Seventy-eighth session

Item 101 of the provisional agenda*

General and complete disarmament

United Nations Register of Conventional Arms

Report of the Secretary-General

Summary

The present report, submitted pursuant to General Assembly resolution [77/69](#), contains information received from Member States on the export and import of conventional arms covered by the United Nations Register of Conventional Arms, as well as information on their international transfers of small arms and light weapons, in accordance with the “seven-plus-one formula” referred to in paragraph 3 of the same resolution.

The report also contains additional background information received from Member States on military holdings and procurement through national production for the calendar year 2022. As at the date of submission of the present report, the Secretary-General had received reports from 55 Governments.

I. Introduction

1. The present report is the thirty-first consolidated report on the United Nations Register of Conventional Arms issued by the Secretary-General since the establishment of the Register.¹ The General Assembly, in its resolution 77/69, called upon Member States to provide, on an annual basis, data and information on their international transfers of major conventional arms covered by the Register, including nil reports, as well as information on procurement through national production and military holdings, as part of additional background information.

2. The General Assembly, in its resolution 71/44, called upon Member States to submit their views on the continuing operation of the Register and its further development, including on whether the absence of small arms and light weapons as a main category in the Register has limited its relevance and directly affected decisions on participation. Furthermore, the Assembly requested the Secretary-General to continue to assist Member States to build capacity to submit meaningful reports and encouraged States in a position to do so to provide assistance for this purpose, upon request, including capacity to report on small arms and light weapons using the seven-plus-one formula.

3. The Secretary-General has underscored the continued relevance of the Register in building trust among States on military matters and has reiterated his call for all States to participate in its operation through the submission of an annual report.

II. Actions taken by the Secretariat

4. The year 2022 marked the thirtieth anniversary of the United Nations Register of Conventional Arms, which the Office for Disarmament Affairs commemorated with a side event.

5. On 13 February 2023, the Office for Disarmament Affairs sent a note verbale to Member States seeking their inputs, followed by email reminders sent to national points of contact and permanent missions of Member States in New York. The replies received are reproduced in section III of the present report. Any national reports and additional information received from Governments after the submission of the report will be made available in the online database.²

6. The Office for Disarmament Affairs continued to maintain the online database and the online reporting tool, ensuring the accuracy of information received from States. During the reporting period, 60 per cent of the States that submitted a report used the online reporting tool.

7. In April 2023, the Office for Disarmament Affairs published an Occasional Paper entitled *The Global Reported Arms Trade: Transparency in Armaments Through the United Nations Register of Conventional Arms – A Guide to Assist National Points of*

¹ The first 30 reports were issued under the following symbols: A/48/344 and Corr.1–3 and Add.1–3; A/49/352 and Corr.1–2 and Add.1–4; A/50/547 and Corr.1 and Add.1–4; A/51/300 and Add.1–5; A/52/312 and Corr.1–2 and Add.1–4; A/53/334 and Corr.1–2 and Add.1–2; A/54/226 and Corr.1 and Add.1–6; A/55/299 and Corr.1 and Add.1–6; A/56/257 and Corr.1 and Add.1–2; A/57/221 and Corr.1–2 and Add.1–3; A/58/203 and Corr.1–2 and Add.1–2; A/59/193 and Corr.1–2 and Add.1–2; A/60/160 and Corr.1–2 and Add.1–3; A/61/159 and Corr.1–2 and Add.1–3; A/62/170 and Add.1–3; A/63/120 and Add.1–3; A/64/135 and Add.1–3; A/65/133 and Add.1–5; A/66/127 and Corr.1–2; A/67/212 and Corr.1–2 and Add.1–2; and A/68/138 and Add.1; A/69/124 and Add.1; A/70/168 and Add.1; A/71/138 and Add.1; A/72/331; A/73/185; A/74/201; A/75/152; A/76/130; and A/77/165.

*Contact in Submitting Their National Reports.*³ This Paper provides updated guidance in support of Member States' participation in the Register.

8. On 2 and 3 May 2023, the Office for Disarmament Affairs, in partnership with the United Nations Institute for Disarmament Research, held virtual training workshops for national points of contact and staff from permanent missions of Member States on preparing submissions for the Register. The training workshops contributed to raising awareness about the importance of transparency in armaments and building States' reporting capacity. In total, 65 government representatives attended the training workshops.

9. As per the information exchange arrangement between the Office for Disarmament Affairs and the secretariat of the Arms Trade Treaty, States parties to the Treaty were able to indicate whether their annual Arms Trade Treaty reports should be shared with the Office for Disarmament Affairs as reports for the Register. As at the date of submission of the present report, the Arms Trade Treaty secretariat had transmitted 15 such annual reports to the Office for Disarmament Affairs. Of these, nine had not been submitted separately to the Register.

10. The Office for Disarmament Affairs held monthly meetings with the informal group of friends of the Register, a new mechanism created upon the recommendation of the 2022 Group of Governmental Experts on the United Nations Register of Conventional Arms to provide support to the Secretariat and Member States in implementing the recommendations contained in the report of the Group and revitalizing the Register.

11. The number of reports submitted by Governments for the Register increased during the most recent reporting cycles (see table).

Table

Number of reports received from Governments for the United Nations Register of Conventional Arms

<i>Publication year of the report of the Secretary-General</i>	<i>Number of reports received from Governments prior to publication</i>
2023	55
2022	37 ^a
2021	34 ^b

^a An additional 23 reports were received after the publication of the report of the Secretary-General on the United Nations Register of Conventional Arms ([A/77/165](#)).

^b An additional 8 reports were received after the publication of the report of the Secretary-General on the United Nations Register of Conventional Arms ([A/76/130](#)).

Note: Data in this table are sourced from Defence Export Controls Branch, Australian Department of Defence, which assess all permit applications. The data refers to permits which were authorized but does not reflect actual tangible or intangible export of items or technology. The values identified in this table are based on life-of-permit details provided by export applicants. In some cases permits are granted for a number of years, with values reflecting the life of the permit. Data in this table do not include items considered parts and components, items being returned for repair and return, items that do not meet Arms Trade Treaty reporting requirements or items being returned to a home country following that country's military training or exercise in Australia.

In line with the commitments of El Salvador to the United Nations under General Assembly resolution [77/69](#) entitled “Transparency in armaments”, I have the honour to report the importation (transfer of control) in 2022 of 4,150 firearms, including small arms and light weapons, pursuant to article 2, category VIII of the Arms Trade Treaty. This information has been reported to the technical secretariat of the Arms Trade Treaty for transmittal to the United Nations Office of Disarmament.

Views on the Register

“Israel welcomes the continuing operation of the United Nations Register of Conventional Arms and the efforts made by the United Nations Member States of the Register to make this significant measure for confidence, trust and security-building between States as relevant and universal as possible, taking into account national, regional and global security concerns of all. Convinced of the importance of adherence to the Register and its specific contribution to regional and global stability and security, Israel responds to the Register annually, since its foundation in 1992, according to its categories on major conventional arms. Israel’s policy on reporting conventional arms transfers is to report the departure or arrival of relevant military equipment from or to its territory. Israel believes that consolidating the existing United Nations Register, by reaching out to States in problematic regions such as the Middle East and convincing them to adhere to it, should be our first priority. Israel supports the multilateral and bilateral cooperation necessary to eradicate all aspects of the illicit trafficking and proliferation of conventional arms.”

Related policies**Three Principles on Transfer of Defense Equipment and Technology**

While maintaining its basic philosophy as a peace-loving nation that conforms to the Charter of the United Nations and the course it has taken as a peace-loving nation, Japan will control the overseas transfer of defence equipment and technology based on the Three Principles on Transfer of Defence Equipment and Technology. The main contents of the Principles are as follows.

(1) Clarification of cases where transfers are prohibited (the first Principle)

Overseas transfer of defence equipment and technology will not be permitted when: (a) the transfer violates obligations under treaties and other international agreements that Japan has concluded; (b) the transfer violates obligations under United Nations Security Council resolutions; or (c) the defence equipment and technology is destined for a country party to a conflict (a country against which the United Nations Security Council is taking measures to maintain or restore international peace and security in the event of an armed attack);

(2) Limitation to cases in which transfers may be permitted as well as strict examination and information disclosure (the second Principle)

In cases not within (1) above, cases in which transfers may be permitted will be limited to the following cases. Those cases will be examined strictly while ensuring transparency. The transfer contributes (a) to active promotion of peace contribution and international cooperation; or (b) Japan's security. Significant cases that require especially careful consideration from the viewpoint of Japan's security will be examined at the National Security Council. As for the cases that were deliberated at the National Security Council, the Government will disclose their information in accordance with the Act on Access to Information Held by Administrative Organs (Law No. 42 of 1999).

(3) Ensuring appropriate control regarding extra-purpose use or transfer to third parties (the third Principle)

In cases satisfying (2) above, overseas transfer of defence equipment and technology will be permitted only in cases where appropriate control is ensured. More concretely, the Government will in principle oblige the Government of the recipient country to gain its prior consent regarding extra-purpose use and transfer to third parties.

Views on the Register

The State of Qatar possesses only conventional weapons and only the minimum necessary to maintain the security of the Qatari people and defend the country's sovereignty in the light of regional and international circumstances. Qatar does not seek to stockpile weapons in amounts that exceed its needs. It is trying to reduce its imports of conventional weapons and devote the greater part of its budget to its human development plan in accordance with Qatar National Vision 2030.

Coordination is ongoing with the monitoring authorities of the Wassenaar Arrangement on Export Controls for Conventional Arms and Dual-Use Goods and Technologies, and any changes to the control lists are followed up.

As for light weapons in the State of Qatar, their possession is limited to the armed forces. Possession of small arms by civilians is regulated by Act No. 14 (1999) concerning weapons, ammunition and explosives and its attached schedule. Amendments were issued under Act No. 26 (2010) and its implementing regulations adopted by Ministerial Decision No. 30 (2013). These rules place restrictions on licences to possess or acquire weapons, as well as on trade in such weapons.

With regard to transfers of small arms and light weapons, the State of Qatar is committed to transparency in the arms trade. Act No. 40 (2002) concerning customs sets forth restrictions to secure the State's ports to ensure that no prohibited items, including weapons of any kind, get through.

Training workshops are held to build capacity for staff in the field of conventional arms and combating the illicit trade and proliferation of small arms and light weapons.

The State of Qatar considers transparency in armaments to be important and necessary in building confidence and reinforcing international peace and security.

Conventional Arms Transfer Policy

23 February 2023

Memorandum on United States Conventional Arms Transfer Policy

National Security Memorandum/NSM-18

Memorandum for the Secretary of State, the Secretary of the Treasury, the Secretary of Defence, the Secretary of Commerce, the Secretary of Energy, the Director of National Intelligence, the Assistant to the President for National Security Affairs

Subject: United States Conventional Arms Transfer Policy Section

Section 1. Purpose

The United States Conventional Arms Transfer (CAT) Policy establishes the executive branch's priorities and rationale for adjudicating the export of conventional arms. The transfer of defence articles and services is an important tool for achieving United States foreign policy and national security objectives by helping allies and partners increase their contributions to global security, as well as by promoting shared interests with allies and partners. Acquisitions of United States defence articles and services by trusted allies and partners reinforce diplomatic relations and deepen military interoperability, in turn shaping the international security environment in a manner that furthers United States foreign policy and national security interests.

The United States is stronger and safer when it works in concert with allies and partners, and arms transfers are an important mechanism to strengthen partner contributions to global security and reinforce these security relationships. Mutually beneficial alliances and partnerships are an enduring strength of the United States, and are critical to achieving our objectives. As the United States faces complex international challenges, this policy will facilitate the United States' ability to work with its allies and partners to secure and promote United States interests, including protecting human rights, bolstering international security and stability, maintaining technological advantages, strengthening interoperability, and preventing proliferation and arms diversion. The transfer of United States defence articles and services is a tangible symbol of United States commitment and partnership to recipient countries, their neighbours, and United States competitors.

The United States CAT Policy will bolster the security of allies and partners and contribute to shared security objectives; enhance global deterrence; promote respect for international humanitarian law and human rights; adhere to international non-proliferation norms; strengthen partnerships that preserve and extend our global influence; spur research and development efforts; and enhance interoperability with our allies and partners. By aligning United States conventional arms transfer policy with United States foreign policy and national security objectives, the United States can continue to be the primary security cooperation partner of choice for its allies and partners, as well as a global leader in advancing the protection of human rights, supporting non-proliferation, and strengthening stability.

The United States will promote norms and controls for the responsible international transfer of conventional arms and exercise restraint in transfers of weapons systems that may be destabilizing or dangerous to international peace and security. The United States will consider arms transfers on a case-by-case basis, taking into account the diversity of United States foreign policy and national security interests. In cases where the United States denies arms transfers for any of the reasons described in the considerations of this policy, it will encourage other arms exporting

countries to exercise commensurate restraint when facing similar decisions. To this end, the United States aims to serve as a model for other countries' national policies and practices related to the responsible international transfer of conventional arms. Out of a desire to promote both norms and controls, and consistent with statutory requirements, the United States will continue to require adherence to end-use monitoring requirements. Further, when needed, the United States will conduct defence institution building to promote compliance with international humanitarian law and the law of armed conflict.

United States foreign policy and national security objectives are best advanced by facilitating arms transfers to trusted actors who will use them responsibly and who share United States interests. This policy recognizes that, when not employed responsibly, defence materiel can be used to violate human rights and international humanitarian law, increase the risk of civilian harm, and otherwise damage United States interests.

Section 2. United States Conventional Arms Transfer Policy scope and objectives

This policy applies to decisions on whether to authorize the transfer of United States arms to a foreign user, including certain items on the Commerce Control List, the transfer of defence articles, related technical data, and defence services, regardless of the authority or United States Government department or agency under which the transfer would occur.

The United States CAT Policy supports the following United States foreign policy and national security objectives:

- Strengthen the collective security of the United States and its allies and partners by enhancing interoperability and supporting United States-led diplomacy in building and maintaining international coalitions.
- Help allies and partners contribute to global security and deter and defend themselves against aggression and foreign malign influence.
- Promote international peace and stability and the settlement of international disputes through diplomacy and deterrence.
- Strengthen United States national security by reinforcing respect for human rights, international humanitarian law, democratic governance, and rule of law.
- Prevent arms transfers that risk facilitating or otherwise contributing to violations of human rights or international humanitarian law.
- Strengthen ally and partner capacity to respect their obligations under international law and reduce the risk of civilian harm, including through arms transfers, as well as appropriate tools, training, advising, and institutional capacity-building efforts.
- Ensure the United States military maintains technological advantages over current and potential adversaries and promote the United States' comparative advantage over our strategic competitors, including Russia and China.
- Strengthen the United States manufacturing and defence industrial base and ensure resiliency in global supply chains.
- Ensure that arms transfers do not fuel corruption or undermine good governance, while incentivizing effective, transparent, and accountable security sector governance.
- Prevent proliferation of equipment and technology that is destabilizing, would advance the ability to develop or deliver weapons of mass destruction, or would

otherwise provide capabilities inconsistent with international non-proliferation agreements, arrangements, and norms.

Section 3. Arms transfer decisions

Arms transfer decisions will continue to meet the requirements of all applicable statutes, including:

- The Arms Export Control Act of 1976, as amended
- The Export Control Reform Act of 2018
- The Foreign Assistance Act, the International Emergency Economic Powers Act, and annual National Defense Authorization Acts

Arms transfer decisions will be consistent with the requirements of all applicable export control regulations and United States international obligations and commitments. These laws and regulations will apply, as appropriate, regardless of whether transfers are accomplished through direct commercial sales, Government-to-Government transfers, export or re-export approvals of certain items on the Commerce Control List, United States assistance programmes, approvals for the retransfer of arms, changes of end use, or upgrades.

As decisions regarding arms transfers are important tools for achieving United States foreign policy and national security objectives, the Secretary of State shall coordinate decisions regarding arms transfers with other relevant executive departments and agencies. The executive branch will, in consultation with the Congress as appropriate, review transfers of conventional arms to ensure alignment with United States foreign policy and national security objectives and will integrate arms transfer policy into broader diplomatic strategies that promote United States foreign policy and national security objectives.

All decisions on potential arms transfers will be made on a case-by-case basis, taking into account the following considerations:

- The degree to which the transfer supports United States strategic and foreign policy interests and bolsters the capabilities of our allies and partners to counter international and transnational threats.
- The risk that the recipient may use the arms transfer to contribute to a violation of human rights or international humanitarian law, based on an assessment of the available information and relevant circumstances, including the capacity and intention of the recipient to respect international obligations and commitments.
- The overall stability of the recipient country's political system, and the degree to which a receiving Government possesses well-governed security institutions that are subject to the rule of law, with effective accountability mechanisms for its security sector, effective civilian control of security forces, and a demonstrated commitment to improving transparency and countering corruption in its defence acquisition system.
- The risk that the transfer will have adverse political, social, or economic effects within the recipient country, including by negatively impacting the protection of human rights, fundamental freedoms, or the activity of civil society; encourage or contribute to corruption; contribute to instability, authoritarianism, or transnational repression; contribute to impunity of security forces; or undermine democratic governance or the rule of law.
- The degree to which the transfer contributes to ally and partner interoperability with United States forces and increases the partner's ability to operate alongside or in lieu of United States forces.

- The degree to which the transfer reduces an ally's or partner's dependence on United States competitors and/or helps displace long-term reliance on those competitors.
- The degree to which the transfer increases United States access and influence in the support of strategic, foreign policy, and defence interests; contributes to countering terrorism, narcotics trafficking, transnational organized crime, or similar threats to national security; and advances the United States' interests in regional stability.
- The degree to which the introduction of a capability could destabilize a country, increase regional tensions, or contribute to an arms race.
- The degree to which (a) the recipient is confronting, has confronted, or is likely to confront armed aggression from United States adversaries or strategic competitors, and (b) the transfer is related to improving the recipient's self-defence capabilities against such aggression.
- Whether the transfer is consistent with United States international arms control, disarmament, and non-proliferation commitments and obligations.
- The recipient's ability to field, maintain and support, employ, secure, and fund the requested system effectively and appropriately in accordance with its intended end use.
- The risk of diversion and the recipient's ability and willingness to protect sensitive equipment and technology, including its history of compliance with end-use requirements and whether the end-use country maintains strong export controls and non-proliferation practices, which can be demonstrated, among other things, by its membership and/or alignment with multilateral non-proliferation regimes.
- An assessment of whether the transfer might contribute to a recipient's pursuit of weapons of mass destruction and their means of delivery.
- The transfer's contribution to United States innovation and technological advancement that helps improve United States and partner responses to security threats, as well as its effect on the United States defence industrial base.
- The transfer's effect on the technological advantage of the United States, and the risk of compromise to United States systems and operational capabilities.
- The risk that the transfer of a competitor's system would undermine United States national security considerations outlined above.

If the United States determines at any time that a transfer is no longer in accordance with United States foreign policy objectives, national security goals, or legal obligations, the United States may cease the transfer of or future support for a transferred defense article or service.

Section 4. Arms transfers and human rights

United States national security is strengthened by greater respect worldwide for human rights and international law, including international humanitarian law. The legitimacy of and public support for arms transfers among the populations of both the United States and recipient nations depends on the protection of civilians from harm, and the United States distinguishes itself from other potential sources of arms transfers by elevating the importance of protecting civilians. Strong United States human rights and security sector governance standards for arms transfers – in addition to ensuring compliance with end-use requirements and providing human rights and international humanitarian law training, as appropriate – encourage recipient

Governments to respect international law, human rights, and good governance, and help prevent violations of human rights or international humanitarian law. These United States standards can serve as a model for other countries' policies on the responsible international transfer of conventional arms. The United States will work bilaterally and multilaterally to assist other suppliers in developing responsible arms transfer policies.

In light of these considerations, and consistent with applicable law, no arms transfer will be authorized where the United States assesses that it is more likely than not that the arms to be transferred will be used by the recipient to commit, facilitate the recipients' commission of, or to aggravate risks that the recipient will commit: genocide; crimes against humanity; grave breaches of the Geneva Conventions of 1949, including attacks intentionally directed against civilian objects or civilians protected as such; or other serious violations of international humanitarian or human rights law, including serious acts of gender-based violence or serious acts of violence against children. This assessment shall include consideration of the available information and relevant circumstances, including the proposed recipient's current and past actions, credible reports that the recipient committed any of the above violations, and other information related to the overall capacity or intention of the recipient to respect international law. If a transfer had previously been authorized and circumstances have changed in ways that would materially increase the risk of any of the negative consequences listed above, the United States will reassess and, as appropriate, review options for ceasing the transfer of or support for a previous authorization.

The recipient Government of an arms transfer is responsible for complying with conditions of arms transfers and its obligations under international law, including those relating to human rights. The United States will engage in appropriate monitoring as part of its effort aimed at ensuring transferred arms are used responsibly and in accordance with these conditions and obligations.

Section 5. Arms transfer restraint and promotion of responsible defence trade

The United States will continue to promote control, restraint, and transparency of arms transfers, including leading the development of norms and controls on the responsible international transfer of arms that contain sensitive technologies. The United States will exercise restraint in international arms transfers that may be destabilizing or threaten international peace and security and will also exercise restraint in transfers involving materials that might be used as delivery systems for weapons of mass destruction or result in adversaries obtaining capabilities that could threaten the security of the United States or of our allies and partners.

The United States recognizes that good security sector governance, including the transparent, accountable, and legitimate management and oversight of security policy and practice, is integral to the responsible possession and use of United States-origin defence materiel. The United States will therefore encourage recipients of United States arms transfers to demonstrate effective security sector governance and seek to ensure their ability to protect United States-origin defence materiel from misuse or illicit transfer, properly deploy and sustain that materiel, and conduct military operations in a manner that addresses, rather than exacerbates, the underlying drivers of conflict.

The United States will continue participation in and support for multilateral, regional, and subregional arrangements that contribute to the objectives and interests outlined in this policy, such as the United Nations Register of Conventional Arms; the United Nations Standardized Instrument for Reporting Military Expenditures; the United Nations Principles for Transactions Linked to Foreign Government End Users

for Products or Services with Surveillance Capabilities; regional initiatives that enhance transparency in conventional arms transactions; the Missile Technology Control Regime; the Wassenaar Arrangement on Export Controls for Conventional Arms and Dual-Use Goods and Technologies; the Inter-American Convention on Transparency in Conventional Weapons Acquisitions; and any other relevant or successor arrangements. Such multilateral arrangements promote common national policies of restraint against the transfer of armaments and sensitive dual use goods and technologies to states whose conduct is cause for serious concern. The United States will work bilaterally and multilaterally to assist other countries transferring conventional arms in developing effective export control mechanisms in support of responsible export policies that align with those of the United States and the highest possible common international standards for regulating the international trade in conventional arms.

Section 6. Supporting arms transfer decisions

Arms transfer decisions are foreign policy and national security decisions that support broader United States policy objectives. The United States will pursue policies, processes, and regulatory changes to create efficiencies in the security cooperation field to provide conventional capabilities that support United States national interests. Although the general policy principle of restraint shall govern decision-making on arms transfers, in an increasingly competitive market, the United States Government will promote transfers when they are in the United States national interest, in line with the considerations of this policy, and consistent with defence trade advocacy procedures. Arms transfers consistent with security cooperation objectives enable the United States to enhance partner interoperability and enable partners to export security.

The United States will seek to address impediments to bilateral defence trade relations with potential recipient countries that may preclude prudent arms transfers from proceeding, limit United States Government and United States defence contractors' market access, or prevent United States entities from competing on a level playing field.

Section 7. Arms transfers involving emerging technologies

This policy applies to all United States arms transfers, including those that involve emerging technologies. Consistent with the Export Control Reform Act of 2018 and other existing law, the United States also will review and develop, as required, additional policy guidance for the review of arms transfers related to or incorporating emerging technologies implicating national security.

Section 8. Earlier presidential actions

This memorandum supersedes National Security Presidential Memorandum 10 of April 19, 2018 (United States Conventional Arms Transfer Policy).

Section 9. General provisions

(a) Nothing in this memorandum shall be construed to impair or otherwise affect:

- (i) The authority granted by law to an executive department or agency, or the head thereof; or
- (ii) The functions of the Director of the Office of Management and Budget relating to budgetary, administrative, or legislative proposals.

(b) This memorandum shall be implemented consistent with applicable law and subject to the availability of appropriations.

(c) This memorandum is not intended to, and does not, create any right or benefit, substantive or procedural, enforceable at law or in equity by any party against the United States, its departments, agencies, or entities, its officers, employees, or agents, or any other person.
