## Deliverables

15.187 Table 15.19 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 15.19

### Subprogramme 6: deliverables for the period 2020–2022, by category and subcategory

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation (number of documents)</b>	–	–	2	–
1. Report to the Committee on Gender and Social Development on the work of the subprogramme	–	–	1	–
2. Issues paper on gender equality and the empowerment of women and girls theme for the Committee on Social Policy	–	–	1	–
<b>Substantive services for meetings (number of three-hour meetings)</b>	–	–	1	–
3. Biennial session of the Committee on Gender and Social Development	–	–	1	–
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects (number of projects)</b>	4	–	2	4
4. Project on gender mainstreaming in national plans, policies and programmes in countries that request technical advisory services with emphasis on women's economic empowerment	1	–	1	1
5. Project on the role of women in post-conflict and peacebuilding to strengthen the capacity of member States to ensure women's equitable participation in decision-making	1	–	–	–
6. Project on the demographic dividend with a gender perspective to enhance the capacity of member States to harness the demographic dividend and achieve gender equality	1	–	1	–
7. Project on managing the African Women Leadership Fund to strengthen the economic empowerment of women through the growth of African women fund managers	1	–	–	–
8. Project to support member States in using the subprogramme's measurement tools to report on their gender equality commitments	–	–	–	1
9. Project on assessing the cost of achieving Sustainable Development Goal 5	–	–	–	1
10. Project on enhancing the capacity of member States to address the gender digital divide and positively reimagine a gender perspective in the economic and digital transformation of African countries	–	–	–	1
<b>Seminars, workshops and training events (number of days)</b>	13	3	10	9
11. Workshop on the African women's report on the theme of digital finance as a pathway to women's economic empowerment to disseminate the results and mainstream policy recommendations into the workplans of selected line ministries	1	1	4	–
12. Workshop on the Women's Entrepreneurship Report to disseminate the results and mainstream policy recommendations into the workplans of selected line ministries	5	1	2	–
13. Training on the African Gender and Development Index to support the efforts of member States to address the priority areas of policy action	5	1	2	5
14. Seminar on the role of women in post-conflict and peacebuilding work to build the capacity among target member States to enhance the participation of women in decision-making	2	–	–	–
15. Workshop on the African women's leadership report to disseminate the results and mainstream policy recommendations into workplans of selected line ministries	–	–	2	–

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
16. ECA-wide gender forum at which divisions and subregional offices showcase their work on gender equality and women's empowerment in support of member States	—	—	—	2
17. Workshop to review policies and programmes designed to narrow the gender digital divide	—	—	—	2
<b>Publications (number of publications)</b>	<b>1</b>	<b>1</b>	<b>2</b>	<b>1</b>
18. African women's report based on the continent-wide initiative for gender equality and women's empowerment to mainstream a gender perspective into sectoral policies of selected line ministries	—	—	1	—
19. Women's Entrepreneurship Report on the theme of examining the linkages between education and productive entrepreneurship to strengthen the capacity of member States to boost the productivity of women entrepreneurs	1	1	—	—
20. African women's leadership report to assess the status of women in leadership positions	—	—	1	—
21. Analytical report on ECA work in support of gender-sensitive sectoral policies	—	—	—	1
<b>Technical materials (number of materials)</b>	<b>4</b>	<b>4</b>	<b>3</b>	<b>3</b>
22. Operational manual on the integration of a gender perspective and demographic dividends into national planning, to enhance the capacity of member States to harness the demographic dividend through gender equality	1	1	—	—
23. Technical note on the gender and demographic dividend index to strengthen the technical capacity of target countries in their efforts to monitor progress and identify priority areas	1	1	—	—
24. Fact sheet entitled "Women in politics in Africa 2019" to raise awareness in the media and among civil society organizations and member States of the share of female parliamentarians and cabinet ministers in Africa	1	1	—	—
25. Policy research on gender issues and climate change in Africa for effective policy intervention	—	1	—	—
26. Policy brief on women's entrepreneurship in Africa to enhance the capacity of member States to introduce innovative strategies for boosting the productivity of women entrepreneurs	1	—	—	—
27. Technical notes on the African Gender Index and the African Gender and Development Index to support African countries in measuring the gap in the status of African men and women and to assess progress made by Governments in implementing policies aimed at promoting gender equality and the empowerment of women and girls	—	—	1	—
28. Policy research on gender equality and on women's empowerment and climate change in Africa for effective policy intervention	—	—	1	—
29. Policy research on gender equality and women's empowerment and the extractive industry in Africa to connect research with the governance of artisanal and small-scale mining sector	—	—	1	—
30. Policy briefs on gender equality in the economic and digital transformation of African countries	—	—	—	3

#### C. Substantive deliverables

**Consultation, advice and advocacy:** special event on International Women's Day (2022) and 16 days of activism and support for the preparatory ministerial meeting, attended by 15 participants from African countries, for the Commission on the Status of Women.

#### D. Communication deliverables

**Digital platforms and multimedia content:** maintained and expanded knowledge platforms for information-sharing and advocacy on gender equality and women's empowerment to deepen dialogue and policy options.

**External and media relations:** press releases on the subprogramme's website after the hosting and organization of each event and active use of the subprogramme's social media accounts.

## **Subprogramme 7**

### **Subregional activities for development**

## **Component 1**

### **Subregional activities in North Africa**

#### **Objective**

15.188 The objective, to which this component contributes, is to enhance the employment creation environment in North Africa through strengthened economic diversification and regional integration and a better recognition of migrant workers' qualifications and skills.

#### **Strategy**

15.189 To contribute to the objective, the component will develop macroeconomic models by using available macroeconomic data, rolling out the models and conducting simulations with ministries of finance, planning and central banks in partner countries. The component will also provide technical assistance through partnerships with statistical institutes, to strengthen countries' capacities to develop data analysis and models to quantify economic distortions and identify the public policy changes to be carried out. In addition, the component will conduct research on employment, addressing youth employment through so-called "industries without smokestacks" projects, in collaboration with the Brookings Institution, and will convene subregional workshops on best practices for job creation in North Africa, in collaboration with Oxford Economics. This work will assist member States in mitigating the impact of COVID-19 on employment and in achieving Sustainable Development Goals 4, 8 and 9.

15.190 The component will provide advisory services and hold subregional consultations to support member States in building their capacity and developing their national strategies for the implementation of the Agreement Establishing the African Continental Free Trade Area, in partnership with ministries of trade, the African Union and the European Union. This work will contribute to the progress made by member States towards Goal 17.

15.191 The component will work to strengthen capacities in six African countries (Côte d'Ivoire, Mali, Morocco, Senegal, South Africa and Zimbabwe) to collect, analyse and disseminate migration-related data and enhance the recognition of skills and qualifications of African workers, to evaluate the negative impact of COVID-19 on remittances and to implement the migration-related targets of the Sustainable Development Goals and the Global Compact for Safe, Orderly and Regular Migration. The component plans to undertake an assessment of migrants' access to various services and to support member States in the implementation or improvement of migration-related policies in order to ensure the better integration of migrants so that they can contribute to economic development. This will be carried out in partnership with the Department for Economic and Social Affairs, the International Labour Organization (ILO), the International Organization for Migration (IOM) and the Office of the United Nations High Commissioner for Refugees (UNHCR). This work will assist member States in making progress towards Goals 3, 4, 8, 10, 16 and 17.

15.192 The component plans to support member States on issues related to COVID-19 by carrying out a detailed analysis of the structural challenges that labour markets face in North Africa in the aftermath of the COVID-19 pandemic, focusing on best

practices in employment creation. The subprogramme plans to develop a road map in support of member States dealing with the effects of COVID-19 in North Africa.

15.193 The above-mentioned work is expected to result in:

(a) Member States adopting evidence-based pro-employment macroeconomic policies and redirecting resource allocations towards sectors that have more economic potential in terms of productivity, competitiveness and employment and that stimulate job creation;

(b) Member States designing appropriate policies that foster regional integration, enhance productivity and create new jobs;

(c) Improved availability and use of migration statistics, and the greater recognition of skills across the continent.

15.194 The planned support on issues related to COVID-19 is expected to result in member States initiating projects to decrease the unemployment rate through learning from best practice in employment creation of another country.

### **Programme performance in 2020**

15.195 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

#### **Increased policy development by member States to facilitate recovery from COVID-19**

15.196 Many countries in the North Africa subregion were unprepared to handle a pandemic like that of the coronavirus. The consequences of the pandemic are expected to be catastrophic for millions of people in the subregion. In response to COVID-19 and to ad hoc requests from member countries, the component produced a report on the medium to long-term impact of the pandemic and suggested mitigation strategies for North Africa. The report presented a set of policy options to reduce the negative socioeconomic effects of COVID-19, examined critical sectors of economies that were affected and considered in particular the needs of people in vulnerable situations. The component also provided a separate analysis of the socioeconomic impact of the pandemic for the Government of Algeria, using the ECA macroeconomic model, notably by assessing the impact on GDP, employment, the budget deficit and the trade balance. It also prepared a report on Morocco which contributed to the development of the COVID-19 socioeconomic response plan developed by the United Nations country team.

15.197 The component further organized five online expert group meetings in relation to COVID-19 on the following issues: best practices in job creation in North Africa, which identified different job creation strategies to increase employment opportunities in North African countries in the context of post pandemic recovery; the potential of the African Continental Free Trade Area to mitigate the impact of COVID-19 on trade strategies in North Africa; the challenges of the post-COVID-19 pandemic era for North Africa, advocating the acceleration of crucial reforms to help the subregion to cope with and rebound from the pandemic; innovation and new technologies in North Africa in the context of COVID-19; and achieving the 2030 Agenda and 2063 Agenda in North Africa. Furthermore, the component organized a meeting on the \$100 billion initiative led by ECA to support Africa in facing the pandemic.

*Progress towards the attainment of the objective, and performance measure*

15.198 The above-mentioned work contributed to the objective, as demonstrated by two North African countries, Egypt and Morocco, adopting job creation strategies to increase employment opportunities in the context of post COVID-19 pandemic; two member States, Mauritania and the Sudan, adopting policies to limit the impact of the pandemic through the African Continental Free Trade Area and different trade strategies; and a further two member States, Algeria and Morocco, adopting policies to accelerate crucial reforms to help the subregion to cope with and rebound from the pandemic (see table 15.20).

Table 15.20  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
–	–	<ul style="list-style-type: none"> <li>• Two North African countries, Egypt and Morocco, adopt job creation strategies to increase employment opportunities in the post-COVID-19 pandemic era</li> <li>• Two member States, Mauritania and the Sudan, adopt policies to limit the impact of the pandemic through the African Continental Free Trade Area and other trade strategies</li> <li>• Two member States, Algeria and Morocco, adopt policies to accelerate crucial reforms to help the subregion to cope with and rebound from the pandemic</li> </ul>

**Impact of COVID-19 on component delivery**

15.199 Owing to the impact of COVID-19 during 2020, the component had to postpone the implementation of scoping and technical support missions to six countries and other planned activities. Those activities included the training of policymakers to design and implement suitable policies to reduce unemployment. The component also postponed major activities of the migration project, such as national and subregional workshops, country situational analysis, capacity-building and advisory services on migration data and statistical dashboards. It further had to postpone planned capacity-building on the localization of the Sustainable Development Goals in Mauritania and on the African Continental Free Trade Area in the Sudan. The component implemented a number of mitigation measures, such as promoting virtual meetings, including for the session of the Intergovernmental Committee of Senior Officials and Experts of the Subregional Office for North Africa, and conducted webinars wherever it was possible and useful to do so. The component postponed some activities that required the physical presence of stakeholders. These changes had an impact on the programme performance in 2020, as specified under result 1 below.

15.200 At the same time, however, the component identified new activities to support member States on issues related to COVID-19, within the overall scope of its

objective. New and modified activities included several country analyses and analytical contributions to the socioeconomic response plan of the United Nations country team in Morocco and the organization of virtual expert group meetings on the impact of COVID-19. The modified and new deliverables contributed to the results in 2020, as specified in the emerging result above.

## **Planned results for 2022**

15.201 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: strategies and policies for employment creation<sup>13</sup>**

#### **Programme performance in 2020**

15.202 The component has worked on the phenomenon of jobless growth in North Africa and analysed the challenges to structural transformation and job creation. Using data from the manufacturing sector, a methodology has been developed and applied to Morocco that showed that distortions in the manufacturing sector have a significant impact on total factor productivity. The component highlighted the need to tackle distortions, boost firms' growth and unleash their job creation capacity. Furthermore, the component supported Algeria, Egypt and Mauritania in strengthening their capacity in the area of building national macroeconomic models for forecasting and policy simulation.

15.203 The above-mentioned work contributed to the increased capacity of 40 government officials in macroeconomic modelling, which did not meet the target of 28 policymakers trained to better assess the gaps in public policies and design and implement suitable policies to reduce unemployment reflected in the proposed programme budget for 2020. Owing to the impact of the COVID-19 on the economies of North African countries, the subprogramme reprogrammed its activities to build the capacity of government officials from member States to assess growth performance and make policy simulations to overcome the impact of the pandemic.

#### **Proposed programme plan for 2022**

15.204 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective and in response to recent developments, the component's work will evolve in 2022 to include the following activities: an analysis of the services sector; an analysis of the dynamic impact of distortions on the trajectories of firms in terms of employment creation; the identification of distortions impeding firms' growth; and an analysis of mechanisms that prevent job creation for the skilled youth and human capital accumulation. The component intends to extend the analysis to the rest of the Moroccan economy, Tunisia and countries where data are available. The component will continue to support member States in rolling out their national macroeconomic models, forecasting growth and assessing the impact of different macroeconomic policies. The expected progress is presented in the updated performance measure below (see table 15.21).

---

<sup>13</sup> As reflected in the proposed programme budget for 2020 ([A/74/6 \(Sect. 18\)](#)).

Table 15.21  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
–	–	Increased capacity of 40 government officials on macroeconomic modelling	56 policymakers trained to better assess the gaps in public policies and design and implement suitable policies to reduce unemployment	Three countries (Algeria, Egypt and Mauritania) use the macroeconometric model developed for forecasting

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: North African countries adopt best practices for job creation<sup>14</sup>

### Programme performance in 2020

15.205 The component is oriented towards employment creation in North Africa to tackle the long-term deficiencies in the subregion. The component has produced a report on labour markets in North Africa, reviewing structural challenges and the impact of COVID-19 and setting out a road map for the post-pandemic period. The component prepared an analysis of active labour market policies in North Africa and identified several best practices on job creation in the subregion. The component also produced an analysis of the strengths and weaknesses of the subregion facing the challenges induced by the pandemic. This analysis led to policy recommendations to tackle the consequences of the pandemic and the challenges facing employment in the short to medium term. Furthermore, the component is conducting enterprise surveys to capture the effect of the pandemic on private firms (output, employment and investment) to provide policy recommendations for the recovery from the effects of COVID-19 on the economy.

15.206 The above-mentioned work contributed to the engagement of three North African countries in the development of suitable policies to reduce the negative impact of COVID-19 on employment, in particular on job creation, which met the planned target reflected in the programme budget for 2021.

### Proposed programme plan for 2022

15.207 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will support member States' efforts to mitigate the impact of COVID-19 in the labour market by designing suitable employment policies, promoting their implementation and providing a platform for regional dialogue. The expected progress is presented in the performance measure below (see table 15.22).

<sup>14</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

Table 15.22  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
–	North African countries gain interest in employment creation for sustainable development and become engaged in regional dialogue	Three North African countries (Egypt, Morocco and Tunisia) engaged in the development of suitable policies to reduce the negative impact of COVID-19 on employment	At least one country in the North African subregion decreases its unemployment rate through the implementation of one job-creation programme	An additional country in the North African subregion decreases its unemployment rate through the implementation of one job-creation programme

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: increased policy design capacity of North African countries to foster regional integration**

#### **Proposed programme plan for 2022**

15.208 Regional integration is a central process of Agenda 2063, which outlines the African development vision for the next four decades. Among the subregions of Africa, North Africa has the lowest degree of integration and regional integration has the potential to increase GDP by 3 per cent in North Africa. The component has supported member States in studying global value chains and formulating African Continental Free Trade Area national strategies in Algeria and Mauritania. The component has increased member States' knowledge of regional integration and its expected impact on the subregion.

#### *Lessons learned and planned change*

15.209 The lesson for the component was that, as expressed by member States, there is a need for a more detailed sectoral analysis of the opportunities for trade development and regional integration in North Africa. The component's previous work on trade facilitation and regional value chains has to be further developed in particular sectors, such as those of pharmaceuticals and finance. In applying the lesson, the component will develop a regional model that could take the form of an integrated productive fabric specialized in sectors such as pharmaceuticals, fishing industries and others.

#### *Expected progress towards the attainment of the objective, and performance measure*

15.210 This work is expected to contribute to the objective, as demonstrated by six member States designing and implementing appropriate policies to foster regional integration (see figure 15.XIII).

Figure 15.XIII

**Performance measure: total number of member States that design appropriate policies to foster regional integration (cumulative)**

## Legislative mandates

15.211 The list below provides all mandates entrusted to the component.

### General Assembly resolutions

- [69/3](#) Priorities and vision articulated in Agenda 2063, the New Partnership for Africa's Development (NEPAD), the Addis Ababa Action Agenda of the Third International Conference on Financing for Development

## Deliverables

15.212 Table 15.23 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 15.23

**Subprogramme 7, component 1: deliverables for the period 2020–2022, by category and subcategory**

32. Analysis of the socioeconomic impact of the pandemic on Algeria	–	1	–	–
33. Report on Morocco for the development of the COVID-19 socioeconomic response plan	–	1	–	–

### C. Substantive deliverables

**Consultations, advice and advocacy:** advisory services to four member States to develop national macroeconomic models; advisory services to two member States to build their national strategies on implementation of the Agreement Establishing the African Continental Free Trade Area; technical assistance to at least four member States to produce datasets on migration; technical assistance to four member States on implementation of the 2030 Agenda; advisory services to one member State on increasing productivity through a better allocation of resources within the economy.

### D. Communication deliverables

**Digital platforms and multimedia content:** maintained knowledge management website, three maintained platforms: customer relationship management, library, and communities of practice; wide electronic diffusion of publications to communities of practice.

**External and media relations:** press releases, newsletters, briefings, social media and other communication materials.

## Component 2 Subregional activities in West Africa

### Objective

15.213 The objective, to which this component contributes, is to advance inclusive development in West Africa through strengthening the countries' capacity to integrate demographic dynamics challenges in policies and planning processes and achieve regional integration.

### Strategy

15.214 To contribute to the objective, the component will promote cooperation with member States, regional entities, think tanks and other partners in the process of demographic dynamics for development. Henceforth, on the one hand, the planned activities will respond to capacity-building requests aimed at harnessing the opportunities unleashed by demographic dividends and, on the other hand, the component will continue to build on the Commission's comparative advantage to undertake analysis and research on demographic issues (subprogramme 9), combined with its expertise in the macroeconomic area (subprogramme 1). In addition, the component will provide knowledge, tools and policies to remove impediments faced by member States to the acceleration of demographic transition and related implications for sustainable development. For this purpose, a wide range of issues, including family dynamics, migration and migrants, health and mortality, ageing and living conditions, historical demography, civil registration, gender equality and the empowerment of women and girls, youth empowerment, peace and security, and others, are being addressed. In the same vein, the component will pursue its strategic partnership with the ECOWAS Commission to ensure that research recommendations are translated into regional policy. This work will support member States' efforts in achieving Sustainable Development Goals 4, 5, 8, 10, 16 and 17.

15.215 The component will make use of policy dialogues to serve as a platform for the dissemination of studies and exploration of opportunities for advocacy, best practices and experience-sharing between countries. The component will continue to work in partnership with the United Nations regional offices in West Africa, the

United Nations Office for West Africa and the Sahel (UNOWAS), the Liptako-Gourma Integrated Development Authority and the Ministerial Coordination Platform for the Sahel on strategies to translate into action the findings of its main studies. Regarding the planned activities in the area of the peace and security agenda, the component will emphasize interventions that privilege the coherence and synergy of actions among United Nations entities with a view to optimizing expected results.

15.216 The component will leverage momentum to deliver more comprehensive and analytical insight into the existing socioeconomic work on the subregional priorities. In relation to countries' COVID-19 socioeconomic response plans, the component will expand the provided support and advocate demographic-economic policies in partnership with national demographic dividend observatories and universities. In addition, it will put emphasis on initiatives for access to fresh financial resources in response to COVID-19 priorities.

15.217 The component will continue, also in view of the socioeconomic impacts of COVID-19, to provide advisory services and technical assistance to ECOWAS and the West African Economic and Monetary Union, intergovernmental organizations and member States in the design and implementation of subregional policies aligned with subregional priorities. More specifically, the component will consolidate its current support for efforts by the ECOWAS Commission to finalize its Vision 2050 and develop its related five-year Community strategic framework.

15.218 The above-mentioned work is expected to result in:

- (a) Mainstreaming of demographic dynamics in countries' public policy frameworks, including deeper regional economic and monetary integration through the ECOWAS Vision 2050;
- (b) Improved livelihoods of populations in the subregion;
- (c) Enhanced regional integration and successful implementation of the international agreed agendas, including the African Continental Free Trade Area.

## **Programme performance in 2020**

15.219 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Increased focus on the demographic dividend potential in West Africa**

15.220 To ensure the successful integration of demographic dynamics in development policies, the subprogramme developed macroeconomic tools, namely a population model and a budget framework sensitive to the demographic dividend, to support Governments in achieving national development goals and the Sustainable Development Goals. The component carried out research which showed that, in the ECOWAS subregion, there were many opportunities for the demographic dividend to be seized. The window of opportunity for the subregion will not close before 2100. The demographic dividend for the West African subregion was estimated at 0.30 per cent in 2019, representing a contribution of 30 per cent to the growth rate of real GDP per capita in the region.

15.221 The component worked with the Ministry of Finance of Mali, in partnership with the Regional Centre of Excellence in Generational Economics of the University of Thiès, in Senegal, and jointly organized a workshop on integrating the demographic dividend in the national budgeting framework, in February 2020 in Bamako. The workshop brought together the Directorate General of Budget; members of

Parliament, counterparts of the Ministry of Economy and Finance, and representatives of civil society. Furthermore, the component's actions and endeavours have contributed to leveraging its strategic partnership and in-depth involvement of the national demographic dividend observatory in Mali to support integration of the demographic dividend into the budget formulation processes.

15.222 In the Niger, the component provided technical and financial assistance and helped to develop its gender and demographic dividend monitoring index. This support has strengthened the national capacity to produce gender and demographic dividend statistics and to integrate the twin dimensions – gender and the demographic dividend – into policies and programmes.

*Progress towards the attainment of the objective, and performance measure*

15.223 The above-mentioned work contributed to the objective, as demonstrated by the increase in the number of national demographic dividend observatories to five and the increase in the number of strategic partnerships with think tanks, research institutions and universities to 10 (see figure 15.XIV).

Figure 15.XIV

**Performance measure: total number of national demographic dividend observatories and partnerships including think tanks and research institutions (cumulative)**

**Impact of COVID-19 on component delivery**

15.224 Owing to the impact of COVID-19 during 2020, the component changed its approach of delivering meetings, workshops and had to delay the yearly servicing of intergovernmental and expert bodies. With regard to the institutional capacity of ECOWAS, the process of formulating and validating the medium-term strategic framework of the ECOWAS Vision 2050 with the key regional stakeholders was deferred to 2021. The component also modified its comprehensive support planned for countries and moved to virtual formats. Thus, emphasis has been put on online training, in particular in demographic dynamics tools and models which are being made available to member States, regional economic communities and intergovernmental organizations. These changes had an impact on the programme performance in 2020, as specified under result 2 below.

15.225 At the same time, however, the component identified additional activities to support member States on issues related to COVID-19, within the overall scope of its objectives. The component was able to repurpose and reprioritize its work programme and supported countries in meeting their immediate needs related to COVID-19. For

example, it worked in partnership with the African Union Commission, the Generation Unlimited global partnership and the United Nations Children's Fund (UNICEF) to provide its expertise in demographic economics to feed into the youth consultation on the theme of building forward and building better with young Africans. In addition, it contributed to a study on the macroeconomic impact of COVID-19 in West Africa, which informed country-specific analyses of the socioeconomic impact of the pandemic and the response plans for eight member countries (Cabo Verde, Côte d'Ivoire, Ghana, Guinea, Guinea-Bissau, Niger, Senegal and Togo). In partnership with ECOWAS and the World Food Programme (WFP), the component also conducted a study on the socioeconomic impacts of COVID-19 in West Africa. In addition, a governance strategy for tracking COVID-19 funds was developed for Guinea, one of the five countries of focus, to support the country in the management of resources allocated to the COVID-19 response.

### **Planned results for 2022**

15.226 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

#### **Result 1: clean break with demographic trends in West Africa<sup>15</sup>**

##### **Programme performance in 2020**

15.227 The component has worked to make progress towards influencing public policies by building the capacities of national officials. Together with the African Union Office of the Youth Envoy, the African Union Commissioner for Youth and Generation Unlimited, it co-organized an online youth policy conversation, in which 3,849 young women and men participated. The outcome of that event informed the deliberations of the African Union Special Technical Committee on Youth, Culture and Sports. The component also trained 10 national officials at a hands-on workshop held in Mali on integrating the demographic dividend in the national budgeting framework and supported Liberia in implementing its road map on harnessing the demographic dividend by training 22 national experts in national transfer accounts methodology.

15.228 The above-mentioned work contributed to building the capacity of 62 national officials in demographic dynamics and strengthening their work to influence the formulation of public policy, which exceeded the planned target of 60 national officials reflected in the proposed programme budget for 2020.

##### **Proposed programme plan for 2022**

15.229 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective and in response to recent developments, the component's work will evolve to include, in addition to capacity-building, an emphasis on the monitoring of budget allocations to the development dividend pillars of public budgeting frameworks at national and subregional levels. The expected progress is presented in the updated performance measure below (see table 15.24).

---

<sup>15</sup> As reflected in the proposed programme budget for 2020 ([A/74/6 \(Sect. 18\)](#)).

Table 15.24  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
–	30 national officials trained in demographic dynamics and working to influence public policy formulation process	62 national officials trained in demographic dynamics and working to influence public policy formulation process	100 national officials trained in demographic dynamics and working to influence public policy formulation process	Three member States effectively use the public budgeting framework sensitive to the demographic dividend in their public budget allocation

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: consolidating 2020 achievements in supporting the ECOWAS Commission and translating recommendations into actions<sup>16</sup>

### Programme performance in 2020

15.230 The component has strengthened the strategic planning and public policy evaluation capacity in the ECOWAS Commission and its member States, with a view to achieving regional integration and increasing accountability. The component also supported the conceptualization of tools and a methodology for the inclusive consultation of ECOWAS populations and conducted an independent assessment of the Commission's Vision 2020. Furthermore, the component organized and worked in partnership with ECOWAS, other ECA subprogrammes, United Nations entities such as UNDP and the United Nations Educational, Scientific and Cultural Organization (UNESCO), consulting firms and country and regional stakeholders in support of national and regional consultations and a retrospective diagnostic on the successful implementation of the Commission's Vision 2020 to capture the aspirations of the subregion's populations. The outcome of the structural analysis has informed the formulation of the ECOWAS Vision 2050.

15.231 The above-mentioned work contributed to a first draft of the Vision 2050 blueprint and its first medium-term implementation plan, which did not meet the target of adoption and launch of the ECOWAS Vision 2050, including the official launch of its single currency, reflected in the programme budget for 2021. The launch of the eco, the proposed single currency for members of ECOWAS, has been postponed, owing to the impact of the COVID-19 pandemic on convergence criteria in the ECOWAS subregion.

### Proposed programme plan for 2022

15.232 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will work to accelerate the operationalization of the ECOWAS Vision 2050 in line with expected progress in the area of regional integration. It will also support the revision of the road map for the introduction of the single currency for the subregion. The expected progress is presented in the performance measure below (see table 15.25).

<sup>16</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

Table 15.25  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Evaluation of progress made against the 2014 road map for the ECOWAS single currency, proposal of scenarios and adoption of a new road map	Assessment of the ECOWAS Vision 2020 and formulation of the post-2020 vision, with the prioritization of accelerated implementation of the ECOWAS capacity development plan	First draft of the Vision 2050 blueprint and its first medium-term implementation plan	At least two West African countries operationalize the ECOWAS Vision 2050, including special emphasis on regional economic and monetary integration	At least two additional West African countries operationalize the ECOWAS 2050 Vision, including special emphasis on regional economic and monetary integration

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: strengthened national strategies for implementing the African Continental Free Trade Area

#### Proposed programme plan for 2022

15.233 The performance of regional economic communities in terms of their contribution to intra-African trade has varied while they are all facing common challenges, such as the inability to boost domestic production and economic diversification. Given the complexity of free trade area provisions, continued attention and support were provided to subregional initiatives, which included support for the development of national strategies to enable member States of the subregion to take full advantage of the African Continental Free Trade Area. The component also promoted the mainstreaming of a gender perspective and a youth focus in the formulation of policies and programmes related to the Area. Accordingly, those aspects have already been included in the validated national African Continental Free Trade Area strategies of six countries: Côte d'Ivoire, Guinea, Niger, Senegal, Sierra Leone and Togo. To date 11 out of 15 (73 per cent) West African countries have ratified the Agreement Establishing the African Continental Free Trade Area and three countries – Benin, Burkina Faso and Guinea-Bissau – are being supported in their work to review and finalize the development of their respective national African Continental Free Trade Area strategies.

#### *Lessons learned and planned change*

15.234 Learning from pandemics such as those of Ebola and COVID-19, the lesson for the component was that it needed to support member States with the development of an interministerial plan for trade, in order to focus in particular on cross-border trade, to ensure limited disruption of the flows of essential goods and persons in the event of partial or full border closures or disruptions. In applying the lesson, the component will support the formulation and implementation of integrated national industrialization and economic diversification policies. It will further prepare for adoption an integrated approach to facilitate the mainstreaming of trade perspectives in national development plans. Since trade in services is an ongoing aspect of the African Continental Free Trade Area negotiations, regional economic communities will continue to develop and implement regional African Continental Free Trade Area

strategies that address barriers to trade in services and harness the potential role of regional economic communities to better service trade integration. The component therefore also plans to provide continued advice for the harmonization of the liberalization agenda of the services sector.

*Expected progress towards the attainment of the objective, and performance measure*

15.235 This work is expected to contribute to the objective, as demonstrated by a growing number of countries in the ECOWAS subregion which have ratified the Agreement Establishing the African Continental Free Trade Area and validated their respective African Continental Free Trade Area national strategies and are implementing the appropriate strategies to derive maximum benefit from intraregional and continental trade (see table 15.26).

**Table 15.26**  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)</i>	<i>2022 (planned)</i>
–	<ul style="list-style-type: none"> <li>• Agreement Establishing the African Continental Free Trade Area launched by the African Union on 7 July 2019 in Niamey</li> <li>• No ECOWAS member country ratified the Agreement</li> <li>• No national African Continental Free Trade Area strategies validated by countries</li> </ul>	<ul style="list-style-type: none"> <li>• 11 ECOWAS countries ratified the Agreement</li> <li>• 6 ECOWAS countries validated African Continental Free Trade Area national strategies (Côte d'Ivoire, Guinea, Senegal, Niger, Sierra Leone and Togo)</li> </ul>	<ul style="list-style-type: none"> <li>• 12 ECOWAS countries ratified the Agreement (cumulative)</li> <li>• 9 ECOWAS countries validated African Continental Free Trade Area national strategies (cumulative)</li> </ul>	<ul style="list-style-type: none"> <li>• 13 ECOWAS countries ratified the Agreement (cumulative)</li> <li>• 10 ECOWAS countries validated African Continental Free Trade Area national strategies (cumulative)</li> </ul>

## **Legislative mandates**

15.236 The list below provides all mandates entrusted to the component.

*Economic Commission for Africa resolutions*

830 (MFC 1 A)	Reform of the regional commissions: relationships between the Economic Commission for Africa, United Nations agencies and the regional and subregional organizations in Africa	909 (XLVI)	Realizing and harnessing the demographic dividend in Africa
		931 (XLVIII)	Data revolution and statistical development

*Conference of the Parties to the United Nations Framework Convention on Climate Change decisions*

1/CP.21	Adoption of the Paris Agreement
---------	---------------------------------

## Deliverables

15.237 Table 15.27 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 15.27

### Subprogramme 7, component 2: deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>2</b>	<b>2</b>	<b>2</b>	<b>2</b>
1. Reports to the Intergovernmental Committee of Senior Officials and Experts of the Subregional Office for West Africa on implementation of the work of ECA in West Africa	1	1	1	1
2. Annual report on the implementation of agreed-upon regional and international development agendas and on the work of ECA in West Africa	1	1	1	1
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>8</b>	<b>8</b>	<b>16</b>	<b>16</b>
3. Annual sessions of the Intergovernmental Committee of Senior Officials and Experts of the Subregional Office for West Africa	8	8	8	8
4. Annual meeting of the West Africa subregional coordination mechanism for the United Nations system-wide support for the African Union and its NEPAD programme with a view to avoiding duplication of effort and creating synergies among development stakeholders	—	—	8	8
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>1</b>	<b>1</b>	<b>1</b>	<b>1</b>

11. Policy briefs on sustainable economic and social transformation in West Africa	1	1	1	1
12. Technical materials on demographic dynamics for development	—	—	1	1
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> expert advice to 15 member States, upon request, and advisory services on the monitoring and implementation of strategies, statistics development, regional integration, demographic dynamics for development and sustainable development in West Africa and making progress towards the Sustainable Development Goals.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> organization of the Intergovernmental Committee for Senior Officials and Experts with 150 high-level participants, launch of flagship reports and related publications.				

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>External and media relations:</b> press releases and provision of other communication materials to the media.				
<b>Digital platforms and multimedia content:</b> subregion-specific content for the ECA website, social media platforms such as Twitter and Facebook, the library, communities of practice.				

## Component 3

### Subregional activities in Central Africa

#### Objective

15.238 The objective, to which this component contributes, is to expand the manufacturing and high-value service sectors and increase the share of tradeable and manufactured goods in total exports; deepen regional value chains; and improve the competitiveness and productivity of local economies in order to accelerate economic diversification and structural transformation in Central Africa.

#### Strategy

15.239 To contribute to the objective, the component will support the operationalization and implementation of economic diversification strategies, visions and industrial plans, which were formulated in Chad, Cameroon, the Congo and Equatorial Guinea over the period 2018–2019. It will also support the formulation of similar policies in other Central African countries. The component will also advocate a conducive business climate in Central Africa, addressing binding constraints associated with access to finance, market information, quality infrastructure, availability and quality of skills, fiscal regime and legal and regulatory framework. The component plans to pursue its support for United Nations country teams and member States in Central Africa by training them in the use of the ECA integrated planning and reporting toolkit.

15.240 The component will collect and collate market access information and trade opportunity data and, through the provision of advisory services and technical assistance, support countries in translating their national African Continental Free Trade Area strategies into specific and bankable projects, programmes and reforms.

15.241 The component will also continue to provide support to the Economic Community of Central African States (ECCAS) and the Central African Economic and Monetary Community (CEMAC) in the harmonization of their trade instruments and the formulation of a consolidated industrial development and economic diversification master plan for Central Africa. Building on the Central Africa Consensual Transport Master Plan, the component will support the subregion in the transformation of transport corridors into development corridors through the GIS-enabled spatial planning and hot spot analysis tool.

15.242 The component will provide advisory services and technical assistance to member States for the purpose of upgrading their information and communications technology infrastructure and regulatory frameworks that are required for the digital transition, including support for the establishment of technology innovation centres in two selected countries, the development of e-commerce and the implementation of digital identity systems. This will benefit from collaboration with the ECA African Centre of Excellence on Digital Identity, Trade and Economy. Supporting member States in Central Africa to secure fiscal space for economic diversification will remain an area of focus, in particular following the position taken by Central African

ministers of finance and economy in October 2019 to focus the next three-year programme with the International Monetary Fund (IMF) not only on short-term measures to restore macroeconomic stability but equally on medium to long-term structural issues, such as economic diversification. To this effect, the component will provide technical assistance and advisory services to socialize the ECA macro model in Central Africa and train a critical mass of experts in relevant units in the administration of the member States. This will include dedicated courses provided through subprogramme 8, in close collaboration with the Debt Management Facility of the World Bank.

15.243 The component will also strengthen collaboration with private sector bodies, set quantitative targets for all factors that weaken productivity and competitiveness, and subsequently develop a reform agenda conducive to triggering the changes needed to reach these targets. This will be done in partnership with the private sector, subregional think tanks and regional economic communities at the regional level, in order to foster emulation, peer learning and progress. The overall work of the component will contribute to supporting member States in making progress towards the Sustainable Development Goals, more specifically Goals 8, 9 and 12, notably through the support of the emergence of regional value chains and intra Central-Africa trade, and the inclusion of pro-growth and pro-jobs policies in development strategies.

15.244 The component, in collaboration with United Nations country teams in Central Africa, plans to support member States on issues related to COVID-19 by providing analysis on the socioeconomic impact of the pandemic on their economies and by formulating policy measures aimed at strengthening the resilience of local economies to external shocks, including those caused by COVID-19 related trade and supply-side disruptions. The component will contribute to strengthening the capacity of the member States' health systems, protecting small and medium-sized enterprises, and supporting the agricultural and pharmaceutical sectors, in the framework of the call for building forward and building better.

15.245 The above-mentioned work is expected to result in:

- (a) Well designed and integrated economic diversification and industrial development master plans, leading to the emergence of regional value chains, an expansion of the manufacturing and high-value service sectors;
- (b) Better performing, well-integrated and functional industrial clusters, special economic zones and industrial plants and well-informed and evidence-based trade creation, thus contributing to the increase of the share of intra-Central Africa trade in the subregion's total trade;
- (c) Better understanding by member States and other stakeholders of the binding constraints on private sector development which can contribute to the design of better strategies and approaches to private sector development;
- (d) Extensive integration of the relevant economic diversification-related goals and targets of the 2030 Agenda and Agenda 2063 in national development strategies and plans, common country assessments and United Nations sustainable development cooperation frameworks, thereby bringing countries and United Nations country teams to place stronger emphasis on trade and economic diversification issues;
- (e) Increase in the number of projects that secure effective financing of industrialization and economic diversification for member States;
- (f) Raise in the level of the Central African productive integration index, reflecting the level of integration of local economies in regional value chains;

(g) Improved access by local firms to information and communications technology products, thus boosting their productivity;

(h) Assistance to member States in the subregion in securing fiscal space to finance their infrastructure needs and modernize their services, in turn improving the business environment and enhancing productivity and competitiveness;

(i) Strengthened role of the private sector in economic diversification in Central Africa and also their contribution to the identification of policy and market failures, including governance issues, non-conducive legal and regulatory frameworks, heavy administrative procedures and inadequate public service delivery, which are all factors currently hindering the productivity and competitiveness of the subregion's local economies, the lowest in Africa.

15.246 The planned support on issues related to COVID-19 is expected to result in better country response and recovery plans to the pandemic and building forward and building better.

### **Programme performance in 2020**

15.247 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

#### **Special economic zones and industrial clusters as the vehicle for structural transformation**

15.248 The share of manufactured goods in total exports of Central Africa is still low. Countries rely on the production and trade of commodities and raw materials with little beneficiation and value addition, exposing them to the vagaries of commodity price fluctuations, leading to booms and busts, macroeconomic instability and unsustainable economic growth. The component has contributed to putting economic diversification at the centre of development policy at the country and regional level, as a sustainable response to building strong, competitive and resilient economies in Central Africa.

15.249 With the direct support of the component and its advocacy, several countries in the region developed economic diversification strategies, readjusted their industrial development plans and incorporated structural transformation or economic diversification issues in their major policy and planning frameworks. For example, in Cameroon, economic structural transformation constitutes a pillar of the country's national development strategy for 2020–2030. The component supported the Government in adopting a more results-oriented approach to the implementation of the industrial development master plan by focusing investments in special economic zones and industrial clusters with the greatest and most immediate socioeconomic impact. To this effect, it helped the Government to identify the Kribi-Edea-Douala growth triangle as the plan's poster project. Moreover, and as part of the Kribi-Edea-Douala growth triangle, the component has supported the formulation and implementation of a short-term plan of action aimed at developing an integrated, well-structured and strong pharmaceutical industry to position Cameroon as a competitive hub in the pharmaceutical production and supply chains in Central Africa. The component has also mobilized the Africa Finance Corporation to co-develop the country's special economic zones and industrial clusters.

#### *Progress towards the attainment of the objective, and performance measure*

15.250 The above-mentioned work contributed to the objective, as demonstrated by the adoption of the Kribi-Douala-Edea growth triangle as a pilot industrial

megacluster to expedite the implementation of the industrial master development plan, of the adoption by the Government of Cameroon of a results-oriented approach to the implementation of the Cameroon industrial development master plan and the formulation and implementation of a short-term plan of action aimed at developing an integrated, well-structured and strong pharmaceutical industry for Cameroon (see table 15.28).

Table 15.28

**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>
—	—	<ul style="list-style-type: none"> <li>• Adoption of the Kribi-Douala-Edea growth triangle as a pilot industrial megacluster to expedite implementation of the industrial development master plan</li> <li>• Adoption by the Government of Cameroon of a results-oriented approach to the implementation of the country's industrial development master plan</li> <li>• Formulation and implementation of a short-term plan of action aimed at developing an integrated, well-structured and strong pharmaceutical industry for Cameroon</li> </ul>

**Impact of COVID-19 on component delivery**

15.251 Owing to the impact of COVID-19 during 2020, most if not all meetings, workshops and training events organized by the component were held online instead of face-to-face. These included the thirty-sixth session of the Intergovernmental Committee of Senior Officials and Experts for Central Africa, held in November 2020 on the theme “Building skills for economic diversification in Central Africa”, ad hoc expert group meetings, and many consultations and advisory services. These changes had an impact on the programme performance in 2020, as specified under result 1 below.

15.252 At the same time, however the component identified and implemented activities to support member States in addressing issues related to COVID-19, within the overall scope of its objectives, namely contributions to reports on the socioeconomic impact of the COVID-19 pandemic on several Central African countries and on the subregion as a whole; and the articulation of the pathways to building resilient economies in Central Africa, in partnership with the United Nations country teams in Cameroon, the Congo and Gabon.

**Planned results for 2022**

15.253 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

**Result 1: increased economic diversification in Central Africa<sup>17</sup>****Programme performance in 2020**

15.254 In 2020, as a result of a persistent campaign for economic diversification anchored on resource-based and trade-induced industrialization, the component succeeded in placing the theme of economic diversification high on the agendas of Governments and regional economic communities in Central Africa for dealing with and building forward and building better from the COVID-19 pandemic. With the support of the component the CEMAC and ECCAS Commissions committed themselves to rigorously pursuing a consolidated subregional economic diversification and industrialization masterplan. Both regional economic communities have reflected this policy priority in tangible actions and instruments of some of their main institutions and statutory bodies. The component also contributed to the formulation of an economic diversification and industrialization masterplan for Chad and a development vision for the Congo (Vision Congo 2048). Both strategies were validated through a participatory and inclusive process.

15.255 Beyond strengthening the capacity of member States and regional economic communities to formulate economic diversification policies, in 2020, the component placed special importance to skills development as a major factor in accelerating the pace of industrialization and economic diversification in Central Africa. To this effect, the theme of the thirty-sixth session of the Intergovernmental Committee of Senior Officials and Experts for Central Africa held in November 2020 was “Building skills for economic diversification in Central Africa”. The Committee officially declared the period 2021–2030 as the decade for economic diversification in Central Africa to foster a significant change in the structure of the economies of the subregion. This decade for economic diversification is linked to the 2020–2030 decade of action and delivery for sustainable development and the efforts towards fulfilment of Agenda 2063. Accordingly, reporting on the decade of economic diversification in Central Africa will constitute an input to the subregion’s reporting on the two agendas.

15.256 As part of the ad hoc United Nations task team set up in the Central African Republic, the component assisted the country to develop and execute a response plan to COVID-19, through an analysis of the socioeconomic impact of the pandemic and by incorporating regional and subregional dimensions into the outline. The component also provided an analysis of medium to long-term measures for strengthening the capacity of the country’s health system, the protection of small and medium-sized enterprises, and support for the agricultural sector. Meanwhile, together with UNDP, the component co-led the work of the United Nations country team in Cameroon on the socioeconomic impacts of the COVID-19 pandemic. Within this framework, the Subregional Office contributed to the formulation by Cameroon of a response plan to the pandemic through a study on the economic and social impact of COVID-19. The component also helped the formulation of the common country assessment and the United Nations sustainable development cooperation framework for Cameroon. The component leads pillar 1 of the framework, which is centred on the implementation of the national African Continental Free Trade Area strategy and industrial development plan.

15.257 The above-mentioned work contributed to the share of 2.1 per cent of intra-Central African trade in intra-African trade, which did not meet the planned target of 3 per cent reflected in the proposed programme budget for 2020, owing mainly to the disruptions caused by COVID-19.

<sup>17</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 18)).

### Proposed programme plan for 2022

15.258 The component will continue its work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will increase its focus on the implementation of the consolidated subregional economic diversification and industrialization masterplan at the subregional level and similar frameworks at national levels in five member States. The expected progress is presented in the performance measure below (see figure 15.XV).

Figure 15.XV

#### Performance measure: share of intra-Central African trade in intra-African trade

(Percentage)

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 2: switching from design to implementation of economic diversification strategies<sup>18</sup>

#### Programme performance in 2020

15.259 The component has assisted Cameroon in the formulation of its national African Continental Free Trade Area strategy. In addition, the component supported the deployment of a trade decision support model in Cameroon and trained senior industry, statistics and trade officials in use of the model, which supports the country in identifying products and market export opportunities to expand and diversify its export products and markets, within the context of the African Continental Free Trade Area. Furthermore, building on the recommendations of the thirty-fifth session of the Intergovernmental Committee of Senior Officials and Experts, which identified e-commerce as an opportunity to expand trade in modern services and implement the African Continental Free Trade Area in the subregion, the component published a study on the role of mobile technologies in enabling e-commerce in Central Africa, organized an online experts group meeting on that issue and a webinar on maximizing intra-African trade in the context of African Continental Free Trade Area and the role in that process of e-commerce and the private sector, both held in December 2020.

15.260 To assist Central African countries to translate the adopted African Continental Free Trade Area strategies into tangible actions to advance economic diversification

<sup>18</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

in Central Africa, the component initiated a GIS-enabled assessment of the growth potential along transport corridors in the subregion. The multivariate analysis and superimposition of socioeconomic and biophysical data has enabled the identification of several economic hotspots that can sustain economic diversification and sustainable development in Central Africa. It further supports better spatial planning, investment decision and the localization of industrial clusters and special economic zones, as well as arbitration between competing land-use options.

15.261 In addition, two project proposals on building capacity in natural capital accounting and mainstreaming the process in national accounts in Cameroon and Gabon were prepared and submitted to the Sustainable Development Goals Fund. The natural capital accounting project in Gabon has been funded and is being implemented. This is aimed at strengthening capacity in the natural capital accounting process and demonstrating how to use its outcomes to expand fiscal space through innovative financing tools such as green and blue bonds. The project will expand the options for financing economic diversification in the subregion, given the limited fiscal space and funding constraints as a result of the fall in commodity prices in 2014.

15.262 Moreover, the component has consistently engaged the United Nations country teams in the subregion to mainstream structural transformation, economic diversification, green growth and the operationalization of the African Continental Free Trade Area in the common country assessments, United Nations sustainable development cooperation frameworks and the overall work of the United Nations in Central Africa, as a means of building more resilient, job-creating and sustainable economies in the subregion. Achieving economic diversification and green growth is central to the repositioning of the work of the United Nations country teams in the Congo and Gabon. The inclusion of economic diversification-related issues in the work of the country teams in Central Africa will promote the cause of “Delivering as one” and expand the funding possibilities for this important campaign across the subregion.

15.263 To encourage local production and consumption, key factors for the achievement of economic diversification, deepen intra-Central Africa trade and increase economic linkages and multiplier effects, such as the expansion of small and medium-sized enterprises, job creation and others, the component launched its campaign on the “Made in Central Africa” label. Use of the “Made in Central Africa” label has been recognized by the CEMAC and ECCAS commissions, senior officials of trade ministries, industry associations, investment promotion authorities and chambers of commerce as a major industrial policy tool for maximizing the benefits for Central African countries of the African Continental Free Trade Area. Under the prevailing rules of origin of the African Continental Free Trade Area, the label would facilitate the expansion of local production and consumption of 379 products termed sensitive (7 per cent of tradable products) and 172 products considered excluded (3 per cent of tradable products), in respect of which the subregion will not compete with any other.

15.264 In addition, at its thirty-fifth session, the Intergovernmental Committee of Senior Officials and Experts of Central Africa, organized by the component, recommended the set-up of two innovation centres in the subregion in collaboration with the Office of Information and Communications Technology (OICT) under the United Nations Technology Innovation Labs initiative. As planned, with the support of the component the Governments of Equatorial Guinea and Gabon submitted requests to OICT for the establishment of innovation centres in their respective countries. Under the leadership of ECA, the component contributed to the launch of an artificial intelligence innovation centre in Brazzaville, aimed at fostering science, technology and innovation in the subregion.

15.265 The above-mentioned work contributed to the finalization and adoption of national African Continental Free Trade Area strategies by Cameroon and the Congo, which met the planned target reflected in the programme budget for 2021.

15.266 Furthermore, the above-mentioned work contributed to the submission of requests by Equatorial Guinea and Gabon for the establishment of innovation centres, which did not meet the planned target of the establishment of such centres as reflected in the programme budget for 2021. The centres could not yet be established as the United Nations Technology Innovation Labs initiative was paused, pending finalization of an assessment of the different innovation structures within the United Nations.

### Proposed programme plan for 2022

15.267 The component will continue its work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will support member States in implementing their economic diversification strategies. The expected progress is presented in the performance measure below (see table 15.29).

Table 15.29  
Performance measure

	administrations on the procedure for the approval of industrial products for the preferential tariff of Central Africa			

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: policy changes conducive to economic diversification in the context of building forward and building better from the socioeconomic impacts of the COVID-19 pandemic and the operationalization of the African Continental Free Trade Area**

#### **Proposed programme plan for 2022**

15.268 While there has been progress in the formulation and adoption of economic diversification strategies, their implementation is still constrained by many issues and challenges, such as access to adequate financing and governance and leadership issues. To address these, the business models in Central Africa require a review. To this effect, in line with the imperative call for action of the decade of action and delivery for sustainable development, the component launched the 2021–2030 Decade for Economic Diversification in Central Africa, to usher transformational change into the subregion, anchored on strong coalitions for change.

#### *Lessons learned and planned change*

15.269 The lesson for the component was that greater development impact is achieved when there is policy alignment and coordination between the subregional office and substantial divisions at headquarters and between line ministries in government departments, and also between development partners, including United Nations country teams. This avoids duplication of efforts and maximizes the opportunities to realize economies of scale. In applying the lesson, the component will promote policy changes and move towards the inclusive and participatory implementation of economic diversification and industrial development plans and strategies, mobilizing both private and public sectors and other pertinent strategic partnerships in the implementation of well-conceived transformational projects and actions. The component will encourage better coordination and United Nations system-wide coherence in the delivery of support to member States and regional economic communities. It will invite partners to co-create and implement joint initiatives from the conceptualization stage, develop relevant theories of change and identify pathways towards harnessing economies of scale and increasing the impact of the coalition's interventions. Moreover, the component will continue to mainstream regional and transboundary issues in the work of the United Nations country teams across Central Africa and reinforce the place of structural transformation and economic diversification in United Nations sustainable development cooperation frameworks.

#### *Expected progress towards the attainment of the objective, and performance measure*

15.270 This work is expected to contribute to the objective, as demonstrated by the number of policy changes adopted in pursuit of economic diversification and industrial development (see figure 15.XVI).

Figure 15.XVI

**Performance measure: total number of policy changes adopted towards economic diversification and industrial development (cumulative)**

## Deliverables

15.271 Table 15.30 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 15.30

<b>Consultation, advice and advocacy:</b> advisory services and high-level policy dialogues with four member States on the implementation and monitoring of economic diversification and African Continental Free Trade Area strategies.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> dissemination of brochures and knowledge products, promoting and providing information through press briefings, media visits, newsletters and news releases on achievements on economic diversification and change leadership in the subregion.				
<b>Digital platforms and multimedia content:</b> maintained websites, digital platforms, and communities of practices on economic diversification, industrialization and the Sustainable Development Goals.				

## Component 4

### Subregional activities in East Africa

#### Objective

15.272 The objective, to which this component contributes, is to achieve deeper regional integration in East Africa, by advancing the operationalization of the African Continental Free Trade Area, increasing intraregional investments, harnessing the blue economy and enhancing regional tourism.

#### Strategy

15.273 To contribute to the objective, the component will build on work undertaken over the period 2019–2021 through providing African Continental Free Trade Area impact assessments for member States and regional economic communities, developing African Continental Free Trade Area national and regional strategies, identifying bottlenecks and also opportunities associated with stagnant levels of intraregional trade. The launch of trading under the Agreement Establishing the African Continental Free Trade Area on 1 January 2021 presents opportunities and challenges for member States to scale up their capacity to implement the Agreement.

15.274 The component will intensify support for the development of national African Continental Free Trade Area strategies and policy harmonization aided by knowledge production, technical support, policy dialogue and capacity-building for improved

policy and strategies pertaining to phases I, II and III of the African Continental Free Trade Area, focusing on such areas as trade in goods trade in services, digital trade, investment, movement of labour, trade and gender equality and women's empowerment, and competition issues to address the constraints.

15.275 External partnerships will be developed with the African Development Bank, Afrieximbank, national bodies responsible for investment and competition issues, the Northern Corridor Transit and Transport Coordination Authority, regional private sector bodies such as the East African Business Council, national private sector institutions and chambers of commerce and industry, policy think tanks, including the African Economic Research Consortium, the Economic Policy Research Centre, the Brookings Institution and TradeMark East Africa. This work will assist member States in making progress towards Goals 8, 9 and 17.

15.276 The component will convene regional capacity-building initiatives for member States, intergovernmental bodies and regional economic bodies with partners and investment promotion forums in the subregion, in line with the objectives of the protocol on investment to the Agreement Establishing the African Continental Free Trade Area, which is under development, and in collaboration with other subprogrammes, including subprogrammes 2 and 3, and possibly with UNCTAD.

15.277 The component will focus on improving the formulation of policies on the blue economy and promote economic diversification. Through the development and application of data collection and analytical tools, the component will thus assess the socioeconomic and environmental potential of aquatic and marine resources of member States. This will be done in collaboration with other divisions, including subprogrammes 4, 5 and 8, to measure the potential contribution of aquatic and marine resources to sustainable development in the region. The component will convene the second subregional forum to raise awareness on the ocean's economy, based on multisectoral approaches to fisheries, maritime transport, management of freshwater resources, tourism, deep-sea mining, and women's access to natural resources. This work will contribute to the progress of member States in achieving Goals 5, 6, 13, 14 and 17.

15.278 The component will further support the implementation of guidelines for urban tourism, in line with the recommendations set out in the African Tourism Strategy formulated by the African Union. The component will scale up its work on the production of high-quality tourism statistics in the subregion, through capacity-building for member States and regional economic communities. This work will be delivered in partnership with subprogrammes 4 and 9, the World Tourism Organization and the World Bank. The component will seek the development of tourism satellite accounts in two more countries in 2022 and will hold consultative and validation meetings with relevant tourism bodies and regional economic communities. Focus will be placed on the resilience of the tourism sector against external shocks such as COVID-19, through cultural tourism products that appeal to the local and regional tourism market and create sustainable employment opportunities for women and young people. This work will contribute to the progress of member States towards Goals 5, 8, 11 and 12.

15.279 The component plans to support member States on issues related to COVID-19 by focusing on integrating post-COVID-19 pandemic recovery in national development planning. This work will build on supporting efforts by member States to implement the recommendations from the socioeconomic impact assessments of the COVID-19 pandemic.

15.280 The above-mentioned work is expected to result in:

- (a) Higher levels of intraregional trade in goods and services;

- (b) Improved regulatory frameworks for investment, hence facilitating operationalization of the African Continental Free Trade Area;
- (c) Harmonization of investment regime and promotion strategies, making the region more competitive and attractive to intraregional investment;
- (d) Enhanced incorporation of blue economy policies and strategies into national development planning frameworks, as a means of promoting economic diversification and sustainable development;
- (e) Deeper regional integration through the sustainable management of transboundary water resources and the improved connectivity of land-linked countries;
- (f) Standardized methodologies for tourism data collection and analysis in the subregion;
- (g) Improved diversification of the tourism sector to cushion it from external shocks.

15.281 The planned support on issues related to COVID-19 is expected to result in increased diversification potential and economic resilience, with a view to building economies in the post-COVID-19 pandemic era through operationalization of the African Continental Free Trade Area.

### **Programme performance in 2020**

15.282 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

#### **Development of African Continental Free Trade Area strategies in response to the COVID-19 pandemic**

15.283 Following the outbreak of the COVID-19 pandemic in early 2020, the component assisted member States and regional economic communities to understand the impact of COVID-19 on their economies through several impact assessments and the development of African Continental Free Trade Area strategies to fast-track implementation of the Agreement establishing the Area as a vehicle for expanding socioeconomic opportunities and addressing the slowdown caused by COVID-19 disruptions.

15.284 In response to requests from several member States in 2020, the component conducted COVID-19 impact assessments, including for Djibouti, Rwanda, Seychelles and Uganda, and also for the East African Community (EAC), the Intergovernmental Authority on Development (IGAD), the Indian Ocean Commission and the International Conference on the Great Lakes Region. The COVID-19 impact assessments identified far-reaching economic impacts on the affected member States and included policy advice for them. For instance, the economy of Seychelles contracted by 13 per cent, requiring a different approach involving economic diversification away from the tourism sector, such as the promotion of regional tourism and a focus on other sectors, such as fisheries, in support of economic recovery after the COVID-19 pandemic.

#### *Progress towards the attainment of the objective, and performance measure*

15.285 The above-mentioned work contributed to the objective, as demonstrated by four member States (Burundi, Comoros, Democratic Republic of the Congo and Rwanda) designing strategies for the African Continental Free Trade Area as a tool for recovery from the COVID-19 pandemic and a regional strategy for EAC in 2020 (see figure 15.XVII).

Figure 15.XVII

**Performance measure: total number of countries that designed strategies for the African Continental Free Trade Area as a tool for recovery from the COVID-19 pandemic (cumulative)**

### **Impact of COVID-19 on component delivery**

15.286 Owing to the impact of COVID-19 during 2020, the component cancelled physical meetings for the twenty-fourth session of the Intergovernmental Committee of Senior Officials and Experts and data collection for the development of the African Continental Free Trade Area implementation strategies. Some activities were postponed as a consequence of government restrictions on travel owing to the COVID-19 pandemic, for instance, the dissemination and consultation work that was planned in form of seminars, workshops and training events organized in connection with the joint ECA-TradeMark East Africa report. The component modified its approach and adopted online data collection methods for its think-tank functions; and used online platforms to convene the planned twenty-fourth session of the Intergovernmental Committee of Senior Officials and Experts and the ad hoc expert group meetings on the blue economy and tourism. These changes had an impact on the programme performance in 2020, as specified under results 1 and 2 below.

15.287 At the same time, however, the component identified additional activities to support member States on issues related to COVID-19, within the overall scope of its objectives. It intensified its technical support to member States, regional economic communities and intergovernmental organizations on the conduct of socioeconomic assessments of the impact of the pandemic on the East African subregion, and on the economies of Djibouti, Rwanda, Seychelles, Uganda, the Great Lakes region in general, and the member States of EAC and IGAD. Using high frequency data, the component paid special attention to the impact of the pandemic on regional trade, culminating in several joint publications with the Brookings Institution. The new deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

### **Planned results for 2022**

15.288 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

# **Result 1: implementing the African Continental Free Trade Area: from vision to action in East Africa<sup>19</sup>**

## **Programme performance in 2020**

15.289 The component provided support for the harmonization of regional standards for trade in services through a subregional report in 2020 which elaborated the potential for services trade in the context of the African Continental Free Trade Area. Tourism, an important services sector, was hit worst by COVID-19 in 2020, hence the component held a policy dialogue as a special expert group meeting alongside the twenty-fourth session of the Intergovernmental Committee of Senior Officials and Experts on strategies for tourism recovery in the subregion.

15.290 The above-mentioned work contributed to six countries having ratified the Agreement Establishing the African Continental Free Trade Area, which exceeded the planned target of five countries reflected in the proposed programme budget for 2020. In addition, six countries (Djibouti, Ethiopia, Kenya, Madagascar, Seychelles and United Republic of Tanzania) registered a positive service trade balance.

15.291 Owing to the impact of the COVID-19 pandemic on data collection and reporting processes, the 2020 actual data on the share of intraregional trade was not available at the time of publication. For that reason, the subprogramme is not able to report the related 2020 actual performance in the context of the proposed programme budget for 2022. The 2020 actual performance will be presented in the context of the proposed programme budget for 2023.

## **Proposed programme plan for 2022**

15.292 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will scale up technical support for phases II and III of the African Continental Free Trade Area negotiations on services, investment, and electronic commerce, and further support policy development for the same purposes in 2022. The expected progress is presented in the performance measure below (see table 15.31).

Table 15.31  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)

<sup>19</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 18)).

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
		United Republic of Tanzania) registered a positive service trade balance		investment, digital commerce)

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: harnessing deeper regional integration in Africa<sup>20</sup>**

### **Programme performance in 2020**

15.293 In line with its regular workplan, the component produced several knowledge products with a view to supporting policy dialogue and a decision-making process leading to ratification of the Agreement Establishing the African Continental Free Trade Area by member States and improving trade as a means of addressing the economic slowdowns caused by the COVID-19 pandemic. These included the African Continental Free Trade Area impact study for East Africa, a report on trade in services, and a subregional profile report. These publications were discussed in different contexts, including at the twenty-fourth session of the Intergovernmental Committee of Senior Officials and Experts in 2020, during which implementation of the Agreement Establishing the African Continental Free Trade Area was prioritized as a smart strategy enabling countries to recover from the impact of COVID-19. To that end, the component intensified awareness-raising and advocacy work for the African Continental Free Trade Area through knowledge dissemination, in conjunction with such partners as TradeMark East Africa and the Brookings Institution, with a view to heightening awareness of the African Continental Free Trade Area.

15.294 The above-mentioned work contributed to the increase in ratifications of the African Continental Free Trade Area to six (Djibouti, Ethiopia, Kenya, Rwanda, Somalia and Uganda), which did not meet the planned target of seven member States reflected in the programme budget for 2021, owing to the impact of COVID-19 on government processes.

### **Proposed programme plan for 2022**

15.295 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will focus on advocacy, analysis and capacity and policy development in phases II and III of the African Continental Free Trade Area negotiations (on investment, intellectual property, services and digital trade), to elaborate the opportunities offered by the Area and to encourage countries to ratify the Agreement. The expected progress is presented in the performance measure below (see figure 15.XVIII).

<sup>20</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

Figure 15.XVIII

**Performance measure: total number of ratifications of the Agreement Establishing the African Continental Free Trade Area (cumulative)**

(Number of countries)

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: strengthened capacity of member States to harness the potential of the blue economy, including tourism within the African Continental Free Trade Area**

#### **Proposed programme plan for 2022**

15.296 The blue economy and tourism are economic sectors that attracted more attention and interest in 2020, owing to their potential and role in the recovery from the COVID-19 pandemic. While the tourism industry was one of the worst affected economic sectors, the blue economy provides hitherto untapped potentials for diversification.

15.297 The component supported knowledge generation in 2020 on blue economy satellite accounts for Seychelles, with a view to identifying diversification strategies that can be adopted to build forward better. The component also developed a blue economy valuation toolkit, that was piloted in three countries, Djibouti, Rwanda and Seychelles, to quantify the net contribution of the blue economy to sustainable development, GDP growth, job creation and environmental sustainability. Furthermore, with targeted technical assistance, the component complemented previous work on deep-sea mining, culminating in the development of a deep-sea mining road map for the continent.

#### *Lessons learned and planned change*

15.298 The lesson for the component was that member States needed more technical support in diversifying their blue economy activities to reduce their dependence on a few sectors and in applying the policy frameworks already developed in this area to create more economic opportunities to mitigate the impact of COVID-19. In applying the lesson, the component will strengthen strategic partnerships with United Nations country teams and external policy think tanks, to ensure that it provides agile technical support and ensures stronger programme sustainability and continuity. The component plans to support countries in the application of the frameworks and tools that were developed in 2020 and 2021 to identify projects with the potential to increase job opportunities and generally support socioeconomic recovery after the COVID-19 pandemic.

*Expected progress towards the attainment of the objective, and performance measure*

15.299 This work is expected to contribute to the objective, as demonstrated by the increase in subregional initiatives in the area of blue economy from three in 2018 to five by 2022, with a view to encouraging economic diversification among countries (see table 15.32).

Table 15.32

**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)</i>	<i>2022 (planned)</i>
Three member States, regional economic communities and intergovernmental organizations implemented subregional initiatives in the area of the blue economy, energy and tourism	Four policy and dialogue platforms on subregional development priorities, such as regional integration and trade, the blue economy and tourism	Nine policy frameworks and tools developed by member States on the blue economy  One country (Seychelles) finalized draft tourism satellite accounts (awaiting government approval)	Thirteen policy frameworks and tools developed by member States on the blue economy	At least two additional member States implement subregional initiatives in the area of the blue economy

**Legislative mandates**

15.300 The list below provides all mandates entrusted to the component.

*Economic and Social Council resolutions*

2011/43

Support to the Republic of South Sudan

**Deliverables**

15.301 Table 15.33 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 15.33

<b>Technical materials</b> (number of materials)	<b>3</b>	<b>3</b>	<b>3</b>	<b>3</b>
18. Technical materials on priority socioeconomic development issues in East Africa	3	3	3	3
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> technical support and advisory services to three member States on implementation of the Agreement Establishing the African Continental Free Trade Area, inclusive growth and economic and social transformation through inter-agency coordination.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> quarterly booklets, pamphlets, fact sheets, wallcharts and information kits and videos to reach all 14 countries in the subregion.				
<b>External and media relations:</b> quarterly engagements with national and regional media outlets (written blogs and interviews targeting 14 countries); electronic briefs and press releases on major activities of the Subregional Office for East Africa, including regional updates to reach all 14 countries in the subregion.				
<b>Digital platforms and multimedia content:</b> monthly web-based information bulletins on global outreach by the Subregional Office for East Africa.				

## **Component 5**

### **Subregional activities in Southern Africa**

#### **Objective**

15.302 The objective, to which this component contributes, is to strengthen subregional and national programmes and capacities to achieve inclusive industrialization for reducing poverty and inequality in Southern Africa.

#### **Strategy**

15.303 To contribute to the objective, the component will continue to promote cooperation and partnership with member States, regional economic communities, specifically the Southern African Development Community (SADC) and the Common Market for Eastern and Southern Africa (COMESA), and other intergovernmental organizations; the African Union; regional development financial institutions such as the African Development Bank; chambers of commerce and industry organized on private sector lines; associations of small and medium-sized enterprises and cross-border traders associations; civil society organizations; universities and research institutions; and United Nations agencies, including the United Nations Industrial Development Organization (UNIDO) and UNCTAD, in advancing regional and national industrialization priorities through the implementation of the SADC industrialization strategy and road map, 2015–2063, and the COMESA industrial policy, 2015–2030, and their alignment with, and support for, national industrialization policies. This work will assist member States in making progress towards the achievement of Sustainable Development Goal 9.

15.304 The component also plans to undertake policy research and analysis on industrialization, to provide technical assistance to member States, regional economic communities and intergovernmental organizations and to disseminate best practices at national and regional levels on industrialization in Southern Africa. In addition, the component will support SADC in the implementation of the new strategic vision for Southern Africa – Vision 2050 – and its 10-year strategic plan, the regional indicative strategic development plan, 2020–2030. This work will contribute to the progress of member States towards the achievement of Goal 9.

15.305 The component will continue to support and collaborate with regional entities and partners such as the SADC Business Council, the COMESA Business Council and the Southern Africa Trust in engaging the private sector, in particular micro, small and medium-sized enterprises, through initiatives such as the establishment and roll-out of a digital platform for such enterprises in Southern Africa, on which those enterprises and their owners, other entrepreneurs and policymakers can exchange information to facilitate business development and to enhance productivity. It will also assist in creating institutional and learning support structures and tools to assist micro, small and medium-sized enterprises to harness innovative approaches to promote their competitiveness and growth of private sector development in the subregion. Furthermore, the component will support implementation of the multi-year collaborative programme on advancing industrialization in the COMESA subregion. The component also plans to provide continued support to member States on the African Continental Free Trade Area in facilitating national consultations and awareness-raising on the free trade area process, ratification of the Agreement Establishing the African Continental Free Trade Area and developing national strategies on the implementation of the Agreement, thereby contributing to the progress of member States towards attainment of Goals 1 and 10.

15.306 The component plans to support member States on issues related to COVID-19 by continuing to undertake analytical work on the impact of COVID-19 on the private sector, including micro, small and medium-sized enterprises, and on industrialization and trade in Southern Africa. The component will focus on building the capacities of governments and the private sector, enabling them to address the impact of the pandemic by rolling out initiatives aimed at supporting the recovery from COVID-19 pandemic and the resurgence of micro, small and medium-sized enterprises, and strengthening their resilience to future shocks.

15.307 The above-mentioned work is expected to result in:

(a) Implementation of the SADC industrialization strategy and road map and the COMESA industrial policy, which will include key initiatives on developing the digital platform for micro, small and medium-sized enterprises for Southern Africa to enhance information sharing and exchange among such enterprises, other entrepreneurs and policymakers; and the development of industrial clusters in selected member States as a pilot scheme, such as the common industrial park between Zambia and Zimbabwe, to promote investment and foster industrial development in the subregion;

(b) Creation of a harmonized and enabling policy environment at the subregional and national levels to anchor the promotion of self-sustained and balanced growth, diversification of the manufacturing base and an improvement in the competitiveness of the industrial sector with matured regional value chains of the various commodities and non-natural resources produced in Southern Africa;

(c) Deployment of innovative approaches by micro, small and medium-sized enterprises in Southern Africa, including digitalization to address their competitiveness, trade and industrial-related challenges.

15.308 The planned support on issues related to COVID-19 is expected to result in:

(a) Strengthened capacities of micro, small and medium-sized enterprises to leverage innovative approaches that address the impact of the pandemic, as a base upon which to build their resilience to shocks and address competitiveness challenges so that they become more effective enablers of trade and industrial development in Southern African;

(b) Governments and policymakers better supporting micro, small and medium-sized enterprises in the post-pandemic context.

## **Programme performance in 2020**

15.309 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Increased subregional cooperation and integration in Southern Africa**

15.310 At the extraordinary session, held in Luanda in 2012, under the theme “SADC strategic challenges, threats and opportunities in the long term: SADC Vision 2050”, the Heads of State and Government of the Southern African Development Community took the decision that, in the years to follow, a long-term vision should be formulated to indicate where the SADC region would want to be by 2050, by positioning itself in the context of emerging continental and global challenges, issues and opportunities.

15.311 In responding to a formal request by SADC in 2019 for assistance in carrying out this decision, the component provided technical support and field-level advisory services to the SADC secretariat throughout the entire visioning process, including

brain-storming sessions, providing substantive inputs to background documents, backstopping consultants and subject matter experts; and by supporting technical meetings and meetings of senior officials that galvanized stakeholders in building up the vision for the subregion. In its design, the vision was anchored on three interrelated pillars, namely, industrial development and market integration; infrastructure development in support of industrialization and regional integration; and social and human capital development in support of industrialization and broad regional integration. Importantly, formulation of the SADC Vision 2050 was underpinned by, and synchronized with, the SADC industrialization strategy and road map, 2015–2063, which is a long-term framework formulated to spur inclusive industrial development and sustainable economic growth in line with the objective of the component.

15.312 The component also provided technical support to the SADC secretariat in formulating the SADC regional indicative strategic development plan for the period 2020–2030, designed to operationalize the SADC Vision 2050, including by outlining key priority areas and actions aimed at strengthening subregional and national capacities to achieve inclusive industrialization for reducing poverty and inequality in Southern Africa.

*Progress towards the attainment of the objective, and performance measure*

15.313 The above-mentioned work contributed to the objective, as demonstrated by the cumulative number of seven subregional initiatives adopted by member States that promote subregional cooperation and integration in Southern Africa (see table 15.34).

Table 15.34

**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
Three subregional initiatives were approved by SADC:	Two additional subregional initiatives were approved by SADC:	Two additional subregional initiatives were approved by SADC:
(a) Mining sector skills audit framework	(a) SADC Protocol on Industry	(a) SADC Vision 2050
(b) Minerals beneficiation profile	(b) SADC Regional Mining Vision	(b) SADC regional indicative strategic development plan, 2020–2030
(c) SADC regional intellectual property rights framework		

**Impact of COVID-19 on component delivery**

15.314 Owing to the impact of COVID-19 during 2020, the component changed the mode of provision of advisory services to member States and regional economic communities and the convening of planned meetings, such as the annual session of the Intergovernmental Committee of Senior Officials and Experts of the component, the Forum on regional integration in Southern Africa, and ad hoc expert group meetings for reviewing planned publications on industrialization in Southern Africa and on regional integration in Southern Africa, which were delivered with reduced durations (hours and days) via videoconferencing platforms, instead of in the usual face-to-face format.

15.315 At the same time, however, the component identified new activities to support member States on issues related to COVID-19, within the overall scope of its objectives, namely, undertaking analytical work on the economic and social impact of the COVID-19 pandemic by collaborating with the United Nations resident

coordinator offices and United Nations country teams in Botswana, Lesotho, Malawi, Mauritius, Zambia and Zimbabwe. The component also provided analytical support to SADC in producing publications. Furthermore, the component contributed to continent-wide analyses on the economic and social impact of COVID-19 on Africa.

## **Planned results for 2022**

15.316 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: accelerating industrialization in Southern Africa<sup>21</sup>**

#### **Programme performance in 2020**

15.317 The component has been assisting member States to accelerate the process of inclusive industrialization in Southern Africa, aimed at achieving a reduction in inequality and poverty. The component provided technical support to the Government of Eswatini in developing a national financing framework for micro, small and medium-sized enterprises. Furthermore, the component, through effective engagement with COMESA, supported the governments of Zambia and Zimbabwe in reaching agreement on an initiative to establish a common agro-industrial park between the two neighbouring countries, constituting an industrial cluster point that would promote and facilitate agro-processing activities and the development of agriculture value chains.

15.318 The above-mentioned work contributed to three member States embarking on initiatives aimed at promoting inclusive industrialization, namely, Eswatini, Zambia and Zimbabwe, which exceeded the planned target of two countries reflected in the proposed programme budget for 2020.

#### **Proposed programme plan for 2022**

15.319 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective and in response to recent developments, the component's work will evolve to include supporting countries in incorporating key elements of not only the SADC industrialization strategy and road map, 2015–2063, but also of the COMESA industrial policy, 2015–2030, by strengthening subregional and national programmes and capacities to achieve inclusive industrialization for reducing poverty and inequality in Southern Africa. The component will also continue to provide technical support to ongoing initiatives, such as the establishment of a common agro-industrial park between Zambia and Zimbabwe, to ensure that they are fully realized and scaled up. The expected progress is presented in the updated performance measure below (see figure 15.XIX).

<sup>21</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 18)).

Figure 15.XIX

**Performance measure: total number of Southern African countries that incorporate key elements of the SADC industrialization strategy and road map (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: from policy to action: deepening industrialization in Southern Africa<sup>22</sup>**

### **Programme performance in 2020**

15.320 The component has been providing technical support and field-level advisory services and has engaged member States and other stakeholders, such as the private sector and civil society organizations, in the African Continental Free Trade Area process through its analytical work and convening of expert and statutory meetings.

15.321 The above-mentioned work contributed to four member States (Angola, Lesotho, Zambia and Zimbabwe) aligning their national frameworks with the SADC industrialization strategy and road map, which exceeded the planned target of two southern African countries reflected in the programme budget for 2021.

### **Proposed programme plan for 2022**

15.322 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will undertake analytical work; convene expert, statutory and policy dialogue meetings; provide technical support to member States and regional economic communities; and engage the private sector and other non-State entities in efforts to deepening inclusive industrialization in Southern Africa by facilitating the diversification of the manufacturing base and the development of agricultural and minerals value chains. The component will also continue to engage some member States in facilitating the ratification of the Agreement Establishing the African Continental Free Trade Area even before they develop a national African Continental Free Trade Area strategy and implementation plan, while other countries will need, first, to conduct impact studies and then to develop national strategies and implementation plans before they can ratify the Agreement. The expected progress is presented in the performance measure below (see figure 15.XX).

<sup>22</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

Figure 15.XX

**Performance measure: total number of southern African countries that develop or align the SADC industrialization strategy and road map in national frameworks (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: inclusive industrialization in Southern Africa through private sector development**

#### **Proposed programme plan for 2022**

15.323 The component has been providing support to member States and regional economic communities in Southern Africa, aimed at strengthening their capacities in the development of policies, strategies and programmes on inclusive industrialization. This work is anchored on the priorities of the subregion as espoused by subregional policy frameworks, including the SADC industrialization strategy and road map, 2015–2063; the SADC Regional Mining Vision; the SADC Protocol on Industry and the COMESA industrial policy, 2015–2030. More recently, the component's work has focused on assisting member States to harmonize and align their national industrial policies and strategies with these subregional frameworks. Furthermore, the component has provided support to member States in the subregion in moving towards ratification and implementation of the Agreement Establishing the African Continental Free Trade Area, a continental arrangement that seeks to create a continent-wide market and which will also stimulate industrial activity. Thus, in 2020, the Governments of Zambia and Zimbabwe developed their national African Continental Free Trade Area strategies and implementation plans, while Angola and Lesotho have ratified the Agreement.

#### *Lessons learned and planned change*

15.324 The lesson for the component was that the successful formulation and implementation of industrial policies are not always linear processes but often iterative, requiring several reviews to ensure coherence. In applying the lesson, the component will ensure flexibility in the manner in which technical support is provided to member States and regional economic communities. For instance, while policy harmonization is still in progress at the subregional level, it is also possible for policy alignment at the national level to begin. Accordingly, and to further deepen the inclusive industrialization agenda, in 2022 the component will focus on providing

further support to member States to align their national policies with the subregional frameworks. The component will also seek to strengthen the capacities of member States and regional economic communities to promote the development of the private sector, in particular micro, small and medium-sized enterprises, and to facilitate their integration in the industrialization process of the subregion. This will include creating a harmonized and enabling policy environment at the subregional and national levels to anchor the promotion of self-sustained and balanced growth, diversification of the manufacturing base and an improvement in the competitiveness of the industrial sector with matured regional value chains of the various commodities and non-natural resources produced in Southern Africa.

*Expected progress towards the attainment of the objective, and performance measure*

15.325 This work is expected to contribute to the objective, as demonstrated by an increased number of member States that have developed initiatives aimed at promoting the integration of micro, small and medium-sized enterprises in the inclusive industrialization agenda (see figure 15.XXI).

Figure 15.XXI

**Performance measure: total number of member States that have developed initiatives aimed at promoting the integration of micro, small and medium-sized enterprises in the inclusive industrialization agenda (cumulative)**

## Legislative mandates

15.326 The list below provides all mandates entrusted to the component.

*General Assembly resolutions*

61/51 Cooperation between the United Nations and the Southern African Development Community

## Deliverables

15.327 Table 15.35 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 15.35

<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> advisory services, including technical knowledge, upon request by member States, regional economic communities and intergovernmental organizations, on inclusive industrialization and regional integration, operationalization of the African Continental Free Trade Area, and support for the work of 11 United Nations country teams in Southern Africa (Angola, Botswana, Eswatini, Lesotho, Malawi, Mauritius, Mozambique, Namibia, South Africa, Zambia and Zimbabwe).				
<b>Databases and other substantive digital materials:</b> database on economic and social statistics updated.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information material:</b> events and quarterly electronic newsletters for the dissemination of information on inclusive industrialization and regional integration.				
<b>Digital platforms and multimedia content:</b> web-based information, social media platforms, and communities of practice.				

## **Subprogramme 8**

### **Economic development and planning**

#### **Objective**

15.328 The objective, to which this subprogramme contributes, is to strengthen African countries' development planning and to improve their capacity to formulate and manage effective public sector policies for structural transformation and sustainable development.

#### **Strategy**

15.329 To contribute to the objective, the subprogramme will continue delivering face-to-face and online training based on enriched training content on sectoral, national and regional development, and medium to long-term planning to deal with the socioeconomic impact of the COVID-19 pandemic.

15.330 The subprogramme will also continue to promote peer learning and collaboration among African development planners through a community of practice and will provide wide access to its digitized knowledge repository on the evolution of development planning in Africa and through policy briefs and research papers.

15.331 Furthermore, through cooperation with resident coordinator offices, different subprogrammes and components of the Commission and external partners (think tanks, academic institutions, the private sector and civil society), the subprogramme will continue to support countries' capacity to monitor and evaluate the implementation of the 2030 Agenda and Agenda 2063 using the integrated planning and reporting toolkit developed by the programme. In particular, this work will assist member States in making progress towards the achievement of Sustainable Development Goals 1, 5, 8 and 17.

15.332 The subprogramme will further continue delivering face-to-face and online training based on updated training content on economic and social policy formulation and management.

15.333 The subprogramme will foster knowledge generation, cross-fertilization and knowledge-sharing through research products and fellowship programmes, development seminars and high-level policy dialogues. Emphasis on mainstreaming a gender perspective and youth-related issues in all relevant public policies will continue in 2022 through the identification of relevant courses in which gender equality and youth-related content, such as entrepreneurship, employment, green economy in the context of sustainable development and poverty eradication, innovation and digital transformation, will be included. This work will further the progress of member States in achieving Goals 7 and 8.

15.334 The subprogramme will also, in collaboration with other subprogrammes, continue to offer face-to-face and online training to resident coordinator offices in selected priority areas, in support of their leadership efforts aimed at addressing the socioeconomic impact of COVID-19. The training will build on the programme's comparative advantages in such areas as trade and the African Continental Free Trade Area, macroeconomic modelling, the regional integration index and many others.

15.335 The subprogramme plans to support member States on issues related to COVID-19 oriented towards macroeconomic policies and development planning, with a view to building forward and building better and achieving resilient recovery.

15.336 The above-mentioned work is expected to result in:

(a) Development planners being better informed and equipped to effect inclusive and COVID-19-responsive development planning processes, in support of structural transformation;

(b) Officials and other stakeholders being capable of more effectively formulating, managing and influencing public policies;

(c) More inclusive approaches to the formulation of development policies by member States.

15.337 The planned support on issues related to COVID-19 is expected to result in the enhanced competence of professional planners and policymakers in mainstreaming the COVID-19 context in policy management and development planning, in order to strengthen the inclusiveness of economies and their resilience to shocks.

### **Programme performance in 2020**

15.338 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

#### **Increased institutional capacity relating to the Agreement Establishing the African Continental Free Trade Area**

15.339 The Agreement Establishing the African Continental Free Trade Area is a milestone in institutional progress towards integration on the continent. Thirty African countries have ratified the Agreement and the subprogramme built the capacity of policymakers and government officials, in addition to other stakeholders, with a view to promoting gradual ratification of the Agreement. The subprogramme held training measures for 813 beneficiaries, including dedicated courses on such topics as making the African Continental Free Trade Area work; the African Continental Free Trade Area for journalists; gender equality and women's empowerment and the African Continental Free Trade Area; webinars and research papers on such issues as the African Continental Free Trade Area in the context of COVID-19: macroeconomic and sectoral impacts; the African Continental Free Trade Area and the labour market; food security and labour mobility in the context of the African Continental Free Trade Area: the case of Senegal; and the impact of the African Continental Free Trade Area on trade flows: empirical evidence using the extended gravity model. Two working papers on the impact of COVID-19 were published jointly with the United Nations country team in Senegal and a paper on the issues of the African Continental Free Trade Area and the impact of COVID-19: macroeconomic and trade diversion versus trade creation assessment, prepared jointly with the International Food Policy Research Institute (IFPRI).

#### *Progress towards the attainment of the objective, and performance measure*

15.340 The above-mentioned work contributed to the objective, as demonstrated by the increased number of trainees in 2020, a period that coincides with the gradual ratification of the Agreement by the above-mentioned member States (see figure 15.XXII).

Figure 15.XXII

**Performance measure: number of trainees, disaggregated by sex, in African Continental Free Trade Area issues, attesting to a significant improvement in the inclusion of the Area in national development plans (annual)**

### Impact of COVID-19 on subprogramme delivery

15.341 Owing to the impact of COVID-19 during 2020, in particular the resulting travel restrictions, the subprogramme cancelled all in situ training activities, turning them into online activities and therefore increasing the number of participants, especially women. As a consequence, the subprogramme was unable to implement hands-on practice sessions for some important specialized courses such as data analysis and macro-modelling. The subprogramme reconfigured its training material in an e-learning format, to ensure continued capacity development support for member States.

15.342 At the same time, however, the subprogramme identified new activities to support member States in dealing with issues related to COVID-19, within the overall scope of its objectives, namely systematically mainstreaming issues related to COVID-19 into its training and research activities, to allow member States to rethink their respective macroeconomic planning for emergencies and beyond to build forward better. It organized webinars and produced research papers and policy briefs with a COVID-19 and post-COVID-19 approach.

### Planned results for 2022

15.343 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

#### **Result 1: strengthened capacity of member States to implement the 2030 Agenda for Sustainable Development and Agenda 2063<sup>23</sup>**

##### **Programme performance in 2020**

15.344 In response to the global COVID-19 pandemic, the subprogramme converted all the planned on-site activities to digital activities, reducing the number of visiting

<sup>23</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 18)).

fellows that it received. These adjustments significantly increased the number of participants in training activities. The subprogramme delivered 18 digital training events and trained the fifth cohort of the master's degree in industrial policies, jointly administered with the University of Johannesburg. Analytical research was conducted through two development seminars, nine webinars, two high-level policy dialogues and one research fellowship, in which 975 experts (553 women), from 47 African countries participated. Out of the 900 respondents to the annual survey conducted in 2020, 87 per cent indicated that they had used knowledge acquired from training at the African Institute for Economic Development and Planning in their professional activities. Most of them provided tangible examples of the knowledge acquired.

15.345 The above-mentioned work contributed to the strengthened capacity of 484 women, which exceeded the planned target of 300 female participants certified reflected in the proposed programme budget for 2020.

### **Proposed programme plan for 2022**

15.346 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue improving public sector policy management and development planning in support of member States' structural transformation in line with the 2030 Agenda and Agenda 2063. The subprogramme plans to continue mainstreaming social investment and development in its training, research and knowledge delivery activities, geared towards the structural transformation of Africa. The subprogramme will increase the number of activities – courses, development seminars, workshops and research related products. It will promote the joint delivery principle with the different subprogrammes, with a particular emphasis on subprogrammes 6 and 9. The expected progress is presented in the performance measure below (see figure 15.XXIII).

Figure 15.XXIII

**Performance measure: number of female participants certified (annual)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: improving public sector management and development planning<sup>24</sup>

### Programme performance in 2020

15.347 The subprogramme has been working on improving public sector management and development planning in support of member States' structural transformation. It continued to assist member States in the implementation of the 2030 Agenda and Agenda 2063 and adapted its activities to take into account the impact of the COVID-19 pandemic and support member States to plan forward better, in terms of debt management as a response to health emergencies and different economic shocks.

15.348 The above-mentioned work contributed to 2,033 trainees having acquired knowledge and skills through training at the African Institute for Economic Development and Planning in public policy formulation, which exceeded the planned target of 2,000 trainees reflected in the programme budget for 2021. In addition, 80 per cent of trainees attested that their knowledge and skills for effective public policies, policy influence, monitoring and evaluation had improved.

### Proposed programme plan for 2022

15.349 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue the strengthening of the institutional capacity in public policy formulation and economic planning through trainings, research and knowledge-sharing activities. The expected progress is presented in the performance measure below (see figure 15.XXIV).

Figure 15.XXIV

**Performance measure: number of trainees acquiring knowledge and skills through training at the Institute in public policy formulation (annual)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

<sup>24</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

### **Result 3: enhanced capacity of professional planners and policymakers for more inclusive and resilient economies**

#### **Proposed programme plan for 2022**

15.350 COVID-19 has had a severe impact on economies and the well-being of people. It has revealed the fragility of the economic and social models of African countries, and also their vulnerability to various shocks. The subprogramme has conducted research work to take into account the impact of the pandemic in its training programmes and proposed areas of reflection to better address the economic and social challenges facing countries.

#### *Lessons learned and planned change*

15.351 The lesson for the subprogramme stemming from the impact of COVID-19 on countries' planning processes was that it needed to integrate a risk management dimension in its capacity-building and research programmes relating to macroeconomic planning and sustainable development. This focus is in line with the imperative of building forward and building better and supporting inclusive and resilient recovery. In applying the lesson, and in response to the recommendations formulated by member States at the seventh session of the Africa Regional Forum on Sustainable Development, the fifty-third session of the Conference of African Ministers of Finance, Planning and Economic Development and the fifty-eighth session of the Governing Council of the African Institute for Economic Development and Planning, the subprogramme will strengthen consideration of the impact of COVID-19 on countries' national development planning and programming. The subprogramme will further adapt its training and research components to strengthen the ability of member States to manage various forms of risks and to absorb exogenous shocks, with the view to reducing their vulnerability to unforeseen crises.

#### *Expected progress towards the attainment of the objective, and performance measure*

15.352 This work is expected to contribute to the objective, as demonstrated by the number of policies developed by member States that contribute to building more inclusive and resilient economies (see figure 15.XXV).

Figure 15.XXV

**Performance measure: total number of policies developed by member States directed towards building more inclusive and resilient economies (cumulative)**

## Legislative mandates

15.353 The list below provides all mandates entrusted to the subprogramme.

### *Economic Commission for Africa resolutions*

58 (IV)	Establishment of the African Institute for Economic Development and Planning	908 (XLVI)	Refocusing and recalibrating the Economic Commission for Africa's structural transformation
858 (XLI)	Special Meeting of the Governing Council of the African Institute for Economic Development and Planning	956 (LI)	African Institute for Economic Development Planning

### *Economic and Social Council resolutions*

2011/13; 2018/22	African Institute for Economic Development and Planning
2013/2	Refocusing and recalibrating the Economic Commission for Africa to support Africa's structural transformation

## Deliverables

15.354 Table 15.36 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 15.36

### **Subprogramme 8: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>1</b>	<b>1</b>	<b>1</b>	<b>1</b>
1. Reports to the Conference of African Ministers of Finance, Planning and Economic Development and the Committee of Experts of the Economic Commission for Africa	1	1	1	1

14. Studies and policy briefs on economic management and development planning	35	9	35	24
15. Knowledge materials on development planning and economic management for use in self-paced distance learning uploaded to classified knowledge repositories	10	11	10	10
<b>C. Substantive deliverables:</b>				
<b>Consultation, advice and advocacy:</b> advisory services to five member States and all six regional economic communities on economic management, development planning and capacity-building; field visits to explore practical applications of classroom learning in areas such as industrialization, transport and infrastructure, agriculture, mining and natural resources management, and tourism in collaboration with concerned subprogrammes and the United Nations system.				
<b>Databases and substantive digital materials:</b> coordination of two communities of practice for African development planners.				
<b>D. Communication deliverables:</b>				
<b>Outreach programmes, special events and information materials:</b> high-level policy dialogues with 150 policy officials from 10 member States, 5 private sector representatives, and 5 subject-matter experts to debate various issues pertaining to African economic development and planning, with particular emphasis on those related to the 2030 Agenda.				
<b>External outreach and media relations:</b> information kit for the African Institute for Economic Development and Planning comprising a strategic plan, training brochures, booklets, leaflets, kakemonos, banners and assorted accessories.				
<b>Library services:</b> books, journals and other library materials on economic management and development planning in French and English.				

## Subprogramme 9

### Poverty, inequality and social policy

#### Objective

15.355 The objective, to which this subprogramme contributes, is to eradicate extreme poverty and reduce inequality through member States' improved policies and strategies for social investments and productive urban job creation.

## Strategy

15.356 To contribute to the objective, the subprogramme will support national strategies on eradication of poverty and reduction of inequalities with a focus on social protection, population and development, migration and ageing. The work will provide options for the development and implementation of national policy on social investments which contribute to the reduction of poverty and vulnerability and the achievement of the 2030 Agenda. The subprogramme plans to strengthen the policy competence of member States and provide technical assistance, organize regional dialogue and foster learning on strategies that promote inclusion and equitable development in Africa. It will provide continued support to African member States in the implementation and appraisal of the Global Compact for Safe, Orderly and Regular Migration, the Madrid International Plan of Action on Ageing, the Programme of Action of the International Conference on Population and Development and the Addis Ababa Declaration on Population and Development in Africa beyond 2014. To improve policy uptake, the subprogramme will engage with national policymakers and all stakeholders through the United Nations resident coordinator offices.

15.357 The subprogramme will continue to promote the policy prioritization of urban job creation through the development of urban strategies and investment frameworks for national development planning, in line with Sustainable Development Goal 11. The subprogramme will develop the knowledge of member States, provide technical assistance and facilitate regional policy learning and dialogue to advance planned and managed urbanization for accelerated structural transformation. In addition, technical assistance will be provided to strengthen member States' capacities to better measure and monitor urbanization dynamics. The work will be carried out largely in partnership with the African Union Commission, the United Nations Human Settlements Programme (UN-Habitat), the African Development Bank and the organization United Cities and Local Governments of Africa.

15.358 The above-mentioned work is expected to result in:

- (a) Enhanced research evidence on policy options for poverty eradication, social investments and protection of the economically vulnerable;
- (b) Strengthened capacities of member States to better tackle and respond to poverty, inequalities, migration and population and development;
- (c) Increased prioritization of productive urban job creation in national development planning, with a view to eradicating extreme poverty and reducing inequality;
- (d) Improved policy knowledge and evidence base on the impact of urbanization on addressing poverty and inequality;
- (e) Strengthened capacities of member States to measure and monitor urbanization dynamics.

15.359 The planned support on issues related to COVID-19 is expected to result in improved economic and financial recovery and resilience in African countries.

## Programme performance in 2020

15.360 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Strengthened national capacities for developing and implementing targeted social policies to respond to COVID-19**

15.361 In response to the increase in poverty and vulnerability due to COVID-19, the subprogramme generated new evidence on economically vulnerable proportions of the population and provided empirically grounded social policy options. The expected increase in poverty due to COVID-19 and the inadequacy of coverage through social policies demonstrate the importance of a review of poverty and vulnerability measurement techniques to propose design policy responses. The subprogramme contributed to making progress towards this goal by developing analytical tools on the measurement and monitoring of poverty and vulnerability and indicating how these relate to social investments and policy formulation. Upon the request by two member States, the subprogramme developed knowledge products on the potential of digital tools in enhancing secondary school quality and supported the recalibration of a national health strategy for the period 2019–2023 to mitigate the effects of COVID-19.

#### *Progress towards the attainment of the objective, and performance measure*

15.362 The above-mentioned work contributed to the objective, as demonstrated by two member States with strengthened national capacities for formulating inclusive, social policies for responding to COVID-19 (see table 15.37).

Table 15.37

#### **Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>
Five member States with strengthened capacity for monitoring of social investments (Chad, Kenya, Mauritania, Mozambique and Nigeria)	Five member States to formulate inclusive, social policies (Chad, Kenya, Mauritania, Mozambique and Nigeria)	Two member States (Ethiopia and Namibia) with strengthened national capacities for formulating inclusive, social policies for responding to COVID-19, through the production of policy tools for interactive engagement with national policymakers

#### **Impact of COVID-19 on subprogramme delivery**

15.363 Owing to the impact of COVID-19 during 2020, the subprogramme postponed some deliverables of two projects on social policy in Africa to enhance the capacities of policymakers in selected countries; the finalization of the report on international migration in Africa; the finalization of the report on the state of urbanization in Africa for evidence-based policymaking; the high-level policy dialogue on the linkages between security and development; the African Human Security Index report; and the policy brief on security and development in Africa. The subprogramme adopted an online approach for the delivery of the capacity-building workshops on social policy for policymakers in selected countries. In addition, workshops on urbanization and development to build the policy capacity of member States were delivered online and attended by 414 African policymakers and experts. These changes had an impact on the programme performance in 2020, as specified under result 1 below.

15.364 At the same time, however, the subprogramme identified additional activities to support member States on issues related to COVID-19, within the overall scope of its objectives, namely a webinar on the joint response to COVID-19 by China and Africa; a report on reducing poverty and vulnerability in Africa in the time of

COVID-19 and an accompanying global dialogue; an assessment of the poverty and employment effects of COVID-19 in Ethiopia and Namibia; assessment and monitoring of the potential of digital tools in enhancing secondary school quality in Ethiopia and combating the threat posed by COVID-19 on schooling; a webinar on COVID-19 and security in Africa as a side event during the African Peace and Security Annual Conference; a report and webinar on COVID-19 in African cities: impacts, responses and policy recommendations; and strengthening of knowledge and skills of the local governments of Accra, Yaoundé and Harare. The new deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

## **Planned results for 2022**

15.365 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: international migration in Africa<sup>25</sup>**

#### **Programme performance in 2020**

15.366 The subprogramme has contributed to the overall objective of poverty eradication and reduction in inequality by focusing on intra-African migration, which represents over 70 per cent of total international migration. The subprogramme supported the collection and analysis of migration data and their use in policy formulation as an integral part of tackling inequality and the eradication of poverty. The subprogramme contributed to the regional review of the Global Compact for Safe, Orderly and Regular Migration and the 2030 Agenda by providing improved data for monitoring progress on migratory flows and building the capacity of national statistical offices to generate and use migration data for policy formulation. The subprogramme supported the production of three national reports and a regional review report on the Global Compact.

15.367 The above-mentioned work contributed to the strengthened knowledge and adoption of policy products on African migration by three member States (Ethiopia, Morocco and Nigeria), which did not meet the target of five member States (Ethiopia, Mali, Morocco, Nigeria and Zimbabwe) reflected in the proposed programme budget for 2020. The two remaining national reports for Mali and Zimbabwe have been postponed, as has finalization of the regional report on migration.

#### **Proposed programme plan for 2022**

15.368 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will undertake capacity-building exercises in the generation of migration data and statistics for better integration of migration issues in national development plans, and also provide inputs to regular regional reviews of the Global Compact for Safe, Orderly and Regular Migration. The expected progress is presented in the performance measure below (see table 15.38).

---

<sup>25</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 18)).

Table 15.38  
Performance measure

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Subregional and regional consultations on the preparation of key knowledge products and advocacy materials on migration	Increased knowledge resulting from case study reports on migration for Cameroon, Ethiopia, Morocco, Senegal and South Africa	Strengthened knowledge and adoption of policy products developed on African migration among three member States (Ethiopia, Morocco and Nigeria)	Strengthened capacities, and development and increased knowledge on international migration by six member States (Côte d'Ivoire, Mali, Morocco, Senegal, South Africa and Zimbabwe), which deepens the existing analysis. In addition, five member States will be part of the component on digital identification of migrants in the Horn of Africa	Enhanced capacities to collect, analyse and disseminate migration data and statistics and to develop and integrate migration in national development plans in seven member States

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: adoption of urban frameworks for urban job creation in Africa<sup>26</sup>

### Programme performance in 2020

15.369 The subprogramme has strengthened the knowledge and skills of African policymakers in designing urban strategies for national development and industrial and regional integration plans, with a view to accelerating economic growth and job creation for poverty eradication and inequality reduction. The subprogramme also provided technical advisory services to member States to strategically integrate urban priorities in their national economic and development planning. Furthermore, the subprogramme strengthened the capacities of local governments to monitor the implementation of the Sustainable Development Goals through voluntary local reviews. As an example, the subprogramme supported the formulation of a national regional development framework as an input to the Ethiopian 10-year national development plan and assisted five local governments in formulating voluntary local reviews (Accra, Yaoundé, Harare, Victoria Falls, Zimbabwe, and Ngora district, Uganda).

15.370 The above-mentioned work contributed to strengthening the capacities of six national and local governments in the design, implementation and monitoring of urban strategies for national development planning and attainment of the Sustainable Development Goals, which met the planned target reflected in the programme budget for 2021.

<sup>26</sup> As reflected in the programme budget for 2021 ([A/75/6/Add.1](#)).

### Proposed programme plan for 2022

15.371 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will generate knowledge, deliver training and technically backstop the formulation of strategies for well-planned, managed and job-rich urbanization that enables economic diversification. The expected progress is presented in the performance measure below (see table 15.39).

Table 15.39

#### Performance measure

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Countries formulate African priorities for the implementation of the New Urban Agenda, including job creation and economic transformation	Countries adopt African priorities for the implementation of the New Urban Agenda through the Specialized Technical Committee on Public Service, Local Government, Urban Development and Decentralization	Strengthened capacities of six national and local governments in the design, implementation and monitoring of urban strategies for national development planning and attainment of the Sustainable Development Goals	Formulation of an urban strategy and investment framework for national development planning	Strengthened capacities of five member States to design strategies for accelerated urban job creation in the context of national development planning

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: increased national capacities to design inclusive policies

#### Proposed programme plan for 2022

15.372 The socioeconomic impact of the COVID-19 pandemic has exacerbated poverty and vulnerability in Africa. The pandemic has stretched the capacity limits of member States, while providing opportunities to reflect on how social policies could be more appropriately designed and expanded to protect the poorest and populations in vulnerable situations.

#### *Lessons learned and planned change*

15.373 The lesson for the subprogramme was that it had made insufficient use of digital tools for delivering technical assistance to member States, which became apparent during the COVID-19 pandemic. In applying the lesson, the subprogramme will devise suitable digital tools and platforms to ensure effective delivery of its support to member States on the reduction of poverty and inequality, including through the development and use of an electronic platform for the sharing of information on managing risk and vulnerability. The subprogramme further plans to provide support to African Governments drawing on its work on strengthening national capacities to design and implement social protection policies for rapid recovery from the COVID-19 pandemic. It will scale up analytical tools and knowledge developed to improve poverty measurement and vulnerability identification.

*Expected progress towards the attainment of the objective, and performance measure*

15.374 This work is expected to contribute to the objective, as demonstrated by six member States using policy and digital tools to design improved inclusive social policies for reducing risk and vulnerability (see figure 15.XXVI).

Figure 15.XXVI

**Performance measure: total number of member States that use tools to design inclusive social policies for reducing risk and vulnerability (cumulative)**

## Legislative mandates

15.375 The list below provides all mandates entrusted to the subprogramme.

### *General Assembly resolutions*

65/234	Follow-up to the International Conference on Population and Development beyond 2014	72/146	Policies and programmes involving youth
65/312	Outcome document of the High-level Meeting of the General Assembly on Youth: Dialogue and Mutual Understanding	75/224	Implementation of the outcomes of the United Nations Conferences on Human Settlements and on Housing and Sustainable Urban Development and strengthening of the United Nations Human Settlements Programme (UN-Habitat)
71/256	New Urban Agenda;		
72/144	Follow-up to the Second World Assembly on Ageing		

### *Economic and Social Council resolutions*

2014/5	Promoting empowerment of people in achieving poverty eradication, social integration and full employment and decent work for all
--------	--

### *Economic Commission for Africa resolutions*

909 (XLVI)	Realizing and harnessing the demographic dividend in Africa	940 (XLIX)	International migration in Africa
------------	---	------------	-----------------------------------

## Deliverables

15.376 Table 15.40 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 15.40

### Subprogramme 9: deliverables for the period 2020–2022, by category and subcategory

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>

23. Policy briefs on scaling up the monitoring of social investments in Africa: report in two countries	2	–	–	–
24. Policy brief on security and development in Africa in the context of the concept of “human security” in accordance with General Assembly resolution 66/290	1	–	–	–
25. Policy brief on poverty and inequality	–	–	1	1
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> dissemination of knowledge products and improved data and statistics for evidence-based policies, strategies and investments to national policymakers in three member States; technical assistance for improved capacities in policy formulation, implementation and monitoring for 100 policymakers; policy dialogues for enhanced policy learning and exchange at national and regional scales.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events, and information materials:</b> flyers, brochures and advocacy materials on the work of the subprogramme; special events at relevant global and regional events; webinars and online seminars.				
<b>External and media relations:</b> press and media communication on the role of cities and social policy in the development of Africa.				
<b>Digital platforms and multimedia content:</b> digital platform for exchange and peer learning on voluntary local reviews in Africa; and one knowledge platform and the African human security index composite index available as an open source online by 2022.				

## Regional Commissions New York Office

### Proposed post and non-post resource requirements for 2022

#### Overview

15.377 The Regional Commissions New York Office is a joint office representing, coordinating and providing policy advice to the five regional commissions, namely, the Economic Commission for Africa, the Economic and Social Commission for Asia and the Pacific, the Economic Commission for Latin America and the Caribbean, the Economic Commission for Europe and the Economic and Social Commission for Western Asia. Its overall objective is to backstop the effective implementation of legislative mandates at the regional level.

15.378 In pursuing that objective, the Office assumes the following interrelated key functions: providing strategic policy advice to the regional commissions on United Nations deliberations and global policy frameworks that have a bearing on their positioning and the effective implementation of their programmes of work; supporting and ensuring representation and outreach vis-à-vis relevant intergovernmental and inter-agency bodies with a view to informing and influencing decision-making from a regional perspective; and enhancing and promoting coordination and interregional cooperation among the regional commissions.

15.379 In the area of policy advice, the Office carries out analysis and produces policy papers, concept notes and other documents on a wide range of topics. In 2020, in response to the COVID-19 pandemic, and working closely with the regional commissions, the Office co-led the coordination of the substantive contributions by the regional commissions to pillar IV of the United Nations framework for the

immediate socioeconomic response to COVID-19, on macroeconomic response and multilateral collaboration; participated actively in the work of the United Nations Sustainable Development Group Task Team on the implementation of the COVID-19 socioeconomic response framework; assumed the function of penholder for a regional commissions joint policy statement entitled “COVID-19: towards an inclusive, resilient and green recovery – building back better through regional cooperation”; and supported the development of joint Development Account projects to address the economic and social challenges emanating from the COVID-19 crisis. The Office also continued to play a critical role in advising and framing the regional commissions’ coordinated approach to conceptualization and operationalization of the repositioning of the regional assets of the United Nations development system, as well as in advising and coordinating positions on other reform streams, among others on regional efforts to better support the country-level and multi-country offices review through its representation of the regional commissions in respective United Nations Sustainable Development Group task teams and providing policy advice in support of the Coordinator’s participation in the meetings of the United Nations Sustainable Development Group principals.

15.380 The Office continued its global representation and advocacy role vis-à-vis relevant intergovernmental bodies with a view to informing and influencing decision-making from a regional perspective, thus contributing to continued recognition on the part of Member States of the regional dimensions of development and the inclusion of explicit mandates for the regional commissions in a number of resolutions adopted by the General Assembly and the Economic and Social Council. In 2020, the Office prepared and introduced to the Economic and Social Council the annual report of the Secretary-General on regional cooperation in the economic, social and related fields, which focused on demonstrating the value proposition of regional cooperation to contribute to an effective response to the COVID-19 crisis. It also reached out to permanent missions of Member States to the United Nations and held online meetings to disseminate and discuss the work of the regional commissions, including on legislative mandates emanating from the regional governing bodies that were brought to the Economic and Social Council for action or attention.

15.381 The Office continues to play a central role in supporting the follow-up and review of the 2030 Agenda, notably by strengthening coherence and interaction among entities at the global, regional and national levels. In that context, the Office has ensured harmonization of the design of regional forums and reporting at the global level, including to the high-level political forum and the Economic and Social Council, and steered ideas for joint analytical products, outreach activities and side events. Specifically, it has ascertained that adequate space would be dedicated to the regional dimension at the high-level political forum on sustainable development, including through a ministerial session reporting the outcomes of the regional forums on sustainable development and the contribution of regional perspectives to the thematic reviews. In 2020, in the margins of the high-level political forum, the Office organized a special event entitled “Messages from the regional commissions: accelerating the 2030 Agenda and building back better from COVID-19” and hosted a voluntary national review lab under the theme “Innovative approaches to spur action and delivery on the 2030 Agenda: lessons from the regions”. It has also supported regional commissions’ contributions to the 2020 Sustainable Development Goal Moment and Sustainable Development Goal Reality Check on the status of implementation of the Goals at the regional level. The Office also organized a Sustainable Development Goal action zone session, entitled “Transformative action for a green, inclusive and gender-equal recovery from the COVID-19 pandemic: innovations and solutions from the regions”. The Office has continued to advocate recognition of the regional dimensions and the role of the regional commissions and

the regional forums on sustainable development in the follow-up and review of the 2030 Agenda in the context of the legislative review process conducted by the Economic and Social Council and the high-level political forum and building on the acknowledgement of the regional commissions and the regional forums for sustainable development in the political declaration adopted by the high-level political forum in 2019.

15.382 The Office mobilized the regional commissions' support for the implementation of the Secretary-General's strategy and road map for financing the 2030 Agenda. In 2020, the Office, first, organized various meetings between the executive secretaries and the Special Envoy of the Secretary-General on Financing the 2030 Agenda, to support an initiative on financing for development in the era of the COVID-19 pandemic and beyond; second, coordinated with the Executive Office of the Secretary-General the conceptualization and organization of high-level round tables to discuss the role of extractive industries as an engine for sustainable development; and, third, led coordination efforts among the regional commissions in their leadership role on the cluster dealing with the operationalization of concerted measures to combat illicit financial flows. The Office has also coordinated the contributions by regional commissions to other financing initiatives, such as the Global Investors for Sustainable Development Alliance and the High-level Panel on International Financial Accountability, Transparency and Integrity for Achieving the 2030 Agenda.

15.383 In the context of the reform of the United Nations development system, the Office continued to advocate recognition of the regional dimension and the role of the regional commissions during negotiations in the operational activities for development segment of the Economic and Social Council on implementation of the quadrennial comprehensive policy review. The ensuing resolutions in 2020 agreed to the revised regional architecture of the United Nations development system and adopted other transformative areas proposed by the Secretary-General.

15.384 In addition, the Office represents the regional commissions in various inter-agency forums. In 2020, it actively participated in and contributed to the work of several reform streams and advisory bodies of the United Nations Sustainable Development Group in such areas as the socioeconomic response to the COVID-19 pandemic, strategic financing, integrated policy support, programme development and results and the multi-country offices review. This has resulted in the strong recognition of the regional dimension of development in the socioeconomic response to the COVID-19 pandemic and in many of the reform initiatives and outcomes, such as in the strengthened link between regional collaborative platforms and peer support groups and the redesign of multi-country offices. The Office continues to participate actively in internal mechanisms of the development system supporting the preparation of the 2021 meeting of the high-level political forum, and the conceptualization of the decade of action and delivery for sustainable development at the regional level. Lastly, the Office represents the regional commissions in the work of the Chief Executives Board High-Level Committee on Programmes. In this context, the Office has actively participated in the work of several task teams, including in the areas of biodiversity and inequality.

15.385 In 2020, the Office further strengthened its communication and outreach function and increased the visibility of the work of the regional commissions at United Nations Headquarters in New York, including through the dissemination of a bi-weekly newsletter on the regional responses to the socioeconomic impact of COVID-19, and also through a revamped webpage.

15.386 As part of its coordination function, the Office continued to promote strategic coordination among the regional commissions through its role as secretary of the

meetings of the executive secretaries. It has also promoted coordination of and collaboration on a number of substantive issues among the regional commissions and between the regional commissions and other departments of the United Nations Secretariat and United Nations agencies, funds and programmes through its networks of focal points in such areas as support for Member States in the implementation of the 2030 Agenda, financing for development, statistics, inequalities, digital connectivity, social development and South-South and triangular cooperation. The Office has also continued collaboration with the offices of the presidents of the Economic and Social Council and of the General Assembly in the preparation of high-level meetings and in support of their priorities. In addition, the Office has promoted partnerships and joint projects to be financed through the Development Account, such as the joint projects on integrated national financing frameworks and on statistics and data to inform the COVID-19 responses, and ensured that the regional dimension was well reflected in policy decisions adopted by the Steering Committee of the Development Account, on which the Director of the Office represents the regional commissions.

15.387 In accordance with the 2030 Agenda, in particular target 12.6 of the Sustainable Development Goals, organizations are encouraged to integrate sustainability information into their reporting cycles and, in compliance with the cross-cutting mandate set out in paragraph 19 of General Assembly resolution [72/219](#), the Office is integrating environmental management practices into its operations. The Office is increasingly using online platform tools and organizing meetings in an online format whenever possible, as well as distributing documentation and promotion materials digitally rather than in printed form.

15.388 Information on compliance with the timely submission of documentation and advance booking for air travel is reflected in table 15.41. The cost-sharing arrangements of travel in some instances between the Office and respective regional commissions have resulted in delays beyond the Office's control in the issuance of tickets. This was particularly relevant in 2019, when there were extensive consultations on the regional repositioning led by the Deputy-Secretary-General in person in the regions and which the Director had to attend in support of the exercise. The Office will continue to make efforts to improve the compliance rate by, among other things, promoting advance planning and working more closely with the Travel Unit to reserve tickets based on the preliminary itinerary in order to secure tickets at the lowest price and minimizing instances of exceptions.

Table 15.41  
**Compliance rate**

(Percentage)

	<i>Actual 2019</i>	<i>Actual 2020</i>	<i>Planned 2021</i>	<i>Planned 2022</i>
Timely submission of documentation	50	89	100	100
Air tickets purchased at least two weeks before the commencement of travel	—	100	100	100

## Programme 16

### Economic and social development in Asia and the Pacific

#### Overall orientation

#### Mandates and background

16.1 The Economic and Social Commission for Asia and the Pacific (ESCAP) is the regional intergovernmental platform and development arm of the United Nations and is responsible for assisting its members and associate members in integrating the three dimensions of sustainable development. Its research, intergovernmental and capacity-building functions support members in the implementation of the 2030 Agenda for Sustainable Development through nine subprogrammes. The mandate derives from the priorities established in relevant resolutions and decisions of the General Assembly and the Economic and Social Council, including Council resolution [37 \(IV\)](#), by which ESCAP was established. The conference structure of the Commission is reviewed periodically and was most recently aligned with the requirements of the 2030 Agenda through Council resolution [2015/30](#) and ESCAP resolution 73/1. ESCAP will conduct a review of the conference structure. The review will be presented at the seventy-eighth session of the Commission, in 2022, for its consideration and decision.

16.2 The multisectoral expertise of ESCAP and its balanced integration of the economic, social and environmental pillars of sustainable development across its programme has been of increasing relevance in responding to the coronavirus disease (COVID-19) pandemic. In 2020, ESCAP has focused on assessing the development impact of that health crisis and reorienting its support for member States where it was most needed. At its seventy-sixth session, the Commission endorsed resolution 76/2, by which the importance of international and regional cooperation to strengthen resilience of member States to the socioeconomic effects of pandemics and other related crises was reaffirmed.

16.3 The support of ESCAP for its member States in response to and in recovery from the COVID-19 pandemic is grouped into four priority action areas for regional cooperation: ensuring economic recovery; protecting people; restoring and building resilience in supply chain connectivity; and protecting and restoring ecosystems. The member States have identified “Building back better from crises through regional cooperation in Asia and the Pacific” as the theme of the seventy-seventh session of the Commission, and ESCAP is in the process of preparing the a study on the theme of regional cooperation, including in these action areas. Data and statistics and science, technology and innovation remain key means of implementation of the 2030 Agenda and the COVID-19 recovery efforts in the region.

16.4 ESCAP support is aimed at providing analysis and policy options and developing the capacity of Governments to formulate and implement policies for sustainable development while building back better from the COVID-19 pandemic and effectively addressing the challenge of climate change. Such support is also provided through the implementation of projects under the regular programme of technical cooperation and the United Nations Development Account.

#### Strategy and external factors for 2022

16.5 The year 2022 will mark the seventy-fifth anniversary of ESCAP, the most inclusive intergovernmental platform in Asia and the Pacific. In 2022, the focus of ESCAP will be on supporting member States in their COVID-19 pandemic recovery

efforts while ensuring that the progress made to date in the implementation of the 2030 Agenda and the achievement of the Sustainable Development Goals is not only maintained, but also taken forward. Asia-Pacific member States reaffirmed their commitment to accelerating the achievement of the Goals, notwithstanding the pandemic, at the Seventh Asia-Pacific Forum on Sustainable Development, where they emphasized the importance of multilateralism, the removal of systemic barriers, investing in institutions, engaging the private sector and coherent policymaking to deliver on the decade of action for the Goals. Given the added strain of the pandemic-induced economic contraction on sustainable development in the region, ESCAP will focus efforts on planning and delivering in partnership with United Nations development system entities and development banks at the regional and national levels. ESCAP will continue to enable opportunities to generate innovative policies for integrated, inclusive and sustainable development and to build consensus on norms and agreements to address shared challenges. ESCAP will also create opportunities for regional dialogue and cooperation in all four priority areas for recovery, with an emphasis on transboundary issues such as connectivity and ecosystems, through intergovernmental meetings scheduled to be held in 2022. It will also focus on building the capacities of member States to respond to the challenge posed by climate change.

16.6 The COVID-19 pandemic notwithstanding, ESCAP will strive to support its member States in accelerating the implementation of the 2030 Agenda through its three core functions, namely, research and analysis, intergovernmental consensus-building and norm-setting, and capacity development. In this effort, ESCAP will be guided by the relevant General Assembly resolutions, including its resolution 74/4, in which the Assembly endorsed “Gearing up for a decade of action and delivery for sustainable development: political declaration of the Sustainable Development Goals Summit”. At the regional level, the regional road map for implementing the 2030 Agenda in Asia and the Pacific, endorsed by the Commission in its resolution 73/9, is the reference framework.

16.7 Guided by the priorities identified in global and regional frameworks and by needs and requests for support in implementing those frameworks at the national level, technical assistance will be provided to member States, especially those in special situations comprising least developed countries, landlocked developing countries, small island developing States and other countries, in such areas as macroeconomic policy and financing for development, sustainable infrastructure connectivity and trade facilitation, technology, management of natural resources, sustainable urban development, disaster risk reduction and resilience, social development, statistics and energy. In this period of recovery from the COVID-19 pandemic, supporting member States in bridging the digital divide, which has accentuated inequalities within and across countries, and in making full use of technology and innovation to advance sustainable development will be of specific focus. ESCAP will continue to provide diagnostic tools and policy support to advance economic recovery efforts in the region not limited in vision to short-term economic growth gains but rather aimed at the long-term economic transformation required pursuant to the 2030 Agenda. Through its cross-cutting subprogramme on subregional activities for development, the programme will strive to ensure that the Commission’s work in individual sectors and with member States is in line with the regionally agreed priorities, including regional cooperation, in particular on transboundary issues. The programme will further strive to ensure that those priorities lead to concrete subregional and regional outcomes and that regional outcomes feed into national sustainable development efforts. In that endeavour, the programme will coordinate closely with resident coordinators and United Nations country teams.

16.8 ESCAP, together with a broad range of partners, including its member States, other United Nations development system entities, other international organizations, the private sector and civil society, supports the follow-up on and review of the 2030 Agenda. Support provided by ESCAP to its member States in the follow-up on and review of the 2030 Agenda at the regional and global levels will continue to rely on analytical, intergovernmental and capacity-building work. Through its activities, ESCAP supported 10 countries in Asia and the Pacific in the preparation of voluntary national reviews submitted in 2020 at the high-level political forum on sustainable development. In 2022, ESCAP and its partners will continue to: (a) convene the Asia-Pacific Forum on Sustainable Development as an annual, inclusive intergovernmental forum, which provides space for multi-stakeholder engagement for follow-up and review in the region, to discuss regional priorities and needs for achieving sustainable development; (b) prepare annual progress reports on the achievement of the Sustainable Development Goals and develop policy recommendations to accelerate progress in achieving the Goals in the region; and (c) support peer learning and strengthen the capacity of member States with regard to voluntary national review planning, policy coherence, stakeholder engagement and data and statistics.

16.9 For 2022, the planned deliverables and activities of ESCAP reflect the likely ongoing challenges related to COVID-19 that are being faced by member States. Such planned deliverables and activities include helping member States to support their populations, in particular individuals and groups in vulnerable situations, through, for example, ongoing impact assessments and monitoring of policies and measures affecting trade and transport in the region and building the resilience of institutions and regional frameworks to further crises, including pandemics such as the COVID-19 pandemic, through regional cooperation. Specific examples of such planned deliverables and activities are provided under subprogrammes 2, 3 and 5. The support provided to member States on issues related to COVID-19 is expected to contribute to planned results in 2022, as described under all subprogrammes and components of ESCAP.

16.10 With regard to cooperation with other entities at the global, regional national and local levels, ESCAP will continue to deliver on the United Nations framework for the immediate socioeconomic response to COVID-19, in addition to ongoing collaboration in various areas such as gender equality and the empowerment of women and girls, social protection, financing for development, road safety and migration. Strengthening engagement with regional and subregional organizations and development partners is a strategic approach for ESCAP in implementing its programme and for promoting and facilitating South-South cooperation, triangular cooperation and regional partnerships. Indeed, the objective of each component under subprogramme 8 is to strengthen regional cooperation, in particular on transboundary issues, in line with the subregional priorities. Sustainable connectivity and resilient and inclusive societies are priorities common to various ESCAP subregions. More concretely, the work of ESCAP at the subregional level, with substantive support from sectoral subprogrammes, has, for example, facilitated the adoption of the 2021–2025 workplan of the North-East Asia Clean Air Partnership and the development and the implementation of the Association of Southeast Asian Nations (ASEAN) Comprehensive Recovery Framework, as depicted in the frameworks of components 2 and 5 of subprogramme 8, respectively.

16.11 With regard to inter-agency coordination and liaison, the United Nations development system entities in Asia-Pacific, in line with the reform proposals, have begun the transition to work within the framework of the regional collaborative platform, to which ESCAP, the Regional Bureau for Asia and the Pacific of the United Nations Development Programme (UNDP) and the Development Coordination Office regional office for Asia and the Pacific provide secretariat support. ESCAP

substantive divisions collaborate in supporting issue-based coalitions established pursuant to the regional collaborative platform. ESCAP is co-leading the coalition on climate change mitigation with the United Nations Environment Programme (UNEP), where ESCAP expertise, across various subprogrammes and geared to support the accelerated achievement of Sustainable Development Goals 7 and 13, the implementation of the Paris Agreement and the building of social, economic and environmental resilience to the impact of climate change, is of specific relevance. Furthermore, the “Sustainable Development Goals help desk” knowledge management hub, co-led by ESCAP and the Development Coordination Office regional office for Asia and the Pacific, serves as the main platform for sharing policy expertise and providing rapid response to needs of countries, as well as of United Nations country teams, to accelerate implementation of the 2030 Agenda. This close collaboration among the United Nations development system entities in the region will continue to gain strength into 2022 and beyond.

16.12 With regard to the external factors, the overall plan for 2022 is based on the following planning assumptions:

- (a) COVID-19 pandemic recovery policies are in line with the 2030 Agenda;
- (b) National Governments maintain and strengthen their commitment to the Commission as the principal platform in the region for leveraging regional cooperation to meet transboundary and common challenges, such as the recovery from the effects of the pandemic;
- (c) Extrabudgetary funding for technical cooperation continues to be available.

16.13 With regard to the COVID-19 pandemic, the programme plan is based on the assumption that the proposed deliverables and activities for 2022 will be feasible to implement. However, if the pandemic were to continue to have an impact on the planned deliverables and activities, these would be adjusted during 2022 within the scope of the overall objectives, strategies and mandates. Any such adjustments would be reported as part of the programme performance information.

16.14 ESCAP integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, gender is a thematic area for subprogrammes 6 and 7. In the 2022 programme plan, the contributions of subprogrammes 2, 4 and 5 and all components of subprogramme 8 to women’s economic empowerment and gender equality are set out in their frameworks. The delivery of results on gender-related Sustainable Development Goals and the mainstreaming of gender into the programme will be guided by the ESCAP gender equality policy and an implementation plan (2019–2023).

16.15 With regard to disability inclusion, ESCAP is promoting it through a twin-track approach in line with the United Nations Disability Inclusion Strategy and the ESCAP disability inclusion policy and implementation plan. In the 2022 programme plan, subprogramme 6 and component 1 of subprogramme 8 cover disability-specific interventions to protect and empower persons with disability and, ultimately, to build disability-inclusive societies. Subprogramme 6 is also intended to address intersectional discrimination based on gender and disability.

16.16 Beyond substantive advancements, ESCAP has taken steps towards modernizing work processes and digital transformation to serve member States in a more agile way. Its significant progress in innovation, data and digital capacities over the past two years is also evidenced by the results of a survey conducted by the United Nations System Chief Executives Board for Coordination. Guided by the data strategy of the Secretary-General, ESCAP promotes data-driven management, for example,

through the use of dashboards to facilitate consolidated programme monitoring and decision-making by senior management. This transformation was expedited by the pandemic and the use of virtual modalities for programme delivery.

## **Programme performance in 2020**

### **Impact of COVID-19 on programme delivery**

16.17 During 2020, the COVID-19 pandemic had an impact on the planned deliverables and activities of ESCAP in four major ways: (a) the changing of deliverables in terms of design and modality; (b) the postponement of planned deliverables; (c) the repurposing of activities with a COVID-19 response component, when possible; and (d) the introduction of additional deliverables. The first type of impact refers to the organization of intergovernmental meetings, expert group meetings and seminars, workshops and training events virtually or through a hybrid modality. This included the Seventh Asia-Pacific Forum on Sustainable Development, the seventy-sixth session of the Commission and five Committee sessions. In many cases, the number of sessions was reduced, given time zone conflicts and limits to keeping participants engaged in a virtual setting over long hours. These reductions are reflected in the deliverable tables throughout the present programme plan. Secondly, on the basis of member States' requests, the second Ministerial Conference on Civil Registration and Vital Statistics in Asia and the Pacific and the Asia-Pacific Regional Review of Implementation of the Global Compact for Safe, Orderly and Regular Migration were postponed to 2021. Thirdly, the analytical products, intergovernmental meetings and project activities were repurposed to incorporate COVID-19 impact assessments and mitigation or recovery measures. For example, the 2020 *Economic and Social Survey of Asia and the Pacific* incorporated an assessment of the economic impact of the pandemic and discussed fiscal policy measures to mitigate the impact. Specific examples of such an impact are provided under all subprogrammes. With respect to the third type of impact, the postponement of planned deliverables and activities also had an effect on the expected results for 2020, as described in the programme performance under components 1 and 2 of subprogramme 8.

16.18 At the same time, however, some planned deliverables and new activities were identified during 2020, within the overall scope of the subprogramme objectives, in order to support member States on issues related to the COVID-19 pandemic. Those new activities included expert group meetings, seminars and technical materials. Specific examples of new activities are provided under all subprogrammes. The new deliverables and activities contributed to results in 2020, as described in the programme performance under subprogrammes 1, 2, 3 and 7 and components 4 and 5 of subprogramme 8.

16.19 Reflecting the importance of continuous improvement and responding to the evolving needs of member States, the programme will mainstream lessons learned and best practices related to the adjustments to and adaptation of its programme owing to the COVID-19 pandemic. Specific examples of good practices include the scaling up of e-learning activities and the organization of hybrid meetings to allow for the balanced representation of member States in intergovernmental deliberations. For 2022, the programme will continue to target opportunities to maximize participation through virtual modalities while safeguarding the benefits of in-person engagement for specific activities.

## Legislative mandates

16.20 The list below provides all mandates entrusted to the programme.

### *General Assembly resolutions*

61/16	Strengthening of the Economic and Social Council	73/133	Graduation of countries from the least developed country category
66/288	The future we want	73/254	Towards global partnerships: a principle-based approach to enhanced cooperation between the United Nations and all relevant partners
67/10	Cooperation between the United Nations and the Eurasian Economic Community		
68/1	Review of the implementation of General Assembly resolution 61/16 on the strengthening of the Economic and Social Council	73/330	Cooperation between the United Nations and the Economic Cooperation Organization
		73/332	Cooperation between the United Nations and the Pacific Islands Forum
69/15	SIDS Accelerated Modalities of Action (SAMOA) Pathway	73/334	Cooperation between the United Nations and the Shanghai Cooperation Organization
69/137	Programme of Action for Landlocked Developing Countries for the Decade 2014–2024	74/3	Political declaration of the high-level meeting to review progress made in addressing the priorities of small island developing States through the implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway
69/277	Political declaration on strengthening cooperation between the United Nations and regional and subregional organizations		
69/283	Sendai Framework for Disaster Risk Reduction 2015–2030	74/4	Political declaration of the high-level political forum on sustainable development convened under the auspices of the General Assembly
69/288	Comprehensive review of United Nations system support for small island developing States	74/15	Political Declaration of the High-level Midterm Review on the Implementation of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024
69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development (Addis Ababa Action Agenda)		
70/1	Transforming our world: the 2030 Agenda for Sustainable Development	74/120	Promoting social integration through social inclusion
70/192	Follow-up to the International Conference on Financing for Development	74/215	Agricultural technology for sustainable development
70/294	Political Declaration of the Comprehensive High-level Midterm Review of the Implementation of the Istanbul Programme of Action for the Least Developed Countries for the Decade 2011–2020	74/216	Implementation of Agenda 21, the Programme for the Further Implementation of Agenda 21 and the outcomes of the World Summit on Sustainable Development and of the United Nations Conference on Sustainable Development
70/299	Follow-up and review of the 2030 Agenda for Sustainable Development at the global level	74/228	Role of the United Nations in promoting development in the context of globalization and interdependence
71/243	Quadrennial comprehensive policy review of operational activities for development of the United Nations system	74/233	Follow-up to the second United Nations Conference on Landlocked Developing Countries
71/312	Our ocean, our future: call for action		
71/321	Enhancing the participation of indigenous peoples' representatives and institutions in meetings of relevant United Nations bodies on issues affecting them	74/235	Women in development
		74/238	Operational activities for development of the United Nations system
72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system	74/253	Enhancing accessibility for persons with disabilities to conferences and meetings of the United Nations system
		74/270	Global solidarity to fight the coronavirus disease 2019 (COVID-19)

74/297	Progress in the implementation of General Assembly resolution 71/243 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system	75/215	Follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States
74/306	Comprehensive and coordinated response to the coronavirus disease (COVID-19) pandemic	75/227	Follow-up to the Fourth United Nations Conference on the Least Developed Countries
74/307	United response against global health threats: combating COVID-19	75/228	Follow-up to the second United Nations Conference on Landlocked Developing Countries
75/15	Cooperation between the United Nations and the Association of Southeast Asian Nations	75/230	Implementation of the Third United Nations Decade for the Eradication of Poverty (2018–2027)
75/16	Cooperation between the United Nations and the Organization of Islamic Cooperation	75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system
75/90	The situation in Afghanistan	75/234	South-South Cooperation
75/154	Inclusive development for and with persons with disabilities	75/235	Agriculture development, food security and nutrition
75/168	Rights of indigenous peoples	75/239	Oceans and the law of the sea
75/175	Human rights and extreme poverty		
75/182	The right to development		
75/213	Promoting sustainable consumption and production patterns for the implementation of the 2030 Agenda for Sustainable Development, building on Agenda 21		

#### *Economic and Social Council resolutions*

37 (IV)	Economic Commission for Asia and the Far East	2019/6	Addressing inequalities and challenges to social inclusion through fiscal, wage and social protection policies
1895 (LVII)	Change of name of the “Economic Commission for Asia and the Far East” to “Economic and Social Commission for Asia and the Pacific”	2019/8	Report of the Committee for Development Policy on its twenty-first session
1998/46	Further measures for the restructuring and revitalization of the United Nations in the economic, social and related fields	2019/27	Support to Non-Self-Governing Territories by the specialized agencies and international institutions associated with the United Nations
2014/11	Follow-up to the International Conference on Financing for Development	2020/5	Strengthening coordination of the statistical programmes in the United Nations system
2015/30	Restructuring the conference structure of the Economic and Social Commission for Asia and the Pacific to be fit for the evolving post-2015 development agenda	2020/9	Mainstreaming a gender perspective into all policies and programmes in the United Nations system
2016/11	Committing to the effective implementation of the 2030 Agenda for Sustainable Development in Asia and the Pacific	2020/16	Programme of Action for the Least Developed Countries for the Decade 2011–2020
2018/5	Strategies for eradicating poverty to achieve sustainable development for all	2020/23	Progress in the implementation of General Assembly resolution 71/243 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system

#### *Economic and Social Commission for Asia and the Pacific resolutions*

66/1	Incheon Declaration	66/15	Strengthening of the evaluation function of the secretariat of the Commission
66/9	Full and effective implementation of the Beijing Platform for Action and its regional and global outcomes in the Asia-Pacific region	67/14	Cooperation between the Economic and Social Commission for Asia and the Pacific and other United Nations and regional and subregional organizations serving Asia and the Pacific

68/8	Enhancing coordination within the United Nations system and cooperation with regional organizations for promoting regional development	73/2	Strengthening the regional mechanism for the implementation of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024
68/9	Terms of reference of the Advisory Committee of Permanent Representatives and Other Representatives Designated by Members of the Commission	73/9	Regional road map for implementing the 2030 Agenda for Sustainable Development in Asia and the Pacific
69/3	Achieving the Millennium Development Goals in Asia and the Pacific: Bangkok Declaration of the Asia-Pacific Least Developed Countries, Landlocked Developing Countries and Small Island Developing States on the Development Agenda beyond 2015	74/1 74/10	Supporting the smooth transition of the least developed countries in Asia and the Pacific towards a sustainable graduation Implementation of the Ministerial Declaration on Enhancing Regional Economic Cooperation and Integration to Support the Implementation of the 2030 Agenda in Asia and the Pacific
70/1	Implementation of the Bangkok Declaration on Regional Economic Cooperation and Integration in Asia and the Pacific	75/1	Implementation of the outcome of the Euro-Asian Regional Midterm Review of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024
70/10	Implementation of the Bangkok Declaration of the Asia-Pacific region on the United Nations Development Agenda beyond 2015		
71/2	Implementation of the Programme of Action for the Least Developed Countries for the Decade 2011–2020 in Asia and the Pacific	75/2	Committing to strengthening the links between national, regional and global follow-up to and review of the 2030 Agenda for Sustainable Development in Asia and the Pacific
71/3	Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024	75/3	Advancing partnerships within and across regions for the sustainable development of Asia and the Pacific
71/4	Implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway	76/1	Strengthening cooperation to promote the conservation and sustainable use of the oceans, seas and marine resources for sustainable development in Asia and the Pacific
72/6	Committing to the effective implementation of the 2030 Agenda for Sustainable Development in Asia and the Pacific		
72/8	Fostering regional cooperation and partnerships to respond to the climate change challenge in the Asia-Pacific region	76/2	Regional cooperation to address the socioeconomic effects of pandemics and crises in Asia and the Pacific
73/1	A conference structure of the Commission aligned with the 2030 Agenda for Sustainable Development		

## Deliverables

16.21 Table 16.1 lists all cross-cutting deliverables, by category and subcategory, for the period 2020–2022.

19. Publications on the implementation of the 2030 Agenda	2	2	1	1
20. <i>Asia-Pacific Sustainable Development Journal</i>	—	—	—	2
<b>Technical materials</b> (number of materials)	<b>3</b>	<b>5</b>	<b>4</b>	<b>4</b>
21. Documents on issues relevant to Asia-Pacific least developed countries, landlocked developing countries and small island developing States	3	5	4	4
<b>C. Substantive deliverables</b>				
<b>Databases and substantive digital materials:</b> Asia-Pacific Sustainable Development Goal partnership data portal; and substantive blog posts for the ESCAP website for regional and global access.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> observance of United Nations international days, including United Nations Day; press conferences/press briefing and press interviews for major publications and events; and outreach activities upon demand for the general public, including for academic organizations for approximately 300 participants.				
<b>External and media relations:</b> press releases and op-ed articles on the work and activities of ESCAP.				
<b>Digital platforms and multimedia content:</b> Sustainable Development Goals help desk accessed by government officials and technical experts; knowledge platform to support least developed countries, landlocked developing countries and small island developing States in Asia and the Pacific in implementing their relevant programmes of action; multimedia promotional content, including videos and educational materials for major publications and events; and inputs for ESCAP social media platforms.				

## **Evaluation activities**

16.22 The following self-evaluations completed in 2020 have guided the proposed programme plan for 2022:

(a) Self-evaluation on the North-East Asian Subregional Programme for Environmental Cooperation;

(b) Self-evaluation on the Asia and Pacific Training Centre for Information and Communication Technology for Development.

16.23 The findings of the self-evaluations referenced above have been taken into account for the proposed programme plan for 2022. For example, the self-evaluation on the North-East Asian Subregional Programme for Environmental Cooperation recommended reviewing the charter of the Subregional Programme and setting a relevant long-term vision, mission and goals, which was reflected in the strategy and result 1 of component 2 in the present report. With respect to the Asia and Pacific Training Centre for Information and Communication Technology for Development, the recommendations were the designing of a medium-term strategy in line with the digital era and the inclusion of advisory services to member States in the area of information and communications technology (ICT) for development in the Training Centre's workplan, in addition to its training programmes. These recommendations have been reflected in the strategy and the deliverables of subprogramme 5.

16.24 The following self-evaluations are planned for 2022:

(a) Self-evaluation on the Asia-Pacific Plan of Action on Space Applications for Sustainable Development (2018–2030);

(b) Self-evaluation on the subprogramme on environment and development subprogramme.

## **Programme of work**

### **Subprogramme 1**

#### **Macroeconomic policy, poverty reduction and financing for development**

#### **Objective**

16.25 The objective, to which this subprogramme contributes, is to strengthen the capacity of member States to achieve stable, inclusive and sustainable economic development in Asia and the Pacific.

#### **Strategy**

16.26 To contribute to the objective, the subprogramme will continue to focus on promoting a more balanced and multidimensional development approach, beyond the primary focus on economic growth, and help member States to transform their economies in a manner that is consistent with the aspirations of the 2030 Agenda. The subprogramme will pay specific attention to the impact of the COVID-19 pandemic and other systemic and persistent development challenges, such as climate change, which aggravate existing vulnerabilities, including poverty, inequality and environmental degradation. If not addressed, these challenges may reverse development progress achieved to date in the Asia-Pacific region, in particular in the

most vulnerable countries. Therefore, it is necessary to build adequate resilience and support economic transition towards sustainable development in the post-COVID-19 era. Such a transition requires holistic policy considerations and coordinated action on three fronts: economic stability and resilience; inclusiveness; and sustainability.

16.27 The subprogramme will advance policies and potential pathways for such an economic transition towards sustainable development through research and knowledge products, capacity-building and technical assistance, and advocacy and intergovernmental coordination. On the research front, the subprogramme will build on its ongoing work, including the *Economic and Social Survey of Asia and the Pacific*, the *Financing for Development in Asia and the Pacific* series, policy papers and other research products, to help member States to mainstream the Sustainable Development Goals into economic policymaking. Using its ongoing and original analytical work, the subprogramme will also provide substantive input to global processes and publications coordinated by the Department of Economic and Social Affairs, the United Nations Conference on Trade and Development (UNCTAD) and others, especially with regard to financing for development and the United Nations socioeconomic response framework to the COVID-19 pandemic. The subprogramme will also continue to support the United Nations Sustainable Development Cooperation Framework processes, as and when needed.

16.28 The subprogramme will further strengthen the links between its research and its capacity-building work to support the development of national economic policies and financing strategies that support the transition of economies towards sustainable development and help them to build resilience to shocks such as the COVID-19 pandemic, in cooperation with United Nations country teams, where possible. It will also support regional cooperation platforms and expand expert networks, such as the Infrastructure Financing and Public-Private Partnership Network of Asia and the Pacific, for effective knowledge dissemination and peer learning.

16.29 The subprogramme will continue to support its main intergovernmental platform, the Committee on Macroeconomic Policy, Poverty Reduction and Financing for Development, to facilitate discussion with member States on economic policies and financing issues that are expected to help the envisaged economic transition. It will also leverage other existing platforms, such as the annual sessions of the Commission and the Asia-Pacific Forum on Sustainable Development, for this purpose.

16.30 Across these three lines of its work, the subprogramme will contribute to and seek synergy in achieving Sustainable Development Goals 1, 8, 9, 10, 12 and 17. Furthermore, the subprogramme will build on its existing and extensive cooperation with multilateral organizations and Asia-Pacific think tanks to advance its work highlighted above. It will also strengthen its cooperation with specialized agencies for policy advice and capacity-building, with a focus on transformative economic policies and financing for development strategies. Expected main partners for 2022 include, but are not limited to, ASEAN, the Global Green Growth Institute and the Astana International Financial Centre.

16.31 The subprogramme plans to support member States on issues related to COVID-19 by focusing on macroeconomic and financing for development policies that promote economic transformation towards sustainable development and more resilient economies.

16.32 The above-mentioned work is expected to result in:

- (a) An improved understanding of the impact of economic policies on sustainable development;

(b) Enhanced capacity of policymakers to mainstream and align economic policies and financing strategies with sustainable development objectives;

(c) A greater ability of the member States to mobilize and allocate financial resources for sustainable development.

16.33 The planned support on issues related to COVID-19 is expected to result in the advancement and greater scope of economic recovery measures that integrate sustainable development and more resilient economies.

## **Programme performance in 2020**

16.34 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Better-informed policymaking by member States in response to the COVID-19 pandemic**

16.35 As a result of the COVID-19 pandemic, the region is expected to face its deepest economic slowdown since at least the 1970s, along with significant job losses and an increase in poverty. To mitigate the impact of the pandemic and rebuild the economy towards greater resilience and sustainability, adequate, timely and well-targeted economic policies, in particular macroeconomic stimulus packages, are urgently needed. In this vein, it was crucial for policymakers to keep track of the rapidly evolving pandemic and policy developments in the region to perform quick yet systematic analyses of potential policy interventions.

16.36 The subprogramme supported Asia-Pacific policymakers on those two fronts by developing an online tracker<sup>1</sup> of policy responses to COVID-19 and a hands-on and applied Excel-based model<sup>2</sup> for COVID-19 impact and policy assessment. The online tracker is a comprehensive stocktaking and data visualization tool to keep policymakers updated on the pandemic situation and containment measures and to provide them with a detailed breakdown of economic stimulus and related trade, transport, social protection and statistics policy responses in the ESCAP region, and was developed with support and input from other subprogrammes.

16.37 The Excel-based assessment model is also supported through the regional programme on technical cooperation and comprises three main deliverables: (a) the Excel-based model, to assess the impact of COVID-19 and inform policy responses; (b) a user manual on how to use the model in different country contexts; and (c) an open webinar, to introduce the model to policymakers and experts.

16.38 The subprogramme's broad engagement with and substantive contributions to the United Nations system-wide processes and initiatives in response to the COVID-19 crisis also contributed to making countries better equipped to assess the impact of economic recovery policies on sustainable development. This included the provision of analytical materials, support for global meetings and the organization of a regional conversation as part of the Initiative on Financing for Development in the Era of COVID-19 and Beyond.

### *Progress towards the attainment of the objective, and performance measure*

16.39 The above-mentioned work contributed to the objective, as demonstrated by policymakers from Afghanistan, Bangladesh, Brunei Darussalam, Cambodia,

<sup>1</sup> Available at [www.unescap.org/covid19/policy-responses](http://www.unescap.org/covid19/policy-responses).

<sup>2</sup> Available at [www.unescap.org/resources/assessing-impact-covid-19-asia-and-pacific-and-designing-policy-responses-excel-based](http://www.unescap.org/resources/assessing-impact-covid-19-asia-and-pacific-and-designing-policy-responses-excel-based).

Georgia, India, Kazakhstan, the Philippines, Samoa, Timor-Leste and Tonga stating that they would use the tool in policymaking or research work. In total, 138 government policymakers from 24 Asia-Pacific countries attended the introductory webinar on the subprogramme's Excel model to assess the impact of COVID-19 and design policy responses (see table 16.2).

Table 16.2

**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>
—	—	Policymakers from 10 countries reported that they would use the COVID-19 impact and assessment tool and/or knowledge products to inform their policymaking in response to the COVID-19 pandemic

**Planned results for 2022**

16.40 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

**Result 1: enhanced understanding of financing needs and strategies for the implementation of the Sustainable Development Goals<sup>3</sup>****Programme performance in 2020**

16.41 The subprogramme collaborated with Samoa in the area of micro-, small and medium-sized enterprise financing and supported the Samoa Business Hub initiative with multiple research pieces. Samoa has since taken steps, in late 2019 and into 2020, to strengthen the Hub and related public support for such financing.

16.42 The subprogramme also organized an Asia-Pacific conference on financing for inclusive and sustainable development in December 2019 with follow-up support to member States in 2020. That event and the follow-up on various topics provided a knowledge exchange platform for 27 participating ESCAP member States on their new financing for development policy initiatives. In particular, Bangladesh, Brunei Darussalam, China, Indonesia, Kazakhstan and Sri Lanka shared their concrete policy actions on various fronts at the event.

16.43 The above-mentioned work contributed to new initiatives by seven member States designing and implementing financing strategies to bridge financing gaps for the implementation of the 2030 Agenda, which exceeded the target of five member States reflected in the proposed programme budget for 2020.

**Proposed programme plan for 2022**

16.44 The subprogramme will continue the work related to the planned result, in line with its mandate. To continue further progress towards the objective, the subprogramme will provide targeted capacity support to member States on financing for development strategies and policies, with the overarching aim of better aligning financial resource

<sup>3</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 19)).

allocation with sustainable development priorities through both financial market development and necessary public sector guidance and support in the process.

16.45 In particular, the subprogramme will continue to focus on thematic issues such as infrastructure financing, capital market development, inclusive financial services and climate financing, through its research products, seminars and training sessions and its support for regional financing for development networks. The expected progress is presented in the performance measure below (see table 16.3).

Table 16.3  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Large financing gaps, especially in countries with special needs, to implement the Sustainable Development Goals	Enhanced understanding of financing needs and strategies among policymakers in member States to effectively pursue the Sustainable Development Goals	New initiatives by seven member States for designing and implementing financing strategies to bridge financing gaps for the implementation of the 2030 Agenda	New initiatives by at least five member States for transforming their economies according to the ambitions of the 2030 Agenda, including but not limited to financing strategies	Three new initiatives by member States for transforming their economies according to the ambitions of the 2030 Agenda, including but not limited to financing strategies

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: Asia-Pacific countries take action to transform their economies for sustainable development<sup>4</sup>

### Programme performance in 2020

16.46 The subprogramme has proposed, in the 2020 edition of its flagship publication, the *Economic and Social Survey of Asia and the Pacific*, an accelerated transition towards achieving Sustainable Development Goal 12 (sustainable consumption and production), given its pivotal role for sustainable development within planetary boundaries. Building on this work, the subprogramme organized eight policy dialogues, in which policy makers and experts from Indonesia, Malaysia, Pakistan, the Philippines and Thailand shared their most recent policy initiatives on the transition towards sustainable development.

16.47 In parallel, the Excel-based model to assess the impact of COVID-19 and design policy responses developed by the subprogramme also served the dual purpose of supporting analysis of economic recovery policies towards sustainable development and COVID-19 impact assessment, as highlighted in the result that emerged in 2020, above. Such policy analysis using the model has been conducted for Afghanistan, the Kyrgyz Republic, Pakistan, Samoa and Sri Lanka as part of the subprogramme's ongoing capacity-building work, supported also by the United Nations Development Account.

16.48 The above-mentioned work contributed to five member States being informed of the design of economic policies and the implementation of financing strategies for the implementation of the 2030 Agenda, through knowledge products of the

<sup>4</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

subprogramme and starting the process of designing such policies and implementing such strategies for the implementation of the 2030 Agenda, which met the planned target, as reflected in the programme budget for 2021.

### Proposed programme plan for 2022

16.49 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will, for example, evaluate changes in financial system and regulations that help to channel investment towards the Sustainable Development Goals and analyse the potential of fiscal policies and the reorientation of public expenditure to support resilient, inclusive and sustainable development. The expected progress is presented in the performance measure below (see table 16.4).

Table 16.4  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Increased awareness of the adverse implications of pursuing growth-centric development approaches, and policy options and financing strategies to effectively pursue the 2030 Agenda, as reflected in the feedback from participants in the subprogramme's capacity-building activities	Enhanced understanding of financing needs and strategies by member States, as demonstrated by 94 per cent of participants expressing their ability to design and implement policies concerning the 2030 Agenda and financing for development	Five member States commenced the design of economic policies and the implementation of financing strategies for the implementation of the 2030 Agenda, informed by knowledge products prepared under the subprogramme	Policy action aimed at transforming their economies according to the ambitions of the 2030 Agenda, informed by knowledge products prepared under the subprogramme, taken by at least five member States	Three policy actions by member States aimed at transforming their economies according to the ambitions of the 2030 Agenda and informed by knowledge products prepared by the subprogramme

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: enhanced capacity of member States in designing policies and strategies for resilient economies

#### Proposed programme plan for 2022

16.50 In response to the COVID-19 pandemic and the subsequent global economic crisis, the subprogramme has laid the groundwork for strengthening the resilience of economic development to non-economic shocks and the role of policies, in particular fiscal policy, in this regard. The subprogramme has, in particular, conducted an analysis of the impact of the pandemic and of the policy responses in the region, which will be published in the *Economic and Social Survey of Asia and the Pacific 2021*, as well as in a series of planned policy briefs and working papers.

#### *Lessons learned and planned change*

16.51 The lesson for the subprogramme was that, given the research-oriented and macroeconomic focus of its work, proving genuine linkages of its work with concrete policy action is a major challenge. This is due mainly to the fact that macroeconomic

policies by nature are comprehensive, take time to form and implement and are often influenced by many factors simultaneously, thus rendering the task of tracking and establishing linkages very difficult. In applying the lesson, the subprogramme will strengthen efforts in results-tracking to collect more information on how its work was used by member States and devote more resources to the development of ready-to-use policy manuals and analytical tools to facilitate the translation of its research into action and, subsequently, to actual changes. Building on the research undertaken in 2020 and planned for 2021, the subprogramme will conduct timely and relevant policy analysis, including results-tracking, to demonstrate how national and regional fiscal, debt and financial strategies and other economic measures can facilitate post-COVID-19 economic recovery and strengthen economic resilience to future economic and non-economic shocks.

*Expected progress towards the attainment of the objective, and performance measure*

16.52 This work is expected to contribute to the objective, demonstrated by three member States being prepared for implementing national strategies and policy initiatives towards more resilient economies, including but not limited to fiscal and financial measures (see table 16.5).

Table 16.5  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
—	—	—	Member States build consensus on strategies and policies towards more resilient economies at the seventy-seventh session of the Commission and the third session of the Committee on Macroeconomic Policy, Poverty Reduction and Financing for Development	Three member States implement national strategies and policy initiatives towards more resilient economies, including but not limited to fiscal and financial measures

## Legislative mandates

16.53 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolutions*

74/205	Financial inclusion for sustainable development	75/204	International financial system and development
74/231	Development cooperation with middle-income countries	75/205	External debt sustainability and development

*Economic and Social Commission for Asia and the Pacific resolutions*

E/CN.11/63	Statistical and economic documentation work	71/5	Implementing the outcome of the Asia-Pacific High-level Consultation on Financing for Development
68/10	Enhancing regional economic integration in Asia and the Pacific		

**Deliverables**

16.54 Table 16.6 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 16.6

<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> technical advice on at least 2 broad issues related to financing for development and macroeconomic policy; advisory support for the task forces of the ESCAP Sustainable Business Network; and country notes and presentation materials on macroeconomic policy, poverty reduction and financing for development.				
<b>Databases and substantive digital materials:</b> substantive blog posts for the ESCAP website for regional and global access.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> press interviews for major publications and events.				
<b>External and media relations:</b> press releases and op-ed articles on the work and activities of the subprogramme.				
<b>Digital platforms and multimedia content:</b> regular, typically monthly, updating and maintenance of web pages of the subprogramme for the ESCAP website in 4 areas, including economic assessment and sustainable development, financing for development, regional economic cooperation and integration and infrastructure financing and public-private partnerships; and inputs for ESCAP social media platforms.				

## Subprogramme 2

### Trade, investment and innovation

#### Objective

16.55 The objective, to which this subprogramme contributes, is to strengthen the capacity of member States to implement policies and programmes that more effectively harness the potential of trade, investment, innovation, technology and enterprise development for sustainable development and regional integration in Asia and the Pacific.

#### Strategy

16.56 To contribute to the objective, the subprogramme will support member States in formulating and implementing policies and measures to facilitate trade, investment and innovation in support of sustainable development, with a specific focus on the needs of least developed and landlocked countries. This work encompasses increasing the capacity of member States to negotiate and implement trade and investment agreements and to design and implement trade facilitation policies and measures, including through the adoption of paperless trade systems. This work is implemented in close cooperation with global and regional partners, including the Asian Development Bank, UNCTAD and the World Trade Organization (WTO).

16.57 The subprogramme, including through the Asian and Pacific Centre for Transfer of Technology, will also provide capacity-building through workshops, training activities and policy advice and develop knowledge products on sustainable foreign direct investment (FDI), innovation, emerging and frontier technologies, responsible and inclusive business, social enterprise, impact investment and innovative finance for women's entrepreneurship.

16.58 In building the capacity of member States to ensure that trade, investment and innovation contributes to sustainable development, the subprogramme will provide support in having member States make progress towards the achievement of the targets of Sustainable Development Goals 8, 9, 17.

16.59 The subprogramme plans to support member States on issues related to COVID-19 in the areas of trade facilitation and support for micro-, small and medium-sized enterprises. The COVID-19 pandemic showed the importance of keeping trade

flowing, in particular in critical goods, further highlighting the importance of trade digitalization, given that it reduces physical interaction in the trade process. In response to COVID-19, the subprogramme will support member States in advancing paperless and contactless trade. The pandemic also highlighted the vulnerability of micro-, small and medium-sized enterprises in times of crisis. In response, the subprogramme will continue its work to enable policies for FDI and micro-, small and medium-sized enterprises, with a key focus on innovative financial and digital tools to support women entrepreneurs.

16.60 The above-mentioned work is expected to result in:

- (a) The reduction in trade costs and the increased participation and competitiveness of companies, especially micro-, small and medium-sized enterprises, in international trade;
- (b) The adoption of more effective rules and procedures governing trade, leading to more efficient trade outcomes aligned with the Sustainable Development Goals;
- (c) The adoption of policies and programmes aimed at achieving more inclusive and sustainable outcomes of business and investment activities;
- (d) The integration of inclusivity and sustainability dimensions in technology and innovation policies in the region.

16.61 The planned support on issues related to COVID-19 is expected to result in the increased resilience of supply chains by enabling continued trade activities and use of technology and innovation in mitigating the impact of future pandemics.

## **Programme performance in 2020**

16.62 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Improved access to innovative trade policy support in response to the COVID-19 pandemic and other crises**

16.63 When the COVID-19 pandemic hit and factories and borders began to close, countries around the world adopted export bans and other barriers to trade on essential goods, such as masks and medical equipment, exposing the vulnerability of supply chains to disruptions and accentuating the importance of maintaining trade flows. In addition, this highlighted the lack of adequate provisions in bilateral and regional trade agreements in Asia and the Pacific to deal with crisis situations and keep trade going in times of emergencies.

16.64 Therefore, in order to address this gap and to ensure greater resilience of trade flows in the post-COVID-19 era, ESCAP and a number of other United Nations entities jointly launched an initiative to develop model provisions for trade agreements, to ensure more cooperation and predictability in times of crisis and pandemic and to speed up recovery. For the subprogramme, the initiative included the organization of an online “policy hackathon”, in collaboration with UNCTAD, the regional commissions, WTO and the Consumer Unity and Trust Society. More than 200 trade analysts from Government, academia, civil society and the private sector were brought together in a 45-day online policy hackathon to develop model provisions for regional and other trade agreements to avoid trade disruptions in times of crisis and pandemic.

16.65 This inclusive policy formulation exercise included 60 written contributions authored by more than 150 co-authors, selected by a core group of senior experts for publication in an online repository, providing a range of policy options for increasing the resilience of trade through trade agreements. A webinar series was organized to promote and further discuss the top-rated contributions, with more than 300 registered participants. All input gathered during the policy hackathon and webinars are being channelled to support the preparation of a handbook of model trade provisions in times of crisis and pandemic, to be jointly published by ESCAP and collaborating United Nations organizations, on the basis of which training sessions for trade negotiators will be organized in 2021. The objective is to provide options for clauses that trade policymakers can include in trade agreements to minimize disruptions in the trade of critical goods in future crises.

*Progress towards the attainment of the objective, and performance measure*

16.66 The above-mentioned work contributed to the objective, as demonstrated by access by member States to an online repository of peer-reviewed solutions to respond to emergent challenges associated with the COVID-19 pandemic. The online repository and related pages had 9,581 unique visits (see table 16.7).

Table 16.7  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
—	—	Member States' access to online repository of peer-reviewed solutions to respond to emergent challenges associated with the COVID-19 pandemic

## **Planned results for 2022**

16.67 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: harnessing innovative business models for social progress<sup>5</sup>**

#### **Programme performance in 2020**

16.68 The subprogramme has continued its work on promoting innovative business models such as impact investment and social enterprise through advocacy activities, research and analysis, capacity-building, facilitating regional knowledge-sharing, and hands-on policy advice to member States. These activities were also supported by the United Nations Development Account. The subprogramme's activities supported the adoption of the Social Enterprise Act in Thailand; the integration of social entrepreneurship as a key pillar in Indonesia's medium-term national development plan; the establishment of a cross-government working group on inclusive business and impact investment led by the Myanmar Directorate of Investment and Company Administration; the launch of the Malaysia Social Impact Exchange which is intended to channel untapped corporate resources towards high-performing social purpose

<sup>5</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 19)).

organizations; the establishment of the National Advisory Board for Impact Investment led by the Bangladesh Ministry of Finance; and the incorporation of social enterprise in the Organic Law in the Bangsamoro Autonomous Region in Muslim Mindanao, the Philippines.

16.69 The above-mentioned work contributed to six countries in the region implementing measures to support impact enterprises and investors, which met the planned target of implementation of measures by member States to support impact enterprises and investors, reflected in the proposed programme budget for 2020.

### **Proposed programme plan for 2022**

16.70 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will provide policy support to member States on social enterprise, impact investment and inclusive business, subject to demand and the availability of resources. The expected progress is presented in the performance measure below (see table 16.8).

**Table 16.8**  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Absence of measures to support impact enterprises and investors	Development of measures by member States to support impact enterprises and investors	Implementation of measures by six countries (Bangladesh, Indonesia, Malaysia, Myanmar, the Philippines and Thailand) to support impact enterprises and investors	Implementation of measures by member States to support impact enterprises and investors	Implementation of measures by member States to support innovative business models

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: harnessing innovative technologies to enhance women's access to financial services<sup>6</sup>**

### **Programme performance in 2020**

16.71 To increase access to finance by women entrepreneurs, the subprogramme supported the launch of a women's bond and an impact investment fund for women entrepreneurs in 2020 and continued to provide advice and support to the winners of the 2019 challenge fund on digital and financial solutions for women entrepreneurs. The subprogramme has also provided policy advice and capacity-building support to Governments on how to ensure an enabling policy environment for digital and financial technologies in support of women's entrepreneurship, including through supporting studies on access by micro-, small and medium-sized enterprises to finance in Bangladesh and Samoa. A research challenge on access to finance for women

<sup>6</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 19)).

entrepreneurs was also launched in 2020, which received more than 60 proposals, with 6 winning proposals awarded funding for their research.

16.72 The above-mentioned work contributed to 7,205 women entrepreneurs having improved access to financial services, with support from ESCAP, in 2020, which exceeded the planned target of 2,500 women entrepreneurs having access to financial services with support from ESCAP, as reflected in the programme budget for 2021.

### **Proposed programme plan for 2022**

16.73 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will provide technical assistance to Governments and intermediaries to enhance women's access to financial services, including through the women's bond, impact investment funds and additional challenge funds. The expected progress is presented in the performance measure below (see figure 16.I).

Figure 16.I

**Performance measure: total number of women entrepreneurs accessing financial services with support from the Economic and Social Commission of Asia and the Pacific (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: making trade processes more efficient, transparent and safer through paperless and contactless trade**

#### **Proposed programme plan for 2022**

16.74 The subprogramme has a long-standing programme on trade facilitation, focused on supporting member States in making trade processes “paperless”. Enabling the electronic exchange of trade data and documents across borders not only helps to reduce trade costs and make it easier to comply with trade procedures, but also can help to identify illegal trade transactions and illicit financial flows. Moreover, it can lead to reduced physical contact between traders and customs and

other officials, thus limiting opportunities for both corruption and contagion during a pandemic.

16.75 The benefits and implementation difficulties associated with digitalizing cross-border trade processes led ESCAP member States to negotiate a United Nations treaty, namely, the Framework Agreement on Facilitation of Cross-border Paperless Trade in Asia and the Pacific. The Framework Agreement, adopted in 2016, provides an inclusive platform for countries at all levels of development to cooperate and develop harmonized cross-border paperless trade solutions.

16.76 Since 2016, the subprogramme has supported the intergovernmental steering group that developed the Framework Agreement on Facilitation of Cross-border Paperless Trade in Asia and the Pacific in devising an implementation road map. The subprogramme has also implemented a series of capacity-building and technical activities related to the treaty. Following Bangladesh's and China's ratification of the treaty in October and November 2020, respectively, the Framework Agreement entered into force in February 2021.

#### *Lessons learned and planned change*

16.77 The lesson for the subprogramme was that it needed to design differentiated support activities for various government bodies within the same country, given that they may have different levels of readiness in paperless trade. In applying the lesson, the subprogramme will provide more tailored assessments and programmes for the different agencies and stakeholders involved. Capacity-building support and technical assistance will be targeted and responsive to ensure that no country is left behind in the adoption of paperless trade.

#### *Expected progress towards the attainment of the objective, and performance measure*

16.78 This work is expected to contribute to the objective, as demonstrated by seven ESCAP member States acceding to the Framework Agreement on Facilitation of Cross-border Paperless Trade in Asia and the Pacific, bringing the total number of countries having acceded to or ratified the agreement to seven (see figure 16.II).

Figure 16.II

**Performance measure: total number of countries having acceded to or ratified the Framework Agreement on Facilitation of Cross-Border Paperless Trade in Asia and the Pacific (cumulative)**

## Legislative mandates

16.79 The list below provides all mandates entrusted to the subprogramme.

### *General Assembly resolutions*

74/229	Science, technology and innovation for sustainable development	75/211	Entrepreneurship for sustainable development
75/203	International trade and development		

### *Economic and Social Commission for Asia and the Pacific resolutions*

70/5	Strengthening regional cooperation and capacity for enhanced trade and investment in support of sustainable development	72/12	Harnessing science, technology and innovation for inclusive and sustainable development in Asia and the Pacific
70/6	Implementation of the decision of the Ad Hoc Intergovernmental Meeting on a Regional Arrangement for the Facilitation of Cross-border Paperless Trade	73/3	Advancing integrated and seamless connectivity for sustainable development in Asia and the Pacific
72/3	Statute of the Asian and Pacific Centre for Transfer of Technology	75/8	Advancing science, technology and innovation for the implementation of the 2030 Agenda for Sustainable Development in Asia and the Pacific
72/4	Framework Agreement on Facilitation of Cross-border Paperless Trade in Asia and the Pacific		

## Deliverables

16.80 Table 16.9 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 16.9

### **Subprogramme 2: deliverables for the period 2020–2022, by category and subcategory**

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>

25. Policy Briefs on trade, investment and innovation	4	4	4	3
26. Reports on trade facilitation and paperless trade implementation	—	—	1	—
27. <i>Asia-Pacific Tech Monitor</i>	4	4	4	4
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> advisory services in three broad areas on trade, investment and innovation; establishment and support of regional knowledge networks linking researchers, policymakers and practitioners in trade, investment and innovation, including the Asia-Pacific Research and Training Network on Trade and the United Nations Network of Experts for Paperless Trade and Transport in Asia and the Pacific; advisory support for the task forces of the ESCAP Sustainable Business Network; and advisory support for the United Nations Special Programme for the Economies of Central Asia Working Group on Innovation and Technology for Sustainable Development.				
<b>Databases and substantive digital materials:</b> databases on trade, investment and innovation for regional and global access; the comprehensive trade cost database; the Asia-Pacific Trade and Investment Agreements Database; trade performance indicators on non-tariff measures; the online Trade Intelligence and Negotiation Adviser; online courses on trade, investment and innovation; country fact sheets and briefing notes on trade and investment; and substantive blog posts for the ESCAP website for regional and global access.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> outreach programmes and briefings on trade, investment and innovation; information and multimedia materials on ESCAP work in trade, investment and innovation; and press interviews for major publications and events.				
<b>External and media relations:</b> press releases and op-ed articles on the work and activities of the subprogramme.				
<b>Digital platforms and multimedia content:</b> regular, typically monthly, updates, for website of the Asia-Pacific Research and Training Network on Trade; updating and maintenance of web pages of the subprogramme for the ESCAP website in four areas, including technology and innovation, business and investment, trade facilitation and digital trade, and trade policy and integration; and input for ESCAP social media platforms.				

## **Subprogramme 3**

### **Transport**

#### **Objective**

16.81 The objective, to which this subprogramme contributes, is to achieve sustainable transport connectivity, logistics and mobility in the Asia-Pacific region.

#### **Strategy**

16.82 To contribute to the objective, the subprogramme will continue its work to improve the efficiency of international transport operations and logistics and develop operational transport connectivity so as to create the conditions necessary for a region-wide sustainable transport and logistics system. In particular, the subprogramme will continue to serve as the secretariat for the Intergovernmental Agreement on the Asian Highway Network, the Intergovernmental Agreement on the Trans-Asian Railway Network and the Intergovernmental Agreement on Dry Ports and provide technical expertise to the intergovernmental deliberations of the relevant working groups. It will also provide technical assistance in eliminating non-physical barriers to regional transport connectivity through strengthened transport facilitation measures, harmonized technical and operational transport standards, regulations and practices, including efficient operational arrangements and harmonized legal frameworks for intermodal transport; facilitate the exchange of good practices on the utilization of new technologies; and conduct research and analysis that address the challenges and ways forward in realizing regional connectivity. This work will help member States to make progress towards the achievement of Sustainable Development Goals 9, 11, 12, 13 and 17.

16.83 The subprogramme will undertake policy advocacy and capacity-building in the areas of sustainable urban transport, road safety and smart transport, including to promote and facilitate the application of the ESCAP-developed sustainable urban transport index, the formulation and implementation of strategies to improve road safety and the development of a road map to support regional cooperation for wider deployment of smart transport systems. The subprogramme will also strengthen its work on the environmental and social dimensions of transport development and operation. This work will support member States in making progress towards the achievement of Sustainable Development Goals 3, 7, 11 and 17.

16.84 To contribute to the above objective, the subprogramme will continue to collaborate with relevant United Nations agencies, funds and programmes, including the International Maritime Organization, the other United Nations regional commissions and agencies and regional development banks, including the Islamic Development Bank; international, regional and subregional organizations, including the Economic Cooperation Organization, the International Transport Workers' Federation, the Organization for Cooperation between Railways and the Shanghai Cooperation Organization; and research institutes, associations and other civil society organizations.

16.85 The subprogramme plans to support member States on issues related to COVID-19 by conducting research and analysis in order to assess the ongoing impact associated with the pandemic on transport connectivity and offer policy solutions to the member States.

16.86 The above-mentioned work is expected to result in:

- (a) Increased measures and initiatives to develop a more sustainable and resilient transport infrastructure along the regional transport networks (Asian

highways, trans-Asian railways and dry ports) to support freight and passenger operations that are affordable, safe, accessible and environmentally friendly;

(b) Increased measures and initiatives to enhance transport connectivity to preserve regional transport linkages post-pandemic and foster regional cooperation to support interregional and intraregional trade and people connectivity, further supporting the realization of the 2030 Agenda;

(c) The formulation and implementation of sustainable transport mobility policy initiatives in member countries, including the planning and development of urban public transport systems, measures to improve transport safety and measures to promote the increasing use of environmentally sustainable modes of transport, and smart mobility approaches in the region.

16.87 The planned support on issues related to COVID-19 is expected to result in the application by countries of available policy options and measures that facilitate cross-border transport while helping to contain pandemics such as COVID-19 and other similar disruptions to regional connectivity.

### **Programme performance in 2020**

16.88 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

#### **Enhanced regional dialogue on freight transport connectivity in the context of COVID-19**

16.89 The outbreak of the COVID-19 pandemic had led to uncoordinated border closures, controls and restrictions on international freight transport operations, resulting in shortages of essential supplies, which contributed to the initial delay in the pandemic response. Therefore, one of the early lessons of the pandemic was the importance of maintaining transport connectivity and the cross-border movement of basic commodities, agricultural products, foodstuffs and medical supplies. Preserving transport connectivity is indispensable not only for the immediate response to the pandemic, but also for the subsequent recovery efforts rooted in the 2030 Agenda and for building resilience to future pandemics and crises. This is especially important for landlocked developing countries. In its contribution to preserve the region's transport connectivity in 2020, the subprogramme launched an online resource page that monitored national responses on freight transport connectivity during the COVID-19 pandemic to help member States to gain access the relevant information and consider coordinating their policy responses and to provide support to the global observatory on border-crossing status due to COVID-19.

16.90 The subprogramme also published a policy brief that provided a preliminary analysis of countries' initial responses to the outbreak and informed current and future policy responses in ensuring the continuity of transport connectivity and logistics in the Asia-Pacific region. It also contributed to coordinating a global United Nations response and calls for action on supply chain connectivity. Furthermore, the subprogramme mobilized and facilitated regional dialogue and country consultations on ways forward for regional cooperation mechanisms that ensure coordinated and timely responses to disruptions in the future.

#### *Progress towards the attainment of the objective, and performance measure*

16.91 The above-mentioned work contributed to the objective, as demonstrated by member States agreeing that concrete collaborative initiatives on sustainable freight

and transport connectivity for efficient and resilient supply chains shall be taken up within the ESCAP regional mechanisms, including during phase two of the Regional Action Programme for Sustainable Transport Connectivity in Asia and the Pacific (2022–2026) and at the sixth session of the Committee on Transport and other regional events (see table 16.10).

Table 16.10  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
—	—	Countries agreed that concrete collaborative initiatives on sustainable freight and transport connectivity for efficient and resilient supply chains should be taken up within the ESCAP regional mechanisms, including during phase two of the Regional Action Programme for Sustainable Transport Connectivity in Asia and the Pacific, to be considered in 2021 at the fourth Ministerial Conference on Transport

## Planned results for 2022

16.92 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### Result 1: shifting towards more sustainable freight transport in Asia and the Pacific<sup>7</sup>

#### Programme performance in 2020

16.93 The subprogramme has supported member States in the adoption of their national policies and measures to facilitate international rail transport through its analytical work and capacity-building activities on rail freight transport, including the convening of a group of experts to discuss challenges in and opportunities for international railway transport along the trans-Asian railway network and beyond in the times of the COVID-19 pandemic.

16.94 The above-mentioned work contributed to the adoption by ESCAP member States of six policies and measures to facilitate international rail transport, which exceeded the planned target of adoption by ESCAP member States of five policies and measures to facilitate international rail transport, reflected in the proposed programme budget for 2020.

<sup>7</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 19)).

### Proposed programme plan for 2022

16.95 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will support member States in designing and implementing facilitation, digitization and harmonization measures along the Trans-Asian Railway Network, the Asian Highway Network and intermodal corridors involving dry ports. The aim of these measures is to enhance the efficiency of the transport systems and accelerate a modal shift towards more environmentally friendly transport within the framework of the Regional Action Programme for Sustainable Transport Connectivity in Asia and the Pacific, phase II (2022–2026). The expected progress is presented in the performance measure below (see table 16.11).

Table 16.11  
Performance measure

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Limited consideration of the practical obstacles to international rail transport, undermining its efficiency and competitiveness	Identification by ESCAP member States of practical measures in support of sustainable freight transport, with a focus on international rail transport	Adoption by ESCAP member States of six policies and measures to facilitate international rail transport	Increased number of freight trains and/or reduced border-crossing times along Trans-Asian Railway routes	Five facilitation, digitization and harmonization measures along the Trans-Asian Railway Network, the Asian Highway Network and intermodal corridors involving dry ports that enhance efficiency of the transport systems and accelerate a modal shift towards more environmentally friendly transport

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 2: realigning the region's priorities towards sustainable transport connectivity in Asia and the Pacific<sup>8</sup>

#### Programme performance in 2020

16.96 The subprogramme has prepared the parliamentary documentation on the review of the implementation of the Regional Action Programme for Sustainable Transport Connectivity in Asia and the Pacific, phase I (2017–2021) and the activities conducted during this phase. That documentation was submitted to the Committee on Transport for the deliberation of member States. The outcome of those deliberations provided the basis for the preparation of phase two of the Regional Action Programme.

16.97 The above-mentioned work contributed to countries participating in the evaluation of the implementation of the first phase of Regional Action Programme

<sup>8</sup> As reflected in the programme budget for 2021 ([A/75/6/Add.1](#)).

and initiating discussions on areas to be added or strengthened in the second phase, which met the planned target, reflected in the programme budget for 2021.

### Proposed programme plan for 2022

16.98 The subprogramme will continue the work related to the planned result, in line with its mandate. The Regional Action Programme for Sustainable Transport Connectivity in Asia and the Pacific, phase II (2022–2026), in the context of the decade of action for the Sustainable Development Goals, will maintain the traditional focus areas such as infrastructure and operational connectivity, road safety, urban transport and digitization of transport, while considering a more holistic approach to strengthen the environmental and social dimensions of transport development and operations.

16.99 To contribute to further progress towards the objective, the subprogramme will support its member States by scaling up the implementation of analytical, intergovernmental and capacity-building activities under the traditional focus areas such as infrastructure and operational connectivity, road safety, urban transport, and digitization of transport, and by initiating the implementation of new activities to strengthen the environmental and social dimensions of transport development, guided by the second phase of the Regional Action Programme. The expected progress is presented in the performance measure below (see table 16.12).

Table 16.12  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Regional Action Programme for Sustainable Transport Connectivity in Asia and the Pacific	Countries further identified key activities to accelerate the implementation of the Regional Action Programme	Countries participated in the evaluation of the implementation of the first phase of the Regional Action Programme and initiated discussions on areas to be added or strengthened in the second phase	Countries adopt the second phase of the Regional Action Programme and other policy frameworks and tools at the fourth session of the Ministerial Conference on Transport	Countries initiate the implementation of the second phase of the Regional Action Programme and other policy frameworks and tools adopted at the fourth session of the Ministerial Conference on Transport

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: accelerating transformative action in transport for the delivery of the Sustainable Development Goals

#### Proposed programme plan for 2022

16.100 The decade of action for the Sustainable Development Goals calls for mobilizing regional action, raising ambitions and identifying solutions, and thus offers further impetus and opportunities to reconsider the transport priorities in the Asia-Pacific region and to accelerate impactful change towards sustainability in the aftermath of the COVID-19 pandemic. The subprogramme facilitated the review of the implementation of the Regional Action Programme for Sustainable Transport Connectivity in Asia and the Pacific, phase I (2017–2021) at the sixth session of the

Committee on Transport. The outcomes of the sixth session Committee are being incorporated into the preparations for the fourth session of the Ministerial Conference on Transport, which will be held at the end of 2021 to discuss the continuous challenge and the tremendous opportunity in the transport sector for making the transition to economic, social and environmental sustainability, to identify priority needs of member States and to set forth future direction through the adoption of phase II of the Regional Action Programme and other policy frameworks and tools that accelerate impactful change towards sustainability.

*Lessons learned and planned change*

16.101 The lesson for the subprogramme was that there was a demand for a more holistic approach to include economic, environmental and social dimensions of transport development and operations in the formulation and implementation of transport policies and measures to support member States in achieving transport-related targets of the Sustainable Development Goals. In applying the lesson, the subprogramme will provide knowledge products to help member countries to define the optimal set of policy interventions that extends beyond the development of transport infrastructure and operational connectivity, road safety, urban transport and digitization to cover reforms and policies that amplify the wider economic benefits of that infrastructure and include areas of unrealized economic potential or possible positive spillover effects for social and environmental development.

*Expected progress towards the attainment of the objective, and performance measure*

16.102 This work is expected to contribute to the objective, as demonstrated by the adoption of eight policies and measures that intensify support for the efficiency and resilience of supply chains, the environmental dimensions of transport systems and improvements in transport safety to accelerate progress towards achieving transport-related targets of the Sustainable Development Goals that are geared towards a safer, more efficient and environmentally sustainable transport sector (see table 16.13).

Table 16.13  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
The Committee on Transport noted with satisfaction the progress in implementing the Regional Action Programme for Sustainable Transport Connectivity in Asia and the Pacific, phase I (2017–2021) and its numerous policy, institutional and technical complementarities with a number of national programmes and development principles	ESCAP member States continued to formulate and implement transport policies and measures in priority areas, as indicated in phase I of the Regional Action Programme	ESCAP member States advanced discussions on priority areas that would balance economic, social and environmental dimensions of transport and support the decade of action for the Sustainable Development Goals by 2030	ESCAP member States reconsider and adopt the agreed regional transport priorities in the Asia-Pacific region that accelerate impactful change towards sustainability while recovering from the COVID-19 pandemic	Eight new policies and measures by member States that intensify support for the efficiency and resilience of supply chains, the environmental dimensions of transport systems and improvements in transport safety to accelerate the progress towards achieving transport-related targets of the Sustainable Development Goals

## Legislative mandates

16.103 The list below provides all mandates entrusted to the subprogramme.

### General Assembly resolutions

69/213	Role of transport and transit corridors in ensuring international cooperation for sustainable development	72/212	Strengthening the links between all modes of transport to achieve the Sustainable Development Goals
70/197	Towards comprehensive cooperation among all modes of transport for promoting sustainable multimodal transit corridors	74/299	Improving global road safety

### Economic and Social Commission for Asia and the Pacific resolutions

70/7	Implementation of the Suva Declaration on Improving Maritime Transport and Related Services in the Pacific	72/5	Strengthening regional cooperation on transport connectivity for sustainable development in Asia and the Pacific
71/6	Maritime transport connectivity for sustainable development	73/4	Implementation of the Ministerial Declaration on Sustainable Transport Connectivity in Asia and the Pacific
71/7	Adoption of the Regional Cooperation Framework for the Facilitation of International Railway Transport	74/2	Promotion of the regional framework for the planning, design, development and operation of dry ports of international importance
71/8	Strengthening intraregional and interregional connectivity in Asia and the Pacific	74/3	Improving road safety in Asia and the Pacific for sustainable transport systems

## Deliverables

16.104 Table 16.14 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 16.14

### Subprogramme 3: deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>4</b>	<b>9</b>	<b>5</b>	<b>4</b>
1. Reports for ESCAP	1	1	–	1
2. Reports for the Committee on Transport	3	8	–	3
3. Reports for the Ministerial Conference on Transport	–	–	5	–
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>20</b>	<b>12</b>	<b>30</b>	<b>22</b>
4. Meetings of the Committee on Transport	6	4	–	6
5. Meetings of the Ministerial Conference on Transport	–	–	10	–
6. Meetings on the Asian Highway Network	–	–	4	–
7. Meetings on the Trans-Asian Railway Network	–	–	4	–
8. Meetings on dry ports	–	–	4	–
9. Meetings of the United Nations Special Programme for the Economies of Central Asia Working Group on Sustainable Transport, Transit and Connectivity	4	2	4	4
10. Expert group meetings on transport connectivity and logistics	8	4	4	8

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
11. Expert group meetings on mobility	2	2	—	4
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>7</b>	<b>18</b>	<b>8</b>	<b>8</b>
12. Capacity-building projects on transport connectivity and logistics	4	13	4	4
13. Capacity-building projects on mobility	3	5	4	4
<b>Seminars, workshops and training events</b> (number of days)	<b>1</b>	—	—	—
14. Training event on transport connectivity and logistics	1	—	—	—
<b>Publications</b> (number of publications)	<b>2</b>	<b>2</b>	<b>2</b>	<b>2</b>
15. Publication on transport developments in Asia and the Pacific	—	—	1	—
16. Publications on transport connectivity, logistics and mobility	2	2	1	2
<b>Technical materials</b> (number of materials)	<b>3</b>	<b>3</b>	<b>3</b>	<b>3</b>
17. Technical materials on transport connectivity and logistics	2	2	2	2
18. Technical materials on mobility	1	1	1	1
<b>C. Substantive deliverables</b>				
<b>Databases and substantive digital materials:</b> data collection for the Asian Highway database, the Trans-Asian Railway network and the network of dry ports; materials on road safety for regional and global access; and substantive blog posts for the ESCAP website for regional and global access.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> press interviews for major publications and events.				
<b>External and media relations:</b> press releases and op-ed articles on the work and activities of the subprogramme.				
<b>Digital platforms and multimedia content:</b> regular, typically monthly, updating and maintenance of web pages of the subprogramme for the ESCAP website in six areas, including the Asian Highway Network, environmentally sustainable transport, the Trans-Asian Railway Network, dry ports and intermodal transport, connecting to global supply chains and safe and inclusive transport.				

## Subprogramme 4

### Environment and development

#### Objective

16.105 The objective, to which this subprogramme contributes, is to reduce the negative impacts of growth on the natural environment and to improve human well-being in urban and rural environments through building the capacity of member States to strengthen climate action and sustainable resource use, realize sustainable urban development and eliminate pollution and waste.

#### Strategy

16.106 To contribute to the objective, the subprogramme, inclusive of the Centre for Sustainable Agricultural Mechanization, will employ three main approaches: circular economy-based solutions; nature-based solutions; and governance for environmental transformation. With respect to the first approach, the subprogramme will support the use of optimization tools for resource efficiency; analyse environmental externalities of economic growth patterns; develop policies to reduce waste and to encourage waste to resource and; analyse markets for new low-carbon products. With regard to the second approach, the subprogramme will support member States in protecting, managing sustainably and restoring natural or modified ecosystems that address societal challenges effectively and adaptively, thereby providing benefits for both

human well-being and biodiversity. As regards the third approach, the subprogramme will support integrated and participatory environmental policymaking, such as community-focused financing and systems frameworks, and support the strengthening of engagement and multi-stakeholder partnerships. The subprogramme will also take into account gender-specific considerations such as the participation of women in decision-making processes and the health impacts of environmental issues, with a focus on countries in special situations, and will generate evidence and provide technical support for integrated policymaking and regional cooperation. The subprogramme will integrate sustainable growth in a cross-cutting way to planned activities, including those related to resource efficiency, ecosystem management and participatory environmental policymaking. These approaches will be applied to the three focus areas, namely, strengthening climate action and sustainable resource use, thereby contributing to the achievement of Sustainable Development Goals 1, 2 and 13–15; realizing sustainable urban development, thereby contributing to the achievement of Goal 11; and eliminating pollution and waste, thereby contributing to the achievement of Goals 6, 11 and 12. The work of the subprogramme in all three areas will contribute to achieving Goal 17.

16.107 The subprogramme will support member States in building capacity for ambitious environmental policy, including action for climate empowerment and participation, for the vertical integration of climate action and sustainable resource use among the regional, national, subnational and local levels, including with non-State actors, and for conservation and sustainable use of marine resources. The subprogramme will provide knowledge and capacity-building products on low-carbon and low-emissions sustainable growth solutions, including on-site and online resource efficiency training and toolboxes to assess and analyse ways to accelerate the implementation of nationally determined contribution commitments and to fulfil reporting requirements with regard to the United Nations Framework Convention on Climate Change. The subprogramme will also strengthen regional cooperation to promote the conservation and sustainable use of the oceans, seas and marine resources for sustainable development by providing a participatory, multi-stakeholder dialogue platform through the Asia-Pacific Day for the Ocean, by coordinating the regional implementation of the United Nations Decade of Ocean Science for Sustainable Development to accelerate transformative ocean action and by promoting the implementation of international conventions and region-wide initiatives.

16.108 The subprogramme will help cities to strengthen their urban planning processes, adopt urban resilience strategies, apply appropriate smart technologies and finance urban infrastructure. Building on earlier work, ESCAP will leverage its subregional presence, network partners and intergovernmental platform to increase awareness of sustainable urban solutions, including issues related to infrastructure needs, climate and disaster risk reduction, air pollution and resource consumption. The subprogramme will support member States through capacity-building projects and activities to develop and apply forecasting tools and sustainable urban solutions within the framework of the Penang Platform for Sustainable Urbanization. Specific initiatives, such as the Asia-Pacific Mayors Academy, and other activities aimed at increasing vertical integration will lead to the development of tools and approaches for local authorities to scale up city-based action. Furthermore, the subprogramme will work to reduce air pollution levels, especially in urban areas across the region, by promoting the adoption of recognized clean air measures.

16.109 Lastly, the subprogramme will work to strengthen partnerships and cooperation with relevant United Nations agencies, funds and programmes (including through the regional collaborative platform and the United Nations country teams), other international, regional and subregional organizations, public-private partnerships, community-based organizations, research institutes, associations and

other civil society organizations. The subprogramme will also work closely with other ESCAP subprogrammes to enhance synergy and coherence in relevant areas.

16.110 The subprogramme plans to support member States on issues related to COVID-19 by providing analysis of the impact of and responses to the pandemic and policy advice to the member States to ensure a sustainable recovery in the aftermath. The subprogramme will also factor in its work environmental considerations emerging from the COVID-19 pandemic.

16.111 The above-mentioned work is expected to result in:

- (a) Enhanced action to address climate change and accelerate implementation of the Paris Agreement in Asia-Pacific countries;
- (b) More sustainable and resilient communities and reduced negative impacts of urbanization;
- (c) Development of scenarios, policies and plans to address the risk of air pollution in the region;
- (d) Enhanced action to strengthen conservation and sustainable management of natural resources, biodiversity and ecosystems, including oceans.

16.112 The planned support on issues related to COVID-19 is expected to result in the enhanced capacity of member States to place environmental action at the core of recovery policies that lead to more sustainable and more resilient economies.

## **Programme performance in 2020**

16.113 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Economic and Social Commission for Asia and the Pacific member States identify prerequisites for accelerating action for delivery of the 2030 Agenda in the context of COVID-19**

16.114 Although there have been gains in some areas, the Asia-Pacific region is currently not on track to achieve any of the 17 Sustainable Development Goals by 2030, and environment-related Goals are where progress and reliable data are especially lacking. This urgency to accelerate progress towards achieving the Goals, which was further intensified owing to the impact of the COVID-19 pandemic, underlies the decade of action for the Goals and was the theme and the main thrust of the Seventh Asia-Pacific Forum on Sustainable Development, coordinated by the subprogramme.

16.115 To facilitate focused regional dialogue on accelerated action, the subprogramme coordinated knowledge products and consultations, building on the transformative entry points derived from “Gearing up for a decade and delivery for sustainable development: political declaration of the Sustainable Development Goals Summit” and the *Global Sustainable Development Report 2019*. Specifically, the subprogramme, together with partners, facilitated the development of six entry point profiles and organized consultations on human well-being and capabilities; sustainable and just economies; food systems and nutrition patterns; the enhancement of power grid connectivity to achieve affordable and clean energy for all; urban and peri-urban development; and global environmental commons. The work on those six entry points culminated in policy recommendations for enabling transformative change and accelerating implementation of the 2030 Agenda in the region. The subprogramme also organized the Seventh Asia-Pacific Forum on Sustainable Development to exchange best practices and highlight tangible solutions, which concluded with a

resounding call for countries to revive international cooperation and multi-stakeholder partnerships to accelerate progress towards achieving the Goals amid addressing the socioeconomic impacts of the COVID-19 pandemic. Outcomes of the forum supported the high-level political forum on sustainable development, where the subprogramme, in collaboration with partners, organized a side event entitled “Fast-tracking the Sustainable Development Goals: driving Asia-Pacific transformations”.

*Progress towards the attainment of the objective, and performance measure*

16.116 The above-mentioned work contributed to the objective, as demonstrated by all member States identifying a compelling sense of urgency and direction, adequate and Sustainable Development Goal results-based budgeting and accountability, and rigorous data and monitoring systems as prerequisites for the acceleration of the implementation of the 2030 Agenda. In addition, it was emphasized in the report of the Seventh Asia-Pacific Forum on Sustainable Development that, in order to implement the 2030 Agenda and deliver on the decade of action, a strong, coordinated, inclusive and coherent global response under the multilateral coordination framework was needed (see table 16.15).

Table 16.15  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>
Endorsement of ESCAP regional road map for implementing the 2030 Agenda for Sustainable Development in Asia and the Pacific by the eighteen member countries in the Pacific sub-region in the Pacific Roadmap for Sustainable Development	Participation and engagement from Government, civil society and related stakeholders in identifying best practices for implementation of the 2030 Agenda	Identification by all member States of prerequisites for the acceleration of the implementation of the 2030 Agenda for Sustainable Development in the report on the Seventh Asia-Pacific Forum on Sustainable Development and in inputs provided to high-level political forum on sustainable development

## **Planned results for 2022**

16.117 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: inclusive and integrated policy processes for effective climate action and natural resources management<sup>9</sup>**

#### **Programme performance in 2020**

16.118 The subprogramme has continued to focus on the work related to strengthening climate action and the sustainable use of resources and has assisted countries in developing initiatives that promote climate action and broader engagement. The subprogramme also supported ASEAN countries by providing independent, coherent, authoritative and policy-relevant scientific and evidence-based assessments and

<sup>9</sup> As reflected in the proposed programme budget for 2020 ([A/74/6 \(Sect. 19\)](#)).

recommendations on the sustainable management of natural resources in the ASEAN region, and contributed to advancing national action and regional cooperation on decoupling economic growth from environmental degradation.

16.119 The above-mentioned work contributed to the establishment of the ASEAN Resources Panel by the ASEAN Senior Officials on the Environment, which met the planned target of scenarios, policies, plans or programmes developed by member States to operationalize environment and climate action at different levels, taking into account input from various stakeholders, reflected in the proposed programme budget for 2020. The ASEAN Resources Panel comprises up to 30 experts and scientists, and its workplan is intended to enhance knowledge and analysis on the environment, and natural resources management trends and impacts, and to provide policy recommendations for consultation and uptake by ASEAN member States.

### Proposed programme plan for 2022

16.120 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will support member States in strengthening the science policy interface in the development of scenarios, policies, plans and programmes for environment and climate-related action. The expected progress is presented in the performance measure below (see table 16.16).

Table 16.16  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Absent or limited scenarios, policies, plans or programmes developed by member States to operationalize environment and climate action at different levels, taking into account inputs from various stakeholders	Limited scenarios, policies, plans or programmes strengthened by member States to operationalize environment and climate action at different levels, taking into account inputs from various stakeholders	ASEAN member States approved the establishment of the ASEAN Resources Panel	Increase in the number of scenarios, policies, plans or programmes adopted by member States to implement environment- and climate action-related Sustainable Development Goals at different levels	Thirty scenarios, policies, plans or programmes adopted by member States to implement environment- and climate action-related Sustainable Development Goals at different levels

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: more ambitious nationally determined contributions to meet commitments to the Paris Agreement<sup>10</sup>

### Programme performance in 2020

16.121 The subprogramme has responded to member country requests in support for the voluntary national reviews of nationally determined contributions by strengthening regional collaboration on mitigation of climate change, sustainable

<sup>10</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

urbanization and resource efficiency. Due regard has been shown for gender mainstreaming, including outreach to women and girls.

16.122 The above-mentioned work contributed to the effective review of nationally determined contributions processes and the revision of the contributions of Mongolia and Myanmar, which met the planned target of scenarios, policies, plans or programmes being developed by member States to operationalize environment and climate action at different levels, including gender mainstreaming, reflected in the programme budget for 2021. The review was considered effective because Mongolia had updated its nationally determined contribution as a result of the process and Myanmar had advanced the revised nationally determined contribution and prepared it for approval by the Government by December 2020.

### Proposed programme plan for 2022

16.123 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will focus on enhancing knowledge and analysis on the environment, and natural resources use and management trends and impacts in the region, developing specific policy recommendations to enhance the governance of natural resources and the environment and enhancing technical capacities of member countries to improve effective natural resource management policies. The expected progress is presented in the performance measure below (see table 16.17).

Table 16.17  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
A memorandum of understanding signed by ESCAP and the secretariat of the United Nations Framework Convention on Climate Change, the Kyoto Protocol and the Paris Agreement to strengthen regional climate action, with a focus on meeting the targets of the 2030 Agenda and the Paris Agreement of 2015	A set of pathways charted as the outcome of Asia-Pacific Climate Week 2019 and as a contribution to the 2019 Climate Action Summit, including energy transition; industry transition; resilience and adaptation; nature-based solutions; transport; infrastructure, cities and local action; enhancing ambition; low carbon and climate resilient development; and access to finance	Mongolia and Myanmar conducted an effective review of their nationally determined contributions processes and Mongolia updated its contribution	With the support of ESCAP, plans updated and revised by at least two countries to make their commitments to nationally determined contributions more ambitious	Plans updated and revised by two additional countries to make their commitments to nationally determined contributions more ambitious

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

**Result 3: member States strengthen regional cooperation on natural resource management, adopt sustainable urban development pathways and develop climate and air pollution mitigation actions**

**Proposed programme plan for 2022**

16.124 To support the Asia-Pacific region in the achievement of Sustainable Development Goals on climate action, clean water, responsible production and consumption and life below water, the subprogramme convened the sixth session of the Committee on Environment and Development to leverage a multitrack programme of engagement, including consideration of environmental solutions to accelerate the implementation of the 2030 Agenda for climate change, ecosystem health and clean air and cities for a sustainable future. The Committee decided to establish a technical expert group on environment and development to enhance regional exchange and to mobilize technical expertise in support of the Commission's efforts to accelerate environmental and sustainable development action.

*Lessons learned and planned change*

16.125 The lesson for the subprogramme was that the COVID-19 pandemic highlighted the need to reflect the close link between the preservation of the environment and healthy human populations in its capacity-building and technical assistance support for member States. In applying the lesson, the subprogramme will coordinate exchanges and capacity-building activities on the basis of integrated approaches that link healthy environments and healthy human societies and good policy practices for a sustainable and resilient recovery from the pandemic.

*Expected progress towards the attainment of the objective, and performance measure*

16.126 This work is expected to contribute to the objective, as demonstrated by the enhanced access of member States to technical expertise and capacity-building activities under the substantive coordination of the technical expert group on environment and development, to accelerate environmental and sustainable development action. (see table 16.18).

Table 16.18  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
Member States call for expanding partnerships for sustainable development at the regional level, including in the area of climate change, at the Fifth Asia-Pacific Forum on Sustainable Development	Asia-Pacific Climate Week 2019 identifies pathways for climate action in the region, and its outcome contributes to the 2019 Climate Action Summit	The Committee on Environment and Development decided to establish the technical expert group on environment and development to enhance regional exchange and to mobilize technical expertise to accelerate environmental and sustainable development action	The technical expert group on environment and development is operational with full membership and a workplan	Member States have enhanced access to technical expertise and capacity-building activities under the substantive coordination of the technical expert group on environment and development to accelerate environmental and sustainable development action

## Legislative mandates

16.127 The list below provides all mandates entrusted to the subprogramme.

### General Assembly resolutions

71/222	International Decade for Action, “Water for Sustainable Development”, 2018–2028	75/212	United Nations Conference on the Midterm Comprehensive Review of the Implementation of the Objectives of the International Decade for Action, “Water for Sustainable Development”, 2018–2028
71/256	New Urban Agenda		
74/212	International Day of Clean Air for blue skies	75/220	Harmony with Nature
		75/222	Combating sand and dust storms

### Economic and Social Council resolutions

2013/19	Conclusion of the work of the Commission on Sustainable Development	2017/24	Human settlements
---------	---	---------	-------------------

### Economic and Social Commission for Asia and the Pacific resolutions

70/11	Implementing the outcome of the Asia-Pacific Forum on Sustainable Development	72/9	Regional cooperation to promote the conservation and sustainable use of the oceans, seas and marine resources for sustainable development in Asia and the Pacific
70/12	Strengthening efforts on human settlements and sustainable urban development for the Asia-Pacific region	73/5	Strengthening Asia-Pacific’s support for the United Nations Conference to Support the Implementation of Sustainable Development Goal 14
71/9	Strengthening cooperation on sustainable management of water resources in Asia and the Pacific	74/4	Implementation of the Ministerial Declaration on Environment and Development for Asia and the Pacific, 2017
72/2	Statute of the Centre for Sustainable Agricultural Mechanization	75/4	Strengthening regional cooperation to tackle air pollution challenges in Asia and the Pacific

## Deliverables

16.128 Table 16.19 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 16.19

### Subprogramme 4: deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned

25. Publication on progress towards sustainable urbanization in Asia-Pacific	—	—	1	—
<b>Technical materials (number of materials)</b>	<b>4</b>	<b>4</b>	<b>5</b>	<b>4</b>
26. Documents on the environment and development (policy briefs, knowledge products and case studies)	1	1	3	1
27. Documents on agricultural machinery	3	3	2	3

#### C. Substantive deliverables

**Consultation, advice and advocacy:** support for working groups on environment and development, including the Issue-based Coalition on Climate Change Mitigation; advisory support for task forces and regional initiatives on UN-Water and sustainable urban development; advisory support for the task forces of ESCAP Sustainable Business Network; and advisory support for the United Nations Special Programme for the Economies of Central Asia Working Group on Water, Energy and Environment.

**Databases and substantive digital materials:** e-learning courses on environment and implementation of the 2030 Agenda for regional and global access; and substantive blog posts for the ESCAP website for regional and global access.

#### D. Communication deliverables

**Outreach programmes, special events and information materials:** information material on agricultural mechanization; observances of United Nations international days, including special events on sustainable urban development and environment and development; and press interviews for major publications and events.

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>External and media relations:</b> press releases and op-ed articles on the work and activities of the subprogramme.				
<b>Digital platforms and multimedia content:</b> regular, typically monthly, updating and maintenance of ESCAP web pages of the subprogramme in three areas, including safeguarding natural resources, cities for a sustainable future, and green growth; and input for ESCAP social media platforms.				

## Subprogramme 5

### Information and communications technology and disaster risk reduction and management

#### Objective

16.129 The objective, to which this subprogramme contributes, is to strengthen ICT, space technology applications and disaster risk reduction and management for resilient and sustainable development in Asia and the Pacific through regional cooperation and sharing of best practices.

#### Strategy

16.130 To contribute to the objective, the subprogramme will support member States by developing norms for inclusive digital connectivity, geospatial data-sharing and disaster resilience-building, supported by policy analysis and evidence-based research. In addition, capacity-building activities will be anchored in regional cooperation mechanisms that promote technical cooperation through South-South and North-South modalities and will be augmented by the programmes of the Asian and Pacific Training Centre for Information and Communication Technology for Development and the Asian and Pacific Centre for the Development of Disaster Information Management. The subprogramme also plans to promote regional policy dialogue and cooperation through expert group meetings on transboundary challenges related to connectivity and disaster risks, including those related to climate change and extreme weather events. The work of the subprogramme is expected to contribute to the achievement of all the Sustainable Development Goals, in particular, Goals 1, 4, 5, 9–11, 13–15 and 17.

16.131 The subprogramme also plans to promote building back better<sup>11</sup> with resilience, through implementation of the Asia-Pacific Information Superhighway initiative. In this context, the subprogramme will carry out diagnostic studies on the digital divide, assess policy and regulatory frameworks and provide gap analysis and policy recommendations, supplemented by advocacy, networking and partnerships in support of the regionally agreed framework.

16.132 The subprogramme will also continue to assist member States in harnessing the most recent advances in space technology applications and geospatial data. The subprogramme will facilitate timely and expanded access to space-derived geospatial data; pool expertise and resources at the regional and subregional levels; promote the sharing of knowledge and good practices; and create synergies with other existing regional initiatives. The work of the subprogramme will be anchored to regional cooperation mechanisms on regional space applications, drought monitoring and early

<sup>11</sup> In support of the Sendai Framework for Disaster Risk Reduction 2015–2030, priority 4: enhancing disaster preparedness for effective response and to “build back better” in recovery, rehabilitation and reconstruction.

warning, and geospatial information management. Implementation in this area will be guided by the Ministerial Declaration on Space Applications for Sustainable Development in Asia and the Pacific and the Asia-Pacific Plan of Action on Space Applications for Sustainable Development (2018–2030).

16.133 The subprogramme will further augment and leverage regional cooperation through the implementation of the activities of the Asia-Pacific Disaster Resilience Network and the ESCAP Multi-Donor Trust Fund for Tsunami, Disaster and Climate Preparedness in Indian Ocean and Southeast Asian Countries, complemented by improved disaster information management through the services delivered by the Asian and Pacific Centre for the Development of Disaster Information Management.

16.134 In order to achieve its objective, the subprogramme will collaborate with relevant United Nations agencies, funds and programmes, including through the regional collaborative platform, international, regional and subregional organizations, regional development banks, community-based organizations, research institutes, associations and other civil society organizations.

16.135 The subprogramme plans to support member States on issues related to COVID-19 by strengthening human and institutional capacity to build back better with resilience. In particular, the subprogramme, inclusive of its regional institutions, will provide assistance in the advancement of digital transformations, the use of innovative geospatial data applications and the provision of targeted solutions for the special needs of countries that face a high disaster risk.

16.136 The above-mentioned work is expected to result in:

- (a) Improved cross-border broadband Internet and infrastructure connectivity;
- (b) Strengthened Internet traffic management in the most disconnected countries of the region;
- (c) Improved e-resilience and the cross-border interoperability of ICT networks that support disaster risk reduction and resilience;
- (d) More reliable, resilient and affordable broadband for all;
- (e) The anticipation of and reduction in disaster risks through improved intercountry sharing and interoperability of geospatial data, and early warning systems, especially for slow-onset disasters in high-risk and low-capacity developing countries.

16.137 The planned support on issues related to COVID-19 is expected to result in:

- (a) Promotion of a common understanding of the principles of geospatial data-sharing in the context of pandemics and of mapping pandemic risk hotspots, and enhancement of the interoperability of data across sectors through the development of common data formats;
- (b) Increased capacity of member States to bring broadband to all and to bolster network capacity for e-resilience in times of crisis-led surges in demand.

## **Programme performance in 2020**

16.138 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Enhancement of the capacity of countries to “build back better” in recovery, rehabilitation and reconstruction**

16.139 In 2020, the subprogramme continued its work on promoting the use of space applications to help countries to benefit from several regional mechanisms that have allowed policymakers, practitioners and scientists across the region to use and leverage satellite-derived data without needing a space programme of their own.

16.140 In the publication *Geospatial Practices for Sustainable Development in Asia and the Pacific 2020: A Compendium*, the subprogramme collected and documented more than 100 examples of good practices relating to space policies and legislation across Asia-Pacific, with the objective of raising awareness of the benefits and barriers to having access to space applications. The Compendium provides policymakers with guidance on how to replicate or tailor specific applications for different country contexts to achieve sustainable development across various sectors. Furthermore, it supports the streamlining of regional needs assessments and helps to match each country’s experiences with the needs for regional cooperation of other countries.

16.141 The subprogramme facilitated the regional sharing of georeferenced big data, the analysis of geospatial and temporal interlinkages and the understanding of risk correlations between COVID-19 and socioeconomic sectors (health, finance, connectivity, education, energy and safety). Two webinars were organized to support policymakers in addressing the question of how space technology applications could best be utilized to address the COVID-19 outbreak and potential future pandemics through enhanced regional cooperation and their role in monitoring and analysing the impact of COVID-19, as well as supporting response and recovery efforts.

#### *Progress towards the attainment of the objective, and performance measure*

16.142 The above-mentioned work contributed to the objective, as demonstrated by the implementation of the Asia-Pacific Plan of Action on Space Applications for Sustainable Development (2018–2030) at the country and subregional levels, including the establishment of an operational platform for enhanced capacity of Central Asian countries under the Regional Cooperative Mechanism for Drought Monitoring and Early Warning and the integration and application of ground-derived and space-derived data for effective monitoring of air pollution (see table 16.20).

**Table 16.20**  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>
Member States adopted the Asia-Pacific Plan of Action on Space Applications for Sustainable Development (2018–2030), a needs-driven blueprint that harnesses space and geospatial applications, as well as digital innovations, to support countries, in particular those with special needs, in achieving the 2030 Agenda	Member States gained access to training materials and tools to enhance the use of space applications in line with needs identified through the Plan of Action	Implementation of the Plan of Action at the country and subregional levels, including the establishment of an operational platform for enhanced capacity of Central Asian countries under the Regional Cooperative Mechanism for Drought Monitoring and Early Warning and the integration and application of ground-derived and space-derived data for effective monitoring of air pollution

## Planned results for 2022

16.143 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: advanced subregional implementation of the Asia-Pacific Information Superhighway<sup>12</sup>**

#### **Programme performance in 2020**

16.144 The subprogramme prepared technical papers, including in-depth studies on the co-deployment of information and communications infrastructure with transport and energy infrastructure for specific countries and subregions. The subprogramme also organized the third session of the Committee on Information and Communications Technology, Science, Technology and Innovation, at which member States deliberated on bridging the digital divide for inclusive broadband access. Furthermore, the subprogramme organized the fourth session of the Asia-Pacific Information Superhighway Steering Committee, at which participants reviewed the progress made on the subregional implementation of the Master Plan for the Asia-Pacific Information Superhighway and discussed the future direction for the next phase of its implementation (2022–2026).

16.145 The subprogramme continued its work on promoting inclusive regional broadband connectivity. Progress was also made on the establishment of carrier-neutral Internet exchange points in the Pacific island economies that will increase intraregional content exchange and improve the reliability, quality and cost of Internet connectivity. An in-depth study determined the technical feasibility of such a proposal, and consultations with the Pacific island economies are now under way on establishing the operational modalities.

16.146 The above-mentioned work contributed to the development and implementation of eight broadband network initiatives within the subregional implementation plans for the Asia-Pacific Information Superhighway, which met the planned target reflected in the proposed programme budget for 2020.

#### **Proposed programme plan for 2022**

16.147 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will support the preparation of the action plan for the next phase of implementation of the Master Plan for the Asia-Pacific Information Superhighway, 2022–2026, for the consideration of and adoption by the Steering Committee at its fourth session, in 2022. This will lead to strengthened and sustained regional cooperation in broadband connectivity through the Asia-Pacific Information Superhighway initiative beyond 2021. The expected progress is presented in the performance measure below (see figure 16.III).

<sup>12</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 19)).

Figure 16.III

**Performance measure: total number of broadband network initiatives developed and implemented within subregional implementation plans for the Asia-Pacific Information Superhighway (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: accelerating regional policy coordination for risk-informed and climate-resilient development<sup>13</sup>**

### **Programme performance in 2020**

16.148 The subprogramme has worked on operationalizing the Asia-Pacific Disaster Resilience Network through its various activities. In conjunction with the World Meteorological Organization (WMO), the regional climate outlook forums in Asia and the Pacific and other stakeholders of climate services, the subprogramme has been developing an impact-based forecasting methodology based on seasonal consensus forecast products. The subprogramme produced a policy study on protecting the most vulnerable to cascading risks from climate extremes and COVID-19 in South Asia and an impact-based forecasting methodology paper for the seventeenth session of the South Asian Climate Outlook Forum. The subprogramme also co-organized the sixteenth session of the Forum on Regional Climate Monitoring, Assessment and Prediction for Asia, at which participants reviewed the progress made in climate monitoring and prediction, focusing on seasonal to inter-annual climate prediction methodologies and systems, and discussed climate impacts and services. Furthermore, the subprogramme published the second edition of *Ready for the Dry Years: Resilience to Drought in South-East Asia*, directly contributing to ASEAN policymaking processes. The subprogramme also implemented a series of capacity development activities, including a webinar series, addressing the growing risk of the disaster-climate-health nexus, hazard complexities and the cascading disasters that are occurring in the context of the COVID-19 pandemic. The subprogramme has also extended technical support to countries, which has resulted in improved risk knowledge and availability of risk information and the mobilization of ESCAP member States and partner institutions to support specific priorities of the ASEAN

<sup>13</sup> As reflected in the programme budget for 2021 ([A/75/6/Add.1](#)).

Agreement on Disaster Management and Emergency Response and of other subregions.

16.149 The above-mentioned work contributed to 10 initiatives by member States for improving disaster resilience, which met the planned target reflected in the programme budget for 2021.

### **Proposed programme plan for 2022**

16.150 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to prioritize its efforts with regard to transboundary river basin floods and slow-onset disasters (drought, desertification and sand and dust storms). The subprogramme will also continue to work on promoting the inclusion and empowerment of at-risk communities in disaster risk hotspots; improving disaster risk information and knowledge and promoting regional cooperation to reduce the risk of transboundary hazards; capitalizing on existing multi-tier partnership networks to build regional cooperation with regard to slow-onset disasters and floods; and promoting solutions through the uptake of innovative technology applications. The expected progress is presented in the performance measure below (see figure 16.IV).

Figure 16.IV

**Performance measure: total number of initiatives for improving disaster resilience (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: bridging development divides through accelerated access to affordable and resilient digital connectivity**

#### **Proposed programme plan for 2022**

16.151 According to International Telecommunication Union (ITU) statistics, approximately 5 per cent of the population in Asia and the Pacific has no access to the Internet. Of those that have Internet access, it is estimated that some two thirds are underconnected, with lower-income and geographically remote countries remaining the most disconnected and benefiting the least from the transformative

opportunities for sustainable development that have benefited billions of people in the region.

16.152 Given that all aspects of daily life have moved to digital formats during the COVID-19 pandemic, evidence is mounting that the digital divide is accentuating development gaps. Inequalities between rural and urban areas, knowledge gaps between children with and without Internet access and rising unemployment among the poor threaten to reverse the development gains made over the past two decades.

16.153 The subprogramme continued to support member States in line with the four pillars of the Asia-Pacific Information Superhighway initiative, namely, infrastructure connectivity, efficient Internet traffic and network management, e-resilience and affordable broadband access for all. For example, the subprogramme further strengthened capacities in Kazakhstan, Kyrgyzstan and Mongolia to develop relevant policies and mechanisms for infrastructure connectivity, including co-deployment opportunities across the energy, transport and ICT sectors. To enhance the capacity of member States to implement national strategies for improving the efficiency of Internet traffic management between Pacific island countries and between the Pacific and Asia, the subprogramme conducted working group meetings and capacity training on operational modalities for Internet exchange points.

#### *Lessons learned and planned change*

16.154 The lesson for the subprogramme was that no fully exhaustive risk assessment or forecasting had been carried out to analyse the possible impact of a crisis such as the COVID-19 pandemic on Internet dependence and usage, as well as on the existing digital divide. In applying the lesson, the subprogramme will seek ways to incorporate experiences of the pandemic into the next phase of the Master Plan for the Asia-Pacific Information Superhighway while accelerating the implementation of the initiative, including through the newly established working groups for improving the efficiency of Internet traffic management in countries in special situations (Pacific island countries, Cambodia, Lao People's Democratic Republic, Myanmar and Viet Nam). In 2022, the subprogramme will also provide analytical products and facilitate intergovernmental deliberations on progress towards bridging the digital divide for inclusive broadband access. The member States will review and discuss this progress during the fourth session of the Committee on Information and Communications Technology, Science, Technology and Innovation. The work of the subprogramme will support the development of a new action plan for the next phase of the Asia-Pacific Information Superhighway, which will be discussed at the sixth session of the Steering Committee.

#### *Expected progress towards the attainment of the objective, and performance measure*

16.155 This work is expected to contribute to the objective, as demonstrated by declining monthly expenditure in Asia-Pacific on fixed and mobile broadband subscriptions as a percentage of gross national income per capita (see figure 16.V).

Figure 16.V

**Performance measure: monthly expenditure in Asia-Pacific on fixed and mobile broadband subscriptions as a percentage of gross national income per capita**

## Legislative mandates

16.156 The list below provides all mandates entrusted to the subprogramme.

### *General Assembly resolutions*

<a href="#">70/125</a>	Outcome document of the high-level meeting of the General Assembly on the overall review of the implementation of the outcomes of the World Summit on the Information Society	<a href="#">74/229</a>	Science, technology and innovation for sustainable development
		<a href="#">75/124</a>	International cooperation on humanitarian assistance in the field of natural disasters, from relief to development
<a href="#">74/82</a>	International cooperation in the peaceful uses of outer space	<a href="#">75/202</a>	Information and communications technologies for sustainable development
<a href="#">74/115</a>	International cooperation on humanitarian assistance in the field of natural disasters, from relief to development	<a href="#">75/216</a>	Disaster risk reduction
		<a href="#">75/222</a>	Combating sand and dust storms

### *Economic and Social Council resolutions*

<a href="#">2015/14</a>	Strengthening of the coordination of emergency humanitarian assistance of the United Nations	<a href="#">2018/14</a>	Strategic Framework on Geospatial Information and Services for Disasters
<a href="#">2015/31</a>	Establishment of the Asian and Pacific Centre for the Development of Disaster Information Management	<a href="#">2019/24</a>	Assessment of the progress made in the implementation of and follow-up to the outcomes of the World Summit on the Information Society
<a href="#">2016/27</a>	Strengthening institutional arrangements on geospatial information management		

### *Economic and Social Commission for Asia and the Pacific resolutions*

<a href="#">71/12</a>	Strengthening regional mechanisms for the implementation of the Sendai Framework for Disaster Risk Reduction 2015–2030 in Asia and the Pacific	<a href="#">72/7</a>	Regional cooperation to combat sand and dust storms in Asia and the Pacific
-----------------------	--	----------------------	---

72/10	Regional review of the implementation of the World Summit on the Information Society action lines	74/6	Advancing disaster-related statistics in Asia and the Pacific
72/11	Advancing disaster-related statistics in Asia and the Pacific for implementation of internationally agreed development goals	75/5	Implementation of the Ulaanbaatar Declaration of the 2018 Asian Ministerial Conference on Disaster Risk Reduction
73/3	Advancing integrated and seamless connectivity for sustainable development in Asia and the Pacific	75/6	Implementation of the Ministerial Declaration on Space Applications for Sustainable Development in Asia and the Pacific and the Asia-Pacific Plan of Action on Space Applications for Sustainable Development (2018–2030)
73/7	Enhancing regional cooperation for the implementation of the Sendai Framework for Disaster Risk Reduction 2015–2030 in Asia and the Pacific	75/7	Advancing the implementation of the Asia-Pacific Information Superhighway initiative through regional cooperation

## Deliverables

16.157 Table 16.21 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 16.21

### Subprogramme 5: deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>5</b>	<b>10</b>	<b>5</b>	<b>7</b>
1. Reports for ESCAP	1	2	3	1

15. Expert group meetings on the Asia-Pacific Information Superhighway	4	—	—	4
16. Expert group meetings on disaster risk reduction	—	—	4	—
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>6</b>	<b>10</b>	<b>6</b>	<b>6</b>
17. Capacity-building projects on disaster information management	1	1	1	1
18. Capacity-building projects on disaster risk reduction	2	2	2	2
19. Capacity-building projects on ICT	2	2	2	2
20. Capacity-building projects on space technology applications	1	5	1	1
<b>Seminars, workshops and training events</b> (number of days)	<b>14</b>	<b>14.5</b>	<b>14</b>	<b>10</b>
21. Training events on ICT	14	14.5	14	10
<b>Publications</b> (number of publications)	<b>1</b>	<b>1</b>	<b>1</b>	<b>4</b>
22. Publications on disaster risk management	1	1	1	2
23. Publication on geospatial practices for sustainable development in South-East Asia	—	—	—	1
24. Publication on digital transformation for sustainable development	—	—	—	1
<b>Technical materials</b> (number of materials)	<b>9</b>	<b>14</b>	<b>8</b>	<b>6</b>
25. Technical papers on disaster information management	1	1	—	2
26. Technical papers on disaster risk reduction	1	5	—	1
27. Technical papers on ICT	6	6	6	2
28. Technical paper on infrastructure resilience	—	—	1	—
29. Technical papers on geospatial information applications	1	2	1	1
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> support for working groups on disaster risk reduction and resilience, including the Issue-Based Coalition on Building Resilience; advisory support for the task forces of the ESCAP Sustainable Business Network; advisory support for committees and organizations on issues related to disaster risk reduction, space applications and ICT.				
<b>Databases and substantive digital materials:</b> guidelines on space technology applications for regional and global access; guidelines for the development and management of disaster information databases and spatial data infrastructure; substantive blog posts for the ESCAP website for regional and global access.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> briefing notes and case studies on ICT; brochures on disaster information management; press interviews for major publications and events.				
<b>External and media relations:</b> press releases and op-ed articles on the work and activities of the subprogramme.				
<b>Digital platforms and multimedia content:</b> regular, typically monthly, updating of content for the Asian and Pacific Training Centre for Information and Communication Technology for Development Virtual Academy and the online presence of the Asian and Pacific Centre for the Development of Disaster Information Management; regular, typically monthly, updating and maintenance of web pages of the subprogramme for the ESCAP website in seven areas, including the Asia-Pacific Information Superhighway, building resilience to disasters, e-resilience, regional cooperation in disaster risk reduction, monitoring drought from space, integration of geospatial information for resilience-building, and space and geospatial information systems for disaster management; regular, typically monthly, updating and maintenance of the website of the Asian and Pacific Centre for the Development of Disaster Information Management; inputs for ESCAP social media platforms; operationalization of the disaster information portal of the Asian and Pacific Centre for the Development of Disaster Information Management.				

## **Subprogramme 6**

### **Social development**

#### **Objective**

16.158 The objective, to which this subprogramme contributes, is to realize inclusive and equitable societies that protect, empower and leave no one behind in Asia and the Pacific, with a focus on population and development, social protection, disability, and gender equality and the empowerment of women.

#### **Strategy**

16.159 To contribute to the objective, the subprogramme, in close collaboration with relevant partners, including the United Nations Population Fund, the International Labour Organization (ILO) and the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women), will bring together Governments on critical issues related to social development in the region. These intergovernmental processes will be informed by analysis and will draw upon the complementary strengths of ESCAP in terms of its regional convening power and the capacity of United Nations agencies, funds and programmes to support national implementation to advance the Sustainable Development Goals.

16.160 The subprogramme will strengthen the evidence base with regard to population and development issues, with a focus on ageing, migration and population dynamics, poverty reduction and leaving no one behind, so as to support Governments in the further implementation of the Programme of Action of the International Conference on Population and Development. The subprogramme will facilitate the monitoring of the implementation of the Asian and Pacific Ministerial Declaration on Population and Development through the framework that was endorsed at the sixth session of the Committee on Social Development. This work will help member States to make progress towards the achievement of Sustainable Development Goals 1, 3–5, 8, 10 and 17.

16.161 The subprogramme will continue to provide support to member States in identifying the population groups that are at the highest risk of being left behind through its newly developed Leave No One Behind methodology, analytical reports, capacity-building and training. In line with the Action Plan to Strengthen Regional Cooperation on Social Protection in Asia and the Pacific, the subprogramme will consolidate national progress and experiences with regard to extending social protection coverage in periodic progress reports; develop a regional platform for member States to share good practices, capacity development tools and training sessions; and provide new and innovative analytical tools and products and capacity development to Governments. This work will help member States to make progress towards the achievement of Sustainable Development Goals 1, 3, 5, 8, 10 and 17.

16.162 The subprogramme will be guided by the Convention on the Rights of Persons with Disabilities and the Incheon Strategy to “Make the Right Real” for Persons with Disabilities in Asia and the Pacific. The subprogramme will conduct research and analysis and provide capacity-building support to member States on building disability-inclusive societies and will support other subprogrammes in mainstreaming disability inclusion. This work will help member States to make progress towards the achievement of Sustainable Development Goals 1, 4, 8, 10, 11 and 17.

16.163 The subprogramme will also continue to follow up on the outcomes of the Asia-Pacific regional 25-year review of the implementation of the Beijing Declaration and Platform for Action (Beijing+25), by supporting Governments in accelerating the

implementation of the Beijing Declaration and Platform for Action. The subprogramme will provide technical assistance in developing gender-responsive policies in the context of economic empowerment and entrepreneurship for women and will support other subprogrammes in mainstreaming gender. This work will help member States to make progress towards the achievement of Sustainable Development Goals 1, 5, 8, 10 and 17.

16.164 The subprogramme plans to support member States on issues related to COVID-19, such as mitigating the adverse effects of the pandemic on the economic empowerment of women, including by assisting them in bridging gaps in the legal framework for micro-, small and medium-sized enterprises and in designing strategies and policy provisions specific to women-led micro-, small and medium-sized enterprises to help them to recover from the shocks induced by COVID-19. The subprogramme will deliver this support through knowledge products, seminars and technical advice to the institutions and stakeholders concerned.

16.165 The above-mentioned work is expected to result in:

- (a) The development of regional frameworks for social development;
- (b) The development of responsive policies and programmes in the domain of population dynamics and social development;
- (c) Enhanced skills and knowledge to enable countries to design and implement inclusive social protection policies;
- (d) Support for national policies and strategies to advance gender equality and women's empowerment, including gender-sensitive business development and investment policies and programmes;
- (e) Improved national policies and programmes in support of disability-inclusive development.

16.166 The planned support on issues related to COVID-19 is expected to result in the design and implementation of inclusive strategies by member States to recover from the shocks caused by COVID-19.

## **Programme performance in 2020**

16.167 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Inclusive national policies in the area of gender equality and empowerment of women**

16.168 The subprogramme convened an expert group meeting in September 2020 to advance the implementation of the Asia-Pacific Declaration on Advancing Gender Equality and Women's Empowerment of 2019. In addition, two subregional meetings were convened in order to encourage policy dialogue, capacity-building and networking for stakeholders from relevant key ministries and national women's machineries. The events facilitated the exchange of knowledge, good practices and lessons learned by stakeholders in the progressive implementation of commitments made at the 25-year review of the implementation of the Beijing Declaration and Platform for Action in the context of the COVID-19 pandemic. Key recommendations were formulated to realize the ambitions of the Beijing Declaration and Platform for Action and the 2030 Agenda.

16.169 The subprogramme also supported six countries (Bangladesh, Cambodia, Fiji, Nepal, Samoa and Viet Nam) in accelerating their efforts towards advancing gender equality and women's economic empowerment through the project entitled Catalyzing Women's Entrepreneurship. The subprogramme assisted policymakers and regulators in developing gender-sensitive policies for micro-, small and medium-sized enterprises that included special provisions for women entrepreneurs. It provided capacity-building support to establish an interministerial and multi-stakeholder platform to foster an enabling policy and business environment for entrepreneurship by women in the target countries. Furthermore, the subprogramme partnered with several government bodies across the six countries, promoting inclusive entrepreneurship in various strategic areas. Technical assistance and tools tailored to specific country contexts were provided through policy dialogues, expert group meetings and other capacity development initiatives.

*Progress towards the attainment of the objective, and performance measure*

16.170 The above-mentioned work contributed to the objective, as demonstrated by the implementation in Viet Nam of a national policy to support women-owned micro-, small and medium-sized enterprises affected by the COVID-19 pandemic, and the establishment in Cambodia of the Women's Entrepreneurship Development Centre, both of which supported the achievement of the aims that emerged from the 25-year review of the implementation of the Beijing Declaration and Platform for Action (see table 16.22).

Table 16.22  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
19 countries agreed on key strategies to empower rural women and girls at the Asia-Pacific high-level meeting for the sixty-second session of the Commission on the Status of Women	Adoption of a ministerial declaration at the Beijing+25 Review including a call to intensify actions to realize the equal rights of women for an equal future by 2030	Two member States (Cambodia and Viet Nam) took policy action towards the achievement of the aims that emerged from the Beijing+25 Review

## **Planned results for 2022**

16.171 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: inclusive national policies to protect and empower vulnerable and marginalized groups<sup>14</sup>**

#### **Programme performance in 2020**

16.172 The subprogramme has focused on the realization of inclusive and equitable societies that empower, protect and leave no one behind. In the area of migration and population ageing, the subprogramme supported the Asia-Pacific Regional Review of Implementation of the Global Compact for Safe, Orderly and Regular Migration. As part of preparations for the Review, ESCAP and the Regional United Nations Network on Migration for Asia and the Pacific collaborated on the *Asia-Pacific Migration*

<sup>14</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 19)).

*Report 2020*, including the organization of an expert group meeting on how to tailor the report for maximum impact to benefit migrants, especially the most vulnerable. A special chapter is focused on the impact of COVID-19 on migrants and their families. Consultations with relevant stakeholders began on the Review to ensure that the whole-of-society approach was followed in reviewing the implementation of the Global Compact.

16.173 In the area of disability, the subprogramme developed policy guidance and organized a regional web-based forum on formulating disability-inclusive responses to COVID-19 at the onset of the pandemic, to provide timely technical support to ESCAP member States in protecting and empowering persons with disabilities during the pandemic. Subsequently, the subprogramme convened the sixth session of the Working Group on the Asian and Pacific Decade of Persons with Disabilities, 2013–2022, for representatives of Governments and civil society organizations to provide updates on efforts and share experiences in progress towards disability inclusion, including initiatives to support and empower persons with disabilities in the context of the COVID-19 pandemic, and to discuss the preparatory process for the conclusion of the Decade. At the session, three ESCAP member States (Bangladesh, China and Samoa) reported on progress in developing disability-inclusive COVID-19 responses, all of which were in alignment with the ESCAP policy guidance on the topic. A policy paper on promoting employment for persons with disabilities in the Asia-Pacific region was prepared and disseminated to ESCAP members and associate members. The ESCAP secretariat also provided technical support for the development of the monitoring and evaluation framework of the ASEAN Enabling Masterplan 2025: Mainstreaming the Rights of Persons with Disabilities.

16.174 The above-mentioned work contributed to the development and implementation of evidence-informed socially inclusive policies by three ESCAP member States (Bangladesh, China and Samoa) to ensure that no one was left behind, in particular in the context of the COVID-19 pandemic, which met the planned target reflected in the proposed programme budget for 2020.

### **Proposed programme plan for 2022**

16.175 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will support the implementation of the Global Compact for Safe, Orderly and Regular Migration and the Madrid International Plan of Action on Ageing, as well as the Incheon Strategy to “Make the Right Real” for Persons with Disabilities in Asia and the Pacific and the Beijing Declaration, including the Action Plan to Accelerate the Implementation of the Incheon Strategy. The expected progress is presented in the performance measure below (see table 16.23).

**Table 16.23**  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
ESCAP member States with limited capacity to address inequality and marginalized groups through policies	ESCAP member States identify priority areas for country-specific policies for population groups that are left behind, including by	Three ESCAP member States developed and implemented evidence-informed socially inclusive policies to ensure that no one was left	At least six ESCAP member States adopt and implement policies that realize inclusive and equitable societies that protect,	Three additional ESCAP member States adopt and implement policies that realize inclusive and equitable societies that protect,

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
	developing solid evidence bases	behind, in particular in the context of the COVID-19 pandemic	empower and leave no one behind	empower and leave no one behind

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: developing and implementing a modality for strengthening regional cooperation on social protection in Asia and the Pacific<sup>15</sup>**

### **Programme performance in 2020**

16.176 To contribute to the realization of inclusive national policies to protect and empower vulnerable and marginalized groups, the subprogramme provided innovative analytical support on leaving no one behind to the Governments of five member States (Cambodia, Kyrgyzstan, Nepal, Thailand and Turkmenistan), primarily through resident coordinator offices and United Nations country teams. The subprogramme's technical input was incorporated into common country assessments and joint programmes developed by United Nations country teams; this ensured that concerted support for the member States was based on the most recent available data and up-to-date and targeted technical expertise on leaving no one behind. The analysis used nationally representative household surveys to identify the groups that were furthest behind in terms of access to various opportunities, including in health, education and nutrition, on the basis of the shared circumstances of these groups, relating, for example, to gender, residence and wealth. The subprogramme has recently incorporated vulnerabilities related to the COVID-19 pandemic in this analysis.

16.177 The subprogramme also helped to enhance the skills of policymakers with regard to designing and implementing inclusive social protection policies, convened the second strategic dialogue on social protection and continued to expand and develop the Social Protection Toolbox. Furthermore, in 2020, the theme of the publication *Social Outlook for Asia and the Pacific* was "The Protection We Want"; the publication contains tailored recommendations on ways in which countries with different coverage levels can achieve social protection for all. The subprogramme also launched a regional review of social protection policies and measures introduced to alleviate the impacts of the pandemic on the most vulnerable population groups.

16.178 The subprogramme also worked with experts to develop the Action Plan to Strengthen Regional Cooperation on Social Protection in Asia and the Pacific, which was endorsed by the Committee on Social Development at its sixth session and includes actions for closer regional cooperation in the development and implementation of inclusive social protection systems.

16.179 The above-mentioned work contributed to the adoption of the Action Plan to Strengthen Regional Cooperation on Social Protection in Asia and the Pacific, which met the planned target of adoption of the regional modality on social protection by Asia-Pacific countries at the sixth session of the Committee on Social Development, reflected in the programme budget for 2021.

<sup>15</sup>As reflected in the programme budget for 2021 ([A/75/6/Add.1](#)).

### Proposed programme plan for 2022

16.180 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will provide technical advice and capacity-building support to member States on strengthening their social protection systems, in line with their national priorities and guided by the Action Plan to Strengthen Regional Cooperation on Social Protection in Asia and the Pacific. The expected progress is presented in the performance measure below (see table 16.24).

Table 16.24  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Countries request the ESCAP secretariat to explore and develop a regional modality on social protection at the fifth session of the Committee on Social Development	19 Asia-Pacific countries officially nominate representatives to a group of experts to develop a draft regional modality	The Action Plan to Strengthen Regional Cooperation on Social Protection in Asia and the Pacific was adopted by Asia-Pacific countries at the sixth session of the Committee on Social Development	ESCAP member States use the new ESCAP tools and the regional modality to broaden national social protection coverage	Through a regional platform, member States participate in peer learning and sharing of good practices to strengthen regional cooperation in social protection

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: advancing data and guidance for evidence-based policy related to population ageing, in line with the Madrid International Plan of Action on Ageing and the 2030 Agenda for Sustainable Development

#### Proposed programme plan for 2022

16.181 In 2020, ESCAP compiled data on population ageing and information on existing policies on older persons in Asia and the Pacific. The results from the analysis showed that the populations of countries in the region were ageing rapidly and that older persons, in particular older women, were the most likely to be marginalized and vulnerable. In addition, the analysis showed that data and information with regard to policies on ageing, covering most countries in the region, were not widely available, comparable or timely. In 2020, in response to requests from member States to the secretariat, the subprogramme commenced work to identify indicators, collect data and analyse the situation of the older population in the region, and review current policies and develop new forward-looking policies to address the challenges linked to population ageing. This work will feed into the regional review of the implementation of the Madrid International Plan of Action on Ageing in 2022. The review will also provide the basis for future work on population ageing, given that the populations of countries in the region will continue to age rapidly and more countries will be concerned about how to address population ageing in the years to come.

*Lessons learned and planned change*

16.182 The lesson for the subprogramme was that the limited amount of age-disaggregated data was a barrier to designing effective policies for older persons in the context of sustainable development. In applying the lesson, the subprogramme will launch a survey on the implementation of the Madrid International Plan of Action on Ageing, with a focus on ageing indicators and data and on policies related to population ageing. The survey analysis will inform the regional review in 2022; engagement with member States on the survey will increase their collaboration in the collection of age-disaggregated data and information on policies for older persons. Using the results from the survey, the subprogramme will further focus its capacity-building programme on addressing the specific concerns of member States, for example, by prioritizing work on data and ageing policies, with an emphasis on the needs of older women, in particular social protection throughout the life cycle, and policies on women's economic empowerment and entrepreneurship and on enhancing women's access to finance and ICT. Given that the proportion of persons with disabilities will increase in ageing societies, the subprogramme will focus on supporting member States in designing policies to address the accessibility challenges faced by older persons. In addition, migration can mitigate some of the effects of population ageing on labour markets. Therefore, the subprogramme will provide analytical and technical cooperation to those member States in which ageing leads to increased demand for migrant workers. Specifically, the subprogramme will assess progress in the implementation of the Madrid International Plan of Action on Ageing so as to inform member States' deliberations on the priority areas for the further implementation of the Plan.

*Expected progress towards the attainment of the objective, and performance measure*

16.183 This work is expected to contribute to the objective, as demonstrated by member States endorsing recommendations for action at the regional and national levels, in accordance with the Madrid International Plan of Action on Ageing and the 2030 Agenda, to address the economic and social impacts of population ageing, especially on older women (see table 16.25).

Table 16.25  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
Member States requested regional commissions to continue to facilitate the further implementation of the Madrid International Plan of Action on Ageing, on the basis of priorities identified in the outcomes of their regional reviews and appraisal exercises and as a modality for the inclusion of older persons in the	ESCAP member States identify priority areas for country-specific policies on population ageing, with a focus on data and identifying good practices for population policies	ESCAP member States support mapping of policies on population ageing and the collection of data to monitor population ageing	ESCAP member States review current policies and the availability of data to address the challenges of population ageing as they relate to the Madrid International Plan of Action on Ageing and the 2030 Agenda	ESCAP member States endorse recommendations for action at the regional and national levels, in accordance with the Madrid International Plan of Action on Ageing and the 2030 Agenda, to address the economic and social impacts of population ageing,

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
implementation and attainment of the 2030 Agenda and the Sustainable Development Goals				especially on older women

## Legislative mandates

16.184 The list below provides all mandates entrusted to the subprogramme.

### *General Assembly resolutions*

49/128	Report of the International Conference on Population and Development	74/128	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly
65/234	Follow-up to the International Conference on Population and Development beyond 2014		
65/312	Outcome document of the High-level Meeting of the General Assembly on Youth: Dialogue and Mutual Understanding	75/131	United Nations Decade of Healthy Ageing (2021–2030)
68/4	Declaration of the High-level Dialogue on International Migration and Development	75/151	Implementation of the outcome of the World Summit for Social Development and of the twenty-fourth special session of the General Assembly
69/147	Intensification of efforts to eliminate all forms of violence against women and girls	75/152	Follow-up to the Second World Assembly on Ageing
73/195	Global Compact for Safe, Orderly and Regular Migration	75/156	Strengthening national and international rapid response to the impact of the coronavirus disease (COVID-19) on women and girls
73/326	Format and organizational aspects of the international migration review forums		
74/121	Policies and programmes involving youth	75/161	Intensification of efforts to prevent and eliminate all forms of violence against women and girls
		75/226	International migration and development

### *Economic and Social Council resolutions*

2015/4	Promoting the rights of persons with disabilities and strengthening the mainstreaming of disability in the post-2015 development agenda	2018/8	Future organization and methods of work of the Commission on the Status of Women
		2019/4	Future organization and methods of work of the Commission for Social Development
2016/25	Future organization and methods of work of the Commission on Population and Development	2020/8	Modalities for the fourth review and appraisal of the Madrid International Plan of Action on Ageing, 2002
2018/6	Third review and appraisal of the Madrid International Plan of Action on Ageing, 2002		

### *Economic and Social Commission for Asia and the Pacific resolutions and decisions*

66/12	Sixth Asian and Pacific Population Conference	67/8	Strengthening social protection systems in Asia and the Pacific
67/5	Full and effective implementation of the Madrid International Plan of Action on Ageing in the Asia-Pacific region	67/9	Asia-Pacific regional review of the progress achieved in realizing the Declaration of Commitment on HIV/AIDS and the Political Declaration on HIV/AIDS
67/6	Enhancing accessibility for persons with disabilities at ESCAP		

68/6	Asia-Pacific regional preparations for the special session of the General Assembly on the International Conference on Population and Development beyond 2014	71/13	Implementation of the Asian and Pacific Ministerial Declaration on Advancing Gender Equality and Women's Empowerment
68/7	Asian and Pacific Decade of Persons with Disabilities, 2013–2022	74/7	Towards disability-inclusive sustainable development: implementation of the Beijing Declaration, including the Action Plan to Accelerate the Implementation of the Incheon Strategy
69/13	Implementation of the Ministerial Declaration on the Asian and Pacific Decade of Persons with Disabilities, 2013–2022, and the Incheon Strategy to “Make the Right Real” for Persons with Disabilities in Asia and the Pacific	74/11	Strengthening regional cooperation to tackle inequality in all its forms in Asia and the Pacific
69/14	Implementation of the Bangkok statement on the Asia-Pacific review of the implementation of the Madrid International Plan of Action on Ageing	Decision 74/26	Report of the Asia-Pacific Intergovernmental Meeting on the Third Review and Appraisal of the Madrid International Plan of Action on Ageing
70/14	Enhancing participation of youth in sustainable development in Asia and the Pacific	Decision 75/7	Report of the Midterm Review of the Asia and Pacific Ministerial Declaration on Population and Development including the Chair's summary

## Deliverables

16.185 Table 16.26 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 16.26

### Subprogramme 6: deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>6</b>	<b>5</b>	<b>3</b>	<b>7</b>
1. Reports for ESCAP	1	3	3	1
2. Reports for the Committee on Social Development	2	2	–	2
3. Reports for intergovernmental meetings on social development	3	–	–	4
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>34</b>	<b>21</b>	<b>18</b>	<b>32</b>
4. Meetings of the Committee on Social Development	6	4	–	6
5. Intergovernmental meetings on social development	6	–	–	12
6. Meetings of the Working Group on the Asian and Pacific Decade of Persons with Disabilities, 2013–2022	4	2	4	–
7. Meetings of the United Nations Special Programme for the Economies of Central Asia Thematic Working Group on Gender and Sustainable Development Goals	2	1	2	2
8. Expert group meetings on gender equality	4	2	–	–
9. Expert group meetings on disability inclusion	–	–	4	4
10. Expert group meetings on social policies	8	8	4	4
11. Expert group meetings on population	4	4	4	4
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>8</b>	<b>11</b>	<b>9</b>	<b>6</b>
12. Capacity-building projects on gender equality	3	3	4	1
13. Capacity-building projects on population and development	1	3	1	1

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
14. Capacity-building projects on disability inclusion	3	4	3	3
15. Capacity-building projects on inequality	1	1	1	1
<b>Publications</b> (number of publications)	<b>5</b>	<b>4</b>	<b>1</b>	<b>3</b>
16. Publications on gender equality	1	1	–	–
17. Publications on disability inclusion	–	–	1	1
18. <i>Social Outlook for Asia and the Pacific</i>	1	1	–	1
19. Publications on population and development	1	1	–	1
20. <i>Asia-Pacific Sustainable Development Journal</i>	2	1	–	–
<b>Technical materials</b> (number of materials)	<b>12</b>	<b>10</b>	<b>11</b>	<b>11</b>
21. Policy papers on gender equality	1	1	1	1
22. Policy papers on disability inclusion	1	1	1	1
23. Policy papers on population	2	2	2	2
24. Policy papers on inequality	3	2	2	2
25. Datasheets on population	1	1	1	1
26. Policy briefs on social development	4	3	4	4

#### C. Substantive deliverables

**Consultation, advice and advocacy:** support for working groups on issues related to social development, including the Issue-Based Coalition on Inclusion and Empowerment; advisory support for the task forces of the ESCAP Sustainable Business Network.

**Databases and substantive digital materials:** online databases and resource facilities on social development for regional and global access; substantive blog posts for the ESCAP website for regional and global access.

#### D. Communication deliverables

**Outreach programmes, special events and information materials:** observances of United Nations international days, including special events on gender equality, population and disability inclusion; media outreach on special events; websites on social development; press interviews for major publications and events.

**External and media relations:** press releases and op-ed articles on the work and activities of the subprogramme.

**Digital platforms and multimedia content:** regular, typically monthly, updating and maintenance of web pages of the subprogramme for the ESCAP website in nine areas, including ageing societies, disability-inclusive development, gender equality and women's empowerment, inequality and leaving no one behind, international migration, population and development, social inclusion, social protection and youth empowerment; inputs for ESCAP social media platforms.

## Subprogramme 7 Statistics

### Objective

16.186 The objective, to which this subprogramme contributes, is to improve the availability, accessibility and use of quality data and official statistics in support of sustainable development in Asia and the Pacific.

### Strategy

16.187 To contribute to the objective, the subprogramme, including the Statistical Institute for Asia and the Pacific, will provide technical assistance, training and capacity-building support to strengthen national statistical capacity to produce, disseminate and communicate statistical products and services, with a focus on modernizing national statistical systems and empowering national statistical offices in the region to benefit from the data sources generated by different components of

national data ecosystems, including administrative data and big data produced and owned by other governmental agencies and the private sector.

16.188 The subprogramme will also provide statistical products and services, such as the *Asia and the Pacific SDG Progress Report* and the Asia-Pacific Sustainable Development Goals Gateway, that make regional data and official statistics accessible and enable assessment of progress in the Asia-Pacific region towards achieving the Sustainable Development Goals. In addition, the subprogramme will develop or support the production of knowledge products in the form of research papers, working papers, statistics briefs and blogs to raise awareness of and share knowledge and experience around official statistics.

16.189 The subprogramme will also promote cooperation and facilitate consensus-building among member States, regional entities and other partners working in data and statistics through regional and country-specific initiatives. This includes, among others, advancing the Declaration on Navigating Policy with Data to Leave No One Behind, in cooperation with member States and development partners, which will constitute the bedrock for enhanced statistical capacity in Asia and the Pacific. The subprogramme's work will help member States to make progress towards the achievement of all the Sustainable Development Goals.

16.190 The subprogramme plans to support member States on issues related to COVID-19 by expanding its work to transform national statistical systems so that they are resilient to future shocks similar to the COVID-19 pandemic. To this end, the subprogramme will provide technical assistance, training and capacity-building support and will promote cooperation and consensus-building, in particular through virtual platforms.

16.191 The above-mentioned work is expected to result in improved availability, accessibility and use of quality data and official statistics in support of sustainable development in Asia and the Pacific.

16.192 The planned support on issues related to COVID-19, if required in 2022, is expected to result in national statistical systems being equipped to review progress in the implementation of the 2030 Agenda in the face of future shocks similar to the COVID-19 pandemic.

## **Programme performance in 2020**

16.193 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Enhanced resilience of national statistical systems despite COVID-19**

16.194 The subprogramme initiated the Asia-Pacific Stats Café event series to provide a forum for discussing urgent needs of national statistical systems arising from the unprecedented situation of the COVID-19 pandemic, such as how to continue data collections under lockdown. The target audience included chief statisticians, staff from national statistical offices and other parts of national statistical systems across the region, United Nations country team staff and development partners. Seven of those Stats Café events were focused directly on COVID-19-related issues, including population estimates, civil registration and vital statistics, and household survey and population census operations. One Stats Café event was dedicated to the sharing of experience regarding COVID-19 data portals. Later, the Stats Café series evolved to cover other topics important to chief statisticians, staff from national statistical offices

and other parts of national statistical systems, including the use of new data sources and new data methods for compiling official statistics.

16.195 Furthermore, the subprogramme published knowledge products to inform those discussions, on relevant topics such as COVID-19 rapid assessment surveys, uncounted deaths and gender impacts, as well as the importance of civil registration and vital statistics systems in assessing the impact of the pandemic.

16.196 The subprogramme also promoted cooperation among member States, experts in multiple statistical areas and relevant agencies in response to questions being raised during the Stats Café interactive components, including the use of Earth observation data and remote sensing data to produce official statistics for COVID-19 responses. In follow-up meetings, further technical advice on the use of remote sensing and administrative data, in particular electricity meter data, to produce official statistics was provided to member States.

*Progress towards the attainment of the objective, and performance measure*

16.197 The above-mentioned work contributed to the objective, as demonstrated by the fact that the Committee on Statistics expressed appreciation of the use of virtual collaboration spaces, including the Stats Café, and encouraged the continued use of such spaces to promote statistical concepts in different areas, and by the feedback received on the relevance of the Stats Café (see table 16.27).

Table 16.27

**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
—	—	The Committee on Statistics at its seventh session expressed appreciation of the use of virtual collaboration spaces, including the Stats Café, and encouraged the continued use of such spaces to promote statistical concepts in different areas; 85 per cent of participants in the Asia-Pacific Stats Café agreed that the Café was relevant to their work

**Planned results for 2022**

16.198 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

**Result 1: stronger policy-data links for better decision-making<sup>16</sup>**

**Programme performance in 2020**

16.199 To empower and enable national statistical systems in the region to lead the development of and to deliver innovative, trusted and timely products and services

<sup>16</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 19)).

for the urgently needed and evolving statistical requirements of the 2030 Agenda, ESCAP member States in 2019 endorsed the Declaration on Navigating Policy with Data to Leave No One Behind. The Declaration contains nine member State commitments, including integrating statistics development with national development plans, strengthening legislative provisions and advocating the expanded use of official statistics for the formulation, implementation and monitoring of policy.

16.200 In 2020, to advance towards the fulfilment of the national commitments contained in the Declaration, the subprogramme provided technical assistance, training and capacity-building support to member States. This included the review of the national statistical system of Maldives, support for the modernization of statistics legislation in the Lao People's Democratic Republic and support for the establishment of systems for exchanging data and metadata between national statistical systems, as well as the development of platforms for data dissemination and reporting in Cambodia and Thailand. The subprogramme also provided knowledge documents on those initiatives to foster experience-sharing across the region.

16.201 Furthermore, the subprogramme provided capacity-building support for improving advocacy for official statistics through the use of the "Every policy is connected" tool, including expansion of the use of the tool in the tourism sector in Samoa. The tool facilitates engagement between national statistical offices and government ministries to strengthen policy-data links for decision-making.

16.202 The above-mentioned work contributed to five countries demonstrating strengthened statistical systems in the account of progress prepared for the seventh session of the Committee on Statistics, which met the planned target reflected in the proposed programme budget for 2020.

### Proposed programme plan for 2022

16.203 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will be guided by the collective vision and framework for action of the Asia-Pacific statistical community for advancing official statistics for the 2030 Agenda and the Declaration on Navigating Policy with Data to Leave No One Behind, and by a monitoring and evaluation framework for both regional mandates, which was endorsed by the Committee on Statistics at its seventh session. The expected progress is presented in the performance measure below (see table 16.28).

Table 16.28  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Commitment to the Declaration on Navigating Policy with Data to Leave No One Behind, adopted by ESCAP member States in 2018	National implementation of the commitments contained in the Declaration	The Committee on Statistics endorsed the account of progress prepared for its seventh session, in which five countries demonstrated strengthened statistical systems	Further national implementation of the commitments contained in the Declaration	Five countries demonstrate strengthened national statistical systems on the basis of the monitoring and evaluation framework for the collective vision and framework for action of the Asia-Pacific statistical

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
				community for advancing official statistics for the 2030 Agenda and the Declaration on Navigating Policy with Data to Leave No One Behind

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: Asia-Pacific countries take steps to transform their statistical systems: the case of Bhutan<sup>17</sup>**

### **Programme performance in 2020**

16.204 To empower national statistical offices in the region to transform their statistical systems, the subprogramme has continued to provide technical assistance, training and capacity-building support to member States, including for the use of administrative data and other non-traditional data sources for official statistics.

16.205 In the case of Bhutan, the subprogramme provided technical assistance and capacity-building support for the harmonization of statistical classifications used in administrative data by government entities, to enable the use of these data by the national statistical office for the purpose of producing official statistics. The subprogramme also provided technical assistance and capacity-building support to Bhutan, along with Fiji, Malaysia, Maldives, Mongolia, Samoa and Viet Nam, for the use of administrative data and geospatial data in the compilation of air emission, land, solid waste and water accounts. Furthermore, the subprogramme hosted, in a virtual mode, the fifteenth Management Seminar for the Heads of National Statistical Offices in Asia and the Pacific, on the theme “National statistical systems: responding to the COVID-19 crisis and building better for the future”, at which participants focused on the use of administrative and other non-traditional data sources for official statistics.

16.206 The subprogramme also promoted cooperation and facilitated consensus in the area of transforming statistical systems by hosting eight Asia-Pacific Stats Café events on the theme of non-traditional data sources for official statistics and by contributing to the sixth International Conference on Big Data for Official Statistics hosted by the Republic of Korea in collaboration with the Statistics Division of the Department of Economic and Social Affairs of the Secretariat and the ESCAP Statistics Division. The subprogramme facilitated the participation of nine member States from Asia-Pacific as speakers at the Conference, including the chief statistician of the National Bureau of Statistics of Bhutan.

16.207 The above-mentioned work contributed to seven countries demonstrating strengthened statistical systems, which exceeded the planned target of at least five countries, including Bhutan, demonstrating strengthened statistical systems in the account of progress on the implementation of the commitments contained in the Declaration on Navigating Policy with Data to Leave No One Behind prepared for the seventh session of the Committee on Statistics, reflected in the programme budget for 2021.

<sup>17</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

### Proposed programme plan for 2022

16.208 The subprogramme will continue the work related to the planned result, in line with its mandate and the nine commitments made by member States in the Declaration on Navigating Policy with Data to Leave No One Behind. The subprogramme will prepare the baseline report, which will provide an overview of the status of the commitments contained in the Declaration and facilitate the related intergovernmental deliberations. The subprogramme will further tailor its work to the commitments prioritized by individual member States at the eighth session of the Committee on Statistics. The expected progress is presented in the performance measure below (see table 16.29).

Table 16.29  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
The Government of Bhutan adopts the Declaration on Navigating Policy with Data to Leave No One Behind at the sixth session of the Committee on Statistics of ESCAP	The Government endorses the Declaration at the seventy-fifth session of ESCAP	Seven countries, including Bhutan, demonstrated strengthened statistical systems in the account of progress on the implementation of the commitments contained in the Declaration prepared for the seventh session of the Committee on Statistics	Further implementation of the national commitments contained in the Declaration	The Committee on Statistics considers the baseline report on the status of the commitments contained in the Declaration and recommends priority actions for transforming national statistical systems

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: Asia-Pacific national statistical systems are better equipped to review progress in the implementation of the 2030 Agenda for Sustainable Development

#### Proposed programme plan for 2022

16.209 More than five years into the implementation of the 2030 Agenda, the data are still not sufficient to monitor progress towards the achievement of the Sustainable Development Goals. The COVID-19 pandemic was a shock to the statistical operations of national statistical organizations and presented huge challenges to national statistical systems by imposing further urgent demands relating to data and statistics and restricting statistical operations. The COVID-19 pandemic also shed more light on the importance of empowering and enabling national statistical systems in the region to use innovative methods and modalities for producing timely, quality, disaggregated data and official statistics in support of the 2030 Agenda.

#### *Lessons learned and planned change*

16.210 The lesson for the subprogramme was that communities of practice provided the possibility for real-time sharing of expert knowledge and experience and complemented conventional means of communication and collaboration among

member States. Member States also indicated that they were receptive to communities of practice in statements delivered at the seventh session of the Committee on Statistics. In applying the lesson, the subprogramme will build on the experience of the Asia-Pacific Data Integration Community of Practice to further promote cooperation and consensus-building in other statistical areas of interest and high priority to member States, including disaster-related statistics, which also benefit from the use of non-traditional data sources. The subprogramme will expand its work to transform national statistical systems so that they are resilient to future shocks by using administrative and non-traditional data sources, such as geospatial data, and innovative data methods, such as data integration. The subprogramme will provide technical assistance, training and capacity-building support and will promote cooperation and consensus-building, in particular through a data integration community of practice. These efforts will contribute to improving the availability, accessibility and use of the quality data and statistics required for monitoring the Sustainable Development Goals in the region.

*Expected progress towards the attainment of the objective, and performance measure*

16.211 This work is expected to contribute to the objective, as demonstrated by the increased availability of data and official statistics to monitor the Sustainable Development Goals (see figure 16.VI).

Figure 16.VI

**Performance measure: Sustainable Development Goal indicators having sufficient data for the Asia-Pacific region**  
(Percentage)

## Legislative mandates

16.212 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolutions*

68/261	Fundamental Principles of Official Statistics	71/313	Work of the Statistical Commission pertaining to the 2030 Agenda for Sustainable Development
--------	---	--------	--

*Economic and Social Council resolutions*

2006/6	Strengthening statistical capacity	2017/7	Work of the Statistical Commission
2011/15	Revision of the statute of the Statistical Institute for Asia and the Pacific		pertaining to the 2030 Agenda for Sustainable Development
2013/21	Fundamental Principles of Official Statistics		

*Economic and Social Commission for Asia and the Pacific resolutions*

246 (XLII)	Statistical services in Asia and the Pacific	71/14	Asian and Pacific Civil Registration and Vital Statistics Decade, 2015–2024
65/2	Regional technical cooperation and capacity-building in statistics development in Asia and the Pacific	73/5	Strengthening Asia-Pacific's support for the United Nations Conference to Support the Implementation of Sustainable Development Goal 14
67/10	A core set of economic statistics to guide the improvement of basic economic statistics in Asia and the Pacific	74/6	Advancing disaster-related statistics in Asia and the Pacific
67/11	Strengthening statistical capacity in Asia and the Pacific	74/8	Accelerating the implementation of the Regional Action Framework on Civil Registration and Vital Statistics in Asia and the Pacific
67/12	Improvement of civil registration and vital statistics in Asia and the Pacific		
69/15	Implementing the outcome of the High-level Meeting on the Improvement of Civil Registration and Vital Statistics in Asia and the Pacific	75/9	Implementation of the Declaration on Navigating Policy with Data to Leave No One Behind
69/16	A core set of population and social statistics to guide national capacity development in Asia and the Pacific		

**Deliverables**

16.213 Table 16.30 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 16.30

**Subprogramme 7: deliverables for the period 2020–2022, by category and subcategory**

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>4</b>	<b>13</b>	<b>1</b>	<b>2</b>
1. Reports for ESCAP	2	1	1	1
2. Reports for the Committee on Statistics	1	12	–	1
3. Report for the Ministerial Conference on Civil Registration and Vital Statistics in Asia and the Pacific	1	–	–	–
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>45</b>	<b>13</b>	<b>15</b>	<b>33</b>
4. Meetings of the Committee on Statistics	6	3	–	6
5. Meetings of the Governing Council of the Statistical Institute for Asia and the Pacific	3	2	3	3
6. Meetings of the United Nations Special Programme for the Economies of Central Asia Project Working Group on Statistics	6	–	–	–
7. Expert group meetings on the use of non-traditional and complementary data sources in official statistics	6	2	6	6

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
8. Meetings of the Regional Steering Group for Civil Registration and Vital Statistics in Asia and the Pacific	6	2	6	6
9. Expert group meetings on strengthening national statistical systems for enhanced quality and trust in official statistics	6	1	—	6
10. Meetings of the Technical Working Group on Disaster-related Statistics in Asia and the Pacific	6	3	—	6
11. Meetings of the Ministerial Conference on Civil Registration and Vital Statistics in Asia and the Pacific	6	—	—	—
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>5</b>	<b>7</b>	<b>5</b>	<b>5</b>
12. Capacity-building projects on statistics	5	7	5	5
<b>Publications</b> (number of publications)	<b>1</b>	<b>1</b>	<b>1</b>	<b>1</b>
13. <i>Asia and the Pacific SDG Progress Report</i>	1	1	1	1
<b>Technical materials</b> (number of materials)	<b>2</b>	<b>6</b>	<b>2</b>	<b>2</b>
14. Statistical briefs and working papers	2	6	2	2
<b>Seminars, workshops and training events</b> (number of days)	<b>—</b>	<b>22</b>	<b>—</b>	<b>13</b>
15. Seminars on statistics	—	22	—	13
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> advisory support for networks of statistics such as those of the Association of Southeast Asian Nations, the Pacific Community and the United Nations Special Programme for the Economies of Central Asia in the five action areas of the Declaration on Navigating Policy with Data to Leave No One Behind.				
<b>Databases and substantive digital materials:</b> ESCAP statistical database accessible at the regional and global levels; database on statistical training materials and resources; substantive blog posts for the ESCAP website for regional and global access.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> press interviews for major publications and events; multimedia promotional content.				
<b>External and media relations:</b> press releases and op-ed articles on the work and activities of the subprogramme.				
<b>Digital platforms and multimedia content:</b> regular, typically monthly, updating and maintenance of web pages of the subprogramme for the ESCAP website in five areas, including investment and user engagement, skills development, quality assurance and trust in statistics, statistical business process modernization and integrated statistics and analysis; inputs for ESCAP social media platforms.				

## Subprogramme 8

### Subregional activities for development

## Component 1

### Subregional activities for development in the Pacific

## Objective

16.214 The objective, to which component 1 of the subprogramme contributes, is to strengthen regional cooperation and integration for sustainable development, in line with the subregional priorities of the Pacific, including building resilience to climate change, sustainable ocean management and reducing inequalities.

## Strategy

16.215 To contribute to the objective, the component will facilitate subregional dialogues among member States on policy and legal challenges to climate-related migration and displacement, in cooperation with subprogrammes 4 and 6; other United Nations entities in the Pacific, such as United Nations resident coordinator offices, the International Organization for Migration and ILO; subregional organizations of the Pacific, such as the Pacific Islands Forum Secretariat and the Pacific Community; and civil society.

16.216 In cooperation with subprogramme 7, the component will provide subregional and in-country capacity development support in the area of ocean accounts using the System of Environmental-Economic Accounting and data standards under the Global Ocean Accounts Partnership.

16.217 The component, in cooperation with subprogramme 6, will continue to provide technical assistance to member States to develop nationally appropriate indicator frameworks and promote women's economic empowerment, social protection and disability policies. The component will also provide opportunities for member States to exchange information and best practices and to engage with civil society to ensure inclusiveness.

16.218 The component will strengthen partnerships, guided by the Pacific Road Map for Sustainable Development and the United Nations Pacific Strategy (2018–2022) and in line with the United Nations development system reforms, and will focus particular attention on Sustainable Development Goals 5, 10, 13, 14 and 17.

16.219 The component plans to support member States on issues related to COVID-19 by providing technical assistance, in coordination with the rest of the United Nations system, in addressing the socioeconomic impacts of the pandemic and devising appropriate recovery responses through national frameworks for Sustainable Development Goal financing and regional cooperation on transboundary issues, in line with the outcomes of relevant assessments.

16.220 The above-mentioned work is expected to result in:

- (a) More effective subregional responses to climate change-related human security issues;
- (b) Improved data availability for evidence-based policymaking on ocean management;
- (c) Strengthened capacity to monitor the implementation of the 2030 Agenda while ensuring that no one is left behind and that development activities reduce inequalities and reach the most vulnerable groups.

16.221 The planned support on issues related to COVID-19 is expected to result in:

- (a) Strengthened capacity of member States to recover from the pandemic through national frameworks for social protection and sustainable development financing;
- (b) Stronger regional cooperation to address transboundary issues.

## Programme performance in 2020

16.222 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Pacific small island developing States strengthen their capacity for domestication of the Convention on the Rights of Persons with Disabilities**

16.223 An estimated 15 per cent of the population in the Pacific are living with a disability and are among the poorest and most marginalized in their communities, with limited access to education, employment, basic services and other development opportunities. In 2016, Pacific leaders endorsed the Pacific Framework for the Rights of Persons with Disabilities to support Governments in protecting and fulfilling the rights of persons with disabilities in accordance with the Convention on the Rights of Persons with Disabilities. To date, 10 of the 12 Pacific small island member States have ratified the Convention. The component has provided technical assistance to member States in conducting comprehensive State and national legislative reviews to identify areas of disability-based discrimination and provide recommendations for reform towards compliance with the Convention.

#### *Progress towards the attainment of the objective, and performance measure*

16.224 The above-mentioned work contributed to the objective, as demonstrated by the number of State and national legislative reviews conducted (see figure 16.VII).

Figure 16.VII

**Performance measure: total number of State and national legislative reviews aimed at enhancing compliance with the Convention on the Rights of Persons with Disabilities (cumulative)**

### **Planned results for 2022**

16.225 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

#### **Result 1: strong national sustainable development indicator sets for follow-up and review<sup>18</sup>**

##### **Programme performance in 2020**

16.226 The component has provided knowledge products and technical assistance to Pacific small island developing States, for example in verifying Sustainable Development Goal indicators and the required data for social inclusion and social protection. In close collaboration with subprogramme 7, the component has also

<sup>18</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 19)).

finalized the updated version of the “Every policy is connected” tool, an online application that enables member States to identify policy priorities and corresponding data needs.

16.227 The above-mentioned work contributed to the implementation of national sustainable development indicator frameworks supported by the “Every policy is connected” tool and the voluntary national review process by the Federated States of Micronesia, Papua New Guinea, Samoa and Solomon Islands, which met the planned target of implementation of sustainable development frameworks supported by localized indicators reflected in the proposed programme budget for 2020.

### **Proposed programme plan for 2022**

16.228 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will provide technical assistance through training, including newly developed e-learning and advisory services, in applying the “Every policy is connected” tool to the Pacific small island developing States to strengthen their statistical capacity to develop more focused national indicator frameworks for monitoring and reporting, including for voluntary national reviews. The expected progress is presented in the performance measure below (see table 16.31).

Table 16.31  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Recognition of the need for integrated monitoring and reporting on sustainable development frameworks by small island developing States	Strengthened statistical capacity through the establishment of national sustainable development indicator sets and technical assistance for integrated monitoring and reporting on sustainable development frameworks	Implementation of national sustainable development indicator frameworks supported by the voluntary national review process by the Federated States of Micronesia, Papua New Guinea, Samoa and Solomon Islands	Strengthened subregional data ecosystem to produce harmonized and integrated data to guide policy planning, implementation and monitoring	Three member States have used the improved national sustainable indicator frameworks in the planning, implementation and monitoring of national policies

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 2: Pacific small island developing States advance cooperation for climate change-related displacement and migration<sup>19</sup>**

#### **Programme performance in 2020**

16.229 The component has, as part of its capacity-building efforts to enhance the protection and empowerment of migrants and communities affected by climate change and disasters in the Pacific region, organized several subregional meetings, including a series of online policy dialogues, to identify options for establishing a

<sup>19</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

regional process and rights-based framework on climate change-related displacement and migration.

16.230 The above-mentioned work contributed to the development of options for establishing a regional process and rights-based framework on climate change-related migration, displacement and planned relocation, which did not meet the planned target of Governments agreeing on the scope of provisions of a declaration on climate change-related migration and displacement to promote climate security in low-lying States, with support from civil society, reflected in the programme budget for 2021. The original plan was to hold an in-person regional policy dialogue in Fiji early in 2020, followed by advocacy and consultations with member States to arrive at an agreement on the scope of provisions of a declaration later in the year. However, the policy dialogue was postponed because of the uncertainties regarding, and later the travel restrictions due to, the COVID-19 pandemic. It was later decided to hold a series of online policy dialogues over three months, from September to November 2020, and the advocacy and consultations planned with Governments were therefore delayed.

### **Proposed programme plan for 2022**

16.231 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will support member States in devising a plan for the implementation of the framework to advance regional cooperation on climate change-related migration, displacement and planned relocation. The expected progress is presented in the performance measure below (see table 16.32).

Table 16.32  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Climate change is recognized by Pacific Islands Forum leaders in the Boe Declaration on Regional Security as the single greatest threat to the livelihoods, security and well-being of people in the Pacific	In the Boe Declaration Action Plan, climate security and human security are identified as priorities for Pacific island countries	Member States developed options for establishing a regional process and rights-based framework on climate change-related migration, displacement and planned relocation	Governments of Pacific island countries advance cooperation on climate change-related migration, displacement and relocation and agree on guiding principles for national legal and policy responses	Governments of the Pacific island countries endorse and implement a rights-based framework on climate change-related migration, displacement and planned relocation

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: Pacific small island developing States strengthen their capacity for socioeconomic recovery from the impacts of the COVID-19 pandemic**

#### **Proposed programme plan for 2022**

16.232 Although Pacific small island developing States have recorded a relatively small number of COVID-19 cases, with some recording none at all, major socioeconomic impacts are being felt across the region as a result of economic

contractions, job losses and disrupted supply chains, which are expected to cause, at best, a slowdown in national investment and progress towards the achievement of the Sustainable Development Goals. The component has been contributing to analytical work and consultations with experts to examine options for improved regional cooperation on the COVID-19 response in the Pacific.

#### *Lessons learned and planned change*

16.233 The lesson for the component was that it needed to take into account the risks posed by crises such as pandemics or climate-related shocks when assisting member States in the design of social protection systems in order to increase coverage for the most vulnerable and ensure people-centred development. In applying the lesson, the component will assist member States in designing risk-informed social protection systems that are appropriate to small island developing States. The component will provide technical assistance to support Governments in the design of social protection policies and financing strategies for a faster recovery towards sustainable and equitable development. In the context of the limited fiscal space of small island developing States, which has been further strained by the pandemic, the component will support member States in the development of financing strategies and enabling frameworks for Sustainable Development Goal investment.

#### *Expected progress towards the attainment of the objective, and performance measure*

16.234 This work is expected to contribute to the objective, as demonstrated by new or improved national policies and frameworks for social protection and sustainable development financing by three member States (see table 16.33).

Table 16.33

#### **Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
—	—	Pacific member States strengthen their commitment to expanding and strengthening social protection systems	Two member States in the Pacific have considered proposals on strengthening policies and systems for social protection in the context of COVID-19 recovery	New or improved national policies and frameworks for social protection and sustainable development financing by three member States

### **Legislative mandates**

16.235 The list below provides all mandates entrusted to the component.

#### *General Assembly resolution*

63/260 Development-related activities

#### *Economic and Social Commission for Asia and the Pacific resolutions*

244 (XLI)	The Commission's Activities in the Pacific	72/9	Regional cooperation to promote the conservation and sustainable use of the oceans, seas and marine resources for sustainable development in Asia and the Pacific
-----------	--	------	---

## Deliverables

16.236 Table 16.34 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 16.34

### Component 1: deliverables for the period 2020–2022, by category and subcategory

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>1</b>	<b>1</b>	<b>1</b>	<b>1</b>

<b>C. Substantive deliverables</b>				
<b>Databases and substantive digital materials:</b> web pages on economic and social development in the Pacific region for subregional, regional and global access; and substantive blog posts for the ESCAP website for regional and global access.				
<b>D. Communication deliverables</b>				
<b>External and media relations:</b> press releases and op-ed articles on the work and activities of the subprogramme component.				
<b>Digital platforms and multimedia content:</b> regular, typically monthly, updating and maintenance of web pages of the subprogramme component for the ESCAP website in four areas, namely, national planning and policy coherence, social inclusion and equality, climate action and resources management, and the review of the Samoa Pathway and the 2030 Agenda; and inputs for ESCAP social media platforms.				

## Component 2

### Subregional activities for development in East and North-East Asia

#### Objective

16.237 The objective, to which component 2 of the subprogramme contributes, is to strengthen regional cooperation and integration for sustainable development, in line with the subregional priorities of East and North-East Asia, including sustainable connectivity, environmental sustainability and innovation for inclusive and resilient societies.

#### Strategy

16.238 To contribute to the objective, the component, in cooperation with relevant subprogrammes, will facilitate multisectoral dialogues among member States on trade, transport, energy and ICT connectivity through regional and subregional

platforms, including the North-East Asia Regional Power Interconnection and Cooperation Forum. These dialogues will focus on how to make connectivity policies more coherent and integrated across sectors while contributing to the achievement of the Sustainable Development Goals. With regard to regional power interconnection in North-East Asia, the component, in cooperation with subprogramme 9 and building on the regional road map on power system connectivity, will develop a road map for a green power corridor to support increased utilization of renewable sources of energy in North-East Asia.

16.239 The component, in cooperation with subprogramme 4, will further strengthen subregional platforms, such as the North-East Asian Subregional Programme for Environmental Cooperation and the North-East Asia Clean Air Partnership, by promoting knowledge-sharing on emerging technologies and deployment in priority areas such as the transport, industry and residential sectors.

16.240 The component, together with relevant subprogrammes, will facilitate subregional cooperation on science, technology and innovation policies and support stakeholders in developing policies and programmes that are inclusive and leave no one behind. In particular, the subprogramme will support member States in identifying key barriers to gender equality in the workplace in the technology industry and in designing gender-sensitive policies. In addition, the subprogramme will provide knowledge products and technical assistance and facilitate peer-to-peer exchanges to enhance the use of science, technology and innovation in ageing societies and for disaster resilience.

16.241 The strategy will be delivered by supporting and promoting intergovernmental processes for sustainable connectivity, environmental sustainability and innovation for inclusive and resilient societies in East and North-East Asia, contributing mainly to the achievement of Sustainable Development Goals 3, 5, 7, 9–11, 13–15 and 17. The component will further build the capacity of member States to identify subregional challenges and opportunities and to apply best practices for making progress towards achieving the Goals.

16.242 The component plans to support member States on issues related to COVID-19 by identifying and promoting innovative approaches to facilitate cross-border connectivity, including contactless cross-border trade and transport, and to enhance the resilience of vulnerable populations, such as women and older persons, through the promotion of inclusive access to science, technology and innovation and support for the integration of these elements into the policy frameworks of member States. The component will also contribute to strengthening subregional environmental cooperation in support of sustainable economic recovery and building back better.

16.243 The above-mentioned work is expected to result in:

- (a) Policy coherence and the integration of connectivity initiatives, for example, with regard to trade and transport facilitation;
- (b) Coordinated actions among stakeholders and Governments to counter common environmental challenges;
- (c) Enhanced knowledge-sharing on and use of science, technology and innovation in building inclusive and resilient societies in the subregion;
- (d) More effective formulation and implementation of policies and strategies consistent with the 2030 Agenda, including through the North-East Asia Multi-stakeholder Forums on the Sustainable Development Goals.

16.244 The planned support on issues related to COVID-19 is expected to result in:

- (a) Enhanced capacity of member States to apply innovative solutions to build resilience to and recover from COVID-19 and similar infectious diseases;
- (b) Enhanced cooperation among member States and enhanced capacity through experience-sharing in addressing cross-border environmental challenges, including air pollution and low carbon development, in support of sustainable economic recovery and building back better.

## **Programme performance in 2020**

16.245 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Strengthened environmental cooperation in East and North-East Asia**

16.246 North-East Asian countries have been continuously exposed to environmental problems, coupled with resource-intensive economic development and insufficient policy and technical compliance in managing environmental externalities. As a result, progress towards achieving the Sustainable Development Goals related to the environment, including those on climate action, life below water and life on land, has been stagnant or regressing in North-East Asia, while the subregion has made major progress towards achieving various Goals in the socioeconomic sphere. Furthermore, air pollution remains a critical issue of concern in the subregion, owing to the high levels of fine particulate matter (PM<sub>2.5</sub>), the annual average concentration of which is quadruple the WHO guideline values. The component has worked to support the North-East Asian Subregional Programme for Environmental Cooperation, which has been strengthening joint action of member States on key environmental challenges, including air pollution, biodiversity and nature conservation, low-carbon and low-emissions cities, desertification and land degradation, and marine protected areas. The component has built multilateral programmes in key thematic areas, institutionalized platforms related to air pollution, marine protected areas and low-carbon and low-emissions cities, and carried out new project activities on biodiversity and nature conservation. The work undertaken by the component inspired member States to draft and adopt ESCAP resolutions 75/4, the first regional resolution to address air pollution, and 76/1, in which subregional member States were called upon to take urgent actions for the conservation and sustainable use of oceans, seas and marine resources through sharing good practices and lessons learned.

16.247 The component held intergovernmental consultations and multi-stakeholder dialogues and produced knowledge products in key thematic areas prioritized by member States to strengthen the operation of the North-East Asian Subregional Programme for Environmental Cooperation, and developed the strategic plan of the Programme for the period 2021–2025 and the workplan of the North-East Asia Clean Air Partnership for the period 2021–2025 for the consideration of member States. In addition, the component coordinated with relevant mechanisms to build synergies and expedite the action taken by member States on air pollution control, biodiversity conservation, low-carbon and low-emissions development and halting land degradation for climate mitigation.

### *Progress towards the attainment of the objective, and performance measure*

16.248 The above-mentioned work contributed to the objective, as demonstrated by the adoption by member States of the strategic plan of the North-East Asian

Subregional Programme for Environmental Cooperation for the period 2021–2025 and the operationalization of the North-East Asia Clean Air Partnership through the adoption of its workplan for the period 2021–2025 (see table 16.35).

Table 16.35

**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>
Member States enhanced their commitment and support for the work of the North-East Asian Subregional Programme for Environmental Cooperation, including the formal launch of the North-East Asia Clean Air Partnership and the adoption of its terms of reference	Member States established operational frameworks of the North-East Asia Clean Air Partnership by inaugurating the Science and Policy Committee of the Partnership	Member States adopted the strategic plan of the North-East Asian Subregional Programme for Environmental Cooperation (2021–2025) and operationalized the North-East Asia Clean Air Partnership by adopting its workplan (2021–2025)

**Planned results for 2022**

16.249 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

**Result 1: subregional intergovernmental policy dialogue on integrated trade and transport facilitation<sup>20</sup>****Programme performance in 2020**

16.250 The component has been implementing activities to enhance the capacity of East and North-East Asian countries for regional connectivity through trade and transport facilitation, guided by knowledge products and subregional dialogues emphasizing the need for policy coordination in these areas. In 2020, the component organized a series of training workshops on economic corridor management, which were designed to raise awareness among officials of the need for cross-sectional policy coordination, in particular in the area of trade and transport facilitation.

16.251 The above-mentioned work contributed to the enhanced capacity of member States to implement subregional initiatives on trade and transport facilitation, which did not meet the target of the establishment of a formal subregional intergovernmental policy dialogue on trade and transport facilitation reflected in the proposed programme budget for 2020. The subregional seminars planned to be held in conjunction with official meetings under the Greater Tumen Initiative were postponed to 2021, in accordance with the decision of member countries of the Initiative. Nevertheless, the component has been laying the groundwork for the envisaged intergovernmental policy dialogue, which is expected to gain further support and momentum with the holding of the subregional seminars and other related activities in 2021.

<sup>20</sup> As reflected in the proposed programme budget for 2020 ([A/74/6 \(Sect. 19\)](#)).

### Proposed programme plan for 2022

16.252 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will strengthen the joint policy dialogue between trade and transport officials by ensuring that they focus on cross-border operational connectivity and take into consideration the developments in the subregion in relation to connectivity initiatives, including cooperation with subregional partners. The component will further support member States in bringing their policies and tools into line with the regional and subregional frameworks for effective connectivity. The expected progress is presented in the performance measure below (see table 16.36).

Table 16.36  
Performance measure

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Absence of dialogue between subregional governmental bodies	Lack of a structured subregional intergovernmental body	Member States have enhanced their capacity to implement subregional initiatives on trade and transport facilitation	At least one additional initiative among East and North-East Asian countries on policy coordination between trade and transport facilitation	One additional initiative launched among East and North-East Asian countries on policy coordination between trade and transport facilitation

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 2: strengthening coordination between trade and transport facilitation in East and North-East Asia<sup>21</sup>

#### Programme performance in 2020

16.253 The component has produced knowledge products, such as an upgraded knowledge portal on North-East Asia trade and transport facilitation and a subregional analytical study on trade and transport facilitation, in which policy coordination for trade and transport facilitation was a major area of focus. In the subregional analytical study, the component made specific and practical recommendations for policy coordination, which may serve as a basis for trade and transport officials to consider how to facilitate coordination between the two sectors. The component also expanded the scope of the study to include challenges and issues related to trade and transport connectivity that emerged from the COVID-19 pandemic.

16.254 The above-mentioned work contributed to strengthened capacity in facilitating coordination between the trade and transport sectors, which did not meet the target of member States engaging in intergovernmental policy dialogues on trade and transport facilitation in a joint manner reflected in the programme budget for 2021. The recommendations of the subregional study were the key components for the discussions among and consideration of government officials for the planned subregional seminars. The subregional seminars planned to be held in conjunction with official meetings under the Greater Tumen Initiative were postponed to 2021.

<sup>21</sup> As reflected in the programme budget for 2021 ([A/75/6/Add.1](#)).

### Proposed programme plan for 2022

16.255 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will build on the developments in regional and subregional initiatives to further promote stronger policy coordination between trade and transport facilitation, including in the areas of digitalization, economic and transport corridors, and transit. The expected progress is presented in the performance measure below (see table 16.37).

Table 16.37

### Performance measure

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Member States separately make progress on international and regional agreements for trade and transport facilitation, as evidenced by the accession by a member State to the Framework Agreement on Facilitation of Cross-border Paperless Trade in Asia and the Pacific	Member States strengthen awareness about the importance of an integrated approach to trade and transport facilitation initiatives, as evidenced by the discussion among Greater Tumen Initiative member countries on trade-transport facilitation linkages at the ESCAP-Greater Tumen Initiative International Seminar on Trade Facilitation	Member States strengthened their capacity in facilitating coordination between the trade and transport sectors	Member States implement initiatives reflecting policy coordination on trade and transport facilitation	Member States review and share with other Asia-Pacific subregions good practices from initiatives implemented to promote policy coordination between trade and transport facilitation

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: improving subregional power grid connectivity in East and North-East Asia

### Proposed programme plan for 2022

16.256 The member States in East and North-East Asia have significant potential for harnessing complementarities in energy resource endowments. In addition, subregional power interconnection offers opportunities to increase the share of renewable energy in the power mix and to reduce reliance on fossil fuels. To contribute to enhancing cooperation towards subregional power grid connectivity in East and North-East Asia, the component worked with subprogramme 9 to build on the regional road map on power system connectivity by carrying out technical and scenario analyses on pathways to developing a green power corridor in North-East Asia and by building trust and political consensus for a road map on subregional power grid connectivity.

*Lessons learned and planned change*

16.257 The lesson for the component was that the component needs to make more effort to strengthen subregional cooperation on power grid connectivity, with a common vision of interconnected power systems. In applying the lesson and in accordance with the regional road map on power system connectivity, the component will focus on building a common understanding and vision in the subregion of power grid connectivity by providing technical and scenario analyses on the development of interconnectors and capacity-building on the concept of a green power corridor that promotes increased use of the subregion's abundant renewable sources of energy.

*Expected progress towards the attainment of the objective, and performance measure*

16.258 This work is expected to contribute to the objective, as demonstrated by member States supporting the implementation of a road map informing the development of an interconnected subregional power grid system (see table 16.38).

Table 16.38  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)</i>	<i>2022 (planned)</i>
Member States launched the North-East Asia Regional Power Interconnection and Cooperation Forum as a regular platform for dialogue	Consultations among member States continued on promoting regional electricity trade and investment in cross-border electricity interconnections in North-East Asia	Member States strengthened their awareness and understanding of potential strategies for improving connectivity	Member States enhance their capacity with regard to technical requirements such as interconnector development to promote the use of renewable sources of energy, as evidenced by a survey	Member States support the implementation of a North-East Asia road map on power system connectivity at a high-level subregional forum

**Legislative mandates**

16.259 The list below provides all mandates entrusted to the component.

*General Assembly resolution*

63/260 Development-related activities

*Economic and Social Commission for Asia and the Pacific resolution*

75/4 Strengthening regional cooperation to tackle air pollution challenges in Asia and the Pacific

**Deliverables**

16.260 Table 16.39 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 16.39

**Component 2: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>1</b>	<b>1</b>	<b>1</b>	<b>1</b>
1. Reports for ESCAP	1	1	1	1
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>11</b>	<b>12</b>	<b>11</b>	<b>11</b>
2. Expert group meetings on policy and programme options to address emerging economic and social development issues in East and North-East Asia	4	4	4	4
3. Senior Officials Meetings of the North-East Asian Subregional Programme for Environmental Cooperation	3	3	3	3
4. Expert group meetings on sustainable development in East and North-East Asia	4	5	4	4
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>2</b>	<b>7</b>	<b>2</b>	<b>4</b>
5. Capacity-building projects on institutional programmatic priorities of ESCAP in East and North-East Asia	1	6	1	3
6. Capacity-building projects of the North-East Asian Subregional Programme for Environmental Cooperation	1	1	1	1
<b>Publications</b> (number of publications)	<b>1</b>	<b>1</b>	–	–
7. Publications on sustainable development of North-East Asia	1	1	–	–
<b>C. Substantive deliverables</b>				
<b>Databases and substantive digital materials:</b> web page on economic and social development in East and North-East Asia for subregional, regional and global access; management and updating of the website of the North-East Asian Subregional Programme for Environmental Cooperation; management and updating of the website of the Asia Carbon Footprint Network for subregional, regional and global access; and substantive blog posts for the ESCAP website for regional and global access.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> press interviews for major publications and events.				
<b>External and media relations:</b> press releases and op-ed articles on the work and activities of the subprogramme component.				
<b>Digital platforms and multimedia content:</b> regular, typically monthly, updating and maintenance of web pages of the subprogramme component for the ESCAP website in three areas, namely, environmental sustainability, strengthening intraregional connectivity, and innovation for resilient and inclusive societies; and inputs for ESCAP social media platforms.				

## Component 3

### Subregional activities for development in North and Central Asia

#### Objective

16.261 The objective, to which component 3 of the subprogramme contributes, is to strengthen regional cooperation and integration for sustainable development, in line with the subregional priorities of North and Central Asia, including sustainable connectivity, economic transformation, and social inclusion and resilience, and through follow-up and review of the 2030 Agenda.

#### Strategy

16.262 To contribute to the objective, the component, in cooperation with the relevant subprogrammes, will encourage subregional dialogue by providing secretariat support

to the thematic working groups<sup>22</sup> of the United Nations Special Programme for the Economies of Central Asia.

16.263 The component will coordinate with all the thematic working groups to ensure that priorities emanating from the Governing Council and the Economic Forum of the Special Programme regarding trade and transport facilitation, environmental sustainability, and energy and digital connectivity are incorporated into their workplans and discussions. In the same vein, the component will ensure that the outcomes of the work of the thematic working groups feed into the deliberations of the Governing Council and the Economic Forum. This work will promote a collaborative approach to addressing the development challenges in the subregion among Governments, civil society, the private sector, the United Nations and other international organizations.

16.264 The component, in cooperation with the Countries in Special Situations Section of ESCAP, will conduct analytical studies and propose policy recommendations to support economic transformation in the subregion as a driver to accelerate the implementation of the 2030 Agenda. Structural economic transformation is a priority for action in the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024. However, there has been limited progress in that regard, as indicated in the outcomes of the midterm review of the Vienna Programme of Action, and efforts must therefore be accelerated. A more integrated approach to structural economic transformation is needed to build back better with a view to achieving the Sustainable Development Goals. The component will provide support in that regard by promoting a holistic approach to structural transformation. This work will help member States to make progress towards achieving Goal 8.

16.265 The component will further mainstream social and environmental dimensions into its analytical work on the Sustainable Development Goals acceleration framework for North and Central Asia to address the Goals related to gender issues, such as Goals 5 and 10. The component, in collaboration with relevant subprogrammes and other partners, will provide knowledge products for policy advice and technical assistance to support women's economic empowerment.

16.266 Lastly, the component will organize annual expert group meetings on sustainable development and the subregional preparatory meeting for the Asia-Pacific Forum on Sustainable Development. These meetings will facilitate dialogue among government officials, civil society, experts and other stakeholders on the themes of the Asia-Pacific Forum on Sustainable Development and the high-level political forum on sustainable development in 2022 and 2023 and the sharing of information on subregional implementation efforts. The component will also support voluntary national review processes at the request of member States. This work will help member States to make progress towards achieving Goal 17.

16.267 The component plans to support member States on issues related to COVID-19 by providing further support in strengthening human and institutional capacity for a sustainable and resilient recovery, as outlined in the ESCAP framework for the socioeconomic response to COVID-19, which is in line with the 2030 Agenda.

---

<sup>22</sup> There are currently six thematic working groups under the United Nations Special Programme for the Economies of Central Asia, namely, the working group on water, energy and environment, the working group on sustainable transport, transit and connectivity, the working group on trade, the working group on statistics, the working group on innovation and technology for sustainable development and the working group on gender and the Sustainable Development Goals. Uzbekistan has proposed the establishment of a working group on investment and financial cooperation. This proposal will be further considered at the 2021 session of the Governing Council of the Special Programme.

16.268 The above-mentioned work is expected to result in:

- (a) Enhanced ownership by member States of, evidence-based solutions for, and strengthened regional cooperation on, programmes to improve trade and transport facilitation as well as energy and ICT connectivity;
- (b) Increased evidence-based knowledge that feeds into policy options for economic transformation in the subregion;
- (c) Improved knowledge-sharing and cooperation among member States in the preparation of their voluntary national reviews.

16.269 The planned support on issues related to COVID-19 is expected to result in increased digital connectivity and digital transformation in the region to support inclusive and sustainable recovery.

### **Programme performance in 2020**

16.270 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

#### **Member States advance commitments for digitalization and the adoption of digital technologies for sustainable transformation and recovery from the COVID-19 pandemic**

16.271 Structural economic transformation is priority 5 of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024 and is essential for realizing the trade potential of landlocked developing countries as they continue to introduce market-oriented policies. Ensuring that recovery packages are in line with the principles of sustainable development will help countries to deal with the COVID-19 crisis more effectively and prepare the subregion to handle other unforeseen crises more efficiently. With the impact of the COVID-19 pandemic, the importance of structural transformation has gained further importance and momentum.

16.272 In 2020, the component organized an expert group meeting with three thematic sessions that highlighted entry points for economic transformation relevant to the countries of the subregion, such as digitalization and agricultural transformation. The working papers on the themes of the sessions informed the deliberations of member States at the 2020 Economic Forum of the United Nations Special Programme for the Economies of Central Asia on opportunities for enhanced regional cooperation to support sustainable and inclusive economic recovery in the wake of COVID-19. At the Forum, the sharing of knowledge, experiences and lessons learned was encouraged among government officials from countries participating in the Special Programme and relevant stakeholders with regard to policies, strategies and initiatives. The Forum participants also called for regional cooperation in trade, transport and digital connectivity to be strengthened, for the network of the thematic working groups of the Special Programme to be enhanced and for further synergies to be built with resident coordinators and United Nations country teams to support the Special Programme.

#### *Progress towards the attainment of the objective, and performance measure*

16.273 The above-mentioned work contributed to the objective, as demonstrated by the adoption by the countries participating in the Special Programme, at the Economic Forum held on 18 and 19 November 2020, of the Declaration on Strengthening Regional Cooperation to Support Socioeconomic Recovery in the Wake of

COVID-19, in which the participating countries reaffirmed their commitment to regional cooperation and stressed the importance of accepting digitalization as a key factor for economic transformation and a driver of sustainable development and of adopting digital technologies for sustainable transformation strategies to ensure that no one is left behind in the recovery from the COVID-19 crisis (see table 16.40).

Table 16.40

**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>
Recognition of the need to accelerate structural economic transformation by member States	A holistic framework linking structural economic transformation and sustainable development elaborated by member States	Member States reaffirmed their commitment to regional cooperation and stressed the importance of accepting digitalization as a key factor for economic transformation and a driver of sustainable development and of adopting digital technologies for sustainable transformation strategies to ensure that no one is left behind in the recovery from the COVID-19 crisis

**Planned results for 2022**

16.274 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

**Result 1: enhanced structural economic transformation through policy advice and dialogue<sup>23</sup>****Programme performance in 2020**

16.275 The component produced technical materials on structural transformation, including digital inclusion and sustainable agricultural transformation. The component also facilitated exchanges among experts and member States through a dedicated expert group meeting and the 2020 Economic Forum of the United Nations Special Programme for the Economies of Central Asia.

16.276 The above-mentioned work contributed to member States recognizing, in the Declaration adopted at end of the 2020 Economic Forum, that a more integrated approach to structural economic transformation is needed for efficient socioeconomic development with a view to achieving the Sustainable Development Goals, which met the planned target reflected in the proposed programme budget for 2020.

**Proposed programme plan for 2022**

16.277 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will provide knowledge products on how structural economic

<sup>23</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 19)).

transformation can support countries in recovering from the COVID-19 pandemic and will propose tangible policy options in line with the priorities expressed by member States in intergovernmental meetings and the new aspects of economic transformation identified in the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024, including the development of a structural transformation strategy aimed at improving science, technology and innovation, export diversification, productivity, efficiency and competitiveness in the agriculture, manufacturing and services sectors, including tourism. The expected progress is presented in the performance measure below (see table 16.41).

Table 16.41  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Recognition of the need to accelerate structural economic transformation by member States	A holistic framework linking structural economic transformation and sustainable development elaborated by member States	Member States recognized, at the 2020 Economic Forum of the United Nations Special Programme for the Economies of Central Asia, that a more integrated approach to structural economic transformation is needed for efficient socioeconomic development with a view to achieving the Sustainable Development Goals	Member States in the subregion recognize structural economic transformation as one of the key drivers to accelerate progress towards the achievement of the Sustainable Development Goals	Two member States implement structural transformation policies as part of their strategy to recover from the COVID-19 pandemic

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: accelerate action and generate solutions to address gaps in implementing the 2030 Agenda for Sustainable Development in North and Central Asia<sup>24</sup>

### Programme performance in 2020

16.278 The component organized the North and Central Asian Multi-stakeholder Forum on Implementation of the Sustainable Development Goals in September 2020. Participants in the Forum shared their experiences in preparing voluntary national review reports, including through multi-stakeholder consultations, and discussed how to address the challenges of policy alignment and financing gaps and how to stay on track to achieve the Goals in accordance with national policies in the period between voluntary national reviews. The Forum provided an opportunity for building capacity and identifying additional needs, including for training materials, tools and operational frameworks to enable strengthened and accelerated implementation of the

<sup>24</sup> As reflected in the programme budget for 2021 ([A/75/6/Add.1](#)).

2030 Agenda during the crisis. The Forum's outcomes and recommendations will feed into regional and global processes, in particular the 2021 Asia-Pacific Forum on Sustainable Development and the high-level political forum on sustainable development. As a follow-up to the Forum, the component conducted a workshop in December 2020 on the implementation of solutions to address the gaps identified by countries in their voluntary national reports.

16.279 Furthermore, the component prepared a working paper on a framework for identifying drivers of sustainable development in North and Central Asia, in which a step-by-step approach is detailed and qualitative and quantitative methods are used to identify drivers of sustainable development at the country level. The working paper will help decision makers to formulate specific and coherent public policies. In addition, an outcome mapping tool helped to reveal areas of the Goals in which progress was lacking and areas for which a strategic framework was already in place to support interventions.

16.280 The above-mentioned work contributed to references to a more integrated approach to economic transformation being made by Kazakhstan and Uzbekistan in their national strategic documents, which met the planned target reflected in the programme budget for 2021.

#### **Proposed programme plan for 2022**

16.281 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will support member States in developing policies for the achievement of the Sustainable Development Goals through expert group meetings, analytical studies and advisory services, with a focus on identifying gaps in the achievement of the Goals using the framework for identifying drivers of sustainable development in North and Central Asia. The expected progress is presented in the performance measure below (see table 16.42).

**Table 16.42**  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Increased number of member States in the subregion are prepared to submit voluntary national review reports at the high-level political forum on sustainable development in 2019	Strengthened regional cooperation and knowledge-sharing to follow up on and review progress towards the achievement of the Sustainable Development Goals, for example through the twinning programme	References to a more integrated approach to economic transformation are made in national strategic documents of Uzbekistan and Kazakhstan	Member States in the subregion agree on a set of key drivers to accelerate progress towards the achievement of the Sustainable Development Goals	Two member States develop policies or measures towards a more integrated approach to the achievement of the Sustainable Development Goals

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

**Result 3: strengthened sustainable subregional connectivity****Proposed programme plan for 2022**

16.282 For landlocked countries in North and Central Asia, located at the crossroads of large economies such as Europe, South Asia and China, connectivity plays an important role in trade and transport, power generation and ICT. In the Vienna Programme of Action, infrastructure development and maintenance in the areas of transport, energy and ICT are emphasized as a priority for landlocked developing countries. With contributions from the United Nations Development Account, the component has begun to design capacity-building support for Kazakhstan and Kyrgyzstan in the development of sustainable and inclusive policies on transboundary infrastructure connectivity, and the same approach could be applied to other countries of the subregion. The component organized expert group meetings of the working groups of the United Nations Special Programme for the Economies of Central Asia on sustainable transport, transit and connectivity; water, energy and environment; trade; technology for sustainable development; and gender and the Sustainable Development Goals. The component also studied challenges in freight transport, trade and digital connectivity triggered by the COVID-19 pandemic, owing in particular to uncoordinated border closures.

*Lessons learned and planned change*

16.283 The lesson for the component was that its technical assistance needed to be more focused on the use of digital technology to enhance the sustainability of subregional connectivity. In applying the lesson, the component will incorporate strategies for leveraging digital transformation and new technologies in its technical assistance and policy advice to countries to enhance the competitiveness of trade and transport modalities while contributing to a significant reduction in adverse environmental effects. The component will conduct expert group meetings and analytical studies as part of the existing project on regional economic cooperation and integration and a new project on rail digitalization and intermodal transport connectivity. The component will also continue to collaborate and engage with other United Nations entities and programmes, including the United Nations Special Programme for the Economies of Central Asia, and with intergovernmental and subregional platforms to enhance sustainable subregional connectivity.

*Expected progress towards the attainment of the objective, and performance measure*

16.284 This work is expected to contribute to the objective, as demonstrated by the development by member States in the subregion of two policies and measures that promote digital technologies to enhance the sustainability of connectivity (see figure 16.VIII).

Figure 16.VIII

**Performance measure: total number of policies and measures that promote digital technologies to enhance the sustainability of connectivity (cumulative)**

### Legislative mandates

16.285 The list below provides all mandates entrusted to the component.

#### General Assembly resolutions

63/260	Development-related activities	72/283	Strengthening regional and international cooperation to ensure peace, stability and sustainable development in the Central Asian region
--------	--------------------------------	--------	---

### Deliverables

16.286 Table 16.43 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 16.43

#### Component 3: deliverables for the period 2020–2022, by category and subcategory

7. Technical materials on regional cooperation and integration for the landlocked and transit developing countries	1	1	1	1
<b>C. Substantive deliverables</b>				
<b>Databases and substantive digital materials:</b> web page on economic and social development in North and Central Asia for subregional, regional and global access; fact sheets on North and Central Asia for subregional, regional and global access; and substantive blog posts for the ESCAP website for regional and global access.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> press interviews for major publications and events.				
<b>External and media relations:</b> press releases and op-ed articles on the work and activities of the subprogramme component.				
<b>Digital platforms and multimedia content:</b> regular, typically monthly, updating and maintenance of web pages of the subprogramme component for the ESCAP website in five areas, namely, sustainable connectivity, economic transformation, social inclusion and resilience, the United Nations Special Programme for the Economies of Central Asia and the review of the 2030 Agenda; and inputs for ESCAP social media platforms.				

## Component 4

### Subregional activities for development in South and South-West Asia

#### Objective

16.287 The objective, to which component 4 of the subprogramme contributes, is to strengthen regional cooperation and integration for sustainable development, in line with the subregional priorities of South and South-West Asia, including sustainable connectivity, women's economic empowerment and the sustainable graduation of the least developed countries.

#### Strategy

16.288 To contribute to the objective, the component will collaborate with other subprogrammes, relevant agencies, think tanks and subregional organizations in the area of sustainable connectivity, with a focus on transport connectivity and trade and investment facilitation. The component will prepare analytical papers and provide capacity-building support to advance transboundary connectivity among the countries in the subregion, for example, among Bangladesh, India and Nepal, and between the subregion and South-East Asia and Central Asia. The component's work on transport connectivity will also be supported by the road safety project of the United Nations Development Account. The component's work on trade and investment facilitation

will be incorporated into its support for graduating least developed countries to prepare them for post-graduation challenges.

16.289 The component will collaborate with other subprogrammes, networks of women entrepreneurs, subregional organizations and other stakeholders working on women's economic empowerment to enhance the capacity of women-owned micro-, small and medium-sized enterprises to leverage e-commerce and digital marketing tools. In particular, the component will provide access to information and digital tools for women entrepreneurs through a dedicated portal and advanced training on e-commerce. The component will continue to deliver demand-driven assistance to women entrepreneurs on e-commerce and digital marketing tools to enhance the capacity to use these tools and expand their micro-, small and medium-sized enterprises.

16.290 The component will also collaborate with other subprogrammes, planning and statistical agencies of member States, United Nations country teams and subregional organizations to support the achievement of the Sustainable Development Goals and the sustainable graduation of the least developed countries. The component will provide tailored capacity-building for member States and other stakeholders to ensure that challenges such as economic contraction due to the COVID-19 pandemic and disruptions to preferential market access and concessional financing can be met in a coherent manner. The component will continue to deliver demand-driven assistance to Afghanistan and Bhutan as part of strengthening and building the analytical capacity of their think tanks to conduct integrated analysis of the Goals through evidence-based policy analysis. The component will convene subregional consultations on the Goals to facilitate the sharing of good practices and bring out subregional perspectives to feed into the relevant ESCAP knowledge products and forums, such as the Asia-Pacific Forum on Sustainable Development and the high-level political forum on sustainable development, and to support country-level processes, for example, the development and implementation of the United Nations Sustainable Development Cooperation Frameworks, including through contributions to the common country analysis. The component will also leverage the establishment and institutionalization of the South Asia network on the Sustainable Development Goals to ensure regional cooperation and the sharing of good practices on sustainable development. The component's work will help member States to make progress towards achieving the relevant targets of Goals 1, 5, 7–10, 12, 13 and 17.

16.291 The component plans to support member States on issues related to COVID-19 by providing analytical support, policy advice and technical assistance on priorities that were identified during the Fourth South Asia Forum on the Sustainable Development Goals, including sustainable global supply chains and the creation of economic opportunities for women to mitigate the negative impact of COVID-19 and build back better.

16.292 The above-mentioned work is expected to result in:

- (a) Enhanced capacities of least developed countries in South Asia to accelerate progress towards the transition to sustainable graduation by 2024;
- (b) Enhanced knowledge and capacity of women entrepreneurs in South Asia to apply e-commerce platforms to expand their business opportunities and participate in local, regional and global value chains;
- (c) Enhanced connectivity in the subregion, especially for landlocked developing countries and with the contiguous subregions of South-East Asia and North and Central Asia.

16.293 The planned support on issues related to COVID-19 is expected to result in increased capacity of member States for more informed policymaking in formulating national and subregional strategies to mitigate the negative impact of COVID-19.

### **Programme performance in 2020**

16.294 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

#### **Member States assessed their socioeconomic responses to the COVID-19 pandemic**

16.295 The COVID-19 pandemic brought unprecedented challenges to the subregion in achieving the targets of the Sustainable Development Goals, especially Goals 1 and 5. The component reorganized its work in line with the ESCAP framework for the socioeconomic response to COVID-19. The component produced a policy paper on the socioeconomic challenges brought by the COVID-19 pandemic to the South Asian countries, in which it provided guidance on how to achieve the Goals and recommended national policy action and subregional cooperation to recover from the pandemic.

16.296 The component provided a subregional platform for initiating a high-level policy dialogue between the planning and/or economy ministers of South Asian countries and their subregional organizations, such as the South Asian Association for Regional Cooperation and the Bay of Bengal Initiative for Multi-Sectoral Technical and Economic Cooperation, to exchange experiences in addressing challenges posed by the COVID-19 pandemic and make proposals for subregional cooperation. This was followed by a policy dialogue of the heads of South Asian think tanks to discuss the key areas of subregional cooperation to mitigate the impact of COVID-19, and the ESCAP policy paper provided a background for these discussions.

16.297 The component also collaborated with subprogramme 5, subregional organizations of South Asian countries and other international organizations, such as WHO, to organize three webinars on risks from cascading disasters faced by South Asian countries, including the COVID-19 pandemic, cyclones, floods and locust attacks. These discussions allowed the experts and senior officials to identify policy strategies to address the challenges.

#### *Progress towards the attainment of the objective, and performance measure*

16.298 The above-mentioned work contributed to the objective, as demonstrated by Bangladesh, India and Pakistan having taken policy action on economic relief and social protection to support a smooth recovery from the COVID-19 pandemic (see table 16.44).

Table 16.44  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
—	—	India, Bangladesh and Pakistan have taken policy action on economic relief and social protection to support a smooth recovery from the COVID-19 pandemic

## Planned results for 2022

16.299 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### Result 1: regional cooperation for achieving the Sustainable Development Goals in South Asia<sup>25</sup>

#### Programme performance in 2020

16.300 The component conducted analytical work to assess progress towards the achievement of the Sustainable Development Goals, key gaps, challenges and opportunities, including for regional cooperation, providing insights for inclusive, resilient and sustainable recovery from the COVID-19 pandemic. This analytical work informed the discussions at the Fourth South Asia Forum on the Sustainable Development Goals, held in December 2020, at which member States called for transformational changes to address inequalities, in particular gender disparities, to accelerate progress towards achieving the Goals in South Asia.

16.301 The component has also developed the South Asia network on the Sustainable Development Goals and launched a web portal for the network to foster subregional cooperation by sharing good practices and distilling evidence-based research findings and recommendations towards the achievement of the Goals, including those relating to challenges arising from the COVID-19 pandemic, for uptake and use by policymakers. The portal is open to government agencies, think tanks, civil society organizations and other stakeholders in South Asia.

16.302 The above-mentioned work contributed to the establishment of a subregional mechanism for sharing good practices and distilling evidence-based research findings and recommendations for uptake and use by policymakers, which met the planned target reflected in the proposed programme budget for 2020.

#### Proposed programme plan for 2022

16.303 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will conduct analysis of issues relating to the achievement of the Sustainable Development Goals in the subregion and organize expert group meetings to facilitate exchanges of good practices among countries. The expected progress is presented in the performance measure below (see table 16.45).

Table 16.45  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Interest expressed by South Asian stakeholders in developing a cooperation mechanism for supporting the	Specific areas identified for subregional cooperation in the implementation of	A subregional mechanism established for sharing good practices and distilling evidence-based research	Member States in the subregion implement their national development frameworks with the evidence-based	Three member States exchange good practices and learning on the implementation of the Sustainable Development Goals

<sup>25</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 19)).

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
achievement of the Sustainable Development Goals	the Sustainable Development Goals	findings and recommendations for uptake and use by policymakers	research findings and recommendations of ESCAP	using the South Asia network on the Sustainable Development Goals as a platform

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: least developed countries in South Asia are well equipped to mitigate graduation challenges<sup>26</sup>**

### **Programme performance in 2020**

16.304 The component has provided technical assistance and analytical studies to support the three graduating South Asian least developed countries in their sustainable graduation process. The component conducted tailored training to enhance the capacity of South Asian least developed countries to accelerate the achievement of the Sustainable Development Goals and sustainable graduation. The component organized a webinar to enhance the capacity of Bangladesh, together with Bhutan and Nepal, to achieve the Goals and address sustainable graduation challenges. Furthermore, the component published a report highlighting the challenges faced by the three graduating South Asian least developed countries in their sustainable graduation in the context of the COVID-19 pandemic. This report served as an input for the Governments and the United Nations country teams in the three countries to guide their preparations for the session of the Committee for Development Policy in February 2021 and follow-up action in 2021 and 2022. The report was submitted to the Committee for Development Policy as the ESCAP input for the 2021 session and is available on the United Nations least developed countries portal.

16.305 The above-mentioned work contributed to enhancing the capacity of Bangladesh, Bhutan and Nepal for sustainable graduation through tailor-made technical assistance and policy advice from ESCAP, which met the planned target reflected in the programme budget for 2021.

### **Proposed programme plan for 2022**

16.306 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will provide specific and tailored policy advice, including workshops, training, webinars and technical materials, relating to the impact of COVID-19 on the graduation of the least developed countries to assist the South Asian least developed countries in achieving the Sustainable Development Goals and addressing challenges related to graduation. The expected progress is presented in the performance measure below (see table 16.46).

<sup>26</sup> As reflected in the programme budget for 2021 ([A/75/6/Add.1](#)).

Table 16.46  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Bhutan and Nepal qualify for the second time for graduation, while Bangladesh meets all three criteria for graduation for the first time, in the triennial review of 2018	Bangladesh, Bhutan, and Nepal have access to capacity-building to identify the key challenges that they will face in the aftermath of their graduation	Bangladesh, Bhutan and Nepal received tailored technical assistance and policy advice from ESCAP	Bangladesh meets the criteria for graduation in the 2021 triennial review and, together with Bhutan and Nepal, is equipped to mitigate the challenges for smooth and sustainable graduation	The graduating least developed countries incorporate the impact of, and their response to, the COVID-19 pandemic into their smooth transition strategies

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

**Result 3: think tanks in South Asian least developed countries improve their capacity for evidence-based policy analysis to support policymaking to accelerate the achievement of the Sustainable Development Goals**

**Proposed programme plan for 2022**

16.307 For accelerated efforts towards the achievement of the Sustainable Development Goals in South Asia to take effect, analytical capacity must be built, especially in least developed countries such as Afghanistan and Bhutan, to enable the countries to identify and harness the links among the Goals and targets. This analytical capacity is also essential to integrating least developed country graduation strategies with strategies for accelerating the achievement of the Goals and building back better in the aftermath of the COVID-19 pandemic, which threatens to reverse the hard-won development gains of reducing extreme poverty and hunger, with millions of people losing their jobs. Furthermore, the landlocked status of Afghanistan and Bhutan brings additional challenges, such as limited infrastructure connectivity and high transaction costs, to achieving sustainable development and recovering from the pandemic.

16.308 In response to the requests made by the Governments of Afghanistan and Bhutan, the component has been providing assistance, since 2019, in strengthening the capacity of existing and emerging national think tanks for evidence-based policy analysis to support policymaking to accelerate the achievement of the Sustainable Development Goals.

*Lessons learned and planned change*

16.309 The lesson for the component was that, in order to support the sustainability and growth of the capacity of think tanks, the component should focus on enhancing the visibility of their work and securing demand from government agencies. In applying the lesson, the component will facilitate the sharing of the work of think tanks through the South Asia network on the Sustainable Development Goals. The component will build on the work done during 2019–2021 to further support capacity development by providing training, facilitating peer-to-peer learning and contributing to the policy advice provided by the think tanks to their Governments through their research and analysis. The work of the component will also be supplemented by the regular programme of technical cooperation.

*Expected progress towards the attainment of the objective, and performance measure*

16.310 This work is expected to contribute to the objective, as demonstrated by the think tanks in Afghanistan and Bhutan providing input to, and holding informed debates on, strategies for accelerating the achievement of the Sustainable Development Goals and building back better, and by their contributing to forums and debates of subregional think tanks (see table 16.47).

Table 16.47

<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> sessions at the South Asia Economic Summit, the sustainable development conference organized by the Sustainable Development Policy Institute, Pakistan, and other subregional events; a newsletter with updates related to the Sustainable Development Goals in South Asia for subregional, regional and global access; and press interviews for major publications and events.				
<b>External and media relations:</b> press releases and op-ed articles on the work and activities of the subprogramme component.				
<b>Digital platforms and multimedia content:</b> regular, typically monthly, updating and maintenance of web pages of the subprogramme component for the ESCAP website in four areas, namely, regional cooperation for accelerating progress towards achieving the Sustainable Development Goals and building back better, sustainable connectivity, women's economic empowerment and the sustainable graduation of the least developed countries; and inputs for ESCAP social media platforms.				

## Component 5

### Subregional activities for development in South-East Asia

#### Objective

16.313 The objective, to which component 5 of the subprogramme contributes, is to strengthen regional cooperation and integration for sustainable development, in line with the subregional priorities of South-East Asia, including sustainable connectivity, inclusive and equitable societies, the efficient management of natural resources and resilient development.

#### Strategy

16.314 The scope of the component is framed by the partnership between ASEAN and the United Nations to a significant extent. To contribute to the objective, the

component will support the implementation of the Plan of Action to Implement the Joint Declaration on Comprehensive Partnership between the Association of Southeast Asian Nations and the United Nations (2021–2025), as well as the complementarities road map for the period 2020–2025. The component will ensure that strategic and substantive matters are discussed in a timely manner by coordinating high-level dialogues and working-level meetings to ensure the relevance and effectiveness of the analytical work of ESCAP and its technical assistance to the subregion. These subregional processes represent opportunities to address the current challenges and priorities of ASEAN and the United Nations, and to enhance effective coordination among the various agencies and sectoral bodies while ensuring synergy in the implementation of the processes. The component will focus on sustainable connectivity, inclusive and equitable societies, the efficient management of natural resources and resilient development, which are identified in the complementarities road map as priority areas in which ESCAP can add value.

16.315 The component, in collaboration with the relevant subprogrammes of ESCAP, will deliver knowledge products on the regional and subregional perspectives on global issues for the member States in South-East Asia; provide a regional forum for the member States in South-East Asia to share their knowledge with other countries, both as a group and bilaterally; and support the implementation of subregional and regional frameworks. The component will also strengthen cooperation with ASEAN through increased engagement with the ASEAN secretariat and relevant sectoral bodies and committees, and through the ASEAN dialogue and partnerships with external stakeholders on initiatives to achieve the Sustainable Development Goals and subregional goals. The component will support member States in their progress towards the achievement of Sustainable Development Goals 3, 9, 10, 13 and 17.

16.316 The component plans to support member States on issues related to COVID-19 by contributing to the implementation of the ASEAN Comprehensive Recovery Framework to ensure that recovery efforts are in line with the 2030 Agenda and the Sustainable Development Goals. The component will contribute to four of the five broad strategies outlined in the Framework, in cooperation with subprogrammes 2 to 6. The component will coordinate joint substantive programming and dialogues between ESCAP and the ASEAN secretariat in the areas of inclusive business, freight transport connectivity, digital connectivity, social protection and women's economic empowerment.

16.317 The above-mentioned work is expected to result in:

- (a) Enhanced innovation, infrastructure and competitiveness in the ICT sectors of member States to support an economic and social transition towards a truly digital subregion;
- (b) Enhanced dialogue on opportunities for fair and equitable access to social protection, especially for various vulnerable groups, and for improving disability statistics, ageing and disability policies and social protection costing;
- (c) Enhanced policy dialogue and capacity for the sustainable use and management of water and marine resources; the monitoring and prevention of land degradation; and the monitoring of fine particulate matter in air pollution (PM<sub>2.5</sub> and PM<sub>10</sub>) and air quality management;
- (d) Enhanced policy dialogue on sustainable finance.

16.318 The planned support on issues related to COVID-19 is expected to result in improved coordination and coherence of policy proposals and technical assistance provided under the ASEAN Comprehensive Recovery Framework in the subregion.

## Programme performance in 2020

16.319 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **ASEAN COVID-19 recovery plans are aligned with regional cooperation for sustainable development**

16.320 In 2020, prompted by the COVID-19 pandemic, the component, in conjunction with other subprogrammes, reviewed and repurposed many of its deliverables in order to assess the impact of the pandemic, devise an immediate socioeconomic response and develop plans for recovery. In the case of South-East Asia, given that ESCAP is the coordinator of the economic and sociocultural pillars and the cross-sectoral cooperation under the ASEAN-United Nations Plan of Action, the component focused its efforts on ensuring that COVID-19 response and recovery efforts would not be made at the expense of progress towards the achievement of the Sustainable Development Goals. This was especially important, given the scale of the short-term economic impact of the pandemic and the predictions that the subregion's gross domestic product would contract by 4 per cent in 2020. The component therefore worked towards facilitating dialogue and providing strategic and substantive input for the development of the ASEAN Comprehensive Recovery Framework in line with the ambitions of the 2030 Agenda.

16.321 More specifically, the component helped to organize the ASEAN-ESCAP high-level policy dialogue on building a resilient ASEAN economic community in the aftermath of COVID-19. The component assisted in the organization of a high-level dialogue on enhancing complementarities between the ASEAN Community Vision 2025 and the 2030 Agenda, and of the Fourth South-East Asia Multi-stakeholder Forum on Implementation of the Sustainable Development Goals. The component also prepared strategic input for the high-level dialogue on ASEAN post-pandemic recovery and the meetings on women's empowerment and disability inclusion. The organization of these dialogues has resulted in the development of joint work between ESCAP and ASEAN.

#### *Progress towards the attainment of the objective, and performance measure*

16.322 The above-mentioned work contributed to the objective, as demonstrated by the alignment of the broad strategies of the ASEAN Comprehensive Recovery Framework, adopted at the thirty-seventh ASEAN Summit, with the 2030 Agenda (see table 16.49).

Table 16.49  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
—	—	The ASEAN Comprehensive Recovery Framework, aligned with the 2030 Agenda, is adopted at the thirty-seventh ASEAN Summit

## Planned results for 2022

16.323 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: enhanced subregional energy connectivity and accessibility<sup>27</sup>**

#### **Programme performance in 2020**

16.324 The component, in collaboration with subprogramme 9, built on earlier analytical work, including the publication entitled *Statistical Perspectives: Energy and Development in the ASEAN Region*, which provided an overview of energy sectors in the region to inform possible energy connectivity initiatives among ASEAN countries. The component, in collaboration with subprogramme 9 and the ASEAN Centre for Energy, also prepared, as planned, a publication on tracking Goal 7 in the ASEAN region, in which it reported on the status of implementation of Goal 7 by the countries. This publication was acknowledged by the renewable energy subsector network, a working group under the ASEAN Senior Officials Meeting on Energy, and presented at a special session of the ASEAN Energy Business Forum on the margins of the thirty-eighth ASEAN Ministers on Energy Meeting in November 2020.

16.325 The above-mentioned work contributed to further deliberations among member States on the achievement of Goal 7, which did not meet the planned target of ASEAN member States agreeing on solutions to Goal 7-related challenges that can be implemented through subregional cooperation reflected in the proposed programme budget for 2020. The three-way partnership among ESCAP, the ASEAN Centre for Energy and the ASEAN secretariat is still being developed to include substantive and intergovernmental collaboration on energy. In the light of the COVID-19 pandemic and its impact on the region at large, the component, in coordination with relevant subprogrammes, has focused efforts on supporting the development of the ASEAN Comprehensive Recovery Framework in 2020. In the process, the component has provided recommendations for priority initiatives to address the socioeconomic aspects of the recovery, including sustainable energy.

#### **Proposed programme plan for 2022**

16.326 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective and in response to recent developments, the component will work to enhance collaboration and partnerships with ASEAN, including its secretariat, through support for ASEAN utilities and regulators in aligning regional power system integration with the Sustainable Development Goals. The expected progress is presented in the performance measure below (see table 16.50).

---

<sup>27</sup> As reflected in the proposed programme budget for 2020 ([A/74/6 \(Sect. 19\)](#)).

Table 16.50  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
ASEAN member States and the United Nations identify the strategic priorities and measures to be undertaken by both sides to enhance regional cooperation and integration for sustainable development	ASEAN member States agree on the challenges impeding the implementation of Sustainable Development Goal 7	Further deliberations among ASEAN member States on the implementation of Goal 7	ASEAN member States identify strategies to further advance power grid connectivity and energy access	ASEAN utilities and regulators enhance the alignment of regional power system integration with the Sustainable Development Goals

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: strengthened cooperation and relations between ASEAN and ESCAP<sup>28</sup>

### Programme performance in 2020

16.327 The component has established a focus on activities that will assist and support countries at the subregional and national levels in addressing the COVID-19 pandemic. The component organized several high-level meetings with ASEAN and coordinated substantive discussions in collaboration with other subprogrammes. The component has coordinated with other subprogrammes and provided input to the joint report on the Comprehensive Partnership between ASEAN and the United Nations, which was submitted to the ASEAN secretariat and the United Nations Secretariat in September 2020, and to the ASEAN Comprehensive Recovery Framework, which was adopted at the thirty-seventh ASEAN Summit, in November 2020. At the Summit, member States also noted the further strengthening of the Comprehensive Partnership between ASEAN and the United Nations and said that they looked forward to enhancing cooperation under the Plan of Action to Implement the Joint Declaration on Comprehensive Partnership between the Association of Southeast Asian Nations and the United Nations (2021–2025).

16.328 The component, in collaboration with subprogramme 4, provided policy-relevant and scientific assessments, made recommendations on the sustainable management of natural resources in the ASEAN region through analytical products and organized a dedicated expert group meeting to discuss the formation of the ASEAN Resources Panel. This work facilitated the establishment of the Panel at the thirty-first meeting of the ASEAN Senior Officials on the Environment.

16.329 The component also coordinated the contributions from countries to the third Asia-Pacific Forum for South-South and Triangular Cooperation, which focused on responses to the COVID-19 pandemic.

16.330 The above-mentioned work contributed to the implementation of the complementarities road map for the period 2020–2025, including the establishment of the ASEAN Resources Panel, to enhanced cooperation between ASEAN and other subregions and to the adoption of the Plan of Action to Implement the Joint Declaration on Comprehensive Partnership between the Association of Southeast Asian Nations and the United Nations (2021–2025), which met the planned targets reflected in the programme budget for 2021.

<sup>28</sup> As reflected in the programme budget for 2021 ([A/75/6/Add.1](#)).

### Proposed programme plan for 2022

16.331 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will continue to coordinate the work of subprogrammes in the implementation of the ASEAN-United Nations Plan of Action (2021–2025), the complementarities road map and the ASEAN Comprehensive Recovery Framework. The expected progress is presented in the performance measure below (see table 16.51).

Table 16.51  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
<ul style="list-style-type: none"> <li>• Conceptualization of the draft complementarities road map for the period 2020–2025</li> </ul>	<ul style="list-style-type: none"> <li>• Noting of the complementarities road map 2020–2025 by ASEAN leaders</li> <li>• Formulation of the Plan of Action to Implement the Joint Declaration on Comprehensive Partnership between the Association of Southeast Asian Nations and the United Nations (2021–2025) begins in line with the road map</li> </ul>	<ul style="list-style-type: none"> <li>• Implementation of the road map, including the establishment of the ASEAN Resources Panel</li> <li>• Enhanced cooperation between ASEAN and other subregions, e.g., ASEAN event at the regional South-South cooperation meeting</li> <li>• Noting of the Plan of Action</li> </ul>	<ul style="list-style-type: none"> <li>• Implementation of the Plan of Action with an increased number of joint ASEAN-United Nations initiatives</li> </ul>	<ul style="list-style-type: none"> <li>• Implementation of the Plan of Action with one additional joint ASEAN-United Nations initiative</li> </ul>

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: empowering women entrepreneurs in ASEAN to overcome the socioeconomic impact of the COVID-19 pandemic

#### Proposed programme plan for 2022

16.332 The component proposed collaborations with ASEAN at the tenth meeting of the ASEAN Coordinating Committee on Micro, Small and Medium Enterprises, held in December 2020. Member States expressed specific interest in innovative policies for addressing the barriers faced by women-owned micro-, small and medium-sized enterprises in ASEAN.

#### *Lessons learned and planned change*

16.333 The lesson for the component was that the previous practice of presenting fully developed projects led to less-than-expected involvement of beneficiaries and that conceptualizing projects together with beneficiaries was key for their successful implementation. In applying this lesson, the component will involve the member States at the development stage to ensure the successful delivery and enhance the ownership of projects. In 2022, the component, in collaboration with subprogramme 6, will work on developing a partnership with the ASEAN Coordinating Committee on Micro, Small and Medium Enterprises to develop policy guidelines for addressing the specific needs of women entrepreneurs in policies and regulations on micro-, small

and medium-sized enterprises in the ASEAN region. This activity is in line with the ASEAN Strategic Action Plan for Small and Medium-sized Enterprise Development (2016–2025) and the ASEAN-United Nations Plan of Action (2021–2025).

*Expected progress towards the attainment of the objective, and performance measure*

16.334 This work is expected to contribute to the objective, as demonstrated by the commitment of the ASEAN member States to implementing the project on enhancing access, inclusion and liquidity for micro-, small and medium-sized enterprises and women entrepreneurs (see table 16.52).

Table 16.52

**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
—	—	Member States expressed interest in initiatives to address barriers faced by women entrepreneurs	Member States have increased access to tools such as guidelines for addressing the needs of women entrepreneurs in policies on micro-, small and medium-sized enterprises in the ASEAN region	Two ASEAN member States implement projects with a focus on enhancing the financial access and inclusion of women entrepreneurs

## Legislative mandates

16.335 The list below provides all mandates entrusted to the component.

*General Assembly resolutions*

63/260 Development-related activities

## Deliverables

16.336 Table 16.53 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 16.53

## Subprogramme 9

### Energy

#### Objective

16.337 The objective, to which this subprogramme contributes, is to ensure access to affordable, reliable, sustainable and modern energy for all in Asia and the Pacific by enhancing member States' capacity for renewable energy, energy efficiency, energy access and energy connectivity.

#### Strategy

16.338 To contribute to the objective, the subprogramme will continue to support member States in achieving the sustainable energy targets set out in Sustainable Development Goal 7. It will do so by improving the national expert Sustainable Development Goal tool for energy planning, an integrated modelling tool designed to assist policymakers in making informed decisions on their policy mix for energy access, energy efficiency and renewable energy to deliver on the targets of Goal 7 and the emission reduction goals under the Paris Agreement.

16.339 The subprogramme will also disseminate information on global and regional trends and new developments related to increasing access to energy, increasing the

share of renewable energy and improving energy efficiency; and on policy tools and approaches to promote the attainment of the targets of Goal 7, in partnership with international development agencies and development banks. Through its work, the subprogramme will continue to produce evidence-based policy guidance on the benefits of access to electricity, which enables the use of appliances for productive work and improves the functioning of schools, hospitals and other facilities, and on the benefits of access to clean cooking, which reduces the adverse health effects of cooking among women and children and the burden of unpaid fuel collection work, in particular for women and children in rural communities. The subprogramme will focus its capacity-building efforts on small island developing States, least developed countries and landlocked developing countries to accelerate progress towards inclusive access to clean cooking. The subprogramme will produce policy guidelines at the national level to increase access for poor households to clean cooking fuels. The Asia Pacific Energy Portal will offer up-to-date data and indicators, policy information and energy infrastructure mapping to help to enhance the evidence base for the achievement and monitoring of Goal 7 and interlinked Goals. The work of the subprogramme will contribute towards achieving Goals 5, 7 and 9.

16.340 The subprogramme will also work with member States and subnational authorities to improve energy efficiency, increase the uptake of renewable energy and enhance local capacity to develop and implement sustainable energy in urban areas. The work of the subprogramme in this area will comprise data collection and analysis, including methodology design and recommendations on policy and technology solutions tailored to the local context, and capacity-building for decision makers and planners at the local authority level. Furthermore, the subprogramme will facilitate peer-to-peer exchanges and partnerships in the areas of energy efficiency and renewable energy. This work will culminate in the development of strategies by member States for a transition towards lower carbon emissions.

16.341 The subprogramme will also facilitate international cooperation on energy connectivity in support of achieving Goals 7 and 17. Energy connectivity is a critical tool for supporting the energy transition, given that it provides an opportunity to reduce energy costs, improve energy security and increase the integration of renewable energy. The subprogramme will produce and contribute to the development of knowledge products on the benefits and implications of energy connectivity for energy security and resiliency, affordability and sustainability. Capacity-building activities will focus on developing a broader understanding of the benefits of energy connectivity and how to achieve them, with a view to encouraging the development of energy connectivity efforts, in particular increased power system integration. The subprogramme will also facilitate intergovernmental dialogue and provide recommendations on policies, legislation and mechanisms needed for connectivity to enable and enhance the transition to sustainable energy systems. The draft regional road map on power system connectivity, which will be submitted to the Committee on Energy for endorsement at its third session, will strengthen partnerships among agencies and member States by providing a clear set of strategies for increasing connectivity, including the sharing of policy and investment information and data related to energy connectivity.

16.342 One of the most affected economic sectors during the COVID-19 crisis has been the energy sector, which has seen the highest drop in energy demand of the past 70 years. The crisis has also highlighted the vulnerabilities of the energy sector to pandemics and other crises, as well as the vulnerability of other critical infrastructure that depends on energy to function. While in the short term the pandemic has affected the demand for fossil fuel energy more than for renewables, the consequences of the pandemic have affected the long-term investment outlook for energy, including sustainable energy projects.

16.343 The subprogramme plans to support member States on issues related to COVID-19 by offering policy options and analysis to strengthen the resilience of the energy sector to future crises on the basis of lessons learned from past crises, including the COVID-19 pandemic, while ensuring continued progress towards the achievement of Goal 7 and the objectives of the Paris Agreement on climate change.

16.344 The above-mentioned work is expected to result in:

(a) Enhanced capacity among member States to develop evidence-based policies to enable energy transition, in particular the capacity to plan for and realize nationally appropriate targets to advance nationally determined contributions to the Paris Agreement;

(b) Increased acceptance of evidence-based policies, strategies and investment plans to promote energy efficiency and renewable energy at the city level for a transition towards low-carbon economies;

(c) Greater capacity of member States to successfully advance energy access and enable ensuing socioeconomic benefits;

(d) Greater energy connectivity in the region.

16.345 The planned support on issues related to COVID-19 is expected to result in member States incorporating options and measures to enhance the resilience of the energy sector into national and local strategies.

## **Programme performance in 2020**

16.346 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Increased awareness of the potential benefits of power system connectivity in four subregions of the Asia-Pacific region**

16.347 The subprogramme, in collaboration with the subregional offices of South-East Asia, East and North-East Asia, North and Central Asia and South and South-West Asia, developed a set of reports examining subregional perspectives on cross-border power connectivity in order to broaden the understanding of policymakers of the benefits of power system integration in each subregion. In the subregional analyses, which took into account each subregion's unique context, a range of challenges and opportunities were identified, and policy recommendations were provided to improve power connectivity as an enabler of energy access and energy transition.

16.348 The subprogramme held consultative meetings with government officials and experts from each subregion to review and discuss technical issues related to the development of policy recommendations. The subprogramme ensured that clear linkages were established in each report to the achievement of Goal 7, in particular increasing the share of renewable energy in the energy mix and reducing greenhouse gas emissions. In East and North-East Asia, the subprogramme and component 2 have begun to collaborate to convert political commitments within the framework of the North-East Asia Regional Power Interconnection and Cooperation Forum into a subregional intergovernmental agreement.

16.349 These reports and consultative meetings also provided the basis for the publication entitled *Electricity Connectivity Road Map for Asia and the Pacific: Strategies towards Interconnecting the Region's Grids*. This work has also supported

the revision of the draft regional road map on power system connectivity. Furthermore, the secretariat published *Regional Power Grid Connectivity for Sustainable Development in North-East Asia: Policies and Strategies*, which provided an analysis of 130 studies and gave policymakers and other stakeholders an overview of the potential benefits of regional power grid interconnection in the subregion and a set of recommendations designed to guide and facilitate increased cooperation on connectivity among the Governments of North-East Asia.

*Progress towards the attainment of the objective, and performance measure*

16.350 The above-mentioned work contributed to the objective, as demonstrated by the agreement of member States to submit the draft regional road map on power system connectivity, thereby promoting cross-border electricity connectivity for sustainable development, for endorsement by the Committee on Energy at its third session (see table 16.54).

Table 16.54

**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
Political willingness to initiate a process to develop a regional road map on energy connectivity demonstrated through the adoption of the Ministerial Declaration on Regional Cooperation for Energy Transition towards Sustainable and Resilient Societies in Asia and the Pacific at the second Asian and Pacific Energy Forum	Member States provided inputs to a draft regional road map to inform policy dialogue on the regional approach to power connectivity	Member States reviewed the draft road map at an informal consultative meeting and recommended its submission to the Committee on Energy for consideration at its third session

**Planned results for 2022**

16.351 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

**Result 1: changing course: Goal 7 national road maps to set Asia and the Pacific on track for sustainable energy by 2030<sup>29</sup>**

**Programme performance in 2020**

16.352 The subprogramme provided capacity-building support to member States, including toolkits to support the development of enabling policies and strategies to attain each target of Goal 7 and conducted training for the development of Goal 7 road maps. Furthermore, the subprogramme incorporated into the toolkits issues related to interlinkages among the targets of Goal 7 and between Goal 7 and other Goals, such as Goals 1 and 13.

16.353 The above-mentioned work contributed to three finalized Goal 7 national road maps, without a further increase in 2020, which did not meet the planned target of

<sup>29</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 19)).

nine Goal 7 national road maps in the Asia-Pacific region reflected in the proposed programme budget for 2020. The scope of the national road maps has been expanded to include an assessment of the impacts of the COVID-19 pandemic on energy scenarios, and policy recommendations have been adjusted to include pandemic response measures alongside the Goal 7-focused actions. Data collection has proved to be complex in many countries, with more time taken than expected to assemble the datasets necessary to conduct the analysis. The subprogramme will respond to the request of the South Pacific Community to train its staff on the use of the tool with a view to developing national road maps in the Pacific.

### Proposed programme plan for 2022

16.354 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will provide tailored technical assistance to member States, upon request, in developing national strategies to address the gap between the existing energy policies and the targets of Goal 7, including ensuring access to electricity and clean cooking fuels and technologies, enhancing energy efficiency and increasing the uptake of renewable energy, which are linked to the implementation of nationally determined contributions under the Paris Agreement. This work will include technical support for the development of Goal 7 national road maps and capacity-building on modelling, energy financing and the implementation of clean energy strategies. The expected progress is presented in the performance measure below (see figure 16.IX).

Figure 16.IX

**Performance measure: total number of Goal 7 national road maps in the Asia-Pacific region (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: evidence-based and people-focused planning for sustainable energy<sup>30</sup>**

### **Programme performance in 2020**

16.355 The subprogramme has developed knowledge products on access to electricity and cleaner fuel, especially in rural areas, and has initiated a series of national workshops to support countries in assessing the strategies and policies necessary to address universal access to clean fuels and technologies. In 2020, the subprogramme conducted a systematic review of clean cooking and quantified the impact of clean cooking programmes and policies on health impacts and the adoption of clean cooking practices across 46,115 households globally. As part of the review, the subprogramme identified the technologies and programmes that work, as well as the key barriers to reducing adverse health impacts and increasing the adoption of clean cooking practices. Its findings may be used to inform future programmes and policies. The subprogramme then analysed various policies and strategies on clean cooking fuel and technologies in South-East Asian countries to identify their effectiveness in creating an enabling environment for the promotion of clean cooking. The subprogramme also conducted data-collection and stakeholder mapping exercises in multiple countries with a view to identifying existing evidence-based policies for attaining universal access. The subprogramme and its partners identified key challenges and opportunities, as well as appropriate stakeholders across health, energy and environment portfolios at the national and regional levels to exchange views and experiences and to communicate the urgency of clean cooking to energy policymakers.

16.356 The above-mentioned work contributed to three Goal 7 national road maps in the Asia-Pacific region, which did not meet the planned target of nine Goal 7 national road maps in the Asia-Pacific region reflected in the programme budget for 2021. Not all countries have the capacity to obtain access to clean cooking, and national studies on clean cooking have proved necessary to contribute to the development of Goal 7 national road maps for countries with special needs. These reports included strategies for attaining universal access to clean cooking fuel and technologies.

### **Proposed programme plan for 2022**

16.357 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will conduct studies on clean cooking in two additional countries in 2021. In 2022, three additional countries will be analysed, with priority given to countries with special needs in the Asia-Pacific region. Furthermore, the subprogramme will provide policy analysis on clean cooking and recommendations to accelerate efforts to reach the target by 2030. The expected progress is presented in the performance measure below (see figure 16.X).

<sup>30</sup> As reflected in the programme budget for 2021 ([A/75/6/Add.1](#)).

Figure 16.X

**Performance measure: total number of Goal 7 national road maps in the Asia-Pacific region that include strategies for attaining universal access to clean cooking fuel and technologies (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: localization of Goal 7: evidence-based energy efficiency and renewable strategies for urban areas**

#### **Proposed programme plan for 2022**

16.358 Localizing the Sustainable Development Goals is key to making the goals relevant and real for communities, households and individuals, including those who are most at risk of being left behind. Localization is the process of taking into account subnational contexts in the implementation of the 2030 Agenda, from setting goals and targets, to determining the means of implementation and using indicators to measure and monitor progress. Effective policy development at the national and subnational levels is therefore crucial for achieving the Goals and meeting their underlying targets. The subprogramme, in partnership with UNEP, developed an analytical framework for establishing a baseline and tracking progress in cities under each target of Goal 7. In 2020, 19 South-East Asian cities were chosen, on the basis of a survey administered by the subprogramme, to prepare fact sheets on Goal 7 localization, known as “snapshots”, addressing the interlinkages of this Goal with other Goals. The 19 snapshots were used to select five cities to conduct detailed studies, which are expected to be completed in 2021.

#### *Lessons learned and planned change*

16.359 The lesson for the subprogramme was that there is a high demand for support on local strategies to complement the Goal 7 national road maps, as cities differ significantly in their progress and efforts towards the localization of Goal 7. The subprogramme identified that there is demand for capacity-building and access to financial resources to support the implementation of and mechanisms to complement coordination efforts among the national, subnational and local levels of governance and robust energy data-collection and monitoring systems.

16.360 In applying the lesson, the subprogramme will develop comprehensive city road maps on Goal 7. The subprogramme will also publish the results of the analysis of the localization of Goal 7 in the participating cities and will organize a regional meeting to

share the experience of South-East Asia in developing strategies to support the attainment of Goal 7. In 2022, the subprogramme will further support the cities in identifying areas for action to accelerate their progress towards achieving the targets of Goal 7. In order to provide robust recommendations on such areas, tailored to the local context of each city under analysis, the subprogramme will conduct detailed studies with the application of integrated modelling of the Goals using the national expert Sustainable Development Goal tool for energy planning. The subprogramme will also support the enhancement of capacity of subnational and local governments and other relevant stakeholders for the localization of Goal 7 through e-learning modules, which will be available for any city in the world and will enable the engagement of more cities in the region. In this way, the subprogramme will also be able to offer capacity-building support to cities that may still be affected by travel restrictions related to the COVID-19 pandemic.

*Expected progress towards the attainment of the objective, and performance measure*

16.361 This work is expected to contribute to the objective, as demonstrated by the uptake by selected cities of 10 Goal 7 city road maps that provide detailed analysis and development strategies for transiting to a low carbon future (see figure 16.XI).

Figure 16.XI

**Performance measure: total number of localized Goal 7 city road maps taken up by Asia-Pacific cities (cumulative)**

## Legislative mandates

16.362 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolutions*

65/151	International Year of Sustainable Energy for All	75/221	Ensuring access to affordable, reliable, sustainable and modern energy for all
67/215	Promotion of new and renewable sources of energy		

*Economic and Social Council resolutions*

2011/14	Promoting regional cooperation for enhanced energy security and the sustainable use of energy in Asia and the Pacific	2013/19	Conclusion of the work of the Commission on Sustainable Development
---------	---	---------	---

*Economic and Social Commission for Asia and the Pacific resolutions*

64/3	Promoting renewables for energy security and sustainable development in Asia and the Pacific	70/9	Implementation of the outcomes of the first Asian and Pacific Energy Forum
67/2	Promoting regional cooperation for enhanced energy security and the sustainable use of energy in Asia and the Pacific	73/8	Strengthening regional cooperation for sustainable energy development in Asia and the Pacific
68/11	Connectivity for energy security	74/9	Implementation of the outcomes of the Second Asian and Pacific Energy Forum

## Deliverables

16.363 Table 16.55 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 16.55

**Subprogramme 9: deliverables for the period 2020–2022, by category and subcategory**

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>1</b>	<b>1</b>	<b>2</b>	<b>1</b>
1. Reports for ESCAP	1	1	1	1
2. Reports for the Committee on Energy	–	–	1	–
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>10</b>	<b>6</b>	<b>16</b>	<b>10</b>
3. Meetings of the Committee on Energy	–	–	6	–
4. Expert working group meetings to support the achievement of Sustainable Development Goal 7	4	1	4	4
5. Expert working group meetings on energy connectivity and regional cooperation	4	4	4	4
6. Meetings of the United Nations Special Programme for the Economies of Central Asia Working Group on Water, Energy and Environment (energy-related issues)	2	1	2	2
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>3</b>	<b>5</b>	<b>2</b>	<b>2</b>
7. Capacity-building projects on the implementation of Goal 7	3	5	2	2
<b>Seminars, workshops and training events</b> (number of days)	<b>1</b>	<b>1</b>	<b>1</b>	<b>1</b>
8. Policy dialogues on energy	1	1	1	1
<b>Publications</b> (number of publications)	<b>1</b>	<b>1</b>	<b>1</b>	<b>4</b>
9. Publications on energy	1	1	1	4
<b>Technical materials</b> (number of materials)	<b>1</b>	<b>2</b>	<b>1</b>	<b>2</b>
10. Technical materials on energy	1	2	1	2
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> policy advice to all member States, upon request, on the implementation of Goal 7.				

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>Databases and substantive digital materials:</b> regular, typically monthly, updates of the Asia Pacific Energy Portal, including policy information, data and infrastructure maps for regional and global access; substantive blog posts for the ESCAP website for regional and global access.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> information materials on subregional statistical perspectives on sustainable energy targeted at government officials and technical experts in the region; and press interviews for major publications and events.				
<b>External and media relations:</b> press releases and op-ed articles on the work and activities of the subprogramme.				
<b>Digital platforms and multimedia content:</b> regular, typically monthly, updating and maintenance of web pages of the subprogramme for the ESCAP website in six areas, namely, renewable energy, energy efficiency, cleaner use of fossil fuels, access to electricity, access to clean cooking, and energy connectivity and regional cooperation; and inputs for ESCAP social media platforms.				

## **Programme 17**

### **Economic development in Europe**

#### **Overall orientation**

##### **Mandates and background**

17.1 The Economic Commission for Europe (ECE) is responsible for facilitating economic integration and cooperation among its member States and promoting sustainable development and economic prosperity in the ECE region. The mandate derives from the priorities established in relevant Economic and Social Council resolutions, including on the workplan on reform of ECE and the outcome of the review of the 2005 reform of ECE (resolutions 2006/38 and 2013/1, respectively), and Council resolution 36 (IV). The ECE region continues to face economic and environmental challenges in addressing the complexity of achieving the Sustainable Development Goals, which remain a source of primary concern to member States. The Commission provides a regional intergovernmental platform from which to address these challenges, such as promoting sustained economic growth and sustainable mobility in the region, facilitating trade and economic integration, protecting the environment, ensuring a flexible and efficient energy supply, strengthening the capacity for measuring sustainable development, building urban sustainability and addressing the implications of demographic trends. The work of the Commission is grounded in many of its conventions, norms and best practices that provide sustainable solutions to problems in areas critical to sustainable development, including those spanning national borders. Apart from serving as a platform for Governments and other stakeholders to collaborate in developing legal instruments and formulating policies for sustainable development, ECE provides specialized and demand-driven technical assistance to build the capacity of countries to implement these instruments, policies and best practices, and facilitates their uptake. ECE support aimed at developing the capacity of Governments to formulate and implement policies for sustainable development is also provided through the implementation of capacity-building activities and projects under the regular programme of technical cooperation and the United Nations Development Account.

##### **Strategy and external factors for 2022**

17.2 ECE aims to promote regional cooperation and integration as a means of achieving sustainable development in the ECE region. Its intergovernmental bodies, which comprise the Commission and its sectoral committees, provide the foundation for ECE support for national Governments and other stakeholders in advancing the achievement of the Sustainable Development Goals. By convening the annual Regional Forum on Sustainable Development, ECE also provides a region-wide multi-stakeholder platform for the follow-up and review of the Goals, focusing on peer learning and the exchange of practical solutions for achieving sustainable development. The work of ECE is aligned with the Addis Ababa Action Agenda of the Third International Conference on Financing for Development, the Vienna Declaration and the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024 and the New Urban Agenda.

17.3 The strategy of the programme is based on the implementation of core interlinked functions that are consistent with the legislative mandates of ECE, namely, policy dialogue, normative work and technical cooperation. In line with the principles of the reform of the United Nations development system at the regional level, in implementing its strategy in 2022, ECE will provide a neutral platform for policy

dialogue to address multi-country, transboundary and regional economic and environmental issues among its 56 member States. The normative work of the programme will focus on the development and implementation of international legal instruments, norms and standards in areas critical to sustainable development, and on the identification and dissemination of best practices within and outside the region. Through technical cooperation in its areas of expertise, the programme will provide integrated policy advice, normative support and capacity-building, aimed at expanding the use of its normative outputs, facilitating the achievement of the Sustainable Development Goals at the country level and achieving multiplier effects by targeting cross-border issues.

17.4 The strategy of the programme is achieved through an integrated approach to sustainable development, which builds on synergies and the results-oriented work of its eight subprogrammes, namely, environment; transport; statistics; economic cooperation and integration; sustainable energy; trade; forests and the forest industry; and housing, land management and population.

17.5 The work of the ECE subprogrammes is aligned with specific Sustainable Development Goals. Identifying and exploiting cross-sectoral synergies of the 2030 Agenda for Sustainable Development and engaging multiple actors for joint action will be critical to accelerating progress in achieving the Goals and will remain a key strategic focus in the future work of ECE. To that end, the Commission will continue to leverage its integrated approach by providing multisectoral policy advice and capacity-building through cross-sectoral collaboration among its eight subprogrammes in four nexus areas at which multiple Goals converge, namely: (a) the sustainable use of natural resources; (b) sustainable and smart cities for all ages; (c) sustainable mobility and smart connectivity; and (d) measuring and monitoring progress towards achieving the Goals.

17.6 In 2022, the programme will continue to provide support to its member States in addressing economic and environmental challenges of achieving the Sustainable Development Goals. Specific attention will be placed on promoting solutions that help to address environmental pressures while ensuring economic prosperity – an ongoing challenge for the ECE region that is central to advancing sustainable development. The Commission will actively contribute to the decade of action for the Goals in the ECE region by engaging its convening power, normative production and technical cooperation, by leveraging its partnerships and best expertise from its networks of experts and by serving as a knowledge hub to promote integrated and cross-sectoral solutions for achieving the Goals. Taking into account a significant environmental footprint of the economies in the ECE region, the Commission will also focus its attention on making progress towards a circular economy and the sustainable use of natural resources, which member States agreed would be the theme of the Commission session to be held in April 2021. ECE will also continue its work to support the efforts of member States to ensure a longer-term recovery from the coronavirus disease (COVID-19) pandemic, bearing in mind that, as the region recovers from this crisis, it has a unique opportunity to build back sustainably.

17.7 For 2022, the ECE planned deliverables and activities reflect the known and anticipated challenges related to COVID-19 that are being faced by member States. Such planned deliverables and activities include: (a) developing policy analyses and recommendations for member States on issues related to the COVID-19 economic recovery phase; (b) broadening and adapting the ECE legally binding instruments, standards and sustainable resource management frameworks to the post-COVID-19 realities and member State needs; (c) assessing lessons learned, implementing capacity-building activities and promoting exchanges of experiences and good practices, including by refocusing and/or adapting existing activities, to support member States in their efforts to build a more resilient, sustainable and productive

economy in the future; and (d) developing studies and publications and organizing webinars and panel discussion on how different sectors of economy can contribute to building back better economies and more resilient cities and communities. Specific examples of such planned deliverables and activities are provided under subprogrammes 1 to 8. The support provided to member States on issues related to COVID-19 is expected to contribute to planned results for 2022, as described under subprogrammes 1, 3, 6, and 8.

17.8 With regard to cooperation with other entities at the global, regional, national and local levels, ECE will build on its close cooperation with international and regional organizations and other regional actors, such as the Organisation for Economic Co-operation and Development (OECD), the Organization for Security and Cooperation in Europe, the European Union and the Eurasian Economic Union. ECE will also strengthen its partnerships with the private sector and civil society organizations, think tanks and the academic sector in order to facilitate the Commission's policy dialogue and normative work and to engage them in the implementation by member States of the 2030 Agenda.

17.9 With regard to inter-agency coordination and liaison, ECE will continue to play a key role in coordinating regional United Nations system entities. Following the establishment of the regional collaborative platform for Europe and Central Asia as an outcome of the repositioning of the United Nations development system at the regional level, ECE will co-lead the platform and work as part of the secretariat servicing the collaborative platform, aimed at promoting joint action and closer cooperation among United Nations regional entities and their partners in addressing regional, cross-cutting policy issues, offering integrated policy advice and providing regional perspectives at the global level. This work will benefit from continued strategic partnerships and joint initiatives, programmes and projects established by ECE with other United Nations entities and international financial institutions, for example, the Food and Agriculture Organization of the United Nations (FAO), the United Nations Conference on Trade and Development (UNCTAD), the United Nations Environment Programme, the United Nations Development Programme, the International Trade Centre, the World Trade Organization and the World Bank. ECE will actively engage in issue-based coalitions aimed at facilitating concerted action between various United Nations agencies and partners on the operational level. Cooperation with other regional commissions will be pursued through joint initiatives, programmes and projects so as to use knowledge management for better results. The United Nations Special Programme for the Economies of Central Asia, implemented jointly by ECE and the Economic and Social Commission for Asia and the Pacific, will serve as the major framework for cooperation with other relevant stakeholders in Central Asia. At the country level, ECE will work closely with the resident coordinators and United Nations country teams in 17 United Nations programme countries in the ECE region to seek opportunities for joint programmes and projects in response to country demands, including on the impact of COVID-19, through social and economic response plans prepared by United Nations country teams. ECE will also continue its active engagement as part of the 17 United Nations country teams in the region through the United Nations Sustainable Development Cooperation Frameworks. The programme will also promote interregional, including South-South, and triangular cooperation.

17.10 With regard to the external factors, the overall plan for 2022 is based on the following planning assumptions:

(a) Member States continue to support the work of ECE and give high priority to regional and subregional cooperation and integration, with a view to achieving sustainable development;

(b) All relevant stakeholders at the national level have the political will to cooperate in implementing ECE legal instruments, norms and standards;

(c) Voluntary resources continue to be available.

17.11 With regard to the COVID-19 pandemic, the programme plan is based on the assumption that implementation of the proposed deliverables and activities for 2022 will be feasible. However, if the pandemic were to have an impact on the planned deliverables and activities, they would be adjusted during 2022 within the scope of the overall objectives, strategies and mandates. Any such adjustments would be reported as part of the programme performance information.

17.12 ECE integrates a gender perspective in its operational activities, deliverables and results, as appropriate. Its work in this area is intended to support member States in the achievement of Sustainable Development Goal 5. In 2022, all sectoral committees governing the ECE subprogrammes will include gender mainstreaming in their work agendas, all ECE technical cooperation projects will be assessed against their impact on gender and the Commission will continue its work on gender and economy, including capacity-building activities for women entrepreneurs from Central Asia. Furthermore, all subprogrammes will continue to mainstream gender into their substantive work and promote the participation of women in all meetings and workshops.

17.13 With regard to disability inclusion, in line with the United Nations Disability Inclusion Strategy and General Assembly resolution [74/144](#), ECE integrates disability inclusion into its operational activities, deliverables and results, as appropriate. Through the work of its subprogrammes, ECE will continue to mainstream relevant inclusiveness aspects into its programmes and projects and will consider disability-related perspectives in the development of norms and standards.

## **Programme performance in 2020**

### **Impact of COVID-19 on programme delivery**

17.14 During 2020, the COVID-19 pandemic had an impact on the planned deliverables and activities of ECE, compromising its convening capacity and norm-setting work. The impact included: (a) a significantly reduced number of ECE intergovernmental meetings with interpretation (from three to one meeting a day) as a result of a combination of COVID-19 response measures and liquidity constraints, which prevented the United Nations Office at Geneva from providing the necessary conference services, including interpretation; (b) meetings and capacity-building initiatives postponed beyond 2020 or cancelled; and (c) a change in the mode of delivery of meetings and capacity-building workshops from in-person to virtual or a hybrid format, with no or reduced interpretation. Specific examples of the impact are provided under subprogrammes 1 to 8. The change in approach and postponement and cancellation of planned deliverables and activities also had an impact on the expected results for 2020, as described in the programme performance under subprogrammes 3, 4, 5 and 7.

17.15 At the same time, however, some planned deliverables and activities were modified, or new activities identified during 2020, within the overall scope of the objectives of the subprogrammes, in order to support member States on issues related to the COVID-19 pandemic. These included: (a) the development of an ECE action framework for responses to the COVID-19 crisis comprising 13 emergency instruments relevant for the immediate response to the crisis and 55 medium- and long-term measures that could be used to reduce risk and “recover better”; (b) the launch of an interactive online platform on COVID-19 and official statistics on the

ECE website; (c) the creation of an observatory on border crossing status due to COVID-19, the establishment of the multidisciplinary advisory group on transport responses to the COVID-19 crisis and an early deployment of the paperless and contactless eTIR international system; (d) adapting the overall theme of the first Forum of Mayors, held on 6 October 2020, to amplify local solutions and strengthen the resilience of cities to emergencies, including to COVID-19; (e) support for member States in addressing the economic and social impacts of the COVID-19 crisis through projects and activities funded from the United Nations Development Account, the regular programme of technical cooperation and the COVID-19 multi-partner trust fund; (f) the launch of a website for sharing information on food loss/waste threats in member States and collecting information that could support Governments in overcoming the impact of COVID-19 on international trade; (g) the initiation of studies on and rapid assessments of the COVID-19 impact in areas crucial to member States; and (h) the provision of COVID-19-related information and lessons learned through publications, webinars, panel discussions and briefings to member States. Specific examples of the modified/new activities are provided under subprogrammes 1 to 4 and 6 to 8. The modified and new deliverables and activities contributed to results in 2020, as described in the programme performance under subprogrammes 1 to 4, 6 and 8.

17.16 Reflecting the importance of continuous improvement and responding to the evolving needs of member States, ECE will mainstream lessons learned and best practices related to the adjustments and adaptation of its programme owing to the COVID-19 pandemic. Specific examples include the adoption of mitigating measures by adjusting, where possible, ECE methods of work and approaches to developing its normative, policy guidance and other products. In particular, ECE organized official intergovernmental meetings either as English-only informal consultations or hybrid/virtual meetings with reduced servicing capacity, including interpretation facilities. While it helped to ensure business continuity, that adjustment reduced the networking opportunities for participants that would, in general, support the negotiation and decision-making process. It also reduced the participation of delegations from member States where English was not an official language, thus affecting both the normative work and the sharing of national experiences and lessons learned. By engaging in an informative learning curve on how to conduct United Nations business online, ECE also organized new webinars and online capacity-building workshops targeted at the same groups of stakeholders and experts that used to participate in the work of ECE. While not all areas of work lent themselves to online approaches, including owing to the lack of interpretation services and differences in time zones, for those topics and settings that did there were significantly higher rates of participation by experts, improved control of agendas and more cross-cutting themes discussed. On the basis of those lessons, ECE will build on the advantages of virtual and in-person interactions while minimizing their relevant shortcomings.

## Legislative mandates

17.17 The list below provides all mandates entrusted to the programme.

### *General Assembly resolutions*

66/288	The future we want	69/277	Political declaration on strengthening cooperation between the United Nations and regional and subregional organizations
67/10	Cooperation between the United Nations and the Eurasian Economic Community		
67/290	Format and organizational aspects of the high-level political forum on sustainable development	69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development (Addis Ababa Action Agenda)

70/1	Transforming our world: the 2030 Agenda for Sustainable Development	74/231	Development cooperation with middle-income countries
71/14	Cooperation between the United Nations and the Shanghai Cooperation Organization	74/235	Women in development
71/16	Cooperation between the United Nations and the Economic Cooperation Organization	74/271	Progress towards an accountability system in the United Nations Secretariat
72/237	South-South Cooperation	74/297	Progress in the implementation of General Assembly resolution 71/243 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system
72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system	74/306	Comprehensive and coordinated response to the coronavirus disease (COVID-19) pandemic
73/10	Cooperation between the United Nations and the Central European Initiative	75/8	Cooperation between the United Nations and the Organization for Democracy and Economic Development – GUAM
73/195	Global Compact for Safe, Orderly and Regular Migration	75/9	Cooperation between the United Nations and the Commonwealth of Independent States
74/122	Implementation of the outcome of the World Summit for Social Development and of the twenty-fourth special session of the General Assembly	75/12	Cooperation between the United Nations and the Black Sea Economic Cooperation Organization
74/128	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly	75/216	Disaster risk reduction
74/144	Implementation of the Convention on the Rights of Persons with Disabilities and the Optional Protocol thereto: accessibility	75/221	Ensuring access to affordable, reliable, sustainable and modern energy for all
74/216	Implementation of Agenda 21, the Programme for the Further Implementation of Agenda 21 and the outcomes of the World Summit on Sustainable Development and of the United Nations Conference on Sustainable Development	75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system

*Economic and Social Council resolutions*

1998/46	Further measures for the restructuring and revitalization of the United Nations in the economic, social and related fields	2013/1	Outcome of the review of the 2005 reform of the Economic Commission for Europe
2006/38	Workplan on reform of the Economic Commission for Europe and revised terms of reference of the Commission		

*Economic Commission for Europe decisions*

A (64)	The work of the Economic Commission for Europe	A (66)	Endorsement of the High-level statement on the post-2015 development agenda and expected sustainable development goals in the ECE region
A (65)	Outcome of the review of the 2005 reform of ECE	A (68)	High-level statement
		B (68)	Extension of the mandate of the Regional Forum on Sustainable Development

## Deliverables

17.18 Table 17.1 lists the crosscutting deliverables, by category and subcategory, for the period 2020–2022.

Table 17.1

### Cross-cutting deliverables for the period 2020–2022, by category and subcategory

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>23</b>	<b>20</b>	<b>33</b>	<b>22</b>
1. Documentation for the Economic Commission for Europe	–	–	10	–
2. Documentation for meetings related to follow-up on global conferences or to cross-sectoral issues	3	2	3	2
3. Documentation for the ECE Executive Committee	20	18	20	20
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>13</b>	<b>11</b>	<b>23</b>	<b>17</b>
4. Meetings of the Economic Commission for Europe	–	–	4	–
5. Meetings related to follow-up of global conferences or to cross-sectoral issues	3	1	3	3
6. Meetings of the ECE Executive Committee	5	6	7	5
7. Meetings of the SPECA Working Group on Gender and SDGs of the United Nations Special Programme for the Economies of Central Asia	2	1	2	2
8. Meetings of the Fifth Committee	1	1	1	1
9. Meetings of the Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
10. Meetings of the Committee for Programme and Coordination	1	1	1	1
11. Meetings of the regional collaborative platform	–	–	4	4
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	–	<b>1</b>	–	–
12. Project on improving knowledge of ECE member States to design and implement integrated policies in support of the 2030 Agenda for Sustainable Development at regional and national levels (ECE nexuses project)	–	1	–	–
<b>Seminars, workshops and training events</b> (number of days)	<b>28</b>	<b>18</b>	<b>28</b>	<b>20</b>
13. Training courses for government officials and private sector (women entrepreneurs) on women's entrepreneurship	28	18	28	20
<b>Publications</b> (number of publications)	<b>3</b>	<b>2</b>	<b>3</b>	<b>3</b>
14. Publication on the regional implementation of, follow-up on and review of the 2030 Agenda for Sustainable Development	1	–	1	1
15. Publication on gender for sustainable development	1	1	1	1
16. Publication on technical cooperation for the 2030 Agenda	1	–	–	–
17. ECE annual report	–	1	1	1
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> advisory services to up to 4 member States implementing the United Nations Sustainable Development Cooperation Framework process and “One United Nations” programme.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> promotional materials (brochures, banners, panels, posters and postcards); films on ECE activities.				
<b>External and media relations:</b> ECE weekly newsletter; press conferences on ECE activities; press releases on ECE activities, for regional and global access.				

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>Digital platforms and multimedia content:</b> update and maintenance of the website of the Executive Committee, the gender website and the technical cooperation activities website; update and maintenance of the website providing access to information and documents related to ECE as a whole; and news on ECE activities on 4 social media platforms.				

## Evaluation activities

17.19 The following self-evaluations completed in 2020 have guided the proposed programme plan for 2022:

- (a) Self-evaluation on Innovation for Sustainable Development Reviews and the Subregional Innovation Policy Outlook (subprogramme 4);
- (b) Self-evaluation on ECE collaboration with United Nations and other partners in delivering on energy for sustainable development (subprogramme 5);
- (c) Self-evaluation on advancing intergovernmental work towards the implementation of the 2017 Lisbon Ministerial Declaration and the regional implementation strategy for the Madrid International Plan of Action on Ageing commitments (subprogramme 8).

17.20 The findings of the self-evaluations referenced above have been considered for the programme plan for 2022. For example, in line with the principles of the United Nations Evaluation Group, ECE evaluations are intended to promote organizational learning, contribute to improvements in programme performance and ensure the accountability of the Secretariat. For subprogramme 4, the recommendations arising from the evaluation of Innovation for Sustainable Development Reviews, namely, to enhance the coherence of the collaboration with United Nations entities and other stakeholders through joint activities and to more systematically collect peer review comments in writing, will be duly incorporated into future Reviews. For subprogramme 5, the recommendations arising from the evaluation of ECE collaboration with United Nations and other partners in delivering on energy for sustainable development, namely, to continue efforts to mobilize extrabudgetary resources for enduring technical assistance and advisory interventions to support the development of policy and legal frameworks, strengthen institutions and build capacity, will be duly incorporated. For subprogramme 8, the recommendations arising from the evaluation on efforts to advance intergovernmental work towards the implementation of the Lisbon Ministerial Declaration and the Regional Implementation Strategy for the Madrid International Plan of Action on commitments, namely, to ensure greater coherence on ageing issues at national and regional levels by strengthening the linkages between the 2030 Agenda and the Sustainable Development Goal reporting frameworks with Plan of Action/Regional Implementation Strategy commitments, will be duly incorporated. In 2022, ECE will continue to strengthen the role of evaluation findings in programme design, delivery and policy directives. Since 2017, the Secretariat has reported on key results of evaluations to the Executive Committee on an annual basis. The annual report on evaluations contains summaries of key evaluations, plans and recommendations for future actions; it also indicates the recommendations that were closed during the period.

17.21 The following self-evaluations are planned for 2022:

- (a) Self-evaluation on the relevance of the Forest Products Annual Market Review to the needs of member States and challenges in the forest sector (subprogramme 7);

(b) Self-evaluation on the country profiles on urban development, housing and land management and smart sustainable city profiles as tools to support the evidence-based approach to achieving the Sustainable Development Goals (subprogramme 8);

(c) Self-evaluation on the activities serviced by ECE under the Convention on Access to Information, Public Participation in Decision-Making and Access to Justice in Environmental Matters (Aarhus Convention) and its Protocol on Pollutant Release and Transfer Registers (2018–2021) (subprogramme 1).

## **Programme of work**

### **Subprogramme 1 Environment**

#### **Objective**

17.22 The objective, to which this subprogramme contributes, is to improve environmental governance and performance for safeguarding the environment and health.

#### **Strategy**

17.23 The strategy of the subprogramme is based on the implementation of the core interlinked functions of international policy dialogue, normative work, capacity-building and the dissemination of good practices and lessons learned in the areas of air quality, water, industrial safety, public participation, impact assessment, environmental monitoring and assessment, environmental performance, education for sustainable development, and mainstreaming of environmental concerns into other dimensions of sustainable development. Through its work, the subprogramme will contribute to the four ECE nexuses, as reflected in paragraph 17.5 above.

17.24 To contribute to the objective, the subprogramme will support the implementation of outcomes of global and regional summits and conferences, and support and promote the implementation by countries of the ECE multilateral environmental agreements, contributing to achieving mainly Sustainable Development Goals 3, 6, 9, 11 to 13, 15 and 17, through the core interlinked functions reflected in paragraph 17.23 above. In addition, it will support and promote the implementation by countries of the ECE policy tools that include the ECE Environmental Performance Review Programme, contributing to achieving mainly Goals 6, 11 to 13 and 15; the ECE Environmental Monitoring and Assessment Programme, contributing to achieving mainly Goal 17; the ECE strategy for education for sustainable development, contributing to achieving Goals 4 and 12; and the Transport, Health and Environment Pan-European Programme, contributing to achieving mainly Goals 3, 11, 13 and 17. Furthermore, the subprogramme will support and promote the sharing of information (e.g., through the Shared Environmental Information System), experiences and good practices in the ECE region. The subprogramme will continue to promote synergies between ECE multilateral environmental agreements, through joint activities.

17.25 The subprogramme will also continue to conduct Environmental Performance Reviews, assisting countries in the implementation of the recommendations from those Reviews and monitoring the impact of the recommendations on national policies. Using a country needs-based approach, the subprogramme will support

countries, with a focus on those in the Caucasus, Central Asia and Eastern and South-Eastern Europe, in environmental policymaking, monitoring, assessment and management, including by providing an intergovernmental platform for representative policymaking and decision-making, organizing workshops and training events, and providing advisory services. Work will also be undertaken with interested non-ECE countries, including those wishing to join the multilateral environmental agreements that are open to global accession.

17.26 The subprogramme plans to support member States on issues related to COVID-19 by developing policy packages and/or recommendations, such as providing concrete recommendations for member States addressing emerging issues related to the work of the subprogramme, including ensuring effective access to information, public participation in decision-making and access to justice in the case of a crisis that have been identified as being of concern during the COVID-19 pandemic and the subsequent economic recovery phase.

17.27 The above-mentioned work is expected to result in:

- (a) Improved environmental governance and performance;
- (b) Strengthened integration of environmental concerns into sectoral policies in the ECE member States;
- (c) Strengthened capacities of countries for the effective development and implementation of environmental legislation and policy;
- (d) Improved response to environmental challenges by ECE member States;
- (e) Enhanced cross-border cooperation between countries and effective international and national cooperation;
- (f) Strengthened implementation of ECE multilateral environmental commitments and increased geographical coverage.

17.28 The planned support on issues related to COVID-19 is expected to result in the strengthened integration of environmental concerns into sectoral policies during the subsequent post-pandemic economic recovery phase in the ECE member States.

## **Programme performance in 2020**

17.29 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Strengthened rights of the public to information on, participation in and justice for environmental matters during the COVID-19 pandemic**

17.30 The Convention on Access to Information, Public Participation in Decision-Making and Access to Justice in Environmental Matters and its Protocol on Pollutant Release and Transfer Registers provide for several obligations specifically relevant in the context of COVID-19. The two treaties are the only global legally binding instruments that give the public broad and concrete rights to participate in decision-making and to have access to information and justice regarding the environment. In doing so, the Convention links environmental and human rights and is intended to protect the rights of both present and future generations so that they can live in a healthy environment. In turn, public participation in decision-making concerns legislation, plans, policies and projects related to these matters. In the response to present threats to human health and/or the environment posed by COVID-19, it is required under the Convention that all information that could enable the public to take measures to prevent or mitigate harm arising from the threat and that is held by a

public authority be disseminated immediately and without delay to those who may be affected.

17.31 ECE services all activities under the Convention and its Protocol. The work done under the Convention and its Protocol not only maintained, but also strengthened the rights mentioned above in the context of the COVID-19 pandemic, given that they embody the right to a healthy environment. In 2020, the subprogramme supported, among other activities, the project on the Shared Environmental Information System and organized thematic sessions, open to all United Nations Member States, dedicated to the requirements under the Convention and its Protocol also in the context of COVID-19, focusing on, for example, public litigation, the protection of defenders of the environment, public participation in trade negotiations, pollutant release and transfer registers, and digital transformation to support the circular economy, biosafety and community resilience. These activities are intended to help parties and other interested member States to enhance governance and accountability and to promote more effective and inclusive decision-making in environmental matters. In addition, the activities are intended to help to build public consensus on environmental issues and public ownership of solutions and decisions, which also leads to increased social cohesion and strengthened communities.

*Progress towards the attainment of the objective, and performance measure*

17.32 The above-mentioned work contributed to the objective, as demonstrated, for example, by the improved capacity of Kazakhstan (see ECE/MP.PP/C.1/2021/6) to meet the requirements of the Convention by holding public hearings during the COVID-19 pandemic through videoconferencing. In addition, through the advisory support provided by the Convention's Compliance Committee,<sup>1</sup> Kazakhstan and other parties and interested States Members of the United Nations received concrete recommendations on how to ensure effective access to information, public participation in decision-making and access to justice in the case of a crisis such as the COVID-19 pandemic and the subsequent economic recovery phase (see table 17.2).

Table 17.2  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
—	—	Strengthened capacity of parties to the Convention on Access to Information, Public Participation in Decision-Making and Access to Justice in Environmental Matters and other interested States Members of the United Nations to ensure effective access to information, public participation in decision-making and access to justice during the COVID-19 pandemic

<sup>1</sup> See statement of the Compliance Committee on the application of the Aarhus Convention during the COVID-19 pandemic and the economic recovery phase. Available at [https://unece.org/fileadmin/DAM/env/pp/compliance/CC-67/ece.mp.pp.c.1.2020.5.add.1\\_advance\\_unedited.pdf](https://unece.org/fileadmin/DAM/env/pp/compliance/CC-67/ece.mp.pp.c.1.2020.5.add.1_advance_unedited.pdf).

### **Impact of COVID-19 on subprogramme delivery**

17.33 Owing to the impact of COVID-19 during 2020, the subprogramme changed the approach to the organization of intergovernmental meetings, seminars and workshops. It also delayed by one year or more delivery of two reviews undertaken by the ECE Environmental Performance Reviews Programme. Owing to travel and lockdown restrictions, the Programme had to postpone to 2021 fact-finding missions on the third Review of Azerbaijan and the second one of Morocco (originally planned, respectively, for the spring and autumn of 2020). The subprogramme has also reconsidered its way of conducting capacity-building activities, and the organization of several capacity-building events online allowed for reaching out to new audiences. However, it proved challenging to organize virtual capacity-building events for some regions, owing to the difficulty in ensuring interpretation and differences in time zones. Consequently, some capacity-building activities had to be postponed.

17.34 At the same time, however, the subprogramme identified additional and modified activities to support member States on issues related to COVID-19, within the overall scope of its objectives. In particular, the subprogramme helped countries to respond to the COVID-19 pandemic with policy packages that increased resilience and supported a sustainable economic recovery; initiated the preparation of new principles on sustainable and healthy sustainable transport, taking stock of experiences from the pandemic; reconfigured a United Nations Development Account project under the Environmental Monitoring and Assessment Programme to strengthen the capacity of target countries in producing environment- and health-related indicators and their use in decision-making on environment and health topics; and, through the advisory support provided by the Compliance Committee, provided concrete recommendations for Kazakhstan and other interested parties and member States on how to ensure effective access to information, public participation in decision-making and access to justice in the case of a crisis such as the COVID-19 pandemic and the subsequent economic recovery phase. The new and modified deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

### **Planned results for 2022**

17.35 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

#### **Result 1: extension of the life of nuclear power plants<sup>2</sup>**

##### **Programme performance in 2020**

17.36 The subprogramme has, through the secretariat to the Convention on Environmental Impact Assessment in a Transboundary Context (Espoo Convention), supported the substantive work, including through assisting in the development of the relevant documents and the organization of meetings of the ad hoc working group established at the seventh session of the Meeting of the Parties, held in Minsk from 13 to 16 June 2017. Twenty-nine parties to the Convention have nominated their representatives to participate in the work of the ad hoc working group, to achieve progress in the preparation of the draft guidance on the applicability of the Convention to the lifetime extension of nuclear power plants. Results of the work were presented for the consideration of the Working Group on Environmental Impact Assessment and

<sup>2</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 20)).

Strategic Environmental Assessment at its meeting held in a hybrid format in Geneva from 24 to 26 August 2020. However, work of the ad hoc group was significantly affected by the COVID-19 pandemic in 2020, owing to which three meetings of the group were cancelled, and work was continued through a written procedure and virtual meetings. Eventually, the agreement on the text was reached, and it was submitted to the Meeting of the Parties for adoption at its eighth session, held in Vilnius from 8 to 11 December 2020.

17.37 The above-mentioned work contributed to the adoption at the eighth session of the Meeting of the Parties to the Convention of guidance on extending the life of nuclear power plants, which met the planned target of the adoption of the guidance, reflected in the proposed programme budget for 2020.

### **Proposed programme plan for 2022**

17.38 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective the subprogramme's work will evolve to include support for the continuous application by member States of the principles of the guidance in the activities under the Convention. The expected progress is presented in the performance measure below (see table 17.3).

Table 17.3  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Absence of guidance on extending the life of nuclear power plants	Development of guidance on extending the life of nuclear power plants	Adoption of guidance will ensure that parties take due account of the outcome of the transboundary environmental impact assessment in their final decisions on extending the life of nuclear power plants	Wide dissemination and application by countries of the guidance on extending the life of nuclear power plants	Continuous application by member States of the principles of the guidance in the activities under the Convention through the parties taking into account the contents of the guidance when implementing the Convention, the Implementation Committee considering the guidance when performing its functions and the parties widely disseminating the guidance to authorities and relevant stakeholders

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: enhanced environmental performance in the Economic Commission for Europe region<sup>3</sup>

### Programme performance in 2020

17.39 The subprogramme has finalized and published the third Environmental Performance Review of Uzbekistan, which includes an assessment of relevant targets of the Sustainable Development Goals. Owing to the COVID-19 emergency, the national launch of the Review was replaced by a broad online promotion through mass media and social platforms. The subprogramme also worked on the third Environmental Performance Review of Romania, which was expert reviewed at the end of October, peer reviewed and adopted in mid-November and published in 2021. Furthermore, the subprogramme developed new approaches to conducting its country review missions in the times of pandemic, such as hybrid missions or virtual missions, depending on the reviewed country's willingness and operational feasibility to organize such missions. The missions include field visits (e.g., landfills, wastewater treatment plants and protected areas) and plenary and individual meetings with the representatives of the government, local authorities, academia, business, and intergovernmental and non-governmental organizations (NGOs).

17.40 The above-mentioned work contributed to achieving 64 targets of the Sustainable Development Goals covered by Environmental Performance Reviews, which met the planned target reflected in the programme budget for 2021.

### Proposed programme plan for 2022

17.41 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will undertake Environmental Performance Reviews of requesting countries, including assessing relevant targets of the Sustainable Development Goals. The expected progress is presented in the performance measure below (see figure 17.I).

Figure 17.I

**Performance measure: total number of targets of the 2030 Agenda for Sustainable Development covered by Environmental Performance Reviews in a year**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

<sup>3</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

**Result 3: improved information for strengthening transboundary water cooperation****Proposed programme plan for 2022**

17.42 More than 60 per cent of freshwater worldwide flows in basins are shared by two or more countries. Transboundary water cooperation is therefore crucial for peace, sustainable development and human well-being. However, only 17 countries worldwide had all their transboundary basins covered under operational arrangements for water cooperation in 2018. Since 2017, the subprogramme's water team has been working to support more than 150 United Nations Member States that share transboundary waters to report on indicator 6.5.2 (Proportion of transboundary basin area with an operational arrangement for water cooperation) of the Sustainable Development Goals. Providing information as part of the reporting template contributes to the strengthening of transboundary water cooperation and the achievement of target 6.5 of the 2030 Agenda.

17.43 Reporting on indicator 6.5.2 is organized in three-year cycles, with the first cycle held in 2017 and the second one in 2020. ECE and the United Nations Educational, Scientific and Cultural Organization are co-custodian agencies for indicator 6.5.2. ECE communicates data on the indicator for transboundary river and lake basins to the Statistical Commission on an annual basis. The data are then included in the progress report of the Secretary-General on the Sustainable Development Goals. A baseline report for indicator 6.5.2 was published in 2018, with the next progress report expected in 2021. For parties to the Convention on the Protection and Use of Transboundary Watercourses and International Lakes, reporting on indicator 6.5.2 and under the Convention is combined.

17.44 During the period 2017–2020, the subprogramme coordinated the preparation and revision of the reporting template and the development of guidance documents to facilitate the reporting on indicator 6.5.2. It organized numerous expert meetings and global and regional capacity-building activities to raise awareness of the reporting process and foster high-quality reporting and the coordination of reports at the basin level. Owing to additional challenges faced by the countries in time of the COVID-19 pandemic regarding the timely preparation and submission of reports and the organization of consultations within the countries and at basin level, the subprogramme organized a series of online capacity-building activities.

*Lessons learned and planned change*

17.45 The lesson for the subprogramme was that the subprogramme's support had not been sufficient for ensuring high-quality reporting by all countries sharing transboundary surface waters. Thus, an effective and structured approach should be established and sufficient resources allocated to support efforts by countries sharing transboundary waters in reporting on indicator 6.5.2 and using the reports for identifying and addressing gaps in transboundary water cooperation. In applying the lesson, the subprogramme will facilitate the exchange of experiences among countries; design and implement capacity development activities to support countries in improving the quality of reporting and informing policy processes on transboundary water cooperation, including in the light of the challenges related to COVID-19; develop an online platform/data system to facilitate the reporting process and analysis; improve communication of results; and develop complementary activities supporting countries in transboundary water cooperation.

*Expected progress towards the attainment of the objective, and performance measure*

17.46 This work is expected to contribute to the objective, as demonstrated by 97 countries that provide accurate data on indicator 6.5.2 for transboundary river and lake basins, as validated by the subprogramme and communicated to the Statistical Commission in 2022 (see figure 17.II).

Figure 17.II

**Performance measure: total number of countries for which data on transboundary river and lake component of indicator 6.5.2 are submitted to the Statistical Commission (cumulative)**

## Legislative mandates

17.47 The list below provides all mandates entrusted to the subprogramme.

### *General Assembly resolutions*

2994 (XXVII)	United Nations Conference on the Human Environment	70/209	United Nations Decade of Education for Sustainable Development (2005–2014)
47/193	Observance of World Day for Water	71/222	International Decade for Action, “Water for Sustainable Development”, 2018–2028
62/68	Consideration of prevention of transboundary harm from hazardous activities and allocation of loss in the case of such harm	71/313	Work of the Statistical Commission pertaining to the 2030 Agenda for Sustainable Development

#### C. Substantive deliverables

**Consultation, advice and advocacy:** advisory services for some 100 government officials and other stakeholders of States participating in the United Nations Special Programme for the Economies of Central Asia on water, energy and other environmental issues.

#### D. Communication deliverables

**Outreach programmes, special events and information materials:** Environmental Performance Review (synopsis and highlights) to facilitate broad dissemination and user-friendly access to key messages and recommendations by representatives of at least 6 categories of stakeholders, such as Government, local authorities, academia, business and intergovernmental and non-governmental organizations, as well as mass media in the reviewed countries; electronic newsletter of the Working Group on Environmental Monitoring and Assessment submitted to all member States in the region, including representatives of Government, academia and intergovernmental and non-governmental organizations.

**External and media relations:** press releases on environmental issues.

**Digital platforms and multimedia content:** update and maintenance of the website of the subprogramme.

## Subprogramme 2 Transport

### Objective

17.49 The objective, to which this subprogramme contributes, is to advance a regionally and globally sustainable inland transport (road, rail, inland waterway and intermodality) system by making it safer, cleaner, more efficient and more affordable, both for freight transport and people's mobility.

### Strategy

17.50 The ECE transport subprogramme is carried out by the programme of work adopted by the Inland Transport Committee. In its capacity as the United Nations platform for inland transport, the Committee's role is to help to efficiently address regional and global needs in inland transport.<sup>4</sup> Through, among others, its 20 working parties and 14 administrative committees, the Committee of Experts on the Transport of Dangerous Goods and on the Globally Harmonized System of Classification and Labelling of Chemicals and more than 50 formal and informal networks bringing together some 6,000 registered experts, the subprogramme promotes regionally and globally sustainable transport systems.

17.51 The core pillar of its work is to administer the international regulatory framework for inland transport, which currently includes 59 United Nations legal

<sup>4</sup> Inland Transport Committee strategy until 2030 ([ECE/TRANS/288/Add.2](#), paras. 4–6).

instruments on safety, pollution, efficiency and effectiveness (normative function), by developing new and updating existing legal instruments, as necessary.

17.52 At the request of member States and contracting parties, the subprogramme services the institutional platforms for national Governments and other key transport stakeholders to maintain this regulatory framework, complemented by policy dialogue, analytical work, technical assistance and capacity-building activities. The subprogramme also contributes to the work of the Special Envoy of the Secretary-General for Road Safety and the operation of the United Nations Road Safety Fund, intended to facilitate improvements in road safety globally. Under emergency situations, including pandemics, the subprogramme also supports the efforts of member States to respond to and recover from such extraordinary circumstances, while minimizing disruptions to the functioning of the national, regional and international transport systems and the implementation of the sustainable development agenda. This work is expected to contribute to all four ECE nexuses.

17.53 To contribute to the objective, the subprogramme will intensify its standard-setting and regulatory activities as the United Nations platform for inland transport conventions, by supporting the development of new instruments and the updating of existing ones and ensuring that they remain up-to-date and open to all United Nations Member States. These activities are expected to support Governments in making progress towards the achievement of Sustainable Development Goals 3, 6 to 9 and 11 to 13. The subprogramme will also work through the Inland Transport Committee plenary sessions and its subsidiary bodies towards ensuring that its regulatory functions are keeping pace with cutting-edge technologies driving transport innovation, especially in the areas of intelligent transport systems, autonomous vehicles and digitalization; that the different amendment processes for the various conventions do not cause fragmentation; and that the dangers of stifling progress owing to premature regulation are avoided. In addition, the subprogramme will provide a platform for policy dialogue at the annual session of the Committee to review emerging challenges and emergency situations in inland transport and proposals for improving infrastructure and operation. Furthermore, the subprogramme will provide an institutional platform through the Committee and its subsidiary bodies supporting regional and interregional connectivity, and developing new or building on existing initiatives, agreements or corridors.

17.54 The subprogramme plans to support member States on issues related to COVID-19 by supporting the adoption by the Inland Transport Committee at its plenary sessions of high-level political statements and/or resolutions on concerted action by member States and contracting parties during pandemics and other emergencies that will strengthen or enable the implementation of emergency-relevant decisions and mandates by the Committee, its subsidiary bodies and their members. The subprogramme will also promote knowledge-sharing and cooperation among Governments and key stakeholders, raise awareness of emerging issues and best responses, facilitate technically the adaptation of legally binding instruments and frameworks to the new realities, and prepare new guidance materials.

17.55 The above-mentioned work is expected to result in:

- (a) Improvements in sustainable mobility, and monitoring and measuring the Sustainable Development Goals;
- (b) Improvements in inland transport, leading to safer, cleaner, more efficient and more affordable systems for contracting parties to the United Nations inland transport conventions;
- (c) More efficient and resilient cross-border flows of goods and people.

17.56 The planned support on issues related to COVID-19 is expected to result in enhanced intergovernmental cooperation in emergency situations and minimized disruptions in the continued implementation and updating of United Nations inland transport conventions.

### **Programme performance in 2020**

17.57 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

#### **Strengthened implementation of legal instruments in inland transport in response to COVID-19**

17.58 The uninterrupted implementation of the planned work of the transport subprogramme, which is in line with the programme of work adopted by the Inland Transport Committee, is essential for the implementation, development and constant updating of the international regulatory framework for inland transport, which currently includes 59 United Nations legal instruments under the purview of the Committee. This work promotes sustainable transport systems worldwide that are safe, sustainable, efficient and affordable, for both freight transport and personal mobility.

17.59 COVID-19 and liquidity constraints created enhanced needs for providing support to member States and contracting parties in the implementation of their obligations under legal instruments and in the provision of proper guidance on downstream legislation. A characteristic example is the cancellation of a combined 20 official three-hour sessions in June and July for two worldwide bodies serviced by ECE, namely, the two subcommittees under the Economic and Social Council Committee on the Transport of Dangerous Goods and on the Globally Harmonized System of Classification and Labelling of Chemicals: the Sub-Committee of Experts on the Globally Harmonized System of Classification and Labelling of Chemicals and the Sub-Committee of Experts on the Transport of Dangerous Goods. These bodies have a worldwide scope and work with interpretation in five languages (Chinese, English, French, Russian and Spanish). Their deliberations and decisions have profound impacts globally on safety and the environment for all modes of transport, as well on workplace and consumer safety. These decisions cannot be taken informally. This situation has created significant pressure to find alternative ways, including through the deployment of new technologies, to allow these and other regulatory bodies to progress as much as possible in their work, even if only on critical business matters, to minimize the impact on downstream legislation worldwide.

17.60 The subprogramme developed response measures, including the development and implementation of a new generation of legal instruments supporting the digitalization/computerization of transport and border-crossing procedures, and the deployment of existing mechanisms and networks in order to accelerate the post-COVID-19 economic recovery of contracting parties to support the efforts of member States towards a sustainable recovery. Those measures included the leveraging and acceleration of digitalization/computerization of existing legal instruments on transport and border-crossing procedures, such as the (eTIR) international system and eCMR. The acceleration of eTIR development and its promotion as the tool that ensures paperless, seamless and contactless border-crossing operations, while keeping the borders open and keeping drivers and customs officers protected from the virus, was welcomed by contracting parties to the Customs Convention on the International Transport of Goods under Cover of TIR Carnets (TIR). To date,

16 contracting parties have officially requested connection to eTIR, while several meetings have already been held with the European Commission (28 European Union member States) to analyse the interconnection of eTIR with New Computerized Transit System of the European Union. Furthermore, building on the network of member States/contracting parties and key transport stakeholders established pursuant to the underlying legal instruments, the subprogramme developed the “Observatory on border crossings status due to COVID-19”, a platform that provides updated information on the current border-crossing status of 174 United Nations Member States, including the national practices and measures implemented in response to the pandemic.

*Progress towards the attainment of the objective, and performance measure*

17.61 The above-mentioned work contributed to the objective, as demonstrated by the increased accessions to these instruments (see figure 17.III).

Figure 17.III

**Performance measure: total number of accessions by Member States to key legal instruments for the digitalization/computerization of transport and border-crossing procedures (CMR, eCMR and TIR), 2018–2020 (cumulative)**

*Abbreviations:* CMR, Convention on the Contract for the International Carriage of Goods by Road concerning the electronic consignment note; eCMR, Additional Protocol to the Convention on the Contract for the International Carriage of Goods by Road concerning the electronic consignment note; TIR, Customs Convention on the International Transport of Goods under Cover of TIR Carnets.

**Impact of COVID-19 on subprogramme delivery**

17.62 Owing to the impact of COVID-19 during 2020, the subprogramme had to cancel, shorten or postpone beyond 2020 key meetings and negotiations. Although goals that capture in part the worldwide work of the subprogramme, as set out in results 2 and 3 below, were met/exceeded, COVID-19 and liquidity constraints had a severe impact on the delivery of the planned work of the subprogramme in other areas by, among other things, compromising its key assets (i.e., its convening power and normative work). Mitigating measures summarized in paragraph 17.16 above helped to ensure business continuity, at least on some issues, although at a rate not sustainable or on par with worldwide demands and needs. The planned work that was affected included sessions of subsidiary Working Parties (Working Party on Lighting and Light-Signalling, Working Party on Pollution and Energy, Working Part on General Safety Provisions, Working Party on Passive Safety and Working Party on Automated/Autonomous and Connected Vehicles) on vehicle regulations, which were held without interpretation and virtually with reduced agendas and decisions adopted under silence procedures. Contracting parties requested 37 half-day morning sessions to be cancelled in order to accommodate participation from various time zones. Overall, as a result of a combination of COVID-19 response measures and liquidity

constraints, only 68 per cent of planned meetings were implemented in 2020 and only 34 per cent of total planned meetings with interpretation services were organized.

17.63 At the same time, however, the subprogramme identified additional and modified activities to support Member States on issues related to COVID-19, within the overall scope of its objectives, namely, establishing new platforms to share knowledge and promote cooperation among Governments and key stakeholders under emergency situations, including pandemics; raising awareness of emerging issues and best responses related to COVID-19; facilitating technically the adaptation of legally binding instruments and framework to the new realities; and preparing new guidance materials related to COVID-19. The new and modified deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

## **Planned results for 2022**

17.64 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: enhanced regulatory framework for sustainable inland transport systems<sup>5</sup>**

#### **Programme performance in 2020**

17.65 The subprogramme has, through the implementation of the Inland Transport Committee's strategy until 2030, scaled up its efforts, including through advisory services, seminars and workshops, to support the development of sustainable inland transport systems internationally and ensure that its activities further benefit other regions in their own efforts to curb the number of road traffic deaths and injuries; improve the environmental performance of the inland transport systems, including regarding the transport of perishable foodstuffs; and enhance efficiency and connectivity, including through digitalization and electronic documents in transport. The subprogramme also supported the participation of countries from outside the ECE region in the activities of the Committee and its subsidiary bodies. Furthermore, the subprogramme scaled up outreach and capacity-building activities, including through partnerships with the United Nations system and external stakeholders and participation in regional and global initiatives.

17.66 The above-mentioned work contributed to increased accessions worldwide to conventions and agreements under the purview of the subprogramme, with 1,801 contracting parties in 2020, which exceeded the planned target of 1,755 contracting parties, reflected in the proposed programme budget for 2020.

#### **Proposed programme plan for 2022**

17.67 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will further scale up its efforts to support the development of sustainable inland transport systems internationally that are more resilient to pandemics and other emergencies, and ensure that its activities further benefit other regions' efforts to curb the number of road traffic deaths and injuries; improve the environmental performance of the inland transport systems, including regarding the transport of perishable foodstuffs; and enhance efficiency and connectivity, including through digitalization and electronic documents in transport. The subprogramme plans to do so through the implementation of the Inland Transport Committee's

---

<sup>5</sup> As reflected in the proposed programme budget for 2020 ([A/74/6 \(Sect. 20\)](#)).

strategy until 2030 by, among other things, accelerating the modernization and updating of relevant legal instruments in ways that are consistent with the lessons learned from the pandemic and address identified gaps in the existing regulatory framework, encouraging the participation of countries from outside the ECE region in the activities of the Committee and its subsidiary bodies and scaling up outreach and capacity-building activities, including through partnerships with the United Nations system and external stakeholders and participation in regional and global initiatives. The expected progress is presented in the performance measure below (see figure 17.IV).

Figure 17.IV

**Performance measure: total number of contracting parties to United Nations legal instruments on transport administered by the Economic Commission for Europe (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: increased number of new United Nations Member States becoming part of the regulatory framework for sustainable inland transport systems<sup>6</sup>**

### **Programme performance in 2020**

17.68 The subprogramme has strengthened its outreach, especially in the area of road safety, to increase the number of new United Nations Member States becoming part of the United Nations regulatory framework for sustainable inland transport systems by acceding to its conventions for the first time. The subprogramme also continued its dedicated work on amendments supporting the further globalization of its legal instruments, thus making it easier for new countries to accede. Furthermore, the subprogramme implemented or supported capacity-building workshops and country-level policy reviews that further clarified the advantages of the implementation, especially to Member States that, until 2020, were not contracting parties to any of the legal instruments under its purview.

17.69 The above-mentioned work contributed to the accession in 2020 of two new Member States, Brunei Darussalam and Honduras, to United Nations road safety conventions, thus reaching 150 of 193 Member States that are contracting parties to at least 1 United Nations convention under the purview of the subprogramme, which exceeded the planned target of one additional ECE member State and/or United Nations Member State that is a contracting party to United Nations inland transport conventions under the purview of the Commission, reflected in the programme budget for 2021.

<sup>6</sup> As reflected in the programme budget for 2021 ([A/75/6/Add.1](#)).

### Proposed programme plan for 2022

17.70 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will strengthen its outreach, including through core partners, to increase the number of new United Nations Member States becoming contracting parties to conventions under its purview. The subprogramme will also continue the further globalization of its legal instruments, thus making it easier and more appealing for new countries to accede. The subprogramme plans to identify common gaps and trends in non-accession countries, through official comparative research papers on regional dynamics, and apply its capacity development strategy in a targeted way in order to build institutional knowledge within those countries, related in particular to the comparative advantages of deploying internationally established instruments, rather than “reinventing the wheel”, thus contributing to the further development of an internationally harmonized regulatory system. Furthermore, the subprogramme will organize or support capacity-building workshops and country-level policy reviews that would further clarify the advantages of the implementation, especially to Member States that, until 2020, were not contracting parties to any of the legal instruments under its purview. The expected progress is presented in the performance measure below (see figure 17.V).

Figure 17.V

**Performance measure: total number of Economic Commission for Europe member States and total number of United Nations Member States that are contracting parties to United Nations inland transport conventions under the purview of the Commission (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: strengthened regulatory support in road safety contributing to fewer worldwide road accident fatalities and injuries

#### Proposed programme plan for 2022

17.71 Notwithstanding strong and consistent efforts by Member States, the international community was not able to achieve by 2020 target 3.6 of Sustainable Development Goal 3 of halving global deaths from road traffic accidents, owing to increasing, rather than decreasing, road fatalities and injuries globally. There were three milestones in 2020 for the global community's and United Nations efforts to recognize the shortcomings and address that challenge: the third Global Ministerial Conference on Road Safety, held in Stockholm on 19 and 20 February 2020; the adoption by the Inland Transport Committee, at its eighty-second session, of the

Committee's recommendations on enhancing national road safety systems; and General Assembly resolution 74/299 on improving global road safety, adopted on 31 August 2020. All three milestones served as recognitions of the unique and critical role of ECE and, by extension, the transport subprogramme in successfully addressing the continuing crisis and establish mandates for the enhanced support of ECE for worldwide efforts. Through the adoption in 2019 of the Committee's strategy until 2030, the subprogramme formulated a 360-degree approach – regulatory, policy dialogue, analytical, capacity-building and technical assistance – to road safety in order to reap more benefits for its main beneficiaries. The approach comprises outreach to increase the number of countries acceding to its core road safety conventions, which support countries' efforts to develop sound national road safety systems; continued development of the international legal framework and its incorporation into the production of safer vehicles; dedicated work on amendments to legal instruments to accelerate their further globalization, which make it easier for countries to accede and contribute to reducing disastrous road safety risks; and national road safety performance reviews and road safety system assessments that will complement the efforts of Member States to enhance their national road safety systems, by helping them, among other things, to identify gaps, prioritize tasks and channel national efforts and financial resources to high-impact investments that are based on reliable, structured and consistent analysis and recommendations. The foundation and conceptual framework for these assessments is the Committee's recommendations on enhancing national road safety systems.

#### *Lessons learned and planned change*

17.72 The lesson for the subprogramme was that it needed to adjust its approach and focus in step with the needs of Member States, where there is a growing and strong demand, including outside the ECE region, to adjust and increase the support for a systematic, foundational approach to road safety that is needed in order to bring the desired results. The global community is increasingly realizing, as evidenced in General Assembly resolution 74/299, the unique contribution that the subprogramme can make.

17.73 In applying the lesson, the subprogramme will encourage the participation of countries from outside the ECE region in the road safety activities of the Inland Transport Committee and its subsidiary bodies and scale up outreach and capacity-building activities to increase knowledge of the Committee's recommendations and enhance their implementation by national road safety authorities, including through partnerships with the United Nations system and external stakeholders and participation in regional and global initiatives. Furthermore, to accelerate improvements in road safety globally, the subprogramme will contribute to ECE efforts to mobilize political and policy support for road safety through the Special Envoy of the Secretary-General for Road Safety and the operation of the United Nations Road Safety Fund, such as through supporting the submission and implementation of joint projects supported through the Fund. As part of its response, the subprogramme will also contribute to the formulation of a coherent global plan of action to support the success of the second Decade of Action for Road Safety. In order to achieve all this, the subprogramme will leverage new technologies, when possible, minimize disruptions in the continued implementation and updating of United Nations inland transport conventions, and ensure continued progress in the achievement of the Sustainable Development Goals.

*Expected progress towards the attainment of the objective, and performance measure*

17.74 This work is expected to contribute to the objective, as demonstrated by the growing number of contracting parties to the seven core United Nations road safety conventions (see figure 17.VI).<sup>7</sup>

Figure 17.VI

**Performance measure: total number of contracting parties to core United Nations road safety conventions (cumulative)**

## Legislative mandates

17.75 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolutions*

58/9	Global road safety crisis	70/217	Follow-up to the second United Nations Conference on Landlocked Developing Countries
68/269	Improving global road safety		
69/137	Programme of Action for Landlocked Developing Countries for the Decade 2014–2024	72/212	Strengthening the links between all modes of transport to achieve the Sustainable Development Goals
69/213	Role of transport and transit corridors in ensuring international cooperation for sustainable development	72/271	Improving global road safety
		73/243	Follow-up to the Second United Nations Conference on Landlocked Developing Countries
70/197	Towards comprehensive cooperation among all modes of transport for promoting sustainable multimodal transit corridors	74/299	Improving global road safety

*Economic and Social Council resolutions*

1999/65	Reconfiguration of the Committee of Experts on the Transport of Dangerous Goods into a Committee of Experts on the Transport of Dangerous Goods and on the Globally Harmonized System of Classification and Labelling of Chemicals	2013/7	Europe-Africa fixed link through the Strait of Gibraltar
		2019/7	Work of the Committee of Experts on the Transport of Dangerous Goods and on the Globally Harmonized System of Classification and Labelling of Chemicals

13. Publications on transport facilitation	—	—	1	—
14. Publications on green and safe transport and cross-cutting issues	8	8	5	5
15. Publications on vehicle regulations	1	1	1	1
16. Publications on statistics	1	1	1	1
<b>Technical materials</b> (number of materials)	<b>2</b>	<b>2</b>	<b>2</b>	<b>1</b>
17. Fact sheet: what you should know about safety belts	1	1	—	—
18. Fact sheet: what you should know about advanced driver assistance systems	—	—	1	—
20. Transport statistics – country profiles	1	1	1	1

#### C. Substantive deliverables

**Consultation, advice and advocacy:** advisory services for contracting parties of United Nations transport conventions administered by ECE on legal instruments relating to inland transport; facilitation of transport; border crossing; road safety; vehicle construction; and transport of dangerous goods and other special cargo.

**Databases and substantive digital materials:** update and maintenance of the International TIR Data Bank website providing access to users from more than 70 contracting parties of the TIR Convention, which includes the list of the more than 32,000 transport companies authorized to use the TIR system; TIR and eTIR websites visits in excess of 19,000 annually; inventory of standards on inland water infrastructure; web-based inventory of existing European Agreement on Main International Railway Lines and European Agreement on Important International Combined Transport Lines and Related Installations standards and parameters; databases on transport statistics, road traffic accidents, transport of dangerous goods, transport of perishable foodstuffs, urban transport and transport and environment; development and maintenance of the web-based Rail Security Observatory; digitalized signs and signals (E-CoRSS) under the Convention on Road Signs and Signals; and smart and sustainable connectivity e-learning platform.

#### D. Communication deliverables

**Outreach programmes, special events and information materials:** information materials on legal instruments and activities of the subprogramme for universal and regional access.

**External and media relations:** press releases for the subprogramme.

**Digital platforms and multimedia content:** digital platforms and multimedia content on sustainable transport and mobility; and update and maintenance of the website of the subprogramme for universal and regional access.

## Subprogramme 3 Statistics

### Objective

17.77 The objective, to which this subprogramme contributes, is to advance official statistics at the national and international levels for evidence-based policymaking and assessing progress towards achieving the Sustainable Development Goals and to

ensure the coordination of statistical activities in the ECE region under the Conference of European Statisticians.

## Strategy

17.78 The strategy of the subprogramme is based on the implementation of the core interlinked functions, namely, the streamlining of international statistical work in the ECE region by promoting dialogue at the Conference of European Statisticians and expert meetings; methodological work to develop and promote guidelines and recommendations to enhance the quality of statistics; statistical capacity development of ECE member States with less developed statistical systems, in particular to measure progress towards achieving the Sustainable Development Goals; and the maintenance and development of the ECE statistical database. ECE statistical work is strongly anchored to the 2030 Agenda, which contains calls for a follow-up on and review of the achievement of the Goals and their targets based on evidence, informed by high-quality, accessible, timely, reliable and disaggregated data. Through its work, the subprogramme will contribute to the ECE nexuses on measuring and monitoring the Goals and on the sustainable use of natural resources. The work conducted under this subprogramme deals mainly with statistical methodology and capacity-building, and the main national partners are national statistical offices of member States.

17.79 To contribute to the objective, the subprogramme will continue to promote methodological work to develop statistical models, guidelines and recommendations to enhance the quality of statistics, and to promote the use of official statistics. This will be done through regional and country-specific initiatives aimed at disseminating the statistical models, guidelines and recommendations and promoting their use. Closer partnerships will be built between geospatial experts and statisticians to support the integration of statistical and geospatial information. The activities will be coordinated and implemented in cooperation with statistical departments of other regional entities such as Eurostat, OECD, the European Free Trade Association, the Interstate Statistical Committee of the Commonwealth of Independent States and the Eurasian Economic Commission, as well as international specialized agencies active in the region. To support the development of the statistical capacity of member States, the subprogramme will facilitate the exchange of experiences in the field of population and housing censuses and provide support to countries in planning and conducting their census. All member States were requested to conduct at least one census between 2015 and 2024 (see Economic and Social Council resolution [2015/10](#)), which was also called the “2020 census round”. The majority of the countries in the ECE region will conduct the census in 2021.

17.80 The subprogramme plans to support member States on issues related to COVID-19 by refocusing existing activities relating to specific subject matter domains (e.g., population censuses, price statistics and environment statistics) to include exchanges of experiences and good practices in compiling COVID-19-relevant statistics while adapting to the restrictions imposed owing to the pandemic. Activities in cross-cutting topics such as statistics for the Sustainable Development Goals, statistical legislation, data collection, data integration, dissemination and human resource management will also be adapted to support countries as they recover from the COVID-19 pandemic.

17.81 The above-mentioned work is expected to result in:

(a) Improved statistical methodology and capacity of member States to support the measuring and monitoring of the Sustainable Development Goals, including the improved cost-efficiency, coverage, accuracy, comparability and timeliness of dissemination of the census results;

(b) An increase in the number of countries that conduct the census through innovative and efficient approaches.

17.82 The planned support on issues related to COVID-19 is expected to result in improved capacity of member States to provide the statistics necessary to develop evidence-based policies to manage the post-COVID recovery.

## Programme performance in 2020

17.83 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Improved measurement of economic globalization and of the activities of multinational enterprise groups

17.84 Economic globalization and the activities of multinational enterprises play a large and growing role in national economies. Measuring economic globalization and the activities of multinational enterprises is a major challenge facing producers of official statistics. To this end, over the past decade, the subprogramme has developed recommendations and guidelines to assist countries in measuring economic globalization. In 2020, the *Guide to Sharing Economic Data in Official Statistics* was finalized and published. This follows in the steps of two previous guides on globalization: “The impact of globalization on national accounts” (2011) and the “Guide to measuring global production” (2015).

17.85 The subprogramme also promoted the implementation of the recommendations included in the guides through the establishment of large cases units in national statistical offices. These units are intended to measure multinational enterprises and incorporate their activities into national economic statistics. Furthermore, the subprogramme promoted a global network of data experts on multinational enterprises, to which a number of countries have assigned dedicated staff. To support countries’ compilation of high-quality and internationally comparable macroeconomic statistics during the COVID-19 pandemic, ECE provided internationally agreed recommendations and continuity guidance.

#### *Progress towards the attainment of the objective, and performance measure*

17.86 The above-mentioned work contributed to the objective, as demonstrated by the number of countries that have established large cases units to support the measurement of economic globalization, which increased to 11 in 2020 (see figure 17.VII).

Figure 17.VII

**Performance measure: total number of countries that have established large cases units (cumulative)**

**Impact of COVID-19 on subprogramme delivery**

17.87 Owing to the impact of COVID-19 during 2020, the subprogramme had to change its plans for all in-person meetings (and, in some cases, cancel or postpone the meetings) that had been planned after mid-March. The subprogramme adopted mitigation measures, such as informal virtual or hybrid meetings and new webinars focusing on the impact of COVID-19 and response by national statistical offices. In some cases, formal meetings were replaced by informal meetings owing to limited capacity at the United Nations Office at Geneva to provide interpretation for virtual meetings.

17.88 At the same time, however, in addition to discussing the impact of COVID-19 and the statistical responses by countries at virtual and hybrid meetings, often having this as the main discussion topic, the subprogramme identified new and modified existing activities to support member States on COVID-19-related issues, within the overall scope of its objectives. An interactive online platform on COVID-19 and official statistics was set up and made available on the ECE website, to guide statistical producers to existing and newly developed resources from ECE and partners to support the continued production of official statistics and to meet the emerging and rapidly changing demands for statistics. The platform offers a space for national statistical offices and international organizations to raise questions and share experiences and developments to safeguard statistical production in the face of the current crisis, providing support to the recovery efforts of member States.

**Planned results for 2022**

17.89 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

**Result 1: increasing the number of countries producing improved statistics for the Sustainable Development Goals<sup>8</sup>****Programme performance in 2020**

17.90 The subprogramme has supported countries in producing improved statistics for the Sustainable Development Goals by providing practical guidance to implement the *Conference of European Statisticians Road Map on Statistics for Sustainable Development Goals*. These include guidance on setting up national reporting platforms on the Goals, reports from piloting Goal indicator data transmission and good practices in communicating data on the Goals. To provide easy access to the guidance materials and data on the Goals, ECE has set up a regional platform on statistics for the Goals, consisting of a knowledge hub and dashboard and database of indicators for the ECE region. Work is ongoing on preparing the second edition of the *Road Map* to address the new challenges in providing statistics for the Goals, including in the context of the COVID-19 pandemic. Furthermore, the subprogramme is bringing together experts from national statistical, mapping and geospatial agencies to share good practices in integrating geospatial and statistical information that is crucial for the measurement of progress towards achieving the Goals. This was done through a collaboration agreement and joint plenary session of the governing bodies (Conference of European Statisticians and the Committee of Experts on Global Geospatial Information Management (Europe)), joint task teams (e.g., on aligning

---

<sup>8</sup> As reflected in the proposed programme budget for 2020 ([A/74/6 \(Sect. 20\)](#)).

geospatial and statistical standards), coordinating capacity-building and organizing joint seminars and webinars.

17.91 The above-mentioned work contributed to the increased availability of statistics on the Sustainable Development Goals from ECE countries. A total of 41 ECE member States have set up national reporting platforms providing data on Goal indicators, which exceeded the planned target of 30 countries, reflected in the proposed programme budget for 2020. A few more countries are in the process of developing such a platform, including Bosnia and Herzegovina, where ECE is providing capacity development support for this purpose.

### **Proposed programme plan for 2022**

17.92 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to provide practical guidance to countries on the implementation of the planned second edition of the *Conference of European Statisticians Road Map on Statistics for Sustainable Development Goals*. The expected progress is presented in the performance measure below (see figure 17.VIII).

Figure 17.VIII

**Performance measure: total number of national reporting platforms on statistics for Sustainable Development Goals in use by member States (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 2: conducting a new population and housing census that provides cost-effective and better-quality results<sup>9</sup>**

#### **Programme performance in 2020**

17.93 The subprogramme has supported member States in the planning and conduct of the population and housing censuses, in accordance with the “Conference of European Statisticians recommendations for the 2020 censuses of population and housing”. It has conducted a review of the short- and long-term consequences of the COVID-19 pandemic on census operations and organized expert meetings to exchange experiences among member States and to identify successful solutions in the context of the pandemic. The subprogramme also enhanced its online platform for the exchange of experiences and methodological information on the censuses. These activities have supported ECE member States in adapting their census plans and

<sup>9</sup> As reflected in the programme budget for 2021 ([A/75/6/Add.1](#)).

operations to the context of the pandemic while maintaining the information content and achieving cost-efficiency, coverage and accuracy of the census.

17.94 The above-mentioned work contributed to the completion of population and housing censuses in 21 per cent of ECE member States, which did not meet the planned target of 25 per cent, reflected in the programme budget for 2021. For most countries, the census is conducted in a way that requires in-person visits of enumerators, which were not possible during the COVID-19 pandemic on the intended scale. These circumstances forced many countries to postpone the census that they had originally planned for 2020.

### **Proposed programme plan for 2022**

17.95 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will organize expert meetings to exchange experiences and conduct methodological work to improve the use of administrative data for population and housing censuses. The expected progress is presented in the performance measure below (see figure 17.IX).

Figure 17.IX

### **Performance measure: Economic Commission for Europe countries having conducted a census in compliance with the Conference of European Statisticians recommendations**

(Percentage)

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: increasing the number of countries that report sex-disaggregated statistical indicators**

#### **Proposed programme plan for 2022**

17.96 Gender data and indicators are in high demand for understanding the situation with respect to gender equality and for monitoring the Sustainable Development Goals and the impact of different policies on women and men. The subprogramme develops statistical capacity and promotes the use of advanced methodologies for producing data and indicators of gender equality.

#### *Lessons learned and planned change*

17.97 The lesson for the subprogramme was that, during the COVID-19 crisis, questions surrounding the economic impact on women and men, the burden of childcare amid school closures and the link between social isolation measures and gender-based

violence further increased the demand on timely gender statistics. In applying the lesson, the subprogramme will organize ECE expert meetings and capacity-building workshops to discuss the responses of national statistical offices to these challenges. The expert exchanges and capacity development will lead to the production of improved statistical indicators from a gender perspective and their improved availability.

*Expected progress towards the attainment of the objective, and performance measure*

17.98 This work is expected to contribute to the objective, as demonstrated by the increased availability of sex-disaggregated indicators in the ECE Sustainable Development Goals database. This is measured as the average percentage of sex-disaggregated indicators available for ECE member States (see figure 17.X).

Figure 17.X

**Performance measure: sex-disaggregated indicators available for Economic Commission for Europe member States in the ECE Sustainable Development Goals database**

(Percentage)

## Legislative mandates

17.99 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolutions*

67/144	Intensification of efforts to eliminate all forms of violence against women	72/234	Women in development
68/261	Fundamental Principles of Official Statistics	73/148	Intensification of efforts to prevent and eliminate all forms of violence against women and girls: sexual harassment
69/210	Entrepreneurship for development		
69/282	World Statistics Day		

*Economic and Social Council resolutions*

2006/6	Strengthening statistical capacity	2018/5	Strategies for eradicating poverty to achieve sustainable development for all
2014/7	Further implementation of the Madrid International Plan of Action on Ageing, 2002	2018/7	Mainstreaming a gender perspective into all policies and programmes in the United Nations system
2015/10	2020 World Population and Housing Census Programme		
2016/27	Strengthening institutional arrangements on geospatial information management	2020/5	Strengthening coordination of the statistical programmes in the United Nations system
2017/7	Work of the Statistical Commission pertaining to the 2030 Agenda for Sustainable Development		

*Economic and Social Council decisions*

2013/235	Report of the Statistical Commission on its forty-fourth session (Statistical Commission decision 44/105: Environment statistics)	2018/227	Report of the Statistical Commission on its forty-ninth session (Statistical Commission decision 49/101: Global indicator framework for Sustainable Development Goals and targets of the 2030 Agenda for Sustainable Development)
2014/219	Report of the Statistical Commission on its forty-fifth session (Statistical Commission decision 45/101: Implementation of the Fundamental Principles of Official Statistics)	2018/227	Report of the Statistical Commission on its forty-ninth session (Statistical Commission decision 49/102: Data and indicators for the 2030 Agenda for Sustainable Development)
2014/219	Report of the Statistical Commission on its forty-fifth session (Statistical Commission decision 45/103: Programme review: broader measures of progress)	2018/227	Report of the Statistical Commission on its forty-ninth session (Statistical Commission decision 49/108: Regional statistical development)
2014/219	Report of the Statistical Commission on its forty-fifth session (Statistical Commission decision 45/110: Big data and modernization of statistical systems)	2018/227	Report of the Statistical Commission on its forty-ninth session (Statistical Commission decision 49/113: Climate change statistics)
2015/216	Report of the Statistical Commission on its forty-sixth session (Statistical Commission decision 46/101: Data in support of the post-2015 development agenda)	2018/227	Report of the Statistical Commission on its forty-ninth session (Statistical Commission decision 49/114: Statistical classifications)
2015/216	Report of the Statistical Commission on its forty-sixth session (Statistical Commission decision 46/102: Population and housing censuses)	2019/210	Report of the Statistical Commission on its fiftieth session (Statistical Commission decision 50/101: Global indicator framework for Sustainable Development Goals and targets of the 2030 Agenda for Sustainable Development)
2015/216	Report of the Statistical Commission on its forty-sixth session (Statistical Commission decision 46/107: International trade and economic globalization statistics)	2019/210	Report of the Statistical Commission on its fiftieth session (Statistical Commission decision 50/103: Partnership, Coordination and Capacity-Building for Statistics for the 2030 Agenda for Sustainable Development)
2016/220	Report of the Statistical Commission on its forty-seventh session (Statistical Commission decision 47/102: High-level Group for Partnership, Coordination and Capacity-Building for Statistics for the 2030 Agenda for Sustainable Development)	2019/210	Report of the Statistical Commission on its fiftieth session (Statistical Commission decision 50/106: National quality assurance frameworks)
2016/220	Report of the Statistical Commission on its forty-seventh session (Statistical Commission decision 47/112: Climate change statistics)	2019/210	Report of the Statistical Commission on its fiftieth session (Statistical Commission decision 50/116: Disaster-related statistics)
2017/228	Report of the Statistical Commission on its forty-eighth session (Statistical Commission decision 48/101: Global indicator framework for Sustainable Development Goals and targets of the 2030 Agenda for Sustainable Development)	2019/210	Report of the Statistical Commission on its fiftieth session (Statistical Commission decision 50/117: International migration statistics)
2017/228	Report of the Statistical Commission on its forty-eighth session (Statistical Commission decision 48/103: Transformative agenda for official statistics)	2020/211	Report of the Statistical Commission on its fifty-first session (Statistical Commission decision 51/101: Global indicator framework for Sustainable Development Goals and targets of the 2030 Agenda for Sustainable Development)
2017/228	Report of the Statistical Commission on its forty-eighth session (Statistical Commission decision 48/107: Fundamental Principles of Official Statistics)	2020/211	Report of the Statistical Commission on its fifty-first session (Statistical Commission decision 51/104: Coordination of statistical programmes)
2017/228	Report of the Statistical Commission on its forty-eighth session (Statistical Commission decision 48/108: Integration of statistical and geospatial information)	2020/211	Report of the Statistical Commission on its fifty-first session (Statistical Commission decision 51/106: National accounts)
2017/228	Report of the Statistical Commission on its forty-eighth session (Statistical Commission decision 48/114: Business registers)		

2020/211	Report of the Statistical Commission on its fifty-first session (Statistical Commission decision 51/107: International trade and business statistics)	2020/211	Report of the Statistical Commission on its fifty-first session (Statistical Commission decision 51/115: Gender statistics)
2020/211	Report of the Statistical Commission on its fifty-first session (Statistical Commission decision 51/108: Price statistics)	2020/211	Report of the Statistical Commission on its fifty-first session (Statistical Commission decision 51/120: Management and modernization of statistical systems)
2020/211	Report of the Statistical Commission on its fifty-first session (Statistical Commission decision 51/110: Environmental-economic accounting)	2020/211	Report of the Statistical Commission on its fifty-first session (Statistical Commission decision 51/123: Integration of statistical and geospatial information)

## Deliverables

17.100 Table 17.6 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 17.6

### Subprogramme 3: deliverables for the period 2020–2022, by category and subcategory

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>81</b>	<b>71</b>	<b>81</b>	<b>81</b>
1. Documentation for the Conference of European Statisticians	43	38	43	43
2. Documentation for expert bodies	38	33	38	38
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>85</b>	<b>77</b>	<b>85</b>	<b>85</b>
3. Meetings of the Conference of European Statisticians and its Bureau	13	13	13	13
4. Meetings of expert bodies	72	64	72	72
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>1</b>	<b>1</b>	<b>1</b>	<b>1</b>
5. Project on social and economic statistics	1	1	1	1
<b>Seminars, workshops and training events</b> (number of days)	<b>6</b>	<b>4</b>	<b>6</b>	<b>6</b>
6. Workshops on social and economic statistics	3	1	3	3
7. Workshops on innovating statistical production	3	3	3	3
<b>Publications</b> (number of publications)	<b>9</b>	<b>8</b>	<b>7</b>	<b>7</b>
8. Publications on topics covering multiple statistical areas	1	1	1	1
9. Publications on social, environmental and economic statistics	8	7	6	6
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> advisory services for more than 100 government officials (staff of national statistical systems) and other stakeholders of countries of Eastern Europe, the Caucasus and Central Asia and South-Eastern Europe on economic, social, demographic and environment statistics, statistics for the Sustainable Development Goals, geospatial statistics and institutional issues and modernization of official statistics (4 countries).				
<b>Databases and substantive digital materials:</b> update and maintenance of ECE statistical databases (SDG, population and gender statistics database; economic statistics database; transport database; forestry database).				

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

#### **D. Communication deliverables**

**Outreach programmes, special events and information materials:** leaflets and other promotional materials.

**External and media relations:** articles for the “UNECE Weekly” and “EnvStats” newsletters for regional access.

**Digital platforms and multimedia content:** interactive digital workspaces (wikis, including the ECE census wiki); update and maintenance of the website of the subprogramme.

## **Subprogramme 4 Economic cooperation and integration**

### **Objective**

17.101 The objective, to which this subprogramme contributes, is to strengthen policies on innovation, competitiveness and public-private partnerships in the ECE region.

### **Strategy**

17.102 The strategy of the subprogramme is based on the implementation of three core interlinked functions in the subprogramme’s two areas of work (innovation and competitiveness policies, and public-private partnerships): international policy dialogue; normative and analytical work; and capacity-building and the sharing of best practices and lessons learned. The two areas of work are complementary. They both contribute to achieving Sustainable Development Goals 8, 9, 12 and 17. Both areas of work also contribute to the ECE nexus areas on sustainable mobility and smart connectivity and on sustainable and smart cities for all ages.

17.103 To contribute to the objective in the first of the above two areas of work (i.e., innovation and competitiveness policies), the subprogramme will continue to support member States in creating a business climate that enables and rewards innovative solutions to sustainable development challenges. It will do so by developing good practices on how innovation can advance sustainable development and how Governments can support this; advising, on request, Governments on innovation policy reforms on the basis of analyses of national innovation systems, policies and institutions; and supporting innovation policy reforms by building capacity through workshops and seminars at the national and subregional levels.

17.104 To contribute to the objective in the second of the above two areas of work (i.e., public-private partnerships), the subprogramme will promote innovative ways of financing, building and managing infrastructure critical for sustainable development. It will do so by developing international guiding principles and standards on how to design regulatory frameworks for public-private partnerships in various sectors and on how to design partnership projects; developing a methodology to evaluate public-private partnership projects on whether they contribute to sustainable development (“people-first” public-private partnerships) and assessing projects, on request; and providing policy advice and capacity-building to support member States in creating regulatory frameworks and partnership project pipelines to help them to close the Sustainable Development Goal infrastructure financing gap.

17.105 The subprogramme plans to support member States on issues related to COVID-19 by focusing some of its policy dialogues, policy analysis, policy recommendations and standards, and capacity-building on the question of how innovation policy and public-

private partnership projects can help to turn the crisis into an opportunity by facilitating innovations and developing infrastructure that not only build back, but also build a better, more resilient, sustainable and productive economy in the future.

17.106 The above-mentioned work is expected to result in a shared and improved understanding among member States:

(a) On policy options to harness the power of innovation for sustainable development, and support national innovation policy reforms, in line with international good practice and ECE recommendations;

(b) On how to design and operate public-private partnerships that contribute to sustainable development and will lead to more “people-first” projects (i.e., projects that not only deliver value for money, but also are ecologically sustainable and socially inclusive), as well as in strengthened capacities for policy and project design and implementation.

17.107 The planned support on issues related to COVID-19 is expected to result in:

(a) New and better policies supporting innovation in areas critical for resilience and sustainability;

(b) Better regulatory frameworks supporting investment in resilient and sustainable infrastructure.

## **Programme performance in 2020**

17.108 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Renewed pathway of the Government of Georgia to improve innovation support policies with a view to “building back better” post-COVID-19**

17.109 A key part of the work of the subprogramme consists of national Innovation for Sustainable Development Reviews developed at the request of member States. These Reviews analyse national innovation performance, systems, institutions and policies in the light of international good practice as developed under the subprogramme, and provide tailored recommendations on how innovation policies can be improved. The subprogramme completed a review of Georgia and developed a shared understanding with the Government of the strengths and weaknesses of current innovation performance and policies, and of policy options for improving innovation performance in pursuit of the country’s sustainable development priorities.

17.110 The subprogramme responded to the COVID-19 pandemic by expanding the assessments and recommendations of the Innovation for Sustainable Development Review of Georgia to provide additional recommendations to the Government on options for strengthening innovation to build back better after the pandemic. These recommendations were based on additional analysis that the subprogramme had carried out on the experience in the entire ECE region on the issue.

### *Progress towards the attainment of the objective, and performance measure*

17.111 The above-mentioned work contributed to the objective, as demonstrated by the endorsement of findings and recommendations from the review by the ECE Team of Specialists on Innovation and Competitiveness Policies and the publication of the Innovation for Sustainable Development Review (see table 17.7). The Team of Specialists is composed of experts nominated by Governments of the ECE member States.

Table 17.7  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
Request received from the Government of Georgia for a national Innovation for Sustainable Development Review; agreement reached on the scope of the Review	Agreement with the requesting Government on the design of the review	ECE Team of Specialists endorses findings and recommendations from the Review, including options for strengthening innovation to build back better after the COVID-19 pandemic

### Impact of COVID-19 on subprogramme delivery

17.112 Owing to the impact of COVID-19 during 2020, the subprogramme had to limit activities requiring travel, resulting in fewer country missions and consultations facilitating policy reforms being carried out than originally envisaged. In turn, member States undertook fewer policy reform measures than previously expected, as specified under result 1 below.

### Planned results for 2022

17.113 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### Result 1: innovation policy outlook for the effective analysis of innovation policies and institutions<sup>10</sup>

#### Programme performance in 2020

17.114 The subprogramme completed the subregional innovation policy outlook for Armenia, Azerbaijan, Belarus, Georgia, the Republic of Moldova and Ukraine. The findings and recommendations were endorsed by the subprogramme's intergovernmental process, and the outlook was launched regionally and in the participating countries.

17.115 The above-mentioned work contributed to four additional policy measures undertaken by pilot project member States, which did not meet the target of six new policy measures reflected in the programme budget for 2020. This was due to the restrictions imposed during the COVID-19 pandemic, which resulted in fewer country missions and consultations facilitating policy reforms than originally envisaged. Another contributing factor was that some Governments had prioritized the immediate health-care response to the pandemic and were not able to devote as much attention to innovation policy reform as expected when planning the above result.

#### Proposed programme plan for 2022

17.116 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to support participating member States in implementing national innovation policy reforms on the basis of the recommendations from the subregional innovation policy outlook. The expected progress is presented in the performance measure below (see figure 17.XI).

<sup>10</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 20)).

Figure 17.XI

**Performance measure: total number of national innovation policy measures taken by pilot project member States (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: people-first public-private partnerships to finance sustainable development<sup>11</sup>**

### **Programme performance in 2020**

17.117 The subprogramme has developed the evaluation methodology for people-first public-private partnerships (formerly the public-private partnerships project impact assessment tool), circulated it for public review among key public-private partnership stakeholders and incorporated the feedback received. The evaluation methodology is expected to provide member States with additional evidence on the impact and performance of their infrastructure projects. Such evidence will assist member States in prioritizing investments in infrastructure projects that support progress towards achieving the Sustainable Development Goals and help to mobilize private finance and innovation capabilities in Goal-compatible projects.

17.118 The above-mentioned work contributed to the ECE Working Party on Public-Private Partnerships endorsing the methodology for piloting, which met the planned target for 2020, reflected in the programme budget for 2021. The lessons from the pilot stage will be incorporated into the methodology for final approval.

### **Proposed programme plan for 2022**

17.119 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will assess at least an additional 50 public-private partnership projects using the evaluation methodology for people-first public-private partnerships. The expected progress is presented in the performance measure below (see table 17.8).

<sup>11</sup> As reflected in the programme budget for 2021 ([A/75/6/Add.1](#)).

Table 17.8  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Member States agreed to set up a project team to develop a project impact assessment tool	The project team was set up and work on the project impact assessment tool commenced	Evaluation methodology endorsed by member States for piloting	At least 100 public-private partnership projects assessed using the evaluation methodology	An additional 50 public-private partnership projects assessed using the evaluation methodology

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: improved capacity of member States to use innovation to achieve their sustainable development objectives**

#### **Proposed programme plan for 2022**

17.120 Enhanced cooperation, knowledge-sharing and capacity-building on science, technology and innovation is one of the key means of implementation of the 2030 Agenda and the achievement of Sustainable Development Goal 17. The evidence collected by the subprogramme and by others shows clearly that economies differ greatly in their capacity to innovate and that Governments differ greatly in their capacity to provide adequate policy support.

17.121 The subprogramme has responded to this challenge by creating a broad network of innovation policymakers and other innovation stakeholders from across the ECE region that are sharing their knowledge on innovation policy through regular policy dialogues (contributing to achieving Sustainable Development Goal 17). On the basis of these exchanges of knowledge, the subprogramme has built up, and is continuously adding to, a collection of international good practices. On request, the subprogramme has been analysing the innovation systems, policies and performance of selected member States and has been benchmarking them against these international good practices. On the basis of these analyses (national Innovation for Sustainable Development Reviews and subregional innovation policy outlook), the subprogramme has been assessing the strengths and weaknesses of existing innovation policies and providing recommendations for policy improvements to the requesting Governments.

#### *Lessons learned and planned change*

17.122 The lesson for the subprogramme was that the medium-term impact of the programme could be improved with the provision of more capacity-building support to Governments as a follow-up to each Innovation for Sustainable Development Review to facilitate the implementation of specific recommendations for policy reforms contained in the Reviews. In applying the lesson, the subprogramme will expand its capacity-building support to requesting Governments in the follow-up to national Reviews and subregional innovation policy outlooks (contributing to achieving Sustainable Development Goal 17). Steps in this direction have already been taken in 2019–2020 in follow-up to a national Review of Belarus.

*Expected progress towards the attainment of the objective, and performance measure*

17.123 This work is expected to contribute to the objective, as demonstrated by an increase of 200 policymakers and other innovation stakeholders from requesting countries benefiting from ECE capacity-building on innovation policy (see figure 17.XII).

Figure 17.XII

**Performance measure: total number of policymakers and other innovation stakeholders from requesting countries that have benefited from Economic Commission of Europe capacity-building on innovation policy (cumulative)**

## Legislative mandates

17.124 The list below provides all mandates entrusted to the subprogramme.

### *General Assembly resolutions*

<a href="#">72/228</a>	Science, technology and innovation for development	<a href="#">74/197</a>	Information and communication technologies for sustainable development
------------------------	--	------------------------	--

### *Economic Commission for Europe decisions*

<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> advisory services under the Working Party on Public-Private Partnership and the Team of Specialists on Innovation and Competitiveness Policies reaching 30 government ministries and agencies and stakeholder entities.				
<b>Fact-finding, monitoring and investigation missions:</b> preparatory and fact-finding missions for Innovation for Sustainable Development Reviews and public-private partnership needs assessments in 3 member States.				
<b>Databases and substantive digital materials:</b> database of infrastructure public-private partnership projects certified and evaluated according to ECE people-first public-private partnership methodology from approximately 15 member States.				
<b>D. Communication deliverables</b>				
<b>External and media relations:</b> press releases and launch events for the above publications for regional, subregional and national access.				
<b>Digital platforms and multimedia content:</b> update and maintenance of the subprogramme's website for regional access.				

## Subprogramme 5

### Sustainable energy

#### Objective

17.126 The objective, to which this subprogramme contributes, is to improve access to affordable and clean energy for all and to reduce greenhouse gas emissions and the carbon footprint of the energy sector in the region.

## Strategy

17.127 The strategy of the subprogramme is to support international policy dialogue and cooperation among Governments, energy industries and other stakeholders to foster sustainable energy development; develop and deploy ECE policy recommendations, norms, standards, guidelines and tools on energy-related issues; and provide capacity-building and assistance to member States, at their request, through training programmes, advisory services and technical cooperation projects. Through its work, the subprogramme will contribute to the four ECE nexus areas described in paragraph 17.5 above.

17.128 To contribute to the objective, the subprogramme will assist member States in integrating the objectives of Sustainable Development Goals 7 and 13 by reducing the environmental footprint of energy, accelerating deep transformation of the energy sector to meet future needs, ensuring the sustainable management of resources and assessing options to ensure energy for sustainable development. The subprogramme will promote policy dialogue and cooperation among member States, regional entities and other partners on sustainable energy issues, in particular energy efficiency, cleaner electricity systems, renewable energy, coal mine methane, resource management, natural gas and energy security through regional and country-specific initiatives aimed at improving cooperation. The initiatives include the establishment of international centres of excellence to disseminate ECE best practice guidance on methane management, the ECE Framework Guidelines for Energy Efficiency Standards in Buildings and the United Nations Framework Classification for Resources, and the conduct of dialogue among countries on pathways to sustainable energy. The subprogramme will provide technical assistance and guidance on energy, disseminate best practices and improve information-sharing. The subprogramme will promote collaboration among actors who are key to implementing national and regional policies. The promotion includes the engagement of stakeholders in developing normative instruments and the encouragement of private and public actors in the deployment and dissemination of the instruments.

17.129 The subprogramme plans to support Member States on issues related to COVID-19 through work on sustainable resource management to ensure the availability of critical materials and activities on high-performance buildings to improve indoor air quality and health. This work will include further development and implementation of the United Nations Framework Classification for Resources and the United Nations Resource Management System for application to raw materials through workshops, capacity-building and case studies, and the deployment and dissemination of the high-performance buildings initiative (training, capacity-building and extension of the initiative's networks).

17.130 The above-mentioned work is expected to result in:

- (a) More effective integration of sustainable energy across national policies and normative frameworks in support of the 2030 Agenda;
- (b) Enhanced dialogue and cooperation among all energy actors to boost transformational investment in the energy sector and, consequently, accelerate the modernization of the energy system to meet countries' development and climate commitments.

17.131 The planned support on issues related to COVID-19 is expected to result in:

- (a) Greater availability of raw material resources needed for surveillance, response and recovery from current and future pandemics, including the raw materials needed to produce personal protection equipment, drugs, vaccines and essential services such as food, water and energy;

(b) Improvement in the performance of buildings from a health perspective (e.g., temperatures, comfort, effective air intake and recycling filters), which will improve the protection and resilience of populations.

## **Programme performance in 2020**

17.132 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Securing the supply of critical raw materials through sustainable resource management**

17.133 The demand for natural resources such as energy, minerals and freshwater is increasing at an exponential rate. The amount of natural resources used in the ECE region is doubling every 25 to 30 years. The consumption is unsustainable, given the environmental impacts, waste problems and greenhouse gas emissions. The subprogramme developed the United Nations Framework Classification for Resources, which includes guidelines and best practices for the energy and mineral sectors that integrate social and environmental considerations fully to facilitate the attainment of affordable and clean energy. A range of guidelines, best practices and case studies was either updated or developed for the Framework Classification to extend its evaluation parameters to better embrace social, environmental and economic considerations and to facilitate application by countries.

17.134 Through extensive training programmes undertaken in 2020, the subprogramme also enhanced the capacity of Member States to apply the United Nations Framework Classification for Resources as a universal standard to facilitate policy and strategy formulation, government resources management, industry business processes and capital allocation. In particular, the subprogramme assisted the European Commission in using the Framework Classification to report critical raw materials in European Union member States. The support included capacity-building and training on the use of the Framework Classification to harmonize reporting codes for primary resources, the use of the Framework Classification for reporting secondary raw materials produced from wastes and other residues, and application of the Framework Classification to deliver coherent resource reporting under a heterogeneous legal framework.

#### *Progress towards the attainment of the objective, and performance measure*

17.135 The above-mentioned work contributed to the objective, as demonstrated by the number of United Nations Member States applying the United Nations Framework Classification for Resources to resources that are critical for attaining the 2030 Agenda (see figure 17.XIII).

Figure 17.XIII

**Performance measure: total number of United Nations Member States using the United Nations Framework Classification for Resources for reporting critical raw materials (cumulative)**

### **Impact of COVID-19 on subprogramme delivery**

17.136 Owing to the impact of COVID-19 during 2020, meetings of three of the groups of experts in energy (18 half-days) were postponed. Much of the substantive work of the groups was delivered through webinars and virtual workshops, and the formal segments of the postponed meetings were merged into the previously scheduled meetings of two other groups of experts (eight half-days) in September 2020. Although two major events, namely, the Global Methane Forum and the International Forum on Energy for Sustainable Development, were cancelled, the lead-up activities were completed in full. Because of the additional task of preparing the online alternatives to in-person meetings and because experts were less available to contribute than previously, the full slate of 60 parliamentary documents could not be produced. Two capacity-building seminars on renewable energy development and policy reforms for climate change mitigation planned for 2020 were postponed because of COVID-19 and persistent travel restrictions. The development of centres of excellence, notably on high-performance buildings, was delayed. Both outreach by ECE and activities by prospective centres were delayed because of limitations on travel and a refocus on COVID-19 management and response. These changes had an impact on programme performance in 2020, as specified under result 2 below.

### **Planned results for 2022**

17.137 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: achieving a step change in the efficiency with which natural resources are used<sup>12</sup>**

#### **Programme performance in 2020**

17.138 The subprogramme updated the United Nations Framework Classification for Resources in 2020 and began to develop a derivative tool called the United Nations Resource Management System that allows for the dynamic management of resource endowments in line with the 2030 Agenda. The Management System is intended to

<sup>12</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 20)).

be a comprehensive framework for the integrated and sustainable management of the natural resource base. The subprogramme also worked with United Nations Member States to develop case studies, conduct capacity-building workshops and deploy application of the Framework Classification nationally and regionally. The subprogramme has secured extrabudgetary funding for continuing development of the Framework Classification and the Management System and capacity-building activities over the coming years. The subprogramme continued the development of the Management System by preparing two advanced concept notes on it, presenting the objectives, fundamental principles, requirements, regional priorities and way forward for it. A comprehensive report discussing the background and vision of the Management System was published in 2020. The principles and guidelines of the Management System have been promoted as effective tools for the sustainable recovery from COVID-19, especially in projects involving micro-, small and medium-sized enterprises.

17.139 The above-mentioned work contributed to increasing the number of countries applying the United Nations Framework Classification for Resources to 35, which exceeded the planned target of 33, reflected in the proposed programme budget for 2020.

#### **Proposed programme plan for 2022**

17.140 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will extend the application and implementation of the United Nations Framework Classification for Resources and further develop the United Nations Resource Management System. The expected progress is presented in the performance measure below (see figure 17.XIV).

Figure 17.XIV

**Performance measure: total number of United Nations Member States applying the United Nations Framework Classification for Resources (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: reduced carbon footprint and improved quality of life with high-performance buildings<sup>13</sup>

### Programme performance in 2020

17.141 The subprogramme updated the Framework Guidelines on Energy Efficiency Standards in Buildings that underpin the ECE high-performance buildings initiative and extended the initiative to reflect broader quality of life indicators (energy services, health, water and climate). The subprogramme extended the outreach of its high-performance buildings initiative to additional communities in the United Kingdom of Great Britain and Northern Ireland and in Eastern Europe that are expected to join the network of centres of excellence on high-performance buildings in 2021 and 2022. Furthermore, the subprogramme advanced the research agenda on high-performance buildings and is advancing projects in Central Asia to produce case studies on the development of high-performance buildings.

17.142 The above-mentioned work contributed to negotiations and agreement with countries/contact with institutions and the establishment of three centres of excellence, which did not meet the planned target of five centres, reflected in the programme budget for 2021. The development of additional centres was affected directly by the COVID-19 pandemic. Both outreach by ECE and activities by the prospective centres were delayed because of limitations on travel and a refocus on COVID-19 management and response.

### Proposed programme plan for 2022

17.143 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will extend the network of centres of excellence, expand the research consortium and prepare case studies on the application of the Framework Guidelines on Energy Efficiency Standards in Buildings. The centres of excellence have succeeded in raising the capacity of building developers within their relevant footprints of activity to deliver high-performance buildings. The expected progress is presented in the performance measure below (see figure 17.XV).

Figure 17.XV

**Performance measure: total number of international centres of excellence disseminating the Framework Guidelines for Energy Efficiency Standards in Buildings (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

<sup>13</sup> As reflected in the programme budget for 2021 ([A/75/6/Add.1](#)).

**Result 3: managing gases to implement the 2030 Agenda****Proposed programme plan for 2022**

17.144 Gases will have an important role in the future energy mix, both as energy vectors (methane (CH<sub>4</sub>) and hydrogen (H<sub>2</sub>)) and as greenhouse gases (CO<sub>2</sub> and CH<sub>4</sub>). The management of these gases will require new normative instruments. The subprogramme has supported Member States as they pursue options for carbon capture and storage, CH<sub>4</sub> management and an H<sub>2</sub> economy by helping to develop normative instruments such as recommendations or best practice guidance and by disseminating and deploying the instruments. In particular, it has developed best practice guidance for methane management in both operating and abandoned coal mines and for monitoring and reporting methane emissions in the oil and gas sectors.

17.145 The natural gas infrastructure could be used to mix CH<sub>4</sub> and H<sub>2</sub>, leading to progressive decarbonization. For this to work across borders, standards on acceptable mixing proportions are needed. In addition, the production of H<sub>2</sub> using carbon-free energy sources could be an important option for decarbonizing energy. The subprogramme has been working with national and organizational partners on the transformation to an H<sub>2</sub> economy.

17.146 Opportunities exist to capture CO<sub>2</sub> emissions and, eventually, atmospheric CO<sub>2</sub> and to use existing infrastructure to transport CO<sub>2</sub> into long-term storage. The subprogramme has developed and submitted policy recommendations on the deployment of carbon capture and storage as a means of minimizing CO<sub>2</sub> emissions.

*Lessons learned and planned change*

17.147 The lesson for the subprogramme was that, to achieve effective and impactful results, the subprogramme must engage not only with Governments, but also with the business community, civil society and academia. An example of this process has been the development of best practice guidance in managing coal mine methane with China, Poland and the Russian Federation, instituting international centres of excellence to disseminate and deploy the guidance. In applying the lesson, the subprogramme will engage in an inclusive, open and transparent process that creates a sense of ownership. This engagement is key to both the development and application of guidance for managing gases and their mixtures. The subprogramme's activities will involve Governments and the private sector. Engagements planned with academia will help to integrate leading and novel technologies into the development of normative instruments.

*Expected progress towards the attainment of the objective, and performance measure*

17.148 This work is expected to contribute to the objective, as demonstrated by the number of countries applying the guidance developed under the subprogramme (see figure 17.XVI).

Figure 17.XVI

**Performance measure: number of Member States applying Economic Commission for Europe guidance to manage gases (CH<sub>4</sub>, H<sub>2</sub>, and CO<sub>2</sub>)**

### Legislative mandates

17.149 The list below provides all mandates entrusted to the subprogramme.

#### *General Assembly resolutions*

<a href="#">69/225</a>	Promotion of new and renewable sources of energy	<a href="#">72/224</a>	Ensuring access to affordable, reliable, sustainable and modern energy for all
<a href="#">70/213</a>	Science, technology and innovation for development		

#### *Economic and Social Council decisions*

1997/226	United Nations International Framework Classification for Energy Reserves/Resources: Solid Fuels and Mineral Commodities	2004/233	United Nations Framework Classification for Fossil Energy and Mineral Resources
		2011/222	Best Practice Guidance for Effective Methane Drainage and Use in Coal Mines

### Deliverables

17.150 Table 17.10 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 17.10

<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> booklets on sustainable energy and related topics, for regional access.				
<b>External and media relations:</b> press releases, keynote speeches and articles.				
<b>Digital platforms and multimedia content:</b> update and maintenance of subprogramme's website providing access to information and documents for regional and global audiences.				

## Subprogramme 6

### Trade

#### Objective

17.151 The objective, to which this subprogramme contributes, is to strengthen trade facilitation and electronic business, regulatory cooperation and standardization policies, agricultural quality standards and trade-related economic cooperation in the ECE region and beyond.

#### Strategy

17.152 The strategy of the subprogramme is based on the implementation of core interlinked functions. The first function is international policy dialogue on reducing regulatory and procedural barriers to trade that hamper market access, including those caused by cumbersome procedures and substantial paperwork; differences in trade procedures, standards and documents; and divergent regulatory approaches and product standards. The second function is normative work to develop standards and recommendations in the areas of trade facilitation and e-business, agricultural quality standards and regulatory cooperation. The third function is focused on capacity-building and the sharing of best practices and lessons learned in all areas of work. Through its work, the subprogramme will contribute to the ECE nexuses on sustainable mobility and smart connectivity, the sustainable use of natural resources and sustainable and smart cities for all ages, and to the cross-cutting theme of a circular economy.

17.153 To contribute to the objective, the subprogramme will continue to promote simple, transparent and effective processes for global trade. The subprogramme also plans to continue its normative work to develop standards and recommendations in the areas of trade facilitation and electronic business. The subprogramme will continue to facilitate international policy dialogue on establishing digital trading environments and ensuring compliance with the requirements of the multilateral trading system, and dissemination of the instruments such as standards, recommendations and guidelines. In addition, the subprogramme will promote sustainable and resilient value chains and enhanced traceability and circularity (e.g., minimizing waste and maximizing the use of natural resources towards a circular economy), through studies, policy dialogues, technology-based pilot initiatives (e.g., blockchain-based traceability for textile value chains). This work will help member States to make progress towards achieving Sustainable Development Goals 8 and 12.

17.154 The subprogramme will continue to promote a predictable and harmonized regulatory environment through strengthening regulatory cooperation and promoting standards and best practices in regulatory frameworks, risk management, conformity assessment and market surveillance. The subprogramme will also disseminate gender-responsive standards, which are aimed at providing a practical way forward for standards bodies wishing to make both their standards and the standards development process gender-sensitive. In addition, through the ECE web portal on standards for the Sustainable Development Goals,<sup>14</sup> the subprogramme will disseminate standards in support of achieving the Goals, in order to showcase information on voluntary standards and maps them according to the Goals and targets of the 2030 Agenda. This work will support member States in making progress towards achieving Sustainable Development Goals 5 and 17.

<sup>14</sup> Available at <https://standards4sdgs.unece.org/>.

17.155 The subprogramme will also continue to promote up-to-date agricultural quality standards and explanatory guidelines through its normative work in these areas. Mindful of 1.6 billion tonnes of food lost or wasted while more than 800 million people suffer from hunger worldwide, the subprogramme will also address food loss and waste by promoting awareness of food loss reduction through policy dialogues, partnerships with international organizations and technology-based initiatives (e.g., blockchain-based food loss application). This work will support member States in making progress towards achieving Sustainable Development Goal 12.

17.156 The subprogramme will continue to carry out analytical evidence-based studies to identify regulatory and procedural barriers to trade and assist Governments in setting action-oriented recommendations for implementing the above-mentioned instruments. This work will support member States in making progress towards achieving Sustainable Development Goal 12.

17.157 The subprogramme plans to support member States on issues related to COVID-19 by further deepening its international policy dialogue, normative, technical assistance and capacity-building activities on digitalization of trade processes in order to support a sustainable and resilient recovery from COVID-19. This work will support member States in making progress towards achieving Sustainable Development Goals 8 and 9.

17.158 The above-mentioned work is expected to result in:

- (a) Simplified trade processes, increased digitalization and greater productivity;
- (b) Increased transparency and traceability of the value chains and reduction of waste, promoting sustainable consumption and production patterns;
- (c) Greater uptake of international standards by countries in order to enable the implementation of internationally harmonized regulatory processes;
- (d) Support for the public and private sectors in the member States to facilitate trade;
- (e) Increased gender equality in trade.

17.159 The planned support on issues related to COVID-19 is expected to result in the enhanced digitalization of trade (e.g., progress towards the adoption of trade-related digital services such as single windows) to minimize COVID-19 transmission risks in the ECE member States.

## **Programme performance in 2020**

17.160 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Increased access to analytical information on the impact of COVID-19 on trade Programme performance in 2020**

17.161 The COVID-19 pandemic has disrupted global trade and supply chains. According to the most recent World Trade Organization (WTO) data, global merchandized trade volume dropped by more than 14 per cent in the second quarter of 2020 compared with the same period in 2019. Some borders were closed temporarily, logistics operations were halted and businesses were closed either in part or in full. There was a shortage of supply for essential products such as medicine and

food. FAO considers that food accessibility and security will be at significant risk if global trade disruption is not adequately addressed. It is widely accepted that the impact of the pandemic is likely to continue for several years. The subprogramme refocused its activities on a sustainable and resilient recovery for ECE member States. For example, as part of its information provision function, the subprogramme launched a website for sharing information on food trade flows in member States and a webpage on trade facilitation resources developed by the United Nations Centre for Trade Facilitation and Electronic Business to support the Governments overcoming the impact of COVID-19. The large number of visits documents the concrete value added of responding to the need for facts-based information by trade stakeholders. As parts of its core, normative function, the subprogramme has begun to support the development of a normative instrument jointly with other agencies through a United Nations Centre project to support member States in expediting joint controls of essential goods and in easing cross-border trade flows during and in the aftermath of a global health crisis. Furthermore, the subprogramme, through the United Nations Centre, produced a report on the ways in which advanced technologies can help to overcome such disruptions and a white paper on the response to pandemic-related trade flow disruption.

17.162 As part of its analytical and technical assistance function, the subprogramme is reviewing the impact of the crisis on trade and structural transformation in five member States. The reviews trace how non-tariff measures governing trade in goods influence end-to-end supply chains and highlight the lingering effects of the COVID-19 pandemic. Undertaken in the context of ECE studies on regulatory and procedural barriers to trade under the Steering Committee on Trade Capacity and Standards, the assessments use ECE evaluation methodology for designing targeted interventions for rebuilding stronger and more resilient post-COVID-19 economies. The findings and recommendations for the first review in Georgia, with integrated comments, were shared with key interlocutors to inform planning processes for future projects.

*Progress towards the attainment of the objective, and performance measure*

17.163 The above-mentioned work contributed to the objective, as demonstrated by access by member States to analytical information on the impact of COVID-19 on trade, including a study, with recommendations, on non-tariff measures affecting the imports and exports of crucial materials and on the impact of the COVID-19 outbreak on international trade and logistics in Georgia, and two webpages containing COVID-19-related resources on trade facilitation and food outlook for the member States (see table 17.11).

**Table 17.11**  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
—	—	Member States have increased access to analytical information on the impact of COVID-19 on trade, including a study, with recommendations, on non-tariff measures affecting the imports and exports of crucial materials and on the impact of the COVID-19 outbreak on international trade and logistics in Georgia, and 2

### Impact of COVID-19 on subprogramme delivery

17.164 Owing to the impact of COVID-19 during 2020, the subprogramme had to change the approach to delivering its normative products but was forced to either cancel or postpone the capacity-building and technical assistance activities. The subprogramme had to cancel seven in-person intergovernmental meetings and organized informal virtual consultations without interpretation. The following meetings were replaced with virtual informal consultations: the sixth session of the Steering Committee on Trade Capacity and Standards; the thirtieth session of the Working Party on Regulatory Cooperation and Standardization Policy; and the seventy-sixth session of the Working Party on Agricultural Quality Standards (including the four meetings of its specialized sections). The business-critical decisions proposed from those consultations were adopted in an emergency “silence procedure” with Geneva-based missions. Notwithstanding the challenges, the subprogramme continued to engage virtually with member States both through representatives at their Geneva missions and counterparts in their capitals. Those changes had an impact on the programme performance in 2020, as specified in result 2 below.

17.165 At the same time, however, the subprogramme identified new activities and modified its existing activities to support member States on issues related to COVID-19, within the overall scope of its objectives. The subprogramme stepped up its activities to increase awareness of existing tools and policy guidance to overcome COVID-19 effects on the logistic chain and intensified its participation in joint activities with partners, aimed at supporting a sustainable economic recovery from the pandemic. For example, the subprogramme created two web pages (on trade facilitation and food) to increase awareness of and accessibility to standards, recommendations, training materials, reports; published news articles on how existing standards and tools of the subprogramme could be used to address trade-related impacts of COVID-19; developed a report on advanced technologies and trade facilitation during the pandemic; conducted studies on the impact of COVID-19 on e-commerce in ECE member States and on trade in Armenia, Belarus, Georgia, the Republic of Moldova and Serbia; pilot-tested an additional module on the impacts of COVID-19 on the United Nations Global Survey on Digital and Sustainable Trade Facilitation in the Kyrgyz Republic; and, in collaboration with UNCTAD, initiated work to help the Kyrgyz Republic, at its request, to develop its own system for sharing information on changes in legislation on non-tariff measures with neighbouring countries. The new and modified deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

### Planned results for 2022

17.166 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

## **Result 1: enhancing trade efficiency in Central Asia<sup>15</sup>**

### **Programme performance in 2020**

17.167 The subprogramme has continued to develop trade facilitation recommendations and electronic business standards for four Central Asian countries (Kazakhstan, Kyrgyz Republic, Tajikistan and Uzbekistan). The subprogramme also supported Central Asian countries through technical assistance and capacity-building activities towards the adoption of national trade facilitation strategies and the implementation of the WTO Trade Facilitation Agreement. Furthermore, the subprogramme continued to support the conduct of the United Nations Global Survey on Digital and Sustainable Trade Facilitation, a joint initiative of the United Nations regional commissions undertaken biennially. Through follow-up workshops and meetings, the subprogramme discussed the results of the trade facilitation reform progress review with the Central Asian member States and identified policy priorities to implement appropriate trade facilitation measures.

17.168 The above-mentioned work contributed to an average trade facilitation implementation rate<sup>16</sup> of 55 per cent of Central Asian ECE member States, which exceeded the planned target of 45 per cent, reflected in the proposed programme budget for 2020. In addition, the Central Asian countries adopted three trade facilitation measures, namely, the national trade facilitation road map (Tajikistan), a national single window (Kazakhstan) and information portals related to export, import and transit procedures (Kyrgyz Republic).

### **Proposed programme plan for 2022**

17.169 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective the subprogramme will evolve to include increased capacity-building and outreach activities for the digitalization of trade processes in the pursuit of a sustainable and resilient recovery from the COVID-19 pandemic. Trade is likely to fall, given that the economic impact of the pandemic may continue for several years. During 2021, trade facilitation implementation and supply chain connectivity are therefore expected to be affected owing to further disruptions in logistics, transportation and health and safety measures and to the potential closure of regulatory and commercial services. However, the subprogramme will support the Central Asian countries in addressing these challenges in reducing the impact on trade facilitation implementation. It is expected that, by 2022, the average trade facilitation implementation rate will begin to increase again. The expected progress is presented in the performance measure below (see figure 17.XVII).

<sup>15</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 20)).

<sup>16</sup> The average trade facilitation implementation rate is calculated on the basis of selected measures from the United Nations Global Survey on Digital and Sustainable Trade Facilitation. Available at <https://untfsurvey.org>.

Figure 17.XVII

**Performance measure: average trade facilitation implementation rate of Central Asian States members of the Economic Commission for Europe**

(Percentage)

*Note:* The United Nations Global Survey on Digital and Sustainable Trade Facilitation is undertaken biennially. The data for 2018 are taken from the 2017–2018 survey, data for 2019 are estimated for the intermediate result and data for 2020 have been taken from the 2019–2020 survey. Actual data for 2021 will be taken from the 2021 survey, given that the survey is expected to be completed by the time of reporting for 2021.

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

**Result 2: improved traceability in the garment sector<sup>17</sup>****Programme performance in 2020**

17.170 The rise in consumer awareness of issues of environmental sustainability has increased the need for easy-to-understand consumer labelling and improvements in the traceability of origin and environmental compliance of garments production. To improve transparency, traceability and reduce the complexity of language on labelling, which has been a constraint to informed consumer choices, from 2018 to 2020, the subprogramme developed a sectoral framework for the traceability and transparency of sustainable and circular value chains in the garment and footwear industry on the basis of global standards. This includes a policy recommendation, implementation guidelines, a call to action and a technical standard for enhancing transparency and traceability for sustainable and circular garment and footwear value chains. To develop this framework and support its uptake and implementation, the subprogramme has mobilized a multi-stakeholder network of experts representing governments, the private sector, international organizations, civil society and think tanks (more than 170 experts, including from associations representing more than 190,000 businesses globally).

17.171 The above-mentioned work contributed to piloting the transparency and traceability framework for sustainable and circular value chains in the cotton sector in five countries and in partnership with eight businesses, including brands, manufacturers and farmers, and involving innovative start-ups and technology solution providers, which met the planned target, reflected in the programme budget for 2021.

<sup>17</sup> As reflected in the programme budget for 2021 ([A/75/6/Add.1](#)).

### Proposed programme plan for 2022

17.172 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will build on the lessons of implementing the framework in member States and adapt it further, including the development and adoption of a principles-based approach, to enlarge its applicability to include transition economies in the ECE region. The expected progress is presented in the performance measure below (see table 17.12). The expected outcome of this work is increased demand for sustainable garment products and enhanced visibility on due diligence, responsible business conduct and sustainability performance in the garment value chains for producers in the implementing countries.

Table 17.12  
Performance measure

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
European Union, International Labour Organization, International Trade Centre and ECE agreed to develop transparency and traceability system for sustainable supply chains	Development of the transparency and traceability system by ECE/United Nations/United Nations Centre for Trade Facilitation and Electronic Business experts and partners	Piloting of the transparency and traceability system in 5 countries and in partnership with 8 businesses	Implementation of the transparency and traceability system by 3 countries	Implementation of the transparency and traceability system by 3 additional countries

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: enhanced digitalization of trade in the ECE member States

#### Proposed programme plan for 2022

17.173 Global trade has been hit hard because of the COVID-19 pandemic. Digitally enabled solutions to trade-related services have played an important role during the pandemic period, given that physical distancing is a key protective measure against virus infection. Building back better requires innovative solutions that support a sustainable and resilient recovery. A priority of the subprogramme is to facilitate trade through greater digitalization (i.e., simplification and dematerialization of trade processes, adoption of information and communications technology (ICT), adoption and harmonization of international standards and guidelines, and promotion of interoperable digital systems). The subprogramme has been developing trade facilitation recommendations and electronic business standards for many years through the intergovernmental body, United Nations Centre for Trade Facilitation and Electronic Business. To date, the United Nations Centre has produced more than 40 policy recommendations on trade facilitation, more than 400 electronic business standards, several training materials and other guidance materials, which are available freely to the global trading community. This normative work, along with policy guidance, technical assistance and capacity-building activities, are geared towards greater digitalization of trade. In response to the COVID-19 pandemic, the focus on digitalization will be further emphasized in the normative, technical assistance and

capacity-building activities of the subprogramme in order to support a sustainable and resilient recovery.

#### *Lessons learned and planned change*

17.174 The lesson for the subprogramme was the growing need to ensure synergies among the cross-cutting themes, given the diversity of the topics addressed by the subprogramme. In applying the lesson, the subprogramme will integrate the cross-cutting themes such as digitalization, circularity, and sustainable and resilient recovery from the COVID-19 pandemic in the 17 programme countries in the ECE region. For example, electronic traceability systems and digital trade-related regulatory services could make the trading environment more sustainable and resilient. Lastly, the subprogramme will enhance engagement with the 17 programme countries through technical assistance and capacity-building activities.

#### *Expected progress towards the attainment of the objective, and performance measure*

17.175 This work is expected to contribute to the objective, as demonstrated by an increase in the average implementation rate of digital trade facilitation measures<sup>18</sup> in the ECE member States (see figure 17.XVIII).

Figure 17.XVIII

#### **Performance measure: average implementation rate of digital trade facilitation measures of Economic Commission for Europe member States**

(Percentage)

#### **Legislative mandates**

17.176 The list below provides all mandates entrusted to the subprogramme.

##### *General Assembly resolutions*

69/137	Programme of Action for Landlocked Developing Countries for the Decade 2014–2024	69/213	Role of transport and transit corridors in ensuring international cooperation for sustainable development
--------	--	--------	---

<sup>18</sup> The data shown in figure 17.XVIII have been extracted from the “Paperless trade” category of trade facilitation measures covered in the United Nations Global Survey on Digital and Sustainable Trade Facilitation, which is undertaken biennially jointly by the five United Nations regional commissions. The subprogramme will conduct the next Global Survey in 2021 and plans to include an additional component on the impact and best practices on trade facilitation due to COVID-19.

70/217	Follow-up to the second United Nations Conference on Landlocked Developing Countries	71/242	Industrial development cooperation
71/239	Follow-up to the second United Nations Conference on Landlocked Developing Countries	73/253	Agriculture development, food security and nutrition

*Economic and Social Council resolution*

1991/76	Promotion of interregional cooperation in the area of international trade facilitation
---------	--

*Economic and Social Council decision*

1997/225	Economic Commission for Europe Recommendation 25, entitled "Use of the UN/EDIFACT Standard"
----------	---

## Deliverables

17.177 Table 17.13 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 17.13

26. Guidelines on cross-border trade	1	1	1	1
<b>C. Substantive deliverables</b>				
<b>Consultation, advice, and advocacy:</b> advisory services to government officials and other stakeholders in at least 10 ECE member States on trade facilitation and electronic business, agricultural quality standards, regulatory cooperation and standardization, and regulatory and procedural barriers to trade.				
<b>Fact-finding, monitoring and investigating missions:</b> fact-finding missions in 3 ECE member States on trade facilitation and electronic business, agricultural quality standards, regulatory cooperation and standardization, and regulatory and procedural barriers to trade.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> booklets, fact sheets and information brochures reaching at least 17 ECE programme countries and more than 1000 public and private sector experts.				
<b>External and media relations:</b> press releases for the subprogramme for regional access, publication launching events and articles in external newsletters.				
<b>Digital platforms and multimedia content:</b> update and maintenance of the website and databases, which is provided to approximately 500,000 users with access to, for example, web pages and databases.				

## **Subprogramme 7**

### **Forests and the forest industry**

#### **Objective**

17.178 The objective, to which this subprogramme contributes, is to strengthen the sustainable management of forests and enhance the contribution of forests and forest products to sustainable development in the ECE region.

#### **Strategy**

17.179 The strategy of the subprogramme is based on the implementation of the core interlinked functions, namely, analytical and normative work, international policy dialogue, capacity-building and communication. Through its work, the subprogramme will contribute to the ECE nexus area on the sustainable use of natural resources. As part of its implementation strategy, the subprogramme will carry out its work in partnership with FAO and other relevant organizations and processes (e.g., International Union for Conservation of Nature, World Agroforestry Centre and Forest Europe).

17.180 To contribute to the objective, the subprogramme will continue to assist and promote cooperation with member States, regional entities and other partners for sustainable forest management, forest landscape restoration and the sustainable use of forest products. The subprogramme also plans to collect, validate and disseminate information and results of research and analysis related to sustainable forest management and the sustainable production and consumption of wood products. The subprogramme will further facilitate the exchange of national experiences and best practices and monitor progress on achieving sustainable forest management using key forest sector indicators, which will help member States to make progress towards achieving the Sustainable Development Goals, notably Goals 12 (responsible consumption and production) and 15 (life on land), as well as in implementing the United Nations strategic plan for forests 2017–2030 (General Assembly resolution [71/285](#)).

17.181 The subprogramme plans to support member States on issues related to COVID-19 by providing information in presentations and panel discussions during sessions of its Committee and Working Party, publications such as the outlook study and subregional studies, and webinars on how the forest sector is and will be affected by the global pandemic and how it can contribute to building back better economies and more resilient communities.

17.182 The above-mentioned work is expected to result in:

- (a) Healthy forest ecosystems in the ECE region that are sustainably managed and provide important ecosystem goods and services to benefit society;
- (b) An increased and efficient use of sustainable forest products that contribute to a sustainable and circular economy and replace less sustainable alternatives such as fossil-fuel based products.

17.183 The planned support on issues related to COVID-19 is expected to result in the enhanced ability of stakeholders to take well-informed decisions on how forests can play a key role in building back better during and after the COVID-19 pandemic.

## Programme performance in 2020

17.184 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Promoting sustainable jobs in the forest sector

17.185 In the past decades, forest sector employment has fallen, primarily because of higher labour productivity. In addition, the recession, caused by the financial crisis of 2008, increased unemployment and economic hardship in forest-dependent communities and regions. The subprogramme has analysed the current state of the forest sector workforce in the ECE region, such as working conditions, occupational safety and health, and the economic and social contexts that have led to structural changes in the sector. Together with a group of experts, the subprogramme identified new fields of activity that will contribute to rural development and help to retain jobs in small- and medium-sized enterprises in the forest sector. These job opportunities can also create new employment for professional groups that may incur job losses in the process of the transition to a sustainable economy and support the integration into the labour market of vulnerable and underrepresented groups, such as young people and women.

17.186 From 2018 to 2020, the subprogramme also analysed major transformation drivers of sustainable jobs in the forest sector development and mapped existing and emerging sustainable jobs, skill requirements and education needs for forest professionals in the ECE region. In addition, the subprogramme prepared guidelines for the promotion of sustainable jobs in forestry and organized several knowledge-sharing activities. Utilizing the framework for classifying sustainable forest jobs and the information gained from stakeholder consultations, the subprogramme produced three publications on sustainable jobs in the forest sector.

#### *Progress towards the attainment of the objective, and performance measure*

17.187 The above-mentioned work contributed to the objective, as demonstrated by Member States having access to three publications that enhance awareness and knowledge of relevant stakeholders, in particular policymakers, of how to attract more young people and women to the forest work, how to navigate occupational hazards in the sector and how to ensure education for new skill requirements in the twenty-first century (see table 17.14).

Table 17.14  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
Improved knowledge and capacities of policymakers in classifying green forest jobs.	Improved understanding by policymakers of the challenges for green forest jobs and which opportunities they may offer to ECE member States.	Member States have access to three publications that enhance awareness and knowledge of how to attract more young people and women to forestry work, how to navigate occupational hazards and how to ensure education for new skill requirements in the twenty-first century.

### **Impact of COVID-19 on subprogramme delivery**

17.188 Owing to the impact of COVID-19 during 2020, the subprogramme had to adjust the dates of several Team of Specialists meetings and delivered those meetings in a virtual format. The seventy-eighth session of the ECE Committee on Forests and the Forest Industry was held in a virtual hybrid format with sessions (each a half-day) reduced from three to two hours. In addition, the forty-second session of the Joint ECE/FAO Working Party on Forest Statistics, Economics and Management was postponed to 2021. In order to continue to deliver on the agreed road map on the revision of the subprogramme's integrated programme of work, the subprogramme held virtual, informal consultations with its delegates. Lastly, the ministerial round table on forest landscape restoration and the ECCA30/Bonn Challenge in Eastern and South-East Europe also had to be postponed to the first half of 2021. With respect to the latter, the subprogramme supported relevant countries in a new, alternative format with individual virtual consultations. The latter change had an impact on the programme performance in 2020, as specified under result 2 below.

### **Planned results for 2022**

17.189 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: are we there yet? Measuring sustainable forest management under Sustainable Development Goal 15<sup>19</sup>**

#### **Programme performance in 2020**

17.190 The subprogramme has, in cooperation with FAO and other regional partners, supported countries of Europe, the Caucasus and Central Asia in concluding their work on national reporting on forest-related indicators of the Sustainable Development Goals. In the period up to 2020, the subprogramme also, jointly with FAO and Forest Europe, provided support to countries of the pan-European region in the finalization of the reporting on forests and sustainable forest management, which contributed to increased capacities within member States to report data and information required for Goal 15. Furthermore, the subprogramme has undertaken extensive work on developing online tools to store and disseminate the collected data. These tools are all available and expected to be operational for the coming years.

17.191 The above-mentioned work contributed to 50 ECE member States reporting data on targets 15.1 and 15.2 of the Sustainable Development Goals, which exceeded the planned target of 46 countries reporting data, reflected in the proposed programme budget for 2020.

#### **Proposed programme plan for 2022**

17.192 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will aim at maintaining the high number of reporting countries and continue to work with partner organizations and countries towards improving the completeness and quality of reporting data. The expected progress is presented in the performance measure below (see figure 17.XIX).

<sup>19</sup> As reflected in the proposed programme budget for 2020 ([A/74/6 \(Sect. 20\)](#)).

Figure 17.XIX

**Performance measure: total number of Economic Commission for Europe member States that report data on targets 15.1 and 15.2 of the Sustainable Development Goals (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: strengthening capacity and political commitment for ecosystem restoration in Eastern and South-Eastern Europe<sup>20</sup>**

### **Programme performance in 2020**

17.193 The subprogramme has organized two virtual meetings to brief countries on the Bonn Challenge pledging (i.e., committing to the restoration of degraded and deforested landscapes) and organizational issues, and to provide an overview of financing opportunities to support countries in the implementation of forest landscape restoration pledges. In addition, the subprogramme prepared briefings for national focal points of 14 countries of Eastern and South-East Europe, followed by individual, informal video calls with the relevant country representatives.

17.194 The above-mentioned work contributed to 3 million ha committed under the Bonn Challenge, which did not meet the target of 7 million ha, reflected in the programme budget for 2021. Countries had planned to announce their official pledges at the ministerial round table on forest landscape restoration and the ECCA30/Bonn Challenge in Eastern and South-East Europe, which was postponed to 2021 owing to travel restrictions in relation to the COVID-19 pandemic.

### **Proposed programme plan for 2022**

17.195 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will expand geographic coverage and work with additional countries in Europe, the Caucasus and Central Asia. It will also provide policy advice and capacity-building to enable further forest landscape restoration. The expected progress is presented in the performance measure below (see figure 17.XX).

<sup>20</sup> As reflected in the programme budget for 2021 ([A/75/6/Add.1](#)).

Figure 17.XX  
**Performance measure: commitments to ECCA30**

(Millions of hectares)

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: increased access to forest product information to support evidence-led policymaking for the sustainable production and consumption of forest products**

#### **Proposed programme plan for 2022**

17.196 Sustainably produced wood is a global commodity and widely used for a number of important key products. ECE member States account for some 40 per cent of global forest resources and more than 60 per cent of wood harvested globally for the manufacturing of wood products (excluding wood energy). Sustainably produced wood has the potential to substitute products manufactured from fossil and finite raw materials such as concrete, steel and petroleum-based products. The subprogramme contributes to achieving its objective by annually collecting data from member States on their production, trade and consumption of wood and wood-based products. The subprogramme further assesses the main drivers behind the market trends (e.g., impact of policies, economic drivers or biotic and abiotic disturbances of forests) and discusses possible further developments by consulting with policy, trade and industry experts and ministries in member States and by conducting desktop studies.

#### *Lessons learned and planned change*

17.197 The lesson for the subprogramme was that the current assessment of information on forest products does not include all forest products and the full life cycle of wood-based products. The subprogramme was therefore not in a position to provide member States with a full assessment of the extent to which the forest-based industries contribute to the achievement of Sustainable Development Goal 12 by member States. In applying the lesson, the subprogramme will supplement the annually collected information to also cover additional products and flows, such as post-consumer wood, paper, paperboard and wooden packaging, wood energy or engineered wood products. With this enhanced methodology, the subprogramme will be in a better position to provide ECE member States with more precise assessments of the role of the forest and forest products sector in terms of employment, volumes of wood harvested and traded, impacts on the sustainable management of the forest resources and how forest products can further improve the sector's role in contribution to achieving Goal 12.

*Expected progress towards the attainment of the objective, and performance measure*

17.198 This work is expected to contribute to the objective, as demonstrated by a steadily increased number of wood-based commodities that are assessed with regard to their production, trade and consumption (see figure 17.XXI). Progress towards the objective is exemplified by wood pellets that are produced from residues of the sawn wood production and are used for energy generation. Wood pellet production increased from 15 million tonnes in 2010 to more than 40 million tonnes in 2020. Another example is the use of cross-laminated timber, an innovative solid wood board for construction, which grew from an experimental product to a globally traded product in the past 10 years. In both cases, the assessment prepared by the subprogramme was the first to provide freely accessible and fact-based information and recommendations for member States, thereby contributing significantly to the development of these innovative products, which minimize wood waste and are substitutes for energy-intensive, finite materials.

Figure 17.XXI

**Performance measure: total number of wood-based commodities assessments available to member States with specific information regarding their production, trade and consumption (cumulative)**

**Legislative mandates**

17.199 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolutions*

62/98	Non-legally binding instrument on all types of forests	75/213	Promoting sustainable consumption and production patterns for the implementation of the 2030 Agenda for Sustainable Development, building on Agenda 21
67/200	International Day of Forests		
71/285	United Nations strategic plan for forests 2017–2030	75/219	Implementation of the Convention on Biological Diversity and its contribution to sustainable development
71/286	United Nations forest instrument		
73/284	United Nations Decade on Ecosystem Restoration (2021–2030)		

*Economic and Social Council resolutions*

2015/33	International arrangement on forests beyond 2015	2020/14	Outcome of the fifteenth session of the United Nations Forum on Forests
2017/4	United Nations strategic plan for forests 2017–2030 and quadrennial programme of work of the United Nations Forum on Forests for the period 2017–2020		

## Deliverables

17.200 Table 17.15 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 17.15

### Subprogramme 7: deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>18</b>	<b>15</b>	<b>24</b>	<b>16</b>
1. Documentation for the Committee on Forests and the Forest Industry/European Forestry Commission	12	10	18	10
2. Documentation for the Joint ECE/FAO Working Party on Forest Statistics, Economics and Management	6	5	6	6
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>26</b>	<b>20</b>	<b>32</b>	<b>22</b>
3. Meetings of the Committee on Forests and the Forest Industry/European Forestry Commission	8	6	16	6
4. Meetings of the Bureau of the Committee on Forests and the Forest Industry	4	3	2	2
5. Meetings of the Joint ECE/FAO Working Party on Forest Statistics, Economics and Management and of Teams of Specialists	14	11	14	14
<b>B. Generation and transfer of knowledge</b>				
<b>Seminars, workshops and training events</b> (number of days)	<b>10</b>	<b>18</b>	<b>15</b>	<b>15</b>
6. Capacity-building events for policymakers, experts and relevant stakeholders from countries in the ECE region on topics related to the ECE/FAO integrated programme	10	18	15	15
<b>Publications</b> (number of publications)	<b>7</b>	<b>11</b>	<b>7</b>	<b>7</b>
7. <i>Forest Products Annual Market Review</i>	1	1	1	1
8. Publication on sustainable forest management and forest products	6	10	6	6
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> forest policy dialogues at the request of countries and support for forest policy issues, for up to 3 member States.				
<b>Databases and substantive digital materials:</b> update and maintenance of ECE region databases on forest resources; forest policies and institutions; forest products; production, consumption and trade, including prices; and wood energy for global access.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> organizations of activities and events celebrating the International Day of Forests; brochures and information material on different forest-related topics; presentations at round tables and discussions at international forest-related events.				
<b>External and media relations:</b> press releases for the subprogramme; compilation and dissemination of the Forest Information Billboard newsletter providing relevant news from the forest sector in one place to approximately 4,000 subscribers.				
<b>Digital platforms and multimedia content:</b> update and maintenance of the website of the subprogramme; videos on forest-related topics.				

## **Subprogramme 8**

### **Housing, land management and population**

#### **Objective**

17.201 The objective, to which this subprogramme contributes, is to strengthen member State-owned programmes and policies promoting decent, adequate, affordable, energy-efficient and healthy housing for all, smart sustainable cities, sustainable urban development and land management, and to advance evidence-based population and social cohesion policies.

#### **Strategy**

17.202 The subprogramme comprises two components: (a) housing and land management; and (b) population.

17.203 The strategy of the subprogramme is based on the implementation of the core interlinked functions, namely, international policy dialogue, normative work and capacity-building and the sharing of best practices and lessons learned in all areas of the subprogramme's work. Through its work, the subprogramme will contribute to the four ECE nexuses, as reflected in paragraph 17.5.

17.204 To contribute to the objective, the housing and land management component of the subprogramme will continue to support member States, including national, regional and local governments and other key stakeholders, in the review of progress in achieving the Sustainable Development Goals, including the implementation of measures to accelerate the achievement of the Goals, and in exchanging experiences and best practices in these areas. The subprogramme will also support local governments in the assessment of the achievement of the Goals at the local level through the application of the ECE/International Telecommunication Union (ITU) key performance indicators on smart sustainable cities. The subprogramme will provide technical assistance and disseminate best practices on the achievement of the housing, city and land-related Goals, especially Goal 11, and, to a lesser extent, Goals 3, 5, 7, 9 and 12. This will be done through the development of country profiles on urban development, housing and land management, profiles of smart sustainable cities, pilot projects on innovative financial mechanisms for smart sustainable cities and thematic studies on affordable decent housing for all, sustainable urban development and land management, including informal settlements. Furthermore, it will support governments in the development of their national and local evidence-based urban, housing policies and land administration. It will also organize a forum of mayors to discuss the challenges that local authorities/governments face in achieving sustainable urban development. Due consideration will be given to the integration of climate change measures into urban policies, strategies and planning. Furthermore, the subprogramme will facilitate the maintenance, management and refurbishment of existing housing stock in ECE member States.

17.205 To contribute to the objective, the population component of the subprogramme will continue to facilitate cooperation between member States, regional agencies and other partners. It will support the review and follow-up activities to assess progress in implementing the ECE regional strategy for the Madrid International Plan of Action on Ageing, 2002, at the national and regional levels. The strategy was adopted by ECE member States at the ECE Ministerial Conference on Ageing held in Berlin on 11 September 2002 as a follow-up to the Second World Assembly on Ageing. In an effort to have ageing mainstreamed into all policy fields, the strategy outlines commitments in 10 priority areas. The subprogramme will provide a platform for

intergovernmental policy debate on matters related to mainstreaming ageing and will facilitate communication with a wider network of experts and NGOs. It will support evidence-based policymaking and monitoring of the implementation of the strategy by coordinating data collection on active ageing indicators and policy-oriented research on ageing and intergenerational and gender relations. The subprogramme will also support the development of national capacities for policy formulation through its policy seminars/master classes and policy briefs that focus on specific policy challenges and possible policy solutions, showcasing good practices from across the region.

17.206 The housing and land management component of the subprogramme plans to support member States on issues related to COVID-19 by strengthening capacity to design, implement and monitor urban economic resilience and recovery and rebuilding plans, including on innovative financing instruments and informal settlements to build back better and promote sustainable smart cities.

17.207 The population component of the subprogramme plans to support member States on issues related to COVID-19 by assessing lessons learned and strengthening capacity to enhance preparedness and emergency response to mitigate the risks for older persons and uphold their rights and dignity during and beyond the pandemic. A special provision included in the ECE guidelines for national reporting on the fourth review and appraisal of the Madrid International Plan of Action on Ageing will provide a basis for summarizing the lessons learned from COVID-19 and sharing successful policy responses in a 2022 synthesis report on Plan of Action/Regional Implementation Strategy implementation.

17.208 The above-mentioned work in the area of housing and land management is expected to result in:

- (a) Improved national and local policies for housing affordability and accessibility for all, energy efficiency and climate neutrality of buildings;
- (b) Increased support for local governments in the development of sustainable real estate markets and smart sustainable cities that integrate the concepts of the 2030 Agenda and the Geneva Charter on Sustainable Housing;
- (c) Improved understanding by city authorities of priorities for socioeconomic development and the development of smart sustainable cities based on the ECE/ITU key performance indicators for smart sustainable cities standard;
- (d) More efficient and resilient land administration systems.

17.209 The above-mentioned work in the thematic area of population is expected to result in:

- (a) An improvement in the design and implementation of integrated policies for active and healthy ageing;
- (b) Policy approaches that advance the rights and dignity of older persons and their contribution to a sustainable and inclusive society for all ages.

17.210 The planned support on issues related to COVID-19 is expected to result in:

- (a) More effective local urban development and housing policies and economic recovery plans that address the consequences of the COVID-19 pandemic, in particular for the most vulnerable groups of population living in informal settlements;
- (b) More prominent consideration of older persons in the mechanisms and operations of national and regional emergency responses such as COVID-19.

## Programme performance in 2020

17.211 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### First Forum of Mayors 2020: giving cities a voice at the international level

17.212 While the 2030 Agenda and its 17 Sustainable Development Goals are global in scope and ambition, implementation to achieve the targets of the Goals takes place locally. Cities and local governments are at the forefront of taking action to respond to multiple challenges at the same time such as climate change, the COVID-19 pandemic, environmental degradation, social inequality, and the lack of adequate and affordable housing. The framework for the Goals recognizes the importance of cities and local authorities by dedicating one Goal to sustainable urban development. However, successful achievement of all 17 Goals relies heavily on local action and ambition. The implementation of the 2030 Agenda will be more effective by also giving a voice to cities and including local stakeholders.

17.213 The housing and land management component acknowledged that fact and worked towards establishing a platform that gives mayors a voice at the regional level and to share their experiences, solutions and lessons learned at the international level. Following the spread of COVID-19, the overall theme of the Forum of Mayors 2020 was adapted to “City action for a resilient future: strengthening local government preparedness and response to emergencies and the impact of disasters and climate change” and the format was changed to allow for virtual participation. The event was held at the Palais des Nations in Geneva on 6 October 2020 and done virtually with interpretation. It was webcast live on United Nations Web TV. The Forum brought together virtually and in-person 40 mayors and deputy mayors from the 36 countries in the ECE region. More than 1,000 people participated in the Forum in-person and remotely from more than 65 countries. Mayors exchanged innovative ideas and efforts to address the COVID-19 emergency and, simultaneously, combat climate change and move towards achieving the Sustainable Development Goals. They highlighted the need for enhanced cooperation across all levels of government to implement the 2030 Agenda. The Forum created media interest, which included 33 media articles published to date, in 9 languages, reaching an estimated 12.5 million readers. It captured some 150 mentions on social media, reaching more than 480,000 people.

### *Progress towards the attainment of the objective, and performance measure*

17.214 The above-mentioned work contributed to the objective, as demonstrated by the adoption of a declaration at the Forum of Mayors providing a blueprint for concrete steps that local authorities would take in the coming months and years to realize their cities’ potential for greater sustainability (see table 17.16).

Table 17.16  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
The Regional Forum for Sustainable Development for the ECE Region agreed on the need for stronger engagement of cities and local authorities in achieving the Sustainable Development Goals.	World Cities Day takes place with mayors and deputy mayors on the theme of sustainable cities.	Declaration adopted at the Forum of Mayors, which provides a blueprint for concrete steps that local authorities will take in the coming months and years to realize their cities’ potential for greater sustainability.

### **Impact of COVID-19 on subprogramme delivery**

17.215 Owing to the impact of COVID-19 during 2020, for the subprogramme component on housing and land management, several in-person training sessions and side events were postponed or cancelled. As a result, there was no possibility for in-depth discussion of all the programmatic items, and some of the decisions of the intergovernmental bodies had to be postponed to 2021. Other meetings and events were modified to allow for virtual participation. However, there were challenges related to the lack of access to a reliable Internet connection by some participants and to reduced or unavailable interpretation services during the meetings. The change in meeting format to allow virtual participation also reduced the overall time for the meetings. Therefore, there was less or no time to discuss national implementation of housing policies.

17.216 At the same time, however, the subprogramme component on housing and land management identified additional and modified activities to support member States on issues related to COVID-19, within the overall scope of its objectives, namely, several additional webinars and virtual meetings, which were organized on topics of economic recovery from COVID-19 at the city level. The new and modified deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

17.217 In parallel, the subprogramme component on population identified new and modified existing activities to support member States on COVID-19 related issues, within the overall scope of its objectives, namely, the following: (a) after a virtual consultation with member States in April (33 country responses), the subprogramme component decided to dedicate the 2020 policy seminar entitled “Older persons in emergency situations: lessons learned from the COVID-19 pandemic”; and (b) in cooperation with the United Nations Population Fund and the World Health Organization, it initiated a pilot rapid assessment of the impact of COVID-19 on the long-term care of older persons in Kazakhstan.

### **Planned results for 2022**

17.218 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

#### **Result 1: regional observatory on urban-related Sustainable Development Goals<sup>21</sup>**

##### **Programme performance in 2020**

17.219 The subprogramme actively supported the exchange of experiences and building the capacities of national and local governments on the formulation and implementation of evidence-based housing and urban development policies. Following the launch of the guidelines on evidence-based policies and decision-making for sustainable housing and urban development at the eightieth session of the Committee on Urban Development, Housing and Land Management, in October 2019, implementation of the guidelines began through the organization of national capacity-building workshops. In 2020, the subprogramme prepared a smart sustainable city profile for the cities of Grodno, Belarus, Nur-Sultan, Kazakhstan, and Rana and Trondheim, Norway, to promote evidence-based housing and urban development

<sup>21</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 20)).

policies at the city level. The subprogramme has also begun preparations to conduct a second country profile on housing and land management for Albania.

17.220 The above-mentioned work contributed to 32 ECE member States applying ECE guidelines on urban development, housing and land management at the national and local levels, which met the planned target, reflected in the proposed programme budget for 2020.

### **Proposed programme plan for 2022**

17.221 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will assist governments in strengthening their capacity to develop evidence-based policies in support of the implementation of the 2030 Agenda by promoting the application of ECE guidelines on urban development, sustainable smart cities, and housing and land management through a virtual platform with e-learning materials, and regional and national capacity-building events, including training on sustainable real estate markets. The expected progress is presented in the performance measure below (see figure 17.XXII).

Figure 17.XXII

**Performance measure: total number of Economic Commission for Europe (ECE) member States that apply ECE guidelines on urban development, housing and land management at the national and local levels (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 2: countries launch new guidelines on how to mainstream ageing to achieve a society for all ages<sup>22</sup>**

#### **Programme performance in 2020**

17.222 The subprogramme has completed a stocktaking exercise on mainstreaming policies, tools and practice developed by ECE member States – 23 country notes were received – and facilitated the drafting process of the new guidelines on mainstreaming ageing under the leadership of the task force on ageing. In 2020, the subprogramme also led two-month-long consultations with the national focal points on ageing and experts in the field on the draft guidelines and supported the revision of the draft guidelines. (Constructive comments and suggestions received from 22 reviewers were taken into account to the extent possible.)

<sup>22</sup> As reflected in the programme budget for 2021 ([A/75/6/Add.1](#)).

17.223 The above-mentioned work contributed to the review and adoption of guidelines on mainstreaming ageing by the ECE Standing Working Group on Ageing in order to benefit policymakers across the region, which met the planned target, reflected in the programme budget for 2021.

#### **Proposed programme plan for 2022**

17.224 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will develop an online training programme for policymakers, technical experts and other stakeholders that would support the application of the guidelines in their local context. The expected progress is presented in the performance measure below (see table 17.17).

Table 17.17

#### **Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Member States decide to develop guidelines and to establish a task force to lead this work	The task force commences its work on developing guidelines and pilots a stocktaking exercise on mainstreaming practices in several countries	Member States reviewed and adopted guidelines on mainstreaming ageing to benefit policymakers across the region	Member States are expected to launch the implementation of guidelines and support the development of a toolkit	The guidelines-based online training programme contributes to setting up strategic frameworks for mainstreaming ageing in a number of ECE countries

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: Madrid International Plan of Action on Ageing beyond 2022: reaching a consensus on the goals and actions for healthy and active ageing in a sustainable world**

#### **Proposed programme plan for 2022**

17.225 The Madrid International Plan of Action on Ageing adopted at the Second World Assembly on Ageing, in 2002, contained a request for a systematic review of its implementation as being essential for the Plan's success in improving the quality of life of older persons. The ECE Regional Implementation Strategy for the Plan of Action, adopted at the ECE Ministerial Conference on Ageing in Berlin, in 2002, reasserted that requirement. The first three 5-year cycles of review and appraisal of the Plan of Action/Regional Implementation Strategy implementation were concluded at ECE Ministerial Conferences in 2007 (León, Spain), 2012 (Vienna) and 2017 (Lisbon) and through the adoption of the relevant ministerial declarations. They involved participatory "bottom-up" elements – engaging civil society and older persons themselves – and generated knowledge for policymakers, supported action and promoted public awareness.

17.226 The fourth 5-year review and appraisal of the Plan of Action/Regional Implementation Strategy in the region will end in 2022. Following the reviews at the national level, the subprogramme will consolidate and analyse information, including gender perspectives, in the synthesis report and coordinate consultations among ECE member States on the next five-year goals and actions for healthy and active ageing

across the region. The fourth regional review and appraisal will culminate with the ECE Ministerial Conference on Ageing in 2022 and adoption of the corresponding ministerial declaration. The subprogramme will facilitate the preparation of a consensus draft declaration, which is expected to reflect on lessons learned from the COVID-19 pandemic and align with the 2030 Agenda and United Nations Decade on Healthy Ageing (2021–2030).

*Lessons learned and planned change*

17.227 The lesson for the subprogramme was that, since spring 2020, there was a growing demand to address the increasing vulnerability of older persons in emergency situations and to link the reporting on the fourth 5-year review and appraisal of the Madrid International Plan of Action on Ageing/Regional Implementation Strategy and efforts to mitigate the COVID-19 impact on older men and women. In applying the lesson, the subprogramme will embed the principles of upholding the fundamental rights and dignity of older persons and the lessons learned from COVID-19 for preparedness, relief and recovery of emergency situations as they relate to older persons.

*Expected progress towards the attainment of the objective, and performance measure*

17.228 The above-mentioned work is expected to contribute to the objective, as demonstrated by a 2022 Ministerial Conference on Ageing adopting by acclamation its outcome document, which outlines the goals and main actions for healthy and active ageing for the period 2023–2027 (see table 17.18).

Table 17.18

**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
Member States agreed on the work programme of the ECE Working Group on Ageing for 2018–2022 and the fourth review and appraisal of the Madrid International Plan of Action on Ageing/Regional Implementation Strategy. The programme envisages the preparation of the Plan of Action/Regional Implementation Strategy +20 report	Member States decided on a tentative timeline for the fourth review and appraisal of the Plan of Action/Regional Implementation Strategy. The ECE Standing Working Group on Ageing tasks its Bureau with the development of guidelines for national reports	The Bureau issues the guidelines for national reports and launches the fourth review and appraisal exercise in the region  A concept note for the 2022 Ministerial Conference on Ageing is discussed at the annual meeting of the Working Group	Member States hold national review and appraisal exercises and submit their national reports to the ECE secretariat  The Bureau prepares the first draft of the ministerial declaration for consultation with the member States	Member States hold intergovernmental consultations on a draft ministerial declaration to be submitted at the 2022 Ministerial Conference  The 2022 Ministerial Conference to adopt by acclamation its outcome document outlining the goals and main actions for healthy and active ageing in 2023–2027 that safeguard the dignity and rights of older persons

## Legislative mandates

17.229 The list below provides all mandates entrusted to the subprogramme.

### *General Assembly resolutions*

65/234	Follow-up to the International Conference on Population and Development beyond 2014	72/144	Follow-up to the Second World Assembly on Ageing
70/107	International cooperation on humanitarian assistance in the field of natural disasters, from relief to development	72/226	Implementation of the outcome of the United Nations Conference on Human Settlements and on Housing and Sustainable Urban Development and strengthening of the United Nations Human Settlements Programme (UN-Habitat)
71/235	Implementation of the outcome of the United Nations Conference on Housing and Sustainable Urban Development (Habitat III) and strengthening of the United Nations Human Settlements Programme (UN-Habitat)	75/131	United Nations Decade of Healthy Ageing (2021–2030)
71/256	New Urban Agenda	75/152	Follow-up to the Second World Assembly on Ageing

### *Economic and Social Council resolutions*

2016/25	Future organization and methods of work of the Commission on Population and Development	2020/8	Modalities for the fourth review and appraisal of the Madrid International Plan of Action on Ageing, 2002
2018/6	Third review and appraisal of the Madrid International Plan of Action on Ageing, 2002	2020/19	Change of name and revised terms of reference of the Working Group on Ageing of the Economic Commission for Europe
2020/7	Affordable housing and social protection systems for all to address homelessness		

### *Economic and Social Council decision*

2014/239	Report of the Commission on Population and Development on its forty-seventh session and provisional agenda for its forty-eighth session (Commission on Population and Development resolution 2014/1, Assessment of the status of implementation of the Programme of Action of the International Conference on Population and Development)
----------	---

### *Economic Commission for Europe decisions*

ECE/AC.23/2002/2/Rev.6	Regional Implementation Strategy for the Madrid International Plan of Action on Ageing, 2002	B (66)	Endorsement of the Geneva Charter on Sustainable Housing
ECE/AC.30/2007/2	Report of the UNECE Ministerial Conference on Ageing: “A Society for All Ages: Challenges and Opportunities”	ECE/HBP/190	Report of the Committee on Housing and Land Management on its seventy-eighth session (Geneva Ministerial Declaration on Sustainable Housing and Urban Development)
ECE/AC.30/2012/3	2012 Vienna Ministerial declaration: “Ensuring a society for all ages: Promoting quality of life and active ageing”	ECE/AC.30/2017/2/Rev.1	Revised report of the Ministerial Conference on Ageing: “A Sustainable Society for All Ages: Realizing the Potential of Living Longer” (2017 Lisbon ministerial declaration)
ECE/HBP/173	Report of the Committee on Housing and Land Management on its seventy-fourth session, which adopted the Strategy for Sustainable Housing and Land Management in the ECE region for the period 2014–2020 (ECE/HBP/2013/3)		

## Deliverables

17.230 Table 17.19 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 17.19

### Subprogramme 8: deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>15</b>	<b>21</b>	<b>24</b>	<b>16</b>
1. Documentation for the Committee on Urban Development, Housing and Land Management	10	16	12	10
2. Documentation for the Working Party on Land Administration	–	–	7	–
3. Documentation for the Standing Working Group on Ageing	5	5	5	4
4. Documentation for the Ministerial Conference on Ageing	–	–	–	2
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>29</b>	<b>26</b>	<b>29</b>	<b>31</b>
5. Meetings of the Committee on Urban Development, Housing and Land Management and its Bureau	14	14	12	14
6. Meetings of the Working Party on Land Administration and its Bureau	8	5	10	6
7. Meetings of the Standing Working Group on Ageing	7	7	7	7
8. Ministerial Conference on Ageing	–	–	–	4
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>2</b>	<b>–</b>	<b>2</b>	<b>1</b>
7. Projects on country profiles on housing, land administration and spatial planning	2	–	1	1
8. Road map for mainstreaming ageing project for a specific country	–	–	1	–
<b>Seminars, workshops and training events</b> (number of days)	<b>5</b>	<b>8</b>	<b>6</b>	<b>5</b>
9. Workshops, seminars and training courses for policymakers and/or experts in the ECE region on housing and land administration (including real estate) and spatial planning	4	7	4	4
10. Workshops and policy seminars on population ageing issues for policymakers, experts, practitioners and other stakeholders in countries of the ECE region	1	1	2	1
<b>Publications</b> (number of publications)	<b>5</b>	<b>5</b>	<b>7</b>	<b>6</b>
11. Publications on housing and land management	2	1	3	4
12. Publications on population	3	3	4	2
13. <i>People-Smart Sustainable Cities</i> (ECE nexuses publication)	–	1	–	–
<b>Technical materials</b> (number of materials)	<b>1</b>	<b>1</b>	<b>3</b>	<b>1</b>
14. Technical guidelines on housing and land management	1	1	2	1
15. Guidelines on mainstreaming ageing	–	–	1	–

### C. Substantive deliverables

**Consultation, advice and advocacy:** generations and gender programme – support for the council of partners; country microdata submission and researchers' access agreements; advisory services for policymakers in up to 4 member States, in preparation for and follow-up to the country profiles on housing, land administration and spatial planning; advisory services for government officials and other stakeholders, to develop national capacities in designing and implementing ageing-related policies and programmes.

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<p><b>Fact-finding, monitoring and investigation missions:</b> fact-finding missions for policymakers in preparation for and follow-up to the country profiles on housing, land administration and spatial planning; fact-finding missions for government officials and other stakeholders to develop national capacities in designing and implementing ageing-related policies and programmes.</p> <p><b>Databases and substantive digital materials:</b> update and maintenance of the active ageing indicators data set for regional access.</p>				
<b>D. Communication deliverables</b>				
<p><b>Outreach programmes, special events and information materials:</b> booklet/fact sheets of the Committee on Urban Development, Housing and Land Management and the Working Party on Land Administration; booklet of the Standing Working Group on Ageing and ageing-related side events for various stakeholders.</p> <p><b>External and media relations:</b> press releases related to housing, land management and population activities for regional access.</p> <p><b>Digital platforms and multimedia content:</b> update and maintenance of the websites related to housing, land management and population activities for global and regional access; Active Ageing Index wiki.</p>				

## **Programme 18**

### **Economic and social development in Latin America and the Caribbean**

#### **Overall orientation**

##### **Mandates and background**

18.1 The Economic Commission for Latin America and the Caribbean (ECLAC) is responsible for promoting the economic, social and environmentally sustainable development of the Latin American and Caribbean countries through international cooperation and by undertaking applied research and evidence-based comparative analysis of development processes and providing normative, operational capacity development, and technical cooperation and advisory services. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, as well as Economic and Social Council resolution 106 (VI), by which the Council established the Commission for the purpose of contributing to, and coordinating action towards, the economic and social development of the region and reinforcing economic relationships among the countries of Latin America and the Caribbean, and with other regions of the world. In 1996, pursuant to its resolution 553 (XXVI), the Commission decided, *inter alia*, that it was to collaborate with member States in the comprehensive analysis of development processes geared towards the design, monitoring and evaluation of public policies and the resulting provision of operational services in the fields of specialized information, advisory services, training and support for regional and international cooperation and coordination. Commission support aimed at developing the capacity of Governments to formulate and implement policies for sustainable development is also provided through the implementation of the regular programme for technical cooperation and Development Account projects.

##### **Strategy and external factors for 2022**

18.2 Latin America and the Caribbean is the developing region that has been hit the hardest by the coronavirus disease (COVID-19) pandemic against a particularly complex backdrop. In 2020, after six years of low average growth rates, albeit with uneven performances among countries, the region's per capita the gross domestic product (GDP) contracted by 7.1 per cent, as poverty and unemployment rates increased significantly as a result of the pandemic. This crisis has exposed the structural problems of the prevailing economic model and the failings of weak and fragmented social protection systems and welfare schemes. Hence, a "new normal" is not the way forward. The development model must be rethought and the economic, social and environmental dimensions of sustainable development must be consolidated so as to leave no one behind.

18.3 In that context, ECLAC proposes an innovative framework, a big push for sustainability aimed at inducing profound and transformative changes in production and consumption patterns. The basis for those changes are investments conducive to a green economy in a context of sustainable development and business opportunities that are economically, socially, and environmentally sustainable. Special emphasis will be placed on issues related to inclusiveness, sustainability and smart cities with a view to fully harnessing the benefits of the fourth industrial revolution and building forward better with more resilient cities, communities and societies. That approach, while giving due consideration to the interconnection with the rural dimension, has

very special significance in a region with an urbanization index of over 80 per cent of the population.

18.4 For 2022, the Commission's planned deliverables and activities reflect known and anticipated challenges related to the COVID-19 pandemic that are being faced by member States. Such planned deliverables and activities include convening high-level meetings, taking advocacy actions, undertaking research, analysis, training and capacity-building activities, convening seminars and workshops, and providing technical assistance and advisory services. The support provided to member States on issues related to COVID-19 is expected to contribute to planned results for 2022, as described under subprogrammes 1, 3, 4, 6, 9, 10 and 12.

18.5 The systematic work done by ECLAC during the past decade on equality issues in the Latin American and Caribbean development context enabled the Commission, very early on, to align its programme of work with the new and emerging needs and demands of member States in relation to the 2030 Agenda and the Sustainable Development Goals. Adaptation of the Commission's programme of work to that new reality has become a permanent feature of the Commission's engagement with its constituency. With regard to cooperation with other entities at the global, regional and national levels, the Commission will work closely with the Governments of the region and other stakeholders (such as the business community, academics and universities, and civil society) to reinforce linkages between national experiences and regional perspectives, foster data comparability and exchange of good practices, and provide effective technical cooperation services for transboundary issues within its purview. It will emphasize analytical, normative, advocacy and capacity-building work to strengthen the design of sustainable development strategies and public policies and to facilitate the continuous follow-up and review of progress towards the Sustainable Development Goals and the implementation of the 2030 Agenda. Operational services in the areas of specialized information, technical cooperation and training will strengthen cooperation, networking and sharing of good practices at the subregional, regional and interregional levels, including South-South cooperation.

18.6 The Regional Agreement on Access to Information, Public Participation and Justice in Environmental Matters in Latin America and the Caribbean, known as the Escazú Agreement, was the first environmental treaty in the region. It was adopted at Escazú, Costa Rica, on 4 March 2018, after two years of preparatory meetings (2012–2014) and nine meetings of the negotiating committee, which had been established in 2014 with significant participation by the public. Throughout this process, ECLAC led and facilitated the organization of meetings, undertook and published extensive applied research that served as a baseline for the regional negotiations, conducted studies to assess the situation of the Caribbean small island developing States, and engaged in technical cooperation with and developed national capacity for Governments, civil society and other stakeholders on issues related to environmental governance and the application of Principle 10 of the Rio Declaration on Environment and Development at the national, subregional and regional levels.

18.7 The Escazú Agreement was opened for signing by the countries of the region in New York in September 2018. By February 2021, instruments of ratification had already been deposited by 12 countries and the Agreement was set to enter into force on 22 April 2021. The Commission, as the technical secretariat of the Agreement, is required to convene the first conference of the parties in 2022 and to provide support to the Committee to Support Implementation and Compliance, as well as to carry out tasks directly related to its role as technical secretariat.

18.8 With regard to inter-agency coordination and liaison, ECLAC will continue to offer its value proposition to member States by combining its three main functions: the think tank and thought leadership role in performing analytical, normative and

knowledge management work; the convening power through its intergovernmental platforms and subsidiary bodies; and the operational role by providing technical cooperation, advisory and capacity development services and peer learning, anchored in data and rigorous evidence-based analysis and understanding of the realities of the region. The Commission will continue to foster a multisectoral and integrated approach to development, and give a voice to countries in special situations, including the single least developed country in the region, the landlocked developing countries, the small island developing States of the Caribbean and the middle-income countries, which make up the majority of the region. The Commission will continue to give integrated and comprehensive follow-up to global summits from a regional perspective, coordinating the region's approach to the implementation of the 2030 Agenda. In that regard, the Commission will convene, in 2022, the fifth meeting of the Forum of the Countries of Latin America and the Caribbean on Sustainable Development, which will report directly to the high-level political forum on sustainable development convened under the auspices of the Economic and Social Council.

18.9 With regard to cooperation with other entities at the global, regional, national and local levels, ECLAC will continue to collaborate with the Bretton Woods institutions, in particular the International Monetary Fund and the World Bank, and with other inter-American and Ibero-American organizations, such as the Organization of American States, the Inter-American Development Bank, the Ibero-American Secretariat and the Development Bank of Latin America. Furthermore, ECLAC will reinforce its close cooperation with all regional mechanisms, including the Community of Latin American and Caribbean States, the Caribbean Community, the Latin American Integration Association, the Southern Common Market, the Central American Integration System, the Pacific Alliance and the Bolivarian Alliance for the Peoples of Our America. In addition, ECLAC will strengthen its collaboration with private sector associations, non-governmental and civil society organizations, think tanks and the academic sector to promote policy dialogue and to engage them in the implementation of the 2030 Agenda, which is ultimately driven by member States. The Commission will continue its active participation to foster substantive coordination among all participating entities in the Executive Committee on Economic and Social Affairs.

18.10 With regard to the external factors, the overall plan for 2022 is based on the following planning assumptions:

(a) The international community continues to be committed to implementing the 2030 Agenda and achieving the Sustainable Development Goals, and to sustain coordinated multilateral actions to overcome the health-related and socioeconomic impact of the COVID-19 pandemic;

(b) The countries of Latin America and the Caribbean continue to support and attach high priority to multilateralism, regional and subregional cooperation, integration and the gradual convergence of integration schemes with a view to broadening the opportunities for achieving economic, social and environmentally sustainable development;

(c) The regional and international communities support the States members of ECLAC and respond to their specific needs and concerns in relation to: (i) international trade, integration and the provision of logistics infrastructure and trade facilitation; (ii) their productive development, innovation, digital policies and macroeconomic policies; (iii) social development, social protection and equality with full respect for human rights, including the implementation of the Regional Agenda to promote inclusive social development; (iv) giving priority to gender mainstreaming in public policies, taking into consideration the Montevideo Strategy for

Implementation of the Regional Gender Agenda within the Sustainable Development Framework by 2030 and the Santiago Commitment adopted by the States members of ECLAC at the fourteenth session of the Regional Conference on Women in Latin America and the Caribbean; (v) the implementation of the recommendations of the Framework of Action for the follow-up to the Programme of Action of the International Conference on Population and Development beyond 2014, the Montevideo Consensus on Population and Development and the Regional Strategy for the Implementation in Latin America and the Caribbean of the Madrid International Plan of Action on Ageing; (vi) good governance, sustainable exploitation of natural resources, food safety and the promotion of the bioeconomy and the circular economy; (vii) incorporating environmental and urban concerns into public policies; (viii) affording priority to development planning and public management at both the national and the subnational levels; and (ix) the work of the Statistical Conference of the Americas and the priorities it sets for statistical development in the region.

18.11 With regard to the COVID-19 pandemic, the proposed programme plan is based on the assumption that the proposed deliverables and activities for 2022 will be feasible to implement. However, if the pandemic were to continue to have an impact on the planned deliverables and activities, they would be adjusted during 2022 as appropriate within the scope of the overall objectives, strategies and mandates of the Commission. Any such adjustments would be reported as part of the programme performance information.

18.12 The overall strategy of the Commission for achieving the objectives of the programme is structured around 13 interdependent and complementary subprogrammes, implemented through an integrated and multidisciplinary approach. Special efforts have been made to ensure that the gender mainstreaming strategy of the Commission is reflected throughout the present document.

18.13 The Commission integrates a gender perspective into its operational activities, deliverables and results, as appropriate. For example, gender focal points are consulted in programme formulation; gender analysis is integrated into all areas under the Commission's mandate. In the light of the enhanced focus on gender-related issues, the integration of gender aspects has been strengthened in several areas under the Commission's mandate. For instance, under subprogramme 5, Mainstreaming the gender perspective in regional development, the planned result for 2022 reflects the increased demand among countries of the region for technical assistance and capacity-building activities aimed at formulating and developing gender equality policies on the basis of international norms and the Montevideo Strategy for the implementation of the Regional Gender Agenda within the Sustainable development Framework by 2030.

18.14 With regard to disability inclusion, in line with the United Nations Disability Inclusion Strategy, ECLAC is implementing inclusive and comprehensive measures regarding the accessibility of facilities, regarding security and improvements in audiovisual technology in conference rooms, and regarding the adaptation of office spaces and furniture to facilitate the full participation and inclusion of persons with disabilities in the daily work of the Commission. Moreover, the Commission is in the process of developing its own strategy for disability inclusion with a view to further advancing the inclusion of persons with disabilities and ensuring the full realization of their rights.

## Programme performance in 2020

### Impact of COVID-19 on programme delivery

18.15 During 2020, the COVID-19 pandemic had an impact on the planned deliverables and activities of the Commission. Early in the year, in view of the impact of the pandemic on the countries of the region, travel restrictions and the change in immediate national priorities, ECLAC prompted a revision of its programme of work to adapt it to the new needs and demands of its constituency. The Commission rapidly moved its planned face-to-face activities to virtual settings. In some cases, this made it possible to increase the number of beneficiaries attending seminars, workshops and meetings. However, the change also presented challenges, given the unequal access to Internet services within and among Member States in the region, which highlighted all the more the relevance of providing support through in-person capacity-building activities and technical assistance, for which virtual alternatives fail to ensure adequate coverage and outreach. Tailor-made technical assistance and policy advice to senior national and sectoral authorities was also affected in some cases, as it was not possible to hold face-to-face meetings and exchanges. In addition to the shift from in-person to virtual meetings, the impact of the pandemic in the Commission's activities included the postponement to 2021 of the fourth meeting of the Regional Conference on Population and Development in Latin America and the Caribbean, the ECLAC Summer School on Latin American Economies 2020, the meeting of the Presiding Officers of the Regional Conference on Social Development in Latin America and the Caribbean and the Forum of the Countries of Latin America and the Caribbean on Sustainable Development, which directly reports to the high-level political forum. Specific examples of the impact are provided under subprogrammes 2, 4 and 6. The change in approach to the implementation of planned deliverables and activities also had an impact on the expected results for 2020, as described in the programme performance under subprogrammes 2, 7 and 13.

18.16 At the same time, however, some additional deliverables and activities were carried out during 2020, within the overall scope of the objectives of the subprogrammes, in order to support member States on issues related to the COVID-19 pandemic. In response to a request from the pro tempore presidency of the Community of Latin American and Caribbean States, the Commission very quickly developed a web tool known as the COVID-19 Observatory in Latin America and the Caribbean to track and analyse the national responses and public policies that the 33 countries of the region implemented to address the pandemic. The tool includes a geoportal that displays the information at the country level. Moreover, ECLAC continues to work closely with the resident coordinators throughout the Latin American and Caribbean region and with the regional desk of the Development Coordination Office to ensure the continuous updating of that information, which is publicly available on the Commission's website. Furthermore, ECLAC published eight special reports on COVID-19 that are focused on the socioeconomic impact of the pandemic on the Latin American and Caribbean region, in particular on economic growth and perspectives, on poverty and inequality, on post-pandemic economic reactivation, on trade and logistics, on digital technologies, and on social and political covenants for equality and sustainable development in the post-pandemic recovery. In addition, ECLAC convened virtual intergovernmental meetings and policy dialogues with ministers of finance, ministers of social development, ministers of science and technology, ministers and authorities belonging to the machineries for the advancement of women in Latin America and the Caribbean, and heads of national statistical offices in the context of the Statistical Conference of the Americas, to mitigate the effects of the pandemic on those most vulnerable. At all those meetings, the active engagement of resident coordinators and United Nations agencies, funds and programmes was promoted. In addition, ECLAC published several inter-agency reports related to the impact of COVID-19, including on food security (Food and Agriculture Organization of the United Nations), health and the economy

(Pan American Health Organization), education (United Nations Educational, Scientific and Cultural Organization), employment (International Labour Organization), child protection (United Nations Children's Fund), the care economy (United Nations Entity for Gender Equality and the Empowerment of Women), and digital inclusion (Organisation for Economic Co-operation and Development). At its thirty-eighth session, the Commission presented the document *Building a New Future: Transformative Recovery with Equality and Sustainability*, which contains concrete proposals focused on renewable energy, sustainable mobility, the digital revolution, the health-care manufacturing industry, the bioeconomy, sustainable tourism and the circular economy in the context of sustainable consumption and production. Specific examples of new activities are provided under subprogramme 10.

18.17 Reflecting the importance of continuous improvement and responding to the evolving needs of member States, the Commission will mainstream lessons learned and best practices related to the adjustments to and adaptation of its programme owing to the COVID-19 pandemic. Specific examples of lessons learned include the need to address the subregional, national and territorial specificities within the Latin American and Caribbean region by levelling the playing field to facilitate equal access to digital technologies, and the relevance of closing the digital inclusion gap. In the planning of future activities, the Commission will therefore attempt to take advantage of the opportunities that digital technologies offer to facilitate greater participation by beneficiaries in its capacity-building activities by combining online and in-person activities.

## Legislative mandates

18.18 The list below provides all mandates entrusted to the programme.

### *General Assembly resolutions*

55/2	United Nations Millennium Declaration	66/125	Implementation of the outcome of the World Summit for Social Development and of the twenty-fourth special session of the General Assembly
58/269	Strengthening of the United Nations: an agenda for further change		
59/57	A Fair Globalization: Creating Opportunities for All – report of the World Commission on the Social Dimension of Globalization	66/157	Strengthening United Nations action in the field of human rights through the promotion of international cooperation and the importance of non-selectivity, impartiality and objectivity
60/1	2005 World Summit Outcome		
63/260	Development-related activities	66/161	Globalization and its impact on the full enjoyment of all human rights
64/172; 66/155; 68/158; 71/192	The right to development	66/210; 70/211	Role of the United Nations in promoting development in the context of globalization and interdependence
64/222	Nairobi outcome document of the High-level United Nations Conference on South-South Cooperation	66/213	Fourth United Nations Conference on the Least Developed Countries
64/289	System-wide coherence		
65/1	Keeping the promise: united to achieve the Millennium Development Goals	66/216; 70/219	Women in development
66/71	International cooperation in the peaceful uses of outer space	66/288	The future we want
66/84	Implementation of the Declaration on the Granting of Independence to Colonial Countries and Peoples by the specialized agencies and the international institutions associated with the United Nations	67/140	Realizing the Millennium Development Goals and other internationally agreed development goals for persons with disabilities towards 2015 and beyond
		67/164	Human rights and extreme poverty
		67/217	Towards a New International Economic Order
		67/226; 71/243; 75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system

67/230	The role of the United Nations in promoting a new global human order	68/234; 73/254	Towards global partnerships: a principle-based approach to enhanced cooperation between the United Nations and all relevant partners
68/1	Review of the implementation of General Assembly resolution 61/16 on the strengthening of the Economic and Social Council	69/313	Addis Ababa Action Agenda of the Third International Conference on Finance for Development (Addis Ababa Action Agenda)
68/4	Declaration of the High-level Dialogue on International Migration and Development	70/1	Transforming our world: the 2030 Agenda for Sustainable Development
68/6	Outcome document of the special event to follow up efforts made towards achieving the Millennium Development Goals	70/299	Follow-up and review of the 2030 Agenda for Sustainable Development at the global level
68/198	Information and communications technologies for development	72/172	Promotion of a democratic and equitable international order
68/201	International financial system and development	72/232	Follow-up to the second United Nations Conference on Landlocked Developing Countries
68/202	External debt sustainability and development		
68/204; 72/204	Follow-up to the International Conference on Financing for Development	72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system
68/210; 74/216	Implementation of Agenda 21, the Programme for the Further Implementation of Agenda 21 and the outcomes of the World Summit on Sustainable Development and of the United Nations Conference on Sustainable Development	73/291	Buenos Aires outcome document of the second High-level United Nations Conference on South-South Cooperation
68/220	Science, technology and innovation for development	75/14	Cooperation between the United Nations and the Latin American and Caribbean Economic System
68/222; 70/215	Development cooperation with middle-income countries		
68/230; 71/244	South-South cooperation		

#### *Economic and Social Council resolutions and decisions*

Decision 2004/310	Implementation of and follow-up to major United Nations conferences and summits	2013/5	Progress in the implementation of General Assembly resolution 67/226 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system
2012/2	The role of the United Nations system in implementing the internationally agreed goals and commitments in regard to education		
2012/9	Poverty eradication	2013/16; 2016/2; 2018/7; 2020/9	Mainstreaming a gender perspective into all policies and programmes in the United Nations system
2012/30	Role of the Economic and Social Council in the integrated and coordinated implementation of and follow-up to the outcomes of the major United Nations conferences and summits, in the light of relevant General Assembly resolutions, including resolution 61/16	2013/44	Follow-up to the International Conference on Financing for Development
		2016/8	Rethinking and strengthening social development in the contemporary world
		2016/12	Establishment of the Forum of the Countries of Latin America and the Caribbean on Sustainable Development

#### *Economic Commission for Latin America and the Caribbean resolutions*

650 (XXXIII)	Brasilia resolution	728 (XXXVII)	Programme of work and priorities of the Economic Commission for Latin America and the Caribbean for 2020
666 (XXXIV)	San Salvador resolution		
690 (XXXV)	Lima resolution	736 (PLEN.34)	Programme of work and priorities of the Economic Commission for Latin America and the Caribbean for 2021
697 (XXXVI)	Horizons 2030 resolution		
700 (XXXVI)	Mexico resolution on the establishment of the Forum of the Countries of Latin America and the Caribbean on Sustainable Development	737 (XXXVIII)	San José resolution
717 (XXXVII)	Havana resolution	748 (XXXVIII)	Programme of work and priorities of the Economic Commission for Latin America and the Caribbean for 2022

## Deliverables

18.19 Table 18.1 lists all cross-cutting deliverables, by category and subcategory, for the period 2020–2022.

Table 18.1

### Cross-cutting deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>5</b>	<b>4</b>	<b>3</b>	<b>5</b>
1. Draft of the programme of work of the ECLAC system	1	1	1	1
2. Report on the activities of the Commission	1	1	1	1
3. Report on the session of the Commission	1	1	–	1
4. Report on the Forum of the Countries of Latin America and the Caribbean on Sustainable Development	1	–	1	1
5. Main substantive document to be discussed at the session of the Commission	1	1	–	1
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>30</b>	<b>20</b>	<b>15</b>	<b>30</b>
6. Meetings of the session of the Commission	15	15	–	15
7. Meetings of the Forum of the Countries of Latin America and the Caribbean on Sustainable Development	10	–	10	10
8. Meetings of the regional collaborative platform	2	2	2	2
9. Meetings of the Committee for Programme and Coordination	1	1	1	1
10. Meetings of the Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
11. Meetings of the Fifth Committee	1	1	1	1
<b>B. Generation and transfer of knowledge</b>				
<b>Publications</b> (number of publications)	<b>4</b>	<b>5</b>	<b>5</b>	<b>5</b>
12. <i>CEPAL Review</i>	3	3	3	3
13. Progress report on the implementation of the 2030 Agenda for Sustainable Development and the Sustainable Development Goals in Latin America and the Caribbean	1	1	1	1
14. Annual regional report on the joint activities with agencies, funds and programmes with a presence in the region	–	1	1	1
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> booklets, fact sheets, wall charts and information kits; the <i>ECLAC Notes</i> electronic newsletter; and public information activities related to the United Nations, ECLAC events and special observances.				
<b>External and media relations:</b> social media campaigns; guided tours of ECLAC premises in Santiago; photographic coverage of ECLAC meetings and activities and audiovisual products on the work of ECLAC; press conferences and media stakes related to the launch of flagship publications and other relevant documents of ECLAC and of the United Nations; press releases in Spanish and English related to the work of ECLAC and of the United Nations; and liaison activities with national and international news media to coordinate interviews with United Nations/ECLAC spokespersons.				
<b>Digital platforms and multimedia content:</b> the regional inter-agency knowledge and data platform on the implementation of the Sustainable Development Goals; ECLAC digital repository.				

## Evaluation activities

18.20 The following evaluations and self-evaluations completed in 2020 have guided the proposed programme plan for 2022:

- (a) Review by the Joint Inspection Unit of ECLAC management and administration;

(b) Self-evaluation on the implementation of the ECLAC gender mainstreaming strategy;

(c) Self-evaluation related to the demographic transition: opportunities and challenges in achieving the Sustainable Development Goals in Latin America and the Caribbean (subprogramme 6);

(d) Self-evaluation on the use of input-output tables for industrial and trade policy in Central and South America (subprogrammes 1 and 11).

18.21 The findings of the evaluations and self-evaluations referenced above have been taken into account for the proposed programme plan for 2022. For example, the evaluation of the gender mainstreaming strategy will be incorporated into the new ECLAC gender mainstreaming strategy, which will shape and inform gender perspectives under all subprogrammes.

18.22 The following evaluations and self-evaluations are planned for 2022:

(a) Self-evaluation on the role of ECLAC in the Caribbean, subject to the availability of extrabudgetary resources;

(b) Self-evaluation on the socioeconomic support provided by ECLAC to countries of the region in response to the COVID-19 crisis, subject to the availability of extrabudgetary resources.

## **Programme of work**

### **Subprogramme 1**

#### **International trade, integration and infrastructure**

##### **Objective**

18.23 The objective, to which this subprogramme contributes, is to advance sustainable development and strengthen the role of Latin America and the Caribbean in international trade and the global economy by deepening regional integration and enhancing logistics and infrastructure.

##### **Strategy**

18.24 To contribute to the objective, the subprogramme will continue to support member States' capacities to cooperate and participate more effectively in global and regional trade, reduce their dependency on the export of primary products and strengthen regional supply chains, thus contributing to the attainment of Sustainable Development Goals 12 (Ensure sustainable consumption and production patterns) and 8 (Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all). The subprogramme will carry out, upon request, technical assistance activities and studies. In addition, the activities under the subprogramme are oriented towards enhancing countries' capacities to face new challenges, such as digital trade and services, participation in global and regional value chains, internationalization of small and medium-sized enterprises, trade facilitation, new public and private standards, environmental sustainability and links with emerging issues in the area of trade infrastructure by conducting analyses at the country and regional levels, thus contributing to the attainment of Goal 10 (Reduce inequality within and among countries).

18.25 To contribute further to the objective, the subprogramme will assist member States in the elaboration and review of logistics policies at the national and subregional levels. It will provide policy recommendations and technical assistance for monitoring the economic infrastructure gap and investment in the region, disseminating new policy options and promoting the exchange of good practices in logistics and transport infrastructure operation (with an emphasis on ports and main trade corridors). Furthermore, it will analyse logistics, trade facilitation and infrastructure development at the national and transboundary levels, in particular in landlocked developing countries and other member States with special needs, contributing to the improvement of connectivity among countries and the enhancement of their participation in regional and global trade flows, thus contributing to the attainment of target 17.11 (Significantly increase the exports of developing countries, in particular with a view to doubling the least developed countries' share of global exports by 2020). In addition, the subprogramme will promote the coordination of logistics and mobility policies with regional integration initiatives in Latin America and the Caribbean through technical cooperation and research activities aimed at facilitating political dialogue and policy convergence among countries in the Latin American and Caribbean region. Finally, it will seek to mainstream the balance between efficiency, resilience and sustainability as a pillar for logistics infrastructure policies and to support the implementation of policies that increase the share of industrialized goods in Latin American and Caribbean countries' exports, thus contributing to the attainment of Goal 9 (Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation).

18.26 The subprogramme plans to support member States on issues related to COVID-19 by examining the impact of the pandemic in all its publications, capacity-building activities and technical assistance services, as relevant.

18.27 The above-mentioned work is expected to result in:

- (a) National policies that promote more sustained, inclusive and sustainable economic growth through sustainable consumption and production patterns;
- (b) The strengthened capacity of countries to formulate trade policies and to negotiate, implement and administer trade agreements at the bilateral, regional, plurilateral and multilateral levels while ensuring special and differentiated treatment for developing countries;
- (c) The enhanced capacity of countries of the region to participate more effectively in global and regional value chains, reduce the logistics overcost that affects the competitiveness and productivity of economies and foster more sustainable trade.

18.28 The planned support on issues related to COVID-19 is expected to result in policies for a more sustainable and resilient recovery.

## **Programme performance in 2020**

18.29 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Incorporation of a gender perspective and the empowerment of women into trade, logistics and regional integration**

18.30 The incorporation of a gender perspective into trade, logistics and regional integration is crucial not only as a way to recognize and encourage the participation of women, but also to incorporate concrete actions aimed at progressing towards gender equality in public policies and sectoral strategies. The subprogramme, in line with the ECLAC strategy for gender mainstreaming, seeks to encourage the participation of women in its capacity-building activities and promote actions to progressively incorporate a gender perspective into sectoral public policies in order to recognize the contribution of women to the economy and to make visible the obstacles that they face as employees or entrepreneurs in trade, logistics and regional integration.

18.31 During 2020, the subprogramme held several technical capacity-building activities and other events specifically tailored to the empowerment of women in trade, logistics and regional integration. Activities were carried out in close coordination with the ECLAC Division for Gender Affairs, the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women), Latin American and Caribbean women's associations active in trade, shipment and logistics, and other civil society actors. Two high-level webinars were organized to analyse what impact COVID-19 is having on women workers and how new opportunities that emerge from the digitalization of trade and logistics are changing the industry and offering opportunities to support gender equality.

#### *Progress towards the attainment of the objective, and performance measure*

18.32 The above-mentioned work contributed to the objective of increasing the participation of women in training and capacity-building activities implemented by the subprogramme related to trade, logistics and regional integration, as demonstrated by the increasing number of women participants and the increasing share of women among participants overall. This result illustrates the efforts made by the subprogramme to organize events in partnership with women associations, thereby fostering the participation of women in subprogramme activities (see figure 18.I).

Figure 18.I

#### **Performance measure: participation of women in training activities related to trade, logistics and regional integration**

#### **Impact of COVID-19 on subprogramme delivery**

18.33 In response to the pandemic, the subprogramme identified new activities to support member States on issues related to the COVID-19 pandemic, within the overall scope of its objectives, namely the publication of a policy brief on the impact

of COVID-19 on international trade and infrastructure, the organization of seminars and workshops to analyse how COVID-19 was affecting countries of the region, and the provision of technical assistance, upon request, regarding matters related to the impact of the pandemic. The new deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

## **Planned results for 2022**

18.34 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: understanding biregional value chains with the Asia-Pacific region<sup>1</sup>**

#### **Programme performance in 2020**

18.35 The subprogramme continued its technical support to the countries of the region in finalizing national input-output tables and harmonizing country data in order to include more national tables in regional and biregional tables. The subprogramme conducted studies simulating the effects of possible biregional agreements between East Asia and Latin America.

18.36 The above-mentioned work contributed to building the capacity of technical government officials in 17 countries in the use of regional input-output tables, which exceeded the planned target of 16 Latin American and Caribbean countries certified in the use of subregional, regional and/or biregional input-output tables reflected in the proposed programme budget for 2020.

#### **Proposed programme plan for 2022**

18.37 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to expand its support to include additional countries in the region, enhancing their capacity to draw up input-output tables, thereby enabling an increase to 19 in the number of Latin American and Caribbean countries included in the biregional input-output tables. The expected progress is presented in the performance measure below (see figure 18.II).

<sup>1</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 21)).

Figure 18.II

**Performance measure: total number of Latin American and Caribbean countries trained in the use of subregional, regional and/or biregional input-output tables (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: fostering logistics competitiveness through the coordination of regional policies on trade facilitation and infrastructure<sup>2</sup>**

### **Programme performance in 2020**

18.38 The subprogramme has, during this period marked by COVID-19, given priority to providing updated information on transport and trade connectivity and to the economic and social impact of the pandemic in trade facilitation and infrastructure by proposing new policy options for the post-pandemic recovery and sharing good practices and lessons learned. The pandemic highlighted the importance of logistics and trade facilitation in reducing the costs and time involved in international trade. To achieve that goal, the subprogramme deepened its collaboration with United Nations specialized agencies, funds and programmes, with other organizations concerned with infrastructure and trade, and with regional integration schemes.

18.39 The above-mentioned work contributed to 15 references being made in presidential or ministerial resolutions related to transport, logistics and trade facilitation, which exceeded the planned target of 7 reflected in the programme budget for 2021.

### **Proposed programme plan for 2022**

18.40 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will encourage policymakers to include infrastructure, logistics and trade facilitation in economic recovery packages after the pandemic. Furthermore, in 2022, the subprogramme will encourage countries in the region to act to reduce their internal logistics costs, create value-added services to maintain their competitiveness and advance the coordination of actions in the field of logistics to reactivate intraregional trade. The expected progress is presented in the performance measure below (see figure 18.III).

<sup>2</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

Figure 18.III

**Performance measure: number of references in presidential or ministerial resolutions related to transport, logistics or trade facilitation in Latin American and Caribbean countries (annual)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: improved coordination of policies on trade, logistics infrastructure and regional integration**

#### **Proposed programme plan for 2022**

18.41 Trade, logistics and regional integration must play a key role in the crisis recovery strategies in Latin America and Caribbean countries. They must improve coordination among each other and within their borders to promote a sustainable economic, social and environmental recovery. The subprogramme will advocate for an interrelated approach to analysing policies in the areas of production, trade, logistics infrastructure and digital innovations with the aim of reducing internal logistics costs, creating regional services with added value to make a better recovery from COVID-19.

#### *Lessons learned and planned change*

18.42 The lesson for the subprogramme was that an increased demand existed for the development of integrated frameworks with multisectoral recommendations to arrive at a more comprehensive assessment, propose more concrete technical solutions and enable the creation of multisectoral expert networks to develop more sustainable and affordable solutions. In applying the lesson, the subprogramme will support the integration of trade facilitation, logistics innovation and digital infrastructure investment at the national and regional levels to take advantage of regulatory convergence, the promotion of smooth supply chains and the benefits of a regional integrated market.

#### *Expected progress towards the attainment of the objective, and performance measure*

18.43 This work is expected to contribute to the objective, as demonstrated by an increase in the number of national institutions requesting support for the development of strategies to advance in trade facilitation, cross-border processes and innovative logistics services within a regional or subregional perspective while aiming for greater coordination or harmonization of norms and standards (see figure 18.IV).

Figure 18.IV

**Performance measure: total number of Latin American and Caribbean country institutions requesting technical support in implementing more coordinated trade and logistics strategies within a regional perspective (cumulative)**

## Legislative mandates

18.44 The list below provides all mandates entrusted to the subprogramme.

### *General Assembly resolutions*

63/199	International Labour Organization Declaration on Social Justice for a Fair Globalization	73/219; 74/201 73/240	International trade and development Towards a New International Economic Order
64/255; 66/260	Improving global road safety	74/15	Political Declaration of the High-level Midterm Review on the Implementation of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024
66/210	Role of the United Nations in promoting development in the context of globalization and interdependence		
69/137	Programme of Action for Landlocked Developing Countries for the Decade 2014–2024	74/299 75/17	Improving global road safety International cooperation to address challenges faced by seafarers as a result of the COVID-19 pandemic to support global supply chains
70/217	Follow-up to the second United Nations Conference on Landlocked Developing Countries		

### *Economic Commission for Latin America and the Caribbean resolutions*

552 (XXVI)	Strengthening sustainable development in Latin America and the Caribbean	732 (XXXVII)	Review of the implementation of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024
608 (XXX)	Promotion of coordination in studies and activities concerning South America		
711 (XXXVI)	Implementation of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024	745 (XXXVIII)	Review of the implementation of the Vienna Programme of Action for Landlocked Developing Countries for the Decade 2014–2024

## Deliverables

18.45 Table 18.2 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 18.2

**Subprogramme 1: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>2</b>	<b>2</b>	<b>1</b>	<b>1</b>
1. Project on the provision of infrastructure and logistics services that promote economic efficiency, social equality and environmental sustainability, and increasing the integration of physical infrastructure in the region	1	1	1	1
2. Project on trade policies and strategies, adaptation to climate change, migration, equitable trade and value chains	1	1	–	–
<b>Seminars, workshops and training events</b> (number of days)	<b>11</b>	<b>11</b>	<b>8</b>	<b>8</b>
3. Workshops and seminars on the relation between regional trade policy and the attainment of the Sustainable Development Goals; comparative strategies for deepening regional value chains; new challenges in the region related to resilient and sustainable logistics, mobility and infrastructure policies; links between trade and other public policies in the light of development in global economy and international trade; cooperation and trade facilitation initiatives in the region	6	6	8	8
4. Training on the provision and management of infrastructure services	3	3	–	–
5. Training on harnessing the region's participation in the global supply chain	2	2	–	–
<b>Publications</b> (number of publications)	<b>24</b>	<b>24</b>	<b>22</b>	<b>22</b>
6. <i>International Trade Outlook for Latin America and the Caribbean</i>	1	1	1	1
7. Publications on economic relations with the United States of America and on capital flows to the region; emerging trade and financial issues in the global economy and the implementation of the Sustainable Development Goals in Latin America and the Caribbean	8	8	8	9
8. Publications on trade and development; maritime transport, sustainable logistics, mobility and infrastructure policies and regional integration; value chains, modern services and e-commerce in the region	15	15	13	12
<b>Technical materials</b> (number of materials)	<b>13</b>	<b>13</b>	<b>10</b>	<b>10</b>
9. <i>Bulletin on the Facilitation of Transport and Trade in Latin America and the Caribbean</i>	8	8	6	6
10. Statistical bulletin on international trade in goods in Latin America and the Caribbean	4	4	4	4
11. Technical report on trends and dispute settlement activity in the World Trade Organization and in regional integration schemes	1	1	–	–
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> advice to member States, upon request, on trade policy, integration, sustainable logistics, mobility and infrastructure policies, and social and sustainability issues.				
<b>Databases and substantive digital materials:</b> databases on trade data and disputes, bond issuance, spreads and credit ratings, sustainable logistics, the Maritime and Logistics Profile of Latin America and the Caribbean data tool, and other data on infrastructure services.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> <i>CEPAL News</i> newsletter.				

## **Subprogramme 2**

### **Production and innovation**

#### **Objective**

18.46 The objective, to which this subprogramme contributes, is to enhance the diversification of productive structures through innovation and the diffusion of new technology and to strengthen linkages and networking between firms.

#### **Strategy**

18.47 To contribute to the objective, the subprogramme will promote policy advocacy and the exchange of experiences and best practices with respect to the dynamics of productive development among stakeholders at the regional, national and local levels through meetings, seminars and electronic forums, including the provision of technical cooperation services, such as specific training courses and workshops.

18.48 To contribute further to the objective, the subprogramme will promote policy advocacy and the exchange of best practices regarding productive development among stakeholders at the regional, national and local levels. Work under the subprogramme will include consultations and close collaboration with high-level authorities responsible for innovation, information and communications technology and digital policies, industrial development, investment and the promotion of small and medium-sized enterprises to put structural diversification and innovation policy at the top of the development agenda in Latin American and Caribbean countries. The subprogramme will focus on the integration of innovation and new, low-carbon technologies, in production processes with an emphasis on digital technologies convergence (that is, the integration of the Internet of things, 5G, big data, artificial intelligence, information technology and cognitive science) and new manufacturing processes (the Industrial Internet); and on capacity-building in digital technologies. Particular attention will be given to the gender dimension of structural change, for example, with regard to productivity, digital and employment gaps. Given the speed of technological change and its profound impact on the digital economy, many of the challenges posed by the new economic context are still unknown. In this context, the subprogramme will conduct economic analyses along with applied research on the basis of the generation, processing and analysis of information and indicators in various databases; the result of these studies will then be disseminated, and policy recommendations will be submitted to Governments, regional bodies and other relevant stakeholders. The dissemination of new and low-carbon technologies and their integration into production processes should contribute to the achievement of Sustainable Development Goal 12, and should have positive effects on aggregate productivity growth thus contributing to the attainment of Goal 8.

18.49 In addition, the subprogramme will work on the connection of micro-, small and medium-sized enterprises with larger firms that use advanced technologies so as to integrate them into the process of learning and competition in dynamic foreign and domestic markets and increase the dissemination of technology. Also, the impact of foreign direct investment will be analysed and measured so as to devise industrial policies that will have positive effects on learning and the diversification of the production and export structures. Foreign investment may have favourable effects on technology transfer and on the expansion of exports. The subprogramme will support, through technical assistance and upon request by countries, the assessment, development and implementation of industrial policies and strategies, thus contributing to the attainment of Goal 9.

18.50 The subprogramme plans to support member States on issues related to COVID-19 by continuing to provide its analysis of the ongoing impact of COVID-19 on firms and sectors in the region. Furthermore, the pandemic-induced crisis has highlighted and exacerbated the pre-existing fragilities and imbalances in the productive structure of the region and has further highlighted the importance of digital connectivity and infrastructure, since they have become critical and essential factors for the functioning of the economy and society. In that context, the subprogramme plans to further support member States on these issues with particular attention given to the digitalization of the productive sector of the region.

18.51 The above-mentioned work is expected to result in:

(a) The design and implementation of industrial and technology policies aimed at diversifying the productive structure and build capacities in Latin American and Caribbean countries;

(b) Strengthened national capacities to incorporate innovation and new technologies into production processes;

(c) The design and implementation of active policies that heighten local innovation and adaptation helping to leverage the potential of foreign direct investment;

(d) The strengthening of the scientific and technological capacity of the member States to move towards more sustainable patterns of consumption and production;

(e) A diversification process associated with the creation of new opportunities for formal jobs and productivity growth.

18.52 The planned support on issues related to COVID-19 is expected to result in an increase of the resilience of the productive sector through a significant increase in the digitalization of firms in the region, including micro-, small and medium-sized enterprises.

## **Programme performance in 2020**

18.53 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Implementation of policies to support businesses and prevent capacity destruction during the COVID-19 pandemic**

18.54 The economic downturn caused by COVID-19 has had a considerable negative impact on businesses in countries of Latin America and the Caribbean, in particular micro-, small and medium-sized enterprises. The great majority have recorded significant decreases in income and are having difficulty remaining in business. The post-pandemic recovery will be slower and more gradual than initially expected, and despite policy measures and programmes put in place by national authorities, a high level of business and job destruction is expected. The greater that effect, the greater will be the loss of accumulated capacities in firms, the dispersion of knowledge and experience, and a breakdown of trust among economic actors. The subprogramme has conducted assessments and analyses and produced reports to assist Governments in the region in navigating this uncertain time. In June 2020, ECLAC issued a special report entitled “Sectors and businesses facing COVID-19: emergency and reactivation”, in which it made several policy recommendations regarding support for

businesses, in particular micro-, small and medium-sized enterprises, and preventing the destruction of capacity during the emergency.

18.55 In April 2020, the subprogramme produced an early analysis of the importance of digital technology to address the crisis, and in August 2020 published the analysis carried out throughout the year in an ECLAC special report on the access to digital technology to address the impact of the COVID-19 crisis. In its several reports, the subprogramme proposed additional policy recommendations to complement and extend the scope of the policy measures already taken by countries in the early months of the crisis.

*Progress towards the attainment of the objective, and performance measure*

18.56 The above-mentioned work contributed to the objective, as demonstrated by the countries that have implemented and/or increased the scope of their measures to prevent the further destruction of capacity and accelerate the reactivation after the pandemic (see table 18.3).

Table 18.3  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
—	—	<p>Countries that have implemented and/or increased the scope of their measures, with regard to:</p> <p>(a) Flexibility and improvement of credit conditions: Argentina, Bolivia (Plurinational State of), Brazil, Chile, Colombia, Ecuador, El Salvador, Peru and Uruguay;</p> <p>(b) Payroll co-financing: Argentina, Chile and Colombia;</p> <p>(c) Cash contributions to the formally self-employed: Argentina, Chile and Uruguay.</p>

**Impact of COVID-19 on subprogramme delivery**

18.57 Owing to the impact of COVID-19 during 2020, the subprogramme adapted the contents of seminars and so that they could be delivered online. The International School on Innovation Policy Management in Latin America, 2020, was cancelled owing to lockdowns, the closing of national borders and the impossibility to conduct it online. Moreover, the 2020 edition of the Summer School on Latin American Economies was postponed to January 2021 and was delivered online. These changes had an impact on the programme performance in 2020, as specified under result 1.

18.58 At the same time, however, the subprogramme identified new activities and modified some of its recurrent ones to support member States on issues related to COVID-19, within the overall scope of its objectives, namely the conduct of assessments and analyses of the impact of COVID-19 on businesses and industries of the region and of the importance of digital technology in addressing the crisis. Moreover, the subprogramme has adapted its annual flagship publication on foreign direct investment to cover the impact of COVID-19 on international flows of foreign direct investment, global value chains and the medical devices sector, with policy

recommendations for the post-pandemic recovery and the development of strategic sectors in the region. The new deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

## Planned results for 2022

18.59 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### Result 1: new institutional capabilities for structural change<sup>3</sup>

#### Programme performance in 2020

18.60 The subprogramme organized training on innovation and new technologies. Given the impossibility of conducting face-to-face training during 2020, it was decided to develop online training activities. Virtual training can be used as a complement to face-to-face training; consideration is being given to adapting training activities to include both virtual and face-to-face elements, which would allow for a greater scope.

18.61 The above-mentioned work contributed to an additional 40 national officials in Latin American and Caribbean countries receiving training in new areas of economic diversification, which met the planned target of a cumulative total of 280 national officials in Latin American and Caribbean countries trained in new areas of economic diversification, as reflected in the proposed programme budget for 2020.

#### Proposed programme plan for 2022

18.62 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to organize the annual face-to-face course on innovation and new technologies. However, on the basis of the success of the online experience, the present courses will be complemented with some online courses. The expected progress is presented in the performance measure below (see figure 18.V).

Figure 18.V

**Performance measure: total number of national officials in Latin American and Caribbean countries trained in new areas of economic diversification (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

<sup>3</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 21)).

## Result 2: development of new public policies to foster the use of new technologies in productive processes<sup>4</sup>

### Programme performance in 2020

18.63 The subprogramme has continued to generate updated information to favour the development of public policies on digital matters. The data available on the Regional Broadband Observatory were updated. The subprogramme continued to work, within the context of the Digital Agenda for Latin America and the Caribbean for the period 2020–2022 (eLAC 2022), which provides a space for dialogue, peer learning and the exchange of best practices between the countries of the region. The Commission serves as the technical secretariat for the Digital Agenda and, in that capacity, facilitates the discussion and dialogue among stakeholders that include Governments of the region, academia, the technical community, the private sector and civil society. Furthermore, the subprogramme produced technical documents and analyses that serve as the basis for the discussions and for the Digital Agenda, which includes the policy priorities for the development of the digital economy.

18.64 The above-mentioned work contributed to development of eight new public policies to foster the use of new technologies in productive processes, which exceeded the planned target of six, as reflected in the programme budget for 2021.

### Proposed programme plan for 2022

18.65 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to produce knowledge products on issues related to new technologies. It will also continue to serve as the technical secretariat for the Digital Agenda and support countries in the development of policies to foster digitalization and the use of new technologies. The expected progress is presented in the performance measure below (see figure 18.VI).

Figure 18.VI

**Performance measure: total number of new public policies to foster the use of new technologies in production processes (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

<sup>4</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

### Result 3: improved connectivity to speed up firm digitalization

#### Proposed programme plan for 2022

18.66 The subprogramme has worked on the development of assessments and analyses of the manner in which firms in Latin America and the Caribbean currently use digital technologies. The COVID-19 pandemic has highlighted the importance of digitizing firms, not only for improving their productivity and competitiveness, but also for their very survival. In that regard, the subprogramme has worked on proposals for measures and plans to accelerate the adoption of new technologies that offer higher connectivity speeds and therefore enable access to a wider range of digital services and applications. An example is the development of the regional digital agenda developed by ECLAC as eLAC 2022, in which one of the central themes is to increase connectivity speed and coverage.

#### *Lessons learned and planned change*

18.67 The lesson for the subprogramme was that there was demand for tailored support to address the specificities of the subregions within the Latin American and Caribbean region in the area of digitalization. Each subregion has a different level of connectivity development, therefore the policy implications differ depending on the context and the specificities and integration mechanisms of each subregion. In applying the lesson, the subprogramme will work specifically on the development of subregional digitalization strategies. For example, ECLAC will support the Pacific Alliance for the development of its regional digital market strategy and will provide assistance to countries in Central America in developing a digital agenda for that subregion.

#### *Expected progress towards the attainment of the objective, and performance measure*

18.68 This work is expected to contribute to the objective, as demonstrated by an increase in the number of countries in the region with connection speeds that enable an intensive use of broadband Internet. Intensive use is defined as the ability to simultaneously perform basic functions (sending and receiving emails, watching videos and browsing the web) and two or more high-demand activities (watching high-definition videos and participating in video conferences). The minimum broadband speed is closely linked to the level of digitalization of a country and is a necessary first step on the way to digitalizing firms (see figure 18.VII).

Figure 18.VII

**Performance measure: percentage of countries in the region with fixed broadband speeds that enable intensive use of the Internet**

## Legislative mandates

18.69 The list below provides all mandates entrusted to the subprogramme.

### *General Assembly resolutions*

66/217	Human resources development	74/199	Promoting investments for sustainable development
73/225	Entrepreneurship for sustainable development		
73/247	Industrial development cooperation	74/229	Science, technology and innovation for sustainable development
74/197	Information and communications technologies for sustainable development	75/176	The right to privacy in the digital age

### *Economic and Social Council resolutions*

2008/18	Promoting full employment and decent work for all	2019/24	Assessment of the progress made in the implementation of and follow-up to the outcomes of the World Summit on the Information Society
2011/37	Recovering from the world financial and economic crisis: a Global Jobs Pact	2020/13	Science, technology and innovation for development

### *Economic Commission for Latin America and the Caribbean resolutions*

653 (XXXIII)	Follow-up to the Plan of Action for the Information Society in Latin America and the Caribbean	729 (XXXVII); 747 (XXXVIII)	Ministerial Conference on the Information Society in Latin America and the Caribbean
672 (XXXIV)	Establishment of the Conference on Science, Innovation and Information and Communications Technologies of the Economic Commission for Latin America and the Caribbean	750 (XXXVIII)	Conference on Science, Innovation and Information and Communications Technologies of the Economic Commission for Latin America and the Caribbean

## Deliverables

18.70 Table 18.4 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 18.4

### **Subprogramme 2: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>8</b>	<b>2</b>	<b>6</b>	<b>6</b>
1. Meetings of the Conference on Science, Innovation and Information and Communications Technologies of ECLAC	8	—	—	6
2. Preparatory meetings for the Conference on Science, Innovation and Information and Communications Technologies of ECLAC	—	2	6	—
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>3</b>	<b>3</b>	<b>1</b>	<b>1</b>
3. Field projects on the region's production structure, foreign direct investment, and new and emerging technologies and policy	3	3	1	1

<b>Seminars, workshops and training events</b> (number of days)	<b>42</b>	<b>18</b>	<b>47</b>	<b>47</b>
4. Workshops on new technologies and support for small and medium-sized enterprises in the region	4	11	6	–
5. Training and seminars on foreign direct investment and small and medium-sized enterprises	3	2	6	6
6. Courses on innovation policy management and economies of the region	35	–	35	35
7. Meeting of experts to analyse recent structural changes, study the trends and progress of the digital economy, and examine recent trends in the behaviour of economic agents in sectors and countries in the region	–	5	–	6
<b>Publications</b> (number of publications)	<b>11</b>	<b>11</b>	<b>6</b>	<b>7</b>
8. <i>Foreign Direct Investment in Latin America and the Caribbean</i>	1	1	1	1
9. Publications and studies on the production structure of the region, foreign investment, industrial policies, and new technologies and innovation	9	9	5	5
10. Study on technological and productive performance in Argentina and Mercosur	1	1	–	1
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> advice to member States, upon request, on policies and strategies for productive development and competitiveness, public-private partnerships, foreign direct investment, and innovation systems and new and emerging technologies.				
<b>Databases and substantive digital materials:</b> databases on economic activity in specific sectors, software for the analysis of the competitiveness of nations and statistical information on the main economic agents in the region.				

### Subprogramme 3

#### Macroeconomic policies and growth

#### Objective

18.71 The objective, to which this subprogramme contributes, is to foster sustainable and inclusive growth in Latin America and the Caribbean by strengthening the capacity of policymakers and other stakeholders in the region to analyse current and emerging macroeconomic and development finance issues and to evaluate, design and implement development-centred macroeconomic and development financing policies that incorporate a gender perspective and are based on comparative policy analysis.

#### Strategy

18.72 To contribute to the objective, the subprogramme will support member States, regional entities and other stakeholders by providing timely analyses of macroeconomic conditions in the region, and applied and comparative research of current and emerging macroeconomic and financing for development policy issues. To that end, the subprogramme will provide timely analyses, disaggregated by gender whenever possible, of macroeconomic trends and trends in financing for development, together with policy options and recommendations through its recurrent flagship and specialized publications, workshops and seminars, as well as through its technical cooperation activities.

18.73 The subprogramme will support the establishment and operation of networks of key stakeholders, including policymakers, academics, private sector analysts, members of civil society organizations and the public at large. In particular, at the subprogramme's annual regional fiscal policy seminar, which is the region's

preeminent forum for the discussion of fiscal policies, spaces will be created for the South-South sharing of experiences and best practices in the analysis, formulation and implementation of policy. At the same time, the subprogramme will leverage its comparative advantages to provide technical cooperation and advisory services, upon request, to member States in the areas of macroeconomic, labour and financing for development policies.

18.74 The activities of the subprogramme will contribute to the attainment of Sustainable Development Goals 8, 10, 16 (Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels) and 17 (Strengthen the means of implementation and revitalize the Global Partnership for Sustainable Development) with a view to fostering sustainable and inclusive development in Latin America and the Caribbean. In addition, the work under the subprogramme is aimed at facilitating the creation and adoption of development financing policies in line with the Addis Ababa Action Agenda of the Third International Conference on Financing for Development.

18.75 The subprogramme plans to support member States on issues related to COVID-19 by supporting them in the design and implementation of macroeconomic and financing for development policies to build back better after the crisis. The subprogramme will deploy its analytical advantages and its ability to convoke key stakeholders to advocate for macroeconomic policies that favour economic recovery measures – particularly fiscal and monetary measures – with the aim of promoting sustainable and inclusive growth. That work will include a focus on constructing sustainable fiscal policy frameworks backstopped by ramping up domestic resource mobilization efforts. The activities will evolve in line with the needs of member States as they evolve in the course of 2022.

18.76 The above-mentioned work is expected to result in:

(a) Strengthened capacity of policymakers and other stakeholders in the region to analyse current and emerging macroeconomic and development finance issues;

(b) Increased capacity of policymakers to evaluate, design and implement macroeconomic and development financing policies that incorporate a gender perspective and that are based on comparative policy analysis.

18.77 The planned support on issues related to COVID-19 is expected to result in the adoption of macroeconomic and financing for development policies, measures and strategies for building back better in line with the policy advocacy of the subprogramme.

### **Programme performance in 2020**

18.78 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

#### **Enhanced South-South policy dialogue on COVID-19 through timely macroeconomic analysis and high-level forums**

18.79 In response to the COVID-19 pandemic, Governments in the region rapidly developed large-scale public policy measures to strengthen public health systems, support families and prevent the destruction of the economy's productive capacity. However, those efforts were made against a backdrop of prolonged weakness in public accounts characterized by large fiscal deficits and rising public debt. To navigate this challenging environment the subprogramme's work in 2020 was aimed at supporting

policymakers in their efforts to analyse, formulate and implement macroeconomic and financing for development policies. The subprogramme published two special reports, in addition to its recurrent flagship reports, that provided policymakers with a timely analysis of the year's emerging macroeconomic trends. Widespread press coverage ensured that the subprogramme's work was available to other key stakeholders, in particular civil society and the public at large.

18.80 The subprogramme enabled the holding of forums, such as two virtual meetings of the Ministers of Finance of Latin American and Caribbean countries held in April and August, that facilitated the South-South sharing of experiences and gave momentum to the development of regional positions on important topics, in particular those related to international financial relations. The forums enabled the subprogramme to disseminate its analysis of current macroeconomic and development finance trends, as well as the results of its applied comparative policy research.

*Progress towards the attainment of the objective, and performance measure*

18.81 The above-mentioned work contributed to the objective, as demonstrated by the number of high-level authorities participating in the subprogramme's fiscal policy forums. That number reflects the value that policymakers in the region attached to the subprogramme's work related to macroeconomic and financing for development policymaking during the COVID-19 pandemic (see figure 18.VIII).

Figure 18.VIII

**Performance measure: number of high-level authorities participating in the subprogramme's high-level meetings and seminars on fiscal policy (annual)**

**Impact of COVID-19 on subprogramme delivery**

18.82 Owing to the impact of COVID-19 during 2020, the subprogramme pivoted its work to address the rapidly emerging need of member States for regional macroeconomic and comparative policy analysis. For example, the focus of the subprogramme's flagship reports, such as *Fiscal Panorama of Latin America and the Caribbean 2020* and *Economic Survey of Latin America and the Caribbean 2020*, was changed to tackle issues arising from the COVID-19 pandemic and to advocate for policies that support efforts to build back better.

18.83 At the same time, however, the subprogramme identified new activities to support member States on issues related to COVID-19, within the overall scope of its objectives, namely the production of additional macroeconomic and financial statistics, virtual meetings of Latin American finance ministers and the publication of special COVID-19 reports that offered continuous monitoring of macroeconomic conditions in the region. The new deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

## Planned results for 2022

18.84 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### Result 1: macroeconomic policies for development in a slow-growth environment<sup>5</sup>

#### Programme performance in 2020

18.85 The subprogramme has promoted active and expansionary fiscal policies to support domestic demand in the context of the economic contraction caused by the pandemic. To that end, the subprogramme's recurrent flagship publications have been reformulated to offer policymakers a menu of public policy options going forward. The reports highlight the need for measures to strengthen the region's tax take to build sustainable fiscal policy frameworks.

18.86 The above-mentioned work contributed to the adoption of 12 measures by member States, including a large number of measures aimed at increasing public investment, which met the planned target of 12 measures taken by countries in the region in the areas of macroeconomic and financing for development policies reflected in the proposed programme budget for 2020.

#### Proposed programme plan for 2022

18.87 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to support policymakers in the identification of policy options to achieve sustainable and inclusive economic growth through its flagship and research publications, seminars and workshops, and technical assistance. The expected progress is presented in the performance measure below (see figure 18.IX).

Figure 18.IX

**Performance measure: total number of measures taken by countries in the region that are in line with the analysis and recommendations of the Economic Commission for Latin America and the Caribbean in the areas of macroeconomic and financing for development policies (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

<sup>5</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 21)).

## Result 2: ramping up resource mobilization to finance the Sustainable Development Goals<sup>6</sup>

### Programme performance in 2020

18.88 The subprogramme has identified resource mobilization to be a key component of the response to the crisis provoked by the COVID-19 pandemic, as well as the foundation for building future fiscal sustainability. In *Fiscal Panorama of Latin America and the Caribbean 2020* and *Economic Survey of Latin America and the Caribbean 2020*, the subprogramme outlined policy options for ramping up tax revenue through greater direct taxation, the adoption of taxes on digital goods and services and of corrective taxes such as public health-related taxes, and the design and implementation of tax policies conducive to a green recovery. The subprogramme underlined the importance of supporting the financing of subnational governments, which are key providers of public services in the region. Furthermore, the subprogramme continued its work in advocating for a greater role for development banks in financing for development, especially in the area of financial inclusion.

18.89 The above-mentioned work contributed to the adoption of 11 policies, measures and strategies by member States, which exceeded the planned target of 10 resource mobilization policies, measures and strategies reflected in the programme budget for 2021.

### Proposed programme plan for 2022

18.90 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will provide applied and comparative policy analysis of development finance policies to support the strengthening of development finance frameworks in the region. It will provide member States, on request, with technical assistance to examine, formulate and implement resource mobilization measures. The expected progress is presented in the performance measure below (see figure 18.X).

Figure 18.X

**Performance measure: total number of resource mobilization policies, measures and strategies (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

<sup>6</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

### **Result 3: macroeconomic and financing for development policies for sustainable and inclusive growth in a post-pandemic world**

#### **Proposed programme plan for 2022**

18.91 The economic shock caused by the COVID-19 pandemic aggravated the low growth that characterized the region's economy over the past decade. Anaemic growth and entrenched income and wealth inequalities and unequal access to quality public goods and services resulted in growing pressure for reform in the region. At the same time, household, corporate and public debt rose substantially, accentuating financial vulnerabilities and limiting consumption and investment. Overcoming the region's structural shortcomings and the new challenges arising from the COVID-19 pandemic will require novel macroeconomic and financing for development policies.

#### *Lessons learned and planned change*

18.92 The lesson for the subprogramme was that virtual meetings, which had not been used extensively in previous years, can be used further and that their use can be expanded to high-level policymakers. In applying the lesson, the subprogramme will seek to leverage virtual meetings and platforms to enhance the impact of its policy advocacy. The subprogramme will advocate for public policies aimed at building back better after the crisis, with an emphasis on measures that support economic growth in the medium and long term and that serve as the basis for achieving the 2030 Agenda and the Sustainable Development Goals. In the post-COVID-19 period, the mobilization of financing for development will become increasingly important in the post-COVID-19 period as a means of creating fiscal sustainability frameworks on the basis of strengthening public revenue. Depending on country needs, the subprogramme will explore the role of development banks and other innovative sources of financing. That advocacy will build on the subprogramme's comparative advantage in regional macroeconomic analysis and policy research and will build on the work carried out in 2020 and planned for 2021. The subprogramme will provide bespoke technical assistance, upon request, to countries of the region. In addition, the subprogramme will leverage its network of key stakeholders to magnify the impact of its work in the region.

#### *Expected progress towards the attainment of the objective, and performance measure*

18.93 This work is expected to contribute to the objective, as demonstrated by an increase in the number of macroeconomic and financing for development policies, measures and strategies for building back better after the COVID-19 pandemic (see figure 18.XI).

Figure 18.XI

**Performance measure: total number of macroeconomic and financing for development policies, measures and strategies for building back better after COVID-19 (cumulative)**

## Legislative mandates

18.94 The list below provides all mandates entrusted to the subprogramme.

### *General Assembly resolutions*

63/199	International Labour Organization Declaration on Social Justice for a Fair Globalization	73/220	International financial system and development
63/229	Role of microcredit and microfinance in the eradication of poverty	73/221	External debt sustainability and development
64/193	Follow-up to and implementation of the Monterrey Consensus and the outcome of the 2008 Review Conference (Doha Declaration on Financing for Development)	73/222	Promotion of international cooperation to combat illicit financial flows and strengthen good practices on assets return to foster sustainable development
65/146	Innovative mechanisms of financing for development	73/223	Follow-up to and implementation of the outcomes of the International Conferences on Financing for Development
67/12; 75/14	Cooperation between the United Nations and the Latin American and Caribbean Economic System	73/247	Industrial development cooperation
67/218	Promoting transparency, participation and accountability in fiscal policies	74/199	Promoting investments for sustainable development
70/126	Promoting social integration through social inclusion	74/270	Global solidarity to fight the coronavirus disease 2019 (COVID-19)
72/206	Financial inclusion for sustainable development	74/306	Comprehensive and coordinated response to the coronavirus disease (COVID-19) pandemic
72/230; 74/231	Development cooperation with middle-income countries	74/307	United response against global health threats: combating COVID-19

### *Economic and Social Council resolutions*

2008/16	Committee of Experts on International Cooperation in Tax Matters	2011/39	Follow-up to the Outcome of the Conference on the World Financial and Economic Crisis and Its Impact on Development: consideration of the possible establishment of an ad hoc panel of experts
2008/18	Promoting full employment and decent work for all		
2009/5	Recovering from the crisis: a Global Jobs Pact	2017/3	United Nations code of conduct on cooperation in combating international tax evasion
2009/30	A strengthened and more effective intergovernmental inclusive process to carry out the financing for development follow-up	2019/6	Addressing inequalities and challenges to social inclusion through fiscal, wage and social protection policies

### *Economic Commission for Latin America and the Caribbean resolutions*

655 (XXXIII)	Caribbean Development and Cooperation Committee	713 (XXXVI)	Regional follow-up to the outcomes of conferences on financing for development
--------------	---	-------------	--

## Deliverables

18.95 Table 18.5 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 18.5

**Subprogramme 3: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>B. Generation and transfer of knowledge</b>				
<b>Seminars, workshops and training events</b> (number of days)	<b>10</b>	<b>10</b>	<b>10</b>	<b>6</b>

6. Study on specific economic issues in Uruguay	1	1	1	1
7. Study on a high-priority issue concerning macroeconomic and development policies in Colombia	1	1	–	–
8. Study on fiscal rules in Brazil, including an evaluation of constitutional changes in expenditure limits and social security reforms	1	1	–	–
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> advice to member States, upon request, on macroeconomic, fiscal and monetary policy analysis and formulation, macroeconomic analysis and systems for monitoring economic development, and on the design and implementation of financing for development schemes and policies geared towards financial and productive development and/or social protection; advice to the Ministry of Economy and Finance of Uruguay on macroeconomic issues.				
<b>Databases and substantive digital materials:</b> statistical information for economic, monetary and financial variables for countries in the region; statistical data sets covering government operations, public debt, tax revenue and revenue from non-renewable natural resources.				

## Subprogramme 4

### Social development and equality

#### Objective

18.96 The objective, to which this subprogramme contributes, is to improve the overall well-being of the people of the region and achieve greater social and economic equality in line with the 2030 Agenda and with full respect for human rights.

#### Strategy

18.97 To contribute to the objective, the subprogramme will support countries in implementing a regional agenda for inclusive social development in line with the outcomes and agreements reached at the Regional Conference on Social Development in Latin America and the Caribbean. The subprogramme will carry out applied research, generating analyses, disseminating results, providing training and advisory services and formulating policy recommendations to strengthen the capacity of stakeholders to perform sound assessments of social issues for application in policy design and implementation. In addition, it will promote policy dialogue and the implementation of the regional agenda for inclusive social development among policymakers, academics, civil society organizations and other stakeholders and facilitate the exchange of experiences and good practices. Priority areas will include:

addressing the multiple dimensions of poverty, inequality and well-being; bridging gaps in well-being and tackling inequalities, including those related to gender, race, ethnicity, age, disability and territory; ensuring access to universal social protection; promoting social and labour inclusion policies; coordinating social, economic and environmental policies; and improving the capacity of social policy to adapt to new and emerging challenges related to such topics as demographic transition, migration, new technologies and climate change. The subprogramme's deliverables will focus on the following subject areas: assessment of the social situation of the population and social policies for equality and social protection.

18.98 To contribute to the objective, the subprogramme will assist countries with capacity-building and technical cooperation on the design, implementation, monitoring and evaluation of strategies, policies and programmes. Research and advisory services will emphasize, in particular, social protection systems based on an equality-oriented and sustainable approach that fully respects human rights; the protection and promotion of the rights of women, children, young people, indigenous peoples, people of African descent, migrants and persons with disabilities; social investment; and education and public health systems, thus contributing to the attainment of Sustainable Development Goals 1 (End poverty in all its forms everywhere), 2 (End hunger, achieve food security and improved nutrition and promote sustainable agriculture), 3 (Ensure healthy lives and promote well-being for all at all ages), 4 (Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all), 8 and 16.

18.99 Actions will be carried out at both the regional and national levels, in partnership with other ECLAC divisions, as well as with the Commission's subregional headquarters and country offices, other agencies of the United Nations system and, when feasible, the resident coordinator system. The main beneficiaries under the subprogramme will be government institutions of the countries of the region, especially the authorities and officials responsible for social policy management (design, implementation and evaluation); regional and subregional organizations; academic institutions and other research centres and non-governmental organizations. Cooperation is envisaged with other regional commissions, intergovernmental and multilateral institutions, as well as South-South cooperation.

18.100 The subprogramme plans to support member States on issues related to COVID-19 by providing counterparts with up-to-date knowledge through the Observatory on Social Development in Latin America and the Caribbean web tool and by assisting Governments in tackling the socioeconomic consequences of COVID-19 through advisory services and knowledge-sharing activities in social policy areas affected by the crisis.

18.101 The above-mentioned work is expected to result in:

(a) A deeper understanding of the structural social challenges and disparities that characterize the region;

(b) Measures and public policies promoting greater social and economic equality and overall well-being of the people of the region.

18.102 As specified in more detail in result 3 below, the planned support on issues related to COVID-19 is expected to result in expanding social protection systems, that take into consideration the social impact of the pandemic as one of the challenges to tackle in the coming years.

## Programme performance in 2020

18.103 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Adoption of the national policy on social protection and promotion in Haiti

18.104 At the request of Haiti, the subprogramme has been assisting the Government with the development of a coherent social protection strategy. Together with the World Food Programme and ECLAC subregional headquarters in Mexico, ECLAC assisted the Ministry of Social Affairs and Labour of Haiti in the conceptualization, drafting, discussion, and costing of such a strategy.

18.105 The subprogramme built on the work carried out in previous years to strengthen the capacities of government officials, especially those in the Ministry of Social Assistance and Labour, and other stakeholders in the area of social protection, provide advisory services and contribute to the drafting and discussions about the national policy on social protection and promotion. Furthermore, the subprogramme developed a report on the costs of implementing the cash transfers proposed as part of that policy.

### *Progress towards the attainment of the objective, and performance measure*

18.106 The above-mentioned work contributed to the objective, as demonstrated by the adoption of the National policy on social protection and promotion by the Government of Haiti in June 2020 (see table 18.6).

Table 18.6  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
The Government of Haiti identified and filled capacity gaps with regard to policy development in the area of social protection	The Government of Haiti accessed a wide range of technical assistance to support the development of a national policy on social protection and promotion	The Government of Haiti adopted the national policy on social protection and promotion and an agreement on the costing of the implementation of cash transfer programmes

### Impact of COVID-19 on subprogramme delivery

18.107 In response to the pandemic, the subprogramme identified a demand for the development of a database on social protection interventions and for reports on the social impact of the pandemic as part of the Commission's comprehensive analyses made available through the COVID-19 Observatory web tool. Those activities made it possible to support member States on policy issues related to the COVID-19 pandemic, within the overall scope of its objectives, namely technical cooperation on social protection and institutional improvement. The new deliverables contributed to results in 2020, as specified under result 3 below.

## Planned results for 2022

18.108 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: achieving the implementation of a regional commitment towards inclusive social development<sup>7</sup>**

#### **Programme performance in 2020**

18.109 Under the direction of the Presiding Officers of the Regional Conference on Social Development, the subprogramme coordinated activities to implement the Regional Agenda for Inclusive Social Development, adopted in 2019. To that end, the subprogramme set up working groups with countries in order to expand networking and South-South cooperation. Furthermore, the subprogramme organized five virtual meetings and a virtual community of practice to facilitate discussions on social protection and social inclusion among representatives of national social authorities.

18.110 The above-mentioned work contributed to the identification of common implementation challenges in tackling the social impact of the COVID-19 pandemic, the sharing of data on 263 emergency social protection programmes during 2020, and policy design to enhance social protection and social inclusion, such as the assistance to Haiti, mentioned above, and the Jajapo national poverty reduction plan in Paraguay as part of that country's social protection system, which met the planned target of Latin American and Caribbean countries developing strategies for improving institutional frameworks and formulating good-quality policies in order to implement their commitment to inclusive social policies that leave no one behind, reflected in the proposed programme budget for 2020.

#### **Proposed programme plan for 2022**

18.111 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will focus on implementing the mandates of the Regional Conference on Social Development in Latin America and the Caribbean, maintaining the Observatory on Social Development in Latin America and the Caribbean web tool and developing a workplan for the implementation of the Regional Agenda for Inclusive Social Development. The expected progress is presented in the performance measure below (see table 18.7).

Table 18.7  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Countries identified obstacles in the area of inclusive social development in countries of the region	Countries committed to inclusive social development, in line with the 2030 Agenda	Countries developed strategies for improving institutional frameworks and formulating good-quality policies in	Countries implement social policies and programmes that promote inclusive social development	Countries develop policies and programmes in line with the workplan of the Regional Agenda for Inclusive Social Development

<sup>7</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 21)).

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
		order to implement their commitment to inclusive social policies that leave no one behind		

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: improved and more effective, efficient, transparent and sustainable social policy institutions<sup>8</sup>**

### **Programme performance in 2020**

18.112 The subprogramme assisted countries in improving their policy institutions in various policy areas. In Chile, ECLAC was invited to join the social cohesion council coordinated by the Ministry of Social Development and Family and contribute to its analysis and to the drafting of a report with recommendations to mainstream social cohesion as a cross-cutting and long-term objective for all public policies. The subprogramme developed and maintained the Observatory on Social Development in Latin America and the Caribbean web tool with up-to-date information on social institutions, social expenditure and non-contributory social protection programmes in the countries of the region, among other things. The subprogramme assisted countries with data and policy analysis related to the social crisis resulting from the pandemic in the form of special reports made available through the COVID-19 Observatory web tool, such as a study on the institutional innovations and challenges of social information systems and social registries in 15 countries of Latin America. Furthermore, in collaboration with the ECLAC subregional headquarters in the Caribbean, the International Labour Organization, the United Nations Human Settlements Programme and Caribbean Catastrophe Risk Insurance Facility, the subprogramme assisted 18 Caribbean member States and associated members with a virtual workshop entitled “Leaving no one behind in the Caribbean”, which was aimed at building resilience and sustainable development through universal social protection.

18.113 The above-mentioned work contributed to an expansion of the collaboration with and between countries and with eight social policy institutions based in countries that include Chile, El Salvador, Guatemala, Honduras and Paraguay that acknowledge improvements in the public action they take as a result of technical assistance provided by ECLAC, which met the planned target of eight such social policy institutions reflected in the programme budget for 2021.

### **Proposed programme plan for 2022**

18.114 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will keep the Observatory on Social Development in Latin America and the Caribbean web tool up to date, produce new policy analysis reports and develop new forms of policy analysis, provide technical assistance to the Governments of the region and expand new spaces for South-South cooperation. The expected progress is presented in the performance measure below (see figure 18.XII).

<sup>8</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

Figure 18.XII

**Performance measure: number of social policy institutions acknowledging improvements in their public action as a result of technical assistance provided by ECLAC (annual)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: advancing innovative sectoral and intersectoral social policies to address inequalities affecting vulnerable populations**

#### **Proposed programme plan for 2022**

18.115 Latin America and the Caribbean have seen increases in levels of poverty and inequality as a consequence of the COVID-19 pandemic. The pandemic arose in a highly uncertain context marked by structural inequalities as well as by the increased challenges and opportunities of digitalization and the fourth industrial revolution, changes in population structures associated with age and migration, morbidity and mortality transitions, as well as by climate change and disasters. The subprogramme will focus on social analysis and policy proposals relating to the social impacts of the pandemic and emerging transformations. The proposed programme plan for 2022 will enhance sectoral and intersectoral social policies to expand the opportunities while leaving no one behind.

#### *Lessons learned and planned change*

18.116 The lesson for the subprogramme was that there was a need for support to increase the adoption of and adapt to the use of new technologies and that it was important to close digital inclusion gaps, among other things. It has shown that the work of the subprogramme could be adapted by developing new processes to cover new populations and needs and shifting from face-to-face to virtual missions and seminars with positive effects on efficiency and the environment, among other innovations. In applying the lesson, the subprogramme will attempt to expand the use of technologies in a mix of virtual and in-person advisory and technical assistance work to facilitate the work of the subprogramme with countries. Furthermore, the subprogramme will focus on cooperation and knowledge-sharing among countries.

#### *Expected progress towards the attainment of the objective, and performance measure*

18.117 This work is expected to contribute to the objective, as demonstrated by survey results for the number of national officers who report that seminars, workshops, technical reports and advisory services of the subprogramme have increased their knowledge and capacities to improve their work in dealing with new challenges related to social issues (see figure 18.XIII).

Figure 18.XIII

**Performance measure: number of national officers acknowledging that they increased their capacity to develop innovative sectoral and intersectoral social policies (annual)**

## Legislative mandates

18.118 The list below provides all mandates entrusted to the subprogramme.

### General Assembly resolutions

66/164	Promotion of the Declaration on the Right and Responsibility of Individuals, Groups and Organs of Society to Promote and Protect Universally Recognized Human Rights and Fundamental Freedoms	71/178 71/180 71/191	Rights of indigenous peoples International Convention on the Elimination of All Forms of Racial Discrimination The right to food
66/165	Protection of and assistance to internally displaced persons	71/197	Globalization and its impact on the full enjoyment of all human rights
66/168	Elimination of all forms of intolerance and of discrimination based on religion or belief	72/235 73/141	Human resources development
66/172	Protection of migrants		Implementation of the outcome of the World Summit for Social Development and of the twenty-fourth special session of the General Assembly
70/126; 72/142	Promoting social integration through social inclusion	73/142	Inclusive development for and with persons with disabilities
70/127	Policies and programmes involving youth		Human rights and extreme poverty
70/131	Convention on the Elimination of All Forms of Discrimination against Women	73/163 73/246	Implementation of the Third United Nations Decade for the Eradication of Poverty (2018–2027)
70/132	Improvement of the situation of women and girls in rural areas		A global call for concrete action for the total elimination of racism, racial discrimination, xenophobia and related intolerance and the comprehensive implementation of and follow-up to the Durban Declaration and Programme of Action
70/138	The girl child	73/262	Buenos Aires outcome document of the second High-level United Nations Conference on South-South Cooperation
70/153	Enhancement of international cooperation in the field of human rights		Political declaration of the high-level meeting on universal health coverage
70/163	National institutions for the promotion and protection of human rights		
70/166	Effective promotion of the Declaration on the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities	73/291	
70/223	Agriculture development, food security and nutrition	74/2	
71/177	Rights of the child		

### Economic and Social Council resolutions

2009/5	Recovering from the crisis: a Global Jobs Pact	2014/32	Establishment of the Regional Conference on Social Development in Latin America and the Caribbean
2012/11	Mainstreaming disability in the development agenda		

2016/8	Rethinking and strengthening social development in the contemporary world	2018/5	Strategies for eradicating poverty to achieve sustainable development for all
2017/12	Promoting the rights of persons with disabilities and strengthening the mainstreaming of disability in the implementation of the 2030 Agenda for Sustainable Development	2020/9	Mainstreaming a gender perspective into all policies and programmes in the United Nations system

*Economic Commission for Latin America and the Caribbean resolution*

722 (XXXVII); Regional Conference on Social Development  
742 (XXXVIII) in Latin America and the Caribbean

## Deliverables

18.119 Table 18.8 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 18.8

**Subprogramme 4: deliverables for the period 2020–2022, by category and subcategory**

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>1</b>	–	<b>10</b>	<b>1</b>
1. Meeting of the Presiding Officers of the Regional Conference on Social Development in Latin America and the Caribbean	1	–	1	1
2. Session of the Regional Conference on Social Development in Latin America and the Caribbean	–	–	9	–
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>2</b>	<b>2</b>	<b>2</b>	<b>1</b>
3. Field projects on social protection, social and labour inclusion policies, human capacities and a human rights approach within social protection systems; social investment and emerging challenges for social policies	2	2	2	1
<b>Seminars, workshops and training events</b> (number of days)	<b>10</b>	<b>10</b>	<b>14</b>	<b>14</b>
4. Meetings of experts to analyse the formulation of new policy recommendations on the rights of specific population groups; to examine mechanisms to promote better coordination within social protection systems, with a rights and equality approach; to examine mechanisms that contribute to increasing coverage and ensuring progressive equality within national social protection systems; to examine the advances and challenges of public policies for labour and productive inclusion	4	4	8	8
5. Training activities on policies on poverty reduction, equality and well-being, and policy formulation for poverty alleviation, access to social protection networks and capacity-building	6	6	6	6
<b>Publications</b> (number of publications)	<b>7</b>	<b>6</b>	<b>9</b>	<b>9</b>
6. <i>Social Panorama of Latin America</i>	1	–	2	1
7. Country office studies: ECLAC office in Bogotá, study on inclusive social and production policies, and critical obstacles to inclusive social development in Colombia; ECLAC office in Buenos Aires, study of social and labour trends in Argentina; and ECLAC office in Montevideo, study on broad aspects of social policy, poverty and inequality in Uruguay	1	1	3	3

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
8. Studies on topics including social rights among specific population groups, social protection including access to decent work, poverty reduction and income distribution, education, and social policies and programmes	5	5	4	5
<b>Technical materials</b> (number of materials)	<b>2</b>	<b>2</b>	<b>2</b>	<b>2</b>
9. Technical materials on social development policies; analytical and methodological proposals to foster the universal implementation of social policies and enhance their impact on equality gaps, to enhance intersectoral and inter-institutional cooperation and to increase the effectiveness and efficiency of social policies	2	2	2	2
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> advice to member States, upon request, on social policies for equality, decision-making in social policy, and social investment and policies; analytical and methodological proposals to enhance intersectoral and inter-institutional cooperation, aimed at improving effectiveness and efficiency; design, implementation and evaluation of social policies.				
<b>Databases and substantive digital materials:</b> Observatory on Social Development in Latin America and the Caribbean, which includes databases on social development, young people, non-contributory social protection, social institutions, and regional commitments.				
<b>D. Communication deliverables</b>				
<b>Digital platforms and multimedia content:</b> knowledge management tools, including on the strengthening of the Latin American and Caribbean Network on Social Development.				

## Subprogramme 5

### Mainstreaming the gender perspective in regional development

#### Objective

18.120 The objective, to which the subprogramme contributes, is to mainstream a gender equality perspective into sustainable and inclusive development strategies in Latin American and Caribbean countries.

#### Strategy

18.121 To contribute to the objective, the subprogramme will continue to produce knowledge and develop gender statistics and indicators, expanding the scope and improving the quality of data and indicators available from the Gender Equality Observatory for Latin America and the Caribbean. The subprogramme will provide technical assistance to the countries of the region in developing policies to promote gender equality, using a rights-based approach and strengthening the capacities of national mechanisms for the advancement of women as well as those of national statistical offices. To promote increased knowledge-sharing on gender resources in the region, the subprogramme will foster increased dissemination of publications and research findings among policymakers and other relevant stakeholders. Particular attention will be devoted to the economic autonomy of women in an integrated framework, connected to physical autonomy and to decision-making autonomy. Given its cross-cutting nature, the main contributions under the subprogramme will be related to the attainment of Sustainable Development Goals 1, 3, 4, 5 (Achieve gender equality and empower all women and girls), 8, 11 (Make cities and human settlements inclusive, safe, resilient and sustainable), 16 and 17.

18.122 The subprogramme plans to support member States on issues related to COVID-19 by focusing its knowledge-generation and research activities and its technical assistance on various possible socioeconomic scenarios in the context of the recovery from the COVID-19 pandemic.

18.123 The above-mentioned work is expected to result in:

(a) Strengthened capacities of member States in building policies for gender equality along with the implementation of the 2030 Agenda;

(b) The advancement of gender equality across the region.

18.124 The planned support on issues related to COVID-19 is expected to result in an enhanced production of gender statistics and the implementation of gender-sensitive policy recommendations aimed at reducing economic impacts by achieving rapid recovery while leaving no one behind.

### **Programme performance in 2020**

18.125 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

#### **Santiago Commitment: accelerating the implementation of the Regional Gender Agenda**

18.126 As part of the Commission's efforts to respond to the ongoing challenge of achieving gender equality in the region, the fourteenth session of the Regional Conference on Women in Latin America and the Caribbean was held in January 2021. Organized by ECLAC with the support of UN-Women, the session was attended by representatives of the Commission's 33 member States and 6 associate members; 365 civil society organizations; 14 agencies, funds and programmes of the United Nations system; and 11 intergovernmental organizations. It is worth noting the participation of the Vice-Presidents of Colombia, Costa Rica and El Salvador, and of about 20 ministers of women's affairs and senior authorities of mechanisms for the advancement of women in the region. As part of its work to organize and prepare the session, the subprogramme actively participated in the negotiations for the Santiago Commitment, which the countries of the region adopted during the session. In it, the countries of the region pledge to take all necessary measures to accelerate the effective implementation of the Beijing Platform for Action and the Regional Gender Agenda, strengthening gender institutions and architecture through the prioritization of machineries for the advancement of women and gender mainstreaming at the different levels of the State.

#### *Progress towards the attainment of the objective, and performance measure*

18.127 The above-mentioned work contributed to the objective, as demonstrated by the adoption by the countries of the region of the Santiago Commitment, which is aimed at accelerating efforts to realize the Regional Gender Agenda (see table 18.9).

Table 18.9  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
<p>Equality plans launched that incorporate elements of the Montevideo Strategy for Implementation of the Regional Gender Agenda within the Sustainable Development Framework by 2030:</p> <p>(a) Costa Rica: national policy for effective equality between women and men (2018–2030)</p> <p>(b) Chile: fourth national plan for equality between women and men (2018–2030)</p> <p>(c) Uruguay: national strategy for gender equality 2030</p>	<p>Member States have access to the regional progress report on the Montevideo Strategy (LC/CRM.14/5)</p>	<p>At the fourteenth session of the Regional Conference on Women in Latin America and the Caribbean, countries of the region adopted the Santiago Commitment, which is aimed at accelerating efforts to realize the Regional Gender Agenda</p>

### Impact of COVID-19 on subprogramme delivery

18.128 In response to the pandemic, the subprogramme identified new activities to support member States on issues related to COVID-19, within the overall scope of its objectives. The subprogramme generated knowledge by making information on national measures to address the impact of the pandemic on the autonomy of women available to Governments of the region through the COVID-19 Observatory web tool.

### Planned results for 2022

18.129 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### Result 1: expanding and strengthening capacity for gender statistics in Latin America and the Caribbean<sup>9</sup>

#### Programme performance in 2020

18.130 The subprogramme has continued to deliver training to national officials on the production and use of gender statistics. The subprogramme supported an increasing number of countries that would be able to produce statistics with a gender perspective in accordance with internationally agreed methodologies and standards. Furthermore, the subprogramme was able to support the countries of the region in the formulation and development of new activities to promote gender statistics in an innovative and effective manner.

18.131 The above-mentioned work contributed to 75 national officials being trained in the production and use of statistics with a gender perspective, which exceeded the planned target of 70 national officials reflected in the proposed programme budget for 2020.

<sup>9</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 21)).

### Proposed programme plan for 2022

18.132 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will increase the offer of training courses on the production of statistics with a gender perspective. The expected progress is presented in the performance measure below (see figure 18.XIV).

Figure 18.XIV

**Performance measure: number of national officials trained in the production and use of statistics with a gender perspective (annual)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 2: strengthening statistical capacities from a gender perspective<sup>10</sup>

#### Programme performance in 2020

18.133 The subprogramme has been working on the continuous improvement of gender statistics, using the Gender Equality Observatory for Latin America and the Caribbean as the main portal to disseminate key indicators on the situation of gender equality, and strengthening statistical capacities through advisory services and technical assistance for the advancement of gender equality among countries in the region. The subprogramme implemented an innovative technical assistance methodology by intensifying the use of different delivery models, such as virtual meetings and trainings using online platforms. Furthermore, the subprogramme organized several webinars for Caribbean countries, with a focus on mapping existing data, identifying gaps in the production of gender statistics and providing recommendations regarding the production, development, systematization and dissemination of statistical information and gender-sensitive indicators in order to promote the use of gender statistics for policymaking to ensure that no women and girls are left behind, in keeping with the commitments set out in the Regional Gender Agenda and the 2030 Agenda.

18.134 The above-mentioned work contributed to 74 national officials being certified in the use of the indicators housed in the Gender Equality Observatory for Latin America and the Caribbean, which met the planned target of 74 reflected in the programme budget for 2021.

<sup>10</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

### Proposed programme plan for 2022

18.135 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective and in response to recent developments, the subprogramme's work will evolve to include gender mainstreaming in sustainable and inclusive development strategies in the countries of Latin America and the Caribbean. The expected progress is presented in the updated performance measure below (see figure 18.XV).

Figure 18.XV

**Performance measure: total number of national officials certified in the use of the indicators housed in the Gender Equality Observatory for Latin America and the Caribbean, and total number of national officials certified in mainstreaming gender in public policies (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: increased capacity to formulate and develop gender equality policies

#### Proposed programme plan for 2022

18.136 In order to continue to incorporate the gender equality perspective into the sustainable and inclusive development strategies of countries of Latin America and the Caribbean, it is important to continue to strengthen their capacity to design, develop and implement gender equality policies in line with the Regional Gender Agenda, the 2030 Agenda and other international agreements. The subprogramme has provided technical assistance to institutions in the region to develop innovative and effective public policies that support and sustain a gender equality architecture that is based on a solid and interconnected institutional framework that incorporates a gender perspective.

#### *Lessons learned and planned change*

18.137 The lesson for the subprogramme was that there was a need to adjust to the growing demand for technical assistance among the countries of the region owing to the economic, political, social and environmental uncertainties, which have been exacerbated by the pandemic and limited resources. This difficulty was successfully overcome by establishing collaborative work strategies, greater support networks and work efficiency within the team. In applying the lesson, the subprogramme will endeavour to detail the decision criteria for future technical assistance, improving the results-based management model. Technical assistance will be focused on formulating gender equality policies that address problems related to the autonomy of women and that include efforts to overcome poverty in terms of both money and time, on achieving equal pay, on ending discrimination in the labour market, on

adapting the biased or insufficient social protection model, and on issues of inequality based on the sexual division of labour (unpaid domestic and care work).

*Expected progress towards the attainment of the objective, and performance measure*

18.138 This work is expected to contribute to the objective, as demonstrated by the number of stakeholders, including relevant institutions in the region, reporting an improvement in the formulation and development of gender equality policies (see figure 18.XVI).

Figure 18.XVI

**Performance measure: total number of stakeholders in the region reporting an improvement in the formulation and development of gender equality policies (cumulative)**

## Legislative mandates

18.139 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolutions*

66/165; 68/180	Protection of and assistance to internally displaced persons	68/192	Improving the coordination of efforts against trafficking in persons
66/166	Effective promotion of the Declaration on the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities	68/228	Human resources development
66/173	Follow-up to the International Year of Human Rights Learning	69/132	Global health and foreign policy
67/139	Towards a comprehensive and integral international legal instrument to promote and protect the rights and dignity of older persons	69/146	Follow-up to the Second World Assembly on Ageing
67/185	Promoting efforts to eliminate violence against migrants, migrant workers and their families	69/147	Intensification of efforts to eliminate all forms of violence against women and girls
68/160	Enhancement of international cooperation in the field of human rights	69/176	Promotion of peace as a vital requirement for the full enjoyment of all human rights by all
68/181	Promotion of the Declaration on the Right and Responsibility of Individuals, Groups and Organs of Society to Promote and Protect Universally Recognized Human Rights and Fundamental Freedoms: protecting women human rights defenders	69/183	Human rights and extreme poverty
68/191; 70/176	Taking action against gender-related killing of women and girls	69/187	Migrant children and adolescents
		69/236	World Survey on the Role of Women in Development
		70/127	Policies and programmes involving youth
		70/130	Violence against women migrant workers
		70/131	Convention on the Elimination of All Forms of Discrimination against Women
		70/132	Improvement of the situation of women and girls in rural areas

70/133	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly	73/148	Intensification of efforts to prevent and eliminate all forms of violence against women and girls: sexual harassment
70/138	The girl child	73/151	Office of the United Nations High Commissioner for Refugees
70/147	Protection of migrants	73/153	Child, early and forced marriage
71/170	Intensification of efforts to prevent and eliminate all forms of violence against women and girls: domestic violence	73/154	Protecting children from bullying
		73/155	Rights of the child
		73/171	The right to food
72/1	Political declaration on the implementation of the United Nations Global Plan of Action to Combat Trafficking in Persons	73/179	The right to privacy in the digital age
		73/209	Protection of persons in the event of disasters
73/17	Impact of rapid technological change on the achievement of the Sustainable Development Goals and targets	73/210	Strengthening and promoting the international treaty framework
		73/294	Twenty-fifth anniversary of the Fourth World Conference on Women
73/146	Trafficking in women and girls	73/302	United Nations action on sexual exploitation and abuse

### *Economic and Social Council resolutions*

2008/33	Strengthening coordination of the United Nations and other efforts in fighting trafficking in persons	2014/5	Promoting empowerment of people in achieving poverty eradication, social integration and full employment and decent work for all
2009/15	Future organization and methods of work of the Commission on the Status of Women	2015/21	Taking action against gender-related killing of women and girls
2009/16	Working Group on Communications on the Status of Women of the Commission on the Status of Women	2015/23	Implementation of the United Nations Global Plan of Action to Combat Trafficking in Persons
2012/16	Promoting efforts to eliminate violence against migrants, migrant workers and their families	2019/2	Mainstreaming a gender perspective into all policies and programmes in the United Nations system

### *Economic Commission for Latin America and the Caribbean resolutions*

657 (XXXIII)	Ad Hoc Committee on Population and Development of the Economic Commission for Latin America and the Caribbean	699 (XXXVI)	Regional Conference on Women in Latin America and the Caribbean
		719 (XXXVII); 739 (XXXVIII)	Regional Conference on Women in Latin America and the Caribbean

## **Deliverables**

18.140 Table 18.10 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 18.10

**Subprogramme 5: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>25</b>	<b>25</b>	<b>12</b>	<b>14</b>
1. Meetings of the Presiding Officers of the Regional Conference on Women in Latin America and the Caribbean	12	12	9	1
2. Subregional preparatory meetings in the Caribbean, South America and Central America	–	–	–	3
3. Session of the Regional Conference on Women in Latin America and the Caribbean	10	10	–	10
4. Meeting with agencies and organizations participating in the Gender Equality Observatory for Latin America and the Caribbean	3	3	3	–
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>1</b>	<b>1</b>	<b>1</b>	<b>1</b>
5. Field projects on unpaid work and social protection of women; gender equality and sustainable development policies; and the economic and physical autonomy of women	1	1	1	1
<b>Seminars, workshops and training events</b> (number of days)	<b>8</b>	<b>8</b>	<b>8</b>	<b>9</b>
6. Training programme on public policies for gender equality for government agencies, the economic autonomy of women, planning for development with a gender perspective and gender statistics for government agencies	5	5	5	8
7. Meetings to consider priority issues emerging from the thirteenth session of the Regional Conference on Women in Latin America and the Caribbean on the evaluation of best practices and challenges in the implementation of gender policies, the promotion of an economic agenda for gender equality, monitoring of the 2030 Agenda, and the analysis of policies on gender equality and the autonomy of women; inter-agency meetings with programmes, funds and specialized agencies of the United Nations system, and with governmental agencies and organizations involved in the Gender Equality Observatory for Latin America and the Caribbean	3	3	3	1
<b>Publications</b> (number of publications)	<b>7</b>	<b>7</b>	<b>5</b>	<b>6</b>
8. Publications, documents and studies on gender, including on gender mainstreaming policies, the economic and physical autonomy of women, poverty from a gender perspective, and implementation of the Montevideo Strategy for Implementation of the Regional Gender Agenda within the Sustainable Development Framework by 2030	7	7	5	5
9. Position document for the fifteenth session of the Regional Conference on Women in Latin America and the Caribbean	–	–	–	1
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> advice to member States, upon request, on public policies for gender mainstreaming and institution-building, methodologies and tools for public policymaking, and on matters relating to the fulfilment of international agreements on gender equality.				
<b>Databases and substantive digital materials:</b> Gender Equality Observer for Latin America and the Caribbean website, and ECLAC website on gender statistics with data from household and time-use surveys and other sources.				

## Subprogramme 6

### Population and development

#### Objective

18.141 The objective, to which this subprogramme contributes, is to fully integrate population issues into development planning, policies and programmes of the countries of Latin America and the Caribbean.

## Strategy

18.142 To contribute to the objective, the subprogramme will provide national and local institutions with training on demographic analysis, population estimates and projections; provide technical support in the follow-up to international agreements (including the Framework of Action for the follow-up to the Programme of Action of the International Conference on Population and Development beyond 2014, the Montevideo Consensus on Population and Development, the Madrid International Plan of Action on Ageing and the Global Compact for Safe, Orderly and Regular Migration), with a gender-sensitive, disability and ethnic approach, and in the follow-up of the population-related targets of the 2030 Agenda; and generate knowledge of population and demographic trends in the region to underpin evidence-based policymaking. In the context of the regional implementation of the 2030 Agenda, the main contributions will be related to Sustainable Development Goals 5, 7 (Ensure access to affordable, reliable, sustainable and modern energy for all), 10 and 17. The subprogramme will improve the use of census data, vital statistics and surveys through the generation of data and development of procedures, computer programs and information systems. Furthermore, the subprogramme will provide technical assistance in the inclusion of sociodemographic inputs in the design and implementation of public policies at the national and local levels. Workshops and seminars will be held to facilitate South-South cooperation, networking and the sharing of successful experiences. In addition, applied research and analysis on key issues such as population ageing, adolescent fertility, persons with disabilities, international migration and the socioeconomic impact of demographic transition, including recommendations on how to reduce inequalities, will be carried out and disseminated through publications. Information and communications technologies will be used to reach the wider public.

18.143 To further contribute to the objective, the work of the subprogramme will be carried out in close cooperation with other ECLAC subprogrammes and the subregional headquarters. The Commission will work with and seek to foster synergies with other United Nations entities involved in the population cluster and other international and intergovernmental organizations. It will strive to continue to play a leading role for the region in the United Nations Network on Migration and in other networks relevant to population issues such as the National Transfer Accounts network. The permanent participation of relevant civil society organizations will be encouraged.

18.144 The main beneficiaries of the subprogramme activities will be government authorities and officials from the region, particularly those working on population-related issues in ministries of planning, social programming, health, education, gender and ethnic affairs and housing, and in national statistical offices. Other beneficiaries will include public, private and civil society entities, organizations of indigenous peoples, professional associations and academia.

18.145 The subprogramme plans to support member States on issues related to COVID-19 by focusing on the impact the pandemic has had on different population groups and the need to consider those diverse situations in development planning. Evidence-based recommendations and national experiences will be shared and analysed in several formats, including virtual dialogues and training.

18.146 The above-mentioned work is expected to result in:

- (a) National capacities to monitor population trends being strengthened;
- (b) Population and development issues being addressed.

18.147 As specified in more detail in the result that emerged during 2020, the planned support on issues related to COVID-19 is expected to result in strengthened national capacities to identify and respond to the needs of various population groups that have experienced a disproportionate impact from the pandemic and during recovery, resulting in greater inequality and increased vulnerability.

## Programme performance in 2020

18.148 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Increased capacity for policy responses aimed at addressing the impact of COVID-19 on vulnerable populations

18.149 As the pandemic was progressing, there was an urgent need to assess its impact on various population groups that were at risk of increased vulnerability, given the deep structural inequalities in the region. New information and capacities were needed to enhance the policy response in both the short and medium terms. The Government of Peru, in its capacity as Chair of the Regional Conference on Population and Development in Latin America and the Caribbean, proposed a process of analysis and dialogue on the impact that COVID-19 was having on several population groups. The proposal was supported by the countries acting as presiding officers of the same conference. The subprogramme responded by leading various studies and dialogues during the second half of 2020.

18.150 The subprogramme raised the visibility of various issues of public interest, as well as of the population groups that were hit the hardest by the pandemic. It made more information, knowledge and tools available to Governments to inform their decision-making processes by analysing the effects of COVID-19 on those groups, such as international migrants, older persons, indigenous peoples, populations of African descent and people with disabilities. National policies were examined to contribute to the identification of possible gaps and formulate recommendations. To disseminate those tools, the subprogramme facilitated a process of high-level and technical regional dialogues among representatives of countries and thousands of representatives of civil society, academia and other interested stakeholders, who participated actively and exchanged experiences. For each dialogue, a summary of the key takeaways was compiled and made public.

#### *Progress towards the attainment of the objective, and performance measure*

18.151 The above-mentioned work contributed to the objective, as demonstrated by public institutions having increased knowledge about and capacities to implement policy measures aimed at mitigating the risks and easing the impact of COVID-19 on vulnerable populations (see table 18.11).

Table 18.11  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
—	—	More than 15 public institutions increased their knowledge about and capacities to implement policy responses and measures aimed at

2018 (actual)

2019 (actual)

2020 (actual)

mitigating the risks and easing the impacts of the COVID-19 pandemic on vulnerable populations, in particular migrants, older persons, indigenous peoples, populations of African descent and people with disabilities

### Impact of COVID-19 on subprogramme delivery

18.152 Owing to the impact of COVID-19 during 2020, the subprogramme moved planned in-person activities to virtual formats in response to travel restrictions and shifted its focus to address emerging public policy challenges in the area of population and development. The regional specialization course on demographic analysis for sustainable development, delivered over the course of about four months, was successfully moved online, as were two virtual workshops on the use and processing of census data using REDATAM software (REDATAM is an acronym that stands for “retrieval of data for small areas by microcomputer”), which is used to report on 2030 Agenda indicators. Virtual work sessions were held with national statistical offices to deliver technical assistance in population and housing censuses (to 13 countries) and in population estimates and projections (to 7 countries). In addition, four webinars were held on the effects of the COVID-19 pandemic on the 2020 census and five technical meetings were held on census data collection and processing for the development of regional guidelines in the issue. Given the impact of the COVID-19 pandemic, the Regional Conference on Population and Development in Latin America and the Caribbean and the meeting on the regional review of the implementation of the Global Compact for Migration were postponed to 2021. These changes had an impact on the programme performance in 2020, as specified under result 1.

18.153 At the same time, however, the subprogramme identified a greater impact on specific population groups and the need for new activities to support member States on issues related to COVID-19, related to tools for evidence-based policies covering different population groups within the overall scope of its objectives. In this regard, the subprogramme provided COVID-19 related technical assistance and published and presented studies with policy recommendations and analysis of regional experiences through virtual means. The new deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

### Planned results for 2022

18.154 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### Result 1: a new wave of demographers informing policies<sup>11</sup>

#### Programme performance in 2020

18.155 The subprogramme has successfully implemented a regional specialization course on demographic analysis for sustainable development, delivered over the

<sup>11</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 21)).

course of about four months, with 36 participants belonging to the following groups: national statistical offices (21 participants), governmental institutions (8 participants) and universities and civil society organizations (7 participants) from the following 12 countries: Argentina, Brazil, Chile, Colombia, Costa Rica, Cuba, Ecuador, El Salvador, Guatemala, Panama, Peru and Uruguay. The subprogramme changed the course format from blended learning to completely virtual learning by replacing the face-to-face phase with online classes. This required an enormous effort to redesign the course over a short period, which shows the subprogramme's high capacity to adapt to the new conditions dictated by COVID-19.

18.156 The above-mentioned work contributed to national statistical offices and other relevant institutions increasing capacity in the production and analysis of demographic information and in the availability of trained trainers who will eventually give training in demography, while 36 students attended the course, including 3 representing the University of Panama, which met the planned target reflected in the proposed programme budget for 2020.

### Proposed programme plan for 2022

18.157 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will increase the reach of the training to include participants from new countries. The expected progress is presented in the performance measure below (see table 18.12).

Table 18.12  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
A comprehensive regional course in demography is not available	A course in selected themes in demography is implemented; the modality for a new comprehensive regional course is developed (elaboration and development of the content and materials, institutional agreements with host country and cooperation funds, and call for and selection of participants)	National statistical offices and other relevant institutions increase their capacity in the production and analysis of demographic information, with 36 students mostly belonging to national statistical institutions attending the course, including 3 representing the University of Panama	Additional national statistical offices and other relevant institutions increase their capacity in the production and analysis of demographic information and the availability of trained trainers, increasing the accumulated impact of the course	National statistical offices and other relevant institutions increase their capacity to produce and analyse demographic information, participants from at least two new countries of the region are included

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: more countries have improved information to support policies to address migration in the region<sup>12</sup>**

### **Programme performance in 2020**

18.158 The subprogramme has supported countries of the region in identifying gaps in their statistical systems, provided technical assistance and facilitated the exchange of national experiences with a view to improving those systems and better informing public policymaking. The subprogramme has been promoting a coordinated perspective in order to include all public data sources, as well as the possible contribution of academia. The subprogramme has been consulting a broad spectrum of stakeholders, including civil society organizations, to better understand the situation of regional migrants and their contributions to development.

18.159 The above-mentioned work contributed to 12 countries presenting their first report on the implementation of the Global Compact for Migration and progress on chapter F of the Montevideo Consensus on Population and Development, which met the planned target reflected in the programme budget for 2021.

### **Proposed programme plan for 2022**

18.160 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will actively contribute to efforts to ensure regional participation in the global review of the implementation of the Global Compact for Migration, and in the discussion and exchange of experiences with respect to migration in Latin America and the Caribbean to improve public policies. The expected progress is presented in the performance measure below (see table 18.13).

Table 18.13  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Countries adopt the Global Compact for Safe, Orderly and Regular Migration, which complements the 2030 Agenda for Sustainable Development and the Montevideo Consensus on Population and Development	Countries prepare data and identify gaps for the first review of the implementation of the Global Compact for Safe, Orderly and Regular Migration	12 countries present their first report on the implementation of the Global Compact for Migration and progress on chapter F of the Montevideo Consensus	Countries have improved data to support the implementation and follow-up of the Global Compact for Migration (global review to be carried out in 2022) and the Montevideo Consensus (regional review to be carried out in 2022)	Countries of the region participate in the global review process with improved data

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

<sup>12</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

### Result 3: increased national capacities to prepare population estimates and projections at the subnational level

#### Proposed programme plan for 2022

18.161 Population estimates and projections are fundamental tools in public planning, management, and resource allocation. They represent the denominator of a large part of the monitoring indicators for the 2030 Agenda and, in the context of COVID-19, updated figures are required to focus actions. Although the region is heterogeneous, in general terms, challenges remain in the preparation of population estimates, especially with respect to the levels of disaggregation and frequency of updating. There is a deficit of trained specialists and methodological and technological resources to support the development of population estimates and projections. Historically, the subprogramme has focused on the national level when working in this area, but the demand for estimates and projections at the subnational level and other disaggregation has been growing. In that regard, technical assistance missions have been carried out to some countries in the region, birth and death records have been evaluated – basic inputs for this task – and pertinent technical material has been prepared.

#### *Lessons learned and planned change*

18.162 The lesson for the subprogramme was that there was an increased demand for microdata on births and administrative registries on user-friendly technological platforms to facilitate development and continuous updates, including methodological and technological improvements needed to ensure the accuracy of data collection. In applying the lesson, the subprogramme will implement the following activities to address those needs: technical assistance to the countries of the region, the development of microdata databases on vital statistics in REDATAM, training courses and the preparation of technical support material.

#### *Expected progress towards the attainment of the objective, and performance measure*

18.163 This work is expected to contribute to the objective, as demonstrated by the availability of updated population estimates and projections prepared by national technical teams strengthened at the national and subnational levels, or other disaggregation (see figure 18.XVII).

Figure 18.XVII

**Performance measure: total number of countries that updated their population estimates and projections at the national and subnational levels, or other disaggregation (cumulative)**

## Legislative mandates

18.164 The list below provides all mandates entrusted to the subprogramme.

### *General Assembly resolutions*

S-21/2	Key actions for the further implementation of the Programme of Action of the International Conference on Population and Development	70/157	Combating intolerance, negative stereotyping, stigmatization, discrimination, incitement to violence and violence against persons, based on religion or belief
59/174	Second International Decade of the World's Indigenous People	70/159	Globalization and its impact on the full enjoyment of all human rights
61/295	United Nations Declaration on the Rights of Indigenous Peoples	70/163	National institutions for the promotion and protection of human rights
65/198	Indigenous issues	70/164	Measures to enhance the promotion and protection of the human rights and dignity of older persons
68/134; 71/164	Follow-up to the Second World Assembly on Ageing		
68/151	Global efforts for the total elimination of racism, racial discrimination, xenophobia and related intolerance and the comprehensive implementation of and follow-up to the Durban Declaration and Programme of Action	70/166	Effective promotion of the Declaration on the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities
		70/179	Improving the coordination of efforts against trafficking in persons
68/179	Protection of migrants	71/165	Inclusive development for persons with disabilities
70/138	The girl child		
70/140	A global call for concrete action for the total elimination of racism, racial discrimination, xenophobia and related intolerance and the comprehensive implementation of and follow-up to the Durban Declaration and Programme of Action	71/177	Rights of the child
		71/178	Rights of indigenous peoples
		71/180	International Convention on the Elimination of All Forms of Racial Discrimination

### *Economic and Social Council decisions*

Decision 2012/232	Special session of the General Assembly on follow-up to the International Conference on Population and Development beyond 2014	Decision 2013/237	Report of the Commission on Population and Development on its forty-sixth session and provisional agenda for its forty-seventh session
-------------------	--	-------------------	--

### *Economic Commission for Latin America and the Caribbean resolutions*

569 (XXVII)	Latin American and Caribbean Demographic Centre-Population Division of ECLAC	657 (XXXIII); 670 (XXXIV)	Ad Hoc Committee on Population and Development of the Economic Commission for Latin America and the Caribbean
615 (XXXI)	International migration	681 (XXXV); 723 (XXXVII)	Regional Conference on Population and Development in Latin America and the Caribbean
644 (XXXII)	Population and development: priority activities for the period 2008–2010		

## Deliverables

18.165 Table 18.14 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 18.14

**Subprogramme 6: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>9</b>	–	<b>18</b>	<b>9</b>
1. Session of the Regional Conference on Population and Development in Latin America and the Caribbean	9	–	9	9
2. Meetings of the Presiding Officers of the Conference	–	–	9	–
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>1</b>	<b>1</b>	<b>1</b>	<b>1</b>
3. Field and technical cooperation projects in the areas of migration; socioeconomic impact of population dynamics; indigenous peoples and people of African descent; and ageing, taking a gender-sensitive approach	1	1	1	1
<b>Seminars, workshops and training events</b> (number of days)	<b>75</b>	<b>66</b>	<b>72</b>	<b>73</b>
4. Meetings of experts on demographic change and its consequences for development, including issues related to indigenous people and people of African descent; ageing-related issues, persons with disabilities and migrants; implementation of recommendations of the Regional Conference on Population and Development; and population censuses	10	8	8	5
5. Workshops on demographic analysis and projections; REDATAM <sup>a</sup> (information system on censuses); sociodemographic variables and emerging issues in development policies, programmes and projects; and population and development	21	14	16	20
6. Course on demographic analysis with a gender-sensitive approach	44	44	44	44
7. ECLAC office in Buenos Aires: courses on quantitative analytical methods and techniques	–	–	4	4
<b>Publications</b> (number of publications)	<b>10</b>	<b>10</b>	<b>9</b>	<b>8</b>
8. Publications on demography, and on population and development	3	3	3	3
9. Studies on demography and gender; demographic trends of indigenous people and people of African descent; trends of sociodemographic persons with disabilities; and population and development	7	7	5	5
10. ECLAC office in Buenos Aires: study on socioeconomic development in the provinces of Argentina	–	–	1	–
<b>Technical materials</b> (number of materials)	<b>3</b>	<b>3</b>	<b>3</b>	<b>3</b>
11. Studies and documents on population projection and censuses	1	1	1	1
12. Newsletters on ageing and development; and on REDATAM <sup>a</sup>	2	2	2	2
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> advice to member States, upon request, on population and development; data collection, demographic analysis and methodologies for population projections and estimates; REDATAM software for the processing, analysis and dissemination of census data; <sup>a</sup> incorporation of sociodemographic variables into development policies, programmes and projects, taking a gender-sensitive approach and considering specific groups; intergovernmental forums in the region on population and development issues; implementation of the Montevideo Consensus on Population and Development and the Regional Strategy for the Implementation in Latin America and the Caribbean of the Madrid International Plan of Action on Ageing, the 2030 Agenda for Sustainable Development, and the Global Compact for Safe, Orderly and Regular Migration.				
<b>Databases and substantive digital materials:</b> databases on demographic trends and population projections, spatial distribution and urbanization; indigenous and peoples of African descent, maternity and migration; REDATAM software for the processing, analysis and dissemination of census data; and platform to follow up on the implementation of the Montevideo Consensus on Population and Development.				
<b>D. Communication deliverables</b>				
<b>Digital platforms and multimedia content:</b> subprogramme's pages on the ECLAC website.				

<sup>a</sup> REDATAM is an acronym that stands for “retrieval of data for small areas by microcomputer”. REDATAM+SP (abbreviated R+SP) is the most recent version of the fourth generation of the software. It can be used in English, Portuguese or Spanish.

## **Subprogramme 7**

### **Sustainable development and human settlements**

#### **Objective**

18.166 The objective, to which this subprogramme contributes, is to ensure the integration and due consideration of environmental, climate and urban management concerns and opportunities in policymaking and policy implementation, with a rights-based approach and ensuring that no one is left behind.

#### **Strategy**

18.167 To contribute to the objective, the subprogramme will enhance knowledge of the region's economic, social and environmental profiles. It will continue to convene and involve Governments, academic institutions, civil society and other stakeholders to foster participatory decision-making. To support the integration of the aforementioned concerns in policymaking and policy implementation, the subprogramme will focus on two main types of activities: (a) assessing the advances made by countries in integrating sustainability criteria into public policies, including monitoring the implementation of principle 10 of the Rio Declaration on Environment and Development, as stated in the Regional Agreement on Access to Information, Public Participation and Justice in Environmental Matters in Latin America and the Caribbean (the Escazú Agreement), and providing support to the Forum of the Countries of Latin America and the Caribbean on Sustainable Development; and (b) strengthening national capacities to design and implement public policies for the sustainability of human settlements and the implementation of the 2030 Agenda, the New Urban Agenda and the intended nationally determined contributions under the Paris Agreement. The subprogramme will conduct these activities through research, resulting in the publication of studies, the organization of expert group meetings, seminars and workshops, and the provision of technical assistance to member States upon request. In that connection, and in the light of the support provided to Governments of the region to make progress towards the implementation of the 2030 Agenda and the attainment of the Sustainable Development Goals, the subprogramme will contribute most notably to Goals 11, 12, 13 (Take urgent action to combat climate change and its impacts), 15 (Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss) and 16.

18.168 The main beneficiaries under the subprogramme will be the decision-making authorities responsible for sustainable development and for human settlements. To involve all the relevant actors, the subprogramme will promote the creation of networks with a wide range of stakeholders in the environmental sphere and the economic and social sectors related to climate change, including government institutions, civil society organizations, private sector representatives and relevant sectoral bodies. To take advantage of synergies, the subprogramme will continue to hold consultations and undertake joint actions with the specialized agencies, funds and programmes of the United Nations system, including the resident coordinator system, the United Nations Environment Programme and the United Nations Human Settlements Programme (UN-Habitat), as well as with regional and subregional development banks.

18.169 The subprogramme plans to support member States on issues related to COVID-19 by providing support on designing economic recovery plans, in order to build back better, based on regional and national studies of specific economic sectors.

18.170 The above-mentioned work is expected to result in:

(a) Well-designed policies that take into account the three pillars of sustainable development, including policies for sustainable development and environmental performance, policies to address the economics of climate change and policies that support sustainable human settlement and inclusive cities;

(b) More effective mainstreaming of sustainable development and climate change issues into areas that extend beyond environmental institutions.

18.171 The planned support on issues related to COVID-19 is expected to result in the design of economic recovery plans in low-carbon economic sectors that create jobs and stimulate the economy.

## **Programme performance in 2020**

18.172 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Sustainable development paths: a big push for sustainability for middle-income countries within the framework of the 2030 Agenda in Latin America and the Caribbean**

18.173 Strategies, policies and planning instruments for sustainable development paths in pilot countries of the region were identified by the subprogramme on the basis of technical assistance requirements of member States and country readiness, to enable the necessary conditions for transformation to emission-reducing, resource-efficient and socially inclusive economic growth after the COVID-19 pandemic. The subprogramme provided analytical tools to support member countries in closing gaps in development, environmental degradation and territorial and social distribution in the form of proposals for a progressive structural change towards sectors with a lower carbon footprint (which is the core of the big push for sustainability), on the basis of a coherent reorientation of policies, investments, regulations and tax regimes. These policy changes are intended to reduce the environmental footprint of the economy, maintain and recover the productive capacity of natural capital and, at the same time, generate jobs and economic growth.

18.174 While certain regional activities that may facilitate a big push for sustainability were also implemented, the subprogramme focused its analysis on Brazil, Costa Rica, the Dominican Republic and Mexico, in areas such as bioeconomy, clean energy, decarbonization, sustainable urban mobility, climate change mitigation and climate change adaptation. The results of this analysis, as well as policy recommendations, were included in the document *Building a New Future: Transformative Recovery with Equality and Sustainability*, presented to ECLAC member States at the thirty-eighth session of the Commission, held in October 2020. In doing this, the subprogramme is in line with the international agenda for development, specifically the 2030 Agenda and its 17 Sustainable Development Goals, the Paris Agreement and the New Urban Agenda – three of the main international cooperation agreements currently in place.

#### *Progress towards the attainment of the objective, and performance measure*

18.175 The above-mentioned work contributed to the objective, as demonstrated by the discussion at the national level of strategies for a big push for sustainability in nine areas (see figure 18.XVIII). The documents prepared were discussed in relation to national and regional contexts, some being appropriated as tools to generate

discussion and even as national policies, such as the national bioeconomy strategy adopted by Costa Rica in 2020. Other examples were a seminar on a big push for sustainable mobility, held in Brasilia; an interministerial seminar with ministers responsible for the economy and territorial development, development banks and private stakeholders to discuss national production of electric vehicles for public transportation; the formation of a parliamentary committee of the Senate of Brazil on a big environmental push; participation in the Coalition for Urban Transitions with the World Resources Institute, the National Autonomous University of Mexico, the United Kingdom of Great Britain and Northern Ireland, UN-Habitat and other stakeholders in Mexico; a seminar on long-term strategies for climate action in the Dominican Republic with the Ministry of the Economy, Planning and Development, Central Bank officials and the Ministry of the Environment and Natural Resources; and a national workshop on aligning the nationally determined contribution of the Dominican Republic with policies, measures and actions on mitigation and adaptation in the electricity sector.

Figure 18.XVIII

**Performance measure: annual number of strategies for a big push for sustainability discussed at the national level**

### Impact of COVID-19 on subprogramme delivery

18.176 Owing to the impact of COVID-19 during 2020, the subprogramme changed the approach by focusing on studies and technical assistance oriented to support economic recovery through the development of a resilient urban economy. These changes had an impact on the programme performance in 2020, as specified in results 1 and 2 below.

18.177 At the same time, however, the subprogramme adapted activities to support member States on issues related to the COVID-19 pandemic, within the overall scope of its objectives, namely by focusing technical assistance and conducting national and regional studies to support the design of environmental, climate and urban policies that support economy recovery from the economic recession caused by the pandemic. The modified deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

### Planned results for 2022

18.178 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

## Result 1: ensure progress towards urban sustainability for climate action<sup>13</sup>

### Programme performance in 2020

18.179 The subprogramme provided technical and advisory services to local-level government officials focused on COVID-19-related recovery and resilience planning. Scoping exercises were conducted to support cities in developing a clear picture of the socioeconomic impact of the pandemic. The subprogramme also conducted region-wide information gathering of policies and measures adopted in the urban sphere in response to the pandemic. This repository of information is a resource to support decision makers in their planning.

18.180 The above-mentioned work contributed to the development of three city-level sustainable urban development plans in line with ECLAC recommendations, which did not meet the planned target of four reflected in the proposed programme budget for 2020, owing to the logistical and planning restraints of the COVID-19 pandemic, the change in local government priorities in the target cities and administrative changes in government, which resulted in a discontinuation of ongoing activities.

### Proposed programme plan for 2022

18.181 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will provide technical advisory services and capacity-building activities to member States to support authorities in developing new, and strengthening existing, sustainable urban development plans that incorporate the urban dimension of the 2030 Agenda and the New Urban Agenda. The expected progress is presented in the performance measure below (see figure 18.XIX).

Figure 18.XIX

**Performance measure: total number of cities developing new sustainable urban development plans (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

<sup>13</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 21)).

## Result 2: improved information available for city planning in Latin American and Caribbean countries<sup>14</sup>

### Programme performance in 2020

18.182 The subprogramme focused on designing the conceptual framework of the Latin American urban and cities platform and virtual urban and cities forum and developing the corresponding web-based instruments. Substantive content was gathered, compiled, analysed and uploaded to the platform, presenting analysis at both the national and city levels for a select number of countries and cities. The subprogramme also launched a virtual community in the forum and hosted its first virtual discussion.

18.183 The above-mentioned work contributed to the launch of the Latin American urban and cities platform and virtual forum, which met the planned target reflected in the programme budget for 2021.

### Proposed programme plan for 2022

18.184 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will work to expand in depth and breadth so as to include a greater number of content types and number of cities profiled. In 2022, it will work to produce content related to the six thematic areas identified in the development of the New Urban Agenda. The expected progress is presented in the performance measure below (see table 18.15).

Table 18.15  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
First steps in the development of the Latin American and Caribbean urban and cities platform	Design of the platform completed, and content developed	Pre-launch of the platform (World Urban Forum)  Launch of the platform at the Regional Forum of the Latin American and Caribbean Countries on Sustainable Development	Platform fully accessible with substantive content for each of the 33 Latin American and Caribbean countries	Member States have access to additional content on the platform, including for each of the 6 thematic areas addressed in the New Urban Agenda

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

<sup>14</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

### Result 3: big push for sustainability for a transformative and sustainable recovery in the context of the 2030 Agenda

#### Proposed programme plan for 2022

18.185 Well-developed and well-implemented policies towards a big push for sustainability for a transformative and sustainable recovery related to urban sustainable mobility and housing, the circular economy, nature-based solutions and green fiscal and investment policies, among other things, can provide the necessary jobs, economic growth and innovation while at the same time promoting a resilient, low-carbon economy and the implementation of the Sustainable Development Goals. The subprogramme has been identifying the economic sectors that should be prioritized in order to produce the desired outcomes and analysing their potential contribution at the regional and national levels to the sustainable development approaches advocated by ECLAC.

#### *Lessons learned and planned change*

18.186 The lesson for the subprogramme was that there is growing demand for concrete case studies to illustrate how to mainstream sustainable practices, in particular for recovery efforts in the wake of the COVID-19 pandemic, that can support national capacity and development action plans. In applying the lesson, the subprogramme will support the design of public policy strategies and/or policy instruments to comply with the 2030 Agenda and nationally determined contributions, at the national and subnational levels, and mainstream them into development and other action plans or regulatory instruments. The subprogramme will support Latin American and Caribbean countries in their transition towards a sustainable low-carbon economy, overcoming the negative effects of the pandemic and in line with the 2030 Agenda and nationally determined contributions, by providing evidence, discussion spaces and technical assistance.

#### *Expected progress towards the attainment of the objective, and performance measure*

18.187 This work is expected to contribute to the objective of a transformative recovery following the COVID-19 pandemic, as demonstrated by two additional countries in the region developing sustainable development strategies and/or policy instruments in line with the framework for sustainable development advocated by ECLAC (see table 18.16).

Table 18.16  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
—	Identification of selected sectors that drive sustainable development with low-carbon emissions	Member States have access to a comprehensive framework for a sustainable recovery	2 countries in the region develop sustainable development strategies and/or policy instruments	2 additional countries in the region develop sustainable development strategies and/or policy instruments

## Legislative mandates

18.188 The list below provides all mandates entrusted to the subprogramme.

### *General Assembly resolutions*

63/281	Climate change and its possible security implications	71/228	Protection of global climate for present and future generations of humankind
64/200	International Strategy for Disaster Reduction	71/229	Implementation of the United Nations Convention to Combat Desertification in Those Countries Experiencing Serious Drought and/or Desertification, Particularly in Africa
64/203	Convention on Biological Diversity		
67/205	Towards the sustainable development of the Caribbean Sea for present and future generations	71/230	Implementation of the Convention on Biological Diversity and its contribution to sustainable development
67/207	Follow-up to and implementation of the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States	71/231	Report of the United Nations Environment Assembly of the United Nations Environment Programme
69/15	SIDS Accelerated Modalities of Action (SAMOA) Pathway	71/235	Implementation of the outcome of the United Nations Conference on Housing and Sustainable Urban Development (Habitat III) and strengthening of the United Nations Human Settlements Programme (UN-Habitat)
69/283	Sendai Framework for Disaster Risk Reduction 2015–2030		
71/223	Implementation of Agenda 21, the Programme for the Further Implementation of Agenda 21 and the outcomes of the World Summit on Sustainable Development and of the United Nations Conference on Sustainable Development	71/256 75/224	New Urban Agenda Implementation of the outcomes of the United Nations Conferences on Human Settlements and on Housing and Sustainable Urban Development and strengthening of the United Nations Human Settlements Programme (UN-Habitat)
71/225	Follow-up to and implementation of the SIDS Accelerated Modalities of Action (SAMOA) Pathway and the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States		

### *Economic and Social Council resolutions*

2017/24	Human settlements
---------	-------------------

### *Economic Commission for Latin America and the Caribbean resolutions*

594 (XXIX)	World Summit on Sustainable Development	706 (XXXVI)	Application of Principle 10 of the Rio Declaration on Environment and Development in Latin America and the Caribbean
602 (XXX)	Monitoring sustainable development in Latin America and the Caribbean		
686 (XXXV)	Application of Principle 10 of the Rio Declaration on Environment and Development in Latin America and the Caribbean	725 (XXXVII)	Regional Agreement on Access to Information, Public Participation and Justice in Environmental Matters in Latin America and the Caribbean
693 (PLEN.30)	Application of Principle 10 of the Rio Declaration on Environment and Development in Latin America and the Caribbean	744 (XXXVIII)	Regional Agreement on Access to Information, Public Participation and Justice in Environmental Matters in Latin America and the Caribbean

### *United Nations Environment Assembly resolutions*

1/13	Implementation of Principle 10 of the Rio Declaration on Environment and Development	2/25	Application of Principle 10 of the Rio Declaration on Environment and Development in the Latin America and Caribbean Region
------	--	------	---

## Deliverables

18.189 Table 18.17 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 18.17

### Subprogramme 7: deliverables for the period 2020–2022, by category and subcategory

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>6</b>	<b>10</b>	<b>12</b>	<b>12</b>
1. Meetings of the General Assembly of Ministers and High-level Authorities of the Housing and Urban Development Sector in Latin America and the Caribbean	6	4	6	6
2. Meeting on the Regional Agreement on Access to Information, Public Participation and Justice in Environmental Matters in Latin America and the Caribbean	—	—	6	—
3. Meeting on the signatory countries to the Escazú Agreement	—	6	—	6
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>1</b>	<b>1</b>	<b>1</b>	<b>1</b>
4. Field projects on adaptation to climate change and mitigation of its impact	1	1	1	1
<b>Seminars, workshops and training events</b> (number of days)	<b>7</b>	<b>7</b>	<b>8</b>	<b>9</b>
5. Meetings of the expert groups on policies for sustainable development of human settlements and climate change; climate change mitigation and adaptation; environmental and urban dimensions of the 2030 Agenda; and experiences in implementing policies related to sustainable development in the region	4	4	4	5
6. Courses on sustainable development and/or environmental economics; climate change mitigation and adaption assessment and policies; human settlement issues; and strategies for the implementation of the intended nationally determined contributions	3	3	4	4
<b>Publications</b> (number of publications)	<b>8</b>	<b>8</b>	<b>8</b>	<b>11</b>
7. Studies on topics including climate change, sustainable development, environmental impact of public policies, carbon tax and low-carbon economy, green recovery policies, environmental fiscal policies, development scenarios in urban areas, sustainable consumption and production patterns, integration of public policies for sustainable development and institution-building, implementation of the New Urban Agenda with an inclusive gender perspective, and gas emissions and related public policies	8	8	8	11
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> advice to member States, upon request, on environmental public policies related to sustainable development and urban sustainability, risk reduction and adaption, and strengthening national capacities; provision of technical cooperation services to national Governments and institutions, at their request, on assessing the progress made towards achieving sustainable development.				
<b>Databases and substantive digital materials:</b> databases on sustainable development, climate change and urban issues.				

## Subprogramme 8 Natural resources

### Objective

18.190 The objective, to which this subprogramme contributes, is to improve the governance and enhance the sustainable use and exploitation of natural resources in Latin America and the Caribbean, focusing on water resources management,

affordable, inclusive and clean energy, extractive resources efficiency, food security, sustainable agriculture and biodiversity.

## Strategy

18.191 To contribute to the objective, the subprogramme will continue to support countries of the region in the design of policies to enable the implementation of a more renewable energy matrix and water sustainability, the accomplishment of the sustainable energy transition and the sustainable management of the water cycle. The subprogramme will provide technical assistance and disseminate best practices on the regulation, supply and sustainable use of water and renewable energy. It will support member States in making progress towards the attainment of Sustainable Development Goals 6 (Ensure availability and sustainable management of water and sanitation for all) and 7.

18.192 To further contribute to the objective, the subprogramme will carry out studies on the governance of fossil and mineral resources (extractive resources), taking into consideration issues and challenges relating to the collection and use of resource rents, material efficiency and decoupling. The subprogramme will provide technical assistance and support multi-stakeholder dialogue, within the framework of more sustainable governance of the extractive industries, to foster clusters and value addition in those activities and their linkages to the rest of the economy.

18.193 In addition, to contribute to the objective, the subprogramme will promote the bioeconomy and circular economy as new production development approaches for the sustainable utilization of biological resources and the valorisation of waste biomass, and will reinforce the coherence, integration and coordination of regional policies and institutions in agricultural development and biodiversity. The subprogramme will provide technical assistance, at the request of member States. This will support member States in making progress towards the achievement of Sustainable Development Goals 2, 13, 14 (Conserve and sustainably use the oceans, seas and marine resources for sustainable development) and 15.

18.194 The subprogramme plans to support member States on issues related to COVID-19 by creating awareness of the role and impacts related to energy and water poverty and lack of basic services (water and electricity), as well as the role of extractive industries during the post-pandemic phase. Also with a focus on the post-pandemic recovery, the subprogramme will support member States on issues of food security and the role of sustainable and resilient food systems (in particular in the context of the United Nations Food Systems Summit process), as well as the role of the bioeconomy for building back better and paving the way for a post-fossil resources society.

18.195 The above-mentioned work is expected to result in:

- (a) Improved access to clean and affordable energy and water;
- (b) Industrial cluster, value addition and linkage initiatives in the mineral and hydrocarbon sectors;
- (c) Enhanced design and implementation of bioeconomy-related policies and strategies for sustainable agricultural and rural development, and the conservation, knowledge and sustainable use of biodiversity.

18.196 The planned support on issues related to COVID-19 is expected to result in the strengthening of member States' diagnosis capabilities (e.g., water and energy access indicators, food security and food systems data, and contributions of the bioeconomy), aiming for better long-term planning and the development of evidence-based policies.

## Programme performance in 2020

18.197 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Reducing the impact of the COVID-19 pandemic on food systems and basic services, in particular for vulnerable groups

18.198 The subprogramme contributed to the response of ECLAC to the impact of COVID-19 pandemic as part of the actions carried out through the COVID-19 Observatory in Latin America and the Caribbean. In this regard, the subprogramme proposed a two-tiered food systems policy response to the pandemic. On the consumption side, and given the increase in poverty and food insecurity, the subprogramme proposed the implementation of a Bonus Against Hunger measure, consisting of monetary and in-kind food transfers to be provided to populations in extreme poverty to ensure their access to food during the most critical period of the pandemic. On the production side, the subprogramme proposed a set of investment policies to strengthen the resilience of the agrifood system in the countries of the region, with a focus on small-scale family agriculture. Some 20 countries of the region implemented or amplified policies against hunger in line with the proposals, implementing more than 55 measures during 2020. In addition, the subprogramme and the Food and Agriculture Organization of the United Nations, following their existing long-lasting collaboration on agriculture and food security, jointly published 16 bulletins on issues related to the impact of the pandemic on food systems in Latin America and the Caribbean, such as the supply of fresh foods, the agricultural labour market, financing, digitalization, avoiding food loss and waste, and changes in consumption patterns.

#### *Progress towards the attainment of the objective, and performance measure*

18.199 The above-mentioned work contributed to the objective, as demonstrated by 20 countries in Latin America and the Caribbean implementing or amplifying policies against hunger (see table 18.18).

Table 18.18  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
—	—	20 countries in Latin America and the Caribbean implemented or amplified policies against hunger

### Impact of COVID-19 on subprogramme delivery

18.200 In response to the pandemic, the subprogramme identified new activities to support member States on issues related to COVID-19, within the overall scope of its objectives. The subprogramme identified the impacts of electricity tariffs on access, and water and electricity insecurity and indicators; recognized the impacts of rising food prices and increasing poverty on food security and the role of resilient food systems in coping with the negative effects of the pandemic; and assessed the potential of the bioeconomy for the post-COVID-19 recovery. The new deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

## **Planned results for 2022**

18.201 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: Regional Observatory on Sustainable Energy for Latin America and the Caribbean<sup>15</sup>**

#### **Programme performance in 2020**

18.202 The subprogramme continued its work related to sustainable energy, in line with its mandate, assisting countries in enhancing their capacity to design and implement measures for sustainable and affordable energy. Under the Development Account project entitled “Regional Observatory on Sustainable Energies”, the subprogramme strengthened national capacities in renewable energies through the provision of technical assistance and webinars on related matters. Under the umbrella of the cooperation agreement between France and ECLAC, technical cooperation on energy efficiency was delivered to countries in the region. In this regard, a training course on the evaluation of national policies on energy issues was delivered, facilitating the improvement of those policies.

18.203 The above-mentioned work contributed to three additional measures being adopted by countries of the region towards the implementation of energy policies, which met the planned target of three additional measures reflected in the proposed programme budget for 2020. Panama launched its national energy transition agenda (resolution 4747), Argentina adopted new laws that promoted renewable energies and energy efficiency under new climate change policies (adoption of International Organization for Standardization standard 50.001) and Colombia adopted new laws to make the energy sector more innovative, more competitive and cleaner (*Official Journal*, 29 November 2020 (No. 51513)). Furthermore, Argentina, Cuba and Panama acknowledged the support received from the subprogramme in formulating public policies that foster the use of renewable energies.

#### **Proposed programme plan for 2022**

18.204 The subprogramme will continue the work related to the planned result, in line with its mandate, further developing the Regional Observatory on Sustainable Energy for Latin America and the Caribbean. To contribute to further progress towards the objective, the subprogramme will continue to strengthen national capacities to foster the deployment of sustainable energies in the region. The expected progress is presented in the performance measure below (see figure 18.XX).

---

<sup>15</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 21)).

Figure 18.XX

**Performance measure: total number of measures adopted by countries of the region towards the implementation of energy policies to achieve affordable, reliable, sustainable and modern energy for all (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: development of the regional potential for bioeconomy<sup>16</sup>**

### **Programme performance in 2020**

18.205 The subprogramme contributed to consolidating the role of ECLAC as a leading regional institution in the field of bioeconomy. The subprogramme provided substantive technical advice for the development of the national bioeconomy strategy of Costa Rica for 2020–2030, launched in August in the presence of the President, the Minister of Science, Technology and Telecommunications, the Minister of Agriculture and Livestock, the Minister of the Environment and Energy, the Minister of Economy, Industry and Commerce, the Vice-Minister of Science, Technology and Telecommunications, the Vice-Minister of Agriculture and Livestock and the Vice-Minister of Economy, Industry and Commerce. In December, Colombia launched its bioeconomy mission with the participation of the President, the Vice-President, the Minister of Education and the Minister of Science, Technology and Innovation. Support from ECLAC in the preparation of studies on waste biorefinery, biomass for energy purposes, digitalization in agriculture and pharmaceutical autonomy was recognized by the Ministry of Science, Technology and Innovation.

18.206 In addition, the subprogramme conducted technical research to support policy formulation regarding the role of the bioeconomy as an engine for the post-COVID-19 recovery in Costa Rica, for the development of a productive transformation recovery agenda, as part of the national bioeconomy strategy; and in Uruguay, for the development of the national sustainable bioeconomy strategy, which is expected to be launched in 2021.

18.207 The above-mentioned work contributed to three Latin American and Caribbean countries initiating the development of national bioeconomy strategies and bioeconomy-related initiatives, which met the planned target reflected in the programme budget for 2021.

### **Proposed programme plan for 2022**

18.208 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective and in response to recent developments related to the needs of the post-COVID-19 recovery,

<sup>16</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

the subprogramme's work will evolve not only to include the development of national bioeconomy strategies but also to support bioeconomy-related initiatives (e.g., policies, projects and prospective studies), especially those related to the valorisation of waste biomass, the development of bio-based products and digitalization in the agrifood system. The expected progress is presented in the updated performance measure below (see figure 18.XXI).

Figure 18.XXI

**Performance measure: total number of Latin American and Caribbean countries that have initiated the development of national bioeconomy strategies and bioeconomy-related initiatives (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: enhanced regional capacities for value addition and linkages in the mining sector**

#### **Proposed programme plan for 2022**

18.209 Over the past 20 years, mineral mining countries in the region have undertaken the reprimarization of their productive structures and lost a share of relatively higher value added segments of production, such as smelting and refining; therefore, there remains ample opportunity to expand manufacturing. During 2020, the subprogramme conducted a training course for officials of ministries responsible for mining on production linkages, provided technical assistance to the mining industry in Chile (in the Metropolitan and Atacama Regions) and undertook several case studies on value addition and innovation policies for copper and lithium in the Andean countries. In Peru, a technical mission on productive linkages in the mining sector was also carried out for the Ministry of Energy and Mines.

#### *Lessons learned and planned change*

18.210 The lesson for the subprogramme was that there was demand for and interest in having enhanced coordination and participation mechanisms for formulating policy guidelines and identifying specific projects to promote value addition and productive linkages in the mining sector. In applying the lesson, the subprogramme will promote multi-stakeholder dialogue and studies on productive linkages in the mining sector.

#### *Expected progress towards the attainment of the objective, and performance measure*

18.211 This work is expected to contribute to the objective, as demonstrated by the number of measures adopted by countries of the region to promote value addition and productive linkages in the mining sector (see figure 18.XXII).

Figure 18.XXII

**Performance measure: total number of measures adopted by countries of the region to promote value addition and productive linkages in the mining sector (cumulative)**

### Legislative mandates

18.212 The list below provides all mandates entrusted to the subprogramme.

#### *General Assembly resolutions*

62/98	Non-legally binding instrument on all types of forests	71/222	International Decade for Action, “Water for Sustainable Development”, 2018–2028
66/200	Protection of global climate for present and future generations of humankind	71/228	Protection of global climate for present and future generations of humankind
66/203	Report of the Governing Council of the United Nations Environment Programme on its twenty-sixth session	71/229	Implementation of the United Nations Convention to Combat Desertification in Those Countries Experiencing Serious Drought and/or Desertification, Particularly in Africa
66/205	Sustainable mountain development		
67/207	Follow-up to and implementation of the Mauritius Strategy for the Further Implementation of the Programme of Action for the Sustainable Development of Small Island Developing States	71/230	Implementation of the Convention on Biological Diversity and its contribution to sustainable development
67/215	Promotion of new and renewable sources of energy	71/245	Agriculture development, food security and nutrition
67/263	Reliable and stable transit of energy and its role in ensuring sustainable development and international cooperation	73/226	Midterm comprehensive review of the implementation of the International Decade for Action, “Water for Sustainable Development”, 2018–2028
69/177	The right to food	73/236	Ensuring access to affordable, reliable, sustainable and modern energy for all
70/198	Agricultural technology for sustainable development	73/253	Agriculture development, food security and nutrition
70/235	Oceans and the law of the sea		

#### *Economic and Social Council resolutions and decisions*

Decision 2004/233	United Nations Framework Classification for Fossil Energy and Mineral Resources	602 (XXX)	Monitoring sustainable development in Latin America and the Caribbean
2006/49	Outcome of the sixth session of the United Nations Forum on Forests	669 (XXXIV)	Activities of the Economic Commission for Latin America and the Caribbean in relation to follow-up to the Millennium Development Goals and implementation of the outcomes of the major United Nations conferences and summits in the economic, social and related fields
552 (XXVI)	Strengthening sustainable development in Latin America and the Caribbean		

## Deliverables

18.213 Table 18.19 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 18.19

### Subprogramme 8: deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>1</b>	<b>1</b>	<b>2</b>	<b>2</b>
1. Projects in the areas of energy, natural resources governance, the water-energy-food nexus and non-renewable natural resources; social equality; environmental sustainability; agrifood systems; and bioeconomy	1	1	2	2
<b>Seminars, workshops and training events</b> (number of days)	<b>11</b>	<b>11</b>	<b>15</b>	<b>15</b>
2. Meetings of experts on sustainable water and energy management; public policies linked to the governance of natural and extractive resources; environmental sustainability; agrifood systems; and bioeconomy	8	8	6	6
3. Training and courses for public and private sector officials involved in agriculture, bioeconomy water, renewable energy and the management of natural and non-renewable resources	3	3	9	9
<b>Publications</b> (number of publications)	<b>10</b>	<b>10</b>	<b>10</b>	<b>8</b>
4. <i>The Outlook for Agriculture and Rural Development in the Americas: A Perspective in Latin America and the Caribbean</i>	–	–	1	–
5. Studies on issues relating to water resources and the nexus with other sectors; energy integration; governance of natural resources; natural resources and development; extractive industries; biophysical trade; environmental sustainability; agrifood systems; and bioeconomy	8	8	9	8
6. Study on rural-urban partnerships in integrated territorial development strategies	1	1	–	–
7. Bulletin on emerging issues of interest for Latin American and Caribbean agriculture and/or rural territories (2020), in collaboration with the Food and Agriculture Organization of the United Nations and the Inter-American Institute for Cooperation on Agriculture	1	1	–	–
<b>Technical materials</b> (number of materials)	<b>2</b>	<b>2</b>	<b>1</b>	<b>2</b>
8. Newsletter of the Network for Cooperation in Integrated Water Resource Management for Sustainable Development in Latin America and the Caribbean	2	2	–	–
9. Bulletin on natural resources for sustainable development in Latin America and the Caribbean	–	–	1	2
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> advice to member States, upon request, on natural resources; and to business and trade promotion organizations and other key stakeholders on the design and implementation of policies and strategies for sustainable agricultural and rural development and bioeconomy.				

## Subprogramme 9

### Planning and public management for development

#### Objective

18.214 The objective, to which this subprogramme contributes, is to enhance planning and public management processes in the region for the advancement of equitable and sustainable development.

## Strategy

18.215 To contribute to the objective, the subprogramme will continue to promote the application of new methodologies, instruments and conceptual frameworks for planning and public management by Governments while fostering high-quality public investment and strong linkages between development and sector-based plans and budgets. It will also encourage cooperation, peer-to-peer learning and the sharing of experiences and good practices in planning and public management through the provision of technical cooperation services and training and by conducting applied research, all of which will help countries of the region to make progress towards the attainment of Sustainable Development Goals 11, 16 and 17.

18.216 The subprogramme plans to support member States on issues related to COVID-19 by enhancing regional capacities for building institutional resilience to cope with challenges posed by internal and external crises produced by natural disasters and/or human activities, such as pandemics, climate change impacts, social and political disruption and economic shocks.

18.217 The above-mentioned work is expected to result in:

- (a) Building of effective, inclusive and strategic institutions and planning processes that prioritize comprehensive development through medium- and long-term visions;
- (b) Reduced structural gaps by enhancing citizens' participation and accountability, and the strengthening of territorial governance, planning and management in public policy processes.

18.218 The planned support on issues related to COVID-19 is expected to result in strengthened capacities in Latin American and Caribbean institutions to withstand deep disruption and ensure continuity of basic services while enhancing preparedness and responsive, adaptive and transformational institutional capacities, at both the national and subnational levels.

## Programme performance in 2020

18.219 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Enhanced capacities in planning and public management for sustainable development**

18.220 The impact of COVID-19 required the subprogramme to reschedule activities and redesign the way in which it provides services to the countries of the region. An analysis undertaken by the subprogramme has strongly repositioned the relevance of planning and public management, in particular on linkages between short-, medium- and long-term measures, and policies for transparency and accountability of public expenditures to respond to the emergency caused by the pandemic and the recovery. The subprogramme adapted its operations by redesigning its technical assistance, training and applied research activities for contingent issues and exploring new working modalities, such as remote technical assistance and training.

18.221 The subprogramme also innovated in engaging with national counterparts to discuss and exchange experiences regarding the challenges faced by Governments in planning and public management in disruptive contexts such as the COVID-19 pandemic. This was made possible by strengthening the virtual networks developed by the subprogramme. Furthermore, the subprogramme could maintain its role as a convener of planning authorities and public investment systems of the region.

*Progress towards the attainment of the objective, and performance measure*

18.222 The above-mentioned work contributed to the objective, as demonstrated by the growing percentage of participants involved in virtual networks, technical assistance and training activities (see figure 18.XXIII).

Figure 18.XXIII

**Performance measure: annual growth of participants attending online activities organized by the subprogramme (percentage)**

**Impact of COVID-19 on subprogramme delivery**

18.223 Owing to the impact of COVID-19 during 2020, the subprogramme has either slowed down or reoriented previous technical cooperation priorities set by Governments to respond to the emergency. The subprogramme organized its work priorities (training, technical assistance and applied research) to be delivered mainly through online tools and services. Moreover, it focused on converting face-to-face training courses to online blended learning and translating training materials into English to have a stronger impact in Caribbean countries.

18.224 At the same time, however, the subprogramme identified new activities and approaches to support member States on issues related to the COVID-19 pandemic, within the overall scope of its objectives, namely topics such as planning for disaster risk reduction and institutional resilience and the provision of technical assistance and counterpart engagement through virtual means. The modified deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

**Planned results for 2022**

18.225 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

**Result 1: planning and public management tools for the territorialization and implementation of the Sustainable Development Goals<sup>17</sup>****Programme performance in 2020**

18.226 The subprogramme continued its work to contribute to the convergence of the 2030 Agenda with national development planning process tools through applied research, technical assistance and training activities. The subprogramme also focused its scope on developing tools for downscaling the Sustainable Development Goals and national goals

<sup>17</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 21)).

to the subnational level, contributing with inputs for the development of territorial strategies, follow-up and funding mechanisms. Furthermore, the subprogramme has developed tools for analysis and to provide inputs that contribute to the achievement of specific Goals such as those on open government (Goal 16), physical planning (Goal 11) and planning for disaster risk reduction and climate action (Goal 13).

18.227 The above-mentioned work contributed to 25 countries having integrated the implementation of the 2030 Agenda into their national planning tools, which exceeded the planned target of 20 countries reflected in the proposed programme budget for 2020.

### **Proposed programme plan for 2022**

18.228 The subprogramme will continue its work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to develop products within the Regional Observatory on Planning for Development, assess new dimensions and modules for enhancing the PlanBarometer, undertake applied research on emerging trends on planning and public management and conduct training to strengthen regional capacities on different strategic issues relating to planning for development and public management. The expected progress is presented in the performance measure below (see figure 18.XXIV).

Figure 18.XXIV

**Performance measure: total number of national strategies for the implementation of the 2030 Agenda (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 2: enhanced capacities for effective strategies for the achievement of national and subnational development goals in countries of the region within the framework of the 2030 Agenda<sup>18</sup>**

#### **Programme performance in 2020**

18.229 The subprogramme contributed to enhancing the capacities of national public officials and other stakeholders in the process of designing, implementing and following up on national and subnational development goals through training activities delivered mainly online. The subprogramme also provided services to strengthen capacities in participatory planning, gender-oriented planning and public leadership.

18.230 The above-mentioned work contributed to the design of an intersectoral territorial development strategy in Uruguay, the strengthening of capacities in results-based planning for achieving national development goals in Paraguay and the

<sup>18</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

preparation of inputs for a subregional development policy framework in Costa Rica, which met the planned target of addressing these topics in at least three countries reflected in the programme budget for 2021.

### Proposed programme plan for 2022

18.231 The subprogramme will continue the work related to the planned target, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will support the design and implementation of open government action plans at the subnational level in at least two countries and strengthen capacities to enhance national public investment systems for the achievement of sustainable development objectives. The expected progress is presented in the performance measure below (see table 18.20).

Table 18.20

### Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
<ul style="list-style-type: none"> <li>• Argentina initiates capacity-building in the territorialization of the 2030 Agenda and its convergence with planning processes</li> <li>• Agreements on the territorialization of the 2030 Agenda between the authority responsible for the follow-up and review of the implementation of the 2030 Agenda and subnational governments</li> </ul>	<ul style="list-style-type: none"> <li>• Argentina initiates capacity-building in approaches for the Sustainable Development Goals in subnational public planning in 2 provinces</li> <li>• Paraguay updates its national development plan to incorporate the 2030 Agenda</li> <li>• Uruguay pilots an assessment of the territorialization of the national development strategy in 1 municipality</li> </ul>	<ul style="list-style-type: none"> <li>• Uruguay designs an intersectoral strategy for the central region</li> <li>• Paraguay identifies financing mechanisms for the national development plan</li> <li>• Costa Rica applies PlanBarometer and identifies specific issues to implement regional development strategies</li> </ul>	<ul style="list-style-type: none"> <li>• Implementation of subnational development plans or strategies in at least 2 additional countries</li> <li>• Application of a methodology for comprehensive results-based management in at least 2 additional countries</li> </ul>	<ul style="list-style-type: none"> <li>• Implementation of subnational open government action plans in at least 2 countries</li> <li>• National public investment plan integrates Sustainable Development Goals framework into assessment tools in at least 1 country</li> </ul>

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: building institutional resilience to face internal and/or external shocks

### Proposed programme plan for 2022

18.232 The COVID-19 pandemic, climate change, natural disasters and political dynamics in the region have highlighted the importance of the capability of institutions to survive shocks and ensure continuity of their most basic functions. The subprogramme has been analysing the importance of planning and public management and the fundamental role of public institutions for emergency and recovery responses. The capacities of the institutions can be critical in overcoming internal and/or external shocks. The subprogramme plans to support public institutions to enhance planning skills capacity to link short-term emergency responses with long-term policies, and to complement existing coordination, with

strengthened coordination across stakeholders, sectors and various government levels before, during and after internal and/or external shocks.

*Lessons learned and planned change*

18.233 The lesson for the subprogramme was that there was increased demand to develop new approaches for strengthening capacities and tools to provide an anticipatory capacity to identify, assess and address the vulnerabilities of the institutions in order to effectively deal with major disruptions and adapt optimally to the evolving circumstances. In applying the lesson, the subprogramme will contribute with new approaches to building institutional resilience in Latin American and Caribbean countries.

*Expected progress towards the attainment of the objective, and performance measure*

18.234 This work is expected to contribute to the objective, as demonstrated by three countries adopting approaches for building institutional resilience and strengthening institutional resilience capacities in their national planning and public management systems (see table 18.21).

Table 18.21  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
—	—	Planning authorities of the region address the importance of building institutional resilience and request the subprogramme to develop an analytical framework that contributes to building institutional resilience	Planning authorities and technical teams identify and address the main issues for building institutional resilience	3 countries adopt approaches for building institutional resilience and strengthening institutional resilience capacities in their national planning and public management systems

## Legislative mandates

18.235 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolutions*

67/218	Promoting transparency, participation and accountability in fiscal policies	73/239	Implementation of the outcomes of the United Nations Conferences on Human Settlements and on Housing and Sustainable Urban Development and strengthening of the United Nations Human Settlements Programme (UN-Habitat)
69/327	Promoting inclusive and accountable public services for sustainable development		
71/327	The United Nations in global economic governance		

*Economic and Social Council resolutions*

2016/26	Report of the Committee of Experts on Public Administration on its fifteenth session	2018/12	Report of the Committee of Experts on Public Administration on its seventeenth session
2017/23	Report of the Committee of Experts on Public Administration on its sixteenth session		

*Economic Commission for Latin America and the Caribbean resolutions*

701 (XXXVI)	Support for the work of the Latin American and Caribbean Institute for Economic and Social Planning (ILPES)	740 (XXXVIII)	Support for the work of the Latin American and Caribbean Institute for Economic and Social Planning (ILPES)
-------------	---	---------------	---

## Deliverables

18.236 Table 18.22 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 18.22

### Subprogramme 9: deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Substantive services for meetings</b> (number of three-hour meetings)	6	6	6	6
1. Meetings of the Regional Council for Planning	–	–	6	–
2. Meetings of the Presiding Officers of the Regional Council for Planning	6	6	–	6
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	1	1	1	1
3. Field projects on development planning and public management for development	1	1	1	1
<b>Seminars, workshops and training events</b> (number of days)	54	54	53	53
4. Learning and e-learning courses on public management systems and practices, budgeting, evaluation and public investment; foresight and scenario planning techniques; multiscale and territorial governance, planning and management; planning, public value and public administration/management in cross-cutting and emerging issues; and public policies and programmes	50	50	50	50
5. Meetings of experts on planning and public management (foresight and planning; evaluation of public policies and programmes; multiscale and territorial governance; planning and development systems and institutions; and public value, public administration and open government policies in the region)	4	4	3	3
<b>Publications</b> (number of publications)	3	3	3	3
6. Publications and studies on planning and public management for development	3	3	3	3
<b>Technical materials</b> (number of materials)	1	1	1	1
7. Infographics, policy briefs and newsletters on planning and public management for development	1	1	1	1
<b>C. Substantive deliverables</b>				

**Consultation, advice and advocacy:** advice to member States, upon request, on planning for development systems and institutions and integrated public management systems and practices, public policies and programmes, project formulation and evaluation, national systems for public investment, and multilevel governance and planning; cross-cutting programming, such as gender mainstreaming and stakeholder engagement, open government, data revolution and e-government, and planning for resilience; and strengthening national capacities to assess progress towards better planning, budgeting and implementation of government policies.

**Databases and substantive digital materials:** Regional Observatory of Planning for Development in Latin America and the Caribbean; technical manuals and software that support training (in situ and e-learning) and technical assistance activities; and databases on planning and public management for development in Latin America and the Caribbean.

## Subprogramme 10 Statistics

### Objective

18.237 The objective, to which this subprogramme contributes, is to improve the production, dissemination and use of statistics for evidence-based decision-making in the region.

### Strategy

18.238 To contribute to the objective, the subprogramme will provide specialized advisory services and online and in situ training courses, expert meetings and seminars. Technical assistance will focus on the development of basic statistics and institutional coordination mechanisms in areas that include national accounts, basic economic statistics and price statistics; environmental statistics, climate change and disaster risk reduction statistics; household survey design and implementation; poverty and inequality measurement; integration of statistical and geospatial information systems; and national coordination mechanisms for Sustainable Development Goal monitoring. Special emphasis will be placed on coordination with agencies and international organizations to avoid the duplication of efforts and maximize the complementarity of activities.

18.239 To further contribute to the objective, the subprogramme will continue to compile and harmonize a large number of economic, environmental and social statistics and indicators, as well as its regional household survey databank (BADEHOG). Dissemination will be undertaken through CEPALSTAT (the main ECLAC statistical database), the Statistical Yearbook and the regional Sustainable Development Goal gateway. In addition, the subprogramme will develop, adapt, translate and implement statistical methodologies, standards and recommendations. It will also contribute analytical and substantive inputs to ECLAC flagship publications and documents.

18.240 In addition, to contribute to the objective, the subprogramme will reinforce the strategic and decision-making role of the Statistical Conference of the Americas of ECLAC. The subprogramme will continue to provide technical secretariat services to the Conference and its various working groups, ensuring that their work is consistent with regional priorities. In addition, it will emphasize the joint implementation of projects and initiatives and work in close cooperation with other ECLAC offices and divisions, as well as bilateral and multilateral partners.

18.241 The subprogramme plans to support member States on issues related to COVID-19 by encouraging the development and adoption of more resilient methodologies for data collection and the production of statistics, such as strengthening the use of administrative records and non-traditional data sources, adopting new modes of data collection and the integration of different data sources, and building capacity in nowcasting methods.

18.242 The above-mentioned work is expected to result in:

(a) Production of reliable economic, social and environmental statistics and new indicators in emerging areas and the improvement of non-traditional sources of information;

(b) Increased availability of regionally comparable data, which are required as a benchmark for regional statistical development and as an input to major ECLAC publications and recommendations;

(c) Greater regional coordination, leading to increased use of statistics at the regional and national levels.

18.243 The planned support on issues related to COVID-19 is expected to result in increased capacities in member countries for the continued production of statistics in situations similar to the COVID-19 pandemic.

### **Programme performance in 2020**

18.244 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Supporting countries to ensure continuity of statistical production during the COVID-19 pandemic**

18.245 Since the beginning of the health emergency relating to the COVID-19 pandemic, national statistical offices have had to interrupt abruptly the collection of primary information for many of their statistical operations. The subprogramme conducted two questionnaires to monitor the state of statistical operations in countries of the region and collaborated actively with them to guarantee the continuity of statistical operations. The subprogramme published recommendations on conducting household surveys, calculating the consumer price index and compiling statistics on national accounts, the balance of payments and foreign trade, in the circumstances presented by the pandemic.

18.246 The subprogramme also held around 20 virtual meetings to exchange experiences with national statistical offices and other producers of official statistics and geospatial data to support the continuity of statistical operations. Most were conducted as joint initiatives with international, regional and national organizations and were disseminated through the Knowledge Transfer Network of the Statistical Conference of the Americas. Furthermore, the subprogramme provided technical support to 14 countries of the region to address the technical challenges derived from the disruptions caused by the pandemic to statistical operations.

#### *Progress towards the attainment of the objective, and performance measure*

18.247 The above-mentioned work contributed to the objective, as demonstrated by the total number of countries in the region that have taken action to ensure continuity of statistical production during the COVID-19 pandemic (see figure 18.XXV).

Figure 18.XXV

**Performance measure: total number of countries in the region that have taken action to ensure the continuity of statistical production during the COVID-19 pandemic**

### **Impact of COVID-19 on subprogramme delivery**

18.248 Owing to the impact of COVID-19 during 2020, the subprogramme changed the approach to seminars and meetings, converting them to online events. The subprogramme also provided support for the continuity of statistical operations, by implementing a regional questionnaire, publishing recommendations, hosting webinars for sharing experiences and recommendations and providing direct technical assistance.

### **Planned results for 2022**

18.249 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: timelier purchasing power parity estimates for a more reliable measurement of Latin American and Caribbean economies<sup>19</sup>**

#### **Programme performance in 2020**

18.250 The subprogramme completed the results for the 2017 cycle for the Latin American and Caribbean region, contributing to the compilation of purchasing power parity estimates at the global level. The subprogramme also produced subregional results for the reference year 2017 for Latin America and the Caribbean and a report containing methodology and detailed results to promote their use in policymaking. Furthermore, the subprogramme started the activities for the 2021 cycle in the region using a rolling survey to regularly produce purchasing power parity estimates that are highly useful for international comparisons.

18.251 The above-mentioned work contributed to 36 countries implementing the rolling benchmark, which did not meet the planned target of 40 participating member States and associate member States implementing the rolling benchmark reflected in the proposed programme budget for 2020. This is because two countries left the Latin America and Caribbean group to be incorporated into the Organisation for Economic Co-operation and Development region (Colombia and Costa Rica), and two countries (Guatemala and Venezuela (Bolivarian Republic of)) were not able to participate in the 2017 cycle, resulting in 36 countries.

<sup>19</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 21)).

### Proposed programme plan for 2022

18.252 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will be enhanced by a workplan agreed with the participating economies and a closer follow-up of the data compiled. More sub regional and country meetings are planned to give better support to the focal points on national accounts and price statistics. The number of target countries has been revised downwards, and the goal is to include 34 economies for the 2021 cycle of the International Comparison Programme. The lower number takes into consideration the situations described in the preceding paragraph, in addition to the new restrictions posed by challenges relating to the COVID-19 pandemic and population census rounds in some member and associate member States. The expected progress is presented in the performance measure below (see figure 18.XXVI).

Figure 18.XXVI

**Performance measure: annual number of member States and associate member States implementing the rolling benchmark**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 2: revamped ECLAC regional statistical portal (CEPALSTAT)<sup>20</sup>

#### Programme performance in 2020

18.253 The statistical database system that supports the core functionalities of CEPALSTAT was developed many years ago using technological approaches that, by today's standards, are quite obsolete and need refreshing on the basis of new solutions on the market under an open-source perspective. In this regard, the subprogramme has taken the proper steps to update the technology that supports several components of the CEPALSTAT statistical database system, renewing the internal architecture, including the design of a new decoupled structure in three layers (back-end, applications and front-end), which improve not only the performance of internal processes, but also the implementation of United Nations cybersecurity standards in an efficient way and the response speed for external users, making the experience of using CEPALSTAT more friendly. The subprogramme has also started to integrate a geospatial solution and functionality for regional statistics, which allows the available statistical information to be visualized in a georeferenced way, facilitating the territorial analysis for external users. Furthermore, the subprogramme has worked on a renewed portal front-end design, which facilitates access to the statistical online functionalities.

<sup>20</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

18.254 The above-mentioned work contributed to an increase in the percentage of users who consider CEPALSTAT data useful for their work to 85 per cent, which exceeded the planned target of at least 70 per cent reflected in the programme budget for 2021.

#### **Proposed programme plan for 2022**

18.255 The subprogramme will continue the work related to revamping the ECLAC regional statistical portal, in line with its mandate. To contribute to further progress towards the objective and in response to recent developments, the subprogramme will evolve to include additional statistical information at the subnational level, which will allow an increase in territorial analysis following the integration of both statistical and geospatial information. The expected progress is presented in the updated performance measure below (see figure 18.XXVII).

Figure 18.XXVII

**Performance measure: percentage of users who consider CEPALSTAT data useful for their work**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: strengthened capacities of Latin American and Caribbean countries to produce relevant environment, climate change and disaster indicators**

#### **Proposed programme plan for 2022**

18.256 The Latin America and Caribbean region is highly vulnerable to the negative consequences of climate change, in particular through rising temperatures, diminishing water stocks, increasing sea-level rise and soil degradation and the impact of extreme events and natural disasters, including for small island developing States of the Caribbean. In responding to this challenge, there is growing demand from member States for increased availability of national environment, climate change and disaster statistics and indicators to inform evidence-based policies and monitor internationally agreed goals such as the Sustainable Development Goals. The subprogramme has focused on hands-on learning including all stakeholders, using official national data, mostly in Latin America. In the wake of the COVID-19 pandemic, modalities of training and technical assistance were strategically revamped and adapted through an innovative, nationally prioritized combination of capacity-building content and tools to support member States. Building on a pilot experience for Panama that was conducted and assessed in late 2020, a new hybrid or blended module approach was developed, based on a tailor-made approach to capacity-building, with nationally prioritized specific content and a combination of pedagogical resources and participatory tools.

*Lessons learned and planned change*

18.257 The lesson for the subprogramme was the increased demand for adjusting capacity-building activities to support remote delivery. In applying the lesson, the subprogramme will implement the upgraded modalities of training and technical assistance to maximize and sustain the participation and retention of active national stakeholders. This will include developing a self-paced and piloted distance learning introductory course, a series of weekly synchronous webinars based on questions and comments from national participants, remote exercises guided by tutors, interviews with participants and remote tests and surveys.

*Expected progress towards the attainment of the objective, and performance measure*

18.258 This work is expected to contribute to the objective, as demonstrated by an increased number of trained practitioners from national statistical offices and relevant line ministries that acknowledge that they have strengthened skills to produce relevant environment, climate change and disaster statistics and indicators on a continuous basis (see figure 18.XXVIII).

Figure 18.XXVIII  
**Performance measure: total number of national trained practitioners that acknowledge that they have strengthened their skills to produce relevant internationally agreed environment, climate change and disaster statistics (cumulative)**

**Legislative mandates**

18.259 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolutions*

67/148	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly	68/261	Fundamental Principles of Official Statistics
--------	--	--------	---

*Economic and Social Council resolutions and decisions*

2000/7	Establishment of the Statistical Conference of the Americas of the Economic Commission for Latin America and the Caribbean	2016/27	Strengthening institutional arrangements on geospatial information management
2006/6	Strengthening statistical capacity	2017/7	Work of the Statistical Commission pertaining to the 2030 Agenda for Sustainable Development
2013/21	Fundamental Principles of Official Statistics		
Decision 2014/219	Report of the Statistical Commission on its forty-fifth session and the provisional agenda and dates for the forty-sixth session of the Commission		

*Economic Commission for Latin America and the Caribbean resolutions*

649 (XXXIII); 668 (XXXIV); 678 (XXXVI); 702 (XXXVI); 721 (XXXVII)	Statistical Conference of the Americas of the Economic Commission for Latin America and the Caribbean	712 (XXXVI)	Regional integration of statistical and geospatial information
---	---	-------------	--

**Deliverables**

18.260 Table 18.23 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 18.23

## Subprogramme 11

### Subregional activities in Central America, Cuba, the Dominican Republic, Haiti and Mexico

#### Objective

18.261 The objective, to which this subprogramme contributes, is to improve the formulation of evidence-based public policies in the economic, social and environmental fields in the countries of the subregion.

#### Strategy

18.262 To contribute to the objective, the subprogramme will support the implementation of national development agendas and strategic reforms towards generating economic and social impacts, and social compacts for equality benefitting the most vulnerable populations. The focus of the subprogramme is on the countries of Central America, Cuba, the Dominican Republic, Haiti and Mexico. Special emphasis will be placed on economic and social development, international trade, industry and integration, agriculture, food security and rural development, energy and natural resources, and climate change, thus contributing to Sustainable Development Goals 1, 2, 7, 8, 10, 13 and 17.

18.263 Under the subprogramme, analytical work will be undertaken to foster the generation, dissemination and implementation of innovative and sound approaches to address the subregion's development challenges, with a view to strengthening national and subregional capacities to formulate more integrated and coherent policies, taking into full consideration the different national contexts in the subregion. The subprogramme will continue to strengthen its multisectoral and interdisciplinary approach, maintaining and updating relevant databases and developing quantitative and qualitative analytical models. The provision of training activities, advisory services and fellowships and the organization and promotion of forums by the subprogramme will facilitate policy dialogue and contribute to strengthening the institutional capacity. The main beneficiaries of the subprogramme will be government authorities and officials, civil society, academic institutions and the business community, as well as subregional entities, such as those involved in the Central American Integration System. The subprogramme will also actively collaborate with the United Nations resident coordinator system and United Nations

country teams in the subregion, providing inputs for the formulation of the United Nations Sustainable Development Cooperation Frameworks.

18.264 The subprogramme plans to support member States on issues related to COVID-19 by conducting research and delivering technical advice oriented to measuring the impact of the pandemic and to designing and implementing public policy for socioeconomic recovery.

18.265 The above-mentioned work is expected to result in increased technical capacity to design, implement and evaluate public policies, including those focused on fiscal matters, trade and integration, energy, agriculture, food security, social protection and climate change.

18.266 The planned support on issues related to COVID-19 is expected to result in strengthened institutional capacity to measure the impacts of the pandemic and to design and implement public policies oriented to the socioeconomic recovery from those impacts, with an approach aimed at building back better.

### **Programme performance in 2020**

18.267 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

#### **Strengthened technical capacity for policies to address the pandemic**

18.268 The pandemic has affected all activities of member States: first, as a health crisis with as significant impact on vulnerable populations; and, subsequently, as an economic crisis. The subprogramme addressed member States' requests for support by identifying policy alternatives to alleviate the impact of the pandemic on vulnerable populations and on the economies of the region.

18.269 The subprogramme made efforts to research and identify policy proposals to strengthen the capacity of countries to respond to the pandemic in areas such as the economic reactivation of particularly affected sectors, impact evaluations and policies to reverse the impact on affected populations. For example, Costa Rica and Mexico requested technical assistance to identify the impact of the pandemic on older persons; based on input-output tables, the subprogramme delivered policy recommendations for economic reactivation for the ministries responsible for the economy in Costa Rica and El Salvador.

#### *Progress towards the attainment of the objective, and performance measure*

18.270 The above-mentioned work contributed to the objective, as demonstrated by 13 national and 2 regional institutions that have strengthened their technical capacities to develop and implement public policies in the context of the pandemic as a result of the subprogramme's efforts on research, capacity-building and technical advice (see table 18.24).

Table 18.24

**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>
—	—	2 regional institutions, namely the Central American Integration System in energy and the Central American Tourism Integration secretariat in tourism, and 13 national institutions, including those dealing with rights of older persons, energy and trade, have strengthened their technical capacities to develop and implement public policies in the context of the pandemic

**Impact of COVID-19 on subprogramme delivery**

18.271 Owing to the impact of COVID-19 during 2020, the subprogramme changed all its activities, including workshops and seminars, to an online approach (with technological and pedagogical changes). Some of the themes for planned courses were adjusted to reflect the new priorities of member States related to the pandemic.

18.272 At the same time, however, the subprogramme identified new activities to support member States on issues related to the COVID-19 pandemic, within the overall scope of its objectives, namely by delivering courses and technical advice, upon request, to address the impact of the pandemic on the economy, energy and specific vulnerable groups. The new deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

**Planned results for 2022**

18.273 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

**Result 1: strengthening institutions for policy coherence within an integrated approach towards implementation of the 2030 Agenda<sup>21</sup>****Programme performance in 2020**

18.274 The subprogramme has supported the process of developing the Central American Sustainable Energy Strategy 2030, an example of coherence between national and regional energy strategies. The subprogramme proposed an inclusive road map, taking advantage of the complementarities and synergies between countries, in order to achieve Sustainable Development Goal 7 by 2030, and at the same time ensuring that the energy sector contributes to the economic, social and environmental sustainability of development, specifically to each of the other 16 Goals. Furthermore, the subprogramme led the approval process of the regional strategy in the first half of 2020.

<sup>21</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 21)).

18.275 The above-mentioned work contributed to eight national institutions and one regional institution having aligned their plans and strategies with the 2030 Agenda, which exceeded the planned target of three reflected in the proposed programme budget for 2020.

### **Proposed programme plan for 2022**

18.276 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will assist in the alignment of plans and strategies of national and regional institutions with the 2030 Agenda, in line with ECLAC recommendations. The expected progress is presented in the performance measure below (see figure 18.XXIX).

Figure 18.XXIX

**Performance measure: annual number of national institutions in the subregion that have aligned their plans and strategies with the 2030 Agenda in line with recommendations of the Economic Commission for Latin America and the Caribbean**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: strengthened technical dialogue for new development strategies in Central America<sup>22</sup>**

### **Programme performance in 2020**

18.277 The subprogramme has contributed to the improved formulation of evidence-based public policies in the economic fields in the Dominican Republic, El Salvador and Guatemala. The subprogramme also seeks to strengthen institutional capacities to focus on better investment opportunities. For example, a study was carried out on the challenges and opportunities to promote investment by the Salvadoran diaspora in their communities of origin. The results and policy recommendations were presented to the Minister of the Economy, the Minister for Foreign Affairs and the President of the Central Bank. A document summarizing the main findings and proposed strategies was published.

18.278 The above-mentioned work contributed to three countries developing studies on investment opportunities, which met the planned target of three countries with studies on growth, investment and productivity reflected in the programme budget for 2021.

<sup>22</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

### Proposed programme plan for 2022

18.279 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective and in response to recent developments, the subprogramme will evolve to include studies on economic, social and environmental structural gaps, which include growth, investment, productivity, social protection, health, education and nutrition. The expected progress is presented in the performance measure below (see figure 18.XXX).

Figure 18.XXX

**Performance measure: annual number of countries with studies on growth, investment and productivity**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: strengthened institutional capacities for designing public investments that incorporate disaster risk reduction and sustainable and inclusive adaptation to climate change

#### Proposed programme plan for 2022

18.280 According to research, Central America is one of the region's most vulnerable and exposed to the effects of climate change. For example, ECLAC estimates, using the loss and damage assessment methodology, that Honduras lost 79.9 per cent of its GDP owing to the impact of Hurricane Mitch.

18.281 The subprogramme, with its national and regional partners, has developed an applied integrated approach to disaster risk reduction and sustainable and inclusive adaptation to climate change by integrating mitigation measures as co-benefits. The subprogramme is working with national and regional institutions to implement this approach in various sectors, especially for green fiscal policies and public investment in key sectors for the 2030 Agenda, such as health, education, water and sanitation, productive sectors and energy.

#### *Lessons learned and planned change*

18.282 The lesson for the subprogramme was the increased demand for directly involving project designers in the sectors prioritized in each country in order to implement an integrated approach to disaster risk reduction and sustainable and inclusive adaptation to climate change. The subprogramme, with institutions responsible for national public investment systems, has conducted situational diagnoses and prepared high-level operational plans to improve national public investment by better integrating disaster risk reduction and sustainable and inclusive climate change adaptation. In applying this lesson, the subprogramme, jointly with

those institutions, will utilize the situational diagnoses and high-level operational plans to inform multi-stakeholder working groups, including ministries responsible for the environment, risk management systems and meteorological institutes, to integrate their knowledge and explore opportunities to replicate the approach and lessons in other countries. On the basis of these engagements, the subprogramme will strengthen methodological guides for the design of public investment projects, training with a “learning by doing” approach with teams designing real projects for the use of national and regional geographic information systems platforms in designing public investment projects.

*Expected progress towards the attainment of the objective, and performance measure*

18.283 This work is expected to contribute to the objective by integrating measures for disaster risk reduction and the sustainable and inclusive adaptation to climate change into the life cycle of public investment projects, as demonstrated by the number of countries with strengthened public investment systems integrating disaster risk reduction and adaptation to climate change into project design (see figure 18.XXXI).

Figure 18.XXXI

**Performance measure: annual number of countries with public investment systems strengthening project design with disaster risk reduction and sustainable and inclusive adaptation to climate change in at least one sector**

## Legislative mandates

18.284 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolutions*

67/12	Cooperation between the United Nations and the Latin American and Caribbean Economic System	68/234	Towards global partnerships: a principle-based approach to enhanced cooperation between the United Nations and all relevant partners
67/144	Intensification of efforts to eliminate all forms of violence against women	69/16	Programme of activities for the implementation of the International Decade for People of African Descent
68/207	Sustainable tourism and sustainable development in Central America	69/151	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly
68/220	Science, technology and innovation for development	69/187	Migrant children and adolescents
68/222	Development cooperation with middle-income countries		

69/202	The role of the United Nations in promoting a new global human order		and of the United Nations Conference on Sustainable Development
69/225	Promotion of new and renewable sources of energy	71/228	Protection of global climate for present and future generations of humankind
69/277	Political declaration on strengthening cooperation between the United Nations and regional and subregional organizations	71/233	Ensuring access to affordable, reliable, sustainable and modern energy for all
70/147	Protection of migrants	71/235	Implementation of the outcome of the United Nations Conference on Housing and Sustainable Urban Development (Habitat III) and strengthening of the United Nations Human Settlements Programme (UN-Habitat)
71/101 A	Information in the service of humanity		Towards a New International Economic Order
71/164	Follow-up to the Second World Assembly on Ageing	71/236	International migration and development
71/178	Rights of indigenous peoples	71/237	Follow-up to the Fourth United Nations Conference on the Least Developed Countries
71/186	Human rights and extreme poverty	71/238	Second United Nations Decade for the Eradication of Poverty (2008–2017)
71/190	Promotion of a democratic and equitable international order	71/241	Industrial development cooperation
71/191	The right to food	71/242	South-South cooperation
71/216	External debt sustainability and development	71/244	Agriculture development, food security and nutrition
71/223	Implementation of Agenda 21, the Programme for the Further Implementation of Agenda 21 and the outcomes of the World Summit on Sustainable Development	71/245	

#### *Economic and Social Council resolutions*

2004/52	Long-term programme of support for Haiti	2014/7	Further implementation of the Madrid International Plan of Action of Ageing, 2002
2011/5	The role of the United Nations system in implementing the internationally agreed goals and commitments in regard to gender equality and the empowerment of women	2014/11	Follow-up to the International Conference on Financing for Development
2012/30	Role of the Economic and Social Council in the integrated and coordinated implementation of and follow-up to the outcomes of the major United Nations conferences and summits, in the light of relevant General Assembly resolutions, including resolution 61/16	2016/8	Rethinking and strengthening social development in the contemporary world
		2016/15	Programme of Action for the Least Developed Countries for the Decade 2011–2020
		2017/9	Mainstreaming a gender perspective into all policies and programmes in the United Nations system
2014/5	Promoting empowerment of people in achieving poverty eradication, social integration and full employment and decent work for all	2017/22	Science, technology and innovation for development

#### *Economic Commission for Latin America and the Caribbean resolutions*

552 (XXVI)	Strengthening sustainable development in Latin America and the Caribbean	653 (XXXIII)	Follow-up to the Plan of Action for the Information Society in Latin America and the Caribbean
615 (XXXI)	International migration	666 (XXXIV)	San Salvador resolution
624 (XXXI)	Support for the United Nations Stabilization Mission in Haiti	687(XXXV)	The regional dimension of the post-2015 development agenda

## **Deliverables**

18.285 Table 18.25 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 18.25

**Subprogramme 11: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>1</b>	<b>1</b>	<b>1</b>	<b>2</b>
1. Field projects on macroeconomic modelling, decent work, macroprudential policies and debt sustainability, social policies and social protection	–	–	1	–
2. Field projects on financial inclusion, structural gaps, input-output tables and the role of fiscal policy in income redistribution	1	1	–	–
3. Field projects on new narratives and structural gaps	–	–	–	1
4. Field projects on climate change adaptation and disaster risk reduction	–	–	–	1
<b>Seminars, workshops and training events</b> (number of days)	<b>15</b>	<b>22</b>	<b>10</b>	<b>16</b>
5. Meetings of experts, including on debt sustainability, macroeconomic and public policies, social structure, welfare systems and stratification, energy, food and agriculture, productive development and international and subregional trends in trade	12	13	10	10
6. Courses and workshops on policy options relating to climate change adaptation and mitigation, the Sustainable Development Goals and sustainable development	3	9	–	6
<b>Publications</b> (number of publications)	<b>10</b>	<b>10</b>	<b>9</b>	<b>10</b>
7. Studies, including on macroeconomics, trade, external investments, social developments inclusive of labour markets, welfare systems, energy and agricultural sectors, public policies focusing on climate change and productive development	10	10	9	10
<b>Technical materials</b> (number of materials)	<b>11</b>	<b>11</b>	<b>11</b>	<b>12</b>
8. Technical reports on subregional activities	1	1	1	2
9. Technical notes on recent macroeconomic developments in the countries of the subregion	10	10	10	10
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> advice to member States, upon request, on macroeconomic and macroprudential policies, the 2030 Agenda, social development issues, trade, sectoral policy, energy and climate change.				
<b>Databases and substantive digital materials:</b> databases on economic statistics and national accounts, social indicators, the agricultural sector and food security, trade integration, the hydrocarbon sector, the electricity sector and climate change in the subregion.				

## Subprogramme 12

### Subregional activities in the Caribbean

#### Objective

18.286 The objective, to which this subprogramme contributes, is to strengthen the sustainable development process in the Caribbean in the economic, social and environmental dimensions and to enhance the subregion's cooperation with Latin America.

#### Strategy

18.287 To contribute to the objective, the subprogramme will continue to engage ECLAC member States, regional and extraregional entities and other partners in regional and country-specific initiatives aimed at improving cooperation among countries and other key development partners. The subprogramme will convene high-

level intergovernmental and technical meetings to facilitate the active engagement of Caribbean countries in the follow-up to global and regional initiatives and conferences, including the Sustainable Development Goals, as well as to explore and articulate strategies and approaches towards sustainable development based on practical research and empirical and conceptual frameworks of analysis.

18.288 To further contribute to the objective, the subprogramme will aid Caribbean countries through technical missions and advisory services, undertake research and analysis on emerging issues and challenges facing the Caribbean and work closely with United Nations entities and Caribbean development partners to strengthen the capacity of development practitioners and decision makers in designing and implementing resilience-building measures for durable development that are inclusive of the special situation of women and persons with disability. The subprogramme also plans to support Caribbean countries in the development of evidence-based policies that promote sustainable development, including Sustainable Development Goals 3, 4, 5, 8, 9, 13 and 14. This work is expected to result in advancing the implementation of national and subregional strategies and programmes.

18.289 The subprogramme plans to support member States on issues related to COVID-19 by orienting its research towards providing focused policy and technical advice to tourism-dependent economies, based on different possible socioeconomic scenarios following the COVID-19 pandemic.

18.290 The above-mentioned work is expected to result in:

(a) Increased effective subregional and regional engagement and consensus, functional cooperation and enhanced political advocacy on issues critical to the development of the Caribbean;

(b) Advancement of the implementation of national and subregional strategies and programmes.

18.291 The planned support on issues related to COVID-19 is expected to result in increased national capacities in select Caribbean tourism-based economies to facilitate resilient recovery in specific tourism-related sectors following the COVID-19 pandemic.

## **Programme performance in 2020**

18.292 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Resilience-building and disaster-resilient reconstruction policies to build back better after disasters**

18.293 The Caribbean is among the region's most vulnerable to the impact of extreme weather events, with countries of the subregion experiencing some of the highest rates of damage relative to their GDP. These events have taken an overwhelming toll on the productive sectors, significantly diminishing the capacity of Caribbean countries to finance their post-disaster recovery and resilience-building. The subprogramme, in partnership with the Inter-American Development Bank and supported by the Pan American Health Organization, conducted a damage and loss assessment of the impact of Hurricane Dorian in the Bahamas in late 2019. The report of the assessment – which estimated the cost of the damage and losses at \$3.4 billion

and was completed in January 2020 – included recommendations to guide the country's resilient reconstruction efforts.

*Progress towards the attainment of the objective, and performance measure*

18.294 The above-mentioned work contributed to the objective, as demonstrated by the Government of the Bahamas accepting the findings and recommendations of the damage and loss assessment report, which it used to inform the development of national policies on resilience-building, the review and updating of existing legislation related to the impact of natural disasters and the design by the Government of resilient reconstruction and redevelopment on the affected islands in response to the socioeconomic challenges in the aftermath of the hurricane (see table 18.26).

**Table 18.26**  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
—	—	The Government of the Bahamas accepted the damage and loss assessment report submitted by ECLAC in 2020 and used it to inform the development of national policies on resilience-building, to review and update existing legislation related to the impact of natural disasters and to design resilient reconstruction and redevelopment on the affected islands

**Impact of COVID-19 on subprogramme delivery**

18.295 Owing to the impact of COVID-19 during 2020, the subprogramme postponed an assessment of the impact of sargassum on the economies of the Caribbean, since data collection in the field by ECLAC staff, a vital component of this research, was not possible. The subprogramme also replaced planned field missions and face-to-face interviews for data collection with virtual meetings and the use of local consultants in lieu of travel by staff members.

18.296 At the same time, however, the subprogramme identified activities to support member States on issues related to the COVID-19 pandemic, within the overall scope of its objectives, namely: it adjusted the planned publication of *The Caribbean Outlook* to incorporate perspectives on how the subregion might address the challenges of response, recovery and resilience-building in the wake of the pandemic, and reformulated research on appropriate monetary and fiscal policy for reducing debt and fuelling growth in Caribbean economies to provide Caribbean member States with a cross-sectoral analysis of the immediate impact of the pandemic on their economies.

**Planned results for 2022**

18.297 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding programme plans and therefore show both the

programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: identifying and addressing challenges in the implementation of the Sustainable Development Goals<sup>23</sup>**

#### **Programme performance in 2020**

18.298 The subprogramme enhanced the institutional capacity of member States to review their progress in achieving the Sustainable Development Goals through subregional and national workshops and training. These activities enabled Caribbean countries to identify critical challenges to timely implementation of the Goals and to begin discussions on how to effectively address them. The subprogramme also provided technical assistance to Caribbean countries in the preparation of their voluntary national reviews for the high-level political forum on sustainable development. This has contributed to improving national capacities for monitoring and evaluating progress in the achievement of the Goals, as well as progress in meeting national development objectives.

18.299 The above-mentioned work contributed to the update of the national development plan of one country, the update of the national development strategy of one country, the review and alignment of sectoral plans of one country with the country's national development strategy, and the preparation of voluntary national reviews by eight countries, which met the planned target reflected in the proposed programme budget for 2020.

#### **Proposed programme plan for 2022**

18.300 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will intensify efforts to facilitate the dissemination of data and statistics that could contribute to evidence-based policies, programmes and advocacy for the successful implementation of and effective reporting on the Sustainable Development Goals, including through the deployment of the REDATAM tool to disseminate census data. The expected progress is presented in the performance measure below (see table 18.27).

Table 18.27  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Requirement to strengthen regional institutional capacity for the comprehensive assessment of development challenges; voluntary national reviews prepared by three Caribbean countries	Improved regional institutional capacity for the comprehensive assessment of development challenges; voluntary national reviews prepared by at least five Caribbean countries	Update of the national development plan of one country, update of the national development strategy of one country, review and alignment of sectoral plans of one country with the country's national development strategy, and	Significantly enhanced regional institutional capacity for the comprehensive assessment of development challenges; voluntary national reviews prepared by at least eight Caribbean countries	Regional institutional capacity well positioned for the comprehensive assessment of development challenges; voluntary national reviews prepared by at least 10 Caribbean countries

<sup>23</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 21)).

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
		preparation of voluntary national reviews by eight countries		

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: more countries with Sustainable Development Goal institutional frameworks to strengthen their sustainable development processes<sup>24</sup>**

### **Programme performance in 2020**

18.301 The subprogramme engaged in national stakeholder consultations on the 2030 Agenda and the Sustainable Development Goals to raise awareness and national ownership. It also provided direct technical assistance to Caribbean countries through the design of templates of institutional frameworks.

18.302 The above-mentioned work contributed to the establishment of a new institutional framework for the Sustainable Development Goals in one country and the designation of existing agencies as the institutional framework in six others, altogether representing 88 per cent of Caribbean countries, which exceeded the planned target of 69 per cent of Caribbean countries with formalized institutional frameworks for the Goals reflected in the programme budget for 2021.

### **Proposed programme plan for 2022**

18.303 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will intensify its stakeholder engagement to contribute to improved national ownership of the global agenda and continue to offer technical assistance to member States in formalizing existing ad hoc arrangements for the Sustainable Development Goals in national institutional frameworks. The expected progress is presented in the performance measure below (see figure 18.XXXII).

<sup>24</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

Figure 18.XXXII

**Performance measure: percentage of Caribbean countries with formalized Sustainable Development Goal institutional frameworks**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: building back better post COVID-19 through economic restructuring and diversification**

#### **Proposed programme plan for 2022**

18.304 Tourism-dependent economies of small island developing States in the Caribbean were severely affected by the COVID-19 pandemic during 2020. Countries of the subregion were already suffering the negative impacts of climate change, extreme weather events and declining access to development assistance as middle-income countries, all of which have contributed to deepening debt and liquidity crises. In the wake of the pandemic, many small island developing States in the Caribbean are endeavouring to undertake economic restructuring and upgrading to promote greater economic diversification and to build back more dynamic and competitive tourism and tourism-related sectors. The subprogramme has completed several research papers on specific sectors to determine and inform member States about the immediate impact of the pandemic on their economies and what could be done to address the challenges.

#### *Lessons learned and planned change*

18.305 The lesson for the subprogramme was the demand for policy options to address different possible scenarios when situations such as the COVID-19 pandemic occur. In conducting research during an evolving situation, the data and information and related conclusions often become outdated very quickly, thereby losing their currency and value to the intended beneficiaries. In applying the lesson, the subprogramme will ensure that future research in such circumstances includes several possible outcomes and scenarios, to facilitate the provision of timely technical and policy guidance to member States during and after events.

#### *Expected progress towards the attainment of the objective, and performance measure*

18.306 This work is expected to contribute to the objective, as demonstrated by a number of Caribbean countries developing proposals for investing in new and existing niches to diversify and resuscitate those sectors (see table 18.28).

Table 18.28  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
—	—	Member States have access to research on the potential impact of the COVID-19 pandemic on Caribbean economies	Caribbean member States have access to a road map to begin to build back better	2 Caribbean countries develop proposals for investing in new or existing sector niches and segments

## Legislative mandates

18.307 The list below provides all mandates entrusted to the subprogramme.

### General Assembly resolutions

67/215	Promotion of new and renewable sources of energy	73/142	Inclusive development for and with persons with disabilities
67/218	Promoting transparency, participation and accountability in fiscal policies	73/148	Intensification of efforts to prevent and eliminate all forms of violence against women and girls: sexual harassment
68/304	Towards the establishment of a multilateral legal framework for sovereign debt restructuring processes	73/225	Entrepreneurship for sustainable development
70/125	Outcome document of the high-level meeting of the General Assembly on the overall review of the implementation of the outcomes of the World Summit on the Information Society	73/226	Midterm comprehensive review of the implementation of the International Decade for Action, "Water for Sustainable Development", 2018–2028
70/128	Cooperatives in social development	73/227	Implementation of Agenda 21, the Programme for the Further Implementation of Agenda 21 and the outcomes of the World Summit on Sustainable Development and of the United Nations Conference on Sustainable Development
70/189	Financial inclusion for sustainable development		
70/204	International Strategy for Disaster Reduction		
70/263	Cooperation between the United Nations and the International Organization for Migration	73/229	Towards the sustainable development of the Caribbean Sea for present and future generations

<b>Library services:</b> information requests; library catalogue; interlibrary loans and services; and book displays (virtual).				

### Subprogramme 13

#### Support for regional and subregional integration and cooperation processes and organizations

#### Objective

18.309 The objective, to which this subprogramme contributes, is to enhance regional and subregional integration processes in order to foster their convergence and the participation of the region through common positions in interregional and global political dialogues in support of the 2030 Agenda.

## Strategy

18.310 The subprogramme will help the region to move towards the achievement of the Sustainable Development Goals, in particular Goals 16 and 17. To contribute to the objective, the subprogramme will continue to provide support to subregional and regional organizations in the context of the Commission's convening role as an intergovernmental platform for policy advice and dialogue, by promoting coordination and cooperation within and among member States and associate members, subregional and regional entities, the resident coordinator system, United Nations agencies, funds and programmes, the private sector, civil society organizations, academic institutions, extraregional stakeholders and other third parties. This support is provided through technical, logistical and substantive contributions to subregional and regional initiatives aimed at facilitating debate and the construction of intraregional agreements and their follow-up, as well as by strengthening the interests and the positioning of the region for participation in interregional and global political dialogues. The subprogramme will also provide technical cooperation and advisory services, upon request, and training activities and will promote the sharing of knowledge and experiences and the transfer of technology.

18.311 The subprogramme will support the development of joint regional positions in multilateral forums and global conferences in connection with important events, such as the meetings of the Community of Latin American and Caribbean States, the Central American Integration System, MERCOSUR, the Pacific Alliance, the Caribbean Community, the Association of Caribbean States, the Organisation of Eastern Caribbean States and other integration mechanisms that will report to the Forum of the Countries of Latin America and the Caribbean on Sustainable Development.

18.312 The subprogramme will also promote peer learning, the sharing of best practices and discussion on shared targets and will prioritize the gender perspective and the Caribbean First strategy of the Commission.

18.313 The subprogramme plans to support member States on issues related to COVID-19 with renewed multilateral cooperation, in the context of integration schemes and organizations in the region.

18.314 The above-mentioned work is expected to result in:

- (a) Reduced regional asymmetries and increased South-South and triangular cooperation initiatives;
- (b) Common positions in support of the implementation of the 2030 Agenda;
- (c) Increased capacity of government officials involved in the economic, social and political aspects of integration processes and those responsible for the implementation of the 2030 Agenda to promote the active engagement of member States in regional and subregional integration processes and their strategic positioning at the global level.

18.315 The planned support on issues related to COVID-19 is expected to result in collaboration to intensify international cooperation to overcome the challenges posed by the pandemic.

## Programme performance in 2020

18.316 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **2030 Agenda: an opportunity to support regional cooperation to fight against COVID-19**

18.317 In 2020, the subprogramme continued to address the needs and demands of member States by convening intergovernmental integration schemes and organizations in the region, ensuring multi-stakeholder dialogue, in particular on the socioeconomic impact of COVID-19 in countries of the region. Even though the fourth meeting of the Forum of the Countries of Latin America and the Caribbean on Sustainable Development was postponed to 2021, the subprogramme promoted and organized different events with civil society and other stakeholders in order to build dialogue, promote the exchange of experiences and best practices and build bridges.

#### *Progress towards the attainment of the objective, and performance measure*

18.318 The above-mentioned work contributed to the objective, as demonstrated by the number of participants from civil society organizations that attended the events organized by the subprogramme in the framework of the Forum of the Countries of Latin America and Caribbean on Sustainable Development or the ECLAC session (see table 18.30).

Table 18.30  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>
230 participants attended the second meeting of the Forum of the Countries of Latin America and the Caribbean on Sustainable Development	300 participants attended the third meeting of the Forum of the Countries of Latin America and the Caribbean on Sustainable Development	227 participants attended the dialogue with civil society in the framework of the thirty-eighth session of the Commission

### **Impact of COVID-19 on subprogramme delivery**

18.319 Owing to the impact of COVID-19 during 2020, training and workshops planned to be delivered by the subprogramme had to be adapted to virtual modalities. Furthermore, the fourth meeting of the Forum of the Countries of Latin America and the Caribbean on Sustainable Development was postponed and scheduled for the first half of 2021.

### **Planned results for 2022**

18.320 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: 2030 Agenda: a space for regional integration<sup>25</sup>**

#### **Programme performance in 2020**

18.321 The subprogramme carried out activities in order to support regional and subregional integration, especially since the outbreak of the COVID-19 pandemic. It also reoriented activities in order to support dialogue in line with the needs of member States and received a request for technical cooperation from Mexico in its capacity of pro tempore secretariat of the Community of Latin American and Caribbean States, in March 2020, on the economic impact of the pandemic in the countries of the region.

<sup>25</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 21)).

This request led to the development by ECLAC of the COVID-19 Observatory and the publication of special reports, with analysis and policy proposals to address the impact of the pandemic in the countries of the region and to recover better from it. In this regard, the subprogramme contributed to the reports entitled “Political and social compacts for equality and sustainable development in Latin America and the Caribbean in the post-COVID-19 recovery” and “The impact of the COVID-19 pandemic on the tourism sector in Latin America and the Caribbean”.

18.322 The above-mentioned work contributed to consideration of the economic demographics of the region, which comprises middle-income countries, landlocked developing countries, small island developing States and Haiti, the only least developed country in the region, in support of the implementation of the 2030 Agenda in the context of the pandemic and leaving no one behind, which met the planned target reflected in the proposed programme budget for 2020 of fostering peer learning and the identification of best practices and lessons learned, even though the fourth meeting of the Forum of the Countries of Latin America and the Caribbean on Sustainable Development was postponed to 2021 owing to the impact of the pandemic in the region.

### Proposed programme plan for 2022

18.323 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to organize activities in the framework of the Forum of the Countries of Latin America and the Caribbean on Sustainable Development. The expected progress is presented in the performance measure below (see table 18.31).

Table 18.31  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Best practices and shared targets on regional progress and challenges in relation to the implementation of the 2030 Agenda were discussed at the second meeting of the Forum of the Countries of Latin America and the Caribbean on Sustainable Development, with the contributions from the second annual report on the implementation of the 2030 Agenda prepared by ECLAC providing a basis	End of cycle peer review and sharing of best practices within the space of the third meeting of the Forum was supported by the quadrennial report prepared jointly by ECLAC and the United Nations Sustainable Development Group for Latin America and the Caribbean, reflecting increased collaboration	Peer learning, sharing of best practices and discussion on shared targets for regional implementation of the 2030 Agenda	Report on progress and challenges will allow for the identification of best practices and lessons learned during the previous cycle, and will support the discussions at the fourth meeting of the Forum as a new implementation cycle begins	In the space of the fifth meeting of the Forum, best practices are shared on how to successfully tackle the impacts of the COVID-19 pandemic on development, thus promoting stronger multilateralism and international cooperation

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: reduced regional asymmetries and increased South-South and triangular cooperation<sup>26</sup>

### Programme performance in 2020

18.324 In the context of the Caribbean First strategy of ECLAC, the subprogramme facilitated a high-level dialogue with 13 Caribbean member States and 14 associate members, in close coordination with ECLAC subregional headquarters for the Caribbean, resident coordinators, United Nations agencies, funds and programmes, subregional organizations, academic institutions and civil society. The dialogue represented an opportunity to increase the level of participation of Caribbean representatives in the activities and events organized by the subprogramme. Moreover, within the framework of the thirty-eighth Session of the Commission, the Caribbean countries had a very high level of representation in the Committee on South-South Cooperation, with the election of Jamaica as Vice-Chair of the Committee. Likewise, in 2020, as part of the follow-up to the second High-level United Nations Conference on South-South Cooperation, the subprogramme supported the evaluation of South-South cooperation in Barbados and Jamaica and the presentation of its results at a meeting of experts, attended by about 100 experts from Latin America and the Caribbean.

18.325 The above-mentioned work did not meet the planned target of 12 Caribbean countries attending the Forum of the Countries of Latin America and the Caribbean on Sustainable Development reflected in the programme budget for 2020. As a result of the outbreak of the COVID-19 virus, ECLAC, in coordination with the Government of Cuba in its capacity as Chair of the Forum for 2018–2020), decided not to proceed with the fourth meeting of the Forum.

### Proposed programme plan for 2022

18.326 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will support member States in increasing the number of Caribbean countries attending the Forum of the Countries of Latin America and the Caribbean on Sustainable Development. The expected progress is presented in the performance measure below (see figure 18.XXXIII).

Figure 18.XXXIII

**Performance measure: number of Caribbean countries attending the Forum of the Countries of Latin America and the Caribbean on Sustainable Development (annual)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

<sup>26</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

### **Result 3: robust regional and subregional integration processes in support of post-pandemic recovery in line with the 2030 Agenda**

#### **Proposed programme plan for 2022**

18.327 The effects of the COVID-19 pandemic are exacerbating inequalities within and among countries. Increased international cooperation and stronger regional multilateralism can support collective action for the provision of global and regional public goods and strengthen deliberative capacities, transparency and informed debate among citizens, all of which can support the region in building back better in the wake of the pandemic. The Secretary-General has said that, in the knowledge that there is no system of global governance, the only possible way out of the crisis is through effective international cooperation; and he has stressed that “multilateralism is not only a matter of confronting shared threats; it is about seizing common opportunities. We now have the opportunity to build back better than in the past”.<sup>27</sup> In the countries of Latin America and the Caribbean, there is an opportunity to prepare and lead with a regional voice in the post-pandemic global arena.

#### *Lessons learned and planned change*

18.328 The lesson for the subprogramme was increased awareness of the importance of promoting dialogue with stakeholders. In applying the lesson, the subprogramme will increase the coordination activities with integration and cooperation organizations to support their relationships with extrarregional stakeholders and third parties, including civil society. The subprogramme will continue to support subregional and regional organizations by promoting coordination, cooperation, complementarity and synergies and by contributing to convergence processes when the Commission’s participation is required.

#### *Expected progress towards the attainment of the objective, and performance measure*

18.329 This work is expected to contribute to the objective, as demonstrated by an increasing number of organizations participating in the Forum of the Countries of Latin America and the Caribbean for Sustainable Development (see figure 18.XXXIV).

Figure 18.XXXIV

**Performance measure: annual number of regional and subregional organizations and civil society organizations participating in the Forum of the Countries of Latin America and the Caribbean on Sustainable Development**

<sup>27</sup> United Nations, “Secretary-General’s message on the International Day of Multilateralism and Diplomacy for Peace”, 24 April 2020.

## Legislative mandates

18.330 The list below provides all mandates entrusted to the subprogramme.

### *General Assembly resolutions*

65/177	Operational activities for development of the United Nations system	73/254	Towards global partnerships: a principle-based approach to enhanced cooperation between the United Nations and all relevant partners
66/223	Towards global partnerships		
71/243	Quadrennial comprehensive policy review of operational activities for development of the United Nations system	73/291	Buenos Aires outcome document of the second High-level United Nations Conference on South-South Cooperation
71/318	Second High-level United Nations Conference on South-South Cooperation	74/270	Global solidarity to fight the coronavirus disease 2019 (COVID-19)
72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system	74/274	International cooperation to ensure global access to medicines, vaccines and medical equipment to face COVID-19
		74/306	Comprehensive and coordinated response to the coronavirus disease (COVID-19) pandemic
		74/307	United response against global health threats: combating COVID-19

### *Economic Commission for Latin America and the Caribbean resolutions*

730 (XXXVII)	Committee on South-South Cooperation	749 (XXXVIII)	Committee on South-South Cooperation
731 (XXXVII)	Seventieth anniversary of the Economic Commission for Latin America and the Caribbean		

## Deliverables

18.331 Table 18.32 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 18.32

### C. Substantive deliverables

**Consultation, advice and advocacy:** advice to member States, upon request, on topics related to the Commission's mandate, including on integration and cooperation, to regional and subregional organizations and processes, including the 2030 Agenda; and provision to member States, upon request, of technical cooperation services to regional and subregional processes and organizations in areas relevant to the Commission's mandate and in their relationships with extraregional stakeholders and third parties in areas relating to the work of the subprogramme.

## **Programme 19**

### **Economic and social development in Western Asia**

#### **Overall orientation**

##### **Mandates and background**

19.1 The Economic and Social Commission for Western Asia (ESCWA) is responsible for promoting inclusive and sustainable development in the Arab region. The mandate derives from the priorities established in relevant General Assembly and Economic and Social Council resolutions and decisions, including Council resolutions 1818 (LV), by which the Council established the Commission, and 1985/69, amending its terms of reference to underscore its social functions.

19.2 The development landscape in the Arab region is dominated by the need to protect development gains while tackling the lingering effects of the coronavirus disease (COVID-19) pandemic, and to leverage this momentum to build back better and accelerate the progress in implementing the 2030 Agenda for Sustainable Development. In this context, ESCWA will support its member States in accomplishing the goals set within their national development plans and fulfilling their vision of thriving Arab societies, based on prosperity, equality, respect for diversity and sustainable use of resources. The planned programme of work was elaborated bearing in mind the negative medium- and longer-term impact of the COVID-19 pandemic and continued protracted and widespread political instability and violent conflict, which exacerbate further the decades-old economic, social and environmental challenges and create additional barriers for the region's development trajectory and fulfilment of its peoples' ambitions.

##### **Strategy and external factors for 2022**

19.3 In line with its mandate and underscoring its commitment to member States, the programme will continue to leverage its expertise, experience and partnerships to deploy multidisciplinary approaches in support of national and regional efforts towards fulfilling the ambitions of the Arab region's peoples for a prosperous and dignified future. The Commission's strategy for 2022 is rooted in the longer-term vision for the region and centred on provision of support to member States in developing and implementing policies, strategies and programmes to enhance the welfare of their citizens, as stipulated by the national development plans and the 2030 Agenda.

19.4 At the very core of the strategy is the commitment to not only remain on track, but, in fact, to build back better and even accelerate, to the extent possible, the progress towards the Sustainable Development Goals. Efforts to mitigate the negative socioeconomic impact of the COVID-19 pandemic will be mainstreamed into the longer-term agenda and vision for the region, allowing development gains to be sustained and expanded. The hallmark of the ESCWA programme for 2022, and each of its six subprogrammes, is the Arab region peoples' ambition for stable, just and flourishing societies. This includes, among other things, strengthening national institutions and regional and subregional collaboration; reducing inequalities and empowering the most vulnerable groups; promoting viable management of natural resources and climate action; and analysis of trends and evidence and development of tools in support of informed decision-making; with the overall aim of sustained shared prosperity.

19.5 Specifically, the programme will support Governments in addressing the many vulnerabilities while building effective and resilient institutions, ensuring that interventions empower and remain focused on addressing the specific needs of the

most vulnerable and marginalized groups of people, as part of the commitment to leave no one behind. In addition to helping member States with optimizing their COVID-19 recovery plans, the programme will invest in increasing access to reliable and disaggregated data and the required technologies and innovation to meet the challenges of the fourth industrial revolution; and provide improved tools and frameworks for the analysis of risks and opportunities; hence enabling informed policy design and decision-making. ESCWA will leverage its expertise and resources in support of sustainable management of groundwater and other natural resources; and will promote debt-swap and debt-reduction schemes, as part of its effort to boost not only socioeconomic progress but also climate-related action. The Commission will contribute to creating an enabling environment for greater regional integration and lasting partnerships for development, including strengthened South-South and triangular cooperation.

19.6 For 2022, the Commission's planned deliverables and activities reflect the likely ongoing challenges related to COVID-19 that are being faced by member States. Such planned deliverables and activities include continued support to national and regional initiatives to mitigate the socioeconomic impact of the pandemic, while remaining on track with the Sustainable Development Goal commitments. This will be achieved through an even greater investment in analysis of trends, challenges and opportunities and new technologies and innovation; enhancing the capacities of national institutions; and ensuring the inclusion and empowerment of the most vulnerable. Specific examples of such planned deliverables and activities are provided under subprogramme 1, Climate change and natural resource sustainability, subprogramme 2, Gender justice, population and inclusive development, subprogramme 3, Shared economic prosperity, subprogramme 5, 2030 Agenda and Sustainable Development Goal coordination, and subprogramme 6, Governance and conflict prevention. The support provided to member States on issues related to COVID-19 is expected to contribute to planned results for 2022, as described under subprogramme 5.

19.7 With regard to cooperation with other entities at the global, regional, national and local levels, the Commission will further consolidate its strategic and historic partnership with the League of Arab States. This partnership manifests itself in several areas, including: monitoring and reporting on progress made in the implementation of the 2030 Agenda; supporting member States on climate change through the ESCWA-based Arab Centre for Climate Change Policies; and jointly working to revisit multidimensional poverty, measure non-income poverty and promote poverty eradication in line with the 2030 Agenda. The two bodies also cooperate on the normative and capacity development dimensions of regional economic integration, including with regard to trade, customs, migration, transport, energy, water, food security and other transboundary and regional development challenges.

19.8 The Commission's partnership with the Islamic Development Bank will continue to cover a number of areas, including: transport corridors as trade facilitators that would lead to increased economic activity and job creation; mainstreaming climate action in national development plans; and the role of parliaments in promoting and monitoring the implementation of the 2030 Agenda. In parallel, ESCWA will partner with the World Bank, the International Monetary Fund, the Organisation for Economic Co-operation and Development (OECD), the World Trade Organization and a multitude of global and regional actors.

19.9 Furthermore, ESCWA will continue its engagement with academic institutions and think tanks, in particular through its academic network for development dialogue, with the aims of promoting dialogue, collaboration and knowledge-sharing between the United Nations and academia in the Arab region; and of enhancing proactive and informed policymaking that is aligned with national ambitions for achieving the

Sustainable Development Goals. It will also create further opportunities for partnership and engagement with civil society and the private sector in order to bridge the knowledge implementation gap and help member States to gain access to innovation and financing.

19.10 With regard to inter-agency coordination and liaison, ESCWA will continue to play a lead role in the Arab region in implementing the Secretary-General's reform agenda, as approved by the General Assembly in its resolution [72/279](#). The Commission will maintain its approach to multi-stakeholder engagement at the national and regional levels, continuing to create unique regional platforms in which government representatives, parliamentarians, civil society and the private sector can exchange good practice and identify innovative solutions. In addition, ESCWA will expand on the services and added value of Manara (the regional knowledge and expertise hub) and will take the lead on a number of global initiatives to improve not only the work of institutions in the region but also of the United Nations globally. This is in addition to the substantive and normative collaboration at the regional and global levels with a plethora of United Nations agencies and global, regional and national institutions on a wide variety of topics relating to the Sustainable Development Goals, such as growth and strengthened capacities of national institutions, employment, poverty, social protection, food security, climate change, migration, gender, and data and statistics.

19.11 The programme will continue to work closely with the United Nations Development Coordination Office and offices of the United Nations resident coordinators and through the regional collaborative platform in the Arab region to ensure greater complementarity and synergy of its own projects with those implemented as part of national development cooperation frameworks. The aim of this collaboration is to optimize United Nations programming in the Arab states, to accelerate achievements towards the 2030 Agenda.

19.12 With regard to the external factors, the overall plan for 2022 is based on the following planning assumptions:

(a) The Governments in the region (and globally) will have shifted their focus from immediate life- and livelihood-saving interventions to socioeconomic recovery and the achievement of the 2030 Agenda;

(b) The national development and political landscapes remain conducive for ESCWA to provide integrated policy advice, normative support and technical capacity-building on regional priorities;

(c) ESCWA partners and interlocutors remain committed to collaboration with the Commission and advancing joint initiatives and projects.

19.13 With regard to the COVID-19 pandemic, the proposed programme plan is based on the assumption that the proposed deliverables and activities for 2022 will be feasible to implement. However, if the pandemic were to continue to have an impact on the planned deliverables and activities, they would be adjusted during 2022 within the scope of the overall objectives, strategies and mandates. Any such adjustments would be reported as part of the programme performance information.

19.14 The Commission integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, it implements the accountability framework for gender equality in line with Economic and Social Council resolution [2013/16](#), in addition to targeted activities led by its subprogramme on gender justice, population and inclusive development. With regard to disability inclusion, in addressing the special needs of marginalized and vulnerable groups, ESCWA will continue to advance the inclusion of the needs of persons with disabilities in its

programme, in line with the United Nations Disability Inclusion Strategy. Special consideration will also be given to greater inclusion and empowerment of youth and the elderly.

19.15 Following the adoption of its resolution 335 (S-VI), the Commission operationalized its new structure, designed to optimize its substantive and operational assets in the service of member States by reconfiguring its overall programme into six subprogrammes on interrelated topics. Accordingly, the programme plan for 2022 is presented under the newly adopted subprogramme structure, in line with resolution 335 (S-VI) and as set forth in the note by the Secretary-General transmitting a report on the new strategic vision of ESCWA (E/2020/12). Reporting on the Commission's performance for 2020 is presented under the previous structure, consisting of seven subprogrammes, which was in place at the time of programme planning for 2020 (see annex to part A).

## Legislative mandates

19.16 The list below provides all mandates entrusted to the programme.

### *General Assembly resolutions*

68/196	United Nations Guiding Principles on Alternative Development	74/216	Implementation of Agenda 21, the Programme for the Further Implementation of Agenda 21 and the outcomes of the World Summit on Sustainable Development and of the United Nations Conference on Sustainable Development
69/230	Culture and sustainable development		
69/277	Political declaration on strengthening cooperation between the United Nations and regional and subregional organizations	74/232	Follow-up to the Fourth United Nations Conference on the Least Developed Countries
69/307	Cross-cutting issues	74/234	Implementation of the Third United Nations Decade for the Eradication of Poverty (2018–2027)
69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development	74/239	South-South cooperation
72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system	75/4	Special session of the General Assembly in response to the coronavirus disease (COVID-19) pandemic

### *Security Council resolutions*

1325 (2000)	2535 (2020)
-------------	-------------

### *Economic and Social Council resolutions*

1818 (LV)	Establishment of an Economic Commission for Western Asia	2020/5	Strengthening coordination of the statistical programmes in the United Nations system
1985/69	Amendment of the terms of reference of the Economic Commission for Western Asia: change of name of the Commission	2020/16	Programme of Action for the Least Developed Countries for the Decade 2011–2020
2014/36	Redesignation of the Technical Committee of the Economic and Social Commission for Western Asia as the Executive Committee and amendment of its terms of reference	2020/20	Admission of Algeria and Somalia to membership in the Economic and Social Commission for Western Asia
2015/26	Assessment of the progress made in the implementation of and follow-up to the outcomes of the World Summit on the Information Society	2020/23	Progress in the implementation of General Assembly resolution 71/243 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system

*Economic and Social Commission for Western Asia ministerial declarations and resolutions*

Tunis Declaration on Social Justice in the Arab Region (2014)	333 (XXX)	Adoption of the proposed amendments to the strategic framework and programme of work for the biennium 2018–2019
Doha Declaration on the Implementation of the 2030 Agenda for Sustainable Development (2016)		
Beirut Consensus on Technology for Sustainable Development in the Arab Region (2018)	334 (XXX)	Adoption of the reports of the subsidiary bodies of the Economic and Social Commission for Western Asia
Arab Declaration on Progress in Implementation of the Beijing Declaration and Platform for Action after 25 Years (2019)	335 (S-VI)	Programme Plan for the Economic and Social Commission for Western Asia for 2021
331 (XXX) Comprehensive approaches to technical cooperation in response to member States' emerging needs	336 (S-VI)	Requests by Algeria and Somalia for membership of the Economic and Social Commission for Western Asia

**Deliverables**

19.17 Table 19.1 lists all cross-cutting deliverables, by category and subcategory, for the period 2020–2022.

Table 19.1

**Cross-cutting deliverables for the period 2021–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>15</b>	<b>15</b>	<b>12</b>	<b>9</b>
1. Reports for the ESCWA ministerial session	9	9	–	1
2. Reports for the Executive Committee	6	6	12	8
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>14</b>	<b>14</b>	<b>17</b>	<b>16</b>
3. Meetings of the Executive Committee	4	4	8	6
4. Meetings of the ESCWA Advisory Committee	4	4	2	3
5. Meeting of the Committee for Programme and Coordination	2	2	1	1
6. Meeting of the Advisory Committee on Administrative and Budgetary Questions	2	2	1	1
7. Meeting of the Fifth Committee of the General Assembly	2	2	1	1
8. Meeting of the regional collaborative platform	–	–	4	4
<b>B. Generation and transfer of knowledge</b>				
<b>Publications</b> (number of publications)	<b>1</b>	<b>1</b>	<b>2</b>	<b>1</b>
9. ESCWA annual report	1	1	1	1
10. Report on the performance of the United Nations development system in the Arab region	–	–	1	–
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> various ESCWA social media platforms and newsletters in Arabic and English; celebration of special international days and weeks, such as International Women's Day, International Day of Persons with Disabilities and World Environmental Day; brochures, leaflets, posters and other promotional material on ESCWA activities; visual content items and videos on ESCWA activities and daily ESCWA news in English and Arabic on the ESCWA website; briefings, lectures and awareness-raising activities with schools, universities and visitors on the work of the United Nations and ESCWA.				
<b>External and media relations:</b> press conferences and briefings by the Executive Secretary and other senior officials and for the launch of flagship publications and major events; interviews of the Executive Secretary and other senior officials with media outlets; ESCWA live television broadcasting services; press releases in English and Arabic on ESCWA activities; media coverage for ESCWA meetings and activities.				

## **Evaluation activities**

19.18 In 2022, ESCWA plans to refocus its evaluations to prioritize specific key result areas within its programme in light of the Commission's long-term strategy, rather than the subprogrammes themselves. The aim will be to support forward planning of activities and results through a more proactive approach to understanding and responding to the needs of the Arab region and the member States. In this connection, at least one evaluation of select areas of ESCWA subprogrammes is planned for 2022.

## **Programme of work**

### **Subprogramme 1**

#### **Climate change and natural resource sustainability**

### **Objective**

19.19 The objective, to which this subprogramme contributes, is to advance climate action and integrated and sustainable policies in the areas of water, energy and food security.

### **Strategy**

19.20 To contribute to the objective, the subprogramme will continue to strengthen the engagement of member States and their capacities in building climate resilience, by mainstreaming climate considerations in development planning and financing. It will provide technical assistance to facilitate access to science-based knowledge resources in support of informed policymaking. It will leverage existing partnerships with other United Nations entities, international financial institutions, regional organizations and other international bodies and with Governments to help member States make progress towards achieving various Sustainable Development Goals and their targets. Specifically, in alignment with Goal 1, the subprogramme will analyse ways to reduce climate vulnerability in strategic sectors through diverse partnerships built under the Arab Centre for Climate Change Policies. Goal 2 will be supported by assessing the impact of climate change on agricultural productivity, ecosystems and extreme water-related climate events. Concurrently, ensuring access to affordable, reliable, sustainable and modern energy will contribute towards the fulfilment of Goal 7. Progress against Goal 12 will be supported by promoting sustainable production and consumption patterns through a more efficient use of natural resources and reducing food loss and waste. The subprogramme will also contribute towards achieving Goal 13 by strengthening resilience and adaptive capacity through integrated policy measures for pursuing adaptation and mitigation and informed human and institutional capacities.

19.21 The subprogramme also plans to strengthen institutions and provide technical assistance to member States, engage them in and provide a neutral platform for cross-sectoral dialogue, and promote and advance the identification and adoption of sustainable solutions in the areas of renewable energy, energy efficiency, water-use efficiency, food security, waste management and environmental sustainability. It will support the high-level joint technical committee for water and agriculture with the implementation of the Cairo declaration and review and promote adoption of the guidelines on water allocation for the agriculture sector in Arab States. In addition, the subprogramme will support regional reporting on and monitoring of progress in achieving the Sustainable Development Goals in an integrated manner by tracking

progress against Goals 2 and 7. It will also promote appropriate solutions for ensuring food security and contribute to the achievement of Goal 6 by fostering integrated water resources management at all levels, including through transboundary water cooperation and greater focus on groundwater resources.

19.22 The subprogramme plans to support member States on issues related to COVID-19 by assessing its continued impact and providing sectoral policy advice to Governments and regional stakeholders focused on the response to and recovery from the pandemic, assisting Governments with building forward better and resuming their efforts to achieve Goals 2, 6, 7, 11, 12 and 13. This includes greater incorporation of health-related considerations into sectoral assessments and technical assistance related to resilience and risks to people and the planet under the changing socioeconomic and climatic conditions for regional and national action linked to the Goals.

19.23 The above-mentioned work by ESCWA and its partners to develop and promote sustainable solutions is expected to result in:

(a) Bolstered commitments of member States to climate action, designed to build the resilience of communities to achieve global and national development goals;

(b) Adoption by member States of policies, plans, harmonized tools, techniques and/or guidelines related to improved groundwater resource management; increased agricultural productivity; greater sustainability of energy systems; and strengthened regional networks and coordination mechanisms that support water, energy and food security.

19.24 The planned support on issues related to COVID-19 is expected to result in greater national capacity to mobilize resources and expertise to mitigate the impacts of the pandemic on food security and the delivery of essential water and energy services needed for a more sustainable recovery.

## Planned results for 2022

19.25 The planned results for 2022 include result 1, which is an update of the result presented in the preceding proposed programme plan, and result 2, which is a new planned result.

### **Result 1: cross-sectoral policies for improved water and food security under changing climate conditions in the Arab region<sup>1</sup>**

19.26 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will support the adoption of the action plan 2022–2025 for the 2019 Cairo declaration and its implementation and follow-up on the implementation of other resolutions by the second joint meeting of Arab Ministers of Agriculture and Water scheduled for 2021. Specifically, ESCWA will support ensuring policy coherence between water and agricultural, and other, sectors; promote agricultural entrepreneurship and appropriate technology development and adoption; and contribute to resilience-building activities for the agricultural sector. It will seek to assist in establishing an Arab regional network of practitioners of the AquaCrop model to scale up capacity development for member States and support training initiatives, data sharing and exchange of experiences gained in past years. In addition, the subprogramme will provide technical assistance to member States, through preparation of substantive reports and documentation ahead of planned meetings and provision of meeting services. It will also continue to support the Arab Centre for Climate Change Policies, including during the annual meetings of its high-level joint technical committee. Furthermore, it will facilitate

<sup>1</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

progress by member States towards the implementation of cross-sectoral action plans, aimed at enhancing coordination between the agriculture and water sectors on water allocation in agriculture, water productivity, efficient water usage, the use of non-traditional water in agriculture and the water-food-energy nexus. The expected progress is presented in the performance measure below (see table 19.2).

Table 19.2  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
—	1 resolution on coordination between the agriculture and water sectors adopted at a joint meeting of Ministers of Agriculture and Water Resources on 4 April 2019 in Cairo, supported by the League of Arab States, the Food and Agriculture Organization of the United Nations and ESCWA	—	2 additional ministerial resolutions on coordination between the agriculture and water sectors are adopted	—
—	9 assessment reports prepared by government officials using AquaCrop and RICCAR regional climate data to inform policy for improved management of water resources and water efficient crop production	2 additional assessment reports prepared by government officials using AquaCrop and RICCAR regional climate data to inform policy on water resources management for more water efficient crop production	2 additional assessment reports prepared by government officials using AquaCrop and RICCAR regional climate data to inform policy on water resources management for more water efficient crop production	Participating member States benefit from technical guidance and exchange of best practices made available through the Arab regional network of AquaCrop practitioners

*Abbreviation:* RICCAR, Regional Initiative for the Assessment of the Impact of Climate Change on Water Resources and Socio-Economic Vulnerability in the Arab Region.

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: improved groundwater management in transboundary settings under the changing climate

19.27 ESCWA member States rely on groundwater for half of their freshwater needs. This reliance is increasing as bodies of surface water become more scarce, polluted and costly to capture in the face of climate change impacts and increasing demand. Arab States also rely heavily on transboundary aquifers, with the majority sharing both renewable and non-renewable groundwater resources. These basins face deteriorating

water quality and overextraction, and their sustainable management is complicated by insufficient data and lack of cooperative arrangements. Only nine ESCWA member States submitted data related to transboundary water cooperation and only seven included groundwater in their submissions concerning indicator 6.5.2 for Sustainable Development Goal 6 in 2018. Since the launch of the landmark report *Inventory of Shared Water Resources in Western Asia* in 2013, the subprogramme has continued working on improving the understanding of transboundary groundwater resources in the region, including by facilitating dialogues on shared water cooperation, as recommended by the Arab Ministerial Water Council and mandated by the ESCWA Committee on Water Resources.

#### *Lessons learned and planned change*

19.28 The lesson for the subprogramme was that while its analytical work to characterize and support cooperation on shared water resources and climate change was appreciated by member States, additional efforts were needed to support the use of research findings for policymaking with respect to groundwater management. A focus on surface water dominated the regional discourse on transboundary water cooperation, water security and climate change, despite the fact that member States rely heavily on groundwater resources, especially in the agriculture sector and in rural settings, and despite the important role that groundwater can play in climate change adaptation. Limited data and understanding of groundwater specificities have also made it difficult to manage this unseen resource, in contrast to more easily understood and observed surface water resources. In applying the lesson, the subprogramme will increase its activities to reposition groundwater resources management in discussions on water security in the Arab region. It will do so by expanding the regional knowledge base on the direct and indirect impacts of climate change on shared groundwater resources through assessments, by building the capacity of member States to carry out such assessments, and by launching a digital database on groundwater resources. The subprogramme will also issue guidelines and build capacity to pursue integrated groundwater management in light of new technologies, benefiting from improved Earth observations, geospatial analysis and big data analytics.

#### *Expected progress towards the attainment of the objective, and performance measure*

19.29 This work is expected to contribute to the objective, as demonstrated by the use of harmonized tools by at least five member States to improve the management of transboundary groundwater for securing their medium- to long-term freshwater needs, and the launch of a regional digital database on groundwater resources (see table 19.3).

Table 19.3  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Launch of a regional knowledge hub (under RICCAR) to enhance access to knowledge products on water and climate change in the Arab countries	Pilot assessment of climate change impacts on a groundwater aquifer in Morocco	A diverse range of stakeholders benefited from webinars on groundwater-related topics, structured around shared priority concerns and addressing knowledge gaps	At least 2 member States recognize the importance of transboundary groundwater for securing their medium- to long-term freshwater needs	At least 5 member States recognize the importance of transboundary groundwater for securing their medium- to long-term freshwater needs

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
		Regional guidelines for improved groundwater abstraction and management vetted by at least 5 member States	At least 4 member States conduct an assessment of climate change impact on their groundwater resources	At least 10 member States acknowledge and benefit from the launch of a regional digital database on groundwater resources

*Abbreviation:* RICCAR, Regional Initiative for the Assessment of the Impact of Climate Change on Water Resources and Socio-Economic Vulnerability in the Arab Region.

## Legislative mandates

19.30 The list below provides all mandates entrusted to the subprogramme.

### *General Assembly resolutions*

68/211	International Strategy for Disaster Reduction	74/215	Agricultural technology for sustainable development
68/217	Sustainable mountain development	74/218	Disaster risk reduction
69/215	International Decade for Action, “Water for Life”, 2005–2015, and further efforts to achieve the sustainable development of water resources	74/219	Protection of global climate for present and future generations of humankind
69/225	Promotion of new and renewable sources of energy	74/220	Implementation of the United Nations Convention to Combat Desertification in Those Countries Experiencing Serious Drought and/or Desertification, Particularly in Africa
71/222	International Decade for Action, “Water for Sustainable Development,” 2018–2028.	74/221	Implementation of the Convention on Biological Diversity and its contribution to sustainable development
72/178	The human rights to safe drinking water and sanitation	74/222	Report of the United Nations Environment Assembly of the United Nations Environment Programme
72/224	Ensuring access to affordable, reliable, sustainable and modern energy for all	74/225	Ensuring access to affordable, reliable, sustainable and modern energy for all
72/242	Impact of rapid technological change on the achievement of the Sustainable Development Goals	74/242	Agriculture development, food security and nutrition
73/226	Midterm comprehensive review of the implementation of the International Decade for Action “Water for Sustainable Development”, 2018–2028		

### *Economic and Social Council resolutions*

2011/5	The role of the United Nations system in implementing the internationally agreed goals and commitments in regard to gender equality and the empowerment of women	2016/10	Economic and Social Commission for Western Asia strategy and plan of action on the 2030 Agenda for Sustainable Development
2011/21	Human settlements	2019/3	Programme of Action for the Least Developed Countries for the Decade 2011–2020

### *Economic and Social Commission for Western Asia resolutions*

281 (XXV)	Addressing climate change issues in the Arab region	329 (XXX)	Establishment of the Arab centre for climate change policies in the Arab region
305 (XXVII)	Sustainable development in the region and follow-up and implementation of the decisions of the Rio+20 Conference		

## Deliverables

19.31 Table 19.4 lists all deliverables, by category and subcategory, for 2021–2022 that are expected to contribute to the attainment of the objective stated above.

Table 19.4

### Subprogramme 1: deliverables for 2021–2022, by category and subcategory

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)			<b>12</b>	–
1. Documents for the Committee on Energy			6	–
2. Documents for the Committee on Water Resources			6	–
<b>Substantive services for meetings</b> (number of three-hour meetings)			<b>60</b>	<b>52</b>
3. Meetings of the Committee on Water Resources			4	–
4. Meetings of the Committee on Energy			4	–
5. Meeting of the Executive Bureau of the Arab Ministerial Council for Electricity and its committees of experts on electricity in Arab countries and on renewable energy and energy efficiency			6	6
6. Session of the Arab Ministerial Water Council and the meeting of its Technical, Scientific and Advisory Committee			6	6
7. Sessions of the Arab Council of Ministers Responsible for Meteorology and Climate and its Permanent Committee for Meteorology, and the meeting of the Sub-Committee on Weather and Climate Risk Information Management			10	10
8. Sessions of the Council of Arab Ministers Responsible for the Environment and its Joint Committee on Environment and Development in the Arab Region			8	8
9. Meetings of standing and ad hoc expert groups on climate change; green technology adaptation; the circular economy; water security; transboundary groundwater; resource efficiency; agriculture and food security; energy management; and other issues relating to sustainable natural resources			22	22
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)			<b>2</b>	<b>6</b>
10. Regional Initiative for Promoting Small-Scale Renewable Energy Applications in Rural Areas of the Arab Region (REGEND)			1	1
11. Regional Initiative for the Assessment of Climate Change Impacts on Water Resources and Socio-Economic Vulnerability in the Arab region (RICCAR)			–	1
12. Arab Integrated Water Resources Management Network (AWARENET)			–	1
13. Arab network of AquaCrop practitioners			–	1
14. Advancing water and food security under climate change			–	1
15. Arab Centre for Climate Change Policies			1	1
<b>Publications</b> (number of publications)			<b>2</b>	<b>2</b>
16. Publications related to climate action and sustainable natural resource management			2	2
<b>Technical materials</b> (number of materials)			<b>3</b>	<b>6</b>
17. Materials related to climate action and sustainable natural resource management			3	6
<b>C. Substantive deliverables</b>				
<b>Databases and substantive digital materials:</b> RICCAR regional knowledge hub on climate change and water accessed by 10,000 visitors.				

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
--------------------------	-----------------	----------------	-----------------	-----------------

#### D. Communication deliverables

**Outreach programmes, special events and information materials:** briefs, fact sheets and booklets on climate change, digital and green technologies, waste management, water security, good agriculture practices and food security, sustainable energy and other issues relating to the management of natural resources for sustainable development; substantive advice to global and regional meetings, including sessions of ministerial councils convened by the League of Arab States on environment, water, electricity, meteorology and climate, the joint ministerial meetings on agriculture and water, the International Forum on Energy for Sustainable Development, the Arab Forum for Renewable Energy and Energy Efficiency, sessions organized during the twenty-seventh session of the Conference of the Parties to the United Nations Framework Convention on Climate Change, the Committee on World Food Security, World Water Week and Cairo Water Week, as well as support for regional launching events (e.g., on groundwater) and webinars (e.g., on climate change), attended by at least 2,000 regional stakeholders.

## Subprogramme 2

### Gender justice, population and inclusive development

#### Objective

19.32 The objective, to which this subprogramme contributes, is to achieve equitable and inclusive social development and reduce inequality, poverty and unemployment in line with the principle of leaving no one behind.

#### Strategy

19.33 To contribute to the objective, the subprogramme will support member States in developing integrated social policies. Specifically, it will work with the League of Arab States, the United Nations Children's Fund and the Oxford Poverty and Human Development Initiative to roll out the revised Arab methodology for measuring multidimensional poverty. The methodology will initially be implemented in a number of Arab countries, in parallel with the subprogramme's work on inequalities, with the aim of catalysing the formation of a policymaking infrastructure to mainstream equality and social justice into public policymaking. ESCWA will inform and advise Arab States on integrated social protection systems that can support national efforts on poverty alleviation and inequality reduction.

19.34 The subprogramme will promote the creation of inclusive and decent work through more diversified and sustainable sectors. It will partner with the International Labour Organization, private sector entities and regional universities to examine the future of the labour market in the Arab region and its implications for economic inclusiveness, skills matching and the demand for jobs. It will build a network of regional and national governmental and non-governmental actors to provide a forum for Arab States to prepare for the impact of the fourth industrial revolution on job markets and, more broadly, on the attainment of the 2030 Agenda. Special focus will be placed on the empowerment of young people, women and persons with disabilities. The subprogramme will partner with relevant universities and youth centres, as well as private sector entities, to ensure the success of home-grown initiatives, to provide tailor-made support for the establishment of a social entrepreneurship incubator and for building the capacity of youth to develop and implement social entrepreneurship projects, and to promote collaboration between youth-led organizations and governments.

19.35 The subprogramme will also support the coordinated efforts of member States to address inequalities, empower vulnerable groups, streamline the principles of social justice in policymaking processes and align their practices with international norms

and global and regional frameworks adopted specifically to address social justice, social protection, inequality, inclusive urban development, migration, gender equality, youth empowerment and the inclusion of persons with disabilities and older persons (Sustainable Development Goals 5, 10, 11, 16 and 17).

19.36 The subprogramme will support member States in developing national strategies on a variety of priority issues, including support for the elderly and persons with disabilities and gender equality, in line with international standards. In partnership with the League of Arab States, it will support member States in delivering on their international commitments through supporting the implementation, follow-up and review of the Global Compact for Safe, Orderly and Regular Migration, as well as the regional review of the Madrid International Plan of Action on Ageing, 2002. The subprogramme will support member States' efforts in advancing gender justice, as part of their fulfilment of the commitments made in the Muscat Declaration: Towards the Achievement of Gender Justice in the Arab Region, of 2016, through its regional project with the United Nations Development Programme (UNDP), the United Nations Population Fund and the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women) to monitor, analyse and support the reform of national legislations and policies.

19.37 Moreover, the subprogramme will facilitate policy dialogue through the Commission's intergovernmental committees, subcommittees and technical working groups, such as the working groups on gender, social protection and disability inclusion.

19.38 The subprogramme plans to support member States on issues related to COVID-19 by continuing to analyse the impact of the pandemic and contribute to the development of national scenarios and strategies aimed at mitigating it.

19.39 The above-mentioned work is expected to result in:

(a) More targeted poverty alleviation strategies, inclusive social protection systems and an informed exchange among public and private actors to create equitable and innovative labour markets that offer decent and productive work for all;

(b) Increased capacity of member States to address structural inequality between social groups and enhance avenues for the participation of marginalized groups (women, youth, the elderly, persons with disabilities, migrants) in order to leave no one behind.

19.40 The planned support on issues related to COVID-19 is expected to result in informed policies to address inequalities among the various groups, in particular those disproportionately affected by immediate and medium- to long-term socioeconomic consequences of the pandemic, and strengthened inclusive social protection for health emergency responses.

## **Planned results for 2022**

19.41 The planned results for 2022 include result 1, which is an update of the result presented in the preceding proposed programme plan, and result 2, which is a new planned result.

### **Result 1: employment perspectives for vulnerable groups in the Arab region<sup>2</sup>**

19.42 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the

---

<sup>2</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

subprogramme will continue to focus on assisting policymakers and entrepreneurs in better understanding local environments, challenges and opportunities for micro-, small and medium-sized enterprises to thrive. Specifically, it will strengthen existing national networks for micro-, small and medium-sized enterprises, including through establishment of national centres for entrepreneurship, enhanced access to information on available governmental and non-governmental support programmes and acceleration of the mainstreaming of technologies and innovative solutions by these enterprises. At the same time, it will promote virtual learning and approaches for sharing good practices in support of efforts to mitigate and overcome the negative socioeconomic impact of the COVID-19 pandemic. The expected progress is presented in the performance measure below (see table 19.5).

Table 19.5  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
—	Regional consultation on development of the digital enabling portal to create an inventory of the needs of and support programmes available to small and medium-sized enterprises	First regional centre for entrepreneurship to support digitization and promotion of innovative solutions for the resurgence of micro-, small and medium-sized enterprises established (see <a href="https://coe.unescwa.org/index.html">https://coe.unescwa.org/index.html</a> )	Strengthened regulatory and promotion programmes in 2 member countries	3 national centres for entrepreneurship established  Strengthened networks of micro-, small and medium-sized enterprises in 7 Arab States
—	—	—	50 small and medium-sized enterprises are using the digital enabling portal to learn about access to existing governmental and non-governmental support programmes	Member States adopt the science, technology and innovation road map for the Arab countries

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: accelerated coherent ageing policies in the Arab region

19.43 Population ageing has already begun in some Arab countries and is projected to begin in the near future in most countries across the region. The share of older persons as a proportion of the total population is projected to increase to 15 per cent by 2050. Their number will increase from around 32 million today to more than 100 million in 2050. This accelerated shift leaves a very tight window for member States to enhance their policy responses to empower and protect older persons and ensure that they are not left behind. Over the past years, the subprogramme has contributed to building knowledge to ensure evidence-based policymaking in the region through

a series of regional and national research products, including the 2018 ESCWA report *Prospects of Ageing with Dignity in the Arab Region*, and two studies published between 2018 and 2019 entitled “Socioeconomic priorities of older persons in Lebanon” and “Towards an ageing strategy in Morocco.”

#### *Lessons learned and planned change*

19.44 The lesson for the subprogramme was that while research products provided a wealth of evidence on ageing in the Arab region and helped identify priority areas for intervention, additional efforts were needed to support the use of research findings for policymaking and their operationalization by member States, as evidenced by the slow progress in developing ageing-related policies. In applying the lesson, the subprogramme will expand its work to foster regional dialogue, peer learning and collaboration, including through leading the regional review of the Madrid Plan of Action. It will also focus its efforts on building member States’ capacities to develop ageing policies, including through developing a policy toolkit on mainstreaming ageing in policymaking and conducting a series of training workshops at the regional and national levels.

#### *Expected progress towards the attainment of the objective, and performance measure*

19.45 This work is expected to contribute to the objective, as demonstrated by seven Arab countries with coherent ageing policies (see figure 19.I).

Figure 19.I

#### **Performance measure: total number of Arab countries with coherent ageing policies (cumulative)**

(Number of countries)

### **Legislative mandates**

19.46 The list below provides all mandates entrusted to the subprogramme.

#### *General Assembly resolutions*

66/130	Women and political participation	67/144	Intensification of efforts to eliminate all forms of violence against women
66/131	Convention on the Elimination of All Forms of Discrimination against Women	68/133	Cooperatives in social development
66/285	Support by the United Nations system of the efforts of Governments to promote and consolidate new or restored democracies	68/137	Violence against women migrant workers
		68/139	Improvement of the situation of women in rural areas

68/143	Assistance to refugees, returnees and displaced persons in Africa	74/120	Promoting social integration through social inclusion
68/181	Promotion of the Declaration on the Right and Responsibility of Individuals, Groups and Organs of Society to Promote and Protect Universally Recognized Human Rights and Fundamental Freedoms: protecting women human rights defenders	74/121	Policies and programmes involving youth
		74/122	Implementation of the outcome of the World Summit for Social Development and of the twenty-fourth special session of the General Assembly
68/191	Taking action against gender-related killing of women and girls	74/125; 75/152	Follow-up to the Second World Assembly on Ageing
68/227; 74/235	Women in development	74/126	Improvement of the situation of women and girls in rural areas
69/142	Realizing the Millennium Development Goals and other internationally agreed development goals for persons with disabilities towards 2015 and beyond	74/127	Violence against women migrant workers
69/147	Intensification of efforts to eliminate all forms of violence against women and girls	74/128	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly
69/149	Trafficking in women and girls	74/134	The girl child
69/229	International migration and development	74/144	Implementation of the Convention on the Rights of Persons with Disabilities and the Optional Protocol thereto: accessibility
69/236	World Survey on the Role of Women in Development		
71/256	New Urban Agenda	74/148	Protection of migrants
72/144	Follow-up to the Second World Assembly on Ageing	74/237	Eradicating rural poverty to implement the 2030 Agenda for Sustainable Development
72/233	Implementation of the Second United Nations Decade for the Eradication of Poverty (2008–2017)	74/253	Enhancing accessibility for persons with disabilities to conferences and meetings of the United Nations system
73/195	Global Compact for Safe, Orderly and Regular Migration		

### *Security Council resolutions*

1325 (2000) 2535 (2020)

### *Economic and Social Council resolutions*

2011/5	The role of the United Nations system in implementing the internationally agreed goals and commitments in regard to gender quality and the empowerment of women	2016/3	Multi-year programme of work of the Commission on the Status of Women
2014/5	Promoting empowerment of people in achieving poverty eradication, social integration and full employment and decent work for all	2017/12	Promoting the rights of persons with disabilities and strengthening the mainstreaming of disability in the implementation of the 2030 Agenda for Sustainable Development
2015/3	Social dimensions of the New Partnership for Africa's Development	2018/9	Twenty-fifth anniversary of the Fourth World Conference on Women
2015/4	Promoting the rights of persons with disabilities and strengthening the mainstreaming of disability in the post-2015 development agenda	2018/10	Situation of and assistance to Palestinian women
2015/6	Future organization and methods of work of the Commission on the Status of Women	2019/2	Mainstreaming a gender perspective into all policies and programmes in the United Nations system
2015/10	2020 World Population and Housing Census Programme	2019/4	Future organization and methods of work of the Commission for Social Development
2015/21	Taking action against gender-related killing of women and girls	2019/6	Addressing inequalities and challenges to social inclusion through fiscal, wage and social protection policies
		2019/28	Situation of and assistance to Palestinian women

*Economic and Social Commission for Western Asia declarations and resolutions*

Muscat Declaration: Towards the Achievement of Gender Justice in the Arab Region (2016)	295 (XXVI)	Guiding declaration of the Economic and Social Commission for Western Asia on giving greater attention to youth policies: an opportunity for development
Arab Declaration on Progress in the Implementation of the Beijing Declaration and Platform for Action after 25 years (2019)		
286 (XXV) Gender statistics for equality and empowerment of women	304 (XXVII)	The role of participation and social justice in achieving sustainable development

**Deliverables**

19.47 Table 19.6 lists all deliverables, by category and subcategory, for 2021–2022 that are expected to contribute to the attainment of the objective stated above.

Table 19.6

**Subprogramme 2: deliverables for 2021–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)			<b>12</b>	<b>4</b>
1. Documents for the Committee on Women			6	2
2. Documents for the Committee on Social Development			6	2
<b>Substantive services for meetings</b> (number of three-hour meetings)			<b>42</b>	<b>36</b>
3. Meetings of the Committee on Social Development			4	—
4. Meetings of the Committee on Women			4	—
5. Meetings of standing and ad hoc expert groups on violence against women; women and peace and security; women's economic empowerment; social protection; poverty; inequality; fiscal policy; informality and the labour market; the future of work; urban development; disability; migration; ageing, youth; and other social issues			32	36
6. Gender discussion series			2	—
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)			<b>2</b>	<b>3</b>
7. Support for women refugees from the Syrian Arab Republic and vulnerable women and girls in host communities			1	—
8. Security Council resolution 1325 (2000) at 20: towards a renewed engagement with the women and peace and security agenda in the Arab region			1	—
9. Support to member States to develop a migration governance framework			—	1
10. Support to member States to develop an ageing policy framework			—	1
11. Support to countries on assessing skills and skills matching techniques			—	1
<b>Publications</b> (number of publications)			<b>5</b>	<b>4</b>
12. Publications on women's rights; social protection; poverty; inequality; the future of work; and migration			5	4

13. Technical materials on women's rights; social protection; poverty; inequality; the future of work; and migration			13	15
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> providing access to some 10,000 Arab experts through producing public goods in the area of social development, including a global social protection tracker.				

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
--------------------------	-----------------	----------------	-----------------	-----------------

#### D. Communication deliverables

**Outreach programmes, special events and information materials:** campaign, promotional material and closing ceremony for the 16 days of activism on gender-based violence event on gender justice attended by at least 50 regional stakeholders; events, campaigns and promotional materials on International Women's Day attended or accessed by at least 50 regional stakeholders; materials on violence against women; a youth art competition (in partnership with non-governmental organizations (NGOs)) on addressing violence against women; information graphs on key results of publications and expert group meetings.

**External and media relations:** commentaries on violence against women.

### Subprogramme 3 Shared economic prosperity

#### Objective

19.48 The objective, to which this subprogramme contributes, is to achieve equitable economic growth, amplify regional interconnectedness and integration, and advance the effective implementation of the Addis Ababa Action Agenda of the Third International Conference on Financing for Development in support of the 2030 Agenda.

#### Strategy

19.49 To contribute to the objective, the subprogramme will continue to provide assistance to member States with the monitoring, analysis and forecasting of macroeconomic and social variables and demonstrate the implications of national strategies, programmes and policies on economic growth and fiscal space for the achievement of the Sustainable Development Goals. It will provide advisory services and capacity-building on best practices for the allocation of resources, mainstreaming the Goals and mitigating structural economic challenges. Moreover, the subprogramme plans to expand its support to member States on monitoring their public social expenditure, by providing comprehensive mechanisms and user-friendly methodological tools, to allow for analysis of fiscal policy choices and their linkages to social expenditure and macrofiscal sustainability.

19.50 The subprogramme will provide advice and build capacity for greater compliance by member States with trade agreements to which they are parties and for negotiating the terms of and access to new intra-Arab and global trade agreements, such as the Arab Customs Union, the Deep and Comprehensive Free Trade Agreement with the European Union, and the African Continental Free Trade Area. To that end, the subprogramme will develop new, user-friendly toolkits for simulating the socio- and macroeconomic impact of participation in potential new trade agreements. Specifically, following the creation of a virtual help desk meant to accelerate trade negotiations and South-South exchange among member States and to engage the private sector and civil society in the negotiation processes of the Arab Customs Union, ESCWA will support Governments in the agreement development process. It will also improve its platform to monitor and evaluate Arab economic integration linked to productive economic and service sectors, making use of key performance indicators, indices and policies. The subprogramme will build on existing geographic information systems for transport networks and facilities in the Arab region, to assess and compare transport performance and transport connectivity between countries within the region and with the rest of the world. This will be paired with provision of advice to member States to improve road safety and facilitating their access to the United Nations Road Safety Fund.

19.51 The subprogramme also plans to monitor and assess progress in advancing financing for development outcomes and ensure that pathways to financing, including in the context of COVID-19, serve as a key means to implementing the 2030 Agenda. The subprogramme will continue to develop the Arab financing for development scorecard as a regional toolbox for assessing prime direct cross-border financial flows and indirect financing opportunity costs. In tandem, the subprogramme will continue to work on the implementation of integrated financing frameworks, provide technical support and respond to related member States' requests, including advancing the implementation of regional response measures and the menu of financing for development policy options. In doing so, the subprogramme will be further contributing to mapping the financing for development landscape, estimating the cost of nationally established goals and targets and mobilizing the resources needed to finance the Sustainable Development Goals.

19.52 The subprogramme plans to support member States on issues related to COVID-19, specifically in response to the devastating impact of COVID-19 on national economies and considering fiscal stimulus packages proposed by Governments across the globe which may impact trade in the Arab region, by assisting regional and national trade finance organizations to design appropriate and effective instruments and strategies to mitigate the impacts of COVID-19 on exports and enterprises and facilitate economic recovery. ESCWA will continue to review trade and trade-facilitation measures in order to assist countries in coordinating responses and integrating specific provisions in trade integration schemes. Moreover, in connection with the debt swap initiative launched to address the adverse impact of the pandemic on fiscal space challenges for low- and middle-income countries, the subprogramme will promote debt swaps for climate finance as a potential tool for debt reduction, in parallel with improving climate finance.

19.53 The above-mentioned work by ESCWA and its partners to develop and promote sustainable solutions is expected to result in:

- (a) Fiscal policies that are connected to economic diversification, social development and the Sustainable Development Goals, while ensuring macroeconomic stability;
- (b) Greater human and institutional capacity among Arab Governments to design and implement sound trade, logistics and transport policies that increase connectivity and contribute to economic growth and prosperity;
- (c) Integrated financing frameworks for the implementation of national development plans and related targets in line with the 2030 Agenda.

19.54 The planned support on issues related to COVID-19 is expected to result in:

- (a) Mitigation of the negative impact of the pandemic on trade flows;
- (b) Adoption, by two or more member States, of specific policies and regulations aimed at facilitating trade during crises, including health emergencies;
- (c) One member State and its creditor(s) set aside a certain amount of debt for a debt swap for a climate or development finance initiative.

## **Planned results for 2022**

19.55 The planned results for 2022 include result 1, which is an update of the result presented in the preceding proposed programme plan, and result 2, which is a new planned result.

**Result 1: social expenditure priorities in coherence with macro fiscal policy<sup>3</sup>**

19.56 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will collect and update data on the social expenditure monitoring digital platform and populate the platform with data on additional member States. It will continue to assess and inform areas of budget allocation reforms and support the revision of line ministries' budget allocation frameworks to include beneficiaries. The subprogramme will finalize two studies on assessing efficiency and effectiveness of social expenditure (in Jordan and Tunisia) and will conduct national data and methodology workshops for additional countries. In 2022, the subprogramme plans to support two additional member States to establish a social expenditure monitoring platform. In addition, a regional workshop will be organized to discuss how to link social expenditure monitoring to policy analysis and reform, followed by national capacity development training workshops. The expected progress is presented in the performance measure below (see table 19.7).

Table 19.7  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
No comprehensive analysis of social expenditure in relation to beneficiaries and purpose	Arab region member States provided with a common social expenditure monitoring framework	2 member States (Jordan and Tunisia) began applying social expenditure monitoring methodology to monitor budget expenditure on social priorities	2 member States rebalance social expenditures across priorities between 2021 and 2022 budgets, applying social expenditure monitoring	More than 2 member States revise budget allocations, using social expenditure monitoring, with the aim of rebalancing social expenditures across priorities

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

**Result 2: debt swap for improved resources for climate and development finance**

19.57 The accumulation of debt and rising debt service obligations are very high for low- and middle-income countries in the Arab region. Increasing costs of borrowing and declining concessional loans have contributed to worsen the situation, while budgets for development expenditure and climate-related investments have been constrained. Loss of growth and revenues due to the recent global economic slowdown, conflicts and crises in parts of the Arab region, weak public finance management and the adverse economic impact of the COVID-19 crisis all contributed to worsen the fiscal space in many countries, at a time when demand for financing for the Sustainable Development Goals, including climate finance, is high. During the past three years, the subprogramme has developed knowledge products and research that highlighted this complex situation. In 2020, it disseminated policy briefs advocating for debt swap as an important mechanism to free up fiscal space and mitigate the impact of the pandemic. It developed a new technical tool on debt-for-climate and debt-for-development swaps and initiated discussions with member States

<sup>3</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

and other stakeholders on the issue of debt swaps as an effective policy option to reduce debt burden and improve climate finance.

#### *Lessons learned and planned change*

19.58 The lesson for the subprogramme was that while research and knowledge products strengthened the understanding of the challenge of debt and climate finance issues in the Arab region, enhanced engagement with member States and strategic partners at the national level will be required to effectively approach debt swaps for climate and development finance. In addition, broader support will have to be sought at the regional and global levels to support and scale up the initiative, with the involvement of key stakeholders such as development financial institutions and the Green Climate Fund. In applying the lesson, the subprogramme will further connect research to policy action and advocacy at the national level, using the technical tool on debt-for-climate swaps to start a discussion with member States that are highly indebted. It will also increase engagement with key stakeholders that can facilitate and help to build support for the debt swap mechanism, such as bilateral and multilateral creditors, regional institutions and the Green Climate Fund.

#### *Expected progress towards the attainment of the objective, and performance measure*

19.59 This work is expected to contribute to the objective, as demonstrated by one or more member States agreeing to set aside an amount of debt for a debt swap for a climate or development finance initiative (see table 19.8).

Table 19.8  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)</i>	<i>2022 (planned)</i>
Greater awareness of member States with respect to fiscal policy and debt sustainability	Increased understanding among member States of debt vulnerabilities	3 member States (Egypt, Jordan and Tunisia) expressed interest in operationalizing the debt-swap mechanism	At least 1 member State starts operationalizing the implementation of a debt swap for a climate or development finance initiative	1 or more additional member States agree to set aside an amount of debt to swap for a climate or development finance initiative

### **Legislative mandates**

19.60 The list below provides all mandates entrusted to the subprogramme.

#### *General Assembly resolutions*

<a href="#">69/213</a>	Role of transport and transit corridors in ensuring international cooperation for sustainable development	<a href="#">72/212</a>	Strengthening the links between all modes of transport to achieve the Sustainable Development Goals
<a href="#">69/227</a>	Towards a New International Economic Order	<a href="#">72/267</a>	The role of diamonds in fuelling conflict: breaking the link between the illicit transaction of rough diamonds and armed conflict as a contribution to prevention and settlement of conflicts
<a href="#">72/167</a>	The right to development		
<a href="#">72/208</a>	Follow-up to and implementation of the outcomes of the International Conferences on Financing for Development	<a href="#">72/271</a>	Improving global road safety

## Subprogramme 4

### Statistics, the information society and technology

#### Objective

19.62 The objective, to which this subprogramme contributes, is to strengthen the development of official statistical frameworks, improve the quality and availability of statistics and advance the information society by accelerating the integration of technology and innovation for sustainable development in the Arab region.

#### Strategy

19.63 To contribute to the objective, the subprogramme will promote the use of diverse data sources in official statistics; digitalization of data services; electronic commerce; and innovation based on information and communications technology (ICT), artificial intelligence and frontier technology; with a focus on the achievement of Sustainable Development Goals. This will include normative work and capacity development on the use of big and open data and geospatial technology to underpin national statistical strategies and the use of official statistics to monitor and follow up on the implementation of the 2030 Agenda. The subprogramme will also continue providing technical assistance to Arab countries in the use of technology in censuses and surveys, sectoral and aggregated statistics, and a wide application of register-based data collection.

19.64 The subprogramme will also work towards a greater use of digital development approaches in addressing social issues and achieving greater digital inclusion by its member States. Through the ESCWA Technology Centre, the subprogramme will facilitate the exchange of experience and technical cooperation and support in the area of entrepreneurial and environmentally friendly technologies for sustainable development; provide a platform for round-table dialogues to address regional challenges related to innovation and technology, such as the varying level of development across the region, the digital gap and facing a development restricted by conflicts and crises; and mobilize resources and develop partnerships in support of these activities.

19.65 The subprogramme will advocate greater compliance with international statistical standards and provide policy recommendations for more consistent data and statistics for the region. To this end, it will act as the regional custodian of the Fundamental Principles of Official Statistics (General Assembly resolution [68/261](#)) and will utilize the established intergovernmental networks of statistical experts to

boost the impact of statistical capacity development for an effective implementation of the Arab regional action plan for sustainable development data.

19.66 The subprogramme will develop and promote technical solutions, platforms and mechanisms for advancing the utilization of science, technology and innovation in inducing social, economic and political development in the Arab region. In collaboration with specialized regional organizations, the subprogramme will assist member States in devising policies and strategies that will enable them to benefit from frontier technology, artificial intelligence, ICT and innovation, as well as the mainstream technologies. The subprogramme will act as a lead actor in Arab Internet governance, digital government and transformation, electronic governance and advanced knowledge production and dissemination. In this respect, the subprogramme will act as a catalyst for regional platforms and a policy dialogue to reach regional consensus, provide policy advice, develop policy tools, provide technical support and assistance to member States and produce innovative knowledge products.

19.67 The subprogramme also plans to enhance the capacities of Arab policymakers to apply new data, statistics, modern technology and knowledge products, tools and techniques, while remaining mindful of the consequences of technology on people and promoting greater digital inclusion, in accordance with the leave no one behind principle and protection of the rights of people in the technology and information age.

19.68 The above-mentioned work is expected to result in:

(a) Strengthened coherence and coordination of statistical activities by member States, based on the national statistical frameworks and in cooperation with regional statistical agencies, to cover the data needs of the 2030 Agenda;

(b) Greater compliance with international statistical standards and recommendations leading to more consistent data about the region and more effective use of statistics in policymaking;

(c) Effective national and regional plans and strategies with improved synergies and nexus between science, technology and innovation, supporting transformation to knowledge and digital economies, building science, technology and innovation ecosystems and promoting technology-based entrepreneurship and small and medium-sized enterprises in the Arab region;

(d) Improved capacity of Arab policymakers to apply new data, statistics, technology and knowledge products, tools and techniques to inform policy decisions to deal with the medium- and longer-term ramifications of the COVID-19 pandemic;

(e) Enhanced capacity to produce and utilize modern technology, data and statistics to deal with the COVID-19 pandemic and, at the same time, minimize the negative consequences of technology on people;

(f) Greater digital inclusion, in accordance with the leave no one behind principle and protection of the rights of people in the technology and information age.

## **Planned results for 2022**

19.69 The planned results for 2022 include result 1, which is an update of the result presented in the preceding proposed programme plan, and result 2, which is a new planned result.

### Result 1: regional knowledge and data repository to strengthen government decision-making processes<sup>4</sup>

19.70 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will focus on enhancing the existing user interface of the ESCWA data portal by including references to the actual data sources and offering additional parsing options. It will also engage with relevant stakeholders at the national level to increase the coverage of the data, thus limiting existing data blanks. Concurrently, the subprogramme will invest in the incorporation of predictive methods of statistical estimation, also known as nowcasting, in the existing tool. Providing such estimates is vital for policymaking and will enable member States to identify overall trends in the absence of or pending availability of the actual statistical data. ESCWA will work with member States on expanding and optimizing the content of the portal so as to increase its usefulness, and on greater automation of processes linked to data-sourcing and processing. Furthermore, pending commitment and participation of other United Nations entities in the Arab region, the subprogramme intends to expand the scope and reach of the portal by including all data available at the national and regional levels in a single data hub. The expected progress is presented in the performance measure below (see table 19.10).

Table 19.10  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
The Secretary-General, in his report on the repositioning of the United Nations development system, requests regional commissions to develop regional knowledge repositories	United Nations development system entities in the region request ESCWA to lead the knowledge management task force of the regional collaborative platform to conceptualize the Arab regional knowledge repository	Data hub, a publicly accessible knowledge and data repository (portal), available for the Arab region	Deployment of the knowledge repository as a publicly accessible regional good (achieved in 2020)  Increased number of member States using the knowledge repository to inform the development of sectoral policies	At least 50 per cent of member States use the knowledge repository to inform the development of sectoral policies

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 2: improving production and communication of data on the Sustainable Development Goals to leave no one behind

19.71 Provision of quality, transparent and disaggregated evidence is vital for policymaking in the context of the 2030 Agenda, in particular in view of the commitment to leave no one behind. Making decisions and reporting on the progress to achieve the Sustainable Development Goals comes with significant data and statistical challenges, including information gaps and lack of data timeliness and quality. With one decade left until 2030, less than half of the Arab countries have

<sup>4</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

developed national reporting platforms on the Goals. The lack of national reporting platforms not only impedes the process of monitoring and reporting, but also hinders analysis, which is vital for policy formulation.

#### *Lessons learned and planned change*

19.72 The lesson for the subprogramme was that it needed to ensure commitment and buy-in at the highest levels of government; this is a key factor in improving the production and dissemination of data on the Sustainable Development Goals, in addition to capacity-building, development of tools and enhancing communication and collaboration. In applying the lesson, the subprogramme will tailor its bilateral technical assistance activities to respond to country-specific needs, by improving existing data collection tools, increasing data generation from new sources and expanding dissemination of disaggregated data on the Goals. Specifically, as part of its commitment to enhancing availability of high-quality, transparent data for the Arab region, the subprogramme will engage with member States at the decision-making level to ensure buy-in for the development of new country-owned reporting platforms on the Goals and concerning further improvements through data availability and data flow within the existing national reporting platforms. Moreover, ESCWA will extend its capacity-building activities to improve data production and modernization of national statistical systems, either by upgrading existing tools or developing new ones to reduce data gaps. This will in turn improve data analysis, reduce reporting costs, avoid duplication of efforts and increase transparency. National engagement will be complemented with capacity-building at the subregional level, including by identification and sharing of good practices.

#### *Expected progress towards the attainment of the objective, and performance measure*

19.73 This work is expected to contribute to the objective, as demonstrated by the availability of at least 50 per cent of country data in the official global database on the Sustainable Development Goals (see figure 19.II).

Figure 19.II

#### **Performance measure: percentage of country data available in the official global database on the Sustainable Development Goals**

(Percentage)

#### **Legislative mandates**

19.74 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolutions*

68/261	Fundamental Principles of Official Statistics	72/242	Impact of rapid technological change on the achievement of the Sustainable Development Goals
68/302	Modalities for the overall review by the General Assembly of the implementation of the outcomes of the World Summit on the Information Society	74/35	Role of science and technology in the context of international security and disarmament
69/204	Information and communications technologies for development	74/197	Information and communications technologies for sustainable development
69/266	A global geodetic reference frame for sustainable development	74/207	Follow-up to and implementation of the outcomes of the International Conferences on Financing for Development
69/282	World Statistics Day	74/229	Science, technology and innovation for sustainable development
70/125	Outcome document of the high-level meeting of the General Assembly on the overall review of the implementation of the outcomes of the World Summit on the Information Society		

*Economic and Social Council resolutions and decisions*

2006/6	Strengthening statistical capacity	2015/10	2020 World Population and Housing Census Programme
2011/24	Committee of Experts on Global Geospatial Information Management	2015/216	Report of the Statistical Commission on its forty-sixth session and the provisional agenda and dates for the forty-seventh session of the Commission
2013/21	Fundamental Principles of Official Statistics		
2014/31	A global geodetic reference frame for sustainable development	2016/8	Rethinking and strengthening social development in the contemporary world
2014/35	Establishment of an intergovernmental committee on technology for development in the Economic and Social Commission for Western Asia	2017/7	Work of the Statistical Commission pertaining to the 2030 Agenda for Sustainable Development
2014/240	Report of the United Nations Group of Experts on Geographical Names on its twenty-eighth session, and the dates, venue and provisional agenda for the twenty-ninth session	2019/19	Promoting technical assistance and capacity-building to strengthen national measures and international cooperation to combat cybercrime, including information-sharing
2014/241	Amendment to the rules of procedure of the United Nations Group of Experts on Geographical Names	2019/24	Assessment of the progress made in the implementation of and follow-up to the outcomes of the World Summit on the Information Society
2014/251	Report of the Committee of Experts on Global Geospatial Information Management on its fourth session and provisional agenda and dates for the fifth session of the Committee	2019/25	Science, technology and innovation for development

*Economic and Social Commission for Western Asia resolutions*

276 (XXIV)	Strengthening statistical capacities in the ESCWA region	287 (XXV)	Strengthening statistical capacities for evidence-based policymaking
283 (XXV)	ESCWA member country compliance with international standards for enhancing national statistical systems	294 (XXVI)	Establishment of the ESCWA technology centre
		297 (XXVI)	Arab MDG monitor for societal progress
286 (XXV)	Gender statistics for equality and empowerment of women	306 (XXVII)	Development of the Arab Internet Governance Forum process and sustaining efforts in the Arabic domain names field

**Deliverables**

19.75 Table 19.11 lists all deliverables, by category and subcategory, for 2021–2022 that are expected to contribute to the attainment of the objective stated above.

Table 19.11

**Subprogramme 4: deliverables for 2021–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Substantive services for meetings</b> (number of three-hour meetings)			<b>38</b>	<b>31</b>
1. Meetings of the ESCWA Technology Centre Advisory Board			2	1
2. Meetings of the ESCWA Technology Centre Technical Committee			2	2
3. Meetings of the Statistical Bureau of the Statistical Committee			2	2
4. Meetings of the standing working groups of the Statistical Committee on economic statistics, demographic and social statistics and disability in the Sustainable Development Goals			10	8
5. Meetings of the Task Force on SDG Data of the Regional Coordination Platform for Arab States			4	4
6. Meetings of the Regional Committee of United Nations Global Geospatial Information Management for the Arab States			4	2
7. Meetings of the League of Arab States on Internet governance; automated digital network systems; the digital economy; innovation policies; enhanced ICT cooperation; ICT strategy; science, technology and innovation; and ICT for the Sustainable Development Goals, digital content in Arabic and entrepreneurship			4	4
8. Meetings of standing and ad hoc expert groups on Arab digital development; regulation and legislation to promote the information society; Internet governance; innovation policies; frontier technologies; technological entrepreneurship; technology transfer; innovation; and other issues relating to technology for development			10	8
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)			<b>2</b>	<b>2</b>
9. ESCWA Technology Centre			1	1
10. International Comparison Program, including on the harmonized consumer price index			1	1
<b>Publications</b> (number of publications)			<b>4</b>	<b>4</b>
11. Publications (including e-publications) on statistics and indicators; non-traditional data sources; national accounts; monitoring of and follow-up on the 2030 Agenda; Arab digital development; and technology and innovation for sustainable development			4	4
<b>Technical materials</b> (number of materials)			<b>9</b>	<b>7</b>
12. Technical materials, briefs and reports on statistics and indicators; non-traditional data sources; national accounts; monitoring of and follow-up on the 2030 Agenda; Arab digital development; and technology and innovation for sustainable development			8	6
13. Development and testing of a methodology to identify clear and accurate baselines for national targets and relevant indicators			1	1
<b>C. Substantive deliverables</b>				
<b>Databases and substantive digital materials:</b> ESCWA Online Statistical Information System and other technology-based platforms providing access to information, knowledge and capacity-building to all 20 member States and international stakeholders.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> semi-annual newsletter on price statistics; semi-annual newsletter on gender statistics; annual statistics newsletter; technology bulletin; Internet governance outcome material targeting a community of practice of at least 500 stakeholders (experts, representatives from members States) in the Arab region.				

## **Subprogramme 5**

### **2030 Agenda and Sustainable Development Goals coordination**

#### **Objective**

19.76 The objective, to which this subprogramme contributes, is to accelerate progress towards sustainable development in the Arab region in line with the 2030 Agenda and to advance intraregional collaboration and a multi-stakeholder approach to key regional and subregional sustainable development issues.

#### **Strategy**

19.77 To contribute to the objective, the subprogramme will continue to support the alignment of national development plans with the 2030 Agenda and its principles, and advocate for an integrated approach to the achievement of, follow-up to and review of the Sustainable Development Goals. Building on the results of the Commission's activities on the 2030 Agenda in the past years, including the annual Arab Forum for Sustainable Development and the Arab sustainable development report, the subprogramme will continue to demonstrate the necessity and value added of a nationally owned, integrated approach to the implementation of, follow-up to and review of the 2030 Agenda.

19.78 The subprogramme will improve and add platforms to strengthen consensus-building, peer learning and knowledge transfer between Arab countries. It will support an expanding set of stakeholders, primarily parliamentarians and civil society, but also the private sector and academics, to ensure understanding of and engagement with the 2030 Agenda by organizing forums and meetings and creating learning opportunities for different groups of stakeholders of the 2030 Agenda. The subprogramme will continue to use the Arab Forum for Sustainable Development, organized in close collaboration with regional United Nations entities and the League of Arab States, as an annual opportunity for Governments to outline and exchange experiences and good practice in support of the follow-up on and review of the 2030 Agenda. The subprogramme will also harness the respective support of the Arab NGO Network for Development and of the League of Arab States, the Islamic Development Bank, UNDP and the Inter-Parliamentary Union to continue providing the opportunity for regional platforms of civil society organizations and of parliamentarians to feed into larger, multi-stakeholder discussions and engage with government representatives.

19.79 The subprogramme plans to support member States on issues related to COVID-19 by continuing to develop and disseminate knowledge and policy products on measures and opportunities to accelerate implementation of the 2030 Agenda in the COVID-19 context and build resilience to crises; and to provide space, through existing platforms for multi-stakeholder engagement and dialogue, to refocus the debate on the central role of Sustainable Development Goal progress in tackling the socioeconomic impact of COVID-19.

19.80 The above-mentioned work is expected to result in:

(a) Improved institutional coordination and evidence-based national policies and processes that reflect an understanding of the key principles of leaving no one behind, fully respecting a human rights-based and multi-stakeholder approach to sustainable development and a more integrated formulation of strategies and targets across the Sustainable Development Goals;

(b) Increased ability of government and non-government stakeholders to partake in the implementation of, follow-up to and review of the 2030 Agenda in Arab

countries; and increased opportunities for different groups to engage with each other across national, subregional, regional and global forums.

19.81 The planned support on issues related to COVID-19 is expected to result in the formulation of recovery plans that, in addition to mitigating the socioeconomic impact of the pandemic itself, build on and integrate the principles and goals of the 2030 Agenda.

## Planned results for 2022

19.82 The planned results for 2022 include result 1, which is an update of the result presented in the preceding proposed programme plan, and result 2, which is a new planned result.

### Result 1: peer-learning and capacity-building for the new generation of voluntary national reviews<sup>5</sup>

19.83 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards this objective, the subprogramme will support the acceleration of progress towards sustainable development in the Arab region in line with the 2030 Agenda, through the advancement of intraregional collaboration and the adoption of a multi-stakeholder approach to key issues. To do so, the subprogramme will continue to facilitate the work of the Arab community of practice on voluntary national reviews, by providing technical advice on the voluntary national review processes to its members, disseminating knowledge material and promoting regular communication and exchange of good practices and lessons learned between them. It will further enhance and sustain exchanges between government officials who are members of the community of practice by launching a web platform that is integrated into a wider learning website on the Sustainable Development Goals. The subprogramme will enable State representatives across the region to connect and continue sharing achievements and discussing issues of concern, with the aim of building common positions and accessing knowledge and information in support of their follow-up and review work on sustainable development. The expected progress is presented in the performance measure below (see table 19.12).

Table 19.12  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Organization of a special session in addition to a high-level dialogue on voluntary national reviews and lessons learned from the process	Member States call for enhanced peer learning on voluntary national reviews during the Arab Forum for Sustainable Development, held in April 2019, and the ESCWA Executive Committee meeting held in June 2019	Launch of the community of practice on voluntary national reviews in the Arab region, with exchanges between government officials	Enhanced and productive interaction between government stakeholders coordinating the voluntary national review process and preparing national Sustainable Development Goal reports	Sustained interactions and exchanges between government stakeholders coordinating the voluntary national review process and/or preparing national Sustainable Development Goal reports

<sup>5</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
	Regional capacity-building workshop on voluntary national reviews in October		Positive feedback on the effectiveness of the community of practice (collected through regular surveys)	
	Agreement among member States to establish a community of practice coordinated by ESCWA			

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: recovery and post-COVID-19 development planning integrates the 2030 Agenda and the Sustainable Development Goals**

19.84 Arab Governments have demonstrated their commitment to adapt the 2030 Agenda at the national level and engage actively in follow-up and review activities. However, the ESCWA *Arab Sustainable Development Report 2020* showed that progress on achieving the Sustainable Development Goals remained slow, with the region lagging behind on critical targets including employment of women and youth, inequality reduction and the shift towards more environmentally friendly economies. The COVID-19 crisis exposed and amplified existing structural barriers to achieving the Goals with a strong impact in countries with non-productive economies, fragmented social protection systems, water scarcity and climate vulnerabilities. Arab countries are expected to engage by 2022 in a process of both accelerating progress on the Goals and reorienting their development plans and policies in response to delays and/or regression caused by the pandemic. In 2020, the subprogramme organized a series of sustainable development dialogues to outline ways in which progress on the 2030 Agenda could have mitigated the impact of the crisis. It also illustrated how accelerated regional efforts to achieve the Goals with the integration of human rights, inclusion and sustainability could enhance recovery from COVID-19 and build resilience to future shocks.

### *Lessons learned and planned change*

19.85 The lesson for the subprogramme was that continued emphasis on the 2030 Agenda in its totality is needed, rather than a narrow focus on the achievement of particular Sustainable Development Goals. Given the impact of COVID-19, it became clear that the subprogramme had to increase its strategic focus on intersectoral approaches and policy coherence, fully respecting human rights, giving priority to development and social protection, data collection and measurement efforts, and focusing on sustainability in economic planning. In applying the lesson, the subprogramme will support a comprehensive implementation of the 2030 Agenda in the region, with a renewed focus on its core principles and ensuring their full integration within COVID-19 recovery plans. To do so, ESCWA will continue to collect data and produce analysis on policy options and will be an advocate with member States for the use of inclusive and coherent policy measures. It will ensure that the Arab Forum for Sustainable Development highlights policy options and practices that support inclusive and sustainable recovery. Research leading to the production of the 2023 Arab sustainable development report will focus on analysing policy measures that address structural barriers to the achievement of the 2030 Agenda.

*Expected progress towards the attainment of the objective, and performance measure*

19.86 This work is expected to contribute to the objective, as demonstrated by at least one additional COVID-19 recovery plan that explicitly integrates the 2030 Agenda and seeks to accelerate progress on the Sustainable Development Goals (see figure 19.III).

Figure 19.III

**Performance measure: total number of COVID-19 recovery plans in the Arab region integrating the 2030 Agenda to accelerate progress on the Sustainable Development Goals (cumulative)**

(Number of plans)

## Legislative mandates

19.87 The list below provides all mandates entrusted to the subprogramme.

### *General Assembly resolutions*

70/1	Transforming our world: the 2030 Agenda for Sustainable Development	74/298	Review of the implementation of General Assembly resolution 67/290 on the high-level political forum on sustainable development, resolution 70/299 on the follow-up and review of the 2030 Agenda for Sustainable Development at the global level and resolution 72/305 on the strengthening of the Economic and Social Council
71/313	Work of the Statistical Commission pertaining to the 2030 Agenda for Sustainable Development		
74/4	Political declaration of the high-level political forum on sustainable development convened under the auspices of the General Assembly		

### *Economic and Social Council resolution*

2016/10	Economic and Social Commission for Western Asia strategy and plan of action on the 2030 Agenda for Sustainable Development
---------	--

### *Economic and Social Commission for Western Asia resolutions*

314 (XXVIII)	The Arab Forum on Sustainable Development	327 (XXIX)	Working mechanisms of the Arab Forum for Sustainable Development
--------------	---	------------	--

## Deliverables

19.88 Table 19.13 lists all deliverables, by category and subcategory, for 2021–2022 that are expected to contribute to the attainment of the objective stated above.

Table 19.13

**Subprogramme 5: deliverables for 2021–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)			—	—
<b>Substantive services for meetings</b> (number of three-hour meetings)			<b>13</b>	<b>15</b>
1. Meetings of the Arab Forum for Sustainable Development			9	8
2. Arab Regional Parliamentary Forum on the 2030 Agenda			—	4
3. Meetings of standing expert groups on the 2030 Agenda			4	3
<b>B. Generation and transfer of knowledge</b>				
<b>Seminars, workshops and training events</b> (number of days)			<b>4</b>	—
4. Arab Regional Parliamentary Forum on the 2030 Agenda			4	—
<b>Technical materials</b> (number of materials)			<b>2</b>	<b>2</b>
5. Technical papers, briefs and bulletins on sustainable development			2	2
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> advice to the Arab Forum for Sustainable Development task force whereby the Forum is attended by more than 350 participants from different stakeholder groups and gives voice to the region at the global level; advice to global and regional events on the implementation of and follow-up to the 2030 Agenda, including the high-level political forum on sustainable development attended by about 2,000 participants and Arab Sustainable Development Week attended by over 1,000 participants.				
<b>Databases and substantive digital materials:</b> Arab Sustainable Development Goals electronic gateway, including training material in the form of self-paced online courses on the 2030 Agenda and Sustainable Development Goals and guidelines on the implementation of the 2030 Agenda, all in the Arabic language.				

## Subprogramme 6

### Governance and conflict prevention

#### Objective

19.89 The objective, to which this subprogramme contributes, is to advance just, peaceful and inclusive societies, especially for people living under occupation or in conflict or post-conflict settings; to improve governance and strengthen effective, efficient and accountable public institutions; and to enhance service delivery.

#### Strategy

19.90 To contribute to the objective, the subprogramme will continue to focus on conflict prevention. It will periodically assess the impact of conflict and occupation on the capacity of member States to achieve the Sustainable Development Goals and to define strategic options for promoting inclusive human development in the Arab region, grounded in the global human security perspective. The subprogramme will propose integrated actions and policies that cultivate an enabling environment in which people's rights, freedoms and socioeconomic opportunities can thrive. This will be achieved through the provision of in-depth, holistic analyses of the developmental, institutional and security challenges faced by the region, that capture the dimensions of good governance and human security as essential prerequisites for economic and social development and environmental sustainability. These analyses will also inform broad policy recommendations aimed at enhancing the role of public institutions in these areas. Moreover, the subprogramme will support member States in evaluating

human development achievements and examining the nexus between human security and human development. This will be achieved by developing an analytical tool to enable policymakers to identify vulnerabilities and design targeted policies for tackling them based on adapted global indices related to human development, governance, environmental sustainability, political instability and the impact of conflict on development in the region.

19.91 ESCWA will advance national governance and resilience capacities to mitigate specific shocks, assess and improve the effectiveness of crisis-response policies and lower risks associated with emerging socioeconomic and governance challenges, which are often transboundary and linked to natural disasters, health threats and conflict and non-conflict drivers of hazards and vulnerability. It will also enhance the capacities of Palestinian institutions to mitigate the impact of the Israeli occupation on prospects for development and the attainment of the Sustainable Development Goals.

19.92 The subprogramme will also raise awareness and support knowledge-sharing on the interdependency between institutional quality and development gains. By providing member States with technical assistance, capacity-building and actionable policy advice, it will seek to improve institutional effectiveness and identify best policy options to increase the quality, inclusiveness and accountability of institutions. The subprogramme will also promote dynamic markets and facilitate cooperation among member States, regional entities and other partners working in the field of competition and consumer protection. It will continue to facilitate the progress towards regional capacity-building through the annual Competition Forum for the Arab Region, which remains a central platform for knowledge exchange in the region. The subprogramme will continue to strengthen harmonized national competition reforms, in line with international standards and taking into consideration global economic trends and challenges. It will do so with a view to establishing a regional competition framework that reflects the development needs of the Arab region and contributes to the modernization of Arab trade integration, inclusive sustainable development and growth.

19.93 The subprogramme will also provide member States with policy advice, knowledge dissemination and capacity-building on digital government transformation and innovation. It will offer measurement tools to assess the progress achieved in digital transformation and guide the advancement of digital government services. Based on the Commission's open government framework, the subprogramme will build the capacity of member States to develop open government strategies. It will disseminate knowledge on the impact of open government on socioeconomic development and promote best practices for achieving the Sustainable Development Goals, in particular targets under Goals 16 and 17.

19.94 The subprogramme plans to support member States on issues related to COVID-19 by devising tools for public institutions to assess the effectiveness of policies deployed in response to the pandemic and, by extension, help to advance national institutional capacities to addresses the pandemic's socioeconomic and governance ramifications.

19.95 The above-mentioned work is expected to result in:

- (a) Reduced exposure of member States to the sources and drivers of hazards and vulnerability;
- (b) Enhanced conflict prevention through evidence-based risk management by policymakers;
- (c) Stronger institutions and more robust, nationally owned reform initiatives that are harmonized, promote fairer competition and contribute to regional integration and economic growth;

(d) Improvement in the services provided by public institutions, with enhanced performance and accountability.

19.96 The planned support on issues related to COVID-19 is expected to result in:

(a) Enhanced integration and collaboration among stakeholders through whole-of-government and whole-of-society approaches and national-to-local coordination in the fight against COVID-19 and its socioeconomic consequences;

(b) Enhanced capacities of key public institutions, senior policymakers and public servants to design and implement coherent, coordinated and harmonized national policies for achieving inclusive human development;

(c) Increased knowledge of the institutional arrangements for implementation of the Sustainable Development Goals in the Arab region.

## Planned results for 2022

19.97 The planned results for 2022 include result 1, which is an update of the result presented in the preceding proposed programme plan, and result 2, which is a new planned result.

### Result 1: public policy outcomes serve the Arab region through effective competition<sup>6</sup>

19.98 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme's work will further support regional capacity-building and knowledge exchange on effective consumer protection and better harmonized competition policies. It will do so by convening jointly with OECD and the United Nations Conference on Trade and Development (UNCTAD) annual sessions of the Competition Forum for the Arab Region, and by delivering webinars on the impact of COVID-19 on competition and consumer protection policies. The subprogramme will also carry out advocacy and capacity-building activities and strengthen its collaboration with partners such as OECD and UNCTAD, in support of formulation of harmonized regional competition recommendations and policy reforms that integrate the development needs of the Arab region and the core principles and objectives of the 2030 Agenda. The expected progress is presented in the performance measure below (see table 19.14).

Table 19.14  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
No harmonized approach to competition assessments in the Arab region	No harmonized approach to competition assessments in the Arab region	1 member State initiated an assessment aimed at strengthening and harmonizing its national competition policy framework	Ratification by Arab countries of a set of recommendations on competition assessment that build on OECD guidelines	At least 4 member States ratify a set of recommendations on competition assessments and policy reforms based on international standards

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

<sup>6</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

## **Result 2: enhanced integration of transboundary risk planning, management and prevention into national development plans and policies**

19.99 Transboundary conflict and non-conflict drivers of hazards and vulnerability threaten the socioeconomic development trajectories of a number of Arab countries. In order for countries to reach their development targets in line with the 2030 Agenda, development planners, policymakers and other stakeholders need to understand the key drivers of hazards and vulnerability and better tailor their social, economic, environmental and governance plans and policies to enhance prevention, mitigation, response and resilience. In that regard, since 2019, the subprogramme produced a flagship publication and technical papers and undertook expert group meetings on the subject matter, involving experts and senior civil servants to validate the concept and strengthen the development of the risk assessment tools to be utilized. An array of risk assessment tools was reviewed and contextualized for the ESCWA region. Enhancing risk mitigation and prevention capacities among national development actors and ensuring that policy options could be drawn from the risk tools being constructed were highlighted.

### *Lessons learned and planned change*

19.100 The lesson for the subprogramme was that in addition to geographical perspectives a more actor-centric perspective was needed to enhance risk assessment and mitigation frameworks, including by supporting national institutions and enhancing senior civil servants' capacities for prevention. Regional cooperation also had to be further strengthened, highlighting the interconnectedness of Sustainable Development Goal 16 with other 2030 Agenda goals and targets. In applying the lesson, the subprogramme will, in collaboration with subprogramme 1, develop knowledge products on the risks associated with conflict, COVID-19, climate change, water scarcity, food security and forced displacement, and ensure the design of risk assessment tools, including approaches to risk management and prevention. The subprogramme will train a cohort of senior civil servants from crisis management units and planning entities in at least two member States on the use of the tools, shock management and risk prevention. It will also launch and facilitate a regional technical dialogue platform to periodically assess the risks associated with transboundary conflict and non-conflict drivers of hazards and vulnerability and offer relevant stakeholders, across its member States, access to risk mitigation and prevention policy options by drawing on state-of-the-art approaches to risk analysis, thereby enhancing evidence-based decision-making on risk management.

### *Expected progress towards the attainment of the objective, and performance measure*

19.101 This work is expected to contribute to the objective, as demonstrated by at least one additional member State integrating the risk assessment tools that address transboundary conflict and non-conflict drivers of hazards and vulnerability into its national development strategy and the regional technical dialogue platform launched to enable peer exchanges among member States on transboundary risk management (see table 19.15).

Table 19.15  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
—	Expert group validated the approach on the transboundary risk assessment and management framework	Arab member States gained access to contextualized (for the region) risk assessment tools and gained a better understanding of qualitative risk assessment approaches	At least 1 member State integrates the developed risk assessment tools that address transboundary conflict and non-conflict drivers of hazards and vulnerability into its national development strategy	At least 1 additional member State integrates the developed risk assessment tools that address transboundary conflict and non-conflict drivers of hazards and vulnerability into its national development strategy  Regional technical dialogue platform is launched and enables peer exchanges among member States on transboundary risk management

## Legislative mandates

19.102 The list below provides all mandates entrusted to the subprogramme.

### General Assembly resolutions

68/211	International Strategy for Disaster Reduction	74/10	Committee on the Exercise of the Inalienable Rights of the Palestinian People
68/303	Strengthening the role of mediation in the peaceful settlement of disputes, conflict prevention and resolution	74/11	Peaceful settlement of the question of Palestine
69/291	Implementation of the recommendations contained in the report of the Secretary-General on the causes of conflict and the promotion of durable peace and sustainable development in Africa	74/14 74/21 74/23	The Syrian Golan Follow-up to the Declaration and Programme of Action on a Culture of Peace Promotion of interreligious and intercultural dialogue, understanding and cooperation for peace
69/327	Promoting inclusive and accountable public services for sustainable development	74/30	Establishment of a nuclear-weapon-free zone in the region of the Middle East
70/262	Review of the United Nations peacebuilding architecture	74/77	Strengthening of security and cooperation in the Mediterranean region
72/240	Permanent sovereignty of the Palestinian people in the Occupied Palestinian Territory, including East Jerusalem, and of the Arab population in the occupied Syrian Golan over their natural resources	74/117 74/139	Assistance to the Palestinian people The right of the Palestinian people to self-determination

### Security Council resolution

1947 (2010)

*Economic and Social Council resolutions*

2019/28	Situation of and assistance to Palestinian women	2019/29	Economic and social repercussions of the Israeli occupation on the living conditions of the Palestinian people in the Occupied Palestinian Territory, including East Jerusalem, and the Arab population in the occupied Syrian Golan
---------	--	---------	--

*Economic and Social Commission for Western Asia resolutions*

271 (XXIV)	Strengthening the role of ESCWA in addressing the impact of conflict and instability within the context of social and economic development	292 (XXVI)	Upgrading the Section for Emerging and Conflict-Related Issues to the level of a division and establishing a governmental committee on emerging issues and development in conflict settings
282 (XXV)	Mitigating the impact on development of conflict, occupation and instability in ESCWA member countries	296 (XXVI)	Enhancing public sector institutions and resources to attain national development goals
		330 (XXX)	Support for the Palestinian people

**Deliverables**

19.103 Table 19.16 lists all deliverables, by category and subcategory, for 2021–2022 that are expected to contribute to the attainment of the objective stated above.

Table 19.16

**Subprogramme 6: deliverables for 2021–2022, by category and subcategory**

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)			<b>1</b>	<b>2</b>
1. Note of the Secretary-General on the economic and social repercussions of the Israeli occupation on the living conditions of the Palestinian people in the Occupied Palestinian Territory, including East Jerusalem, and the Arab population in the occupied Syrian Golan to the General Assembly and the Economic and Social Council			1	1
2. Report to the ESCWA ministerial session on the social and economic impact of the Israeli occupation: thematic focus			–	1
<b>Substantive services for meetings</b> (number of three-hour meetings)			<b>16</b>	<b>13</b>
3. Meetings of standing and ad hoc expert groups on post-conflict and sustainable peace; vulnerability assessments and risk mitigation; institution building to strengthen resilience, performance and service provision; innovation in the public sector; public service delivery; open government; economic governance; and mitigating the impact of occupation, policy dialogue and issues concerning sustainable development of conflict-affected countries and countries in transition			12	13
4. High-level meeting of the League of Arab States/Arab Administrative Development Organization/ESCWA			4	–
<b>B. Generation and transfer of knowledge</b>				
<b>Seminars, workshops and training events</b> (number of days)			<b>5</b>	<b>5</b>
5. Training exchange platform on competition in the region			5	1
6. Competition Forum for the Arab Region			–	1
7. Seminars on governance and digital transformation; and major sub-indices (governance, human development index, conflict, environment)			–	2
8. Training on the comprehensive risk assessment framework			–	1

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>Publications</b> (number of publications)			<b>2</b>	<b>1</b>
9. Publications on governance and conflict prevention			2	—
10. Palestine under occupation IV			—	1
<b>Technical materials</b> (number of materials)			<b>8</b>	<b>8</b>
11. Technical materials, briefs and reports on sustainable peace; vulnerability assessments and risk (associated with conflict, COVID-19, climate change, water scarcity, food security and forced displacement) mitigation; institution-building to strengthen resilience, performance and service provision; innovation in the public sector; open government; economic governance; mitigating the impact of occupation; sustainable development of conflict-affected countries and countries in transition; impact of competition reforms on trade policy; human development and human security; and advancing the Sustainable Development Goals			8	8
<b>D. Communications deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> side event at the substantive session of the Economic and Social Council attended by 75 experts and representatives from Governments and civil society organizations from the region; observance of the International Day of Solidarity with the Palestinian people; wallchart on the impact of conflict and occupation on the socioeconomic development of the Palestinian people; booklets and pamphlets on governance, conflict prevention and the impact of the Israeli occupation on development outcomes; regional technical dialogue platform for member States on assessment of risks associated with transboundary conflict and non-conflict drivers of hazards and vulnerability.				
<b>Digital platforms and multimedia content:</b> portal on open government and open data in the Arab region; portal on Arab business environment legislative framework, including competition provisions and legislation.				

## Annex

### Programme performance in 2020<sup>1</sup>

#### Impact of COVID-19 on programme delivery

19.A.1 During 2020, the coronavirus disease (COVID-19) pandemic had an impact on the planned deliverables and activities of the Economic and Social Commission for Western Asia (ESCWA). The impact included the inability to hold in-person consultations and meetings and to deliver on-site technical support and capacity-building. For most programmed activities, ESCWA amended the means of programme delivery to virtual/remote engagement and implemented them. Some planned activities, however, could not be altered to accommodate the COVID-19 restrictions and the pandemic-compliant operations model and, as a result, were postponed to 2021 or replaced with other activities. Specific examples of the impact are provided under the seven subprogrammes. Importantly, the change in approach, including modification and postponement of certain planned deliverables and activities, did not have a significant impact on the overall expected results for 2020. This is due to the proactive approach adopted by ESCWA of leveraging the resources available to ensure that it delivered on its mandate and commitments and advancing, to the extent possible, on the objectives set.

19.A.2 In addition to modifying the scope or modality of delivery of several planned deliverables and activities to accommodate both the additional demands and the constraints, ESCWA identified several new activities during 2020 to support member States on issues related to the COVID-19 pandemic. The aforementioned changes to the planned programme of work included: (a) changes in the scope of analysis and policymaking support, including provision of data and technical expertise, to include a COVID-19 pandemic component; (b) greater use of information and communications technologies as the means of programme delivery; and (c) additional activities focused predominantly on supporting member States in their responses to COVID-19, in particular assistance with mitigating the socioeconomic impact of the pandemic, while protecting development gains and achievements against the 2030 Agenda for Sustainable Development. It should be noted that modifications and new deliverables remained fully in line with the Commission's mandate and objectives, and, as such, contributed to the overall results in 2020. Specific examples of the new and modified activities are described in the programme performance under all seven subprogrammes. The new activities contributed to results in 2020, as described in the programme performance under subprogrammes 1, 4, 5, 6 and 7.

19.A.3 Reflecting the importance of continuous improvement and responding to the evolving needs of member States, ESCWA will mainstream lessons learned and best practices related to the adjustments to and adaptation of its programme owing to the COVID-19 pandemic so as to ensure that the planned support to member States remains relevant and adequate in this new context. Specific examples of lessons learned include greater focus, at the programme design stage, on programme continuity considerations, including the feasibility of programme delivery through alternative operational modalities. It should also be noted that such alternative modalities of programme delivery impacted the effectiveness of some of the completed activities, in particular those related to confidence-, consensus- and capacity-building, multilateral collaboration and peer-to-peer sharing of good practices. In this context, the Commission will continue to refine its use of

<sup>1</sup> As outlined in paragraph 19.4 of the present report, the programme presented for ESCWA reflects a change in the programme structure for 2021. For that reason, programme performance information for 2020 is included in this annex, which follows the programmatic structure of 2020.

information and communications technologies and explore other alternative delivery models, such as hybrid meeting formats, electronic formats for publications and technical materials, innovative massive open online courses (MOOCs) and mentoring platforms for capacity-building, to enable it to enhance the effectiveness of its activities, in particular those related to confidence-, consensus- and capacity-building, multilateral collaboration and peer-to-peer sharing of good practice, should traditional means of implementing the planned activities remain hampered by the pandemic.

### **Subprogramme 1**

#### **Integrated management of natural resources for sustainable development**

19.A.4 Programme performance in 2020 includes programme performance presented under result 1 as well as result 2, which emerged during 2020.

#### **Result 1: energy efficiency in the building sector<sup>2</sup>**

19.A.5 In 2019 and 2020, the subprogramme produced baseline mappings of energy use in the building sector in Jordan and Tunisia, the results of which were validated through national dialogues with relevant stakeholders, and assessed the related policy and institution-building needs in both countries. The evidence gathered in the process allowed ESCWA to better target its technical assistance in support of the efforts of the Governments to design and implement energy efficiency policies and programmes for the sector. As part of the assistance, the subprogramme undertook assessments of energy performance certification standards for energy-intensive household appliances and equipment in both countries. It subsequently supported relevant institutions in Tunisia to set up a digitalized process aimed at reinforcing the certification programme. The launch of a similar scheme has also been discussed with institutions in Jordan. Furthermore, the subprogramme worked with relevant institutions in both countries on identifying energy efficiency measures that could be replicated on a large scale and on developing implementation schemes, including incentives and financing instruments for end users, to retrofit building envelopes and adopt more energy-efficient equipment and appliances.

19.A.6 The above-mentioned work contributed to the development by one member State (Tunisia) of two large-scale schemes, one offering end users access to incentives, financing instruments and implementation assistance for thermal retrofitting of the building envelopes and the other involving the dissemination of more energy-efficient equipment/appliances, which did not meet the planned target of at least two member States reflected in the proposed programme budget for 2020. The process for the development of two similar schemes in Jordan (roof insulation and dissemination of solar water heaters) has also been initiated. However, large-scale implementation schemes for Jordan remain under development owing to delays related to COVID-19 (see table 19.A.1).

---

<sup>2</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 22)).

Table 19.A.1

**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
Development by member countries of appropriate energy efficiency strategies and policies for the existing building stock in the residential and services sectors	Endorsement by 1 member country of the minimum energy performance standards for energy-intensive household appliances and equipment	1 member State developed two large-scale schemes offering end users access to incentives, financing instruments and implementation assistance for thermal retrofitting of the building envelope and dissemination of more energy-efficient equipment/appliances

**Result 2: food insecurity in the Arab region under the challenge of the COVID-19 pandemic**

19.A.7 The COVID-19 pandemic has exacerbated food security challenges linked to climate change, food import dependency and conflicts in the Arab region, in particular in the least developed countries and the countries in conflict. This has led to alarming outcomes, including a potential for more socioeconomic disruption and sociopolitical instability.

19.A.8 To address this situation, the subprogramme prepared two policy briefs on the impact of COVID-19 on food security and water resources. The briefs shed light on how the pandemic will influence food security in Arab countries during the coming decade, taking into account the usual sources of vulnerability (such as climate change, food trade and conflicts), analyse ways for member States to mitigate those threats, alleviate the negative impacts of COVID-19 and build a more food-secure future, and provide recommendations on actions to be taken by national, regional and global actors. The subprogramme also changed the scope of a planned publication on climate change and biofuel challenges for food security in vulnerable Arab countries to focus instead on ensuring food security in the Arab region under the challenge of COVID-19. This knowledge product allowed the subprogramme to update simulation parameters and prepare alternative scenarios. To make pertinent information available at the national level, the subprogramme revised the results of 22 food security country profiles, using the regionally adopted Arab food security monitoring framework, and added a section on the impacts of COVID-19 on food security at the national level, as well as references to national initiatives undertaken to improve the situation.

*Progress towards the attainment of the objective, and performance measure*

19.A.9 The above-mentioned work contributed to the objective, as demonstrated by the provision to 22 member States of access to information on the impact of COVID-19 on food security and mitigation initiatives, which supported informed decision-making and the ability of Arab countries to ensure that their populations are food secure by 2030, in line with the 2030 Agenda (see table 19.A.2).

Table 19.A.2

**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
—	—	22 member States accessed information on the impact of COVID-19 on food security and mitigation initiatives

### Impact of COVID-19 on subprogramme delivery

19.A.10 Owing to the impact of COVID-19 during 2020, some regional meetings were rescheduled to 2021 (e.g. the third meeting of the ESCWA Group of Experts on Fossil Fuels), while others were converted into shorter sessions held virtually (e.g. the expert group meeting on resource efficiency in the Arab region, the expert group meeting on food security and trade, the fifth meeting of the Arab Climate Outlook Forum and regional awareness-raising events for the World Day to Combat Desertification and Drought and the World Water Day youth event). Global meetings were also either postponed to 2021 (e.g. the twenty-sixth session of the Conference of the Parties to the United Nations Framework Convention on Climate Change and the eleventh International Forum on Energy for Sustainable Development) or held as shorter, virtual sessions (e.g. the Vienna Energy Forum and World Water Week). The postponements made it difficult to adopt the resolutions required in order to realize the planned expected results or caused delays in the implementation of pilot initiatives and thus had a negative impact on the programme performance in 2020.

19.A.11 At the same time, however, the subprogramme modified activities to support member States on issues related to the COVID-19 pandemic, within the overall scope of its objectives, namely, it revised the scope of its publication on food security to incorporate the effects of the pandemic and adapted the planned expert group meetings to enable discussions on its impact on food security, water and energy. In addition, in order to provide member States with an assessment of the impact of the COVID-19 pandemic and viable response and mitigation measures, the subprogramme prepared unplanned policy briefs on poverty, food security and water scarcity in the region. In order to counter delivery impediments caused by travel restrictions, the subprogramme developed online training materials and organized a series of webinars on climate change analysis, using geographic information system tools under the Regional Initiative for the Assessment of the Impact of Climate Change on Water Resources and Socioeconomic Vulnerability in the Arab Region (6 sessions); on groundwater through the Arab Integrated Water Resources Management Network (12 sessions); and on transboundary water cooperation (6 sessions). The modified deliverables contributed to results in 2020, as specified in result 2 above.

### Deliverables

19.A.12 Table 19.A.3 lists all deliverables, by category and subcategory, for 2020 that contributed and are expected to contribute to the attainment of the objective.

Table 19.A.3

#### Subprogramme 1: deliverables for 2020, by category and subcategory

15. Guidelines, technical materials and reports on water resources	1	—	—	—
16. Policy brief on water resources in the context of the COVID-19 pandemic	—	1	—	—
17. Policy briefs and reports on energy	1	1	—	—
18. Technical materials and reports on food security	1	—	—	—
19. Policy brief on food security in the context of the COVID-19 pandemic	—	2	—	—
20. Technical materials on issues related to the management of natural resources for sustainable development	1	1	—	—

## Subprogramme 2

### Social development

19.A.13 Programme performance in 2020 includes programme performance presented under result 1 as well as result 2, which emerged during 2020.

#### Result 1: towards policies and actions that protect the rights of migrants and improve their lives<sup>3</sup>

19.A.14 In 2019 and 2020, the subprogramme focused its efforts on helping member States operationalize the Global Compact for Safe, Orderly and Regular Migration. It did so by supporting evidence-based policymaking through the design of knowledge products and tools, including an online database aimed at facilitating access to

<sup>3</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 22)).

migration-related policies in the region and the *Situation Report on International Migration 2019*, which presented data on migration patterns and trends in Arab countries, with an analysis of the policy implications of the Global Compact for the region. The subprogramme also helped build regional dialogue platforms to enhance collaboration in the area of migration. It led the regional review of the Global Compact and brought member States together to discuss the progress made, as well as the challenges faced and possible solutions. Furthermore, the subprogramme organized a series of regional workshops to build the capacity of policymakers to operationalize the Global Compact and follow up on/review its implementation at the national level. Support was provided to the Government of the Sudan to develop a first draft of the national migration strategy aligned with the Global Compact. In addition, the subprogramme strengthened regional partnerships by launching, together with International Organization for Migration, the International Labour Organization and the League of Arab States, an issue-based coalition on international migration in Arab countries, with the participation of 18 other United Nations agencies, funds and programmes.

19.A.15 The above-mentioned work contributed to 133 new migration policies, programmes and actions in Arab countries, which exceeded the planned target of 70 new migration policies, programmes and actions reflected in the proposed programme budget for 2020 (see figure 19.A.I).

Figure 19.A.I

**Performance measure: total number of migration policies, programmes and actions enacted in Arab countries that are fully aligned with the Global Compact for Safe, Orderly and Regular Migration (cumulative)**

**Result 2: mitigation of the impact of multiple crises on vulnerable groups in Lebanon through learning opportunities, in partnership with a leading global massive online open course platform**

19.A.16 The COVID-19 pandemic has had a severe impact on the economy, on jobs and on learning and training opportunities in the Arab region, especially among young people and women. The region has some of the world's highest unemployment rates and young people and women form the largest part of its informal sector. Although information and communications technologies and digital technologies were leveraged, where possible, to sustain the provision of education and other services, the public education sector in most countries of the region has been unable to provide the needed tools and training for teachers and students to adapt to the crisis. In Lebanon, this was compounded by an acute economic crisis and the explosion in the port of Beirut.

19.A.17 Against that backdrop, and in cooperation with the Ministry of Labour of Lebanon, ESCWA partnered with one of the leading global MOOC platforms to provide free learning opportunities with certification for Lebanese citizens. More than 4,900 courses were made available, some in Arabic, offering certification by some of the world's finest academic, research and other institutions. ESCWA set up a special registration platform and carried out a full-fledged promotional campaign on social and traditional media to target individuals, in particular youth and women, who lost their jobs or whose university curricula were interrupted owing to the COVID-19 pandemic, the explosion in the port of Beirut and the economic crisis. As a result, 25,000 individuals were able to upgrade their skills to meet the requirements of the labour market. This included development of soft and hard skills, including leadership, management, communication, entrepreneurship, business analysis, sales, computer networking and operating systems, data analysis and management, finance, statistics and mathematics. ESCWA communicated with registered candidates and supported them throughout their registration and learning process.

*Progress towards the attainment of the objective, and performance measure*

19.A.18 The above-mentioned work contributed to the objective, as demonstrated by the fact that 25,000 individuals, including many young people and women, completed more than 40,000 courses (a total of 500,000 learning hours) (see table 19.A.4).

Table 19.A.4  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
—	—	25,000 individuals, including many young people and women, completed more than 40,000 courses (a total of 500,000 learning hours)

**Impact of COVID-19 on subprogramme delivery**

19.A.19 In response to the pandemic, the subprogramme identified new activities to support member States on issues related to COVID-19, within the overall scope of its objectives. The subprogramme identified priority areas to help member States analyse the impact of COVID-19 and mitigate its effects on the most vulnerable groups. Specifically, the subprogramme developed a series of policy briefs assessing the impact of the pandemic and projecting regional losses and scenarios for countries to enable development of the most appropriate and innovative coping strategies to help member States to ensure that no one is left behind. These included, for example, the solidarity tax model to reduce the gap in wealth inequality. It also cooperated with other United Nations entities on conducting country-specific assessments on, among other things gender equality and the overall socioeconomic situation.

**Deliverables**

19.A.20 Table 19.A.5 lists all deliverables, by category and subcategory, for the 2020 that contributed and are expected to contribute to the attainment of the objective.

Table 19.A.5

**Subprogramme 2: deliverables for 2020, by category and subcategory**

9. Briefs and bulletins on migration	1	1	—	—
10. Policy briefs assessing the impact of the pandemic and projecting regional losses and scenarios for countries	—	2	—	—

### Subprogramme 3

#### Economic development and integration

19.A.21 Programme performance in 2020 includes programme performance presented under result 1 as well as result 2, which emerged during 2020.

#### **Result 1: financing the Sustainable Development Goals through fiscal consolidation and domestic resource mobilization<sup>4</sup>**

19.A.22 In 2020, the subprogramme continued to support member States in identifying avenues to finance sustainable development, including through fiscal consolidation and domestic resource mobilization. To that end, the subprogramme updated and reissued the *Fiscal Policy Review of Arab States 2019*, which provides a baseline for the tax and expenditure reforms needed to mobilize domestic public resources. It supported member States in selecting thematic financing for development options to address regional challenges and bridge the financing gap, in line with the conclusions of the report on global developments and regional challenges as reflected in the Arab Financing for Development Scorecard. The subprogramme also continued to provide technical expertise to Governments on matters of fiscal policy reform, which included the provision of economic modelling tools to support Governments in the formulation of socially acceptable reform proposals focused on decreasing fiscal deficits and increasing the understanding of the linkages among fiscal policy choices. It organized a capacity-building workshop to support Jordan in addressing tax base erosion and adopting optimal tax policies, and it used modelling techniques to assess the economic and social

<sup>4</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 22)).

implications of the COVID-19 pandemic, supporting two member States in defining and implementing mitigation measures.

19.A.23 The above-mentioned work contributed to the objective, as demonstrated by the design and implementation by two member States of fiscally sustainable COVID-19 mitigation measures, which exceeded the planned target of the inclusion of a subsidy reform proposal in the financial law submitted by the Government of Tunisia to parliament for approval reflected in the proposed programme budget for 2020 (see table 19.A.6).

Table 19.A.6  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
Request by member States, including Tunisia, to support fiscal policy reform	<p>Development of socially acceptable fiscal policy reform proposals and corresponding economic models</p> <p>A subsidy reform proposal is adopted by Tunisia in its financial law, with an automatic adjustment mechanism for energy prices</p>	Two member States (Egypt and Tunisia) design and implement fiscally sustainable COVID-19 mitigation measures

## **Result 2: enhanced master plan to build back the port of Beirut**

19.A.24 The development of the Port of Beirut stretched over several decades and followed various master plans. The last one, which dates from 2018, took into consideration inherited buildings and warehouses and analysed constraints hindering the full performance of the port and its optimal connectivity to land transport networks. The explosions of 4 August 2020 resulted in significant damage to the port premises. While there was an urgent need to make the port operational again, the situation opened the door for discussions on future layouts of the port and measuring the potential for enhanced performance and competitiveness and for adopting the most advanced port technologies. In this context, ESCWA received a request for technical assistance from the Port of Beirut Management and Operating Committee to prepare a study on revisiting the 2018 master plan.

19.A.25 The subprogramme, at the request of the Port of Beirut Management and Operating Committee, organized a series of consultations and three workshops to discuss such questions and produce the requested study. During the workshops, the approach and data and information sources for the study were discussed, the initial survey findings were presented and a final draft report was disseminated for comments from relevant stakeholders. The study took into account ground alterations after the blast and offered a comprehensive vision of the interaction between the port and its hinterland, with an analysis of the comparative advantages of all Lebanese ports and recommendations on strategic needs with respect to integrated port development, as well as on actions to enhance port performance. The subprogramme built the general concept of the study and proposed guidelines for the adjustment and update of the 2018 master plan. It included recommendations related to the location of the port facilities, the accessibility from outside the port and the traffic circulation within the port, opportunities for multimodal connectivity with the hinterland and the use of emerging and future technologies for port operations and handling.

*Progress towards the attainment of the objective, and performance measure*

19.A.26 The above-mentioned work contributed to the objective, as demonstrated by the adoption by the authorities of the port of Beirut of the study recommendations related to enhanced performance, increased competitiveness and the latest technologies for the design of an updated master plan (see table 19.A.7).

Table 19.A.7

Master plan of the port of Beirut on port performance and optimal connectivity to land transport networks	Master plan of the port of Beirut on port performance and optimal connectivity to land transport networks	Adoption by the authorities of the Port of Beirut of the study recommendations related to enhanced performance, increased competitiveness and the latest technologies for the design of an updated master plan

**Impact of COVID-19 on subprogramme delivery**

19.A.27 In response to the pandemic, the subprogramme identified new activities to support member States on issues related to COVID-19, within the overall scope of its objectives. The subprogramme contributed substantively to the development of a regional emergency response framework to mitigate the impact of COVID-19 and the publication of several unplanned policy briefs analysing the pandemic's impact on the economy and finance in the region covering such issues as the loss of economic growth, employment, foreign direct investment, trade and trade facilitation measures, capital markets, financial systems, remittances, debt sustainability, fiscal space, trade finance and food security. The subprogramme also supported the development of the United Nations Comprehensive Response to COVID-19, in particular as it pertains to debt and the socioeconomic impact of COVID-19 on the Arab region, and helped to ensure that the region's interests were reflected in the menu of policy options for development financing which will be reviewed at the next International Conference on Financing for Development. The subprogramme also joined the Remittance Community Task Force and participated in the drafting of a blueprint for action to safeguard remittances in times of crisis. In addition, ESCWA used modelling techniques to forecast and analyse the socioeconomic impact of COVID-19 in the region, including a fiscal multiplier analysis, which informed the decisions of the parliament on fiscal stimulus; develop public debt and debt stabilization scenarios for Egypt, Jordan and Tunisia; and analyse regional debt sustainability in the context of COVID-19 impact mitigation. Furthermore, the subprogramme worked with a number of international partners to collectively identify solutions for transport and trade connectivity in the age of pandemics. The subprogramme, in collaboration with the United Nations Conference on Trade and Development (UNCTAD) and the Organisation for Economic Co-operation and Development (OECD), delivered webinars entitled "Competition law and policy during and in the aftermath of the COVID-19 pandemic: reflections in the Arab region" and "Consumer protection in the aftermath of the COVID-19 pandemic: focus on digitalization" in lieu of the planned expert group meetings on supporting Arab countries in transition and key processes/institutions that support economic activity and economic transactions.

## Deliverables

19.A.28 Table 19.A.8 lists all deliverables, by category and subcategory, for the year 2020 that contributed and are expected to contribute to the attainment of the objective.

Table 19.A.8

### Subprogramme 3: deliverables for 2020, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>4</b>	<b>4</b>	—	—
1. Parliamentary documents for the Technical Committee on Liberalization of Foreign Trade, Economic Globalization and Financing for Development in the Countries of the ESCWA Region	2	2	—	—
2. Parliamentary documents for the Committee on Transport and Logistics	2	2	—	—
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>20</b>	<b>12</b>	—	—
3. Expert group meeting on supporting Arab countries in transition	4	—	—	—
4. Expert group meeting on key processes/institutions that support economic activity and economic transactions	4	—	—	—
5. Substantive servicing of the twenty-first session of the Committee on Transport and Logistics	4	4	—	—
6. Expert group meeting on assessing Arab economic integration	4	4	—	—
7. Expert group meeting on macrofiscal policy and employment	4	4	—	—

17. Technical materials on poverty in the Arab region	5	5	—	—
18. National employment profiles	3	3	—	—
19. Technical paper on employment creation	1	1	—	—
20. Technical materials on industrial policy in the Arab region	2	2	—	—
21. Technical materials on fiscal policy in the Arab region	3	2	—	—
22. Technical material on the Arab region recovery from COVID-19	—	1	—	—
23. Technical materials on financing for development in the Arab region	2	2	—	—

## Subprogramme 4

### Technology for development and regional integration

19.A.29 Programme performance in 2020 includes, programme performance presented under result 1 as well as result 2, which emerged during 2020.

#### **Result 1: digital development in the Arab region: leaving no one behind<sup>5</sup>**

19.A.30 Inclusive and equitable access to information and communications technology (ICT), the Internet and e-services and a robust information society and digital economy are essential tools for the empowerment of people and sustainable development in the Arab region. In 2020, the subprogramme convened the fifth Arab Internet Governance Forum and published the flagship *Arab Digital Development Report 2019*, both of which were geared towards empowering people and ensuring inclusiveness. The latter identified policy gaps and opportunities for harnessing ICT in support of sustainable development. In this context, the subprogramme convened 10 national research workshops to help Governments assess their national digital development reviews of 2019 and related methodologies. The subprogramme also promoted national ownership and elaboration of thematic strategies/policies on ICT-related issues by member States. It convened expert group meetings to develop and endorse a digital development framework and process manual. The subprogramme also produced reports entitled “Arab digital agenda: preliminary framework for the Arab ICT strategy” and “ESCWA vision on work modalities to develop the Arab ICT strategy”. Both have been endorsed by the working group of the Arab Telecommunications and Information Council of Ministers, paving the way for the inception of a unified regional ICT strategy, namely, the Arab digital agenda. To date, three regional events have been convened, in collaboration with the League of Arab States, to advance its development.

19.A.31 To address the emerging requests related to the COVID-19 pandemic, the subprogramme offered support to member States in tailoring the digital components of their responses. That support included convening, together with the League of Arab States, the first Arab Forum on Information and Communications Technologies Fighting COVID-19: Arab Initiatives and Success Stories and producing, together with UNCTAD, a global report entitled “Post-pandemic COVID-19 economic recovery: enabling developing countries to better harness e-commerce and digital trade”, as well as undertaking other initiatives in the field of digital technology that identified good ICT practice, policies and solutions for mitigating the adverse effects of the pandemic on health, economies and societies.

19.A.32 The above-mentioned work contributed to the adoption of national strategies/policies on select ICT-related issues by 4 member States and the adoption by 22 States of the vision and preliminary framework underpinning the unified regional ICT strategy (the Arab digital agenda), which exceeded the planned target of at least three member States deploying their national digital strategy for accelerating the achievement of the Sustainable Development Goals reflected in the proposed programme budget for 2020 (see table 19.A.9).

<sup>5</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 22)).

Table 19.A.9

**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
Member States adopted the multisectoral Arab digital development process	At least 10 member States deploy the national digital development template to assess the digital development landscape vis-à-vis inclusiveness and empowerment	National strategies/policies on select ICT-related issues adopted by 4 member States  The vision and preliminary framework underpinning the unified regional ICT strategy (the Arab digital agenda) adopted by 22 States

**Result 2: peer learning and improved decision-making for fiscal stimulus and social protection policy responses in the context of COVID-19**

19.A.33 The COVID-19 pandemic forced most countries, including Arab States, to announce, within a short span of time, fiscal stimulus packages and social protection measures in order to mitigate the negative impacts of the pandemic. Enhanced access to information on the policy responses adopted, tools and delivery mechanisms was needed to help countries better understand which policies were more effective and to support them in the adoption of the best measures to counter the impact of the pandemic, including by protecting the most vulnerable groups, recognizing that countries with developed social protection systems were in a better position to deliver effective responses.

19.A.34 In this context, the subprogramme developed an interactive COVID-19 stimulus tracker, which, in a user-friendly way, maps and visualizes worldwide fiscal and social protection policy responses to the pandemic throughout the world. The tracker facilitated peer learning and dialogue on fiscal policy and social protection options. It informed the social protection policy responses dialogue with representatives from ministries of social affairs of Arab States, which was held virtually in April 2020. In addition, ESCWA used information generated by the tracker to produce and disseminate a series of policy briefs aimed at further informing webinar discussions on topics related to the economic and social impact of the pandemic. This included a policy brief on limited fiscal space putting the Arab region at risk of recovering better from the COVID-19 pandemic and contributions to a policy brief issued by the Secretary-General entitled “The impact of COVID-19 on the Arab region: an opportunity to build back better”. Furthermore, a harmonized set of social protection measures agreed upon by the five United Nations regional commissions were produced through the use of the tracker, which helped advance the analysis of social protection policies and their effectiveness in a comparative context of regions and countries.

*Progress towards the attainment of the objective, and performance measure*

19.A.35 The above-mentioned work contributed to the objective, as demonstrated by 89 users from the Arab region and 85 users from the rest of the world using the COVID-19 stimulus tracker for decision-making (see table 19.A.10).

Table 19.A.10  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
—	—	89 users from Arab States and 85 users from the rest of the world use the COVID-19 stimulus tracker tool for decision-making  1 member State (Sudan) initiated a reassessment of its social protection strategy and another member State (Jordan) launched a review of its social assistance database

### Impact of COVID-19 on subprogramme delivery

19.A.36 In response to the pandemic, the subprogramme identified new activities to support member States on issues related to COVID-19, within the overall scope of its objectives. The subprogramme organized a virtual forum jointly with the League of Arab States and partners on addressing the COVID-19 pandemic and produced a study, in collaboration with UNCTAD, on e-commerce in the COVID-19 context. The new deliverables contributed to results in 2020, as specified in result 2 above.

### Deliverables

19.A.37 Table 19.A.11 lists all deliverables, by category and subcategory, for the year 2020 that contributed and are expected to contribute to the attainment of the objective.

Table 19.A.11

17. Post-pandemic COVID-19 economic recovery: enabling developing countries to better harness e-commerce and digital trade	—	1	—	—

## Subprogramme 5

### Statistics for evidence-based policymaking

19.A.38 Programme performance in 2020 includes programme performance presented under result 1 as well as result 2, which emerged during 2020.

#### Result 1: introducing modern technologies and a geospatial dimension to enhance the availability of census data for the 2030 Agenda<sup>6</sup>

19.A.39 From 2018 to 2020, the subprogramme supported the modernization of national statistical offices in the Arab region by enhancing the use of new technologies for population and housing censuses, including by publishing and disseminating knowledge products on the use of electronic devices and data quality assessment in electronic censuses. The subprogramme also created an online knowledge base, in Arabic and English, that gathers guidelines, studies and information on capacity-building events. Furthermore, the subprogramme worked closely with national statistical offices on planning the collection of data and supported strategic decision-making with a view to the adoption of new technologies in censuses. It organized training events in Iraq, Libya, Morocco, Saudi Arabia, the Sudan and the United Arab Emirates on the use of new technologies and geospatial information in data collection (tablets and self-enumeration using the Internet and records linkages, electronic editing, and data dissemination and utilization), as well as a series of five regional capacity-building workshops to facilitate the exchange of experience among national statistical offices in Arab countries. In 2020, the subprogramme delivered technical advice on how to implement censuses via social media platforms, as a few countries decided to postpone their census data collection beyond 2020 owing to the COVID-19 pandemic.

19.A.40 The above-mentioned work contributed to 16 Arab States being ready to conduct population and housing census using new technologies, which met the planned target reflected in the proposed programme budget for 2020 (see figure 19.A.II).

<sup>6</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 22)).

Figure 19.A.II

**Performance measure: number of Arab States ready to conduct population and housing censuses using new technologies (cumulative)**

### **Result 2: policy briefs on the socioeconomic impact of COVID-19**

19.A.41 The decade that was marked for accelerated action and delivery towards sustainable development has been disrupted by a global health threat that has severely impacted the Arab region. The virus has affected the lives and livelihoods of people from all social and economic backgrounds. Although the focus has, until now, been on urgent action to save lives and protect and repair livelihoods, the crisis also served as a stark reminder of the importance of an efficient and effective public sector as the first line of defence in addressing any risk and of the need to continuously strengthen national capacities, which are of paramount importance to the welfare of countries and to their social and economic prosperity.

19.A.42 In the wake of the pandemic, ESCWA capitalized on its expertise and proactively embarked on an analysis of emerging trends, risks and opportunities and identified good practice in support of national and regional policy- and decision-making on issues related to COVID-19. Specifically, ESCWA prepared 12 thematic policy briefs on topics ranging from the impact of the pandemic on specific vulnerable groups (youth, the elderly and women) and core socioeconomic factors (food security and poverty, fiscal and financial stability, natural resources and trade) to future-focused proposals for recovery and building back better.

#### *Progress towards the attainment of the objective, and performance measure*

19.A.43 The above-mentioned work contributed to the objective, as demonstrated by the strengthened capacities of member States to develop evidence-based policies aimed at tackling the immediate and longer-term consequences of the pandemic, while remaining on track towards achieving the Sustainable Development Goals and the 2030 Agenda (see table 19.A.12).

Table 19.A.12  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
—	—	Strengthened capacities of member States to develop evidence-based policies aimed at tackling the immediate and longer-term consequences of the pandemic, while remaining on track towards achieving the Sustainable Development Goals and the 2030 Agenda

### Impact of COVID-19 on subprogramme delivery

19.A.44 In response to the pandemic, the subprogramme identified new activities to support member States on issues related to COVID-19, within the overall scope of its objectives. The subprogramme, in collaboration with other ESCWA subprogrammes, also focused on analyses of trends and generating evidence- and data-based policy recommendations on a variety of topics ranging from the impact of the pandemic on specific vulnerable groups (youth, the elderly and women) and core socioeconomic factors (food security and poverty, fiscal and financial stability, natural resources and trade) to future-focused proposals for post-pandemic recovery. These, in turn, informed national policymaking in relation to tackling the negative effects of the pandemic on the people, the economies and the achievement of the Sustainable Development Goals in the Arab region. The new deliverables contributed to results in 2020, as specified in result 2 above.

### Deliverables

19.A.45 Table 19.A.13 lists all deliverables, by category and subcategory, for the year 2020 that contributed and are expected to contribute to the attainment of the objective.

## Subprogramme 6

### Advancement of women

19.A.46 Programme performance in 2020 includes programme performance presented under result 1 as well as result 2, which emerged during 2020.

#### Result 1: national women's machineries: agents for change<sup>7</sup>

19.A.47 From 2018 to 2020, the subprogramme engaged with Syrian women refugees in Jordan and Lebanon to better understand their immediate needs, document what would improve their lives as refugees in their host communities and identify their aspirations upon return to their home country. The in-depth knowledge obtained was used to advocate with national women's machineries and other stakeholders with respect to enhancing service provision to women refugees and supporting the implementation of national action plans in Jordan and Lebanon based on Security Council resolution 1325 (2000) on women and peace and security. The subprogramme also extensively supported Yemen in finalizing and disseminating its first national action plan, which was endorsed in December 2019. It helped the Sudan to develop its national action plan through a series of national and subnational meetings that ensured broad ownership of the process and led to its endorsement by the Government in March 2020. The subprogramme also provided support to the State of Palestine in revising its existing national action plan and developing a new one to address identified gaps, such as the limited representation of women in the security sector and the need for further integration of the women and peace and security agenda into security sector operations. Furthermore, the subprogramme helped build the capacity of the national women's machinery in Kuwait and supported the development of its national action plan upon request for technical assistance.

<sup>7</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 22)).

19.A.48 The above-mentioned work contributed to the adoption of an additional comprehensive action plan that is participatory and inclusive (the Sudan), which met the planned target reflected in the proposed programme budget for 2020 (see table 19.A.14).

Table 19.A.14

**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
No comprehensive action plans adopted that are participatory and inclusive	Adoption of 1 comprehensive action plan that is participatory and inclusive (Yemen)	Adoption of an additional comprehensive action plan that is participatory and inclusive (the Sudan)

**Result 2: supporting member States in mitigating the impact of COVID-19 on gender equality gains**

19.A.49 In early 2020, Governments around the globe imposed lockdowns to contain the COVID-19 pandemic. While necessary to prevent loss of life, these measures brought with them a troubling consequence: an increase in violence against women and girls, including online violence. In many cases, because of the pandemic, survivors of violence were stranded in the proximity of perpetrators, while their ability to access essential support services decreased significantly, either because the services were not available (e.g. they were reprioritized to focus on COVID-19 interventions) or not easily accessible. Women and girls in the Arab region were no exception.

19.A.50 In response to the initial reports of increased violence against women and girls and a projected increase in gender-based inequality in the labour market, education and access to timely services and information, as well as with regard to care work responsibilities, the subprogramme issued a multi-agency policy brief on the impact of COVID-19 on gender equality in the Arab region. The brief aimed to raise awareness among member States of the potential gendered impact of the lockdowns and, in particular, the gender equality concerns that needed to be taken into consideration while addressing the pandemic. It was accompanied by an open letter to Governments of all Arab States, advocating the implementation of alternative solutions to assist female survivors of domestic violence across the region. A subsequent policy brief on violence against women and girls and COVID-19 in the Arab region provided qualitative and quantitative data on instances of such violence, the availability of support systems, and good and emerging practices for preventing and combating violence against women and girls. The efforts were complemented by a special meeting of the ESCWA Committee on Women, which discussed the impact of COVID-19 on gender equality at the regional and national levels. In addition, building on the regional approach and in partnership with the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women), ESCWA provided policy guidance at the national level (e.g. for Iraq and Yemen) on mitigating the impact of the pandemic on women's economic and political participation and access to social protection services.

19.A.51 Furthermore, the subprogramme expanded its planned activities and led the technical assistance efforts of several United Nations agencies to enhance the capacity of the National Family Safety Programme in Saudi Arabia to address gender-based violence. The assistance entailed developing and delivering a series of capacity-building and information-sharing webinars (a total of 13 workshops reaching over 400

service providers) on addressing violence against women through service provision during the COVID-19 pandemic.

*Progress towards the attainment of the objective, and performance measure*

19.A.52 The above-mentioned work contributed to the objective, as demonstrated by senior officials and heads of national women's machineries in the Arab region benefitting from policy advice aimed at addressing the gendered impact of COVID-19 and by the strengthened capacity of at least 400 service providers in Saudi Arabia to optimize service delivery to women victims of violence (see table 19.A.15).

Table 19.A.15  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
—	—	<p>Senior officials and heads of national women's machineries in the Arab region benefitted from policy advice aimed at addressing the gendered impact of COVID-19</p> <p>Strengthened capacity of at least 400 service providers in Saudi Arabia to optimize service delivery to women victims of violence</p>

**Impact of COVID-19 on subprogramme delivery**

19.A.53 In response to the pandemic, the subprogramme identified new activities to support member States on issues related to COVID-19, within the overall scope of its objectives. The subprogramme identified, as a new priority area, assistance to member States with the analysis of the gendered impact of COVID-19 and mitigation of its implications for women and girls. Specifically, the subprogramme focused on prevention and early action against gender-based violence. It also cooperated with other United Nations entities on conducting country-specific assessments in relation to gender equality, as part of the overall socioeconomic situation. This new deliverable contributed to results in 2020, as specified in result 2 above.

**Deliverables**

19.A.54 Table 19.A.16 lists all deliverables, by category and subcategory, for the year 2020 that contributed and are expected to contribute to the attainment of the objective.

Table 19.A.16

## Subprogramme 7

### Conflict mitigation and development

19.A.55 Programme performance in 2020 includes, programme performance presented under result 1 as well as result 2, which emerged during 2020.

#### Result 1: strengthened institutions for the prevention of and recovery from conflict<sup>8</sup>

19.A.56 From 2018 to 2020, the subprogramme developed a self-assessment methodology and tool to strengthen the public sector and identify key institutional

<sup>8</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 22)).

gaps in countries affected by crisis, conflict or occupation. It produced a series of tailor-made national capacity-building modules for Iraq, Yemen and the State of Palestine. A total of 86 civil servants took part in training sessions and effectively increased their capacities to enhance institutional effectiveness for conflict recovery and prevention, and better development outcomes. The gaps assessment methodology was formally adopted by the Ministry of Planning in Iraq, while training-of-trainers courses were delivered to 40 civil servants in Yemen. The Palestinian General Personnel Council also adopted the methodology to support its workforce planning strategies. The subprogramme presented the gaps assessment methodology to 18 representatives of ESCWA member States during an Executive Committee meeting in July 2019. Furthermore, the subprogramme provided policy recommendations to Iraq, Yemen and the State of Palestine based on institutional gap assessment reports produced in 2019 and 2020.

19.A.57 The above-mentioned work contributed to the use of the gap assessment methodology by at least three member States, which met the planned target reflected in the proposed programme budget for 2020 (see table 19.A.17).

Table 19.A.17  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
Institutional gap assessment methodology discussed with member States	Institutional gap assessment methodology used in 2 member States (Iraq and Yemen)	Methodology used in at least 1 additional member State (State of Palestine)

## Result 2: strengthened governance and public institutions to mitigate the impact of the COVID-19 pandemic

19.A.58 The COVID-19 pandemic has had far reaching consequences in the Arab region. The situation called for unprecedented efforts and innovative measures to contain the spread of the disease. It required effective and coordinated action at the local and regional levels to strengthen governance and public institutions and mitigate the far-reaching socioeconomic and political repercussions of the crisis.

19.A.59 The subprogramme, in line with its previous work and expertise in the field of governance and institutional development and in partnership with the Division for Public Institutions and Digital Government of the Department of Economic and Social Affairs and the United Nations Educational, Scientific and Cultural Organization (UNESCO), organized a series of two webinars on leveraging public governance and spearheading innovative solutions to address the COVID-19 pandemic in Arab countries. The webinars explored innovative means to address the impact of the pandemic in the region and build back better, with a focus on enhanced planning for emerging crises. They covered enabling factors and incentives, aspects linked to functional capacities (such as assessment, decision-making, planning, monitoring and evaluation, policy formulation and budgeting) and dimensions such as risk management, crises and conflict sensitivity, enabling change, and fostering inclusion and participation. A total of 229 representatives of Governments, academia, civil society organizations and other relevant stakeholders from 50 countries, including all the countries of the Arab region, as well as 700 viewers, contributed to the discussions. The subprogramme also facilitated contacts between experts and Arab government representatives from different countries to further support the exchange of knowledge and experiences on integrating the Sustainable Development Goals in

national development plans, with a focus on how to enhance coordination for effective service delivery in the context of COVID-19.

*Progress towards the attainment of the objective, and performance measure*

19.A.60 The above-mentioned work contributed to the objective, as demonstrated by the strengthened understanding of and capacity to support coordinated and effective service delivery in the context of COVID-19 among 229 representatives from 50 countries (see table 19.A.18).

Table 19.A.18  
**Performance measure**

2018	2019	2020
—	—	Strengthened understanding of and capacity to support coordinated and effective service delivery in the context of COVID-19 among 229 representatives from 50 countries

**Impact of COVID-19 on subprogramme delivery**

19.A.61 In response to the pandemic, the subprogramme identified new activities to support member States on issues related to COVID-19, within the overall scope of its objectives. The subprogramme reoriented the theme of a planned policy paper to focus on COVID-19, conflict and risks in the Arab region: the need to end hostilities and invest in peace. It also replaced the meeting of the joint ESCWA/Department of Economic and Social Affairs/OECD working group on open and innovative government in the public sector with a webinar on agile and resilient responses to the COVID-19 pandemic in the Arab world: governance capacity to build back better. Moreover, the unplanned technical paper on governance in times of crisis: Sustainable Development Goal 16 in a post-COVID-19 world was published instead of a technical paper on the quality of institutions and structural transformation. In addition, preparation of parliamentary documents on the impact of Israeli policies and practices and the impact of conflict on development was cancelled, in view of the postponement of the thirty-first ministerial session. Furthermore, an unplanned regional webinar series was held (two meetings delivered jointly with the Department of Economic and Social Affairs and UNESCO) on leveraging public governance and spearheading innovative solutions to address the COVID-19 pandemic in the Arab region and a series of webinars was held aimed at strengthening effective governance through the development of a menu of possible solutions and strengthened information-sharing through the websites of the Department of Economic and Social Affairs, ESCWA and UNESCO. The new deliverables contributed to results in 2020, as specified in result 2 above.

**Deliverables**

19.A.62 Table 19.A.19 lists all deliverables, by category and subcategory, for the year 2020 that contributed and are expected to contribute to the attainment of the objective.

## Programme 20

### Human rights

#### Legislative mandates

20.1 The list below provides all mandates entrusted to the programme.

##### *General Assembly resolutions*

47/135	Declaration on the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities	65/1	Keeping the promise: united to achieve the Millennium Development Goals
48/121	World Conference on Human Rights	65/312	Outcome document of the High-level Meeting of the General Assembly on Youth: Dialogue and Mutual Understanding
48/141	High Commissioner for the promotion and protection of all human rights	66/288	The future we want
55/2	United Nations Millennium Declaration	68/134	Follow-up to the Second World Assembly on Ageing
56/266	Comprehensive implementation of and follow-up to the World Conference against Racism, Racial Discrimination, Xenophobia and Related Intolerance	68/165	Right to the truth
57/300; 58/269	Strengthening of the United Nations: an agenda for further change	68/181	Promotion of the Declaration on the Right and Responsibility of Individuals, Groups and Organs of Society to Promote and Protect Universally Recognized Human Rights and Fundamental Freedoms: protecting women human rights defenders
60/1	2005 World Summit Outcome		
61/159	Composition of the staff of the Office of the United Nations High Commissioner for Human Rights	70/1	Transforming our world: the 2030 Agenda for Sustainable Development
61/166	Promotion of equitable and mutually respectful dialogue on human rights	70/262	Review of the United Nations peacebuilding architecture
61/295	United Nations Declaration on the Rights of Indigenous Peoples	71/189	Declaration on the Right to Peace
		74/132	Report of the Human Rights Council
62/134	Eliminating rape and other forms of sexual violence in all their manifestations, including in conflict and related situations	75/201	Review of the United Nations peacebuilding architecture

##### *Security Council resolutions*

2282 (2016)	2558 (2020)
-------------	-------------

##### *Human Rights Council resolutions and decisions*

2/102	Reports and studies of mechanisms and mandates	24/35	Impact of arms transfers on human rights in armed conflicts
4/6	Strengthening of the Office of the United Nations High Commissioner for Human Rights	24/118	Establishment of a special fund for the participation of civil society in the Social Forum, the Forum on Minority Issues and the Forum on Business and Human Rights
6/9	Development of public information activities in the field of human rights, including the World Public Information Campaign on Human Rights	42/1	Composition of staff of the Office of the United Nations High Commissioner for Human Rights
6/30	Integrating the human rights of women throughout the United Nations system	45/113	Postponement of the implementation of certain activities mandated by the Human Rights Council
8/4	The right to education		
21/7	Right to the truth		

## Programme of work

### Subprogramme 1

#### Human rights mainstreaming, right to development, and research and analysis

##### (a) Human rights mainstreaming

#### Objective

20.2 The objective, to which this subprogramme contributes, is to advance the promotion and protection of all human rights and to further integrate all human rights into areas of work of the United Nations system, in accordance with the guiding principles of this programme.

#### Deliverables

20.3 Table 20.1 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 20.1

<b>Library services:</b> OHCHR publications in all available languages, human rights training and education publications, books, reports, periodicals, videos, DVDs on human rights, translations of the Universal Declaration of Human Rights.				

## Subprogramme 2 Supporting human rights treaty bodies

### Objective

20.8 The objective, to which this subprogramme contributes, is to advance the promotion and protection of the effective enjoyment by all of all human rights by providing support and advice to the human rights treaty bodies, ensuring that the guiding principles of this programme are adhered to and increasing the knowledge and awareness of the international human rights treaties and the work of all treaty bodies among national and international actors.

### Deliverables

20.9 Table 20.4 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 20.4

12. Regional training sessions on human rights issues for Governments, national human rights institutions and civil society by the United Nations Human Rights Training and Documentation Centre for South-West Asia and the Arab Region	28	19	42	42

#### C. Substantive deliverables

**Consultation, advice and advocacy:** consultations on human rights by the United Nations High Commissioner/Deputy High Commissioner for Human Rights with Members States; regional consultation on human rights issues for Governments, national human rights institutions and civil society by the United Nations Human Rights Training and Documentation Centre for South-West Asia and the Arab Region; and assistance to special rapporteurs and independent experts of the Human Rights Council (country mandates).

**Fact-finding, monitoring and investigation missions:** fact-finding, monitoring and investigation missions and commissions of inquiry established and supported; technical support and substantive and secretariat services for country-specific missions; monitoring, technical support and substantive services to human rights components in peace missions, including preparing inputs on the human rights situation mandated by the Security Council.

**Humanitarian assistance missions:** support and substantive advice related to human rights challenges in humanitarian operations.

**Databases and substantive digital materials:** update and maintenance of databases on geographic human rights information, including the human rights case database, and of a secure information exchange platform in support of the commissions of inquiry and fact-finding missions.

#### D. Communication deliverables

**External and media relations:** press releases and media briefings by country-mandate holders and the High Commissioner.

## Subprogramme 4 Supporting the Human Rights Council, its subsidiary bodies and mechanisms

### Objective

20.12 The objective, to which this subprogramme contributes, is to advance the promotion and protection of the effective enjoyment by all of all human rights by providing strengthened support and advice, while ensuring that the guiding principles of this programme are adhered to, to the Human Rights Council and its subsidiary bodies and mechanisms, including the Advisory Committee, the special procedures, the universal periodic review and the complaint procedure.

### Deliverables

20.13 Table 20.6 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 20.6

**Subprogramme 4: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>

<b>C. Substantive deliverables</b>				
<p><b>Consultation, advice and advocacy:</b> consultations and events held in parallel with the sessions of the Human Rights Council with members and observers of the Council; briefings to Member States and United Nations entities on procedural issues relating to the Council and its subsidiary bodies, mechanisms and working groups; briefings to representatives of the least developed countries and small island developing States to enhance their capacity to participate in the work of the Council and its subsidiary bodies; pre-session and post-session briefings by the Secretary of the Council to non-governmental organizations; and communications by special rapporteurs, independent experts and working groups mandated by policymaking bodies on behalf of alleged victims of human rights violations.</p>				
<b>D. Communication deliverables</b>				
<p><b>External and media relations:</b> press releases on the work of the Human Rights Council and its subsidiary bodies and mechanisms.</p> <p><b>Digital platforms and multimedia content:</b> update and maintenance of Internet and extranet web pages on the work of the Human Rights Council and its subsidiary bodies and mechanisms.</p>				

## Programme 21

### International protection, durable solutions and assistance to refugees

#### Overall orientation

#### Mandates and background

21.1 The Office of the United Nations High Commissioner for Refugees (UNHCR) is responsible for leading and coordinating international action for the protection of refugees and the search for solutions to their plight. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolution [319 A \(IV\)](#), by which the Assembly established the Office, and resolution [428 \(V\)](#), which sets out its statute. In addition, the international legal basis for the protection of refugees finds its principal expression in the Convention relating to the Status of Refugees, of 1951 and the Protocol thereto, of 1967. UNHCR also has responsibilities for stateless persons pursuant to paragraph 6 (A) (ii) of the statute and article I (A) (2) of the 1951 Convention with regard to refugees who are stateless, as well as to various General Assembly resolutions, including resolutions [3274 \(XXIX\)](#) and [31/36](#) in relation to the Convention relating to the Status of Stateless Persons, of 1954 and the Convention on the Reduction of Statelessness, of 1961. Over the years, the mandate of UNHCR has been extended to other groups through various Assembly resolutions. The Office provides protection and assistance to internally displaced persons, working in cooperation with the Under-Secretary-General for Humanitarian Affairs and Emergency Relief Coordinator and in the context of the collaborative response of the United Nations system, as well as with the consent of the State concerned.

21.2 While the final figures for 2020 are not yet available, UNHCR has estimated that the total population of concern to UNHCR surpassed 83 million at mid-2020. While the coronavirus disease (COVID-19) pandemic temporarily led to a reduction in the number of new asylum seekers owing to movement restrictions and border closures, significant new displacement was registered during the first half of 2020, including in the Syrian Arab Republic and the Democratic Republic of the Congo). In 2022, the number of persons of concern will depend on the resolution of or increase in the number of conflicts.

21.3 Despite persistent and emerging challenges in providing protection, assistance and solutions for persons of concern to UNHCR, key advances were made towards more predictable and equitable burden- and responsibility-sharing within the framework of the global compact on refugees. The Global Refugee Forum generated commitments and pledges that have the potential to significantly improve the lives of refugees and their host communities. A number of critical arrangements and tools were established to operationalize burden- and responsibility-sharing, and opportunities were created to broaden the engagement in refugee responses of a wide range of stakeholders, including development and private sector actors. In 2020, UNHCR and its partners mounted large-scale preparedness and response efforts for persons of concern and host communities as COVID-19 spread. The pandemic exacerbated existing humanitarian crises and millions of refugees, internally displaced persons and others lost their livelihoods owing to movement restrictions and lockdowns. The Office continued with its organizational reform, increasing its ability to operate in a flexible manner in complex operating environments.

## Programme of work

### Objective

21.4 The objective, to which the programme contributes, is to ensure international protection to refugees and other persons of concern to UNHCR and to achieve durable solutions to their problems in cooperation with States and other organizations without discrimination and taking age and gender into consideration.

### Strategy

21.5 To contribute to the objective, the Office will encourage States to adhere to relevant international instruments, including the refugee and statelessness conventions, and regional instruments. Complementary forms of protection will be promoted, including on the basis of human rights law. UNHCR will work with States and other partners to ensure that the attainment of durable solutions to displacement influences broader development agendas and is central to peacebuilding efforts. The Office will advocate and support measures that foster inclusion, including with respect to educational opportunities, and access to formal economies and the labour market, which will improve the well-being of persons of concern, enhance protection and bring about solutions. It will continue to support the implementation of the global compact on refugees in close cooperation with States and other relevant stakeholders, and will advocate greater financial support for refugee host countries and communities and other persons of concern. In this regard, UNHCR will follow up on the pledges made at the Global Refugee Forum and redouble its efforts to expand international cooperation and responsibility-sharing.

21.6 UNHCR will promote adequate and proper reception conditions for asylum seekers, alternatives to detention and the fair treatment of protection claims. Ensuring adequate reception arrangements remains a challenge for States receiving large numbers of new arrivals. UNHCR will continue to work with national and local authorities and civil society to strengthen and expand reception facilities, develop transition accommodation and ensure effective assistance, targeting women and children and the most vulnerable. The promotion and dissemination of refugee law and protection principles, through the training of government officials and staff of non-governmental agencies, will be another means of achieving the stated objective.

21.7 The Office will provide protection and assistance to internally displaced persons, with its engagement based on the relevant General Assembly resolutions, including resolution [74/160](#), in close collaboration with partners in the United Nations system under the Inter-Agency Standing Committee and non-governmental organizations (NGOs). The Office will continue to advocate the prevention and reduction of statelessness, as well as the protection of stateless persons. This includes promoting accession by States to the relevant international instruments and working with States to facilitate the acquisition, reacquisition or confirmation of nationality by stateless persons.

21.8 Furthermore, the Office, will seek to contribute to the objectives of the 2030 Agenda for Sustainable Development. Notably, in support of Sustainable Development Goal 4 on education, UNHCR will promote equitable access to education and inclusion in national educational systems. It will support persons of concern through a wide variety of partnerships and explore innovative ways to bring learning to even the most isolated communities. The UNHCR publication *Refugee Education 2030: A Strategy for Refugee Inclusion* will guide the Office's engagement in this area.

21.9 The Office will continue to collaborate with governments and partners to promote the inclusion of refugees, internally displaced persons and others of concern in national emergency preparedness and response plans. It will respond to emergency situations, in line with its strategy on accountability to affected populations, and will strengthen communication and feedback mechanisms for persons of concern and host communities. In 2022, UNHCR will leverage its new results-based framework and results-based management tool deployed in 2021, so as to better plan through evidence-based decision-making. The tool will also enable the Office to better report on the impact of its programmes for persons of concern.

21.10 For 2022, the planned deliverables and activities reflect strengthened approaches that incorporate lessons from the COVID-19 pandemic. Such planned deliverables and activities include health, water, sanitation and hygiene, protection and livelihood activities, which will continue to be mainstreamed and strengthened to ensure sufficient capacity to deal with any new virus variants. As part of its efforts to build back better, UNHCR recognizes that it will remain critical to sustain advocacy for the inclusion of persons of concern in national vaccination roll-out and socioeconomic recovery plans. COVID-19 presents an opportunity to strengthen the inclusion of persons of concern in national systems. UNHCR has ensured and continues to ensure the mainstreaming of protection and pandemic response activities, and will continue to monitor the evolution of the pandemic and assess the needs of persons of concern.

21.11 The above-mentioned work is expected to result in:

- (a) Key advances towards more predictable and equitable burden- and responsibility-sharing within the framework of the global compact on refugees;
- (b) Strengthened national asylum systems;
- (c) Some 90,000 individuals acquiring nationality or having it confirmed;
- (d) Some 22 million individual records being registered in the UNHCR Population Registration and Identity Management EcoSystem (PRIMES).

## **External factors for 2022**

21.12 With regard to the external factors, the overall plan for 2022 is based on the following planning assumptions:

- (a) Security conditions in most countries will allow UNHCR to carry out its programmes, although vigilance will need to be maintained owing to the presence of armed groups and violence against humanitarian workers. Humanitarian access will be granted in most countries, enabling the Office to respond to urgent protection and assistance needs;
- (b) Continued ownership by the international community and the willingness of States and relevant stakeholders to contribute to and support the implementation of the global compact on refugees;
- (c) The narrowing of asylum space in some countries, with increasingly restrictive admission and asylum policies towards refugees and asylum seekers, will continue to require enhanced protection responses;
- (d) Significant funding gaps will continue to hamper the operational scope of and assistance provided by UNHCR, particularly if there is no increase in resources commensurate with the increased needs of persons of concern.

21.13 With regard to the COVID-19 pandemic, the proposed programme plan is based on the assumption that the proposed deliverables and activities for 2022 will be feasible to implement. However, if the pandemic were to have a further impact on the planned deliverables and activities, the plans would be adjusted during 2022 within the scope of the overall objectives, strategies and mandates. Any such adjustments would be reported as part of the programme performance information.

2.14 With regard to cooperation with other entities at the global, regional, national and local levels, the Office will continue to work closely with a wide range of actors. This includes governments, regional organizations, international humanitarian and development organizations, financial institutions NGOs, private sector partners, academia and refugees themselves. The Office reached its Grand Bargain commitment of providing 25 per cent of its programme expenditures through local and national responders in 2019. Preliminary data for 2020 show disbursement of approximately \$802 million, or 28 per cent of programme expenditures, through local and national responders. The Office remains committed to complying with this level of performance going forward through its proposed programme budget for 2022. The Office will remain committed to the principle of participation, believing that refugees and other persons of concern who benefit from the programme's activities should be consulted over decisions that affect their lives.

21.15 With regard to coordination and cooperation within the United Nations system, UNHCR will continue its engagement in various forums, including the Inter-Agency Standing Committee and the United Nations System Chief Executives Board for Coordination. The engagement of a broad range of actors, including those beyond the traditional humanitarian sphere, is critical to mobilizing effective responses and pursuing solutions to forced displacement and statelessness. This means strengthening existing partnerships, but also pursuing new ones that can help foster innovative approaches. The Office will pursue measures to continue to promote an integrated approach to addressing people's vulnerability before, during and after crises through long-term and targeted planning for refugees and host communities.

21.16 The Office integrates a gender perspective in its operational activities, deliverables and results through its age-, disability- and gender-sensitive policy and established mandatory core actions to help strengthen these commitments. The Office has further promoted the empowerment of and will continue to support all persons of concern, including women and girls who are victims of violence, with access to health care, psychosocial support, safe shelter and legal aid. Community engagement will be strengthened and awareness-raising initiatives prioritized to prevent violence. The Office will continue to promote gender equality and will strengthen mechanisms to ensure accountability to affected persons.

21.17 UNHCR has developed a 2020–2024 action plan to meet the United Nations Disability Inclusion Strategy requirements. To that end, the Office will seek to identify persons of concern with disabilities during registration exercises and in its direct engagement with persons of concern in order to better target their needs. The International Disability Alliance will support the Office in advancing its strategy on disability inclusion with the direct participation of persons with disabilities and their representative organizations. The Office will pursue capacity-building on disability inclusion in displacement and statelessness situations; advocate disability inclusion in key humanitarian forums, including the Global Refugee Forum; and ensure policy implementation and monitoring.

## Evaluation activities

21.18 The following evaluations completed in 2020 have guided the proposed programme plan for 2022:

- (a) Strategic/centralized evaluations of UNHCR performance:
  - (i) UNHCR country portfolio evaluation: Iraq (August 2020);
  - (ii) Evaluation of UNHCR's Country Operation, Afghanistan (August 2020);
  - (iii) UNHCR country portfolio evaluation: Afghanistan, Angola, Iraq, Morocco, synthesis report (September 2020);
  - (iv) UNHCR's engagement in humanitarian-development cooperation: emerging findings from a longitudinal evaluation, phase 2, November 2019–May 2020 (December 2020);
  - (v) UNHCR's emergency response to the Venezuela (Bolivarian Republic of) situation (December 2020);
  - (vi) Evaluation of UNHCR's approach to learning and development for workforce and partners (December 2020).
  - (vii) UNHCR's L3 response to Cyclone Idai in Mozambique, Zimbabwe and Malawi (postponed to first quarter 2021);
- (b) Joint evaluations on United Nations/system-wide performance:
  - (i) UNICEF/IOM/UNHCR evaluation synthesis report: children on the move;
  - (ii) Inter-agency humanitarian evaluation on gender equality and the empowerment of women and girls (October 2020);
- (c) Decentralized evaluations/reviews of UNHCR performance:
  - (i) Independent review of individual donor assessments in humanitarian operations (November 2020);
  - (ii) Independent review of the UNHCR's Global Strategy: Beyond Detention 2014–2019;
  - (iii) UNHCR decentralized livelihood evaluations, synthesis report (2019);
  - (iv) Evaluation of the UNHCR-Government of Colombia four-year plan, 2015–2019 (June 2020);
  - (v) Baseline evaluation of the IKEA Foundation livelihoods and energy projects among Somali refugees and host communities in Melkadida, Ethiopia (June 2020), and evaluation of UNHCR's Innovation Fund (November 2020);
  - (vi) Evaluation of the effects of UNHCR cash-based interventions on protection outcomes in Rwanda (June 2020).

21.19 The findings of the evaluations referenced above have been taken into account for the proposed programme plan for 2022. For example, the first results of the three-year evaluation of humanitarian-development cooperation (December 2020) have shown that since the initiation of the New York Declaration for Refugees and Migrants of 2016 and the launch of the global compact on refugees in 2018, UNHCR has made substantial and systematic progress in terms of both increasing its outreach to and

deepening its cooperation with other development actors. Highlights of the progress achieved include joint advocacy with the World Bank Group targeting host governments and deepened collaboration on data analysis. Furthermore, UNHCR has established global operational partnerships with other United Nations agencies that are being translated into cooperation in country operations. The evaluation found that concerted efforts by UNHCR to engage directly with bilateral development institutions were under way to secure the inclusion of displaced populations in development frameworks. The evaluation also highlighted further opportunities for UNHCR to engage with the United Nations sustainable development cooperation processes and to improve collaboration with the United Nations development system and development NGOs, particularly at the level of country operations. In applying the findings, the UNCHR proposed programme plan for 2022 includes explicit efforts to continue to leverage and mainstream collaboration with broader development mandates.

21.20 The evaluation of UNHCR's approach to learning and development (December 2020) found that the organization approaches skills and knowledge development through training courses. The evaluation identified the need for UNHCR to reframe and update its current learning model and transform learning approaches across the organization. The evaluation recommended that, in order to make learning more relevant and accessible to UNHCR's workforce and partners, some responsibilities and resources for learning should be devolved to the regional level. As part of the proposed programme plan for 2022, opportunities to develop and pilot region-specific learning will be encouraged and targeted.

21.21 The following evaluations of global UNHCR strategies and policies are planned for 2022:

- (a) Humanitarian-development cooperation (third year);
- (b) UNHCR-led initiatives to end statelessness;
- (c) Repatriation programmes and activities;
- (d) Asylum capacity development;
- (e) Implementation of the UNHCR age-, disability- and gender-sensitive policy;
- (f) Major humanitarian responses in the Democratic Republic of the Congo and the Sahel;
- (g) Country strategies in Egypt, the Sudan, Uganda, Zambia, Mexico and Myanmar and multi-country operations in the Baltic and Nordic countries;
- (h) Joint United Nations/system-wide evaluations of the response in Yemen, the protection of refugee rights in the context of COVID-19 and the UNHCR/UNICEF road map for refugee children.

21.22 The regional structure of UNHCR structure will bring evaluations closer to the point of delivery. The selection of programmes and activities to be evaluated within regions will be increasingly determined by the regional bureaux and aligned to regional priorities. It is anticipated that in 2022 a sizeable number of decentralized evaluations will be commissioned by the regional bureaux.

## Programme performance in 2020

21.23 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Cash assistance lessens protection risks and economic hardship for persons of concern

21.24 In 2020, UNHCR continued providing cash assistance, which has proved to be an efficient way to support immediate needs, address protection risks and mitigate the socioeconomic hardship of the most vulnerable. Cash assistance, which complements governments' efforts by contributing an additional safety net for vulnerable refugees and persons of concern, increased during 2020 to mitigate the impact of COVID-19, totalling approximately \$2.4 billion between 2016 and 2020. In 2020 more than 65 operations launched new cash initiatives and/or expanded existing cash assistance, reaching some 7.85 million vulnerable people. The Office also pursued the establishment of robust refugee registration and cash delivery systems. New modalities for cash deliveries were deployed, including increasing one-off transfers; advancing payments; aligning cash assistance with national social safety nets; switching from cash to in-kind assistance when markets were not functioning; and increasing the use of digital payments. New technology such as contactless biometric identification was tested and relevant risk mitigation action was deployed to prevent the risk of fraud in compliance with UNHCR administrative standard operating procedures.

#### *Progress towards the attainment of the objective, and performance measure*

21.25 The above-mentioned work contributed to the objective, as demonstrated by the increase in cash assistance distributed to persons of concern from \$646 million to \$694 million (see figure 21.I).

Figure 21.I

#### Performance measure: total annual cash assistance distributed to persons of concern

(Millions of United States dollars)

Note: Figure for 2020 is provisional pending the finalization of the year-end accounts.

### Impact of COVID-19 on programme delivery

21.26 During 2020, the COVID-19 pandemic had an impact on the planned deliverables and activities of UNHCR. COVID-19 has affected everyone throughout the world, threatening people's health and livelihoods and compounding challenges for the most vulnerable. In addition to its health impacts, COVID-19 has produced a significant protection crisis and a pandemic of poverty. It has created a deepened sense

of despair among the world's forcibly displaced, straining their coping mechanisms, threatening their livelihoods and exacerbating challenges to their mental health. The pandemic has also contributed to a more constrained humanitarian space, with pandemic-related restrictions and border closures affecting access to asylum and territory.

21.27 At the same time, however, activities were modified in response to issues related to the COVID-19 pandemic. UNHCR is committed to being able to “stay and deliver” and introduced measures to ensure the health and well-being of its staff, including by adopting flexible measures to respond to changing operational contexts and adjusting its programmes to mitigate the impacts of the virus and ensure continuity of essential protection and assistance services. UNHCR seized opportunities provided by the regional bureaux, where decisions could be expedited and decentralized. The regional bureaux identified requirements related to COVID-19 quickly, allowing UNHCR headquarters to allocate resources swiftly. This resulted in quicker delivery of assistance and a high implementation rate (measured as expenditure over funds available). UNHCR also leveraged new technologies in its response to COVID-19, which allowed for an effective response despite 88 per cent of the workforce working remotely at the peak of the pandemic. By moving early and with procurement undertaken at scale, the Office benefited from bulk prices, with global stockpiles maintained and supplies prepositioned. By December 2020 UNHCR had procured goods and services worth \$186.1 million in response to the COVID-19 pandemic. Operationally, UNHCR worked in collaboration with governments, partners and persons of concern, scaling up and adapting its response modalities to mitigate the pandemic's impacts on persons of concern. The response focused on scaling life-saving support through health, water and sanitation services; increasing shelter capacity; strengthening lifesaving information-sharing and communication; providing vital protection services; ensuring that the rights and protection of forcibly displaced people were respected; and providing cash support to persons of concern affected by the economic downturn and loss of jobs, which proved to be a valuable and cost-effective way of providing immediate assistance to families in need. Across operations, UNHCR and partners also leveraged community-based approaches and reinforced and supported national efforts. By December 2020, 39.4 million persons of concern had received assistance related to COVID-19. Nearly 9.38 million persons of concern had accessed health services, with some 605,000 individuals receiving mental health and psychosocial support and over 1.18 million women and girls receiving comprehensive care. Over 15.34 million people accessed protection services and 7.85 million persons of concern benefited from cash assistance.

21.28 Reflecting the importance of continuous improvement and responding to the evolving needs, UNHCR will mainstream the lessons learned and best practices related to the adjustments to and adaptation of its programme owing to the COVID-19 pandemic. Specific examples of its build back better efforts include leveraging the regional bureaux and their strategic capacity to swiftly develop emergency plans that work because they are specifically tailored to regional needs, streamlining supply processes to enable the quick purchase and delivery of personal protective equipment and medical items, and streamlining the resource allocation process to ensure that additional resources required by operations are allocated as expeditiously as possible.

## **Planned results for 2022**

21.29 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

## **Result 1: implementation of the global compact on refugees<sup>1</sup>**

### **Programme performance in 2020**

21.30 The Office has continued its work related to supporting the implementation of the global compact on refugees in line with its mandate and in close cooperation with States and other relevant stakeholders. The compact is aimed at providing a basis for predictable and equitable burden- and responsibility-sharing among all Member States, together with other relevant stakeholders. The four objectives of the compact are: to ease the pressure on host countries; to enhance refugee self-reliance; to expand access to third-country solutions; and to support conditions in countries of origin for return of refugees in safety and dignity. Some 1,400 pledges were made towards the objectives of the compact at the first Global Refugee Forum, held in December 2019. One year on, the COVID-19 pandemic has highlighted the importance of the principles at the heart of the compact: a spirit of solidarity to work together, to share responsibilities and to ensure that people who have been forced to flee are included in national responses. In 2020, many entities that had made pledges at the Forum shifted areas of focus or updated pledge objectives to adapt to the emergency situation. UNHCR facilitated the pairing of financial commitments with policy pledges made by host countries at the national, regional and global levels and monitored their implementation. The year 2020 saw the operationalization of arrangements and tools to facilitate more predictable and equitable responsibility-sharing, while progress was also made towards greater inclusion of refugees in national systems and national development and preparedness plans. From Azerbaijan to Costa Rica, many Governments have included refugees in their national health systems to ensure that no one is left behind in the COVID-19 response. UNHCR played a catalytic role in supporting host Governments in their efforts to strengthen the complementarity of programmes and policy interventions by development actors, targeting areas that are hosting people who have been forcibly displaced.

21.31 The pledges and contributions announced at the Global Refugee Forum are key to transforming the aspirations contained in the global compact on refugees into positive changes in the lives of refugees and host communities. The compact will steer the work of UNHCR, States and partners in the decade ahead and beyond, providing a powerful tool for broadening the base of support for refugees and their host countries and communities, strengthening protection, advancing inclusion and pursuing solutions through the realization of the compact's four key objectives.

21.32 The above-mentioned work contributed to more than 250 financial pledges (annual and multi-year) amounting to approximately \$8 billion announced at the Global Refugee Forum by States, the private sector and development actors (including low-income refugee-hosting countries). More than half of the 1,400 pledges (financial and non-financial) made at the Forum have been initiated, based on progress updates received by pledging entities in 2020. UNHCR will continue to monitor progress in fulfilling those pledges. The result met the planned target of participation by States in the Forum to announce pledges and contributions of financial, material, technical or other categories reflected in the proposed programme budget for 2020.

21.33 Furthermore, the above-mentioned work also contributed to some 230 best practices directly linked to the agreed objectives contained in the global compact on refugees being shared on the digital platform for the compact, which met the planned target reflected in the programme budget for 2020.

<sup>1</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 25)).

### Proposed programme plan for 2022

21.34 The Office will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objectives of the global compact, including the timely implementation of pledges made at the Global Refugee Forum, UNHCR will continue to manage the digital platform for the global compact on refugees to disseminate good practices and information, including tracking of the implementation of pledges and contributions emanating from the Forum. Implementation, follow-up and review of the compact in 2022 will be informed by the indicator framework, with publication of an inaugural report and a meeting of high-level officials in December 2021, both of which will also inform further pledging guidance for the next Forum, to be held in 2023. The expected progress is presented in the performance measure below (see table 21.1).

Table 21.1

#### Performance measure

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Affirmation of the global compact on refugees	Participation by States in the Global Refugee Forum to announce pledges and contributions of financial, material, technical or other kinds of support, as well as to share best practices to meet the objectives of the global compact on refugees	1,400 pledges, including financial pledges amounting to \$8 billion, announced at the Global Refugee Forum. More than half of the 1,400 pledges made at the Forum have been initiated  230 best practices to meet the objectives were shared on the digital platform of the global compact on refugees	Member States will, through a digital platform provided by UNHCR, share good practices and information on the implementation of pledges	Member States will have access to a consolidated indicator framework for the global compact on refugees, to report on biennially, starting in 2021, which supports the strategic development of pledges to address gaps and challenges in achieving the objectives of the compact

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 2: emergency deployments in support of persons of concern<sup>2</sup>

#### Programme performance in 2020

21.35 In March 2020, the High Commissioner declared a global level-2 emergency in response to the COVID-19 pandemic. Like other emergencies, the response to COVID-19 in the context of forced displacement required a collective effort to support persons of concern and address the wide-ranging impacts. Yet the pandemic was unlike any other emergency UNHCR had seen in its 70-year history. It was a crisis on top of multiple layers of crises already faced by some 80 million forcibly displaced people around the world. Alongside the pandemic, UNHCR responded to new and growing displacement crises, including in the Sahel region, where nearly

<sup>2</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

3.7 million people were forced to flee both internally and across borders, and in northern Mozambique and Ethiopia's Tigray region, where hundreds of thousands were forced from their homes by violence. Other protracted situations, such as Afghanistan, Somalia and the Syrian Arab Republic, as well as the Rohingya in Asia, continued to require emergency support in 2020. Some \$36.2 million worth of core relief items were dispatched from global stockpiles to 44 countries in 2020. In total, emergency deployments accounted for 36,999 mission days in 2020. Technical experts in shelter, water, sanitation and hygiene, public health, protection cluster/sector coordination, information management and education, among other areas, provided a much needed surge of operational capacity required in the emergency. New emergency deployments rose after the first wave of COVID-19 ended in many countries in September 2020 and in response to new emergencies. COVID-19 prompted a rethinking of modalities for emergency deployment. UNHCR used in-country deployable experts from standby partners, with experts in public health, epidemiology and water, sanitation and hygiene providing remote online support to emergency operations.

21.36 The above-mentioned work contributed to a total of 212 emergency support staff deployments in 2020, 113 (53 per cent) through various UNHCR internal rosters and 99 (47 per cent) through emergency standby partners, which did not meet the target of 300 personnel planned to be deployed reflected in the proposed programme budget for 2021. COVID-19 travel restrictions and border closures severely restricted typical deployment and in-person programme delivery modalities.

### Proposed programme plan for 2022

21.37 The Office will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, UNHCR will continue to maintain an active roster of emergency support staff available for deployment and will proactively adjust to the changing operational context at all levels. The Office will continue to apply new modalities for emergency deployments as appropriate. The expected progress is presented in the performance measure below (see figure 21.II).

Figure 21.II

**Performance measure: annual number of personnel deployed to respond to emergencies**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

**Result 3: strengthening protection of and enabling durable solutions for refugees and asylum seekers through individual registration****Proposed programme plan for 2022**

21.38 Individual registration and strengthening the quality of registration data enables refugees and asylum seekers to access their rights by ensuring the integrity of refugee protection systems and preventing and combating fraud and crime, including trafficking in persons. The Office shares resources and expertise to strengthen national capacity for individual registration and documentation, including support for digitalization, biometrics and other relevant technology. In line with its policy on the protection of personal data of persons of concern and its age-, disability- and gender-sensitive policy, UNHCR also shares disaggregated registration data. The Office continued individual registration of refugees and asylum seekers, ensuring that they receive documentation and have improved access to protection and other available services. UNHCR will continue to strengthen its identity management capability and expand the coverage of PRIMES, which provides a suite of interoperable registration, identity management and case management tools and applications.

*Lessons learned and planned change*

21.39 The lesson for the Office was reduced opportunities for rolling out PRIMES to new locations and for training staff due to restrictions on travel and border closures. Upon the outbreak of the COVID-19 pandemic in 2020, the deployment of PRIMES to field missions was put on hold. Delivery of training on emergency registration was also affected by restrictions on movement, thus placing reliance on the roster of previous trainees to fill gaps in emergencies. Training modules were adapted for online delivery and the existing infrastructure for data migration was effectively executed through cloud technology and repurposed to support remote modalities. Innovative remote deployment modalities resulted in the roll-out of PRIMES tools to 27 new operations, leading to 100 operations now using PRIMES. The number of individuals with records in PRIMES rose from 10.2 million to 15 million in 2020, and was accessible by 7,200 users. In applying the lesson, UNHCR will place greater focus on new and emerging registration methods, including technologies that facilitate self-service by refugees, remote training and simulations, and contactless data collection. UNHCR will strengthen its identity management capability and will expand the coverage of PRIMES. For instance, some approaches have enabled high productivity during the pandemic. These include manual remodelling of biometric devices to enable contactless biometric capture and identification, conducting registration interviews via video calls using smartphones, and the installation of Plexiglass dividers in registration facilities.

*Expected progress towards the attainment of the objective, and performance measure*

21.40 This work is expected to contribute to the objective, as demonstrated by the continued increase in the number of refugees and asylum seekers registered on an individual basis (see figure 21.III).

Figure 21.III

**Performance measure: total number of individual registration of refugees and asylum seekers (cumulative)**

(Millions of persons)

**Legislative mandates**

21.41 The list below provides all mandates entrusted to the Office.

*General Assembly resolutions*

319 A (IV)	Refugees and stateless persons	58/153	Implementing actions proposed by the United Nations High Commissioner for Refugees to strengthen the capacity of his Office to carry out its mandate
428 (V)	Statute of the Office of the United Nations High Commissioner for Refugees		
538 B (VI)	Assistance and protection of refugees	70/1	Transforming our world: the 2030 Agenda for Sustainable Development
1166 (XII)	International assistance to refugees within the mandate of the United Nations High Commissioner for Refugees	74/160	Protection of and assistance to internally displaced persons
50/152; 73/151; <sup>3</sup> 75/163	Office of the United Nations High Commissioner for Refugees	75/164	Assistance to refugees, returnees and displaced persons in Africa

*Conventions and conference declarations*

Convention relating to the Status of Refugees, of 1951, and the Protocol thereto, of 1967	Cartagena Declaration on Refugees, 1984
Convention relating to the Status of Stateless Persons, 1954	Convention on the Rights of the Child, 1989
Convention on the Reduction of Statelessness, 1961	San José Declaration on Refugees and Displaced Persons, 1994
Organization of African Unity Convention Governing the Specific Aspects of Refugee Problems in Africa, 1969	African Union Convention for the Protection and Assistance of Internally Displaced Persons in Africa, 2009

**Deliverables**

21.42 Table 21.2 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

<sup>3</sup> In which the Assembly affirmed the global compact on refugees (A/73/12 (Part II)).

### C. Substantive deliverables

**Consultation, advice and advocacy:** assistance to Member States in all regions on the establishment of national legal and administrative frameworks in line with protection standards.

**Fact-finding, monitoring and investigation missions:** fact-finding missions on programme areas of concern and on the search for durable solutions; missions undertaken by senior management on protection issues relating to refugees and other persons of concern.

**Humanitarian assistance missions:** missions undertaken by the senior executive team on issues relating to basic services and assistance provided to refugees and other persons of concern to some 50 countries.

**Direct service delivery:** biometric registration provided; cash assistance delivered to people of concern across operations; at least 4 million persons of concern targeted with shelter assistance; approximately 2 million children enrolled in primary education; access to a sustainable source of electricity provided to about 3 million people of concern; about 90,000 people acquired nationality or had it confirmed; at least 85 per cent of UNHCR operations have functioning complaint and feedback mechanisms in place.

### D. Communication deliverables

**Outreach programmes, special events and information materials:** special annual events: (a) international consultations with NGOs; (b) High Commissioner's dialogue on protection challenges with States, academics, NGOs and other stakeholders; (c) World Refugee Day, focusing on raising public awareness of refugee issues and increasing support for refugees; (d) Nansen Refugee Award, which is a yearly event intended to acknowledge people, groups and organizations for their outstanding work on behalf of forcibly displaced people.

**External and media relations:** media briefings and press conferences reaching a global and geographically diverse audience on the work of UNHCR and situations relating to refugees and others of concern; regular media engagements on protection and operation-related themes and issues.

**Digital platforms and multimedia content:** publication of multimedia content (text, photos and videos) at [www.unhcr.org](http://www.unhcr.org) on the work of UNHCR and issues relating to refugees and others of concern; UNHCR global social media accounts disseminate multimedia content to more than 10 million followers with vast geographic diversity; at least 80 goodwill ambassadors and other high profile supporters, spanning all regions and including advocates who are themselves former refugees, raise awareness and amplify voices of refugees and others of concern; weekly updates and maintenance of [www.refworld.org](http://www.refworld.org).

## **Programme 22**

### **Palestine refugees**

#### **Overall orientation**

##### **Mandates and background**

22.1 The United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA) is responsible for providing assistance and protection to Palestine refugees. The mandate derives from the priorities established in relevant General Assembly resolutions, including resolution [302 \(IV\)](#). Since starting operations in 1950, the Agency has adapted its programmes to meet the increasingly complex needs of Palestine refugees and to provide them with a measure of protection and stability amid chronic conflict in the region. It stands ready to continue to do so in 2022 in accordance with the triennial mandate that it received from the General Assembly through resolution [74/83](#).

##### **Strategy and external factors for 2022**

22.2 The mission of UNRWA is to help Palestine refugees achieve their full potential in human development under the difficult circumstances in which they live. In line with that mission, as part of its medium-term strategy for the period 2016–2021, UNRWA works towards five strategic outcomes: (a) Palestine refugee rights under international law are protected and promoted; (b) Palestine refugee health is protected and the disease burden is reduced; (c) school-age children complete quality, equitable and inclusive basic education; (d) Palestine refugee capabilities are strengthened for increased livelihood opportunities; and (e) Palestine refugees are able to meet their basic human needs of food, shelter and environmental health. Progress towards these outcomes will continue to drive the Agency's operations during 2022.

22.3 Under the above-mentioned five strategic outcomes, UNRWA aims to achieve its goals by maintaining and improving the provision of education and health services, relief and social services, microfinance assistance, infrastructure and camp improvement within refugee camps and protection, for the benefit of 5.7 million registered Palestine refugees in Jordan, Lebanon, the Syrian Arab Republic, Gaza and the West Bank, including East Jerusalem. In that regard, innovation will continue to play a pivotal role across UNRWA programming, including in education, where efforts to strengthen digital content and the supportive technical infrastructure will be leveraged in support of new ways of learning; improving what is delivered (through digital resources) and how it is delivered (via content delivery). Enabling students to be reached more efficiently and effectively through a variety of materials that can be self-directed, cooperative, interactive, problem-oriented and flexible in order to prepare them for a digital world, the Agency will also ensure that the challenges to digital education, including Internet access and the availability of technology to participate in digital learning, will be addressed.

22.4 For 2022, the Agency's planned deliverables and activities reflect the known and anticipated challenges related to coronavirus disease (COVID-19). Such planned deliverables and activities include: (a) the provision of education to over 500,000 students through mixed learning methods; (b) the continued use of telemedicine and home delivery of medicines to non-communicable disease patients; (c) food and cash distributions for the most vulnerable; and (d) the expanded provision of mental health and psychosocial support to Palestine refugees through the Agency's protection,

health, education and relief and social services programming. Specific examples of such planned deliverables and activities are provided under each subprogramme.

22.5 With regard to cooperation with other entities at the global, regional, national and local levels, UNRWA maintains a wide range of partnerships with host and donor Governments, international financial institutions, UNRWA national committees and the private sector that assist the Agency to deliver its mandate. Additional partnerships with international and national non-governmental organizations and community-based organizations maximize the Agency's technical capacity to deliver more effective and efficient results in key service delivery areas, including protection, health and poverty alleviation for the most vulnerable.

22.6 With regard to inter-agency coordination and liaison, UNRWA will continue to both maintain and expand core partnerships that reflect its commitment to supporting the implementation by Member States of Sustainable Development Goal 17. Many of those partnerships date to the Agency's founding in 1949, such as those with host Governments, the United Nations Educational, Scientific and Cultural Organization and the World Health Organization (WHO). Inter-agency partners helped to establish norms for Agency education and health programmes, and both organizations continue to furnish strategic assistance. UNRWA continues to interact regularly with United Nations country teams and their member organizations to improve synergies, in particular in the area of service delivery, in keeping with the respective organizational mandates.

22.7 With regard to external factors, the overall plan for 2022 is based on the following planning assumptions:

- (a) Instability and, in some cases, unrest and conflict characterize the macroenvironment throughout 2022;
- (b) The macroenvironment is characterized by a continuation of the current cycle of complex emergencies;
- (c) Demand for Agency emergency assistance increases, combined with a rising demand for core services;
- (d) Hostility towards and prejudice against Palestine refugees within host communities do not increase;
- (e) The blockade of Gaza does not tighten;
- (f) UNRWA can raise sufficient funds;
- (g) Security-related movement restrictions in the occupied Palestinian territory do not increase;
- (h) Enrolled populations do not increase beyond projections based on historical trends;
- (i) Commodity and rental prices do not rise beyond projected levels;
- (j) The infrastructure, installations and housing in the Agency's fields of operation do not sustain damage as a result of natural or human-made humanitarian crises.

22.8 With regard to the COVID-19 pandemic, the proposed programme plan is based on the assumption that the proposed deliverables and activities for 2022 will be feasible to implement. However, if the pandemic were to continue to have an impact on the planned deliverables and activities, they would be adjusted during 2022 within the scope of the overall objectives, strategies and mandate. Any such adjustments would be reported as part of the programme performance information.

22.9 UNRWA integrates a gender perspective into its operational activities, deliverables and results, as appropriate. For example, under subprogramme 1, recommendations from biennial protection audits serve to identify practical measures to increase the involvement of women and girls in Agency programming, while under subprogramme 2, women and men, girls and boys have equal access to primary health care. In addition, under subprogramme 3, all Palestine refugee children and youth enjoy, on a non-discriminatory basis, an equal opportunity to learn in Agency schools and are supported in developing their full potential, while under subprogramme 4, women are prioritized as recipients of microfinance loans. Under subprogramme 5, prioritization for shelter rehabilitation is accorded to vulnerable groups, including female-headed households. UNRWA will also continue to mainstream protection and gender into its operations, including with a view to meeting the needs of Palestine refugee children, persons with disabilities, youth and other vulnerable groups.

22.10 In line with the United Nations Disability Inclusion Strategy, the Agency will further advance disability inclusion through: (a) the reconstruction and rehabilitation of UNRWA installations to make them accessible to persons with disabilities; (b) continued support for students with a disability to support their inclusion in the education system, including through the use of accessible technology, in line with the UNRWA inclusive education approach; and (c) training of front-line staff to ensure the provision of services to persons with disabilities.

## **Programme performance in 2020**

### **Impact of COVID-19 on programme delivery**

22.11 During 2020, the COVID-19 pandemic had an impact on the planned deliverables and activities of the Agency. The impact included the temporary closure to the public of 704 schools, 23 microfinance branch offices and 60 registration offices Agency-wide as well as 25 UNRWA health centres in Jordan and 10 food distribution centres in Gaza. Specific examples of such impact under each of the five subprogrammes are provided below. The change in approach of planned deliverables and activities also had an impact on the expected results for 2020, as described in the programme performance under each subprogramme.

22.12 At the same time, however, some planned deliverables and activities were modified during 2020, within the overall scope of the objectives of the subprogrammes, on issues related to the COVID-19 pandemic. Those modifications included the institution of staggered health centre appointments, introduction of telemedicine, home delivery of essential medicines and the use of self-learning materials and interactive computer-based learning to minimize the spread of disease. In addition, food and cash distributions were scaled up in support of the most vulnerable. Specific examples of the modified activities are provided under each of the five subprogrammes listed below. The modified deliverables and activities contributed to results in 2020, as described in the programme performance under each subprogramme.

22.13 Reflecting the importance of continuous improvement and responding to the evolving needs of Palestine refugees, the programme will mainstream lessons learned and best practices related to the adjustments to and adaptation of its subprogrammes owing to the COVID-19 pandemic. Specific examples of lessons learned include how UNRWA categorized the services to be maintained, adapted, and scaled up in order to best address the COVID-19 emergency.

## Legislative mandates

22.14 The list below provides all mandates entrusted to the programme.

### *General Assembly resolutions*

302 (IV), 74/83, 75/93	Assistance to Palestine refugees	74/84	Persons displaced as a result of the June 1967 and subsequent hostilities
3331 B (XXIX)	United Nations Relief and Works Agency for Palestine Refugees in the Near East	74/85	Operations of the United Nations Relief and Works Agency for Palestine Refugees in the Near East
65/272	Report of the Secretary-General on the strengthening of the management capacity of the United Nations Relief and Works Agency for Palestine Refugees in the Near East	75/94	Operations of the United Nations Relief and Works Agency for Palestine Refugees in the Near East
70/1	Transforming our world: the 2030 Agenda for Sustainable Development		

## Deliverables

22.15 Table 22.1 lists all cross-cutting deliverables, by category and subcategory, for the period 2020–2022.

Table 22.1

### **Cross-cutting deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>

## Evaluation activities

22.16 The following self-evaluations completed in 2020 have guided the programme plan for 2022:

- (a) Subprogrammes 1, 2, 3, 4 and 5: a self-evaluation of the UNRWA medium-term strategy 2016–2021 monitoring and reporting activities;
- (b) Subprogrammes 1, 2, 3, 4 and 5: a self-evaluation on the UNRWA activities for Palestine refugees from the Syrian Arab Republic in Lebanon and Jordan.

22.17 The findings of the self-evaluations referenced above have been taken into account for the proposed programme plan for 2022. For example, the recommendations stemming from the self-evaluation of the UNRWA medium-term strategy 2016–2021 monitoring and reporting activities resulted in sex-disaggregated

reporting for another 27 performance indicators, which has led to an increased management focus to incorporate the needs of women into activities under subprogrammes 2, 4 and 5.

22.18 The following evaluations are planned for 2022:

- (a) Evaluation of the reform of the education programme;
- (b) Evaluation of the UNRWA emergency appeal mechanism.

## **Programme of work**

### **Subprogramme 1**

#### **Palestine refugee rights under international law are protected and promoted**

##### **Objective**

22.19 The objective, to which this subprogramme contributes, is to ensure that Palestine refugee rights under international law are protected.

##### **Strategy**

22.20 To contribute to the objective, the subprogramme will strengthen the protection of vulnerable and at-risk groups by: (a) developing the capacity of front-line UNRWA personnel; (b) coordinating safe and meaningful access to life-saving services; (c) leading in the engagement of community members in self-protection; and (d) providing access to medical, legal and/or psychosocial counselling and services for survivors of protection violations either directly or through referral to external partners. The subprogramme also plans to document protection concerns affecting Palestine refugees, including non-admission, refoulement and legal status and will engage host Governments, specialized organizations and other United Nations entities on those issues to secure remedial action, which will help to make progress towards Sustainable Development Goal 16. In addition, the subprogramme will implement protection principles across the spectrum of the Agency's service delivery, which will help to make progress towards Goals 5 and 10.

22.21 The subprogramme plans to provide support on issues related to COVID-19 by building new partnerships to engage Palestine refugee communities in integrated recovery mechanisms. These partnerships will be based on realistic recovery actions and specific protection issues that need to be addressed. The subprogramme will also provide Palestine refugees with access to face-to-face, phone and online consultations with social workers for those that seek support in relation to a range of protection concerns, including violence, substance abuse and the loss of livelihoods under situations of lockdown.

22.22 The above-mentioned work is expected to result in:

- (a) An increase in the identification of survivors of gender-based violence, abuse and neglect and in safe and unhindered access for such survivors to remedial services;
- (b) Equal and dignified access to services for all Palestine refugees, including persons with disabilities, the elderly, undocumented married women and girls, and female- and child-headed households.

22.23 The planned support on issues related to COVID-19 is expected to result in:

(a) The building of self-protection mechanisms within Palestine refugee communities, particularly for the most vulnerable and at-risk groups and individuals, to effectively respond to protection concerns specific to, or accentuated by, COVID-19;

(b) An increase in psychosocial resilience within Palestine refugee communities during periods of prolonged lockdowns and movement restrictions due to COVID-19.

## Programme performance in 2020

22.24 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Protecting the rights of Palestine refugees

22.25 The Agency's protection activities respond to the protection needs of Palestine refugees. Those needs have been exacerbated by the onset of COVID-19 and associated movement and economic restrictions across all fields of UNRWA operation.

22.26 The subprogramme advocated and extended support to Palestine refugees who faced violations or risks to the enjoyment of rights during the reporting period. This support took the form of vulnerability-focused programming, including psychosocial and legal assistance and the promotion of self-protection and community mobilization to support resilience. Furthermore, through the issuance of formal letters, bilateral meetings and briefings, the subprogramme engaged with host authorities, United Nations entities, civil society and the international community to promote compliance with international law and secure remedial action for Palestine refugees whose rights had been violated. In the Syrian Arab Republic, UNRWA advocacy efforts contributed to the Agency being granted access to Yarmouk camp to provide primary health care, distribute food and non-food items and disseminate awareness-raising materials on explosive remnants of war.

### *Progress towards the attainment of the objective, and performance measure*

22.27 The above-mentioned work contributed to the objective, as demonstrated by an increasing number of protection advocacy interventions targeting duty-bearers (see figure 22.I).

Figure 22.I

**Performance measure: number of protection advocacy interventions, including formal letters received by duty-bearers**

**Impact of COVID-19 on subprogramme delivery**

22.28 Owing to the impact of COVID-19 during 2020, the subprogramme postponed all staff training on protection issues from March to July 2020. The subprogramme was also impacted by movement restrictions in UNRWA fields of operation due to COVID-19, which hindered the identification and documentation of protection issues.

22.29 At the same time, however, the subprogramme identified new activities on issues related to COVID-19, within the overall scope of its objectives, namely the expansion of hotline services to vulnerable groups, particularly survivors of gender-based violence. The subprogramme also expanded psychosocial support services for Palestine refugees through individual and group counselling sessions conducted through hotlines and over social media.

**Planned results for 2022**

22.30 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

**Result 1: realizing the vision of equality for all<sup>1</sup>****Programme performance in 2020**

22.31 The subprogramme has continued to mainstream protection through UNRWA health, education, relief and social services, microfinance and infrastructure and camp improvement programming. In addition, the subprogramme developed staff protection capacity, prioritizing those in front-line service-delivery positions through training courses on protection principles and their practical application, including: (a) combating gender-based violence for front-line personnel in Lebanon; (b) addressing violence against children for teachers and school counsellors in Jordan; and (c) disability inclusion for personnel in all fields of Agency operation. In-person training courses were postponed from March to September owing to the COVID-19 pandemic, although e-learning courses resumed in July.

22.32 The above-mentioned work contributed to the training of 4,620 Agency personnel in protection, which exceeded the planned target of 3,000 staff trained reflected in the proposed programme budget for 2020.

**Proposed programme plan for 2022**

22.33 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to mainstream protection through additional training for front-line personnel, focusing on the self-identification of protection concerns, combating gender-based violence, promoting disability inclusion and addressing violence against children. However, owing to anticipated funding shortfalls, the number of UNRWA staff to be trained in 2021 and 2022 in protection is expected to decrease. The expected progress is presented in the performance measure below (see figure 22.II).

---

<sup>1</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 26)).

Figure 22.II

**Performance measure: number of additional United Nations Relief and Works Agency for Palestine Refugees in the Near East staff trained in protection**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: mainstreaming protection principles into the delivery of United Nations Relief and Works Agency for Palestine Refugees in the Near East services<sup>2</sup>**

### **Programme performance in 2020**

22.34 The subprogramme has continued to ensure that UNRWA services are delivered in accordance with internationally agreed standards and the Agency's own fundamental protection principles, established in 2010. The subprogramme achieved this through the design and implementation of training courses for UNRWA personnel that focused on key protection issues faced by Palestine refugees, including violence against children in Agency schools, inequalities rooted in social norms and obstacles to access to basic services for persons with disabilities.

22.35 The above-mentioned work contributed to the training of 4,620 Agency personnel on combating gender-based violence, addressing violence against children and promoting disability inclusion (see table 22.2).

### **Proposed programme plan for 2022**

22.36 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to mainstream protection through additional training for front-line personnel, focusing on the self-identification of protection concerns, combating gender-based violence, promoting disability inclusion and addressing violence against children. The expected progress is presented in the performance measure below (table 22.2).

<sup>2</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

Table 22.2  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
5,609 UNRWA staff trained on combating gender-based violence, mainstreaming core protection standards, promoting disability inclusion and addressing violence against children	6,544 UNRWA staff trained on combating gender-based violence, mainstreaming core protection standards, international protection standards and addressing violence against children	4,620 UNRWA staff trained on combating gender-based violence, promoting disability inclusion and addressing violence against children	3,000 UNRWA staff to be trained on combating gender-based violence, promoting disability inclusion and mainstreaming core protection standards	2,650 UNRWA staff to be trained on combating gender-based violence, disability inclusion and mainstreaming core protection standards

**Result 3: strengthened protection for Palestine refugees through compliance monitoring and continuous improvement**

**Proposed programme plan for 2022**

22.37 The subprogramme is mindful that, while UNRWA strives to ensure that protection is addressed through and within its services, protection concerns may arise directly from its operations. Challenges include conflict, protection risks based on inequalities driven by social norms, the potential for violence against children in UNRWA schools and obstacles to access to basic services for persons with disabilities. To assess whether protection is mainstreamed throughout Agency service provision and gauge UNRWA compliance with protection principles, the subprogramme conducts internal audits of protection safeguards on a biennial basis. These internal audits are implemented by protection officers in the Agency's headquarters and field offices and result in an agreed set of recommendations that can encompass policy enhancements, operational improvements and changes in organizational culture.

*Lessons learned and planned change*

22.38 The lesson for the subprogramme was that standardized and frequent reporting structures and processes at the level of UNRWA field offices enhance the implementation rate of protection audit recommendations. In applying the lesson, the subprogramme will designate one focal point in each field office who will be responsible for regular follow-up with stakeholders charged with recommendation implementation. In addition, the subprogramme will increase the frequency of internal reporting to facilitate timely remedial action should implementation challenges be encountered.

*Expected progress towards the attainment of the objective, and performance measure*

22.39 This work is expected to contribute to the objective, as demonstrated by a steadily increasing implementation rate of protection audit recommendations by field offices (see figure 22.III).

Figure 22.III

**Performance measure: percentage of protection audit recommendations implemented by field offices**

## Deliverables

22.40 Table 22.3 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 22.3

**Subprogramme 1: deliverables for the period 2020–2022, by category and subcategory**

*Category and subcategory*

### C. Substantive deliverables

**Direct service delivery:** some 8,000 Palestine refugees provided with legal counselling, legal information and/or referrals to legal service providers; multiple submissions to the international human rights system

## Subprogramme 2

**Palestine refugee health is protected and the disease burden is reduced**

### Objective

22.41 The objective, to which this subprogramme contributes, is to ensure that Palestine refugee health is protected and the disease burden is reduced.

### Strategy

22.42 To contribute to the objective, the subprogramme will control the spread of communicable diseases through surveillance and awareness-raising among staff and refugees, the provision of free childhood immunization services and by participating in host Governments' mass immunization campaigns. The subprogramme also plans to continue to provide people-centred primary health care using the family health team model in UNRWA health centres, which will help to make progress towards Sustainable Development Goal 3. In addition, the subprogramme will improve the accessibility of Agency health centres, which will help make progress towards Goal 10.

22.43 The subprogramme plans to provide support on issues related to COVID-19 by adapting its service delivery models. In this regard, depending on the characteristics of the COVID-19 pandemic in each field of UNRWA operation, this may include the use of telemedicine consultations, home delivery of medication to non-communicable disease patients and the provision of training and personal protective equipment to health workers. The subprogramme will also support the establishment of isolation and quarantine centres, where warranted, in support of national response plans.

22.44 The above-mentioned work is expected to result in:

- (a) A reduction in the incidence and prevalence of vaccine-preventable diseases among refugee communities;
- (b) A reduction of maternal and infant mortality among Palestine refugees, effective treatment of patients suffering from non-communicable diseases and better antenatal and postnatal care services;
- (c) Enhanced accessibility of Agency health facilities, particularly benefiting persons with disabilities.

22.45 The planned support on issues related to COVID-19 is expected to result in:

- (a) The effective adaptation of essential health services for Palestine refugees to curtail COVID-19 outbreaks, for instance through telemedicine and home delivery of medicines;
- (b) An effective and safe response to COVID-19 outbreaks, especially in areas with congested living environments.

## **Programme performance in 2020**

22.46 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Reduced dependency on antibiotics**

22.47 Antibiotics are used to prevent and treat bacterial infections and, since their widespread introduction in the 1940s, have been responsible for reducing mortality and improving life expectancy rates. However, as a consequence of their overuse, antibiotics have become less effective in treating a range of infections, including pneumonia, urinary tract infections, tuberculosis, blood poisoning, gonorrhoea and foodborne diseases. This has resulted in higher medical costs, prolonged hospitalization and increased mortality rates. The subprogramme has sought to reduce the use of antibiotics by establishing a limit on the percentage of prescriptions issued by Agency medical officers for curative diseases, prescribing antibiotics at 25 per cent of total prescriptions issued. This threshold is based on the standard recommended by WHO and is monitored on a quarterly basis.

22.48 The subprogramme also introduced technical instruction and management protocols on the 10 most common health conditions encountered at UNRWA health centres to establish uniform procedures for their treatment and to rationalize the prescription-issuing behaviour of Agency medical officers. Furthermore, the subprogramme continued to train UNRWA medical officers on evidence-based medicine, including through the WHO course on standard integrated management of childhood illnesses and the family medicine diploma programme. These training activities enhanced the clinical and diagnostic skills of Agency medical officers, thereby also improving prescription-issuing practice.

*Progress towards the attainment of the objective, and performance measure*

22.49 The above-mentioned work contributed to the objective, as demonstrated by a decrease in antibiotics prescriptions as a percentage of total prescriptions issued by UNRWA health centres (see figure 22.IV).

Figure 22.IV

**Performance measure: antibiotics prescriptions as a percentage of total prescriptions issued by United Nations Relief and Works Agency for Palestine Refugees in the Near East health centres**

**Impact of COVID-19 on subprogramme delivery**

22.50 Owing to the impact of COVID-19 during 2020, the subprogramme reduced health centre walk-in foot traffic through the establishment of telemedicine consultations in Jordan and Gaza, a lifeline given that the 25 UNRWA health centres in Jordan were temporarily closed upon the order of the host Government from March to May 2020. In addition, the subprogramme introduced a triage protocol to screen patients with respiratory illnesses, separating them from the normal patient flow in order to reduce the potential for the spread of infection. The subprogramme also suspended non-critical services, including preconception care and preventative dental consultations, from March to June 2020, to release capacity within Agency health centres that could be dedicated to addressing COVID-19. In addition, the subprogramme introduced home delivery of medicines for registered non-communicable disease patients to ensure service continuity and reduce patient foot traffic in health centres.

22.51 At the same time, however, the subprogramme identified new activities to provide support on issues related to COVID-19, within the overall scope of its objectives, namely by increasing financial subsidies for Palestine refugees hospitalized in Jordan, Lebanon, the Syrian Arab Republic and Gaza. Some 4,221 patients benefited from the extension of that support. The subprogramme also introduced risk communication and community engagement activities in 45 refugee camps in Jordan, Lebanon, Gaza and the West Bank. Further, in cooperation with community volunteers, UNRWA sought to raise awareness of COVID-19 prevention among Palestine refugees.

**Planned results for 2022**

22.52 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### Result 1: caring for a healthy future<sup>3</sup>

#### Programme performance in 2020

22.53 The subprogramme extended primary health-care services through 140 health centres in Jordan, Lebanon, the Syrian Arab Republic, Gaza and the West Bank in 2020. In that regard, 5,798,904 primary health-care consultations were provided during the year. The subprogramme also addressed the increasing prevalence of non-communicable diseases, such as diabetes mellitus, hypertension and cardiovascular and chronic respiratory diseases among Palestine refugees. The subprogramme did so by adopting an “at-risk” approach that, in addition to passive detection of cases, focused on screening target groups, including persons over 40 years old, persons who are overweight or obese, persons with a family history of non-communicable diseases, smokers and pregnant women. Furthermore, the subprogramme ensured that all non-communicable disease patients received adequate care, including annual health assessments incorporating blood pressure and blood sugar monitoring, body mass index calculations and assessments of control status and counselling on the use of medication, dietary adjustments and other lifestyle changes.

22.54 The above-mentioned work contributed to 70,516 Palestine refugees aged 40 years and above being screened for diabetes mellitus in 2020, which did not meet the target of 191,949 Palestine refugees aged 40 years and above being screened reflected in the proposed programme budget for 2020. The target could not be met owing to the onset of COVID-19, which led to service interruptions and the suspension of non-critical services from mid-March to the end of 2020. During that period, only patients exhibiting symptoms of diabetes and hypertension were screened.

#### Proposed programme plan for 2022

22.55 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to provide Palestine refugees with universal access to primary health-care services across all fields of UNRWA operation. In that regard, through 140 health centres, the subprogramme will provide a range of curative services, pre- and postnatal care and non-communicable disease screening and care. The expected progress is presented in the performance measure below (see figure 22.V).

Figure 22.V

**Performance measure: total number of Palestine refugees aged 40 years and above screened for diabetes mellitus (annual)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

<sup>3</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 26)).

## Result 2: efficient and responsive health services<sup>4</sup>

### Programme performance in 2020

22.56 The subprogramme has continued to roll out the e-health system across UNRWA health installations. By the end of 2020, e-health was operational in 139 of 140 health centres and held 3,678,687 patient records. The lone health centre that remains unconnected is in the Syrian Arab Republic, where there are persistent challenges with the electricity supply and Internet connectivity. The subprogramme also updated e-health in 2020 to include the latest international classification of diseases, adopted by UNRWA in January 2020. The use of the updated classification will make e-health data more useful in relation to priority setting, resource allocation and organizational policy formulation. In March 2020, in-person training for Agency e-health users on the updated classification began, in coordination with WHO. The course was transitioned to online learning following the onset of COVID-19 shortly thereafter.

22.57 The above-mentioned work contributed to 139 health centres implementing e-health, which exceeded the planned target of 138 health centres reflected in the programme budget for 2021.

### Proposed programme plan for 2022

22.58 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will transition e-health to a new, secured platform grounded in a United Nations International Computing Centre cloud-based server. The upgraded system will be more reliable, make data entry more efficient and improve data quality. The implementation of these enhancements will commence in 2022 and is expected to be completed by the end of 2023. The expected progress is presented in the performance measure below (see figure 22.VI).

Figure 22.VI

**Performance measure: total number of United Nations Relief and Works Agency for Palestine Refugees in the Near East health centres having implemented the e-health system (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

<sup>4</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

### Result 3: vaccine-preventable disease outbreaks prevented within Palestine refugee communities

#### Proposed programme plan for 2022

22.59 Immunization is an important element of basic care as it protects against deadly diseases that can be prevented through timely interventions during childhood. With the 1974 introduction of the Expanded Programme on Immunization, WHO sought to streamline, develop and expand immunization programmes throughout the world. UNRWA health centres began implementing the Programme in 1979, mirroring its adoption by each host country. In line with the Programme, the subprogramme currently vaccinates 12 and 18-month-old Palestine refugee children against tuberculosis, diphtheria, pertussis, tetanus, polio, measles, mumps, rubella and hepatitis (A and B). The subprogramme's coverage has surpassed the WHO 95 per cent target for immunization coverage for the past two decades. The subprogramme maintains this high rate by: (a) ensuring a consistent supply of vaccines; (b) adhering to an appointment system for vaccinations; (c) continuously following up on patients defaulting on their appointments; and (d) participating in campaigns to educate and encourage parents to have their children immunized.

#### *Lessons learned and planned change*

22.60 The lesson for the subprogramme highlighted the benefits associated with a collaborative approach in responding to an outbreak of hepatitis A in Rashidieh camp in Lebanon. Here, coordinated actions with the host country's Ministry of Public Health, the camp committee and the UNRWA education and infrastructure and camp improvement programmes ensured that the outbreak was controlled at an early stage. In applying the lesson, the subprogramme will continue to enhance both internal and external coordination to both prevent and respond to disease outbreaks. In addition, hygiene promotion will be conducted in UNRWA schools. The subprogramme will also participate in community engagement activities with host country health ministries and camp committees to improve health awareness and reduce the risk of epidemic propagation.

#### *Expected progress towards the attainment of the objective, and performance measure*

22.61 This work is expected to contribute to the objective, as demonstrated by the maintenance of the immunization coverage rate for children at 18 months old, who received all booster vaccines at or above the WHO target of 95 per cent (see figure 22.VII).

Figure 22.VII

**Performance measure: percentage of children aged 18 months who received all booster vaccines**

## Deliverables

22.62 Table 22.4 below lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 22.4

### Subprogramme 2: deliverables for the period 2020–2022, by category and subcategory

---

*Category and subcategory*

---

#### C. Substantive deliverables

**Direct service delivery:** approximately 9.0 million public health-care consultations; some 90,000 mental health and psychosocial support consultations.

---

## Subprogramme 3

### School-aged children complete quality, equitable and inclusive basic education

#### Objective

22.63 The objective, to which this subprogramme contributes, is to ensure that school-aged children complete quality, equitable and inclusive basic education.

#### Strategy

22.64 To contribute to the objective, the subprogramme will enhance the professionalization of teachers through continuous professional development and career progression opportunities and ensure that the textbooks used are developing students' skills and competencies, and promote human rights culture and practices and higher-order thinking skills in UNRWA classrooms. The subprogramme also plans to continue to monitor student performance, ensure safe and secure learning environments, facilitate parent engagement and promote inclusive recreational and extracurricular activities, which will help to make progress towards Sustainable Development Goals 4 and 5. In addition, the subprogramme will continue to enhance the capacity of the Agency's education staff, ensure students identified with a disability receive support meeting their specific needs, assist individuals identified as experiencing a protection risk and work towards healthy and accessible schools, which will help Member States to make progress towards Sustainable Development Goal 10.

22.65 The subprogramme plans to provide support on issues related to COVID-19 by implementing a blended learning approach in all schools affected by local restrictions, including the use of self-study through the provision of printed, online and televised materials. The subprogramme will also integrate psychosocial support into its education services, to be provided by counsellors through online and social media channels.

22.66 The above-mentioned work is expected to result in:

- (a) The meeting or surpassing of UNRWA targets for the percentage of students performing at the "Achieved" or "Advanced" levels in the triannual monitoring of learning achievement tests, to be conducted in either the third quarter of 2021 or the first quarter of 2022;

(b) A reduction in inequalities and in the gap in student performance in monitoring of learning achievement testing;

(c) Fewer children having to repeat a grade or dropping out of school completely.

22.67 The planned support on issues related to COVID-19 is expected to result in:

(a) The continuation of basic education for all pupils enrolled in Agency schools despite the periodic physical closure of schools and implementation of mixed learning methods on account of COVID-19;

(b) Enhanced well-being for all students, particularly vulnerable students, during periods of prolonged lockdowns and movement restrictions due to COVID-19, which is specified in more detail under result 3 below.

### **Programme performance in 2020**

22.68 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

#### **Improved education through increased parental involvement**

22.69 Educational research consistently suggests that parental engagement with children's education is a strong predictor of student participation, achievement and attainment. The subprogramme engages parents in supporting their children's education through regular awareness sessions for parents on a variety of topics, including psychosocial support, safety and security. UNRWA also considers parent-teacher associations to be a reliable mechanism to increase parental engagement and has established such associations in all 709 Agency schools, in accordance with the Agency's regulatory framework and educational policies, strategies and principles. Parent-teacher associations help strengthen links between students, teachers, parents and community members so that they can share ideas and be actively involved in the school's work.

22.70 The subprogramme also engages parents and the community in the students' learning process, including in times of emergencies, through the parent-teacher associations. Furthermore, the subprogramme uses the associations to mobilize community support for school events and facilitates the organization of recreational and educational activities for students by the associations.

#### *Progress towards the attainment of the objective, and performance measure*

22.71 The above-mentioned work contributed to the objective, as demonstrated by the percentage of active parent-teacher associations in place, despite the slight reduction in performance owing to disruption caused by COVID-19 (see figure 22.VIII).

Figure 22.VIII

**Performance measure: percentage of active parent-teacher associations in place in United Nations Relief and Works Agency for Palestine Refugees in the Near East schools**

### **Impact of COVID-19 on subprogramme delivery**

22.72 Owing to the impact of COVID-19 during 2020, the subprogramme postponed triennial monitoring of learning achievement tests for all grade 4 and grade 8 students, which were originally scheduled to be conducted in March 2020, to 2021. The subprogramme also transitioned to a remote learning approach for all 528,846 students enrolled in basic education in Jordan, Lebanon, the Syrian Arab Republic, Gaza and the West Bank following the physical closure of schools in March 2020 until the end of the 2019/20 school year. Remote learning continued in most fields during the 2020/21 school year. UNRWA schools provided self-learning materials to students through email, online platforms and social media. Hard copies of materials were also printed and distributed to students who did not have access to the Internet.

22.73 At the same time, however, the subprogramme identified new activities on issues related to COVID-19, within the overall scope of its objectives, namely the introduction of catch-up classes for students who fell behind in their learning, either owing to challenges with access to self-learning or limitations in relation to the curriculum materials offered. The subprogramme also launched an awareness-raising campaign targeting students at Agency schools on health and hygiene to help prevent the transmission of COVID-19 by actively engaging students to develop and share their own messages.

### **Planned results for 2022**

22.74 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

#### **Result 1: learning side by side: inclusive education<sup>5</sup>**

##### **Programme performance in 2020**

22.75 The subprogramme has strengthened the inclusive education approach to ensuring that all Palestine refugee children and young people, regardless of gender, ability, disability, socioeconomic status, health and psychosocial need, have an equal opportunity for learning in Agency schools and are supported in developing their full

<sup>5</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 26)).

potential. The subprogramme has continued to strengthen student support teams, comprising school principals, teachers, school counsellors and health tutors, in all five fields of operation. The subprogramme also conducted virtual outreach sessions with parents and students, designed to build a supportive and destigmatized environment around students with disabilities. Furthermore, the subprogramme upgraded 10 schools to improve the overall accessibility for Palestine refugee students, and in addition, one school was constructed in accordance with the Technical Standards and Guidelines to Ensure Physically Accessible Environments at UNRWA Premises. The subprogramme also modernized its data capture techniques on students identified as having a disability in order to improve the accuracy and reliability of data used to target support to students.

22.76 The above-mentioned work contributed to 60.54 per cent of students being identified as having a disability and receiving support, which exceeded the planned target of 53 per cent of students being identified as having a disability and receiving support reflected in the proposed programme budget for 2020.

### **Proposed programme plan for 2022**

22.77 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to utilize and build the capacity of student support teams. The subprogramme will also continue to upgrade Agency schools to improve accessibility for Palestine refugee students. The expected progress is presented in the performance measure below (see figure 22.IX).

Figure 22.IX

**Performance measure: percentage of students identified as having a disability who receive support**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: improved grades through school quality assurance<sup>6</sup>**

### **Programme performance in 2020**

22.78 The subprogramme has continued to support the work of school quality assurance units in each field office, which were established in 2014, to implement the UNRWA quality assurance system. The implementation of school quality assurance was limited in 2020 owing to the closure of schools following the onset of COVID-19

<sup>6</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

and the refocusing of efforts to transition all students to remote learning. The subprogramme therefore developed and reviewed materials to enhance the capacity of the education support cadre to adapt and implement the school quality assurance process in the light of the new challenges caused by the pandemic.

22.79 The above-mentioned work contributed to the continuation of the school quality assurance process in Agency schools, which, in turn, is expected to lead to improved learning, which did not meet the planned target of 65 per cent of students performing at the “Achieved” or “Advanced” levels in the monitoring of learning achievement Arabic language tests in grade 8, reflected in the proposed programme budget for 2021. In view of the closure of UNRWA schools caused by COVID-19, monitoring of learning achievement tests were postponed from spring 2020 to either the third quarter of 2021 or the first quarter of 2022, dependent on the lifting of local restrictions on the reopening of schools in all Agency fields of operation.

### Proposed programme plan for 2022

22.80 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will resume regular visits by school quality assurance units to UNRWA schools as they reopen. The subprogramme will also undertake a classroom observation study, which will be used, together with monitoring of learning tests, to evaluate teaching and learning quality. The expected progress is presented in the performance measure below (see table 22.5).

Table 22.5  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
Analysis of the 2016 monitoring of learning test results were finalized and schools were categorized according to the support needed to improve performance. School improvement plans were put in place	<ul style="list-style-type: none"> <li>A guidance manual for the implementation of performance improvements was made available to all schools in Arabic and English</li> <li>Teacher capacity on assessment skills strengthened and enrichment materials for mathematics and Arabic introduced as part of the implementation of school improvement plans</li> </ul>	Modules on constructive learning approaches and classroom practices embedded into teacher and support cadre training programmes as part of the implementation of school improvement plans	Monitoring of learning tests in Arabic and mathematics takes place in all UNRWA schools for students at grade 4 and grade 8. Some 64.7 per cent of students are targeted to perform at the “Achieved” or “Advanced” levels in monitoring of learning achievement Arabic language tests in grade 8	Analysis of monitoring of learning achievement test results available to inform education programme adjustments at Agency-wide, field-specific and school-specific levels

### Result 3: increased education efficiency linked to reduced drop-out rates

#### Proposed programme plan for 2022

22.81 Sustainable Development Goal 4 includes targets to ensure that school-aged children complete quality, equitable and inclusive basic education. An important measure of inclusiveness is education participation, which can be increased through an efficient education system that seeks to minimize grade repetition and drop-out rates among students through the adoption of inclusive education practices. The efficiency of the UNRWA education system is gauged through the coefficient of internal efficiency, which measures the ideal number of pupil-years required to produce a number of graduates from a given school-cohort for a cycle of education. For instance, a coefficient of 1 implies that all students who enrolled in grade 1 also graduate from grade 9/10 in the ideal number of years, without any of those students dropping out or repeating a school year. The subprogramme has, in line with the Agency's 2013 inclusive education policy: (a) enhanced the capacity of UNRWA education staff; (b) ensured students identified with a disability have received support meeting their specific needs; (c) assisted individuals identified as experiencing a protection risk; and (d) worked towards creating healthy and accessible schools.

#### *Lessons learned and planned change*

22.82 The lesson for the subprogramme was that it needed to adapt its inclusive education practices and systems in the light of the transition to remote learning owing to the onset of COVID-19. Inclusive education ensures that students are provided with support specific to their learning needs. That support, in turn, helps to keep students engaged in the learning process and reduce drop-out rates, which is an important component in ensuring education system efficiency. In applying the lesson, the Agency will continue to draw on its significant experience in providing education in emergencies. The Agency will establish a task force to determine how best to respond to challenges in relation to the implementation of inclusive education. The task force will capture the Agency's education system response, including lessons learned, and disseminate its findings to UNRWA schools in the form of best practices.

#### *Expected progress towards the attainment of the objective, and performance measure*

22.83 This work is expected to contribute to the objective, as demonstrated by a coefficient of internal efficiency of the Agency's education system at or above the UNRWA benchmark of 0.92 (see figure 22.X).

Figure 22.X  
Performance measure: coefficient of internal efficiency

## Deliverables

22.84 Table 22.6 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

## Subprogramme 4 Palestine refugee capabilities are strengthened for increased livelihood opportunities

### Objective

22.85 The objective, to which this subprogramme contributes, is to ensure that Palestine refugee capabilities are strengthened for increased livelihood opportunities.

### Strategy

22.86 To contribute to the objective, the subprogramme will provide financial services such as diversified loan products covering businesses, consumption and housing needs to low-income Palestine refugees, women and youth through a network of 23 microfinance branches in Jordan, the Syrian Arab Republic, Gaza and the West Bank. The subprogramme also plans to create employment opportunities for Palestine refugees through infrastructure and construction projects in camps, which will help to make progress towards Sustainable Development Goals 1 and 8. In addition, the subprogramme will provide quality and relevant technical and vocational education and training at its vocational training centres and education science facilities for degree-level teacher education in the West Bank (Education Science Faculty) and Jordan (Faculty of Educational Sciences), focusing on vulnerable young people whose families are recipients of the social safety net programme and continue the provision of an UNRWA-wide donor-funded scholarships programme, which will help Member States to make progress towards Sustainable Development Goals 4, 5, 8 and 10.

22.87 The subprogramme plans to provide support on issues related to COVID-19 by expanding its offering of small enterprise loans for existing businesses and start-up efforts in Jordan, the Syrian Arab Republic, Gaza and the West Bank and by promoting Palestine refugee employment opportunities in construction and infrastructure works in all fields of UNRWA operation to, among other things, reduce the lasting economic impact on businesses and loss of livelihoods owing to COVID-19. The subprogramme will also implement a blended learning approach at all vocational training centres, the Education Science Faculty and the Faculty of Educational Sciences affected by local restrictions owing to COVID-19 closures, utilizing a dedicated online platform through which course material is shared.

22.88 The above-mentioned work is expected to result in:

- (a) Inclusive economic growth;
- (b) An increase in employment opportunities, decent work and poverty reduction;
- (c) A sustained high percentage of all vocational training centre, Education Science Faculty and Faculty of Educational Sciences graduates employed.

22.89 The planned support on issues related to COVID-19 is expected to result in:

- (a) The stimulation of investment, job creation, economic growth and innovation driven by small enterprises and construction and infrastructure works for Palestine refugees affected by a loss of livelihood due to the economic impact of COVID-19;
- (b) The continuation of education for all students enrolled in vocational training centres, the Education Science Faculty and the Faculty of Educational Sciences despite the physical closure of vocational and technical training centres due to COVID-19.

### **Programme performance in 2020**

22.90 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

#### **Improved adoption of and tailored microfinance options for women entrepreneurs**

22.91 Across the Near East, women remain severely underrepresented in the labour force. In 2019, according to the International Labour Organization, women's labour force participation was 14 per cent in Jordan and the Syrian Arab Republic, 18 per cent in Gaza and the West Bank and 23 per cent in Lebanon. The subprogramme seeks to address this by promoting livelihood opportunities for women through tailored microfinance products for female clients. These products include the women's household credit, which is a home-based loan that allows recipients to purchase household assets through income-generating activities. Many women's household credit clients are the primary breadwinner for their household, in addition to having family responsibilities.

22.92 The subprogramme also encourages women entrepreneurs by promoting female clients for micro-enterprise "credit plus" loans. This product helps micro-enterprises to build up and maintain reserves of short-term working capital and provides financing for expansion.

#### *Progress towards the attainment of the objective, and performance measure*

22.93 The above-mentioned work contributed to the objective, as demonstrated by an increasing percentage of all microfinance loan products provided to women clients (see figure 22.XI).

Figure 22.XI

**Performance measure: percentage of all microfinance loan products provided to women**

### **Impact of COVID-19 on subprogramme delivery**

22.94 Owing to the impact of COVID-19 during 2020, the subprogramme was forced to close microfinance branch offices, suspend the issuance of new microfinance loans and defer loan repayments between March and May. Following the reopening of microfinance branch offices, the subprogramme adopted a conservative lending approach in relation to new microfinance loans. As a result, the number of clients with Agency microfinance loans was 21,339 by the end of 2020, a decrease from the 35,576 client loans at the end of 2019. In relation to technical and vocational education and training, the subprogramme transitioned to a self-learning approach for all 10,237 students enrolled in vocational training centres, the Education Science Faculty and the Faculty of Educational Sciences following the physical closure of training centres from March 2020 to the start of the 2020/21 academic year. Learning materials were made available through online platforms, and students without connectivity were provided with Internet packages. Those changes had an impact on programme performance in 2020, as specified under results 1 and 2 below.

22.95 At the same time, however, the subprogramme identified new activities on issues related to COVID-19, within the overall scope of its objectives, namely the procurement of devices and Internet access for vulnerable students enrolled in vocational training centres to allow them to continue their technical and vocational education and training. The subprogramme also introduced psychosocial support, which was available for all vocational training centre, Education Science Faculty and Faculty of Educational Sciences students through individual and group counselling sessions conducted online and through social media channels.

### **Planned results for 2022**

22.96 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

#### **Result 1: microfinance: client-focused interventions<sup>7</sup>**

##### **Programme performance in 2020**

22.97 The subprogramme has continued to provide access to loan products for Palestine refugees and members of other vulnerable and marginalized groups who

<sup>7</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 26)).

would normally be ineligible for such products as they possess few assets for use as collateral. One of the key target groups for UNRWA microfinance products has been young people aged 18–30 years in Jordan, the Syrian Arab Republic, Gaza and the West Bank. Young people face high levels of unemployment across all fields of Agency operation. In 2019, according to the International Labour Organization, youth unemployment ranged from 20.8 per cent in the Syrian Arab Republic to 37.3 per cent in Jordan and 40.0 per cent in Gaza and the West Bank.<sup>8</sup> The subprogramme offered specific support to young people by offering Mubadarati (initiative) loans to young men and women aged 18–30 to start new businesses that create self-employment and employment opportunities for others. When launched in 2012, the Mubadarati was the first youth start-up loan product of its kind in the region.

22.98 The above-mentioned work contributed to 4,950 young people receiving microfinance loans. The number of new microfinance loans disbursed to young people in 2020 decreased by 47.6 per cent compared to 2019 owing to challenges associated with COVID-19 as described in result 2 (expanded access to microfinance) below.

### Proposed programme plan for 2022

22.99 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to target young people for UNRWA microfinance products, especially those seeking to start new businesses that create self-employment and employment opportunities for others. The expected progress is presented in the performance measure below (see table 22.7).

Table 22.7  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
10,695 young people received UNRWA microfinance products, valued at \$10,220,460	9,444 young people received UNRWA microfinance products, valued at \$8,806,956	4,950 young people received microfinance products, valued at \$4,011,311	14,748 young people are expected to receive UNRWA microfinance products with an increase in the value of loans provided	15,043 young people are expected to receive UNRWA microfinance products with an increase in the value of loans provided

### Result 2: expanded access to microfinance<sup>9</sup>

#### Programme performance in 2020

22.100 The subprogramme has continued to provide access to loan products for Palestine refugees and other vulnerable and marginalized groups who would normally be ineligible for such products as they possess few assets for use as collateral. In 2020, the subprogramme provided loans to 21,339 clients, including 8,200 Palestine refugees. The subprogramme also expanded its operations in the Syrian Arab Republic through the opening of a new credit unit in Sahnaya, the targeting of new clients in Husayniyah and the reduction of interest rates for Palestine refugee clients to stimulate business. These efforts increased the number of Palestine refugee clients in the Syrian Arab Republic by 13 per cent compared to 2019.

<sup>8</sup> Unemployment, youth total (percentage of total labour force ages 15–24), <https://data.worldbank.org/indicator/SL.UEM.1524.ZS>.

<sup>9</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

22.101 The above-mentioned work contributed to 21,339 clients receiving microfinance loans, which did not meet the target of 46,969 loan recipients reflected in the proposed programme budget for 2021. The target was not met owing to: (a) a decrease in the number of potential clients with a sufficient creditworthiness rating to take out a loan, which was possibly linked to an overall deterioration in the economic situation in Jordan, the Syrian Arab Republic, Gaza and the West Bank as a result of COVID-19; (b) the suspension of microfinance loans to new clients and the closure of microfinance branch offices between March and May; and (c) the adoption of a conservative lending approach in relation to new microfinance loans following the resumption of microfinance programming.

### **Proposed programme plan for 2022**

22.102 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will direct its efforts to alleviating the economic impact of COVID-19 on Palestine refugees and other vulnerable and marginalized groups by disbursing microfinance loans in Jordan, the Syrian Arab Republic, Gaza and the West Bank. In this respect, the subprogramme plans to disburse 48,965 microfinance loans in 2022. The expected progress is presented in the performance measure below (see figure 22.XII).

Figure 22.XII

**Performance measure: total number of clients receiving financial services (microfinance loans) (annual)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023

### **Result 3: improved youth employment through vocational training**

#### **Proposed programme plan for 2022**

22.103 The subprogramme provides technical and vocational education and training to young Palestine refugees, equipping them with the relevant skills and expertise for labour markets across the Middle East. The subprogramme operates eight vocational training centres and enrolls approximately 8,000 students onto its courses each year. Three types of courses are offered: (a) semi-professional courses of two-year duration (technician level) at the post-secondary school level for those who have successfully completed year 12 of schooling; (b) trade courses (vocational) of a one-year (skilled labourer level) and two-year (craftsman level) duration for those who have successfully completed at least years 9 or 10 of schooling; and (c) short-term courses to prepare young Palestine refugees for employment in sectors where there is a high demand in the labour market. A range of specializations are covered, such as mechanics, building construction,

plumbing, refrigeration, electrical installations, auto electrical installations and electronics, communication systems, mobile maintenance, hair-dressing and fashion design, graphic design, accounting, assistant pharmacist, nursing, medical records and physiotherapy.

#### *Lessons learned and planned change*

22.104 The lesson for the subprogramme was that it needed to focus on developing the capacity of technical and vocational education and training students and instructors to engage in remote learning during the closure of vocational training centres due to COVID-19. In applying the lesson, the subprogramme will enhance access to remote learning for the students and instructors by procuring learning devices and connectivity packages. The subprogramme will also invest in training instructors in the skills needed to effectively deliver technical and vocational education and training remotely.

#### *Expected progress towards the attainment of the objective, and performance measure*

22.105 This work is expected to contribute to the objective, as demonstrated by the maintenance of the percentage of vocational training centre graduates gaining employment within one year of graduation in 2020, despite the economic downturns and increasing levels of unemployment affecting UNRWA host countries (see figure 22.XIII).

Figure 22.XIII

**Performance measure: percentage of vocational training centre graduates employed within one year of graduation**

### **Deliverables**

22.106 Table 22.8 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 22.8

**Subprogramme 4: deliverables for the period 2020–2022, by category and subcategory**

*Category and subcategory*

#### **C. Substantive deliverables**

**Direct service delivery:** issuance of microfinance loans valued at \$48,698,929; approximately 10,000 enrolments in technical and vocational education and training and the youth programme; and some 2,000 job placements created as full-time equivalents.

## **Subprogramme 5**

### **Palestine refugees are able to meet their basic human needs of food, shelter and environmental health**

#### **Objective**

22.107 The objective, to which this subprogramme contributes, is to ensure that Palestine refugees are able to meet their basic human needs of food, shelter and environmental health.

#### **Strategy**

22.108 To contribute to the objective, the subprogramme will assist in the mitigation and reduction of abject poverty and food insecurity among Palestine refugees through the distribution of cash-based and in-kind social transfers to persons in need, including those in abject poverty (those who are unable to meet their basic food needs) and households headed by women, the elderly and persons with disabilities, which will help to make progress towards Sustainable Development Goals 1, 2, 5 and 10. The subprogramme will continue to provide safe and habitable shelters for Palestine refugees through the rehabilitation of substandard shelters for the most vulnerable Palestine refugees, which will help to make progress towards Sustainable Development Goals 1, 10 and 11. In addition, the subprogramme will continue to provide Palestine refugees living in camps with effective environmental health services, including equitable and sufficient water for their basic needs, storm water drainage systems, solid waste collection and sewerage systems, which will help to make progress towards Sustainable Development Goals 6 and 12.

22.109 The subprogramme plans to provide support on issues related to COVID-19 by increasing the value of in-kind and cash-based social transfers to existing vulnerable recipients of social transfer programmes and enrolling additional refugees who have been identified as being in need to mitigate additional ongoing socioeconomic hardship due to COVID-19 and the recovery phase. The subprogramme will also look to expand its shelter rehabilitation activities and improve water and sewage networks in camps to mitigate against risks of COVID-19 transmission associated with overcrowding and poor sanitation.

22.110 The above-mentioned work is expected to result in:

- (a) An increase in resilience among the target population in the face of economic hardship and restricted household income;
- (b) An improvement in the safety and protection of Palestine refugee families;
- (c) An improvement in environmental health and infrastructure services, including access to safe drinking water, sanitation, drainage, electricity and waste disposal, for Palestine refugees living in camps.

22.111 The planned support on issues related to COVID-19 is expected to result in:

- (a) Mitigation of the economic impact of COVID-19 on the most vulnerable and provision for their socioeconomic needs;
- (b) An improvement in hygiene conditions in crowded refugee camps and enhanced public health to prevent the spread of diseases, including COVID-19.

## Programme performance in 2020

22.112 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Safeguarding sanitation in refugee camps during the pandemic

22.113 Over the last 70 years, the 58 official Palestine refugee camps in Jordan, Lebanon, the Syrian Arab Republic, Gaza and the West Bank have grown organically into highly congested spaces characterized by concentrations of poverty and extreme overcrowding, and some lack proper sewerage and drainage systems. These conditions make Palestine refugees susceptible to air- and water-borne diseases such as diarrhoea, cholera and hepatitis. The subprogramme has worked with Palestine refugees to improve the physical and social environment of the camps through a community-driven planning approach to improvements that include refugees in both the planning and design processes.

22.114 The subprogramme also collaborated with the host Governments in all five fields of Agency operation to ensure Palestine refugees residing in official camps have access to safe drinking water through comprehensive water-supply networks. Host Governments are responsible for the provision of public services to these camps; UNRWA, however, connected an increased number of shelters to official water networks, replaced water pipes, installed water treatment systems and implemented a range of measures to improve water production and quality at source. Furthermore, the subprogramme improved sewerage systems, waste removal services, storm-water drainage and rodent-control services.

### *Progress towards the attainment of the objective, and performance measure*

22.115 The above-mentioned work contributed to the objective, as demonstrated by the increase in the percentage of shelters in official camps connected to adequate water supply services (see figure 22.XIV).

Figure 22.XIV

**Performance measure: percentage of shelters in camps connected to adequate water supply services**

### Impact of COVID-19 on subprogramme delivery

22.116 Owing to the impact of COVID-19 during 2020, the subprogramme changed its approach to food assistance by providing home deliveries of food packages in Gaza rather than through collection at crowded distribution centres. Food assistance was delivered to 226,578 Palestine refugee households in Gaza (1,109,778 individuals) in the first half of 2020. The subprogramme also postponed camp improvement works

in Lebanon and Gaza between March and May 2020 due to movement restrictions which hampered the ability to receive supplies and access project sites.

22.117 At the same time, however, the subprogramme identified new activities on issues related to COVID-19, within the overall scope of its objectives, namely the enhancement of cash assistance to Palestine refugees in all fields of operation to mitigate additional socioeconomic hardship due to COVID-19. In this regard, top-up cash assistance payments benefited 840,746 Palestine refugees in Jordan, Lebanon, the Syrian Arab Republic and Gaza in 2020. The subprogramme also enhanced solid waste collection and sanitation activities in refugee camps. Disinfection campaigns were held in all 58 official refugee camps and additional sanitation labourers were hired in Jordan, Lebanon, the Syrian Arab Republic, Gaza and the West Bank.

## **Planned results for 2022**

22.118 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: expansion of the Agency's social safety net programme<sup>10</sup>**

#### **Programme performance in 2020**

22.119 The subprogramme has continued to reform the Agency's social safety net programme. This included the establishment of a minimum basic social assistance floor in those fields of UNRWA operations with very high poverty rates and afflicted by chronic crises, such as the Syrian Arab Republic and Gaza. In the Syrian Arab Republic, all Palestine refugees received a cash transfer of \$9 per person per month as part of the Agency's emergency programme response, which was supplemented by an additional \$5 per person per month for the most vulnerable, including households headed by women, the elderly and persons with disabilities, under the social safety net programme. In Gaza, preparations were implemented towards the 2021 transition to universal food assistance provided through the Agency's emergency programme response, supplemented by cash payments for vulnerable groups under the social safety net programme. The subprogramme also increased the transfer value of the social safety net programme in Jordan and Lebanon to accommodate consumer price inflation and to maintain the purchasing power of the transfer value against a baseline set in 2016. However, the transfer value of the social safety net programme remains at only 20 per cent of minimum food requirements in Jordan and the West Bank and below 13 per cent in Lebanon.

22.120 The above-mentioned work contributed to 390,443 poor and vulnerable refugees receiving assistance through the social safety net programme, which did not meet the target of 475,213 reflected in the proposed programme budget for 2020. In view of the pandemic, a socioeconomic survey to be implemented in Lebanon, which was expected to provide the basis for the reform and expansion of the social safety net programme, had to be deferred to 2021.

#### **Proposed programme plan for 2022**

22.121 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will conduct a socioeconomic survey and implement a high-frequency

<sup>10</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 26)).

situation monitoring approach in Lebanon which will provide a basis of evidence for introducing emergency cash assistance to Palestine refugees in Lebanon, as well as for increasing the transfer value of the social safety net programme. Crisis situation monitoring will be implemented on a biannual basis in Gaza and the Syrian Arab Republic to keep track of the economic situation affecting Palestine refugees and report on the effectiveness and relevance of relief assistance interventions. The social safety net programme in Jordan and the West Bank will also be better aligned with host country social assistance schemes to offer targeting and transfer value equivalency, thereby preventing duplicative coverage, and in the case of Jordan, increasing the inclusion of populations excluded by the host country's programmes. The expected progress is presented in the performance measure below (see figure 22.XV).

Figure 22.XV

**Performance measure: total number of poor and vulnerable refugees receiving assistance (annual)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: targeting those most in need through the social safety net programme<sup>11</sup>**

### **Programme performance in 2020**

22.122 The subprogramme has continued to provide eligible refugees with in-kind food assistance and cash-based transfers under the social safety net programme. These transfers contributed to poverty mitigation for Palestine refugees across the Agency's fields of operations, with priority focus on those in abject and absolute poverty. While the social safety net programme was reformed in the Syrian Arab Republic to target beneficiaries based on vulnerability criteria, the eligibility of Palestine refugees to receive social transfers under the social safety net programme in Jordan, Lebanon, the Syrian Arab Republic and the West Bank continued to be determined based on poverty-based criteria. This entails the use of a proxy means testing formula which includes a detailed analysis of the underlying causes of poverty, costs of food commodities and socioeconomic and protection factors. In 2020, information for this analysis was obtained through data pertaining to national poverty lines and the consumer price index, as well as through telephone interviews with social safety net programme applicants, following the suspension of home visits at the onset of the COVID-19 pandemic. The proxy means testing formula allows the Agency to assess whether social safety net programme beneficiaries and applicants are in abject poverty

<sup>11</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

(food insecure) or absolute poverty (not able to meet the entire basket of basic needs, including food).

22.123 The above-mentioned work contributed to the social transfers through the social safety net programme received by 255,448 Palestine refugees in Jordan, Lebanon, Gaza and the West Bank using poverty-based criteria and by 134,995 Palestine refugees in the Syrian Arab Republic targeted using vulnerability-based criteria. The number of recipients of social transfers reflects a decrease of approximately 4 per cent compared with 2019 owing to the challenges caused by COVID-19 in conducting home visits for the purpose of completing proxy means testing on existing and prospective social safety net programme recipients, as described in paragraph 22.122 above. The previous performance measure reflected in [A/75/6/Add.1](#) is reported in figure 22.XV.

### Proposed programme plan for 2022

22.124 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to maintain updated information on national poverty lines and the consumer price indices in the fields of UNRWA operation. The subprogramme will also continue to undertake telephone interviews or, should the public health situation allow, home visits to social safety net programme applicants by Agency social workers to conduct poverty assessments. The expected progress is presented in the performance measure below (see table 22.9).

Table 22.9  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
Social transfers through the social safety net programme received by 255,266 Palestine refugees in Jordan, Lebanon, Gaza and the West Bank determined through poverty-based criteria. The social safety net programme remained suspended in the Syrian Arab Republic as poverty-based targeting could not be implemented	Social transfers through the social safety net programme received by 406,511 Palestine refugees in Jordan, Lebanon, Gaza and the West Bank determined through poverty-based criteria. The social safety net programme was reintroduced in the Syrian Arab Republic for 16,071 Palestine refugees targeted using a vulnerability-based targeting criteria	Social transfers through the social safety net programme received by 255,448 Palestine refugees in Jordan, Lebanon, Gaza and the West Bank through poverty-based criteria and by 134,995 Palestine refugees in the Syrian Arab Republic targeted through vulnerability-based criteria	Social transfers through the social safety net programme received by a total of 479,420 Palestine refugees in Jordan, Lebanon, the Syrian Arab Republic, Gaza and the West Bank. Universal food assistance will be introduced in Gaza, supplemented by cash assistance targeted through vulnerability-based criteria	Social transfers through the social safety net programme received by a total of 530,000 Palestine refugees in Jordan, Lebanon, the Syrian Arab Republic, Gaza and the West Bank. Progress on the reform of the social safety net programme in Lebanon and progress on preparations for reform of the social safety net programme in Jordan and the West Bank

### Result 3: safe and habitable shelters for vulnerable Palestine refugees

#### Proposed programme plan for 2022

22.125 Since their establishment, the 58 official refugee camps across the Agency's five fields of operation have transformed from temporary shelters into highly urbanized and overcrowded spaces. Owing to conflict, increases in the refugee population, difficult economic conditions and limited space, many shelters have become critically substandard. The majority of shelters contain asbestos, zinc or temporary roofing that constitute acute health risks, and many also suffer from poor sanitation and a lack of ventilation. As of 2020, there were an estimated 40,000 substandard shelters, excluding those that have been affected by hostilities in Lebanon, the Syrian Arab Republic and Gaza. The subprogramme is dedicated to upgrading critically substandard shelters and prioritizes support for the most vulnerable Palestine refugees in accordance with a number of criteria, including poverty status, family size, number of persons in the family with a disability, amount of time waiting for shelter rehabilitation and the type of head of household (e.g. female, or custodian or guardian of orphans). In 2020, the subprogramme rehabilitated 561 substandard shelters in Jordan, Lebanon, Gaza and the West Bank.

#### *Lessons learned and planned change*

22.126 The lesson for the subprogramme was that shelter rehabilitation is most successful when the primary beneficiaries are fully engaged. In applying the lesson, the subprogramme will promote the use of the self-help approach, whereby the families whose shelters are being rehabilitated manage the works, with the Agency's technical support and supervision. The expansion of the self-help approach is expected to increase the satisfaction rate of beneficiaries of UNRWA shelter rehabilitation assistance.

#### *Expected progress towards the attainment of the objective, and performance measure*

22.127 This work is expected to contribute to the objective, as demonstrated by an increase in the total number of families who have benefited from improved shelter conditions (see figure 22.XVI).

Figure 22.XVI

**Performance measure: total number of families benefiting from improved shelter conditions (cumulative)**

### Deliverables

22.128 Table 22.10 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

## Programme of work

### Subprogramme 1 Policy and analysis

#### Objective

23.2 The objective, to which this subprogramme contributes, is to improve the strategic and operational coherence of humanitarian response.

#### Deliverables

23.3 Table 23.1 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 23.1

#### Subprogramme 1: deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>3</b>	<b>3</b>	<b>3</b>	<b>3</b>
1. Report of the Secretary-General on the strengthening of the coordination of emergency humanitarian assistance of the United Nations	1	1	1	1
2. Report of the Secretary-General on the protection of civilians	1	1	1	1
3. Report of the Secretary-General on natural disasters	1	1	1	1
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>6</b>	<b>6</b>	<b>6</b>	<b>6</b>
4. Meetings of the Third Committee	1	1	1	1
5. Meetings of the Expert Group on the Protection of Civilians	4	4	4	4
6. Meetings of the Economic and Social Council humanitarian affairs segment	1	1	1	1
<b>B. Generation and transfer of knowledge</b>				
<b>Seminars, workshops and training events</b> (number of days)	<b>3</b>	<b>3</b>	<b>3</b>	<b>3</b>
7. Organization of forums/workshops with academic institutions and non-governmental organizations to promote humanitarian assistance and to address humanitarian concerns	3	3	3	3
<b>Technical materials</b> (number of materials)	<b>2</b>	<b>2</b>	<b>2</b>	<b>2</b>
8. Strategy papers, policy tools and guidance notes for humanitarian agencies on the relation among the political, humanitarian assistance and human rights dimensions of the United Nations response to crises	1	1	1	1
9. Studies, guidance and policy analysis on developments in the humanitarian sector	1	1	1	1

### Subprogramme 2 Coordination of humanitarian action and emergency response

#### Objective

23.4 The objective, to which this subprogramme contributes, is to ensure a coherent, effective and timely humanitarian response to alleviate human suffering in natural disasters and complex emergencies.

## Deliverables

23.5 Table 23.2 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 23.2

### Subprogramme 2: deliverables for the period 2020–2022, by category and subcategory

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>4</b>	<b>4</b>	<b>4</b>	<b>4</b>
1. Report to the General Assembly on the Central Emergency Response Fund	1	1	1	1
2. High-level pledging events on the provision of international assistance to countries affected by humanitarian emergencies	3	3	3	3
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>2</b>	<b>2</b>	<b>2</b>	<b>2</b>
3. High-level meetings and side events of the General Assembly on the provision of international assistance to countries affected by humanitarian emergencies	2	2	2	2
<b>B. Seminars, workshops and training events</b> (number of days)	<b>2</b>	<b>2</b>	<b>2</b>	<b>2</b>
4. Workshops on humanitarian law and other emerging issues for resident coordinators/humanitarian coordinators	2	2	2	2
<b>C. Substantive deliverables</b>				
<b>Humanitarian assistance missions:</b> strategy-building missions to review humanitarian needs and design appropriate response strategies.				
<b>Consultation, advice and advocacy:</b> briefings to the Security Council on specific complex emergency situations; meetings with donors, informal briefings and consultations with more than 50 Member States on specific emergency situations and the financing of humanitarian requirements; consolidated inter-agency appeals for 27 countries and regions affected by humanitarian emergencies; meetings with humanitarian organizations in more than 30 countries on operations, policies and coordination arrangements; and meetings with Member States, regional organizations and the private sector on common humanitarian actions.				
<b>Databases and substantive digital materials:</b> access to monitoring mechanisms in support of operational partners.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> meetings and special events on specific complex emergency situations; quarterly donor briefings on humanitarian financing; the Central Emergency Response Fund annual report; consolidated annual report on country-based pooled funds; and Global Humanitarian Overview.				
<b>E. Enabling deliverables</b>				
<b>Administration:</b> delivering of grants from the Central Emergency Response Fund for new and protracted emergencies and of grants from the country-based pool funds.				

## Subprogramme 3 Natural disaster risk reduction

### Objective

23.6 The objective, to which this subprogramme contributes, is to prevent and reduce the risk of and vulnerability to natural hazards and the impact of disasters.

### Deliverables

23.7 Table 23.3 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 23.3

**Subprogramme 3: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>3</b>	<b>2</b>	<b>2</b>	<b>2</b>
1. Report to the General Assembly on the implementation of the Sendai Framework for Disaster Risk Reduction 2015–2030	1	1	1	1
2. Provision of substantive and technical support to General Assembly (Second Committee) resolution negotiations on disaster risk reduction (annual) and effective global response to address the impacts of the El Niño phenomenon (biennial)	2	1	1	1
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>1</b>	<b>1</b>	<b>1</b>	<b>1</b>
3. General Assembly plenary (Second Committee), agenda item on sustainable development.	1	1	1	1
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	<b>29</b>	<b>30</b>	<b>29</b>	<b>30</b>
4. National, regional and interregional projects related to the implementation of the Sendai Framework	29	30	29	30
<b>Seminars, workshops and training events</b> (number of days)	<b>323</b>	<b>332</b>	<b>323</b>	<b>330</b>
5. Capacity development training and workshops for regional, national and local disaster risk reduction planning and implementation and monitoring of the Sendai Framework	323	332	323	330
<b>Publications</b> (number of publications)	<b>3</b>	<b>2</b>	<b>5</b>	<b>3</b>
6. Global Assessment Report on Disaster Risk Reduction and Global Assessment Report special reports	1	—	1	1
7. United Nations Office for Disaster Risk Reduction annual report	1	1	1	1
8. United Nations Office for Disaster Risk Reduction biennial work programme and strategic framework	—	—	2	—
9. United Nations Plan of Action on Disaster Risk Reduction for Resilience: Towards a Risk-informed and Integrated Approach to Sustainable Development (progress report)	1	1	1	1
<b>Technical materials</b> (number of materials)	<b>11</b>	<b>14</b>	<b>14</b>	<b>15</b>
10. Best practices, standards, guidance and other tools to promote learning and knowledge-sharing for the monitoring and implementation of the Sendai Framework	6	10	10	10
11. Policy guidance on the application of risk knowledge	—	4	1	4
12. Outcome documents of the regional and global platforms	5	—	3	1

**C. Substantive deliverables**

**Consultation, advice and advocacy:** provide advice and support related to the formulation and improvement of 50 regional, national and local disaster risk reduction strategies and plans as well as advice formulated on 5 national early warning systems and mechanisms; support for risk governance capacities of 14 regional and subregional intergovernmental organizations; facilitate the implementation of the United Nations Plan of Action on Disaster Risk Reduction for Resilience: Towards a Risk-informed and Integrated Approach to Sustainable Development; support private sector in risk analytics for risk-informed decision-making and risk reduction through partnership with the Insurance Development Forum and engagement in the InsuResilience Global Partnership; advocate for policy coherence on disaster risk reduction across sectors, including through engagement with the Conference of States Parties on the Rights of Persons with Disabilities, the multi-stakeholder forum on science, technology and innovation for the Sustainable Development Goals and the Economic and Social Council integration segment, and other intergovernmental processes, to advance the implementation of the Sendai Framework.

**Databases and substantive digital materials:** maintenance and further enhancement of the Sendai Framework monitor for monitoring and reporting on progress against the Sendai Framework targets; assistance in establishing and managing disaster loss databases for 120 countries and territories.

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and informative materials:</b> organization of high-level global and regional meetings on disaster risk reduction; World Tsunami Awareness Day events; Sendai Seven Campaign: Seven Targets, Seven Years/International Day for Disaster Reduction events; and newsletters, press releases and notes verbales on Sendai Framework monitoring published and/or disseminated.				
<b>External and media relations:</b> high-level advocacy of the Special Representative of the Secretary-General for Disaster Risk Reduction through high-level advocacy missions, press releases, op-eds, web stories, social media posts, videos and press coverage.				
<b>Digital platforms and multimedia content:</b> maintenance and further enhancement of PreventionWeb, the online knowledge platform for disaster risk reduction; maintenance and enhancement of the Sendai Framework voluntary commitments online platform with more than 75 voluntary commitments recorded.				

## Subprogramme 4 Emergency support services

### Objective

23.8 The objective, to which this subprogramme contributes, is to expedite international humanitarian assistance to victims of emergencies and natural disasters, including environmental disasters and technological accidents.

### Deliverables

23.9 Table 23.4 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 23.4

#### Subprogramme 4: deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>B. Generation and transfer of knowledge</b>				
<b>Field and technical cooperation projects</b> (number of projects)	5	5	5	5
1. Project on interoperability of response tools and procedures	1	1	1	1
2. Projects on response capacity-building	4	4	4	4
<b>Seminars, workshops and training events</b> (number of days)	50	43	50	50
3. Regional and international training sessions, workshops and simulation exercises on various response services and field coordination (e.g., United Nations Disaster Assessment and Coordination Team; United Nations humanitarian civil-military coordination; environmental emergency response; International Search and Rescue Advisory Group; humanitarian programme cycle)	50	43	50	50
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> advisory services to 70 key stakeholders and Member States on rapid response coordination, including United Nations humanitarian civil-military coordination and integrating environmental considerations into humanitarian response.				
<b>Humanitarian assistance missions:</b> 5–10 United Nations humanitarian civil-military coordination support missions annually (upon request); 3–10 United Nations Disaster Assessment and Coordination Team missions annually (subject to occurrence of disasters and at the request of disaster-affected governments or humanitarian country teams); provision of humanitarian coordination support for emergency core relief; and provision of technical support for rapid assessment and emergency preparedness planning.				

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<p><b>Databases and substantive digital materials:</b> guidance, tools and handbooks on humanitarian coordination response services annually, including: revision of International Search and Rescue Advisory Group guidelines; update and maintenance of electronic tools related to rapid response and humanitarian coordination; update and maintenance of the roster for humanitarian coordinators.</p>				
<p><b>D. Communication deliverables</b></p>				
<p><b>Outreach programmes, special events and information materials:</b> annual partnership and outreach event to facilitate collaboration and interoperability among 2,000 stakeholders, including humanitarian responders; and approximately 3–5 norms/guidance/tools on emergency response services annually.</p>				
<p><b>Digital platforms and multimedia content:</b> update and maintenance of websites dedicated to various technical humanitarian response services.</p>				

## Subprogramme 5

### Humanitarian emergency information and advocacy

#### Objective

23.10 The objective, to which this subprogramme contributes, is to ensure effective advocacy of humanitarian principles and knowledge-sharing, serving populations affected by disasters and emergencies.

#### Deliverables

23.11 Table 23.5 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 23.5

#### Subprogramme 5: deliverables for the period 2020–2022, by category and subcategory

Category and subcategory
<p><b>C. Substantive deliverables</b></p> <p><b>Consultation, advice and advocacy:</b> support for humanitarian partners to strengthen community engagement; authoritative, comprehensive information and analysis on humanitarian needs and response: consolidated information and analysis on crises and high-risk countries (e.g., multi-stakeholder intersectoral analysis outputs); quality-assured data for use by more than 1,000 operational partners; and chairing of a humanitarian communications group that includes both United Nations and NGO members to help strengthen advocacy and consistency in messaging and the planning and sequencing of communications content.</p> <p><b>Databases and substantive digital materials:</b> updating and maintenance of field guides, maps and other logistics information for more than 1,000 humanitarian operational partners on the ground; establishment of information management standards for information exchange in the humanitarian community, reporting templates and guidance, including shared data standards among operational partners; databases and electronic tools related to humanitarian response and response coordination; International Search and Rescue Advisory Group urban search and rescue directory; and common risk and vulnerability assessment methodologies and tools.</p>
<p><b>D. Communication deliverables</b></p> <p><b>Outreach programmes, special events and information materials:</b> information materials on advocacy on coordination of humanitarian action; organization of World Humanitarian Day and other real or virtual events on humanitarian issues and concerns, including exhibitions, seminars and public events, possibly through digital platforms; use of campaigns, special events and traditional and social media to advocate for humanitarian issues and specific emergency situations; and more proactive outreach and engagement through new and current digital platforms to inform and mobilize resources and support, including by reaching the highly digitized segment of people aged 15–34 and maximizing awareness and engagement to further support people affected by humanitarian crises.</p>

**External and media relations:** a proactive approach to media engagement and activity; provide daily updates to United Nations correspondents through the noon briefing and deliver the twice-weekly Palais des Nations briefings in Geneva; regular informal and formal media briefings around the world, story pitches and interview offers to advocate for assistance for people caught in humanitarian crises while showing the value added by the Office's work; and support for global fundraising through a comprehensive communications strategy for the launch of the Global Humanitarian Overview (annual consolidated appeals) in support of the Central Emergency Response Fund and of pledging conferences for large humanitarian crises.

**Digital platforms and multimedia content:** manage and support humanitarian community digital platforms used by a global audience of more than 15 million people per year, such as ReliefWeb, humanitarianresponse.info and Humanitarian Data Exchange; guidance, templates and training on various reporting products, including situation report and humanitarian snapshot; and video and other multimedia content on international humanitarian law, international human rights law, humanitarian principles and protection of civilians, including gender-based violence in conflicts.

**E. Enabling deliverables**

**Information and communications technology:** product support for Office for the Coordination of Humanitarian Affairs collaboration services and global information and communications technology group, information and communications technology emergency response and business continuity services, business intelligence and data analysis services.

---

## Programme 24

### Global communications

#### Legislative mandates

24.1 The list below provides all mandates entrusted to the programme.

##### *General Assembly resolutions*

13 (I)	Organization of the Secretariat	74/128	Follow-up to the Fourth World Conference on Women and full implementation of the Beijing Declaration and Platform for Action and the outcome of the twenty-third special session of the General Assembly
168 (II)	United Nations Day		
423 (V)	Human Rights Day		
32/40 B	Question of Palestine		
35/201	Annual Reham Al-Farra Memorial Journalists' Fellowship Programme	75/23	Special information programme on the question of Palestine of the Department of Global Communications of the Secretariat
36/67	International Year of Peace and International Day of Peace	75/25	Follow-up to the Declaration and Programme of Action on a Culture of Peace
54/134	International Day for the Elimination of Violence against Women	75/80	United Nations Disarmament Information Programme
57/7	Final review and appraisal of the United Nations New Agenda for the Development of Africa in the 1990s and support for the New Partnership for Africa's Development	75/101 A	Questions relating to information: information in the service of humanity
57/129	International Day of United Nations Peacekeepers	75/101 B	Questions relating to information: United Nations global communications policies and activities
60/7	Holocaust remembrance	75/121	Dissemination of information on decolonization
60/225	Assistance to survivors of the 1994 genocide in Rwanda, particularly orphans, widows and victims of sexual violence	75/237	A global call for concrete action for the elimination of racism, racial discrimination, xenophobia and related intolerance and the comprehensive implementation of and follow-up to the Durban Declaration and Programme of Action
62/122	Permanent memorial to and remembrance of the victims of slavery and the transatlantic slave trade		
64/13	Nelson Mandela International Day		

#### Programme of work

##### Subprogramme 1

##### Strategic communications services

##### Objective

24.2 The objective, to which this subprogramme contributes, is to mobilize audiences and strengthen support for the work, principles and purposes of the United Nations.

##### Deliverables

24.3 Table 24.1 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 24.1

**Subprogramme 1: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>1</b>	<b>1</b>	<b>1</b>	<b>1</b>
1. Report for the General Assembly on the dissemination of information on decolonization	1	1	1	1
<b>B. Generation and transfer of knowledge</b>				
<b>Seminars, workshops and training events</b> (number of days)	<b>26</b>	<b>26</b>	<b>26</b>	<b>26</b>
2. Training programme for Palestinian broadcasters and journalists	24	24	24	24
3. International Media Seminar on Peace in the Middle East	2	2	2	2
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> communications campaigns and strategic outreach events and programmes through the Department's field offices reaching local audiences through lectures, exhibits and the organization of more than 100 Model United Nations conferences on priority issues or special observances of the United Nations, with specific target audiences (e.g., civil society, youth, academia, governments and the private sector) and working in some 120 languages.				
<b>External and media relations:</b> press conferences, briefings and panel discussions on United Nations priorities, activities, events, publications, reports and outcomes of negotiations or other United Nations activities; media outreach, including media interviews and/or placement of opinion articles; strategic partnerships with education institutions, the media, civil society, the private sector, the creative community and other partners; and production of radio and television programmes.				
<b>Digital platforms and multimedia content:</b> flagship and other social media accounts, campaigns and multilingual websites managed by United Nations information centres.				

## Subprogramme 2

### News services

### Objective

24.4 The objective, to which this subprogramme contributes, is to mobilize audiences and strengthen support for the work, principles and purposes of the United Nations.

### Deliverables

24.5 Table 24.2 lists all deliverables, by category and subcategory, for the period 2020–2022, that contributed and are expected to contribute to the attainment of the objective stated above.

Table 24.2

**Subprogramme 2: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>
<b>D. Communication deliverables</b>
<b>External and media relations:</b> accreditation of and services to 1,000 members of the media, covering the United Nations meetings; coverage of intergovernmental meetings; online publication and distribution of speeches and statements of the Secretary-General and the Deputy Secretary-General and transcripts of press encounters of the Secretary-General; and photo coverage of meetings of key intergovernmental bodies and activities of the Secretary-General, the Deputy Secretary-General and the President of the General Assembly.

## Category and subcategory

**Digital platforms and multimedia content:** daily multimedia content – audio, video and text – in the six official languages and three non-official languages (Hindi, Kiswahili and Portuguese) disseminated through multiple platforms and channels, including online and on social media, and through partnerships with external media organizations; creation, updating and maintenance of the core United Nations website (including the home page), 185 United Nations observances and major global campaigns in the six official languages; assistance to United Nations entities to ensure that their websites meet the requirements for United Nations language parity (some 43 websites); live television coverage, including live streams, and the posting of on-demand webcasts of intergovernmental meetings and other newsworthy events taking place at Headquarters; and provision of audiovisual library services to delegates, media outlets and others.

### Subprogramme 3

#### Outreach and knowledge services

#### Objective

24.6 The objective, to which this subprogramme contributes, is to mobilize audiences and strengthen support for the work, principles and purposes of the United Nations.

#### Deliverables

<b>Outreach programmes, special events and information materials:</b> partnerships with civil society, academic institutions and other entities; educational and promotional materials on United Nations activities, such as UN Chronicle and Basic Facts about the United Nations, and briefing programmes on a broad range of United Nations topics; responses to public enquiries and special kits for teachers; selection, design, organization and installation of exhibits at United Nations Headquarters and online; multilingual guided tours to more than half a million visitors in 20 languages; outreach programme with prominent personalities, including Messengers of Peace and other celebrities, as advocates; special events and promotion of observances of				

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
selected commemorative days and years; Creative Community Outreach Initiative resulting in the United Nations or a United Nations issue being featured in a film, television or theatre product; graphic design products in support of branding, communication campaigns and information materials; student events, such as global videoconferences; guidance and expert advice to 850 organizations that host around 260,000 students at Model United Nations; and conferences on subjects such as slavery and the transatlantic slave trade and Holocaust remembrance.				
<b>External and media relations:</b> press conferences and press releases to announce new outreach partnerships and special events; and exhibit openings.				
<b>Digital platforms and multimedia content:</b> updating and maintenance of iSeek, the primary internal communications platform of the Secretariat for all users across the world; publishing articles; conducting training for more than 1,000 participants; and maintenance of e-deleGATE and United Nations Development Business.				
<b>Library services:</b> United Nations digital commons: a secure digital United Nations central repository (the United Nations Digital Library); information and knowledge services: online Library products for the Library's global public, loan and related services and the provision of direct and targeted research to representatives of Member States; wider community engagement: web and social media presence, events and lectures and management of the United Nations System Electronic Information Acquisition Consortium and the United Nations Depository Library Programme; and curation of diverse library content.				

## **Programme 25**

### **Management and support services**

#### **Section 29A**

#### **Department of Management Strategy, Policy and Compliance**

#### **Overall orientation**

#### **Mandates and background**

25A.1 Driving the management paradigm shift, including supporting the new peace and security architecture and the development system reforms, the Department of Management Strategy, Policy and Compliance is responsible for policy leadership in all management areas through the provision of a clear, integrated global management strategy and policy framework and through strengthened monitoring, evaluation and accountability mechanisms that oversee the exercise of delegated authority in an environment of decentralized management. It will contribute to enabling a culture of continuous learning and accountability and promote innovation, inclusion and environmental sustainability in business models throughout the Secretariat. The Department of Management Strategy, Policy and Compliance is also responsible, jointly with the Department of Operational Support, for managing the activities of the Office of Information and Communications Technology. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolutions [72/266 A](#), [72/266 B](#), [72/254](#) and [73/281](#). The Department of Management Strategy, Policy and Compliance plays an integral role in realizing the Secretary-General's new management paradigm, with an emphasis on transparency, accountability and decision-making that is closer to points of delivery.

#### **Strategy and external factors for 2022**

25A.2 The strategy for 2022 includes continuing to advance the new management paradigm through an integrated approach, with three interlinked pillars: programme planning, finance and budget; human resources; and business transformation and accountability. The Department will:

(a) Commit to new ways of working, including through the formulation of holistic policies and approaches that foster the achievement of tangible results, including through renewed investment in technology and commitment to continuous improvement;

(b) Strengthen the Organization's resilience, including its preparedness to maintain business continuity in emergencies, by guiding, monitoring and adjusting the post-coronavirus disease (COVID-19) "next normal" working methods at United Nations Headquarters to continually adapt to changing environments, risks and opportunities;

(c) Drive results-based management policies and practices into the daily functioning and culture of the Organization, together with an integrated cycle of planning, risk and performance management, and evaluation;

(d) Foster greater transparency and accountability envisaged to engender greater credibility and trust in the capabilities of the United Nations as an organization, both by Member States and the people that it serves;

(e) Enhance data analysis and reporting capabilities that enable real-time, user-friendly access to data to support informed decision-making and improved management of risks to achieve the objectives of the United Nations;

(f) Create a collaborative and inclusive environment through integrated solutions and strategic partnerships throughout the United Nations system;

(g) Work towards the implementation of a dynamic human resources strategy that fosters greater diversity, supports managers in finding the right people, provides a strengthened learning framework, supports the development of new competencies, talents and strengthened multilingualism, ensures a civil and safe work environment and promotes a culture of continuous learning, innovation and improvement to actively build a better United Nations.

25A.3 The Department will continue to provide leadership in the development and delivery of integrated organizational management strategies, policies and models supporting a decentralized, field-focused paradigm in which managers are empowered through the enhanced delegation of authority framework. It will liaise with Member States and other external entities on management-related issues and foster coordination within the Secretariat, as well as with the funds, programmes and specialized agencies of the United Nations system, to build partnerships and promote best practices.

25A.4 Having laid the foundation for greater decentralization, the main challenge will continue to be to accelerate the culture shift required to fully implement the new management paradigm of increased delegation of authority, transparency and accountability and a culture of continuous learning.

25A.5 Through the new Enterprise Resource Planning Solution Division, which came into existence on 1 January 2021, the Department will continue to enable business transformation that leverages current and future trends in enterprise resource planning solutions. The Umoja solution and its accompanying business intelligence framework will allow the Department to respond to organizational requirements for better and more timely decision-making, enhanced accountability systems and the rapid adoption of newly identified best practices, as well as strengthened support for real-time data access, augmented and predictive analytics and planning and monitoring capabilities.

25A.6 The proposed component 3, Management advisory services, of subprogramme 1 comprises two components that were previously reflected under subprogramme 1, namely component 4, Management evaluation component for the administration of justice, and component 3, Secretariat of the Headquarters Committee on Contracts and the Headquarters Property Survey Board, as well as organizational resilience management capacity previously reflected under subprogramme 4, Business transformation and accountability. In response to the recommendation of the Joint Inspection Unit in its 2011 review of business continuity management and in the light of experience gained during 2020, it is proposed that the organizational resilience management capacity be redeployed to the Office of the Under-Secretary-General for Management Strategy, Policy and Compliance as the Sustainability and Resilience Management Unit, to more fully reflect the expanded nature of its activities.

25A.7 With regard to cooperation with other entities, the Department will continue to support and work closely with all entities of the Secretariat and build partnerships, internally within the Secretariat and externally with the United Nations system, to find inclusive responses to challenges and develop innovative business models that cater to the evolving and specific requirements of each entity, with an emphasis on the field.

25A.8 With regard to inter-agency coordination and liaison, the Department will represent the Secretary-General in inter-agency coordination mechanisms, including the High-level Committee on Management of the United Nations System Chief Executives Board for Coordination (CEB) and its networks.

25A.9 With regard to the external factors, the overall plan for 2022 is based on the planning assumption that all stakeholders will extend their full cooperation and support to the Department in implementing its mandates.

25A.10 With regard to the COVID-19 pandemic, the proposed programme plan is based on the assumption that the proposed deliverables and activities for 2022 will be feasible to implement. However, if the pandemic were to continue to have an impact on the planned deliverables and activities, they would be adjusted during 2022 within the scope of the overall objectives, strategies and mandates. Any such adjustments would be reported as part of the programme performance information.

25A.11 The Department integrates geographical diversity and gender perspectives in its operational activities, deliverables and results, as appropriate. For example, subprogramme 3 will align the global outreach activities to achieve the goals of the Secretariat's geographical diversity strategy and the United Nations system-wide strategy on gender parity, conduct a comprehensive examination of the Secretariat's recruitment methods from a diversity perspective to eliminate any potential unconscious bias or other inclusion issues and continue efforts to expand the availability of a diverse pool of qualified candidates for future vacancies through the use of innovative mechanisms such as pipelines and talent pools. Integrating a gender perspective, it will provide advice to senior managers on conduct and discipline matters and administrative appeals and on critical incidents. With regard to substantive digital materials, the gender perspective is also incorporated, in particular with regard to victim assistance. For subprogramme 4, the integrated business transformation approach will ensure that gender-related aspects are considered and more easily analysed and monitored. The Department will play a leadership role in driving the Secretary-General's system-wide strategy on the future of work and continues to support efforts to achieve gender parity and address sexual harassment in the workplace. Furthermore, the Department will work towards the equitable geographical representation of Member States in the Secretariat workforce and prioritize the integration of environmental sustainability and resilience management into the strategies, policies and compliance and reporting frameworks of the Organization. Through its policy leadership in these interconnected fields, the Department will foster a change in culture at all levels of the Secretariat.

25A.12 The Department will also support Secretariat-wide efforts on disability inclusion through the implementation of the United Nations Disability Inclusion Strategy. The Department will continue to elevate awareness of disability inclusion within it and support entities by mainstreaming disability inclusion in human resources strategy and policy, particularly in the areas of leadership, inclusiveness and organizational culture, which are core areas of the strategy.

## **Programme performance in 2020**

### **Impact of COVID-19 on programme delivery**

25A.13 During 2020, the COVID-19 pandemic had an impact on the planned deliverables and activities of the Department of Management Strategy, Policy and Compliance. The impact included a reprioritization of resources under executive direction and management to lead and coordinate efforts in response to the emerging and evolving pandemic throughout the course of 2020, both at the Secretariat and

departmental level. As Alternate Chair of the Senior Emergency Policy Team, the Under-Secretary-General and her Office were required to shift focus from planned activities to address the pandemic, including through extensive coordination and consultation activities across several departments, and concentrate efforts on the coordination and dissemination of COVID-19-specific policies, guidance and communications. A number of planned deliverables were not carried out, for example, planned travel for meetings of the High-level Committee on Management and the Staff-Management Committee and meetings on the strategic heritage plan of the United Nations Office at Geneva, as well as visits to the Office and peacekeeping missions. Meetings and events had to be reconfigured to a virtual environment or were cancelled or postponed as a result of COVID-19. The response to the pandemic also required a reprioritization of resources towards the health and well-being of personnel, including in the area of mental health. Specific examples of the impact are provided under subprogramme 1 (components 2 and 3), subprogramme 2 (component 2), subprogramme 3 (component 1) and subprogramme 4. The change in approach regarding planned deliverables and activities also had an impact on the expected results for 2020, as described in the programme performance under subprogramme 2 (component 2).

25A.14 At the same time, however, some planned deliverables and activities were modified and some new activities were identified during 2020, within the overall scope of the objectives of the subprogrammes, in order to support clients on issues emerging during the COVID-19 pandemic. Those modifications and new activities included several enhancements to Umoja; a proactive response to possible disruptions in the payments system; the establishment of the enterprise risk management task force to support Secretariat entities on issues related to COVID-19; and the expansion of the Secretariat-wide risk register. Specific examples of the modified and new activities are provided under all subprogrammes. The modified and new deliverables and activities contributed to results in 2020, as described in the programme performance under subprogramme 2 (component 1).

25A.15 Reflecting the importance of continuous improvement and responding to the evolving needs of Member States and clients, the programme will mainstream lessons learned and best practices related to the adjustments to and adaptation of its programme owing to the COVID-19 pandemic. Specific examples of lessons learned demonstrated that although virtual meetings have been critical in the context of COVID-19, engaging in person remains important for certain types of meetings, such as exchanges on sensitive matters at United Nations Headquarters. Since these types of engagements are the most effective when carried out in person, there is a need to employ a hybrid approach in the future while maintaining the majority of savings.

## Legislative mandates

25A.16 The list below provides all mandates entrusted to the programme.

### *General Assembly resolutions*

52/12 A and B	Renewing the United Nations: a programme for reform	61/245	Comprehensive review of governance and oversight within the United Nations and its funds, programmes and specialized agencies
58/269	Strengthening of the United Nations: an agenda for further change		
58/280	Review of duplication, complexity and bureaucracy in United Nations administrative processes and procedures	72/254 72/266 A and B	Human resources management Shifting the management paradigm in the United Nations
60/1	2005 World Summit Outcome		

73/281	Shifting the management paradigm in the United Nations: comparative assessment of human resources structures	75/252	Questions relating to the proposed programme budget for 2021
75/243	Programme planning	75/253	Special subjects relating to the proposed programme budget for 2021

## Deliverables

25A.17 Table 25A.1 lists all cross-cutting deliverables, by category and subcategory, for the period 2020–2022.

Table 25A.1

### Cross-cutting deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>8</b>	<b>18</b>	<b>8</b>	<b>8</b>
1. Meetings of the Fifth Committee of the General Assembly	3	4	3	3
2. Meeting of the Special Committee on Peacekeeping Operations	1	5	1	1
3. Meetings of the Advisory Committee on Administrative and Budgetary Questions	3	8	3	3
4. Meeting of the Committee for Programme and Coordination	1	1	1	1
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> consultation and engagement with Member States on matters relating to the work of the Department.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> information and engagement events; articles and videos; newsletters.				
<b>Digital platforms and multimedia content:</b> maintenance and update of a total of four websites, intranet and social media accounts of the Department of Management Strategy, Policy and Compliance.				
<b>E. Enabling deliverables</b>				
<b>Administration:</b> six meetings of the Management Client Board; and two meetings of the Arts Committee.				

## Evaluation activities

25A.18 A self-evaluation by the Department of Management Strategy, Policy and Compliance and the Department of Operational Support on the efficacy of the Management Client Board is planned for 2022.

## **Programme of work**

### **Subprogramme 1**

#### **Enterprise resource planning solution, services to the Fifth Committee of the General Assembly and to the Committee for Programme and Coordination, and management advisory services**

### **Component 1**

#### **Enterprise resource planning solution**

### **Objective**

25A.19 The objective, to which this component contributes, is to improve the management of the Organization's resources for its work in line with mandates.

### **Strategy**

25A.20 To contribute to the objective, in line with mandates, the component will support business transformation in the areas of programme planning, programme management, monitoring of programme delivery, and data and business analytics by harmonizing processes and practices and using modern technology.

25A.21 The component will continue to support the Organization by building upon its business intelligence platforms to support access to real-time data, augmented and predictive analytics, including machine learning and natural language processing, and planning capabilities. This is predicated on the deployment of the SAP Analytics Cloud.

25A.22 Established on 1 January 2021, the component reports to both the Under-Secretary-General for Management Strategy, Policy and Compliance and the Under-Secretary-General for Operational Support. The focus of the component, in addition to the support, monitoring and upgrading of the Umoja system, is to meet evolving business needs through continuous improvements directed by the business. The component will work with business areas to translate requirements into integrated functional solutions that are built whenever possible through out-of-the-box solutions that have sustainable road maps and meet Umoja architectural standards. The business will take on responsibility for testing, training and change management, with the component to assist where required.

25A.23 The above-mentioned work is expected to result in:

- (a) A more efficient and transparent management of the Organization's financial, human and physical resources;
- (b) Better and more timely decision-making by management through access to advanced analytics;
- (c) The application and rapid adoption of newly identified best practices by the Organization;
- (d) The continued effective operation of the Organization and of alternate working arrangements, as Umoja functionality will underpin the Organization's work beyond the pandemic.

## Programme performance in 2020

25A.24 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Uninterrupted and seamless Umoja functionalities during the COVID-19 pandemic

25A.25 The Organization had to react quickly to the challenges posed by the COVID-19 pandemic, resulting in, among other things, a protracted period and level of telecommuting never before experienced. Changes made to administrative guidelines to cater for the new reality had to be implemented in the Umoja system, so as to allow for staff members to accurately record and request the adjusted entitlements, as well as to ensure business continuity. The component implemented changes to the configuration and coding in multiple modules of the system in order to accommodate the new reality facing the Organization. These changes included: (a) a new telecommuting type, “Telecommuting COVID-19”, for tracking alternate working arrangements, distinct from flexible working arrangements; (b) the carrying over of unused annual leave as at 31 March 2020; (c) an increase of the uncertified sick leave quota from 7 to 14 days for the leave cycle from 1 April 2020 to 31 March 2021; and (d) the advance disbursement of staff salaries, with payment dates and payroll areas adjusted to enable such a change. In addition, the component enabled the seamless access to human resources, finance, budget, procurement, supply chain and conference and event management data, as well as analytics.

25A.26 The component supported the Organization’s management of the liquidity crisis. The ability to track and monitor the entire life cycle of expenditures and all cash movements across all funding sources gave extraordinary visibility, not available hitherto, to analyse the cash inflows and outflows in a very granular fashion by types of commitments, entities and other criteria. The ability to break down staff costs by post occupancy for each post on the basis of each day rather than each month allowed more granular control over staff cost spending, which is around 75 per cent of the regular budget. Umoja also provided new features, such as funding blocks, that allow controls over spending that are easy to implement.

25A.27 Also key to managing during the liquidity crisis, Umoja’s ability to analyse the spending patterns of each entity across the past five years by budget line, and to analyse the lag between a commitment of funds (budget consumption) and the outflow of cash, was critical to forecasting cash outflows and adjusting commitments based on expected liquidity.

### *Progress towards the attainment of the objective, and performance measure*

25A.28 The above-mentioned work contributed to the objective, as demonstrated by the 99.988 per cent uptime of the Umoja system in 2020 compared with 99.927 per cent in 2019, with no comparative data available for 2018, since the methodical tracking of system uptime started in 2019 only (see figure 25A.I). The seamless integration of the changes to the Umoja system required as a result of COVID-19 facilitated the ability of staff to undertake their work in Umoja remotely and to have access to all of their data, and the timely and effective functioning of the Organization through the pandemic.

Figure 25A.I

**Performance measure: uptime of the Umoja system**

(Percentage)

**Impact of COVID-19 on component delivery**

25A.29 In response to the pandemic, the component identified new activities to support clients on issues emerging during the COVID-19 pandemic, within the overall scope of its objectives. The Umoja solution has facilitated the Organization's transition to working away from the office during the pandemic. The nature of the solution, and its accessibility, integration and transparency, was such that it played an instrumental role in keeping the Organization operational during the crisis. All its functionality was accessible to users from remote and home locations. The component was also able to maintain the software remotely. Additionally, the component was able to carry out several enhancements to the system to support new policies and procedures necessary for dealing with the response to the pandemic without interruption to the completion of its established goals. The following are a representative sample of changes to Umoja that were designed and implemented to support business continuity during the pandemic: (a) danger pay for a limited group of staff directly involved in certain COVID-19 operations; (b) the bulk salary advances solution to easily process mass salary advances for an entity or a group of staff; and (c) medevac and first line of defence<sup>1</sup> payroll cost recovery, in which Umoja payroll was configured to include a global cost recovery mechanism for financing the costs for pandemic-related expenses for the United Nations system-wide medevac arrangements and the augmentation of medical facilities, including COVID-19 testing, in United Nations system hospitals and clinics. The additional activities contributed to results in 2020, as specified in the emerging result for 2020 above.

**Planned results for 2022**

25A.30 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

<sup>1</sup> The first line of defence framework was developed in the context of the COVID-19 pandemic to contribute to the operational continuity of the United Nations country teams on the ground and to ensure the safety and health of the United Nations personnel and their families through the provision of COVID-19-related and other health-care services.

## Result 1: supporting managers in leveraging the new capabilities offered by Umoja Extension 2<sup>2</sup>

### Programme performance in 2020

25A.31 The component, in cooperation with the Office of the Controller, as well as other stakeholders of the performance dashboard, has deployed a key component of the strategic planning, budgeting and performance management solution, combining strategic planning and programme performance information with budget consumption and post-incumbency data in real time in a user-friendly interface. Initially deployed for six pilot peacekeeping missions in October 2019, the dashboard for the regular budget entities, including special political missions, was deployed in May 2020, following the adaptation to the new regular budget annual results framework. At the end of July 2020, the component launched a new Member States' contributions portal as part of the Umoja suite of applications. The portal contains daily data from Umoja on the status of Member States' contributions for assessed budgets. Furthermore, the component launched the budget information pilot, which was custom-designed to provide budget data from Umoja. The financial budget tables and schedules included in budget reports, performance reports and supplementary documents are being made available incrementally to the Advisory Committee on Administrative and Budgetary Questions and to the Fifth Committee of the General Assembly. For all of these solutions, the component developed user-friendly interfaces, which are accessible through desktop computers, tablets or other mobile devices using a secure login.

25A.32 The above-mentioned work contributed to increased access to data for managers and Member States in alignment with the Secretary-General's commitment to transparency, which met the planned target reflected in the proposed programme budget for 2020 and the twelfth and final progress report of the Secretary-General on the enterprise resource planning project ([A/75/386](#)).

### Proposed programme plan for 2022

25A.33 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will implement new tools, such as interactive dashboards for human resources and uniformed capabilities management, that enable further analytical reporting for decision-making. Working with all the business areas and subprogramme 4, the component will design and deliver common data models and customized visualizations for Member States, leveraging rich data from Umoja and other internal and external systems. The expected progress is presented in the performance measure below (see table 25A.2).

Table 25A.2  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Stabilizing the functions covered by the processes within the scope of Umoja Foundation and Extension 1, and designing and	Deploying and stabilizing the Umoja Extension 2 functionalities and adapting Umoja, as a reform enabler, to the	Increased access to data for managers and Member States in alignment with the Secretary-General's commitment to transparency and	Continuous improvements, enhancements and data analytics enabling process improvements and better-informed	Continuous improvements, enhancements and data analytics enabling process improvements and better-informed

<sup>2</sup> As reflected in the proposed programme budget for 2020 ([A/74/6 \(Sect. 29A\)](#)).

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
developing the building blocks for the Umoja Extension 2 functionalities	evolving needs of the reform pillars	deployed Umoja Extension 2 functionality	decisions on resources	decisions on resources

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: business transformation and process improvements<sup>3</sup>

### Programme performance in 2020

25A.34 The component has contributed to the improvement of the management of the Organization's resources for its work in line with mandates, which is demonstrated by the availability of results-driven resource planning, implementation and monitoring and supported by richer data analytics for timely decision-making. The component deployed the strategic planning, budgeting and performance management solution to all Secretariat entities. Following the deployment, the solution was enhanced with an additional module for travel budgeting, and significant changes were made to the position model while the component further streamlined the summary model. The solution was also extended to include a new recosting engine that enabled the implementation of a more accurate recosting methodology by the Programme Planning and Budget Division by applying better currency usage patterns, and therefore more realistic exchange rate and inflation adjustments. Furthermore, the component deployed the performance monitoring module within the strategic planning, budgeting and performance management solution that is used for programme implementation and supports performance management for the regular budget. The corresponding performance monitoring module for the peacekeeping budget was further enhanced in May 2020.

25A.35 The above-mentioned work contributed to the availability of results-driven resource planning, implementation and monitoring modules supported by richer data analytics for timely decision-making by programme managers, which met the planned target reflected in the proposed programme budget for 2021.

### Proposed programme plan for 2022

25A.36 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will explore further integration opportunities and areas for continuous improvement in cooperation with stakeholders and broaden its analytics offerings. The expected progress is presented in the performance measure below (see table 25A.3).

<sup>3</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect. 29A)).

Table 25A.3  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Reporting capabilities are available to all users	Reporting capabilities and dashboards are available to selected entities	Results-driven resource planning, implementation and monitoring modules supported by richer data analytics are available for timely decision-making by programme managers	Dashboards/ analytics capabilities are available to all users, including Member States	End users, including programme managers, interact with data through self-service analytics and are provided with the ability to rapidly develop reports with real-time access to their data, empowering timely, informed decision-making

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: advanced analytics for staff and Member States

#### Proposed programme plan for 2022

25A.37 Transitioning to a mainstreaming phase in providing solutions to business needs, the component provided its techno-functional expertise for the ongoing maintenance of and upgrades and continuous improvements to the Umoja system, which has been fully deployed since the end of 2020. The component also provided enhanced analytics capability to staff and senior management as well as to Member States that have transitioned to cloud-based advanced enterprise-wide analytics.

#### *Lessons learned and planned change*

25A.38 The lesson for the component was that early, extensive and sustained business engagement is critical for improving adoption and ensuring future ownership of the solution by the business. Extended business teams are one way to assist in this regard through requirement-gathering, solution design, the development of training content and hypercare. In applying the lesson, the component will work with its stakeholders and through its new governance mechanism, outlined in the twelfth and final progress report of the Secretary-General on the enterprise resource planning project ([A/75/386](#)), and in partnership with the Department of Operational Support, to continue to ensure that these lessons obtained through the extended business teams are applied going forward. In 2021, the implementation of the SAP Analytics Cloud will begin to enable the deployment of the advanced analytics capability and the digital boardroom. For 2022, the deployment of self-service analytics for the entire Secretariat is envisioned, encompassing augmented and predictive analytics that include machine learning and natural language processing. The component plans to deliver additional value to the Organization through the deliverables outlined above, leveraging current trends and future product road maps in enterprise resource planning.

*Expected progress towards the attainment of the objective, and performance measure*

25A.39 This work is expected to contribute to the objective, as demonstrated by Member States having access to a robust suite of dashboards and analytic capabilities providing a broad range of data models and customized visualization for human resources and uniformed capabilities management, among other areas (see table 25A.4).

Table 25A.4  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)</i>	<i>2022 (planned)</i>
All entities to which Umoja was deployed benefited from Umoja Foundation, Umoja Extension 1 and the uniformed capabilities management and implementing partner/grantor programme management functionalities from Umoja Extension 2	Umoja Extension 2 functionalities deployed and stabilized and Umoja, as a reform enabler, adapted to the evolving needs of the reform pillars, and the new delegation of authority framework enabled	Increased access to data for managers and Member States in alignment with the Secretary-General's data strategy, along with deployed Umoja Extension 2 functionality	Programme managers take better-informed decisions on human resources and uniformed capabilities management	Member States access a robust suite of dashboards and analytic capabilities providing a broad range of data models and customized visualization for human resources and uniformed capabilities management, among other areas

### Legislative mandates

25A.40 The list below provides all mandates entrusted to the component.

#### *General Assembly resolutions*

<a href="#">60/260</a>	Investing in the United Nations for a stronger Organization worldwide	<a href="#">63/262</a>	Information and communications technology, enterprise resource planning, and security, disaster recovery and business continuity
<a href="#">60/283</a>	Investing in the United Nations for a stronger Organization worldwide: detailed report	<a href="#">75/253 A</a>	Special subjects relating to the proposed programme budget for 2021

### Deliverables

25A.41 Table 25A.5 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 25A.5

**Subprogramme 1, component 1: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>1</b>	<b>1</b>	–	–
1. Progress report on the enterprise resource planning project	1	1	–	–
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>3</b>	<b>3</b>	–	–
2. Meetings of the Fifth Committee of the General Assembly	2	2	–	–
3. Hearings of the Advisory Committee on Administrative and Budgetary Questions	1	1	–	–
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> discussions with client groups, through the governance mechanisms and informally, on the sustainability of and continuous improvements to the system to meet their business needs.				
<b>D. Communication deliverables</b>				
<b>Digital platforms and multimedia content:</b> updating and maintenance of the Umoja/Enterprise Resource Planning Solution Division website and social media accounts.				
<b>E. Enabling deliverables</b>				
<b>Information and communications technology:</b> continuous improvements to the Umoja system; and service desk tier 3 support.				

## **Component 2**

### **Services to the Fifth Committee of the General Assembly and to the Committee for Programme and Coordination**

#### **Objective**

25A.42 The objective, to which this component contributes, is to facilitate effective and efficient deliberations and decision-making by the Fifth Committee of the General Assembly and the Committee for Programme and Coordination.

#### **Strategy**

25A.43 To contribute to the objective, the component will continue to improve communication on organizational and procedural aspects of meetings and enhance substantive, technical and secretariat support to the Member States and other participants in the meetings.

25A.44 The above-mentioned work is expected to result in the smooth conduct of meetings of the intergovernmental bodies serviced.

#### **Programme performance in 2020**

25A.45 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

#### **Continued deliberations through online platforms**

25A.46 The COVID-19 pandemic disrupted the modalities for formal meetings and informal consultations in the Fifth Committee and in the Committee for Programme

and Coordination. In-person formal meetings and informal consultations were significantly curtailed, and the vast majority of those intergovernmental meetings were replaced by online informal consultations in order to ensure business continuity and facilitate the deliberations and decision-making of the Committees. Procedural formal meetings were mostly cancelled and replaced by the electronic sharing of introductory statements proceeding directly to remote informal consultations on online platforms, with no in-person general discussions. The component explored different online platforms to accommodate the meetings of the Committees. After careful consideration of the technical capabilities of the various options and the respective requirements of the Committees and after consultations with Member States, the two Committees decided to use different platforms for their respective sessions. However, remote meetings were held without interpretation owing to constraints and limitations related to the availability of remote simultaneous interpretation.

25A.47 Working remotely posed extra challenges to the component in ensuring the timely dissemination of information, engagement and consultation with all delegations and required additional efforts by the component, inter alia, using online live updates to draft resolutions during meetings and undertaking silence procedures for adoption by consensus of resolutions and decisions. The component supported the decision of the membership to temporarily adapt its working practices to the new meeting modalities as an exceptional measure, adopted in response to the pandemic, which would not set a precedent.

*Progress towards the attainment of the objective, and performance measure*

25A.48 The above-mentioned work contributed to the objective, as demonstrated by the increased number of meetings held by means of videoconference in 2020 (see figure 25A.II).

Figure 25A.II

**Performance measure: videoconference usage by the Fifth Committee of the General Assembly and the Committee for Programme and Coordination**

(Number of meetings by videoconference)

**Impact of COVID-19 on component delivery**

25A.49 In response to the COVID-19 pandemic, during 2020, the component changed its approach to the conduct of meetings of the Fifth Committee and the Committee for Programme and Coordination. The component expeditiously shifted the focus of its work from planning and organizing in-person meetings, which were no longer feasible, to online meetings. In line with General Assembly decisions

74/544, 74/555, 74/558 and 74/561 on the procedure for taking decisions of the General Assembly during the COVID-19 pandemic, the component supported the Committees in adapting their working methods to conclude their work and ensured that the 72-hour silence procedure established for taking decisions was observed.

## **Planned results for 2022**

25A.50 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: increased awareness of sources of information available for delegates<sup>4</sup>**

#### **Programme performance in 2020**

25A.51 The component, as a result of the COVID-19 pandemic, adapted business processes to the evolving working environment and the significantly increased reliance on the e-deleGATE portal to provide information to Member States related to the work of the Fifth Committee and the Committee for Programme and Coordination. The portal became a key destination site where the component made all relevant information and documentation, including draft resolutions and supplementary information (previously also circulated in hard copy during meetings), available to Member States. Links to other sites that were not previously available on the portal were also added for ease of accessibility to documentation and information relevant to the work of the Committees. The component used the front page of “Fifth Committee Place” and “CPC Place” in e-deleGATE to draw the attention of delegates to links and login information to access virtual meetings, related witness lists and information on key health and safety measures in place for the limited physical meetings of the Fifth Committee and related links to COVID-19 contact-tracing forms. In order to facilitate delegates’ participation in virtual meetings, the component created several guides on practical aspects of how to participate in online meetings and the meeting functionalities and technical requirements of the platform. In addition, the component worked with Bureau representatives on providing “tips for facilitators” and “basics for new delegates”, and created a document, in collaboration with component 3 of subprogramme 2, detailing the working practices and interpretation of language submissions for General Assembly budget resolutions.

25A.52 In compliance with General Assembly decisions 74/544, 74/555, 74/558 and 74/561 related to decision-making through silence procedure, the component engaged with all stakeholders, including the Office of the President of the General Assembly and Secretariat officials, to ensure that the Committees would be able to adopt their resolutions, decisions and reports. In 2020, the component processed 25 of 44 resolutions and five decisions of the Fifth Committee and 30 reports of the Committee for Programme and Coordination, which were all adopted by silence procedure. The subprogramme also conducted a survey to assess the satisfaction of delegates of the Committees with the overall services provided by the Secretariat.

25A.53 The above-mentioned work contributed to positive survey results, with 97.9 per cent of respondents in the Fifth Committee and 97.3 per cent of respondents in the Committee for Programme and Coordination indicating that they were either “very satisfied” or “satisfied” with the overall services of the secretariat of the

<sup>4</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 29A)).

Committees, which met the planned target reflected in the proposed programme budget for 2020.

### Proposed programme plan for 2022

25A.54 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will increase efforts to leverage the technical capabilities of available tools, including the e-deleGATE platform, to improve communication with Member States on the availability of preparatory and background materials prepared by the secretariats of the Committees. The expected progress is presented in the performance measure below (see table 25A.6).

Table 25A.6  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Positive survey results	Positive survey results	Positive survey results on the overall services of the secretariat of the Committees	Maintained and/or improved positive survey results	Maintained and/or improved positive survey results
<ul style="list-style-type: none"> <li>• Fifth Committee of the General Assembly: 98.3 per cent</li> <li>• Committee for Programme and Coordination: 97.5 per cent</li> </ul>	<ul style="list-style-type: none"> <li>• Fifth Committee of the General Assembly: 95.7 per cent</li> <li>• Committee for Programme and Coordination: 97.3 per cent</li> </ul>	<ul style="list-style-type: none"> <li>• Fifth Committee of the General Assembly: 97.9 per cent</li> <li>• Committee for Programme and Coordination: 97.3 per cent</li> </ul>		

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 2: increased awareness of sources of information available for delegates<sup>5</sup>

#### Programme performance in 2020

25A.55 The component continued its work to provide advice on historical and procedural information to the Bureau members and coordinators of the Committees on an ongoing basis, not only during the sessions but also during off-session periods. One-on-one meetings between a member of the secretariat of the Fifth Committee or the Committee for Programme and Coordination with each of the 57 coordinators of the different agenda items in the Committees took place prior to and throughout the course of the sessions. That support for coordinators was critical to ensure that they were aware of the working practices of the Committees and had access to all relevant information on the e-deleGATE platform and on the public websites of the Committees that would guide their work in bringing the Committees to consensus agreements. In addition, the component responded to requests for advice from individual delegations that requested support throughout the year, reflecting in part the normal turnover of representatives within delegations.

<sup>5</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect. 29A)).

25A.56 The surveys conducted at the end of the seventy-fourth session of the Fifth Committee and the sixtieth session of the Committee for Programme and Coordination showed that the above-mentioned work contributed to positive results, with 97.9 per cent of Fifth Committee members and 97.3 per cent of members of the Committee for Programme and Coordination surveyed indicating they were either “very satisfied” or “satisfied” with the services provided, which met the planned target reflected in the proposed programme budget for 2021.

### Proposed programme plan for 2022

25A.57 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will increase efforts to leverage the technical capabilities of available tools, including the e-deleGATE platform, to further enhance the availability of organizational and procedural information. The expected progress is presented in the performance measure below (see table 25A.7).

Table 25A.7  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Positive survey results	Positive survey results	Positive survey results	Maintained or improved positive survey results	Maintained or improved positive survey results
<ul style="list-style-type: none"> <li>• Fifth Committee of the General Assembly: 98.3 per cent</li> <li>• Committee for Programme and Coordination: 97.5 per cent</li> </ul>	<ul style="list-style-type: none"> <li>• Fifth Committee of the General Assembly: 95.7 per cent</li> <li>• Committee for Programme and Coordination: 97.3 per cent</li> </ul>	<ul style="list-style-type: none"> <li>• Fifth Committee of the General Assembly: 97.9 per cent</li> <li>• Committee for Programme and Coordination: 97.3 per cent</li> </ul>		

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: improved information available to delegates

#### Proposed programme plan for 2022

25A.58 The Fifth Committee and the Committee for Programme and Coordination have a high volume of items that they must consider during the limited time available for the sessions. The regular turnover of individual delegates covering the Committees for their respective missions necessitates accessibility of information throughout the year. The component continuously improved and adapted information available to delegates, including for new committee members, to increase their awareness of the related sources of information and to leverage the tools available to them, such as the e-deleGATE portal and the websites of the Committees. The access to the tools offered by the component facilitates meaningful participation in the deliberations of the Committees and supports their decision-making, within their agreed working procedures and practices.

*Lessons learned and planned change*

25A.59 Building on preliminary observations and feedback, as well as the 2020 experience of remote meeting modalities, the lesson for the component was that it needed to increase emphasis on providing Member States with information that would facilitate their effective participation in the intergovernmental process prior to and during the sessions of the Committees. In applying the lesson, the component, as the secretariat of the Committees, plans to provide targeted support to new delegates as well as to coordinators of agenda items. While the component consistently engages directly with already identified coordinators through correspondence, discussions and in-person meetings (under normal circumstances), the component intends to focus on a more systematic approach to address this specific need, including through the preparation of procedural guidelines and by offering the option of holding a workshop at the beginning of each session.

*Expected progress towards the attainment of the objective, and performance measure*

25A.60 This work is expected to contribute to the objective, as demonstrated by positive survey results on the availability of organizational and procedural information (see table 25A.8).

Table 25A.8  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
Positive survey results on the availability of organizational and procedural information	Positive survey results on the availability of organizational and procedural information	Positive survey results on the availability of organizational and procedural information	Maintained positive survey results on the availability of organizational and procedural information	Maintained positive survey results on the availability of organizational and procedural information
<ul style="list-style-type: none"> <li>• Fifth Committee of the General Assembly: 97.1 per cent</li> <li>• Committee for Programme and Coordination: 92.6 per cent</li> </ul>	<ul style="list-style-type: none"> <li>• Fifth Committee of the General Assembly: 94.6 per cent</li> <li>• Committee for Programme and Coordination: 100 per cent</li> </ul>	<ul style="list-style-type: none"> <li>• Fifth Committee of the General Assembly: 100 per cent</li> <li>• Committee for Programme and Coordination: 100 per cent</li> </ul>		

**Legislative mandates**

<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> advice to 10 Bureau members; consultation and advice to 57 coordinators; and response to queries from and provision of advice to individual delegations on historical proceedings of the Committees.				
<b>D. Communication deliverables</b>				
Digital platforms and multimedia content: update and maintenance of the websites of the Fifth Committee of the General Assembly and the Committee for Programme and Coordination; and update of information on e-deleGATE.				

## Component 3 Management advisory services

### Objective

25A.63 The objective, to which this component contributes, is to advance transparency of administrative decision-making, fairness, integrity and the resilience of the Organization to deliver on its mandates.

## Strategy

25A.64 To contribute to the objective, the component will strengthen the Organization's resilience, including its preparedness to maintain business continuity in emergencies, by guiding, monitoring and adjusting the post-COVID-19 ways of working at United Nations Headquarters to continually adapt to changing environments, risks and opportunities. For example, the component will monitor the use of hybrid working patterns and behaviours and advise whether additional support, guidance and/or training is required or whether policies need to be adjusted.

25A.65 The component will continue to improve the overall quality of the acquisition process and reflect those improvements in substantive policy and guidance-related recommendations, including through the use of data analytics. In addition, the component will continue to objectively analyse the facts presented in requests for a management evaluation vis-à-vis the legal framework of the Staff Regulations and Rules of the United Nations and provide the requesting staff member with a reasoned, comprehensive evaluation conveying the basis for the recommendation of the Management Evaluation Unit on the case.

25A.66 The above-mentioned work is expected to result in:

- (a) A more resilient, agile and sustainable Organization and an innovative and thriving workforce that delivers results;
- (b) An Organization better prepared for complex and long-term emergencies;
- (c) A strengthened acquisition and asset disposal process;
- (d) The early resolution of disputes that arise from decisions taken in the Administration on a staff member's employment;
- (e) Greater staff awareness of the internal justice system.

## Programme performance in 2020

25A.67 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Business continuity during the COVID-19 pandemic

25A.68 The Secretariat at United Nations Headquarters has conducted formal business continuity planning for a little over a decade. These plans were specific to potential disruptive events in New York and were geared towards emergencies lasting days or weeks. With the arrival of COVID-19 in early 2020, however, the component had to rapidly expand the scope of its support for business continuity planning to advise the entire Secretariat on the preparation for and response to a global pandemic of a prolonged duration.

25A.69 In February 2020, Secretariat entities worldwide were instructed to prepare for a significant increase in the number of personnel working remotely and to update their business continuity plans accordingly and submit them to the component. Staff were advised to store documents on cloud-based platforms, such as SharePoint, if they had not already done so, to ensure remote accessibility. Guides to telecommuting were issued, and tutorials on leading and participating in virtual meetings were offered.

25A.70 The two emergency management bodies at United Nations Headquarters, the Crisis Operations Group and the Senior Emergency Policy Team, began meeting much more frequently to assess the pandemic situation and to coordinate and monitor the

business continuity response. Between February 2020 and February 2021, the component participated in 38 meetings of the Crisis Operations Group and organized 14 meetings of the Senior Emergency Policy Team.

25A.71 The component also led biweekly virtual meetings of the business continuity focal points at United Nations Headquarters and global meetings to provide updates on the COVID-19 situation and to coordinate the sharing of successful business continuity and resilience practices across entities, identify opportunities for collaboration and foster more agile adaptation to the unavoidably emerging working environments. The component also advised entities on improving their business continuity plans.

*Progress towards the attainment of the objective, and performance measure*

25A.72 The above-mentioned work contributed to the objective, as demonstrated by 100 per cent of essential and time-critical business services being supported by business continuity plans (see figure 25A.III).

Figure 25A.III

**Performance measure: percentage of essential and time-critical business services supported by business continuity plans**

**Impact of COVID-19 on component delivery**

25A.73 Owing to the impact of COVID-19 during 2020, the component encountered challenges in carrying out its planned outreach activities, although it was able to advance such activities to some degree by means of a virtual format. Training initiatives and consultations that otherwise would have been conducted in person were redesigned for remote delivery, with adjustments during the year to also apply lessons learned.

25A.74 At the same time, however, the component identified additional activities to support its clients on issues emerging during the COVID-19 pandemic, within the overall scope of its objectives, namely expanding the scope of its support from entities at United Nations Headquarters to Secretariat entities globally while also providing more frequent and enhanced support to the two emergency management bodies in New York, the Crisis Operations Group and the Senior Emergency Policy Team. The component also implemented a structured COVID-19 communications mechanism, in coordination with other departments, to catalogue and publish the new and changed policy and guidance documents and communicate them to multiple groups of stakeholders, including staff, Member States and United Nations system organizations. The new deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

## **Planned results for 2022**

25A.75 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: new end-to-end case management system for strategic policy recommendations in the area of procurement<sup>6</sup>**

#### **Programme performance in 2020**

25A.76 The component worked with the Office of Information and Communications Technology to enhance the design of the new end-to-end case management system for strategic policy recommendations in the area of procurement, to ensure that it reflected the new delegation of authority framework and that it was compliant with current information and communications technology standards.

25A.77 The component also simplified and standardized the automated formats through the case management system to ensure consistency of the business process with the delegation of authority framework among 35 entities that will be using the new system.

25A.78 Furthermore, using remote instructor lead techniques implemented during the pandemic, the component commenced training for over 450 users, including administrators for each entity. The objective of the training was to familiarize the users with the new system and allow for seamless transition from the legacy system to the new one.

25A.79 The above-mentioned work contributed to the improvement in the overall quality of the acquisition process by formalizing the feedback of the Headquarters Committee on Contracts qualitative review of procurement actions and its substantive policy and guidance-related recommendations for relevant stakeholders in the Department of Management Strategy, Policy and Compliance and the Department of Operational Support, which met the planned target reflected in the proposed programme budget for 2020.

#### **Proposed programme plan for 2022**

25A.80 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will use a continuous improvement approach, designing enhanced dashboards to provide clear visual data and enable authorized officials to identify and target weaknesses in the acquisition process and address them accordingly. It will also train users in the application of the enhanced dashboards to improve compliance. The expected progress is presented in the performance measure below (see table 25A.10).

---

<sup>6</sup> As reflected in the proposed programme budget for 2020 ([A/74/6 \(Sect. 29A\)](#)).

Table 25A.10  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Absence of a structured process for strategic policy changes based on Headquarters Committee on Contracts recommendations among Secretariat entities, including the field	Establishment of a more robust, structured process for evidence-based strategic policy changes, based on Headquarters Committee on Contracts recommendations among Secretariat entities, including the field	Improved quality of the acquisition process by formalizing the feedback of the Headquarters Committee on Contracts qualitative review of procurement actions and its substantive policy and guidance-related recommendations for relevant stakeholders in the Department of Management Strategy, Policy and Compliance and the Department of Operational Support	New policy which, having been informed by data from the end-to-end case management system, strengthens the procurement and disposal of assets of the Organization	<ul style="list-style-type: none"> <li>• Improved monitoring capabilities of end-to-end case management system through dashboards and additional reporting capabilities</li> <li>• Increased number of entities that refocus their resources and streamline all facets of their acquisition process</li> </ul>

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: improved access to internal justice recourse<sup>7</sup>

### Programme performance in 2020

25A.81 The component was able to make progress in the area of improving access by staff to the internal justice system, holding virtual meetings with four staff unions and staff at large in the Department of Safety and Security to exchange views on issues of concern to staff with regard to the internal system of justice. The component used these opportunities to gauge the common questions of staff regarding management evaluation for the purpose of updating the frequently asked questions set out on the Management Evaluation Unit webpage.

25A.82 The above-mentioned work contributed to the early resolution of staff-related disputes and the prevention of unnecessary litigation through staff awareness of the internal system of justice, which met the target reflected in the proposed programme budget for 2021.

### Proposed programme plan for 2022

25A.83 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the

<sup>7</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect. 29A)).

component will continue to carry out outreach briefings for managers and administrative decision makers on lessons learned in the internal system of justice, conduct meetings with staff unions and develop iSeek resources devoted to management evaluation by including more detailed frequently asked questions based on typical questions from staff during outreach activities. The component will provide participants in the outreach activities with the opportunity to provide feedback. The expected progress is presented in the performance measure below (see table 25A.11).

Table 25A.11  
Performance measure

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Limited knowledge of the internal system of justice and the role of the Management Evaluation Unit among staff members, especially those serving at more remote duty stations	Limited knowledge of the internal system of justice and the role of the Management Evaluation Unit among staff members, especially those serving at more remote duty stations	The early resolution of staff-related disputes and prevention of unnecessary litigation through staff awareness of the internal system of justice	Positive feedback from field office staff on the understanding of issues in the internal system of justice	Increased understanding by staff of management evaluation issues in the internal system of justice

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: post-COVID-19 next normal: build back better

#### Proposed programme plan for 2022

25A.84 The COVID-19 pandemic has demonstrated the importance of not simply striving for business continuity alone, but for strengthening the overall resilience and sustainability of the Organization. The Organization's initial response to the pandemic emphasized the importance of supporting managers and staff as they adapted to new ways of working, as well as ensuring that measures were immediately taken to make documentation and records available electronically to enable effective remote working modalities. In March 2020, the Organization rapidly adapted policies to the modified reality resulting from the pandemic and communicated them globally. More than 50 policies and guidance documents were issued, catalogued and communicated.

25A.85 Co-led by the Department of Management Strategy, Policy and Compliance and the Department of Operational Support, the overall coordination of this work led to the inception of the "next normal" project to plan for the post-COVID-19 working environment. The component actively involved over 90 staff from Secretariat entities and agencies, funds and programmes of the United Nations system based in New York, to identify guiding principles and lessons learned during the pandemic to design the first version of a "next normal" framework at the Secretariat. The component has also liaised with other entities, such as offices away from Headquarters, regional commissions and the peacekeeping and special political missions, to include their views in the project.

*Lessons learned and planned change*

25A.86 The lesson for the component was that the nature of the United Nations mandate requires in-person presence to render maximum results. At the same time, it has been proven that some functions can be conducted effectively and efficiently while working remotely or in a hybrid fashion that combines on-site and remote work. The Organization has learned to hold meetings remotely, as well as training and workshops. In applying the lesson, the component will work on the “next normal” framework, which involves 14 workstreams on topics ranging from work modalities to occupational safety and health to organizational culture and learning. The component will develop a first iteration of the framework that can be implemented as soon as health conditions allow and that will be fine-tuned over the coming years as the United Nations adjusts to and learns from the new working conditions and responds to unforeseen challenges and opportunities. The guiding principles of the framework will be socialized widely and actively implemented and mainstreamed into Secretariat policies, practices and operations. In 2022 and beyond, the component will guide, monitor and adjust as necessary the implementation of the “next normal” at United Nations Headquarters by applying lessons learned as well as principles of sustainability and resilience. It will also ensure close alignment with the “future of work” initiative led by the CEB High-Level Committee on Management.

*Expected progress towards the attainment of the objective, and performance measure*

25A.87 This work is expected to contribute to the objective, as demonstrated by the percentage of recommendations of the “next normal” framework implemented for United Nations Headquarters (see table 25A.12).

Table 25A.12  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
—	—	United Nations Headquarters transitions to business continuity mode as a result of COVID-19	Secretary-General considers proposal for post-COVID-19 “next normal” framework for United Nations Headquarters	Percentage of recommendations of the “next normal” framework implemented for United Nations Headquarters

**Legislative mandates**

25A.88 The list below provides all mandates entrusted to the component.

*General Assembly resolutions*

<b>Administration:</b> administration of and support for the new case management system; training and guidance for members of the 34 local committees on contracts and 43 local property survey boards; advice on procurement and property policy documents; administration and maintenance of online learning tools for local committees on contracts and local property survey boards, and provision of related training and guidance.				
<b>Internal justice and oversight:</b> recommendations on requests for management evaluation of contested administrative decisions; recommendations on requests for suspension of action submitted to the Secretary-General in cases involving separation from service of staff members; substantive and technical servicing of the Headquarters Committee on Contracts and the provision of recommendations on proposed procurement awards to heads of entities; substantive and technical servicing of the Headquarters Property Survey Board; reports on the functioning of the local committees on contracts and local property survey boards and procurement functions in entities; annual reporting to the United Nations Environment Programme on Secretariat-wide environmental sustainability performance.				

## Subprogramme 2

### Programme planning, finance and budget

## Component 1

### Finance

### Objective

25A.90 The objective, to which this component contributes, is to secure the financing of the Organization's expenses, pursuant to Article 17 of the Charter of the United Nations, and to ensure sound, effective and efficient integrated financial management of and reporting on United Nations resources, supported by a strong internal control environment.

### Strategy

25A.91 To contribute to the objective, the component will continue to ensure the proper application of the Financial Regulations and Rules of the United Nations, will adapt policies and procedures relating to financial matters in response to emerging issues and will continue to strengthen the system of internal controls in support of the prudent management of resources in the context of the decentralized delegation of authority framework.

25A.92 The component will provide effective support to the Committee on Contributions, will ensure the timely issuance of assessments and will continue its

increased focus on providing up-to-date information on the status of assessed contributions. The component will continue to closely monitor and forecast the collection of assessments and manage cash outflows based on liquidity forecasts.

25A.93 The component will prepare International Public Sector Accounting Standards (IPSAS)-compliant financial statements for the Organization and will focus on increased transparency with an improved financial discussion and analysis statement, as recommended by the IPSAS Board. Additionally, the component will provide support for the establishment, management and reporting of the extrabudgetary funds of the Organization. The component will continue to manage financial risks through sound investment management, global cash management and global banking management.

25A.94 The component will continue to coordinate and manage the group health and life insurance programmes and the property and liability insurance activities of the Organization and provide services to the Advisory Board on Compensation Claims and the United Nations Claims Board, and to administer the related compensation payments. The component will ensure the accurate and timely disbursement of salaries and related allowances and benefits to United Nations staff and other personnel, disbursements to vendors and other contractors, and other disbursements in respect of the financial obligations of the Organization. Furthermore, the component will provide governance of master data to ensure the integrity, standardization and harmonization of data across the enterprise resource planning system and the other enterprise systems of the Organization.

25A.95 The component plans to support the global Secretariat on issues emanating from the COVID-19 pandemic by continuing to strengthen the Organization's global banking and payments system to better support operations at the country level and to strengthen business continuity and organizational resilience. New tools and platforms for managerial information will be implemented and updated to allow for more efficient accessibility, analysis, dissemination and transparency of data, which are key in the post-COVID-19 virtual work environment.

25A.96 At the system-wide level, the component will lead on the strengthening of the underlying financial arrangements related to mechanisms, such as medical evacuation, that were part of the immediate response to the COVID-19 pandemic at the United Nations system-wide level. The component will continue to drive the use of online health consultations, including for mental health purposes, contributing to improved well-being of staff, as well as cost containment relating to health insurance costs.

25A.97 The above-mentioned work is expected to result in:

- (a) Prudent financial management of the resources entrusted to the Secretariat;
- (b) A strengthened system of internal controls that supports accurate reporting and reduced incidence of fraud;
- (c) Increased transparency of financial reporting;
- (d) Better positioning of the Organization to respond to external shocks.

## **Programme performance in 2020**

25A.98 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Strengthened staff health programmes in response to COVID-19

25A.99 With the onset of COVID-19 in 2020 and stay-at-home orders instituted globally across the Organization, the component introduced online health consultations to the more than 150,000 United Nations medical insurance plan participants, including around 50,000 locally recruited staff serving in field duty stations. Telehealth applications and webpages were introduced to all plan participants, enabling easy access to medical services. Plan participants turned to telemedicine to remain engaged with physicians at a time when in-person visits were more challenging or impossible to schedule. The audiovisual communication in real time allowed physicians and patients to connect while keeping them safe during the ongoing pandemic. In addition to providing easy and safe access to medical care, including mental health care, the online consultations helped to safeguard the sustainability of the United Nations medical plans by ensuring that plan participants and Member States paid less for care incurred through one of the telehealth solutions.

25A.100 At the United Nations system-wide level, as a response to the pandemic, the component provided support for the first line of defence and medevac mechanisms that contributed to the enhancement of local health capacities, with a specific focus on three areas: (a) strengthening national capacities; (b) strengthening United Nations clinics; and (c) upgrading International Organization for Migration health centres in places with no United Nations clinics and limited national capacities. These mechanisms also contributed to local COVID-19 testing and treatment of staff and other United Nations system personnel, and to the evacuation of ill staff to treatment hubs, as needed. The component led the negotiations among the 14 participating United Nations system entities of the financial agreements for a cost-sharing arrangement and ensured that the funding and payment mechanisms were in place to support both medevac and first line of defence.

#### *Progress towards the attainment of the objective, and performance measure*

25A.101 The above-mentioned work contributed to the objective, as demonstrated by a total of 39,395 telehealth consultations across all United Nations medical plans and access to online health-care consultations for all United Nations staff enrolled in the United Nations health insurance programme (see table 25A.14). Telehealth applications and webpages were introduced to all plan participants, enabling easy access to medical services at reduced rates.

Table 25A.14  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
<ul style="list-style-type: none"> <li>• A total of 125 telehealth consultations were held across all United Nations medical plans</li> <li>• No medevac or first line of defence mechanisms in place</li> </ul>	<ul style="list-style-type: none"> <li>• A total of 305 telehealth consultations were held across all United Nations medical plans</li> <li>• No medevac or first line of defence mechanisms in place</li> </ul>	<ul style="list-style-type: none"> <li>• A total of 39,395<sup>a</sup> telehealth consultations were held across all United Nations medical plans and all United Nations staff enrolled in the United Nations health insurance programme had access to online health-care consultations</li> <li>• Medevac and first line of defence mechanisms were in place with an agreed cost-sharing formula</li> </ul>

<sup>a</sup> Number includes teleconsultations outside online platforms.

## **Planned results for 2022**

25A.102 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: new internal controls framework supporting the enhanced delegation of authority framework<sup>8</sup>**

#### **Programme performance in 2020**

25A.103 The component continued its work related to the implementation of activities to support the statement of internal control and is on track for the issuance of the first statement for all operations of the Secretariat by mid-2021. The component finalized the documenting of the entity-level controls for the Secretariat as adapted to the integrated framework of the Committee of Sponsoring Organizations of the Treadway Commission, led discussions on the draft self-assessment questionnaire with the Internal Control Advisory Group and incorporated the feedback received from the Advisory Group. Furthermore, the component finalized the draft self-assessment questionnaire and implemented an electronic platform to support the completion of the questionnaire by each entity of the Secretariat.

25A.104 The process underpinning the statement of internal control goes well beyond the finance function. Owing to the change in the business model of the Organization, particularly the enhanced delegation of authority, the orientation has shifted from the reporting objective to support reliable IPSAS-compliant financial statements to fully adapting all three objectives of the Committee of Sponsoring Organizations of the Treadway Commission framework, relating to operations, reporting and compliance. The implementation of a full-scope internal control integrated framework contributes to the efforts to strengthen accountability for results, enable delegation of authority through detailed organizational unit- and activity-level controls and boost transparency by focusing on internal and external reporting. The efforts will contribute to an ongoing assessment of the internal control environment and promote a culture of self-evaluation to ensure the efficacy and the functioning of internal controls.

25A.105 The above-mentioned work contributed to 100 per cent timely submission of the completed questionnaire that documented self-attestation of compliance by entity heads, which met the planned target reflected in the proposed programme budget for 2020.

#### **Proposed programme plan for 2022**

25A.106 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will further standardize the statement of internal control framework documentation, including self-assessment letters and remediation plans. The expected progress is presented in the performance measure below (see figure 25A.IV).

<sup>8</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 29A)).

Figure 25A.IV

**Performance measure: timely and well-documented self-attestation of compliance submitted by entity heads**

(Percentage)

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: financial management systems integration for better decision-making<sup>9</sup>**

### **Programme performance in 2020**

25A.107 The component has made progress in its goal to provide accessible information to Member States and intergovernmental bodies and also to improve transparency and accountability. The component worked jointly with subprogramme 1, component 1, to introduce the new Member States' contributions portal in July 2020, which provided Member States with an improved experience, with new reports and graphical displays of financial information. By the end of 2020, 202 users were registered.

25A.108 Furthermore, the component leveraged the use of the Umoja platform to provide Member States and intergovernmental bodies with information to aid them in the decision-making process. The initiatives provided support to the management reform process.

25A.109 The above-mentioned work contributed to improved transparency and accountability as Member States and intergovernmental bodies had improved access to financial information, which met the planned target reflected in the proposed programme budget for 2021.

### **Proposed programme plan for 2022**

25A.110 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will further refine and enhance the contributions portal with additional reports and graphs. The component will also contribute to the roll-out of an interactive and user-friendly dashboard with data analytics capabilities. The dashboard will establish linkages between substantive information and financial data at multiple levels, depending on the reporting and management requirements of various stakeholders. Managers may use such a dashboard at a strategic level to articulate their programme delivery to Member States and other stakeholders, or at a granular level to help them better manage their day-to-day operations. Empowerment of managers to plan and manage programme delivery better will go hand-in-hand with enhanced delegation of authority and accountability for results, to support the Secretary-General's management reform. The expected progress is presented in the performance measure below (see table 25A.15).

<sup>9</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect. 29A)).

Table 25A.15  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
—	—	Improved transparency and accountability as Member States and intergovernmental bodies access financial information	Additional applications available on the integrated platform such as troop and police data; management dashboards to facilitate liquidity management	Improved information for management decision-making and external reporting resulting from the global roll-out of the integrated performance dashboard, combining substantive information and resource data, across all funding sources

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: enhanced transparency, comparability and usefulness of financial statements across the United Nations system**

#### **Proposed programme plan for 2022**

25A.111 The United Nations implemented IPSAS in 2014 to align the Organization with best practice accrual-based accounting and reporting and to improve the consistency and comparability of financial statements based on the requirements of IPSAS.

25A.112 In addition to the accounting standards, the IPSAS Board produces optional guidance material to further improve the information available to users of the financial statements. The Board's recommended practice guideline 2 provides guidance on preparing and presenting the financial statement discussion and analysis that accompanies the IPSAS-compliant financial statements. The purpose of the financial statement discussion and analysis is to support user understanding of the financial position, financial performance and cash flows presented in the financial statements. The financial statement discussion and analysis that complies with recommended practice guideline 2 further contributes to the objectives of transparency, accountability and usefulness for decision-making of IPSAS-compliant financial statements.

25A.113 The adoption by the United Nations of the IPSAS Board's recommended practice guideline 2 is part of a United Nations system-wide effort, coordinated by the Task Force on Accounting Standards of the Finance and Budget Network. Currently, the variations in the format and content of the financial discussion reports among United Nations system entities, especially on risks and uncertainties that have an impact on the financial situation of the entity, make the current financial discussion reports more challenging to compare and difficult for users to understand; the adoption of recommended practice guideline 2 across the United Nations system will go a long way to addressing comparability and usefulness.

25A.114 The component has started the preliminary actions towards the implementation of recommended practice guideline 2, by developing, as part of a working group of the Task Force on Accounting Standards, a comprehensive template to support a harmonized approach to implementation of the guideline.

25A.115 The proposed harmonized approach for the financial statement discussion and analysis that complies with recommended practice guideline 2 will be presented during the 2021 meeting of the Task Force on Accounting Standards.

*Lessons learned and planned change*

25A.116 The lesson for the component was that while the adoption of IPSAS has increased the Organization's compliance with best practice accounting and reporting, the IPSAS-compliant financial statements have much more information, both in terms of quantity and complexity, for users of the financial statements to digest; thus, the financial discussion report has become increasingly more important to users. The IPSAS Board's recommended practice guideline 2, while not mandatory for IPSAS compliance, allows for the unpacking of the information in the financial statements and presentation of the analysis in a structured manner that has benefits for transparency, usefulness and consistency across the IPSAS-compliant financial reporting of the United Nations system. In applying the lesson, the component will incorporate the IPSAS Board's recommended practice guidelines, in addition to IPSAS, as relevant, as an integral part of the framework that drives IPSAS-compliant reporting for the Secretariat. The component will lead the development of a unified format for the financial statement discussion and analysis across United Nations system entities. This unified format will include harmonized structure, content and terminology, and will capture the following information in the financial statement discussion and analysis: (a) a more in-depth overview of the operations of the United Nations and the environment in which it operates; (b) detailed information about the Organization's objectives and strategies; (c) a more structured analysis of the Organization's financial statements, including significant changes and trends in the Organization's financial position, financial performance and cash flows; and (d) a description of the entity's principal risks and uncertainties that affect its financial position, financial performance and cash flows. The implementation of recommended practice guideline 2 for the United Nations Secretariat will commence with the presentation of the 2021 financial statements. The component will track the progress of implementation across the United Nations system and confirm the benefits for comparability that recommended practice guideline 2 will bring.

*Expected progress towards the attainment of the objective, and performance measure*

25A.117 This work is expected to contribute to the objective, as demonstrated by the increased comparability and enhanced consistency of the financial statement discussion and analysis across United Nations system entities (see table 25A.16).

Table 25A.16  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
—	—	Decision by the Task Force on Accounting Standards to align the financial report with the IPSAS Board's recommended practice guideline 2	Adoption by the Task Force on Accounting Standards of a comprehensive, harmonized approach for the financial statement discussion and analysis that complies with recommended practice guideline 2	Increased comparability and enhanced consistency of the financial statement discussion and analysis across United Nations system entities

## Legislative mandates

25A.118 The list below provides all mandates entrusted to the component.

### General Assembly resolutions

60/283	Investing in the United Nations for a stronger Organization worldwide: detailed report	75/242	Financial reports and audited financial statements, and reports of the Board of Auditors
73/307	Improving the financial situation of the United Nations	75/252	Questions relating to the proposed programme budget for 2021
74/1	Scale of assessments for the apportionment of the expenses of the United Nations: requests under Article 19 of the Charter		

## Deliverables

25A.119 Table 25A.17 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 25A.17  
Subprogramme 2, component 1: deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>12</b>	<b>12</b>	<b>12</b>	<b>12</b>
1. Annual financial reports to the General Assembly	2	2	2	2
2. Reports on multi-year payment plans and the financial situation of the United Nations to the General Assembly	3	3	3	3
3. Financial statements on United Nations peacekeeping and non-peacekeeping operations to the General Assembly	7	7	7	7

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>22</b>	<b>22</b>	<b>22</b>	<b>22</b>
4. Meetings of the Fifth Committee of the General Assembly	18	18	18	18
5. Meetings of the Investment Committee	4	4	4	4
<b>Conference and secretariat services for meetings</b> (number of three-hour meetings)	<b>20</b>	<b>5</b>	<b>31</b>	<b>20</b>
6. Meetings of the Committee on Contributions	20	5	31	20
<b>B. Generation and transfer of knowledge</b>				
<b>Seminars, workshops, fellowships and training events</b> (number of days)	<b>–</b>	<b>9</b>	<b>–</b>	<b>24</b>
7. Medical insurance plan training events, information sessions and workshops	–	9	–	24
<b>Technical materials</b> (number of materials)	<b>777</b>	<b>777</b>	<b>776</b>	<b>776</b>
8. Monthly reports on the status of contributions	12	12	12	12
9. Documents on the assessment of the contributions of Member States to the United Nations	15	15	14	14
10. Donor financial reports	750	750	750	750

#### C. Substantive deliverables

**Consultation, advice and advocacy:** advice to approximately 40 donors on voluntary contribution financial agreements; ad hoc information on the scale of assessments, peacekeeping financing and the status of contributions.

#### E. Enabling deliverables

**Administration:** three technical documents relating to the statement of internal control; consultations with the Internal Control Advisory Group on the statement of internal control framework; advice to departments/offices on the application of the Financial Regulations and Rules of the United Nations, accounting and financial matters and related systems; advice on sustaining IPSAS compliance to the United Nations finance community in peacekeeping and non-peacekeeping missions; assessment calculations for contributions of Member States for the regular budget, peacekeeping operations and the international tribunals, and calculations for credits for peacekeeping operations; advocacy on internal controls; advice to Member States and United Nations offices on the management of extrabudgetary resources; development of accounting policies and associated corporate guidance, practices and procedures; five workshops on financial matters for chief finance officers and 68 chief administrative officers; update of Umoja finance process documents; servicing of the financial helpdesk for the Umoja enterprise resource planning system; processing of approximately 18,000 United Nations Development Programme service clearing accounts; provision of financial management support to the Development Coordination Office and the United Nations Office for Partnerships; building of International Aid Transparency Initiative and CEB reporting frameworks for reporting entities for consistent reporting to stakeholders; reporting of cases of fraud and presumptive fraud to the Board of Auditors twice a year; provision and management of life, health, property and liability insurance activities; administration of 275 bank accounts worldwide, including maintenance of bank account signatory panels; establishment of the banking arrangements; processing of payments for the house bank accounts managed by United Nations Headquarters; recording of incoming funds; assessment and support of 65 global cashiers and 15 regional cashiers; management of cash requirements in different currencies; update and maintenance of banking details of vendors, staff and Member States; management of pooled investments; establishment of monthly United Nations operational rates of exchange for 222 currencies; development and servicing of Umoja finance processes; update and maintenance of financial applications; update and maintenance of SWIFT and global payment data and Umoja master data; substantive support to departments on business analysis; review of 2,900 user access provisioning requests for finance roles in Umoja, ensuring delegation of authority is obtained for the roles; processing and execution of payments; negotiation and administration of insurance policies; processing of approximately 600 investment settlements; execution of approximately 3,800 foreign exchange transactions.

## Component 2

### Field operations finance

#### Objective

25A.120 The objective, to which this component contributes, is to ensure the effective and efficient deliberations by Member States on the results to which the field and other Secretariat entities contribute and on the resources required for the work of those entities in line with their mandates, and to ensure the effective and efficient management of resources.

## Strategy

25A.121 To contribute to the objective, the component will provide strategic guidance on budgeting and financial stewardship and develop policies, methodologies and tools in that regard. It will provide strategic guidance on financial management and financing issues, especially on cross-cutting initiatives affecting field operations, including guidance on formulating human resources requirements, corporate initiatives, financial strength and liquidity and strengthening of internal controls, and timely, high-quality, simplified and action-oriented responses to managers in the field. The component will also monitor the liquidity of individual special accounts and oversee cash-flow and operating reserves for field operations.

25A.122 The component will provide strategic guidance on global property management and real estate services, including oversight of major construction projects and long-term capital planning, as reflected in the strategic capital review. Furthermore, the component will provide expert advice and guidance on property management and review financial data for accurate recording and for compliance with IPSAS and the established property management performance framework for field and other Secretariat entities. The component will also ensure central supervision of projects, including by incorporating risk management principles and lessons learned to decision-making.

25A.123 The above-mentioned work is expected to result in client entities effectively and efficiently managing their resources within the levels approved through improved accuracy in forecasts and proposals.

## Programme performance in 2020

25A.124 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Improved services to special political missions to meet their resourcing needs

25A.125 In order to enhance its role, assumed in 2019, as the Headquarters entry point for all special political missions for their financing needs, the component took active measures in 2020 to further improve its service to 40 special political missions and to assist them in mitigating liquidity challenges through the provision of clear and timely guidance and by increasing the predictability of allotments.

25A.126 The component, throughout 2020, closely monitored the latest financial situation and ensured that missions were updated periodically, provided clear guidance and assistance to the missions in devising their spending plan and worked closely with missions to prioritize their expenses to cater to special circumstances. Furthermore, the component ensured that sufficient funding was reserved to cover staffing costs and non-discretionary costs at all times, and to safeguard the interests of the Organization and the safety and security of staff.

### *Progress towards the attainment of the objective, and performance measure*

25A.127 The above-mentioned work contributed to the objective, as demonstrated by the increased ability of special political missions to mitigate liquidity challenges and ensure funding for staffing costs, safety and security and non-discretionary costs through the effective prioritization of expenses (see table 25A.18).

Table 25A.18  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
Special political missions engage in the budget preparation and execution	Special political missions directly engage in all aspects of the budget preparation and execution	Increased ability of special political missions to mitigate liquidity challenges and ensure funding for staffing costs, safety and security and non-discretionary costs through the effective prioritization of expenses

### Impact of COVID-19 on component delivery

25A.128 Owing to the impact of COVID-19 during 2020, the planned surge to increase the technical knowledge of missions related to budget preparation and Umoja tools remained limited owing to the cancellation of trips to the field. These trips were also intended to increase the collaboration between Headquarters and missions during the budget proposal process and hence to improve the quality of the budgets and budget performance reports.

25A.129 At the same time, however, the component identified new activities to support its clients on issues emerging during the COVID-19 pandemic, within the overall scope of its objectives, namely organizing a series of online meetings with peacekeeping missions to support their budget preparation process by providing special strategic guidance on budgeting and financial stewardship during the pandemic. This included guidance on how to report on the impact of COVID-19 on mandate and budget implementation, and on how to articulate the changes in planning assumptions, strategies and expected results, and indicators of achievement and outputs based on the effects of COVID-19 and lessons learned. The component also provided special strategic guidance on the financial closure of accounts during COVID-19.

### Planned results for 2022

25A.130 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### Result 1: independent risk management for global United Nations capital construction projects<sup>10</sup>

#### Programme performance in 2020

25A.131 The component provided independent risk management services to entities implementing global capital construction projects. The component also provided project owners with an independent assessment of their projects related to budget performance. Furthermore, the component recommended risk mitigation measures.

25A.132 The above-mentioned work contributed to budget confidence levels of 43 per cent for the Economic Commission for Africa (ECA), 27 per cent for the United Nations Office at Nairobi, 20 per cent for the Economic and Social Commission for Asia and the Pacific (ESCAP) and 40 per cent for the Economic Commission for Latin

<sup>10</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 29A)).

America and the Caribbean (ECLAC), which did not meet the planned target of 90 per cent for ECA, 75 per cent for the United Nations Office at Nairobi, 60 per cent for ESCAP and 80 per cent for ECLAC reflected in the proposed programme budget for 2020. This was due primarily to the onset of the COVID-19 pandemic, which caused major delays in the implementation of the projects owing to travel and site access restrictions and disruptions to labour markets and supply chains.

### Proposed programme plan for 2022

25A.133 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective and in response to recent developments, the component's work will evolve to provide additional technical guidance and advice and continue to suggest risk mitigation measures for implementing entities, in order to enable the local project teams to eventually recover from the negative impacts of the COVID-19 pandemic on progress in 2020 and 2021; however, lingering effects are also expected to be experienced into 2022, hence the confidence levels are projected to be slightly lower in 2022 than initially forecasted 2021 levels. The expected progress is presented in the updated performance measure below (see figure 25A.V).

Figure 25A.V

**Performance measure: budget confidence levels for ongoing global United Nations construction projects, 2018–2022**

(Percentage)

*Abbreviations:* ECA, Economic Commission for Africa; ECLAC, Economic Commission for Latin America and the Caribbean; ESCAP, Economic and Social Commission for Asia and the Pacific; UNON, United Nations Office at Nairobi.

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: enhanced property management performance framework<sup>11</sup>

### Programme performance in 2020

25A.134 The component has provided property management performance monitoring services to global United Nations entities by establishing and promulgating a performance framework. The component, through the framework, also provided entities with tools for self-reporting and monitoring their own performance.

<sup>11</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect. 29A)).

Furthermore, the component, through the framework, ensured improved stewardship and accountability for property management and reporting.

25A.135 The above-mentioned work contributed to improved stewardship and accountability for property management and reporting through the successful extension of the framework to offices away from Headquarters, regional commissions and tribunals during the reporting period, which met the planned target of strategic guidance on property management performance monitoring and reporting extended to the offices away from Headquarters, regional commissions and tribunals; quarterly self-assessment and performance monitoring regime extended to all entities funded from the regular budget, reflected in the proposed programme budget for 2021.

### **Proposed programme plan for 2022**

25A.136 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will review and adjust the property management performance monitoring and reporting framework implemented in all Secretariat entities, taking into consideration the varying property management operational requirements and administrative structures of the entities. The expected progress is presented in the performance measure below (see table 25A.19).

Table 25A.19  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Performance management framework made operational in the special political missions	Business intelligence tools applied to enable self-service and reporting capability for end users in Umoja; quality assurance measures for the preparation of IPSAS financial reports extended to the offices away from Headquarters, regional commissions and tribunals	Improved stewardship and accountability for property management and reporting through the successful extension of the framework to offices away from Headquarters, regional commissions and tribunals during the reporting period	Property management performance monitoring and reporting mainstreamed in the standard business processes of all entities	More efficient use of assets through improved utilization of serialized equipment

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: enhanced data analysis to support resource management in special political missions**

#### **Proposed programme plan for 2022**

25A.137 The component works closely with special political missions to optimize their management of financial resources, by undertaking periodic monitoring of budget performance of the missions and frequent consultations and communications about the financial situation to support the individual missions' planning and execution of their expenditure plan.

*Lessons learned and planned change*

25A.138 The lesson for the component was that financial data and analytics, as well as monitoring and analysis of programmatic performance to support the prioritization of expenditures and missions' decision-making on their financial performance and mandate implementation, are often not readily available and require manual collection of information and ad hoc analysis. In applying the lesson and to achieve continued improvement, the component will enhance the support provided to special political missions in managing their financial resources by investing in training and developing staff capacity of the missions in data analysis, monitoring and reporting, as well as leveraging the new modules (on integrated planning, management and reporting) being made available through Umoja Extension 2.

*Expected progress towards the attainment of the objective, and performance measure*

25A.139 This work is expected to contribute to the objective, as demonstrated by the increased ability of special political missions to monitor and analyse their programmatic and financial performance (see table 25A.20).

Table 25A.20  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
Special political missions analyse their financial performance	Special political missions analyse their financial performance (especially with regard to the liquidity situation)	Special political missions analyse their financial performance (especially to articulate the impact of COVID-19 on mandate implementation)	All special political missions use new Umoja modules for monitoring and analysis of programmatic and financial performance	Increased ability of special political missions to monitor and analyse their programmatic and financial performance

**Legislative mandates**

25A.140 The list below provides all mandates entrusted to the component.

*General Assembly resolutions*

47/217	Establishment of a Peacekeeping Reserve Fund	61/256	Strengthening of the capacity of the Organization in peacekeeping operations
49/233 A	Administrative and budgetary aspects of the financing of the United Nations peacekeeping operations	61/279	Strengthening the capacity of the United Nations to manage and sustain peacekeeping operations
50/221 B	Support account for peacekeeping operations	70/286	Cross-cutting issues
55/231	Results-based budgeting	75/253 A	Special subjects relating to the proposed programme budget for 2021
59/296; 61/276	Administrative and budgetary aspects of the financing of the United Nations peacekeeping operations: cross-cutting issues		

## Deliverables

25A.141 Table 25A.21 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 25A.21

### Subprogramme 2, component 2: deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>46</b>	<b>50</b>	<b>43</b>	<b>41</b>
1. Reports to the General Assembly on the proposed budget and budget performance of United Nations peacekeeping operations	26	28	23	22

3. Reports to the General Assembly on the final disposition of assets and final performance of peacekeeping missions in liquidation	2	3	2	1
4. Reports to the General Assembly on the administrative and budgetary aspects of the financing of peacekeeping operations	7	7	7	7
5. Notes to the General Assembly on the administrative and budgetary aspects of the financing of peacekeeping operations	4	4	4	4
6. Reports to the General Assembly on estimates in respect of special political missions, good offices and other political initiatives authorized by the General Assembly and/or the Security Council	6	7	6	6
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>120</b>	<b>82</b>	<b>120</b>	<b>120</b>
7. Meetings of the Fifth Committee of the General Assembly	70	32	70	70
8. Meetings of the Advisory Committee on Administrative and Budgetary Questions	50	50	50	50
<b>B. Generation and transfer of knowledge</b>				
<b>Technical materials</b> (number of materials)	<b>5</b>	<b>–</b>	<b>5</b>	<b>5</b>
9. Statements to the Security Council and other reports on financial implications of activities other than field operations authorized by the Security Council in its resolutions	5	–	5	5
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> discussions with all Member States on financial matters with regard to field operations; specific consultations with all troop- and police-contributing countries on liabilities of missions; advice to substantive committees of the General Assembly on potential budgetary implications.				
<b>E. Enabling deliverables</b>				
<b>Administration:</b> expert advice and guidance on budgeting and financial stewardship for 53 active field operations, as well as two closing field operations; quarterly payments to troop- and police-contributing countries; formulation of resource requirements to support the assessment and planning for new, expanding, transitioning and liquidating field operations; publication of the Property Management Manual and its dissemination to all entities, including resident coordinator offices; strategic guidance on property management performance monitoring and reporting; supplemental instructions for preparation of IPSAS financial reports on property, plant and equipment; training on property management; expert advice and support on Umoja relating to property management; oversight and technical guidance on major capital projects, ongoing maintenance and alteration projects.				

### **Component 3**

#### **Programme planning and budgeting**

#### **Objective**

25A.142 The objective, to which this component contributes, is to ensure the effective and efficient deliberations by Member States on the results to which the Secretariat contributes, on the translation of mandates into workplans, on the resources required for the work of the Secretariat in line with its mandates and to ensure the effective and efficient management of resources.

#### **Strategy**

25A.143 To contribute to the objective, the component will continue to issue strategic guidance for the preparation of the programme budget and engage with Member States from the early stages of the budget preparation process. The component will also finalize and present to the legislative bodies the Secretary-General's annual programme budgets and the budget of the International Residual Mechanism for Criminal Tribunals, the budget performance reports, and other reports on budgetary matters, including statements of programme budget implications and revised programme budget proposals, in accordance with the Financial Regulations and Rules of the United Nations and the Regulations and Rules Governing Programme Planning, the Programme Aspects of the Budget, the Monitoring of Implementation and the Methods of Evaluation. The component will also provide substantive services on budgetary matters to the Fifth Committee of the General Assembly, the Committee for Programme and Coordination and the Advisory Committee on Administrative and Budgetary Questions. Furthermore, the component will provide online tools accessible to Member States in order to facilitate deliberations on budgetary matters.

25A.144 The component will provide strategic guidance on budgeting and financial stewardship, including on managing the spending authorities; develop policies, methodologies and tools in that regard; and provide advice on all budgetary matters.

25A.145 The component plans to support clients in the preparation of their annual programme budgets, including through virtual workshops and meetings on budgetary matters.

25A.146 The above-mentioned work is expected to result in:

- (a) Increased transparency and strengthened dialogue between the Secretariat and Member States;
- (b) The prudent use of resources, while maximizing programme delivery.

#### **Programme performance in 2020**

25A.147 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

#### **Real-time simulations by Member States for better deliberations**

25A.148 The component plays a central role in providing, at the request of Member States, budgetary estimates and financial implications based on various planning and costing scenarios provided by Member States during the budget deliberations. The

timeliness, accuracy and accessibility of the information are important factors in supporting Member States to make informed and time-sensitive decisions.

25A.149 At the end of 2020, the component invested additional time in the development of a robust cost-matrix file that captured the financial impact of potential decisions of Member States. Through the file, well-structured and comprehensive costing information was provided that included additional dimensions, such as the split between post and non-post resources and the link to recommendations from the Advisory Committee on Administrative and Budgetary Questions. The component, while populating the new file, also stepped up the practice of reaching out and consulting with Member States to ensure accuracy in the interpretation of the intent of the proponents, which reduced the risk of inaccurate costing. Once the file was fully populated and after validating the accuracy of its content, the component shared the new file with Member States and made available a new dynamic report format. The new report enabled Member States to independently run simulations of costing scenarios.

*Progress towards the attainment of the objective, and performance measure*

25A.150 The above-mentioned work contributed to the objective, as demonstrated by the improved access of Member States to the financial implications of potential decisions, allowing them to run costing scenarios independently and in real time, tailored to their specific needs (see table 25A.22).

Table 25A.22  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
Limited access to the financial implications of potential decisions of Member States, which can only request the Secretariat to provide the financial implications of costing scenarios tailored to their specific needs	Limited access to the financial implications of potential decisions of Member States, which can only request the Secretariat to provide the financial implications of costing scenarios tailored to their specific needs	Improved access of Member States to the financial implications of potential decisions, allowing them to run costing scenarios independently and in real time, tailored to their specific needs

## Planned results for 2022

25A.151 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: results.un.org – holding the Secretariat accountable for its work and deepening the understanding of its contribution to results<sup>12</sup>**

#### **Programme performance in 2020**

25A.152 At the end of 2020, the component launched the results.un.org portal, which provides easy access to the hundreds of results contained in the programme budget for 2021. Available in the six official languages, the interactive portal shows the breadth of the work of the United Nations, for example, how the United Nations is helping to reduce inequality, achieve sustainable development, advance adherence to human rights

<sup>12</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 29A)).

obligations and the rule of law, achieve safer and more peaceful societies and ensure greater access to humanitarian assistance and protection for refugees, while advancing international law.

25A.153 During 2020, the component worked with various Secretariat departments, including the Department for General Assembly and Conference Management and the Office of Information and Communications Technology, to analyse and categorize the diverse results and devise a simple information architecture that enables users to easily access their areas of interest. For example, the information architecture allows the user to filter by specific themes, such as Governments, indigenous peoples, persons with disabilities, women, youth and other minorities and vulnerable groups. In the prototyping phase, the component conducted user research to inform the portal features and supported the design of wireframes and mock-ups of the website. Throughout the construction and pilot launch, the component tested features and refined the categorization and filtering of information for simplicity and enhanced usability. As a result of the testing, users can now filter results by entity, geographic location and category of result, and can use intelligent search capability, providing a seamless and effective way to access the large diversity of results.

25A.154 The above-mentioned work contributed to positive feedback provided by Member States during the demonstration of the new results.un.org portal and recognition by Member States of the involvement of programme managers in the programme planning and budget process, which met the planned target reflected in the proposed programme budget for 2020.

#### **Proposed programme plan for 2022**

25A.155 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will engage further with Member States to identify areas of potential interest and add dimensions in those areas in future enhancements of the portal. The component will also liaise with the Department of Global Communications to explore opportunities to further disseminate the information through other means. The expected progress is presented in the performance measure below (see table 25A.23).

**Table 25A.23**  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Feedback on parliamentary documentation and budget process	Feedback on parliamentary documentation and budget process	Positive feedback from Member States on results.un.org, and recognition by Member States of the involvement of programme managers in the programme planning and budget process	Member States benefit from easier access to richer programmatic information	Member States have enhanced access to higher number of results narratives and can more easily find information by filtering results by additional dimensions, such as type of country (e.g., least developed countries) and priorities of the Organization

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: enhanced accessibility of budgetary information through use of an information portal<sup>13</sup>

### Programme performance in 2020

25A.156 The component developed, with the assistance of the Umoja team, a financial dashboard providing real-time budgetary information. The dashboard provides Member States with access to enriched and real-time budgetary information that can be tailored to their individual needs. Furthermore, the information has been provided on a more granular level than in the past. For instance, in addition to the overall provisions for travel, Member States will now have access to the itineraries and assumptions underpinning the estimates.

25A.157 The above-mentioned work contributed to meaningful, timely and easy-to-understand budgetary information for Member States through the financial dashboard, which met the planned target of understanding by Member States of budget proposals through reports of the Secretary-General, supplementary information and responses to written questions; views expressed by Member States on the format and structure of information to be sought through the new portal, reflected in the proposed programme budget for 2021.

### Proposed programme plan for 2022

25A.158 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will further enrich and broaden the scope, granularity and usability of the information provided on the basis of the requirements of and feedback from Member States. The expected progress is presented in the performance measure below (see table 25A.24).

Table 25A.24  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Understanding by Member States of budget proposals through reports of the Secretary-General, supplementary information and responses to written questions	Understanding by Member States of budget proposals through reports of the Secretary-General, supplementary information and responses to written questions	Access by Member States to meaningful, timely and easy-to-understand budgetary information through the financial dashboard	Understanding by Member States of budget proposals through reports, supplementary information, responses to written questions and instantaneously through the new dashboard; formal feedback from Member States indicating that the instantaneously available information facilitated the intergovernmental process	Real-time access, through the financial portal, to at least five information elements, including monthly expenditure, that would otherwise require written questions by the Advisory Committee on Administrative and Budgetary Questions and the Fifth Committee of the General Assembly

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

<sup>13</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect.29A)).

### **Result 3: improved budgeting in the United Nations through early and direct engagement with Member States**

#### **Proposed programme plan for 2022**

25A.159 In accordance with the Secretary-General's vision for a more responsive, accountable, results-oriented budgeting process, the component has been presenting annual budget proposals with more engagement from programme managers and Member States in the process. In that regard, the component has been organizing more than 20 workshops each year, engaging between 1,200 and 1,500 programme managers and supporting their formulation of the programmatic aspects of the budget proposals. In addition, the component added new workshops that support departments in the preparation of the post and non-post resource requirements of the budget proposals, which cover, among other aspects, the utilization of new functionalities of Umoja budget formulation systems that facilitate the preparation of budgets.

25A.160 Starting in early 2020, the component institutionalized the direct engagement with Member States in the budget preparation process. This early engagement with Member States, which takes place in February, provides an opportunity for the component to confirm its interpretation of the provisions contained in the resolutions of the General Assembly adopted at the end of the previous year.

25A.161 These adjustments were introduced by the component without prejudice to the sequential nature of the budgetary process, as programme plans continue to be formulated prior to the resource requirements portion of the budget. Despite the capacity challenges associated with the effort required to prepare the early engagement with Member States and the additional workshops, which now also cover the post and non-post resource requirements and the information systems utilized to prepare that portion of the budget, the component continues to prioritize these new initiatives in the budgetary process, as they are believed to enable the preparation of better budget reports and facilitate the deliberations by Member States. Additionally, the initiatives are closely aligned with some of the intended benefits of the budget reform, including the more results-oriented culture in the United Nations and increased transparency and accountability of the budget process within the Secretariat.

#### *Lessons learned and planned change*

25A.162 The lesson for the component was that the engagement with Member States provides invaluable insight and unique opportunities to enhance budgeting in the United Nations. It provides an opportunity not only to confirm the understanding of the guidance from the General Assembly, but also to introduce refinements to the information to be presented in future budget proposals. In applying the lesson, the component will expand the scope of the early engagement with Member States to ensure a more comprehensive coverage of budgetary aspects. For example, in 2021, the component expanded the scope of the early engagement with Member States and also validated the translation of the provisions in Assembly resolution [75/252](#) to the budget proposals for 2022, sought feedback on the first financial performance report and explored further enhancements to the recosting presentation. This more extensive coverage went beyond the programmatic segment of the budget proposals, which was the focus of the early engagement in 2020. In 2022, the component will expand the scope further, and intends to promote a discussion on the experience of the Secretariat during the implementation of the annual budget.

*Expected progress towards the attainment of the objective, and performance measure*

25A.163 This work is expected to contribute to the objective, as demonstrated by the decision of Member States to confirm the change to an annual budget period and a budget submitted in an enhanced format, achieved as a result of the recommendations of Member States through various resolutions and through the early engagement (see table 25A.25).

Table 25A.25

**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
–	Decision by Member States to improve the budget presentation format for 2021 by reducing the use of photographs, incorporating the list of mandates and deliverables into the official published document, adding strategy at the subprogramme level, providing more years of performance measures and presenting consolidated financial information at the section level	Decision by Member States to improve the budget presentation format for 2022 by adding more results narratives, improving the structure and consistency of strategies and providing additional information on posts and positions, preliminary estimates for major construction projects and consolidated information on information and communications technology spending	Decision by Member States on no more than five improvements to the budget presentation and format for 2023	Decision by Member States to confirm the change to an annual budget period and a budget submitted in an enhanced format based on guidance by Member States

**Legislative mandates**

25A.164 The list below provides all mandates entrusted to the component.

*General Assembly resolutions*

2617 (XXIV)	Study of the nature of the increases in the level of expenditure in the United Nations regular budget	42/211	Implementation of General Assembly resolution 41/213
41/213; 60/254	Review of the efficiency of the administrative and financial functioning of the United Nations	55/231	Results-based budgeting
		75/243	Programme planning
		75/252	Questions relating to the proposed programme budget for 2021

**Deliverables**

25A.165 Table 25A.26 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 25A.26

**Subprogramme 2, component 3: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>71</b>	<b>83</b>	<b>81</b>	<b>83</b>
1. Reports to the General Assembly on the proposed programme budget, including programme plan and performance information	47	47	48	50
2. Reports to the General Assembly on the proposed budget, revised estimates and performance information for the International Residual Mechanism for Criminal Tribunals	3	2	3	3
3. Reports to the General Assembly on revised estimates resulting from resolutions and decisions adopted by the Economic and Social Council and the Human Rights Council	2	4	2	2
4. Statements to the General Assembly on the programme budget implications of draft resolutions	8	9	8	8
5. Ad hoc reports and conference room papers to the General Assembly on financial and budgetary matters	11	21	20	20
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>120</b>	<b>150</b>	<b>176</b>	<b>176</b>
6. Meetings of the Fifth Committee of the General Assembly and the Committee for Programme and Coordination	67	97	97	97
7. Hearings of the Advisory Committee on Administrative and Budgetary Questions	53	53	79	79
<b>B. Generation and transfer of knowledge</b>				
<b>Technical materials</b> (number of materials)	<b>109</b>	<b>144</b>	<b>99</b>	<b>110</b>
8. Oral statements of programme budget implications arising from draft resolutions	93	131	93	100
9. Letters to the Advisory Committee on Administrative and Budgetary Questions on extrabudgetary posts or positions at the level of D-1 and higher	16	13	6	10
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> briefings for Member States on programme planning and budgetary matters; advice on the potential budgetary implications of approximately 500 draft resolutions of the Main Committees of the General Assembly.				
<b>E. Enabling deliverables</b>				
<b>Administration:</b> expert advice and guidance on budgetary issues and policies relating to programme planning and budgeting for 28 programmes and 41 budget sections.				

**Subprogramme 3****Human resources****Component 1****Global strategy and policy****Objective**

25A.166 The objective, to which this component contributes, is to ensure a decentralized, agile, field-focused management paradigm, for the effective and transparent management of human resources and a high-performing, diverse and engaged workforce.

## Strategy

25A.167 To contribute to the objective, the component will promote an agile, geographically diverse, inclusive and gender-balanced workforce that represents the diverse peoples of the world and enhances the Organization's ability to perform, and will simplify and streamline management policies that will underpin a modern management framework to enable the effective delivery of mandates. The component will also provide efficient human resources services supported by an enabling policy framework to fulfil clients' mandates, where team, individual and organizational performance are aligned and human resources risks are transparently and effectively managed, as characterized by an accountable Organization. The component will remain committed to fostering innovation as a means of improving programmatic delivery of human resources in support of cultural change across the Organization. It will establish strategic policy imperatives anchored on guidance and feedback from entities, particularly from the field. The component will continue to provide authoritative policy interpretation to ensure consistency, fairness and the equitable treatment of staff in the global Secretariat and oversee the setting of salaries and benefits for locally recruited staff members by applying International Civil Service Commission (ICSC) methodologies. The component will actively engage with management on all aspects of relations between staff and management and work with other organizations of the United Nations common system of salaries and allowances to advance the work of the High-level Committee on Management and the Human Resources Network of CEB, and through ICSC, including by leading the implementation of the United Nations workplace mental health and well-being strategy across the United Nations system.

25A.168 For greater integration and collaboration and to improve efficiency and reduce costs, the component will advance efforts towards mutual recognition over time, which calls for entities within the United Nations common system to operate according to the principle of mutual recognition of best practices in terms of policies and procedures.

25A.169 The component will continue to lead the efforts to enhance harmonization and improve efficiency in the United Nations system. A flagship initiative, known as "OneHR", will be relaunched in 2022 and will provide United Nations system organizations with job classification and/or reference verification services. Other services rationalizing service delivery will also be offered to the common system organizations.

25A.170 The component will continue to improve talent management in the Organization and, in particular, work towards implementing a new approach to mobility, adopting new values and behaviours in talent management, ensuring the universality of candidate assessment methods and strengthening the performance management framework. Additionally, the component will ensure that future workforce needs are based on entities' strategic direction, assuring that strategic workforce planning remains aligned to the evolving priorities of entities and influences future workforce analysis to inform talent management actions, such as the upskilling of staff or the creation of new functions. It also will aim to attract the best talent through strategic outreach, particularly with regard to geographical diversity and gender parity.

25A.171 The above-mentioned work is expected to result in:

(a) The use of human resources policies by managers to exercise their delegated authority effectively and in full compliance with the Organization's legislative mandates and internal policies;

(b) Talent acquisition focusing on current workforce gaps and future needs, and enhancement of existing talent through learning and development, mobility and effective performance management;

(c) A diverse workforce that reflects the peoples the Organization serves.

## Programme performance in 2020

25A.172 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Increased cross-functional and cross-level pairing in global mentorship programme

25A.173 Mentoring programmes are a career enrichment opportunity and are proven to improve the motivation and productivity of the workforce. To nurture an environment that promotes open-mindedness and contributes towards professional satisfaction among staff, the Office of Human Resources, in partnership with ESCAP, delivered mentoring programmes to staff working remotely across three time zones. Built on the foundational elements of mentoring and seeking to break through some of the cultural barriers in the United Nations, the joint project enabled a flexible pairing system in which mentees could be paired with mentors of different levels. Supported by software with an algorithm that proposes mentor-mentee pairings, the subprogramme saved significant time and resources while offering a widely available opportunity for thousands of staff globally. The algorithm included input from mentees in the pairing process, which involved a mix of automation and human choice. Most importantly, it enabled all levels and types of staff to participate. The programme opened opportunities to expand beyond Secretariat entities and connected mentees and mentors from across common system organizations. Through this approach, the component facilitated a richer experience and chipped away at assumptions made about job levels and what they mean.

### *Progress towards the attainment of the objective, and performance measure*

25A.174 The above-mentioned project contributed to the objective, as demonstrated by 650 pairings across 118 countries and 82 duty stations in 2020 (see figure 25A.VI). Through these programmes, the component promoted empowerment among the staff as mentors shared knowledge, experience and career advice, demonstrating openness and goodwill. It is expected that strengthening mentoring relationships across the job levels will further nurture an environment that promotes open-mindedness and contributes towards professional satisfaction among staff.

Figure 25A.VI

**Performance measure: number of mentor-mentee pairings in the mentoring programme**

**Impact of COVID-19 on component delivery**

25A.175 Owing to the impact of COVID-19 during 2020, the component's work on policy simplification, for example, the review and revision of administrative issuances, was significantly diverted to support the needs of entities, provide policy advice and develop COVID-19 guidance, which required extensive coordination among the United Nations common system. It significantly slowed down the ongoing and strategic policy development work.

25A.176 Owing to travel restrictions, several ICSC meetings were cancelled, including one plenary session and some working group sessions, including of the working groups on the local salary survey methodology and parental leave. In-person staff-management meetings for both the global Staff-Management Committee and the Joint Negotiation Committee for the Field were also cancelled.

25A.177 At the same time, however, the component identified new activities to support its clients on issues that emerged during the COVID-19 pandemic with implications going forward. Through the leveraging of technology, the component's outreach activities were converted to virtual engagements, expanding the reach of such activities to audiences from parts of the world otherwise not possible to reach. Simultaneously, the global pandemic accelerated organizational learning, which the component used to design, develop and offer training online. All leadership and management development programmes with a face-to-face component were transformed into remote delivery in 2020, contributing to expanded outreach. Additionally, a key project that is part of the strategic workforce planning framework and constitutes a vital building block for introducing strategic workforce planning was recalibrated for successful online delivery.

**Planned results for 2022**

25A.178 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

**Result 1: realignment of the human resources policy framework to support the transition to a decentralized, field-focused management paradigm<sup>14</sup>****Programme performance in 2020**

25A.179 The component continued its innovative approaches to realigning the human resources policy framework to empower Secretariat entities to effectively and responsibly exercise their delegated authority for human resources management and ensure the delegation of centrally held decision-making authority closer to the point of service delivery. In doing so, the component aligned its capacities with the most pressing policies, such as the downsizing policy, while also developing a broad range of policy guidance to address the impact of COVID-19 on human resources issues. The component also simplified the process for policy prioritization, development, consultation and approval by providing opportunities for entities to contribute their interests and perspectives to policy development. Furthermore, the component, through engagement with entities, sought feedback and perspectives on policy instruments and their impact on operations, especially in the field.

25A.180 The above-mentioned work contributed to positive feedback from clients throughout the Secretariat that indicated the positive impact of the revised regulatory

---

<sup>14</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 29A)).

framework on the effective management of human resources, including in the field, which met the planned target reflected in the proposed programme budget for 2020.

### Proposed programme plan for 2022

25A.181 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will prioritize the development and modernization of policies with the highest impact on the mandate delivery of the Organization. The expected progress is presented in the performance measure below (see table 25A.27).

Table 25A.27  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Clients in Secretariat entities engaged in identifying areas for the simplification and revision of the regulatory framework	Continued simplification and revision of the regulatory framework, including detailed matrix on new delegation of authority; client needs integrated into the revised policies	Feedback from clients throughout the Secretariat indicating the positive impact of the revised regulatory framework on the effective management of human resources, including in the field	Continued simplification and revision of the regulatory framework; client needs integrated into the revised policies; feedback from clients throughout the Secretariat indicating the positive impact of the revised regulatory framework on the effective management of human resources, including in the field	Continued simplification and revision of the regulatory framework; client needs integrated into the revised policies; feedback from clients throughout the Secretariat indicating the positive impact of the revised regulatory framework on the effective management of human resources, including in the field

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 2: more diverse and inclusive workforce<sup>15</sup>

#### Programme performance in 2020

25A.182 The component has consistently engaged with Member States, in particular those that are unrepresented or underrepresented and troop- and police-contributing countries, to raise awareness among their nationals about job and career opportunities with the Organization. Working towards the result of a diverse and inclusive workforce, the component launched a diversity toolkit for reassignment and recruitment, which provides actionable measures for hiring managers, human resources practitioners and senior managers, to be implemented during the different phases of filling posts in line with diversity goals, including the goal on geographical diversity. The senior manager's compact establishes key performance indicators for gender and geography for each year and holds senior managers accountable. Member State-specific outreach profiles were created for unrepresented and underrepresented Member States and those contributing troops, consisting of information on the

<sup>15</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect. 29A)).

growing sectors and skill sets and useful information on effective communication channels, professional associations in each functional area, universities, popular national and local media outlets and social media channels in each Member State. In the report of the Secretary-General entitled “Composition of the Secretariat: staff demographics” (A/75/591 and A/75/591/Add.1), the component, for the first time, provided an additional in-depth analysis of factors having an impact on progress towards improving diversity. In particular, the analysis focused on key challenges and opportunities to achieve the gender parity and the geographical diversity objectives to inform talent management initiatives in those areas.

25A.183 The above-mentioned work contributed to the number of unrepresented and underrepresented Member States remaining at 57, which did not meet the target of 55 reflected in the proposed programme budget for 2021. Owing to liquidity constraints, hiring for regular budget positions was frozen in 2020. Therefore, there was little to no opportunity to improve geographical representation throughout 2020, resulting in overall stability of the number of unrepresented and underrepresented Member States throughout the year.

### Proposed programme plan for 2022

25A.184 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will align the global outreach activities to achieve the goals of the Secretariat’s geographical diversity and the United Nations system-wide gender parity strategies, conduct a comprehensive examination of the recruitment methods of the United Nations from a diversity perspective to eliminate any potential unconscious bias or other inclusion issues and continue efforts to expand the availability of qualified female candidates for future vacancies through the use of innovative mechanisms such as pipelines and talent pools. Furthermore, it will deploy a robust methodology for data collection and launch evidence-based measures in support of diversity in the Organization. The efforts undertaken will enhance the mainstreaming of diversity and inclusion in the workforce. The expected progress is presented in the performance measure below (see figure 25A.VII). The aim of the component is to make progress towards attaining gender parity by 2028 and for there to be no unrepresented or underrepresented Member States in the Secretariat by 2030.

Figure 25A.VII

**Performance measure: number of unrepresented and underrepresented Member States and representation of women as a percentage of total staff**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: enhanced access to human resources information for Member States

#### Proposed programme plan for 2022

25A.185 In 2020, in collaboration with other stakeholders, the component initiated an ambitious business transformation project to create a “common data warehouse” for corporate and management data of different functional areas, including human resources. Parts of the Secretariat have already taken advantage of this approach and are working with the corporate enterprise systems to provide enhanced accessibility to Member States’ contribution data by creating a new online information portal.

#### *Lessons learned and planned change*

25A.186 The lesson for the component was that Member States are expecting timelier and more detailed workforce data than currently available in HR Insight. In applying the lesson, the component will seek to replace and modernize the portal to include enhanced features for Member States. The new portal will incorporate additional information from the current paper-based reports of the Secretary-General on the composition of the Secretariat and on gratis personnel, retired staff and consultants and individual contractors into a front-end web tool as it becomes available in the enterprise resource planning system. The portal will provide a monthly online update of some information that is currently published only on an annual basis and will present the information in a visually more appealing and accessible way.

#### *Expected progress towards the attainment of the objective, and performance measure*

25A.187 This work is expected to contribute to the objective, as demonstrated by Member States having access to Secretariat staff composition data through the enhanced online portal, which takes readings from the new common data warehouse, and the increased timeliness of data availability and increased data transparency, contributing to efficient monitoring of the Secretariat workforce composition by Member States, which will better inform decision-making (see table 25A.28).

Table 25A.28  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
Member States have access to Secretariat staff composition data through HR Insight	Member States have access to Secretariat staff composition data through HR Insight	Member States have access to Secretariat staff composition data through HR Insight	<ul style="list-style-type: none"> <li>• Member States have access to Secretariat staff composition data through HR Insight</li> <li>• Foundation for the new common data warehouse, with human resources information and accessible portal, is built</li> </ul>	<ul style="list-style-type: none"> <li>• Member States have access to Secretariat staff composition data through the enhanced online portal, which takes readings from the new common data warehouse</li> <li>• Increased timeliness of data availability and increased data transparency, contributing to efficient monitoring of the Secretariat workforce</li> </ul>

				composition by Member States, which will better inform decision-making

## Legislative mandates

25A.188 The list below provides all mandates entrusted to the component.

### General Assembly resolutions

52/252	Revisions to article I of the Staff Regulations and chapter I of the 100 series of the Staff Rules of the United Nations	61/274	Comprehensive proposal on appropriate incentives to retain staff of the International Criminal Tribunal for Rwanda and the International Tribunal for the Former Yugoslavia
58/144	Improvement of the status of women in the United Nations system		
61/262	Conditions of service and compensation for officials other than Secretariat officials: members of the International Court of Justice and judges and ad litem judges of the International Tribunal for the Former Yugoslavia and the International Criminal Tribunal for Rwanda	63/271 68/265 72/254 74/254 75/245 A	Amendments to the Staff Regulations Mobility framework Human resources management Seconded active-duty military and police personnel United Nations common system

## Deliverables

25A.189 Table 25A.29 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 25A.29

### Subprogramme 3, component 1: deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	5	6	5	6
1. Reports to the General Assembly	5	6	5	6
<b>Substantive services for meetings</b> (number of three-hour meetings)	133	100	115	119
2. Meetings of the Advisory Committee on Administrative and Budgetary Questions	6	6	7	6
3. Meetings of the Fifth Committee of the General Assembly	35	29	20	35
4. Meetings of the International Civil Service Commission	92	65	88	78
<b>E. Enabling deliverables</b>				
<b>Administration:</b>				
<b>Strategy and policies:</b> policy documents and tools on human resources policies and procedures, including on conditions of service and the enhanced delegation of authority; expert advice and authoritative guidance to all Secretariat entities on human resources-related rules and policies; salary surveys; provision of classification advice and related appeals.				

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<p><b>Talent management:</b> talent management strategies, policies, processes and tools pertaining to diversity, inclusion, mobility and outreach, leveraging innovation, creativity and best practices, including a new diversity toolkit, a full set of 60 profiles of unrepresented and underrepresented Member States to enable targeted outreach and new technology for establishing a diverse talent pool; outreach with a focus on online channels and platforms, including participation in 27 career events organized with academia and other professional networks; servicing of staff management bodies, including the Staff-Management Committee; strategic workforce planning framework and human resources analytics; online and ad hoc reports for Member States on human resources information, including support for more than 180 users in permanent missions.</p> <p><b>Organizational learning:</b> organizational learning, performance management and staff development strategies, programmes and tools to build leadership and management capacity, including continuation of the e-management certificate programme for at least 500 staff members with first reporting officer responsibilities; continuation of the United Nations System Executive Management Programme for approximately 235 staff members with second reporting officer functions; management and leadership development programmes, including the United Nations Leaders Programme for approximately 85 D-1 and D-2 staff members; support for the participation of about 40 female staff members in the “Leadership, women and the United Nations ” programme; building and strengthening coaching capacity for staff with first reporting officer functions; assessment of the leadership culture in the Secretariat; leadership programmes and senior leadership support programme for Assistant Secretaries-General and Under-Secretaries-General; strategic advice, tools and guidance on organizational development, including diversity and inclusion; development and support for professional and substantive skills development programmes, including six mandated corporate learning programmes, as well as substantive skills programmes; strategies and tools for career enhancement and growth; frameworks, strategies, tools and guidance on performance management, including managerial effectiveness; launch of a new learning management system that will meet the evolving needs for learning and building staff capacity throughout the Secretariat; and conduct of the 2022 learning needs analysis to identify high-priority and emerging staff capacities to deliver on mandates.</p> <p><b>Internal justice and oversight:</b> serving as expert witness for testimonies to the United Nations Dispute Tribunal and the United Nations Appeals Tribunal on matters of policy, compensation and conditions of service.</p>				

## Component 2

### Administrative law

#### Objective

25A.190 The objective, to which this component contributes, is to strengthen accountability in line with the standards of conduct by all categories of personnel.

#### Strategy

25A.191 To contribute to the objective, the component will develop, deploy and use a global case management system and identify lessons learned, including in relation to critical incidents affecting the well-being and safety of staff, and develop tools and guidance material for senior leaders.

25A.192 The component will also engage in capacity-building, including through the ALD Connect online information-sharing platform, direct outreach to senior managers and the ongoing development of tools and guidance materials to support senior managers in carrying out their responsibilities and exercising their authority.

25A.193 The component will also review disciplinary matters for sanctioning purposes, represent the Secretary-General before the United Nations Dispute Tribunal with regard to appeals against administrative decisions, continue to expand screening for integrity for the Secretariat and continue to review and update policies relating to the conduct of personnel.

25A.194 The above-mentioned work is expected to result in:

- (a) Enhanced oversight across the Secretariat as well as monitoring of matters that affect the reputation of the Organization, and the timely review and handling of misconduct matters;
- (b) Well-informed decision-making by senior managers;
- (c) An enhanced culture of individual accountability.

## Programme performance in 2020

25A.195 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Effective adherence to standards of conduct following management reform

25A.196 Following the management reform, conduct and discipline management was consolidated to include all related matters in the work of the component. This was done to ensure an integrated end-to-end approach to managing misconduct. The approach led to strengthened prevention, risk management and awareness-raising, improved outreach to beneficiaries and led to synergies, such as those between field missions and the other Secretariat entities where there is now a holistic approach to conduct and discipline. In addition, lessons from case management gathered in 2020 have informed policy and decision-making.

25A.197 In addition, following the COVID-19 crisis and in the context of management reform, the component served as a catalyst for action in the face of serious incidents. The component supported cross-departmental responses to matters of a critical nature. For both clients and service providers, this resulted in not only consistent guidance provision but also consideration, through feedback, of changes to the applicable administrative framework that further streamlined administrative processes and afforded greater flexibility in handling these context-specific matters more effectively.

### *Progress towards the attainment of the objective, and performance measure*

25A.198 The above-mentioned work contributed to the objective, as demonstrated by a coherent and integrated approach to misconduct management, both within the subprogramme and across other offices and departments of the Secretariat, through close coordination (see table 25A.30).

Table 25A.30  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
Network of conduct and discipline practitioners limited to peacekeeping operations	Informal knowledge-sharing among conduct and discipline practitioners from all Secretariat entities	A coherent and integrated approach to misconduct management, both within the subprogramme and across other offices and departments of the Secretariat, through close coordination

### **Impact of COVID-19 on component delivery**

25A.199 In response to the pandemic, during 2020, the subprogramme had to adapt its approach to all regular engagements with stakeholders, including critical capacity-building initiatives, to support the implementation of results 1 and 2 below. In order to meet the challenges posed by COVID-19, the component conducted biweekly online meetings with conduct and discipline teams and focal points, including the Victims' Rights Advocate. Those meetings allowed for exchanges on the constraints and challenges as a result of COVID-19; discussions and presentations on substantive issues; and the added benefit of discussions on a range of issues to support the implementation of programmes, which may not have been possible without the regular meetings. Furthermore, to enable access to secure systems such as the Misconduct Tracking System and the victim assistance tracking system, multi-factor authentication was enabled so that a United Nations server or mobile office was not required to access these secure and confidential systems.

### **Planned results for 2022**

25A.200 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: integrated approach to upholding the highest standards of conduct<sup>16</sup>**

#### **Programme performance in 2020**

25A.201 The component formed the Secretariat network of conduct and discipline focal points, the ALD Connect network, which comprises all Secretariat entities, including 50 entities (departments and offices based in New York, offices away from Headquarters, regional economic and social commissions, tribunals and field operations) that have conduct and discipline focal points and 31 field operations that either have a conduct and discipline team or are covered by a conduct and discipline team. Through the ALD Connect network of conduct and discipline focal points, the component engages directly with the 81 entities, which represent all Secretariat entities across the globe.

25A.202 The component organized over 20 in-person and online capacity-building activities with conduct and discipline focal points from departments and offices based in New York, offices away from Headquarters, regional economic and social commissions, tribunals and field missions on a variety of conduct and discipline policies and processes. Sessions included the reporting, recording and tracking of misconduct allegations; a series of workshops to help entities to develop their misconduct risk register and workplan; a session dedicated to the development of sexual exploitation and abuse action plans requested by the Secretary-General; and training on the role of conduct and discipline focal points under the Secretary-General's bulletin on addressing discrimination, harassment, including sexual harassment, and abuse of authority ([ST/SGB/2019/8](#)). The sessions involved subject matter experts from across the component and were developed in collaboration with key stakeholders across the Organization, including the Victims' Rights Advocate, the Investigations Division of the Office of Internal Oversight Services and the Office of the Special Coordinator on Improving the United Nations Response to Sexual Exploitation and Abuse. The sessions serve as an opportunity for colleagues to ask questions and share their experiences and the good practices they have put in place.

<sup>16</sup> As reflected in the proposed programme budget for 2020 ([A/74/6 \(Sect. 29A\)](#)).

The ALD Connect intranet platform offers documentary and video resources and allows for dynamic and continuous communication and knowledge exchange.

25A.203 The above-mentioned work contributed to the appointment of conduct and discipline focal points in all Secretariat entities, which met the planned target reflected in the proposed programme budget for 2020.

### **Proposed programme plan for 2022**

25A.204 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will build capacity through information sessions, training and workshops on various topics to keep conduct and discipline practitioners and members of the network of conduct and discipline focal points up to date on relevant policies and support their implementation, learning from feedback and requests for information. The expected progress is presented in the performance measure below (see table 25A.31).

Table 25A.31  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Network of conduct and discipline practitioners limited to peacekeeping operations	Informal knowledge-sharing among conduct and discipline practitioners from all Secretariat entities	100 per cent of entities designated a conduct and discipline focal point	Following development of the global case management system, the network of conduct and discipline practitioners will be utilizing the system fully to record, monitor and track matters	Strengthened capacity across the Secretariat for integrated tracking and monitoring of misconduct

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 2: deployment of a Secretariat-wide case management tracking system<sup>17</sup>**

#### **Programme performance in 2020**

25A.205 Jointly with the Office of Information and Communications Technology, the component has completed the development of the main module of a case management system. The component rolled out the module to users in January 2021.

25A.206 The above-mentioned work contributed to all conduct and discipline focal points across the entire Secretariat having access to the global case management system, which met the planned target reflected in the proposed programme budget for 2021.

<sup>17</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect. 29A)).

### Proposed programme plan for 2022

25A.207 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will continue to support the roll-out of the case management tracking system, ensuring training and access for identified users. The expected progress is presented in the performance measure below (see table 25A.32).

Table 25A.32

#### Performance measure

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Network of conduct and discipline practitioners limited to peacekeeping operations	Informal knowledge-sharing among conduct and discipline practitioners from all Secretariat entities	Conduct and discipline focal points across the entire Secretariat have access to the global case management system	Following development of the global case management system, the network of conduct and discipline practitioners will be utilizing the system fully to record, monitor and track matters	Increased expertise of end users on the use of reporting dashboards for informed decision-making

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: strengthened individual accountabilities

#### Proposed programme plan for 2022

25A.208 Over the past few years, the component has put in place the building blocks to realize the broad objectives outlined in the Secretary-General's vision for management reform, namely, to enhance the culture of individual accountability. These include the development of the conduct and discipline function across the global Secretariat, based on the principles of accountability, delegation of authority, informed decision-making, integration and harmonization of standards and practices, including, but not limited to, the ALD Connect network and the global case management system.

#### *Lessons learned and planned change*

25A.209 The lesson for the component was that it needed to build on and expand the Misconduct Tracking System previously used by all peacekeeping missions to make a new system available to the ALD Connect network. Through the use of the Misconduct Tracking System, the component had already documented lessons for the overall development of the new global case management tracking system. As the Misconduct Tracking System was made available to users and developers to ensure that end users took advantage of the platform, the component received important feedback throughout its deployment on how to improve and refine the global case management tracking system. In applying the lesson, the component will update the categorization of misconduct in the database and add new data fields to the user interface and enhance it to enable harmonized recording, reporting and oversight of the entire allegations handling process. The component plans to roll out a training

programme that will incorporate the lessons and experience of users, as well as guidance going forward in the full roll-out. In parallel, the component will analyse lessons learned, identify client needs and capture evolving Organizational mandates. By developing and expanding these tools, the component aims to grow a culture of individual accountability that enables strengthened leadership and individual dedication to promote and respect the United Nations standards of conduct.

*Expected progress towards the attainment of the objective, and performance measure*

25A.210 This work is expected to contribute to the objective, as demonstrated by the strengthened capacity of all Secretariat entities to manage misconduct cases, increase reporting capacity and facilitate the identification of trends that strengthen decision-making and policy development (see table 25A.33).

Table 25A.33

**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)</i>	<i>2022 (planned)</i>
Network of conduct and discipline practitioners limited to peacekeeping operations	Informal knowledge-sharing among conduct and discipline practitioners from all Secretariat entities	Structured knowledge-sharing among conduct and discipline practitioners from all Secretariat entities through ALD Connect	Following development of the global case management system, the network of conduct and discipline practitioners will be utilizing the system fully to record, monitor and track matters	Strengthened capacity of all Secretariat entities to manage misconduct cases, increase reporting capacity and facilitate the identification of trends that strengthen decision-making and policy development

**Deliverables**

25A.211 Table 25A.34 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 25A.34

**Subprogramme 3, component 2: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>1</b>	<b>1</b>	<b>1</b>	<b>1</b>
1. Report for the General Assembly	1	1	1	1
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>20</b>	<b>32</b>	<b>20</b>	<b>23</b>
2. Meetings of the Advisory Committee on Administrative and Budgetary Questions	5	8	5	5
3. Meetings of the Fifth Committee of the General Assembly	7	16	7	10
4. Meetings of the Special Committee on Peacekeeping Operations	2	2	2	2
5. Meetings of the Fourth Committee of the General Assembly	2	1	2	2

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
6. Meetings of the Sixth Committee of the General Assembly	3	3	3	3
7. Meetings of the Committee for Programme and Coordination	1	2	1	1

### C. Substantive deliverables

**Consultation, advice and advocacy:** provision of best practices and lessons learned on conduct issues to other international organizations (such as the African Union, the North Atlantic Treaty Organization and CEB entities); advocacy with Member States on conduct and discipline issues.

**Databases and substantive digital materials:** management of public database and website relating to conduct and discipline.

### E. Enabling deliverables

**Administration:** implementation and oversight, including updating, of the Organization's conduct and discipline policies; development and maintenance of the strategic framework for response to critical incidents in order to support business continuity and meet the Organization's duty of care obligations, including staff safety and security; training of the global network of approximately 80 conduct and discipline focal points.

**Internal justice and oversight:** representation of the Secretary-General before the United Nations Dispute Tribunal in cases challenging administrative decisions, including challenges to disciplinary sanctions (approximately 250 cases); facilitation of informal dispute resolution in partnership with relevant Secretariat entities; advice to all Secretariat entities on conduct and discipline and administration of justice matters; advice to all Secretariat entities on critical incidents; creation of the ALD Connect network; maintenance of databases on conduct issues, victim assistance, administrative appeals and disciplinary matters referred, including integrated data analysis.

## Subprogramme 4 Business transformation and accountability

### Objective

25A.212 The objective, to which this subprogramme contributes, is to ensure a results-oriented, data-driven, agile Organization that is efficient, accountable, transparent, compliant and driven by lessons learned and continuous improvements.

### Strategy

25A.213 To contribute to the objective, the subprogramme will reinforce the Organization's systems of accountability by evaluating overall organizational performance trends; assessing the alignment of roles and responsibilities and monitoring the exercise of delegated authority; monitoring the senior managers' compacts; mainstreaming the use of evaluation as part of the programme planning cycle; and coordinating the Secretariat's interaction with oversight bodies and identifying trends in their recommendations. The subprogramme will carry out capacity-building activities to support all United Nations entities in identifying, assessing, evaluating and controlling risk, using an enterprise risk management approach, and will support the achievement of mandated programmatic results by training all entities in results-based management. The subprogramme will also support the implementation of the data strategy of the Secretariat, enable entities to access management data from Secretariat systems and analytical tools supporting data-driven decision-making, and lead and coordinate the Secretariat's portfolio of business transformation projects, such as with regard to the availability of a comprehensive business intelligence platform.

25A.214 The above-mentioned work is expected to result in:

- (a) A reinforced accountability culture in the Organization in the areas of risk awareness and monitoring performance;

- (b) Greater use of enterprise data in decision-making and programme delivery;
- (c) Teams across the Secretariat strengthening new collaboration practices using online platforms, as specified in more detail under result 3 below.

## Programme performance in 2020

25A.215 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Proactive approach: managers better prepared to mitigate risk

25A.216 The United Nations operates in an environment of growing complexity and uncertainty, which requires managers at all levels to be proactive in identifying and mitigating risks through the maintenance of an up-to-date risk register and the definition of appropriate risk responses. Enterprise risk management supports enhanced accountability and facilitates effective decision-making in the Organization. The subprogramme worked with senior leadership and key stakeholders to finalize the revised Secretariat-wide risk register, which took into account the response to the COVID-19 pandemic. The risk register was approved by the Management Committee in July 2020, which was a critical milestone towards mainstreaming risk management across the Secretariat.

25A.217 The subprogramme also coordinated the establishment of eight functional working groups across the Secretariat, led by corporate risk owners at principal level, to create risk treatment and response plans for the most critical risks affecting the global Secretariat. Furthermore, the subprogramme offered several webinars and virtual conferences for enterprise risk management focal points worldwide – attended by hundreds of participants – to promote a risk-aware culture and to support managers to identify, evaluate and mitigate risks to their operations. Additionally, a new online training module, “Fundamentals of enterprise risk management”, was released and taken by hundreds of staff members.

### *Progress towards the attainment of the objective, and performance measure*

25A.218 The above-mentioned work contributed to the objective, as demonstrated by a comprehensive Secretariat-wide risk register being in place and the completion of full risk assessments of 17 Secretariat entities in accordance with the enterprise risk management policies and procedures, contributing to promoting a risk-aware culture and better decision-making in support of mandate delivery (see table 25A.35).

Table 25A.35

#### Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
Limited development of risk assessments and preparation of risk registers at entity level in accordance with the enterprise risk management policies and procedures	Revision of the Secretariat-wide risk register to provide strategic guidance on the development of local risk registers at the entity level and development of a network of enterprise risk management focal points to implement risk assessments at the entity level	A comprehensive Secretariat-wide risk register in place, and completion of full risk assessments of 17 Secretariat entities in accordance with the enterprise risk management policies and procedures, contributing to promoting a risk-aware culture and better decision-making in support of mandate delivery

### **Impact of COVID-19 on component delivery**

25A.219 Owing to the impact of COVID-19 during 2020, the subprogramme changed the approach to the delivery of its planned workshops and site visits. Planned in-person workshops and site visits were replaced by a series of shorter virtual briefings in the areas of enterprise risk management, oversight coordination, results-based management, evaluation, data analytics, management dashboard, delegation of authority and senior managers' compacts. Those briefings were either designed for participation from all entities and a wide audience or tailored to a specific group of client entities. A similar approach was followed to provide briefings on the accountability system of the Secretariat, often resulting in the briefings reaching a wider audience than originally expected, but not being able to always lead to deep-dive analysis or advanced training sessions to the extent originally planned.

25A.220 At the same time, however, the subprogramme identified additional deliverables to support clients on issues emerging during the COVID-19 pandemic, within the overall scope of its objectives, namely, the establishment of the enterprise risk management task force to support Secretariat entities on issues related to COVID-19 and the expansion of the Secretariat-wide risk register.

### **Planned results for 2022**

25A.221 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

#### **Result 1: programme managers using evidence-based systems for improved decision-making and performance<sup>18</sup>**

##### **Programme performance in 2020**

25A.222 The subprogramme enhanced the online management dashboard launched in 2019, thereby providing managers in all Secretariat entities with greater insight into business data to support evidence-based decision-making and improved performance. The newly introduced section on accountability indicator monitoring provides managers with access to automated quarterly reporting on the 16 key performance indicators of the delegation of authority accountability framework. The subprogramme also continuously made outreach efforts to keep users abreast of updates and of training opportunities.

25A.223 The above-mentioned work contributed to over 700 active users across the Secretariat using the tools and solutions for improved decision-making, which met the planned target reflected in the proposed programme budget for 2020.

##### **Proposed programme plan for 2022**

25A.224 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will enable the expansion of the features of management and programme performance dashboards, with additional data views where necessary, to help managers with data analysis and decision-making. The expected progress is presented in the performance measure below (see table 25A.36).

<sup>18</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect. 29A)).

Table 25A.36  
Performance measure

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Limited stand-alone systems to support decision-making and performance monitoring and reporting	First use of integrated and evidence-based systems to support decision-making and performance monitoring and reporting	Over 700 active users across the Secretariat use the tools and solutions for improved decision-making	Increase in the usage of programme performance dashboards	Further increase in the usage and expansion of the functionalities of programme performance and management dashboards

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: Business Intelligence takes off<sup>19</sup>

### Programme performance in 2020

25A.225 The subprogramme worked with subject matter experts in various functional areas to deliver certified data models through the United Nations business intelligence project in areas such as supply chain management, finance, travel and human resources management. The subprogramme also made relevant updates to the data dictionaries, job aids and support material. Furthermore, the subprogramme has set up a communication platform on SharePoint to keep the user community updated with the project's deliverables, and to receive feedback and assess requirement priorities. The subprogramme successfully delivered over 100 certified data models that enhanced the management dashboard and other reporting mechanisms. The subprogramme also worked towards enabling real-time reporting from transactional enterprise systems such as Umoja and Inspira for designated critical reports, thereby facilitating data access to programme managers.

25A.226 The above-mentioned work contributed to the increase in active users of the integrated management dashboard to 724, which did not meet the planned target of 800 active users reflected in the proposed programme budget for 2021. The subprogramme offered virtual sessions and communicated new enhancements as they deployed, which contributed to a steady increase in the number of active users. However, the lack of in-depth, in-person sessions as well as a delay in the delivery of some enhanced features until late December 2020 had an impact on user responses.

### Proposed programme plan for 2022

25A.227 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to develop and release additional certified data models from diversified corporate systems according to the priorities set by the governing board of the United Nations business intelligence project, in compliance with CEB and International Aid Transparency Initiative data standards, to ensure data comparability across United Nations system organizations for greater transparency and support for evidence-based decision-making. The expected progress is presented in the performance measure below (see figure 25A.VIII).

<sup>19</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect. 29A)).

Figure 25A.VIII

**Performance measure: active users of the integrated management dashboard**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

**Result 3: towards organizational transformation and innovation****Proposed programme plan for 2022**

25A.228 The COVID-19 pandemic has brought about an increased awareness of the need for the Organization and its staff to be flexible and quickly adapt to any situation. During the pandemic, the Secretariat continued to deliver on its mandates and witnessed the accelerated adoption of innovative business practices. During this time, the subprogramme adopted and supported initiatives to advance and promote collaborative ways of working through a network-based approach and activities carried out under five themes: innovation and risk-taking; fit for the future; working flexibly; collaborative environment; and empowered networks. Through this approach, the subprogramme facilitated a large number of innovation-focused virtual sessions with internal and external guest speakers and experts who shared their knowledge, experience and techniques with United Nations staff at large to help support and promote the uptake of new methodologies. Additionally, the subprogramme joined an alliance of United Nations system-wide networks to launch the “reimagine the UN together challenge”, which engaged thousands of staff across the system, created virtual teams and generated over 80 innovation submissions, culminating in a pitching event to senior leaders. The “reimagine” challenge was completed by the launch of the “reimagine dialogue” series to provide an additional channel for innovative discussion and thinking to support onward organizational transformation. Organizational culture advancements and benefits achieved during the COVID-19 pandemic through the acceleration of business innovation approaches can inform and be built upon to further transform the United Nations into a workplace of the future.

*Lessons learned and planned change*

25A.229 The lesson for the subprogramme was that there is a significant need and appetite for the Organization to advance and increase opportunities for staff to engage in business innovation towards realizing the intentions of management reform and to support transformation of the Organization as a whole. In applying the lesson, the subprogramme will increase focus and efforts on further expanding activities and deliverables that support the onward promotion and adoption of new business practices towards the realization of a transformed and innovative Organization.

*Expected progress towards the attainment of the objective, and performance measure*

25A.230 This work is expected to contribute to the objective, as demonstrated by the further increase in and expansion of opportunities for business transformation and innovation activities and networks across the United Nations system (see table 25A.37).

Table 25A.37

**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)</i>	<i>2022 (planned)</i>
–	Limited avenues or platforms for business transformation and innovation	More opportunities in business transformation and innovation activities throughout the Secretariat	Increased opportunities in business transformation and innovation activities and networks throughout the Secretariat	Further increase in and expansion of opportunities for business transformation and innovation activities and networks across the United Nations system

**Legislative mandates**

25A.231 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolutions*

<a href="#">59/272</a>	Review of the implementation of General Assembly resolutions <a href="#">48/218 B</a> and <a href="#">54/244</a>	<a href="#">63/276</a>	Accountability framework, enterprise risk management and internal control framework and results-based management framework
<a href="#">61/245</a>	Comprehensive review of governance and oversight within the United Nations and its funds, programmes and specialized agencies	<a href="#">64/259</a>	Towards an accountability system in the United Nations Secretariat
		<a href="#">74/271</a>	Progress towards an accountability system in the United Nations Secretariat

**Deliverables**

25A.232 Table 25A.38 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 25A.38

**Subprogramme 4: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>4</b>	<b>4</b>	<b>3</b>	<b>3</b>
1. Report to the General Assembly on accountability	1	1	1	1
2. Report of the Secretary-General on the implementation of the recommendations of the Board of Auditors	3	3	2	2

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>27</b>	<b>21</b>	<b>26</b>	<b>13</b>
3. Hearings of the Advisory Committee on Administrative and Budgetary Questions	13	13	8	5
4. Meetings of the General Assembly	10	4	15	4
5. Meetings of the Independent Audit Advisory Committee	4	4	3	4

#### E. Enabling deliverables

**Administration:** online training on evaluation targeting all entity evaluation focal points; quarterly key performance indicators report covering more than 230 entities with a delegation of authority; senior managers' compacts performance assessment for 65 entity heads; provision of workshops, briefings and guidance to approximately 130 compact focal points; enterprise-wide outreach and advocacy campaigns to raise awareness of change management, business innovation and new ways of working; continuous improvements in analytics and corporate dashboards; network and training opportunities on new ways of working and modern business approaches across the Organization; online, instructor-led and train-the-trainer skills development programme for advanced data analytics and visualization benefiting knowledge workers and staff with analytical roles; in support of the data strategy, provision of guidance on results-based management to entities; workshops with staff members and enterprise risk management focal points; 57 enterprise risk management focal points trained and certified in the advanced enterprise risk management training course in Inspira; one enterprise risk management tool provided to entities.

## Section 29B Department of Operational Support

### Overall orientation

#### Mandates and background

25B.1 The Department of Operational Support is the operational arm of the Secretariat and the client-facing interface for operational support matters in the Secretariat's management structure, which exists to support the objective of effective mandate delivery in partnership with Secretariat entities and other clients. Its mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolutions [72/266 B](#) and [73/281](#). The Department delivers rapid, effective, efficient, responsible and customized enabling solutions that help partners meet their mandates, including in the most challenging operating environments.

#### Strategy and external factors for 2022

25B.2 In 2022, the Department will support effective mandate delivery through the provision of operational support for the implementation of partner decisions and the provision of operational capacity development and advisory services to clients and, in exceptional cases, exercise delegated authority on behalf of clients across the Secretariat.

25B.3 To implement the programme, the Department will partner with client entities to mutually define requirements and co-create solutions in the areas of end-to-end supply chain management, uniformed personnel support, human resources, capacity development, delivery of diverse training services, business process improvement, medical and transactional services and operational support solutions in information and communications technology through the Office of Information and Communications Technology.

25B.4 In addition, it will support entities within the Secretariat, such as small offices at Headquarters or in the field, that lack either a dedicated executive office or

administrative unit or the capacity to meet the demands of surge requirements or other unusual circumstances.

25B.5 Internally, the Department will pursue the continuous improvement of its own support model as well as Secretariat-wide business processes, including through innovative pilot initiatives with internal and external stakeholders and building on the enablers deriving from the acceleration of digitization in response to the coronavirus disease (COVID-19) pandemic business continuity situation. The Department will proactively harness technology, data and new ways of working to deliver faster and better support, in line with its vision to be recognized for operational excellence in the service of the mission of the United Nations.

25B.6 For 2022, the Department's planned deliverables and activities reflect strengthened approaches that incorporate lessons from the COVID-19 pandemic. Such planned deliverables and activities include responsive advisory support to COVID-19-related human resources queries, building upon more adaptive approaches to operational training and capacity development initiatives, ensuring that proper prevention, risk mitigation and policy measures and occupational health and safety procedures are in place to reduce the burden of COVID-19 on operations, including field hospitals, strengthening overall crisis preparedness and ensuring that the procurement and delivery of goods and services remain adaptive and responsive to COVID-19-related challenges, including the coordination of a system-wide vaccine roll-out, which may continue into 2022. Specific examples of such planned deliverables and activities are provided under component 3 of subprogramme 1, and component 2 of subprogramme 2.

25B.7 With regard to cooperation with other entities, the Department will seek to build and develop relationships with internal and external partners to enhance its core role. This includes maintaining arrangements with the Department of Management Strategy, Policy and Compliance that integrate and leverage the complementarity of the roles of the two Headquarters management departments, including the Management Client Board. The Department will continue to coordinate and foster mutually beneficial partnerships with key partners, including Member States and regional organizations, such as the African Union and European Union, to achieve the scale and effectiveness needed to address complex challenges in line with its mandates.

25B.8 With regard to inter-agency coordination and liaison, the Department will continue to advance the mutual recognition agenda and to seek collaboration opportunities and synergies in the spirit of One United Nations. To this end, the Department will continue its coordination with agencies, funds and programmes with regard to the recruitment of medical personnel for United Nations clinics and the training of health-care personnel, as well as the implementation of United Nations health-care standards, their governance and monitoring, and ensuring compliance with such standards. Furthermore, in May 2020, under the leadership of the Department, the United Nations System-Wide Task Force on Medical Evacuations in Response to COVID-19 was created to mobilize and resource an infrastructure to conduct medical evacuations of eligible persons who have contracted COVID-19 and cannot be treated locally. With the completion of the establishment phase, work will continue under the leadership of the Department in transitioning to a sustained medical evacuation mechanism. Utilizing the experience gained with United Nations system-wide cooperation efforts with regard to the medical evacuation of United Nations personnel, dependants and partners undertaken in response to the COVID-19 pandemic in 2020 and 2021, and in line with the recommendation of the First Line of Defence Task Force to the Executive Committee, the Vaccine Deployment Working Group, led by the Department, was also formed to work in parallel with the existing

structures and in close coordination with the United Nations Medical Directors Working Group, the resident coordinator system and other system-wide entities to deliver the vaccine where needed.

25B.9 With regard to the external factors, the overall plan for 2022 is based on the following planning assumptions:

- (a) National institutions are supportive of efforts to improve the local health environment and facilities at mission locations;
- (b) Troop- and police-contributing countries continue to cooperate to ensure the timely completion and implementation of memorandums of understanding in line with the requirements for the provision of troops, formed police unit personnel and contingent-owned equipment;
- (c) Vendors are able to provide quality responses in a timely manner, including the delivery of goods and services on time;
- (d) Vendors, in particular those from developing countries, participate in business seminars and apply for registration.

25B.10 With regard to the COVID-19 pandemic, the programme plan is based on the assumption that the proposed deliverables and activities for 2022 will be feasible to implement. However, if the pandemic were to have an impact on the planned deliverables and activities, they would be adjusted during 2022 within the scope of the overall objectives, strategies and mandates. Any such adjustments would be reported as part of the programme performance information.

25B.11 The Department continues to integrate a gender perspective in its operational activities, deliverables and results, as appropriate, such as through improvement of the quality of health-care services delivered in United Nations operations worldwide in the area of women's health, and vendor outreach activities targeted at women-owned businesses. Through guidance and workforce planning toolkits developed for staffing initiatives, such as the senior women talent pipeline, the Department will also support and advise entities, upon request, to enable them in the exercise of their delegated authorities, including their gender parity targets. With regard to capacity-building, language and communications training sessions encompass the careful integration of a gender perspective in the design, development and delivery of substantive courses in the six official languages of the United Nations on how to use language in a gender-inclusive way.

25B.12 With regard to disability inclusion, under subprogramme 4, the Department plans to continue to upgrade the physical environment at Headquarters to promote inclusiveness by improving accessibility provisions for persons with disabilities for delegates, visitors and staff on the premises, as well as to continue efforts to enhance cleaning and disinfection at Headquarters.

## **Programme performance in 2020**

### **Impact of COVID-19 on programme delivery**

25B.13 During 2020, the COVID-19 pandemic had an impact on the planned deliverables and activities of the Department. The impact included the postponement of deployments, rotations, repatriations, the delivery of training courses such as advanced first-aid courses and courses related to crisis communication, activities related to the delivery of the governance training programme, building maintenance work and construction projects. Specific examples of the impact are provided under all subprogrammes. The change in approach and postponement of planned

deliverables and activities also had an impact on the expected results for 2020, as described in the programme performance under component 3 of subprogramme 1, component 1 of subprogramme 2, and subprogrammes 3 and 4.

25B.14 At the same time, however, some planned deliverables and activities were modified, and new activities identified during 2020, within the overall scope of the objectives of the subprogrammes, in order to support clients on issues related to the COVID-19 pandemic. Those modifications and new activities included the adaptation of working methods to support clients and the continuity of United Nations operations, the acceleration of digital modernization to enable seamless business continuity and a shift to the utilization of virtual means, where possible, such as in the case of “walkthroughs” of United Nations medical facilities and tender opening ceremonies, as well as ensuring that the United Nations Headquarters facilities stayed open with adequate health and safety measures in place. Specific examples of the modified activities are provided under all subprogrammes. The modified and new deliverables and activities contributed to results in 2020, as described in the programme performance under component 3 of subprogramme 1, component 1 of subprogramme 2, and subprogrammes 3 and 4.

25B.15 Reflecting the importance of continuous improvement and responding to the evolving needs of Member States, the programme will mainstream lessons learned and best practices related to the adjustments to and adaptation of its programme owing to the COVID-19 pandemic. Specific examples of best practices and lessons learned include the utilization of virtual meetings instead of in-person meetings, where feasible, and the continuation of digitization efforts.

## Legislative mandates

25B.16 The list below provides all mandates entrusted to the programme.

### *General Assembly resolutions*

72/266 A; Shifting the management paradigm in the 75/254 A–C Programme budget for 2021  
72/266 B; 73/281 United Nations

## Deliverables

25B.17 Table 25B.1 lists all cross-cutting deliverables, by category and subcategory, for the period 2020–2022.

Table 25B.1

### **Cross-cutting deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>4</b>	<b>4</b>	<b>4</b>	<b>4</b>
1. Meetings of the Fifth Committee	1	1	1	1
2. Meetings of the Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
3. Meetings of the Committee for Programme and Coordination	1	1	1	1
4. Meetings of the Special Committee on peacekeeping operations	1	1	1	1

## **Evaluation activities**

25B.18 The following self-evaluations completed in 2020 have guided the proposed programme plan for 2022:

- (a) Self-evaluation of recruitment process improvements;
- (b) Self-evaluation of the deployment process for uniformed personnel;
- (c) Self-evaluation of the Department's senior leadership team.

25B.19 The findings of the self-evaluations referenced above have been taken into account for the programme plan for 2022. For example, the self-evaluation on recruitment process improvements identified improvements to the process introduced during 2019 and helped prioritize the next set of changes in 2022 under component 1 of subprogramme 1. The self-evaluation on the deployment processes for uniformed personnel helped identify bottlenecks in the overall and downstream deployment processes, helping define the scope of further reviews of and improvements to processes in 2022 under component 2 of subprogramme 2.

25B.20 The following self-evaluations are planned for 2022:

- (a) Joint self-evaluation by the Department of Management Strategy, Policy and Compliance and the Department of Operational Support of the efficacy of the Management Client Board;
- (b) Evaluation of the capacity development projects developed and/or delivered by the Capacity Development and Operational Training Service;
- (c) Evaluation of the United Nations system's HIV post-exposure prophylaxis (PEP) kit programme.

## **Programme of work**

### **Subprogramme 1 Support operations**

#### **Component 1 Human resources support**

#### **Objective**

25B.21 The objective, to which this component contributes, is to strengthen the human resources capacity of all Secretariat entities, enable improved, simplified human resources processes, and offer the Organization talented and diverse staffing pools.

#### **Strategy**

25B.22 To contribute to the objective, the component will continue to provide timely and consistent specialized advisory support and guidance on the proper exercise of delegated authority in the area of human resources to human resources business partners across the Secretariat, and to support them in conflict prevention and resolution and other entity-specific operational needs.

25B.23 The component will also continue to improve, simplify, digitize and streamline human resources processes, tools and procedures, with due consideration

for multilingualism and disability inclusion in various areas, such as recruitment, onboarding, administration of human resources forms and staff files, non-staff capacities and workforce planning. It will also provide modern testing and examination services and platforms.

25B.24 The component will furthermore offer high-quality and diverse talent pools of candidates by managing rosters across all job families. It will continue to administer the young professionals programme.

25B.25 The above-mentioned work is expected to result in:

- (a) Improved entity capabilities to accountably and efficiently exercise their delegated human resources authorities in support of the entity's mandate;
- (b) Increased efficiencies and measurable reductions in currently existing delays and redundancies in operational human resources processes;
- (c) Strengthened capacities for identification and recruitment of candidates and talent that are the best fit on a timely basis.

### **Programme performance in 2020**

25B.26 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

#### **Increased focus on business continuity: digitization of human resources documents and forms**

25B.27 In the light of the virtual office environment related to the COVID-19 pandemic and associated travel restrictions, entities developed workarounds to facilitate business continuity in a number of key human resources processes. The decentralized ad hoc solutions did not, however, consistently meet expectations, or were not compatible with cross-Secretariat policy requirements. In response, the component focused on new priority activities in order to provide responsive support to Secretariat entities on issues related to business continuity in the new virtual office environment during the COVID-19 pandemic. The subprogramme focused on fast-tracking the recommendations for the migration of tools, processes and reference materials to an online environment. Activities included a comprehensive review of physical human resources forms and documents in order to enable seamless business continuity of key human resources processes requiring physical signatures during and after the pandemic. Specifically, and in collaboration with other offices, the subprogramme has been working on a project to propose alternatives to current physical document and signature requirements in Secretariat-wide human resources processes, with a view to allowing for fully electronic solutions for more than 200 physical forms and documents, save for those requiring physical signature by the host State.

25B.28 Throughout the evolving situation, the component has also launched initiatives to support entities in adjusting to the new virtual office realities in the recruitment and rostering processes, allowing them to conduct assessments with candidates that were previously done in person online. For example, together with its partners in the Office of Information and Communications Technology and the Department of Management Strategy, Policy and Compliance, and taking into account the travel restrictions related to the pandemic, the component enabled the use of a "location-independent" information technology tool which facilitates the

organization of expert panels and the conducting of candidate interviews and assessments on a fully virtual basis.

*Progress towards the attainment of the objective, and performance measure*

25B.29 The above-mentioned work contributed to the objective, as demonstrated by the increased digitization and improved efficiency of human resources administration, forms, processes and candidate assessments (see table 25B.2).

Table 25B.2  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
Processes, forms and systems in the areas of human resources administration and candidate interviewing have physical documents and assessment requirements	Processes, forms and systems in the areas of human resources administration and candidate interviewing have physical documents and assessment requirements	<p>Paperless alternatives exist to physical document requirements in Secretariat-wide human resources processes (including medical, tax, travel and insurance processes), covering more than 230 forms and document types</p> <p>Candidate interviews and assessments, such as expert panels, held through a “location-independent” mechanism in line with policy, virtually gathering all required staff, ex officio panel members, notetakers and candidates from all around the world into virtual interview rooms</p>

**Impact of COVID-19 on component delivery**

25B.30 In response to the pandemic, the component identified new activities to support clients on issues related to COVID-19, within the overall scope of its objectives. The component provided responsive and tailored support to Secretariat entities on issues related to business continuity during the pandemic. With the outbreak of COVID-19, the component faced an increased need among client entities for faster advisory support, adaptive guidelines and extensive communication on policy application under exceptional circumstances related to the pandemic. Since the beginning of 2020, the component has provided fast and responsive advisory support on more than 1,100 COVID-19-related human resources queries from client entities, with a response time of less than one business day, supported more than 25 virtual briefings for entities on the pandemic and collaborated on more than 40 specialized human resources guidance documents, including detailed administrative guidelines and guidance on non-staff personnel, special measures for field entities, the education grant and rest and recuperation. The component has also been providing specific dedicated operational human resources support to entities most in need, typically to field missions, in recognition of their unique and difficult circumstances during the pandemic, and coordinating with colleagues in the Office of Human Resources to develop guidance, taking into account the needs of the field in areas such as travel, alternate and flexible working arrangements and return to premises.

## **Planned results for 2022**

25B.31 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: the right people to be at the right place at the right time<sup>20</sup>**

#### **Programme performance in 2020**

25B.32 The component provided operational support and specialized advice to human resources managers and business partners to enable client entities in the exercise of their delegated human resources authorities. The component also focused on providing client entities with improved and streamlined human resources processes, tools, enterprise systems and related guidance in the areas of recruitment, onboarding, operational workforce planning, non-staff capacities and candidate interviewing, testing and examination.

25B.33 The above-mentioned work contributed to a client satisfaction rate of 93 per cent among Secretariat human resources business partners with the advisory services on human resources management issues and an 82 per cent satisfaction rate for the human resources guidance materials provided to client entities by the component, which met the planned target of clients experiencing satisfactory advisory support and human resources guidance packages based on feedback from client entities, and volumes of service requests, reflected in the proposed programme budget for 2020. Client entities also benefited from improved and simplified human resources processes as indicated by satisfaction rates higher than 80 per cent among survey respondents who indicated having used the newly introduced process improvements in the areas of recruitment and onboarding.

#### **Proposed programme plan for 2022**

25B.34 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will continue to offer diverse and high-quality talent pools of candidates by managing rosters and the young professionals programme. The component will also continue to improve and facilitate efficiencies in various human resources processes through streamlining, simplification and digitization while making effective use of technology, which will also enable business continuity of human resources administration for entities operating in special situations with limited access to a physical office environment. The expected progress is presented in the performance measure below (see table 25B.3).

---

<sup>20</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 29B)).

Table 25B.3  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Peacekeeping missions received dedicated human resources advice and support from the Field Personnel Division of the Department of Field Support, including in the areas of rosters, workforce planning and multidisciplinary visits	Secretariat-wide client entities will receive dedicated support and other advisory services in support of their operational human resources requirements	93 per cent of senior Secretariat human resources business partners are satisfied with the advisory services on entity human resources issues  82 per cent of senior Secretariat human resources business partners are satisfied with the human resources guidance materials provided	Clients are empowered to better execute delegated human resources authority through dedicated operational advisory support, have access to needs-based guidance packages and experience improved and simplified human resources processes	Clients are empowered to better execute their human resources mandates through timely and operationally sound guidance, and benefit from improved and increasingly digitized human resources processes

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: reduced recruitment timelines of Secretariat entities<sup>21</sup>

### Programme performance in 2020

25B.35 The component has designed, developed and launched process changes and innovative tools in multiple iterative cycles of process improvements to make the recruitment process faster and easier, with the objective of significantly reducing the administrative burden for the hiring manager. The component also assisted entities with training materials, advice and support in order to ensure increased use of the more efficient tools and process innovations. In that regard, the component established a dedicated online platform, on which human resources officers, hiring managers and recruiters can access training materials and raise questions about the newly introduced process changes, tools and system innovations.

25B.36 The above-mentioned work contributed to an average recruitment timeline of 158 days, which did not meet the target of 130 days, reflected in the proposed programme budget for 2021. The reason for missing the target may be partly attributed to the liquidity crisis and pause in regular budget recruitments. With over 150 entities in the Secretariat operating in more than 480 duty stations globally and under very different operational circumstances, identifying cross-cutting factors that significantly influenced recruitment timelines and are applicable to all entities is complex.

### Proposed programme plan for 2022

25B.37 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will continue to introduce innovative changes to the recruitment process. The component will also generate recommendations for policy changes that would

<sup>21</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect. 29B)).

enable more transformative changes to the process for improved efficiency and quality. For the process improvements in the online systems to translate into a reduction of recruitment timelines, it is critical that entities engage in self-monitoring of their performance and make full use of the newly introduced improvements and system changes. In addition, managers will need to be sufficiently comfortable and motivated in the use of the new tools. Entities will need to fully embrace and capitalize on the newly introduced improvements and system enhancements. The component therefore recognizes the increased need to drive behavioural change at the level of hiring managers and recruiters. It will strengthen entity-specific communication, advice and capacity-building with regard to the adoption of the new Inspira tools so that entities can fully benefit from the use of the system innovations in ongoing and upcoming recruitment efforts. The expected progress is presented in the performance measure below (see figure 25B.I).

Figure 25B.I

**Performance measure: recruitment timelines, by selection year**

(Number of days)

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

**Result 3: improved recruitment and administration of non-staff personnel****Proposed programme plan for 2022**

25B.38 The component has implemented dedicated support for client entities regarding the use, recruitment and administration of non-staff personnel across the United Nations Secretariat. It has published a comprehensive catalogue on non-staff modalities that provides managers and human resources practitioners with an overview, definition, rules and regulations, processes and information on the delegation of authority. The component also conducted a study on the use of consultants, individual contractors, interns, type II gratis personnel, experts on non-reimbursable loan and government-provided personnel. The study noted recommendations in the area of policy, processes and people (communication and capacity-building), as well as systems.

*Lessons learned and planned change*

25B.39 The lesson for the subprogramme stemming from the study was that it needed to include updated policies, comprehensive guidance materials for human resources practitioners and information materials for programme managers and non-staff personnel, and update existing recruitment modules in Inspira, as well as

implement Umoja as the central system of record to further improve reporting on non-staff capacities. In applying the lesson, the component will focus on client-oriented process guidance and process improvements, as well as intensified capacity-building and sharing of information through a dedicated community of practice. In alignment with the process guidance, the component will also address the update of Inspira functionalities for consultants, individual contractors and interns, and lay the foundation for the implementation of a supply and demand module in Inspira, which will facilitate the coordination with Member States of the provision of gratis personnel to the Organization.

*Expected progress towards the attainment of the objective, and performance measure*

25B.40 This work is expected to contribute to the objective, as demonstrated by experiencing improved and simplified processes and a recruitment model for gratis personnel (see table 25B.4).

Table 25B.4  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
Secretariat-wide client entities manage non-staff personnel without consistent centralized support	Secretariat-wide client entities manage non-staff personnel with dedicated advisory support by one centralized focal point	<p>Clients have access to a dedicated compendium for the recruitment and administration of non-staff personnel</p> <p>Clients benefit from a dedicated focal point for the recruitment and administration of non-staff personnel and set the priorities for the work programme based on their needs</p>	<p>Clients manage non-staff personnel and have access to needs-based guidance packages</p> <p>Clients benefit from a dedicated community of practice which prioritizes their needs and leverages best practice</p>	<p>Clients manage non-staff personnel responsibly and efficiently with the help of specialized operational advisory support and guidance</p> <p>Client entities experience improved and simplified non-staff processes for consultants, contractors and interns</p>

## Deliverables

25B.41 Table 25B.5 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 25B.5

**Subprogramme 1, component 1: deliverables for the period 2020–2022, by category and subcategory***Category and subcategory***E. Enabling deliverables**

**Administration:** provide advice and guidance in response to service requests emanating from entities across the Secretariat on all human resources issues, including escalating to the Department of Management Strategy, Policy and Compliance for authoritative policy interpretation when necessary; administration of centralized competitive examinations and staffing programmes in the six official United Nations languages for at least 2,000 applicants, including the young professionals programme and language proficiency examinations; manage the placement of approximately 60 young professionals programme roster candidates and the reassignment of young professional staff members after their initial two years of service; manage up to 40 centralized generic job openings administered across 23 job families to populate rosters; provide tools, guidance and technical support to client entities regarding workforce planning, organizational design, recruitment strategies and non-staff modalities, including via field or virtual visits to entities; provide operational recommendations and feedback to the Department of Management Strategy, Policy and Compliance on all draft issuances, as well as submit proposed policy revisions based on an analysis of client needs; roll out human resource business processes improvements, including in the areas of recruitment, onboarding and modernization of staff administration, including through the development or use of new tools.

**Component 2****Capacity development and operational training****Objective**

25B.42 The objective, to which this component contributes, is to ensure that all Secretariat entities have the necessary operational capacities to effectively deliver on the mandates entrusted to them.

**Strategy**

25B.43 To contribute to the objective, the component will develop and/or deliver diverse training and capacity development services in partnership with various offices of the Secretariat focused on operational needs, enhance knowledge management and strengthen the effectiveness of operational capacities through support for standardization and process improvement initiatives, incorporating linguistically diverse delivery modalities, where possible. The component will also deliver training programmes on various operational areas, including governance improvement, administration and support areas, supply chain management and eLearning modules for Umoja training across the Secretariat. The component will also work to broaden the linguistic diversity of United Nations personnel and commit to exploring and expanding the range and content of training programmes by optimizing existing in-house expertise.

25B.44 While certain in-person training initiatives will continue where required, the Capacity Development and Operational Training Service plans to develop greater online learning initiatives, with various eLearning, remote delivery and blended course design possibilities to gradually replace instructor-led classroom delivery.

25B.45 The above-mentioned work is expected to result in:

(a) Stronger organizational governance by senior leadership teams, and better trained and empowered staff to support operational decision-making, resource management and improvement of operational processes;

(b) Cost-effective knowledge management and learning management platforms, reaching the widest possible spectrum of day-to-day practitioners across

the Secretariat, and strengthening of awareness and competence with regard to resource stewardship and other operational responsibilities;

(c) Greater linguistic proficiency and diversity, and improved communication capacities across the Secretariat.

## **Programme performance in 2020**

25B.46 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Online knowledge management platform in support of administrative and operational guidance: the Knowledge Gateway**

25B.47 As part of the integrated policy and guidance framework for the United Nations Secretariat, the Knowledge Gateway was launched in April 2020 to assist practitioners in effectively performing their administrative and operational support functions, and to help staff members in their understanding of human resource directives and benefits. By providing guidance in an easy to navigate, thematically organized site, the Gateway enables users to find the relevant guidance needed to execute their functions accurately and effectively. It provides clear linkages between the guidance and the pertinent policies, and focuses primarily on providing practical user-friendly tips for the application and implementation of and compliance with policy. In early 2021, an automated assistant was added to the site, so that users can receive responses to specific questions in real time.

25B.48 Through close collaboration between the subprogramme and subject matter experts from the Department of Operational Support, the Department of Management Strategy, Policy and Compliance and other Secretariat entities, the Knowledge Gateway expanded from 37 administrative and operational support themes to 72 in the first nine months of its existence. Guidance related to the Knowledge Gateway includes standard operating procedures, guidelines, manuals, frequently asked questions, infographics, videos and process flows. Further, the Knowledge Gateway supports the use of peer-to-peer knowledge-sharing through the administrative and operational support communities of practice for practitioners.

### *Progress towards the attainment of the objective, and performance measure*

25B.49 The above-mentioned work contributed to the objective, as demonstrated by a total of 78,111 site visits to the Knowledge Gateway since its launch in April 2020. As of December 2020, over 6,000 staff members and practitioners in the Secretariat had accessed the platform to leverage the administrative and operational support guidance available (see figure 25B.II).

Figure 25B.II

**Performance measure: number of staff members and number of site visits to the Knowledge Gateway since its launch in April 2020 (cumulative)**

### Impact of COVID-19 on component delivery

25B.50 Owing to the impact of COVID-19 during 2020, the roll-out of the subprogramme's second year of operational training and capacity development initiatives was slowed down. While launch of the eLearning component of the Enhanced Training for High-level Operational Support programme was anticipated in late 2020, content revisions took longer than expected and its launch is now anticipated in the third quarter of 2021. The in-person component has been postponed due to ongoing travel restrictions. Most sessions of the governance training programme had to be cancelled, as it requires an in-person presence for the recipient entities and the instructor to achieve its aims and objectives. Human resources-related course design and development for Umoja had to be reconceived and adapted to the remote-working situation, with human resources partners and mentors no longer able to deliver in-person components and in-person events replaced with virtual ones.

25B.51 At the same time, however, the component identified new and modified activities to support clients on issues emerging during the COVID-19 pandemic, within the overall scope of its objective. In particular, the subprogramme changed the approach of language classes and transformed overnight the face-to-face language classes in six languages into online-only classes starting in March 2020. One positive aspect has been the rapid acquisition by United Nations Secretariat staff of skills connected to the use and adaptation of online platforms and applications, facilitating the delivery of learning and training initiatives remotely, online or in a blended format. Regarding the governance training programme, three small entities agreed to participate in a pilot which involved the remote delivery of the programme and shorter, modified content in the second half of 2020.

### Planned results for 2022

25B.52 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

**Result 1: strengthened capacities in developing and adopting strategic, systematic and better approaches to doing business<sup>22</sup>**

**Programme performance in 2020**

25B.53 The component has executed the design, development and/or delivery of 35 capacity development projects in the fields of environment, finance, human resources, supply chain management, business process improvement, language and communication, medical and occupational health, information and communications technologies, project management, audits, boards of enquiry, organizational governance, knowledge management, the Enhanced Training for High-level Operational Support programme and facilities management, leveraging the centralized funding made available by the General Assembly for the enhancement of capacity development under the new paradigm introduced by the management reform.

25B.54 The above-mentioned work contributed to the delivery of fully integrated operational capacity development programmes across 14 operational themes that address capacity gaps and support decentralized authorities, which exceeded the target of nine functional areas reflected in the proposed programme budget for 2020.

**Proposed programme plan for 2022**

25B.55 The component will continue the work related to the planned result, in line with its mandate, and will assist clients in building and improving the operational capacities needed to exercise authority in an accountable manner for strengthened capacities to develop and adopt a systematic and improved approach to conducting business; increase skills, knowledge and expertise in performing their functions; and strengthen accountability. The expected progress is presented in the performance measure below (see table 25B.6).

Table 25B.6  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Operational capacity development programmes delivered but inconsistent across pillars in comprehensively assessing capacity gaps and providing programmes that integrate business process improvement, training, systems and tools, including knowledge management	Fully integrated operational capacity development programmes delivered to address capacity gaps in three functional areas  Initial capacity development and support programmes launched in support of decentralized authorities	Delivery of fully integrated operational capacity development programmes across 14 operational themes that address capacity gaps and support decentralized authorities	Fully integrated operational capacity development programmes underpinned by a knowledge management platform that offers a better user experience and addresses capacity development needs for practitioners and managers	Clients access integrated operational capacity development programmes, including processes supported by enterprise resource management  Knowledge management platform with increased functionality provided through the application of state-of-the-art technologies

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

<sup>22</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 29B)).

**Result 2: further trend towards eLearning courses<sup>23</sup>****Programme performance in 2020**

25B.56 Among the various online offerings, the component has supported the development of a human resources certification programme for practitioners across the global Secretariat. A new online course aimed at expanding the eLearning opportunities for human resources partners was rolled out in June 2020. Entitled “Onboarding in Umoja”, the course is designed to refresh the knowledge of human resources partners and/or obtain corresponding functional roles for performing the onboarding actions in Umoja. In addition, the component introduced the course “Resource management for certifying officers”, which is designed to emphasize the financial management responsibilities of certifying officers for the operations of the entity, with the online course covering topics across various functional areas such as travel and human resources, using scenario-based illustrations.

25B.57 The above-mentioned work contributed to online training of 1,200 human resources partners who registered for the “Onboarding in Umoja” course and applied various aspects of the onboarding procedures in Umoja, which exceeded the planned target of 850 staff reflected in the proposed programme budget for 2021.

25B.58 Furthermore, the above-mentioned work also contributed to the enrolment of 833 staff members in the “Resource management for certifying officers” course, of which 331 staff members successfully passed the course.

**Proposed programme plan for 2022**

25B.59 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will enhance learning and development opportunities for staff that blend content and subject matter across functional areas, including finance, budget, human resources and supply chains, in support of better decision-making and the enhancement of operational management skills. This new approach is also aimed at leveraging business intelligence with knowledge in the use of the enterprise resource planning system, and Inspira primarily, to bring together a platform for learners to better assess the impact of decision-making in the entity as a whole. The courses will incorporate a blended instructional design, with an emphasis on online courses to reach a greater audience, but through virtual or in-person training where necessary.

25B.60 To contribute to this progress, the component will refresh the Umoja training courses, with an emphasis on eLearning solutions, and undertake needs assessments of staff and entities, identifying opportunities for collaboration across functional areas and across other learning capacities of the Secretariat. The expected progress is presented in the updated performance measure below (see figure 25B.III).

---

<sup>23</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect. 29B)).

Figure 25B.III

**Performance measure: total number of United Nations staff enrolled and number of staff passing the “Resource management for certifying officers” course (cumulative)**

### Result 3: integration of Umoja training

#### Proposed programme plan for 2022

25B.61 Through the end of 2020, the component was involved primarily with the development of training capacity for human resources business partners and mentors at United Nations entities. The General Assembly, in its resolution [75/253](#), recommended the establishment of a sustainable structure within the component in support of Umoja and the mainstreaming of business and training resources. This resulted in resources to improve the design and delivery of Umoja training courses for various functional areas, including the integration of aspects of enterprise resource planning systems with related policies and operational procedures. The component, in close coordination with the respective business process owners, will develop required training courses to ensure that Secretariat staff members are equipped with the proper knowledge for effective use of Umoja for United Nations operational processes.

#### *Lessons learned and planned change*

25B.62 Based on assessments, the lesson for the component was the need to refresh out-of-date Umoja instructor-led training sessions, integrate them with other operational training sessions and expand the range of training opportunities in support of effective decision-making processes. Umoja role provisioning needs to be expanded and expedited through the availability of online certification programmes. In applying the lesson, the component will place an emphasis on the design of the self-paced eLearning courses by combining various learning methods, interactive materials, training videos, practical exercises, skill boosters, quizzes and participant feedback. The component will also embark on a structured assessment of how best to integrate Umoja-related needs into broader training offerings. The subprogramme will further enable human resources partners to resolve Umoja human resources issues in a more effective manner without escalating them to Umoja human resources service desks, through the Umoja human resources certification training, integrated with related human resources policies and operational procedures,

#### *Expected progress towards the attainment of the objective, and performance measure*

25B.63 This work is expected to contribute to the objective, as demonstrated by a reduced number of annual human resource services requests in Umoja (see figure 25B.IV). The component forecasts a reduction of 5 per cent in the number of

Umoja human resources tickets per year attributable to the quality of self-paced Umoja human resources eLearning courses, the availability of online training for human resources partners in any geographical location and the strengthening of the knowledge of the network of human resources business experts and mentors in United Nations entities.

Figure 25B.IV

**Performance measure: number of human resources service requests in Umoja (annual)**

## Deliverables

25B.64 Table 25B.7 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 25B.7

**Subprogramme 1, component 2: deliverables for the period 2020–2022, by category and subcategory**

*Category and subcategory*

### E. Enabling deliverables

**Administration:** in-person, online and blended capacity development programmes and initiatives; in-person and virtual governance improvement programme for approximately 100 senior leadership staff annually from 18 United Nations Secretariat entities; instructor-led and online language and communication training in all six official United Nations languages, including direct provision at United Nations Headquarters and other duty stations and additional promotion of comparable online language learning licences in 14 Secretariat entities for 1,000 staff members; training in the use of updated and simplified enterprise system workflows (like Inspira and Umoja), applying business process improvement methodologies; continuous promotion of best practices to simplify and harmonize operational processes, including through the expanded dissemination and customization of guidance through the Knowledge Gateway.

## Component 3

### Health-care management and occupational safety and health

#### Objective

25B.65 The objective, to which this component contributes, is to ensure the health and well-being of the United Nations workforce.

## Strategy

25B.66 To contribute to the objective, the component will undertake comprehensive and detailed credentialing of United Nations health-care personnel and will implement systems for ensuring the appropriate qualifications and skills of health-care personnel who deploy to the field. The component will also provide leadership and technical support to the medical workforce of the United Nations system, including field missions (Secretariat and troop- and police-contributing country facilities), and United Nations clinics administered by the United Nations Development Programme (UNDP). The component will implement health-care quality and patient safety standards in all United Nations health-care facilities above level 1+ care. Compliance with these standards will be assessed through the review of health-care facilities, the training of medical officers in assessment methodologies and the review of data from the hospital evaluation tool. This component will further implement a clinical adverse event reporting system to support data collection for surveillance and reporting of risks, adverse events and other indicators of harm at different levels of health services in order to provide safer health care.

25B.67 To contribute further to the objective, the component will review, develop and promote programmes and policies to collect data on and reduce the burden of infectious disease among United Nations personnel worldwide, as well as develop evidence-based chronic disease prevention and health promotion programmes for implementation by United Nations medical services globally. The implementation of these activities will further strengthen the response and preparedness of United Nations duty stations for future public health emergencies, using lessons learned from the COVID-19 pandemic. The component will also implement modernized business processes, including the collection of work-related incident data using an electronic occupational safety and health record system; the improved capture of the causes of the first 20 days of sickness absence; and the integration of systems covering incidents, sickness absences, work-related medical evacuations and service-incurred compensation.

25B.68 The component will support clients on issues related to COVID-19 by maintaining awareness of developments in public health and the clinical management of COVID-19 and by providing expert advice on all aspects of United Nations operations in the context of a global pandemic. This includes circumstances in which COVID-19 affects Member State programmes or personnel (such as troop rotations), the use of protective equipment, diagnosis, isolation, quarantine and contact tracing, virus testing, vaccination, medical treatment and a dedicated COVID-19 medical evacuation capability. These activities include written guidance, virtual reviews of relevant sites and the provision of new services and equipment. The component will also undertake a COVID-19-specific review of the medical workforce, its training and the clinics and hospitals that support United Nations personnel. At United Nations Headquarters in New York, it will undertake workplace and meeting risk assessments in order to support the in-person components of the General Assembly and its committees, as well as other bodies such as the Security Council. It will also provide COVID-19 testing capability to support contact tracing for Member State delegations to the United Nations in New York.

25B.69 The above-mentioned work is expected to result in:

(a) A reduced number of adverse events and preventable harm through an improvement in the quality of health-care services delivered in United Nations operations worldwide in the areas of women's health (in support of the strategy on gender parity), mental health (in support of the strategy on mental health) and

emergency response (in support of the strategy on the safety and security of personnel);

(b) A reduction of adverse events and preventable harm by enhancing the health and well-being of personnel, thereby contributing to reduced absenteeism and presenteeism, and improved productivity in the workplace;

(c) Improved and targeted interventions to mitigate occupational health and safety risks.

25B.70 The planned support on issues related to COVID-19 is expected to result in improved clinical management of COVID-19 cases in United Nations health-care facilities, improved compliance with public health and occupational health measures to reduce the risk of COVID-19 among United Nations personnel and improved responsiveness to COVID-19-related health-care workforce and policy needs.

## **Programme performance in 2020**

25B.71 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **COVID-19 pandemic response and management**

25B.72 During 2020, the component invested significant resources in the preparedness and readiness of United Nations duty stations and health facilities to facilitate an effective response to the COVID-19 pandemic, to protect staff health and safety and to help detect and slow down transmission of the virus.

25B.73 The component supported United Nations system-wide COVID-19 response efforts throughout 2020, including through the design and implementation of an electronic COVID-19 case-tracking system to capture laboratory-confirmed cases in the United Nations system globally; and development of more than 60 COVID-19 technical and operational guidelines for United Nations policymakers, managers, health-care workers and personnel, including on planning and preparedness, risk mitigation strategies, public health and outbreak prevention and management, clinical diagnosis and management, personal protective equipment, meetings and gatherings, and management of psychosocial needs. Guiding the response, the component also provided services that included risk assessments for the General Assembly, testing and contact tracing at United Nations Headquarters in New York and global medical evacuation services.

25B.74 Extensive training, awareness-raising and communication to United Nations personnel and medical staff were undertaken through weekly COVID-19 webinars (in which the average participation was more than 200 United Nations health-care workers per webinar), the development of communications materials (e.g. posters, answers to frequently asked questions, presentations) and support of the United Nations COVID-19 website. A new COVID-19 eLearning platform for both iOS and Android users was also created to equip all United Nations personnel, including peacekeepers, with the knowledge and skills to protect themselves and their colleagues from COVID-19 infection.

25B.75 The component further provided operational guidance to all United Nations duty stations on the investigation and management of COVID-19 outbreaks. An electronic COVID-19 outbreak reporting app was created with partners for seamless electronic reporting by field medical and public health personnel of COVID-19 outbreaks occurring in United Nations locations globally. In addition, a COVID-19 monitoring and verification app was created for monitoring the compliance of field

missions with all necessary public health measures, particularly with regard to uniformed personnel in contingent settings, who were at high risk due to congregate settings allowing limited physical distancing. The component's counselling office further shifted its usual work type and delivery to ensure that COVID-19-related stress was addressed, resulting in 4,519 individuals participating in 669 online psychosocial training sessions held throughout the year.

25B.76 Due to the restrictions on global travel, the component devised an innovative approach to COVID-19 prevention efforts for field missions. Starting in June 2020, comprehensive virtual (video) public health walkthroughs were conducted by the component, covering 22 duty stations, 43 contingents and 56 level 1 clinics across six field missions (United Nations Multidimensional Integrated Stabilization Mission in the Central African Republic (MINUSCA), United Nations Multidimensional Integrated Stabilization Mission in Mali (MINUSMA), United Nations Organization Stabilization Mission in the Democratic Republic of the Congo (MONUSCO), United Nations Assistance Mission in Afghanistan (UNAMA), United Nations Mission in South Sudan (UNMISS) and United Nations Support Office in Somalia (UNSOS)). Each walkthrough included comprehensive stakeholder interviews with high-ranking civilian and military officials, and hours of "live" video walkthroughs of contingent camp accommodations, isolation and quarantine facilities, communal dining and prayer areas, and contingents' level 1 clinics (including triage, screening and isolation areas). Checklists, based on United Nations and World Health Organization (WHO) standards and guidelines, were developed to guide the interviews and walkthroughs. At the end of each mission's walkthrough, a comprehensive report on best practices and recommendations for improvement was compiled and shared with the mission and other locations for collective learning.

25B.77 In July 2020, the component also conducted further virtual walkthroughs of 21 level 1+, level 2, level 2+ and level 3 hospitals in 11 missions. The patient tracer methodology was used to observe (through role-play) the protocols, procedures and patient flow that United Nations medical staff utilize when receiving suspected COVID-19 patients. Observations collected were used to form a complete evaluation of each hospital's readiness in alignment with United Nations health-care quality and patient safety standards and the WHO rapid hospital readiness checklist for COVID-19.

*Progress towards the attainment of the objective, and performance measure*

25B.78 The above-mentioned work contributed to the objective, as demonstrated by the compliance of all 21 hospitals with the WHO rapid hospital readiness checklist for COVID-19 (see table 25B.8). From the start of the pandemic to the end of 2020, the United Nations system recorded a total of 8,473 laboratory-confirmed COVID-19 cases among United Nations personnel and dependants. Within this group, there were 92 deaths, an overall case fatality rate of 1.1 per cent. While it is difficult, in the midst of the pandemic, to ascertain precisely the impact and effectiveness of the component's global mitigation actions, the combination of the above measures likely contributed significantly to the prevention of COVID-19 morbidity and mortality among the United Nations population globally.

Table 25B.8  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
—	—	100 per cent of assessed United Nations hospitals comply with the WHO rapid hospital readiness checklist

### Impact of COVID-19 on component delivery

25B.79 Owing to the impact of COVID-19 on travel during 2020, the component postponed the delivery of the master trainer course on buddy first aid and the field medical assistant courses. Due to COVID-19-related travel restrictions, the component was not able to provide in-person advice and support to missions and duty stations on preventive measures and outbreak management support. Furthermore, the training to be provided to the chief medical officers in order for them to become assessors of the health-care quality and patient safety standards was postponed. Due to the impact of COVID-19, a comprehensive review of the public health elements of the Medical Support Manual for United Nations Field Missions, a document which guides all troop-contributing countries, was postponed.

25B.80 At the same time, however, the component identified new activities to support clients during the pandemic. It developed more than 60 COVID-19 guidance documents to advise United Nations personnel, health-care providers and United Nations organizations on infection prevention and control, personal protective equipment, outbreak management, basic precautionary measures, isolation and quarantine, and testing and clinical evaluation and management. A novel case-reporting dashboard and outbreak reporting tools were created to capture COVID-19 cases from all United Nations entities, including Secretariat and non-Secretariat entities.

25B.81 Additionally, dedicated public health experts supported hundreds of outbreak investigations globally and provided technical support to missions and duty stations. In 22 duty stations, comprehensive virtual walkthroughs of 43 contingents' camp settings and 56 level 1 clinics were conducted in six missions (MINUSCA, MINUSMA, MONUSCO, UNAMA, UNMISS and UNSOS). These inspections looked at the implementation of COVID-19 outbreak preventive measures. The component also created a new monitoring and verification tool to assist contingents in tracking detailed adherence to COVID-19 prevention measures in their missions.

25B.82 Virtual walkthroughs were also conducted at 21 hospitals in 11 missions to ensure that WHO requirements regarding hospital preparedness for COVID-19 were met. The assessment of a field hospital's compliance with the United Nations health-care quality and patient safety standards was also conducted virtually. Seventy-eight global webinars were organized for medical personnel in order to improve capacities to support Member State and United Nations personnel on issues related to COVID-19, including outbreak management, infection control, treatment of severe cases and vaccine administration.

25B.83 Regarding occupational safety and health activities, 2,278 in-home and on-site COVID-19 polymerase chain reaction (PCR) tests were conducted for staff of permanent missions to the United Nations in New York, United Nations system personnel and household members. In addition, 283 COVID-19 cases reported by staff were followed up clinically. Seventy-five events required contact tracing, and appropriate testing was undertaken. The COVID-19 reintegration plan was developed

for United Nations Headquarters. In support of the General Assembly, 105 meeting risk assessments were conducted. Globally, 206 COVID-19 medical evacuations were directly or indirectly supported. To support reporting globally, an electronic system was developed for the confidential self-reporting of COVID-19 cases and vaccinations in order to enable more accuracy in the United Nations system COVID-19 dashboard.

25B.84 Staff counsellors extended their consultations and training to all United Nations staff, with expanded offerings in different time zones and the incorporation of sessions in French. Through these efforts, 4,519 staff in 67 countries received mental health-related support in 2020. The new activities and deliverables contributed to results in 2020, as specified in the emerging result above.

## **Planned results for 2022**

25B.85 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: improvement in survival of peacekeepers after injury, through integrated trauma care<sup>24</sup>**

#### **Programme performance in 2020**

25B.86 The component has developed a course and a handbook to guide the training of field medical assistants in order to enable advanced first aid to be delivered in the field. This is a capability that is not uniformly present in all troop- and/or police-contributing countries, but it is critical to the survival of the injured. The ability of field medical assistants to start fluid replacement at the point of injury, or to secure an airway to keep a casualty breathing, can make the difference between the survival and death of the injured. The advanced first aid course, which is at a higher level than the buddy first aid course, helps field medical assistants to develop and maintain the right skills to provide adequate care at the point of injury in field duty stations, thereby improving survival rates. The second and third courses to validate the training material for the field medical assistant course were postponed due to travel restrictions related to COVID-19.

25B.87 The above-mentioned work contributed to the delivery of the first buddy first aid course in Morocco in February 2020, which all 21 trainees passed successfully, which exceeded the planned target reflected in the proposed programme budget for 2020. Reporting against the planned targets of increasing survival rates at the point of injury as well as an increased percentage of casualties who arrive at a hospital alive and who are discharged alive has not yet been possible due to methodological difficulties in collecting the data.

#### **Proposed programme plan for 2022**

25B.88 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will conduct the second and third field medical assistant pilot courses and adjust the field medical assistant curriculum based on the pilot courses in 2021 and 2022, and then proceed with the planned handover to subprogramme 3 for future implementation. The expected progress is presented in the performance measure below (see table 25B.9).

<sup>24</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect. 29B)).

Table 25B.9  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Buddy first-aid course: 11 new master trainers certified, now authorized to train trainers using the approved curriculum in their respective troop-contributing countries	Buddy first-aid course: 10 master trainers certified; first troops fully trained in the new buddy first aid standard deployed, resulting in improved standard of care at point of injury; pilot course for medical assistants in the field and courses for master trainers developed and delivered, resulting in troop-contributing countries having a training framework using the approved course curricula	Buddy first aid training was conducted in Morocco in February 2020. A total of 21 trainees attended the course, all of whom passed and received their certification	Field medical assistant course; launch of the second pilot/proof of concept and implementation of the trauma register system to track casualties who arrive at a hospital alive	Field medical assistant course; launch of the third pilot/proof of concept; adjustment of the field medical assistant course curriculum based on lessons learned from pilot courses; increased number of field medical facilities providing inputs to the trauma registry

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: high-quality health care through ensuring a competent medical workforce<sup>25</sup>

### Programme performance in 2020

25B.89 In 2020, the component developed and implemented a standard operating procedure to guide the Headquarters-level credentialing of health-care workers deployed to all field duty stations. In addition, under the delegation of authority framework, a separate standard operating procedure for chief medical officers and managers of UNDP-administered clinics was developed on the decentralized credentialing of medical personnel deployed to the field. The component also created a technical skills framework on the minimum professional standards for medical personnel to better guide the credentialing process, and to support hiring managers in the field during the recruitment process for health-care workers. The component also rolled out the health-care quality and patient safety standards to hospitals in the field. As of 2020, a total of 79 hospital commanders had been trained to implement these standards in their health-care facilities.

25B.90 The above-mentioned work contributed to 2,300 health-care worker clearances being processed by the Department, which did not meet the planned target of 3,230 health-care workers credentialed, reflected in the proposed programme

<sup>25</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect. 29B)).

budget for 2021. This was due to reduced and/or postponed rotation of the medical staff of troop- and police-contributing countries due to COVID-19.

### **Proposed programme plan for 2022**

25B.91 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will improve the credentialing process in compliance with the standard operating procedures and the technical skills framework and will begin implementation of the delegation of authority to chief medical officers and UNDP health managers. The component will also ensure that credentialed health-care staff work in health-care facilities that meet the United Nations health-care quality and patient safety standards by developing, updating and maintaining an eLearning platform for the training of health-care professionals in implementing the standards in United Nations health-care facilities. The work will also evolve to include the development of an eLearning platform for at least 10 assessors of the standards. The expected progress is presented in the performance measure below (see figure 25B.V).

Figure 25B.V

**Performance measure: total number of health-care workers credentialed (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: occupational safety and health incident-reporting system linking workplace incidents with related health data**

#### **Proposed programme plan for 2022**

25B.92 In order to identify and address the workplace issues that result in injuries, illnesses and costs, the component has developed an electronic incident reporting system on the same platform as its electronic medical records system, as required by the Secretary-General's bulletin on the introduction of an occupational safety and health management system (ST/SGB/2018/5). The system supports desktop and mobile applications through which staff can report workplace-related health and safety accidents, incidents and exposures for the attention of medical staff. Medical staff in turn can trigger incident reports if a patient's illness or injury is indeed considered work-related, and can classify incidents according to medically established categories. The component has established a mechanism to link each incident with medical cases, including for incidents in which more than one person is affected. The system links the incident to associated sick leave, medical evacuations or compensation costs, providing for the first time an evidence-based assessment of

the financial and operational impact of workplace injuries and illness lasting longer than 20 days. The component is finalizing procedures and user guides to ensure consistency in use, with the aim of reducing the costs to the Organization associated with sick leave.

*Lessons learned and planned change*

25B.93 The lesson for the component was that personnel capability and reporting capacity must align. While the software development is complete, and the workflows are in place, the analysis of more than 200 incidents recorded during 2020 has been deferred due to personnel resourcing constraints associated with the COVID-19 pandemic. However, 10 actionable mitigation measures were put in place in 2020, most of which were pandemic-related. In applying the lesson, the component will increase the responsibility of entities to review and analyse incidents, including through the identification of actionable mitigation measures, rather than relying on Headquarters to perform these tasks. The component will undertake beta testing and piloting in missions, and train safety officers and safety focal points on the use of the system. In 2022, the component will further refine data entry and analysis, introduce the programme in locations where professional safety officers exist and continue to develop reports and dashboards that provide managers at all levels with near real-time health and safety data that can be used to meet the Organization's duty of care to its staff and to those who are affected by its work.

*Expected progress towards the attainment of the objective, and performance measure*

25B.94 This work is expected to contribute to the objective, as demonstrated by a total of 300 actionable mitigation measures completed and verified in 2022 (see figure 25B.VI).

Figure 25B.VI

**Performance measure: number of actionable mitigation measures completed and verified per year (annual)**

**Deliverables**

25B.95 Table 25B.10 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 25B.10

**Subprogramme 1, component 3: deliverables for the period 2020–2022, by category and subcategory***Category and subcategory***E. Enabling deliverables**

**Administration:** initiatives emerging from requests of supported entities.

**Occupational safety, health and well-being:** credentialing process for health-care personnel, in compliance with the standard operating procedures and the technical skills framework; initiation of the delegation of authority to chief medical officers and UNDP health managers for the credentialing of health-care personnel; medical clearance of 3,200 personnel for recruitment and travel, and immunization of about 3,300 personnel annually; psychosocial services, including mental health services; oversight of occupational health and safety services, including risk assessments, policies, tools, training, preparedness assessments for 22 duty stations, incident reporting systems, incident investigation, auditing of 22 duty stations and vendor compliance with policies, guidelines and quality/safety standards; oversight of field medical services, including auditing of 20 field medical evacuations and assessment of three field hospitals for compliance with health-care quality and patient safety standards; training of all hospital commanders in the implementation of health-care quality and patient safety standards and training of 10 United Nations medical personnel in assessing those standards; clinical governance of field health-care facilities through clinical audits and clinical pathways; review of patient experience surveys to improve the quality of care in health-care facilities; audit of long-term sick leave cases in 20 field duty stations; organization of monthly educational webinar sessions for medical personnel; training 60 persons on occupational health and safety issues; organization of field occupational safety training course; comprehensive guidance provided for public health emergencies; and assessment of emergency preparedness, including for mass casualty events, to identify capability gaps.

## **Subprogramme 2**

### **Supply chain management**

## **Component 1**

### **Integrated supply chain management**

### **Objective**

25B.96 The objective, to which this component contributes, is to ensure the availability of the right goods and services at the right place, the right time and the right costs for effective and efficient mandate implementation by the United Nations Secretariat client entities.

### **Strategy**

25B.97 To contribute to the objective, the component will continue to develop and implement category management strategies, an industry standard practice with a strategic approach to sourcing solutions by organizing the acquisition of related goods and services into discrete groups by area of spending, supply markets and fulfilment of client needs. The component will also refine and update the global demand and acquisition plan, determining total requirements of client entities and identifying sourcing options. The component will continue to maintain the list of strategic goods and services sourced through Headquarters operational support to improve risk management in procurement. Furthermore, the component will intensify its outreach efforts, including through targeted outreach to Member States based on a category management approach and further strengthening of the use of business seminars, in particular for vendors from developing countries and countries with economies in transition.

25B.98 The component plans to support clients on issues related to COVID-19 by establishing and managing charter agreements for the continuation of support for medical evacuation, including for COVID-19, as applicable, and provide procurement support to clients for the sourcing and delivery of medical supplies and equipment.

Also, throughout 2022, the component will continue to support the vaccination programme for United Nations personnel. The focus will remain on procurement and distribution of the vaccine and ancillary products such as cold chain equipment, needles and syringes. It is anticipated that United Nations staff and dependants entitled to be vaccinated through a United Nations programme will have received their vaccine by the end of the second quarter of 2022. In terms of facilities and infrastructure, a rethinking of accommodation configurations, as well as availability of service to ensure high hygienic standards, will require the provision of medical support and engineering expertise to design and establish, or refurbish, field camps and clinics, as well as the provision of medical supplies and equipment. Based on the lesson learned from the COVID-19 pandemic, the component will continue reviewing and revising its guidance and procedures, and adapt them to high-threat environments and movement limitations, while maintaining core operations.

25B.99 The above-mentioned work is expected to result in:

(a) Improved alignment of the needs of clients with the capability of suppliers, and the availability of the right goods and services at the right time, while taking into consideration whole life-cycle costs;

(b) Improved visibility of global requirements and improved guidance for client entities on cost-effective and efficient sourcing and delivery solutions, such as global/regional systems contracts, local procurement, letters of assist or memorandums of understanding, or the leveraging of existing stock maintained in strategic deployment stocks or United Nations reserves or surplus from other entities, thereby avoiding the cost of additional procurement;

(c) Optimal sourcing options for client entities to satisfy client demand in the most efficient and effective manner, and the avoidance of an organization's reputational risk in sensitive areas such as arms and ammunition and life-saving drugs, including blood and blood-related products, and the standardization of goods and services based on multiple clients' requirements;

(d) A more diversified vendor roster for different categories of goods and services, facilitating effective international competition.

25B.100 The planned support on issues related to COVID-19 is expected to result in ensuring that an adequate supply of vaccines, medical equipment and supplies and transportation services remains available to support the activities of clients.

## **Programme performance in 2020**

25B.101 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Timely response to the COVID-19 pandemic: the first resilience test of United Nations supply chain management**

25B.102 The year 2020 was the first real test of resilience for the component in providing timely medical supplies, testing kits and equipment to its clients in response to the COVID-19 pandemic. From the early stage of the pandemic, the component proactively engaged with client entities to prepare for and be able to rapidly and effectively respond to COVID-19. A supply chain impact analysis was conducted to guide missions on the early ordering of goods and services, along with stock replenishment to mitigate the potential impacts of airspace and border closures. The medical supplies and equipment required in response to the pandemic were sourced

and delivered through intense collaboration between the Logistics and Procurement Divisions, the United Nations Logistics Base and other stakeholders. The proactive action to centralize procurement activities played a significant role in the timely response to field mission requirements, while ensuring cost-effective solutions. For example, the United Nations finalized contracts for ventilators in late March 2020, at the same time that major buyers were entering the market with huge orders. Just a few weeks later, the market was completely saturated with orders, and credible suppliers were unable to commit to delivering supplies before September or October 2020.

*Progress towards the attainment of the objective, and performance measure*

25B.103 The above-mentioned work contributed to the objective, as demonstrated by the sourcing and delivery of medical equipment and supplies to fulfil clients' requirements, the establishment of standby air charter and air ambulance agreements to fulfil 24/7 medical evacuation support and passenger transportation needs, and the provision of guidance on other operations within the COVID-19 pandemic environment, such as isolation wards, quarantine facilities, the configuration of barracks for troop- and police-contributing countries, patient transfer, and storage and transportation of human remains (see table 25B.11).

Table 25B.11  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
—	—	<p>Medical supplies and equipment for all client entities, including peacekeeping missions, special political missions, regional commissions and offices away from headquarters</p> <p>117 United Nations staff members medically evacuated through 11 standby air charter agreements and 10 air ambulance services</p>

**Impact of COVID-19 on component delivery**

25B.104 Owing to the impact of COVID-19 during 2020, the component postponed deployments, rotations and repatriations from March to June 2020, resulting in a backlog of movements of 168 units and in excess of 80,000 passengers, along with the cancellation of flight service vendor on-site audits, bidders conferences, advance assessment and predeployment visits to troop- and police-contributing countries to address the critical needs of clients to respond to the COVID-19 pandemic, onboarding of staff due to travel restrictions, and business seminars to diversify the pool of potential vendors, particularly those from developing countries and countries with economies in transition. Key projects associated with renewing contracts for medical equipment and medical consumables were suspended for most of the year, and therefore delayed by approximately 12 months. Additionally, and although substantial progress had been achieved, completion of the category management strategies was delayed by the need to respond to the COVID-19 pandemic first, and the vaccination effort. These changes had an impact on the programme performance in 2020, as specified under results 1 and 2 below.

25B.105 At the same time, however, the component modified activities to support client entities on issues related to the COVID-19 pandemic, within the overall scope of its objectives, namely by refocusing its efforts from in-person interactions to web-based solutions, where applicable, and organizing virtual workshops with vendors, particularly vendors from developing countries and countries with economies in transition, which allowed the workshops to be held safely despite the pandemic. The component also provided support to clients in responding to COVID-19 by centralizing the sourcing and distribution of medical supplies and equipment; ensuring supply chain resilience, including through supply chain impact analysis to respond to COVID-19; identifying and making quarantine and isolation arrangements; freight forwarding and medical transportation; managing and transporting human remains; and disposing of COVID-19-related hazardous medical waste. The component negotiated standby arrangements with regard to air charter agreements, including air ambulances, provided 24/7 support to the United Nations System-Wide Task Force on Medical Evacuations in Response to COVID-19 that supported 117 medical evacuations from all parts of the world, and established and managed 12 global contracts for standby air arrangements and 11 contracts for air ambulances. These deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

## **Planned results for 2022**

25B.106 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: towards an efficient and effective supply chain function<sup>26</sup>**

#### **Programme performance in 2020**

25B.107 The component has continued to improve the supply chain planning framework by developing tailored solutions based on a client segmentation approach to providing support services to all the entities in the United Nations Secretariat. In 2020, the global supply chain plan (formerly the global demand and acquisition plan), in addition to encompassing peacekeeping missions, included for the first time the demand, source and delivery plans of special political missions, thus maximizing the benefits of plan rationalization using a category management approach. The component continuously analysed the global demand for goods and services and offered a clearly marked sourcing solution based on global and regional system contracts, through local procurement or by leveraging existing reserves and stocks, and surplus from other entities, or through Member States under letters of assist or memorandums of understanding. The component also issued improved guidance to client entities, with an updated procurement manual, and detailed supply chain operational guidance documents on thematic areas such as cooperation, enabling client entities to efficiently perform their delegated authorities. This was further strengthened with a virtual conference of chief procurement officers and the launch of a procurement community of practice, rounding out the strategic advice towards implementation of the client entities' mandates.

25B.108 The above-mentioned work contributed to the development of a total of 15 category strategies, which included the refinement of and updates to six categories from 2019, which did not meet the target of 20 category strategies reflected in the

---

<sup>26</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 29B)).

proposed programme budget for 2020. The target of 20 category strategies could not be met due to the reprioritization of the component's work to respond to the COVID-19 pandemic.

### Proposed programme plan for 2022

25B.109 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component's work will evolve to include the conduct of follow-up activities to implement the category strategies developed during 2021. By 2021, the component expects to complete the development of all category strategies identified and proceed in 2022 with the implementation plan. The component will be developing sourcing solutions, for example, systems contracts, turnkey contracts or letters of assist with Member States, to satisfy the different client segments. The expected progress is presented in the performance measure below (see table 25B.12).

Table 25B.12  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
—	8 category strategies for sourcing available	9 additional category strategies for sourcing available  6 categories refined and promulgated	30 additional category strategies for sourcing available	Readily available sourcing solutions for goods and services to satisfy the requirements of different client segments (special political missions, peacekeeping missions, offices away from headquarters and regional economic commissions)

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 2: improved planning with long-term forecasting enabled by Umoja and a systematic approach to enhance outreach efforts for United Nations procurement in developing countries and countries with economies in transition<sup>27</sup>

#### Programme performance in 2020

25B.110 The component has worked on innovative solutions, maximizing economies of scale through continuous improvement of the supply chain planning framework by developing tailored solutions based on a client segmentation approach to provide support services to all the entities in the United Nations Secretariat. The component conducted 21 business seminars for vendors from developing countries and countries with economies in transition and developed a set of key performance indicators measuring, among other things, the number of seminar attendees registering in the United Nations Global Marketplace and the number of attendees invited to tenders in different categories, including with a specific focus on areas such

<sup>27</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect. 29B)).

as disaster relief, security and logistics and health care. Satisfaction surveys were shared with all business seminar participants in the six official languages of the United Nations to explore opportunities for improvement with regard to any future engagement with potential vendors. The component also developed standard operating procedures for vendor outreach activities and established a partnership with a global non-governmental organization to encourage women-owned businesses to participate in procurement opportunities. Additionally, the component enhanced the vendor registration process by allowing vendors to submit required supporting documents to register as a potential vendor in any of the six official languages and further increased transparency by conducting public tender opening ceremonies virtually.

25B.111 The above-mentioned work contributed to the roll-out of the global demand and acquisition planning functionality, which was enabled by Umoja Extension 2, which met the target planned for 2020 and will lead to improved data visibility and better sourcing options going forward and result in more timely delivery of goods and services at competitive pricing.

### **Proposed programme plan for 2022**

25B.112 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will leverage the data collected through the category management approach and strengthen coordination with the Member States and chambers of commerce. The expected progress is presented in the performance measure below (see table 25B.13).

Table 25B.13  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
First roll-out of the global demand and acquisition plan to provide full and timely visibility of requirements	Refinement of the global demand and acquisition plan with potential improvement in organizational efficiencies through possible shifting from new procurement to existing sourcing	Global demand and acquisition plan enabled by Umoja Extension 2 to provide improved data visibility and sourcing options for the timely delivery of goods and services at a competitive cost	Global demand and acquisition plan with forecasting capability based on consumption pattern and thereby improved utilization of cost-effective sources by client entities for the timely availability of the right goods and services required by clients	Better forecasting capability, allowing for the utilization of cost-effective sources by client entities for the timely availability of the right goods and services required by clients

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: automation and modernization of the supply chain

#### Proposed programme plan for 2022

25B.113 The component has been identifying clients' needs to effectively meet their requirements through strategic sourcing with quality goods and services at a competitive cost. The component has worked closely with all clients and stakeholders to transition the demand and acquisition planning process from the 2018 initial plan to include advanced analysis and provide specific guidance on new sourcing or the use of available stocks or reserves. In 2020, the component expanded the planning framework to include special political missions, which is expected to be further refined in the coming years to be fully supported by Umoja Extension 2. The planning framework in 2022 is envisaged to have full forecasting capability, which will be coordinated with the category managers.

#### *Lessons learned and planned change*

25B.114 The lesson for the component was that the Organization needed to increase and move faster with investment in technology for automation and modernization of the United Nations supply chain through, among other things, a warehousing and distribution network, diversified delivery options with smaller drones for remote locations and globalization through interoperability and partnerships with other organizations, while keeping centralized accountability for fast decision-making. In applying the lessons, the component will focus on timely completion of the full deployment of the Umoja Extension 2 supply chain modules of demand planning, source planning and supply network planning. At the same time, the component will continue rolling out e-tendering solutions to modernize the procurement process and will work with industry experts and interested Member States to conduct a test run to assess the feasibility of utilizing aerial logistics drones in peacekeeping environments to deliver critical lighter logistical items in remote areas.

#### *Expected progress towards the attainment of the objective, and performance measure*

25B.115 This work is expected to contribute to the objective, as demonstrated by the reduction in the solicitation time for requests for quotations to 52 days (see figure 25B.VII).

Figure 25B.VII

#### Performance measure: solicitation timelines for requests for quotations

(Number of days)

## Legislative mandates

25B.116 The list below provides all mandates entrusted to the component.

### General Assembly resolutions

68/263; 69/273

Procurement

70/286

Cross-cutting issues

## Deliverables

25B.117 Table 25B.14 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 25B.14

### Subprogramme 2, component 1: deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	–	–	1	1
1. Report of the Secretary-General on procurement activities, submitted to the General Assembly (biennial report)	–	–	1	1
<b>Substantive services for meetings</b> (number of three-hour meetings)	–	–	4	4
2. Meetings of the Fifth Committee	–	–	3	3
3. Meetings of the Advisory Committee on Administrative and Budgetary Questions	–	–	1	1
<b>B. Generation and transfer of knowledge</b>				
<b>Seminars, workshops and training events</b> (number of days)	44	46	46	46
4. Business seminars for suppliers from developing countries and countries with economies in transition on how to do business with the United Nations	44	46	46	46
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> advice on about 100 local procurement authority requests annually from client entities; advice provided to all integrated mission planning entities for new, emerging and surge operations.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> system-wide cooperation on business operation projects and procurement cases with the United Nations entities procurement network.				
<b>Digital platforms and multimedia content:</b> e-catalogue for all goods and services; supply chain performance framework updated and shared among client entities; business intelligence reports for all functions in the Secretariat-wide supply chain published, including on supply chain performance; dedicated virtual space to spur on innovation and excellence in supply chain management created; annual update of Secretariat procurement statistics published on the Procurement Division website.				
<b>E. Enabling deliverables</b>				
<b>Administration:</b> advisory services on procurement matters for staff and 44 client entities, including on optimal acquisition plans, sourcing solutions, use of systems contracts, procurement modalities and other supply chain matters; category management and planning approach for the end-to-end supply chain, including through the issuance of standard operating procedures and the yearly supply chain planning guidance, the launch of the online sourcing support service community of practice, and category-specific communities of practice, such as fuel and rations; updating of system contracts and training and certification of staff; development of global demand and acquisition plans and the conducting of strategic sourcing, under the category management approach; operationalization of mutual recognition, in line with the promulgated supply chain operational guidance on cooperation with United Nations organizations, through the establishment of a collaborative contract such as a fleet management vehicle-tracking system with the World Food Programme; sourcing, solicitation, negotiation, establishment and management of contracts to ensure no disruption of the supply chain, including 100 global systems contracts, 30 turnkey				

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
contracts, air transportation service contracts (95 commercial and 30 military) and other contracts; vendor registration processes supported in the six official United Nations languages; meetings with, or briefings provided to, 6 international partners annually, including Member States, to identify and implement functional arrangements within areas of logistical cooperation in all field missions; deployment and rotation movements arranged, facilitated and monitored, and solutions sourced for uniformed personnel and associated cargo by air, naval and ground transport modalities; strategic-level support within the logistics specialist areas of aviation, strategic movement by sea and overland, engineering, medical logistics, transport and fleet management and life support, including fuel, rations and general supplies; development of an effective and efficient United Nations-wide aviation regulatory framework; conduct of aviation safety assessments, including of air service vendors; development and sharing of simplified and user-friendly operational guidance, manuals and best practices on supply chain management, which are continuously improved via user feedback; employment of an e-tendering platform; updating of online contracts catalogue for global, regional and local system and turnkey contracts, including letters of assist, roll-out, integration, stabilization and continuous improvement of Umoja Extension 2 modules, including features enabling category management and troop strength reporting by location; implementation of Umoja master data management and data quality measures for seamless data accessibility.				

## **Component 2**

### **Uniformed capabilities support**

#### **Objective**

25B.118 The objective, to which this component contributes, is to ensure the efficient and effective functioning of the peace and security pillar of the United Nations.

#### **Strategy**

25B.119 To contribute to the objective, the component will serve as the single point of contact for troop- and police-contributing countries on all administrative and logistical issues related to force generation, memorandums of understanding, contingent-owned equipment and reimbursement. The component supports the periodic review by the General Assembly of the reimbursement framework associated with uniformed capabilities deployed in formed units, supports the negotiation and finalization of memorandums of understanding with troop- and police-contributing countries, expeditiously processes applicable reimbursements in line with the decisions of the General Assembly and facilitates the strategic integration of relevant performance data related to deployed contingent-owned equipment. The component will also provide a streamlined reimbursement process, involving enhanced memorandum of understanding and payment processes, which are expected to result in increased transparency and accountability, and the real-time availability of data for Member States, Headquarters and field missions. The component will continue to provide strategic and operational support and foster enhanced partnerships with troop- and police-contributing countries.

25B.120 The component plans to support Member States on issues related to COVID-19 by leading the establishment of a consultative group of Member States and partners to guide the way forward on administering COVID-19 vaccines to uniformed personnel, by supporting the recalibration of the rotation schedule for formed units, thereby minimizing risks to United Nations personnel and the citizens served by the United Nations, and by establishing the eligibility requirements for applicable reimbursements for uniformed personnel under travel and quarantine restrictions.

25B.121 The above-mentioned work is expected to result in:

- (a) Support for the review by the General Assembly of the reimbursement framework for formed units and the implementation of all derivative guidance;
- (b) The timely finalization of memorandums of understanding and the provision of better client service, permitting reimbursements in line with standards and rates mandated by the General Assembly, while improving communication with troop- and police-contributing countries regarding the performance of contingent-owned equipment;
- (c) Streamlined and timely payments to troop- and police-contributing countries for uniformed personnel and contingent-owned equipment deployed in formed units, letters of assist reimbursements, death and disability claims and ad hoc claims;
- (d) Enhanced standardization and the reduction of errors, which increases the quality of memorandums of understanding and claims.

25B.122 The planned support on issues related to COVID-19 is expected to result in a coordinated way forward on administering COVID-19 vaccines to uniformed personnel, decreased disruptions to peacekeeping operations by supporting and managing the requirements related to the pandemic during the rotation of formed units, and the outlining of eligibility for applicable reimbursements for uniformed personnel under travel and quarantine restrictions.

## **Programme performance in 2020**

25B.123 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Periodic review of the reimbursement framework for formed units**

25B.124 The General Assembly periodically reviews the standards and rates of reimbursement for uniformed personnel and contingent-owned equipment deployed in formed units to United Nations field missions. As established in previous General Assembly resolutions, these two periodic reviews are the quadrennial survey to inform the rate of reimbursement for uniformed personnel deployed in formed units (resolution [67/261](#)) and the triennial meeting of the contingent-owned equipment working group (resolution [50/222](#)).

25B.125 The component provided substantive support prior to, during and after the 2020 meeting of the triennial Working Group on Contingent-Owned Equipment by preparing substantive issue papers, providing briefings to Member States, supporting the Chair and sub-working group chairs, preparing daily summaries and formal documents and providing guidance and advice. The subprogramme also prepared and transmitted the report of the 2020 Working Group ([A/74/689](#)) and the report of the Secretary-General on the triennial review of the rates and standards for reimbursement to Member States for contingent-owned equipment ([A/74/698](#)). The recommendations of the 2020 Working Group were endorsed by the General Assembly in its resolution [74/279](#). As required by the Assembly in its resolution [59/298](#), the 2020 version of the Manual on Policies and Procedures concerning the Reimbursement and Control of Contingent-Owned Equipment of Troop/Police Contributors Participating in Peacekeeping Missions has also been published as an official United Nations document in all six official languages ([A/75/121](#)).

25B.126 The component has commenced preparations for the 2021/22 quadrennial survey to inform the rate of reimbursement for uniformed personnel deployed in formed units. The survey will be conducted in 2021 and the associated report of the Secretary-General is expected to be taken up by the General Assembly in 2022.

*Progress towards the attainment of the objective, and performance measure*

25B.127 The above-mentioned work contributed to the objective, as demonstrated by the updated standards and rates of reimbursement for contingent-owned equipment deployed to field missions in support of mandated tasks. The 48 recommendations of the Working Group on Contingent-Owned Equipment represent the highest number of recommendations ever agreed in a working group since the inception of the system in 1996 and almost double the number of recommendations agreed in the 2017 Working Group (see table 25B.15).

Table 25B.15

**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
—	—	Standards and rates of reimbursement for contingent-owned equipment were updated through 48 recommendations of the 2020 Working Group on Contingent-Owned Equipment

**Impact of COVID-19 on component delivery**

25B.128 Owing to the impact of COVID-19 during 2020, the component used virtual platforms to provide briefings to Member States, troop- and police-contributing countries, peacekeeping missions and host countries on the impact of the pandemic on troop rotation, reimbursements for formed units and the negotiation of memorandums of understanding. As a result of the pandemic, the component temporarily suspended in-person negotiations on memorandums of understanding, in-person briefings, physical verification visits to elevate units to the rapid deployment level of the Peacekeeping Capability Readiness System, and the contingent-owned equipment workshop for field missions. These changes had an impact on programme performance in 2020, including the temporary suspension of the rotation of uniformed personnel, memorandum of understanding negotiations taking longer than usual and challenging remote verification visits owing to time-zone differences.

25B.129 At the same time, however, the component identified activities to support Member States on issues related to the COVID-19 pandemic, within the overall scope of its objectives, including providing policy guidance on applicable reimbursements pursuant to the framework approved by the General Assembly and serving as the Secretariat for the consultative group of Member States to devise a strategy for the provision of COVID-19 vaccines to uniformed personnel deployed in formed units.

**Planned results for 2022**

25B.130 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

**Result 1: reduced timeline in processing of reimbursements through a single entry point<sup>28</sup>****Programme performance in 2020**

25B.131 The component, in line with the framework approved by the General Assembly, certified reimbursements to troop- and police-contributing countries for uniformed personnel deployed in formed units to peacekeeping missions. The component continues to successfully implement integrated reimbursement processes for uniformed personnel and contingent-owned equipment. Reimbursements for uniformed personnel continue to be certified in accordance with General Assembly-mandated quarterly deadlines.

25B.132 The component also successfully completed the design, testing and deployment of a technical solution integrating reimbursements of uniformed personnel in the Uniformed Capabilities Management System, which previously contained reimbursement processes only for contingent-owned equipment and other types of claims. The integration of uniformed personnel reimbursement processes replaces an archaic manual process and reduces associated errors. The integrated platform incorporates improved calculation and reporting mechanisms related to reimbursements for uniformed personnel and contingent-owned equipment, Statements of Unit Requirements, memorandums of understanding, verification reports and the deductions associated with gaps in deployed contingent-owned equipment.

25B.133 The above-mentioned work contributed to troop- and police-contributing countries having a single contact point for all support and logistical aspects of all contributions and the certification of reimbursements to about 90,000 military and police personnel deployed in formed units within the mandated three months following the end of each quarter, which met the planned target reflected in the proposed programme budget for 2020. In addition, six of the nine memorandums of understanding for formed units newly deployed to field missions in 2020 were signed prior to or within 90 days of deployment, which met the target of completion of all memorandums of understanding within 90 days of deployment. Two memorandums of understanding were signed outside the 90-day period but with no resulting disruptions to the reimbursement process. One memorandum of understanding is pending with the concerned intergovernmental organization.

**Proposed programme plan for 2022**

25B.134 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will continue to work on enhancements of the Uniformed Capabilities Management System to improve productivity related to reimbursements for uniformed personnel and to provide better services to all stakeholders, including Member States and peacekeeping and special political missions (see table 25B.16).

---

<sup>28</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 29B)).

Table 25B.16  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Troop- and police-contributing countries do not have a single contact point for administrative and logistical aspects of the force generation process across multiple organizational units	Troop- and police-contributing countries have a single contact point for all support and logistical aspects of all contributions	Troop- and police-contributing countries have a single contact point for all support and logistical aspects of all contributions  Timely certification of reimbursements to about 90,000 military and police personnel within the mandated three months following the end of each quarter	Troop- and police-contributing countries have a single contact point for all support and logistical aspects of all contributions  Timely certification of reimbursements to all military and police personnel  Completion of all memorandums of understanding within 90 days after deployment	Timely certification of reimbursements for military and police personnel in formed units within the mandated three months following the end of each quarter  Enhanced transparency and strengthened accountability related to uniformed personnel reimbursements, relying on automated processes to track and report on deployed numbers of uniformed personnel

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: single point of contact in the areas of administrative, logistical and financial support to troop- and police contributing countries for faster reimbursement<sup>29</sup>**

### **Programme performance in 2020**

25B.135 The component will continue to implement its mandate as the single point of contact for troop- and police-contributing countries on all administrative, and logistical functions related to force generation, memorandums of understanding, contingent-owned equipment and reimbursement. The component has worked closely with all stakeholders to process reimbursements to troop- and police-contributing countries for deployed contingent-owned equipment capabilities within the mandated period of three months after the end of the quarter immediately prior. The component also engaged with field missions through regular communication and follow-up when needed to complete reimbursement certifications within the mandated timeline.

25B.136 The component assiduously worked with troop- and police-contributing countries, Headquarters focal points and field missions to complete the formal signature process for 31 pending legacy memorandums of understanding. These signed memorandums of understanding allowed for the certification of pending reimbursements for contingent-owned equipment, highlighting the importance of the component's role as the single point of contact for troop- and police-contributing countries. In addition, the component continues to focus on the completion of

<sup>29</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect. 29B)).

memorandums of understanding within 90 days after deployment, thereby allowing for the certification of applicable reimbursements for contingent-owned equipment.

25B.137 The above-mentioned work contributed to 5,600 timely reimbursement certifications, which exceeded the planned target of 5,000 contingent-owned equipment reimbursement claims and uniformed personnel processed within three months reflected in the proposed programme budget for 2021. Additional certifications are broadly associated with the downsizing and drawdown of United Nations field missions, requiring a temporary increase in eligible reimbursements for uniformed personnel and contingent-owned equipment.

### **Proposed programme plan for 2022**

25B.138 The component will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the component will continue to work on enhancements of the Uniformed Capabilities Management System to allow for even more functionality to improve productivity and provide better client services to Member States, Headquarters entities and field missions. Further process automation and reporting standardization will focus primarily on the strategic integration of relevant performance data related to deployed contingent-owned equipment (see figure 25B.VIII).

Figure 25B.VIII

**Performance measure: number of contingent-owned equipment reimbursement claims certified within the mandated three months following the end of the preceding quarter (annual)<sup>a</sup>**

<sup>a</sup> The title of the performance measure presented in the proposed programme budget for 2021 (A/75/6 (Sect. 29B)) was corrected to accurately reflect the data presented therein.

<sup>b</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: a sustainable and appropriate approach to post-traumatic stress disorder claims within the death and disability framework for uniformed personnel**

#### **Proposed programme plan for 2022**

25B.139 The component received a significant number of post-traumatic stress disorder (PTSD) claims, which require expeditious settlement in accordance with General Assembly resolution 66/264. In the past, the component had received seven such cases in which such claims were processed years after the drawdown and closure of the respective United Nations field missions. In 2019, the component received 342 such claims, of which 304 originated from closed field missions. Resources were not immediately available to compensate the claimants in accordance with the overall

death and disability framework for uniformed personnel. The General Assembly adopted resolution [74/280](#) (see also [A/73/755](#), para. 81), in which it called for a study that provided a holistic analysis of the policy, legal, administrative and financial aspects of post-traumatic stress disorder. In line with the Assembly's requirement, this study is expected to include procedures for processing claims, medical standards, budgetary methodology for liability estimation and sources of funding. To support the preparation of the required study, the subprogramme established an advisory board on post-traumatic stress disorder, which includes Member State representatives and United Nations focal points.

*Lessons learned and planned change*

25B.140 The lesson for the component was that it could not process post-traumatic stress disorder claims associated with closed field missions in the absence of required appropriations and with depleted contributions. In applying the lesson, the component will lead the advisory board on post-traumatic stress disorder, and will coordinate with Member States and external subject matter experts on the conduct of the study to prepare recommendations for decisions by the General Assembly. The component will expeditiously implement any further decisions of the Assembly on the process for reimbursing post-traumatic stress disorder claims for uniformed personnel associated with closed field missions.

*Expected progress towards the attainment of the objective, and performance measure*

25B.141 This work is expected to contribute to the objective, as demonstrated by the submission to the General Assembly of a comprehensive study on the reduction of pending post-traumatic stress disorder claims submitted for closed field missions (see table 25B.17).

Table 25B.17  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
290 claims are awaiting assessment from the Medical Services Division related to cases of post-traumatic stress disorder, caused, in most cases, by events that occurred 15 to 20 years ago	304 claims related to cases of post-traumatic stress disorder pending from closed missions	In its resolution <a href="#">74/280</a> , the General Assembly called for a comprehensive study on post-traumatic stress disorder  Advisory board on post-traumatic stress disorder claims established with Member States and subject matter experts	Reimbursement of post-traumatic stress disorder claims for closed field missions examined by the advisory board	The General Assembly considers the comprehensive study on the reimbursement of post-traumatic stress disorder claims for closed field missions  Reduction of pending post-traumatic stress disorder claims submitted for closed field missions

## Legislative mandates

25B.142 The list below provides all mandates entrusted to the component.

### General Assembly resolutions

67/261	Report of the Senior Advisory Group established pursuant to General Assembly resolution 65/289 to consider reimbursement to troop-contributing countries and other related issues	72/285	Rates of reimbursement to troop- and police-contributing countries
		74/279	Triennial review of the rates and standards for reimbursement to Member States for contingent-owned equipment

## Deliverables

25B.143 Table 25B.18 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 25B.18

### Subprogramme 2, component 2: deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>2</b>	<b>2</b>	–	<b>1</b>
1. Report of the 2020 Working Group on Contingent-Owned Equipment	1	1	–	–
2. Report of the Secretary-General on the 2020 Working Group on Contingent-Owned Equipment	1	1	–	–
3. Report of the Secretary-General on the results of the survey to support the review of the standard rate of reimbursement to troop- and police-contributing countries	–	–	–	1
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>3</b>	<b>3</b>	–	
3. Meeting of intergovernmental bodies, including the Fifth Committee and the Working Group on Contingent-Owned Equipment	3	3		
<b>B. Generation and transfer of knowledge</b>				
<b>Seminars, workshops and training events</b> (number of days)	<b>10</b>	<b>10</b>	<b>20</b>	<b>10</b>
5. Training programmes and seminars to Member States on the various aspects of memorandums of understanding, contingent-owned equipment policies and procedures, as well as death and disability compensation claims	10	10	20	10
<b>E. Enabling deliverables</b>				
<b>Administration:</b> servicing and implementing recommendations of intergovernmental processes regarding the legislative reimbursement framework, including changes arising from the quadrennial survey on the standard rate of reimbursement to troop- and police-contributing countries, the triennial meetings of the Working Group on Contingent-Owned Equipment and decisions of the General Assembly; briefings and training sessions for all troop- and police-contributing countries and other Member States, Secretariat entities and all field missions with formed units on the reimbursement framework; new and amended Statements of Unit Requirements, memorandums of understanding, letters of assist and agreements for military and police contingents deployed to field missions or pledged to the rapid deployment level of the Peacekeeping Capability Readiness System, including via consultations with troop- and police-contributing countries and Secretariat entities, and participation in assessment and advisory, predeployment, rapid deployment level, contingent-owned equipment verification and other visits to troop- and police-contributing countries; assessment and calculation of reimbursements for military and police personnel and contingent-owned equipment deployed to field missions on memorandums of understanding or letters of assist, including via calculation of premiums, deductions and death and disability and post-traumatic stress disorder compensation; servicing of the Contingent-Owned Equipment/Memorandum of Understanding Management Review Board; preparation of comparative performance analysis and management decision reports.				

## **Subprogramme 3**

### **Special activities**

#### **Objective**

25B.144 The objective, to which this subprogramme contributes, is to ensure clients can respond to special situations.

#### **Strategy**

25B.145 To contribute to the objective, the subprogramme will enhance the capacity for newly deployed or expanded Secretariat entities to achieve their agreed-upon stage of initial operational capacity. The subprogramme will accomplish this effort by identifying critical staff and resources – both financial as well as deployable assets – that can be emplaced in the theatre of operation. It will also provide dedicated support to Secretariat entities during surges, transitions and liquidations.

25B.146 The subprogramme oversees a range of specialized and cross-cutting operational capacities. The specific requirements for different clients will be met through dedicated staffing resources or – in particular for start-up, liquidation, surge and crisis requirements – through the formation of temporary teams with subject matter experts drawn from the Office of Support Operations, component 1 of subprogramme 2 and the Office of Information and Communications Technology, as required, to meet immediate support requirements until the crisis has ended or resources have been identified or approved to meet the requirements on an ongoing basis.

25B.147 The subprogramme will continue to manage and strengthen arrangements with key partners such as regional organizations, as well as other United Nations actors and Governments, including triangular partnership arrangements, for both offering and receiving operational support assistance, and develop tools and analysis to assess and forecast cost drivers.

25B.148 The subprogramme will also contribute to strengthening capacity for crisis preparedness at all duty stations through crisis preparedness training for all personnel and managers, including through the development of a human resources planning framework for crisis preparedness and response tailored to the needs of the respective client. The subprogramme will continue to train a cadre of crisis support volunteers and manage the existing roster of crisis support volunteers that serve as the first line of support for affected staff and their families. Through the network of volunteers, the subprogramme provides post-incident survivor services, including continuous support to staff and their families, the coordination of counselling and the provision of assistance with the processing of benefits and entitlements for affected United Nations personnel and their families. The subprogramme also facilitates the timely resolution of residual issues in support of staff members and their families through the organization of memorial services. During emergencies, the subprogramme also activates call centres across the globe and the crisis support volunteers' network.

25B.149 The above-mentioned work is expected to result in:

- (a) A more expedient and sustainable deployment of staff, assets and financial resources for the entity to start executing its mandate as quickly as possible;
- (b) More timely closure of unresolved administrative issues, such as aged receivables, unreconciled payments and potential claims from third parties, as well as vendor disputes;

(c) Strengthened crisis preparedness and response capacities, and higher awareness levels across the United Nations system;

(d) Enhanced cooperation agreements that support the planning and drafting of support concepts for start-up and surge or crisis situations.

## Programme performance in 2020

25B.150 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Ensured mandate implementation during the COVID-19 pandemic

25B.151 At the onset of the COVID-19 pandemic, the subprogramme convened operational support capacity from the other subprogrammes in the Department to support Secretariat entities in ensuring the continuity of mandate implementation operations. To enable, for example, the procurement of polymerase chain reaction tests, personal protective equipment and medical supplies by component 1 of subprogramme 2, or the virtual review of United Nations health facilities by component 3 of subprogramme 1, the subprogramme provided oversight and coordination between Headquarters and the field by assessing the needs of field entities, coordinating possible solutions and identifying capabilities within the Department.

25B.152 The subprogramme shared chairing responsibilities (with the Department of Peace Operations and the Department of Political and Peacebuilding Affairs) for the establishment of the Field Support Group on COVID-19, a joint field-United Nations Headquarters forum to identify and address challenges that peacekeeping operations, special political missions and support hubs were facing as a result of the pandemic. Furthermore, the subprogramme monitored key risks, such as medical response and protection capacity, life support and continuity arrangements, and security concerns for Secretariat personnel in relation to COVID-19 and established cross-functional working groups to focus on key areas of the United Nations pandemic response. The subprogramme also ensured that field entities were supported on issues specific to their operating environment by introducing senior focal points for individual field entities.

### *Progress towards the attainment of the objective, and performance measure*

25B.153 The above-mentioned work contributed to the objective, as demonstrated by the Member States and regional organizations having access to regular and timely updates and newsletters on the pandemic response by the United Nations Secretariat (see table 25B.19).

Table 25B.19  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
—	—	Member States and regional organizations have access to regular and timely updates and newsletters on the pandemic response by the United Nations Secretariat

### **Impact of COVID-19 on subprogramme delivery**

25B.154 Owing to the impact of COVID-19 during 2020, training sessions to prepare clients to respond to special situations, such as training for family focal points, for call centre volunteers and on soft skills in crisis communications for responders, were postponed. COVID-19-related travel restrictions also resulted in the delayed deployment of some surge staff to the United Nations Integrated Transition Assistance Mission in the Sudan (UNITAMS). These changes had an impact on programme performance in 2020, as specified in results 1 and 2 below.

### **Planned results for 2022**

25B.155 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

#### **Result 1: clients enabled to respond effectively and efficiently to the challenges of special situations<sup>30</sup>**

##### **Programme performance in 2020**

25B.156 The subprogramme has progressed work in this area through the development and activation of the standing surge capacity pool, which is a standby pool of 750 United Nations Secretariat staff that are available for surge deployment to special situations, such as the start-up of new entities, transitions, closures or any emergency situation, for a period of 90 days, across 125 professional functions. This pool provides staffing resources to augment the capacity of requesting entities. For example, in 2020, the pool deployed one human resources and counselling specialist to support Beirut-based staff and the entities affected by the explosion at the port of Beirut.

25B.157 The above-mentioned work contributed to the rapid deployment of the advance team for the start-up of UNITAMS, to which 65 per cent of identified surge positions were deployed within one month, which did not meet the target of 80 per cent of identified surge positions encumbered within one month reflected in the proposed programme budget for 2020. The target was only partially met due to delays in the issuance of visas and COVID-19-related travel restrictions.

##### **Proposed programme plan for 2022**

25B.158 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will leverage the standing surge capacity pool to address critical staffing gaps. The subprogramme plans to expand the pool of functions for “management and administration”, as well as initiate a refresher exercise to keep the pool current and ready for deployment. Additionally, the pool will be extended to cover functions most commonly called upon with regard to the peace and security pillar. The expected progress is presented in the performance measure below (see table 25B.20).

<sup>30</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 29B)).

Table 25B.20  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Entities do not use rapid deployment rosters	Entities promulgate rapid deployment rosters	65 per cent of identified surge positions for the UNITAMS start-up were deployed in the first month	<p>The concept of rapid deployment rosters evolved into the standing surge capacity pool, providing a roster of validated staff in 125 identified functions, commonly required for start-ups, transitions, closures or emergency response</p> <p>The pool will enable the Organization to deploy at short notice pre-approved staff for assignments of up to 90 days to support surge requirements globally within Secretariat entities</p>	<p>An expansion of the pool to include additional functions</p> <p>Deployment of required expertise to meet urgent surge-level requirements within 10 days of notification</p>

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: enabling comprehensive support solutions for partners<sup>31</sup>

### Programme performance in 2020

25B.159 The subprogramme has contributed to ensuring that clients can respond to special situations through the utilization of the standing surge capacity tool. The subprogramme also, with regard to partnerships, strengthened the capacity in the Department to provide effective and efficient support services that enable mandate implementation. This included the establishment of functional partnerships with Member States and regional partners (specifically the Federal Agency for Technical Relief of Germany (*Bundesanstalt Technisches Hilfswerk*) and the European Union), as well as strengthening interoperability with key partners such as the African Union, the European Union, the Collective Security Treaty Organization and the North Atlantic Treaty Organization on a number of operational issues, including best practice in response to COVID-19.

25B.160 The above-mentioned work contributed to 65 per cent of identified surge positions for UNITAMS being encumbered in the first month, which did not meet the target of 80 per cent of identified surge positions encumbered in the first month reflected in the proposed programme budget for 2021. The target was only partially met due to COVID-19-related travel restrictions and delays in the issuance of visas.

<sup>31</sup> As reflected in the proposed programme budget for 2021 ([A/75/6 \(Sect. 29B\)](#)).

### Proposed programme plan for 2022

25B.161 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will coordinate the efforts of the Department of Operational Support to establish critical operational support platforms for new missions or other entities, including with regard to initial situational awareness, preliminary engagement and planning with relevant counterparts, and the detailed planning and development of the required operational support concept or plan. The expected progress is presented in the performance measure below (see table 25B.21).

Table 25B.21  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
—	Entities promulgate rapid deployment rosters	The start-up of UNITAMS utilized the standing surge capacity pool for deployments  65 per cent of identified surge positions for UNITAMS were deployed in the first month.	35 per cent of approved positions encumbered by entity start date of new missions  60 per cent of plans for start-up, surge support and crisis have considered partnership options	40 per cent of approved positions encumbered by entity start date of new missions  65 per cent of plans for start-up, surge support and crisis have considered partnership options

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: new and expanded field operations guided by mission support concepts

#### Proposed programme plan for 2022

25B.162 The subprogramme oversees a range of specialized and cross-cutting operational capacities, including start-up, surge and crisis situations. The mission support concept is the reference document for the Department's support for any field entity in special situations such as start-up, closure or other significant change in operations. It outlines how the various pillars of mission support will be delivered and administered. The identified support requirements, planning assumptions and parameters help define the most effective support approach, mission support staffing complement, technical sub-plans across the spectrum of support services, and related resourcing requirements. The subprogramme has previously developed mission support concepts in the recent establishment of special political missions in Haiti, the Sudan and Yemen. In a start-up, the finalization of a mission support concept is also a key milestone in a field entity achieving initial operating capacity, whereby the field entity is able to take over direct responsibility for further planning and implementation of support functions.

#### *Lessons learned and planned change*

25B.163 The lesson for the subprogramme was that the development of mission support concepts increases the ability of the Department to deliver consolidated solutions that draw on the full range of the Department's roles and expertise, and

ensures effective and coherent linkages between strategic level planning and operational and technical level plans. In applying the lesson, the subprogramme plans to guide the systematic development of mission support concepts to simplify the interface with key clients on planning and coordination, including other Headquarters departments and other relevant field entities. The subprogramme will develop minimum standards and provide quality assurance for the development of the concepts. Additionally, the concepts will be integrated into the policy planning for other Departments (i.e. the Department of Peace Operations and the Department of Political and Peacebuilding Affairs) so that the mission support concepts are mainstreamed and aligned to overall planning efforts.

*Expected progress towards the attainment of the objective, and performance measure*

25B.164 This work is expected to contribute to the objective, as demonstrated by 100 per cent of mission support concepts fully meet the minimum standards (see table 25B.22).

Table 25B.22  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
Mission support concepts applied in an ad hoc fashion	Mission support concepts applied in an ad hoc fashion	Mission support concepts applied in the establishment of special political missions in Haiti, the Sudan and Yemen	Systematic application of mission support concepts in all special situations	100 per cent of mission concepts fully meet the minimum standards

## Deliverables

25B.165 Table 25B.23 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 25B.23  
**Subprogramme 3: deliverables for the period 2020–2022, by category and subcategory**

*Category and subcategory*

### E. Enabling deliverables

**Administration:** preparedness frameworks for entities in special situations, tools and standard operating procedures, pools of Secretariat staff for surge capacity, tabletop training exercises with 3 partner organizations and situational awareness reports; guidance to entities in special situations, including via strategic assessments and resourcing reviews for 6 field missions, updated mission support concepts for 6 field missions, recruitment plans, and resourcing plans, budgets and allocations for 6 field missions; deployment of dedicated capacities to provide in situ or virtual support, including operational and advisory services, during critical phases of start-ups, transitions, downsizings, closures, liquidations or crises; establishment of a functioning initial operating capability for new or expanded entities; strategic guidance and backstopping support to UNSOS; oversight of the implementation of the human rights due diligence policy in the provision of support to all non-United Nations security forces; capacity-building of 2 partner organizations to plan, manage and deploy peace support operations, including via the United Nations-African Union expertise exchange programme; capacity-building of uniformed peacekeepers to address the capability requirements of peacekeeping operations through partnerships between the United Nations, troop- and police-contributing countries and Member States; establishment and management of a comprehensive framework of resourcing standards in operational support; support of the establishment of a United Nations-wide data management platform, for operational visibility and preparedness; global implementation of an e-solution to provide timely access to all Secretariat entities on staff affected by downsizing.

## **Subprogramme 4 Administration, New York**

### **Objective**

25B.166 The objective, to which this subprogramme contributes, is to ensure a safe and fit-for-purpose physical environment at Headquarters and responsive facilities, as well as administrative, logistical, information and other services in support of the efficient functioning of the Organization and an informed public on the work of the United Nations.

### **Strategy**

25B.167 To contribute to the objective, the subprogramme will continue to proactively maintain and operate the Headquarters buildings while leveraging technology and integrating good practices in facilities management that achieve efficiencies, promote a modern workplace and support Member States in the implementation of the Sustainable Development Goals. It will pursue its long-term planning of office accommodation and building alterations to support the needs of entities in New York and maintain the property value of the campus. The strategic focus of the subprogramme in this area will be to incorporate new office space trends resulting from the COVID-19 pandemic, strengthen essential building maintenance functions, implement the planned accessibility improvement projects for persons with disabilities and continue to support environmental sustainability management efforts.

25B.168 The subprogramme also plans to provide efficient, timely and cost-effective services to clients in New York in the areas of building management, office space, asset and official gift management, inventory and warehouse management, travel and transportation, mail and pouch services, event management, postal administration, catering, other commercial operations and processing of tax reimbursements for United States taxpayers. In addition, pending the General Assembly decision on the global service delivery model, this subprogramme will provide specialized human resources support in the areas of onboarding, separations and processing of complex entitlements (including education grants, dependency allowances and rental subsidies) for staff of all Headquarters-based United Nations entities and respective field locations. The subprogramme will also support Secretariat entities globally with effective archives and records management services. In addition to continuing to strive for a high level of client satisfaction and provide services within standard turnaround times, the strategic focus of the subprogramme will be on strengthening property management support and reporting at UNHQ, as well as undertaking the first phase of streamlining archives storage and management in preparation for vacating the Falchi building at the expiration of the lease in 2024.

25B.169 The subprogramme will also provide postal, gift, archival and information services to the public in New York and globally to raise awareness of the past and current work of the United Nations.

25B.170 The above-mentioned work is expected to result in:

- (a) A highly functional, more inclusive and sustainable campus that symbolizes the ideals of the United Nations;
- (b) Favourable client satisfaction and cost efficiency in the provision of services;
- (c) Increased awareness of the public of the current and past work of the Organization.

## Programme performance in 2020

25B.171 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Uninterrupted building operations and safe reopening of United Nations Headquarters during the COVID-19 pandemic

25B.172 At the start of the pandemic, when the United Nations Headquarters premises closed for safety reasons, it was critical to the Organization's response to the crisis that all essential onsite building operations, particularly cleaning services, be maintained. The safe reopening of the complex also rested on the ability of the subprogramme to implement safety measures, prepare the building for increasing occupancy and maintain safe working conditions. The subprogramme played a major role in the development of the response to the pandemic. In accordance with the return-to-work policy, the subprogramme ensured skeleton operations in phase 0, prepared the building for phases 1 and 2 of the return of staff, and maintained safe working conditions, including through deep and more frequent cleaning, installation of sanitizing stations, increased ventilation, signage and multiple measures to enforce social distancing. Appreciation for the responsiveness of the subprogramme and the safety measures put in place was expressed by the occupants of the United Nations Headquarters buildings throughout the various phases of the COVID-19 pandemic. In addition, the continuity of mail, pouch, travel and other services which supported medical evacuation operations and the shipment of personal protective equipment, medicines and information technology equipment around the world contributed to the safety of United Nations personnel and remote working.

#### *Progress towards the attainment of the objective, and performance measure*

25B.173 The above-mentioned work contributed to the objective, as demonstrated by the safe reopening of the United Nations complex under reduced capacity, facilitating the implementation of mandates and meetings of the intergovernmental bodies with no major incident reported (see table 25B.24).

Table 25B.24  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
—	—	Safe phase 2 reopening of the United Nations Headquarters complex with reduced capacity, facilitating the implementation of mandates and meetings of the intergovernmental bodies with no major incidents reported

### Impact of COVID-19 on subprogramme delivery

25B.174 Owing to the impact of COVID-19 during 2020, the subprogramme adapted working methods to support the continuity of United Nations operations and postponed planned results and major maintenance projects at United Nations Headquarters. Due to the pandemic, essential operations at Headquarters were continuously adjusted to the evolving crisis in order to maintain the premises fit for

purpose at every stage and prioritize urgent mail, diplomatic pouch, passport and visa deliveries, material management and other services. The working methods to process staff members' tax reimbursements were swiftly adjusted to ensure continuity of services by allowing staff to submit tax claims electronically while claims submitted in paper format were digitalized and processed remotely. Individual client and other services were provided virtually by adjusting working methods to a remote environment.

25B.175 The COVID-19 pandemic did result in the postponement of building maintenance work and construction projects due to local authorities' pandemic measures and the need to shift priorities and capacities to meet the challenges of the crisis. Special events were cancelled and the temporary suspension of international mail services in certain destinations resulted in some delays in the dispatch of some essential mail and pouches. Several operations experienced significant backlogs such as in processing and digitizing paper records. These changes had an impact on the programme performance in 2020, with lower than planned rates of implementation of the flexible workplace and accessibility improvement projects as specified in results 1 and 2 below.

25B.176 At the same time, however, the subprogramme modified activities to support United Nations personnel and Member States in implementing their work during COVID-19, within the overall scope of its objectives, namely adapting the premises owned and leased by United Nations Headquarters to the physical distancing and recommended hygiene requirements; contributing to sharing COVID-19-related resources in New York; supporting staff and their families with complex travel situations; assisting departments at United Nations Headquarters with the transition of files to SharePoint, the decommissioning of legacy systems, and improving the management of United Nations digital records in coordination with the Office of Information and Communications Technology; and developing online tools and working methods to provide continued services. As examples, the subprogramme developed a user-friendly website with an increased volume of resources and published more than 1 million pages of historical archives on its research portal. It also temporarily transitioned some functions to a fully electronic submission process such as for United Nations laissez passer applications to provide emergency-level global operational support for travel documents to the COVID-19 medical evacuations arranged by WHO operations. The modified deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

## **Planned results for 2022**

25B.177 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: transformed Secretariat through flexible workplace implementation<sup>32</sup>**

#### **Programme performance in 2020**

25B.178 The subprogramme has continued to modernize United Nations Headquarters through the implementation of the flexible workplace project. In 2020, 3 floors in the Secretariat building were reconfigured, bringing the total to 22 flexible floors. The Organization was able to accommodate new office space requirements linked to the United Nations development system reform, including for the move of

<sup>32</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 29B)).

the Development Coordination Office into the Secretariat building, while at the same time vacating an additional floor in a leased building. Staff on converted floors were able to transition seamlessly to full remote working when the building closed and, throughout the COVID-19 pandemic, flexible workspace proved adaptable to fluctuating levels of occupancy and the application of safety measures such as social distancing.

25B.179 The above-mentioned work contributed to an increase in the workplace capacity to accommodate an additional 187 people, which did not meet the planned target of 262 people reflected in the proposed programme budget for 2020. The project was delayed when construction had to be suspended for several months following local COVID-19 “stay at home” orders. When construction resumed, the subprogramme completed the floors that were in an advanced stage of implementation and postponed the five remaining floors pending more clarity on the post-pandemic landscape and the office space requirements of the departments concerned, as reported in [A/75/342](#).

### Proposed programme plan for 2022

25B.180 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective and in response to recent developments, the subprogramme’s work will evolve to include an ongoing assessment of changing workspace requirements in the post-pandemic environment and their impact on the implementation of flexible workplace strategies and future office space needs at United Nations Headquarters. As reported in [A/75/342/Add.1](#) and [A/75/342/Add.1/Corr.1](#), the subprogramme has undertaken a review of the project in accordance with the recommendations of the Advisory Committee on Administrative and Budgetary Questions and the decision of the General Assembly in its resolution [75/253](#). In view of the uncertainties surrounding the post-pandemic landscape, it was proposed to close out the project and consider any future large-scale workspace reconfiguration required to meet emerging needs as a new initiative. The subprogramme will continue to mainstream the approach to small-scale office reconfiguration requirements across buildings owned and leased by the United Nations to the extent possible, taking into account lessons learned and the latest office space trends. The expected progress is presented in the updated performance measure below (see figure 25B.IX).

Figure 25B.IX

**Performance measure: increase in flexible workplace capacity (annual)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: an inclusive Secretariat through accessibility improvements<sup>33</sup>

### Programme performance in 2020

25B.181 The subprogramme has improved the accessibility of the Headquarters campus to facilitate the inclusion of persons with disabilities in the work of United Nations and increased building compliance with relevant standards. Among the projects completed in 2020 were the installation of accessibility doors at the second-floor entrance to the Economic and Social Council, the incorporation of a perimeter fence access gate and the replacement of curb cuts, minor renovations to multiple restrooms throughout United Nations Headquarters, the renovation of wheelchair-accessible parking spaces and the addition of accessibility signage. The subprogramme also finalized the design of a future lift installation at the General Assembly Hall speakers' rostrum. In addition, the flexible workplace project has contributed to the inclusion of persons with disabilities by facilitating movement on the floors, providing adjustable furniture systems and customizing the workplace to specific needs as required.

25B.182 The above-mentioned work contributed to a 23 per cent implementation rate of the accessibility programme, which did not meet the target of 33 per cent reflected in the proposed programme budget for 2021. The planned work was delayed by the suspension of all construction activities during local authorities' COVID-19 "stay at home" orders.

### Proposed programme plan for 2022

25B.183 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will install additional accessibility doors and make other improvements in accordance with its three-year programme. The expected progress is presented in the performance measure below (see figure 25B.X).

Figure 25B.X  
Performance measure: total implementation rate of the accessibility programme by year  
(Percentage)

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

<sup>33</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect. 29B)).

**Result 3: streamlined United Nations Secretariat archives management****Proposed programme plan for 2022**

25B.184 The Organization is going through a digital transformation and paper records are increasingly being replaced by digital data, a trend that has only been accelerated by the COVID-19 pandemic. This evolution is creating new requirements for the subprogramme to receive, store, preserve, process, and provide access to digital records. At the same time, the subprogramme continues to be responsible for the processing of new transfers of paper records and the management of current archive holdings.

25B.185 As custodian of the United Nations Secretariat archives, the subprogramme directly operates two repositories and uses a third-party vendor to manage physical records. The expiration of the Falchi Building lease in December 2024, where the largest repository is located, offers an opportunity to streamline the archives management function in line with best practices and industry trends, from an in-house to a third-party storage and records management model.

*Lessons learned and planned change*

25B.186 The lesson for the subprogramme was that the digital transformation is rendering the direct management of physical archives obsolete as the focus shifts to capturing digital records from enterprise systems. Third-party storage and records management services have proven secure and efficient in handling paper records and the Falchi lease expiration is the opportune time for operational changes. Given the large volume of records to be processed, the streamlining initiative to discontinue the Falchi repository requires a sustained effort starting in 2022. In applying the lesson, the subprogramme, over the next three years, is planning to appraise all records in the repository, dispose of time-expired records, inventory and transfer records of continuing value to a third-party vendor, preserve permanent archives to international standards and digitize selected archives to ensure easy and continued access. Once completed, and with the physical archive management functions provided by a third party, the subprogramme will be able to reallocate resources to meet the requirements of its growing portfolio. Significant benefits are expected in the form of efficiency gains and client satisfaction from improved access to digitized paper records and, ultimately, better operational support in managing digital records.

*Expected progress towards the attainment of the objective, and performance measure*

25B.187 This work is expected to contribute to the objective, as demonstrated by the reduction in the volume of records held at the Falchi Building repository from 50,000 linear feet in 2020 to 35,000 planned in 2022 (see figure 25B.XI).

Figure 25B.XI

**Performance measure: volume of records at the Falchi building**

(Linear feet)

**Legislative mandates**

25B.188 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolutions*

<a href="#">67/254</a>	Special subjects relating to the programme budget for the biennium 2012–2013	<a href="#">72/262</a> A-B	Special subjects relating to the programme budget for the biennium 2018–2019
<a href="#">68/247</a>	Special subjects relating to the proposed programme budget for the biennium 2014–2015	<a href="#">73/279</a> A	Special subjects relating to the programme budget for the biennium 2018–2019
<a href="#">69/274</a> A-B	Special subjects relating to the programme budget for the biennium 2014–2015	<a href="#">74/263</a>	Special subjects relating to the proposed programme budget for 2020
<a href="#">71/272</a>	Special subjects relating to the programme budget for the biennium 2016–2017	<a href="#">74/267</a>	Enlargement of the Advisory Committee on Administrative and Budgetary Questions: amendment to rule 155 of the rules of procedure of the General Assembly
<a href="#">72/219</a>	Protection of global climate for present and future generations of humankind	<a href="#">75/253</a>	Special subjects relating to the proposed programme budget for 2021

**Deliverables**

25B.189 Table 25B.25 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 25B.25

**Subprogramme 4: deliverables for the period 2020–2022, by category and subcategory***Category and subcategory***D. Communication deliverables**

**External and media relations:** Information and reception services to visitors, delegates and the general public, including responding to inquiries on the current and past work of the United Nations.

**Library services:** archive, record and information management services provided for all entities at United Nations Headquarters and field missions; recordkeeping assessments conducted for Secretariat entities globally; paper and digital records security - screened, catalogued, stored and preserved; legacy paper archives digitized;

**E. Enabling deliverables**

**Administration:** provision of administrative support services, including specialized human resources support in the areas of onboarding and processing of complex entitlements, dependency benefits and rental subsidies for approximately 8,250 staff of all Headquarters-based United Nations entities and respective field locations, and processing of transactions and claims for 7,000 staff members in the areas of tax reimbursement, in line with relevant rules, regulations and standards; streamlining of internal administrative processes in the areas of human resources, finance and budget, travel and tax reimbursement.

**Logistics:** 1,825,000 square feet of owned and leased premises, facilities and assets managed, maintained and altered as required, including management of gifts; office accommodations provided for around 8,000 personnel; completion of service requests for facilities and commercial services; conferences and special events managed; warehousing and transportation services provided; processing of travel requests and travel documents, as well as lump sum calculations; airline agreements negotiated or renegotiated; host country registrations processed.

**Correspondence and documentation services:** provision of mail services, including approximately 800,000 postal, courier and diplomatic pouch shipment and messenger services.

## Section 29C

### Office of Information and Communications Technology

#### Overall orientation

#### Mandates and background

25C.1 The Office of Information and Communications Technology is responsible for the delivery of information and communications technology (ICT) in the United Nations. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolutions [63/262](#) and [72/266](#) B. The impact of the coronavirus disease (COVID-19) pandemic has starkly highlighted the importance of ICT in supporting business continuity and mandate delivery across the Secretariat and in intergovernmental bodies.

#### Strategy and external factors for 2022

25C.2 In 2022, the Office will continue to implement programmes that support the strategic goals of ensuring an environment where interoperability allows information to flow effectively throughout the Organization, facilitating coherent and integrated mandate implementation, where ICT is leveraged as a critical operational and strategic enabler for the work of the United Nations and where the Organization is protected from rapidly escalating cybersecurity threats.

25C.3 The Office will continue to play a lead role in strengthened governance of ICT operations across the Secretariat. Overseen by an expanded ICT Steering Committee, this includes a strengthened policy framework and more proactive engagement of the global ICT community. The Office will also enhance its monitoring and compliance role to ensure adherence globally to applicable ICT policies, standards and architecture, including in relation to information security.

25C.4 The Office supports and facilitates the implementation of mandates by departments, offices and field operations globally. This entails, as a first step, the provision of a resilient and secure global network and ICT systems, platforms and applications that enable collaboration and communication across the Secretariat and across the wider United Nations common system. During 2022, the Office will continue to ensure that ICT infrastructure is maintained and, where required, upgraded to support business continuity, through the required capital expenditures.

The Office will also support mandate delivery by Secretariat entities through the development and deployment of technology and data services and solutions that facilitate their programmatic delivery.

25C.5 As demonstrated during the move to largely remote working during the COVID-19 pandemic, the adoption of enterprise platforms that are cloud-based, where United Nations personnel can collaborate and connect regardless of their location, proved critical for the Organization as it adapted to new ways of working. Because of this ongoing programme of work, United Nations personnel have a single place to meet, communicate, share files and collaborate, enabling a mobile and digital workforce. The shift to enterprise platforms from legacy applications will continue, leading to a more cohesive, coherent and resilient ICT ecosystem, as will the strategic shift to cloud-based services.

25C.6 Although capacity has been strengthened, priority will continue to be given to information security, as the United Nations continues to face challenges with regard to adequately mitigating the growing, scale and complexity of cybersecurity threats. During 2022, the Office will establish proactive threat hunting capabilities, replacing the existing reactive intrusion detection systems. This transition will decrease reliance on outsourced services and strengthen internal capacity that is solely focused on United Nations operations, as both the internal ICT landscape as well as the external threat landscape evolve. The Office will also continue to carry out cybersecurity assessments of Secretariat entities to identify risks and, where required, recommend mitigating measures. These assessments can also identify systemic issues that require broader action.

25C.7 The Office will support efforts to transform the Organization to one that more effectively uses data and information to support decision-making and inform strategic direction. This work will be aligned with the Data Strategy of the Secretary-General for Action by Everyone, Everywhere and support the strategic goal of strengthening interoperability. While contributing to many of the related work streams, the Office will lead in the creation of technology enablers to support this transformation. Analytics and data solutions will also continue to be implemented, and associated standards and architecture will be formulated to achieve a consistent approach to data. Work on self-service analytics and other advanced analytics tools will continue to expand, building a cadre of United Nations staff globally who are able to produce analytics products to enhance transparency and enable decision-making as required. Other data-driven initiatives will continue to be deployed globally during 2022. The Office will also support areas such as policy formulation and the governance of information management. The continued shift to cloud-based services will also be instrumental to the implementation of the Data Strategy.

25C.8 Innovation will continue to underpin the work of the Office. Efforts will continue to identify frontier technologies, such as artificial intelligence and blockchain, to build innovative technology solutions to support the work of the United Nations and mandate delivery globally. Conversational artificial intelligence will continue to be strengthened and its use expanded through integration into systems and solutions.

25C.9 For 2022, the Office's planned deliverables and activities reflect known and anticipated challenges related to COVID-19 that are being faced by Member States. Such planned deliverables and activities include continued support in order to maintain the business continuity of the Secretariat and intergovernmental bodies, ensuring that platforms and solutions adequately support remote or hybrid working methods or meetings. Specific examples of such planned deliverables and activities are provided under subprogramme 2.

25C.10 With regard to interoperability and inter-agency coordination, the Office will build on the significant progress of 2020, through which access to collaboration on Secretariat platforms was provided to more than 100,000 personnel from agencies, funds and programmes. Globally, this has facilitated collaboration across the larger United Nations common system and supported coherence in mandate delivery.

25C.11 With regard to the external factors, the overall plan for 2022 is based on the planning assumption that major contractual or licence costs with vendors will not increase at a rate greater than standard inflation.

25C.12 With regard to the COVID-19 pandemic, the proposed programme plan is based on the assumption that the proposed deliverables and activities for 2022 will be feasible to implement. However, if the pandemic were to have a further impact on the planned deliverables and activities, they would be adjusted during 2022 within the scope of the overall objectives, strategies and mandates. Any such adjustments would be reported as part of the programme performance information.

25C.13 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, under subprogramme 3, the enterprise talent management platform now provides hiring managers with analytics during the assessment stages of the recruitment process to ensure that gender parity is taken into consideration throughout the hiring life cycle. In addition, the United Nations Careers Portal is being redesigned to attract and engage a diverse audience, and contribute to a workforce that reflects the breadth of Member States' nationalities, including through increased gender parity and diversity. The Office also continued to work with the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women) and the Office of Human Resources on efforts to increase the participation of women in its own workforce and in ICT throughout the Secretariat.

## **Programme performance in 2020**

### **Impact of COVID-19 on programme delivery**

25C.14 During 2020, the COVID-19 pandemic had an impact on the planned deliverables and activities of the Office. The COVID-19 pandemic starkly highlighted the criticality of ICT to the ability of the United Nations to function and represented a major test for the new integrated approach to ICT. The strategic decisions and investments made by the Secretariat, in particular with regard to the move to cloud computing and ICT platform choices, were critical to enabling business continuity during this period, as was the strengthened capacity of the Office to deliver enterprise applications Secretariat-wide since the introduction of management reforms. The deployment in September 2019 of a new integrated software suite that supports productivity, communication and collaboration from any location and addresses a number of complex issues related to interoperability, information security and information management proved instrumental in enabling the work of the Organization to continue uninterrupted, even when the suite became necessary to many staff who were put on mandatory telecommuting arrangements at short notice. However, supporting the Secretariat required strengthening and increasing the capacity of ICT applications, developing new ICT platforms, strengthening cybersecurity and creating guidance on how to work within the new environment. Intergovernmental bodies also needed additional support to function virtually, including with regard to addressing challenges such as simultaneous interpretation. Supporting the ability of the United Nations to communicate globally through virtual events also needed enhancements to the capacity available in March 2020. The results of these efforts became evident during the largely virtual high-level segment of the seventy-fifth session of the General Assembly.

25C.15 Reflecting the importance of continuous improvement and responding to the evolving needs of Member States, the programme will mainstream lessons learned and best practices related to the adjustments and adaptation of its programme owing to the COVID-19 pandemic. Specific examples of lessons learned that will be prioritized include the mainstreaming and enhancement of technologies to support a flexible and secure working model that incorporates remote and hybrid working arrangements. This includes incorporating cybersecurity tools to ensure protection from cyberthreats and secure remote support and software updating capabilities. The need to provide a similar experience for ICT users irrespective of their location is a technology challenge that will continue to be addressed, and will include the adaptation of applications and the proper equipping of personnel to work on-site and/or remotely. Much effort was expended to continually repurpose and rebuild the technology infrastructure in physical conference rooms at Headquarters to facilitate virtual/hybrid meeting participation, as the risk assessments for safety, health standards and social distancing continually changed and evolved during 2020. The COVID-19 pandemic has demonstrated that the Organization's global ICT infrastructure and applications need to be adaptable to changing requirements and be accessible from anywhere, with minimum intervention from the user community. The continued migration to the cloud in 2022 will strengthen the performance, availability and security of the Organization's applications and data, providing more options for agile and flexible approaches to delivering solutions to end users.

## Legislative mandates

25C.16 The list below provides all mandates entrusted to the programme.

### *General Assembly resolutions*

63/262	Information and communications technology, enterprise resource planning, and security, disaster recovery and business continuity	71/272 B, sect. III	Special subjects relating to the programme budget for the biennium 2016–2017: status of implementation of the information and communications technology strategy for the United Nations
69/262, sect. II	Questions relating to the programme budget for the biennium 2014–2015: information and communications technology in the United Nations	72/262 C, sect. I	Special subjects relating to the programme budget for the biennium 2018–2019: status of implementation of the information and communications technology strategy for the United Nations
70/248 A, sect. V	Special subjects relating to the proposed programme budget for the biennium 2016–2017: information and communications technology in the United Nations	72/266 B	Shifting the management paradigm in the United Nations

## Deliverables

25C.17 Table 25C.1 lists all cross-cutting deliverables, by category and subcategory, for the period 2020–2022.

Table 25C.1

**Cross-cutting deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>

1. Report of the Secretary-General on the status of implementation of the information and communications technology strategy	1	–	–	–
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>3</b>	<b>3</b>	<b>3</b>	<b>3</b>
2. Meetings of the Fifth Committee	1	1	1	1
3. Meetings of the Committee for Programme and Coordination	1	1	1	1
4. Meetings of the Advisory Committee on Administrative and Budgetary Questions	1	1	1	1

**Evaluation activities**

25C.18 A self-evaluation on data classification completed in 2020 guided the programme plan for 2022.

25C.19 The findings of the self-evaluation referenced above have been taken into account for the programme plan for 2022, which will assess the compliance of ICT systems and services against the established enterprise architecture, while noting that an examination of data and data classification is an important prerequisite for enterprise architecture, which is designed to ensure that ICT systems and services are implemented in a manner that supports the needs of the Organization for data and information and that they support the work of the offices and departments of the Secretariat. In addition, the enterprise architecture supports strategic aspects of ICT by increasing coherence, which facilitates cybersecurity efforts and supports interoperability.

25C.20 A self-evaluation of the compliance of information and communication technology systems and services against the enterprise architecture is planned for 2022.

**Programme of work****Subprogramme 1****Strategy and technology innovation****Objective**

25C.21 The objective, to which this subprogramme contributes, is to enhance an innovative, secure, unified digital space for the United Nations.

**Strategy**

25C.22 To contribute to the objective, the subprogramme will continue to focus on the establishment of strategies, policies and governance, as well as the provision of advisory services covering information technology, innovation and information management, including cybersecurity management services, to the Organization. The subprogramme works closely with United Nations clients to identify their key data,

information and technology priorities or challenges and facilitate the adoption of solutions to meet their needs. By working in close collaboration with internal and external partners, the subprogramme ensures results through the innovative, integrated and secure design and implementation of technology solutions. The subprogramme supports the core work of the United Nations by using emerging innovative technologies, such as artificial intelligence, machine learning and distributed ledger technology, to provide strategic solutions and enabling environments in partnership with relevant United Nations entities. Strategic and policy aspects of information management are central to this subprogramme, as is the implementation of the Data Strategy of the Secretary-General.

25C.23 The use of technology to support the core work of the United Nations is established in General Assembly resolution [69/262](#), and technology innovation is a pillar of the information and communications technology strategy for the United Nations. The subprogramme also supports United Nations entities in reducing the level of risk to the image, resources, data, operations and safety of the personnel and assets of the United Nations. The subprogramme promotes information security campaigns, supports and implements security measures, strengthens proactive threat management capabilities and promotes the use of advanced security features. In parallel, the subprogramme's efforts also focus on supporting Secretariat entities to ensure that information security risks do not hamper efforts to implement United Nations mandates or adversely affect support to Member States. The subprogramme further helps to facilitate access to data across the Organization by leveraging modern technology, strengthens data literacy by co-leading the implementation of the Data Strategy and governs information and data management. The subprogramme will continue to develop and strengthen information management strategies and policies as well as promote the effective use of data.

25C.24 The above-mentioned work is expected to result in:

- (a) Better awareness of innovation techniques and new technologies, and increased capacity of Secretariat entities to deliver on mandates;
- (b) Strengthened resilience of the Organization and better awareness by end users of existing and future threats, and a strong central capability and capacity to support the global Secretariat in safeguarding the data, information, services, solutions and infrastructure of the United Nations;
- (c) Improved use of information and data by departments and offices;
- (d) A coherent ICT landscape in the Secretariat through compliance with policies, procedures and guidelines as well as common standards, strategies and architecture.

## **Programme performance in 2020**

25C.25 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Improved security of technology environment and responsible and innovative use of information and communications technology solutions**

25C.26 Given the interconnected nature of the Organization's systems and data, all entities of the Secretariat, including field missions, have a role in keeping the overall ecosystem safe. Cybersecurity has become a key enabler of not only regular ICT operation, but also the ability of the Organization to deliver on its mandates. As part of the ongoing efforts to improve the cybersecurity posture of the Organization, the subprogramme conducted four cybersecurity assessments at different field missions in 2020 (the United Nations Mission in South Sudan (UNMISS), the United

Nations Multidimensional Integrated Stabilization Mission in Mali (MINUSMA), the United Nations Integrated Office in Haiti (BINUH) and the United Nations Interim Administration Mission in Kosovo (UNMIK)). Further assessments were put on hold owing to COVID-19-related travel restrictions but are expected to be resumed as soon as the situation allows. These assessments focused on the different cybersecurity risks that each mission operates under, and attempted to detect attack vectors that, if exploited by an adversary, could have a negative impact on the ability of the mission to operate safely or allow unauthorized access to the mission's information and/or assets. Knowledge transfer activities were also conducted to help the mission proactively tackle cybersecurity risks going forward.

25C.27 The subprogramme also supported mandate delivery by Secretariat entities through the development of software solutions for use by Member States in their jurisdictions. These solutions help counter money-laundering and the financing of terrorism, detect the travel of terrorists and serious criminals, manage land registries and educate primary school students. In this regard, the subprogramme completed key technical components of the goTravel solution for the Office of Counter-Terrorism, which is used to facilitate the detection of terrorists and serious criminals and their travel movements in compliance with Security Council resolutions [2178 \(2014\)](#), [2396 \(2017\)](#) and [2482 \(2019\)](#). Another successful application of emerging technologies, in partnership with the United Nations Children's Fund, is the learning platform UNILEARN, which was built and piloted for 120,000 primary school children, parents and teachers in the state of Rajasthan, India. The subprogramme has also supported the United Nations Human Settlements Programme (UN-Habitat) on the implementation of a blockchain-enabled solution to improve the capacity of Afghanistan to manage land registry records.

*Progress towards the attainment of the objective, and performance measure*

25C.28 The above-mentioned work contributed to the objective, as demonstrated by Member States, in collaboration with other United Nations entities, having access to innovative United Nations technology solutions, and the improved cybersecurity posture of the Organization that enables it to detect potential attack vectors before they are exploited (see table 25C.2).

Table 25C.2  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
The United Nations Mission for the Referendum in Western Sahara and the United Nations Military Observer Group in India and Pakistan have an increased awareness and practical knowledge of risks and mitigation measures	<p>Passenger data management solution established to facilitate detection of terrorists' travel</p> <p>The United Nations Assistance Mission in Afghanistan and the United Nations Support Office in Somalia/United Nations Assistance Mission in Somalia have access to up-to-date cybersecurity assessments and areas to improve security of technology environment were identified</p>	<p>The Caribbean Community and Botswana have access to goTravel through collaboration with the Office of Counter-Terrorism</p> <p>Afghanistan has access to the land registry solution through the UN-Habitat/Government of Afghanistan "City for All" programme</p> <p>UNMISS, MINUSMA, BINUH and UNMIK have access to up-to-date cybersecurity assessments and mitigation and improvement measures by missions have commenced</p>

### **Impact of COVID-19 on subprogramme delivery**

25C.29 Owing to the impact of COVID-19 during 2020, the subprogramme cancelled the 2020 data symposium event, which resulted in a greater effort to coordinate data awareness and outreach and slowed engagement with key ICT stakeholders. The subprogramme also had to change its approach to some advisory services, such as on-site information management services for United Nations entities. This change resulted in reduced scope for the provision of policy governance advice and the sharing of best practices. The cybersecurity assessments of field missions have been postponed until travel restriction are lifted. However, the subprogramme supported efforts to strengthen the information security of the Organization as new risks and threats emerged in the virtual workspace environment. A significant increase in demand was noted for: (a) security architecture services that supported remote working arrangements, including the development of solutions for the remote management of computers, remote access to internal applications and assessments of remote simultaneous interpretation platforms; and (b) additional threat monitoring and incident response requirements due to increased cybersecurity threats. However, these demands created an overload on the existing resources, which were also affected by the liquidity crisis. These changes had an impact on the programme performance in 2020, as specified under results 1 and 2 below.

### **Planned results for 2022**

25C.30 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: better information, enhanced data sharing and reduction in risk of security breaches<sup>34</sup>**

#### **Programme performance in 2020**

25C.31 The subprogramme has drafted an information management framework in consultation with entities across the Secretariat and other United Nations organizations. Once endorsed, the framework will create opportunities to generate standardized principles, policies, guidelines and procedures, and facilitate access to and the sharing of information while reducing the risk of its duplication. The subprogramme also established information governance strategies for enterprise solutions, such as Unite Workspace, and continued to provide guidance and support to client departments on the adoption of technology solutions. Furthermore, the subprogramme, in coordination with the Executive Office of the Secretary-General, is leading the implementation of the “technology environment” enabler outlined in the Data Strategy of the Secretary-General by providing strategic coordination and oversight of United Nations technology, governance and processes.

25C.32 The above-mentioned work contributed to the adoption by client departments of some policies and procedures, such as the technical procedure for data classification and the technical procedure for sharing information with external parties, and the adoption by client departments of new technology solutions such as Unite Workspace, which did not fully meet the planned target of adoption by client departments of new policies and procedures and adoption by client departments and Member States of new technology solutions. The target was not fully achieved because, owing to liquidity constraints, capacity and resources were insufficient to

<sup>34</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 29C)).

develop all the supporting guidance documents needed during 2020 to support the information management framework.

### Proposed programme plan for 2022

25C.33 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective and in response to recent developments, the work in this subprogramme will evolve to include continued coordination on the technology environment enabler outlined in the Data Strategy of the Secretary-General, the implementation of the information management framework, the creation of policies, guidelines and standards to support the information management framework and the development of a compliance function. The expected progress is presented in the updated performance measure below (see table 25C.3).

Table 25C.3  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
<ul style="list-style-type: none"> <li>Discussions between client departments on the information security governance framework</li> </ul>	<ul style="list-style-type: none"> <li>Identification by client departments of standards for analytics and business intelligence systems and data</li> </ul>	<ul style="list-style-type: none"> <li>Adoption by client departments of some policies and procedures, such as the Secretariat ICT technical procedure on sharing information with external parties and the job aid on guidance on the use of electronic signatures</li> <li>Adoption by client departments of new technology solutions, such as Unite Workspace</li> </ul>	<ul style="list-style-type: none"> <li>Adoption by client departments of the use of conversational artificial intelligence</li> </ul>	<ul style="list-style-type: none"> <li>Adoption of the information management framework and two supporting policies and guidelines by client departments</li> <li>Usage by clients of a compliance function to monitor and assess the effectiveness of controls established in policies and procedures</li> </ul>

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: mainstream the use of artificial intelligence<sup>35</sup>

### Programme performance in 2020

25C.34 The subprogramme has launched an artificial intelligence-based chatbot for Secretariat staff that includes a number of initial skills such as the ability to impart information about COVID-19, basic facts about the United Nations and its senior leadership, information about the Sustainable Development Goals and the management of email and calendars. The chatbot system provides an intuitive interface that allows users to quickly get the information they need from multiple

<sup>35</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect. 29C)).

sources in a more precise and informative way. It also provides personalized and secure virtual assistance by performing personal tasks related to messaging and calendar management. The subprogramme will also continue to expand on the chatbot's skills and promote its use across the different departments of the United Nations. Over time, as the system evolves, it will be able to provide support for the departments' unique operational needs.

25C.35 The subprogramme will continue to provide frontier technologies that can be used by the departments and offices of the Secretariat, in accordance with ICT policies, standards and architecture, to support the implementation of their mandates. In addition, the subprogramme will continue efforts related to the establishment of partnerships throughout the United Nations system.

25C.36 The above-mentioned work contributed to users having access to conversational artificial intelligence in order to find information, which met the planned target of the development of an artificial intelligence-based chatbot prototype, "Alba", and the building of United Nations context-aware language understanding capabilities, reflected in the proposed programme budget for 2021.

### Proposed programme plan for 2022

25C.37 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective and in response to recent developments, the subprogramme's work will evolve to include the implementation of the conversational artificial intelligence platform in other official languages of the United Nations and the alignment of frontier and emerging technologies with organizational priorities and the Data Strategy of the Secretary-General, as well as the use of conversational artificial intelligence in the context of enterprise applications, such as those related to policies and processes. The expected progress is presented in the updated performance measure below (see table 25C.4).

Table 25C.4  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
<ul style="list-style-type: none"> <li>Research and development of core building blocks for natural language processing</li> </ul>	<ul style="list-style-type: none"> <li>Building of United Nations context-aware language understanding capabilities</li> <li>Development of artificial intelligence-based chatbot prototype, Alba</li> </ul>	<ul style="list-style-type: none"> <li>Users have access to conversational artificial intelligence to find information</li> <li>Availability of 9 artificial intelligence capabilities for offices and departments</li> </ul>	<ul style="list-style-type: none"> <li>Full realization of the benefits of conversational artificial intelligence</li> <li>Applications can include conversational artificial intelligence capabilities</li> </ul>	<ul style="list-style-type: none"> <li>Availability of conversational artificial intelligence in 3 official languages of the United Nations</li> </ul>

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: seamless access to United Nations data for all personnel

#### Proposed programme plan for 2022

25C.38 The Organization must be able to respond to complex situations in the most efficient and well-informed way. A quick, effective response across multiple

geographic and disciplinary layers requires the intelligent management of large amounts and a large variety of data. Managers and decision makers can be supported to find the information they need to make fast, well-informed decisions. The subprogramme aims at supporting data-driven decision-making by making sure that the Secretariat's technology tools and processes are aligned to empower United Nations personnel in the optimal use of data for insight, impact and integrity. An internal pilot project to catalogue data was implemented as an initial step, and research was conducted on data exchange platforms and best practices.

#### *Lessons learned and planned change*

25C.39 The lesson for the subprogramme was that there were fragmented data infrastructures in the Organization that prevented data interoperability and systems integration. In applying the lesson, the subprogramme will work on a subset of authoritative data sets and will assess how the data exchange platform can be extended to accommodate all data sources, and at the same time look at opportunities to harmonize the United Nations data infrastructures. The subprogramme will provide United Nations personnel with a data exchange platform that serves as a central gateway to authoritative data sources. It will include vital information about the data and where and how the data can be accessed. The key activities will include the identification of the data sources and coordination with the data owners to establish appropriate governance and a data literacy programme. In addition, the subprogramme will also integrate governance functionality into the platform to support data quality and monitor compliance with established governance policies. Universal access to the data can be achieved with the implementation of an Organization-wide data provisioning and distribution model that allows data access to specific users in a well-governed and secure manner. The subprogramme will continue to build and extend on the capabilities of the data exchange platform based on lessons learned from the pilot project. The data exchange platform will leverage machine learning and other artificial intelligence techniques to accelerate and automate data management and governance processes.

#### *Expected progress towards the attainment of the objective, and performance measure*

25C.40 This work is expected to contribute to the objective, as demonstrated by clients having access to available authoritative data sources to help them in their decision-making processes (see table 25C.5).

Table 25C.5  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
—	—	—	Users in 3 entities have access to authoritative data sets which help them in a wide array of decision-making processes	An additional 6 entities have access to authoritative data sets which help users in a wide array of decision-making processes

### **Deliverables**

25C.41 Table 25C.6 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 25C.6

**Subprogramme 1: deliverables for the period 2020–2022, by category and subcategory***Category and subcategory***E. Enabling deliverables**

**Information and communications technology:** formulation, updating and institutionalization of ICT and information management policies and standards; enterprise architecture framework and compliance oversight mechanism; analytics and innovation guidelines for oversight and accountability; analytics and frontier technology solutions accessible to Secretariat entities; repeatable technology solutions and realization of the benefits of conversational artificial intelligence; expert advice to ICT service providers on information management; policies and procedures for data privacy and mechanisms for oversight of adherence to data privacy principles; disaster recovery plan for critical systems; and information security framework across Secretariat entities, comprising a framework document on information security and security assessment of systems and entities.

## **Subprogramme 2**

### **Operations support**

**Objective**

25C.42 The objective, to which this subprogramme contributes, is to achieve an optimized ICT infrastructure and technology environment for all United Nations entities, within which the Organization's global technology solutions, systems and applications are delivered securely and in an intuitive manner.

**Strategy**

25C.43 The subprogramme will continue to implement and upgrade systems and infrastructure to enable the Secretariat and Member States to effectively deliver on the Organization's core work and deliverables. The rapid adoption of global enterprise platforms gives users a single place to meet, communicate, share files and collaborate, enabling a mobile and digital workforce. Further work is planned to enable broader collaboration and the sharing of information within the larger United Nations common system with the continued goal of simplification of the underlying information and communications technology infrastructure.

25C.44 The subprogramme will contribute to enabling the Data Strategy of the Secretary-General. The implementation of self-service analytics and other advanced analytics tools will continue to expand the cadre of United Nations staff globally who can produce their own analytics products to enhance transparency and enable decision-making. Other data-driven initiatives, such as the situational awareness technology platform Unite Aware and the Unite field remote infrastructure monitoring system, will continue to be rolled out globally, supporting data-driven decision-making by senior management in peace operations.

25C.45 The subprogramme will continue to implement hybrid cloud hosting, which is transforming how the Organization hosts its data and applications. Consolidating the Organization's data primarily in a United Nations-managed cloud environment will facilitate the objective of the Data Strategy of the Secretary-General to simplify access to the Organization's data.

25C.46 The subprogramme will continue to advance the delivery of ICT support and services through a standardized information technology service management framework; create a cross-cutting client service desk approach to carry out the Secretariat's customer relationship management activities; provide around-the-clock support for enterprise applications such as Umoja, Inspira and Unite Mail; provide

faster resolution of incidents and service requests; and increase customer satisfaction and application uptime.

25C.47 The subprogramme plans to support Member States on issues related to COVID-19 by continuing to facilitate virtual collaboration across the United Nations system, supporting intergovernmental meetings through a hybrid model that caters to both in-person and remote participants.

25C.48 The above-mentioned work is expected to result in:

(a) The facilitation of mandate delivery by Secretariat entities by a modern, resilient and secure global ICT infrastructure;

(b) Greater collaboration across the United Nations common system that supports the Secretariat in the execution of its mandates with greater agility;

(c) A modern and secure technology environment that serves as the foundation for the Data Strategy of the Secretary-General;

(d) A user base that is capable and familiar with the systems and processes required to present relevant information to inform decision makers in the most optimal way;

(e) Improved satisfaction of end users with ICT enterprise services and increased engagement and communication with clients;

(f) Enterprise-level solutions to facilitate complex intergovernmental meetings and remote access, verbatim report-writing and translation, interpretation, broadcast and webcast capabilities.

## **Programme performance in 2020**

25C.49 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Business continuity in the time of COVID-19**

25C.50 The subprogramme supported the work of the Secretariat and intergovernmental bodies from the onset of the COVID-19 pandemic in March 2020, which required strengthening and increasing the capacity of ICT infrastructure and broadcasting and conferencing systems, the commissioning of new ICT remote simultaneous interpretation platforms and the issuance of guidance on how to work in the new virtual environment.

25C.51 The United Nations videoconferencing capacity was increased from 400 simultaneous connections globally on 15 March to 1,000 by June 2020. This upgrade was critical to enabling large complex meetings of intergovernmental bodies to run simultaneously. A new virtual meeting platform was introduced that allowed up to 1,000 participants to interact. The procurement of three remote simultaneous interpretation systems was completed and integrated into existing conference room systems.

### *Progress towards the attainment of the objective, and performance measure*

25C.52 The above-mentioned work contributed to the objective, as demonstrated by the enhanced capabilities detailed above. The subprogramme ensured that the Secretariat and intergovernmental bodies were provided with the technical solutions to enable business continuity and mandate delivery following the move to largely remote working as a result of the restrictions imposed because of the COVID-19 pandemic (see figure 25C.I).

Figure 25C.I

**Performance measure: number of simultaneous United Nations videoconferencing connections globally**

### **Impact of COVID-19 on subprogramme delivery**

25C.53 Owing to the impact of COVID-19 during 2020, the subprogramme postponed the planned establishment of an operations centre simulation training environment at the Regional Service Centre in Entebbe, Uganda, as a result of restrictions on the travel of passengers and the transport of cargo.

25C.54 At the same time, from the outset of the pandemic, the subprogramme supported the work of the Organization and its personnel with regard to working remotely, as it had the appropriate enterprise tools and systems in place and the capacity to scale up to the required levels. This enabled the Secretariat workforce to effectively transition in a short number of weeks in March 2020 to primarily remote working in many duty stations. This also enabled the Organization to continue mandate implementation globally by facilitating communication and collaboration. To continue to support meetings of intergovernmental bodies, the subprogramme transitioned to a new model, facilitating complex meetings with both full remote participation and hybrid in-person and remote participation.

### **Planned results for 2022**

25C.55 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: technology towards a connected United Nations<sup>36</sup>**

#### **Programme performance in 2020**

25C.56 During 2020, the subprogramme delivered fit-for-purpose ICT infrastructure and platforms that allowed the Organization to connect, collaborate and communicate. The rapid move to remote working in many duty stations due to COVID-19 starkly highlighted the criticality of ICT to the ability of the United Nations to function. The strategic decisions, including the move to the cloud and the global deployment of the Unite Mail and Unite Workspace suite of collaboration and

<sup>36</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 29C)).

communication tools, completed in September 2019, were critical to enabling the Secretariat to transition to a digital workforce.

25C.57 The above-mentioned work contributed to increased customer satisfaction with Unite Service Desk services, resulting in a customer satisfaction level of 94 per cent, which exceeded the planned target of 85 per cent customer satisfaction reflected in the proposed programme budget for 2020, and phase 2 of the Unite Workspace project migrated a large volume of United Nations files from local infrastructure in duty stations to centrally managed locations, providing remote access to the files.

### **Proposed programme plan for 2022**

25C.58 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will pursue enhancements to the collaboration and communication platforms, such as seamless sharing of complex files, collaboration in real time and integration with the telephony system, which will result in increased customer satisfaction. The expected progress is presented in the performance measure below (see figure 25C.II).

Figure 25C.II

#### **Performance measure: customer satisfaction with services delivered**

(Percentage)

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 2: improved collaboration<sup>37</sup>**

#### **Programme performance in 2020**

25C.59 The subprogramme's implementation of Unite Workspace phase 2 delivered a suite of collaborative tools to more than 56,000 users globally, and migrated locally stored files to the cloud so that they are now accessible from each end-user device, including mobile devices. The Unite Service Desk revised its catalogue and provided global support for these new solutions. Furthermore, the subprogramme continued the delivery of business intelligence products, allowing staff to produce their own dashboards, thereby facilitating decentralized and local decision-making.

<sup>37</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect. 29C)).

25C.60 Following the transfer of the resident coordinator system to the Secretariat, the subprogramme has focused on supporting greater interoperability between the Secretariat and the agencies, funds and programmes of the United Nations system. Technical solutions are being implemented in a phased manner to enable business-to-business connections among entities, allowing the personnel of United Nations system organizations to gain access to the information services and collaboration platforms of other organizations of the United Nations system. To date, approximately 105,000 staff members from United Nations system organizations and affiliates have been provided access to Secretariat collaboration and file-sharing platforms. This has enabled broad collaboration across the United Nations common system, increasing client satisfaction with services provided by the subprogramme.

25C.61 The above-mentioned work contributed to clients having access to real-time solutions, including the new collaborative tools, to resolve their own issues quickly, which met the planned target reflected in the proposed programme budget for 2021.

### Proposed programme plan for 2022

25C.62 The subprogramme will continue the work related to the planned result, in line with its mandate. While the subprogramme will continue the delivery of collaboration and communication platforms and self-service analytical tools to the Secretariat, access to these platforms and tools will be provided progressively to other United Nations system organizations in the context of the Data Strategy of the Secretary-General (see table 25C.7).

Table 25C.7  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
The continuous focus on efficiency and automation decreased the resolution time by 66 per cent for all supported applications; for Umoja, Inspira and Unite Mail, which account for 69 per cent of the service requests, the average resolution time was just three hours	Unite Service Desk consolidated further tier 1 service desks; resolution time decreased by more than 50 per cent; and Unite Service Desk achieved an all-time high average customer satisfaction rate of 93 per cent	Clients have access to real time solutions, including the new collaborative tools, to resolve issues quickly	The continual deployment of new software and development of more functionalities within the client portal will improve the client experience and reduce resolution time	Clients have improved access to real-time solutions and collaboration tools, including use of artificial intelligence and machine-learning methods

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: enhanced situational awareness for decision makers

#### Proposed programme plan for 2022

25C.63 The subprogramme successfully completed piloting Unite Aware in the United Nations Multidimensional Integrated Stabilization Mission in the Central African Republic (MINUSCA) at the end of 2019. Unite Aware is a technology platform designed to provide a coherent and comprehensive approach to situational

awareness and information analysis for United Nations peace operations. The Unite Aware platform standardizes the technologies used to collect and manage a broad range of data and information sources in a secure manner and then presents that information to non-uniformed and uniformed decision makers by means of visualization, reporting and analysis instruments. The holistic approach taken has delivered a coherent and intuitive technology platform and associated processes.

*Lessons learned and planned change*

25C.64 The lesson for the subprogramme resulting from the pilot was the need for a learning platform to support the roll-out and ongoing acceptance of Unite Aware. A diverse user group that included uniformed personnel who regularly rotate highlighted the need for readily available training for incoming staff. In applying the lesson, the subprogramme will modularize online learning to allow new users to learn the areas related to their work during predeployment and the early stages of deployment. Incorporating the learning component as an integral part of the Unite Aware platform will effectively introduce new users to the platform and ensure its overall sustainability.

*Expected progress towards the attainment of the objective, and performance measure*

25C.65 This work is expected to contribute to the objective, as demonstrated by the fact that Unite Aware is already fully operational in MINUSCA. The subprogramme is expected to increase the availability of the Unite Aware technology platform to more peace operations (see table 25C.8).

Table 25C.8  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
–	MINUSCA pilot of Unite Aware platform	Availability of Unite Aware platform in MINUSCA	Availability of Unite Aware platform to 2 additional peace operations	Availability of Unite Aware platform to 4 additional peace operations

**Deliverables**

25C.66 Table 25C.9 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 25C.9  
**Subprogramme 2: deliverables for the period 2020–2022, by category and subcategory**

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
Conference and secretariat services for meetings (number of three-hour meetings)	32 460	29 879	33 434	33 251
Meetings of intergovernmental and expert bodies at Headquarters	32 460	29 879	33 434	33 251
<b>E. Enabling deliverables</b>				
Information and communications technology: hardware and infrastructure, and software and applications.				

## **Subprogramme 3 Enterprise solutions**

### **Objective**

25C.67 The objective, to which this subprogramme contributes, is to ensure effective and efficient implementation of the mandates of Secretariat entities.

### **Strategy**

25C.68 To contribute to the objective, the subprogramme will continue to develop and maintain technical solutions that support mandate delivery by Secretariat entities. In this context, the subprogramme will enhance identity management by leveraging cloud technology, implement application integration by electronic data exchanges, upgrade service management solutions, enhance talent management and manage the United Nations safety and security information systems. The subprogramme will also continue to work with Umoja and peacekeeping missions on uniformed capabilities management solutions. It will further contribute to the development pillar of the Secretary-General's reform initiative by providing information technology solutions to support mandate delivery by substantive departments and offices, and will support public website content management and knowledge management solutions as well as deploy and support collaboration and communication tools and services.

25C.69 The above-mentioned work is expected to result in:

- (a) Users enabled to operate applications and equipment with one single identity;
- (b) Further automation of administrative support processes;
- (c) Faster recruitment and onboarding of personnel;
- (d) Increased availability of information for professional security officers to perform their duties of protecting United Nations personnel across the United Nations system;
- (e) More timely reimbursements to troop- and police-contributing countries;
- (f) Facilitation of contributions to the Sustainable Development Goals through technology solutions, as articulated by programmatic mandates;
- (g) Improved information-sharing between and among the Organization's stakeholders, including enhanced coordination and cooperation within and across the Secretariat and the broader United Nations system.

### **Programme performance in 2020**

25C.70 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

#### **Timely information on COVID-19 available to United Nations medical personnel**

25C.71 In response to the outbreak of the COVID-19 pandemic, the subprogramme developed a centralized COVID-19 data hub accessible to medical personnel of the United Nations system that provides daily situation reporting of confirmed cases across the Organization worldwide. This facilitated the work of United Nations medical services and decision-making by senior management of the

entities concerned, supporting mandate delivery and response coordination. While the data hub is available across the United Nations system, access is open only to a very limited and controlled number of medical personnel because of the strictly confidential nature of medical data.

*Progress towards the attainment of the objective, and performance measure*

25C.72 The above-mentioned work contributed to the objective, as demonstrated by the timely provision of an information technology solution for the United Nations system (see table 25C.10).

Table 25C.10

**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
—	—	26 medical focal points have access to daily situation reporting of confirmed COVID-19 cases

**Impact of COVID-19 on subprogramme delivery**

25C.73 Owing to the impact of COVID-19 during 2020, the subprogramme experienced delays in the planned completion of some deliverables, leading to the suspension of some on-site training and delayed deployment of a number of programmatic support solutions to users, such as mobile applications for logistics support. The pandemic also caused delays to the Wayfinder proof of concept, which is intended to offer accessible indoor navigation solutions to persons with disabilities. These delays were due to travel restrictions affecting the project team and reduced access to the installation sites at the United Nations Headquarters complex.

25C.74 At the same time, however, the subprogramme identified new activities related to the COVID-19 pandemic, within the overall scope of its objectives, namely the COVID-19 data hub for the United Nations system that provides daily situation reporting of confirmed cases among United Nations personnel worldwide, thereby supporting the work of the Organization's medical services and decision-making by senior management. The new deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

**Planned results for 2022**

25C.75 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

**Result 1: global access to applications, anywhere, anytime<sup>38</sup>**

**Programme performance in 2020**

25C.76 The subprogramme has improved information-sharing and online collaboration between personnel, enabling a flexible and responsive global workforce and improving staff productivity and effectiveness. In particular, the subprogramme completed the development of the electronic Committee on Contracts to support the

<sup>38</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 29C)).

delegation of authority in procurement across all duty stations and deployed the second phase of uniformed capabilities management to facilitate timely processing of reimbursement to troop- and police-contributing countries. The subprogramme also deployed the second phase of the enterprise knowledge gateway, with a chatbot, questions and answers, and full-text search capability extended across the Department of Peace Operations policy and practice database on official guidance and best practices in the areas of conflict prevention, electoral assistance, mediation, sustaining peace and the police, among others. Furthermore, the subprogramme built a service portal for the United Nations Office at Nairobi, enabling information-sharing and transparency on administrative services provided by the Office to agencies, funds and programmes.

25C.77 The above-mentioned work contributed to a 70 per cent increase to 16,000 personnel actively using collaboration and communication tools in December 2020, from a baseline of 9,400 users in March 2020, and an increase of 23 solutions accessible from any location on multiple devices, which met the planned target of a higher percentage of staff actively using collaboration and communication tools and a greater number of solutions accessible from any location on multiple devices reflected in the proposed programme budget for 2020.

### Proposed programme plan for 2022

25C.78 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to provide shared enterprise solutions that are built on standard platforms and are compliant with enterprise security and architecture requirements for secure access to information, online collaboration and communication between personnel from any location at any time, and will review highly customized enterprise solutions for migration to modern technology standards. The expected progress is presented in the performance measure below (see table 25C.11).

Table 25C.11  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Few staff have access to collaboration and communication tools	More staff actively use collaboration and communication tools	70 per cent increase to 16,000 personnel actively using collaboration and communication tools  23 additional solutions accessible from any location on multiple devices	Online collaboration and communication tools are used by personnel while working remotely or travelling on official business, and for online meetings	Increased and widespread utilization of online collaboration and communication tools

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

**Result 2: United Nations partners to collaborate with the Organization on any device from any location<sup>39</sup>****Programme performance in 2020**

25C.79 The subprogramme has developed a sophisticated system to extend access to shared systems to United Nations partner entities, governmental and non-governmental organizations and academic and research institutions, among others. Once access is granted by authorized personnel, secure and seamless online collaboration is enabled between the Secretariat and United Nations partners from any device and any location. For example, the subprogramme collaborated with the Umoja project team to register external partners on two portals for Member States, namely the Umoja contributions and budget planning portals. The subprogramme also enriched the functionality of the electronic travel advisory application to allow location service and headcounts of United Nations personnel, including the agencies, funds and programmes, in risk management areas. Furthermore, the subprogramme carried out several enhancements to the verification module of Inspira, including making it mobile compatible, for use by the agencies, funds and programmes to check the references of candidates recommended for selection.

25C.80 The above-mentioned work contributed to enabling the collaboration of the Secretariat with 5,396 active United Nations external partner accounts, exceeding the target of 3,676 reflected in the proposed programme budget for 2021.

**Proposed programme plan for 2022**

25C.81 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will maintain and support partner registration for access to United Nations tools and applications. Since a large number of registrations were already established in 2020, precipitated by the necessity of remote working due to the pandemic, the number of external partners is expected to increase at a slower pace or remain stable over the coming years. The expected progress is presented in the performance measure below (see figure 25C.III).

---

<sup>39</sup> As reflected in the proposed programme budget for 2021 ([A/75/6 \(Sect. 29C\)](#)).

Figure 25C.III

**Performance measure: total number of external accounts of authorized United Nations partners (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: timely custom information technology solutions for mandate delivery**

#### **Proposed programme plan for 2022**

25C.82 Mandate delivery by substantive entities is facilitated by information technology solutions that are developed by the subprogramme. Examples of past projects include a United Nations Environment Programme virtual reality application to demonstrate the volume and impact of carbon emissions; a United Nations Office for Disaster Risk Reduction solution for partnerships at the local, national, regional and global levels to support the implementation of disaster risk reduction strategies and plans; and the Economic and Social Commission for Asia and the Pacific Sustainable Development Goals helpdesk as a one-stop online service providing access to Goal-related tools, knowledge products, data portals, expertise, advice and opportunities for peer-learning and regional South-South cooperation through thematic areas, covering a multitude of topics.

#### *Lessons learned and planned change*

25C.83 The lesson for the subprogramme was related to the surge capacity of ICT resources for timely implementation of past projects. Although the Office of Information and Communications Technology serves as the technology supplier, it does not control if or when projects needed by client offices start, since they depend on the prioritization and availability of funding determined by the substantive offices concerned. In applying the lesson, the subprogramme will combine available internal capacity with on-demand contractual services, striking the right balance between surge capacity and preserving essential project knowledge in-house.

#### *Expected progress towards the attainment of the objective, and performance measure*

25C.84 This work is expected to contribute to the objective, as demonstrated by Secretariat entities' access to additional information technology solutions to support the programmatic mandates of the Secretariat (see table 25C.12).

Table 25C.12  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
—	—	Technology Facilitation Mechanism in use by the Department of Economic and Social Affairs  FeedUP@UN in use by the Economic Commission for Europe  Fourth edition of Sendai Framework monitoring solution in use by the United Nations Office for Disaster Risk Reduction	Three additional information technology solutions available to support mandate delivery by Secretariat entities	Three additional information technology solutions available to support mandate delivery by Secretariat entities

## Deliverables

25C.85 Table 25C.13 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 25C.13  
Subprogramme 3: deliverables for the period 2020–2022, by category and subcategory

### Category and subcategory

#### E. Enabling deliverables

**Information and communications technology:** implementation and support for content management, communications and collaboration solutions provided to all Secretariat personnel and external partners; ongoing development and support for the enterprise web management platform (Unite Web), including security and standards compliance, used by Secretariat entities, field missions and permanent missions; enterprise talent and performance management solutions for around 55,000 users; integration with more than 30 applications; Umoja support, including uniformed capabilities management; support for service management solutions for approximately 10,000 users; safety and security solutions for about 40,000 users; specific programmatic solutions for peace and security to facilitate management of time and attendance for military and United Nations police personnel, sexual exploitation and abuse incident reporting and misconduct case tracking; and Technology Facilitation Mechanism, food loss and waste management and Sendai Framework monitoring solutions for the Sustainable Development Goals.

## **Section 29E**

### **Administration, Geneva**

#### **Overall orientation**

##### **Mandates and background**

25E.1 The United Nations Office at Geneva was established in 1947 pursuant to General Assembly resolution 24 (I) and successive resolutions of the Assembly. The Office is responsible for providing administrative and support services to entities in Geneva and their field offices, in accordance with policies, procedures and practices established by the Under-Secretary-General for Management Strategy, Policy and Compliance and the Under-Secretary-General for Operational Support. The Office is also responsible for providing support services to the intergovernmental processes of the Organization in line with its role as a major conference centre for international diplomacy; providing building management and engineering services, including space planning, allocation of offices and maintenance of a register of land and properties in Geneva that belong to the United Nations; providing technical conference support services as well as information and communications technology (ICT) infrastructure; and providing library and knowledge management services in support of the implementation of the mandated programmes and activities of the Secretariat.

##### **Strategy and external factors for 2022**

25E.2 The Office will continue to provide administrative and support services, including direction and coordination in human resources management, financial resources management, information and communications technology, central support services and library services at the United Nations Office at Geneva, including the management and utilization of United Nations premises and the coordination of human resources, finance and administrative policies with other Geneva-based organizations. The Office will carry out and monitor the implementation of policy and other functions related to the management of human resources, finance and budget, information and communications technology and central support services, as determined by the Under-Secretary-General for Management Strategy, Policy and Compliance. It will provide financial, budgetary and accounting services, as well as guidance and advice, in accordance with the Financial Regulations and Rules of the United Nations and relevant standards. In addition, the Office manages the human resources requirements of the United Nations offices in Geneva, including by providing guidance and advice, staff development and learning services, career support and counselling, staff welfare activities, medico-administrative services and human resources legal advisory services.

25E.3 The Office provides administrative and support services for United Nations meetings held in Geneva and for specialized agencies and provides procurement, commercial activities, transportation, travel and other central support services. It also provides regional ICT services and library, records and archives, and knowledge management services in support of the implementation of the mandated programmes and activities of the Secretariat. The Office further ensures proper coordination and implementation of the recommendations of oversight bodies at the Office as well as the business continuity of administrative support for other entities in Geneva in emergency cases.

25E.4 Implementation of the strategic heritage plan of the United Nations Office at Geneva progressed steadily, with the aim of striving for the highest standards with

regard to accessibility and the elimination of barriers, while preserving the principles of the original design and the historical features of the existing buildings. However, progress was slower than anticipated owing to the enforcement of health and sanitary measures related to the coronavirus disease (COVID-19) pandemic at the work site. Physical renovation works at the historic buildings of the Palais des Nations began in January 2021 and are projected to continue until 2024, while occupancy of the new building H will begin in April/May 2021; additional parts of the historic Palais that are to be renovated will be vacated. The progressive implementation of the strategic heritage plan is presenting the staff of the Office with a broad range of significant challenges ranging from commissioning and assuming responsibility for the operation of the new building H to sequential decommissioning of parts of the historic Palais building complex and the management of swing space and related issues as staff move into and out of temporary space. To ensure a smooth transition, change management initiatives are under way to attune staff to flexible workspace strategies, accelerate the move from paper to electronic storage and refine the management of flexible working arrangements, among other activities. A temporary conference facility to ensure business continuity during the renovation period was built and became operational in 2020 and a number of existing conference rooms are being modified to enable remote and hybrid conference operations, including with interpretation.

25E.5 In 2022, the Office will concentrate its efforts on providing continued and uninterrupted services to clients, irrespective of the challenges encountered during the period of renovations and construction. This will include enhancing the role of its Client Support Centre and continuing to expand the range of services offered, including online services. The Office will also continue to pursue innovative ways to support clients, including by providing services in an agile manner; enabling technologically advanced e-services and enhanced audiovisual technology capabilities; and supporting on short notice special high-level negotiations organized by special political missions (related to, for example, Libya, the Syrian Arab Republic or Yemen), fact-finding panels and other mandated activities and ad hoc requests. Client board meetings will also continue to be held regularly in 2022 to promote an open, transparent and collaborative approach to service delivery, and adherence to evolving key performance indicators will continue to be monitored closely.

25E.6 For 2022, the Office's planned deliverables and activities reflect the known and anticipated challenges related to COVID-19 that are being faced by clients. Such planned deliverables and activities include continuing to lead the coordination with the host country, the French authorities, Member States and international organizations in Geneva on the response to the pandemic in support of the Director-General; the provision of support to staff and clients, including human resources and medical support, mental health support and online client support; the implementation of protective measures to ensure a safe environment for personnel and clients; a focus on keeping all United Nations staff in Geneva informed about the latest developments and the Office's response to them; dedication to the safe servicing of meetings and conferences and provision of online service offerings where feasible.

25E.7 To further inter-agency coordination and liaison, the Office collaborates with other Geneva-based United Nations system organizations and international governmental organizations, coordinating the Common Procurement Activities Group and the work related to the common system. The Office, in its role as the provider of secretariat services to the Common Procurement Activities Group, will continue to coordinate and expand the activities of the Group, combining the major procurement activities of its 20 Geneva-based members. Administrative and support services are also provided by the Office to support United Nations funds and programmes, specialized agencies and other organizations of the United Nations common system on a reimbursable basis. The Office will also continue to digitize and preserve the

archives and official documents of the United Nations in collaboration with other United Nations libraries.

25E.8 With regard to external factors, the overall plan for 2022 is based on the planning assumption that extrabudgetary resources for services provided by the United Nations Office at Geneva will continue to be available to client offices.

25E.9 With regard to the COVID-19 pandemic, the proposed programme plan is based on the assumption that the proposed deliverables and activities for 2022 will be feasible to implement. However, if the pandemic were to have a further impact on the planned deliverables and activities, they would be adjusted during 2022 within the scope of the overall objectives, strategies and mandates. Any such adjustments would be reported as part of the programme performance information.

25E.10 The Office continues to integrate a gender perspective in its operational activities, deliverables and results, as appropriate. It will contribute to reaching gender parity, in line with the Secretary-General's system-wide strategy on gender parity, by keeping hiring managers and human resources focal points in client entities informed of the impact of selection decisions through consultations and briefings. The Human Resources Management Service provides advice to client offices on how to conduct targeted outreach and disseminate job openings through established human resources networks. In addition, the Office regularly participates in outreach events, international career fairs and briefings to promote career opportunities in the United Nations, with a view to improving geographical representation and gender balance in the Organization.

25E.11 In line with the United Nations Disability Inclusion Strategy, the Office established a disability inclusion team with representatives from all divisions and services and launched its action plan for 2020–2021 to help to drive local-level implementation of the Strategy. Significant progress was made in 2020 towards achieving the goals set out in the action plan, including the adoption of remote participation tools for meetings and events; the development of new approaches to incorporate live captioning and sign-language interpretation from remote locations into hybrid and virtual meetings; and the creation of an iSeek toolkit for the inclusion of persons with disabilities. This work will continue in 2022.

## **Programme performance in 2020**

### **Impact of COVID-19 on programme delivery**

25E.12 During 2020, the COVID-19 pandemic had an impact on the planned deliverables and activities of the Office. This impact included delays in construction and maintenance activities in order to comply with strict COVID-19 health and safety regulations; delays in implementing non-emergency updates and upgrades to existing information technology systems and postponement of several information technology-related projects; cancellation of training courses and postponement of training course development; and postponement of workshops and activities across many subprogrammes and cancellation of all in-person workshops and activities. Specific examples of the impact are provided under all subprogrammes. The postponement of planned deliverables and activities also had an impact on the expected results for 2020, as described in the programme performance under subprogrammes 3, 4 and 5.

25E.13 At the same time, however, some planned deliverables and activities were modified, and some new activities were identified during 2020, within the overall scope of the objectives of the subprogrammes, in order to support clients on issues emerging during the COVID-19 pandemic. These modifications and new activities included implementing alternative working arrangements and providing support to personnel to work effectively remotely; providing staff and clients with human

resources support, medical support, mental health support and online client support; ensuring that staff, clients and Member States were well informed through numerous communication channels; using guidance from the host country and the World Health Organization (WHO) to develop and implement a plan for the safe return to the Palais des Nations premises; offering virtual and hybrid meeting and conference support in addition to in-person meetings; and modifying numerous service offerings so that they could be delivered online. Specific examples of these modified and new activities are provided under all subprogrammes. The modified deliverables and activities contributed to results in 2020, as described in the programme performance under subprogrammes 2, 3 and 4.

25E.14 Reflecting the importance of continuous improvement and responding to the evolving needs of client offices, the Office will mainstream lessons learned and best practices related to the adjustments and adaptation of its programme owing to the COVID-19 pandemic. Specific examples of lessons learned include the importance of the continuation of virtual meetings and online training and servicing modalities to allow for wider participation by staff and clients. Through a realignment of resources during the pandemic, it was possible in 2020 to accommodate a limited number of hybrid meetings with interpretation that had not previously been mandated or resourced. With regard to future planning of intergovernmental meetings, a hybrid meeting format with remote interpretation can be accommodated, subject to available funding. This would allow for business continuity during times of uncertainty and wider participation by those representatives of Member States unable to travel, while also maintaining critical meeting functions and face-to-face interaction for effective negotiations.

## Legislative mandates

25E.15 The list below provides all mandates entrusted to the programme.

### General Assembly resolutions

24 (I)	Transfer of certain functions, activities and assets of the League of Nations	75/253	Special subjects relating to the proposed programme budget for 2021
72/303	Progress towards an accountability system in the United Nations Secretariat		

## Deliverables

25E.16 Table 25E.1 lists all cross-cutting deliverables, by category and subcategory, for the period 2020–2022.

Table 25E.1

### Cross-cutting deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>3</b>	<b>3</b>	<b>3</b>	<b>3</b>
1. Meetings of the Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
2. Meetings of the Committee for Programme and Coordination	1	1	1	1
3. Meetings of the Fifth Committee	1	1	1	1

## **Evaluation activities**

25E.17 An evaluation of the provision of support through the Client Support Centre – both virtual and in-person support (cutting across four subprogrammes) – is planned for 2022.

## **Programme of work**

### **Subprogramme 1**

#### **Programme planning, finance and budget**

### **Objective**

25E.18 The objective, to which this subprogramme contributes, is to ensure sound, effective and efficient financial management by client offices.

### **Strategy**

25E.19 To contribute to the objective, the subprogramme will continue to strengthen the monitoring of budget implementation, reporting, financial management and accounts control by coordinating with Headquarters and providing timely advice to client entities with regard to financial management. The subprogramme will continue to provide assistance, guidance and training to programme managers and administrative units of client organizations on financial management and budgetary matters. The subprogramme will also, in line with the objective, ensure efficient financial and administrative procedures and effective budget implementation; strengthen internal financial controls and streamline financial procedures and guidelines; regularly review workflow procedures to identify ways to achieve a faster and more efficient client response; monitor the implementation of oversight bodies' recommendations; and ensure strict compliance with the Financial Regulations and Rules of the United Nations and the financial policies of the United Nations.

25E.20 The above-mentioned work is expected to result in improved integrity of financial data and enhanced overall management of programme budget and extrabudgetary resources.

## **Programme performance in 2020**

25E.21 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **New disarmament dashboard improved financial visibility for Member States**

25E.22 The subprogramme serves four Geneva-based disarmament conventions with regard to financial matters. In recent years, Member States have expressed the desire to have clear, visible access to disarmament-related financial data, in particular contribution statuses and current outstanding amounts. In 2018, the subprogramme began sharing monthly contribution reports in Word format. The reports were acknowledged as a significant step forward; however, Member States did not find the format user-friendly and there were still additional unmet needs.

25E.23 In 2019, the subprogramme organized needs-assessment workshops with the Geneva branch of the Office for Disarmament Affairs to better understand user requirements; it then collaborated with information technology developers to create an online disarmament dashboard. The new dashboard displays financial information relating to the Geneva-based disarmament conventions through an easy-to-read and user-friendly interface. The dashboard is accessible to all States parties to the disarmament conventions in question and provides a transparent view of outstanding receivables per convention per State, collection rates, the timing of the payments, the level of expenditures compared with the approved cost estimates, and the status of working capital funds. The disarmament dashboard was presented to States parties in March 2020. Additional feedback was collected and the tool was further enhanced.

*Progress towards the attainment of the objective, and performance measure*

25E.24 The above-mentioned work contributed to the objective, as demonstrated by the greater transparency and availability of data on payments and expenditures relating to the Geneva-based disarmament conventions (see table 25E.2).

Table 25E.2  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
Disarmament-related financial data available in Word format	Disarmament-related financial data available in Word format	Greater transparency and availability of data on payments and expenditures relating to the Geneva-based disarmament conventions

**Impact of COVID-19 on subprogramme delivery**

25E.25 Owing to the impact of COVID-19 during 2020, the subprogramme took longer to complete certain scheduled activities because of a loss of efficiency resulting from the substitution of virtual collaboration for in-person meetings, discussions and problem-solving.

25E.26 At the same time, the subprogramme identified new activities to support clients on issues emerging during the COVID-19 pandemic, within the overall scope of its objectives, namely by working together with other subprogrammes and departments to ensure funding for the continuation of multilingual meetings and conferences. The subprogramme developed financial forecasting tools to help to estimate and control the cost of interpretation platforms for hybrid meetings of the secretariats of intergovernmental bodies. The forecasting tools quickly highlighted the most affordable hybrid meeting options, saving significant time during the decision-making process.

**Planned results for 2022**

25E.27 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

## Result 1: transforming the finance function under a new management paradigm<sup>40</sup>

### Programme performance in 2020

25E.28 In 2020, the subprogramme worked on updating the existing risk register, using the latest tools and corporate guidance issued by Headquarters. Interviews were held with 22 stakeholders. The final risk register, issued at the end of 2020, includes 13 risks at the service level that are considered high or very high. Several of these risks directly impact the services that the subprogramme provides to clients. For example, there is a need to ensure that the subprogramme service portfolio offerings remain relevant to the needs of clients; that the subprogramme provides the innovative solutions necessary to meet client expectations; that cybersecurity is adequate to provide stable financial services to clients; and that subprogramme staff have the skills required to meet future client needs. A local enterprise risk management committee was also established to review the risk register twice a year. In parallel, the subprogramme completed the preparatory work for the issuance of the first statement of internal controls, with the finalization of the risk control matrices and the remediation action plans to mitigate identified gaps in controls.

25E.29 The above-mentioned work contributed to having a full risk and internal control system in use, which met the planned target reflected in the proposed programme budget for 2020. In addition, the subprogramme had no significant adverse audit findings with respect to the preparation of volume I of the financial statements in relation to the Office.

### Proposed programme plan for 2022

25E.30 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will ensure that the enterprise risk management committee meets at least twice a year to update the risk register and follow up on the implementation of the risk mitigation action plans. The subprogramme also plans to enter the risk mitigation action plans into the risk management dashboard to more effectively monitor these elements. The expected progress is presented in the performance measure below (see table 25E.3).

Table 25E.3  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Monitoring driven by monthly accounts monitoring dashboard	Monitoring informed by a financial risk catalogue tailored to the Office	Full risk and internal control system in use	Internal control system reviewed and monitored for efficiency and effectiveness	Improved quality of services available to clients through risk mitigation action plans and a risk management dashboard

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

<sup>40</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 29E)).

## Result 2: improving staff payroll<sup>41</sup>

### Programme performance in 2020

25E.31 The subprogramme has made significant progress in developing the proposed payroll verification system, which uses business intelligence tools to automatically extract payroll data from Umoja and identify and highlight those items that require further analysis and investigation. As at the end of 2020, the system is 70 per cent complete.

25E.32 The above-mentioned work contributed to reducing the average number of monthly payroll exclusions to 262, which did not meet the planned target of 150 reflected in the proposed programme budget for 2021. The period of two to three months of pilot testing of the tool originally planned for the third quarter of 2020 is now planned for the second quarter of 2021 owing to staffing shortages related to the liquidity constraints. The pilot will involve running the current manual process in parallel with the new system and then comparing results. This will enable the subprogramme to identify any bugs in the system and also to learn from the new system, incorporating early lessons learned into current day-to-day work.

### Proposed programme plan for 2022

25E.33 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to use and learn from the new tool and reduce the average number of payroll exclusions over the years to come. The expected progress is presented in the performance measure below (see figure 25E.I).

Figure 25E.I

**Performance measure: average number of monthly payroll exclusions**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

<sup>41</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect.29E)).

**Result 3: improved oversight and visibility of risk management practices through monitoring of the implementation of the statement of internal controls and risk treatments**

**Proposed programme plan for 2022**

25E.34 The Office participates in audits to improve the governance, risk management and internal control processes underlying the services provided to clients. To ensure that external and internal audit recommendations are implemented within agreed timelines, it is critical to closely monitor their progress. To assist with that effort, the subprogramme has created a risk management dashboard. The dashboard lists all audit recommendations from the Board of Auditors and the Office of Internal Oversight Services (OIOS) and tracks the progress of implementation. Information provided through the dashboard includes the recommendations, their status and estimated completion dates and the departments responsible.

*Lessons learned and planned change*

25E.35 The lesson for the subprogramme was that monitoring the implementation plans for the audit recommendations alone was not enough. To completely fulfil its obligations while striving to improve the quality of its client services, the subprogramme will also need to monitor and mitigate the risks identified through the statement of internal controls and enterprise risk management. Both of these vehicles cover important areas that have a direct impact on the services provided to clients. For example, the statement of internal controls monitors controls such as ensuring that client vendor payments are made on time, that staff are paid on time, that client and donor reporting is accurate and in accordance with agreed standards and that client billing and cost recovery processes are fair and managed properly. Actions related to enterprise risk management include ensuring that staff have the skills to meet the future needs of clients, that the technology underlying client financial services is secure from cyberattacks and that client service offerings remain relevant and aligned with future client requirements. In applying the lesson, the subprogramme will upgrade the current dashboard to include the statement of internal controls and enterprise risk management categories and train the Office's managers to monitor current treatment plans and related actions through the dashboard.

*Expected progress towards the attainment of the objective, and performance measure*

25E.36 This work is expected to contribute to the objective, as demonstrated by the improved oversight and visibility of risk management through unified monitoring of risks and treatments and a more Organization-centric risk management perspective on the part of managers (see table 25E.4).

**Table 25E.4**  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
Endorsement of project scope and system requirements to build the risk management dashboard	Managers have access to a bespoke risk management dashboard to monitor OIOS and Board of Auditors recommendations	Risk control matrices inform a uniform approach to treating risks	Strengthened Organization-wide risk management system and risk management dashboard capturing a wider array of risks and	• Improved oversight and visibility of risk management through unified monitoring of risks and treatments

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
			treatments, including client services	• Managers have a more Organization-centric risk management perspective

## Legislative mandates

25E.37 The list below provides all mandates entrusted to the subprogramme.

### General Assembly resolutions

41/213	Review of the efficiency of the administrative and financial functioning of the United Nations	75/242	Financial reports and audited financial statements, and reports of the Board of Auditors
42/211	Implementation of General Assembly resolution 41/213	75/243 75/252	Programme planning Questions relating to the proposed programme budget for 2021

## Deliverables

25E.38 Table 25E.5 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 25E.5

### Subprogramme 1: deliverables for the period 2020–2022, by category and subcategory

#### Category and subcategory

#### E. Enabling deliverables

**Administration:** financial management, including risk management and internal control, preparation and implementation of budgets and other resource proposals; management of 670 posts across regular budget and extrabudgetary funding sources (creation, extension, abolition and funding for both short-term and longer-term positions); financial reporting and accounting; cash and revenue management; management of service arrangements with almost 50 client entities, including quarterly cost recovery billing across more than 120 service lines; processing of payroll for about 7,500 staff members across the globe per month and over 275,300 payments and disbursements annually; provision of guidance and advice on all financial matters; provision of medical insurance to over 32,000 staff, retirees and dependants all over the world; administration of compensation claims; implementation and management of client service board meetings (quarterly).

## Subprogramme 2 Human resources management

### Objective

25E.39 The objective, to which this subprogramme contributes, is to ensure a competent, diverse, adaptable and healthy workforce, to advance the highest standards of efficiency, competence and integrity and to ensure resilient organizational change.

## Strategy

25E.40 To contribute to the objective, the subprogramme will continue to support the acquisition and development of talent and to reinforce an enabling work environment. In addition, the subprogramme will reinforce its advisory role, develop internal human resources analytics capabilities and dedicate specific attention to staff welfare and mental health to more effectively support clients.

25E.41 The subprogramme will also continue to provide learning and development activities. Special emphasis will be placed on multilingualism and targeted human resources activities, such as training sessions and briefings that champion organizational performance management, drive organizational change, foster innovation and flexibility, provide support to staff to help them to navigate workplace changes and create a harmonious workplace. The subprogramme will also continue to collaborate with the Library at the United Nations Office at Geneva to generate new opportunities for learning and knowledge exchange through the Knowledge and Learning Commons.

25E.42 The subprogramme plans to continue some of the important COVID-19-related initiatives started in 2020. At the crisis management level, the subprogramme will continue to work with the human resources subnetwork of the Security Management Team to ensure a coherent approach to upcoming COVID-19-related plans.

25E.43 The above-mentioned work is expected to result in:

- (a) High client satisfaction with the advice and support provided;
- (b) Increased motivation and capacity of client staff to successfully navigate workplace changes, embrace innovation and adopt new ways of working;
- (c) Increased capacity of clients' teams to work in a more agile and flexible manner;
- (d) Increased understanding of the existing mechanisms to address improper conduct;
- (e) The continued ability of clients and Member States to carry out their work efficiently and effectively, while feeling fully supported in a challenging environment, regardless of their location.

## Programme performance in 2020

25E.44 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Improved staff motivation during the COVID-19 pandemic

25E.45 To help staff to remain engaged during the COVID-19 pandemic, the subprogramme adopted a three-pronged strategy encompassing communications, staff welfare and well-being, and the provision of remote access to key human resources services.

25E.46 Regarding communications, the subprogramme provided client staff with continued updates on how the Organization was tackling COVID-19. It issued more than 55 COVID-19 broadcast updates from the Director-General; regularly held manager briefings, staff briefings and a back-to-the-office town hall meeting;

established a hotline for staff queries; and produced posters, digital screens, building signage and videos to prepare for the return of staff to the Palais des Nations.

25E.47 Regarding staff welfare and well-being, the subprogramme organized virtual workshops, outreach programmes and virtual meditation sessions, with over 2,500 staff participating. In addition, over 1,300 staff attended individual counselling sessions (about a 35 per cent increase in comparison with the pre-COVID-19 period). Furthermore, the subprogramme encouraged managers to conduct daily online meetings with their teams to maintain a connection to staff. In addition, the subprogramme conducted a staff health and well-being survey in the United Nations Secretariat in Geneva during the pandemic in 2020.

25E.48 Finally, through the virtual Client Support Centre, the subprogramme provided up-to-date COVID-19-related administrative guidance and support, such as to facilitate border-crossing. Client service requests increased by over 50 per cent during the period, with 3,000 enquiries related specifically to border-crossing and visa issues.

*Progress towards the attainment of the objective, and performance measure*

25E.49 The above-mentioned work contributed to the objective, as demonstrated by the fact that 86 per cent of staff reported feeling motivated or energized by their work (see figure 25E.II).

Figure 25E.II

**Performance measure: percentage of staff who reported feeling motivated or energized by their work**

**Impact of COVID-19 on subprogramme delivery**

25E.50 Owing to the impact of COVID-19 during 2020, the subprogramme postponed or cancelled scheduled activities in several areas. Regarding training, the development, design and enhancement of new courses had to be postponed, all in-person training sessions were cancelled, and language classes were adjusted and provided entirely remotely. Regarding the Staff Counsellor's Office, scheduled workshops and planned events were also reprogrammed to focus on resilience-building as well as mental health and well-being.

25E.51 At the same time, however, the subprogramme identified new or slightly modified activities to support its clients on issues emerging during the COVID-19 pandemic, within the overall scope of its objectives. Regarding medical services, the subprogramme performed contact tracing for confirmed and suspected COVID-19 cases; set up and staffed a 24-hour telephone hotline; ordered, managed and distributed COVID-19-related equipment; implemented a workplace risk assessment

for specific posts as part of the “return to the Palais” strategy; supported the United Nations system medical evacuation (MEDEVAC) platform developed by WHO and implemented by the Medical Coordination Unit for staff members evacuated worldwide; and coordinated with local doctors and hospitals. In addition, the subprogramme developed and implemented a plan to help staff to remain engaged and deliver on their expected results, even under the strains and challenges of COVID-19.

## **Planned results for 2022**

25E.52 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: a healthy workforce for a better world<sup>42</sup>**

#### **Programme performance in 2020**

25E.53 In line with the Office’s return-to-work policy covering a staff member’s return to work following an extended period of absence such as sick leave, the subprogramme implemented individual return-to-work plans for over 20 client staff members. The subprogramme conducted an analysis of each situation and implemented a plan to facilitate the reintegration of staff into the office. Furthermore, the subprogramme continued monthly coordination meetings between medical services and services whose needs and constraints were more specific, in order to ensure a holistic approach. The subprogramme also implemented a procedure to review medical restrictions (such as restrictions on physical training, carriage of firearms, heavy lifting and driving) before allowing security officers to return to work after a period of sick leave. The positive feedback received from services with staff returning to work confirmed that the new procedures had helped staff to return to work smoothly and had supported managers in welcoming staff back to the office. Lessons learned from the experiences of 2020 are being analysed and will be taken into account to improve future return-to-work plans.

25E.54 The above-mentioned work contributed to the full implementation of the return-to-work policy and to positive feedback on individual return-to-work plans, which met the planned target reflected in the proposed programme budget for 2020.

#### **Proposed programme plan for 2022**

25E.55 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will expand the adjusted return-to-work policy to other client offices and will also share the experience and lessons learned with other client entities. Overall, the subprogramme will continue to improve the management of long-term sick leave absences. The expected progress is presented in the performance measure below (see table 25E.6).

<sup>42</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 29E)).

Table 25E.6  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Formulation of return-to-work policy and introduction by the working group on staff well-being	Launch of return-to-work policy and augmentation by the working group on staff well-being	<ul style="list-style-type: none"> <li>• Full implementation of return-to-work policy</li> <li>• Positive feedback from the majority of managers on individual return-to-work plans</li> </ul>	Return-to-work policy reviewed and lessons learned taken into account	<ul style="list-style-type: none"> <li>• Adjusted return-to-work policy expanded to other client offices</li> <li>• Experience and lessons learned shared with client departments as a best practice</li> </ul>

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: innovative approaches to support staff during a changing work environment<sup>43</sup>

### Programme performance in 2020

25E.56 The subprogramme has continued to make progress towards introducing innovative new work approaches such as the huddle technique to support staff in a changing work environment. Building on the success of the pilot project conducted in 2019, the subprogramme continued to train teams on the huddle technique; currently, 17 teams actively participate in daily huddles. The use of huddles throughout the COVID-19 crisis facilitated productivity by maintaining focus on strategic goals and priorities. It also enforced team accountability by ensuring that team members were on task. The subprogramme also delivered a train-the-trainer session to 10 new colleagues at the beginning of 2020 to expand the use of team huddles and share lessons learned.

25E.57 The above-mentioned work contributed to positive feedback from managers and staff of pilot huddle teams and led to the creation of a training-of-trainers session on use of the huddle technique and an increase in the number of teams implementing huddles from 15 to 17, which met the planned target reflected in the proposed programme budget for 2021.

### Proposed programme plan for 2022

25E.58 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue the transition towards a more agile United Nations Office at Geneva through the promotion of modern agility techniques designed to enable flexibility and creativity within teams for the purpose of empowering staff, supporting managers and improving delivery of results. The expected progress is presented in the performance measure below (see table 25E.7).

<sup>43</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect.29E)).

Table 25E.7  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
—	Initial pilot teams implement huddle technique as a result of feedback from clients that identify a need to strengthen capacity-building, client focus and support for a more collaborative and flexible work environment and management by results	<ul style="list-style-type: none"> <li>• Positive feedback from managers and staff of pilot huddle teams led to the creation of a training-of-trainers session on use of the huddle technique</li> <li>• Increase in the number of teams implementing huddles from 15 to 17</li> </ul>	Expanded use of huddles and positive feedback from managers and staff on how the use of huddles has supported management by results and leads to a more collaborative and flexible work environment	Positive feedback on training sessions to promote an agile mindset, which are deemed useful for teams in adapting to the new work reality and contribute to improving results

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: increased civility and respect in the workplace

#### Proposed programme plan for 2022

25E.59 To support the Director-General, the subprogramme developed a strategy to increase client staff trust in existing mechanisms, encourage staff to speak up without fear of retaliation and change the perception among staff that people are not held accountable for unethical behaviour. In 2018, targeted briefing sessions were organized on standards of conduct and ethical values, responsibilities regarding disputes and conflicts, and the importance of a healthy work environment. In 2019, the subprogramme established a stakeholders' group to prevent and tackle harassment. In addition, conduct and discipline focal points were designated to support staff and advise the Director-General regarding prohibited behaviour and misconduct. In 2020, emphasis was placed on training with the launch of the "United to Respect" dialogues to help staff to become more engaged and proactive in establishing and maintaining a harmonious and civil work environment.

#### Lessons learned and planned change

25E.60 The lesson for the subprogramme was that more work needs to be done to help staff to navigate the informal and formal complaint channels available to them, as well as to sensitize them to their responsibilities as bystanders. In applying the lesson, the subprogramme will roll out the "United to Respect" dialogues on a larger scale. The subprogramme will also communicate more broadly on the role of the conduct and discipline focal points, use tracking tools to closely monitor situations of prohibited conduct and ensure that complaints are handled effectively. Finally, the subprogramme will create an informal network of reliable and trained colleagues to whom staff experiencing conflicts can speak and from whom they can obtain useful neutral information and advice.

*Expected progress towards the attainment of the objective, and performance measure*

25E.61 This work is expected to contribute to the objective, as demonstrated by the establishment of an informal network for conflict resolution on a pilot basis and increased staff awareness of the number of reported cases and measures taken to fight harassment and other prohibited conduct (see table 25E.8).

Table 25E.8  
**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)</i>	<i>2022 (planned)</i>
Managers received targeted briefing on exercising responsibilities related to disputes and conflicts and promoting a healthy work environment	<ul style="list-style-type: none"> <li>Establishment of a stakeholders' group to prevent and tackle harassment at the United Nations Office at Geneva</li> <li>Increased staff awareness of existing mechanisms and promotion of informal dispute resolution</li> </ul>	<ul style="list-style-type: none"> <li>Launch of "United to Respect" dialogues</li> <li>Designation of two conduct and discipline focal points</li> <li>Implementation of the misconduct tracking system</li> </ul>	<ul style="list-style-type: none"> <li>Increased number of staff who attend the "United to Respect" training</li> <li>Better staff awareness on where to go to get help</li> </ul>	<ul style="list-style-type: none"> <li>Establishment of an informal network for conflict resolution on a pilot basis</li> <li>Increased staff awareness of the number of reported cases and measures taken to fight harassment and other prohibited conduct</li> </ul>

## Legislative mandates

25E.62 The list below provides all mandates entrusted to the subprogramme.

### *General Assembly resolutions*

<a href="#">72/254</a>	Human resources management	<a href="#">75/245</a>	United Nations common system
<a href="#">73/276</a>	Administration of justice at the United Nations		

## Deliverables

25E.63 Table 25E.9 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 25E.9  
**Subprogramme 2: deliverables for the period 2020–2022, by category and subcategory**

### *Category and subcategory*

#### **D. Communication deliverables**

**Outreach programmes, special events and information materials:** job fairs and career presentations to identify prospective candidates for recruitment, including female candidates, from unrepresented and underrepresented Member States and to promote awareness of employment opportunities in the United Nations; health and wellness promotion programmes for workforce serving across more than 20 client entities; knowledge-sharing in the area of human resources.

**E. Enabling deliverables**

**Administration:** talent management and job classification; administration of approximately 3,500 staff contracts; expert advice and guidance on human resources policies, including on the administration and implementation of Staff Regulations and Rules and staff selection system; training on organizational and managerial competencies, substantive and technical skills, language and communications, and career development for more than 9,000 staff members and other participants per year; administration of tests; staff counselling services and psychological support; conduct of staff surveys, including on cost of living and daily subsistence allowance; obtention of 6,700 host country residence permits in liaison with local authorities; occupational health and medico-administrative services for 12,000 client staff in Geneva and field offices, medical consultations and advice, medical emergency preparedness, health and well-being campaigns; learning, career development and performance management.

**Internal justice and oversight:** legal advice in relation to cases of alleged misconduct; act as legal counsel for the Organization before the United Nations Dispute Tribunal; act as respondent on behalf of the Organization in cases brought by staff to the Management Evaluation Unit and the Office of the United Nations Ombudsman and Mediation Services; legal and policy advisory services to more than 20 client entities, including through briefings and ad hoc information sessions for managers on best practices and lessons learned with regard to administration of justice.

### Subprogramme 3 Support services

#### Objective

25E.64 The objective, to which this subprogramme contributes, is to ensure the efficient, environmentally responsible and effective functioning of the United Nations Office at Geneva with regard to premises, office and conference facilities management; asset management; travel and transportation; mail and pouch services; procurement; and commercial activities.

#### Strategy

25E.65 To contribute to the objective, the subprogramme will continue to provide services in the areas of facilities management, assistance with conference activities, special events, project management, space management, procurement, contract management, property management, travel, administration of diplomatic privileges, visas, United Nations travel documents, transportation, mail and pouch services, warehousing and sustainable environmental management. The subprogramme will also continue to actively support the implementation of the strategic heritage plan, in particular ensuring that solutions are in place to minimize the impact of any potential disruptions during the renovation of the historic buildings of the Palais des Nations, which began in January 2021 and will continue until 2024, and the operation of the new building H upon its completion and handover in 2021.

25E.66 The subprogramme will continue to provide essential technical conferencing support services for conferences, meetings and events that take place at the Office, including in its annexes, such as the Palais Wilson (consisting of more than 35 conference rooms with capacity ranging from 10 to 2,200 seats per room). New advanced technologies for supporting conferences have emerged in recent years, of which the subprogramme will continue to take full advantage.

25E.67 The subprogramme will also continue to upgrade processes to increase efficiency and strengthen joint procurement services with other United Nations organizations and agencies based in Geneva through the Common Procurement Activities Group.

25E.68 The subprogramme will continue to implement new local and WHO regulations and guidelines; equip meeting and conference rooms with the necessary infrastructure and equipment to support virtual and hybrid meetings, in accordance with available funding; and provide any other assistance as required to ensure a safe and secure Palais des Nations for staff, clients and delegates. In addition, the subprogramme will implement a “smart locker” solution for delivery and collection of mail for its clients. Smart lockers will allow staff greater flexibility in collecting and dropping off mail at their convenience in a secure manner, while also supporting flexible working arrangements.

25E.69 The above-mentioned work is expected to result in:

- (a) Greater efficiency of support services provided to the Office and its client entities, in particular during the strategic heritage plan construction and renovation works;
- (b) Modern, quality conference support services, including during strategic heritage plan renovations;
- (c) A more coordinated response to the procurement needs of client entities;
- (d) Improved workplace safety and conditions in the Palais des Nations and its annexes;
- (e) The availability of multilingual conferences and United Nations meetings held at Geneva.

## **Programme performance in 2020**

25E.70 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **A safe return to the Palais des Nations for clients and staff and the safe servicing of conferences and meetings during the COVID-19 crisis**

25E.71 The COVID-19 pandemic caused significant disruptions to the workplace at the Palais des Nations. Since the onset of the pandemic, the subprogramme has focused efforts on implementing measures to ensure a safe return to the Palais for clients and staff and the safe servicing of conferences and meetings. The subprogramme studied and implemented physical distancing measures and prepared additional detailed health and safety plans to allow the safe continuation of work. It also established new one-way pedestrian paths inside and outside the managed premises, designed and installed safe partitioning (Plexiglas) in conference rooms and other areas, and designed and installed signage to indicate safe routes and maximum occupancy of areas such as offices and conference rooms. It further introduced special cleaning, sanitization and disinfection of all touch points such as door handles, headphones and elevator push buttons. In addition, all COVID-19-related measures recommended by the Federation of European Heating, Ventilation and Air Conditioning Associations were implemented, including the introduction of 100 per cent fresh air, with no air recirculation, which resulted in higher energy consumption and thus higher operating costs.

### **Progress towards the attainment of the objective, and performance measure**

25E.72 The above-mentioned work contributed to the objective, as demonstrated by the safe return to the Palais des Nations of clients and staff and the safe servicing of conferences and meetings (see table 25E.10).

Table 25E.10  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
—	—	<ul style="list-style-type: none"> <li>• Safe conditions for the return to the Palais des Nations of clients and staff, with varying rates of occupancy depending on the progression of the pandemic and the guidance from local authorities</li> <li>• Safe servicing of conferences and meetings</li> </ul>

### Impact of COVID-19 on subprogramme delivery

25E.73 Owing to the impact of COVID-19 during 2020, the subprogramme was delayed in implementing construction and maintenance activities in order to comply with strict COVID-19 health and safety regulations. During the initial period of the pandemic, authorities suspended construction and related works affecting Villa Pelouse, the Pregny security entrance, Bar Concordia, asbestos removal projects and others. This resulted in delayed delivery of projects and delays in space allocation for key clients. COVID-19-related restrictions on construction also delayed the completion of building H (part of the strategic heritage plan). This, in turn, prevented the subprogramme from completing several preparatory activities related to its eventual occupancy, originally planned for 2020. These changes had an impact on programme performance in 2020, as specified under result 1 below.

25E.74 At the same time, however, the subprogramme identified new activities to minimize the risks linked to the propagation of COVID-19 at the Palais des Nations and implemented all health and safety requirements to mitigate virus spread. The new deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

### Planned results for 2022

25E.75 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### Result 1: innovative building management<sup>44</sup>

#### Programme performance in 2020

25E.76 The subprogramme made considerable progress in preparing for occupancy of the new building H in 2020, including developing guidelines, leveraging technologies and introducing preventive maintenance strategies for space optimization. The subprogramme purchased the required Revit licences and software to operate the business information modelling system, which it is using to create a three-dimensional model of the new building H and which provides building information to optimize and expedite maintenance. Regarding space optimization,

<sup>44</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 29E)).

space planning studies and design solutions have been completed on paper, incorporating new concepts of open space and flexible workspaces.

25E.77 The above-mentioned work contributed to preparation for the immediate occupancy of building H upon completion of construction, which did not meet the planned target of optimization of use of space and preventive maintenance following the launch of the building information modelling system reflected in the proposed programme budget for 2020. Work has been stymied because the completion of the building has been delayed to the second quarter of 2021 owing to COVID-19. The subprogramme is still on track to complete all required activities by the time the building is ready for occupation.

### **Proposed programme plan for 2022**

25E.78 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to optimize space as entities move into and out of the swing space. Furthermore, the subprogramme will develop a new maintenance approach that prioritizes preventive rather than corrective action. The new approach will protect the buildings from deterioration, obsolescence, depreciation and redundancy. The expected progress is presented in the performance measure below (see table 25E.11).

Table 25E.11  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Absence of space optimization	Absence of space optimization	Preparation for the immediate occupancy of building H upon completion of construction	Optimization of space following the development of space allocation guidelines and space management guidelines	Reduction of building deterioration through new “preventative maintenance” approach

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 2: reducing waste generation by clients, visitors and staff at the Palais des Nations<sup>45</sup>**

#### **Programme performance in 2020**

25E.79 The subprogramme has installed 53 shared waste recycling stations throughout the Palais des Nations and its annexes and has simultaneously removed individual waste bins from selected areas, resulting in a higher rate of waste sorting. The subprogramme initiated a new solicitation incorporating updated environmental requirements, so that waste recycling is integrated directly into the primary cleaning contract. The subprogramme also fully eliminated single-use petroleum-based plastics in the Palais des Nations. Furthermore, the subprogramme inaugurated a pilot eco-point that resulted in an increase in the amount of waste recycled as well as the reuse of materials and office supplies.

<sup>45</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect. 29E)).

25E.80 The above-mentioned work contributed to the recycling of 74 per cent of office waste, which met the planned target reflected in the proposed programme budget for 2021.

### **Proposed programme plan for 2022**

25E.81 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to explore the possibility of constructing a waste sorting centre, which would enlarge the number of types of waste that can be sorted or reused, to include, for example, green biodegradable waste, construction and demolition waste and hazardous waste. The expected progress is presented in the performance measure below (see figure 25E.III).

Figure 25E.III  
Performance measure: percentage of waste recycled

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: a sustainable infrastructure to support and moderate hybrid meetings**

#### **Proposed programme plan for 2022**

25E.82 As a result of constraints caused by COVID-19, in-person conference services were disrupted at the United Nations Office at Geneva during 2020 and it became paramount to identify and implement immediate virtual and hybrid solutions to guarantee business continuity of conferencing, even when in-person meetings and conferences were not possible.

25E.83 To meet this need, in 2020 the subprogramme upgraded six conference rooms with the necessary audiovisual equipment and technology, including cameras to show the speaker's face and expressions and tools for providing remote simultaneous interpretation. These upgrades allowed the subprogramme to support 572 hybrid meetings.

#### *Lessons learned and planned change*

25E.84 The lesson for the subprogramme was that, to provide the infrastructure required to offer hybrid meetings in the long term and sustainably, a three-pronged strategy would have to be adopted encompassing preparing additional meeting rooms with the necessary technology, identifying a platform capable of providing remote

simultaneous interpretation and training staff on the technology required to moderate these meetings.

25E.85 In applying the lesson, the subprogramme will expand the implementation of the plan to progressively increase the number of conference rooms equipped to provide hybrid meetings, as funding permits, and develop a strategy to expand the number of staff trained to moderate virtual and hybrid meetings. The subprogramme is striving to ensure that the infrastructure required for hybrid meetings is in place and that trained staff within the Office and within our client organizations (substantive secretariats) have the skills to moderate hybrid meetings.

*Expected progress towards the attainment of the objective, and performance measure*

25E.86 This work is expected to contribute to the objective, as demonstrated by the availability of 13 conference rooms for hybrid meetings with remote simultaneous interpretation (see figure 25E.IV).

Figure 25E.IV

**Performance measure: number of conference rooms available to service hybrid meetings with remote simultaneous interpretation (cumulative)**

## Legislative mandates

25E.87 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolutions*

58/263	Report of the Joint Inspection Unit on the revenue-producing activities of the United Nations system	69/273	Procurement
58/277	Report of the Joint Inspection Unit on the management audit review of outsourcing in the United Nations and the United Nations funds and programmes		

## Deliverables

25E.88 Table 25E.12 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 25E.12

**Subprogramme 3: deliverables for the period 2020–2022, by category and subcategory***Category and subcategory***E. Enabling deliverables**

**Administration:** management and maintenance of United Nations premises, including its offices, technical infrastructure of 43 conference rooms, annexes and parks; briefing of Member States on supporting strategic heritage plan implementation, benefiting from the new facilities and fully utilizing the workspace.

**Logistics:** travel arrangements for staff and meeting participants.

**Procurement:** administration of the Common Procurement Activities Group for the United Nations offices and other participating entities; planning and sourcing support for the acquisition of goods and services; issuance of purchase orders for goods and services; procurement of goods and services.

**Asset management:** physical verification of assets and monitoring of property records for 36,000 serialized items, plant and equipment and non-financial inventories for the United Nations Office at Geneva, other Secretariat departments and offices and other United Nations entities (plus warehousing and disposal).

**Facilities management:** management of buildings consisting of 181,560 m<sup>2</sup> containing 2,800 offices and providing redesigns and office furniture to serve the needs of client entities.

**Transportation:** shipment of official property, bulk consignments for conferences and removal of personal effects, and related insurance requirements.

**Mail services:** receipt and inspection, and onward distribution, of goods; provision of mail, pouch and distribution services for United Nations offices and other United Nations entities.

**Visas and diplomatic services:** issuance of laissez-passers and other travel documents for 53 United Nations entities and staff in locations worldwide.

**Subprogramme 4****Information and communications technology operations****Objective**

25E.89 The objective, to which this subprogramme contributes, is to advance the efficient and effective implementation of client entities' substantive programmes through technologies, including a coherent enterprise information and communications technology system and enterprise architecture; access to ICT-related technological innovations; and a secure, coherent and resilient technology application hosting and infrastructure landscape.

**Strategy**

25E.90 To contribute to the objective, the subprogramme will place client entity programme objectives and business needs at the centre of decisions involving ICT service offerings. This includes implementing new technologies by developing an understanding of business programmes, creating relationships of trust with clients and managing a portfolio of relevant solutions.

25E.91 The subprogramme will also align and build resilient capacity to meet client business objectives by acquiring knowledge and expertise on relevant solutions, offering business value by migrating to the most cost-effective sourcing options, exploiting economies of scale, adopting innovative technologies and discontinuing legacy systems, and ensure the effective and efficient use of ICT resources by engaging and leading the ICT community at entities of the United Nations system in Geneva and elsewhere in Europe in the definition, adoption and deployment of ICT governance policies and procedures. The subprogramme will oversee and support ICT

strategy implementation and provide cybersecurity services to achieve a safe and reliable ICT landscape for the conduct of business.

25E.92 The subprogramme plans to contribute to building back better by accelerating and prioritizing strategic efforts to develop the capacity to seamlessly support all aspects of work from dispersed geographical locations.

25E.93 The above-mentioned work is expected to result in:

(a) Clients who are empowered during the decision-making process and whose administrative and management tasks are facilitated through access to appropriate information technology tools;

(b) Client entities agilely implementing new and innovative technologies that fulfil their business needs;

(c) Client entities accessing cost-effective services and solutions that optimize the use of their resources to achieve business goals.

### **Programme performance in 2020**

25E.94 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

#### **Remote simultaneous interpretation of hybrid meetings enabled United Nations official meetings to continue during the COVID-19 pandemic**

25E.95 Since March 2020, access to the premises of the United Nations Office at Geneva has been reduced owing to COVID-19. This has had an impact on the Organization's capacity to hold official meetings, such as meetings of the Human Rights Council, the World Health Assembly and the International Labour Conference, on the premises. As a result, Member States required the Office to provide platforms that enabled meetings to be held remotely, while ensuring that official United Nations interpretation remained available and that rules of procedure were adhered to. The subprogramme conducted extensive testing of different remote simultaneous interpretation software tools for multilingual, online and hybrid meetings, and different technical architectural solutions to link such tools to the audiovisual conference and interpretation systems existing at the Palais des Nations.

25E.96 The subprogramme defined preferred technical set-up standards and, in collaboration with subprogramme 3, equipped six conference rooms with the necessary infrastructure and technology to support virtual and hybrid meetings. Furthermore, the Office was the first duty station to hold a hybrid official meeting with interpretation.

#### *Progress towards the attainment of the objective, and performance measure*

25E.97 The above-mentioned work contributed to the objective, as demonstrated by the number of official and non-calendar hybrid meetings held by the Office in 2020, including those involving remote simultaneous interpretation (see figure 25E.V).

Figure 25E.V

**Performance measure: number of non-hybrid meetings held, number of hybrid meetings held with remote simultaneous interpretation and number of hybrid meetings held without remote simultaneous interpretation (annual)**

### Impact of COVID-19 on subprogramme delivery

25E.98 Owing to the impact of COVID-19 during 2020, the subprogramme could not fully implement the Management Committee cybersecurity action plan. The subprogramme also interrupted the implementation of non-emergency updates and upgrades to existing systems from March 2020 to September 2020, including changes to information technology security systems, connectivity services, hosting services, voice, video and data communications services, and new application systems in a secure environment.

25E.99 At the same time, however, the subprogramme identified new activities to support its clients on issues that emerged during the COVID-19 pandemic, within the overall scope of its objectives. The new activities included remote conferencing with simultaneous interpretation; the deployment and maintenance of the Surveillance Outbreak Response Management and Analysis System, a surveillance tool that allows the detection of infection chains and contact tracing; emergency remote computer support procedures; monitoring of physical presence on the premises; the development of a workflow application for flexible working arrangements; and the provision of guidance on e-signature. The new deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

### Planned results for 2022

25E.100 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

## Result 1: agile provision of business solutions through technology<sup>46</sup>

### Programme performance in 2020

25E.101 The subprogramme has used an agile and proactive approach to advise clients and deploy technical solutions to facilitate the building of websites, to optimize and automate processes and to support new emergency COVID-19 requirements. Applying this approach was critical in 2020. The COVID-19 emergency accelerated the implementation of some client solutions and created the need for new ones owing to the emerging new ways of working. New solutions developed for clients in 2020 have included website builders, website hosting, workflow automation, the Microsoft Shifts solution for building occupancy, COVID-19 patient tracking and several robotic process automation robots, among other things.

25E.102 The above-mentioned work contributed to the implementation of 15 ICT business solutions, which met the planned target reflected in the proposed programme budget for 2020.

### Proposed programme plan for 2022

25E.103 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to engage with clients to advise and deploy business solutions to fulfil their substantive and operational needs. For 2022, the subprogramme plans to implement an additional 20 ICT business solutions. The expected progress is presented in the performance measure below (see figure 25E.VI).

Figure 25E.VI

**Performance measure: number of information and communications technology business solutions implemented (annual)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: drive strategic business innovation<sup>47</sup>

### Programme performance in 2020

25E.104 The subprogramme has continued to engage with clients to bring forward their innovation ideas. In 2020, the subprogramme deployed an effective technological end-to-end innovation process – from idea generation to launching the

<sup>46</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect.29E)).

<sup>47</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect.29E)).

pilot to sustainable production. The subprogramme also documented the idea management workflow analysis, calculations criteria, standard operating procedures for pilot approval and the metrics for decisions on next steps following pilot results.

25E.105 The above-mentioned work contributed to the implementation of 11 innovative ICT solutions by substantive offices, which exceeded the planned target of 6 reflected in the proposed programme budget for 2021. Some examples of these pilot solutions include the automation of payroll verification, approval workflow using Microsoft Flow and Power Apps, face recognition on video feed from a picture, parking space availability using machine learning, quick website creation and deployment, Umoja payment checks and Umoja bank statement reconciliation.

### **Proposed programme plan for 2022**

25E.106 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to engage with clients to bring forward their innovation ideas into a technological end-to-end innovation process. For 2022, the subprogramme plans to help clients to implement an additional 15 innovative ICT solutions. The expected progress is presented in the performance measure below (see figure 25E.VII).

Figure 25E.VII

**Performance measure: number of innovative information and communications technology solutions implemented by client substantive offices (annual)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: standardized, cost-effective information and communications technology services on the Geneva campus**

#### **Proposed programme plan for 2022**

25E.107 The subprogramme has been improving the offering of basic ICT services on the Geneva campus for the onboarding of new entities establishing their operations in Geneva, as well as for existing entities, in the areas of network access, data storage and application hosting, telecommunication services and user computing services and support.

*Lessons learned and planned change*

25E.108 The lesson for the subprogramme was that it could not provide standard, cost-effective options to all clients owing to a lack of a default offering for basic ICT services that could be applied to the different needs of these clients. In applying the lesson, the subprogramme will analyse and re-engineer the provision of such services to assemble and offer a value-added portfolio of basic ICT campus services, both mandatory and optional, exploiting economies of scale and efficient service processes to achieve standardization and cost-effectiveness. The subprogramme plans to update its service catalogue for basic ICT services to include at least one comprehensive, standardized and financially advantageous service package, thus simplifying, streamlining and improving the client experience at the time of onboarding.

*Expected progress towards the attainment of the objective, and performance measure*

25E.109 This work is expected to contribute to the objective, as demonstrated by the provision of at least one fast, cost-effective out-of-the-box solution for the immediate needs of clients joining the Geneva community (see table 25E.13).

Table 25E.13  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
<ul style="list-style-type: none"> <li>• 35 à la carte ICT service offerings available</li> <li>• No bundled service offerings</li> </ul>	<ul style="list-style-type: none"> <li>• 43 à la carte ICT service offerings available</li> <li>• No bundled service offerings</li> </ul>	<ul style="list-style-type: none"> <li>• 48 à la carte ICT service offerings available</li> <li>• No bundled service offerings</li> </ul>	Complete and easy-to-understand service package option developed for clients	At least one bundled service package offering a fast, cost-effective out-of-the-box solution for the immediate needs of clients joining the Geneva community

**Legislative mandates**

25E.110 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolutions*

57/304	Information and communication technology strategy	63/269	Information and communications technology, disaster recovery and business continuity for the United Nations: arrangements for the secondary data centre at Headquarters
63/262	Information and communications technology, enterprise resource planning, and security, disaster recovery and business continuity		

**Deliverables**

25E.111 Table 25E.14 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 25E.14

**Subprogramme 4: deliverables for the period 2020–2022, by category and subcategory***Category and subcategory***E. Enabling deliverables**

**Information and communications technology:** provision of security for information technology systems and data for end users; connectivity services; hosting services; voice, video and data communications services; operation and maintenance of existing and new application systems in a secure environment; technical support to 5,000 end users; advisory services on business solutions.

**Subprogramme 5****Library services****Objective**

25E.112 The objective, to which this subprogramme contributes, is to ensure the preservation of and enhanced access to past, present and future knowledge of the United Nations, to mobilize this knowledge, and to increase knowledge-sharing, education and dialogue among Member States and between Member States and the international community.

**Strategy**

25E.113 To contribute to the objective, the subprogramme will continue to provide access to United Nations documents and publications as well as to externally produced knowledge resources that provide information about the Organization's areas of work. In order to enhance and simplify the retrieval of this information, the subprogramme will provide knowledge tools that bring together key information resources on United Nations issues and global agendas. The subprogramme will also continue to digitize and preserve the archives and official documents of the League of Nations and the official documents of the United Nations, the latter in collaboration with other United Nations libraries. A project to ensure total access to the League of Nations archives will make the entire collection of 15 million pages available online in full, unifying information about the history of multilateralism and providing information about lessons learned. In addition, the subprogramme will implement records management standards and best practices across the United Nations Office at Geneva and at other Secretariat entities in Geneva through training and advisory services for staff on records management. In the context of the strategic heritage plan, the subprogramme will continue to enable designated records management focal points within United Nations services at the Palais des Nations to identify and transfer official records of the United Nations to the Records Management Unit.

25E.114 The subprogramme will continue to provide support for cultural diplomacy and to connect diplomats with United Nations staff, experts and global citizens through discussion and learning events. The subprogramme will also continue to organize learning events and cultural activities as online and hybrid (virtual and in-person) events, instead of relying only on on-site events.

25E.115 The above-mentioned work is expected to result in:

- (a) More informed participation and subsequent decision-making by diplomats and staff;
- (b) Improved transparency and accountability for the Organization;

(c) Preservation of institutional and historical memory as clients' official records are transferred during the renovation and construction activities of the strategic heritage plan;

(d) A vibrant cultural activities programme online and on-site that enables Member States to showcase their arts and culture through exhibitions, film screenings and other events;

(e) Alternative learning opportunities online and on-site for United Nations staff and diplomats on topics that support career development and the implementation of United Nations policies and agendas.

## **Programme performance in 2020**

25E.116 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **A virtual service desk for clients**

25E.117 The subprogramme has greatly expanded its digital offerings in recent years, acquiring more than 70 information database subscriptions and thousands of electronic journals and books. As a result, most client queries now pertain to accessing the digital collection, and the subprogramme has set up a virtual service desk to support users. With the enforced lockdown during the COVID-19 crisis, in 2020 the virtual service desk was expanded to receive all client queries, ensuring that clients could continue to receive timely and informative replies.

25E.118 The subprogramme added a live chat service to its website, expanded existing website services and continued to provide email and telephone reference services. Its services are streamlined and managed through an information technology tool, which includes live monitoring and analytical charts. The subprogramme also expanded the network of experts who reply to requests for information; they, too, are connected live through the information technology tool.

### *Progress towards the attainment of the objective, and performance measure*

25E.119 The above-mentioned work contributed to the objective, as demonstrated by the fact that 1,238 users of the virtual service desk (41 per cent of the total number of users) received a response to their requests within one hour. While there was a 48 per cent increase in the number of requests for information or access to information between 2018 and 2020, the number of requests replied to in under one hour increased by 73 per cent (see figure 25E.VIII).

Figure 25E.VIII

**Performance measure: total number of user requests and number of requests responded to in under one hour**

### Impact of COVID-19 on subprogramme delivery

25E.120 Owing to the impact of COVID-19 during 2020 and the six-week closure of the facilities, the subprogramme had to interrupt its activities on the League of Nations archives digitization project. These changes had an impact on the programme performance in 2020, as specified in result 1 below.

25E.121 At the same time, however, the subprogramme modified activities to support clients on issues emerging during the COVID-19 pandemic by setting up a virtual service desk for staff members, which has been integrated into existing work processes to provide speedy and pertinent responses. The modified deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

### Planned results for 2022

25E.122 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### Result 1: total digital access to the League of Nations archives<sup>48</sup>

#### Programme performance in 2020

25E.123 The subprogramme has continued digitization operations and publishing efforts and remains on target for scheduled project completion in 2022. The subprogramme also began processing its historical map collection, which contains 20,000 maps that will be scanned in 2021.

25E.124 The above-mentioned work contributed to the digitization of 10 million pages in the League of Nations archives, which did not meet the planned target of 10.5 million pages reflected in the proposed programme budget for 2020. This target was missed owing to a six-week closure of the facilities due to COVID-19.

#### Proposed programme plan for 2022

25E.125 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the

<sup>48</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 29E)).

subprogramme will complete the digitization operation in 2022, scanning a total of 15 million pages by May 2022, with indexing and online publishing completed in the third quarter. The expected progress is presented in the performance measure below (see figure 25E.IX).

Figure 25E.IX

**Performance measure: total number of digitized pages in the League of Nations archives (cumulative)**

(Millions of pages)

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

**Result 2: the Knowledge and Learning Commons, physical and virtual spaces for knowledge-sharing, education and dialogue<sup>49</sup>**

**Programme performance in 2020**

25E.126 The subprogramme has continued to strengthen collaboration and knowledge-sharing among diplomats, United Nations staff and interns across the United Nations system in Geneva through the Knowledge and Learning Commons by building a virtual space for learning sessions. Owing to the COVID-19 situation, all events planned for March 2020 had to be cancelled and the subprogramme developed and produced online sessions to continue to support clients. The sessions focused on mental health and well-being, multilateral negotiation, mediation amid diversity, sustainability, and access to digital and online resources at the United Nations Library and Archives in Geneva. The transition to online sessions enabled a wider range of colleagues from the United Nations system in Geneva and other duty stations to participate. As a result, participation increased by 53 per cent in 2020, with over 4,400 attendees, compared with 2,870 attendees in 2019.

25E.127 The above-mentioned work contributed to 59 events and 7 additional learning opportunities, making a total of 66 learning opportunities and events offered to clients at the Knowledge and Learning Commons, which exceeded the planned target of 60 reflected in the proposed programme budget for 2021.

**Proposed programme plan for 2022**

25E.128 The subprogramme will continue the work related to the planned result, in line with its mandate. Despite the closure of the Library building from September 2022 for the works under the strategic heritage plan, the Knowledge and Learning

<sup>49</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect.29E)).

Commons will continue to provide online sessions and learning opportunities. The expected progress is presented in the performance measure below (see figure 25E.X).

Figure 25E.X

**Performance measure: number of learning opportunities and events offered to clients at the Knowledge and Learning Commons (annual)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: increased access to knowledge on multilateralism**

#### **Proposed programme plan for 2022**

25E.129 Advocating for multilateralism through knowledge services is an important component of the subprogramme's work. In 2018, it created the programme "100 Years of Multilateralism in Geneva" and coordinated a network of 74 partners (public and private institutions), which organized many events and exhibitions and issued publications focused on the history and evolution of multilateralism. While the programme ended in 2020, some partners were ready to continue the work.

#### *Lessons learned and planned change*

25E.130 The lesson for the subprogramme was that it needed to be more systematic, coordinated and streamlined in its approach to working with partners and networks. Such an approach will enable the subprogramme to make stronger, more sustainable partnerships and create more impactful events and activities. In applying the lesson, the subprogramme will leverage existing partnerships and create new ones with permanent missions, other international organizations and United Nations services, and academic institutions. The subprogramme plans to develop and launch a partnership and networking strategy, recruit a knowledge manager to coordinate and manage the partnerships, train subprogramme staff to increase networking and partnership skills, and identify and carry out more targeted, larger-scale activities for knowledge projects and events focused on multilateralism. Through strategic management, these knowledge partnerships will become a powerful mechanism to create more innovative and impactful opportunities for the generation and sharing of knowledge, thus enabling informed debate.

*Expected progress towards the attainment of the objective, and performance measure*

25E.131 This work is expected to contribute to the objective, as demonstrated by improved access to information, activities and events that increase knowledge of multilateralism (see table 25E.15).

Table 25E.15

**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)</i>	<i>2022 (planned)</i>
Work with individual partners on subprogramme events and activities for clients	Work with individual partners on subprogramme events and activities for clients	Recognition of need to more formally manage and coordinate partnerships to create larger events and activities for clients with more impact	Development of a partnership strategy that helps the subprogramme to identify and carry out more targeted, larger-scale activities and events for clients focused on multilateralism	Improved access to information, activities and events that increase knowledge of multilateralism

**Legislative mandates**

25E.132 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolution*

356 (IV) Budget appropriations for the financial year 1950

**Deliverables**

25E.133 Table 25E.16 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 25E.16

**Subprogramme 5: deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>B. Generation and transfer of knowledge</b>				
<b>Seminars, workshops and training events</b> (number of days)	<b>40</b>	<b>54</b>	<b>40</b>	<b>40</b>
Events for diplomats and United Nations staff and interns on the processes, working mechanisms and rules of the Secretariat and for career development	40	54	40	40
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> advisory services on records management.				
<b>Databases and substantive digital materials:</b> Total Digital Access to the League of Nations Archives Project (LONTAD) system and platform for free online access to the League of Nations digitized archives and for their preservation.				

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
--------------------------	-----------------	----------------	-----------------	-----------------

#### D. Communication deliverables

**Outreach programmes, special events and information materials:** cultural activities programme including exhibitions, concerts and films; guided tours of the Library, archives and the permanent and temporary exhibitions of the United Nations Museum Geneva; discussion panels and conferences for cultural exchange and education and dialogue on key United Nations issues; exhibitions in the spaces of the Library and at the United Nations Museum Geneva.

**Library services:** knowledge services, such as virtual and on-site reference services, search platform design and selected information packages, to enable evidence-based policymaking and facilitate research for diplomats, delegates, United Nations staff and academics worldwide; digitized pages of official records and documents that are available online; unified resource management system for United Nations Secretariat libraries with online access; print and electronic information resources; management and preservation of United Nations and League of Nations archives and records; access to on-site and online archives and records.

## Section 29F Administration, Vienna

### Overall orientation

#### Mandates and background

25F.1 The United Nations Office at Vienna was established in 1979 pursuant to General Assembly resolution [31/194](#) with the objective of providing administrative support to the United Nations Secretariat units located in Vienna. Under the terms of the tripartite memorandum of understanding of 1977 and subsequent amendments to it, the Office also provides administrative support on a common services basis to other international organizations based in the Vienna International Centre, namely, the International Atomic Energy Agency (IAEA), the United Nations Industrial Development Organization (UNIDO) and the Preparatory Commission for the Comprehensive Nuclear-Test-Ban Treaty Organization.

#### Strategy and external factors for 2022

25F.2 The Office will leverage the various enterprise systems in the delivery of efficient and effective administrative services, supported by an enabling policy framework and enhanced decision-making through monitoring, data analysis and reporting. The strategy for 2022 will continue to include: (a) coordinating with Headquarters and providing timely advice to the entities serviced on all administrative matters; (b) strengthening internal financial controls and streamlining financial procedures and guidelines to ensure effective financial management; (c) playing a central support role in shaping an enabling organizational culture through targeted enhancement of leadership, learning and career support activities and a more robust performance management system that supports increased accountability, staff engagement, workplace flexibility and empowerment while ensuring a diverse and inclusive workplace; (d) maintaining efficient and cost-effective travel and transportation services through best practices, as well as through close cooperation and benchmarking with other United Nations system organizations; (e) continuing to promote environmental sustainability in coordination with all departments and offices; (f) strengthening the capacity of procurement staff through the management and delivery of online procurement training courses and certification programmes to ensure the consistent application of and full compliance with established policy, procedures and best practices across the Organization; (g) improving the management of assets by continuing to implement the Organization-wide framework in compliance

with the International Public Sector Accounting Standards; (h) improving outreach to clients, especially through the use of electronic resources; (i) supporting enterprise application deployments and integrating new technologies into the organizational business toolkit; and (j) increasing compliance with technology standards, guidelines and methodologies, as well as with information and communications technology policies and enterprise architecture.

25F.3 The United Nations Secretariat units located in Vienna to which the Office provides administrative support are the United Nations Office on Drugs and Crime (UNODC), the Office for Outer Space Affairs, the International Trade Law Division of the Office of Legal Affairs, the secretariat of the United Nations Scientific Committee on the Effects of Atomic Radiation, the United Nations Information Service, the Office of Internal Oversight Services, the Office for Disarmament Affairs, the regional office of the Office of the United Nations Ombudsman and Mediation Services and the United Nations Register of Damage Caused by the Construction of the Wall in the Occupied Palestinian Territory. The Office provides support services, garage operations, language training and communication services on a common services basis to IAEA, UNIDO and the Preparatory Commission for the Comprehensive Nuclear-Test-Ban Treaty Organization.

25F.4 For 2022, the Office's planned deliverables and activities reflect strengthened approaches that incorporate lessons from the coronavirus disease (COVID-19) pandemic. Such planned deliverables and activities include an improved business continuity plan and a more resilient information technology network. The support provided to United Nations Secretariat units located in Vienna on issues related to COVID-19 is expected to contribute to planned results for 2022, as described under subprogrammes 3 and 4.

25F.5 With regard to the external factors, the overall plan for 2022 is based on the following planning assumptions:

(a) Other organizations of the United Nations common system in Vienna are willing to collaborate with the United Nations Secretariat on ongoing activities;

(b) The extrabudgetary funding situation of client offices does not have an adverse impact on the ability of the Office to plan and implement its activities.

25F.6 With regard to the COVID-19 pandemic, the proposed programme plan is based on the assumption that the proposed deliverables and activities for 2022 will be feasible to implement. However, if the pandemic were to continue to have an impact on the planned deliverables and activities, they would be adjusted during 2022 within the scope of the overall objectives, strategies and mandates. Any such adjustments would be reported as part of the programme performance information.

25F.7 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, it provides support in implementing gender mainstreaming into drug control and crime prevention activities. It will also contribute to reaching gender parity, in line with the Secretary-General's system-wide strategy on gender parity, by building on the achievements of 2020, whereby female candidates were selected for 56 per cent of UNODC job openings and 67 per cent of United Nations Office at Vienna job openings in the Professional and higher categories, with the ultimate goal of reaching gender parity in staffing. The Office will support reporting on the implementation of the strategy and action plan of the Office and UNODC for gender equality and the empowerment of women, including on gender-responsive performance management.

25F.8 In line with the United Nations Disability Inclusion Strategy, the Office and the other Vienna-based organizations, as members of the joint committee to administer the Common Fund for Financing Major Repairs and Replacements at the Vienna International Centre, will ensure that the necessary renovations, updates and repairs

identified in the accessibility report commissioned by the host country are prioritized within the Common Fund. In 2020, the Vienna-based organizations of the common systems renewed the entrances of all buildings to comply with accessibility regulations for persons with disabilities. Moreover, the Office is working on strengthening an inclusive organizational culture that is supportive of staff members with disabilities, as well as staff who have dependants with disabilities. For that purpose, regular training opportunities about disability inclusion will be offered, and the clear communication of available benefits and entitlements with regard to disabilities will be provided to all staff. Furthermore, disability inclusion awareness-raising events will be organized in the context of promoting an enabling work environment. Such activities will strengthen an inclusive culture that supports the self-disclosure and advocacy of staff and their dependants with disabilities. Those activities will be pursued in close consultation with and with the active involvement of persons with disabilities and their representative organizations.

## Programme performance in 2020

### Impact of COVID-19 on programme delivery

25F.9 During the COVID-19 pandemic in 2020, the programme modified some planned deliverables and activities, within the overall scope of the objectives of the subprogrammes, in order to enhance support to the United Nations Secretariat entities located at the Vienna International Centre. Those modifications included expanding support for telecommuting, adapting the learning and organizational development curricula, delivering virtual training, supporting remote and hybrid meetings and providing increased client support in all administrative processes. Specific examples of the activities are provided under subprogrammes 1 to 4. The modified deliverables and activities contributed to results and accelerated performance in 2020, as described in the programme performance of subprogrammes 1, 2 and 3.

25F.10 Reflecting the importance of continuous improvement and responding to the evolving needs of client offices, the programme will mainstream lessons learned and best practices related to the adjustments to and adaptation of its programme owing to the COVID-19 pandemic. Specific examples of lessons learned include the importance of resilient and sustainable network connectivity for the efficient and effective daily operation of remote working and the importance of integrating more potential future scenarios in the business continuity plan.

### Legislative mandates

25F.11 The list below provides all mandates entrusted to the programme.

#### *General Assembly resolutions*

31/194	Utilization of office accommodation and conference facilities at the Donaupark Centre in Vienna	70/255; 72/303	Progress towards an accountability system in the United Nations Secretariat
58/278	Report of the Joint Inspection Unit on common and joint services of United Nations system organizations at Vienna		

### Deliverables

25F.12 Table 25F.1 lists all cross-cutting deliverables, by category and subcategory, for the period 2020–2022.

Table 25F.1

**Cross-cutting deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>3</b>	<b>3</b>	<b>3</b>	<b>3</b>
1. Meetings of the Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
2. Meetings of the Committee for Programme and Coordination	1	1	1	1
3. Meetings of the Fifth Committee	1	1	1	1

**Evaluation activities**

25F.13 The following self-evaluations are planned for 2022:

(a) Implementation of information technology infrastructure and technical improvements;

(b) Activities in employment and capacity development to meet the requirements of the United Nations Disability Inclusion Strategy.

**Programme of work****Subprogramme 1****Programme planning, finance and budget****Objective**

25F.14 The objective, to which this subprogramme contributes, is to ensure sound, effective and efficient financial management by client offices.

**Strategy**

25F.15 To contribute to the objective, the subprogramme will continue to strengthen the monitoring of budget performance, financial management and control, and improve reporting. It will provide assistance, guidance and training to programme managers and administrative units of client offices on financial management and budgetary matters. It will also coordinate with the Office of Programme Planning, Finance and Budget at Headquarters and provide timely advice to the entities serviced on financial management and budget implementation. It will streamline financial processes and guidelines and regularly review workflow procedures to identify ways to achieve a more efficient and faster client response. It will also strengthen internal financial controls, monitor financial performance and risks and ensure integrity of organizational financial data, thus contributing to an enhanced accountability system. In addition, it will monitor the implementation of recommendations from oversight bodies and ensure strict compliance with the Financial Regulations and Rules of the United Nations and the financial policies of the United Nations. Going forward, the subprogramme will also provide support and guidance to its clients, in areas such as timely closing and reporting of grants. The subprogramme will also continue to enhance the management of client requests following the launch of a client support portal in 2020.

25F.16 The above-mentioned work is expected to result in:

- (a) Improved accessibility and understanding of financial information by client offices;
- (b) Increased accountability by client offices;
- (c) Improved integrity of financial data;
- (d) Enhanced overall management of programme budget and extrabudgetary financial resources.

## Programme performance in 2020

25F.17 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Enhanced client services

25F.18 Prior to 2020, clients requested services through Lotus Notes or by email. Clients were not able to see the status of their requests, and the subprogramme did not have a mechanism to track requests received for all types of services. Therefore, in 2020, the subprogramme redesigned client management processes to utilize cloud-based technology, allowing for increased transparency in the tracking of requests, more efficient remote working during COVID-19 lockdown periods and enhanced client services. The subprogramme also organized and provided access to financial information, which is stored in the United Nations Office at Vienna client support portal, a central repository for service requests, to streamline client management processes. The client support portal also hosts guidance materials and answers to frequently asked questions.

### *Progress towards the attainment of the objective, and performance measure*

25F.19 The above-mentioned work contributed to the objective, as demonstrated by enhanced client services and transparency through real-time tracking of requests for financial resource management services (see table 25F.2).

Table 25F.2  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
Requests submitted through Lotus Notes or email, with limited tracking of requests	Requests submitted through Lotus Notes or email with limited tracking of requests	Enhanced client services and transparency through real-time tracking of requests for financial resource management services

### Impact of COVID-19 on subprogramme delivery

25F.20 Owing to the impact of COVID-19 during 2020, the subprogramme redesigned client management processes to utilize cloud-based technology, allowing more efficient remote working and enhanced client services. In addition, the subprogramme adapted the training content relating to financial and budgetary matters to allow delivery by virtual means. The subprogramme also adapted internal processes to support remote auditing. Moreover, the subprogramme performed an analysis of the impacts of the COVID-19 lockdown on the costing of client services, such as interpretation and translation services and language classes.

25F.21 At the same time, the subprogramme identified new activities to support clients on issues related to the COVID-19 pandemic. The subprogramme undertook close monitoring of programme delivery, in particular UNODC operations, in the context of the Task Force on the Financial Impact of COVID-19 established by the Director-General/Executive Director of the United Nations Office at Vienna/United Nations Office on Drugs and Crime to monitor the financial strength of the UNODC trust funds. The subprogramme provided additional briefings on the impact of COVID-19 on the financial situation of UNODC to Member States in the context of the standing open-ended intergovernmental working group on improving the governance and financial situation of the United Nations Office on Drugs and Crime.

## **Planned results for 2022**

25F.22 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: improved management of voluntary contributions in the United Nations Office on Drugs and Crime<sup>50</sup>**

#### **Programme performance in 2020**

25F.23 To improve the management of voluntary contributions in UNODC, the subprogramme has reviewed and simplified the underlying processes and conditions for project revisions, streamlined workflows and developed guidance, tools and performance standards in collaboration with UNODC programme managers and resource mobilization teams. The subprogramme also delivered training to UNODC on project and grants management and adapted the training to be delivered online. Furthermore, the subprogramme delivered refresher courses with the aim of increasing the quality of submission of project documents and revisions.

25F.24 The above-mentioned work contributed to an average number of 47 days to approve project revisions, which did not meet the target of 35 days reflected in the proposed programme budget for 2020. The project revision process includes financial clearance by the subprogramme and other administrative clearances by other subprogrammes prior to programmatic clearance and final approval. The planned 2020 target could not be met owing to multiple amendments throughout the clearing process, such as corrections to budget and staffing tables, justifications for increased budget, as well as programmatic revisions. However, the subprogramme's work has improved the average number of days for financial clearance of project revisions from 29 days in 2018 to 19 days in 2020.

#### **Proposed programme plan for 2022**

25F.25 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will work closer with client departments to review existing management instructions and leverage Umoja Extension 2 to streamline processes regarding project revisions and increase the timeliness of funding allocations to projects and programmes. The expected progress is presented in the updated performance measure below (see figure 25F.I).

<sup>50</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 29F)).

Figure 25F.I

**Performance measure: number of days to approve project revisions**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: empowering ownership and management of resources<sup>51</sup>**

### **Programme performance in 2020**

25F.26 The subprogramme refined its existing reports and dashboards utilizing the business intelligence data warehouse. The subprogramme also performed a financial analysis of the programme performance on a regular basis, liaised with clients on an updated programme forecast and further assessed the implications of the COVID-19 pandemic and mitigation measures, which contributed to improving the financial performance of UNODC field offices. Furthermore, the subprogramme continued to work on quality assurance for UNODC projects integrating new Umoja Extension 2 functionalities.

25F.27 The above-mentioned work contributed to a 94 per cent total utilization of the approved budget by UNODC field offices, which met the planned target reflected in the proposed programme budget for 2021.

### **Proposed programme plan for 2022**

25F.28 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to promote the use of reports and dashboards and engrain their use in client offices' decision-making processes through ongoing training and guidance on financial and budgetary matters. The expected progress is presented in the performance measure below (see figure 25F.II).

<sup>51</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect. 29F)).

Figure 25F.II

**Performance measure: United Nations Office on Drugs and Crime field offices annual budget implementation rate**

(Percentage)

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

**Result 3: timely closing and reporting of grants****Proposed programme plan for 2022**

25F.29 Owing to the increase in voluntary contributions administered for client offices, the subprogramme has been receiving a greater number of requests for more frequent donor reporting and has been facing delays in the issuance of final donor reports, due to pending open items. The subprogramme has started to develop new self-paced training and guidance materials for substantive offices to monitor and address those open items. In the client support portal, a page was created with guidance on the monitoring of open items and of open commitments, together with a pre-closure checklist. The subprogramme has also started to deliver ad hoc targeted sessions to substantive offices on such topics as invoice processing and reception process, financial monitoring and the closure of grants and projects.

*Lessons learned and planned change*

25F.30 The lesson for the subprogramme was that a more targeted action plan was needed to work with client offices to monitor the life cycle of grants, activities and financial transactions, and to perform the required actions for the timely closing of grants. In applying the lesson, the subprogramme will systematically review all grants and pre-emptively assess grants to identify potential issues that could delay donor reporting. The subprogramme will also hold regular training sessions involving subject matter experts on how to resolve such areas as open items related to travel ticket payments and United Nations Development Programme financial authorizations, and will develop additional self-trouble-shooting guides to support the training.

*Expected progress towards the attainment of the objective, and performance measure*

25F.31 This work is expected to contribute to the objective, as demonstrated by 60 per cent of final financial reports issued in their due year (see figure 25F.III).

Figure 25F.III

**Performance measure: percentage of final financial reports issued in the year they are due**

(Percentage)

## Legislative mandates

25F.32 The list below provides all mandates entrusted to the subprogramme.

### General Assembly resolutions

41/213	Review of the efficiency of the administrative and financial functioning of the United Nations	75/243	Programme planning
		75/252	Questions related to the proposed programme budget for 2021
42/211	Implementation of General Assembly resolution 41/213	75/253	Special subjects relating to the proposed programme budget for 2021
75/242	Financial reports and audited financial statements, and reports of the Board of Auditors		

## Deliverables

25F.33 Table 25F.3 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 25F.3

### Subprogramme 1: deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	<b>2</b>	<b>2</b>	<b>2</b>	<b>2</b>
1. Consolidated budget for UNODC for the biennium	–	–	1	–
2. Performance report for UNODC for the biennium	1	1	–	1
3. Annual financial report and audited financial statements for UNODC	1	1	1	1

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
---------------------------------	-------------------------	------------------------	-------------------------	-------------------------

**E. Enabling deliverables**

**Administration:** financial management, including risk management and internal control, preparation and implementation of budgets and other resource proposals; management of 2,340 posts (creation, extension, abolishment and funding); financial reporting and accounting; cash and revenue management; accounting services, including processing for cost recovery; issuance of 24,000 United Nations Development Programme-related financial authorizations, payments, disbursements and payroll for 1,400 staff members; guidance and advice on all financial matters; and management of after-service health insurance claims for 600 beneficiaries.

## **Subprogramme 2**

### **Human resources management**

**Objective**

25F.34 The objective, to which this subprogramme contributes, is to ensure the attraction, development and retention of a competent, diverse, adaptable and healthy workforce with the highest standards of efficiency, competence and integrity, giving due regard to geographical representation, inclusivity and gender balance.

**Strategy**

25F.35 To contribute to the objective, the subprogramme will foster and reinforce an enabling working environment for its clients with regard to service delivery, talent management and organizational culture. The subprogramme will build on the Enabling Environment Guidelines for the United Nations System, published by the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women). The approach will encompass the delivery of a broad spectrum of human resources services to clients in Vienna and in UNODC field offices, including talent outreach and attraction initiatives to enhance gender parity and geographical representation and inclusiveness of persons with disabilities. In addition, the subprogramme will focus on supporting personnel through talent development initiatives and promoting workplace flexibility. The subprogramme is also reinforcing a culture of zero-tolerance against prohibited conduct, which includes the implementation of multiple initiatives of the United Nations System Chief Executives Board for Coordination (CEB).

25F.36 The subprogramme plans to support client offices on issues related to COVID-19 by enabling the remote onboarding of candidates, as well as remote outreach events to continue to attract candidates. Development opportunities and training for staff will reinforce awareness-raising and preventive measures and actions taken towards addressing prohibited conduct and ensure a zero-tolerance policy against sexual harassment are all held virtually. Finally, further support will be provided on flexible working arrangements to further facilitate the adaptation to a hybrid work environment.

25F.37 The above-mentioned work is expected to result in an overall improvement of staff engagement, motivation, productivity and well-being, thereby contributing positively to the delivery of the Organization's mandates.

**Programme performance in 2020**

25F.38 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Increase in geographical diversity among interns, providing a more diverse talent pool for staff recruitment**

25F.39 With the implementation of the COVID-19 emergency measures, including lockdown and travel restrictions, and in order to respect obligations towards interns and enhance business continuity for offices, the subprogramme introduced a remote internship modality. Interns represent an important applicant pool for future personnel positions and are an integral part of the workforce.

25F.40 Interns who were already on board were given an option to telecommute either from the duty station or from their home countries. In addition, for new recruits, the subprogramme utilized this new remote modality as a lever to further enhance geographical diversity among interns. Outreach activities by the subprogramme specifically highlighted the options of remote internships to target a wider audience and delivered webinars to more than 400 junior professionals across the world interested in entry-level positions such as internships. Furthermore, the subprogramme developed procedures and put suitable agreements in place, which allowed close interaction and monitoring for remote interns and supervisors.

#### *Progress towards the attainment of the objective, and performance measure*

25F.41 The above-mentioned work contributed to the objective, as demonstrated by the increase in geographical diversity among interns, especially among underrepresented Member States and low represented regional groups, as well as nationals of countries who had typically been denied internship visas by the host country Government (see figure 25F.IV).

Figure 25F.IV

**Performance measure: geographical diversity among interns/annual percentage of interns selected from the various regional groups**

**Impact of COVID-19 on subprogramme delivery**

25F.42 Owing to the impact of COVID-19 during 2020, the subprogramme had to cancel planned training activities. Those changes had an impact on the programme performance in 2020, as specified in result 1.

25F.43 At the same time, however, the subprogramme modified activities to support client offices on issues related to the COVID-19 pandemic within the overall scope of its objectives, namely, it adapted its learning and organizational development curricula to respond to emerging staff needs in the area of psychosocial counselling. The subprogramme delivered seven webinars with over 200 participants, and provided several additional training courses to over 300 participants on flexible working arrangements, such as the personal and professional impact on working remotely and staff well-being. Training also included building capacity to learn how to deliver training virtually instead of face-to-face. The subprogramme also enabled client departments to retain and recruit interns remotely. This approach yielded a more diverse intern applicant pool throughout the pandemic.

**Planned results for 2022**

25F.44 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

**Result 1: improved delivery of programmes by optimizing performance<sup>52</sup>****Programme performance in 2020**

25F.45 In 2020, the subprogramme developed the conversation package, a performance management and feedback tool, that supports supervisors through effective coaching models to enhance the performance of staff. The subprogramme developed a pilot of the conversation package with 48 staff. Dedicated training sessions, including role plays and related activities were conducted in addition to bi-weekly feedback meetings, thereby tracking the training's progress and effectiveness.

25F.46 The above-mentioned work contributed to a positive feedback by staff members on the conversation package, which did not meet the planned target of the offices utilizing the 360-degree feedback method for a reduction of improvement plans and to promote development plans, reflected in the proposed programme budget for 2020. Due to the pandemic, the subprogramme had to adapt its learning and organizational development curricula. As the exigencies of service shifted, the subprogramme could not dedicate the resources and planning needed for the 360-degree feedback implementation and the conversation package was rolled out instead.

**Proposed programme plan for 2022**

25F.47 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will launch the conversation package at the Director levels in 2021 and further roll it out for all staff in 2022, replacing the 360-degree feedback tool. Staff will be trained on how to give feedback, which will ultimately strengthen the performance management system, creating a coaching culture. The expected progress is presented in the updated performance measure below (see table 25F.4).

---

<sup>52</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 29F)).

Table 25F.4  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Awareness of current cases of performance management related to improvement plans and analysis of the number of improvement plans	Number of staff members aware of the new performance appraisal approach, number of awareness campaigns launched and establishment of a baseline for rolling out 360-degree feedback	Positive feedback by staff members on the conversation package	Increased use of peer feedback linked to development plan	All staff use conversation package training in staff development plan for giving constructive feedback

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: enhancing geographical diversity<sup>53</sup>

### Programme performance in 2020

25F.48 In line with the action plan, containing 29 actions and commitments, that was endorsed by the Executives Committee of the United Nations Office at Vienna and UNODC, the subprogramme, in 2020 further expanded its activities to strengthen equitable geographic representation among its staff. The subprogramme introduced a justification requirement for recommendations of candidates from overrepresented Member States and launched various awareness-raising efforts through social media, articles, social media posts and webinars to reach senior management, hiring managers and staff. A “diversity corner” was also published on the intranet that provides regular updates on the matter. Furthermore, the subprogramme held multiple career webinars and established an outreach package for potential candidates, in addition to many other activities to enhance geographical diversity.

25F.49 The above-mentioned work contributed to 52 per cent of candidates for UNODC and the United Nations Office at Vienna selected from underrepresented countries, which exceeded the planned target of 41 per cent reflected in the proposed programme budget for 2021.

### Proposed programme plan for 2022

25F.50 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will expand its outreach activities through new partnerships with relevant professional networks and organizations in unrepresented and underrepresented Member States and low-represented regions. The subprogramme will also build on its current activities and provide further online webinars on career opportunities to potential candidates. In addition, regular updates on geographical diversity will be provided to the Director-General/Executive Director, Executives Committee, hiring managers and governing bodies to further enhance awareness. Finally, representatives in UNODC field offices will be engaged and supported to

<sup>53</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect. 29F)).

allow better leverage of their local networks. The expected progress is presented in the performance measure below (see figure 25F.V).

Figure 25F.V

**Performance measure: yearly percentage of candidates selected from underrepresented countries**

(Percentage)

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: fostering a respectful and civil workplace

#### Proposed programme plan for 2022

25F.51 In 2019, the Secretary-General published the bulletin on addressing discrimination, harassment, including sexual harassment, and abuse of authority (ST/SGB/2019/8). In response, the subprogramme has launched a variety of preventive measures and actions to support client offices with the aim of fostering a respectful and civil workplace and protecting staff from prohibited conduct. In particular, the subprogramme deployed and implemented multiple CEB initiatives and products, which included the official launch of the Code of Conduct to Prevent Harassment, Including Sexual Harassment at United Nations System Events, and the adaptation of a guide for managers on the prevention of and response to sexual harassment in the workplace. Furthermore, various awareness-raising activities and training courses were conducted reaching over 400 staff members, and four conduct and discipline focal points were appointed. In addition, a mandatory performance objective was included in performance management reviews.

#### *Lessons learned and planned change*

25F.52 The lesson learned for the subprogramme was that clear and consistent guidance to staff is one of the most important aspects to ensure that staff and personnel understand the available resources, support and protection. The definitions of and procedures for reporting misconduct are scattered across different policies and manuals. The multiplicity of actors involved compounds the issue, leading to delays in addressing prohibited conduct. In applying the lesson, the subprogramme will work to ensure that, in the long run, 95 per cent of active staff members have taken the mandatory online course on the prevention of sexual harassment, which educates staff

members about the different actors at their disposal to report any form of misconduct, including sexual harassment.

*Expected progress towards the attainment of the objective, and performance measure*

25F.53 This work is expected to contribute to the objective, as demonstrated by 95 per cent of staff having completed relevant training of awareness on the applicable framework and mechanisms (see figure 25F.VI).

Figure 25F.VI

**Performance measure: percentage of staff who completed the mandatory online training on the prevention of sexual harassment in the work environment (cumulative)**

(Percentage)

## Legislative mandates

25F.54 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolutions*

<a href="#">58/144</a>	Improvement of the status of women in the United Nations system	<a href="#">72/254</a>	Human resources management
<a href="#">63/271</a>	Amendments to the Staff Regulations	<a href="#">75/668</a>	Administration of justice at the United Nations
<a href="#">73/281</a>	Shifting the management paradigm in the United Nations		

## Deliverables

25F.55 Table 25F.5 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 25F.5

**Subprogramme 2: deliverables for the period 2020–2022, by category and subcategory***Category and subcategory***D. Communication deliverables**

**Outreach programmes, special events and information materials:** outreach programmes, including special events, information and broadcast materials, job fairs and career presentations for more than 1,500 potential candidates; health- and wellness-promotion programmes and awareness-raising programmes on prohibited conduct and the Enabling Environment Guidelines for all staff members.

**E. Enabling deliverables**

**Administration:** human resources services provided to 3,500 personnel; succession planning, organizational design, classification and reclassification of posts, outreach and full recruitment process, expert advice on the conduct of staff selection processes to all hiring managers, human resources policies and legal advice; counselling of staff on personal, family and work-related concerns; talent management; issuance and renewal of appointments, administration of staff movements and separation/terminations; provision of training on organizational and managerial competencies on a bi-annual basis, substantive and technical skills, and career development; orientation programmes for new personnel twice a year; health awareness programmes; and provision of medical services in collaboration with other Vienna-based entities.

**Internal justice and oversight:** legal and policy advisory services provided to line managers, senior officials and colleagues in the discharge of their official functions; preparation of legal positions for administrative reviews and cases brought by staff to the Management Evaluation Unit and the Office of the United Nations Ombudsman and Mediation Services; assistance to the responsible official in receiving and assessing complaints and reports of alleged misconduct and processing such complaints in accordance with established policies and procedures, including liaising with the Office of Internal Oversight Services and other investigative bodies, as well as the Administrative Law Division once the disciplinary process is invoked; and discharging the role of Conduct and Discipline Focal Point and awareness-raising on matters related to the administration of justice at the United Nations.

## Subprogramme 3

### Support services

#### Objective

25F.56 The objective, to which this subprogramme contributes, is to ensure the efficient, environmentally sound and effective functioning of client offices with regard to conference and facilities management, asset management, travel and transportation, mail and pouch services, procurement, commercial activities, records management and library services.

#### Strategy

25F.57 To contribute to the objective, the subprogramme will provide regular support to clients with regard to changing workspace needs within the constraints of limited office space. The subprogramme also continues to work with client offices in revising office space standards. The subprogramme will assist, advise and provide regular virtual and instructor-led training on travel policies and related Umoja processes. The subprogramme will continue to focus on improving outreach services to ensure better utilization of library resources.

25F.58 The above-mentioned work is expected to result in:

- (a) An optimized use of workspace;
- (b) Effective management of clients' travel resources;
- (c) Enabling clients, including Member States, to continue to make informed decisions and develop policies by providing access to information resources through the library.

## Programme performance in 2020

25F.59 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Enabling remote access to library resources for UNODC field offices

25F.60 In fulfilling their duties, staff members frequently consult the library services offered by the subprogramme for research purposes. In response to the COVID-19 situation, Vienna-based staff continued their work remotely, which limited their ability to gain physical access to the library. In 2020, the subprogramme increased its efforts to negotiate with vendors to gain more flexible remote access options to library resources to ensure that Vienna-based staff as well as UNODC field office staff could continue to deliver the Organization's mandates. The subprogramme worked with 10 vendors to open their subscriptions not only to the United Nations Office at Vienna library but also provide more than 3,000 library clients across the globe with remote access to academic journals, professional magazines and other critical online media.

25F.61 The subprogramme embarked on a communication campaign to inform clients about the newly available remote access to library resources. Furthermore, the subprogramme provided training to 90 clients across 35 UNODC field offices on the use of those resources to ensure clients could maximize their use of library subscriptions to fulfil their mandated activities.

### *Progress towards the attainment of the objective, and performance measure*

25F.62 The above-mentioned work contributed to the objective, as demonstrated by 2,042 remote monthly searches across library resources (see figure 25F.VII). During 2020, six databases, three online dictionaries, two current affairs resources and three academic journals were added for remote access.

Figure 25F.VII

**Performance measure: average remote monthly searches across library resources**

**Impact of COVID-19 on subprogramme delivery**

25F.63 Owing to the impact of COVID-19 during 2020, the subprogramme adjusted its office space cleaning approach to include thorough disinfection and cleaning, in particular the offices of staff who either tested positive for COVID-19 or had close contact with persons who had tested positive. Owing to issues related to COVID-19 logistics obstacles, the subprogramme experienced delays in delivering equipment to field offices. Those changes had an impact on the programme performance in 2020, as specified under result 1 below.

25F.64 At the same time, however, the subprogramme identified new activities to support client offices on issues related to the COVID-19 pandemic, within the overall scope of its objectives, namely, to provide remote access to clients to continue using library subscriptions. The new deliverable contributed to results in 2020, as specified in the emerging result for 2020 above.

**Planned results for 2022**

25F.65 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

**Result 1: faster delivery of equipment to beneficiaries<sup>54</sup>****Programme performance in 2020**

25F.66 The subprogramme has worked on correcting the incomplete equipment records to ensure faster delivery of equipment to beneficiaries. The subprogramme also finalized the underlying business processes and led the implementation of a new operational workflow between property focal points and substantive offices in Vienna and at UNODC field offices. Furthermore, the subprogramme provided continuous training on property management policies and practices for staff in Vienna and at field offices.

25F.67 The above-mentioned work contributed to the faster delivery of equipment to beneficiaries, as demonstrated by the reduced delivery time within 35 days. The target of 30 days reflected in the proposed programme budget for 2020 could not be met owing to unforeseen logistics obstacles related to COVID-19.

**Proposed programme plan for 2022**

25F.68 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to submit correct and complete equipment records within 30 days. The expected progress is presented in the performance measure below (see figure 25F.VIII).

---

<sup>54</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 29F)).

Figure 25F.VIII

**Performance measure: number of days for delivery of equipment**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

**Result 2: Improved mail and pouch tracking system for clients<sup>55</sup>****Programme performance in 2020**

25F.69 In 2020, the subprogramme has tested and evaluated a mail and pouch tracking system by assessing the tracking software and hardware to provide a more secure mail and pouch service that offers real-time tracking information to users. The tested system proved to be too time-consuming and, in addition, the system did not allow for the inclusion of complete shipment data, as required by the United Nations Office at Vienna.

25F.70 The above-mentioned work contributed to the testing and evaluation of a pilot system tested, which met the target of an available pilot system for testing and the training of users trained to validate that the system meets business requirements, reflected in the proposed programme budget for 2021. The proposed system did not meet the current United Nations Office at Vienna business requirements, which is why the subprogramme is actively searching for alternative solutions that would better fit the mail operation's needs.

**Proposed programme plan for 2022**

25F.71 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will test and evaluate a new solution by 2022. The expected progress is presented in the performance measure below (see table 25F.6).

<sup>55</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect. 29F)).

Table 25F.6

**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021(planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Manual tracking of office mail and pouch	Mail operations proposed a digital mail and pouch system that provides real-time information about shipments	Pilot system tested and evaluated did not meet business requirements	Client offices use digital mail and pouch tracker and provide positive feedback	New solution will be implemented

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

**Result 3: improved Organization business continuity response****Proposed programme plan for 2022**

25F.72 The COVID-19 situation brought forward the need to review and evaluate the existing business continuity plan. In 2020, the subprogramme initiated an assessment of the existing plan by all client offices. Critical staff were identified and information on experiences of 2020 were collected.

*Lessons learned and planned change*

25F.73 The lesson for the subprogramme was that the 2020 COVID-19 pandemic revealed gaps in the existing business continuity plan. As such, a crisis type was not defined and required a different crisis management approach. The COVID-19 experience increased the appreciation by all client offices for a sound business continuity plan. In applying the lesson, the subprogramme will engage motivated staff at large to ensure their active participation in the review of established requirements and will further integrate the results of its assessment into a revised business continuity plan that includes more potential future scenarios to improve the organization's crisis preparedness.

*Expected progress towards the attainment of the objective, and performance measure*

25F.74 This work is expected to contribute to the objective, as demonstrated by increased preparedness of the Organization for future crises (see table 25F.7).

Table 25F.7

**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021(planned)</i>	<i>2022 (planned)</i>
Business continuity plan in place	Business continuity plan in place	Gaps in Business continuity plan identified during COVID-19 crisis	Evaluation of the business continuity plan and response to the 2020/2021 crisis	Increased preparedness of the Organization for future crises

## Legislative mandates

25F.75 The list below provides all mandates entrusted to the subprogramme.

### *General Assembly resolutions*

58/276	Outsourcing practices	69/273	Procurement
58/277	Report of the Joint Inspection Unit on the management audit review of outsourcing in the United Nations and the United Nations funds and programmes		

## Deliverables

25F.76 Table 25F.8 lists all deliverables, by category and subcategory, for the period 2020–2022, that contributed and are expected to contribute to the attainment of the objective stated above.

Table 25F.8

### **Subprogramme 3: deliverables for the period 2020–2022, by category and subcategory**

#### *Category and subcategory*

#### **D. Communication deliverables**

**Library services:** knowledge services to enable evidence-based policymaking and facilitate research for 3,000 library clients; digitize pages of official documents to make them available online; print and electronic information resources; and on-site and online access.

#### **E. Enabling deliverables**

**Administration:** management and maintenance of United Nations-leased premises.

**Logistics:** Travel management: arrangement of tickets, visas and laissez-passer for staff and meeting participants for Vienna-based United Nations Secretariat entities and over 105 UNODC field office locations.

**Procurement:** provision of full procurement services.

**Asset management:** physical verification of assets and monitoring of United Nations property records at the Vienna International Centre and at the over 105 UNODC field office locations.

**Facilities management:** management of office space and office furniture.

**Transportation:** shipment of official property, bulk consignments for conferences, and removal of personal effects and related insurance requirement.

**Mail services:** provision of mail, pouch and distribution services for more than 200 United Nations offices and 15 other United Nations entities in Vienna.

## **Subprogramme 4 Information and communications technology operations**

### **Objective**

25F.77 The objective, to which this subprogramme contributes, is to advance the efficient and effective implementation of client entities' substantive programmes through technologies, including a coherent enterprise information and communications technology system and enterprise architecture, access to information and communications technology (ICT)-related technological innovations and a secure, coherent and resilient technology application hosting and infrastructure landscape.

## Strategy

25F.78 To contribute to the objective, the subprogramme will place client offices' programme objectives and business needs at the centre of decisions involving ICT service offerings and the implementation of new technologies. It will also support enterprise application deployments and integrate local service delivery mechanisms to avoid replication of globally available services. The subprogramme will strengthen cybersecurity through the implementation of vulnerability management, continuous monitoring, the protection of classified information and related policies and procedures. It will promote cloud computing through using Secretariat-wide systems contracts and increase compliance with technology standards, guidelines and methodologies by cooperating with the regional technology centres and the Office of Information and Communications Technology.

25F.79 The subprogramme plans to support client offices on issues related to the COVID-19 pandemic by providing technology solutions that support staff in adopting the new ways of working.

25F.80 The above-mentioned work is expected to result in:

- (a) Improved service delivery by conforming with the global service procedures;
- (b) Achieving a harmonized technology landscape;
- (c) Reducing fragmentation by leading staff to incorporate tools and services seamlessly into their daily business workflows to achieve their goals with effectiveness, efficiency and satisfaction from learning about and using them;
- (d) Greater scalability by making systems more adaptable to changing needs and demands through the use of cloud-based security for enterprise applications;
- (e) A more secure, coherent and resilient technology application hosting and infrastructure landscape.

## Programme performance in 2020

25F.81 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### New way of working

25F.82 The COVID-19 pandemic changed the way of working at the United Nations, in particular remote working across the entire work force. In response, the subprogramme implemented the new United Nations Office at Vienna client support portal to enable virtual access to services for clients anytime, anywhere. The subprogramme also implemented measures to prevent and mitigate relevant cyber risks for all mission-critical processes for the United Nations Office at Vienna and deployed multi-factor authentication for all staff members, which enabled secure login to access information technology systems while working remotely. Furthermore, the subprogramme continued to provide support to users on moving their files to cloud storage. Moreover, the subprogramme supported remote meetings through different technologies, such as Microsoft Teams and Cisco Webex, and enabled remote simultaneous interpretation platforms for virtual and hybrid meetings, which provided simultaneous interpretation to remote participants.

*Progress towards the attainment of the objective, and performance measure*

25F.83 The above-mentioned work contributed to the objective, as demonstrated by 31 meetings and conferences held that were supported with remote simultaneous interpretation technologies (see table 25F.9).

Table 25F.9

**Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>
Simultaneous interpretations provided as in-conference room service	Simultaneous interpretations provided as in-conference room service	31 meetings and conferences with remote simultaneous interpretation technologies

**Impact of COVID-19 on subprogramme delivery**

25F.84 During 2020, the subprogramme identified new activities to support staff on issues related to the COVID-19 situation, within the overall scope of its objective. Subsequently, the subprogramme prioritized supporting remote working through the provision of cloud-based systems and accelerated the implementation of the use of desk-to-desk videoconferencing tools. The subprogramme further extended support for telecommuting arrangements and enhanced the configuration of processes to operate efficiently from any location, including document management, review and approval workflows and automation.

25F.85 Overall, the subprogramme provided a higher than planned level of maintenance and support for all applications, software licenses and information technology infrastructure, as well as equipment related to telecommuting and virtual meetings. The new activities contributed to results in 2020, as specified in the emerging result in 2020 above and accelerated programme performance, as specified under results 1 and 2, below.

**Planned results for 2022**

25F.86 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

**Result 1: enhancing videoconferencing<sup>56</sup>****Programme performance in 2020**

25F.87 The subprogramme has continued its efforts to modernize desktop and mobile videoconferencing services by encouraging the use of United Nations standard desk-to-desk videoconferencing tools in 2020. Since the beginning of 2019, the subprogramme has prioritized enabling staff to be more adept at using cloud-based information-sharing and collaboration tools. As a result of those efforts, staff were already prepared to use such tools that proved critical during the COVID-19 pandemic. The subprogramme accelerated its efforts on using desk-to-desk video conferencing and virtual meetings in 2020. The subprogramme also provided equipment to enable each staff member to use videoconferencing and encouraged staff to use various videoconferencing applications, including Teams, Skype and Webex.

<sup>56</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 29F)).

Furthermore, the subprogramme distributed user guidelines and shared best practices on using those tools and services and conducted several workshops for empowering users to work more efficiently remotely.

25F.88 The above-mentioned work contributed the use of desk-to-desk videoconferencing by 90 per cent of Vienna-based staff, which exceeded the planned target of 75 per cent reflected in the proposed programme budget for 2020.

### Proposed programme plan for 2022

25F.89 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will support new videoconferencing and virtual meeting tools standardized by the Office of Information and Communications Technology. The expected progress is presented in the performance measure below (see table 25F.10).

Table 25F.10  
Performance measure

2018 (actual)	2019 (actual) <sup>a</sup>	2020 (actual)	2021 (planned) <sup>b</sup>	2022 (planned)
Access to meeting room and conference room videoconferencing facilities for group meetings	25 per cent of staff having had the experience of participating in desk-to-desk videoconferencing	Use of desk-to-desk videoconferencing by 90 per cent of Vienna-based staff	80 per cent of Vienna-based staff able to use desk-to-desk videoconferencing	98 per cent of Vienna-based staff able to use desk-to-desk videoconferencing

<sup>a</sup> The 25 per cent rate was an interim proxy, however the actual rate achieved for 2019 was 48 per cent.

<sup>b</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: technology enables field staff to perform with less disruption<sup>57</sup>

### Programme performance in 2020

25F.90 The subprogramme has been moving to cloud computing by reducing local applications and locally hosted computing resources, such as physical servers, landline telephones, desktops, local data storage systems, and data centre facilities. The subprogramme also supported the ability to work remotely by providing staff with cloud-based information sharing and collaboration tools that are globally accessible over the Internet. Furthermore, the subprogramme implemented the new United Nations Office at Vienna client support portal to enhance support to all clients and enable virtual access to the support services of the subprogramme for clients anytime, anywhere. The new client support portal serves as the central entry point for all client service needs, allowing clients to request services and link up with the correct application or counterpart while providing essential monitoring information to the subprogramme on all administrative and support-related areas.

25F.91 The above-mentioned work contributed to the use of 23 cloud-based services by staff members, which exceeded the planned target of 14 services, reflected in the proposed programme budget for 2021.

<sup>57</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect. 29F)).

### Proposed programme plan for 2022

25F.92 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will roll out more cloud-based services in 2022, by converting local applications into cloud-based services and coordinating further migration of data from individual users and divisions to the cloud. The expected progress is presented in the performance measure below (see figure 25F.IX).

Figure 25F.IX

**Performance measure: total number of cloud-based services in use (cumulative)**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: strengthening connectivity resiliency

#### Proposed programme plan for 2022

25F.93 The COVID-19 pandemic showed the importance of a resilient and sustainable network connectivity to allow staff to access information technology systems, data and tools while working remotely. In 2018, the subprogramme piloted a new, simplified network infrastructure solution to improve the networking capability in field locations. Since then, the solution was applied in three UNODC field offices (Bangkok, Cairo and New Delhi) and extended in three more offices (Brussels, Dakar and Kabul). In 2020, the subprogramme continued to strengthen network capability, particularly for UNODC field operations, and promoted mobile technology to facilitate the delivery of UNODC programmes. The subprogramme also continuously enhanced information and data security while supporting remote working during the pandemic and helped to enhance the business continuity capacity of Vienna-based secretariat units, as well as UNODC field offices.

#### *Lessons learned and planned change*

25F.94 The lesson for the subprogramme was that the configuration, which includes both wired and wireless connectivity for office computers and telephones, has improved the networking capability of all offices where it was rolled out. In applying the lesson, the subprogramme will constantly monitor the configuration to

assess whether it fulfils the requirements of other field locations with weak network connectivity, so as to become a model for a more sustainable network across UNODC offices. The subprogramme will expand the implementation of cost-effective network infrastructure solutions in all UNODC field offices to create a resilient and sustainable office network with wired and wireless networking.

*Expected progress towards the attainment of the objective, and performance measure*

25F.95 This work is expected to contribute to the objective, as demonstrated by 12 UNODC field offices using the network solution (see figure 25F.X).

Figure 25F.X

**Performance measure: number of UNODC field offices using the network solution**

## Legislative mandates

25F.96 The list below provides all mandates entrusted to the subprogramme.

### *General Assembly resolutions*

<a href="#">57/304</a>	Information and communications technology strategy	<a href="#">63/269</a>	Information and communications technology, disaster recovery and business continuity for the United Nations: arrangements for the secondary data centre at Headquarters
<a href="#">63/262</a>	Information and communications technology, enterprise resource planning, and security, disaster recovery and business continuity		

## Deliverables

25F.97 Table 25F.11 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 25F.11

**Subprogramme 4: deliverables for the period 2020–2022, by category and subcategory***Category and subcategory***E. Enabling deliverables**

**Information and communications technology:** provision of security for information technology systems and data; connectivity services for remote devices; hosting services; voice, video and data communications services; operation and maintenance of existing and new application systems in a secure environment; technical support to 3,000 end users; and advisory services on business solutions.

## **Section 29G**

### **Administration, Nairobi**

**Overall orientation****Mandates and background**

25G.1 The United Nations Office at Nairobi was established by the Secretary-General on 1 January 1996 as a successor to the United Nations Common Services Unit at Nairobi and two separate divisions of administration of the United Nations Environment Programme (UNEP) and the United Nations Human Settlements Programme (UN-Habitat). In its resolution [53/242](#), the General Assembly requested the Secretary-General to strengthen the Office and encouraged the Director-General of the United Nations Office at Nairobi to take steps to increase the level of utilization of the Office. The Office was established to strengthen the United Nations presence in Nairobi and to achieve economies of scale. Under a memorandum of understanding and specific service arrangements with UNEP and UN-Habitat, the Office provides them with a full range of administrative and other support services. The Office also administers the provision of common services to more than 60 offices of United Nations agencies, funds and programmes operating in or from Kenya and a range of services to the resident coordinator system. In addition, Kenya is one of 16 locations that provides in situ, location-dependent services to a global client base. In Kenya, the Office serves as the designated Secretariat service provider.

**Strategy and external factors for 2022**

25G.2 The Nairobi duty station is unique in that it hosts a diverse set of United Nations system offices and operations. Nairobi hosts a large, well-organized inter-agency network comprising more than 60 offices of United Nations agencies, funds and programmes operating in or from Kenya that make up the Common Services Management Team for which the Office is the common services provider. In addition, Kenya hosts special political missions and peacekeeping support operations. Collectively, the activities of these Nairobi-based United Nations entities make significant contributions to advancing United Nations goals and values – in Kenya, in the region and globally.

25G.3 For 2022, the Office remains committed to maintaining optimal levels of delivery. Its contribution to the United Nations development system reform will remain ongoing. Support for the global resident coordinator system, the implementation of the new business operations strategy 2.0 and common back office initiatives will continue. Progress towards the major infrastructure projects (office blocks A to J, conference

rooms and other facilities upgrades) will also remain high on the agenda of the programme.

25G.4 The Office provides human resources administration, payroll and finance services to international staff in over 131 resident coordinator offices around the world. In addition, the Office, as one of the regional service providers, supports international travel, the recruitment of consultants and procurement services for resident coordinator offices in Africa. In 2022, the Office will continue to work closely with the Department of Operational Support and the resident coordinator system to further extend the support provided.

25G.5 Furthermore, by 2022, a major new client, the Office of the United Nations High Commissioner for Refugees (UNHCR), with approximately 140 staff members, will have moved into offices at the Gigiri complex. The United Nations Office at Nairobi will demonstrate agility and adapt to the “new normal” and will encourage and support its clients to do the same. The Office will leverage the 142 acres that comprise the Gigiri complex and stimulate creative ways to make greater use of outdoor spaces, such as meeting pods. The Office will continue to strengthen its financial management and internal control systems mechanisms and its risk framework. The Office will also continue to support its clients within the existing inter-agency governance framework, strive to increase its client portfolio and forge stronger partnerships in the region. Nairobi will remain a destination in the region for medical evacuations, and the United Nations treatment facility that was completed in 2020 will serve to provide assurance of good quality medical care to United Nations system entities in the region.

25G.6 The Office will also continue to engage further with the host country Government in support of its mandate and the clients it serves. A communications strategy will be implemented, facilitating feedback from current and potential clients, in order to continue to refine the services provided.

25G.7 With regard to cooperation with other entities, the Office will continue to work with the United Nations system organizations based in Nairobi, including through the local common services governance framework. It will do so in support of United Nations common business operations, common premises and back offices. The Office will leverage best practices, eliminate duplication and overlap and generate efficiencies, synergies and coherence with a view to expanding the service base as well as ensuring efficiency and effectiveness.

25G.8 With regard to external factors, the overall plan for 2022 is based on the following planning assumptions:

(a) Other organizations of the United Nations common system based in Nairobi continue to be committed to collaborating with the United Nations Secretariat on ongoing activities;

(b) The extrabudgetary funding situation of client offices does not have an adverse impact on the ability of the Office to plan and implement its activities.

25G.9 With regard to the coronavirus disease (COVID-19) pandemic, the proposed programme plan is based on the assumption that the proposed deliverables and activities for 2022 will be feasible to implement. However, if the pandemic were to have a further impact on the planned deliverables and activities, they would be adjusted during 2022 within the scope of the overall objectives, strategies and mandates. Any such adjustments would be reported as part of the programme performance information.

25G.10 The Office integrates a gender perspective into its operational activities, deliverables and results, as appropriate. It will contribute to reaching gender parity, in line with the Secretary-General’s system-wide strategy on gender parity, by keeping

hiring managers and human resource focal points in client entities informed of the impact of selection decisions through consultations and briefings.

25G.11 In line with the United Nations Disability Inclusion Strategy, the Office looks to ensure that all major repairs and replacements at the United Nations complex in Nairobi take into account disability inclusion. Moreover, the Office is working on strengthening an inclusive organizational culture that is supportive of staff members with disabilities as well as staff who have dependants with disabilities. For this purpose, regular training opportunities about disability inclusion will be offered and clear communication of available benefits and entitlements with regard to disabilities will be provided to all staff. Furthermore, disability inclusion awareness-raising events will be organized in the context of promoting an enabling work environment. These activities will strengthen an inclusive culture that supports the voluntary disclosure of and advocacy for staff and their dependants with disabilities. The mentioned activities will be pursued in close consultation with and the active involvement of persons with disabilities and their representative organizations through the common services governance structure.

## **Programme performance in 2020**

### **Impact of COVID-19 on programme delivery**

25G.12 During 2020, the COVID-19 pandemic had an impact on the planned deliverables and activities of the United Nations Office at Nairobi, and the Office strived to minimize the impact on delivery to clients, demonstrating agility, creativity and innovation.

25G.13 At the same time, however, some planned deliverables and activities were modified, within the overall scope of the objectives of the subprogrammes, in order to support clients on issues related to the COVID-19 pandemic. The Joint Medical Service team was central to COVID-19-related medical evacuation cases. In response to the COVID-19 pandemic, and with the aim of safeguarding the welfare of United Nations staff members and their dependants in Kenya and the region, the Office liaised with United Nations Headquarters to construct a 100-bed treatment facility in Nairobi.

25G.14 The Office also issued a back-to-office strategy that was endorsed and implemented at the inter-agency level. The strategy was introduced by the Office and included innovative ways of working. The Office collaborated with all affected United Nations agencies, funds and programmes operating in or from Kenya on all matters pertaining to COVID-19, including mandate implementation in the inter-agency network, namely, the COVID-19 crisis management team and the Common Services Management Team. With the support of the inter-agency network, capacity within the Office's Joint Medical Service to meet additional demands of clients with regard to the COVID-19 pandemic was enhanced. As a positive example of agility and client orientation, the Office's Information and Communications Technology Services facilitated the remote working of more than 4,000 staff members globally. Virtual meetings and training sessions were held seamlessly, including town hall meetings on COVID-19 that included the entire United Nations system in Kenya.

25G.15 Reflecting the importance of continuous improvement and responding to the evolving needs of client offices, the Office will mainstream lessons learned and best practices related to the adjustments to and adaptation of its programme owing to the COVID-19 pandemic. Specific examples include the Office's ability to provide efficient remote support through client support desks to assist with administrative, operational and personal matters, as well as its ability to accelerate the online services provided to clients through virtual cloud-based platforms in the areas of payments, training, transportation and electronic archiving and storage systems, to name just a few. The

pandemic was also an enabler that accelerated the conversion of working environments, such as the provision of more outdoor working environments (e.g., outdoor working pods) that encourage the concept of indoor/outdoor working and in turn reduce the risk of infection. Additional lessons included the streamlining of remote support mechanisms to provide more convenience for all staff, such as online physical verification services and online auction services for disposal.

## Legislative mandates

25G.16 The list below provides all mandates entrusted to the programme.

### *General Assembly resolutions*

52/12 A and B	Renewing the United Nations: a programme for reform	75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system
53/239	Report of the Secretary General on environment and human settlements	75/252	Questions relating to the proposed programme budget for 2021

## Deliverables

25G.17 Table 25G.1 lists all cross-cutting deliverables, by category and subcategory, for the period 2020–2022.

Table 25G.1

### **Cross-cutting deliverables for the period 2020–2022, by category and subcategory**

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Substantive services for meetings</b> (number of three-hour meetings)	<b>3</b>	<b>3</b>	<b>3</b>	<b>3</b>
1. Meetings of the Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
2. Meetings of the Committee for Programme and Coordination	1	1	1	1
3. Meetings of the Fifth Committee	1	1	1	1

## Evaluation activities

25G.18 A self-evaluation of its client relationship management approach, including systems and staffing configuration, taking into consideration the Office's growing and globally dispersed client offices, is planned for 2022.

## Programme of work

### Subprogramme 1

#### Programme planning, finance and budget

### Objective

25G.19 The objective, to which this subprogramme contributes, is to ensure the sound, effective and efficient financial management and reporting by client offices.

## Strategy

25G.20 To contribute to the objective, the subprogramme will strengthen the financial management and internal control of the regular budget and extrabudgetary funds of the programme and that of its clients. The subprogramme will continue to support the Organization in embedding results-based management principles into its operations to improve the Organization's efficiency, effectiveness and accountability.

25G.21 The subprogramme will support client offices in the implementation of the mandated activities, provide financial services, produce accurate and timely financial reports to donors and manage funding arrangements with implementing partners. The subprogramme will further streamline the financial procedures and workflows of client offices and ensure strict adherence to the Financial Regulations and Rules of the United Nations. In addition, the subprogramme will increase engagement with client entities to implement the enhanced delegation of authority framework.<sup>58</sup>

25G.22 The subprogramme will continue to maintain the financial accounts of its clients, improve the financial integrity of data, prepare the financial statements in compliance with International Public Sector Accounting Standards (IPSAS), support the internal and external audit processes and provide assurances on the management of the United Nations resources through improved financial dashboards for client entities.

25G.23 The subprogramme plans to support its clients on issues related to COVID-19 by providing responsive support for COVID-19 initiatives in relation to organizational preparedness, isolation facilities and the 100-bed United Nations treatment facility. The subprogramme also plans to restructure the client relationship management system to ensure the continuity of financial management and reporting services provided remotely to client offices in geographically dispersed locations.

25G.24 The above-mentioned work is expected to result in:

- (a) Operational efficiency, improved stewardship of donor funds and increased accountability, and the transparency and accountability of client entities in accordance with the enhanced delegation of authority framework;
- (b) An unqualified audit opinion of the Board of Auditors for UNEP and UN-Habitat;
- (c) Enhanced decision-making by Member States on the impact of their contributions to the programme and the project implementation of the client entities.

25G.25 The planned support on issues related to COVID-19 is expected to result in:

- (a) The preparedness of the United Nations to address the impact of COVID-19;
- (b) The ability of client offices to continue the implementation of their mandates.

## Programme performance in 2020

25G.26 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Strengthened organizational resilience and response to COVID-19

25G.27 Nairobi is a unique duty station that hosts a diverse set of United Nations system offices and operations and a large, well-organized inter-agency network comprising more than 60 offices of United Nations agencies, funds and programmes operating in or from Kenya. The response to the COVID-19 pandemic required the

<sup>58</sup> [ST/SGB/2019/2](#).

United Nations Office at Nairobi, on behalf of the crisis management team, to develop a collective, all-encompassing and robust approach to meet the mandatory government requirements for quarantine and isolation, and to construct a United Nations regional treatment facility in partnership with the Nairobi Hospital to diagnose and treat infectious diseases of United Nations staff and their dependants and the staff of United Nations affiliates in the region in the light of the COVID-19 pandemic.

25G.28 The subprogramme is responsible for the overall financial management of all activities carried out by the Office. As such, the subprogramme was responsible for working with all stakeholders to ascertain the requirements of the United Nations, prepare the programme budgets for the COVID-19 pandemic response and present them for approval by the inter-agency network, and develop a cost-sharing mechanism for the preparedness requirements of the Joint Medical Service, including resources for the temporary quarantine and isolation facilities. In addition, the subprogramme provided financial management support for the construction of the United Nations regional treatment facility to support United Nations entities and operations in the region.

*Progress towards the attainment of the objective, and performance measure*

25G.29 The above-mentioned work contributed to the objective, as demonstrated by the quarantine and/or treatment at the medical facility for COVID-19 of 497 staff members and their dependants, as well as the evacuation of 15 staff members and their dependants to Nairobi during this period (see table 25G.2).

Table 25G.2  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
—	—	497 staff members and their dependants were quarantined and/or treated at the medical facility for COVID-19, and 15 staff members and their dependants were evacuated to Nairobi during this period

## Planned results for 2022

25G.30 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### Result 1: improved grant reporting and closure of expired grants<sup>59</sup>

#### Programme performance in 2020

25G.31 The subprogramme is responsible for the management of donor contribution agreements (grants), with a total portfolio of 6,200 donor grants as of the end of 2020. After the end of each donor agreement operational period, the subprogramme works with clients to complete the financial transactions and contractual commitments of the grants and close the expired grants in Umoja to indicate the completion of actions for

<sup>59</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 29G)).

the grants. Between 2015 and 2018, after the transition to Umoja, there were significant delays in the closure of expired grants. From 2019 onward, the subprogramme has implemented a management dashboard for grant closure so clients are able to monitor the progress of the closures, worked with clients to determine priority lists of grants to be closed and coordinated the closure of grants with expired agreements. The dashboard highlights pending actions and the responsible action owners, as well as problem areas that require solutions and management decisions.

25G.32 The above-mentioned work contributed to the reduction of grants from donors awaiting financial closure to 38 per cent, which exceeded the planned target of 40 per cent reflected in the proposed programme budget for 2020. The closure of 959 parent grants in 2020 resulted in a higher delivery rate.

### Proposed programme plan for 2022

25G.33 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will aim at closing 75 per cent of expired grants by the end of 2022. To achieve this, the subprogramme will focus on improving the technical capacity and analytical skills of staff, streamline business intelligence reporting and leverage analytical tools to better monitor open items that hinder timely grant closure, and standardize procedures to improve quality and responsiveness to clients' reporting requirements. The expected progress is presented in the performance measure below (see figure 25G.I).

Figure 25G.I

#### Performance measure: expired grants from donors awaiting financial closure

(Percentage)

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 2: increasing monitoring and accountability in implementing partner arrangements for improved programme delivery<sup>60</sup>

#### Programme performance in 2020

25G.34 The subprogramme has introduced improved business intelligence and dashboard reports to help clients monitor the implementation of partnership agreements, and has continued to remind clients to pursue timely reporting from their partners. The subprogramme also encouraged clients to tighten the criteria for the selection of new

<sup>60</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect. 29G)).

partners and to include financial reporting compliance as one of the prerequisites for payments to their partners.

25G.35 The above-mentioned work contributed to the financial closure of 2,822 partnership agreements in 2020, which increased the percentage of financially closed expired agreements with implementing partners to 46 per cent, exceeding the planned target of 30 per cent reflected in the proposed programme budget for 2021.

### Proposed programme plan for 2022

25G.36 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will further enforce the systematic review of long-outstanding advances provided to the implementing partners, especially in relation to expired funding agreements. This includes analysing the root causes of significant delays in reporting by the partners, and the initiation of mitigating measures to enhance accountability, such as ensuring that implementing partners account for prior advances before providing additional advances to the same partners. The subprogramme, furthermore, will continue to recommend to clients the blacklisting of non-compliant partners to enhance partner accountability with regard to their compliance with partnership policies and procedures. In addition, comprehensive status reports on advances to implementing partners will be provided on a regular basis. The subprogramme will continue to maintain direct engagement with the clients to monitor progress in the implementation of audit recommendations on the implementing partner arrangements and ensure compliance with agreed key performance indicators. The subprogramme will engage with key stakeholders on the development of improvements to the implementing partner module of Umoja Extension 2, with the aim of increasing process efficiencies and the use of Umoja functionality to meet operational requirements. The expected progress is presented in the performance measure below (see figure 25G.II).

Figure 25G.II

### Performance measure: expired agreements with implementing partners that are financially closed

(Percentage)

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: improved client relationship management and services to clients**

#### **Proposed programme plan for 2022**

25G.37 The subprogramme is the financial service provider for UNEP and UN-Habitat. The subprogramme continued to broaden its client base, including by providing financial services to the resident coordinator system. The subprogramme is committed to supporting its clients with the implementation of the enhanced delegation of authority framework for programme managers and strengthening engagement with clients to improve their understanding of IPSAS, the Financial Regulations and Rules and policies that are necessary for the implementation of the enhanced delegation of authority framework.

25G.38 In anticipation of increased demand for its services from an expanding global client base, the subprogramme established a client service centre: a single point of contact for client enquiries and service requests. Prior to this, the subprogramme had also begun, and has since completed, the migration of multiple systems to a customer relationship management system: the iNeed system. Both initiatives were undertaken with the aim of simplifying and improving the client experience and ensuring that high-quality and timely financial, accounting and reporting services can be provided to all within agreed key performance timelines. The subprogramme continues to provide consistent high-quality and timely responses to clients, while the client service centre, in addition to coordinating all client requests and responses through the iNeed system for financial, accounting and reporting services, has assumed responsibility for identifying and coordinating the delivery of training requirements, monitoring the performance of services against agreed performance indicators and reporting on client satisfaction. Since the implementation of the work-from-home modality as a result of the COVID-19 pandemic, the client service centre has committed to ensuring that the quality and timeliness of its services to its global clients are not compromised. Requests and queries were properly tracked and routed to responsible units, and the client service centre leveraged various communication channels and provided globally accessible coverage. The subprogramme has also developed an iNeed dashboard aimed at reporting on compliance against key performance indicators for various services provided to clients.

#### *Lessons learned and planned change*

25G.39 The lesson for the subprogramme was that clients continued to demand high-quality and timely services globally from their service provider, but they also needed to continuously build their technical capacity and adopt innovative analytical tools. In applying the lesson, the subprogramme plans to strengthen its relationships with clients and build capacity for the further expansion of both services and the client base, and further improve customer satisfaction levels. The subprogramme will continue to engage with clients while enhancing the reporting dashboards to strengthen its relationship with and the capacity of its clients.

#### *Expected progress towards the attainment of the objective, and performance measure*

25G.40 This work is expected to contribute to the objective, as demonstrated by an increase in client satisfaction to 96 per cent, as measured through a survey for completed requests (see figure 25G.III).

Figure 25G.III

**Performance measure: number of iNeed tickets and percentage of client satisfaction**

## Legislative mandates

25G.41 The list below provides all mandates entrusted to the subprogramme.

### General Assembly resolutions

41/213	Review of the efficiency of the administrative and financial functioning of the United Nations	75/243	Programme planning
		75/252	Questions relating to the proposed programme budget for 2021
42/211	Implementation of General Assembly resolution 41/213	75/253	Special subjects relating to the proposed programme budget for 2021

## Deliverables

25G.42 Table 25G.3 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 25G.3

**Subprogramme 1: deliverables for the period 2020–2022, by category and subcategory**

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>B. Generation and transfer of knowledge</b>				
<b>Seminars, workshops and training events</b> (number of days)	<b>20</b>	<b>25</b>	<b>20</b>	<b>20</b>

<b>Publications</b> (number of publications)	<b>2</b>	<b>2</b>	<b>2</b>	<b>2</b>
2. Publications on financial statement volumes for UNEP and UN-Habitat	2	2	2	2

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>D. Communication deliverables</b>				
<b>Digital platforms and multimedia content:</b> Quarterly Programme Planning, Finance and Budget Section newsletter.				
<b>E. Enabling deliverables</b>				
<b>Administration:</b> Financial management, including risk management and internal control, preparation and implementation of budgets and other resource proposals; management of posts (creation, extension, abolishment and funding); financial reporting and accounting, including 1,000 donor reports; cash and revenue management; accounting services, including processing for cost recovery; payments, payroll for more than 3,100 staff members, disbursements; guidance and advice on all financial matters; management of after-service health insurance claims for 443 staff and dependant beneficiaries, management of 19,600 grants and resolution of 18,500 requests through the client relationship management system (iNeed tickets).				

## Subprogramme 2

### Human resources management

#### Objective

25G.43 The objective, to which this subprogramme contributes, is to ensure the acquisition, development and retention of a competent, diverse, adaptable and healthy workforce with the highest standards of efficiency and integrity.

#### Strategy

25G.44 To contribute to the objective, the subprogramme will facilitate the recruitment process of personnel for its clients, ensuring fair and competitive recruitment processes. In addition to the direct support provided to clients, the subprogramme will continue to collaborate with United Nations Headquarters and other offices away from Headquarters in the development and refinement of tools and processes to streamline the recruitment process experience for hiring managers and candidates, as well as to assist hiring managers in their evaluation of candidates. The subprogramme will continue its activities of strategic communication to foster greater interest from women and applicants from underrepresented countries. Furthermore, the subprogramme will provide guidance to hiring managers and entities to promote the selection of qualified candidates from the indicated categories.

25G.45 The subprogramme will also continue to develop the skills and competencies of staff members through various training programmes delivered both in-person and virtually (i.e., language programmes, leadership development, coaching, mentoring and skill- and/or career-specific training). By collaborating with other United Nations entities in jointly held training sessions, the subprogramme will also continue its efforts to offer a diversity of training sessions and courses to its clients.

25G.46 The subprogramme will continue to develop content for its internal knowledge platforms among human resources and administrative focal points, both in Nairobi and at outposted duty stations serviced by the Office, in order to ensure consistency of administration with regard to all staff members. Furthermore, the subprogramme will continue its outreach programmes to all staff members through briefings and intranet platforms to ensure that staff are knowledgeable about their benefits and entitlements and the processes by which they are authorized.

25G.47 The subprogramme will continue to deliver a comprehensive health and well-being programme that includes the promotion and awareness of staff members' mental health and physical well-being, health assessments and advice. In addition, the

subprogramme will leverage online courses and available resources at other duty stations, including New York, Vienna and Geneva.

25G.48 The subprogramme plans to support its clients on issues related to COVID-19 by providing support from its Joint Medical Service and its dedicated COVID-19 medical facility through the provision of medical surge and wellness staff to duty stations outside of Nairobi in the form of doctors, nurses and counsellors.

25G.49 The above-mentioned work is expected to result in:

- (a) An increase in the knowledge and skills of staff members;
- (b) A more diverse workforce;
- (c) The ability of client entities to respond to their changing priorities;
- (d) An increase in staff productivity at work.

25G.50 The planned support on issues related to COVID-19 is expected to result in the ensured welfare of staff members and their dependants through the dedicated medical facilities.

## **Programme performance in 2020**

25G.51 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Transfer of administration of the resident coordinator offices to the United Nations Office at Nairobi**

25G.52 Following the transition of the resident coordinator system from the United Nations Development Programme (UNDP) to the United Nations Secretariat effective 1 January 2020, the subprogramme became the global service provider for the administration of the staff members transferring to the Secretariat. Drawing upon the knowledge and years of expertise in staff administration, the subprogramme onboarded 200 international staff members serving in resident coordinator offices around the globe during the course of the year. The resident coordinator system is now the Office's third largest client, and its most diverse geographically, with offices located in 131 countries.

25G.53 The subprogramme also launched the second phase of the transition of staff from UNDP to the United Nations Secretariat, and started, among other substantive transition processes, the administrative migration of eligible locally recruited staff under core special purpose trust fund budgets of all resident coordinator offices. Building on experience from transferring internationally recruited staff members manually within four months, this second phase of the migration was handled as a data conversion rather than a manual conversion in order to improve data accuracy and minimize errors when staff members' personal information was migrated from one enterprise resource planning system to the other. Furthermore, the subprogramme also took over the processing of consultancy and individual contractor contracts for the resident coordinator offices in Africa.

### *Progress towards the attainment of the objective, and performance measure*

25G.54 The above-mentioned work contributed to the objective, as demonstrated by the seamless transition from UNDP to the Secretariat of 465 staff without interrupted services to the staff member (see table 25G.4).

Table 25G.4  
Performance measure

2019 (actual)	2019 (actual)	2020 (actual)
Decision by Member States to transfer the resident coordinator system from UNDP to the United Nations Secretariat	Seamless transition from UNDP to the Secretariat of 73 staff within 4 months (September to December 2019) without disruption of services to the staff member	Seamless transition from UNDP to the Secretariat of 465 staff in less than 3 months (mid-October to end of December 2020) without disruption of services to the staff member

## Planned results for 2022

25G.55 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### Result 1: timely recruitment of consultants/individual contractors for programme delivery<sup>61</sup>

#### Programme performance in 2020

25G.56 The number of contracts for consultants and individual contractors issued to client offices increased from 1,500 in 2015 to more than 2,700 in 2020. To improve service provision, the subprogramme recruited and trained additional staff in the administration and issuance of contracts for consultants and individual contractors, streamlined the processes whereby clients submit requests for service by moving from a shared mailbox to an online system leveraging Unite Self Service (iNeed) and provided monthly training to client offices. In addition, the subprogramme implemented a dashboard on key performance indicators for the recruitment of consultants and individual contractors. The subprogramme receives and administers on average 55–60 requests per week related to this type of administration, for which it provides support to its clients.

25G.57 The above-mentioned work contributed to an increase in the percentage of job openings that met the recruitment timelines to 75 per cent, which exceeded the planned target of 70 per cent reflected in the proposed programme budget for 2020. In addition, the subprogramme reduced the processing time of contracts for consultants and individual contractors from 10 to 7 working days.

#### Proposed programme plan for 2022

25G.58 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to improve the skills of its clients and develop their knowledge of administration and policy regarding consultants and individual contractors. The subprogramme plans to create templates and checklists to assist clients in streamlining such processing, and provide training to clients and its staff with regard to the entire process (see figure 25G.IV).

<sup>61</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 29G)).

Figure 25G.IV

**Performance measure: client job openings that meet recruitment timelines**

(Percentage)

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: enhanced organizational effectiveness through improved onboarding process<sup>62</sup>**

### **Programme performance in 2020**

25G.59 The subprogramme developed and administered a pilot onboarding survey in the first quarter of 2020 for international staff members in the resident coordinator system who received human resources administrative services from the subprogramme. The aim was to identify existing good practices as well as priority development areas that required improvement for the onboarding of new staff (i.e., orientation of new hires). Building on this survey, the subprogramme was to launch a wider scale and ongoing onboarding survey during the calendar year. Owing to the impact of COVID-19, and the subprogramme's requirements to redistribute its resources to address the impact of the pandemic on staff, the survey was not administered to other newly onboarded staff as planned. The subprogramme nevertheless transferred elements of the orientation sessions into online modules and consistently offered them virtually.

25G.60 The above-mentioned work contributed to the implementation of some of the recommendations made by the communications innovations working group and the establishment of key performance indicators for the onboarding process, which met the planned target reflected in the proposed programme budget for 2021.

### **Proposed programme plan for 2022**

25G.61 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will monitor performance against the established performance indicators and make necessary improvements as needed based on the responses received in surveys from newly onboarded staff. Furthermore, the subprogramme will engage in the organization-wide review of staff onboarding processes. The expected progress is presented in the performance measure below (see table 25G.5).

<sup>62</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect. 29G)).

Table 25G.5  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
—	Need identified to enhance the onboarding experience of new staff and improve the effectiveness of the onboarding process. A communications innovation working group was set up to review the process, identify the challenges and make recommendations	Recommendations of the communications innovations working group implemented; key performance indicators for the onboarding process established for 2021	85 per cent client satisfaction rate with the onboarding process	87 per cent client satisfaction rate with the onboarding process

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: portfolio of online learning expanded to global clients

#### Proposed programme plan for 2022

25G.62 In the past years, the United Nations Office at Nairobi has intensified its follow-up with management and individual staff on compliance with the nine online mandatory learning courses, resulting in a significant boost in online participant registrations for self-paced learning. Furthermore, the Office facilitated learning programmes in a primarily in-person classroom attendance mode. With the onset of COVID-19, however, the Office embarked on making its in-person classroom training available as facilitator-led virtual classroom sessions and succeeded in doing so for most of the courses on offer.

#### *Lessons learned and planned change*

25G.63 Identified through the administration of a learning needs assessment, the lesson for the subprogramme was the increasing relevance of and continued need by staff members to access capacity development offerings online in addition to making these courses available to a global client base. In applying the lesson, the subprogramme will consult with clients on their learning needs and reach out and liaise with subprogramme 4 and the Office of Human Resources at Headquarters to develop and deploy new online self-paced courses and facilitate blended instructor-led online courses. The subprogramme will also increase and improve the portfolio of available learning programmes in relation to data analysis and best practices in the use of the corporate productivity suite.

#### *Expected progress towards the attainment of the objective, and performance measure*

25G.64 This work is expected to contribute to the objective, as demonstrated by the increased number of participants in online and virtual instructor-led courses coordinated by the Office (see figure 25G.V).

Figure 25G.V

**Performance measure: annual number of participants in self-paced online learning and virtual classroom activities**

## Legislative mandates

25G.65 The list below provides all mandates entrusted to the subprogramme.

### General Assembly resolutions

58/144	Improvement of the status of women in the United Nations system	72/255	United Nations Common System
63/271	Amendments to the Staff Regulations	73/276	Administration of justice at the United Nations
72/254	Human resources management	73/281	Shifting the management paradigm in the United Nations

## Deliverables

25G.66 Table 25G.6 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 25G.6

**Subprogramme 2: deliverables for the period 2020–2022, by category and subcategory**

### Category and subcategory

#### E. Enabling deliverables

**Administration:** First-level review in administration of justice process (formal and informal); outreach activities, including newsletters on various human resources matters, as well as human resources open days; training on competencies, substantive and technical skills, languages and communications programmes and career development for 5,300 participants; performance management; inter-agency coordination on learning in support of Nairobi-based United Nations entities; administration of tests; health campaigns, including in relation to the mental health strategy; talent acquisition (approximately 300 recruitment actions for staff and 2,000 recruitment actions for consultants annually); classification of close to 300 positions within client programmes and advertisement of job openings; expert advice and guidance on staff selection processes, staff and non-staff hiring; offer management, including when-actually-employed staff; conduct of the annual staff survey on cost of living, maximum rent levels and local salary surveys; staff pay and benefit services; expert advice and guidance on human resources policies to all clients, including on the administration and implementation of the Staff Rules and Regulations, entitlements and benefits, including payroll-related services; administration of workforce, from onboarding to separation of appointment, contracts, benefits and entitlements; medical consultations, advice and awareness programmes, including on mental health, emergency and preparedness, HIV/AIDS, support for pregnancy and breastfeeding and travel; staff counselling services.

## Subprogramme 3

### Support services

#### Objective

25G.67 The objective, to which this subprogramme contributes, is to ensure the efficient, environmentally sound and effective functioning of client offices with regard to conference and facilities management, host country services, asset management, travel and transportation, mail and pouch services, commercial activities and procurement services, as well as archives and records management.

#### Strategy

25G.68 To contribute to the objective, the subprogramme will continue to move towards the provision of sustainable and efficient solutions with a specific focus on the management of waste, energy, water and wastewater, implementing an environmental management system, significantly improving staff awareness through training on environmental sustainability and best practices, and monitoring and auditing as part of the environmental management system process.

25G.69 The subprogramme will continue to help clients with changing workspace needs within a limited office space and with the migration from traditional archiving to more efficient filing and technology-based solutions. The subprogramme also plans to work with client offices in revising office space standards. As the Office moves to a flexible workplace arrangement, all existing available office space will be redesigned to maximize usage while also optimizing working conditions and supporting the operational requirements of each tenant.

25G.70 The subprogramme will focus on expanded digital transport solutions through an integrated platform for better utilization of transport resources, and an efficient distribution between internal and external transport service providers. In addition, the subprogramme will continue to assist, advise and provide regular training to end users of these transport services as well as to the client approvers. The subprogramme has also continued outreach activities through airline and hotel open days to inform clients of the travel services available to them. In addition, the subprogramme ensures immediate and effective travel services, especially leading up to major scheduled meetings, by relocating travel personnel to the client offices to establish on-site travel hubs.

25G.71 The subprogramme will provide client-centric and solution-oriented procurement services to client entities and continuously strive to maximize best value for money with due consideration to whole-life costs and effective international competition, enhanced through extensive geographical outreach and minimized transactional costs.

25G.72 The above-mentioned work is expected to result in:

- (a) The achievement of ISO 14001 certification;
- (b) Improved physical infrastructure and optimized use of space in support of a sustainable, safe and flexible working environment, including installation of outdoor working pods to support indoor/outdoor safe working;
- (c) Efficient and convenient host country services to all clients, including remote service options to keep clients and staff safe;
- (d) Efficient and convenient digitally enabled transport solutions in use by all clients;
- (e) Efficient and convenient procurement services available virtually to all global clients.

## **Programme performance in 2020**

25G.73 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Expanded virtual procurement service for a global client base**

25G.74 In 2020, the subprogramme's clients had large volumes of procurement requirements for their operations in more than 70 countries spread over six continents, including Africa, Asia, Europe and Latin America and the Caribbean, North America and Oceania. By the beginning of 2020, the impact of the global pandemic on the subprogramme's capacity became evident, requiring a more client-oriented approach. From the onset of the outbreak, the subprogramme quickly transitioned its operations from paper-based processes and physical offices to virtual workspaces. The subprogramme instituted an integrated "one-stop" cloud-based (real-time) e-system called "Metrics", developed in-house, that provided access to all clients and procurement staff to requisitioning, operations and programme management services. Metrics, which is accessible from all electronic devices (including telephones) enabled global clients to submit their procurement requests seamlessly and effortlessly (less than two minutes per each requisition). The system also provided clients with a way to track the progress of their procurement action. The subprogramme, leveraging the cloud functionality, transitioned its paper-based processes and record-keeping to digital platforms and quickly embraced and implemented the use of e-signatures. The subprogramme also extensively utilized virtual bid conferences and virtual management of bid receipts and bid openings. This last initiative resulted in a significant improvement in global participation of vendors in online conferences as well as bids, especially from those vendors from developing countries and countries with economies in transition. The shift to a virtual setting enabled the subprogramme to provide an expansive suite of services to remote locations, including to projects in countries/regions with ongoing conflicts. Moreover, the subprogramme proactively conducted market research and outreach to identify potential local and regional vendors in developing countries and countries with economies in transition, which resulted in a measurably high participation of vendors from countries in those economic categories, as the virtual workspace reduced or eliminated the cost of doing business with the United Nations, which in the past had been cited as a barrier or financial burden to these vendors.

### *Progress towards the attainment of the objective, and performance measure*

25G.75 The above-mentioned work contributed to the objective, as demonstrated by the increasing number of transactions with vendors from least developed and developing countries and countries with economies in transition to 3,699 by the end of 2020 (see figure 25G.VI). Furthermore, the above-mentioned initiatives and strategies resulted in increasing the volume of business conducted with local and regional vendors, significantly enhancing competition and resulting in improved best-value outcomes.

Figure 25G.VI

**Performance measure: number of transactions per year with vendors from developed countries versus least developed countries, developing countries and countries with economies in transition**

### Planned results for 2022

25G.76 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

#### Result 1: sustainable architecture/facilities<sup>63</sup>

##### Programme performance in 2020

25G.77 The subprogramme has made improvements to the existing office space and continued to install more energy-efficient and sustainable facilities, thus reducing greenhouse gas emissions. In 2020, the subprogramme implemented sustainable and efficient solutions to improve waste management, reduce energy and water consumption and improve the treatment and reuse of wastewater. For example, the waste sorting station tracks, monitors, sorts and recycles all waste collected from client offices and external areas. Water conservation initiatives were focused on the installation of efficient push taps, water efficient dual flush toilets, aerating showerheads, water spray guns in the kitchens and investigations of water leaks to minimize the use and loss of this important natural resource. The subprogramme also installed new centralized septic tanks, and all wastewater for the compound is treated through the recently renovated oxidation ponds. The subprogramme has also started the replacement of fluorescent lights with light-emitting diode (LED) fittings combined with motion sensors.

25G.78 The ISO 14001 certification process is ongoing but was heavily affected by the COVID-19 pandemic, as it was not possible for the auditors to conduct on-site surveys and training. The subprogramme is focused on the auditing phase, which will help to identify gaps and discrepancies and identify solutions to address reoccurrences.

25G.79 In addition, in 2020 various improvements to convert the current traditional, static workspaces to flexible and agile workspaces were either already completed or

<sup>63</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 29G)).

were ongoing as part of the Office's ongoing capital construction project. Improvements were made in office environments and extended beyond improved energy efficiencies to include improved natural ventilation and natural and artificial light. The subprogramme also implemented sustainable procurement principles focusing on sustainable, locally available and easily maintainable interior finishes, such as furniture. The subprogramme also encouraged a paperless working environment through the promotion of digital working platforms and began a revision of its policies related to archives and records management efficiencies.

25G.80 The above-mentioned work contributed to a 47 per cent reduction in water usage and a 34 per cent reduction in energy consumption, which significantly exceeded the planned targets of a 2 per cent reduction in water consumption and a 2 per cent reduction in energy consumption per person reflected in the proposed programme budget for 2021. Given the limited occupancy of the Office's premises during 2020 owing to the COVID-19 pandemic, water and energy consumption were reduced significantly, far exceeding the targets indicated for 2020, but this is not representative of normal operations, which would be expected to approach 2019 levels by late 2021. Other services, however, such as "hyper-cleaning" and sanitizing, and the installation of glass separators, had to be incorporated as a result of the COVID-19 pandemic.

### Proposed programme plan for 2022

25G.81 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will work to achieve ISO 14001 certification, the replacement of traditional fluorescent lighting in offices with energy-efficient LED fittings, the installation of solar lighting in outdoor circulation areas, including footpaths and car parks, and the installation of additional outdoor working pods not only to improve the working conditions of staff but also to reduce energy use, and will continue the replacement of sanitary fittings with water-saving alternatives (see table 25G.7).

Table 25G.7  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
<ul style="list-style-type: none"> <li>• 80 per cent increase in recycling of office waste</li> <li>• Climate neutrality achieved through offset of emissions (1,707 tons of carbon dioxide) for 2017 data</li> </ul>	<ul style="list-style-type: none"> <li>• 500 tons of carbon dioxide emissions reduced, climate neutrality for 2018 data</li> <li>• Climate neutrality achieved through offset of emissions (2,040 tons of carbon dioxide) for 2018 data</li> </ul>	<ul style="list-style-type: none"> <li>• Climate neutrality continued to be achieved through offset of emissions</li> <li>• 34 per cent reduction in energy consumption due to limited occupancy during 2020</li> <li>• 47 per cent reduction in water consumption due to limited occupancy during 2020</li> </ul>	<ul style="list-style-type: none"> <li>• 5 per cent reduction in carbon dioxide emissions</li> <li>• 8 per cent reduction in energy consumption per person (based on normal resumed occupancy)</li> <li>• 2 per cent reduction in water consumption per person (based on normal resumed occupancy)</li> <li>• Average 150 m<sup>3</sup> of water treated per day (based on</li> </ul>	<ul style="list-style-type: none"> <li>• Continue to offset annual emissions</li> <li>• 4 per cent reduction in energy consumption per person (against 2019 baseline)</li> <li>• 2 per cent reduction in water consumption per person (against 2019 baseline)</li> <li>• ISO 14001 certification</li> </ul>

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
		<ul style="list-style-type: none"> <li>• Estimated half the average 90 m<sup>3</sup> per day of water treated owing to the low occupancy</li> </ul>	normal resumed occupancy)	

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: efficient management of e-waste and construction waste<sup>64</sup>**

### **Programme performance in 2020**

25G.82 Since 2020, the Nairobi compound has been subject to a number of major maintenance projects (e.g., roof waterproofing, glazing replacement, basement refurbishments, car park and road upgrades) which has led and will continue to lead to a higher volume of construction waste. To ensure the efficient management of this unavoidable construction waste, the subprogramme has rolled out two programmes to monitor and track e-waste as well as monitor construction waste from the major maintenance and renovation works scheduled for 2020, including waste resulting from the renovation of basement space to office space, which consisted of concrete walling, old doors and windows, and electrical, lighting and sanitary fittings as well as some metal. E-waste is recycled through public auction sales, and in 2020 a significant quantity was recycled, representing a significant overachievement with regard to the original target set for 2020, predominantly through the disposal through auction of large electrical items, including solar panel batteries and uninterruptible power supply units.

25G.83 The above-mentioned work contributed to the recycling of 34,226 kg of construction waste and the recycling of 9,867 kg of e-waste, which exceeded the planned target of 30,000 kg of construction waste recycled reflected in the proposed programme budget for 2021.

### **Proposed programme plan for 2022**

25G.84 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to ensure that all waste related to construction and major maintenance is recorded by waste type and the disposal method is confirmed with a focus on recyclable disposal methods. All construction contractors will be targeted to comply with these requirements. Public online auctions will be held on a regular basis and extended to all United Nations entities based in Kenya that require efficient and sustainable disposal services, including for e-waste. The expected progress is presented in the performance measure below (see figure 25G.VII).

<sup>64</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect. 29G)).

Figure 25G.VII

**Performance measure: annual quantity of recycled construction waste and e-waste**

(Kilograms)

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

**Result 3: integrated digital transport solution****Proposed programme plan for 2022**

25G.85 The Office has a broad and diverse transport responsibility that includes the provision of staff bus services (morning and evening), taxi, hire car, an out-of-hours shuttle and the management of a fleet of approximately 20 vehicles. These transport services provide efficient travel logistics to a large number of United Nations clients based in Nairobi in order to assist with cost-effective commuting for their staff, which reduces congestion in the area. The provision of transport services to major clients also supports meeting and conference participants and facilitates travel to official events and visits to third-party locations and government offices. All vehicles are provided with service management, fuel, cleaning, monitoring and driver management services. The Office intends to move from the current disparate range of numerous outsourced services to a more efficient consolidated transport service run on a single platform. The move will be gradual, as will the benefits that the Office and all clients (corporate and individual) gain, which will include more efficiency, administrative time savings and client convenience, as well as enhanced customer service through a flexible, reliable and easily accessible mobile application.

*Lessons learned and planned change*

25G.86 The lesson for the subprogramme was that pilot projects conducted for the out-of-hours shuttle and digital taxi transport options proved to be more efficient, providing greater real-time flexibility to staff (using a telephone-based application), with more door-to-door convenience (through vehicles that had smaller configurations), as well as time savings achieved by using shorter routes. Overall, this significantly improved client convenience. There was also time saved on administration, and much-improved client satisfaction regarding the ease of use for all users and approvers of the online and mobile application. In applying the lesson, the subprogramme plans to extend these pilot services to more United Nations clients and to incorporate the staff bus

service as part of the digital transportation solution, providing all staff with a more efficient, convenient and flexible transport solution.

*Expected progress towards the attainment of the objective, and performance measure*

25G.87 This work is expected to contribute to the objective, as demonstrated by the increased accessibility of transportation services available to clients, who are able to request such services through a single and intuitive platform (see table 25G.8).

Table 25G.8

**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
Multiple fragmented third-party transport providers for staff bus, taxi, hire car and out-of-hours shuttle	<ul style="list-style-type: none"> <li>Multiple fragmented third-party transport providers for staff bus, taxi, hire car and out-of-hours shuttle</li> <li>Pilot for digital taxi and shuttle services trialled in 2019</li> </ul>	<ul style="list-style-type: none"> <li>Significantly reduced need for staff or official transportation owing to the COVID-19 pandemic in 2020</li> <li>Roll-out of digital taxi and shuttle services delayed to 2021</li> </ul>	More accessible and convenient taxi and shuttle services available in various ways, including mobile applications	Increased accessibility of transportation services available to clients, who are able to request such services through a single and intuitive platform

**Legislative mandates**

25G.88 The list below provides all mandates entrusted to the subprogramme.

*General Assembly resolutions*

58/263	Report of the Joint Inspection Unit on the revenue-producing activities of the United Nations system	58/277	Report of the Joint Inspection Unit on the management audit review of outsourcing in the United Nations and the United Nations funds and programmes
58/272	Special subjects relating to the proposed programme budget for the biennium 2004–2005, section I, information and communication technology strategy	62/269	Procurement reform
		69/273	Procurement
58/276	Outsourcing practices		

**Deliverables**

25G.89 Table 25G.9 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 25G.9

**Subprogramme 3: deliverables for the period 2020–2022, by category and subcategory***Category and subcategory***E. Enabling deliverables**

**Administration:** Management and maintenance of United Nations-owned land/premises/buildings (140 acres), including its 8 office blocks A–J, 11 office blocks M–X, 8 office blocks for new facilities, for a total of 73 office floors, 14 conference rooms, grounds and other buildings and infrastructure; management of office space, redesign of office layouts and configurations to serve the needs of the United Nations offices, other Secretariat departments and offices of other United Nations entities in Nairobi.

**Logistics:** Receipt and inspection; issuance on average of over 400 laissez-passer and over 16,000 travel requests and other travel documents, travel arrangements for staff and meeting participants; handling of all privileges and immunities for approximately 2,000 entitled staff for 53 United Nations entities subscribed to the host country services provided by the United Nations Office at Nairobi on behalf of the Government of Kenya.

**Procurement:** Planning procurement and sourcing support for the acquisition of goods and services; issuance of over 5,000 purchase orders per year for goods and services.

**Asset management:** Physical verification of 23,000 property records, including assets and equipment in Nairobi, and monitoring of over 33,000 property records for UNEP and UN-Habitat at over 100 outposted locations globally; financial and non-financial inventories, warehousing and disposal.

**Facilities management:** Management of office space and office furniture.

**Transportation:** Shipment of official property, bulk consignments for conferences, and the removal of personal effects and related insurance requirements.

**Mail services:** Mail, pouch, distribution, registry and archiving services.

**Subprogramme 4****Information and communications technology operations****Objective**

25G.90 The objective, to which this subprogramme contributes, is to advance the efficient and effective implementation of client entities' substantive programmes through innovative technology solutions, while maintaining secure, coherent and resilient technology services and infrastructure backbone.

**Strategy**

25G.91 To contribute to the objective, the subprogramme will propose innovative solutions through consultative engagements with the client entities to ensure that their programme objectives and business needs are at the centre of the decisions on information and communications technology (ICT) service offerings and on the implementation of new technologies.

25G.92 The subprogramme will also continue to develop and deploy an innovation process that will offer the capability to test new technologies and solutions to determine their business benefits and feasibility. Given current industry trends, it is imperative to explore and adopt new technologies when they promise to bring business benefits, especially in a reliable, consistent and sustainable manner.

25G.93 The subprogramme also plans to accelerate the adaptation of cloud-based solutions such as Unite Workspace for file system and voice/video collaboration, transform local service desks to mobile service desks, extend the mobile data bundle and provide remote simultaneous interpretation virtual conference solutions to enable

client entities to deliver their mandates and Member States to collaborate. The above-mentioned work is expected to result in:

- (a) Empowered clients that take effective decisions and have access to more timely and responsive services;
- (b) ICT capabilities that are developed through a more integrated planning and prioritization process;
- (c) Client entities' business needs that are fulfilled through an agile implementation of new and innovative technologies;
- (d) Client entities' substantive programmes that are implemented more efficiently and effectively.

## **Programme performance in 2020**

25G.94 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Virtual conferences and town hall meetings**

25G.95 Using the remote working arrangements introduced during the pandemic, the subprogramme coordinated, delivered and supported virtual delegate conferences and client town hall meetings. The subprogramme reprioritized its resources to focus on rapidly introducing new videoconference technologies and remote simultaneous interpretation services. The subprogramme worked closely with the Office of Information and Communications Technology (OICT) to evaluate and introduce remote simultaneous interpretation systems and leverage system contracts to provide the services. In addition, the subprogramme worked to prepare executive offices and delegates by holding multiple dry runs, and then provided live event support and post-event lessons learned, documentation and recordings.

#### *Progress towards the attainment of the objective, and performance measure*

25G.96 The above-mentioned work contributed to the objective, as demonstrated by the availability of 4,512 hours of official videoconference and remote simultaneous interpretation meetings for client entities and Member States. The number of official videoconference and remote simultaneous interpretation meetings doubled compared with previous years, and used technologies such as videoconferencing, remote simultaneous interpretation systems, Unite Teams meetings, live events and WebEx (see figure 25G.VIII).

Figure 25G.VIII

**Performance measure: number of hours of official meetings with videoconference and remote simultaneous interpretation services available**

### Planned results for 2022

25G.97 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### Result 1: the United Nations Office at Nairobi smart office, enabling UNEP and UN-Habitat staff to work securely anywhere at any time<sup>65</sup>

#### Programme performance in 2020

25G.98 The subprogramme implemented technologies to achieve its goal to support its clients' work anywhere and everywhere. It accelerated the adoption of the United Nations cloud-based productivity and collaboration platform (Unite Workspace); shifted clients' desk phones to their computer desktops for calls within the United Nations system using existing licences; provided a connectivity safety net through private partnerships to augment home office Internet connectivity with mobile telephone connectivity; and virtualized the local service desk to support clients through Unite Workspace and "soft IP telephony". When the Nairobi campus switched to remote working modalities, these technologies provided uninterrupted continuity of operations with the campus and a transition to a cloud-connected, green and secure campus supported using virtual means.

25G.99 The subprogramme remained focused and connected to its clients during the pandemic through the establishment of a regular business relationship management programme. Regular engagements were held with clients to understand emerging client ICT requirements, advise on new ICT services and review the quality of their experience when working with the subprogramme during the previous period.

25G.100 The above-mentioned work contributed to achieving 100 per cent cloud-based content for UNEP and UN-Habitat. This exceeded the planned target of 75 per cent reflected in the proposed programme budget for 2020.

<sup>65</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 29G)).

### Proposed programme plan for 2022

25G.101 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to the maintenance of the objective, the subprogramme will focus on providing operational support and maintenance through the timely resolution of client service requests and roll out new features of existing enterprise cloud-based applications to enhance users' virtual experience, collaboration and productivity. This will be done while maintaining a secure, coherent and resilient infrastructure backbone. The expected progress is presented in the performance measure below (see figure 25G.IX).

Figure 25G.IX  
**Performance measure: UNEP and UN-Habitat content on the cloud**  
 (Percentage)

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 2: increased number of innovative solutions<sup>66</sup>

#### Programme performance in 2020

25G.102 The subprogramme has enhanced the knowledge and the skill sets of its staff to support clients with the move to cloud-hosted services, and offered innovative solutions on areas such as Unite Workspace, data services, a connectivity safety net and remote simultaneous interpretation services, which enabled users and Member States to collaborate effectively during the pandemic. The subprogramme also collaborated with OICT at United Nations Headquarters to leverage cloud hosting. In addition, the subprogramme continued to explore new innovative solutions, such as an enterprise active directory, virtual desktop management and an information security dashboard to support the client base.

25G.103 The above-mentioned work contributed to an increase in the number of innovative solutions to seven, which exceeded the target of four reflected in the proposed programme budget for 2021. Furthermore, the introduction of cloud-based solutions has enabled the United Nations Office at Nairobi to shut down many servers and migrate content to enterprise systems, which has resulted in a reduction of the data centre's carbon footprint by 45 per cent. In addition, this contributed to a reduction in

<sup>66</sup> As reflected in the proposed programme budget for 2021 (A/75/6 (Sect. 29G)).

the Office's carbon emissions of approximately 140 tons, contributing to green environmental sustainability.

#### **Proposed programme plan for 2022**

25G.104 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will shift to cloud-based enterprise active directory services to simplify and further secure and harmonize client access to enterprise services. In addition, virtual desktop management services will be deployed and enable the ICT technical team to enforce security policies and software updates of users' computers remotely, independent of their location. Furthermore, the Information and Communications Technology Services in Nairobi will work with OICT to design and implement an information security dashboard to improve security monitoring and compliance. The subprogramme will continue its efforts to adopt cloud-based technologies, reduce the data centre footprint and harmonize ICT network infrastructure to reduce carbon emissions by 10 per cent in 2022. The expected progress is presented in the performance measure below (see figure 25G.X).

Figure 25G.X

**Performance measure: total cumulative number of innovative solutions available to client offices**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the proposed programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

#### **Result 3: access to information and communications technology services by a larger client base**

##### **Proposed programme plan for 2022**

25G.105 The subprogramme, in support of the United Nations development system reform, is committed to contributing to the increased effectiveness of United Nations operations by implementing the business operations strategy 2.0. The subprogramme engaged with the offices and departments of the United Nations Secretariat and United Nations agencies, funds and programmes co-located in Nairobi, offering ICT services both on and off the Nairobi campus. The preparation for and response to the pandemic provided an opportunity to accelerate and further improve the already large portfolio of services offered to clients, making them available anywhere and anytime to support clients' mobile and flexible workplaces.

### *Lessons learned and planned change*

25G.106 The lesson for the subprogramme was that it had the ability and confidence to provide remote office support that enabled existing clients to work from anywhere and everywhere during the pandemic, and to service new client entities such as UNHCR and the resident coordinator offices. The subprogramme has demonstrated its ability and agility to deliver services and support to diverse, geographically dispersed clients. In applying the lesson, the subprogramme will engage with potential clients and offer cloud-based solutions such as remote simultaneous interpretation, Unite Workspace and commonly managed network and Internet services to gain greater effectiveness across the system by fulfilling the goals of the business operations strategy 2.0.

### *Expected progress towards the attainment of the objective, and performance measure*

25G.107 This work is expected to contribute to the objective, as demonstrated by the increased number of clients with access to ICT services provided by the subprogramme (see figure 25G.XI).

Figure 25G.XI

**Performance measure: number of United Nations entities with access to information and communications technology services provided by the subprogramme**

## **Legislative mandates**

25G.108 The list below provides all mandates entrusted to the subprogramme.

### *General Assembly resolutions*

57/304	Information and communication technology strategy	63/269	Information and communications technology, disaster recovery and business continuity for the United Nations: arrangements for the secondary data centre at Headquarters
63/262	Information and communications technology, enterprise resource planning, and security, disaster recovery and business continuity		

## **Deliverables**

25G.109 Table 25G.10 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 25G.10

**Subprogramme 4: deliverables for the period 2020–2022, by category and subcategory***Category and subcategory***E. Enabling deliverables**

**Information and communications technology:** Provision of security for information technology systems and data for 2,600 end users; connectivity services; hosting services; voice, video and data communications services; operation and maintenance of existing and new application systems in a secure environment; technical support to end users; 3,000 information technology equipment items maintained.

## Programme 26

### Internal oversight

### Overall orientation

#### Mandates and background

26.1 The Office of Internal Oversight Services (OIOS) is responsible for assisting the Secretary-General in fulfilling his internal oversight responsibilities in respect of the resources and staff of the Organization through the provision of internal audit, inspection and evaluation, and investigation services. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolutions [48/218 B](#), [54/244](#), [59/272](#), [64/263](#), [69/253](#) and [74/257](#). The Office will continue to maintain its operational independence in carrying out its objectives.

26.2 Through internal audit, the Office examines, reviews and appraises the use of the financial resources of the United Nations in order to guarantee the implementation of programmes and legislative mandates and ascertain compliance of programme managers with the financial and administrative regulations and rules, as well as with the approved recommendations of external oversight bodies; and undertakes performance audits to assess responsiveness to the requirements of programmes and legislative mandates and the effectiveness of the system of internal control of the Organization.

26.3 Through programme evaluations and inspections, the Office evaluates the efficiency and effectiveness of the implementation of the programmes and legislative mandates of the Organization.

26.4 Through investigations, the Office investigates reports of violations of United Nations regulations, rules and pertinent administrative issuances and transmits to the Secretary-General the results of such investigations, together with appropriate recommendations to guide the Secretary-General in deciding on jurisdictional or disciplinary action to be taken.

26.5 The Office may also provide support and advice to management on the effective discharge of their responsibilities and on the implementation of recommendations, and facilitate self-evaluation by programme managers through appropriate methodological support.

26.6 The Independent Audit Advisory Committee continues to provide the Office with advice to strengthen the programme's risk-based planning and budgeting through the use of capacity gap assessments as a basis for identifying the resources needed by the Office to implement its mandate effectively and efficiently.

#### Strategy and external factors for 2022

26.7 In support of the Secretary-General's focus on building a more sustainable and inclusive future and on reforming the Organization to better deliver against this vision, the strategy for 2022 prioritizes the programme's activities in the following areas: (a) the provision of support to Member States on the implementation of the Sustainable Development Goals; (b) the response to the coronavirus disease (COVID-19) pandemic and the lessons learned on United Nations system coherence and business continuity; (c) the implementation of the Secretary-General's reforms of the management, peace and security, and development pillars; (d) the strengthening of organizational culture on the basis of respect, equality and results; and (e) the

implementation of the Secretary-General's strategies on data, gender parity and environmental sustainability.

26.8 Effective engagement with the senior leadership of the Organization will help the programme identify risks to the Organization and provide timely assurance and advice on issues related to the efficient, economical, effective and ethical management of the Organization's resources.

26.9 For 2022, the Office's planned deliverables and activities reflect strengthened approaches that incorporate lessons from the COVID-19 pandemic. Such planned deliverables and activities include oversight assignments that focus on the impact on programme results and outcomes of the United Nations response to COVID-19. Specific examples of such planned deliverables and activities are provided under subprogrammes 1 and 2.

26.10 With regard to cooperation with other entities at the global, regional, national and local levels, the Office coordinates its work with the Board of Auditors and the Joint Inspection Unit, and liaises as appropriate with relevant offices involved in the internal justice system of the Organization.

26.11 With regard to inter-agency coordination and liaison, the Office is a participating member of the Representatives of Internal Audit Services of the United Nations Organizations, the United Nations Representatives of Investigative Services and the United Nations Evaluation Group. The programme cooperates closely with academia through the United Nations System Staff College and the "evaluation practitioners exchange" seminars of the United Nations Evaluation Group, which also involve members of the international and national evaluation communities, including EvalPartners.<sup>1</sup>

26.12 With regard to external factors, the overall plan for 2022 is based on the planning assumption that the Office will have unimpeded access to the Organization's staff and its records and other required information.

26.13 With regard to the COVID-19 pandemic, the programme plan is based on the assumption that the proposed deliverables and activities for 2022 will be feasible to implement. However, if the pandemic were to continue to have an impact on the planned deliverables and activities, they would be adjusted during 2022 within the scope of the overall objectives, strategies and mandates. Any such adjustments would be reported as part of the programme performance information.

26.14 The Office integrates a gender perspective in its operational activities, deliverables and results, as appropriate. Subprogramme 1 assesses gender-related risks and includes appropriate audit coverage. Subprogramme 2 conducts its evaluations in accordance with relevant General Assembly resolutions and in line with United Nations Evaluation Group guidance documents. Subprogramme 3 has developed a gender-responsive, victim-centred methodology for investigations of sexual exploitation and abuse and workplace sexual harassment.

26.15 The Office is committed to pursuing the goals of inclusion and empowerment of persons with disabilities and will report on its performance against the accountability framework contained in the United Nations Disability Inclusion Strategy. In 2022, the Office's work will also cover the Organization's activities to implement the Strategy.

---

<sup>1</sup> EvalPartners, formed by the International Organization for Cooperation in Evaluation and the United Nations, is an innovative partnership whose members are civil society organizations and voluntary organizations for professional evaluation.

26.16 The Office will strive to maintain a working environment that emphasizes responsibility for results and fosters harmony, learning and professionalism. The Office will focus on ensuring that staff are equipped with the knowledge and skills necessary to effectively propose solutions to address risks and gaps in implementing the Secretariat's data, gender parity, environment and disability strategies; the programmatic integration of the COVID-19 response; and the increased delegation of authority to the field with improved focus on results. This will translate, for example, to the strengthening of the generic job profiles for auditors with the inclusion of a requirement for data analytics skills. OIOS will also enhance methodological guidance for thematic and outcome evaluations of programmes, including for peacekeeping components, and finalize guidance to incorporate COVID-19 response and lessons learned into evaluation designs. The Office will also incorporate the implementation of gender parity, environmental concerns and disability inclusion into all relevant oversight activities. Subprogramme 3 will strengthen the use of data that is readily available to inform investigation planning. In addition, using the web-based, analytical functionality of TeamMate, the programme will strengthen its communication and reporting capacity with regard to following up on recommendations.

## **Programme performance in 2020**

### **Impact of COVID-19 on programme delivery**

26.17 During 2020, the COVID-19 pandemic had an impact on the planned deliverables and activities of the Office. The Office had to remotely implement oversight activities that are normally undertaken in person or accomplished through direct observation. It also had to cancel or postpone several planned internal audit and evaluation assignments. Specific examples of the impact are provided under each of the three subprogrammes. The change in approach and the postponement and cancellation of planned deliverables and activities also had an impact on the expected results for 2020, as described in the programme performance under subprogrammes 1 and 2.

26.18 At the same time, however, the Office identified new activities and modified planned activities within the overall scope of the objectives of the programme, in order to support entities on issues emerging during the COVID-19 pandemic. Those modifications included, for example: additional advisory services to support risk assessments in response to COVID-19 for field missions; support at Headquarters for the Department of Operational Support in the pre-audit of emergency procurement related to COVID-19; and support for the Organization generally by providing a theory of change in support of the COVID-19-related risk assessment. A summary of these activities is provided under subprogrammes 1 and 2.

26.19 Reflecting the importance of continuous improvement, and as part of its efforts to build back better, the programme will mainstream lessons learned and best practices related to the adjustments to and adaptation of its programme owing to the COVID-19 pandemic. Specific examples and lessons learned include the critical need for the programme to further its knowledge of, and effective access, to the information and communications technology (ICT) systems and data that the Office relies on to perform its function. The programme plans to develop the OIOS data strategy to strengthen its organizational resilience to disruptions and ensure business continuity.

## Legislative mandates

26.20 The list below provides all mandates entrusted to the programme.

### General Assembly resolutions

48/218 B	Review of the efficiency of the administrative and financial functioning of the United Nations	61/275	Terms of reference for the Independent Audit Advisory Committee and strengthening the Office of Internal Oversight Services
60/1	2005 World Summit Outcome		
61/245	Comprehensive review of governance and oversight within the United Nations and its funds, programmes and specialized agencies	74/257	Review of the implementation of General Assembly resolutions 48/218 B, 54/244, 59/272, 64/263 and 69/253

## Deliverables

26.21 Table 26.1 lists all cross-cutting deliverables, by category and subcategory, for the period 2020–2022.

Table 26.1

### Cross-cutting deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	2	2	2	2
1. Report on the activities of the Office of Internal Oversight Services (Part I)	1	1	1	1
2. Report on the activities of the Office of Internal Oversight Services (Part II)	1	1	1	1
<b>Substantive services for meetings</b> (number of three-hour meetings)	37	18	19	31
3. Meetings of the Fifth Committee	8	8	8	8
4. Meetings of the Committee for Programme and Coordination	21	4	3	17
5. Meetings of the Advisory Committee on Administrative and Budgetary Questions	4	2	4	2
6. Meetings of the Independent Audit Advisory Committee	4	4	4	4
<b>B. Generation and transfer of knowledge</b>				
<b>Seminars, workshops and training events</b> (number of days)	—	3	4	2
7. Training on the Office of Internal Oversight Services recommendation monitoring system	—	3	4	2
<b>Publications</b> (number of publications)	2	1	2	1
8. Semi-annual report to the Secretary-General	2	1	2	1
<b>C. Substantive deliverables</b>				
<b>Consultation, advice and advocacy:</b> expert advice to management on cross-cutting issues related to governance, risk management and control, as well as the results of oversight activities.				
<b>Databases and substantive digital materials:</b> maintenance of a comprehensive database and dashboard for monitoring the status of implementation of the approximately 1,000 open recommendations of the Office.				
<b>D. Communication deliverables</b>				
<b>Outreach programmes, special events and information materials:</b> content on communications platforms, briefings and presentations on oversight activities.				

## **Evaluation activities**

26.22 While OIOS is not evaluated, its subprogrammes follow internal oversight professional requirements to complete an external quality assessment every five years at a minimum.

## **Programme of work**

### **Subprogramme 1**

#### **Internal audit**

#### **Objective**

26.23 The objective, to which this subprogramme contributes, is to improve the efficiency, economy, effectiveness and impact of the Organization's programmes, in keeping with best management practices.

#### **Strategy**

26.24 To contribute to the objective, the subprogramme will conduct internal audit activities to recommend improvements to key controls and processes and identify accountability issues. In 2022, particular attention will be given to how COVID-19 has influenced changes in key controls and processes.

26.25 The subprogramme will further focus on work with the Department of Management Strategy, Policy and Compliance to provide advice on the implementation of the recommendations emerging from the review of the United Nations Secretariat accountability system, which the subprogramme conducted jointly with subprogramme 2. This review will provide context for several other activities of the subprogramme to cover entity performance with regard to the implementation of delegated authority and the implementation of statements of internal control, for example.

26.26 The subprogramme will strive to apply best-practice audit techniques and strengthen its capacity to use ICT systems and data, drawing from lessons learned in 2020 during the COVID-19 pandemic. The launch of an enhanced web-based audit management system will continue to strengthen the audit management process and facilitate the monitoring of recommendations. The subprogramme will also apply the findings of the 2020 self-assessment on the relevant internal audit standards, including by improving the risk assessment methodology and its documentation methods. It will strengthen work planning processes to ensure that United Nations cross-cutting priority areas are mainstreamed into internal audit assignments and increase the use of data analytics to monitor workplan implementation in a dynamic environment. In addition, it plans to commission an external quality assessment according to internal oversight professional requirements.

26.27 The above-mentioned work is expected to result in the increased efficiency, economy and effectiveness of the work of the Organization and greater impact on results.

## **Programme performance in 2020**

26.28 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Strengthened internal control framework for sustained performance and enhanced transparency of the Organization**

26.29 Through the conduct of internal audits, the subprogramme aimed at strengthening governance, risk management and control processes in entities and areas covered by the 2020 internal audit workplan. The subprogramme issued 93 audit reports and advisory memorandums to programme managers containing 377 recommendations. They included: 27 reports for entities under the regular budget; 30 for entities funded by the support account for peacekeeping operations; and 36 for entities that receive extrabudgetary funding (including 17 for the Office of the United Nations High Commissioner for Refugees (UNHCR) and 7 for the United Nations Joint Staff Pension Fund).

26.30 Governance systems are key controls for sustained performance and enhanced transparency in mandate implementation. In 2020, audits conducted by the subprogramme covered activities in the areas of governance mechanisms and related processes in the Office of Investment Management of the United Nations Joint Staff Pension Fund (as requested by the General Assembly), and, in the Secretariat, those related to procurement and supply chain management, data protection and privacy, and document management systems. For the latter audits, recommendations aimed at strengthening governance processes, such as guidance for business continuity for unforeseen situations (e.g., COVID-19). Other audited areas included the initial response by the African Union-United Nations Hybrid Operation in Darfur (UNAMID) and the United Nations Organization Stabilization Mission in the Democratic Republic of the Congo (MONUSCO) to the COVID-19 pandemic.

26.31 Directly related to the strengthening of the Secretariat's internal control framework, the subprogramme, at the request of the Department of Management Strategy, Policy and Compliance, provided advice on the design of the statements of internal control in the areas of procurement, human resources and logistics, and of the self-assessment checklist on performance reporting to be completed by entities.

#### *Progress towards the attainment of the objective, and performance measure*

26.32 The above-mentioned work contributed to the objective, as demonstrated by the implementation of 39 per cent of recommendations to address risks related to internal control by their target date (see figure 26.I).

Figure 26.I

**Performance measure: percentage of recommendations to address risks related to internal control implemented by target date**

*Note:* Not including advisory memorandums or other advice provided to entities.

### **Impact of COVID-19 on subprogramme delivery**

26.33 Owing to the impact of COVID-19 during 2020, the subprogramme changed its internal audit approach and cancelled or postponed a number of deliverables. The subprogramme was able to conduct audit activities remotely, but the activities took longer to complete as not all documents were available electronically. While OIOS was able to maintain access to staff through videoconferencing, the access was not of the same quality as in-person interactions. Physical verifications, the assessment of soft controls and the assessment of ICT infrastructures were difficult to implement. The constraints resulted in the cancellation of 53 planned deliverables. These changes had an impact on the programme performance in 2020, as specified in result 2 below.

26.34 At the same time, however, the subprogramme identified 24 additional activities to support departments on issues emerging during COVID-19, within the overall scope of its objectives. New assignments related to the impact of COVID-19 were added, including a review of management actions to ensure business continuity and staff well-being for peacekeeping operations; advisory services in the areas of supply chain management, cash-based interventions and the remote monitoring of implementing partners for UNHCR; and a pre-audit of COVID-19-related emergency procurement in support of the Department of Operational Support.

### **Planned results for 2022**

26.35 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

#### **Result 1: a strengthened second line of defence for enhanced compliance and risk management in the Organization<sup>2</sup>**

##### **Programme performance in 2020**

26.36 In line with its mandate, the subprogramme conducted audits and made recommendations to strengthen centralized, business-enabling functions within the Secretariat. In 2020, the subprogramme focused on efforts by the Department of Management Strategy, Policy and Compliance, the Department of Operational Support, the Department of Safety and Security and the Office of Information and Communications Technology to strengthen risk management, internal control and accountability functions, including data management and the monitoring of delegation of authority.

26.37 The above-mentioned work contributed to 15 per cent of accepted audit recommendations directed to the Secretariat departments performing centralized, business-enabling functions, which exceeded the planned target of 12 per cent reflected in the proposed programme budget for 2020.

##### **Proposed programme plan for 2022**

26.38 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to progress towards the objective, the subprogramme plans to undertake audits in eight entities with a focus on the effectiveness of data and ICT systems management to ensure successful implementation of the delegation of authority system. The expected progress is presented in the performance measure below (see figure 26.II).

<sup>2</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 30)).

Figure 26.II

**Performance measure: percentage of annual accepted audit recommendations directed to the Secretariat departments performing centralized, business-enabling functions**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: increased impact through more relevant and timely action by programme managers to implement audit recommendations<sup>3</sup>**

### **Programme performance in 2020**

26.39 The subprogramme strengthened its recommendation process to ensure that the Office formulates recommendations that clearly address the risks and causes of underperformance, so that programme managers understand the rationale and criticality of these recommendations and implement them without undue delay. As an internal performance indicator, the subprogramme set itself a target to assess whether its recommendations had more immediate impact on action by programme managers, aiming for at least 85 per cent of all recommendations to be implemented within 24 months of issuance.

26.40 The above-mentioned work contributed to the implementation (closure) of 70 per cent of recommendations within 24 months, which did not meet the planned target of 85 per cent reflected in the programme budget for 2021. The lower-than-expected performance is attributed in part to the COVID-19 pandemic, which slowed the follow-up on the implementation of recommendations.

### **Proposed programme plan for 2022**

26.41 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will formulate recommendations that are useful and actionable within a reasonable period and will continue to work with management towards their expeditious implementation. The expected progress is presented in the performance measure below (see figure 26.III).

<sup>3</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

Figure 26.III

**Performance measure: percentage of recommendations implemented (closed) within 24 months**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: strengthened data governance for enhanced performance and accountability of the Organization**

#### **Proposed programme plan for 2022**

26.42 In 2020 and 2021, the subprogramme conducted assurance and advisory service activities in the areas of data classification, handling and protection, and documents management, covering most Secretariat entities, including peacekeeping operations. Some of this work supports the development of policies for data governance in the Secretariat.

#### *Lessons learned and planned change*

26.43 The lesson for the subprogramme was that efforts made by the subprogramme to enhance its capacity to audit areas such as data governance has proved essential to providing internal audit support in areas such as business continuity and crisis management, and to quickly adjusting programmes to sustain core mandates and goals during the COVID-19 pandemic. It also allowed the subprogramme to meaningfully contribute to the development of the policies for data governance in the Secretariat by providing detailed assessments of the internal data management practices of Secretariat entities. In applying the lesson, the subprogramme will intensify its efforts to address identified areas of higher risk and provide recommendations to further increase data governance for the enhanced performance and accountability of the Organization. The subprogramme will focus its audits on topics such as the management of the privacy, availability, usability, security and integrity of data in support of the Data Strategy of the Secretary-General for Action by Everyone, Everywhere, and to contribute to the Organization's resilience to external shocks.

#### *Expected progress towards the attainment of the objective, and performance measure*

26.44 This work is expected to contribute to the objective, as demonstrated by an implementation rate of 85 per cent of audit recommendations that strengthen data governance in the Organization (see figure 26.IV).

Figure 26.IV

**Performance measure: percentage of implemented audit recommendations issued in a given year that strengthen data governance in the Organization**

### Legislative mandates

26.45 The list below provides all mandates entrusted to the subprogramme.

#### General Assembly resolutions

67/244 B	Financing of the International Residual Mechanism for Criminal Tribunals	75/247	Report on the activities of the Office of Internal Oversight Services
72/266 B	Shifting the management paradigm in the United Nations		

### Deliverables

26.46 Table 26.2 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 26.2

#### Subprogramme 1: deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>A. Facilitation of the intergovernmental process and expert bodies</b>				
<b>Parliamentary documentation</b> (number of documents)	1	1	1	–
1. Audit of the governance arrangements in the Office of Investment Management of the United Nations Joint Staff Pension Fund (resolution 74/263)	1	1	–	–
2. Biennial report on procurement, with a focus on demand and source planning of goods in peacekeeping missions (resolution 72/266 B), incorporating the implementation of post-employment restrictions of staff involved in the procurement process (resolution 74/256)	–	–	1	–
<b>B. Generation and transfer of knowledge</b>				
<b>Publications</b> (number of publications)	150	93	150	150
3. Internal audit reports (assurance and advisory)	150	93	150	150

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
--------------------------	-----------------	----------------	-----------------	-----------------

### C. Substantive deliverables

**Consultation, advice and advocacy:** expert advice to management on issues related to oversight activities in coordination with other oversight bodies through bilateral and tripartite meetings with the Joint Inspection Unit and the Board of Auditors.

## Subprogramme 2 Inspection and evaluation

### Objective

26.47 The objective, to which this subprogramme contributes, is to strengthen relevance, efficiency, effectiveness and impact in the implementation of programmes and legislative mandates of the Organization, and improve decision-making, accountability and learning.

### Strategy

26.48 To contribute to the objective, the subprogramme will focus on substantive outcomes achieved at the subprogramme level by Secretariat entities under the peace and security, sustainable development, human rights, and humanitarian work pillars. In the conduct of its evaluations, the subprogramme will integrate the Secretary-General's strategies on gender, environmental sustainability and data, and also take into consideration the impact of COVID-19 on programme performance for mandate implementation.

26.49 The subprogramme will continue to refine its methodology and develop appropriate evaluation design and data collection techniques for enhanced programme evaluation. In support of the Secretary-General's management reform, which called for the strengthening of Secretariat evaluation capacity, the subprogramme plans to provide ongoing and regular methodological guidance and capacity-building support to Secretariat entities, and to the wider Organization, in partnership with the Department of Management Strategy, Policy and Compliance. The subprogramme will also support system-wide evaluation through collaboration with the Executive Office of the Secretary-General. Regular tripartite and bilateral consultation with the Joint Inspection Unit and the Board of Auditors will continue to enhance the synergies between the work plan of the subprogramme with those of the other oversight bodies. The subprogramme plans to complete subprogramme evaluations of three regional commissions and evaluations of the coordination function of the Office for the Coordination of Humanitarian Affairs and the resident coordinator system, as well as one thematic evaluation where the theme remains to be determined. The subprogramme will also start the Security Council-mandated evaluation of the methods and work of the International Residual Mechanism for Criminal Tribunals in 2021, for the Council's review in 2022.

26.50 The subprogramme will participate in the annual evaluation practitioners exchange seminars of the United Nations Evaluation Group, which often involve members of academia and the international and national evaluation communities, including EvalPartners. The United Nations Evaluation Group is also developing an evaluation certificate programme, in partnership with academia, through its working group on the professionalization of evaluation. As part of its strategy to strengthen Secretariat evaluation, the subprogramme will work with the Department of Management Strategy, Policy and Compliance to develop and implement a Secretariat

evaluation training programme in partnership with the United Nations System Staff College.

26.51 The above-mentioned work is expected to result in:

(a) Increased learning and accountability of departments and offices towards achieving the planned outcomes of their programmes of work at the subprogramme level and drawing upon lessons learned, particularly during the COVID-19 pandemic;

(b) Strengthened evaluation capacity and performance, and greater use of evaluation results to inform programme planning within the Organization.

## **Programme performance in 2020**

26.52 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Strengthened learning culture in the Organization**

26.53 The subprogramme developed new knowledge products that utilized previously collected evaluation data for the preparation of evaluation synthesis reports and guidance. These synthesis reports facilitated organizational learning by sharing trends and insights. The evaluation synthesis report on the organizational culture of the United Nations was issued in June 2020. In the report, issues of importance to senior leaders were highlighted, including, for example, the need to strengthen: (a) monitoring and evaluation; (b) strategic thinking to achieve outcomes; (c) communication and knowledge-sharing; (d) Headquarters/field integration; and (e) gender mainstreaming through equal professional opportunities for all staff, and the need to give due consideration to gender issues at the policy and operational levels. Work was also initiated on a synthesis report on coordination and another on strategic planning, for completion in first quarter of 2021.

26.54 The subprogramme produced a synthesis of United Nations guidelines for evaluation under COVID-19 from guidelines issued by the evaluation offices of the United Nations Development Programme, the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women), the World Food Programme, the United Nations Population Fund, the International Labour Organization, the United Nations Children's Fund, the United Nations Office on Drugs and Crime (UNODC), UNHCR, the Food and Agriculture Organization of the United Nations, the World Bank, and the Organisation for Economic Co-operation and Development. This fed into the development of a protocol for the assessment of the response to COVID-19 as guidance for Secretariat evaluation functions.

26.55 Using a "theory of change" approach, the subprogramme developed a detailed analysis and diagram of the cause and effect chain of United Nations response to COVID-19 as a contribution to the risk assessment work of subprogramme 4 of the Department of Management Strategy, Policy and Compliance and as an input to a draft evaluation on early lessons and the evaluability of the United Nations COVID-19 response and recovery multi-partner trust fund being undertaken by the Executive Office of the Secretary-General.

### *Progress towards the attainment of the objective, and performance measure*

26.56 The above-mentioned work contributed to the objective, as demonstrated by increased learning on trends and good practices through cross-departmental evaluation synthesis reports and common standards on evaluating the response to the COVID-19 pandemic for the United Nations Secretariat (see table 26.3).

Table 26.3  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)
<ul style="list-style-type: none"> <li>• Organizational learning on trends and good practices through targeted programme evaluations</li> </ul>	<ul style="list-style-type: none"> <li>• Organizational learning on trends and good practices through targeted programme evaluations</li> </ul>	<ul style="list-style-type: none"> <li>• Increased learning on trends and good practices through cross-departmental evaluation synthesis reports</li> <li>• Common standards on evaluating the response to COVID-19 for the United Nations Secretariat</li> </ul>

### Impact of COVID-19 on subprogramme delivery

26.57 Owing to the impact of COVID-19 during 2020, the subprogramme had to postpone the completion of two peacekeeping evaluation reports to 2021. As the Organization adjusted to the new norm of working under COVID-19, the subprogramme resumed its oversight work with the launch of new evaluation assignments in the fourth quarter. The impact of the delayed start of new evaluation assignments meant that all the evaluation outputs that would normally have been completed by March 2021 will be delayed to the last quarter of 2021. The delay will reduce the number of evaluations available for review by the Committee for Programme and Coordination and the General Assembly in its consideration of Secretariat programme performance and design.

26.58 At the same time, however, the subprogramme identified new activities within the overall scope of its objectives. With the onset of COVID-19 in March 2020, and with the demands that the pandemic placed on Secretariat entities, the subprogramme focused on innovation and the development of new products. The new and modified deliverables and activities contributed to results in 2020, as specified in the emerging result for 2020 above.

### Planned results for 2022

26.59 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### Result 1: focused evaluation for improved decision-making on United Nations reform and matters relating to the Sustainable Development Goals<sup>4</sup>

#### Programme performance in 2020

26.60 In 2020, the subprogramme planned to provide more evaluative evidence on the outcomes of the United Nations reform initiatives and efforts to support the achievement of the Sustainable Development Goals. Towards this end, the subprogramme increased the focus of its evaluations on these two areas.

26.61 The subprogramme provided evaluation oversight of reform initiatives through its evaluations of the new Department of Political and Peacebuilding Affairs, and through an advisory engagement in support of the new Development Coordination

<sup>4</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 30)).

Office and the resident coordinator system. It also completed an inspection of the evaluation function of UN-Women in support of management reform efforts to strengthen evaluation.

26.62 The subprogramme evaluated Secretariat entities that had roles in supporting Member States with regard to the implementation of the 2030 Agenda for Sustainable Development, including the Department of Economic and Social Affairs; the Office of the High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States; UNODC; the New Partnership for Africa's Development through the Office of the Special Adviser on Africa; the Economic Commission for Africa (ECA); and the Department of Global Communications. In addition, in response to a request of the Security Council, the subprogramme also evaluated the methods and work of the International Residual Mechanism for Criminal Tribunals. In accordance with standard practice, the Office initiated post-evaluation surveys on the quality of the evaluation reports.

26.63 The above-mentioned work contributed to the adoption of a structured approach to the evaluation of United Nations reform and matters relating to the Sustainable Development Goals in the seven assignments planned, and supported decision-making for nine Secretariat entities, which met the planned target reflected in the proposed programme budget for 2020.

#### **Proposed programme plan for 2022**

26.64 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will conduct 13 evaluations and inspections of Secretariat programmes and cross-cutting themes, focusing on assessing the achievement of subprogramme outcomes under the peace and security, sustainable development, human rights, and humanitarian work pillars. The expected progress is presented in the performance measure below (see table 26.4).

Table 26.4

#### **Performance measure**

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Ad hoc evaluations for decision-making on United Nations reform and matters relating to the Sustainable Development Goals:	Initiation of dialogue among programme managers on evaluation of United Nations reform and matters relating to the Sustainable Development Goals	The adoption of a structured approach to evaluations of United Nations reform and matters relating to the Sustainable Development Goals in the seven assignments planned in support of decision-making for nine Secretariat entities	Higher percentage of all inspection and evaluation recommendations accepted by programme managers, and timelier implementation	100 per cent of inspection and evaluation recommendations accepted by programme managers
• Office for Disarmament Affairs	• United Nations Environment Programme

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
		Preparedness for implementation of the Sustainable Development Goals		

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: enhanced contribution to strengthened relevance, efficiency, effectiveness and impact of Secretariat evaluations<sup>5</sup>**

### **Programme performance in 2020**

26.65 In the peace and security pillar, the subprogramme initiated its planned evaluations of: (a) political affairs in peacekeeping operations; (b) MONUSCO support to rule of law and security institutions in the Democratic Republic of the Congo; (c) the contribution of the United Nations Multidimensional Integrated Stabilization Mission in Mali to the return, restoration and extension of State authority in the rule of law area and the fight against impunity in northern and central Mali; and (d) a thematic evaluation of women and peace and security issues in peacekeeping. In the development pillar, the subprogramme has begun its planned evaluations of: (a) ECA – with a focus on the subprogramme on macroeconomic policy; (b) the Economic Commission for Latin America and the Caribbean – with a focus on the subprogramme on macroeconomic governance; and (c) the coherence of United Nations country-level programming in support of the 2030 Agenda (for the Development Coordination Office). The inception phases of evaluation work in both pillars include: undertaking preliminary research; coordinating with internal and external oversight entities; scoping work, which includes risk and evaluability assessments; stakeholder analyses; developing the theory of change through close consultations with entity management focal points and stakeholder representatives; and drafting the inception paper, which includes the overall evaluation design and detailing of evaluation methods and sources for data.

26.66 In addition, the subprogramme produced 26 advisory notes, memorandums and guidance to support entity decision-making and the learning of lessons, including notes to the Department of Economic and Social Affairs, ECA, the Office of the Special Adviser on Africa, the United Nations Relief and Works Agency for Palestine Refugees in the Near East, the Department of Global Communications, the Office of the High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States and the Development Coordination Office and disaggregated mission-level survey results for 13 peacekeeping missions.

26.67 The subprogramme continued its work on strengthening the Secretariat's evaluation capacity and coverage through the development of its biennial report on strengthening the role of evaluation and the application of evaluation findings on programme design, delivery and policy directives, and an evaluation dashboard to accompany it, and through support for the Secretary-General's evaluation policy. In 2020, the subprogramme also provided methodological support to the evaluation office of the Office of Counter-Terrorism for its evaluation of the United Nations Counter-Terrorism Centre, and provided methodological advice and tools for evaluation to special political missions and peacekeeping missions.

26.68 The above-mentioned work contributed to an implementation rate of 47 per cent of recommendations within the indicated time frame of 24 month, which

<sup>5</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

did not meet the planned target of 85 per cent reflected in the programme budget for 2021. This was due in part to the closure of a large number of old recommendations in 2020, and to the impact of the new timeline of 24 months for implementation of recommendations, versus the previous timeline of 36 months. In 2021, the subprogramme is to provide methodological and other support to five entities of the Secretariat so that they achieve acceptable quality standards for evaluation.

### **Proposed programme plan for 2022**

26.69 The subprogramme will continue the work related to the planned result, in line with its mandate. In 2022, it plans to submit to the Committee for Programme and Coordination and the General Assembly the seven evaluations referred to in paragraph 26.65 above. It will continue and complete work on the following evaluations: (a) macroeconomic policy, poverty reduction and financing development in the Economic and Social Commission for Asia and the Pacific; (b) shared economic prosperity in the Economic and Social Commission for Western Asia; (c) coordination of humanitarian action and emergency response in the Office for the Coordination of Humanitarian Affairs; (d) economic cooperation and integration in the development pillar in the Economic Commission for Europe; (e) the resident coordinator system; and (f) results-based budgeting components, to be determined, of the United Nations Multidimensional Integrated Stabilization Mission in the Central African Republic, the United Nations Mission in South Sudan, either the United Nations Interim Security Force for Abyei or the United Nations Interim Force in Lebanon, the United Nations Mission for the Referendum in Western Sahara, and a fifth mission, as well as a thematic topic to be determined. The subprogramme will also complete the Security Council-mandated evaluation of the methods and work of the International Residual Mechanism for Criminal Tribunals, for the Council's review in 2022. The expected progress is presented in the performance measure below (see figure 26.V).

Figure 26.V

**Performance measure: percentage of recommendations closed within 24 months**

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: strengthened evaluation function in the Secretariat for a more relevant, efficient and effective United Nations**

#### **Proposed programme plan for 2022**

26.70 Robust evaluation promotes accountability, learning and evidence-based decision-making to strengthen the overall performance of the United Nations in

achieving results. Since 1994, the subprogramme has issued a biennial report on strengthening the role of evaluation and the application of evaluation findings on programme design, delivery and policy directives, and an evaluation dashboard to accompany it, which provides an analysis of the performance and independence of the evaluation function in the Secretariat. Pinpointing avenues to further strengthen evaluation capacity in the Secretariat has been identified by the Secretary-General as critical to the successful implementation of the various United Nations reform initiatives. Therefore, in its most recent biennial report, the subprogramme increased the number of entities assessed.

*Lessons learned and planned change*

26.71 The lesson for the subprogramme was that it needed to increase its efforts to support evaluation arrangements throughout the Secretariat to improve the Organization's evaluation function. Another key finding of the latest biennial report was that evaluation practice remains highly uneven across the Secretariat, with meaningful practice limited to just a handful of entities with established functions and dedicated resources (mostly under the development and human rights pillars) and are largely project-focused and donor-driven. There was marginal, or non-existent, evaluation practice in most entities in the peace and security and management and support areas. Subprogramme evaluation by programme managers, as required by the Secretary-General's bulletin on the Regulations and Rules Governing Programme Planning, the Programme Aspects of the Budget, the Monitoring of Implementation and the Methods of Evaluation ([ST/SGB/2018/3](#)), was limited across the Organization. The lack of evaluation capacity-building and technical support for the development of evaluation functions and strengthening the culture of evaluation across the Organization remained critical gaps. In applying the lesson, the subprogramme plans to utilize this information and coordinate with the Department of Management Strategy, Policy and Compliance and the evaluation functions of other entities to strengthen its support, guidance and tools for the conduct of high-quality evaluations across the Secretariat, including guidance for gender and human rights responsive evaluation methodologies, and promote the integration of essential elements of evaluation (e.g., evidence, independence, learning, adapting) into existing reviews and assessments. It will also coordinate and support the organization of evaluation training for staff, programme managers and senior leadership in order to further strengthen evaluation capacities in the Secretariat. The subprogramme will enhance the way that it assesses evaluation capacity in the Organization, focused on the following criteria: the existence of a dedicated evaluation arrangement or focal point; the development of an entity-specific evaluation policy; and an evaluation workplan.

*Expected progress towards the attainment of the objective, and performance measure*

26.72 This work is expected to contribute to the objective, as demonstrated by the increased percentage of entities that meet at least 80 per cent of the performance criteria assessed in the OIOS biennial report on strengthening the role of evaluation and the application of evaluation findings on programme design, delivery and policy directives (see figure 26.VI).

Figure 26.VI

**Performance measure: percentage of entities meeting at least 80 per cent of the performance criteria assessed in the biennial report on strengthening the role of evaluation and the application of evaluation findings on programme design, delivery and policy directives**

*Note:* These assessments exclude OIOS. Baseline data will be established from 2021.

## Legislative mandates

26.73 The list below provides all mandates entrusted to the subprogramme.

### General Assembly resolutions

60/254	Review of the efficiency of the administrative and financial functioning of the United Nations	72/266 A and B	Shifting the management paradigm in the United Nations
		75/243	Programme planning

## Deliverables

26.74 Table 26.5 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 26.5

### Subprogramme 2: deliverables for the period 2020–2022, by category and subcategory

<b>Consultation, advice and advocacy:</b> advisory notes, memorandums and guidance provided to all Secretariat entities.				

## Subprogramme 3 Investigations

### Objective

26.75 The objective, to which this subprogramme contributes, is to enhance accountability and ethical behaviour within the Organization.

### Strategy

26.76 To contribute to the objective, the subprogramme will investigate reports of possible violations of United Nations regulations, rules and pertinent administrative policies. The subprogramme plans to support the efforts to systematize prevention and response to sexual misconduct, including sexual exploitation and abuse, as well as sexual harassment. It will continue to enhance capacity in combating fraud and corruption, especially medical insurance fraud. In addition, the subprogramme will focus on diversifying the composition of its staff by reaching out to professional networks to attract interested and well-qualified candidates with different backgrounds.

26.77 The subprogramme will continue to coordinate with other United Nations oversight bodies such as the Joint Inspection Unit and the Board of Auditors, and participate in the United Nations System Chief Executives Board for Coordination Task Force on Addressing Sexual Harassment within the Organizations of the United Nations System, in particular the subgroup on improving the investigation of sexual harassment. In addition, it plans to commission an external quality assessment according to the internal oversight professional requirements.

26.78 The above-mentioned work is expected to result in decisions made by the Secretary-General and his delegates on jurisdictional or disciplinary actions or corrective measures, as well as improved accountability for misconduct.

## Programme performance in 2020

26.79 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### Increased ability of the Organization to address reported misconduct

26.80 While the subprogramme saw a temporary decline in the intake of new reports of misconduct between March and May 2020, an upsurge in reporting was seen in June 2020, with a subsequent return to pre-pandemic levels of reporting noted in the final quarter of 2020. The subprogramme maintained its focus on the organizational priorities related to sexual harassment, sexual exploitation and abuse,

retaliation, and fraud and corruption. Reporting of misconduct to OIOS remained high despite the pandemic, reflecting continued trust in the reporting mechanisms. Medical insurance fraud and fraud by implementing partners were confirmed as high-risk areas. In this context, the subprogramme achieved an increase of some 22 per cent with regard to case completion compared with 2019. In addition, despite the slowdown of some investigations as a result of COVID-19, the average completion time for investigations remained fairly constant.

26.81 The subprogramme has looked to introduce cloud-based forensic software to better support and speed up investigations. It has also placed renewed focus on completing investigations that have been pending finalization from the previous period. Notably, this resulted in more reports being issued and investigations finalized in 2020 than in 2018 and 2019, respectively.

*Progress towards the attainment of the objective, and performance measure*

26.82 The above-mentioned work contributed to the objective, as demonstrated by the increased number of investigations closed, from 207 in 2018 to 331 in 2020 (see figure 26.VII). The number of cases closed as a proportion of intake increased to 26 per cent in 2020, from 20 per cent in 2018 and 2019.

Figure 26.VII

**Performance measure: reports of misconduct received versus number of investigation cases completed**

### **Planned results for 2022**

26.83 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

#### **Result 1: focusing on the investigation of sexual harassment<sup>6</sup>**

##### **Programme performance in 2020**

26.84 The subprogramme has supported the Organization in developing and providing enhanced sexual harassment investigative capacity. The subprogramme has

<sup>6</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 30)).

also finalized a manual on the investigation of sexual harassment for adoption by the United Nations system and its partners.

26.85 The above-mentioned work contributed to an average completion time of 10 months for sexual harassment investigations, which did not meet the planned target of 3 months presented in the proposed programme budget for 2020. The subprogramme delivered outcomes with regard to 25 (51 per cent) sexual harassment allegations within 9 months of intake, and an additional 10 (20 per cent) between 9 and 12 months of intake.

### **Proposed programme plan for 2022**

26.86 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will strengthen its contribution to the prevention of and response to both sexual harassment and sexual exploitation and abuse by using a streamlined and accelerated approach to the handling of sexual misconduct in the Organization that is based on a victim-centred approach. The expected progress is presented in the performance measure below (see figure 26.VIII).

Figure 26.VIII

### **Performance measure: average completion time of sexual harassment investigations**

(Months)

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 2: improved investigation of sexual exploitation and abuse, sexual harassment and fraud and corruption, with a renewed focus on procurement fraud<sup>7</sup>**

#### **Programme performance in 2020**

26.87 The subprogramme focused its efforts on improving the timeliness of investigations of sexual exploitation and abuse, as well as continuing to ensure that investigations take a victim-centred approach.

26.88 The subprogramme also strengthened interdivisional communication and collaboration with subprogramme 1 in the areas of identification and analysis of fraud indicators. This collaboration led to an increase in the number of matters related to fraud reviewed by the subprogramme, improving the Organization's detection and response to procurement fraud. The subprogramme will continue to exploit the

<sup>7</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

synergies that exist between the Internal Audit Division and the Investigations Division in this area.

26.89 In 2020, entitlement fraud intake decreased by 36 per cent compared with 2019, although the total number of cases investigated remained steady (45 in 2020 compared with 48 in 2019). Medical insurance fraud comprised the vast majority of cases: 40 cases, or 89 per cent, of total entitlement fraud investigations. The average completion time for entitlement fraud cases was 10.3 months. The subprogramme also completed 58 cases relating to sexual exploitation and abuse, 49 relating to sexual harassment and 226 cases relating to fraud and corruption.

26.90 The above-mentioned work contributed to the completion of 67 per cent of investigation and closure reports that met timeline targets, which did not meet the planned target of 100 per cent reflected in the programme budget for 2021. Differences in the complexity and nature of particular investigations has meant that the percentage of cases meeting the planned targets, although improving, was still less than 100 per cent.

### **Proposed programme plan for 2022**

26.91 The subprogramme will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the subprogramme will continue to identify ways to shorten the time taken to complete investigations, for example, by improving data analytics capability, streamlining reporting and minimizing vacancies. The subprogramme plans to use the results of the external quality assessment that will be conducted during 2022 to help inform the process of improving its timeliness targets and to better reflect the way in which investigations are actually conducted. The expected progress is presented in the performance measure below (see figure 26.IX).

Figure 26.IX

**Performance measure: percentage of investigation and closure reports that meet timeline targets**

\* To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### **Result 3: increased trust in investigation outcomes**

#### **Proposed programme plan for 2022**

26.92 The subprogramme has focused on improving investigation outcomes. In the past, an all-female specialized team of sexual harassment investigators was established to increase trust in this category of investigation, which is primarily

victim-centred. Building on this success, the subprogramme will continue its efforts to diversify its staff in terms of gender, equitable geographical representation and professional background, as well as improve retention.

#### *Lessons learned and planned change*

26.93 The lesson for the subprogramme was that the growth in the implementation of partner fraud investigations highlighted the need for specific language skills within the workforce of the subprogramme to undertake effective investigations. In addition, a greater variety of professional backgrounds is required to effectively cater for and respond to the range of investigations conducted within the United Nations. Gender diversity is one of many aspects critical to achieving victim-centred investigations of sexual exploitation and abuse as well as sexual harassment investigations. In applying the lesson, the subprogramme will reach out to professional networks and qualified personnel to improve its diversity and enable it to better discharge its investigative mandate and contribute to increasing trust in the investigation process and outcomes.

#### *Expected progress towards the attainment of the objective, and performance measure*

26.94 This work is expected to contribute to the objective, as demonstrated by an increased trust in investigation outcomes as a result of mainstreaming diversity into investigation activities (see figure 26.X).

Figure 26.X

**Performance measure: percentage of survey respondents that are confident that the investigation reports enabled relevant decisions**

### **Legislative mandates**

26.95 The list below provides all mandates entrusted to the subprogramme.

#### *General Assembly resolutions*

59/287	Report of the Office of Internal Oversight Services on strengthening the investigation functions in the United Nations	75/247	Report on the activities of the Office of Internal Oversight Services
62/247	Strengthening investigations	74/257	Review of the implementation of General Assembly resolutions 48/218 B, 54/244, 59/272, 64/263 and 69/253
68/252	Human resources management		

## Deliverables

26.96 Table 26.6 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 26.6

### Subprogramme 3: deliverables for the period 2020–2022, by category and subcategory

<i>Category and subcategory</i>	<i>2020 planned</i>	<i>2020 actual</i>	<i>2021 planned</i>	<i>2022 planned</i>

Investigation and closure reports	275	278	275	275

## **Programme 27**

### **Jointly financed administrative activities**

### **International Civil Service Commission**

#### **Overall orientation**

#### **Mandates and background**

27.1 The International Civil Service Commission (ICSC) was established pursuant to General Assembly resolution [3357 \(XXIX\)](#) and is responsible for the regulation and coordination of the conditions of service for the United Nations common system. Under its statute, the Commission is a subsidiary organ of the Assembly. In the exercise of its functions, the Commission is guided by the principles set out in the agreements between the United Nations and other organizations aimed at the development of a single unified international civil service through the application of common personnel standards, methods and arrangements.

#### **Programme of work**

##### **Objective**

27.2 The objective, to which ICSC contributes, is to ensure fair and harmonized conditions of service for staff in the United Nations common system.

##### **Strategy**

27.3 To contribute to the objective, the Commission will continue to develop and strengthen a common system of salaries, allowances and benefits under the Noblemaire and Flemming principles, apply the methodologies for determining salaries and post adjustment classifications, and provide guidance and advice on the administration of human resources management policies and systems, including job evaluation standards and tools, and substantive support for all stakeholders.

27.4 The Commission will also lend its expertise to stakeholders and will work closely with the Human Resources Network of the United Nations System Chief Executives Board for Coordination (CEB). The Commission will seek feedback from organizations on the conditions of service of staff, conduct workshops to educate staff on the work of the Commission and on the benefits and entitlements available to staff of the United Nations common system, and carry out periodic global surveys to solicit information from the staff at large, all in an effort to determine the most appropriate conditions of service. In addition, the Commission will analyse the conditions of service of staff in difficult duty stations.

27.5 The above-mentioned work is expected to result in:

- (a) Equitable conditions of service in each duty station;
- (b) A coherent and effective human resources management system that is closely aligned with the achievement of organizational goals and objectives.

## **External factors for 2022**

27.6 With regard to the external factors, the overall plan for 2022 is based on the planning assumption that organizations of the United Nations common system provide timely information, as requested by ICSC, and that they fully implement the Commission's decisions and recommendations.

27.7 The Commission has developed standards of conduct the intent of which is to reflect the overarching ideals of behaviour and conduct for an international civil service. Thus, the standards inspire and provide explanations to staff in the organizations of the common system by articulating some basic standards that form the ethical underpinnings of an international civil service. Following recent developments in the organizations of the common system to address current ethical challenges, including racism, the Commission will review its standards of conduct as scheduled in its programme of work for 2022. The Commission will collect information from common system organizations in order to conduct its review and propose relevant updates to the standards of conduct to be used as a guide within the common system.

27.8 With regard to the coronavirus disease (COVID-19) pandemic, the programme plan is based on the assumption that the proposed deliverables and activities for 2022 will be feasible to implement. However, if the pandemic were to continue to have an impact on the planned deliverables and activities, they would be adjusted during 2022 within the scope of the overall objectives, strategies and mandates. Any such adjustments would be reported as part of the programme performance information.

27.9 The Commission integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, at its fifty-first session, the Commission adopted the framework for human resources management to guide policy and practice in the organizations of the United Nations common system. The framework identifies core human resources elements with clear explanations of how all the various areas are linked and the principles that should guide work in each area. The latest revision, in 2018, included a section on gender and diversity. In 2022, the Commission's secretariat will report on gender and diversity in common system organizations.

## **Programme performance in 2020**

27.10 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Consistent application of staff conditions and entitlements during the COVID-19 pandemic**

27.11 Following the declaration by the World Health Organization (WHO) that COVID-19 was a pandemic, the ICSC secretariat supported common system organizations in navigating new challenges, such as potential health risks stemming from COVID-19 and the inability to properly carry out data collection and surveys. The ICSC secretariat developed and issued a publication answering frequently asked questions about COVID-19 relating to danger pay with regard to the COVID-19 situation in all languages, in collaboration with WHO. The publication served primarily as a set of guidelines for the identification of staff who would qualify for that special allowance, and enabled consistent decision-making regarding the eligibility and approval of danger pay for common system staff, such as front-line workers, who were at greater risk of exposure to COVID-19. In addition, in carrying

out mandated activities, particularly staff surveys, an emerging issue was the change in typical spending patterns as a result of government-enacted stay-at-home orders to limit the spread of COVID-19. Recognizing the potential negative impact that survey results could have on staff conditions of service and entitlements, ICSC analysed the results and the Chair of ICSC guaranteed that there would be no reduction in the net take-home pay for common system staff in the Professional and higher categories by approving interim special measures on net take-home pay.

*Progress towards the attainment of the objective, and performance measure*

27.12 The above-mentioned work contributed to the objective, as demonstrated by the consistent application of guidelines relating to entitlements for all staff within the common system. Emergent public health risks associated with the COVID-19 pandemic were reflected in the actions of ICSC, which recognized the increased health risks to staff and included, as mandated, eligibility for danger pay under certain high-risk work environments (see table 27.1).

Table 27.1

**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
—	—	Consistent application of staff conditions and entitlements for all common system staff that incorporated emergent public health risks associated with the COVID-19 pandemic

**Impact of COVID-19 on programme delivery**

27.13 During 2020, the COVID-19 pandemic had an impact on the planned deliverables and activities of ICSC. This impact included the cancellation of ICSC sessions and working groups on key areas, including parental leave and the review of salary survey methodologies. A number of salary surveys, including the cost-of-living surveys and data collection used for processing daily subsistence allowances, were postponed. Despite the impact of COVID-19, most of the regular activities of the Commission were implemented through different modalities. These changes had an impact on the programme performance in 2020, as specified in result 1 below.

27.14 At the same time, however, some planned deliverables and activities were modified and new activities were identified during 2020, within the overall scope of the programme objectives, in order to support common system organizations on issues related to the COVID-19 pandemic. Following the meeting in June of the ICSC working group on hardship classification of duty stations, an additional special meeting was held virtually by the ICSC secretariat in July with a focus on: (a) how to strengthen the overall capacity of the data collection process for the health factor under the ICSC hardship classification process; and (b) how to capture the impact of COVID-19 on the conditions of work and life in the field duty stations in terms of health. ICSC developed resources and guidelines to support common system organizations in navigating emergent challenges related to COVID-19. The modified deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

27.15 Reflecting the importance of continuous improvement and responding to the evolving needs of the common system, the Commission will mainstream lessons learned and best practices related to the adjustment and adaptation of its programme

owing to the COVID-19 pandemic. Specific examples of lessons learned include the continuation of virtual meeting modalities, which allow for the wider participation of stakeholders. There may be instances in which hybrid meetings would be preferred, in order to allow for successful negotiations with stakeholders; therefore, for future event planning, aspects of hybrid meetings will be employed to widen the engagement of staff and executive heads.

## **Planned results for 2022**

27.16 The planned results for 2022 include results 1 and 2, which are updates of results presented in the preceding proposed programme plans and therefore show both the programme performance in 2020 and the proposed programme plan for 2022. Result 3 is a new planned result.

### **Result 1: improved compensation package<sup>1</sup>**

#### **Programme performance in 2020**

27.17 After the approval of the new compensation package by the General Assembly in its resolution [70/244](#), the staff of the ICSC secretariat continued to provide guidance on the implementation of the changes approved by the Assembly. The Commission also monitored the progress of the implementation by organizations of the common system. Furthermore, as requested by the Assembly, the Commission launched a survey among common system organizations in order to solicit detailed feedback on the new package.

27.18 The above-mentioned work contributed to the full implementation of the compensation package, which did not meet the planned target of full and consistent implementation of the compensation package by all organizations of the common system, as reflected in the proposed programme budget for 2020. While the survey was launched to capture further details of the impact of the new compensation package and its consistent implementation, organizations were not in a position to obtain all of the information requested in the survey as a result of the COVID-19 pandemic. All organizations have committed to providing the requested information as soon as it becomes available.

#### **Proposed programme plan for 2022**

27.19 The Commission will continue its work related to the planned result, in line with its mandate. To contribute to further progress towards the objective and in response to recent developments, the Commission will continue to collect, review and analyse the results of the survey and present its findings in 2021. If any changes or updates are needed after the presentation of its report to the General Assembly, the Commission expects to address those changes in 2022. The expected progress is presented in the updated performance measure below (see table 27.2).

---

<sup>1</sup> As reflected in the proposed programme budget for 2020 ([A/74/6 \(Sect. 31\)](#)).

Table 27.2  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
<ul style="list-style-type: none"> <li>Implementation of the new United Nations common system compensation package ongoing by all 28 organizations of the common system in a consistent fashion</li> </ul>	<ul style="list-style-type: none"> <li>Full implementation of the new common system compensation package by all 28 organizations of the common system</li> </ul>	<ul style="list-style-type: none"> <li>Full implementation of the compensation package</li> <li>Positive feedback was received from the organizations regarding the changes, including, for example, that the list of over 40 admissible expenses that could be claimed in administering the education grant was shortened to 4 items</li> </ul>	<ul style="list-style-type: none"> <li>Qualitative and quantitative feedback received from staff and organizations reflect that the compensation package meets its intended goals and has a positive impact on organizational programme delivery</li> </ul>	<ul style="list-style-type: none"> <li>Endorsement of changes to the compensation package by the General Assembly</li> </ul>

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## Result 2: focusing more on the needs of stakeholders<sup>2</sup>

### Programme performance in 2020

27.20 The Commission has, with the active participation of stakeholders, reviewed the operational rules of the post adjustment system and made a number of modifications to the operational rules regulating the determination of the post adjustment multiplier to contribute to its objective. Following the ruling of the International Labour Organization Administrative Tribunal on the results of the 2016 cost-of-living survey in Geneva, which resulted in different post adjustment scales for common system staff in Geneva, the goal of the review was to achieve an optimal balance among competing desirable compensation goals, including accuracy, transparency, simplicity, the stability of net remuneration and the predictability of its periodic adjustment. The Commission ensured full participation in the review by all stakeholders in order to increase confidence in the common system compensation system and to contribute to its objective of having fair and harmonized conditions of service.

27.21 The above-mentioned work contributed to a better understanding of the methodology used to determine the post adjustment multiplier as well as the Commission's role in the process, which met the planned target reflected in the programme budget for 2021. In particular, during the review meeting of the operational rules used in the post adjustment system, there was record attendance by all stakeholders, including the senior representatives of human resources of all common system organizations, representatives from the three staff associations and members of the Commission. The results of the review were then presented to the

<sup>2</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

Advisory Committee on Post Adjustment Questions, an expert subsidiary body of ICSC that provides technical advice on the methodology of the post adjustment system. At this meeting, the changes in the operational rules were endorsed by members of the Advisory Committee in the presence of all aforementioned stakeholders. During the proceedings, no objections were raised by stakeholders, which provided a strong basis for increased awareness of and agreement on the operational rules that were discussed and endorsed.

### Proposed programme plan for 2022

27.22 The Commission will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the Commission will work on promoting strong acceptance of the new methodology by all stakeholders, organizing more workshops on specific topics of interest and need as expressed by survey results, printing educational leaflets and proactively reaching out to all stakeholders. The ability of ICSC to achieve its objective in recommending improved conditions of service for staff will evolve based on trust from partners and a better understanding of the role of ICSC. The expected progress is presented in the performance measure below (see table 27.3).

Table 27.3  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
—	Staff litigation against a decision by the Commission	Improved understanding by staff of the methodology used to determine post adjustments and the role of the Commission, manifested through increased awareness of and expressed understanding by stakeholders during the review meeting and subsequent presentation and endorsement at the meeting of the Advisory Committee on Post Adjustment Questions	Absence of litigation from staff	General Assembly reiterating the role of the Commission, continued absence of litigation from staff and strong acceptance of new methodology by all stakeholders

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: improved conditions of service, retention and attraction of staff in duty stations with extreme hardship

27.23 Most duty stations with extreme hardship conditions are categorized as non-family locations, as internationally recruited staff members are not allowed to install their families because of dangerous conditions or the absence of adequate

housing. Staff members in these locations are entitled to a non-family service allowance. Some duty stations have extreme hardship conditions and lack adequate housing or educational and health facilities, but staff members can install their families there, though this is often not desirable. This has created problems for staff members, such as isolation from family and additional expenses related to maintaining another home outside the duty station for family members. The Commission has reviewed the situation and also noticed the difficulty in attracting staff, especially women, to those locations. To address this, the Commission decided to recommend some flexibility by allowing an element of choice for staff members. As a result, on a pilot basis, staff members at “E” duty stations where dependants could theoretically be installed were granted the option to decide whether or not to install their dependants, but were given an additional allowance to help defray the cost of having to maintain a second home if they chose not to install them. The pilot is due for review at the seventy-sixth session of the General Assembly.

*Lessons learned and planned change*

27.24 The lesson for the Commission was that analysing the motives, choices and actions of staff members can assist in workforce planning in different categories of duty stations, including non-family duty stations, and can also be used to evaluate costs to common system organizations. In applying the lesson, the Commission will regularize the analysis of staff choices and collaborate with the Human Resources Network Standing Committee on Field Duty Stations to create workforce planning data analytics. This analysis will help address staff needs in non-family duty stations, support the retention of staff and support recruitment to non-family duty stations, including through supporting the new approach to mobility in the common system.

*Expected progress towards the attainment of the objective, and performance measure*

27.25 The work is expected to contribute to the objective, as demonstrated by fair and harmonious conditions of service for staff in the field. The expectation is that it will be easier to fill vacancies at locations with extreme hardship conditions because of the flexibility offered to staff (see table 27.4).

Table 27.4  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
Pilot initiated granting flexibility to staff in duty stations with extreme hardship conditions	Staff given choices in deciding whether or not to install their families in duty stations with extreme hardship conditions	Staff continue to make an informed choice and make use of the pilot grant enabling flexibility to staff in duty stations with extreme hardship conditions	Indications of staff satisfaction with the choice and flexibility provided to staff to decide on whether or not to install their families in duty stations with extreme hardship conditions	Attraction and retention of staff, especially women, in duty stations classified as undergoing extreme hardship

**Legislative mandates**

27.26 The list below provides all mandates entrusted to ICSC.

## General Assembly resolutions

3357 (XXIX)

Statute of the International Civil Service  
Commission

75/245 A

United Nations common system

## Deliverables

27.27 Table 27.5 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 27.5

## International Civil Service Commission: deliverables for the period 2020–2022, by category and subcategory

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned

15. Frequently asked questions on COVID-19 (in collaboration with WHO)	—	1	—	—
16. Rest and recuperation framework	1	—	1	1
<b>C. Substantive deliverables</b>				

**Consultation, advice and advocacy:** advice to the United Nations Appeals Tribunal and the International Labour Organization Administrative Tribunal on specific areas relating to human resources management; research papers on specific issues raised by Member States, organizations and staff representatives (restricted documents of the Commission); information meetings with Member States and organizations outside the United Nations common system.

Category and subcategory	2020 planned	2020 actual	2021 planned	2022 planned
<b>E. Enabling deliverables</b>				
<b>Administration:</b> update and maintenance of the International Civil Service Commission website; preparation of documentation and substantive documents for the Commission and the Advisory Committee on Post Adjustment Questions reports; salary surveys and cost-of-living surveys carried out at more than 60 field duty stations.				

## Joint Inspection Unit

### Overall orientation

#### Mandates and background

27.28 The Joint Inspection Unit is mandated, through its statute, as contained in General Assembly resolution [31/192](#), to review matters bearing on the efficiency of services and the proper use of funds and to provide an independent view aimed at improving management and methods and at achieving greater coordination among the organizations of the United Nations system. The Unit performs inspections and evaluations and issues reports, notes and management letters in which it identifies best practices, proposes benchmarks and facilitates information-sharing among all the organizations of the United Nations system that have adopted its statute.

#### Programme of work

##### Objective

27.29 The objective, to which the Joint Inspection Unit contributes, is to improve the efficiency, effectiveness and coordination of the United Nations system.

##### Strategy

27.30 To contribute to the objective, the Joint Inspection Unit will ensure that its programme of work includes system-wide reviews in the identified main thematic areas: accountability and oversight functions and systems; management and administration practices; the implementation of policies, strategies and programmes, as well as coordination and collaboration on the realization of internationally agreed development goals, such as the Sustainable Development Goals; and governance arrangements and mechanisms, as well as inter-agency coordination. The Unit will, in particular, undertake system-wide reviews of the management and administration practices and methods of the organizations of the United Nations system in the areas of human and financial resources, administration, results-based management, strategic planning and management, change management, risk management, security and safety, and information technology. The Joint Inspection Unit will, in conducting its reviews, focus on system-wide issues that can be assessed across all or multiple organizations. The Joint Inspection Unit will also develop and implement effective platforms for the sharing of good practices and knowledge in the various thematic areas of the work of the Unit.

27.31 The above-mentioned work is expected to result in:

- (a) Better information for legislative body decision-making;

(b) Improved efficiency and effectiveness of the organizations of the United Nations system;

(c) Improved coordination and collaboration of the organizations of the United Nations system.

## **External factors for 2022**

27.32 With regard to the external factors, the overall plan for 2022 is based on the planning assumption that participating organizations fully cooperate with the reviews of the Joint Inspection Unit and that recommendations are accepted and implemented.

27.33 With regard to the COVID-19 pandemic, the programme plan is based on the assumption that the proposed deliverables and activities for 2022 will be feasible to implement. However, if the pandemic were to continue to have an impact on the planned deliverables and activities, these would be adjusted during 2022 within the scope of the overall objectives, strategies and mandates. Any such adjustments would be reported as part of the programme performance information.

27.34 With regard to coordination and cooperation within the United Nations system, the Unit will continue its engagement in various forums, including the Board of Auditors and the Office of Internal Oversight Services. The engagement of a broad range of actors, including those beyond the traditional inspection sphere, is critical to mobilizing effective responses and pursuing solutions to improve business processes. This means strengthening existing partnerships, but also pursuing new ones that can help foster innovative approaches. The Unit will pursue measures to continue to promote an integrated approach to support the implementation of the recommendations included in its reports.

27.35 The Joint Inspection Unit integrates a gender perspective in its operational activities, deliverables and results, as appropriate. For example, the terms of reference for management and administrative reviews of single organizations conducted by the Joint Inspection Unit examine and report on the gender policies and practices of those organizations.

27.36 In line with the United Nations Disability Inclusion Strategy, the Unit will also continue to accelerate the effective mainstreaming of disability inclusion, including mitigating measures to overcome any challenges while operationalizing disability inclusion.

## **Programme performance in 2020**

27.37 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Improved visibility and engagement by governing bodies in Joint Inspection Unit recommendations**

27.38 As a central agent of change in the United Nations system, the Joint Inspection Unit carries out evaluations and promotes and advances vital management, administrative and coordination issues. To be effective in this role requires the Unit to compel executive heads across the United Nations system to act in order to bring about impactful change, which often involves adapting complex and embedded organizational practices. In managing this challenge and to generate buy-in from

executive heads, the Unit engages in meetings with governing bodies and oversight committees and conducts conferences and workshops on a vast range of topics associated with the Unit's work, notably, on such topics as staff mobility, change management, knowledge management, results-based management, the investigations function and enterprise risk management.

27.39 The consideration of the reports of the Joint Inspection Unit by the governing bodies of participating organizations has increased as more organizations make time in their respective agendas to deliberate the substance of the Unit's reports. To achieve this, the Unit drew attention to the provisions in its statute regarding the consideration of the Joint Inspection Unit reports and highlighted those practices of organizations that should be considered good practices to emulate. This action improved the visibility of the Unit's reports, which has enhanced the consideration and deliberation of their substance by the governing bodies of the Unit's participating organizations.

27.40 The consideration of the reports of the Joint Inspection Unit by the governing bodies suggests that the selection of topics and the quality of the reports are relevant and important to the governing bodies.

*Progress towards the attainment of the objective, and performance measure*

27.41 The above-mentioned work contributed to the objective, as demonstrated by the advancement and mainstreaming of the reports and recommendations of the Joint Inspection Unit within the United Nations system organizations (see table 27.6).

Table 27.6

**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
—	—	7 participating organizations' governing bodies regularly consider Joint Inspection Unit reports as an item on their agendas. Of these, 3 governing boards (the United Nations Educational, Scientific and Cultural Organization, the Joint United Nations Programme on HIV/AIDS and WHO) led the advancement and mainstreaming of the Joint Inspection Unit reports and recommendations, for instance, by requiring management to submit proposals to the board for implementing recommendations, requiring periodic reporting against the implementation of endorsed recommendations and enhancing transparency by publishing reports on implementation

**Impact of COVID-19 on programme delivery**

27.42 During 2020, the COVID-19 pandemic had an impact on the planned deliverables and activities of the Joint Inspection Unit. As an oversight body, the Joint Inspection Unit supports Member States through the preparation of relevant independent reviews as included in its programme of work. In this regard, the Joint Inspection Unit included the consideration of the impact of the COVID-19 pandemic on the organizations of the United Nations system as a matter to be evaluated in the context of the specific reviews included in the next programme work of the Unit (e.g., in 2021 the Unit included a review of business continuity policies and practices). The Unit adapted its approach (e.g., where in-person interviews were used, virtual interactions were employed instead) regarding data-collection activities necessary for the undertaking of the inspections and evaluations included in its 2020 annual programme of work. The change in the approach to planned data-collection activities had a qualitative impact on the data collected; however, it has not affected the quantitative results for 2020, as the number of deliverables produced was the same as planned. The impact on the qualitative aspects with regard to the comprehensiveness of data and insights usually gathered during on-site interviews and the direct observation and inspection of aspects of the subject under review was, however, expected.

**Result 1: increased acceptance of Joint Inspection Unit recommendations<sup>3</sup>****Programme performance in 2020**

27.43 The Joint Inspection Unit worked on 12 reviews (excluding 1 review that was suspended), of which 7 were carried over from previous years. Of the 12 reviews, the Unit completed 8 and issued those reports in 2020. During 2020, significant progress was made in bringing governing bodies of United Nations system organizations to deliberate on the substance of the Unit's reports. The Unit accomplished this by drawing attention to the statute of the Joint Inspection Unit and by engaging with organization management, particularly those based in Europe. The impact of these efforts in 2020 is likely to improve the rate of acceptance and implementation of recommendations in future years.

27.44 The above-mentioned work contributed to an acceptance rate for recommendations of 68 per cent for all reports issued in the period from 2012 to 2019, which did not meet the target of 70 per cent reflected in the proposed programme budget for 2020. The reduction in the acceptance rate could be attributable to several organizations postponing or reducing the agenda items of the meetings of governing bodies meetings owing to COVID-19, as well as the number of reports carried over from 2018 to 2019 (eight) and from 2019 to 2020 (seven). The rate of acceptance and implementation can only reasonably be measured between one and two years after the issuance of the review reports. Based on the relevance, importance and high priority of the subject matter, and the renewed focus on the reports of the Joint Inspection Unit by the governing bodies, the Unit is confident that the reports completed in 2019 and 2020 will contribute to an increase in the acceptance rate of recommendations in forthcoming years.

**Proposed programme plan for 2022**

27.45 The Joint Inspection Unit will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the Unit will redouble efforts to improve the consideration of its reports by the governing bodies of participating organizations in a manner that includes deliberations

---

<sup>3</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 31)).

on the substance of and taking decisions on the recommendations set out in the Unit's reports. The Unit has embarked on a campaign to that effect and will continue to promote improved adherence to the provisions of the statute of the Joint Inspection Unit for the consideration of Unit reports, and to bring to the attention of participating organizations the actions taken by organizations that are considered good practices by the Unit – with a request that these practices be adopted by all organizations. The expected progress is presented in the performance measure below (see figure 27.I).

Figure 27.I

**Performance measure: rate of acceptance of recommendations of the Joint Inspection Unit**

(Percentage)

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

**Result 2: aligning the programme of work with priorities of the United Nations system for more effective contribution to legislative bodies and organizations<sup>4</sup>**

**Programme performance in 2020**

27.46 The Joint Inspection Unit prepared its programme of work after a consultative process that took into consideration proposals for reviews submitted by its participating organizations as well as by oversight bodies and the inspectors themselves. The final programme of work adopted by the Unit included five system-wide projects and one management and administration review. The review proposals for five of the six reviews emanated from submissions made by the Unit's participating organizations or their oversight bodies. The Unit also consulted with all participating organizations before confirming the programme of work to ensure that the reviews were relevant, important and of high priority.

27.47 The above-mentioned work contributed to 61 per cent of recommendations pertaining to United Nations system-wide coordination, coherence and harmonization being accepted, and participating organizations, as well as oversight bodies, providing proposals for five of the six reviews adopted in the Unit's programme of work. The previous performance measure reflected in the programme budget for 2021 (A/75/6/Add.1) is reported in result 1, figure 27.II, above.

**Proposed programme plan for 2022**

27.48 The Joint Inspection Unit will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective,

<sup>4</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

the Unit will continue to produce high-quality reports on subjects that are relevant, important and of high priority to its participating organizations. To accomplish this, the Unit will revise its mechanisms for requesting proposals from participating organizations, oversight bodies and coordinating bodies and provide additional guidance to executive heads and entities to ensure that proposals are made regarding subjects that are relevant, important, of high priority and appropriate for the mandate of the Unit. The aim is to increase the rate of acceptance of recommendations. In particular, the Joint Inspection Unit will be targeting recommendations that have been made pertaining to enhancing system-wide coordination, cooperation, coherence and harmonization for which acceptance rates are showing a declining trend. The expected progress is presented in the performance measure (see table 27.7 below).

Table 27.7  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
<ul style="list-style-type: none"> <li>• 60 per cent of recommendations pertaining to United Nations system-wide coordination, coherence and harmonization accepted</li> <li>• Participating organizations as well as oversight bodies provided proposals for 4 of 9 reviews adopted in the Unit's programme of work</li> </ul>	<ul style="list-style-type: none"> <li>• 65 per cent of recommendations pertaining to United Nations system-wide coordination, coherence and harmonization accepted</li> <li>• Participating organizations as well as oversight bodies provided proposals for 5 of 8 reviews adopted in the Unit's programme of work</li> </ul>	<ul style="list-style-type: none"> <li>• 61 per cent of recommendations pertaining to United Nations system-wide coordination, coherence and harmonization accepted</li> <li>• Participating organizations as well as oversight bodies provided proposals for 5 of 6 reviews adopted in the Unit's programme of work</li> </ul>	<ul style="list-style-type: none"> <li>• 63 per cent of recommendations pertaining to United Nations system-wide coordination, coherence and harmonization accepted</li> <li>• Participating organizations as well as oversight bodies provide proposals for 5 of 7 reviews adopted in the Unit's programme of work</li> </ul>	<ul style="list-style-type: none"> <li>• 66 per cent of recommendations pertaining to United Nations system-wide coordination, coherence and harmonization accepted</li> <li>• Participating organizations as well as oversight bodies provide proposals for 6 of 8 reviews adopted in the Unit's programme of work</li> </ul>

*Note:* The acceptance rates are based on recommendations contained in reports of the Joint Inspection Unit issued in previous years. For example, the rate for 2018 is based on reports issued in 2015 and 2016; 2019 in 2016 and 2017; and 2020 in 2017 and 2018. This delay provides for the time taken for the consideration of reports by organizations.

### **Result 3: governing bodies regularize their consideration of Joint Inspection Unit reports**

#### **Proposed programme plan for 2022**

27.49 The value and impact of the reports of the Joint Inspection Unit are only realized when the recommendations in those reports are accepted and implemented by the participating organizations. The Unit has made progress with six governing bodies, including the General Assembly, to ensure the regular scheduling of the consideration of the Unit's reports. These governing bodies also invite the Unit to introduce the reports, participate in the deliberations and answer relevant questions. The governing bodies take decisions on the implementation of recommendations in accordance with article 11 (4) of the Unit's statute.

### *Lessons learned and planned change*

27.50 The lesson for the Joint Inspection Unit was that it could strengthen and diversify its strategies to support the understanding and consideration of its reports and in turn support the further acceptance and implementation of recommendations. In particular, the Unit examined and identified variations in how the various governing boards considered and deliberated on the Unit's reports. In applying the lesson, the Unit will consider the variations in deliberations and focus on efforts to support governing bodies in their consideration in more systematic ways, as guided by the Joint Inspection Unit statute. The Unit will make targeted efforts in 2022 to increase the number of governing bodies considering the Unit's reports and will, as appropriate, seek invitations to meet with governing boards and present the findings and recommendations of the reports. Moreover, to build a longer-term working relationship and strengthen accountability, the Unit will request that the governing board secretariats provide information and updates on the acceptance of recommendations and plans for implementation.

### *Expected progress towards the attainment of the objective, and performance measure*

27.51 This work is expected to contribute to the objective, as demonstrated by an increase in the number of governing bodies that consider the reports of the Joint Inspection Unit in accordance with article 11 (4) of its statute, which will in turn improve the rate of acceptance and implementation of recommendations (see figure 27.II).

Figure 27.II

**Performance measure: total number of governing bodies that regularize their consideration of Joint Inspection Unit reports (cumulative)**

### **Legislative mandates**

27.52 The list below provides all mandates entrusted to the Joint Inspection Unit.

## United Nations System Chief Executives Board for Coordination

### Overall orientation

#### Mandates and background

27.54 The United Nations System Chief Executives Board for Coordination, composed of the Secretary-General and the executive heads of the organizations of the United Nations system, is responsible for promoting coherence, cooperation and coordination in the policies, programmes and activities of the organizations of the United Nations system in accordance with their mandates and in response to the decisions of intergovernmental bodies. The mandate of the Board derives from the priorities established in relevant General Assembly and Economic and Social Council resolutions and decisions, including Council resolution 13 (III) and decision 2001/321. At a time when the international community is confronted by increasingly complex and interrelated global challenges, coordinated and coherent action by the entities of the United Nations system is more important than ever. The COVID-19 crisis has exposed fragilities, exacerbated vulnerabilities, reversed development gains and created serious risks for peace and security across the world. The longer-term effects of the pandemic, most notably its socioeconomic fallout, will shape the work of the United Nations for years to come. Mobilizing the system's collective capacity is vital to guiding a sustainable and inclusive recovery from the pandemic and

supporting the broad and integrated implementation of the 2030 Agenda by Member States, as well as the full range of mandates entrusted to United Nations system entities.

## **Programme of work**

### **Objective**

27.55 The objective, to which CEB contributes, is to leverage the collective capacity of the organizations of the United Nations system for the effective delivery of mandates.

### **Strategy**

27.56 To contribute to the objective, CEB and its two high-level committees will continue to provide the means for senior leaders of the United Nations system to establish a shared vision, agree on strategic action, pursue policy coherence in both programmatic and administrative areas, and coordinate the use of resources, capacities and knowledge. CEB will provide vision and leadership to guide the effective and coherent implementation of mandates by United Nations system organizations. CEB, through its High-level Committee on Programmes, will continue to foster system-wide policy coherence and programme coordination in response to intergovernmental mandates and in support of internationally agreed development goals. It will develop shared strategies, approaches and frameworks to address emerging policy and programme issues requiring system-wide action. Through its High-level Committee on Management, CEB will continue to foster the development of innovative approaches to improve efficiency and simplify business practices, and accelerate the harmonization, mutual recognition and integration of business operations. It will utilize its functional networks on finance and budget, human resources, digitization and technology, procurement, and safety and security to disseminate and, where applicable, mutually recognize best practices, innovative management approaches and partnerships in all areas of management.

27.57 For 2022, the planned deliverables and activities reflect the known and anticipated challenges related to COVID-19 that are being faced by the United Nations system and Member States. The CEB secretariat plans to support the United Nations system in addressing issues related to COVID-19 by continuing to pursue a coherent and coordinated response to the pandemic and to support efforts to recover better from both the management and programmatic perspectives.

27.58 The above-mentioned work is expected to result in:

- (a) Accelerating progress towards the broad and integrated implementation of the 2030 Agenda by Member States and the full range of mandates entrusted to United Nations system entities;
- (b) A more coherent and coordinated United Nations system response to global challenges, including recovery from COVID-19;
- (c) Greater capacity of United Nations system organizations to provide effective management responses that support the delivery of mandates.

## External factors for 2022

27.59 With regard to the external factors, the overall plan for 2022 is based on the planning assumption that member organizations commit themselves and make timely contributions to the issues addressed by CEB.

27.60 With regard to the COVID-19 pandemic, the programme plan is based on the assumption that the proposed deliverables and activities for 2022 will be feasible to implement. However, if the pandemic were to have a further impact on the planned deliverables and activities, they would be adjusted during 2022 within the scope of the overall objectives, strategies and mandates. Any such adjustments would be reported as part of the programme performance information.

27.61 CEB integrates a gender perspective in its activities, deliverables and results, as appropriate, including in the products of its high-level committees, such as system-wide strategies, shared approaches and frameworks. For example, the inequalities task team, established by the High-level Committee on Programmes in 2019, works to strengthen the United Nations system's leadership, coordination and impact with regard to reducing inequalities. Gender equality and women's empowerment feature prominently in its activities, advanced under the direction of the United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women) and the Office of the United Nations High Commissioner for Human Rights. In 2020, one product of the inequalities task team was a policy brief entitled "COVID-19, inequalities and building back better".<sup>5</sup> The brief provides high-level policy guidance and concrete recommendations on pathways leading from a state of crisis towards transformed economies and more equitable, gender-just societies. In 2022, CEB will continue to incorporate gender equality and women's empowerment into the activities of its high-level committees and will support the development of products that maximize leadership and coordination opportunities across the United Nations system.

27.62 With regard to disability inclusion and in line with the United Nations Disability Inclusion Strategy, CEB will continue to support the advancement of disability inclusion.

## Programme performance in 2020

27.63 Programme performance in 2020 includes the below result that emerged during 2020, as well as programme performance presented under results 1 and 2 below.

### **Operational continuity through agile inter-agency alignment of administrative responses to the COVID-19 situation**

27.64 During 2020, the COVID-19 pandemic had a significant impact on the human resources-related work of the CEB member organizations in multiple ways, ranging from the need to adapt and reconfigure office space in response to the new challenges, to the search for solutions for rest and recuperation provisions in a dynamically changing environment that had fewer flight connections and closed borders, to the requirement to align the handling of a multitude of exceptional requests by staff regarding particular personal situations.

---

<sup>5</sup> See <https://unsceb.org/covid-19-inequalities-and-building-back-better-policy-brief-hlcp-inequalities-task-team>.

27.65 The Human Resources Network of the High-level Committee on Management swiftly adjusted to the new situation by increasing the number and frequency of virtual coordination sessions of its field group and the Network itself, in particular during the initial months of the pandemic, with a minimum of weekly meetings. These meetings were aimed at coordinating critical issues at hand, liaising with key partners such as ICSC, medical directors or controllers, and agreeing on specific administrative guidelines in response to the changing COVID-19 situation. This allowed management in the various organizations and duty stations to receive swift guidance regarding particular challenges and facilitated a largely harmonized approach within the United Nations system, in particular in field locations. This was particularly important in situations in which the effects of the COVID-19 situation were amplified by other unexpected emergencies, such as the explosion at the port of Beirut.

*Progress towards the attainment of the objective, and performance measure*

27.66 The above-mentioned work contributed to the objective, as demonstrated by the timely availability of United Nations system-wide administrative guidelines in response to emergency situations and their necessary updates to adjust to the rapidly changing circumstances. Specifically, in 2020 four versions of human resources administrative guidelines on dealing with the pandemic situation were made available, as were four versions of specific guidance notes on options for rest and recuperation duty stations that were affected by COVID-19 travel restrictions. (see table 27.9).

Table 27.9  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)
—	—	United Nations system organizations had access to and were supported and guided by administrative guidelines in response to emergency situations, and their necessary updates, to adjust to the rapidly changing circumstances

**Impact of COVID-19 on programme delivery**

27.67 During 2020, the COVID-19 pandemic had an impact on the planned deliverables and activities of the CEB secretariat. The impact was predominantly reflected as a change in the mode of meetings from in-person to virtual, which required that they be abbreviated in scope and duration. Furthermore, the CEB secretariat supported only one meeting each of the Economic and Social Council and of the Committee for Programme Coordination in 2020 instead of the planned two each, owing to disruptions caused by the pandemic. These changes had an impact on the programme performance in 2020, as specified in result 2 below.

27.68 At the same time, however, the CEB secretariat identified new and modified activities within the overall scope of the objectives of the programme in order to support the United Nations system and Member States on issues related to the COVID-19 pandemic. Its agendas were structured to rally and align the United Nations system in response to the crisis, and to reflect on multilateralism and the common agenda and challenges for the United Nations system in a post-COVID-19 world. Several work streams of the High-level Committee on Programmes took on a

COVID-19 angle, such as those on inequalities, indigenous peoples and biodiversity. The High-level Committee on Management convened a number of ad hoc meetings to address the evolving situation in an agile and timely manner, issued and updated administrative guidelines and integrated a COVID-19 perspective into its ongoing work. The modified deliverables contributed to results in 2020, as specified in the emerging result for 2020 above.

27.69 Reflecting the importance of continuous improvement and responding to the evolving needs of Member States, the CEB Secretariat will mainstream lessons learned and best practices related to the adjustments and adaptation of its programme owing to the COVID-19 pandemic. Specific examples of lessons learned include that shortened virtual meeting formats limit the ability of members to discuss important issues of system-wide relevance in depth, and limit their ability to participate fully due to time differences, technical difficulties and/or time constraints. Furthermore, critical networking opportunities that facilitate the resolution of issues and create informal synergies between organizations are not readily replicable. While the majority of the Board's and Committees' work therefore does not lend itself to be moved online and/or to a virtual format, the secretariat will explore the potential for virtual intersessional meetings of the Committees to discuss any time-sensitive matters.

### **Result 1: scaling up innovation across the United Nations system<sup>6</sup>**

#### **Programme performance in 2020**

27.70 The CEB secretariat has continued to support efforts to foster and scale up innovation across the United Nations system, in line with its mandate. In particular, it cooperated with the United Nations System Staff College and the United Nations Innovation Network to build on the foundation provided by the United Nations innovation toolkit, formally launched in November 2019, to support a comprehensive approach to innovation to improve the capability of United Nations system entities to systematically innovate to serve their beneficiaries. As the custodian of the toolkit, the Staff College, in partnership with the Innovation Network and with the support of the CEB secretariat, organized live events to showcase its application. An "Introduction to innovation" asynchronous online course was launched in 2020, and dashboard functionality that tracks the aggregated results of the innovation assessments and tool usage of each United Nations system organization over time was progressively rolled out with the aim of informing executive decision-making with regard to promoting a culture of innovation.

27.71 The above-mentioned work contributed to raising awareness of and engagement with the toolkit, which met the planned target that the innovation toolkit be adopted as a key reference within the United Nations system, as reflected in the proposed programme budget for 2020.

#### **Proposed programme plan for 2022**

27.72 The CEB secretariat will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the CEB secretariat will continue to promote the usage of the toolkit and participation in Staff College courses; champion and support the Staff College's efforts to augment and expand its learning programmes and products on innovation; and link these efforts, as appropriate, back to the work of the CEB mechanisms, all with the aim of improving and expanding the innovation mindset and capacity of United Nations system staff. The expected progress is presented in the performance measure below (see table 27.10).

<sup>6</sup> As reflected in the proposed programme budget for 2020 (A/74/6 (Sect. 31)).

Table 27.10  
Performance measure

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned) <sup>a</sup>	2022 (planned)
Absence of system-wide guidance/tools on fostering innovation	Online publication of first-generation United Nations innovation toolkit	Adoption of United Nations system innovation toolkit as a key reference for promoting a culture of innovation	United Nations system innovation toolkit is incorporated into system-wide learning programmes delivered by the United Nations System Staff College	Innovation mindset and capacity of United Nations system staff improves and expands

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

## **Result 2: adoption of policies by member organizations to realize the future of the United Nations system workforce<sup>7</sup>**

### **Programme performance in 2020**

27.73 The CEB secretariat has supported the High-level Committee on Management and its Task Force on the Future of the United Nations System Workforce in considering new ways of working and recommending elements to foster an enabling culture and positive employee experience, examining pilot initiatives using technology and developing proposals for new sustainable contractual modalities. In June 2020, the High-level Committee on Management reoriented the work of the Task Force in the light of the impact of the COVID-19 pandemic, with the support of the CEB secretariat, to refocus the work of the Task Force towards areas that would have the most potential effect on the immediate future, including an expanded approach to flexible working that is supported by modern and sustainable workforce arrangements and enabling technologies. In the remaining months of the year, the Task Force made substantial progress towards the definition of elements of a draft policy for flexible working modalities. The CEB secretariat also led a system-wide consultation among members of the High-level Committee on Management to collect comments on and input for the proposed efforts of the Task Force outlined in its interim report. Furthermore, the CEB secretariat coordinated the engagement with ICSC, staff federations and other stakeholders.

27.74 The above-mentioned work contributed to the finalization in 2021 of elements of a United Nations system model framework for flexible working, which did not meet the target of a High-level Committee on Management-approved and CEB-endorsed model framework for the United Nations system workforce reflected in the programme budget for 2021. The impact of the COVID-19 pandemic on the United Nations system workforce compelled the Committee and its Task Force, and in turn the CEB secretariat, to adapt its work to take a phased approach. A first phase responded to the immediate need for policy development regarding flexible working arrangements, taking into account forced experiences brought about by the COVID-19 pandemic.

<sup>7</sup> As reflected in the programme budget for 2021 (A/75/6/Add.1).

### Proposed programme plan for 2022

27.75 The CEB secretariat will continue the work related to the planned result, in line with its mandate. To contribute to further progress towards the objective, the CEB secretariat will support the development of a model framework on flexible working modalities aimed at the implementation by individual organizations of related administrative guidance and policies towards a more modern and agile United Nations system workforce. The work will consider a holistic approach, including people-centred and cultural aspects, leadership commitments and the development of elements of possible new working modalities. These elements will ultimately align with the original target. The expected progress is presented in the performance measure below (see table 27.11).

Table 27.11

#### Performance measure

<i>2018 (actual)</i>	<i>2019 (actual)</i>	<i>2020 (actual)</i>	<i>2021 (planned)<sup>a</sup></i>	<i>2022 (planned)</i>
Examination by the High-level Committee on Management of the United Nations System Chief Executives Board for Coordination (CEB) functional networks on the impact of digital technology and innovation on the workforce of their relevant functional areas	Endorsement by CEB of a United Nations system strategy on the future of work; establishment of a cross-functional Committee task force on the future of the United Nations system workforce	Progress towards the definition of elements of a draft policy for flexible working modalities	Adoption by individual United Nations system organizations of administrative guidance and policies to facilitate a more agile and responsive workforce	Implementation by individual organizations of related administrative guidance and policies towards a more modern and agile United Nations system workforce

<sup>a</sup> To maintain accountability for initial programme plans, the 2021 target is carried forward from the programme budget for 2021 and reflects best estimates at that point in time before the COVID-19 pandemic. Programme performance for 2021 will be reported in the proposed programme budget for 2023.

### Result 3: United Nations system-wide financial statistics for better decision-making, greater transparency and enhanced accountability

#### Proposed programme plan for 2022

27.76 Under the direction of the High-level Committee on Management and in partnership with the United Nations Sustainable Development Group, the CEB secretariat supported the development in 2018 of six United Nations data standards for the reporting of United Nations system-wide financial information – the “data cube initiative” – and a road map for their implementation. This has since contributed to the collection of more comprehensive and comparable data. In 2020, further improvements were made to the existing guidance for reporting, in collaboration with the Organisation for Economic Co-operation and Development and the International Aid Transparency Initiative, allowing for greater harmonization and streamlining of multiple reporting requirements. The road map was updated to incorporate lessons learned from past data collection exercises, enabling better support to entities in complying with the two standards that are currently in a transitional period,<sup>8</sup> and

<sup>8</sup> Standard III, geographic location, and standard V, Sustainable Development Goals, both with mandatory reporting from 1 January 2022.

incorporating the latest provisions from the Data Strategy of the Secretary-General for Action by Everyone, Everywhere,<sup>9</sup> which highlights the data cube as one of three initial priority programmes.

*Lessons learned and planned change*

27.77 The lessons for the CEB secretariat are twofold. On the one hand there is a high demand for more disaggregated data, compatible with the Sustainable Development Goals, that can be used for insight and decision-making and to guide the COVID-19 recovery. On the other hand, entities are experiencing reporting fatigue, as more effort is required to address the growing demand for information. In applying the lessons, the CEB secretariat has updated the road map to strengthen the integration of data across organizations, whenever feasible, to incorporate disaggregated data and to enhance alignment and streamline the multiplicity of reporting requirements through the development of a minimum data set.

*Expected progress towards the attainment of the objective, and performance measure*

27.78 This work is expected to contribute to the objective, as demonstrated by the fact that a commonly accepted United Nations system-wide framework for the reporting of financial data improves reliability and comparability. In addition, this framework requires the reporting of disaggregated data by function, country, donor and Sustainable Development Goal, enhancing transparency and accountability with regard to system-wide financial flows. All this aims at producing system-wide data that is aligned with international standards and is easily accessible to Member States and other stakeholders. Ultimately, the data cube framework is intended to strengthen the comprehensiveness, comparability and analytical quality of information on financial resources and their utilization in support of the 2030 Agenda for Sustainable Development, in line with the commitments of the funding compact and the vision of the Data Strategy of the Secretary-General (see table 27.12).

Table 27.12  
**Performance measure**

2018 (actual)	2019 (actual)	2020 (actual)	2021 (planned)	2022 (planned)
Approval of six data standards for the reporting of United Nations system-wide financial information and draft road map	Successful first data collection available under the new standards and finalization of road map for implementation	Greater harmonization of reporting; availability of an updated road map and improved guidance for reporting entities	Availability of disaggregated data; greater intra-United Nations system data-driven coordination; streamlining of reporting requirements through a minimum data set	United Nations system-wide comprehensive, comparable financial data with analytical quality, enhanced transparency and accountability on system-wide financial flows and data aligned with international standards that is easily accessible

<sup>9</sup> See [www.un.org/en/content/datastrategy/index.shtml](http://www.un.org/en/content/datastrategy/index.shtml).

## Legislative mandates

27.79 The list below provides all mandates entrusted to CEB.

### *General Assembly resolutions*

64/289	System-wide coherence	74/251	Programme planning
69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development (Addis Ababa Action Agenda)	75/233	Quadrennial comprehensive policy review of operational activities for development of the United Nations system

### *Economic and Social Council resolutions and decisions*

13 (III)	Coordination Committee	2001/321	Further consideration of the annual overview review report of the Administrative Committee on Coordination
----------	------------------------	----------	--

## Deliverables

27.80 Table 27.13 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

## Programme of work

### Subprogramme 1

#### Security and safety services

#### Objective

28.2 The objective, to which this subprogramme contributes, is to ensure a safe and secure environment for all United Nations personnel, delegates, dignitaries and other visitors while conducting activities at United Nations Headquarters, offices away from Headquarters and regional commissions and while attending special events hosted by the United Nations at external locations.

#### Deliverables

28.3 Table 28.1 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 28.1

**Subprogramme 1: deliverables for the period 2020–2022, by category and subcategory***Category and subcategory***E. Enabling deliverables****Safety and security**

**Security of United Nations premises:** security risk management services and access control for approximately 8 million people per year at United Nations Headquarters, offices away from Headquarters and regional economic and social commissions.

**Security of United Nations special events:** coordination and provision of security services for approximately 200 United Nations special events and conferences held away from United Nations premises per year.

**Specialized security services:** specialized security services, including the provision of close protection for senior United Nations officials and visiting dignitaries, and investigations of security incidents and fire safety.

## **Subprogramme 2**

### **Regional field operations**

**Objective**

28.4 The objective, to which this subprogramme contributes, is to ensure the safety and security of personnel and the security of United Nations premises and assets in the United Nations field duty stations to enable the implementation of United Nations mandates, programmes and activities worldwide.

**Deliverables**

28.5 Table 28.2 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 28.2

**Subprogramme 2: deliverables for the period 2020–2022, by category and subcategory***Category and subcategory***E. Enabling deliverables****Safety and security**

**Security assessments:** security services and deployment of 50 security personnel in response to emergencies.

**Training and capacity-building:** workshops and training on crisis management/preparedness, analysis, security management, leadership and best practices for key security personnel of United Nations security management systems, such as designated officials for security, chief security advisers and security advisers.

## **Subprogramme 3**

### **Specialized operational support**

**Objective**

28.6 The objective, to which this subprogramme contributes, is to ensure the safety and security of United Nations operations, premises and personnel, and improve the efficiency and effectiveness of the security operations and the security management system of the United Nations.

## Deliverables

28.7 Table 28.3 lists all deliverables, by category and subcategory, for the period 2020–2022 that contributed and are expected to contribute to the attainment of the objective stated above.

Table 28.3

### Subprogramme 3: deliverables for the period 2020–2022, by category and subcategory

*Category and subcategory*

#### E. Enabling deliverables

##### Safety and security

**Critical incident stress management:** provision of emotional first aid and psychological support to United Nations personnel following reported critical incidents or as a resilience-building measure, stress management and resilience-building training for personnel and dependents in high-risk duty stations, training on critical incident stress management during emergencies to 120 United Nations counsellors and external mental health professionals, technical supervision to United Nations field counsellors, expert advice and consultations on psychosocial well-being to 450 managers in the field and at Headquarters, and briefings on the management of stress and critical incident stress policy.

**Physical security:** providing dedicated assessments of the physical security of United Nations premises globally, as well as topical guidance, physical security training and analysis of data provided by the physical security assessment app.

**Training and capacity-building:** provision of security learning throughout the United Nations security management system through the use of technology, diverse learning methodologies and partnerships to enhance delivery capacities.

**Protection coordination:** implementation of the Department's protective services strategy with continued travel tracking and coordination of the movement of senior United Nations officials, in addition to planning and coordinating with respective Missions the delivery of mandatory certification training to close protection officers.

22-01206 (E) 280422
