africa to counter illicit drug trafficking	58/6	Strengthening international cooperation in preventing and combating illicit financial flows linked to drug trafficking, from the anti-money-laundering perspective
57/1	Promoting the implementation of the United Nations Guiding Principles on Alternative Development and proposal to organize an international seminar/workshop on the implementation of the Guiding Principles	58/7	Strengthening cooperation with the scientific community, including academia, and promoting scientific research in drug demand and supply reduction policies in order to find effective solutions to various aspects of the world drug problem
57/2	Drug abuse prevention through sport: promoting a society free of drug abuse through sport and the Olympic ideal		
57/3	Promoting prevention of drug abuse based on scientific evidence as an investment in the well-being of children, adolescents, youth, families and communities	58/10	Promoting the use of the international electronic import and export authorization system for licit international trade in narcotic drugs and psychotropic substances
57/4	Supporting recovery from substance use disorders	58/11	Promoting international cooperation in responding to new psychoactive substances and amphetamine-type stimulants, including methamphetamine
57/5; 58/8	Special session of the General Assembly on the world drug problem to be held in 2016		

59/5	Mainstreaming a gender perspective in drug-related policies and programmes	61/8	Enhancing and strengthening international and regional cooperation and domestic efforts to address the international threats posed by the non-medical use of synthetic opioids
60/1	Preparations for the sixty-second session of the Commission on Narcotic Drugs in 2019		
60/2	Strengthening international cooperation to assist the States most affected by the illicit transit of drugs, especially developing countries, based on the principle of common and shared responsibility	61/9	Protecting children from the illicit drug challenge
		61/11	Promoting non-stigmatizing attitudes to ensure the availability of access to and delivery of health, care and social services for drug users
60/4	Preventing and responding to the adverse health consequences and risks associated with the use of new psychoactive substances	62/3; 63/5	Promoting alternative development as a development-oriented drug control strategy
60/5	Increasing international coordination relating to precursors and non-scheduled precursor chemicals used in the illicit manufacture of narcotic drugs and psychotropic substances	62/5	Enhancing the capacity of Member States to adequately estimate and assess the need for internationally controlled substances for medical and scientific purposes
60/6	Intensifying coordination and cooperation among United Nations entities and relevant domestic sectors, including the health, education and criminal justice sectors, to address and counter the world drug problem	62/6	Promoting measures to prevent transmission of HIV attributable to drug use among women and for women who are exposed to risk factors associated with drug use, including by improving access to post-exposure prophylaxis
60/7	Promoting scientific evidence-based community, family and school programmes and strategies for the purpose of preventing drug use among children and adolescents	62/7	Promoting measures to prevent and treat viral hepatitis C attributable to drug use
		63/3	Promoting awareness-raising, education and training as part of a comprehensive approach to ensuring access to and the availability of internationally controlled substances for medical and scientific purposes and improving their rational use
60/8	Promoting measures to prevent HIV and other blood-borne diseases associated with the use of drugs, and increasing financing for the global HIV/AIDS response and for drug use prevention and other drug demand reduction measures	63/4	Promoting the involvement of youth in drug prevention efforts
60/9	Enhancing the capacity of law enforcement, border control and other relevant agencies to counter illicit drug trafficking through training	Decision 50/2	Review of dronabinol and its stereoisomers
		Decision 53/1	Transfer of phenylacetic acid from Table II to Table I of the United Nations Convention against Illicit Traffic in Narcotic Drugs and Psychotropic Substances of 1988
61/2	Strengthening efforts to prevent drug abuse in educational settings		
61/4	Promoting measures for the prevention of mother-to-child transmission of HIV, hepatitis B and C and syphilis among women who use drugs	Decision 57/2	Preparations for the special session of the General Assembly on the world drug problem to be held in 2016
		Decision 57/3	Provisional agenda for the special segment to be held during the fifty-eighth session of the Commission on Narcotic Drugs, in March 2015, on preparations for the special session of the General Assembly on the world drug problem to be held in 2016
61/5	Promoting the implementation of the electronic International Import and Export Authorization System for licit trade in narcotic drugs and psychotropic substances		
61/6	Promoting the implementation of the United Nations Guiding Principles on Alternative Development and related commitments on alternative development and regional, interregional and international cooperation on development-oriented, balanced drug control policy addressing socioeconomic issues	Decision 58/14	Provisional agenda for the special segment to be held during the reconvened fifty-eighth session of the Commission on Narcotic Drugs, on preparations for the special session of the General Assembly on the world drug problem to be held in 2016
		Decision 59/7	Inclusion of phenazepam in Schedule IV of the Convention on Psychotropic Substances of 1971
61/7	Addressing the specific needs of vulnerable members of society in response to the world drug problem		

## Deliverables

13.71 Table 13.9 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 13.9

### Subprogramme 2: deliverables for the period 2020–2022, by category and subcategory

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>10</b>	<b>10</b>	<b>10</b>	<b>10</b>
1. Reports to the Commission on Narcotic Drugs on progress made by Member States in fulfilling the commitments in the 2009 Political Declaration and Plan of Action, and resolutions pertaining to drug demand reduction and related matters, HIV/AIDS and alternative development	3	3	3	3
2. Reports to the Commission on Narcotic Drugs on regional drug trafficking trends	5	5	5	5
3. Note to the Commission on Narcotic Drugs on coordination and alignment between the Commission and the Programme Coordinating Board of the Joint United Nations Programme on HIV/AIDS	2	2	2	2
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>27</b>	<b>31</b>	<b>42</b>	<b>39</b>
4. Meetings of the Commission on Narcotic Drugs on issues related to drug demand reduction and related matters, HIV/AIDS and alternative development	21	21	21	21
5. Meetings of the subsidiary bodies of the Commission on Narcotic Drugs (Meetings of Heads of National Drug Law Enforcement Agencies and the Subcommission on Illicit Drug Traffic and Related Matters in the Near and Middle East)	–	4	15	12
6. Meetings of the Commission on Crime Prevention and Criminal Justice on issues related to drug demand reduction, HIV/AIDS prevention, treatment and care, and sustainable livelihoods	1	1	1	1
7. Expert group meetings on drug demand reduction, HIV/AIDS and alternative development	5	5	5	5
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>11</b>	<b>12</b>	<b>11</b>	<b>11</b>
8. Projects related to drug use prevention, treatment and rehabilitation, including access to controlled substances for medical purposes	5	5	5	5
9. Projects related to HIV/AIDS prevention, treatment and care	5	5	5	5
10. Projects related to alternative development and sustainable livelihoods	1	2	1	1
<b>Seminars, workshops and training events</b> (number of days)	<b>24</b>	<b>24</b>	<b>24</b>	<b>24</b>
11. Training courses on drug control conventions and drug supply reduction	15	15	15	15
12. Training on drug demand reduction, HIV/AIDS and alternative development	9	9	9	9
<b>Publications</b> (number of publications)	<b>3</b>	<b>3</b>	<b>3</b>	<b>3</b>
13. Publication on drug use prevention and treatment, and access to controlled substances	2	2	2	2
14. Publications on HIV/AIDS prevention, treatment and care	1	1	1	1

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

### C. Substantive deliverables

**Consultation, advice and advocacy:** advisory services on law enforcement and the implementation of the drug control conventions; substantive and technical support on evidence-based prevention and treatment, on HIV/AIDS prevention treatment and care, and on alternative development and sustainable livelihoods; substantive and technical support to the International Society of Substance Use Professionals annual conference, with 1,000 participants from 100 countries; side events at the session of the Commission on Narcotic Drugs, with 75 Member States represented and 750 persons participating; and advocacy for drug use prevention through online “Listen First” materials targeting youth, parents and policymakers, with a monthly average of 1,000 clicks.

### D. Communication deliverables

**Outreach programmes, special events and information materials:** annual celebration of World Drug Day on 26 June, with 100 countries participating and over 1,000 national and local events.

## Subprogramme 3 Countering corruption

### Objective

13.72 The objective, to which this subprogramme contributes, is to prevent and counter corruption through the effective implementation of the United Nations Convention against Corruption.

### Strategy

13.73 To contribute to the objective, the subprogramme will provide policy and legislative advice, build the capacities of relevant actors and facilitate the transfer of expertise. The subprogramme will also continue to assist Member States, upon request, in strengthening public sector institutions and the role of civil society, parliamentarians, the private sector, academia and the general public in the prevention of corruption, including by providing technical assistance to States in the follow-up to country reviews conducted under the Mechanism for the Review of Implementation of the United Nations Convention against Corruption, as well as other types of technical assistance. In addition, the subprogramme will continue to coordinate the implementation of mandates given by policymaking and treaty bodies, in particular the Conference of the States Parties to the Convention, its subsidiary bodies and other governing organs, and support related intergovernmental processes, including the follow-up to the special session of the General Assembly against corruption, to be held in 2021.

13.74 The subprogramme will also promote international cooperation regarding the investigation, prosecution and adjudication of corruption and related offences. It will also contribute to strengthening the recovery and return of stolen assets. Furthermore, the subprogramme will help develop and disseminate knowledge products on the implementation of the Convention and assist Member States, upon request, in producing data and conducting statistical and analytical studies and research into corruption, including in collaboration with academia and other stakeholders, to enable informed policy decisions and progress on the international anti-corruption reform agenda. Based on the experiences of Member States in the implementation of the Convention, the subprogramme will further emphasize South-South cooperation and encourage the sharing of knowledge and good practices at the national and regional levels. This work will help Member States to make progress towards the achievement of Sustainable Development Goal 16.

13.75 The subprogramme plans to support Member States in their response to, and recovery from, COVID-19 and future emerging crises by strengthening transparency and integrity in public procurement, including for medical supplies and personal protective equipment, and whistle-blower protection and oversight mechanisms, in Southern Africa, South America and South-East Asia, including through its network of anti-corruption advisers.

13.76 The above-mentioned work is expected to result in:

- (a) States parties participating actively and effectively in the Mechanism for the Review of Implementation of the United Nations Convention against Corruption;
- (b) States' legal, policy and institutional frameworks addressing corruption risks in line with the United Nations Convention against Corruption;
- (c) Anti-corruption practitioners and other stakeholders having and using the capacity to prevent and counter corruption;
- (d) Policymakers, practitioners and other stakeholders using evidence-based knowledge and tools on anti-corruption to inform decision-making;
- (e) Partners actively supporting and promoting implementation of the United Nations Convention against Corruption in a coordinated effort;
- (f) States being able to systematically and in a timely manner trace, seize, freeze, confiscate and return assets stolen by officials through acts of corruption, within the framework of the United Nations Convention against Corruption.

## **Programme performance in 2020**

13.77 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Corruption prevention in times of crisis**

13.78 Countries have taken a broad range of measures to contain and mitigate the spread of COVID-19, leading to a significant slowdown in global economic activity. In response to the slowdown in economic activity, Member States have taken measures to provide an economic safety net for citizens and businesses in distress. In this context, safeguards may have been relaxed and compliance, oversight and accountability may have been traded for rapid response and impact, thus leading to the emergence of opportunities for corruption, such as in vaccine and emergency procurement. The subprogramme has developed several corruption-related COVID-19 policy papers to help Member States navigate these times of uncertainty and address challenges in the context and aftermath of the COVID-19 pandemic.

13.79 The subprogramme has also conducted analyses of fraud and corruption risks related to COVID-19 economic rescue measures in South-East Asia and South America and Mexico and has provided advice to Member States on COVID-19-related emergency legislation, for instance in Kenya and Mexico, which requested legislative assistance on bills for whistle-blower protection amidst the crisis. Furthermore, the subprogramme has assessed the changing corruption risk landscape, including by collecting and consolidating information from its network of field-based advisers, and proposed policy responses for Governments to ensure that investigations and prosecutions and international cooperation continue despite the challenges posed by COVID-19. This has enabled the subprogramme to provide

emergency guidance and advisory services to States to identify and mitigate corruption risks resulting from the COVID-19 pandemic.

*Progress towards the attainment of the objective, and performance measure*

13.80 The above-mentioned work contributed to the objective, as demonstrated by Member States developing policy responses to support the swift and effective implementation of measures to respond to threats and vulnerabilities emerging during the COVID-19 pandemic, including detecting the proceeds of corruption (see table 13.10). As pointed out by a Member State, UNODC training helped to effectively mitigate corruption in the procurement of testing equipment.

Table 13.10  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
—	—	Member States develop policy responses to support the swift and effective implementation of measures to respond to threats and vulnerabilities emerging during the COVID-19 pandemic

**Impact of COVID-19 on subprogramme delivery**

13.81 Owing to the impact of COVID-19 during 2020, the subprogramme cancelled some planned deliverables. Specifically, the duration of some meetings of the Conference of the States Parties to the Convention and its subsidiary bodies was reduced, resulting in an overall reduced number of meetings in 2020. The subprogramme also changed its approach with regard to fast-tracking the implementation of the United Nations Convention against Corruption by providing support to Member States remotely.

13.82 At the same time, however, the subprogramme identified new activities to support Member States on issues related to the COVID-19 pandemic, within the overall scope of its objectives, namely providing substantive support, in the form of policy papers for Member States, survey tools for anti-corruption agencies and advanced virtual methodologies for addressing corruption in the context of emergency procurement, to meet critical needs and with a view to highlighting corruption as an important issue to tackle in the global response to COVID-19. The new deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

**Planned results for 2022**

13.83 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and which show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

## **Result 1: reviewing the implementation of the United Nations Convention against Corruption to spearhead national anti-corruption reforms<sup>6</sup>**

### **Programme performance in 2020**

13.84 The subprogramme held the drawing of lots to select peer reviewers as part of the Mechanism for the Review of Implementation of the United Nations Convention on Corruption in a timely manner amid the global health crisis. Following approval by Member States for the meeting of the Implementation Review Group to be conducted virtually, the subprogramme successfully launched the fifth year of the Implementation Review Mechanism, thereby avoiding a potential loss of time for countries in the final year of the review process.

13.85 The subprogramme also supported States in the completion of country reviews to advance the implementation of the United Nations Convention against Corruption. The unprecedented measures taken by States parties to manage the health crisis caused by the COVID-19 pandemic have had a dual effect on the completion of country reviews under the Implementation Review Mechanism – in some instances, it allowed for accelerated finalization of executive summaries and country review reports, whereas in other instances, it had a negative impact on the pace of reviews, in particular the country visits. Among the most immediate consequences were delays in the preparation of self-assessment checklists, desk reviews and country reports, as well as the postponement of already-scheduled country visits. UNODC efforts to encourage States to participate in virtual country visits were met with reservations, with only one State under review in agreement with this adapted set-up.

13.86 The above-mentioned work contributed to the submission by 122 States parties of completed self-assessment checklists and the timely launch of the fifth and final year of the second cycle of the Implementation Review Mechanism, which met the planned target of the submission of further additional self-assessment checklists with the continued support of UNODC to States parties, resulting in the timely launch of the fifth and final year of the second cycle of the Mechanism, reflected in the proposed programme budget for 2020.

### **Proposed programme plan for 2022**

13.87 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will work towards the acceleration of the implementation of the Convention by assisting States to conduct the country reviews under the Implementation Review Mechanism. The expected progress is presented in the performance measure below (see table 13.11).

**Table 13.11**  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
76 submissions by States parties of their completed self-assessment checklists since the start of the second cycle of the Implementation	Additional self-assessment checklists submitted by States parties with UNODC assistance	122 submissions by States parties of their completed self-assessment checklists and the timely launch of the fifth and final year	An increased number of additional checklists submitted with the continued support of UNODC to	A further increase in the number of additional checklists submitted to States parties, with a view to advancing the timely completion

<sup>6</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 16)).

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Review Mechanism, in 2016		of the second cycle of the Implementation Review Mechanism	States parties, with a view to advancing the timely completion of the country reviews	of the country reviews

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: fast-tracking the implementation of the United Nations Convention against Corruption by States parties<sup>7</sup>**

### **Programme performance in 2020**

13.88 The subprogramme has established regional platforms (South-East Asia, East Africa, South America and Mexico, and Southern Africa) composed of policy and decision makers, focusing specifically on fast-tracking the implementation of the United Nations Convention against Corruption at the global, regional and national levels, while also taking into account the outcomes of the country reviews conducted under the Implementation Review Mechanism. This approach has enabled participating States parties to identify and focus on specific priority thematic areas in their fight against corruption. It has also enabled States parties to leverage South-South cooperation for a broader range of technical assistance support. In seeking to strengthen its effectiveness, the subprogramme will continue to assist States in implementing the Convention more effectively.

13.89 During the COVID-19 pandemic, the work continued to be undertaken with participating countries remotely. In South-East Asia, the subprogramme organized training at the national and regional levels and provided national-level support in the areas of financial investigation and asset recovery, beneficial ownership, whistle-blower protection, conflict of interest and public procurement, particularly in emergency situations. In addition, three regional studies were produced, on beneficial ownership transparency and companies' registration, on the oversight systems related to increased spending owing to COVID-19 and on the utilization of digital datasets and artificial intelligence for the identification of fraud and corruption. In East Africa, capacity-building activities were conducted and mentoring and remote assistance were provided to countries with regard to public procurement and whistle-blower protection, with a focus on the health sector, financial investigations and parallel investigations linked to wildlife crime. A virtual platform to exchange and share experiences in all thematic areas of the project was piloted. In South America and Mexico, mapping/baselining activities were conducted in all nine countries at the national level and 10 national events and one regional online workshop were conducted in all thematic areas of the project. In Southern Africa, mapping/baselining activities were conducted in all eight countries at the national level and four national activities were conducted. Owing to the severity of the COVID-19 situation in the region, no work was undertaken to develop or deliver a regional workshop.

13.90 Furthermore, the subprogramme developed an increased number of knowledge products, including e-learning modules enabling the provision of remote support, given that travel restrictions were in place for most of 2020. In this regard, three e-learning courses were developed and five publications were drafted. Finally, a

<sup>7</sup> As reflected in the proposed programme budget for 2021 ([A/75/6 \(Sect. 16\)](#) and [A/75/6 \(Sect. 16\)/Corr.1](#)).

survey on oversight mechanisms for COVID-19 response packages was carried out in the four regions covered by the platforms.

13.91 The above-mentioned work contributed to 39 country-level activities to fast-track the implementation of the Convention, which exceeded the planned target of 29 country-level activities reflected in the proposed programme budget for 2021.

### **Proposed programme plan for 2022**

13.92 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue its work in all thematic areas of the four regional platforms to identify common anti-corruption priorities, leverage regional capacities and knowledge, and tailor technical assistance to specific needs and thematic priorities identified in each region. The expected progress is presented in the performance measure below (see figure 13.III).

Figure 13.III

**Performance measure: number of annual country-level activities to fast-track the implementation of the United Nations Convention against Corruption**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: renewed political commitment to the fight against corruption**

#### **Proposed programme plan for 2022**

13.93 Corruption undermines governance, hinders development and has a destabilizing effect on societies through its very direct impact on the lives of citizens. It hurts most those who are disenfranchised – the poor, women and minorities – who often have to pay bribes to gain access to essential services. Corruption is an instrumental enabler in the commission of many offences, including many serious crimes. The subprogramme played a central role in improving the capacity of and cooperation among States parties in preventing and combating corruption, including by facilitating the preparatory process for the special session of the General Assembly against corruption, to be held in 2021, which resulted in a concise and action-oriented political declaration setting out a strategic and comprehensive approach for the future fight against corruption.

#### *Lessons learned and planned change*

13.94 The lesson for the subprogramme was that catalytic action is needed to effectively prevent and fight corruption globally, which calls for mainstreaming

corruption across relevant initiatives, such as the political declaration of the special session of the General Assembly against corruption, including by drawing upon the recommendations arising from the Implementation Review Mechanism. The follow-up to the special session of the General Assembly against corruption will provide an opportunity to galvanize the political will of States and will present an excellent opportunity for the international community to advance the fight against corruption. In applying the lesson, the subprogramme will extend its reach and impact by supporting the implementation of joint commitments contained in the political declaration of the special session of the General Assembly, with the objective of maximizing multiplier effects in the fight against corruption.

*Expected progress towards the attainment of the objective, and performance measure*

13.95 This work is expected to contribute to the objective, as demonstrated by States translating the political declaration adopted at the special session of the General Assembly against corruption in 2021 into actionable and practical measures to advance the global fight against corruption (see table 13.12).

Table 13.12  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)</i>	<i>2022 (planned)</i>
Adoption by the General Assembly of resolution <a href="#">73/191</a> on the special session of the General Assembly against corruption	Adoption by the Conference of the States Parties to the Convention, for subsequent adoption by the General Assembly, of a resolution on the special session of the General Assembly against corruption	Adoption by the General Assembly of resolution <a href="#">74/276</a> and decision <a href="#">74/568</a> on the special session of the General Assembly against corruption	Adoption of a concise and action-oriented political declaration at the special session of the General Assembly against corruption in 2021	States translate the political declaration adopted at the special session of the General Assembly against corruption in 2021 into actionable and practical measures to advance the global fight against corruption

## Legislative mandates

13.96 The list below provides all mandates entrusted to the subprogramme.

### *Conventions*

United Nations Convention against Corruption

### *General Assembly resolutions and decisions*

<a href="#">46/152</a>	Creation of an effective United Nations crime prevention and criminal justice programme	<a href="#">65/227</a>	Realignment of the functions of the United Nations Office on Drugs and Crime and changes to the strategic framework
<a href="#">51/59</a>	Action against corruption		
<a href="#">61/209</a> ; <a href="#">62/202</a> ; <a href="#">63/226</a> ; <a href="#">64/237</a>	Preventing and combating corrupt practices and transfer of assets of illicit origin and returning such assets, in particular to the countries of origin, consistent with the United Nations Convention against Corruption	<a href="#">65/230</a>	Twelfth United Nations Congress on Crime Prevention and Criminal Justice
<a href="#">65/1</a>	Keeping the promise: united to achieve the Millennium Development Goals (para. 52)	<a href="#">66/177</a>	Strengthening international cooperation in combating the harmful effects of illicit financial flows resulting from criminal activities

66/179; 67/184; 68/185; 69/191	Follow-up to the Twelfth United Nations Congress on Crime Prevention and Criminal Justice and preparations for the Thirteenth United Nations Congress on Crime Prevention and Criminal Justice	70/174	Thirteenth United Nations Congress on Crime Prevention and Criminal Justice
66/181; 67/189; 68/193; 69/197; 70/178; 71/209; 72/196; 73/186; 74/177	Strengthening the United Nations crime prevention and criminal justice programme, in particular its technical cooperation capacity	71/206; 72/192; 73/184; 74/171	Follow-up to the Thirteenth United Nations Congress on Crime Prevention and Criminal Justice and preparations for the Fourteenth United Nations Congress on Crime Prevention and Criminal Justice
67/192; 68/195; 69/199; 71/208; 73/190	Preventing and combating corrupt practices and the transfer of proceeds of corruption, facilitating asset recovery and returning such assets to legitimate owners, in particular to countries of origin, in accordance with the United Nations Convention against Corruption	73/191; 74/276	Special session of the General Assembly against corruption
		74/170	Integrating sport into youth crime prevention and criminal justice strategies
		74/172	Education for Justice and the rule of law in the context of sustainable development

### *Economic and Social Council resolutions*

2006/23; 2007/22	Strengthening basic principles of judicial conduct	2010/20; 2011/34	Support for the development and implementation of an integrated approach to programme development at the United Nations Office on Drugs and Crime
2006/24	International cooperation in the fight against corruption		
2007/20; 2009/22; 2011/35; 2013/39	International cooperation in the prevention, investigation, prosecution and punishment of economic fraud and identity-related crime	2011/32	Strengthening international cooperation in combating the harmful effects of illicit financial flows resulting from criminal activities
2009/25	Improving the collection, reporting and analysis of data to enhance knowledge of trends in specific areas of crime		

## **Deliverables**

13.97 Table 13.13 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 13.13

### **Subprogramme 3: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>80</b>	<b>80</b>	<b>100</b>	<b>80</b>
1. Note by the Secretary-General to the General Assembly on crime prevention and criminal justice	—	—	1	—
2. Reports on the sessions of the Conference of the States Parties and its subsidiary bodies	6	6	7	6

10. Global programme to prevent and combat corruption through effective implementation of the United Nations Convention against Corruption in support of Sustainable Development Goal 16	1	1	1	1
<b>Seminars, workshops and training events</b> (number of days)	<b>5</b>	<b>5</b>	<b>5</b>	<b>5</b>
11. Expert group meetings on developing guidance or tools for specific areas of the United Nations Convention against Corruption, including based on the needs identified through the Implementation Review Mechanism	5	5	5	5
<b>Publications</b> (number of publications)	<b>4</b>	<b>4</b>	<b>4</b>	<b>3</b>
12. Official publications on anti-corruption	4	4	4	3
<b>Technical materials</b> (number of materials)	<b>3</b>	<b>3</b>	<b>3</b>	<b>4</b>
13. Guidance and tools on anti-corruption	3	3	3	4

#### C. Substantive deliverables

**Consultation, advice and advocacy:** provision of training courses to 50 governmental experts to conduct reviews under the Implementation Review Mechanism, facilitation of the completion and analysis of self-assessment checklist responses, conduct of 20 country visits and drafting of country review reports and executive summaries.

**Databases and substantive digital materials:** maintenance of a database of laws and jurisprudence, as well as of non-legal knowledge relevant to the United Nations Convention against Corruption, including for issues related to asset recovery; maintenance of a database of competent authorities, asset recovery focal points and central authorities; maintenance of the online anti-corruption portal known as Tools and Resources for Anti-Corruption Knowledge; and development and maintenance of electronic tools and training materials on standards, policies, operational procedures and good practices in the implementation of the Convention by States parties.

## Subprogramme 4 Terrorism prevention

### Objective

13.98 The objective, to which this subprogramme contributes, is to strengthen a criminal justice regime against terrorism that is effective and is implemented by Member States in accordance with the rule of law.

### Strategy

13.99 To contribute to the objective, the subprogramme will respond to requests from Member States to provide normative and capacity-building support to prevent terrorism and violent extremism, as and when conducive to terrorism,<sup>8</sup> by initiating and supporting the development of cooperation frameworks with Member States at the national, regional and global levels. The subprogramme also plans to develop and implement results-based projects on terrorism prevention and strengthen the impact

<sup>8</sup> See General Assembly resolutions 71/209 and 72/194.

of its field delivery through coordination and integrated planning and implementation with partners that support Governments with terrorism prevention, in particular the Global Counter-Terrorism Coordination Compact and its working groups, which will help Member States to make progress towards relevant Sustainable Development Goals, including Goals 5 and 16. The subprogramme is mandated under resolutions of the General Assembly<sup>9</sup> and the Security Council,<sup>10</sup> as well as the United Nations Global Counter-Terrorism Strategy, adopted by the Assembly in 2006 in its resolution [60/288](#), and the biennial reviews of the Strategy, to deliver counter-terrorism technical assistance to requesting Member States.

13.100 The subprogramme plans to support Member States on issues related to COVID-19 by mitigating the restrictions imposed as a result of the pandemic and developing technical assistance tools and training activities in line with Member States' counter-terrorism needs in the context of COVID-19. The pandemic has had a significant impact on the terrorism landscape, and the subprogramme plans to support Member States in responding to related threats more effectively.

13.101 The above-mentioned work is expected to result in:

- (a) Ratification by Member States of an increased number of international legal instruments against terrorism;
- (b) Revision by Member States, accordingly, of domestic counter-terrorism legislation;
- (c) Development by Member States of strategies and action plans for combating terrorism;
- (d) Effective investigation, prosecution and adjudication of terrorism cases by criminal justice officials, in line with the relevant international legal instruments and norms, standards and good practices;
- (e) Increased national, regional and international cooperation between law enforcement and judicial entities.

## **Programme performance in 2020**

13.102 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Criminal justice and law enforcement officials are equipped with counter-terrorism capacities during the pandemic**

13.103 The terrorism landscape was drastically transformed by COVID-19. The health crisis meant that the number of individuals confined to their homes and spending more time on the Internet had skyrocketed, making them more vulnerable and susceptible to recruitment and radicalization by terrorists and terrorist groups, who were also spending more time online owing to the pandemic. As a result of the pandemic, the preservation, collection and utilization of essential electronic evidence in terrorism cases has become even more critical. In response, the subprogramme has been developing new tools to offer tailored services to better address Member States' counter-terrorism needs in the context of COVID-19. For example, the subprogramme developed a space on its online Counter-Terrorism Learning Platform, known as the iRoom, to specifically address matters related to electronic evidence. The iRoom is a secure online space that acts as a

<sup>9</sup> See General Assembly resolutions [72/194](#), [72/284](#) and [74/175](#).

<sup>10</sup> See Security Council resolution [2482 \(2019\)](#) and previous related Security Council resolutions.

“one-stop shop” for technical assistance delivery and allows for the exchange of best practices, stocktaking and the development of new tools related to electronic evidence, established for prosecutors, investigators and the judiciary to collaborate on cross-border terrorism and organized crime cases involving electronic evidence.

13.104 The subprogramme also continued to promote the application of international norms, standards and good practices in countering terrorism and continued to support Member States with their criminal justice responses against terrorism, in line with the United Nations Global Counter-Terrorism Strategy. The subprogramme moved the delivery of its technical assistance activities online and has trained over 2,000 criminal justice officials virtually since the outbreak of the pandemic. As part of these efforts, the subprogramme significantly scaled up the use of its online Counter-Terrorism Learning Platform. With a wide range of flexible features and tools, the Platform allows for high levels of interaction between participants and moderators and includes over 3,000 criminal justice and law enforcement officers from more than 135 countries as registered members.

*Progress towards the attainment of the objective, and performance measure*

13.105 The above-mentioned work contributed to the objective, as demonstrated by 727 criminal justice and law enforcement officers having enhanced capacities in criminal justice responses to terrorism (see figure 13.IV).

Figure 13.IV

**Performance measure: number of criminal justice and law enforcement officials with enhanced capacities in criminal justice responses to terrorism, trained via the online Counter-Terrorism Learning Platform (cumulative)**

**Impact of COVID-19 on subprogramme delivery**

13.106 Owing to the impact of COVID-19 in 2020, the subprogramme sought alternative avenues to continue to deliver technical assistance to Member States. In compliance with social distancing measures and in an effort to avoid the interruption of critical technical assistance, the subprogramme moved the delivery of its technical assistance activities online through the online Counter-Terrorism Learning Platform. Owing to travel restrictions, several activities within the framework of the Global Programme on Strengthening the Legal Regime against Terrorism that were intended to be conducted in person and could not be delivered online were postponed.

13.107 At the same time, however, the subprogramme identified new activities to support Member States on issues related to the COVID-19 pandemic, within the overall scope of its objectives, namely, in order to support Nigeria in continuing its counter-terrorism efforts while adapting to the COVID-19 context, the subprogramme

developed guidelines for the Nigerian police to reduce the risk of infection while protecting the public from criminal activity, including terrorism.

## **Planned results for 2022**

13.108 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: progress in the prosecution and adjudication of members of Islamic State in Iraq and the Levant (Da'esh)<sup>11</sup>**

#### **Programme performance in 2020**

13.109 The subprogramme has been building the capacity of criminal justice officials to investigate, prosecute and adjudicate terrorism in accordance with the rule of law and human rights. Despite the COVID-19 restrictions, the subprogramme delivered two training sessions on conducting and managing interviews of terrorist suspects in a human-rights compliant manner and on investigating, prosecuting and adjudicating crimes committed by Islamic State in Iraq and the Levant (Da'esh) (ISIL). The subprogramme has also been promoting the role of Iraqi women officials in countering terrorism in Iraq by developing their knowledge and capacities to prevent, counter and prosecute terrorism in Iraq, in accordance with the mandate in Security Council resolutions [1325 \(2000\)](#) and [2242 \(2015\)](#) to promote and support women's participation in peace processes.

13.110 The subprogramme also provided support in the use and promotion of alternatives to imprisonment in cases related to terrorism. In addition, the subprogramme has been providing support to judicial institutions in the liberated areas, such as the Mosul Investigative Court. Furthermore, the subprogramme initiated work to support the victims of ISIL in Iraq.

13.111 The above-mentioned work contributed to an increased number of victims of terrorism accessing the Iraqi judicial system and strengthened judicial institutions, with increased participation of women at the policy, planning and technical levels, which met the planned target of steps being taken towards the establishment of national judicial mechanisms or processes for the prosecution and adjudication of members of ISIL reflected in the proposed programme budget for 2020.

#### **Proposed programme plan for 2022**

13.112 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to deliver tailored technical assistance to strengthen criminal justice responses to terrorism, in line with the United Nations Counter-Terrorism Strategy, and will support the victims of terrorism in Iraq through mechanisms to increase their role in criminal justice proceedings and the provision of psychological support. The expected progress is presented in the performance measure below (see table 13.14).

<sup>11</sup> As reflected in proposed programme budget for 2020 ([A/74/6 \(Sect. 16\)](#)).

Table 13.14  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Iraq requests technical assistance for the development of national judicial mechanisms to prosecute and adjudicate ISIL-related crimes	Discussions ensue on national judicial mechanisms or processes for the prosecution and adjudication of members of ISIL	Increased number of victims of terrorism accessing the Iraqi judicial system and strengthened judicial institutions, with increased participation of women at the policy, planning and technical levels	Enhanced capacity to handle domestic cases relating to ISIL while upholding fundamental rights	Cases relating to ISIL are successfully prosecuted while fundamental rights are upheld and victims of ISIL are protected

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: strengthened capacity of criminal justice officials to prevent terrorism<sup>12</sup>

### Programme performance in 2020

13.113 The subprogramme has been working on strengthening a criminal justice regime against terrorism that is effective and is implemented by Member States in accordance with the rule of law. The subprogramme has been providing support to authorities in Sri Lanka in developing a comprehensive policy and legislative framework for counter-terrorism that is fully compliant with the rule of law, human rights standards and fundamental freedoms. The subprogramme has also been providing training to criminal investigators, prosecutors and judges on rehabilitation and reintegration, including alternatives to imprisonment and community-based interventions; special investigative techniques for identifying and responding to harmful online content; development of a national toolkit for criminal justice practitioners based on the Practical Guide for Requesting Electronic Evidence Across Borders to suit the local context and procedures; the use and admissibility of digital evidence in investigations and court; and tailoring a regional toolkit for judges to the national context of Maldives and Sri Lanka, which included components on supporting female criminal justice practitioners in serving in the judicial system.

13.114 The above-mentioned work contributed to the certification of criminal justice officials to process terrorism cases in line with applicable international law, which met the planned target reflected in the proposed programme budget for 2021.

### Proposed programme plan for 2022

13.115 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to train criminal investigators, prosecutors and judges and will support inter-agency and regional cooperation among law enforcement and judicial

<sup>12</sup> As reflected in proposed programme budget for 2021 ([A/75/6 \(Sect. 16\)](#) and [A/75/6 \(Sect. 16\)/Corr.1](#)).

officials to facilitate operational information exchange and mutual legal assistance. The expected progress is presented in the performance measure below (see table 13.15).

Table 13.15  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
—	—	Criminal justice officials are certified to process terrorism cases in line with applicable international law	Officials are able to resolve and process terrorist cases in line with applicable international law, including gender norms	Meetings are held of a regional information exchange forum to strengthen inter-agency and regional cooperation among law enforcement and judicial officials

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: terrorists are brought to justice in line with the rule of law and human rights

#### Proposed programme plan for 2022

13.116 The right to a fair and speedy trial is paramount in ensuring access to justice. Delays in processing terrorism cases can ultimately obstruct access to justice. Thousands of people have been detained for alleged association with Boko Haram in the Lake Chad Basin countries. To help address the backlog in terrorism cases, the subprogramme has been building the capacity of the criminal justice system to effectively investigate, prosecute and adjudicate those terrorism cases with respect for human rights. This extensive assistance has included the revision of over 1,200 terrorism cases, as well as support to the criminal justice system to effectively address gender issues, including sexual and gender-based violence committed by terrorist groups.

#### *Lessons learned and planned change*

13.117 The lesson for the subprogramme was that, in addition to improving the knowledge and skills of criminal justice officials, the subprogramme must provide support to better equip criminal justice systems, in order to effectively address the backlog in terrorism cases. In applying the lesson, the subprogramme will expand its assistance to provide the necessary forensic equipment, logistics support, and policy and procedural guidance to assist criminal justice officials to more effectively put in practice the knowledge and skills gained.

#### *Expected progress towards the attainment of the objective, and performance measure*

13.118 This work is expected to contribute to the objective, as demonstrated by the number of criminal justice officials trained with regard to the investigation, prosecution and adjudication of terrorism cases (see figure 13.V).

Figure 13.V

**Performance measure: number of criminal justice officials trained annually on the investigation, prosecution and adjudication of terrorism cases**

### Legislative mandates

13.119 The list below provides all mandates entrusted to the subprogramme.

#### *General Assembly resolutions*

58/136; 59/153	Strengthening international cooperation and technical assistance in promoting the implementation of the universal conventions and protocols related to terrorism within the framework of the activities of the Centre for International Crime Prevention	66/178; 68/187; 70/177; 72/194	Technical assistance for implementing the international conventions and protocols related to counter-terrorism
		70/148	Protection of human rights and fundamental freedoms while countering terrorism
60/288	The United Nations Global Counter-Terrorism Strategy	74/175	Technical assistance provided by the United Nations Office on Drugs and Crime related to counter-terrorism
62/46	Preventing the acquisition by terrorists of radioactive materials and sources	75/145	Measures to eliminate international terrorism
62/172; 64/177	Technical assistance for implementing the international conventions and protocols related to terrorism	75/196	Strengthening the United Nations crime prevention and criminal justice programme, in particular its technical cooperation capacity
65/74; 67/51; 69/50; 71/66	Preventing the acquisition by terrorists of radioactive sources		

#### *Security Council resolutions*

1267 (1999)	2322 (2016)
1373 (2001)	2341 (2017)
1540 (2004)	2347 (2017)
1624 (2005)	2370 (2017)
2133 (2014)	2396 (2017)
2178 (2014)	2423 (2018)
2199 (2015)	2462 (2019)
2253 (2015)	2482 (2019)
2309 (2016)	

*Economic and Social Council resolutions*

2019/21 Technical assistance provided by the United Nations Office on Drugs and Crime related to counter-terrorism

*Commission on Crime Prevention and Criminal Justice resolutions*

21/3 Strengthening international cooperation to address the links that in some cases may exist between transnational organized criminal activities and terrorist activities

22/4 Enhancing the effectiveness of countering criminal threats to the tourism sector, including terrorist threats, in particular, by means of international cooperation and public-private partnerships

## Deliverables

13.120 Table 13.16 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 13.16

### Subprogramme 4: deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	2	2	1	2
1. Report of the Secretary-General to the Commission on Crime Prevention and Criminal Justice	1	1	1	1
2. Report of the Secretary-General to the General Assembly	1	1	–	1
<b>Substantive services for meetings</b> (number of three-hour meetings)	12	3	20	12
3. Meetings of the General Assembly and its subsidiary bodies	2	1	2	2
4. Meetings of the Security Council and its subsidiary bodies	5	2	5	5

9. Publications, handbooks and training manuals on specific thematic issues related to counter-terrorism	3	2	2	3
10. Supporting legal responses and criminal justice capacity aimed at preventing and countering terrorism (menu of services)	1	–	1	–
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> advisory services on legislative drafting and strategies and plans of action; consultation on the development of technical assistance plans; advisory services on the visits of the Counter-Terrorism Committee; and substantive support to national training institutions.				

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
--------------------------	-----------------	----------------	-----------------	-----------------

**Databases and substantive digital materials:** updating and maintenance of the SHERLOC counter-terrorism tools containing over 2,300 pieces of counter-terrorism legislation, including the database of national central authorities for counter-terrorism cases, the online Counter-Terrorism Learning Platform for over 3,200 members, the observatory of jurisprudence for the Americas and the Central Asian network to prevent terrorism.

#### D. Communication deliverables

**Outreach programmes, special events and information materials:** global parliamentary summit on terrorism; promotion of the ratification of the 19 international legal instruments related to terrorism for the Member States that have not ratified, with approximately 1,222 remaining ratifications and accessions; brochures, flyers and information kits in legal, criminal justice and related areas; and the International Day of Remembrance of and Tribute to the Victims of Terrorism.

**Digital platforms and multimedia content:** update and maintenance of the website and social media platforms.

## Subprogramme 5 Justice

### Objective

13.121 The objective, to which this subprogramme contributes, is to prevent crime and ensure more effective, fair, humane and accountable criminal justice systems as a basis for the rule of law and sustainable development.

### Strategy

13.122 To contribute to the objective, the subprogramme will continue to promote the development of United Nations standards and norms in crime prevention and criminal justice and facilitate their application through working with all relevant sectors in national criminal justice systems and all actors involved in crime prevention and criminal justice reform.

13.123 The subprogramme will also provide assistance, upon request, to Member States, and in particular to criminal justice actors (such as the police, prosecution services, judiciary, including the juvenile justice system, lawyers, community-based experts and prison staff) by enabling knowledge transfer, supporting institution-building and providing capacity-building and technical advice. The subprogramme will also promote cooperation with other sectors, including education, health and social services. The work of the subprogramme will focus in particular on creating evidence bases for crime prevention and addressing risk factors and root causes of offending and reoffending; promoting human rights-based policing; increasing access to legal aid; strengthening the effectiveness, fairness and efficiency of criminal justice processes; developing sentencing policies and promoting the use of alternatives to imprisonment; as well as improving prison conditions, improving treatment of violent extremist<sup>13</sup> prisoners and preventing radicalization, and supporting social reintegration upon release. The subprogramme will incorporate cross-cutting issues related to victims and witnesses; gender in the criminal justice system, including violence against women; and children in the criminal justice system, including violence against children. The subprogramme will continue to share studies, good practices and information technology resources, and develop and disseminate practical tools, such as guidance notes, handbooks, training curricula and model legislation, as well as support

<sup>13</sup> The terms “violent extremist” and “violent extremism” refer to violent extremism as and when conducive to terrorism (see General Assembly resolutions [71/209](#) and [72/194](#)).

counterparts in applying these tools. This work will help Member States to make progress towards Sustainable Development Goals 5, 11 and 16.

13.124 The subprogramme plans to support Member States on issues related to COVID-19 by strengthening criminal justice systems' abilities to prepare for, respond to and recover from crisis. The subprogramme will continue to support strengthening of legal frameworks and adoption and implementation of holistic and inclusive short-term crisis strategies and related actions that ensure the continued functioning of criminal justice systems and equal access to its services, while reducing the risk of violations of the human rights of those affected disproportionately by the pandemic, in particular detainees, prisoners and victims of crime. The subprogramme will also support long-term, evidence-based and sustainable recovery measures and take into account lessons learned during the crisis on the needs of both the population and justice actors, leveraging existing capacities and using new technologies.

13.125 The above-mentioned work is expected to result in:

- (a) Enhanced coordination between justice actors, for example, between police officers, defence lawyers and investigating judges to address excessive and arbitrary police and pretrial detention;
- (b) Improved frequency and quality in application of alternatives to imprisonment in appropriate cases;
- (c) Improved prosecution and adjudication of cases of violence against women and girls;
- (d) Improved prevention of and responses to violence against children through crime prevention and criminal justice strategies and programmes;
- (e) Increased access to justice for the vulnerable sectors of society and increased public trust in the justice system, including through countrywide legal aid services that are accessible to all and are tailored to the rights and needs of the population;
- (f) Enhanced support for social reintegration of prisoners and prevention of recidivism;
- (g) Prevention of victimization and creation of safer communities;
- (h) Empowerment of women and girls within crime prevention and criminal justice programmes and systems.

13.126 The planned support on issues related to COVID-19 is expected to result in a reduction of the use of detention and imprisonment through strengthened functioning of and equal access to justice mechanisms, and in enhanced knowledge and capacity of justice actors to prevent and redress human rights violations and crime, counter discrimination and empower communities.

## **Programme performance in 2020**

13.127 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Enhanced access to legal aid for women offenders and victims in West Africa**

13.128 Legal aid is an essential element of a fair, humane and efficient criminal justice system that is based on the rule of law and a foundation for the enjoyment of other rights, including the right to a fair trial. Restrictions related to the COVID-19

pandemic have significantly constrained access to legal aid for victims of domestic violence, thereby rendering legal aid more pressing as a means of protection from rights violations. The subprogramme, in collaboration with the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women), reprogrammed existing joint activities on legal aid services to maintain and enhance access to justice for women and girls in Liberia, Senegal and Sierra Leone during the COVID-19 pandemic, by developing needs-based advocacy and remote training materials and providing additional funding to legal aid providers to deliver services, as feasible, to women detainees, prisoners and victims of crime.

13.129 The subprogramme also promoted the establishment of alternative and remote mechanisms for women to access legal aid. For example, in Sierra Leone a free hotline for victims of domestic and sexual violence was established, in partnership with the police and the Legal Aid Board. Data collection efforts have been promoted in all three project countries in order to understand how COVID-19 is changing the nature of cases encountered. The subprogramme, in close cooperation with national and local authorities and other stakeholders, in particular paralegals, who are central to this effort, established one-stop centres that will aid in the data collection effort and enhance access to legal aid for women who come into conflict with the law. Collecting data will provide public information to key ministries, stakeholders and civil society organizations in order to promote the inclusion of women's rights in COVID-19 responses. Furthermore, the subprogramme supported legal empowerment initiatives in all target countries, as well as direct service provision by paralegals and lawyers to women detainees in police stations and to women victims of crime.

*Progress towards the attainment of the objective, and performance measure*

13.130 The above-mentioned work contributed to the objective, as demonstrated by 673 justice actors trained and 150 women benefitting from legal education (see figure 13.VI).

Figure 13.VI

**Performance measure: annual number of justice actors trained and number of women benefitting from legal education**

**Impact of COVID-19 on subprogramme delivery**

13.131 Owing to the impact of COVID-19 during 2020, the subprogramme changed the assistance provided through capacity-building and tool development by shifting

the method of delivery from in-person workshops, training and conferences to virtual meetings and webinars, and postponed those events which were thought to better function in person. These changes had an impact on the programme performance in 2020, as specified in results 1 and 2 below. As all sessions of intergovernmental bodies were cancelled or postponed to 2021 owing to the pandemic, the subprogramme's activities for servicing these bodies' meetings were limited to development of selected parliamentary documentation such as working papers and activity reports.

13.132 At the same time, however, the subprogramme identified new and modified activities to support Member States on issues related to the COVID-19 pandemic, within the overall scope of its objectives, namely timely development of up-to-date support by issuing guidance notes and operational advice, including on COVID-19 preparedness and responses in prisons; capacity-building through online training programmes; development of e-learning courses on pressing issues such as violence against children; and organization of virtual meetings and conferences to disseminate knowledge and encourage exchange of experience among countries, including on human rights-based policing, restorative justice programmes and restorative justice approaches to teaching criminal justice, as well as a global webinar series on gender-responsive criminal justice and prison reform. The subprogramme also assessed the impact of COVID-19 on crime prevention and criminal justice responses to gender-based violence against women and girls and approaches to apply non-custodial measures to decongest prisons and detention facilities. The subprogramme also changed the focus of some activities from capacity-building to direct financial assistance to service providers. The new and modified deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

## **Planned results for 2022**

13.133 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: helping women prisoners in the Plurinational State of Bolivia prepare for their lives after prison<sup>14</sup>**

#### **Programme performance in 2020**

13.134 The subprogramme has developed and implemented a vocational training programme, in collaboration with the Ministry of Education, for female prisoners from two prisons in La Paz on construction techniques, as the construction sector in the Plurinational State of Bolivia is growing and has a high demand for qualified female workers. In 2020, no additional female prisoners were trained on construction techniques; however, the subprogramme continued to liaise with prison administrations to prepare female prisoners for their release with a view to strengthening their employability upon release.

13.135 The above-mentioned work contributed to no additional female prisoners being trained and/or released, which did not meet the planned target of training 20 prisoners in 2020 reflected in the proposed programme budget for 2020. Challenges were experienced owing to the impact of COVID-19 on in-person gatherings and holding individual meetings with prisoners to prepare them for their release. The

<sup>14</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 16)).

project activities had to stall in early 2020 as all activities in prisons were suspended by the authorities.

### Proposed programme plan for 2022

13.136 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective and in response to recent developments, the subprogramme's work will evolve to include awareness-raising and training activities for prison administrations and policymakers across all regions. The expected progress is presented in the updated performance measure below (see table 13.17).

Table 13.17

### Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
—	10 female prisoners trained and/or employed after release	No additional female prisoners trained and/or employed after release	10 female prisoners trained and/or employed after release	Number of prison staff and policymakers in requesting Member States trained

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: communities are more resilient to crime and violence<sup>15</sup>

### Programme performance in 2020

13.137 The subprogramme has supported Member States in developing and introducing policies and programmes that help to prevent crime. In 2020, it expanded the knowledge-base for crime prevention policies and programmes in Mexico, and developed and assessed dedicated strategies at the State and city levels, including with regard to the prevention of violence against women. The subprogramme also provided input and suggestions for the development of a draft law on crime prevention in Kyrgyzstan and continued its technical assistance activities in several other Member States, including Lebanon, Peru and Uzbekistan, to facilitate the use of sport-based crime prevention initiatives in the context of youth-focused programmes. The subprogramme also provided technical assistance to the State of Palestine, including capacity-building and awareness-raising activities on sport-based youth crime prevention as well as the provision of sports equipment to schools to enhance access to sport and safe spaces for youth development. Furthermore, the subprogramme supported Member States in making their policing more community-oriented and developed technical tools to guide States in their efforts to implement local crime prevention strategies, including manuals on restorative justice and the use of sport for the prevention of violent extremism.<sup>16</sup>

13.138 The above-mentioned work contributed to the development and implementation of gender-sensitive crime prevention policies and programmes in five States, which met the planned target for 2020 reflected in the proposed programme budget for 2021, despite implementation challenges related to COVID-19.

<sup>15</sup> As reflected in the proposed programme budget for 2020 (A/75/6 (Sect. 16) and A/75/6 (Sect. 16)/Corr.1).

<sup>16</sup> The term "violent extremism" refers to violent extremism as and when conducive to terrorism (see General Assembly resolutions 71/209 and 72/194).

### Proposed programme plan for 2022

13.139 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will scale up its technical assistance through virtual and in-person capacity-building and other activities to strengthen Member States' capacity to prevent crime effectively, involving criminal justice practitioners, including law enforcement, as well as other government entities and civil society. The expected progress is presented in the performance measure below (see figure 13.VII).

Figure 13.VII

**Performance measure: number of States that develop and implement gender-sensitive crime prevention policies and programmes with the support of UNODC (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: people in contact with the criminal justice system have increased access to justice services

#### Proposed programme plan for 2022

13.140 Access to justice is a key component of a fair, humane, effective and efficient criminal justice system and a central component of the 2030 Agenda. COVID-19 created unprecedented challenges for criminal justice systems to be able to provide equal access to justice, especially as courts were closed, while social distancing measures were imposed and strictly enforced by the police. The subprogramme has focused on promoting human rights-based policing, as well as access to legal aid, use of restorative justice programmes and access to justice for victims of crime. On the basis of the relevant United Nations standards and norms in crime prevention and criminal justice, the subprogramme has worked with actors from criminal justice institutions, civil society, academia and the private sector in awareness-raising; developing strategies and interventions; reform of mechanisms, laws and policies; data collection and analysis; and tool development, knowledge transfer and capacity-building to provide access to justice for all.

#### *Lessons learned and planned change*

13.141 The lesson for the subprogramme was that it needed to rethink how to more effectively transfer its wealth of guidance and knowledge to leverage its mandate, which covers both supporting State authorities in preventing and responding to crime and violence and ensuring that the rights of groups with specific needs are respected and essential services are provided, to address the risks and challenges posed by the pandemic. In applying the lesson, the subprogramme will use its acquired expertise in

linking the different mandate areas together. It will increase its support so as to: (a) empower communities to achieve access to justice for all, including by promoting human rights-based and community-oriented policing, legal empowerment campaigns to inform people of their rights and how to access them, and capacity-building for delivery of specialized legal aid services for victims of crime and women and girls; (b) reduce rates of police and pretrial detention, including through enhancing capacity and knowledge to ensure access to quality legal aid services, advisory services and capacity-building for the police, technical assistance aimed at strengthening internal and external police oversight mechanisms, support for coordination between the police and prosecution and other justice actors, and more effective investigations; and (c) improve access to fair and effective restorative justice programmes, including through reviewing and supporting legislative reform to develop or expand national restorative justice programmes, assisting in establishing, implementing and improving restorative justice programmes, and enhancing the capacity of restorative justice practitioners to deliver services. It will also put measures in place to ensure efforts are evidence- and needs-based, so as to enable recovery plans to truly reach and secure the rights of those who are at risk of being left furthest behind. This will be done in a holistic manner using a people-centred approach through provision of support for drafting and revising legislation and for developing inclusive and gender-sensitive policies and other reform outcomes that facilitate increased access to justice, as well as capacity-building and dissemination of knowledge to improve the skills of justice actors to resolve the justice problems of the population, particularly for vulnerable groups.

*Expected progress towards the attainment of the objective, and performance measure*

13.142 This work is expected to contribute to the objective, as demonstrated by an increase in the number of Member States implementing activities to increase equal access to justice for all (see figure 13.VIII).

Figure 13.VIII

**Performance measure: number of Member States implementing activities to increase equal access to justice for all (cumulative)**

### Legislative mandates

13.143 The list below provides all mandates entrusted to the subprogramme.

*Conventions*

Convention on the Elimination of All Forms of Discrimination  
against Women

Convention on the Rights of the Child

*General Assembly resolutions*

34/169	Code of Conduct for Law Enforcement Officials	56/261	Plans of action for the implementation of the Vienna Declaration on Crime and Justice: Meeting the Challenges of the Twenty-first Century
40/33	United Nations Standard Minimum Rules for the Administration of Juvenile Justice (the Beijing Rules)	57/170	Follow-up to the plans of action for the implementation of the Vienna Declaration on Crime and Justice: Meeting the Challenges of the Twenty-first Century
40/34	Declaration of Basic Principles of Justice for Victims of Crime and Abuse of Power		
43/173	Body of Principles for the Protection of All Persons under Any Form of Detention or Imprisonment	60/177 <sup>18</sup>	Follow-up to the Eleventh United Nations Congress on Crime Prevention and Criminal Justice
45/110	United Nations Standard Minimum Rules for Non-custodial Measures (the Tokyo Rules)	65/228	Strengthening crime prevention and criminal justice responses to violence against women
45/111	Basic Principles for the Treatment of Prisoners	65/229	United Nations Rules for the Treatment of Women Prisoners and Non-custodial Measures for Women Offenders (the Bangkok Rules)
45/112	United Nations Guidelines for the Prevention of Juvenile Delinquency (the Riyadh Guidelines)	65/230	Twelfth United Nations Congress on Crime Prevention and Criminal Justice
45/113	United Nations Rules for the Protection of Juveniles Deprived of their Liberty	67/185	Promoting efforts to eliminate violence against migrants, migrant workers and their families
45/116	Model Treaty on Extradition		
45/117	Model Treaty on Mutual Assistance in Criminal Matters	67/186	Strengthening the rule of law and the reform of criminal justice institutions, particularly in the areas related to the United Nations system-wide approach to fighting transnational organized crime and drug trafficking
45/118	Model Treaty on the Transfer of Proceedings in Criminal Matters		
45/119	Model Treaty on the Transfer of Supervision of Offenders Conditionally Sentenced or Conditionally Released	67/187	United Nations Principles and Guidelines on Access to Legal Aid in Criminal Justice Systems
46/152	Creation of an effective United Nations crime prevention and criminal justice programme	67/188; 68/190; 69/192	Standard Minimum Rules for the Treatment of Prisoners
48/104	Declaration on the Elimination of Violence against Women	67/191	United Nations African Institute for the Prevention of Crime and the Treatment of Offenders
51/59 <sup>17</sup>	Action against corruption		
51/60	United Nations Declaration on Crime and Public Security	68/189	Model strategies and practical measures on the elimination of violence against children in the field of crime prevention and criminal justice
52/86	Crime prevention and criminal justice measures to eliminate violence against women		
55/59	Vienna Declaration on Crime and Justice: Meeting the Challenges of the Twenty-first Century	69/194	United Nations Model Strategies and Practical Measures on the Elimination of Violence against Children in the Field of Crime Prevention and Criminal Justice
55/89; 74/143	Torture and other cruel, inhuman or degrading treatment or punishment	70/174	Thirteenth United Nations Congress on Crime Prevention and Criminal Justice
56/119	Role, function, periodicity and duration of the United Nations congresses on the prevention of crime and the treatment of offenders	70/175	United Nations Standard Minimum Rules for the Treatment of Prisoners (the Nelson Mandela Rules)
		70/176	Taking action against gender-related killing of women and girls

<sup>17</sup> In particular the annex, entitled "International Code of Conduct for Public Officials".

<sup>18</sup> In particular the annex, entitled "Bangkok Declaration on Synergies and Responses: Strategic Alliances in Crime Prevention and Criminal Justice".

71/256	New Urban Agenda	73/262; 74/137	A global call for concrete action for the total elimination of racism, racial discrimination, xenophobia and related intolerance and the comprehensive implementation of and follow-up to the Durban Declaration and Programme of Action
72/193	Promoting the practical application of the United Nations Standard Minimum Rules for the Treatment of Prisoners (the Nelson Mandela Rules)		
73/148	Intensification of efforts to prevent and eliminate all forms of violence against women and girls: sexual harassment	74/127	Violence against women migrant workers
73/155; 74/133	Rights of the child	74/134	The girl child
73/184; 74/171	Follow-up to the Thirteenth United Nations Congress on Crime Prevention and Criminal Justice and preparations for the Fourteenth United Nations Congress on Crime Prevention and Criminal Justice	74/170	Integrating sport into youth crime prevention and criminal justice strategies
		74/172	Education for justice and the rule of law in the context of sustainable development
73/185	The rule of law, crime prevention and criminal justice in the context of the Sustainable Development Goals	75/196	Strengthening the United Nations crime prevention and criminal justice programme, in particular its technical cooperation capacity
73/207; 74/191	The rule of law at the national and international levels	S-30/1	Our joint commitment to effectively addressing and countering the world drug problem

*Economic and Social Council resolutions and decisions*

1984/47	Procedures for the effective implementation of the Standard Minimum Rules for the Treatment of Prisoners	1997/36	International cooperation for the improvement of prison conditions
1984/50; 1996/15	Safeguards guaranteeing protection of the rights of those facing the death penalty	1998/21 <sup>20</sup>	United Nations standards and norms in crime prevention and criminal justice
1989/57; 2000/15	Implementation of the Declaration of Basic Principles of Justice for Victims of Crime and Abuse of Power	1998/22	Status of foreign citizens in criminal proceedings
1989/60	Procedures for the effective implementation of the Basic Principles on the Independency of the Judiciary	1998/23 <sup>21</sup>	International cooperation aimed at the reduction of prison overcrowding and the promotion of alternative sentencing
1989/61	Guidelines for the effective implementation of the Code of Conduct for Law Enforcement Officials	1999/23	Work of the United Nations Crime Prevention and Criminal Justice Programme
		1999/25	Effective crime prevention
1989/64	Implementation of the safeguards guaranteeing protection of the rights of those facing the death penalty	1999/26	Development and implementation of mediation and restorative justice measures in criminal justice
1989/65	Effective prevention and investigation of extralegal, arbitrary and summary executions	1999/27 <sup>22</sup>	Penal reform
1995/9	Guidelines for the prevention of urban crime	1999/28	Administration of juvenile justice
1997/28	Firearm regulation for purposes of crime prevention and public health and safety	2002/12	Basic principles on the use of restorative justice programmes in criminal matters
1997/29	Measures on the prevention and control of illicit trafficking in motor vehicles	2002/13; <sup>23</sup> 2005/22	Action to promote effective crime prevention
		2002/14	Promoting effective measures to deal with the issues of missing children and sexual abuse or exploitation of children
1997/30 <sup>19</sup>	Administration of juvenile justice	2004/28	United Nations standards and norms in crime prevention and criminal justice
1997/31	Victims of crime and abuse of power		

<sup>19</sup> In particular the annex, entitled "Guidelines for Action on Children in the Criminal Justice System".

<sup>20</sup> In particular the annex, entitled "Plan of action for the implementation of the Declaration of Basic Principles of Justice for Victims of Crime and Abuse of Power".

<sup>21</sup> In particular the annex, entitled "Kadoma Declaration on Community Service".

<sup>22</sup> In particular the annex, entitled "Arusha Declaration on Good Prison Practice".

<sup>23</sup> In particular the annex, entitled "Guidelines for the Prevention of Crime".

2005/14	Model bilateral agreement on the sharing of confiscated proceeds of crime or property covered by the United Nations Convention against Transnational Organized Crime and the United Nations Convention against Illicit Traffic in Narcotic Drugs and Psychotropic Substances of 1988	2007/24	International cooperation for the improvement of access to legal aid in criminal justice systems, particularly in Africa
		2008/24	Strengthening prevention of urban crime: an integrated approach
		2009/26	Supporting national and international efforts for child justice reform, in particular through improved coordination in technical assistance
2005/20	Guidelines on Justice in Matters involving Child Victims and Witnesses of Crime		
2005/21	Strengthening the technical cooperation capacity of the United Nations Crime Prevention and Criminal Justice Programme in the area of the rule of law and criminal justice reform	2013/33	The rule of law, crime prevention and criminal justice in the United Nations development agenda beyond 2015
		2014/21	Strengthening social policies as a tool for crime prevention
2006/20	United Nations standards and norms in crime prevention	2016/17	Restorative justice in criminal matters
		2016/18	Mainstreaming holistic approaches in youth crime prevention
2006/22	Providing technical assistance for prison reform in Africa and the development of viable alternatives to imprisonment	2017/16	Promoting the practical application of the United Nations Standard Minimum Rules for the Treatment of Prisoners (the Nelson Mandela Rules)
2006/23 <sup>24</sup>	Strengthening basic principles of judicial conduct		
2006/25	Strengthening the rule of law and the reform of criminal justice institutions, including in post-conflict reconstruction	2017/19	Promoting and encouraging the implementation of alternatives to imprisonment as part of comprehensive crime prevention and criminal justice policies
2006/29	Crime prevention and criminal justice responses to violence against women and girls	2019/21	Technical assistance provided by the United Nations Office on Drugs and Crime related to counter-terrorism
2007/21	Information-gathering instrument in relation to United Nations standards and norms in crime prevention and criminal justice	Decision 2005/247	Report of the Secretary-General on capital punishment and the safeguards guaranteeing protection of the rights of those facing the death penalty
2007/22	Strengthening basic principles of judicial conduct		
2007/23	Supporting national efforts for child justice reform, in particular through technical assistance and improved United Nations system-wide coordination		

*Commission on Crime Prevention and Criminal Justice resolutions and decisions*

17/2	Strengthening the rule of law through improved integrity and capacity of prosecution services	21/2	Countering maritime piracy, especially off the coast of Somalia and in the Gulf of Guinea
18/1	Supplementary rules specific to the treatment of women in detention and in custodial and non-custodial settings	22/6	Promoting international cooperation and strengthening capacity to combat the problem of transnational organized crime committed at sea
18/2	Civilian private security services: their role, oversight and contribution to crime prevention and community safety	25/2	Promoting legal aid, including through a network of legal aid providers
19/6	Countering maritime piracy off the coast of Somalia	27/6	Restorative justice
		28/1	Strengthening the engagement of all members of society in crime prevention
20/5	Combating the problem of transnational organized crime committed at sea	Decision 19/1	Strengthening crime prevention and criminal justice responses to counterfeiting and piracy
21/1	Strengthening Government oversight of civilian private security services and the contribution of such services to crime prevention and community safety		

<sup>24</sup> In particular the annex, entitled “Bangalore Principles of Judicial Conduct”.

*Commission on Narcotic Drugs resolutions*

55/12	Alternatives to imprisonment for certain offences as demand reduction strategies that promote public health and public safety	59/4	Development and dissemination of international standards for the treatment of drug use disorders
58/5	Supporting the collaboration of public health and justice authorities in pursuing alternative measures to conviction or punishment for appropriate drug-related offences of a minor nature	59/5	Mainstreaming a gender perspective in drug-related policies and programmes
		59/7	Promotion of proportionate sentencing for drug-related offences of an appropriate nature in implementing drug control policies

**Deliverables**

13.144 Table 13.18 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 13.18

**Subprogramme 5: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>

7. Criminal justice handbook series	2	6	2	3
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> substantive and technical support (remotely and in-person) on crime prevention and criminal justice to 60 Member States, other relevant organizations and agencies and 15 national and regional programmes; and guidance on best practices in crime prevention and criminal justice reform.				

## **Subprogramme 6**

### **Research, trend analysis and forensics**

#### **Objective**

13.145 The objective, to which this subprogramme contributes, is to ensure that Member States have enhanced knowledge of trends on drugs and crime for effective scientific and evidence-based policy formulation.

#### **Strategy**

13.146 To contribute to the objective, the subprogramme will continue to provide timely and accurate statistics and analyses of world drug and crime problems, with particular attention to specific manifestations of crime and its transnational dimensions through the production of global and thematic reports, an online monitoring platform and a data-sharing portal. Through strengthened research capacity in the field and technical oversight at headquarters, the subprogramme will improve the quality and relevance of the evidence it generates resulting in better designed programmes and improved impact assessment of interventions. The subprogramme will also continue to support countries in the collection of and reporting on data regarding drugs and crime, as required to monitor progress against certain Sustainable Development Goals and targets, in particular Goals 3 and 16, as they relate to drug use, trafficking, illicit financial flows, justice, crime and crime-related violence.

13.147 The subprogramme also plans to provide support and capacity-building to Member States, upon request, to produce, disseminate and analyse drug and crime data and statistics, including targeted assistance to increase their capacity to produce data and monitor progress towards relevant Sustainable Development Goals. The subprogramme will also assist Member States, upon request, in identifying trends, emerging issues and priorities in drugs, crime and corruption.

13.148 The subprogramme will also ensure that Member States have access to and use quality forensic and scientific services in support of their efforts to counter drugs, crime and terrorism. It will provide technical assistance and expert advice to drug-testing laboratories, forensic institutions and Member States, assisting in forensics standard setting and the exchange of quality forensic data and services for policymaking and decision-making. In addition, the subprogramme will provide scientific support to the three governing bodies under the international drug conventions, namely the Commission on Narcotic Drugs, the International Narcotics Control Board and WHO.

13.149 The subprogramme plans to support Member States on issues related to COVID-19 by producing knowledge and tools on drugs and crime that are based on existing deliverables and adapted to support national and multilateral responses to the COVID-19 recovery, including the use of new modalities for the delivery of its scientific and forensic services. By providing data and analysis to spur transformative change, as agreed upon by Member States, the subprogramme will provide support for addressing the most pressing policy needs in view of informing the COVID-19 recovery.

13.150 The above-mentioned work is expected to result in:

- (a) Enhanced knowledge among Member States, the international community and other relevant stakeholders on formulating strategic responses to existing and emerging drugs and crime issues;

(b) Increased capacity of Member States to produce and analyse statistical data on trends, including trends in specific and emerging drugs and crime issues;

(c) Improved scientific and forensic capacity of forensic service providers to meet internationally accepted standards of performance through quality assurance;

(d) Enhanced scientific and forensic capacity of institutions in receipt of UNODC assistance.

13.151 The planned support on issues related to COVID-19 is expected to result in:

(a) Increased knowledge of Member States on challenges related to drugs and crime that may have the potential to slow down the COVID-19 recovery;

(b) Recovery policies and programmes which integrate drugs and crime issues.

### **Programme performance in 2020**

13.152 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

#### **Front-line law enforcement officers trained on correct use of personal protective equipment**

13.153 Based on the nature of law enforcement operations, the potential for front-line officers to be exposed to COVID-19 during the execution of their routine duties has increased significantly. The safety procedures, protocols and measures taken to protect officers from risk of exposure when handling dangerous or toxic substances can also protect them from exposure to communicable diseases such as COVID-19. In order to offer practical information and guidance to help protect front-line officers from risk of exposure and prevent the spread of COVID-19, while enabling them to carry out their operational duties, the subprogramme has adapted the content of its guidelines for the safe handling of substances and management of exposure risk for law enforcement and customs officers to produce a seven-part series of instructional videos on the appropriate use of, removal and decontamination of personal protective equipment. These videos cover topics from the correct use and removal of appropriate masks and gloves to complete chemical and particulate personal protective equipment ensembles. Personalized kits containing all the essential elements of this equipment have also been developed to be provided as part of training courses on safe handling to law enforcement, customs officers and forensic personnel to be delivered in person and using virtual reality technology. The video series was disseminated using social media and through a number of webinars and virtual meetings.

#### *Progress towards the attainment of the objective, and performance measure*

13.154 The above-mentioned work contributed to the objective, as demonstrated by 95,700 views of the video series on the correct use and removal of personal protective equipment (see figure 13.IX).

Figure 13.IX

**Performance measure: number of views of video series on correct use and removal of personal protective equipment**

### **Impact of COVID-19 on subprogramme delivery**

13.155 Owing to the impact of COVID-19 during 2020, the subprogramme postponed training activities planned for 2020 in the United Nations Narcotics Laboratory, but developed and delivered virtual training courses in forensics instead.

13.156 At the same time, however, the subprogramme identified new and modified activities and accelerated the implementation of planned activities to support Member States on issues related to the COVID-19 pandemic within the overall scope of its objectives, namely the production of dedicated briefs on the impact of COVID-19 on drugs, organized crime, trafficking in persons and smuggling of migrants. In addition, topics related to COVID-19 were included in the *World Drug Report 2020* and the *World Wildlife Crime Report 2020: Trafficking in Protected Species*. The subprogramme also developed a special module of the United Nations Toolkit on Synthetic Drugs focusing on the impact of the COVID-19 pandemic on the opioid crisis and global responses and a video series on the correct use and removal of various items of personal protective equipment. The deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

### **Planned results for 2022**

13.157 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: estimating the number of hidden victims of trafficking in persons<sup>25</sup>**

#### **Programme performance in 2020**

13.158 The subprogramme has continued to promote the multiple systems estimation methodology as a sound way for Member States to estimate human trafficking victimization and report on Sustainable Development Goal indicator 16.2.2. The subprogramme also started the elaboration of written guidance for countries that wish to undertake national studies to estimate the prevalence of trafficking in persons.

<sup>25</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 16)).

13.159 The above-mentioned work contributed to the initiation of studies to estimate the prevalence of trafficking in persons, including non-detected victims, by 13 countries, which did not meet the target of 15 countries reflected in the proposed programme budget for 2020. The planned 2020 target could not be met owing to travel restrictions related to COVID-19, preventing direct engagement with government counterparts and other stakeholders to build relationships of trust, which is crucial to studies that involve the collection and sharing of microdata on a particularly sensitive group of people, namely trafficking victims.

### **Proposed programme plan for 2022**

13.160 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to work with Member States, upon request, and initiate new studies to estimate the hidden victims of trafficking in persons, tailored to the situation in the given country. The expected progress is presented in the performance measure below (see figure 13.X).

Figure 13.X

**Performance measure: number of countries initiating studies to estimate the prevalence of trafficking in persons, including non-detected victims (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 2: countries more effectively respond to the threat posed by synthetic drugs<sup>26</sup>**

#### **Programme performance in 2020**

13.161 The subprogramme has developed three new specialized modules of the United Nations Toolkit on Synthetic Drugs, namely, postal security, access to medicines while preventing their diversion, and a special module focusing on the impact of COVID-19 on the opioid crisis and global responses. The subprogramme has also developed a dedicated website for the toolkit allowing Member States to access resources and facilitating their interaction with the guidance and tools provided.

<sup>26</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect. 16) and A/75/6 (Sect. 16)/Corr.1).

13.162 The above-mentioned work contributed to the strengthened response to synthetic drugs by 30 countries through accessing the toolkit, which exceeded the planned target of 15 countries reflected in the proposed programme budget for 2021.

### **Proposed programme plan for 2022**

13.163 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will target 45 additional countries and further develop three additional specialized toolkit modules to address the challenges of the complex drug markets involving the use of the Internet and the darknet, the use of cyberspace and cryptocurrencies, and the shipping of synthetic drugs using air cargo. The expected progress is presented in the performance measure below (see figure 13.XI).

Figure 13.XI

**Performance measure: expected annual growth in the number of countries strengthening their responses to synthetic drugs**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: more timely responses by Member States to drug trends and emerging issues through an expanded monitoring platform**

#### **Proposed programme plan for 2022**

13.164 For effective responses at the national, regional and global levels, countries need timely and relevant information on drug markets, which are rapidly evolving, expanding and becoming increasingly complex. Latest trends, such as the multifaceted global opioid crisis, the growing market for new psychoactive substances, the rapid rise in the non-medical use of pharmaceutical drugs and the impact of the COVID-19 pandemic on drug markets, demonstrate the need for rapid, evidence-based responses. To address this issue, the subprogramme has developed an online monitoring platform that uniquely collects real-time data on seizures of all types of drugs, building on and expanding the Drugs Monitoring Platform and complementing other existing monitoring systems, to increase timeliness, relevance, accessibility and usability of drug seizure data.

#### *Lessons learned and planned change*

13.165 The lesson for the subprogramme was that current monitoring systems could not provide timely data and evidence to capture the impact of phenomena such as COVID-19 on drugs and related crime and organized crime. In applying the lesson, the subprogramme will accelerate the development of the online monitoring platform

and integrate traditional data sources with innovative solutions based on big and smart data that build on new technologies and methodologies.

*Expected progress towards the attainment of the objective, and performance measure*

13.166 This work is expected to contribute to the objective, as demonstrated by an increased number of entities using the online monitoring platform, including ministries, national, regional and international agencies and specialized agencies and programmes, which will generate prompt and timely responses based on improved detection, processing and visualization of drug trafficking trends and threats (see figure 13.XII).

Figure 13.XII

**Performance measure: number of entities using the monitoring platform for timely information on drugs (cumulative)**

## Legislative mandates

13.167 The list below provides all mandates entrusted to the subprogramme.

### *Conventions*

Single Convention on Narcotic Drugs of 1961, as amended by the 1972 Protocol

United Nations Convention against Illicit Traffic in Narcotic Drugs and Psychotropic Substances of 1988

Convention on Psychotropic Substances of 1971

### *General Assembly resolutions*

834 (IX)	United Nations Narcotics Laboratory	56/119	Role, function, periodicity and duration of the United Nations congresses on the prevention of crime and the treatment of offenders
1395 (XIV)	Technical assistance in narcotics control		
45/179	Enhancement of the United Nations structure for drug abuse control	61/183; 69/201; 70/182	International cooperation against the world drug problem
46/152	Creation of an effective United Nations crime prevention and criminal justice programme	64/293	United Nations Global Plan of Action to Combat Trafficking in Persons
48/12	Measures to strengthen international cooperation against the illicit production, sale, demand, traffic and distribution of narcotic drugs and psychotropic substances and related activities	68/186	Strengthening crime prevention and criminal justice responses to protect cultural property, especially with regard to its trafficking
49/168; 52/92	International action to combat drug abuse and illicit production and trafficking	70/176	Taking action against gender-related killing of women and girls

72/197	Promoting the implementation of the United Nations Guiding Principles on Alternative Development and related commitments on alternative development and regional, interregional and international cooperation on development-oriented, balanced drug control policy addressing socioeconomic issues	75/196	Strengthening the United Nations crime prevention and criminal justice programme, in particular its technical cooperation capacity
73/343	Tackling illicit trafficking in wildlife	75/198	International cooperation to address and counter the world drug problem
75/158	Trafficking in women and girls	S-20/2	Political Declaration
		S-20/4 <sup>27</sup>	Measures to enhance international cooperation to counter the world drug problem
		S-30/1	Our joint commitment to effectively addressing and countering the world drug problem

### *Economic and Social Council resolutions*

1984/48	Crime prevention and criminal justice in the context of development	2011/36	Crime prevention and criminal justice responses against illicit trafficking in endangered species of wild fauna and flora
1988/9	International Conference on Drug Abuse and Illicit Trafficking	2012/19	Strengthening international cooperation in combating transnational organized crime in all its forms and manifestations
1988/13	Strengthening of cooperation and coordination in international drug control	2013/37; 2015/24	Improving the quality and availability of statistics on crime and criminal justice for policy development
1993/40	Measures to prevent the diversion of precursor and essential chemicals to the illicit manufacture of narcotic drugs and psychotropic substances	2013/40	Crime prevention and criminal justice responses to illicit trafficking in protected species of wild fauna and flora
1997/41	Implementation of comprehensive measures to counter the illicit manufacture, trafficking and abuse of amphetamine-type substances and their precursors	2013/41; 2015/23	Implementation of the United Nations Global Plan of Action to Combat Trafficking in Persons
2001/14	Prevention of diversion of precursors used in the illicit manufacture of synthetic drugs	2013/42	United Nations Guiding Principles on Alternative Development
2007/21	Information-gathering instrument in relation to United Nations standards and norms in crime prevention and criminal justice	2018/17	The rule of law, crime prevention and criminal justice in the context of the Sustainable Development Goals
2009/22	International cooperation in the prevention, investigation, prosecution and punishment of economic fraud and identity-related crime	2019/23	Combating transnational organized crime and its links to illicit trafficking in precious metals and illegal mining, including by enhancing the security of supply chains of precious metals
2009/25	Improving the collection, reporting and analysis of data to enhance knowledge of trends in specific areas of crime		

### *Commission on Crime Prevention and Criminal Justice resolutions*

19/5	International cooperation in the forensic field	21/3	Strengthening international cooperation to address the links that in some cases may exist between transnational organized criminal activities and terrorist activities
20/4	Promoting further cooperation in countering transnational organized crime		

### *Commission on Narcotic Drugs resolutions and decisions*

1 (XXXIII)	Cooperation in the strengthening of action against the illicit drug traffic through training in the African region	1 (XXXIX)	Scientific and technical cooperation in the control of drug abuse and illicit trafficking: development of drug profiling/signature analysis in support of a scientific approach to law enforcement
12 (XXXVIII)	Scientific and technical cooperation in the control of drug abuse and illicit trafficking	42/3	Monitoring and verification of illicit cultivation

<sup>27</sup> In particular the Action Plan against Illicit Manufacture, Trafficking and Abuse of Amphetamine-type Stimulants and Their Precursors contained therein.

44/14	Measures to promote the exchange of information on new patterns of drug use and on substances consumed	58/9	psychoactive substances and incidents involving such substances
47/5	Illicit drug profiling in international law enforcement: maximizing outcome and improving cooperation		Promoting the role of drug analysis laboratories worldwide and reaffirming the importance of the quality of the analysis and results of such laboratories
48/1	Promoting the sharing of information on emerging trends in the abuse of and trafficking in substances not controlled under the international drug control conventions	58/11	Promoting international cooperation in responding to new psychoactive substances and amphetamine-type stimulants, including methamphetamine
50/4	Improving the quality and performance of drug analysis laboratories	59/3	Promoting informal networking within the scientific community and the sharing of scientific evidence-based findings that may inform policies and practices to address the world drug problem
50/9	Use of drug characterization and chemical profiling in support of drug law enforcement intelligence-gathering and operational work, as well as trend analysis	59/8	Promotion of measures to target new psychoactive substances and amphetamine-type stimulants
52/7	Proposal concerning quality evaluation of the performance of drug analysis laboratories	60/4	Preventing and responding to the adverse health consequences and risks associated with the use of new psychoactive substances
53/7	International cooperation in countering the covert administration of psychoactive substances related to sexual assault and other criminal acts	61/3	Laboratory support for the implementation of the scheduling decisions of the Commission on Narcotic Drugs
53/11	Promoting the sharing of information on the potential abuse of and trafficking in synthetic cannabinoid receptor agonists	61/8	Enhancing and strengthening international and regional cooperation and domestic efforts to address the international threats posed by the non-medical use of synthetic opioids
54/3	Ensuring the availability of reference and test samples of controlled substances at drug testing laboratories for scientific purposes	61/9	Protecting children from the illicit drug challenge
54/6	Promoting adequate availability of internationally controlled narcotic drugs and psychotropic substances for medical and scientific purposes while preventing their diversion and abuse	62/2	Enhancing detection and identification capacity for synthetic drugs for non-medical use by increasing international collaboration
54/9	Improving quality and building monitoring capacity for the collection, reporting and analysis of data on the world drug problem and policy responses to it	62/4	Advancing effective and innovative approaches, through national, regional and international action, to address the multifaceted challenges posed by the non-medical use of synthetic drugs, particularly synthetic opioids
55/1	Promoting international cooperation in responding to the challenges posed by new psychoactive substances	63/1	Promoting efforts by Member States to address and counter the world drug problem, in particular supply reduction-related measures, through effective partnerships with private sector entities
55/2	Promoting programmes aimed at the treatment, rehabilitation and reintegration of drug-dependent persons released from prison settings	63/2	Promoting and improving the collection and analysis of reliable and comparable data to strengthen balanced, integrated, comprehensive, multidisciplinary and scientific evidence-based responses to the world drug problem
56/4	Enhancing international cooperation in the identification and reporting of new psychoactive substances		Promoting alternative development as a development-oriented drug control strategy
56/5	Promoting the sharing of expertise in and knowledge on forensic drug profiling	63/5	Strengthening the subsidiary bodies of the Commission on Narcotic Drugs
56/10	Tools to improve data collection to monitor and evaluate the implementation of the Political Declaration and Plan of Action on International Cooperation towards an Integrated and Balanced Strategy to Counter the World Drug Problem	Decision 60/1	Improved and streamlined annual report questionnaire
57/9	Enhancing international cooperation in the identification and reporting of new	Decision 63/15	

*Conference of the Parties to the United Nations Convention against Transnational Organized Crime*

5/4 Illicit manufacturing of and trafficking in firearms, their parts and components and ammunition

## Deliverables

13.168 Table 13.19 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 13.19

**Subprogramme 6: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>2</b>	<b>2</b>	<b>2</b>	<b>2</b>
1. Report to the Commission on Narcotic Drugs on world drug abuse	1	1	1	1
2. Report to the Commission on Crime Prevention and Criminal Justice on world crime trends	1	1	1	1
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>2</b>	<b>2</b>	<b>2</b>	<b>2</b>
3. Meetings of the Commission on Narcotic Drugs on world drug abuse	1	1	1	1
4. Meetings of the Commission on Crime Prevention and Criminal Justice on world crime trends	1	1	1	1
<b>B. Generation and transfer of knowledge</b>				
<b>Seminars, workshops and training events</b> (number of days)	<b>10</b>	<b>10</b>	<b>10</b>	<b>10</b>
5. Workshops/training courses on drug control, crime prevention and forensics	10	10	10	10
<b>Publications</b> (number of publications)	<b>10</b>	<b>10</b>	<b>10</b>	<b>10</b>
6. Research publications on drug control and crime prevention	5	5	5	5
7. Forensic publications on drug control and crime prevention	4	4	4	4
8. Journals on narcotics, and crime and society	1	1	1	1
<b>Technical materials</b> (number of materials)	<b>14</b>	<b>14</b>	<b>14</b>	<b>14</b>
9. Technical research materials on the monitoring of illicit drug crops	5	5	5	5
10. Technical forensic materials on drug control and crime prevention	9	9	9	9
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> consultation, advice and advocacy, advisory services, support and information to Governments, international, regional and national organizations, institutions and laboratories on drugs and crime statistics and on forensics.				
<b>Databases and substantive digital materials:</b> international statistics on crime, based on responses to the annual crime trend survey; international statistics on illicit drugs; online database of individual drug seizures (40,000 visits per year); and early warning advisory on new psychoactive substances (3,000 sessions per month, 30 news clips/alerts per year).				

## **Subprogramme 7**

### **Policy support**

#### **Objective**

13.169 The objective, to which this subprogramme contributes, is to advance institutional reform and strengthen policy and operational responses by Member States on drug control, crime prevention and criminal justice.

#### **Strategy**

13.170 To contribute to the objective, the subprogramme will provide assistance to headquarters and field-based offices related to supporting institutional reforms and ensuring policy coherence through strengthening policy dialogue and enhancing interdivisional coordination. The subprogramme will also provide assistance in the development of United Nations Sustainable Development Cooperation Frameworks, upon request. In addition, the subprogramme will continue to institutionalize a results-based management culture across UNODC by providing technical advice and capacity-building with a view to further strengthening transparency and accountability in UNODC interventions. Furthermore, the subprogramme will, as necessary, undertake policy analysis and coordinate with other United Nations agencies on emerging issues related to drugs, crime, corruption and terrorism.

13.171 The subprogramme will strengthen strategic engagement with Member States, regional entities and United Nations system and multilateral bodies in promoting the rule of law, security and justice under the framework of the 2030 Agenda and build the capacity of civil society, academia and the private sector to assist Member States in meeting their obligations. Furthermore, the subprogramme will conduct dialogues with donor Governments, Member States, international organizations and private sector entities to mobilize resources and carry out targeted advocacy and communication activities through the use of traditional and new media in substantive areas such as combating transnational organized crime, trafficking in drugs and corruption. This will help Member States to make progress towards Sustainable Development Goals 16 and 17.

13.172 The above-mentioned work is expected to result in increased awareness of and capacity by Member States to:

- (a) Address the interlinked issues of drugs, crime, corruption and terrorism at the global, regional, national and local levels, in partnership with United Nations country teams and through the relevant United Nations Sustainable Development Cooperation Frameworks that reflect UNODC mandates;
- (b) Implement mandated areas of the international normative framework that address cross-cutting systemic issues, such as corruption and economic crime;
- (c) Ensure that issues related to drugs, crime and terrorism are reflected within the broader national programmes for development.

#### **Programme performance in 2020**

13.173 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Timely and effective information for a better COVID-19 response

13.174 During 2020, the subprogramme focused on communicating support by UNODC in response to the COVID-19 pandemic. With an overarching emphasis on the importance of addressing the pandemic in specific pockets of vulnerability, the subprogramme created a dedicated webpage on the corporate UNODC website, as a one-stop shop for all information about UNODC activities and materials related to COVID-19. This included policy documents, technical guidance, social media content and opinion pieces on a wide range of issues under the UNODC mandate. This page has also been linked to the main United Nations COVID-19 website, making it easier for Member States and the broader public to access all relevant information with one click.

13.175 The subprogramme also conducted an online training course on recording short videos using easily available devices, such as smartphones, for UNODC staff both at headquarters in Vienna and in the field. Owing to social distancing measures and travel restrictions, the UNODC video production team was unable to record planned footage or in-person interviews with experts or beneficiaries. Besides mitigating the negative impact of the pandemic on UNODC video production, which forms an essential part of its communications in line with the Secretary-General's digital-first approach, the workshop also enabled UNODC staff from around the globe to contribute high-quality videos. Furthermore, the subprogramme organized press and other special events online and later in a hybrid format. One example was the first virtual music concert organized by UNODC on 30 July, the World Day against Trafficking in Persons, with 30 artists from around the globe performing to raise funds for the United Nations voluntary trust fund for victims of trafficking in persons, especially women and children.

#### *Progress towards the attainment of the objective, and performance measure*

13.176 The above-mentioned work contributed to the objective, as demonstrated by 65,751 views on the UNODC webpage dedicated to COVID-19 between 15 March and 31 December 2020 (see figure 13.XIII).

Figure 13.XIII

**Performance measure: number of views on the UNODC webpage dedicated to COVID-19, 15 March–31 December 2020**

#### **Impact of COVID-19 on subprogramme delivery**

13.177 Owing to the impact of COVID-19 during 2020, the subprogramme adapted its activities, for example by changing in-person training related to effective participation of civil society organizations to online training, resulting in an increase

in the number of training activities. Three training events related to results-based management and strategic planning and five training activities related to mainstreaming the Sustainable Development Goals into national plans were cancelled owing to COVID-19. In addition, the methodology for urban safety governance assessments had to be adapted to incorporate remote data collection methods. This change had an impact on the programme performance in 2020, as specified in result 2 below.

13.178 At the same time, however, the subprogramme identified new activities to support Member States on issues related to the COVID-19 pandemic, within the overall scope of its objectives, including adoption of a UNODC/United Nations Office at Vienna COVID-19 crisis communications strategy, establishment of a dedicated COVID-19 web page, as well as the organization of press and other special events online and later in a hybrid format with both online and in-person participation. The new deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

## **Planned results for 2022**

13.179 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: whole-of-government approaches to safer, more inclusive and more resilient societies<sup>28</sup>**

#### **Programme performance in 2020**

13.180 The subprogramme has supported the Regional Office for Central Asia in coordinating and providing support for the Government of Uzbekistan on taking an integrated and systems approach to addressing the interlinked problems of drugs, crime, corruption and terrorism. This was done by supporting participation in policy dialogue, providing advisory services to key interlocutors and engaging with senior counterparts in relevant parts of the Government.

13.181 The above-mentioned work contributed to policy level buy-in secured for a holistic urban safety governance model to address issues related to drugs, crime, corruption, organized crime and terrorism, which partly met the planned target of cities adopting cross-sectoral and coherent whole-of-government policies and plans to address issues related to drugs, crime, corruption, organized crime and violent extremism<sup>29</sup> reflected in the proposed programme budget for 2020.

#### **Proposed programme plan for 2022**

13.182 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective and in response to recent developments, the subprogramme's work will evolve to include providing technical expertise in the development of a new regional programme for Central Asia. The expected progress is presented in the updated performance measure below (see table 13.20).

<sup>28</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 16)).

<sup>29</sup> The term "violent extremism" refers to violent extremism as and when conducive to terrorism (see General Assembly resolutions 71/209 and 72/194).

Table 13.20  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Cities have limited capacity to develop cross-sectoral and coherent whole-of-government policies and plans to address issues related to drugs, crime, corruption, organized crime and violent extremism	Cities have enhanced capacities to develop cross-sectoral and coherent whole-of-government policies and plans to address issues related to drugs, crime, corruption, organized crime and violent extremism	Policy level buy-in secured for a holistic urban safety governance model to address issues related to drugs, crime, corruption, organized crime and terrorism	Cities begin implementation of cross-sectoral and coherent whole-of-government policies and plans to address issues related to drugs, crime, corruption, organized crime and violent extremism and monitor progress to ensure ongoing adaptability to changes in local conditions	Cities continue implementation of cross-sectoral and coherent whole-of-government policies and plans to address issues related to drugs, crime, corruption, organized crime and violent extremism and monitor progress to ensure ongoing adaptability to changes in local conditions

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: urban safety governance – local governments adopt integrated and inclusive policies for safer urban areas<sup>30</sup>

### Programme performance in 2020

13.183 The subprogramme has been working on an urban safety governance initiative. This initiative is premised on an approach which recognizes that challenges to urban safety emerge from a complex interaction of risk factors at the local, national and global levels. The safety governance approach provides policymakers with a more inclusive framework within which to address the intersection of global threats and local dynamics in order to mitigate risk factors for urban safety, including by strengthening legitimate governance, reducing inequality and promoting inclusion and individual and community resilience. As part of its field project on urban safety governance, the subprogramme developed the urban safety governance assessment tool, a hands-on guide that offers general and practical guidance on conducting such assessments in urban areas. Furthermore, on the basis of this guidance tool, the subprogramme conducted urban safety governance assessments in cities in Central Asia, Latin America and East Africa.

13.184 The above-mentioned work contributed to no cities adopting integrated and inclusive approaches to enhance urban safety governance, which did not meet the planned target of three cities adopting integrated and inclusive approaches to enhance urban safety governance reflected in the proposed programme budget for 2021. Owing to lockdown measures imposed in response to COVID-19, research teams' capability to collect data from concerned communities was affected, resulting in delays. Research teams adapted their methodology to enable remote collection of data to conduct the urban safety governance assessments. However, as a result of the delays

<sup>30</sup> As reflected in the proposed programme budget for 2021 ([A/75/6 \(Sect. 16\)](#) and [A/75/6 \(Sect. 16\)/Corr.1](#)).

experienced, the development and adoption of integrated and inclusive approaches to address the identified challenges will take place in 2021 and 2022.

#### **Proposed programme plan for 2022**

13.185 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will expand this approach to an additional three cities for a total of six in 2022. The expected progress is presented in the performance measure below (see figure 13.XIV).

Figure 13.XIV

**Performance measure: total number of cities adopting integrated and inclusive approaches to enhance urban safety governance (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023. The current estimate for 2021 is three cities adopting integrated and inclusive approaches to enhance urban safety governance.

### **Result 3: increased stakeholder engagement in the implementation of the United Nations Convention against Transnational Organized Crime**

#### **Proposed programme plan for 2022**

13.186 With the signing of the United Nations Convention against Transnational Organized Crime and the Protocols thereto, the international community demonstrated its political will to address a global challenge with a global response. Successful implementation of the Convention requires a multi-stakeholder approach that not only brings together actors from the government but also draws on experience and expertise from civil society, academia and the private sector. The engagement of these stakeholders in constructive dialogues, as part of the Mechanism for the Review of the Implementation of the United Nations Convention against Transnational Organized Crime and the Protocols thereto, will allow them to share independent views on the review process and will ensure communication between Member States and other stakeholders, in line with resolution 9/1 adopted by the Conference of the Parties to the Convention in 2018. The subprogramme has been enhancing the capacities of stakeholders from civil society, academia and the private sector to implement the Convention and its Review Mechanism by facilitating networks for collaboration and coordination and fostering dialogue between non-governmental stakeholders and national authorities.

### *Lessons learned and planned change*

13.187 The lesson for the subprogramme was that without having a platform for constructive dialogue, non-governmental stakeholders and Member States will not be able to engage as effectively in the review process for the Convention. In applying the lesson, the subprogramme will build on the outcomes of capacity-building activities, including region-specific recommendations, to foster policy dialogue and strengthen stakeholder networks to counter transnational organized crime at a local level. Through the inclusive, multi-stakeholder approach, the subprogramme will enable Member States to have well-equipped and informed partners to engage with in the implementation of the Convention, thereby strengthening policy on and operational responses to transnational organized crime.

### *Expected progress towards the attainment of the objective, and performance measure*

13.188 This work is expected to contribute to the objective, as demonstrated by the number of countries volunteering to host dialogues on organized crime between non-governmental stakeholders and national authorities (see figure 13.XV).

Figure 13.XV

**Performance measure: number of countries volunteering to host dialogues on organized crime between non-governmental stakeholders and national authorities (cumulative)**

### **Legislative mandates**

13.189 The list below provides all mandates entrusted to the subprogramme.

#### *General Assembly resolutions*

51/59	Action against corruption	68/193; 69/197	Strengthening the United Nations crime prevention and criminal justice programme, in particular its technical cooperation capacity
65/1	Keeping the promise: united to achieve the Millennium Development Goals		
65/227	Realignment of the functions of the United Nations Office on Drugs and Crime and changes to the strategic framework	69/195	Rule of law, crime prevention and criminal justice in the United Nations development agenda beyond 2015
66/180	Strengthening crime prevention and criminal justice responses to protect cultural property, especially with regard to its trafficking	70/181	Special session of the General Assembly on the world drug problem to be held in 2016
68/178	Protection of human rights and fundamental freedoms while countering terrorism	70/182	International cooperation against the world drug problem
68/188	The rule of law, crime prevention and criminal justice in the United Nations development agenda beyond 2015	71/243	Quadrennial comprehensive policy review of operational activities for development of the United Nations system
		71/256	New Urban Agenda

72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system	74/177	Strengthening the United Nations crime prevention and criminal justice programme, in particular its technical cooperation capacity
		Decision 74/550 B	Fourteenth United Nations Congress on Crime Prevention and Criminal Justice

*Economic and Social Council resolutions and decisions*

1999/30	Review of the United Nations International Drug Control Programme: strengthening the United Nations machinery for international drug control within the scope of the existing international drug control treaties and in accordance with the basic principles of the Charter of the United Nations	2014/22	Thirteenth United Nations Congress on Crime Prevention and Criminal Justice and the post-2015 development agenda
		2015/24	Improving the quality and availability of statistics on crime and criminal justice for policy development
2007/23	Supporting national efforts for child justice reform, in particular through technical assistance and improved United Nations system-wide coordination	Decisions 2013/246; 2015/234; 2017/236	Improving the governance and financial situation of the United Nations Office on Drugs and Crime: extension of the mandate of the standing open-ended intergovernmental working group on improving the governance and financial situation of the United Nations Office on Drugs and Crime
2009/23	Support for the development and implementation of the regional programmes of the United Nations Office on Drugs and Crime		
2010/20; 2011/34	Support for the development and implementation of an integrated approach to programme development at the United Nations Office on Drugs and Crime		

*Commission on Crime Prevention and Criminal Justice resolutions*

20/9	Improving the governance and financial situation of the United Nations Office on Drugs and Crime: work of the standing open-ended intergovernmental working group on improving the governance and financial situation of the United Nations Office on Drugs and Crime on evaluation and oversight	22/2; 24/1	Improving the governance and financial situation of the United Nations Office on Drugs and Crime: recommendations of the standing open-ended intergovernmental working group on improving the governance and financial situation of the United Nations Office on Drugs and Crime
------	---	------------	--

*Commission on Narcotic Drugs resolutions*

51/14	Promoting coordination and alignment of decisions between the Commission on Narcotic Drugs and the Programme Coordinating Board of the Joint United Nations Programme on HIV/AIDS	57/5	Special session of the General Assembly on the world drug problem to be held in 2016
		58/1; 60/3	Improving the governance and financial situation of the United Nations Office on Drugs and Crime: recommendations of the standing open-ended intergovernmental working group on improving the governance and financial situation of the United Nations Office on Drugs and Crime
53/16	Streamlining of the annual report questionnaire		
54/11	Improving the participatory role of civil society in addressing the world drug problem		
54/17	Improving the governance and financial situation of the United Nations Office on Drugs and Crime: work of the standing open-ended intergovernmental working group on improving the governance and financial situation of the United Nations Office on Drugs and Crime on evaluation and oversight	59/5	Mainstreaming a gender perspective in drug related policies and programmes
		60/6	Intensifying coordination and cooperation among United Nations entities and relevant domestic sectors, including the health, education and criminal justice sectors, to address and counter the world drug problem

*Conference of the Parties to the United Nations Convention against Transnational Organized Crime*

9/1	Establishment of the Mechanism for the Review of the Implementation of the United Nations		Convention against Transnational Organized Crime and the Protocols thereto
-----	---	--	--

*Conference of the States Parties to the United Nations Convention against Corruption*

4/6	Non-governmental organizations and the Mechanism for the Review of the Implementation of the United Nations Convention against Corruption	5/6	Private sector
-----	---	-----	----------------

## Deliverables

13.190 Table 13.21 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 13.21

**Subprogramme 7: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>5</b>	<b>5</b>	<b>5</b>	<b>5</b>
1. Field and technical cooperation project related to results-based management and strategic planning	1	1	1	1
2. Field and technical cooperation project related to advocacy and global communications	1	1	1	1
3. Field and technical cooperation project related to civil society partnerships	1	1	1	1
4. Field and technical cooperation project related to urban safety governance	1	1	1	1
5. Project managing the United Nations voluntary trust fund for victims of trafficking in persons, especially women and children	1	1	1	1
<b>Seminars, workshops and training events</b> (number of days)	<b>30</b>	<b>34</b>	<b>33</b>	<b>35</b>
6. Training events on effective participation of civil society organizations in issues under the UNODC mandate, including combating drugs, crime and corruption	15	27	18	30
7. Training events on mainstreaming the Sustainable Development Goals into national plans	5	–	5	0
8. Training events on results-based management and strategic planning	10	7	10	5
<b>Publications</b> (number of publications)	<b>2</b>	<b>2</b>	<b>2</b>	<b>2</b>
9. Publications related to the effective participation of civil society organizations in issues under the UNODC mandate, including combating drugs, crime and corruption	1	1	1	1
10. Publications related to results-based management and mainstreaming the 2030 Agenda	1	1	1	1
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> campaigns to observe the International Day against Drug Abuse and Illicit Trafficking, the World Day against Trafficking in Persons and the International Anti-Corruption Day reaching approximately 737 million people across the world; promotional materials on UNODC mandate areas, including on the Commission on Narcotic Drugs and the Commission on Crime Prevention and Criminal Justice; and fundraising initiatives and strategic partnerships with international financial institutions, international organizations and the private sector.				
<b>External and media relations:</b> press events; and development of new fundraising initiatives and strategic partnerships with international financial institutions, international organizations and the private sector in support of the United Nations voluntary trust fund for victims of trafficking in persons, especially women and children.				
<b>Digital platforms and multimedia content:</b> design, maintenance and update of the UNODC website and social media channels reaching around 6.3 million people monthly; and social media packages, including audiovisual and text content.				

## **Subprogramme 8**

### **Technical cooperation and field support**

#### **Objective**

13.191 The objective, to which this subprogramme contributes, is to strengthen Member State-owned programmes countering drugs, crime and terrorism.

#### **Strategy**

13.192 To contribute to the objective, the subprogramme will continue to provide policy advice, strategic guidance and coordination to all UNODC field offices for the development and implementation of integrated operational programmes and ensure their full implementation, notably through synergies with other areas of work in UNODC. The subprogramme will ensure operational accountability and programmatic efficiency, including by engaging in the development of business operational strategies and common back offices, monitoring risks and ensuring the inclusion of effective results-based management in the planning, monitoring and reporting of all UNODC field presences. UNODC field offices will provide support, according to their mandates and at the request of interested Member States, and ensure the inclusion of governance, security and preventing and countering drugs, crime and terrorism with a human rights perspective in the implementation of joint United Nations programmes.

13.193 Building on the normative and technical assistance mandates of the Office, the subprogramme also plans to support the development of regional strategies and operational programmes promoting the joint pursuit of justice, public security and development through policy dialogue and coordination, as well as serving as a common platform for joint efforts with United Nations partners, international financial institutions, other multilateral bodies and civil society. In addition, the subprogramme will support the establishment of South-South cooperation and promote interregional cooperation among partner countries designed to foster full ownership by regional entities. Furthermore, the subprogramme will enhance international support for implementing effective and targeted capacity-building in developing countries to support national plans to implement all the Sustainable Development Goals, including through North-South, South-South and triangular cooperation.

13.194 The subprogramme plans to support Member States on issues related to COVID-19 by engaging, especially at the field level, in the implementation of socioeconomic responses plans, the Global Humanitarian Response Plan for COVID-19 and the strategic preparedness and response plans in close coordination with the lead entities (WHO, the Office for the Coordination of Humanitarian Affairs of the Secretariat, the Development Coordination Office and UNDP) and the respective United Nations country teams. In particular, UNODC is expected to contribute to different extents in supporting the five pillars of the socioeconomic response plans, in some countries taking the lead or co-lead role in outcomes related to health, protecting people, social cohesion and community resilience. This will be achieved through hybrid meetings and training that combine in-person participation of local experts with support offered by international experts, as well as through the development or adaptation of e-learning modules.

13.195 The above-mentioned work is expected to result in:

(a) Improved UNODC support to Member States through a field offices network that is fit for purpose to achieve results and impact on the ground;

(b) UNODC field presences that are fully aligned with the United Nations development system reform and are able to effectively deliver capacity-building to counter drugs, crime and terrorism;

(c) Selected countries receiving tailored programmes in particular in priority areas for UNODC mandates, to support relevant Sustainable Development Goals and the security and human rights agendas;

(d) Renewed cooperation and coherence with offices of the United Nations resident coordinators and regional Development Coordination Office desks within both development system and business operations reforms which enhance the efficiency of UNODC support to Member States.

13.196 The planned support on issues related to COVID-19 is expected to result in increased technical, normative and analytical capacity of Member States, through alternative methods of delivery.

### **Programme performance in 2020**

13.197 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

#### **Containment of the impact of COVID-19 in different settings**

13.198 The COVID-19 pandemic presented a number of challenges related to its traditional technical assistance delivery approach, which usually has relied on in-person delivery of workshops and meetings. Despite this, many UNODC regional and country offices, in cooperation with various teams in headquarters and in coordination with respective United Nations country teams, successfully adopted new innovative approaches in technical assistance delivery. The subprogramme devised an “easy implementation guide” based on the experiences gathered from UNODC field presences, providing field offices and global programmes with concrete, coherent and tested options to continue to implement technical assistance. The modalities of implementation were divided into two categories: (a) interventions related to COVID-19; and (b) continuing implementation in the COVID-19 context.

13.199 The subprogramme, in coordination with field offices, responded to several requests from Member States to translate new priorities and policy guidance into technical assistance on the ground. In particular, the subprogramme devised actions to operationalize the Office’s rapid response, including through the urgent procurement and supply of personal protective equipment and medical supplies to meet the needs of Member States. The target beneficiaries included prisoners, people who use drugs, potential victims of human trafficking, law enforcement offices (police, wildlife units, port authorities, airport authorities, forensic authorities and maritime crime law officials), social workers, volunteers, frontline health workers and other staff in drug treatment centres. The Office’s rapid response was also operationalized through online training and capacity-building programmes; tailored research and policy analysis; development, adaptation and provision of information, education and communication materials; and mentoring, advice and technical support, including through expanding partnerships with civil society and local actors to maintain the support and delivery of regular services (in line with the Secretary General’s Global Humanitarian Response Plan for COVID-19). For countries where the information and communications technology (ICT) infrastructure did not allow for a wide use of ICT-enabled implementation modalities, UNODC supported stakeholders with the establishment of specialized training centres offering computer-based training and e-learning resources. In some countries, UNODC established new approaches for partnerships, leading to an adaptation of the delivery model, which

contributed to the interdivisional development of a reformed partnership framework that is more agile and efficient so as to allow UNODC to work with partners to better provide support to beneficiaries. Furthermore, the subprogramme spearheaded internal work streams driven by an effectiveness agenda aimed at empowering field colleagues to fully exploit the delegation of authority, engage with external partners and engage with and contribute to various United Nations reform efforts.

*Progress towards the attainment of the objective, and performance measure*

13.200 The above-mentioned work contributed to the objective, as demonstrated by the containment of the impact of the COVID-19 pandemic in several instances, including prison settings, border posts, ports and drug rehabilitation centres as well as in social care, school and other settings; at least 1,000 frontline health workers being trained on safe service delivery to vulnerable persons; and enhanced capacities of professionals in health and criminal justice systems on issues related to COVID-19 (see table 13.22).

Table 13.22

**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
—	—	Containment of emergency situations created by COVID-19 in several instances, including prison settings, border posts, ports and drug rehabilitation centres, as well as in social care, school and other settings
		At least 1,000 frontline health workers trained on safe service delivery to vulnerable persons
		Enhanced capacities of professionals in health and criminal justice systems on issues related to COVID-19

**Impact of COVID-19 on subprogramme delivery**

13.201 Owing to the impact of COVID-19 during 2020 and the need for extensive consultations with Member States in programme development, the number of regional programmes went down to 15. Programme development is anticipated to return to its normal course of delivery in 2022.

13.202 At the same time, the subprogramme identified new and modified activities to support Member States on COVID-19-related issues, within the overall scope of its objectives, through support to field offices to adjust programmatically and operationally in order to rapidly respond to Member States' needs, in coordination with respective United Nations country teams, including through tailored research and policy analysis; provision of information, education and communication materials; procurement and supply of personal protective equipment, medical support and other needs; and mentoring, advice and technical support. The subprogramme was instrumental, particularly through its field office network and presence, in the scale-up of capacity-building programmes, including by deploying hybrid forms of training with local expertise participating in person and international experts

contributing virtually. In addition, through field support, the subprogramme supported 49 Member States in the development of their inter-agency action plans and socioeconomic response plans through the respective United Nations country teams. The new and modified deliverables contributed to results in 2020, as specified in the emerging result above.

## **Planned results for 2022**

13.203 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: switching from opium to coffee in Myanmar<sup>31</sup>**

#### **Programme performance in 2020**

13.204 The subprogramme has made significant progress towards enabling farmers to move away from opium poppy cultivation by supporting the Green Gold coffee cooperative, which was established in 2015 and has over 1,000 coffee growers, to further increase the quality and output of exportable coffee and successfully transition to organic cultivation, thus enhancing the income for participating farmers. The subprogramme also supported Green Gold to obtain equipment and expertise to address specific challenges in coffee cultivation, contributing to enhanced sustainability as farmers are increasingly able to resolve quality issues without UNODC or other external support. Furthermore, the subprogramme continued to work with approximately 2,000 farmers and reached the milestone of almost 2,000 hectares in areas managed by local communities as “community forests”. The subprogramme protected against the expansion of opium poppy cultivation and trained local communities in the management of wood and non-wood forest resources, measures that protect against deforestation and forest degradation and water conservation to limit the expansion of opium poppy cultivation in natural forest areas.

13.205 The above-mentioned work contributed to Green Gold moving to organic cultivation, taking steps towards formal organic certification and becoming the largest producer of coffee in Myanmar, which partially met the planned target for Green Gold to obtain organic certification and become the largest producer of coffee in Myanmar reflected in the proposed programme budget for 2020. Green Gold in 2020 was indeed the largest producer of coffee in Myanmar in terms of contributing farmers and was among the largest producers in terms of output. However, while the cooperative has managed to move to full organic production as anticipated in the programme budget, actual confirmation of the certification will be obtained only after three years of maintaining relevant standards in cultivation.

#### **Proposed programme plan for 2022**

13.206 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme plans to continue to support Green Gold in further expanding output and market access while maintaining organic cultivation standards, which will eventually allow full formal organic certification. At the same time, the subprogramme plans to enhance farmers’ access to additional value chains (such as tea, avocados and honey) to ensure inclusiveness for the entire community, including women and those without access to land; to enhance sustainability of the switch to

<sup>31</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 16)).

coffee by reducing incentives to plant opium poppy as a side crop; and to further consolidate the dynamics of the emerging licit economy in the project area. The expected progress is presented in the performance measure below (see table 13.23).

Table 13.23

**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
First container of Green Gold coffee shipped from Myanmar (October 2018)	Fair trade certification for Green Gold obtained	Green Gold moved to organic cultivation, took steps towards formal organic certification and became the largest producer of coffee in Myanmar	Green Gold exports seven containers of coffee under fair trade conditions  Green Gold has its own processing facility	Green Gold obtains full formal organic certification  Farmers in the project area can rely on additional value chains (e.g., tea, avocados and honey) for enhanced inclusiveness and sustainability

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: improved regional security through strategic expertise and integrated programming in Mozambique<sup>32</sup>**

### **Programme performance in 2020**

13.207 In line with the Maputo strategic road map against transnational organized crime, drugs and terrorism, which was formally approved by the Government of Mozambique in June 2020, the subprogramme engaged with relevant authorities of Mozambique to improve regional security as a whole through targeted technical cooperation. UNODC promoted regional cooperation by implementing a virtual trilateral planning cell to allow for information-sharing and operational coordination to counter heroin trafficking between Mozambique, South Africa and the United Republic of Tanzania and held a virtual round table for the western Indian Ocean region on security against maritime terrorist attacks to help address this emerging threat in northern Mozambique. The subprogramme is also contributing to the establishment of multi-agency units to enhance the interdiction of illicit trafficking activities through containerized cargo and airfreight. Two units, one at the port of Maputo and one at the cargo area of Maputo International Airport, were completed by the end of 2020. The subprogramme also deployed staff in a surge capacity, which ensured that the country's needs and the regional emerging threats were adequately reflected in defining the key priorities for the subregion, including in the work programme of the United Nations country team.

13.208 The above-mentioned work contributed to the adoption of the Maputo road map, the establishment of the regional trilateral maritime crime planning cell with South Africa and the United Republic of Tanzania, the establishment of a port control unit at a first seaport and airport cargo area and an increase in seizures at ports, airports and land borders. The subprogramme did not fully meet the targets of the establishment of the joint airport interdiction task force in Maputo, the establishment of transnational crime units and the improvement of laboratories to increase forensic

<sup>32</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect.16) and A/75/6 (Sect.16)/Corr.1).

evidence for criminal cases. The national election in December 2019 and delays in forming the new Government, together with the COVID-19 pandemic, significantly delayed implementation plans, which will lead to some performance measures being shifted to 2021 and 2022.

### Proposed programme plan for 2022

13.209 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will ensure that delayed objectives are met and relevant initiatives are supported and will strengthen cooperation on issues related to terrorism. The expected progress is presented in the performance measure below (see table 13.24).

Table 13.24  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Low rates of seizures of illicit drugs, wildlife and forest products and firearms	Opening of the UNODC office in Mozambique	Adoption of the Maputo road map	Increased law enforcement joint operations	Increased number of training and study visits to strengthen cooperation with neighbouring Member States on issues related to terrorism
High rates of drug abuse	Strategic dialogue leading to new United Nations Sustainable Development Cooperation Framework, including key deliverables under relevant Sustainable Development Goals, including Goals 3, 16 and 17	Regional trilateral maritime crime planning cell established with South Africa and the United Republic of Tanzania	Port control unit established at a second seaport	Increased number of adjudications of criminal cases facilitated through improved laboratories and use of scientific evidence
High HIV/AIDS prevalence rates		Port control unit established at a first seaport and airport cargo area	Decrease or stability in rates of drug abuse and HIV/AIDS prevalence	Joint airport interdiction task force established and operational at Maputo International Airport
		Increase in seizures at ports, airports and land borders	Increase in the proportion of seized small arms and light weapons, as well as other items	Establishment of transnational crime units
			Successful investigation and prosecution of cases of money-laundering and increase in assets being recovered	
			Wildlife and forest areas being restored in key parts of the country	
			Mentorship programmes and training curricula integrated in relevant training institutes	

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: regional strategic vision for Latin America and the Caribbean to address crime, drugs and terrorism threats**

#### **Proposed programme plan for 2022**

13.210 The UNODC dialogue with and presence in Latin America has gradually evolved in the past 15 years, partially reflecting the evolution of the region in political, economic and social terms. Latin American Member States are playing a prominent role in shaping the multilateral response in areas that fall under the UNODC mandate. Similarly, Latin American Member States have substantially increased their ownership of and engagement in technical cooperation initiatives in their countries. The subprogramme has progressively adapted to the evolving and challenging environment by reshaping its presence and portfolio, including by promoting regional cooperation through centres of excellence, advocacy initiatives, research and analysis.

#### *Lessons learned and planned change*

13.211 The lesson for the subprogramme was that it needed to mainstream its position within the new United Nations development system architecture, including at the country level and through targeted engagement with the regional commissions to fulfil its mandate in the context of the 2030 Agenda. In applying the lesson, the subprogramme will develop a strategic vision for UNODC assistance to Member States in the region. It will identify strategic goals and its core expertise and will undertake a detailed analysis of needs, relevant stakeholders and the most effective pathways for intervention that will result in a tangible impact. In doing so, the subprogramme will engage Member States and relevant partners at the national level, including resident coordinators, as well as the Regional United Nations Sustainable Development Group for Latin America and the Caribbean, the Economic Commission for Latin American and the Caribbean, the Department of Political and Peacebuilding Affairs of the Secretariat, academia and civil society, in the development of the strategy through an inclusive and open process. The regional vision will further consolidate the support provided to Member States and solidify the increasing coordination and collaboration with and among Member States.

#### *Expected progress towards the attainment of the objective, and performance measure*

13.212 This work is expected to contribute to the objective, as demonstrated by eight joint initiatives and programmes launched through the Multi-Partner Trust Fund Office in Latin America (see figure 13.XVI).

Figure 13.XVI

**Performance measure: total number of joint initiatives and programmes launched through the Multi-Partner Trust Fund Office in Latin America (cumulative)**

## Legislative mandates

13.213 The list below provides all mandates entrusted to the subprogramme.

### *General Assembly resolutions*

65/227	Realignment of the functions of the United Nations Office on Drugs and Crime and changes to the strategic framework	74/301	New Partnership for Africa's Development: progress in implementation and international support
72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system	74/302	Implementation of the recommendations contained in the report of the Secretary-General on the causes of conflict and the promotion of durable peace and sustainable development in Africa
74/238	Operational activities for development of the United Nations system	74/307	United response against global health threats: combating COVID-19
74/253	Enhancing accessibility for persons with disabilities to conferences and meetings of the United Nations system		

### *Economic and Social Council resolutions*

2011/34	Support for the development and implementation of an integrated approach to programme development at the United Nations Office on Drugs and Crime
---------	---

### *Commission on Narcotic Drugs resolutions*

52/10	Strengthening interregional cooperation among the States of Latin America and the Caribbean and the States of West Africa in combating drug trafficking	54/7 55/9	Paris Pact initiative Follow-up on measures to support African States in their efforts to combat the world drug problem
52/13	Improving the governance and financial situation of the United Nations Office on Drugs and Crime		

## Deliverables

13.214 Table 13.25 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 13.25

### **Subprogramme 8: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>22</b>	<b>15</b>	<b>18</b>	<b>20</b>
Technical cooperation and field support for regional and country programmes	22	15	18	20
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> consultations with Member States and partners on UNODC strategic and programme priorities, new programme initiatives and options, including partnerships; strategic and operational field support and substantive oversight services; and advisory services for 80 Member States and stakeholders on policies, strategies and cooperation frameworks in UNODC-mandated areas.				

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>E. Enabling deliverables</b>				
<b>Safety and security:</b> safety and security services to 105 physical field office locations.				

## Subprogramme 9

### **Component 1: provision of secretariat services and substantive support to the Commission on Narcotic Drugs, the Commission on Crime Prevention and Criminal Justice and the United Nations congresses on crime prevention and criminal justice**

#### **Objective**

13.215 The objective, to which component 1 of this subprogramme contributes, is to ensure the effective and efficient functioning of the United Nations intergovernmental bodies dealing with issues relating to drugs, crime and terrorism, as well as the effective and efficient functioning of the standing open-ended intergovernmental working group on improving the governance and financial situation of UNODC and of the United Nations congresses on crime prevention and criminal justice in fulfilling their advisory roles.

#### **Strategy**

13.216 To contribute to the objective, the component will continue to support the Commission on Narcotic Drugs and its five subsidiary bodies (the Subcommission on Illicit Drug Traffic and Related Matters in the Near and Middle East and the regional meetings of heads of national drug law enforcement agencies) through the provision of substantive and organizational services. The component will continue to provide substantive and technical support to the Commission on Crime Prevention and Criminal Justice and to the United Nations congresses on crime prevention and criminal justice, including the follow-up to the Fourteenth Crime Congress and the implementation of the provisions of its outcome document. In addition, the component will continue to provide support to the standing open-ended intergovernmental working group on improving the governance and financial situation of UNODC through facilitating the preparations for and the organization of the formal and informal meetings of the working group. This work will help Member States to make progress towards Sustainable Development Goals 3, 5, 8, 10, 11, 16 and 17.

13.217 The component plans to support Member States on issues related to COVID-19 by organizing meetings on the impact of COVID-19 on matters related to drugs and crime in the framework of the Commissions and subsidiary bodies, as well as on the work of UNODC within the open-ended intergovernmental working group. The organization of future meetings is foreseen to be increasingly in a hybrid format, containing both in-person and online components.

13.218 The above-mentioned work is expected to result in:

- (a) Enhanced cooperation among Member States in accelerating the implementation of international drug policy commitments made over the past decade;
- (b) Enhanced cooperation among Member States in the implementation of comprehensive strategies for crime prevention towards social and economic

development and integrated approaches to challenges faced by criminal justice systems;

(c) Enhanced understanding of Member States of governance and financial matters relating to UNODC.

13.219 The planned support on issues related to COVID-19 is expected to result in increased knowledge of the impact of COVID-19 on matters related to drugs and crime and in turn enhanced capacity of Member States to address related challenges.

## Programme performance in 2020

13.220 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Digital transformation: accelerated remote participation of Member States in intergovernmental meetings

13.221 Remote participation has enhanced the interactive discussions in the framework of the Vienna-based Commissions in recent years, through the use of video messages, videoconferencing systems and webcasting of meetings. With the emergence of COVID-19, the component has fully embraced the necessity to enhance the possibility for delegations to participate in online meetings in an interactive manner, by emulating in-person participation when such participation is not possible and complementing it to support comprehensive representation. Despite liquidity constraints, the component led the development of online and hybrid meeting formats for the intergovernmental meetings serviced by UNODC.

13.222 The component also developed instructions for meeting participants and organizers, tested remote interpretation software and provided support to remote participants to enable their participation. Furthermore, the component also substantively and organizationally serviced online and hybrid intersessional meetings of the Commission on Narcotic Drugs and scaled-down meetings of its subsidiary bodies and intersessional meetings of the Commission on Crime Prevention and Criminal Justice and of the standing open-ended intergovernmental working group.

#### *Progress towards the attainment of the objective, and performance measure*

13.223 The above-mentioned work contributed to the objective, as demonstrated by 15 intergovernmental meetings with remote participation of participants from around the world conducted (see table 13.26).

Table 13.26  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
—	—	15 intergovernmental meetings conducted with remote participation from around the world

### Impact of COVID-19 on component delivery

13.224 Owing to the impact of COVID-19 during 2020, the component postponed the Fourteenth Congress on Crime Prevention and Criminal Justice from April 2020 to

March 2021. This change had an impact on the programme performance in 2020, as specified under result 1 below.

13.225 In addition, the meetings of the Commission on Narcotic Drugs and its subsidiary bodies, the Commission on Crime Prevention and Criminal Justice, the crime congresses and the open-ended intergovernmental working group were modified to online or hybrid formats. In line with safety measures related to COVID-19, the twenty-ninth session of the Commission on Crime Prevention and Criminal Justice, scheduled for May 2020, was postponed and scaled down to take place in December 2020 in a hybrid format. The meetings of the subsidiary bodies of the Commission on Narcotic Drugs were reconfigured to scaled-down, extraordinary online meetings in October. The topical meetings of the Commission on the scheduling of cannabis in August, September and October 2020 were modified with remote interpretation in a hybrid format. In addition, the thematic discussions of the Commission on drug demand reduction took place in October in a hybrid format. Intersessional meetings and meetings of the Extended Bureaux of the Commissions and formal and informal meetings of the open-ended intergovernmental working group, as well as the negotiations on the outcome declaration of the Fourteenth Crime Congress, were held in online and hybrid formats. The component organized and serviced the meetings, which enabled the engagement of experts from around the world in interactive discussions. This contributed to results in 2020, as specified in the emerging result for 2020 above.

13.226 At the same time, however, the component identified new and modified activities to support Member States on issues related to the COVID-19 pandemic, within the overall scope of its objectives, namely by organizing meetings with a substantive focus on the impact of COVID-19. Two dedicated briefings were organized in the framework of the open-ended intergovernmental working group, enabling a substantive discussion between Member States and UNODC on the impact of the COVID-19 pandemic on the financial situation, as well as on the programmatic, intergovernmental and field work of the Office. Furthermore, the extraordinary meetings of the subsidiary bodies of the Commission on Narcotic Drugs in October were dedicated to the topic of the current situation with respect to addressing and countering the world drug problem in the light of COVID-19, and the thematic discussions of the Commission analysed the impact of COVID-19 in the area of drug demand reduction.

## **Planned results for 2022**

13.227 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

**Result 1: advancing crime prevention, criminal justice and the rule of law towards the achievement of the 2030 Agenda: the Crime Congress returns to Kyoto in 2020<sup>33</sup>**

### **Programme performance in 2020**

13.228 The component has continued to support the relevant intergovernmental bodies, in line with its mandate, and assisted Member States in advancing work within the Commission on Crime Prevention and Criminal Justice towards the implementation of the 2030 Agenda in the field of crime prevention and criminal justice. The preparations for the Fourteenth United Nations Congress on Crime

<sup>33</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 16)).

Prevention and Criminal Justice were supported, as reflected in the programme plan for 2020, and were on track until the Congress had to be postponed owing to COVID-19. The preparations were resumed after the General Assembly decided by its decision 74/550 B that the Congress would take place in March 2021. Substantive preparations for the Congress include the preparation of the parliamentary documentation, support for the negotiations on the Kyoto declaration, the organization of the work of the plenary and the committee meetings, as well as work relating to the invitations and registration process. The component also initiated the conceptualization of a hybrid concept for the Congress in March 2021 with variable in-person and online participation components, with a view to ensuring business continuity despite unpredictable future developments and possible restrictions for in-person meetings at the time of the Congress. Furthermore, the component supported the development of a communications plan for the Congress, the establishment and maintenance of the related website, the organization of a programme of high-level side events and, in coordination with other services and the host country, the organization of ancillary meetings, exhibitions and a youth forum. The component also addressed issues related to travel of staff and representatives as well as budgetary and other administrative matters related to the preparation of the event.

13.229 The above-mentioned work did not meet the target of 70 per cent of Member States reflecting in their statements during the regular sessions of the Commission on Crime Prevention and Criminal Justice, as the preparatory body to the Crime Congress, and to the Crime Congress itself, national efforts to contribute to the implementation of the 2030 Agenda and Goal 16 in particular, reflected in the proposed programme budget for 2020. The meetings of the Commission and the Crime Congress were cancelled owing to COVID-19, and as such there were no statements in which Member States could have reflected their national efforts to contribute to the 2030 Agenda. The Commission met on 3 December 2020 to conduct the work of its regular session in a scaled-down format and the Crime Congress was postponed to March 2021.

### **Proposed programme plan for 2022**

13.230 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective and in response to recent developments, the component's work will evolve to include strengthened crime prevention, criminal justice and rule of law towards the achievement of the 2030 Agenda in the follow-up to the Fourteenth Crime Congress, outlined in result 3 below. The expected progress is presented in the updated performance measure below (see figure 13.XVII).

Figure 13.XVII

**Performance measure: Member States reflecting in their statements during the regular sessions of the Commission on Crime Prevention and Criminal Justice, as the preparatory body to the Crime Congress, and in their statements to the Crime Congress itself, national efforts to contribute to the implementation of the 2030 Agenda and Goal 16 in particular**

(Percentage)

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: strengthened crime prevention, criminal justice and rule of law towards the achievement of the 2030 Agenda<sup>34</sup>**

13.231 The component has been working on supporting the preparations for and conduct of the United Nations congresses on crime prevention and criminal justice that have been held in different regions of the globe since 1955, bringing together policymakers, legislators, practitioners, youth and representatives of international organizations, civil society and academia to explore ways and means to enhance the international community's response to crime. In 2020, the component continued leading the preparations for the Congress that was scheduled to be held in Kyoto, Japan, in 2020. The component provided the necessary technical and substantive services, in a timely and high-quality manner, to support Member States in negotiating the draft Kyoto declaration. Furthermore, the component has already set the stage for the follow-up to the Congress by the Commission on Crime Prevention and Criminal Justice, as the main policymaking body of the United Nations in crime prevention and criminal justice matters and the implementing body for the crime congresses. However, since the Congress had to be postponed owing to the COVID-19 pandemic, the follow-up was also affected. While support to the Commission in translating the outcome document of the Congress into policy action had to be postponed until after the Congress, the component has commenced follow-up in terms of operational cooperation towards the implementation of the outcome, including concept development and the preparation of related e-learning tools. This work will be further strengthened throughout 2021.

13.232 The above-mentioned work contributed to 93 per cent of Member States expressing full satisfaction with the quality and timeliness of technical and substantive services provided by UNODC, which exceeded the planned target of 67 per cent reflected in the proposed programme budget for 2021.

<sup>34</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect. 16) and A/75/6 (Sect. 16)/Corr.1).

### Proposed programme plan for 2022

13.233 The component will continue its work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will support the Commission on Crime Prevention and Criminal Justice in translating the outcome of the Fourteenth Crime Congress into policy initiatives in the area of crime prevention and criminal justice. The expected progress is presented in the performance measure below (see figure 13.XVIII).

Figure 13.XVIII

**Performance measure: Member States participating in meetings of the Commission on Crime Prevention and Criminal Justice expressing full satisfaction with the quality and timeliness of technical and substantive services provided by the secretariat of the governing bodies of the United Nations Office on Drugs and Crime**

(Percentage)

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: strengthened implementation of international drug policy commitments towards the achievement of the 2030 Agenda**

#### **Proposed programme plan for 2022**

13.234 The component will continue to provide secretariat support to the relevant intergovernmental bodies, in line with its mandate, for the achievement of the 2030 Agenda. The component has supported Member States through the Commission on Narcotic Drugs with the implementation of all international drug policy commitments by conducting thematic discussions within the Commission, bringing together the expertise of Member States, United Nations entities, international and regional organizations, civil society and affected populations. The component facilitated these thematic discussions by providing opportunities to share good practices and challenges in the practical implementation of international drug policy.

#### *Lessons learned and planned change*

13.235 The lesson for the component was that effective international cooperation within the framework of multilateralism requires even more comprehensive and inclusive participation in meetings. To achieve good policy results that are accepted by all and, as such, enjoy the legitimacy that will foster universal implementation, it is important that all delegations and interested stakeholders, including those who are not in a position to travel to the meeting venue, have the chance to make a contribution and have their voice heard. In applying the lesson, the component will further enhance the possibilities for remote participation in Commission meetings by organizing more

meetings in a hybrid format, which will provide delegations the opportunity to include additional experts in their delegations participating online. With the aim of translating policy commitments, made at the international level, into concrete action at the national level, the component will further continue to facilitate remote participation to ensure that all voices are heard, in particular in view of the upcoming progress review to be held by the Commission on Narcotic Drugs in 2024, as set out in the 2019 ministerial declaration of the Commission.

*Expected progress towards the attainment of the objective, and performance measure*

13.236 This work is expected to contribute to the objective, as demonstrated by the percentage of Member States expressing full satisfaction with the quality and timeliness of technical and substantive services provided by the secretariat to the governing bodies of UNODC (see figure 13.XIX).

Figure 13.XIX

**Performance measure: Member States participating in meetings of the Commission on Narcotic Drugs expressing full satisfaction with the quality and timeliness of technical and substantive services provided by the secretariat to the governing bodies of the United Nations Office on Drugs and Crime**

(Percentage)

## Legislative mandates

13.237 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolutions and decisions*

415 (V)	Transfer of functions of the International Penal and Penitentiary Commission	73/185	The rule of law, crime prevention and criminal justice in the context of the Sustainable Development Goals
46/185	Questions relating to the proposed programme budget for the biennium 1992–1993	74/171	Follow-up to the Thirteenth United Nations Congress on Crime Prevention and Criminal Justice and preparations for the Fourteenth United Nations Congress on Crime Prevention and Criminal Justice
61/252	Questions relating to the programme budget for the biennium 2006–2007		
72/305	Review of the implementation of General Assembly resolution 68/1 on the strengthening of the Economic and Social Council	74/550 B	Fourteenth United Nations Congress on Crime Prevention and Criminal Justice

*Economic and Social Council resolutions and decisions*

1946/9 (I)	Commission on Narcotic Drugs	1985/11	Cooperation for the control of illicit drug trafficking and drug abuse in the African region
1974/1845 (LVI)	Cooperation for drug law enforcement in the Far East region		

1987/34	Meeting of Heads of National Drug Law Enforcement Agencies, Latin America and Caribbean Region	1992/22	Implementation of General Assembly resolution 46/152 concerning operational activities and coordination in the field of crime prevention and criminal justice
1990/30	Establishment of a Meeting of Heads of National Drug Law Enforcement Agencies, European Region	Decision 2017/236	Improving the governance and financial situation of the United Nations Office on Drugs and Crime: extension of the mandate of the standing open-ended intergovernmental working group on improving the governance and financial situation of the United Nations Office on Drugs and Crime
1991/38	Terms of reference of the Commission on Narcotic Drugs		
1992/1	Establishment of the Commission on Crime Prevention and Criminal Justice		

### *Commission on Crime Prevention and Criminal Justice resolutions*

26/1	Improving the governance and financial situation of the United Nations Office on Drugs and Crime: recommendations of the standing open-ended intergovernmental working group on improving the governance and financial situation of the United Nations Office on Drugs and Crime
------	--

### *Commission on Narcotic Drugs resolutions and decisions*

60/1	Preparations for the sixty-second session of the Commission on Narcotic Drugs in 2019	Decision 60/1	Strengthening the subsidiary bodies of the Commission on Narcotic Drugs
60/3	Improving the governance and financial situation of the United Nations Office on Drugs and Crime: recommendations of the standing open-ended intergovernmental working group on improving the governance and financial situation of the United Nations Office on Drugs and Crime		

## **Deliverables**

13.238 Table 13.27 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 13.27

### **Subprogramme 9, component 1: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>82</b>	<b>69</b>	<b>71</b>	<b>65</b>
1. Reports to the General Assembly on international cooperation to counter the world drug problem and on crime prevention and criminal justice, including reports on the United Nations congresses on crime prevention and criminal justice	22	23	4	5
2. Notes to the Economic and Social Council on the contribution of the Commission on Narcotic Drugs and of the Commission on Crime Prevention and Criminal Justice to the annual high-level political forum on sustainable development	2	2	2	2
3. Annual reports to the Economic and Social Council on the regular and reconvened sessions of the Commission on Narcotic Drugs and of the Commission on Crime Prevention and Criminal Justice	4	3	4	4
4. Annual reports to the Commission on Crime Prevention and Criminal Justice	14	15	14	12

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
5. Reports to the Commission on Narcotic Drugs	12	15	13	14
6. Reports and notes by the Secretariat to the subsidiary bodies, including on their meetings, cooperation and implementation of recommendations	24	9	30	24
7. Notes by the Secretariat to the Commissions on the work of the standing open-ended intergovernmental working group on improving the governance and financial situation of UNODC	2	2	2	2
8. Documentation for ad hoc expert group meetings related to the Commission on Narcotic Drugs	2	—	2	2
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>187</b>	<b>179</b>	<b>164</b>	<b>154</b>
9. Meetings of the Fourteenth United Nations Congress on Crime Prevention and Criminal Justice	33	—	—	—

13. Meetings of the subsidiary bodies of the Commission on Narcotic Drugs	40	7	50	40
14. Meetings of the standing open-ended intergovernmental working group on improving the governance and financial situation of UNODC	12	19	12	12
15. Ad hoc expert group meetings related to the Commission on Narcotic Drugs	4	—	4	4
<b>B. Generation and transfer of knowledge</b>				
<b>Publications</b> (number of publications)	<b>5</b>	<b>4</b>	<b>5</b>	<b>5</b>
16. Report on the manufacture of narcotic drugs and psychotropic substances and their precursors	1	—	1	1
17. Directory of competent national authorities under the international drug control treaties	1	1	1	1
18. Schedules and tables of the international drug control conventions	3	3	3	3
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> provision of substantive and technical support to the Vienna-based Commissions, representatives of Member States, all permanent missions in Vienna and other relevant stakeholders relating to the work of the Commissions; issuance of notes verbales as notifications under the international drug control treaties; and coordination and monitoring of the follow-up to the mandates contained in the relevant resolutions and decisions adopted by the Commissions.				
<b>Databases and substantive digital materials:</b> maintenance and updating of database on the manufacture of narcotic drugs and psychotropic substances and their precursors; maintenance and updating of database on resolutions and decisions by the Commission on Narcotic Drugs and of the Commission on Crime Prevention and Criminal Justice; and development and updating of the secure webpages for use by the Commission on Narcotic Drugs, the Commission on Crime Prevention and Criminal Justice and the standing open-ended intergovernmental working group on improving the governance and financial situation of UNODC.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> organization and promotion of one special event of the Commissions, including the launch of the annual <i>World Drug Report</i> .				
<b>External and media relations:</b> preparation of web stories to be posted on the UNODC website, highlighting key developments and updates in the work of the Commissions and the crime congresses.				
<b>Digital platforms and multimedia content:</b> further elaborating and updating of dedicated websites for the Commissions, the United Nations congresses on crime prevention and criminal justice, the follow-up to the special session of the General Assembly on the world drug problem held in 2016 and the follow-up to the 2019 ministerial segment of the Commission on Narcotic Drugs; and managing dedicated social media accounts, including Twitter, YouTube, Instagram and Flickr (Commission on Narcotic Drugs, Commission on Crime Prevention and Criminal Justice, follow-up to the 2016 special session of the General Assembly and United Nations congresses on crime prevention and criminal justice) with over 12,000 followers.				

## **Subprogramme 9**

### **Component 2: Provision of secretariat services and substantive support to the International Narcotics Control Board**

#### **Objective**

13.239 The objective, to which component 2 of this subprogramme contributes, is to ensure the effective and efficient functioning of the International Narcotics Control Board in fulfilling its treaty-based mandate, through such measures as monitoring and promoting the full implementation of and full compliance with the three international drug control treaties, and supporting Member States in implementing their treaty obligations.

#### **Strategy**

13.240 To contribute to the objective, the component will continue to provide independent secretariat services and substantive support to the International Narcotics Control Board, including ensuring that the Board is provided with advice on treaty implementation and raising the awareness of Governments and the international community about the implementation of the international drug control conventions, particularly through the publication and dissemination of the treaty-mandated reports of the Board. The component also plans to raise awareness within Governments and the international community on the need to develop and implement national drug control policies and regulatory control systems for narcotic drugs, psychotropic substances and precursor chemicals. The component will support Governments in the exchange of import and export authorizations, including through INCB Learning and the International Import and Export Authorization System (I2ES), and build the capacity of competent national authorities to ensure the availability of controlled substances for licit purposes. In addition, the component will monitor the international movement of precursors and the illicit use of internationally controlled and non-scheduled precursors, ensuring worldwide cooperation and exchange of information on licit and illicit activity, through electronic means such as the Pre-Export Notification Online (PEN Online) system and the Precursors Incident Communication System (PICS), projects Prism and Cohesion and task force efforts. The component will also provide technical advice to the Board in assessing substances for scheduling recommendations under the 1988 Convention. Furthermore, the component will enhance cooperation among and build the capacity of law enforcement, customs, postal and other national agencies to safely detect and interdict new psychoactive substances and non-scheduled precursors, through the Global Rapid Interdiction of Dangerous Substances (GRIDS) programme. This work will help Member States to make progress towards Sustainable Development Goal 3.

13.241 The component plans to support Member States on issues related to COVID-19 by updating the model guidelines for the international provision of controlled medicines for emergency medical care in cooperation with WHO. In addition, the component plans to support Member States in identifying and responding to changing patterns in the trafficking in and abuse of new psychoactive substances and non-medical synthetic opioids that may take place owing to emergency situations such as the COVID-19 pandemic.

13.242 The above-mentioned work is expected to result in:

- (a) Advancement of the Board's dialogue with Governments to promote the implementation of the drug control conventions and the Board's recommendations and engage on treaty-related matters;

(b) Effective functioning of the international system for licit trade in controlled substances;

(c) More accurate identification and reporting of Governments on their needs for and consumption of narcotic drugs and psychotropic substances for medical and scientific purposes;

(d) Lower volume of precursor chemicals available for the illicit manufacture of drugs;

(e) Reduction in the trafficking in and illicit consumption of internationally controlled substances and new psychoactive substances.

13.243 The planned support on issues related to COVID-19 is expected to result in:

(a) Strengthened capacity of Member States to respond to changes related to COVID-19 in the demand for and trafficking of new psychoactive substances and non-medical synthetic opioids;

(b) Ability of Member States to better respond to emergency situations requiring expedited international trade in and humanitarian supply of controlled substances for medical purposes.

### **Programme performance in 2020**

13.244 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

#### **Member States addressed new trends in trafficking and abuse of new psychoactive substances and non-medical synthetic opioids during the COVID-19 pandemic**

13.245 The COVID-19 pandemic resulted in apparent new trends in trafficking in and abuse of new psychoactive substances and highly potent non-medical synthetic opioids, and increased trafficking through the exploitation of Internet-related services and delivery of goods to individuals by mail and courier services. These trends are expected to continue and grow in the years ahead. The component strengthened the capacity of Member States in analysis and exchange of intelligence on trafficking in dangerous substances through the Internet and in the safe handling of shipments possibly containing highly toxic substances.

13.246 The component also collaborated with the World Customs Organization, the Oceania Customs Organization, Internet-related service providers, mail and courier service providers and online financial intermediaries for the prevention of trafficking in new psychoactive substances, non-medical synthetic opioids and non-scheduled precursors. Furthermore, the component facilitated the exchange of information among Member States on new trends in trafficking in and abuse of new psychoactive substances and non-medical synthetic opioids during the COVID-19 pandemic.

#### *Progress towards the attainment of the objective, and performance measure*

13.247 The above-mentioned work contributed to the objective, as demonstrated by 162,948 pieces of information on trafficking in new psychoactive substances exchanged in real time among Member States (see figure 13.XX).

Figure 13.XX

**Performance measure: number of pieces of information on trafficking in new psychoactive substances exchanged in real time among Member States annually**

### **Impact of COVID-19 on component delivery**

13.248 Owing to the impact of COVID-19 during 2020, the component serviced a shortened 128th session of the Board. Several INCB treaty-monitoring country missions also had to be postponed, resulting in a reduced number of reports. In addition, the modality of capacity-building activities delivered by the component under the INCB Learning project and the GRIDS programme was changed to online or hybrid to the extent possible; and several activities originally planned for the first and second quarters of 2020 were postponed. The following deliverables of the component were affected: parliamentary documentation; substantive servicing of meetings; conference services for meetings; and training events.

13.249 At the same time, however, the component modified planned and identified new activities to support Member States on issues related to the COVID-19 pandemic, within the overall scope of its objectives, resulting in an increased number of expert group meetings to advise the board, seminars, workshops and training events, and technical materials published, particularly on estimates and assessments. The component held an expert group meeting on methodologies for collection of data on consumption of psychotropic substances online instead of in-person.

### **Planned results for 2022**

13.250 The planned results for 2022 include result 1, which is an update of the result presented in the preceding proposed programme plan and therefore shows both the programme performance in 2020 and the proposed programme plan for 2022. Result 2 is a new planned result.

### **Result 1: safeguarding the capacity of the International Narcotics Control Board to monitor the treaty-mandated reporting by Governments and to prevent diversion of internationally controlled substances<sup>35</sup>**

#### **Programme performance in 2020**

13.251 The component has been working on modalities for ensuring that all estimates and assessments of licit requirements for narcotic drugs, psychotropic substances and precursors are established by year end. The component also supported the Board in

<sup>35</sup> As reflected in the proposed programme budget for 2021 ([A/75/6 \(Sect.16\)](#) and [A/75/6 \(Sect.16\)/Corr.1](#)).

the supervision of the licit trade in internationally controlled substances to ensure availability for licit purposes. Furthermore, the component has been working to ensure the sustainability of the international drug control system and that estimates and assessments of licit requirements are submitted by Member States and established by the Board more efficiently.

13.252 The above-mentioned work contributed to the continued operation by the Board of the international drug control system, which met the planned target of establishing 100 per cent of processes, estimates and assessments established by year end, on the basis of replies received in form B/P and form D, reflected in the proposed programme budget for 2021.

### **Proposed programme plan for 2022**

13.253 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will support Member States in the implementation of new modalities that enable more efficient submission of estimates and assessment of licit requirements for narcotic drugs, psychotropic substances and precursors and their establishment by the Board by year end. The expected progress is presented in the performance measure below (see figure 13.XXI).

Figure 13.XXI

**Performance measure: processes, estimates and assessments established by year end, on the basis of the replies received in form B/P and form D**

(Percentage)

### **Result 2: uninterrupted trade in internationally controlled medicines during emergencies and other urgent situations**

13.254 The work of doctors, nurses and health-care professionals in general, who provide treatment and care to people including the most vulnerable, needs to be supported, and safe and effective controlled medicines should be available, accessible and affordable at all times for people who need them. The COVID-19 pandemic demonstrated the need for the international community to reassess modalities for ensuring adequate access to and availability of internationally controlled drugs during emergencies and other urgent situations to ensure that all people in all countries of the world are able to access essential medicines. This includes those medicines that are under international control. During the pandemic, the component provided guidance to Member States on the basis of the joint WHO/INCB model guidelines for the international provision of controlled medicines for emergency care developed in 1996. It issued statements and policy briefs to ensure that the procurement and supply of controlled medicines in countries met the needs of patients, both for COVID-19 positive patients and those who require internationally controlled

medicines for other medical conditions. The component advised individual Member States on procedures to simplify and expedite international trade in controlled medicines in line with the requirements of the drug control conventions.

*Lessons learned and planned change*

13.255 The lesson for the component was that the existing WHO/INCB model guidelines were outdated and that an updated tool would better support the work of Member States and humanitarian assistance organizations in ensuring adequate access to and availability of internationally controlled substances in emergency situations, where established procedures may not be functioning. In applying the lesson, the component will consult with Member States, WHO and other relevant stakeholders to develop updated guidelines and promote their implementation to ensure that trade in medicines containing internationally controlled substances can continue with minimum interruption during emergencies, pandemics and other urgent situations.

*Expected progress towards the attainment of the objective, and performance measure*

13.256 This work is expected to contribute to the objective, as demonstrated by the adoption of updated model guidelines by Member States (see table 13.28).

Table 13.28  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
WHO/INCB model guidelines serve as a basis for the international provision of controlled medicines for emergency care	WHO/INCB model guidelines serve as a basis for the international provision of controlled medicines for emergency care	Recognition that the WHO/INCB model guidelines should be updated to better guide Member States in ensuring provision of controlled medicines during emergency situations such as COVID-19	Revision of model guidelines in consultation with WHO and Member States	Adoption of updated model guidelines by Member States

**Legislative mandates**

13.257 The list below provides all mandates entrusted to the subprogramme.

*Conventions*

Single Convention on Narcotic Drugs of 1961 as amended by the 1972 Protocol

United Nations Convention against Illicit Traffic in Narcotic Drugs and Psychotropic Substances of 1988

Convention on Psychotropic Substances of 1971

*General Assembly resolutions*

45/179 Enhancement of the United Nations structure for drug abuse control

59/162

Follow-up on strengthening the systems of control over chemical precursors and preventing their diversion and trafficking

46/104 United Nations International Drug Control Programme

S-20/2

Political Declaration

S-30/1

Our joint commitment to effectively addressing and countering the world drug problem

*Security Council resolutions*

1817 (2008)

*Economic and Social Council resolutions*

1966/1106 (XL)	Implementation of the Single Convention on Narcotic Drugs, 1961	1996/29	Action to strengthen international cooperation to control precursors and their substitutes used in the illicit manufacture of controlled substances, in particular amphetamine-type stimulants, and to prevent their diversion
1967/1196 (XLII); 1991/48	Administrative arrangements to ensure the full technical independence of the International Narcotics Control Board		
1973/1775 (LIV)	Keeping in force the administrative arrangements to ensure the full technical independence of the International Narcotics Control Board	2003/39	Strengthening systems of control over chemical precursors and preventing their diversion and trafficking
1992/29	Measures to prevent the diversion of precursor and essential chemicals to the illicit manufacture of narcotic drugs and psychotropic substances	2004/38	Follow-up on strengthening the systems of control over chemical precursors and preventing their diversion and trafficking

*Commission on Narcotic Drugs resolutions*

49/3	Strengthening systems for the control of precursor chemicals used in the manufacture of synthetic drugs	62/1	Strengthening international cooperation and comprehensive regulatory and institutional frameworks for the control of precursors used in the illicit manufacture of narcotic drugs and psychotropic substances
54/6	Promoting adequate availability of internationally controlled narcotic drugs and psychotropic substances for medical and scientific purposes while preventing their diversion and abuse	62/2	Enhancing detection and identification capacity for synthetic drugs for non-medical use by increasing international collaboration
54/8	Strengthening international cooperation and regulatory and institutional frameworks for the control of precursor chemicals used in the illicit manufacture of synthetic drugs	62/4	Advancing effective and innovative approaches, through national, regional and international action, to address the multifaceted challenges posed by the non-medical use of synthetic drugs, particularly synthetic opioids
56/13	Precursors: raising awareness on the diversion in international trade of non-scheduled substances for use as alternatives to scheduled substances in the illicit manufacture of narcotic drugs and psychotropic substances	62/5	Enhancing the capacity of Member States to adequately estimate and assess the need for internationally controlled substances for medical and scientific purposes
57/9	Enhancing international cooperation in the identification and reporting of new psychoactive substances and incidents involving such substances	62/8	Supporting the International Narcotics Control Board in fulfilling its treaty-mandated functions in cooperation with Member States and in collaboration with the Commission on Narcotic Drugs and the World Health Organization
58/10	Promoting the use of the international electronic import and export authorization system for licit international trade in narcotic drugs and psychotropic substances	63/1	Promoting efforts by Member States to address and counter the world drug problem, in particular supply reduction-related measures, through effective partnerships with private sector entities
60/5	Increasing international coordination relating to precursors and non-scheduled precursor chemicals used in the illicit manufacture of narcotic drugs and psychotropic substances	63/3	Promoting awareness-raising, education and training as part of a comprehensive approach to ensuring access to and the availability of internationally controlled substances for medical and scientific purposes and improving their rational use
61/5	Promoting the implementation of the electronic International Import and Export Authorization System for licit trade in narcotic drugs and psychotropic substances		
61/8	Enhancing and strengthening international and regional cooperation and domestic efforts to address the international threats posed by the non-medical use of synthetic opioids		

## Deliverables

13.258 Table 13.29 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 13.29

### Subprogramme 9, component 2: deliverables for the period 2020–2022, by category and subcategory

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>52</b>	<b>37</b>	<b>52</b>	<b>52</b>
1. Annual report of the International Narcotics Control Board	1	1	1	1
2. Reports of the International Narcotics Control Board on the implementation of article 12 of the 1988 Convention, on narcotic drugs and on psychotropic substances	3	3	3	3
3. Reports on the supervision of the movement of narcotic drugs, psychotropic substances and precursor chemicals for licit purposes and on the supply of opiate raw materials and demand for opiates for medical and scientific purposes	8	8	8	8
4. Report on intersessional developments, report of the Committee on Finance and Administration, report of the Standing Committee on Estimates and report on the implementation of decisions taken at its previous session, and reports on matters examined and decisions taken by the International Narcotics Control Board	11	10	11	11
5. Estimated requirements for narcotic drugs, assessments of requirements for psychotropic substances, and assessments of licit requirements for amphetamine-type stimulant precursors	6	6	6	6
6. Evaluation of overall treaty compliance by Governments, report on measures to ensure the execution of the international drug control treaties, reports on missions conducted by the International Narcotics Control Board, and specific studies on and evaluation of implementation by Member States of recommendations made by the Board	23	9	23	23
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>98</b>	<b>92</b>	<b>98</b>	<b>98</b>
7. Meetings of the International Narcotics Control Board and its Standing Committee on Estimates	60	50	60	60
8. Meetings of ad hoc expert groups to advise the International Narcotics Control Board	18	22	18	18
9. Meetings in connection with global projects of the International Narcotics Control Board	20	20	20	20
<b>Conference and secretariat services for meetings</b> (number of three-hour meetings)	<b>98</b>	<b>92</b>	<b>98</b>	<b>98</b>
10. Meetings of the International Narcotics Control Board and its Standing Committee on Estimates	60	50	60	60
11. Meetings of ad hoc expert groups to advise the International Narcotics Control Board	18	22	18	18
12. Meetings in connection with global projects of the International Narcotics Control Board	20	20	20	20
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>3</b>	<b>3</b>	<b>3</b>	<b>3</b>
13. Projects to support Government compliance with the international drug control conventions	3	3	3	3

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>Seminars, workshops and training events</b> (number of days)	<b>4</b>	<b>28</b>	<b>4</b>	<b>4</b>
14. Training courses for national authorities to improve compliance with drug control treaties and improve availability of internationally controlled substances for medical and scientific purposes while preventing diversion and abuse	4	28	4	4
<b>Technical materials</b> (number of materials)	<b>56</b>	<b>88</b>	<b>56</b>	<b>92</b>
15. Updates of estimates and assessments of medical and scientific requirements for narcotic drugs and psychotropic substances	24	64	24	64
16. Annual update of forms for treaty-mandated reporting by Member States on narcotic drugs, psychotropic substances and precursor chemicals under the 1961, 1971 and 1988 Conventions and related Economic and Social Council resolutions, and annual update of the lists of narcotic drugs, psychotropic substances and precursor chemicals controlled under the three conventions	12	12	12	12
17. Periodic maintenance of the tables of countries that require authorizations for the import of substances listed in Schedules III and IV of the 1971 Convention, and annual update of the special international surveillance list of non-scheduled chemicals	5	5	5	5
18. Monthly alerts on issues related to drug control and treaty compliance, and update of training materials for national authorities on implementing the provisions of the three drug-control conventions	15	7	15	15
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> country missions of the International Narcotics Control Board to review implementation of the conventions and to make recommendations aimed at improving treaty adherence and implementation, with a view to ensuring the availability of internationally controlled substances while preventing diversion, trafficking and abuse.				
<b>Databases and substantive digital materials:</b> International Drug Control System (IDS) used by the INCB secretariat; International Import and Export Authorization System (I2ES), used by 68 Governments; Pre-Export Notification Online (PEN Online) system, used by 165 Governments; Precursors Incident Communication System (PICS), used by 123 Governments; and Project Ion Incident Communication System (IONICS), used by 135 Governments.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> side events during intergovernmental meetings.				
<b>External and media relations:</b> press releases and press conferences on activities of the International Narcotics Control Board; responses to media requests; statements by members of the Board at intergovernmental meetings; newsletters for Governments; and dissemination of recommendations and positions of the Board to decision makers and the general public.				
<b>Digital platforms and multimedia content:</b> updating and maintenance of the website of the International Narcotics Control Board and the secure areas for Board members and competent national authorities.				

## Programme 14

### Gender equality and the empowerment of women

#### Legislative mandates

14.1 The list below provides all mandates entrusted to the programme.

##### *General Assembly resolutions*

34/180	Convention on the Elimination of All Forms of Discrimination against Women	72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system
50/42	Fourth World Conference on Women		
50/203	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action	73/146	Trafficking in women and girls
54/4	Optional Protocol to the Convention on the Elimination of All Forms of Discrimination against Women	73/148	Intensification of efforts to prevent and eliminate all forms of violence against women and girls: sexual harassment
54/134	International Day for the Elimination of Violence against Women	73/149	Intensifying global efforts for the elimination of female genital mutilation
S-23/2	Political declaration	74/126	Improvement of the situation of women and girls in rural areas
S-23/3	Further actions and initiatives to implement the Beijing Declaration and Platform for Action	74/127	Violence against women migrant workers
62/136	Improvement of the situation of women in rural areas	74/128	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly
64/289	System-wide coherence		
66/130	Women and political participation	74/235	Women in development
69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development	75/158	Trafficking in women and girls
70/1	Transforming our world: the 2030 Agenda for Sustainable Development	75/160	Intensifying global efforts for the elimination of female genital mutilation
71/243	Quadrennial comprehensive policy review of operational activities for development of the United Nations system	75/161	Intensification of efforts to prevent and eliminate all forms of violence against women and girls
		75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system

##### *Economic and Social Council resolutions and decisions*

76 (V)	Communications concerning the status of women		anniversary of the Fourth World Conference on Women
304 (XI)	Report of the Commission on the Status of Women (fourth session)	2009/16	Working Group on Communications on the Status of Women of the Commission on the Status of Women
1992/19	Communications on the status of women		
1996/6	Follow-up to the Fourth World Conference on Women	2015/6	Future organization and methods of work of the Commission on the Status of Women
1996/31	Consultative relationship between the United Nations and non-governmental organizations	2019/2	Mainstreaming a gender perspective into all policies and programmes in the United Nations system
1999/257	Enabling the Commission on the Status of Women to continue to carry out its mandate	2020/9	Mainstreaming a gender perspective into all policies and programmes in the United Nations system
2005/232	Declaration of the Commission on the Status of Women on the occasion of the tenth		

*Economic and Social Council agreed conclusion and ministerial declaration*

2020/9	Mainstreaming a gender perspective into all policies and programmes in the United Nations system	2020/15	Multi-year programme of work of the Commission on the Status of Women
--------	--	---------	---

*Security Council resolutions*

1325 (2000),  
1820 (2008),  
1888 (2009),  
1889 (2009),  
1960 (2010),  
2106 (2013),  
2122 (2013),  
2242 (2015),  
2467 (2019),  
2493 (2019)

*Agreed conclusions of the Commission on the Status of Women*

1996	Implementation of strategic objectives and action in the critical area of concern: poverty	2005	Political declaration on the occasion of the tenth anniversary of the Fourth World Conference on Women
1996	Women and the media		
1996	Child and dependent care, including sharing of work and family responsibilities	2006	Enhanced participation of women in development: an enabling environment for achieving gender equality and the advancement of women, taking into account, inter alia, the fields of education, health and work
1997	Women and the environment		
1997	Women in power and decision-making		
1997	Women and the economy	2006	Equal participation of women and men in decision-making processes at all levels
1997	Education and training of women		
1998	Violence against women	2007	Elimination of all forms of discrimination and violence against the girl child
1998	Women and armed conflict		
1998	Human rights of women	2008	Financing for gender equality and the empowerment of women
1998	The girl child	2009	The equal sharing of responsibilities between women and men, including caregiving in the context of HIV/AIDS
1999	Women and health		
1999	Institutional mechanisms for the advancement of women	2011	Access and participation of women and girls in education, training and science and technology, including for the promotion of women's equal access to full employment and decent work
2001	Women, the girl child and human immunodeficiency virus/acquired immunodeficiency syndrome	2013	Elimination and prevention of all forms of violence against women and girls
2001	Gender and all forms of discrimination, in particular racism, racial discrimination, xenophobia and related intolerance	2014	Challenges and achievements in the implementation of the Millennium Development Goals for women and girls
2002	Eradicating poverty, including through the empowerment of women throughout their life cycle, in a globalizing world	2015	Political declaration on the occasion of the twentieth anniversary of the Fourth World Conference on Women
2002	Environmental management and the mitigation of natural disasters	2016	Women's empowerment and the link to sustainable development
2003	Participation in and access of women to the media, and information and communication technologies and their impact on and use as an instrument for the advancement and empowerment of women	2017	Women's empowerment in the changing world of work
2004	The role of men and boys in achieving gender equality	2018	Challenges and opportunities in achieving gender equality and the empowerment of rural women and girls
2004	Women's equal participation in conflict prevention, management and resolution and in post-conflict peacebuilding		

2019	Social protection systems, access to public services and sustainable infrastructure for gender equality and the empowerment of women and girls	2021	Women's full and effective participation and decision-making in public life, as well as the elimination of violence, for achieving gender equality and the empowerment of all women and girls
2020	Political declaration on the occasion of the twenty-fifth anniversary of the Fourth World Conference on Women		

## Programme of work

### Subprogramme 1

#### Intergovernmental support, coordination and strategic partnerships

#### Objective

14.2 The objective, to which this subprogramme contributes, is to strengthen the achievement of gender equality and the empowerment of women, including women's full enjoyment of their human rights.

#### Deliverables

14.3 Table 14.1 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 14.1

**Subprogramme 1: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>4</b>	<b>2</b>	<b>4</b>	<b>2</b>
1. Reports for the General Assembly, including on the improvement of the status of women	2	–	2	–
2. Reports for the Economic and Social Council, including on mainstreaming a gender perspective in the United Nations system	1	1	1	1
3. Reports for the Commission on the Status of Women on the normative aspects of the work of the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women)	1	1	1	1
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>52</b>	<b>52</b>	<b>46</b>	<b>46</b>
4. Meetings of the General Assembly, including formal and informal meetings of the Second and Third Committees	16	16	10	10
5. Meetings of the Security Council on women and peace and security	3	3	3	3
6. Meetings of the Economic and Social Council	1	1	1	1
7. Meetings of the Commission on the Status of Women, including consultations by the Bureau and meetings by the Commission to implement its organization of work	32	32	32	32
<b>B. Generation and transfer of knowledge</b>				
<b>Publications</b> (number of publications)	<b>3</b>	<b>3</b>	<b>3</b>	<b>3</b>
8. Network (focal points on the status of women)	3	3	3	3

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>Technical materials</b> (number of materials)	<b>5</b>	<b>9</b>	<b>8</b>	<b>11</b>
9. Guidance materials on gender parity in the United Nations system and on the implementation of the System-wide Action Plan on Gender Equality and the Empowerment of Women, the United Nations country team System-wide Action Plan gender equality scorecard and the United Nations country team gender equality marker	5	9	8	11
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> cross-sectoral interactive dialogues and ministerial round tables, with broad regional representation and participation from Governments, United Nations entities, women's organizations and the private sector; multi-stakeholder expert side events on gender equality and the empowerment of women in key meetings, conferences and summits, reaching on the average over 100 participants per event, comprising representatives of Member States, women's and other civil society organizations, United Nations entities and think tanks; expert consultations on gender mainstreaming in a thematic area or sector in which gender considerations are absent or need strengthening with at least 4-6 experts and representatives of Governments, United Nations entities and civil society organizations (per consultation)				
<b>D. Communication deliverables</b>				
<b>Digital platforms and multimedia content:</b> Daily updates and maintenance of the UN-Women website, reaching more than 7 million unique visitors.				

## Subprogramme 2

### Policy and programme activities

#### Objective

14.4 The objective, to which this subprogramme contributes, is to enhance efforts in the elimination of discrimination against women and girls and the achievement of gender equality in, inter alia, the fields of development, human rights and peace and security, including by leading, coordinating and promoting the accountability of the United Nations system in this regard.

#### Deliverables

14.5 Table 14.2 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 14.2

7. Training on gender-responsive budgeting	1	2	1	3
8. Training on gender statistics <sup>b</sup>	—	23	28	30
<b>Publications</b> (number of publications)	<b>2</b>	<b>1</b>	<b>2</b>	<b>1</b>
9. Inventory of activities on violence against women	1	—	1	1
10. Publication on <i>Progress of the World's Women</i>	—	—	1	—
11. Publication on Beijing+25	1	1	—	—
<b>Technical materials</b> (number of materials)	<b>2</b>	<b>4</b>	<b>4</b>	<b>4</b>
12. Reports of expert group meetings on the priority themes/issues decided by the Commission on the Status of Women	1	1	1	1
13. Guidance notes on essential services to respond to violence against women and on integrating gender equality into macroeconomic policies	—	2	2	2
14. Knowledge material on the implementation of Security Council resolution 1325 (2000) on women and peace and security and its agenda	1	1	1	1
15. Policy Brief: "The impact of COVID-19 on women"	—	1	—	—
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> technical advice to Member States in all regions, at their request, and non-governmental organizations on access to financial markets and services for women, gender-responsive budgeting, gender-responsive development plans at the national and local levels, gender equality policies, strategies and action plans; technical advice to strengthen the role of national women's machinery in the development, implementation and monitoring of gender equality policies, strategies and actions plans; support for the implementation of the women and peace and security agenda, including country-level assistance to develop and implement national action plans on women and peace and security; expert consultation on priority themes and issues in preparation for the session of the Commission on the Status of Women, and preparation of the <i>Progress of the World's Women</i> report; technical advice to ministries of finance, planning and women's affairs, at their request, on integrating a gender perspective into policies on macroeconomics, and social protection systems, decent work and the care economy, to achieve the Sustainable Development Goals				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> brochures for the promotion of the Commission on the Status of Women and booklets and pamphlets on various topics relevant to support gender equality and the empowerment of women				
<b>External and media relations:</b> media releases reaching global and geographically diverse public, technical expert and Government audiences on various topics related to women, including on UN-Women flagship publications				
<b>Digital platforms and multimedia content:</b> update and maintenance of web platforms on financing for gender equality, the political participation of women, and gender equality and HIV and AIDS, and of the Global Database on Violence against Women				
<b>Library services:</b> documents maintained to preserve the institutional memory related to UN-Women				

<sup>a</sup> The large increase for projects on Safe Cities Free of Violence Against Women and Girls and Safe Cities and Safe Public Spaces reflects a methodological change in how these deliverables are counted. The change was made to align and ensure coherence with the UN-Women strategic plan.

<sup>b</sup> The large increase for training on gender statistics reflects a methodological change in how these deliverables are counted. This change was made to align and ensure coherence with the UN-Women strategic plan.

## **Programme 15**

### **Economic and social development in Africa**

#### **Overall orientation**

##### **Mandates and background**

15.1 The Economic Commission for Africa (ECA) is responsible for promoting the economic and social development of its member States, fostering intraregional integration and promoting international cooperation for the development of Africa. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, as well as Economic and Social Council resolution [671 \(XXV\) A](#). The coronavirus disease (COVID-19) pandemic in Africa has revealed a series of dire challenges and emerging critical issues that will need to be urgently addressed to ensure attainment of the outcomes of the 2030 Agenda for Sustainable Development and Agenda 2063, The Africa We Want, of the African Union.

15.2 ECA has a critical role to play in providing sets of innovative solutions, and also demand-driven and tailor-made policy and technical advice to member States and regional economic communities in pursuit of accelerated post-COVID-19 recovery and the rise of more prosperous and inclusive societies. ECA interventions will include cutting-edge research and related integrated policy and capacity support focused on economic diversification, with a special focus on the design of innovative financial instruments for increased resource mobilization; the development of national and subregional strategies and the setting up of additional regional stakeholder platforms for an enhanced operationalization of the African Continental Free Trade Area; and the digital transformation.

##### **Strategy and external factors for 2022**

15.3 The ECA programme strategy has at its core an integrated and coherent approach whereby subprogrammes are planned and delivered together, with a focus on transformational changes across key domains and a measurable contribution to the 2030 Agenda and Agenda 2063. In pursuing its mandate, ECA will continue to concentrate on five strategic directions:

- (a) Enhancing the capacity and relevance of ECA as a premier knowledge policy institution in Africa in deploying knowledge to support policymaking to drive the development agenda of Africa;
- (b) Formulating policy options to accelerate economic diversification and job creation for the transformation of Africa;
- (c) Designing and implementing financing models and leveraging them for the development of human, physical and social infrastructure assets;
- (d) Supporting ideas and actions to foster deeper regional integration and the development of regional public goods, with a focus on social inclusion and taking into account synergies between the economic and social development programmes of Africa and its peace and security agenda;
- (e) Advocating a common position for Africa at the global level and developing regional responses as a contribution to global governance issues.

15.4 In pursuing these strategic directions, ECA has three core functions that cut across all its various subprogrammes. These are its convening function, its think-tank function, and its operational function, as defined below:

(a) Convening function: provision of multilateral and multi-stakeholder platforms, helping to reinforce multilateralism regionally and globally;

(b) Think-tank function: conducting interdisciplinary research and analysis of key challenges facing member States and Africa as a whole, while also promoting peer learning and development;

(c) Operational function: provision of direct policy advice and support to member States, including through cooperation with other United Nations system entities.

15.5 The COVID-19 pandemic has led to the reinforcement of the long-term vision of ECA in terms of its strategic positioning as a first-class think tank, catalyst and facilitator within the framework of international negotiations involving Africa. As an illustrative example, over the past year ECA has demonstrated the multiplier effect of its voice, conveying member States' particular exigencies in respect of debt servicing, leading to substantial savings which could be repurposed towards tackling the socioeconomic impacts of the COVID-19 pandemic.

15.6 In this regard, ECA intends to boost collaboration with the resident coordinator system and United Nations country teams and the coordination of collective actions at national and subregional levels through its new strategic approach on working with resident coordinators and country teams and the recently launched Regional Collaborative Platform for Africa and its cluster work around opportunity and issue-based coalitions. ECA will further mainstream policy guidance and recommendations, taking into account the relevant provisions of intergovernmental policy organs and platforms and promote cooperation among the regional economic communities for a sound and expeditious implementation of regional agreements within the context of the various United Nations-African Union partnership frameworks, including on peace and security. ECA will pursue its support for member States and regional economic communities in implementing key strategic frameworks such as the African Continental Free Trade Area. ECA will also continue to harness the private sector as a driver for job creation and alternative means of development financing and endeavour to support policies to ensure that the sector thrives.

15.7 Although it has posed serious threats to the sustainable development and growth of the continent, the COVID-19 pandemic has also opened up a number of new opportunities. ECA will enhance its facilitating role in terms of identifying and proposing innovative financing tools to boost domestic resource mobilization, and address debt servicing, as a main mitigating measure. ECA will focus its interventions in 2022 on building forward and building better by harnessing the multiple opportunities offered by, among others, the digital revolution, the implementation of the Agreement Establishing the African Continental Free Trade Area since 1 January 2021 and the blue economy, by amplifying its pioneering role in producing and disseminating quality knowledge products, providing tailor-made policy and technical advice and convening policy dialogues on emerging sustainable development issues in line with the 2030 Agenda and Agenda 2063. As part of the United Nations reform agenda, ECA will use the Africa Regional Collaborative Platform and opportunity and issue-based coalitions, together with direct support for the resident coordinator system and United Nations country teams, as the main delivery channels for its services.

15.8 The proposed programme for 2022 was adopted by the Conference of Ministers in its resolution 981 (LIII) of 23 March 2021. The proposal included a change in the title of subprogramme 5 from "Climate change, environment and natural resources management" to "Technology, climate change and natural resources management", to align it with the mandate, objective and work of the subprogramme.

15.9 For 2022, the ECA planned deliverables and activities reflect the known and unknown challenges related to the COVID-19 pandemic that are being faced by member States. Such planned deliverables and activities include enhanced support for the implementation of the Agreement Establishing the African Continental Free Trade Area as a key instrument for boosting sustainable growth on the continent; and the development of digital platforms and tools to advance a safe and sustainable development agenda on the continent with special emphasis on health-economy linkages. They will also comprise the conceptualization and provision of customized macroeconomic models, together with knowledge products assessing the socioeconomic impacts of COVID-19, with a view to integrating related findings into policy formulation at continental, subregional and national levels.

15.10 Capacity-building and training activities around key emerging development issues will also be held to foster the identification of additional post-COVID-19 recovery pathways and the conceptualization of strategic policy frameworks. As an example, given the impact of the COVID-19 pandemic on national statistical systems, the upgrading of official statistics in Africa has become an urgent task to enable the tracking of progress made in respect of the implementation of the 2030 Agenda, Agenda 2063 and national development plans. As a result, technical assistance will be provided to member States in strengthening their systems, and efforts will be made to tap the potential of big data and non-traditional sources to ensure the near-real time availability of data. Specific examples of such planned deliverables and activities are provided under subprogrammes 1, 2, 3, 5, 6, 8 and 9, and also under components 1, 3, 4 and 5 of subprogramme 7. The support provided to member States on issues related to COVID-19 is expected to contribute to planned results for 2022, as described under subprogrammes 5, 8 and 9 and component 4 of subprogramme 7.

15.11 With regard to the external factors, the overall plan for 2022 is based on the following planning assumptions:

(a) Despite the fluid nature and uncertain evolution of the COVID-19 pandemic, sustainable long-term recovery pathways are identified, consolidated and followed for the delivery of ECA services;

(b) The Africa Regional Collaborative Platform is fully operational and is used to channel ECA contributions and support for the implementation of African Union-United Nations cooperation frameworks;

(c) Member States and regional economic communities continue to cooperate among and between themselves and coordinate collective and harmonized actions focusing on the implementation of the 2030 Agenda and Agenda 2063, and on operationalization of the African Continental Free Trade Area in a post COVID-19 context, with support from ECA;

(d) Intergovernmental policy organs and forums provide continued policy advice on emerging priorities with a view to guiding interventions by ECA.

15.12 With regard to the COVID-19 pandemic, the proposed programme plan is based on the assumption that the proposed deliverables and activities for 2022 will be feasible to implement. If, however, the pandemic were to have a continued impact on the planned deliverables and activities, they would be adjusted during 2022 within the scope of the overall objectives, strategies and mandates. Any such adjustments would be reported as part of the programme performance information.

15.13 The Commission integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, the objective of subprogramme 6 is to accelerate the pace of member States to implement, and report on, their global and regional commitments related to gender equality and the empowerment of women

and girls and to enhance their implementation of policies and programmes for the empowerment of women and girls, in order to achieve gender equality and inclusiveness in Africa. The subprogramme also provides technical support to the Commission's other subprogrammes to ensure that a gender perspective is reflected in their programme of work. The subprogramme will also strengthen the capacity of member States, through the provision of tailored technical support, advisory services and hands-on training, in gender equality, the empowerment of women and girls, inclusiveness and economic diversification, women's entrepreneurship, and the integration of a gender perspective into national policies and programmes.

15.14 With regard to cooperation with other entities at the global, regional, national and local levels, the joint African Union and United Nations frameworks on peace, security, human rights and development, the 2030 Agenda and Agenda 2063 will entail a need for greater and stronger coordination between United Nations agencies to deliver as one in cooperation with the African Union. Consequently, support by ECA for member States and regional economic communities will be underpinned by its leadership role in coordinating the work of the United Nations system to support the African Union Commission within the mandate of ECA. In addition, ECA will build on its existing strategic partnership with the African Development Bank, the African Export-Import Bank (Afreximbank) and other regional and subregional organizations and with central banks, universities, think tanks, other research institutions, civil society and private sector organizations, and forge new partnerships in advancing attainment of the 2030 Agenda and Agenda 2063. With regard to South-South and triangular cooperation, ECA will continue to leverage value-adding partnerships premised on the principle of enhancing complementarity and development impact. This will also enable the Commission to respond better to the evolving needs of member States within the context of new and emerging opportunities.

15.15 With regard to inter-agency coordination and liaison, ECA will continue to promote collaborative delivery through cross-sectoral initiatives that cut across goals and targets and ensure effective linkages between regional, subregional and national perspectives. This will include working through the Regional Collaborative Platform for Africa and enhanced collaboration with regional United Nations entities through opportunity and issue-based coalitions to ensure more coordinated responses and a cogent collective contribution to fulfilment of the 2030 Agenda and Agenda 2063. In addition, ECA will make its knowledge products more visible and accessible to member States, resident coordinators and United Nations country teams through a more targeted effort to disseminate its knowledge resources, including through the online and on-site training services provided under subprogramme 8.

15.16 Joint efforts are needed to expedite the African Union-United Nations Framework for the Implementation of Agenda 2063 and the 2030 Agenda for Sustainable Development in the context of recovery from the COVID-19 pandemic and the decade of action and delivery for sustainable development. This will require strengthening inter-agency coordination to deliver as one in cooperation with the African Union and multisectoral partnerships to identify actions, programmes and projects, and regional platforms that will contribute to achievement of the goals of the above-mentioned African Union-United Nations framework. Consequently, support by ECA for member States and regional economic communities will be underpinned by its leadership role in coordinating the work of the United Nations system in support of the African Union Commission.

15.17 In addition, through the recently launched Regional Collaborative Platform for Africa and its cluster work around opportunity and issue-based coalitions, there will be need for more robust coordination between United Nations agencies to deliver as

one. Continued collaboration with the regional economic and social commissions will be vital in ensuring advocacy at the global level of the African position and the integration of its contributions in regional responses to global discussions. In addition, ECA will leverage its existing strategic partnerships with regional and subregional organizations and with central banks, universities, think tanks, other research institutions, civil society and private sector organizations, and forge new partnerships in advancing fulfilment of the 2030 Agenda and Agenda 2063.

15.18 With regard to disability inclusion, ECA will participate in the implementation of the system-wide United Nations Disability Inclusion Strategy and will include mitigating measures to overcome any challenges while operationalizing such inclusion. The strategy will cover programme design, implementation and evaluation, policies on the operational aspects; including for reasonable accommodation of related requests and consultations with persons with disabilities. In order to advance disability inclusion, the programme plans to develop a global meeting registration portal with additional accessibility features. Furthermore, specialized equipment will be provided at the headquarters compound in Addis Ababa and, in a subsequent phase, at subregional offices, with a view to enhancing widespread access. Adequate training for the use of the portal and assistive equipment will be provided to all concerned staff. The programme will also explore the development and implementation of specific joint projects with other United Nations entities.

## **Programme performance in 2020**

### **Impact of COVID-19 on programme delivery**

15.19 During 2020, the COVID-19 pandemic had an impact on the planned deliverables and activities of ECA, including the postponement or cancellation of deliverables and activities. These deliverables and activities included the preparation and finalization of thematic studies and reports, such as those on international migration in Africa, the state of urbanization in Africa and the Africa Human Security Index; reports of policy dialogues and ad hoc expert group meetings, on such issues as integration of statistical and geospatial information, and of technical and validation workshops, such as those related to the review of African Continental Free Trade Area strategies; reports of scoping missions to member States for data collection and analysis; and reports of capacity-building sessions for African practitioners such as regulators and investors on issues linked to the development of capital markets. Additional examples of the impact are provided under all subprogrammes. The postponement and cancellation of planned deliverables and activities also had an impact on the expected results for 2020, as described in the programme performance of subprogrammes 2, 6 and 9 and components 1, 2, 3 and 4 of subprogramme 7.

15.20 At the same time, however, some planned deliverables and activities were modified and some new activities were identified during 2020, within the overall scope of the objectives of the subprogrammes, in order to support member States on issues related to the COVID-19 pandemic. Some deliverables were achieved through a change of approach with regard to delivery modalities and methods, as demonstrated by the shift from in situ meetings and missions to online meetings and webinars, enabling a greater number of participants to attend and contribute. All in situ training activities under subprogramme 8 were cancelled and the associated training materials were reconfigured in an e-learning format. Other modifications and new activities included the refocusing of studies and assessments on the analysis of socioeconomic impacts of the COVID-19 pandemic; the leveraging of innovative solutions such as information and communications technology and digital governance to address those impacts, fostering experience sharing on best practices among member States; the

design of transformative financial instruments and the convening of new meetings and policy dialogues, such as those gathering African ministers of finance together to discuss debt issues and initiatives leading to important savings for member States; and the strengthening of the role of the private sector and its investments in the economic growth and transformation of Africa (infrastructure, land and agriculture, energy). Additional examples of the modified and new activities are provided under all subprogrammes. The modified and new deliverables and activities contributed to results in 2020, as described in the programme performance under subprogrammes 1, 2, 3 and 9, and components 1 and 4 of subprogramme 7.

15.21 Reflecting the importance of continuous improvement and responding to the evolving needs of member States, the programme will mainstream lessons learned and best practices related to the adjustments to and adaptation of its programme owing to the COVID-19 pandemic. Specific examples of best practices include the use of information and communications technology for the convening of expert meetings, ministerial conferences, thematic webinars and e-learning sessions, which led to the inclusion of a much larger number of beneficiaries in 2020, with a better gender balance and more diversified, than in previous years. This entailed the need for additional flexibility and versatility by organizers and participants, reducing disruptive impacts on the business as usual activities of the Commission. Lessons learned focused on the importance of business continuity and contingency plans and the need to strengthen them with a meticulous risk assessment and identification of new mitigation measures. Subprogrammes have already started to adjust and adapt their approach accordingly and will continue to do so in 2022 through the strengthening of monitoring and evaluation mechanisms and quarterly accountability and programme performance review meetings.

## Legislative mandates

15.22 The list below provides all mandates entrusted to the programme.

### *General Assembly resolutions*

S-21/2	Key actions for the further implementation of the Programme of Action of the International Conference on Population and Development	64/222	Nairobi outcome document of the High-level United Nations Conference on South-South Cooperation
57/144	Follow-up to the outcome of the Millennium Summit	65/214 65/274	Human rights and extreme poverty Cooperation between the United Nations and the African Union
57/270 B	Integrated and coordinated implementation of and follow-up to the outcomes of the major United Nations conferences and summits in the economic and social fields	65/280	Programme of Action for the Least Developed Countries for the Decade 2011–2020
58/220	Economic and technical cooperation among developing countries	66/130 66/137	Women and political participation United Nations Declaration on Human Rights Education and Training
58/269	Strengthening of the United Nations: an agenda for further change	66/224	People's empowerment and development
60/1	2005 World Summit Outcome	68/145	Strengthening collaboration on child protection within the United Nations system
60/222	United Nations Declaration on the New Partnership for Africa's Development	68/225	Specific actions related to the particular needs and problems of landlocked developing countries: outcome of the International Ministerial Conference of Landlocked and Transit Developing Countries and Donor Countries and International Financial and Development Institutions on Transit Transport Cooperation
61/234	Enhancing the role of the subregional offices of the Economic Commission for Africa		
64/215	Legal empowerment of the poor and eradication of poverty		

68/238	Follow-up to and implementation of the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States	74/270	Global solidarity to fight the coronavirus disease 2019 (COVID-19)
69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development	74/302	Implementation of the recommendations contained in the report of the Secretary-General on the causes of conflict and the promotion of durable peace and sustainable development in Africa
70/1	Transforming our world: the 2030 Agenda for Sustainable Development	75/151	Implementation of the outcome of the World Summit for Social Development and of the twenty-fourth special session of the General Assembly
70/155	The right to development	75/154	Inclusive development for and with persons with disabilities
70/159	Globalization and its impact on the full enjoyment of all human rights	75/156	Strengthening national and international rapid response to the impact of the coronavirus disease (COVID-19) on women and girls
70/184	Information and communications technologies for development	75/180	Enhancement of international cooperation in the field of human rights
70/192	Follow-up to the International Conference on Financing for Development	75/194	Preventing and combating corrupt practices and the transfer of proceeds of corruption, facilitating asset recovery and returning such assets to legitimate owners, in particular to countries of origin, in accordance with the United Nations Convention against Corruption
70/211	Role of the United Nations in promoting development in the context of globalization and interdependence	75/202	Information and communications technologies for sustainable development
70/215	Development cooperation with middle-income countries	75/203	International trade and development
70/224	Towards global partnerships: a principle-based approach to enhanced cooperation between the United Nations and all relevant partners	75/204	International financial system and development
71/220	Cooperative measures to assess and increase awareness of environmental effects related to waste originating from chemical munitions dumped at sea	75/205	External debt sustainability and development
71/289	Cooperation between the United Nations and the International Organization of la Francophonie	75/206	Promotion of international cooperation to combat illicit financial flows and strengthen good practices on assets return to foster sustainable development
72/234; 74/235	Women in development	75/207	Promoting investments for sustainable development
72/266	Shifting the management paradigm in the United Nations	75/211	Entrepreneurship for sustainable development
72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system	75/212	United Nations Conference on the Midterm Comprehensive Review of the Implementation of the Objectives of the International Decade for Action, "Water for Sustainable Development", 2018–2028
73/195	Global Compact for Safe, Orderly and Regular Migration	75/213	Promoting sustainable consumption and production patterns for the implementation of the 2030 Agenda for Sustainable Development, building on Agenda 21
74/4	Political declaration of the high-level political forum on sustainable development convened under the auspices of the General Assembly	75/215	Follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States
74/216	Implementation of Agenda 21, the Programme for the Further Implementation of Agenda 21 and the outcomes of the World Summit on Sustainable Development and of the United Nations Conference on Sustainable Development	75/217	Protection of global climate for present and future generations of humankind
74/233	Follow-up to the second United Nations Conference on Landlocked Developing Countries	75/220	Harmony with Nature
74/253	Enhancing accessibility for persons with disabilities to conferences and meetings of the United Nations system	75/221	Ensuring access to affordable, reliable, sustainable and modern energy for all
		75/225	Towards a New International Economic Order

75/226	International migration and development	75/232	Eradicating rural poverty to implement the 2030 Agenda for Sustainable Development
75/227	Follow-up to the Fourth United Nations Conference on the Least Developed Countries	75/234	South-South cooperation
75/229	Promotion of sustainable tourism, including ecotourism, for poverty eradication and environment protection	75/235	Agriculture development, food security and nutrition
75/230	Implementation of the Third United Nations Decade for the Eradication of Poverty (2018–2027)	75/237	Global efforts for the total elimination of racism, racial discrimination, xenophobia and related intolerance and the comprehensive implementation of the follow-up to the Durban Declaration and Programme of Action
75/231	Industrial development cooperation	75/239	Oceans and the law of the sea

### *Economic and Social Council resolutions*

2014/11	Follow-up to the International Conference on Financing for Development	2017/28	Programme of Action for the Least Developed Countries for the Decade 2011–2020
2017/9	Mainstreaming a gender perspective into all policies and programmes in the United Nations system	2018/23	New strategic directions of the Economic Commission for Africa

### *Economic Commission for Africa resolutions*

671 (XXV) A	Establishment of an Economic Commission for Africa	966 (LII)	Review of the intergovernmental structure of the Economic Commission for Africa pursuant to its resolution 943 (XLIX) and resolution 957 (LI)
748 (XXVIII)	Population, family and sustainable development		
822 (XXXI)	Implementation of the treaty establishing the African Economic Community: strengthening regional economic communities; rationalization and harmonization of the activities of regional and subregional communities	967 (LII)	Progress in the implementation of the Programme of Action for the Least Developed Countries for the Decade 2011–2020 and preparation for the Fifth United Nations Conference on the Least Developed Countries
874 (XLIII)	Strengthening the subregional offices of the United Nations Economic Commission for Africa	968 (LII)	Fiscal policy, trade and the private sector in a digital era: a strategy for Africa
928 (XLVIII)	Implementing Agenda 2063: planning, mobilizing and financing for development	969 (LII)	Digitization and the digital economy initiative
929 (XLVIII)	Third International Conference on Financing for Development	972 (LIII)	African Continental Free Trade Area
935 (XLVII)	Least developed countries in Africa	973 (LIII)	Data and statistics
937 (XLIX)	Mainstreaming the 2030 Agenda for Sustainable Development and Agenda 2063 into national strategic frameworks, action plans and programmes	974 (LIII)	Civil registration and vital statistics
938 (XLIX)	Integrated reporting and follow-up on sustainable development	975 (LIII)	Sustainable industrialization and diversification of Africa in the digital era in the context of the coronavirus disease pandemic
939 (XLIX)	Africa Regional Forum on Sustainable Development	976 (LIII)	Coronavirus disease vaccines
941 (XLIX)	Organization of an annual African regional review of progress in the implementation of the outcomes of the World Summit on Information Society	977 (LIII)	Economic Commission for Africa support for least developed countries in the context of the Fifth United Nations Conference on the Least Developed Countries
964 (LII)	2020 programme plan and budget	978 (LIII)	Midterm review of the Vienna Programme of Action for the Landlocked Developing Countries for the Decade 2014–2024
965 (LII)	Luxembourg Protocol to the Convention on International Interests in Mobile Equipment on Matters Specific to Railway Rolling Stock	979 (LIII)	African Institute for Economic Development and Planning
		980 (LIII)	Special drawing rights
		981 (LIII)	2022 programme plan and budget

## Deliverables

15.23 Table 15.1 lists all cross-cutting deliverables, by category and subcategory, for the period 2020–2022.

Table 15.1

### Cross-cutting deliverables for the period 2020–2022, by category and subcategory

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>5</b>	<b>6</b>	<b>5</b>	<b>8</b>
1. Coordination meetings on the African Union-United Nations Framework for the Implementation of Agenda 2063 and the 2030 Agenda for Sustainable Development	2	2	2	2
2. Annual Africa Business Forum	–	1	–	1
3. Meetings of the Regional Coordination Platform	–	–	–	2
4. Meetings of the Fifth Committee	1	1	1	1
5. Meetings of the Committee for Programme and Coordination	1	1	1	1
6. Meetings of the Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
<b>B. Generation and transfer of knowledge</b>				
<b>Publications</b> (number of publications)	<b>2</b>	<b>3</b>	<b>2</b>	<b>2</b>
7. Report on overview of economic and social conditions in Africa to the Conference of African Ministers of Finance, Planning and Economic Development and Committee of Experts of the Economic Commission for Africa	–	1	–	1
8. Implementation reports on the African Union-United Nations Framework for the Implementation of Agenda 2063 and the 2030 Agenda for Sustainable Development	2	2	2	1
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> support for the implementation of the African Union-United Nations Framework for the Implementation of Agenda 2063 and the 2030 Agenda for Sustainable Development.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> advocacy and awareness-raising with member States.				

## Evaluation activities

15.24 The following self-evaluations completed in 2020 have guided the proposed programme plan for 2022:

(a) Final evaluation of the joint financial arrangement between ECA and the pooled fund partners;

(b) Final evaluation of the project to deepen African trade integration through effective implementation of the African Continental Free Trade Area, to support economic integration.

15.25 The findings of the self-evaluations referenced above have been taken into account for the proposed programme plan for 2022. For example, the evaluations identified systemic weaknesses in the theories of change that were applied in ECA projects, as they lacked robustness while in some cases missing altogether. Similarly, the evaluation findings noted that project monitoring and evaluation frameworks could be strengthened. To address these shortcomings, theory of change and monitoring and evaluation frameworks will be made mandatory in project documents. In the terms of reference of projects, the assessment phase will henceforth include

special emphasis on assessing the theory of change, along with the other evaluation criteria stipulated by the United Nations Evaluation Group prior to project approval. In that context, monitoring and reporting are being further strengthened through training measures for staff in results-based management and other skills. An internal online reporting system is currently being developed and will soon be rolled out.

15.26 While the joint financial arrangement between ECA and the pooled fund partners has been discontinued since the end of 2019, the recommendations from the end-of-project evaluation have provided valuable insights and lessons that ECA is actively incorporating in its future projects and programmes. The findings from the evaluation of the African Trade Policy Centre (ATPC) have resulted in the formulation of a gender strategy and recruitment of a full-time gender expert. Pursuant to another recommendation, a partnership strategy is currently being developed. To remedy the weakness of the programme review mechanism, quarterly review meetings have been organized since 2020 and, for ATPC, bimonthly team meetings are being organized. In addition, to improve overall monitoring and evaluation, a dedicated expert is being hired to strengthen all related aspects, including learning. Guidelines for national strategies for the operationalization of the African Continental Free Trade Area were revised in the light of recommendations and lessons learned from the evaluation, including the need to formulate criteria for the selection of countries to engage in the design of national strategies: such criteria have now been formulated.

15.27 The following self-evaluations are planned for 2022:

- (a) ECA support for member States in strengthening their national accounts;
- (b) Mainstreaming and outcomes of the Sustainable Development Goals in the ECA programme of work for 2018–2021;
- (c) Fifty-fourth session of the Economic Commission for Africa;
- (d) Eighth session of the Africa Regional Forum on Sustainable Development.

## **Programme of work**

### **Subprogramme 1**

#### **Macroeconomic policy and governance**

#### **Objective**

15.28 The objective, to which this subprogramme contributes, is to achieve structural transformation and inclusive growth in Africa through strengthened and effective development planning, macroeconomic policy analysis and enhanced public sector finance management and governance.

#### **Strategy**

15.29 To contribute to the objective, the subprogramme will develop knowledge products such as the annual editions of the Africa Sustainable Development Report and adopt and customize policy-relevant tools such as the integrated planning and reporting toolkit, to assist countries in the design, implementation and tracking of performance on national development plans that are aligned with the 2030 Agenda and Agenda 2063. The subprogramme will convene regional and expert group meetings for the dissemination of the knowledge products and exchange of experience and capacity-building in the area, and in addition the subprogramme also plans to

provide technical assistance and to mount country-specific initiatives to strengthen development planning institutions. The subprogramme will also continue to track progress towards the Sustainable Development Goals and fulfilment of Agenda 2063 through annual reports and convene meetings of least developed countries for policy dialogue and advice on country initiatives for the implementation of the new programme of action for least developed countries to be adopted at the Fifth United Nations Conference on the Least Developed Countries. The subprogramme will also support work to create a policy framework that ensures coherence, coordination and effective resource mobilization and allocation.

15.30 The subprogramme will produce knowledge and policy products, such as the Africa quarterly economic performance and outlook report and the Economic Report on Africa, convene and participate in various corporate conferences and workshops, such as the annual session of the Conference of African Ministers of Finance, Planning and Economic Development, and conduct capacity-building and advisory activities that foster the exchange of knowledge and ideas. This work will support member States in their progress towards the achievement of the Sustainable Development Goals. The subprogramme will also continue its support for member States through the development and implementation of economic models for forecasting and policy simulation, to assist in the design and implementation of evidence-based policies and plans.

15.31 The subprogramme will further undertake policy research and produce knowledge products such as the African Economic Governance Report, convene workshops and seminars and work with internal and external partners, such as the African Peer Review Mechanism and the Consortium on Illicit Financial Flows. This work will assist member States in their progress towards the achievement of Goals 16 and 17.

15.32 The subprogramme plans to support member States on issues related to COVID-19 by making use of the customized ECA macroeconomic models being developed and implemented to assess the impact of COVID-19, to feed into the countries' policy formulation and implementation processes. This will involve capacity-building and the findings and results of the impact of COVID-19 analysis will be presented to policymakers at expert group meetings.

15.33 The above-mentioned work is expected to result in:

- (a) A more coordinated and integrated approach to policy design and implementation;
- (b) The accelerated and sustainable graduation of African least developed countries;
- (c) The increased use of new ideas and macroeconomic modelling and forecasting tools in policy analysis, formulation and implementation, thereby fostering structural transformation and sustained inclusive growth;
- (d) The increased mobilization of domestic and international public resources for development and investment in priority areas.

## **Programme performance in 2020**

15.34 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Enhanced macroeconomic analysis in response to the COVID-19 pandemic

15.35 The subprogramme supported member States in assessing the economic impacts of COVID-19 in such countries as Ethiopia, Namibia and Rwanda. The subprogramme further developed and modified the country-specific models fed into the respective 2020 common country assessment reports with regard to the impact of COVID-19, led by resident coordinator offices.

#### *Progress towards the attainment of the objective, and performance measure*

15.36 The above-mentioned work contributed to the objective, as demonstrated by three countries (Ethiopia, Namibia and Rwanda) having taken steps to respond to the socioeconomic impacts of the COVID-19 pandemic, following the impact assessment through the use of the macroeconomic models (see figure 15.I). In Ethiopia, for example, the assessment led to the identification and development of a proposal on the bankable projects through which the United Nations could provide support to the Government. These areas include micro, small and medium-sized enterprises, job creation and agriculture and rural development. In Namibia, it fed into the country's Social Economic Response Plan, which is guiding United Nations support for the Government in its COVID-19 mitigation and recovery efforts.

Figure 15.I

**Performance measure: annual number of countries that have assessed the socioeconomic impacts of COVID-19**

### Impact of COVID-19 on subprogramme delivery

15.37 Owing to the impact of COVID-19 during 2020, the subprogramme had to postpone the first meeting of the Economic Governance Committee, which was planned to take place in 2020. The meeting was to be organized in response to the recommendation of the Conference of African Ministers of Finance, Planning and Economic Development at its fifty-second session, held in Marrakech, Morocco, in 2019. The subprogramme also modified the roll-out process of the integrated planning and reporting toolkit, converting it to a two-track approach. An online approach has been used to introduce the tool to member States, while a second track is followed, with hands-on training and face-to-face interactions. The face-to-face training sessions were deferred to after 2020. The subprogramme also changed the approach to the workshop on public finance, from a face-to-face format to a combination of virtual and online training. The online course on illicit financial flows was conducted in cooperation with subprogramme 8, attracting a higher number of participants from more countries, although concerns arose regarding the efficacy of the approach in building the capacity of the participants.

15.38 At the same time, however, the subprogramme adjusted some activities to support member States on issues related to COVID-19, within the overall scope of its objectives. The subprogramme changed its approach to the development and implementation of ECA modelling work to incorporate the assessment of the impact of the COVID-19 pandemic on the target countries. This led to the development and use of the macroeconomic model for assessing the impact of COVID-19 on Africa as a whole, and also on specific countries such as Ethiopia, Namibia and Rwanda, where the outputs from the modelling work have been used to inform policy through the countries' common country assessments under the countries' respective United Nations country teams. The subprogramme modified its advisory services, by use of webinars to support member States in leveraging public governance and spearheading innovative solutions such as information and communications technology and digital governance to address the COVID-19 pandemic. This led to an exchange of information among member States on best practices, identifying challenges and how to tackle them, including through peer support, to effectively meet the objectives of public responses to the pandemic.

15.39 In addition, the subprogramme contributed to new activities identified to support member States on issues related to COVID-19, within the overall scope of its objectives, namely the convening of African ministers of finance to discuss debt issues and initiatives such as the Group of 20 Debt Service Suspension Initiative and the sovereign debt restructuring mechanism; convening of a meeting on special drawing rights with ministers of finance and relevant stakeholders to deliberate on debt sustainability and restructuring; an African COVID-19 finance initiative; and the liquidity and sustainability facility for African sovereign bonds. All these activities led to the production of proposals on the general allocation of special drawing rights and the voluntary redistribution of existing special drawing rights from countries that do not require them to countries facing liquidity constraints. The new deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

### **Planned results for 2022**

15.40 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: macroeconomic model to inform policymaking and analysis<sup>1</sup>**

#### **Programme performance in 2020**

15.41 The subprogramme supported member States in the development and implementation of the countries' macroeconomic model for forecasting and policy simulation to aid in their policy formulation and implementation processes. The subprogramme also carried out capacity-building activities to enhance the modelling and economic analysis skills of member States. Furthermore, the subprogramme convened expert group meetings to share knowledge and experience with regard to modelling and economic analysis work in different countries.

15.42 The above-mentioned work contributed to 11 member States (Algeria, Burundi, Djibouti, Egypt, Ethiopia, Gambia, Ghana, Mauritania, Namibia, Rwanda and Zambia) leveraging the macroeconomic model for policy analysis and advice, which exceeded the planned target of nine member States reflected in the proposed programme budget for 2020.

---

<sup>1</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 18)).

### Proposed programme plan for 2022

15.43 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to provide technical support in terms of capacity-building in modelling and policy analysis and also convening of expert group meetings for knowledge-sharing in additional countries in the development and implementation of the macroeconomic model. The expected progress is presented in the performance measure below (see figure 15.II).

Figure 15.II

**Performance measure: total number of member States leveraging the macroeconomic model for policy analysis and advice (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 2: curbing illicit financial flows to enhance domestic resource mobilization<sup>2</sup>

#### Programme performance in 2020

15.44 The subprogramme worked with partners, namely the United Nations Conference on Trade and Development (UNCTAD) and the United Nations Office on Drugs and Crime (UNODC), to identify illicit financial flows in the statistical framework of the Sustainable Development Goals and develop a conceptual framework and measurement methodologies for such flows, thus enabling reporting on progress and promotion of indicator 16.4.1 of Goal 16 on the measurement of illicit financial flows from tier 3 to tier 2. ECA work on measuring trade misinvoicing, the largest commercial component, is a significant part of this conceptual framework and its methodologies, and will contribute to country strategies for curbing illicit financial flows.

15.45 The above-mentioned work contributed to the establishment of methodologies to measure the magnitude of illicit financial flows for Nigeria and the United Republic of Tanzania, which met the planned target reflected in the programme budget for 2021.

<sup>2</sup> As reflected in the programme budget for 2021 ([A/75/6/Add.1](#)).

### Proposed programme plan for 2022

15.46 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will roll out the conceptual framework, guidelines and measurement methodologies in member States and support the measurement, collection of information and reporting on the prevalence of illicit financial flows in each country, and also launch asset recovery initiatives. The expected progress is presented in the performance measure below (see figure 15.III).

Figure 15.III

**Performance measure: total number of countries that establish methodologies to measure the magnitude of illicit financial flows (as per indicator 16.4.1) (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: improved capacity in development planning for sustainable development and structural transformation in Africa

#### Proposed programme plan for 2022

15.47 Together with the 2030 Agenda and Agenda 2063, African countries have also committed themselves to implementing the Paris Agreement on climate change and the Sendai Framework on Disaster Risk Reduction. The need for the joint mainstreaming of global and continental development agendas in national policies and plans poses enormous challenges to African countries. The traditional planning approaches and tools available to countries have proved inadequate for integrating continental and international commitments in countries' planning and policy frameworks. Over the course of 2019 and 2020, the subprogramme provided capacity-building with a focus on the application and use of the integrated planning and reporting toolkit that helped countries to align their national development plans with the Sustainable Development Goals and Agenda 2063.

#### *Lessons learned and planned change*

15.48 The lesson for the subprogramme was that capacity-building in the use of development planning tools such as the integrated planning and reporting toolkit is optimized and more sustainable when it is carried out in partnership with institutions

such as the African Union Commission, the African Union Development Agency, the African Development Bank and the United Nations Development Programme (UNDP) and also in internal collaborative arrangements with enabling divisions on technology management and deployment and with subprogramme 4 on data management. The engagement of external partners ensured the comprehensive and successful delivery of the ECA integrated planning tools. In applying the lesson, the subprogramme will continue to forge partnerships with external partners and invest in dedicated integrated planning and reporting toolkit project managers at the subregional level for the parallel and accelerated deployment of planning tools. In 2022, the subprogramme will support member States in mainstreaming continental and global development agendas into their development plans, using sustainable development planning tools to seize opportunities for sustainable and inclusive growth. The development planning tools will support African countries in designing resilient national development plans by identifying and prioritizing high impact interventions through 2022 and beyond. To this end, the subprogramme will aim to roll out ECA development planning tools in 17 countries in Africa, doubling the number reached in 2020.

*Expected progress towards the attainment of the objective, and performance measure*

15.49 This work is expected to contribute to the objective, as demonstrated by 17 countries in 2022 using development planning tools to ensure alignment between national development plans, the continental development agenda – Agenda 2063 – and global development agendas – the Sustainable Development Goals (see figure 15.IV).

Figure 15.IV

**Performance measure: total number of countries adopting development planning tools (cumulative)**

## Legislative mandates

15.50 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolutions*

48/180

Entrepreneurship and privatization for economic growth and sustainable development

51/191

United Nations Declaration against Corruption and Bribery in International Commercial Transactions

54/128	Action against corruption	65/313	Follow-up to the Conference on the World Financial and Economic Crisis and its Impact on Development
54/197	Towards a stable international financial system, responsive to the challenges of development, especially in the developing countries	65/314	Modalities for the fifth High-level Dialogue on Financing for Development
58/4	United Nations Convention against Corruption	66/209	Promoting the efficiency, accountability, effectiveness and transparency of public administration by strengthening supreme audit institutions
60/34	Public administration and development		
64/116	The rule of law at the national and international levels	66/213	Fourth United Nations Conference on the Least Developed Countries
65/123	Cooperation between the United Nations, national parliaments and the Inter-Parliamentary Union	66/256	The United Nations in global governance
		73/63	Preventing and combating illicit brokering activities
65/286	Implementing the smooth transition strategy for countries graduating from the list of least developed countries		

### *Economic and Social Council resolutions*

2005/3	Public administration and development	2008/18	Promoting full employment and decent work for all
--------	---------------------------------------	---------	---

### *Economic Commission for Africa resolutions*

862 (XLII)	Enhancing domestic resource mobilization	896 (XLV)	Illicit financial flows from Africa
865 (XLII)	Global financial and economic crisis	916 (XLVII)	Illicit financial flows
879 (XLIV)	Governing development in Africa: the role of the State in economic transformation		

## Deliverables

15.51 Table 15.2 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 15.2

### Subprogramme 1: deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>1</b>	<b>1</b>	<b>1</b>	<b>1</b>
1. Report on overview of economic and social conditions in Africa to the Conference of African Ministers of Finance, Planning and Economic Development and Committee of Experts of the Economic Commission for Africa	1	1	1	1
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>4</b>	–	–	–
2. Committee on Economic Governance	4	–	–	–
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>2</b>	<b>2</b>	<b>6</b>	<b>11</b>
3. Project on illicit financial flows from Africa	1	1	1	1
4. Development, customization and training in the use of the ECA macroeconomic model for selected countries	–	–	4	4

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
5. Roll-out of the integrated planning and reporting toolkit and continued support for countries that have deployed the tool	–	–	–	5
6. Internship and fellowship programme for young African economists to build their capacity to formulate, implement and monitor development policies and programmes	1	1	1	1
<b>Seminars, workshops, fellowships and training events</b> (number of days)	<b>6</b>	<b>6</b>	<b>2</b>	<b>2</b>
7. Macroeconomic modelling workshop – to share experiences between African policymakers and experts on macroeconomic modelling	2	2	2	2
8. Training workshop on public finance in Africa	2	2	–	–
9. Seminar on development planning tools	2	2	–	–
<b>Publications</b> (number of publications)	<b>2</b>	<b>2</b>	<b>3</b>	<b>2</b>
10. Africa Sustainable Development Report	1	1	1	1
11. Economic Report on Africa	1	1	1	1
12. African Economic Governance Report	–	–	1	–
<b>Technical materials</b> (number of materials)	<b>10</b>	<b>10</b>	<b>10</b>	<b>10</b>
13. Policy briefs on emerging economic issues and challenges to growth and development in Africa	3	3	3	3
14. Research papers on emerging issues related to macroeconomic analysis, economic governance and public finance	3	3	3	3
15. Africa quarterly economic performance and outlook report	4	4	4	4
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> advisory services to five member States on emerging macroeconomic and governance issues and development planning; technical support to the African Peer Review Mechanism secretariat in the area of country self-assessments and integration of outcomes from the assessments into national development plans and related processes.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> organization of the annual African Economic Conference, which serves as a platform for deliberating emerging economic issues in Africa.				
<b>Digital platforms and multimedia content:</b> in the area of development planning, the 2030 Agenda and Agenda 2063.				

## Subprogramme 2

### Regional integration and trade

#### Objective

15.52 The objective, to which this subprogramme contributes, is to strengthen regional cooperation and integration among member States through increased trade flows, improved industrialization and increased investments.

#### Strategy

15.53 To contribute to the objective, the subprogramme will continue to work with the African Union Commission, the resident coordinator offices and UNCTAD, and also with development partners, to support member States in securing market access and business opportunities from the African Continental Free Trade Area while minimizing any potential adverse effects (import surges, dumping, customs revenue loss risks) in the context of the agendas of the African Union, regional economic communities and World Trade Organization (WTO)-related and other multilateral and

bilateral trade issues such as regional trade protocols, the African Growth and Opportunity Act and economic partnership agreements.

15.54 The subprogramme will also provide technical assistance for the implementation of the African digital transformation strategy at the policy levels as the common digitization agenda for the continent. Furthermore, the subprogramme will leverage the policy findings of the subprogramme's key knowledge products at meetings and workshops.

15.55 The subprogramme will further develop and disseminate policy tools, instruments and guidelines and help to identify opportunities for diversification, value addition and the development of manufacturing and industrial clusters for member States in support of the Action Plan for the Accelerated Industrial Development of Africa, contributing to the achievement of Sustainable Development Goal 9. It will also provide technical support to member States.

15.56 In addition, the subprogramme will organize training courses to aid the programmes of work of member States (in particular the landlocked developing countries and regional economic communities) for the implementation of existing regional cooperation frameworks such as the Action Plan for Boosting Intra-African Trade, the Action Plan for the Accelerated Industrial Development of Africa and the Programme for Infrastructure Development in Africa.

15.57 The subprogramme will provide advisory services to member States on strengthening the formulation and implementation of national, regional and continental competition policies, intellectual property policies and measures for investment facilitation. The subprogramme will also provide advisory services and training for negotiators on the Agreement Establishing the African Continental Free Trade Area in the light of the second phase of Agreement issues, in order to equip them with up-to-date knowledge of policies in the areas of competition, investment and intellectual property.

15.58 The subprogramme will provide advisory services and technical assistance to member States and regional economic communities to address bottlenecks to integration, such as poor design and sequencing of regional integration arrangements, the multiplicity of the schemes and barriers to trade and investment, through the formulation and dissemination of policy recommendations for the harmonization and mainstreaming of multiple regional integration protocols, regulations and policies into national laws and plans.

15.59 The subprogramme plans to support member States on issues related to COVID-19 by disseminating evidence-based analysis with recommendations on building forward and building better and supporting requesting member States to implement them. In addition, and in the context of the formulation and implementation of African Continental Free Trade Area strategies, the subprogramme will integrate recommendations on responding to the impacts of COVID-19 on trade and supporting requesting member States in their efforts to implement these recommendations.

15.60 The above-mentioned work is expected to result in:

- (a) Countries implementing their respective African Continental Free Trade Area strategies;
- (b) Improvement in the ways in which both the public and the private sector operate;

(c) A more coherent, coordinated and responsive interface between the African Continental Free Trade Area and the free trade areas and customs unions of the regional economic communities;

(d) Policy coherence and the alignment of trade and industrialization policies with the 2030 Agenda and Agenda 2063;

(e) Diversification of productive capacities and production patterns, thereby contributing to the acceleration of industrialization in Africa;

(f) Reduced transaction risks and intermediation costs and strengthened engagement with the private sector;

(g) Enhanced opportunities for private sector operators to leverage transboundary opportunities, creating a more business-friendly African single market, and ensuring improved market access conditions for African exports.

15.61 The planned support on issues related to COVID-19 is expected to result in informed policy decisions by member States and advocacy efforts around continental strategic initiatives, such as the African Continental Free Trade Area, and in overall support of the African continent.

## **Programme performance in 2020**

15.62 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Integrated COVID-19 analysis and recommendations in African Continental Free Trade Area strategies**

15.63 In the context of the start of trade under the Agreement Establishing the African Continental Free Trade Area in January 2021 (previously planned for July 2020), the subprogramme has been building countries' readiness with technical support upon requests for the development of African Continental Free Trade Area strategies. These strategies would not be pertinent without the integration of COVID-19 analysis and recommendations relating to trade and the African Continental Free Trade Area. In 2020, the subprogramme contributed to adapting such strategies with analysis and recommendations to tackle COVID-19 effects relating to, among others, macroeconomic frameworks, COVID-19 trade implications such as reduced cross-border trade, reduced tourism and trade-related transport or trade-related employment, while highlighting immediate COVID-19-related trade priorities such as creating special lanes for the fast customs clearance of medical supplies, leveraging the standards and guidelines for medical supplies, masks, disinfectants and protective equipment that have been made freely available and facilitating safe fish and land-border trade.

#### *Progress towards the attainment of the objective, and performance measure*

15.64 The above-mentioned work contributed to the objective, as demonstrated by two countries (Mauritania and Sierra Leone) integrating COVID-19 analysis and recommendations in their African Continental Free Trade Area strategies with short-term and medium-term analysis regarding macroeconomic frameworks and recommendations on using trade to address COVID-19 challenges (see table 15.3).

Table 15.3  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
—	—	Two countries (Mauritania and Sierra Leone) integrated COVID-19 analysis in their African Continental Free Trade Area strategies with short-term and medium-term analysis regarding macroeconomic frameworks and recommendations on using trade to address COVID-19 challenges

*Impact of COVID-19 on subprogramme delivery*

15.65 Owing to the impact of COVID-19 during 2020, the subprogramme cancelled the validation of two African Continental Free Trade Area strategies (Chad and Djibouti), and also the development of electronic investment guides. The subprogramme also postponed the delivery of electronic investment guides for requesting member States owing to the lack of access to primary data in the context of COVID-19 travel restrictions. Where the approach was concerned, the subprogramme changed its mode of delivery, with the organization of three online expert group meetings. In addition, the subprogramme also changed its approach by increasing its reliance on national consultants, backed by ECA subregional offices, who led work on the ground. This change was necessitated by international travel restrictions that impeded the travel of the ECA staff members who had been leading and supporting technical support remotely with consultations by telephone or over the Internet. These changes had an impact on the programme performance in 2020, as specified under results 1 and 2 below.

15.66 At the same time, however, the subprogramme identified new activities to support member States on issues related to COVID-19, within the overall scope of its objectives, namely with the organization of 12 webinars to discuss and agree on trade, industrialization and investment approaches to tackle the impact of COVID-19 and to build forward and better. The latter measure was coupled with knowledge products outlining evidence-based recommendations linking the objective of the subprogramme with issues related to the COVID-19 pandemic. The new deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

**Planned results for 2022**

15.67 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

## **Result 1: ratification, incorporation and implementation of the African Continental Free Trade Area<sup>3</sup>**

### **Programme performance in 2020**

15.68 The subprogramme continued its awareness-raising work with member States in order to increase the number of countries ratifying the African Continental Free Trade Area. The subprogramme organized two national forums, drafted targeted policy briefs and provided technical support to prepare countries for the African Continental Free Trade Area. It conducted advocacy with high-level policymakers which contributed to the ratification of the Agreement Establishing the African Continental Free Trade Area by Nigeria on 11 November 2020. In addition, the subprogramme delivered technical support to requesting member States geared in particular to enhancing their understanding of the modalities of acceding to the Agreement and the economic and social implications of such accession.

15.69 In 2020, four African Continental Free Trade Area strategies were developed and validated by the Gambia, Mauritania, Senegal and Sierra Leone. The strategies outlined ways for these countries to harness the full benefits of the African Continental Free Trade Area through the identification of comparative and competitive advantages and also through the key value addition of trade and investment opportunities. The national African Continental Free Trade Area strategies analyse synergies between plans and policies (including national development plans and trade, industrial, infrastructure, education, macroeconomic, investment, social and other policies) and identify gaps, while making tailored recommendations for their implementation. Moreover, where the African Continental Free Trade Area is concerned, the subprogramme also contributed to disseminating technical presentations, discussions in various e-forums and webinars and knowledge products such as the report *Assessing Regional Integration in Africa IX*, and also papers on COVID-19 implications and trade to prepare countries for the start of trading under the Agreement Establishing the African Continental Free Trade Area in January 2021.

15.70 The above-mentioned work contributed to the expansion of intra-African trade as a proportion of the total trade of Africa to the level of 16.3 per cent, which did not meet the target of 17.6 per cent reflected in the proposed programme budget for 2020. Attainment of that target was impeded by the COVID-19 pandemic, which delayed the start of the African Continental Free Trade Area originally scheduled for July 2020 and rescheduled to January 2021.

### **Proposed programme plan for 2022**

15.71 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will formulate strategies with COVID-19 perspectives and assist member States in implementing them. Consequently, strategies that were produced before the pandemic will be updated in order to include recommendations bearing COVID-19 responses from a trade perspective. The expected progress is presented in the performance measure below (see figure 15.V).

<sup>3</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 18)).

Figure 15.V

**Performance measure: share of intra-African trade in the total trade of Africa (annual)**

(Percentage)

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: making the most of the African Continental Free Trade Area<sup>4</sup>**

### **Programme performance in 2020**

15.72 The subprogramme has continued, in collaboration with the African Union Commission, the regional economic communities and the United Nations resident coordinator offices and country teams, to pursue efforts to build a coalition around the African Continental Free Trade Area of Governments, the media, the private sector and civil society in general, including women and youth groups, to give them a better understanding of what is at stake for their respective countries with the Agreement establishing the Area and to make the most out of the Agreement in their respective fields. The subprogramme has also held consultations in Burkina Faso, Burundi, the Gambia, Mauritania, Mauritius, Rwanda, Senegal, Sierra Leone and the Sudan. Furthermore, to assess the understanding of the African Continental Free Trade Area gained by participants through these consultations, the subprogramme ran a survey, which indicated that an average of 87.2 per cent of participants had grasped the implications of the Area for their respective sectors.

15.73 Owing to the impact of COVID-19 on data collection and reporting processes, the actual data for 2020 were not available at the time of publication. In consequence, the subprogramme is not able to report the actual performance in 2020 in the context of the proposed programme budget for 2022. The actual performance in 2020 will be presented in the context of proposed programme budget for 2023.

### **Proposed programme plan for 2022**

15.74 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective and in response to recent developments, the subprogramme's work will evolve to include the challenges to the African Continental Free Trade Area in a post-COVID-19 pandemic world in 2022. The subprogramme will continue to advocate adherence to the African Continental Free Trade Area as a framework for responding to the effects of the

<sup>4</sup> As reflected in the programme budget for 2021 ([A/75/6/Add.1](#)).

pandemic; it will also involve the formulation and implementation of African Continental Free Trade Area strategies with a COVID-19 response from a trade perspective and the implementation of an African country business index in six pilot countries. The expected progress is presented in the updated performance measure below (see figure 15.VI).

Figure 15.VI

**Performance measure: total number of countries that increased their ratio of intra-African trade to their total trade (cumulative)**

<sup>a</sup> Data on the number of countries that increased the ratio of their intra-African trade to their total trade are not yet available. These figures will be presented in the context of the proposed programme budget for 2023.

<sup>b</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: member States adopt and implement recommendations for increasing regional integration**

#### **Proposed programme plan for 2022**

15.75 Relevant and implementable knowledge products on regional integration in Africa help to boost the capacity of member States to adopt and implement policies in support of their respective development agendas. The subprogramme disseminated the report *Assessing Regional Integration in Africa IX*, which focuses on analysing the next steps for the African Continental Free Trade Area and includes the recommendation to develop African Continental Free Trade Area strategies. Subsequent to the issuance of the report, the subprogramme worked with 38 countries and three regional economic communities, in response to their request, on the development and implementation of African Continental Free Trade Area strategies.

#### *Lessons learned and planned change*

15.76 The lesson for the subprogramme was an increased demand by stakeholders and member States for subregional level coordination and more timely response to requests, notably in the context of the COVID-19 pandemic. The subprogramme benefited from the respective subregional networks of the Commission's subregional offices and their proximity with respective stakeholders when implementing technical cooperation. In addition, such coordination facilitated faster responses in the field, including in the synergies built with the United Nations resident coordinator offices and country teams. In applying the lesson, the subprogramme will consolidate this mechanism and devolve part of its technical and administrative processes to subregional offices. Such devolution is expected to result in closer outreach to member States and regional economic communities through the respective

intergovernmental committees of senior officials and experts, workshops and dialogues on regional integration, aimed at disseminating subregional focused recommendations from the tenth report in the *Assessing Regional Integration in Africa* series and to provide closer follow-up to technical support requests with implementation support from ECA headquarters.

*Expected progress towards the attainment of the objective, and performance measure*

15.77 This work is expected to contribute to the objective, as demonstrated by 30 member States adopting and 20 member States implementing recommendations from the report *Assessing Regional Integration in Africa X* (see figure 15.VII).

Figure 15.VII

**Performance measure: total number of member States that adopt and implement recommendations from the report *Assessing Regional Integration in Africa X* (cumulative)**

## Legislative mandates

15.78 The list below provides all mandates entrusted to the subprogramme.

### *General Assembly resolutions*

70/115	Report of the United Nations Commission on International Trade Law on the work of its forty-eighth session	74/301	New Partnership for Africa's Development: progress in implementation and international support
70/293	Third industrial development decade for Africa (2016–2025)	74/204	Commodities

### *Economic and Social Council resolutions*

2017/11	Social dimensions of the New Partnership for Africa's Development
---------	---

### *Economic Commission for Africa resolutions*

847 (XL)	Aid for trade	891 (XLV)	Accelerating regional integration and boosting intra-African trade
867 (XLIII)	Assessment of progress on regional integration in Africa	907 (XLVI)	Industrialization for an emerging Africa
		914 (XLVII)	African regional integration index

922 (XLVII)	Industrialization for inclusive and transformative development in Africa	960 (LI)	Harnessing the potential of the African Continental Free Trade Area and creating fiscal space for jobs and economic diversification
934 (XLVIII)	Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024		

## Deliverables

15.79 Table 15.4 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 15.4

### Subprogramme 2: deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>3</b>	<b>2</b>	<b>3</b>	<b>2</b>
1. Report on the session of the Committee on Regional Cooperation and Integration on levelling the playing field for intra-African investment with a view to sharing best practices among member States	1	–	1	–
2. Updates on the status of international and intra-African trade for the Committee on Regional Cooperation and Integration	1	1	1	1
3. Report on the status of the implementation of the Vienna Programme of Action for the Conference of African Ministers of Finance, Planning and Economic Development	1	1	1	1
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>3</b>	<b>–</b>	<b>3</b>	<b>–</b>
4. Meeting of the Committee on Regional Cooperation and Integration	3	–	3	–
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>3</b>	<b>7</b>	<b>4</b>	<b>7</b>
5. Project on boosting intra-African trade through enhancing the capacity of member States and regional economic communities to increase the African share of international trade	1	1	1	1

<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> advisory services in response to the needs expressed by all 54 member States and regional or subregional cooperation groups in the context of the New Partnership for Africa's Development (NEPAD) and the Framework for a Renewed United Nations-African Union Partnership on Africa's Integration and Development Agenda 2017–2027; analytical support for the Vienna Programme of Action; maintenance of the Observatory on Regional Integration in Africa.				
<b>D. Communication deliverables</b>				
Outreach programmes, special events and information materials: communication materials on regional integration and trade; information kits on the activities of the African Trade Policy Centre; high-level policy dialogue on trade.				
Digital platforms and multimedia content: maintenance of the observatory on regional integration in Africa.				

### Subprogramme 3

#### Private sector development and finance

#### Objective

15.80 The objective, to which this subprogramme contributes, is to enhance the business environment to leverage the role of the private sector and its investments in the economic growth and transformation of Africa, to improve land-tenure security, in particular for women, and to enhance innovative private sector financing and investment for infrastructure, energy and services, and agriculture.

#### Strategy

15.81 To contribute to the objective, the subprogramme will provide advisory services and technical assistance to member States to implement the 2014 Malabo Declaration on Accelerating Agricultural Growth and Transformation for Shared Prosperity and Improved Livelihoods and associated frameworks. In collaboration with other United Nations entities and strategic partners, the subprogramme will address the impacts of the COVID-19 pandemic on food security and agriculture. It will produce knowledge products with policy recommendations and offer advisory services and technical assistance to member States in regionally integrated

agricultural value chains, agricultural financing, climate change management, other risks and agribusiness and agro-industrial development. The subprogramme will convene member States and other stakeholders with a view to advocating adoption of the recently endorsed African Union guidelines on the development of regional agricultural value chains and the continental agribusiness strategy and providing technical assistance to member States in this regard.

15.82 The subprogramme will further support member States in implementing the African Union Declaration on Land Issues and Challenges in Africa, in particular by improving women's tenure security to meet the target set by the Specialized Technical Committee on Agriculture, Rural Development, Water and Environment of the African Union Commission. The target is to allocate 30 per cent of land rights to women by 2025. The subprogramme will also provide technical capacity and training on applying the African Union guidelines on large-scale land-based investments to promote responsible land-based investments in support of agriculture and infrastructural development.

15.83 The subprogramme will support efficient, equitable and sustainable private sector participation in infrastructure and create an agribusiness environment conducive to crowding in private capital sector financing. Furthermore, the subprogramme will provide technical assistance to overcome tenure insecurity and gender biases and youth marginalization in land and property rights systems. The subprogramme will support member States in making progress towards Sustainable Development Goals 1 and 5 by facilitating equal rights to ownership and control over land and property.

15.84 The subprogramme will continue to support member States and market participants in exploring investment and co-investment opportunities in infrastructure, real estate, and other sectors in close cooperation with pension funds, asset management firms, private equity and financial institutions. The subprogramme will also provide technical assistance and disseminate best practices to member States with a view to identifying priority growth sectors and developing and implementing policies, strategies and programmes that will improve their competitiveness, attract investment and stimulate entrepreneurship. The programme will also support member States in developing and deepening their domestic debt markets as a sustainable method of mobilizing additional resources for development financing needs. Deepening domestic debt markets will also allow Governments to maintain fiscal stability and reduce their debt burden and reliance on foreign debt borrowing that puts economies under strain, in particular for countries exposed to currency risks.

15.85 The subprogramme will promote women's economic and financial empowerment by supporting African women entrepreneurs and fund managers in developing an innovative financing platform that will help crowd in capital and promote the growth of women-owned or women-led companies. By leveraging these innovative financing instruments, the subprogramme will support member States in making progress towards Goals 1, 5, 8, 9, 11 and 17.

15.86 The subprogramme will further continue to work with the African Union Commission, the African Union Development Agency, the African Development Bank and regional economic communities in operationalizing priority plan II of the Programme for Infrastructure Development in Africa, assisting with technical analysis. In particular, transport and energy and African infrastructure have been affected by the COVID-19 pandemic, as travel restrictions had impacts on the global supply chain and the manufacture of energy products. The subprogramme will support the development of home-grown solutions for Africa. Accordingly, it will step up its work with member States, regional partners and international organizations in developing and disseminating regulatory tools and frameworks, along with best

practices in public-private partnership models that attract private sector participation and investment in energy infrastructure. Furthermore, in collaboration with international partners and regional entities, the subprogramme will continue to advocate private capital support for existing and new rail projects in Africa, owing to the importance of rail as a cheaper, more efficient, safer and environmentally friendly mode of transport. This advocacy will include encouraging member States to ratify the Luxembourg Protocol to the Convention on International Interests in Mobile Equipment on Matters specific to Railway Rolling Stock, which facilitates increased and cheaper finance from the private sector to support much-needed new rolling stock procurement. Furthermore, the subprogramme will provide policy advisory services and technical assistance to member States on the implementation of the single African air transport market and efforts to improve road safety in Africa and to digitalize the continent's transport sector.

15.87 The subprogramme plans to support member States on issues related to COVID-19 by collaborating with strategic partners in ensuring that the deliverables contribute to enhancing the capacity of member States to provide viable and sustainable post-COVID-19 pandemic solutions enabling African economies to build back better. By providing advisory services and technical assistance to the member States in developing resilient transport infrastructure and services, the subprogramme will contribute to building the continent's capacity for a rapid response to health and economic crisis, such as those triggered by the COVID-19 pandemic.

15.88 The above-mentioned work is expected to result in:

- (a) Improved standing of Africa in the global business environment rankings by promoting the role of the private sector and facilitating its investments in agriculture, energy, infrastructure and other sectors of the economy;
- (b) Improved competitiveness, productivity, value addition and trade in agricultural goods and services through the development of regional agricultural value chains in line with the appropriate African Union guidelines and continental agribusiness strategy;
- (c) Improved policy and regulatory reforms and effective land administration through the conduct of research and analysis, dissemination of best practices, advocacy and provision of technical assistance to member States in accordance with the African Union framework and guidelines on land policy in Africa and the guiding principles for large-scale land-based investments in Africa;
- (d) Enhanced accessibility of credit in contexts where land can be used as collateral, and strengthened ability of women to enter into agricultural contracts in mutually beneficial land-based investment models;
- (e) Reduced inefficiencies and expenditure of time and money on securing land and other property rights, in particular the issuance of certificates and title deeds to facilitate lending;
- (f) Climate conducive to improved access to markets and a diversified investors' base with an increased appetite for domestic currency debt markets;
- (g) Innovative strategies to mobilize capital both domestically and internationally (through venture capital, private equity, and impact investment), with the potential to scale up and ensure an economic impact;
- (h) Implementation of an increased number of energy projects by member States and the attainment of the strategic programme direction, in particular, the implementation of innovative financing for infrastructure for the transformation of Africa, advocacy of the African position at the global level and the development of regional responses;

(i) Deepened regional integration and enhanced intra-African trade, in the context of the Agreement Establishing the African Continental Free Trade Area and Agenda 2063, through reduced transport costs resulting from the implementation of good quality cross-border transport infrastructure projects;

(j) Enhanced connectivity and reduced cost of air transport in Africa in the context of the single African air transport market, thereby creating jobs and contributing to the continent's economic development;

(k) Increased efficiency of the African rail sector, including through cheaper finance from the private sector to support rolling stock procurement;

(l) reduced road fatalities and injuries and cost of road crashes to African economies.

15.89 The planned support on issues related to COVID-19 is expected to result in:

(a) Implementation by member States of COVID-19 recovery action plans at the national and regional levels, in particular for the African aviation and logistics sectors;

(b) Survival, recovery and sustainability of the transport, logistics and energy sectors from the adverse impact of the pandemic.

## **Programme performance in 2020**

15.90 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Increased resilience of agriculture and food systems in response to COVID-19**

15.91 As a result of COVID-19, gross domestic product (GDP) growth in Africa is estimated to have contracted by 1.8 percentage points in 2020, causing the continent's first recession in 25 years. Those in vulnerable situations, in particular, the landless, day labourers, female-headed households and small-scale producers and enterprises, have been hard hit. The number of those who live in extreme poverty is expected to have increased by 29 million, adding to the nearly 450 million persons living on under \$1.9 per day. The food security impact of COVID-19 could be further aggravated by economic shocks, including commodity price declines, low export demand, low local consumption, drought and other phenomena, such as locust invasions.

15.92 In its awareness of the extreme uncertainty about the path, duration, magnitude and impact of the pandemic on African economies, the subprogramme has committed itself, along with partners, including Afreximbank and the African Union Commission, to a series of emergency interventions to assist African countries in developing a rapid response to the supply and policy gaps in food and critical medical items needed to combat the COVID-19 pandemic in Africa. To this end, the subprogramme has provided technical assistance to Afreximbank to develop and establish a food security component within the jointly established Pandemic Trade Impact Mitigation Facility to help African countries to manage the food security implications of the COVID-19 pandemic. The subprogramme has further provided technical assistance to member States in the development of bankable projects. To identify priority countries for intervention and an optimal operation modality for the Facility's food security component, the subprogramme convened a series of stakeholders meeting, including major players in African agriculture.

*Progress towards the attainment of the objective, and performance measure*

15.93 The above-mentioned work contributed to the objective, as demonstrated by the Government of Guinea receiving, within the food security component of the Pandemic Trade Impact Mitigation Facility, a trade credit of \$14 million furnished to the country's Chamber of Agriculture. The allocated trade credit is intended to strengthen the Guinean post-COVID-19 recovery and resilience programme, which aims to ensure food security through the rapid boosting of agricultural productivity and production by securing imports of agricultural inputs such as seeds, pesticides and fertilizers (see table 15.5).

Table 15.5  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
Technical guide for the development of land policy developed and the Agricultural Policy Act reviewed to mainstream land governance in Guinea, informed by the African Union guidelines on large-scale land-based investments	Technical guide for policy and legislative reform approved and endorsed by the Government of Guinea as a basis for policy review, to provide an enabling environment for land-based agricultural investments	Government of Guinea received, within the food security component of the Afreximbank Pandemic Trade Impact Mitigation Facility, a trade credit of \$14 million furnished to the Chamber of Agriculture to mitigate the impact of the COVID-19 pandemic on agriculture and food security

**Impact of COVID-19 on subprogramme delivery**

15.94 Owing to the impact of COVID-19 during 2020, the subprogramme cancelled workshops in selected African member States. These workshops were aimed, first, at strengthening the capacity of African regulators and investors to tackle issues and procedures related to the development of capital markets; and, second, at enhancing the capacity of African policymakers and insurance practitioners in respect of policies, tools and practice for risk modelling in the agricultural insurance sector in Africa. The subprogramme postponed a number of deliverables, including workshops for curricula development and review to be held with universities in Liberia and South Sudan; a policy dialogue with vice-chancellors on enhancing the quality of land governance training and research programmes in Africa; and training on the application of African Union and United Nations guidelines and instruments to improve land governance. There was also a delay in several other outputs due to the necessity to reprogramme, including the study report and policy briefs on the mapping of land-based investment opportunities for agriculture and agribusiness in Africa; the report on challenges and opportunities relating to agro-industrial park development in Africa; the report on the assessment of potential for enhancing agriculture and weather index insurance in Africa; and the launch of the Africa regional overview of food security and nutrition. The quality of these reports may be affected as primary data collection was not possible because of travel restrictions.

15.95 At the same time, however, the subprogramme identified new activities to support member States on issues related to the COVID-19 pandemic, within the overall scope of its objectives, namely to enhance the business environment to leverage the role of the private sector and its investments in the economic growth and transformation of Africa, to improve land tenure security, in particular for women, and to enhance innovative private sector financing and investment for infrastructure,

energy and services, and agriculture. The new deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

## **Planned results for 2022**

15.96 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: strengthened business environment for private sector investments in energy and infrastructure development<sup>5</sup>**

#### **Programme performance in 2020**

15.97 The subprogramme has applied the new regulatory review methodology and tool to assess the readiness of 11 African countries for private sector investments in the energy sector. In partnerships with the African Union Commission, the African Development Bank and the African Union Development Agency, the subprogramme also assisted regional economic communities and member States in identifying priority infrastructure projects that will be supported by the Programme for Infrastructure Development in Africa until and including 2030. It also developed a common African strategy to engage with external partners in infrastructure investment. The subprogramme provided technical advisory services on energy project finance in Angola, Eritrea and Ethiopia. All these interventions, in particular support in the regulatory assessment of the electricity sector in 11 countries and advisory services in Angola, Eritrea and Ethiopia, strengthened the energy planning units in these countries. The subprogramme also undertook activities to address the financing of and improve efficiencies in the transport sector. Furthermore, the subprogramme responded to the COVID-19 pandemic and produced several deliverables that assess the pandemic's impact on the aviation industry, African ports, cross-border trade protocols, the introduction of cashless transport services and the energy sector.

15.98 The above-mentioned work contributed to the institution by 11 member States of energy planning units in their respective line ministries and government agencies, which exceeded the planned target of 10 member States reflected in the proposed programme budget for 2020. In addition, nine countries (Angola, Ethiopia, Ghana, Kenya, Mauritania, Morocco, Rwanda, South Africa and Zambia) pledged in validation meetings to have off-grid (mini-grid) units within their energy ministries to address rural electrification.

#### **Proposed programme plan for 2022**

15.99 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective and in response to recent developments, the subprogramme's work will evolve to include developing methodologies and tools to assist countries in improving energy regulations to enhance private sector investment in the energy sector, and also to instigate a continental approach that would be endorsed by the African Union Assembly. The subprogramme plans to review regulatory frameworks with a focus on the impediments along the different parts of the energy value chain that continue to prevent investments (namely, transmission and distribution, and off-grid energy) with a view to providing member States with options and possible ways of surmounting these impediments. The expected progress is presented in the updated performance measure below (see table 15.6).

<sup>5</sup> As reflected in the proposed programme budget for 2020 ([A/74/6 \(Sect. 18\)](#)).

Table 15.6  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
One member State instituted an energy planning unit in its respective line ministry/government agency	Three member States instituted energy planning units in their respective line ministries/government agencies	<ul style="list-style-type: none"> <li>Eleven member States instituted energy planning units in their respective line ministries/government agencies</li> <li>Nine countries (Angola, Ethiopia, Ghana, Kenya, Mauritania, Morocco, Rwanda, South Africa and Zambia) pledged in validation meetings to have off-grid (mini-grid) units within their energy ministries to address rural electrification</li> </ul>	<ul style="list-style-type: none"> <li>Eleven member States institute energy planning units in their respective line ministries/government agencies (achieved in 2020)<sup>a</sup></li> <li>Seven additional countries (Cameroon, Côte d'Ivoire, Egypt, Mozambique, Senegal, Seychelles and Uganda) strengthen their power sector planning for private sector investments, including mini-grids</li> </ul>	Of the 16 countries that validated the regulatory review, 5 adopt the continental framework on private sector investments in the energy sector

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: enhancing investment in energy infrastructure through land policy reforms<sup>6</sup>

### Programme performance in 2020

15.100 The subprogramme has developed a regulatory methodology that investigates the effectiveness of the electricity sector policy and regulatory frameworks to attract private investments. The methodology tool takes on the investor's perspective and investigates fundamental policy and regulatory elements which constitute an enabling framework for scaling up investments in new electricity infrastructures. Given the growing demand for agriculture, energy and infrastructure on the one hand, and the underlying structural challenges preventing the growth of these crucial sectors on the other, the subprogramme promoted land governance frameworks that improve conditions for land-based investments conducive to inclusive private investments. This included development of a mapping tool to map opportunities for land-based investments with application in Malawi. The tool supports the negotiation of land deals for agriculture and biofuels, and also the exploration and extraction of oil, gas, and geo-thermal resources, the harnessing of hydrological, wind, and to some extent solar power. The subprogramme also provided capacity-building to the relevant member States' institutions in the application of the African Union framework and

<sup>6</sup> As reflected in the programme budget for 2021 ([A/75/6/Add.1](#)).

guidelines on land policy in Africa and the guiding principles for large-scale land-based investments in Africa.

15.101 The above-mentioned work contributed to the regulatory review of the power sector by 10 member States (Angola, Cameroon, Ethiopia, Ghana, Kenya, Mauritania, Senegal, Seychelles, South Africa and Zambia), which exceeded the planned target of eight reflected in the programme budget for 2021.

#### **Proposed programme plan for 2022**

15.102 The subprogramme will continue the work related to the planned result, in line with its mandate. In contributing to further progress towards the objective, the subprogramme will ensure the harmonization of power sector regulatory frameworks with land policies to speed up the implementation of transformative projects. Even if power sector regulations are in effect, poor land governance and the resulting high transaction costs of securing rights, poor land use and environmental management hamper the growth of the energy sector. The subprogramme will therefore identify specific gaps in policy, legal and legislative frameworks and provide technical assistance to effect changes in land and energy strategies and frameworks to reduce the loss of land and social dislocation of local communities in the context of land-based investments for energy and, in particular, to prevent potential disruption to food systems and production, to reduce environmental degradation and to mitigate the effects of climate change. In 2022, the subprogramme will build on the knowledge generated in 2021 to develop guidelines that will form the basis for reforms in the energy and land sectors, in particular the harmonization of policies and legislation and programmes to promote energy and related infrastructural investments. The expected progress is presented in the performance measure below (see table 15.7).

Table 15.7

#### **Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
—	—	Ten countries reviewed their power sector regulatory frameworks and identified non-energy barriers affecting their implementation	Four countries (out of eight) align their land policies with the energy sector	Three additional countries harmonize land and energy policies and strategies

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: increased access to financing for infrastructure development through public private partnerships**

#### **Proposed programme plan for 2022**

15.103 The infrastructure gap in Africa is massive and constitutes one of the primary reasons that many African countries may not achieve the Sustainable Development Goal targets. There are significant infrastructure gaps in the energy, transport (rail, maritime, road and air), water and information and communications technology sectors. The African Development Bank estimates the continent's infrastructure needs

at between \$130 billion and \$170 billion per year, with a financing gap ranging from \$68 billion to \$108 billion per year. It is also expected that the COVID-19 pandemic will seriously affect investments in infrastructure, as African Governments prioritize saving lives by focusing on investments in the health and sanitation sector. It is also widely acknowledged, however, that infrastructure development would be at the core of post-pandemic recovery strategies, as infrastructure is the primary catalyst for economic development and trade.

*Lessons learned and planned change*

15.104 The lesson for the subprogramme was that it did not anticipate the growing demand by member States for ad hoc and time-sensitive technical support on transport and energy financing, in particular in the context of the COVID-19 pandemic. In applying the lesson, the subprogramme will leverage and build on partnerships with African regional and continental organizations, relevant United Nations agencies, and specialized institutions worldwide involved in the continent's infrastructure development. It plans to strengthen stakeholders' capacities to use private-public partnership models as a means of generating innovative financing and infrastructure development in support of industrialization in selected African countries, namely: Cameroon, Côte d'Ivoire, Kenya, Malawi, Uganda and Zambia.

*Expected progress towards the attainment of the objective, and performance measure*

15.105 This work is expected to contribute to the objective, as demonstrated by three countries harmonizing their private-public partnership framework with national laws and adopting international tools and standards in private-public partnership and six countries reaching North-South and South-South cooperation agreements for project development and technology transfer (see table 15.8).

Table 15.8  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
North-South and South-South private-public partnership cooperation agreements for project development and technology transfer in place in six member States (Cameroon, Côte d'Ivoire, Kenya, Malawi, Uganda and Zambia)	North-South and South-South private-public partnership cooperation agreements for project development and technology transfer in place in six member States (Cameroon, Côte d'Ivoire, Kenya, and Malawi, Uganda and Zambia)	North-South and South-South private-public partnership cooperation agreements for project development and technology transfer in place in six member States (Cameroon, Côte d'Ivoire, Kenya, Malawi, Uganda and Zambia)	<ul style="list-style-type: none"> <li>Private-public partnership frameworks in six countries are harmonized in line with countries' private-public partnership laws</li> <li>At least three countries implement North-South and South-South private-public partnerships in infrastructure projects</li> </ul>	<ul style="list-style-type: none"> <li>At least three countries adopt international tools and standards in private-public partnerships</li> <li>North-South and South-South cooperation agreements for project development and technology transfer in six target countries</li> </ul>

## Legislative mandates

15.106 The list below provides all mandates entrusted to the subprogramme.

### General Assembly resolutions

64/193	Follow-up to and implementation of the Monterrey Consensus and the outcome of the 2008 Review Conference (Doha Declaration on Financing for Development)	66/195 67/215	Agricultural technology for development Promotion of new and renewable sources of energy
65/146	Innovative mechanisms of financing for development	70/198	Agricultural technology for sustainable development
65/314	Modalities for the fifth High-level Dialogue on Financing for Development	74/299	Improving global road safety

### Economic and Social Council resolutions

2014/11	Follow-up to the International Conference on Financing for Development
---------	--

### Economic Commission for Africa resolutions

819 (XXXI)	Promotion of energy resources development and utilization in Africa	921 (XLVII)	Agricultural transformation for an industrialized Africa
877 (XLIII)	Towards realizing a food-secure Africa		

## Deliverables

15.107 Table 15.9 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to attaining the objective stated above.

Table 15.9

### Subprogramme 3: deliverables for the period 2020–2022, by category and subcategory

### C. Substantive deliverables

**Consultation, advice and advocacy:** advice to three universities in three countries on the review of curricula on agriculture and land governance in Africa; advice to four member States on policy, legal and institutional reforms to support women's land tenure security and entrepreneurship; advice on mainstreaming a gender perspective in land and agriculture policies and programmes; promotion of the regional transport policies and programmes such as: the Yamoussoukro Decision, the single African air transport market, the Programme for Infrastructure Development in Africa and the Africa Transport Policy Programme; implementation of the African Union Road Safety Charter; promotion of road safety in all member States, upon request, in Africa; advice to member States on the issuance of green bonds in Africa to enhance environmental sustainability and development finance in Africa; advice to member States on issuance of the Sustainable Development Goal 7 bond to accelerate access to clean and affordable energy in Africa; promotion of private sector investment in railway equipment; organization of

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
the African financial summit on the margins of the National Association of Securities Professionals; convening of the Annual Pension and Financial Services Conference; convening of a conference on land policy in Africa; holding of high-level policy dialogues and other events on the margins of relevant platforms; a policy dialogue to facilitate the establishment of a consortium of pension funds in African member States; annual retreat and infrastructure investment workshop for African and United States investors; annual meetings of the Programme for Infrastructure Development in Africa steering committee; and organization of Programme for Infrastructure Development in Africa Week; advocacy of crowd funding of renewable electricity capacity in Africa and strengthening and upgrading of transmission systems on the continent; advice to three member States in developing regional agricultural value chains in accordance with the African Union framework and guidelines for such chains and in mainstreaming land governance issues in agriculture; convening of the Africa business forum, the multi-stakeholder platform on land and investments (the Forum for African Traditional Leaders, civil society platforms and regional economic communities); convening of high-level policy forums to advocate on behalf of youth in such areas as agribusiness and employment.				
<b>Database and other substantive digital materials:</b> toolkit for mapping land-based investment opportunities for agriculture and agribusiness in Africa; interactive map on large-scale land-based investments.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> communication materials on energy infrastructure, competitiveness index for capital markets issues; information on land-based investment opportunities for agriculture and agribusiness, on agriculture and agribusiness and on mapping investment opportunities (including agro-industrial parks).				

## Subprogramme 4

### Data and statistics

#### Objective

15.108 The objective, to which this subprogramme contributes, is to strengthen the production, dissemination and use of credible data, statistics and geospatial information at national, regional and global levels for evidence-based policy and decision-making.

#### Strategy

15.109 To contribute to the objective, the subprogramme will develop the capacity of member States by providing technical assistance on newly developed methodologies, tools and techniques in censuses and surveys, while also mainstreaming geospatial information technology and other new innovations and technologies in all relevant stages of statistical processes, including exploring the use of big data and non-traditional data sources, based on the latest applied research. To this end, the programme will support African national statistical systems in transforming their data governance and management methods by digitalizing the data collection, compilation and dissemination process for statistical areas, including censuses and civil registration systems. To improve the availability of harmonized statistics, the subprogramme has created and maintains updated databases, which are accessible for public use. The data are updated regularly, ensuring that the most current data disaggregated by location are available on topics such as African economies, demographics, social indicators, environment and other statistics. The subprogramme also plans to provide training and to make platforms available for the exchange of best and promising practices among member States and their respective statistical agencies.

15.110 The subprogramme will step up communication about and advocacy of the use of statistics and geospatial information through national celebrations of African Statistics Day, the engagement of social media, and the design and distribution of communication and advocacy materials.

15.111 The subprogramme also plans to provide training and technical assistance in the design and implementation of national strategies for the development of statistics and national spatial data infrastructure with related integrated geospatial information frameworks.

15.112 Given the impact of the COVID-19 pandemic on national statistical systems, there is an urgent need to transform and modernize the statistics-gathering mechanisms in Africa in order to track progress in respect of the 2030 Agenda, Agenda 2063 and national development plans. To build forward and better and ensure the resilience of national statistics systems, the subprogramme plans to provide member States with technical assistance in the transformation and modernization of their national statistics systems. The subprogramme will also assist national efforts to fast-track the development of a continental strategy for a geospatial response to the COVID-19 pandemic. Technical assistance will be provided to member States.

15.113 The above-mentioned work is expected to result in:

- (a) Enhanced capacity and further efficiency in the collection of comparable and harmonized statistics at various levels of disaggregation and improved statistical operations, including the conduct of censuses and surveys; the compilation of administrative statistics and building of fundamental geospatial datasets;
- (b) Enhanced monitoring and reporting on the implementation of the 2030 Agenda and Agenda 2063 by reducing data gaps of indicators on both agendas;
- (c) Improved uptake and use of innovative tools and technologies for statistical operations in national statistical systems;
- (d) Improved uptake of data and statistics and geospatial information management, closer collaboration between components and stakeholders of the national statistical systems and better coordinated geospatial data infrastructures;
- (e) Increased resilience of national statistical systems;
- (f) Increased commitment, investment and ownership of the processes of the production, analysis, dissemination and use of statistics and spatial information;
- (g) Improved data collection approaches and methodologies, processing, analysis and dissemination of timely data by national statistical systems using modern methods.

## **Programme performance in 2020**

15.114 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Increased capacity for conducting accurate and efficient censuses**

15.115 Censuses and civil registration systems are important sources of the demographic and socioeconomic data required to measure progress on the 2030 Agenda and Agenda 2063. Population and housing census data are indispensable to effective development planning and the monitoring of demographic, socioeconomic and environmental trends, policies and programmes, and are crucial for the research and analysis of social and economic trends. Census results coupled with other sources of data are necessary for the formulation of policies affecting economic and social development, in particular at lower administrative levels and for special population subgroups.

15.116 The subprogramme has provided technical assistance for the collection of data through censuses and civil registration. The subprogramme developed an application for use by countries during digital census preparations that automatically uploads the correct software and maps on to each tablet and ensures distribution of these tablets to the right enumeration area. This significantly reduces the risk of error and the amount of work (and hence cost) involved in preparing the tablets for the census, while also speeding up the process. It also established a tablet-sharing programme among countries as part of efforts to promote South-South cooperation. The subprogramme also developed reusable electronic dashboards for increased quality control during fieldwork procedures that make it possible, in real time, to monitor the progress made and the quality of enumeration. In addition, the subprogramme launched an online ECA Price Watch Centre, to take part in the Africa debate on public policy relating to the impact of the inflation rate on economies. The subprogramme further provided technical assistance to member States in the modernization and transformation of their national statistical systems. In addition, the subprogramme commenced the provision of assistance to countries in developing 2030 Agenda and Agenda 2063 data portals for reporting and monitoring purposes.

*Progress towards the attainment of the objective, and performance measure*

15.117 The above-mentioned work contributed to the objective, as demonstrated by the fact that all Sustainable Development Goal indicators have a conceptually clear methodology and internationally agreed standards and there are no more tier 3 indicators. A notable improvement has also been observed in data availability in African countries. In addition, the number of Sustainable Development Goal indicators for which there are no data for any of the African countries has been reduced to 52. Nineteen countries have more than 160 indicators with data. The countries with fewer than 125 indicators with data, namely Libya (107), Eritrea (113), Somalia (122) and South Sudan (124), need support in gathering more data to monitor their progress towards the Sustainable Development Goals (see table 15.10).

Table 15.10  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
	<ul style="list-style-type: none"> <li>• All Sustainable Development Goal indicators have a conceptually clear methodology and internationally agreed standards and there are no more tier 3 indicators</li> </ul>	<ul style="list-style-type: none"> <li>• All indicators have a conceptually clear methodology and internationally agreed standards and there are no more tier 3 indicators</li> </ul>
	<ul style="list-style-type: none"> <li>• 79 indicators with no data for any of the African countries</li> </ul>	<ul style="list-style-type: none"> <li>• 52 indicators with no data for any of the African countries</li> </ul>
No country with data for more than 160 indicators	<ul style="list-style-type: none"> <li>• No country with data for more than 160 indicators</li> </ul>	<ul style="list-style-type: none"> <li>• 19 countries with data for more than 160 indicators</li> </ul>

**Impact of COVID-19 on subprogramme delivery**

15.118 Owing to the impact of COVID-19 during 2020, the subprogramme had to postpone technical services on censuses as some countries suspended their preparations for these. In addition, work on the United Nations Legal Identity Agenda was postponed to 2021 in three countries: Ethiopia, Guinea and Senegal. Technical

advice for some major surveys was halted as countries cancelled or postponed their surveys. Because of the pandemic, technical assistance and advisory missions were suspended, and therefore the timeline of related projects was delayed or postponed. These included advisory missions on such issues as national strategies for the development of statistics, censuses, the consumer price index, GDP rebasing, supply and uses tables, and trade in value added. The subprogramme further postponed technical assistance missions, which had been scheduled in response to requests by member States for statistical capacity-building. The COVID-19 pandemic has heavily affected the timely implementation of the convening function of the subprogramme. Most of the intergovernmental and expert group meetings have been deferred to 2021, although there was need for such direct contacts to follow up on arrangements for the implementation of global issues and matters of interest for Africa and member States. Most of the planned training and awareness-raising activities have been affected by the COVID-19 pandemic. For instance, capacity development workshops were postponed or cancelled for Central Africa, Southern Africa and North Africa.

15.119 At the same time, however, the subprogramme identified new activities to support member States on issues related to COVID-19, within the overall scope of its objectives. The subprogramme developed strategies for maintaining the registration of life-cycle vital events under the lockdown. The subprogramme further articulated ground-level support to assess the impact of the COVID-19 pandemic on the activities and operations of national mapping authorities in Africa to develop an Africa geoportal dedicated to COVID-19 with a gallery and story maps about the Africa geographic information system (GIS) community response. It further conducted research on the emergency mapping of hotspots and mobility patterns of COVID-19 in communities in Africa for improved decision-making and produced a policy guideline on the perspectives of a holistic strategy for a geospatial response to COVID-19 in Africa. In addition, the subprogramme explored new methods and alternative approaches to the consumer price index and the provision of online technical assistance and identified new partners to support national statistical systems in their efforts to ensure resilience. It also developed guidelines and tools for countries planning to conduct e-censuses and surveys.

## **Planned results for 2022**

15.120 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: improving national data availability for reporting on the Sustainable Development Goals<sup>7</sup>**

#### **Programme performance in 2020**

15.121 The subprogramme has supported countries in undertaking censuses and improving their civil registration systems, which are prerequisites for measuring performance against the population-related Sustainable Development Goals and will improve the availability of data on the Goals. The subprogramme strengthened member States' capacities to produce and use timely statistical data, information and services for evidence-based decision-making in Africa. The subprogramme also assisted more than 15 countries in developing statistical strategies linked to other national information infrastructures as part of national, regional and global agendas.

<sup>7</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 18)).

15.122 The above-mentioned work contributed to the reduction of data gaps for the monitoring and reporting of indicators of the Sustainable Development Goals and targets of Agenda 2063 in 20 member States, which exceeded the planned target of 15 member States reflected in the proposed programme budget for 2020.

### **Proposed programme plan for 2022**

15.123 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will provide technical assistance to countries undertaking censuses in 2021 and 2022. The subprogramme will further continue to develop integrated geospatial information frameworks to support countries in developing spatially enabled government services and mainstreaming geospatial information technologies into statistical data collection, processing, analysis and dissemination. In addition, the subprogramme will improve the quality and coverage of economic and environment statistics in member countries to facilitate reporting on the 2030 Agenda and Agenda 2063. The expected progress is presented in the performance measure below (see figure 15.VIII).

Figure 15.VIII

**Performance measure: total number of member States that have reduced data gaps for the monitoring and reporting of indicators on the Sustainable Development Goals and Agenda 2063 (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: increasing visibility through civil registration and good legal identity<sup>8</sup>**

### **Programme performance in 2020**

15.124 The subprogramme has been working with countries to build integrated and interoperable civil registration and identity management systems, including the development of tools that guide the building of resilient systems. Furthermore, the subprogramme has conducted capacity-building initiatives for national experts on how to strengthen their civil registration systems.

<sup>8</sup> As reflected in the programme budget for 2021 ([A/75/6/Add.1](#)).

15.125 The above-mentioned work contributed to an increase to four of the number of countries registering at least 50 per cent of births within 24 months, which met the planned target reflected in the programme budget for 2021.

### **Proposed programme plan for 2022**

15.126 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will assist countries with digitalizing and decentralizing their civil registration systems. It will do so by promoting the use of mobiles phones for birth and death notifications. The expected progress is presented in the performance measure below (see figure 15.IX).

Figure 15.IX

**Performance measure: total number of countries that register at least 50 per cent of births within 24 months (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: enhanced capacities of member States to develop and implement integrated geospatial information frameworks**

#### **Proposed programme plan for 2022**

15.127 The subprogramme has been providing assistance to member States in developing their geospatial policies and resources. At this juncture, there is a growing need to explore and develop possible mechanisms for geospatial information, infrastructure and policies to be embedded more holistically within the subprogramme's technical assistance and knowledge-sharing services, and their subsequent implementation in African countries. Many countries have already taken steps to develop their national spatial data infrastructures. The integrated geospatial information framework is forming a new and emerging data architecture for sustainable development in which collaborative information systems that are comprehensive and coordinated are able to provide evidence on the state of places, people, events and activities, and to deliver timely information necessary for citizens, organizations and Governments to build accountable actions and make informed and evidenced-based decisions. For example, the use of earth observation and spatial data for water resources management enables water authorities to assess and monitor water

quantity and quality, on a regular basis, at local, national and regional scales. Such information is critical to achieving the Sustainable Development Goals nationally.

#### *Lessons learned and planned change*

15.128 The lesson for the subprogramme was that it needed to focus more on supporting member States with spatial data collection, management and dissemination and access to policies in development information strategies and plans, since the needed data for informed decision-making were not always available. In applying the lesson, the subprogramme will help member States to work towards national integrated information systems through the formulation of appropriate frameworks, guidelines and methodologies which can be piloted and implemented within and across countries and regions for enhanced decision-making on spatial planning, land management and other matters. The subprogramme envisages a joint vision to assist member States to take practical actions to bridge the geospatial digital divide in the implementation of national strategic and development priorities and the 2030 Agenda. In the context of the COVID-19 pandemic, the subprogramme will facilitate the use of telecommunications and other technological means to communicate with and support the work of the country teams in the field.

#### *Expected progress towards the attainment of the objective, and performance measure*

15.129 This work is expected to contribute to the objective, as demonstrated by a cumulative number of 15 countries developing and implementing national action plans on an integrated geospatial information framework (see figure 15.X).

Figure 15.X

**Performance measure: total number of countries developing and implementing national action plans on an integrated geospatial information framework (cumulative)**

### **Legislative mandates**

15.130 The list below provides all mandates entrusted to the subprogramme.

#### *General Assembly resolutions*

68/261	Fundamental Principles of Official Statistics	69/266	A global geodetic reference frame for sustainable development
		69/282	World Statistics Day

*Economic and Social Council resolutions*

131 (VI)	Co-ordination of cartographic services of specialized agencies and international organizations	2013/21	Fundamental Principles of Official Statistics
476 (XV)	International co-operation on cartography	2015/10	2020 World Population and Housing Census Programme
2011/24	Committee of Experts on Global Geospatial Information Management	2016/27	Strengthening institutional arrangements on geospatial information management

*Economic Commission for Africa resolutions*

849 (XL)	Statistics and statistical capacity-building in Africa	911 (XLVI)	Statistics and statistical development
		931 (XLVIII)	Data revolution and statistical development
882 (XLIV)	Implementation of the African Charter on Statistics and the Strategy for the Harmonization of Statistics in Africa	758 (XXVIII)	The role of cartography, remote sensing and geographic information systems (GIS) in sustainable development

**Deliverables**

15.131 Table 15.11 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 15.11

**Subprogramme 4: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>

46. Africa data revolution report	1	—	1	1
47. African Statistical Yearbook	1	1	1	1

#### C. Substantive deliverables

**Consultation, advice and advocacy:** technical advice on civil registration and vital statistics, on the 2022 round of population and housing censuses for member States in Africa and on Sustainable Development Goal indicators.

Advice to the annual meetings of the Committee of Directors General of National Statistics Offices of the African Union, African Statistical Coordination Committee, Statistical Commission, consultative meeting on strengthening and harmonization of economic statistics in Africa; high-level forums on global geospatial information management.

Technical assistance to member States in the implementation of civil registration frameworks and systems; the implementation and revision of national strategies for the development of statistics; digitalization and the integration of data science initiatives; survey methodology and coordination of the national statistical system and statistical legislation (including administrative data systems and other sources); and to national statistical offices on the application of data dissemination and exchange systems; consultation with member States and regional stakeholders for the validation of data for the African Statistical Yearbook; advocacy of the adoption of strategies and methodologies by member States and regional bodies to make official statistics open by default; advice on the development and management of civil registration and vital statistics strategic plans; production and dissemination of gender statistics; advocacy to strengthen the gender statistics focal point network, advocacy to strengthen population and housing censuses; advice on the adoption and technical implementation of the 2008 System of National Accounts in Africa by member States.

Technical assistance to five member States in developing integrated geospatial information frameworks at national and regional level; technical assistance in the establishment of national and regional spatial data infrastructure; technical assistance in the integration of geospatial and statistical information, the implementation of the African Geodetic Reference Frame, the development of fundamental themes and standards for geospatial datasets; and technical assistance and advisory services in the implementation of global and regional initiatives and programmes (African Space Agency, Group on Earth Observations, African initiative under the Global Earth Observation System of Systems (AfriGEOSS), Global Monitoring for Environment and Security programme, Regional Centre for Mapping of Resources for Development, African Regional Institute for Geospatial Science and Technology; Digital Earth Africa and others).

**Database and other substantive digital materials:** ECA statistical data portal ECASStats; geospatial databases, online application, services and platforms; Africa GeoPortal.

#### D. Communication deliverables

**Outreach programmes, special events and information materials:** celebration of African Statistics Day; annual Africa Symposium on Statistical Development with some 300 participants; Africa statistics flash; Africa statistics pocketbook; launch of facts and figures on African and major world economies and of advocacy materials on African Statistics Day; Geographic Information System Day.

**Digital platforms and multimedia content:** Executive Statistics Monitor mobile application.

## **Subprogramme 5**

### **Technology, climate change and natural resources management**

#### **Objective**

15.132 The objective, to which this subprogramme contributes, is to advance inclusive and sustainable development, through the strengthened capacity of member States to harness new technologies and innovation, natural resources and the green and blue economy, and to enhance climate resilience.

#### **Strategy**

15.133 To contribute to the objective, the subprogramme will support member States in the formulation and implementation of national and regional policies to build a sound scientific, technological and industrial base through, first, policy research on new technologies and innovation and data-driven decisions; second, the convening of peer learning, dialogue and consensus-building platforms on science, technology and innovation, digital transformation methodologies and frameworks; and, third, technical assistance to member States. The work will further assist member States in making progress towards Sustainable Development Goals 8 and 9.

15.134 The subprogramme will conduct policy research and provide technical support to member States on extractives-led productive linkages, as these linkages can help to drive economic development and diversification through direct and indirect economic benefits in the extractive industry value chain. The subprogramme plans also to provide technical advisory services and technical support to member States in the design and implementation of mineral policies, strategies and plans that are aligned with the principles of the Africa Mining Vision. This will be complemented by peer learning and dialogue on lessons learned and good practices through the convening of policy dialogues and expert group meetings on extractives-led productive linkages and on optimal policies and strategies that include consideration of environmental, social and gender issues and that are aligned with the Africa Mining Vision.

15.135 The subprogramme will conduct training for policymakers, experts and practitioners and increase country-level technical assistance to strengthen knowledge, skills, tools and technologies to design and implement strategies and programmes to achieve sustainable growth in the context of sustainable development and poverty eradication. The training and in-country technical assistance will be supported by workable options and good practices identified through policy research and analysis of sustainable growth pathways. This will assist member States in making progress towards the achievement of Goals 1, 2 and 15. The subprogramme will continue to convene regional platforms, in particular the Africa Regional Forum on Sustainable Development, jointly with other ECA subprogrammes and in collaboration with the African Union Commission, the African Development Bank and the United Nations system.

15.136 The subprogramme will conduct assessments of living species, geomorphological analysis and the mapping of floors of water bodies, including underground waters, in general, and oceans, in particular. The subprogramme will also provide tailor-made and targeted training to policymakers on the different perspectives and sectors of the blue economy and on the multisectoral approach necessary to develop the capacity and skills for negotiation and better representation in forums at all levels. It will also support sustainable planning, policy formulation and governance on the blue economy in line with the Africa Blue Economy Strategy by providing technical advisory services to the African Union Commission, regional economic communities and intergovernmental organizations, and also to pilot with

member States the formulation of strategic policy frameworks on the blue economy using the methodology provided in the Blue Economy Policy Handbook as adapted to the needs and expectations of specific beneficiaries, contributing to attainment of Goal 14.

15.137 The subprogramme will, first, conduct policy research and analysis to build the climate resilience of African economies, societies and ecosystems to reduce their vulnerability to disaster; and, second, broaden advisory services and technical assistance and provide training and tools to build human and institutional capacities in countries in support of policy coherence and the integrated implementation of climate actions, while supporting member States with modelling of the economic impacts of climate change, and the development of strategies and approaches for accelerating private sector investments for the implementation of for nationally determined contributions and the achievement of Goal 13 and other related goals, including Goal 7 on clean and affordable energy. Furthermore, the subprogramme will formulate new narratives and guidance on climate change and development and will convene dialogues, in collaboration with regional entities and development partners, to critically examine and explore the opportunities and geopolitical complexities of climate change and its implications for the development of Africa.

15.138 The subprogramme plans to support member States on issues related to COVID-19 by strengthening the capacity of Africa for a sustainable recovery from the pandemic and raise awareness on the links between climate change, economy, and health issues, including pandemics, while supporting member States with options for the prioritization of stimulus plans for sustainable recovery from the pandemic for better outcomes. The subprogramme will engage in building the capacity of member States to generate the workforce needed to assess, maintain, develop and produce health technologies, and will also promote investment in innovations focusing on COVID-19. These efforts will be supported by ongoing work on building human capital and innovation through education, competitions and design schools for innovators. Furthermore, the subprogramme will contribute to publications geared towards building back better after the COVID-19 pandemic, in particular in relation to just transitions from fossil fuels to renewable energy. In this regard, adjustments will be made to the work being undertaken on mining-related issues to take into consideration the impact of COVID-19 on this particular sector.

15.139 The above-mentioned work is expected to result in:

- (a) Improved public services, encouraging private sector investments in new and emerging technologies to foster the transition to innovation and digital economy; to encourage the uptake of emerging domestic and foreign-owned technologies and the development and strengthening of platforms for interactions between academic, industrial and business sectors and the government; and to stimulate commitment to low-emission and low-carbon growth and the development and deployment of frontier and appropriate technologies;
- (b) Inclusion by natural resource-rich African countries of economic linkages between the natural resources sector and other sectors and diversification in their policies and strategies;
- (c) Alignment of policies and strategies with the principles of the Africa Mining Vision, to encourage the consideration of environmental, social and gender issues, and to include mineral-based industrialization;
- (d) Expanded uptake of effective policies and good practices, generating strong and common regional positions for the advocacy of international support for sustainable growth, poverty eradication and sustainable development;

(e) Improved knowledge of the blue economy in Africa, and better designed, more integrated and effective policy frameworks on the blue economy at subregional and national levels and sustainable African blue economy initiatives at national, subregional and continental levels;

(f) Adoption and implementation by countries of strategies and programmes to transition to sustainable growth;

(g) Robust development policies, strategies and plans that capitalize on the challenges posed by climate change to the transition to low-emission and low-carbon climate-resilient economies;

(h) Attainment of common positions and the effective means of implementation of climate responses that capitalize on the continent's abundant natural resources, including its vast renewable resources (energy, water, marine and other resources) with a view to its inclusive and sustainable development;

(i) Increased private sector investments in the implementation of the Sustainable Development Goals.

15.140 The planned support on issues related to COVID-19 is expected to result in revised nationally determined contributions that are streamlined with national development frameworks, plans and programmes and sustainable recovery from COVID-19, climate resilience and increased awareness of the link between climate change and health.

## **Programme performance in 2020**

15.141 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Digital transformation to accelerate economic diversification**

15.142 In collaboration with subprogramme 4, the subprogramme supported several member States in the development of digital transformation strategies and the launch of digital platforms to enhance transparency in government procurement and information-sharing in the context of COVID-19. Emerging technologies such as digital, advanced materials (nanotechnology), advanced energy technologies, in particular renewables, and biotechnologies are central to economic diversification, achieving inclusive and equitable growth in a sustainable manner. The subprogramme launched new initiatives in emerging technologies with a special focus on national and institutional policies and strategies and building human capital in artificial intelligence, nanotechnology and health technologies, and pharmaceutical chemistry and manufacturing.

15.143 In collaboration with the African Union Commission and other partners, the subprogramme has successfully contributed to the development of the digital transformation strategy for Africa, endorsed by the African Union Executive Council at its thirty-sixth ordinary session. Through various activities, the subprogramme has supported several member States in implementing key pillars of the strategy. For example, in Kenya, technology is positioned as a key enabler in meeting the Government's development blueprint, the Big Four Agenda, comprising food security, universal health coverage, affordable housing and manufacturing. The subprogramme supported the development and adoption of the Kenyan digital economy project, an ambitious initiative aimed at bridging the digital divide in the country. In addition, it provided advice on the development of the Huduma Halisi citizen feedback platform, a digital identity scheme that enables Kenyan citizens to provide feedback with the use of their mobile phones on their engagement with the various public services. In Ethiopia, the Government launched an e-commerce pilot project to improve access of

small enterprises to the digital marketplace, in line with the innovation pillar of the African digital transformation strategy. In Cameroon, implementation of the digital transition focused on the expansion of the broadband infrastructure and the increase in telecommunications traffic, while implementation of the Africa Communication and Information Platform for Economic and Health Action in the Congo enhanced the capability of the government to communicate and interact with the citizenry in mitigating and managing the socioeconomic impacts of the COVID-19 pandemic.

*Progress towards the attainment of the objective, and performance measure*

15.144 The above-mentioned work contributed to the objective, as demonstrated by the adoption of a digital transformation strategy by the African Union Commission, implementation of the Africa Communication and Information Platform in the Congo, the launch of an e-commerce pilot project in Ethiopia, and the establishment of the Huduma Halisi digital platform in Kenya (see table 15.12).

Table 15.12

**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
—	—	<ul style="list-style-type: none"> <li>• African Union adopted a Digital Transformation Strategy</li> <li>• Africa Communication and Information Platform for Economic and Health Action launched in the Congo</li> <li>• Launch of e-commerce pilot project in Ethiopia</li> <li>• Digital platform established in Kenya for interaction between citizens and government services (Huduma Halisi)</li> </ul>

**Impact of COVID-19 on subprogramme delivery**

15.145 Owing to the impact of COVID-19 during 2020, the subprogramme changed many of its in-person meetings to online consultations. These included the five country case studies (Cameroon, Côte d'Ivoire, Kenya, South Africa and Zambia) and one regional study on unleashing the potential of the private sector to drive green growth and job creation. Online consultations made it possible to finalize voluntary local review reports for Ngora district in Uganda; and the cities of Harare and Victoria Falls in Zimbabwe. Field visits in the context of the Sustainable Development Goal 7 initiative were no longer possible, and participating Governments were invited to provide the information themselves. In addition, the subprogramme's plan to carry out a training event on inclusive green economy and monitoring and evaluation for Zimbabwe was changed from face-to-face to an online format.

15.146 The Goal 7 initiative, launched at the third Africa Business Forum in February 2020, included a plan for field visits to target countries to identify key assets to be structured for potential private sector financing. A number of countries could not be visited because of COVID-19 constraints. Activities that had to be postponed included the convening of expert group meetings for the consolidation and validation of a

methodological framework for nationally determined contributions. The subprogramme's plan to co-host Africa Climate Week with the United Nations Framework Convention on Climate Change and other partners was also put on hold as a result of the pandemic, while preparations to co-host the ninth Conference on Climate Change and Development in Africa with Cabo Verde have significantly slowed down. The change in priorities and reduced responsiveness at national level caused deliverables such as the revision of nationally determined contributions to fall behind schedule.

15.147 At the same time, however, the subprogramme identified new activities to support member States on issues related to COVID-19, within the overall scope of its objectives, namely the production of knowledge products on climate change and development after the pandemic. A technical paper on climate change and development in Africa after the COVID-19 pandemic was drafted. Two digital platforms for the pooled procurement of medical supplies for curating and sharing information on COVID-19 were developed. A number of these deliverables have been moved online or followed a hybrid format that includes online and face-to-face interactions.

## **Planned results for 2022**

15.148 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: climate resilience integrated in national sustainable development plans in Africa<sup>9</sup>**

#### **Programme performance in 2020**

15.149 Over the course of 2020, the subprogramme engaged in preparatory work to support three focus countries (Liberia, Malawi and Zimbabwe) and the Economic Community of West African States (ECOWAS) in revising their nationally determined contributions. In partnership with the African Academy of Sciences, the subprogramme continued to guide research on development planning by 20 climate research grantees spread across Africa. The subprogramme also initiated the drafting of an implementation plan for the five-year Climate Research for Development in Africa initiative.

15.150 The subprogramme further organized or co-organized six workshops and forums to support member States in their climate change interventions and efforts to realize the Sustainable Development Goals. In partnership with the African Union, and together with subprogramme 6, the subprogramme drafted an African climate strategy and a strategy on climate change, gender equality and the empowerment of women and girls for Africa. The subprogramme, in collaboration with the Department for Economic and Social Affairs and the United Nations Development Programme (UNDP), supported the Government of Ethiopia through the Ministry of Water, Irrigation and Energy and the Planning and Development Commission in training key staff on integrated climate, land, energy and water systems modelling to support sectoral policy priorities of the country's third ten-year growth and transformation plan. A similar approach was advanced and is in progress in Cameroon in collaboration with the Ministry of Planning. The subprogramme, in collaboration with subprogramme 3, continued implementation of the Goal 7 initiative for Africa with ongoing support for mobilizing private sector investments for clean energy in Ethiopia, Senegal and South Africa.

---

<sup>9</sup> As reflected in the proposed programme budget for 2020 ([A/74/6 \(Sect. 18\)](#)).

15.151 The above-mentioned work contributed to the integration of climate change effects into national development plans by four member States (Cameroon, Ethiopia, Liberia and Zimbabwe), which did not meet the planned target of six member States reflected in the proposed programme budget for 2020. This is because the revision work in Malawi was impeded by the re-run of the presidential elections in that country.

15.152 Furthermore, the above-mentioned work also contributed to increased learning by and capacity of member States to integrate climate change into development policies and plans, through implementation of the Climate Research for Development in Africa initiative in 20 countries, which exceeded the planned target of six countries equipped with tools for review and reporting expertise to integrate nationally determined contributions into their national development plans reflected in the proposed programme budget for 2020.

### Proposed programme plan for 2022

15.153 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will ramp up its support to member States in the implementation of their updated nationally determined contributions, and to prepare contributions to the 2023 global stocktake of the Paris Agreement, covering mitigation, adaptation, loss and damage, and means of implementation. The expected progress is presented in the performance measure below (see table 15.13).

Table 15.13  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
<ul style="list-style-type: none"> <li>Establishment of the African nationally determined contributions hub for coordinated support for implementation of nationally determined contributions</li> <li>Report on coherence and readiness of African nationally determined contributions</li> </ul>	At least three countries review and report on the level of integration of nationally determined contributions in their national development plans	<ul style="list-style-type: none"> <li>Four member States integrate the effects of climate change into their national development plans (Cameroon, Ethiopia, Liberia and Zimbabwe)</li> <li>Increased learning and capacity of member States to integrate climate change into development policies and plans, through implementation of the Climate Research for Development in Africa initiative</li> </ul>	At least three countries implement updated post-2020 nationally determined contributions	<ul style="list-style-type: none"> <li>At least four additional countries implement updated post-2020 nationally determined contributions</li> <li>Increased analytical capacity of member States in preparation for the 2023 Paris Agreement global stocktake</li> <li>Three countries with increased analytical capacity and tools to integrate climate resilience in investments in climate-sensitive sectors</li> </ul>

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

**Result 2: increased investment in climate action in Africa<sup>10</sup>****Programme performance in 2020**

15.154 The subprogramme, in collaboration with the Office of the Executive Secretary and subprogramme 3, launched the Sustainable Development Goal 7 initiative to support several member States in their efforts to mobilize investments, in particular from the private sector, to address the increasing need for access to adequate, secure and reliable energy services, with initial pilots in Angola, Ethiopia, Mozambique, Rwanda and Senegal. These countries were assisted with investment advisory services to start the identification of possible clean energy projects that could be supported. Initiatives included possible green bonds in South Africa, a renewable energy and energy efficiency fund in support of the Sovereign Fund of Senegal (FONSIS) for up to seven countries in West Africa, and advisory services to Ethiopia to support and mobilize refinancing for the government utility Ethiopian Electric Power.

15.155 The above-mentioned work contributed to private sector investment frameworks in clean energy actions under the Goal 7 initiative in three countries (Ethiopia, Mozambique and Rwanda), which met the planned target of three countries revising their nationally determined contributions reflected in the proposed programme budget for 2021.

**Proposed programme plan for 2022**

15.156 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective and in response to recent developments, the subprogramme's work will evolve to include support to member States in increasing the scale and speed of private sector participation in the implementation of their nationally determined contributions. The expected progress is presented in the updated performance measure below (see table 15.14).

Table 15.14  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
—	Ten countries engaged in the Goal 7 initiative	Private sector investments in clean energy actions under the Goal 7 initiative in three countries (Ethiopia, Senegal and South Africa)	At least five countries revised their nationally determined contributions	At least eight countries engage in the private sector in the implementation of nationally determined contributions

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

**Result 3: increased resilience through channelling resources to respond to the COVID-19 pandemic and climate change****Proposed programme plan for 2022**

15.157 The subprogramme finalized a framework providing policy and investment options to ensure that stimulus measures are optimally directed towards recovery from the immediate impacts of the COVID-19 pandemic while also building resilience and

<sup>10</sup> As reflected in the programme budget for 2021 ([A/75/6/Add.1](#)).

responding to climate change. The framework underlines opportunities for member States to adopt low-emission and low-carbon development pathways which maximize job creation and gross value added in their economies. The need for this analysis is framed within the African Green Stimulus Programme adopted by the African Conference of Ministers of Environment in January 2021. It also provides a framework for interventions to implement the Africa Blue Economy Strategy and the African Union strategy on digital transformation, and to build continental resilience to climate change.

#### *Lessons learned and planned change*

15.158 The lesson for the subprogramme was to recognize the increased demand expressed by member States, through the adoption of the African Green Stimulus Programme, for analysis and assessment on the impact of sustainability-oriented investments as a vehicle for responding to the economic aftermath of the COVID-19 pandemic and providing a basis to build climate resilience. In applying the lesson, the subprogramme will use its research function to identify recovery options for African States to build forward better from the pandemic. It will further analyse in detail the investment options for at least four member States and roll out the blue economy toolkits to support the African Union Blue Economy Strategy in two East African countries in 2021 and two additional countries in 2022. The blue economy toolkit supports member States in accounting for their natural blue economy capital, and consequently identifying potential nature-based interventions to build climate resilience and create jobs (for example through eco-tourism and sustainable fisheries) in line with the objectives of the African Green Stimulus Programme.

#### *Expected progress towards the attainment of the objective, and performance measure*

15.159 This work is expected to contribute to the objective, as demonstrated by at least two countries implementing initiatives to secure finance for a climate-resilient green and blue economic recovery (see table 15.15).

Table 15.15  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
—	—	Two countries (Rwanda and Seychelles) developed policy options for a climate-resilient blue economy pathway	At least four countries develop policy options including investments for a climate-resilient green and blue economic recovery	At least two countries implement initiatives for such purposes as securing finance for a climate-resilient green and blue economic recovery

### **Legislative mandates**

15.160 The list below provides all mandates entrusted to the subprogramme.

#### *General Assembly resolutions*

62/8	Overview of United Nations activities relating to climate change	64/206	Promotion of new and renewable sources of energy
		66/288	The future we want

75/217	Protection of global climate for present and future generations of humankind	73/327	International Year for the Elimination of Child Labour, 2021
72/228	Science, technology and innovation for development	74/301	New Partnership for Africa's Development: progress in implementation and international support

### *Economic and Social Council resolutions*

2017/22	Science, technology and innovation for development
---------	--

### *Economic Commission for Africa resolutions*

818 (XXXI)	Promotion of mineral resources development and utilization in Africa	901 (XLV)	Africa Regional Forum on Sustainable Development Promoting an innovation society for Africa's social and economic transformation
819 (XXXI)	Promotion of energy resources development and utilization in Africa		
884 (XLIV)	Climate change and sustainable development in Africa	919 (XLVII)	Green economy and structural transformation in Africa
887 (XLIV)	Enhancing science and technology for development in Africa	930 (XLVIII)	Africa Regional Forum on Sustainable Development

## **Deliverables**

15.161 Table 15.16 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 15.16

### **Subprogramme 5: deliverables for the period 2020–2022, by category and subcategory**

### C. Substantive deliverables

**Consultation, advice and advocacy:** advisory services to two member States and two regional and subregional cooperation groups on the framework for a renewed United Nations-African Union partnership on Africa's integration and development agenda for 2017–2027; technical support for the secretariat of the African Peer Review Mechanism in support of country self-assessments and integration of their outcomes into national development plans and related processes; technical support and advisory services to three countries on climate change; advisory services to two countries on the green economy in the context of sustainable development and poverty eradication, natural resources; and technical support and advisory services to three countries on innovation and technology in Africa; high-level expert dialogues on science, technology and innovation with approximately 35 representatives from African countries; high-level policy event on the green economy in the context of sustainable development and poverty eradication and structural transformation in Africa with 100 participants;

African climate talks to gather inputs from around 100 African stakeholders on the continent's interests in global climate governance discourses, such as the Conference of the Parties to the United Nations Framework Convention on Climate Change; advisory services on policies and strategies on technology, innovation to two countries, the green and blue economies to two countries, climate change and natural resources management to three countries; documentation for the African Union-NEPAD meetings in the areas of new technologies and innovation, environment and natural resources, the green economy and climate change in the context of the 2030 Agenda and Agenda 2063; the African regional review of the implementation of the outcomes of the World Summit on the Information Society, with representatives of all African countries and the African Internet Governance Forum (African platform for multi-stakeholder policy dialogue on prevailing and emerging issues on Internet governance with 400 participants).

### D. Communication deliverables

**Outreach programmes, special events and information materials:** brochures, flyers, briefs and information kits on technology, climate change, the green and blue economies, environment, and natural resources management and logistics, including newsletters.

**External and media relations:** press releases related to the issuance of major publications and the organization of important events on technology, climate change, the green and blue economies, environment, and natural resources management and logistics, including newsletters.

**Digital platforms and multimedia content:** update and maintenance of websites, social media and platforms on technology, climate change, the green and blue economies, environment, and natural resources management and logistics, including newsletters.

## Subprogramme 6 Gender equality and women's empowerment

### Objective

15.162 The objective, to which this subprogramme contributes, is to achieve gender equality and women's empowerment in Africa, through accelerating the pace of implementation by member States of, and their reporting on, their global and regional commitments related to gender equality and the empowerment of women and girls and to enhance their implementation of policies and programmes for the empowerment of women and girls.

### Strategy

15.163 To contribute to the objective, the subprogramme will undertake policy research and technical advisory services, and will convene policymakers and experts to increase knowledge, develop capacity and stimulate discussion on the

mainstreaming of a gender perspective into development policies and programmes, to ensure gender-sensitive development outcomes. Specifically, the subprogramme plans to build on the costing exercise for the attainment of Sustainable Development Goal 5, which will form part of the findings of the 2021 *African Women's Report*, and also the work on women's entrepreneurship and harnessing demographic dividends. Furthermore, the subprogramme will provide support to the various subprogrammes and implementing divisions across ECA, in mainstreaming a gender perspective into the deliverables that they provide to member States.

15.164 The subprogramme will provide technical support to member States to measure progress and report on the status of implementation of their national programmes and policies related to their global and regional commitments. Specifically, the subprogramme plans to build on the results of the African Gender and Development Index, and also on the findings and recommendations of the African women's leadership report. Furthermore, the subprogramme will roll out the Index in the remaining countries that have not yet implemented the index.

15.165 This work will assist member States in their progress towards achieving Goal 5 on gender equality and the empowerment of women and girls. In addition, the work is expected to have positive impacts towards achievement, both direct and indirect, of a number of other Goals, including Goals 1, 2, 3, 4, 8, 10, 11, 13 and 16.

15.166 The subprogramme plans to support member States on issues related to COVID-19 by placing greater emphasis on resilience and focusing more on the impact of exogenous shocks in addition to existing and underlying risks and vulnerabilities faced by women and girls. This will be achieved by revisiting project objectives to ensure resilient outcomes in relation to COVID-19 and other external shocks.

15.167 The above-mentioned work is expected to result in:

- (a) Strengthened consideration of a gender perspective in the planning and implementation of national policies and programmes to ensure outcomes that address gender equality and women's empowerment;
- (b) Greater policy influence and impact to respond to the defined outcomes of global and regional commitments on gender equality and women's empowerment.

15.168 The planned support on issues related to COVID-19 is expected to result in:

- (a) Increased knowledge and strengthened capacities to design and develop policies that address the care economy as part of COVID-19 response and recovery;
- (b) Greater resilience of women and girls in facing intersecting challenges and inequalities, in particular by gaining access to opportunities, services and products through digital platforms.

## **Programme performance in 2020**

15.169 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Strengthened capacity of member States to report on the implementation of gender equality commitments**

15.170 African countries have ratified various global and regional human treaties that commit them to promoting gender equality and pursue policies aimed at eliminating discrimination against women. They are committed to reporting on the measures that they have adopted to give effect to the provisions of these treaties. In the Africa regional

review meeting organized by ECA, the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women) and African Union Commission, member States reaffirmed their commitment to accelerating implementation of the Beijing Platform for Action aligned with the implementation of the 2030 Agenda and Agenda 2063. The subprogramme has strengthened the capacity of member States to use the African Gender and Development Index to report on their gender equality commitments, as part of their voluntary national reviews, universal periodic reviews, reports for the 25-year review of the implementation of the Beijing Declaration and Platform for Action and in national planning. The subprogramme aligned the Index with relevant Sustainable Development Goal indicators and with relevant human rights instruments and their provisions on gender equality and women's empowerment, replacing existing Index indicators where appropriate. It is envisaged that the use of the Index will assist member States in bringing out a gender perspective in their COVID-19 response and recovery efforts and enable policy actions that lessen the burden imposed on women and girls by the pandemic. The new proposed African Gender and Development Index indicators will encompass more health perspectives, along with other indicators related to the impacts of COVID-19 and other public health pandemics in the region.

15.171 The subprogramme also provided technical support and consulted widely on the use of existing Sustainable Development Goal indicators and human rights instruments, in order to update the indices and methodology of the African Gender and Development Index and align it more closely with global frameworks, and ensure policy coherence and synergy with existing monitoring tools and instruments and streamlined reporting processes and procedures for member States. Furthermore, the subprogramme focused on significant challenges in the field of gender equality and the empowerment of women and girls for deeper analysis, and contextualized Sustainable Development Goal monitoring and reporting to regional priorities, to enrich the existing knowledge and evidence base provided by the Index. This includes providing support to Eswatini, Ethiopia, Mauritius, Namibia and Seychelles, to use the Index to monitor and report on their global and regional commitments on gender equality.

*Progress towards the attainment of the objective, and performance measure*

15.172 The above-mentioned work contributed to the objective, as demonstrated by 52 member States implementing the African Gender and Development Index to monitor and report on their regional and global gender equality commitments (see figure 15.XI).

Figure 15.XI

**Performance measure: total number of countries that have employed the African Gender and Development Index to monitor and review their commitments on gender equality (cumulative)**

**Impact of COVID-19 on subprogramme delivery**

15.173 Owing to the impact of COVID-19 during 2020, the subprogramme cancelled a number of deliverables, including a workshop on strengthening the implementation of the national strategy to institutionalize gender mainstreaming in development in Mauritania and the provision of technical support to Botswana, the Democratic Republic of the Congo and Lesotho to mainstream a gender perspective into national policies and strategies. The subprogramme postponed a number of deliverables, including a regional workshop on harnessing the demographic dividend with a gender perspective. The subprogramme also contributed to the ECA publication “COVID-19 in Africa: protecting lives and economies”, by analysing the effects of the pandemic on women and girls. These changes had an impact on the programme performance in 2020, as specified under result 2 below.

15.174 At the same time, however, the subprogramme identified new activities to support member States on issues related to COVID-19, within the overall scope of its objectives. Working in collaboration with the African Union Commission and UN-Women, the subprogramme hosted an online high-level meeting of ministers responsible for gender equality and women’s affairs to look at post-COVID-19 pandemic recovery policies with a gender perspective. The subprogramme collaborated with the NEPAD Unit at ECA to backstop the Department of Economic and Social Affairs in organizing a series of high-level African dialogues on COVID-19. The subprogramme modified deliverables, including revision of the technical note on the demographic dividend project to incorporate regional analysis on COVID-19.

**Planned results for 2022**

15.175 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

**Result 1: harnessing the demographic dividend in Africa with gender equality<sup>11</sup>****Programme performance in 2020**

15.176 The subprogramme has mainstreamed a gender perspective into the deliverables of all ECA subprogrammes, including substantive analysis and their policy recommendations. For example, the subprogramme provided support to subprogramme 5 to mainstream a gender perspective in its climate-resilient development policies programme and provided support to subprogramme 4 in analysing the facts and figures on women in politics and decision-making in Africa for the report *The World’s Women 2020: Trends and Statistics*. Furthermore, the subprogramme undertook a comprehensive analysis of the digital finance ecosystem, as part of the *African Women’s Report 2020*, to identify pathways to women’s economic empowerment across Africa.

15.177 The above-mentioned work contributed to three member States mainstreaming a gender perspective into sectoral policies, which met the planned target reflected in the proposed programme budget for 2020.

**Proposed programme plan for 2022**

15.178 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the

---

<sup>11</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 18)).

subprogramme will develop an analytical report on ECA work in support of gender-sensitive sectoral policies and plans to convene a commission-wide gender forum at which divisions and subregional offices will showcase their work on gender equality and women's empowerment for feedback from member States. The expected progress is presented in the performance measure below (see figure 15.XII).

Figure 15.XII

**Performance measure: total number of countries adopting sector-specific policies that mainstream a gender perspective into sectoral policies (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: assessing the cost of achieving Sustainable Development Goal 5 in five selected countries<sup>12</sup>**

### **Programme performance in 2020**

15.179 The subprogramme has undertaken background work on comparing costing models to assess the cost of achieving Sustainable Development Goal 5. The subprogramme also identified sectoral progress on and challenges towards achieving Goal 5 in selected countries through analysis and research undertaken as part of the African Gender and Development Index. These data will form the basis for the sectoral focus of the costing exercise. In performing this analysis and research, the subprogramme strengthened its strategic partnerships with a number of stakeholders, such as UN-Women and the Economic and Social Commission for Asia and the Pacific (ESCAP), which have developed their own methodologies for the costing of Sustainable Development Goal 5. These partnerships will support a more robust development financing perspective.

15.180 The above-mentioned work contributed to the implementation of the African Gender and Development Index in two member States to inform the choice of sectors to be included in the subsequent costing exercise, which did not meet the target of costing completed for one pilot country to support the scaling up of the costing model to extend across other sectors for Goal 5 reflected in the proposed programme budget for 2021. This is due to changes in programme implementation as a result of COVID-19, where the subprogramme addressed ad hoc, additional and evolving programme deliverables related to the COVID-19 response.

<sup>12</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

### Proposed programme plan for 2022

15.181 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective and in response to recent developments, the subprogramme's work will evolve and the results of the costing will feed into the implementation of the African Gender and Development Index. With its analysis, the subprogramme will further contribute to the efforts by member States to ensure better financing of gender equality and strengthened planning and monitoring processes to enhance their performance in achieving gender equality. The expected progress is presented in the updated performance measure below (see table 15.17).

Table 15.17  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
African Gender and Development Index regional synthesis report, which identified gaps across economic, social and political blocs for 12 countries	African Gender and Development Index regional synthesis report and 25-year review of the implementation of the Beijing Declaration and Platform for Action, which identified priorities and challenges from 15 country analyses and 50 national reports respectively	African Gender and Development Index implemented in two member States to inform the choice of sectors to be included in the subsequent costing exercise	Costing completed for five countries to inform investments and resource allocation	Five countries identify gaps across economic, social and political blocs, and integrate costing measures into planning, monitoring and evaluation of gender equality programmes

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: enhanced capacity of member States to address gender equality in the economic and digital transformation of African countries

#### Proposed programme plan for 2022

15.182 Information and communications technology, in the form of digital technology, is key to stimulating a promising digital and information economy across Africa, creating the jobs of the future for the continent's growing youth population, engendering a critical mass of highly skilled and technically qualified personnel for the labour market and providing the tools needed to empower every African women and girl. Challenges persist, however, in the form of structural barriers to the empowerment of women and girls in harnessing the digital economy, so that they may participate in, and benefit from, inclusion in the development, use and adoption of digital technology initiatives across Africa. The COVID-19 pandemic has highlighted the essential role that digital technologies play in connecting individuals and communities, in providing access to services, including education, and in maintaining connectivity to global and local economies.

15.183 The subprogramme has undertaken various activities to address the growing gender digital divide and to narrow such gender gaps. It has developed a comprehensive report on the digital finance ecosystem, as part of the *African Women's*

*Report 2020*, which focused on digital finance as a pathway to women's economic empowerment. The report provided an assessment of the thematic barriers and challenges to women's economic empowerment within the context of the digital ecosystem, such as the regional disparities in digital skills. The subprogramme has also compiled indices on the status of gender equality and women's empowerment across more than 40 African countries, through the African Gender and Development Index and its related research and analysis. This provides a basis for assessing the status quo on both structural and sectoral benchmarks and targets for addressing women's economic empowerment.

#### *Lessons learned and planned change*

15.184 The lesson for the subprogramme was that it relied heavily on workshops, expert group meetings and its convening function, together with other face-to-face interactions, to deliver its programme effectively and reach its audience. With the advent of the COVID-19 pandemic and its related restrictions and precautions, the subprogramme was made keenly aware of the limited support that it could provide without physical engagement with member States. Furthermore, given the lack of broadband infrastructure across the continent, the use of online engagement did not offer an adequate alternative. In applying the lesson, the subprogramme will design its programme delivery in a more flexible manner, so that it can develop and disseminate its knowledge products in a more effective way, including through identifying options for the online delivery of programme elements. Programmatically, the subprogramme will identify ways to empower women through enabling technologies, in particular information and communications technology. It will also build on the digital initiatives of ECA to enhance the digital skills and the work of the Publications, Conference and Knowledge Management Division, namely on initiatives to enhance the digital skills of women and girls to close the gender digital divide.

#### *Expected progress towards the attainment of the objective, and performance measure*

15.185 This work is expected to contribute to the objective, as demonstrated by five African countries revising policies and programmes designed to reduce the gender digital divide (see table 15.18).

Table 15.18  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
Digital finance-related information and communications technology skills of women across Africa stood at 13.7 per cent and 25.6 per cent in North Africa, compared to a global average of 20.6 per cent	<ul style="list-style-type: none"> <li>African Gender and Development Index regional synthesis report and 25-year review of the implementation of the Beijing Declaration and Platform for Action, which identified priorities and challenges from 15 country</li> </ul>	<i>African Women's Report 2020</i> , which focused on digital finance as a pathway to women's economic empowerment, provided a comprehensive overview of the digital finance architecture	60 per cent of survey respondents, representing member States, have enhanced their knowledge on the gender digital divide	Five African countries revise policies and programmes designed to narrow the gender digital divide

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
	analyses and 50 national reports respectively			
	• 33 per cent of Internet users in Africa are women			

## Legislative mandates

15.186 The list below provides all mandates entrusted to the subprogramme.

### *General Assembly resolutions*
