Seventieth session

First Committee

Agenda item 97

General and complete disarmament

Afghanistan, Australia and France: draft resolution

Countering the threat posed by improvised explosive devices

The General Assembly,

Expressing grave concern over the devastation caused by the increasing use of improvised explosive devices by illegal armed groups, terrorists and other unauthorized recipients,¹ which has affected a large number of the world's countries and has resulted in thousands of casualties, both civilian and military,

Expressing concern at the serious harm that such improvised explosive device attacks have caused to United Nations staff and peacekeepers, and to humanitarian workers by threatening their lives, increasing the cost of their activities, limiting their freedom of movement and affecting their ability to deliver on their mandates,

Expressing concern also about the negative impact of these attacks on socioeconomic development, infrastructure and freedom of movement, and the security and stability of States, and thus underlining the need to address this issue in order to achieve relevant goals and targets under the 2030 Agenda for Sustainable Development,² in particular target 16.1 to significantly reduce all forms of violence and related death rates everywhere,

Recognizing that the wide spectrum of materials that can be used for the manufacture of improvised explosive devices, including those sourced from the military and civilian industry, contributes to their diverse nature and their deployment methods, which thus requires an appropriate approach to the formulation of measures to counter them,

Noting the important role that States can play in working with business entities to develop effective strategies to counter the threat of improvised explosive devices,³ including to prevent the adverse impact of the diversion of materials and the potential loss of revenue and risk to reputation,

* Second reissue for technical reasons (4 November 2015).

¹ See resolution 69/51 and [A/CONF.192/BMS/2014/2](#).

² Resolution 70/1.

³ See the Guiding Principles on Business and Human Rights: Implementing the United Nations "Protect, Respect and Remedy" Framework ([A/HRC/17/31](#)).

Stressing the paramount need to prevent illegal armed groups, terrorists and other unauthorized recipients from, and identify the networks that support them in, obtaining, handling, financing, storing, using or seeking access to all types of explosives, whether military or civilian, as well as other military or civilian materials and components that can be used to manufacture improvised explosive devices, including detonators, detonating cords and chemical components, while at the same time avoiding any undue restrictions on the legitimate use of those materials,

Stressing also the importance of securing conventional ammunition stockpiles in order to mitigate the risk of their diversion to illicit use as materials for improvised explosive devices,

Stressing further the importance of engagement by all Member States in a comprehensive and coordinated community of action to countering the global threat posed by improvised explosive devices in the hands of illegal armed groups, terrorists and other unauthorized recipients, taking into account national capacities,

Noting the discussions on the issue of improvised explosive devices by the informal group of experts under the Protocol on Prohibitions or Restrictions on the Use of Mines, Booby-traps and Other Devices as amended on 3 May 1996 (Amended Protocol II)⁴ and on the technical annex of the Protocol on Explosive Remnants of War (Protocol V)⁵ to the Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons Which May Be Deemed to Be Excessively Injurious or to Have Indiscriminate Effects.⁶

Noting also the multilateral efforts to counter improvised explosive devices of the Programme Global Shield, led by the World Customs Organization and assisted by the International Criminal Police Organization and the United Nations Office on Drugs and Crime, to prevent the smuggling and illicit diversion of precursor chemicals that could be used to build improvised explosive devices, the network of regional and multilateral communities of action established by States to counter improvised explosive devices, the research on those devices being undertaken by the United Nations Institute for Disarmament Research and the work undertaken by the United Nations Mine Action Service to mitigate the threat posed by those devices to civilians, United Nations staff, peacekeepers, and humanitarian personnel, in particular in the field,

Reaffirming the inherent right of Member States to individual or collective self-defence in accordance with Article 51 of the Charter of the United Nations,

1. *Strongly urges* States to develop and implement, where appropriate, all necessary national measures to promote the exercise of vigilance by their nationals, persons subject to their jurisdiction and firms incorporated in their territory or subject to their jurisdiction that are involved in the production, sale, supply, purchase, transfer and storage of precursor components and materials that could be used to make improvised explosive devices;

2. *Strongly encourages* States, where appropriate, to develop and adopt their own national policy to counter improvised explosive devices that includes civilian-military cooperation, to strengthen their countermeasure capability to combat illegal armed groups, terrorists and other unauthorized recipients in their use of improvised explosive devices, and notes that the policy could include measures to support

⁴ United Nations, *Treaty Series*, vol. 2048, No. 22495.

⁵ United Nations, *Treaty Series*, vol. 2399, No. 22495.

⁶ United Nations, *Treaty Series*, vol. 1342, No. 22495.

international and regional efforts to prevent, protect against, respond to, recover from and mitigate attacks using improvised explosive devices and their widespread consequences;

3. *Encourages* States to enhance, as appropriate, international and regional cooperation, including the sharing of information on good practices as appropriate and where relevant, in cooperation with the International Criminal Police Organization, in order to address the theft, diversion, loss and illicit use of materials for making improvised explosive devices, while ensuring the security of sensitive information shared;

4. *Encourages* States to also take measures to stem the transfer of knowledge of improvised explosive devices and their construction and use by illegal armed groups, terrorists and other unauthorized recipients, as well as the illicit acquisition of components over the Internet;

5. *Also encourages* States to participate, in accordance with their obligations and commitments, in the ongoing work on improvised explosive devices by the informal group of experts under the Protocol on Prohibitions or Restrictions on the Use of Mines, Booby-traps and Other Devices as Amended on 3 May 1996 (Amended Protocol II) to the Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons Which May Be Deemed to Be Excessively Injurious or to Have Indiscriminate Effects;

6. *Further encourages* States to participate, as appropriate, in a comprehensive and coordinated community of action to counter improvised explosive devices in accordance with their respective international obligations and commitments, and to consider supporting the Programme Global Shield, the proposal for a Counter-improvised explosive device global alliance emanating from the inaugural International Counter-Improvised Explosive Device Leaders' Forum and other multilateral and regional efforts;

7. *Encourages* States, and international, regional and other organizations with relevant expertise and that are in a position to do so, to render technical, financial and material assistance to interested States upon their request aimed at strengthening the capacity of such States to counter the threat of improvised explosive devices, including through assistance for developing good practices for the protection of civilians from attacks by improvised explosive devices, and to provide appropriate assistance to the victims of such attacks;

8. *Also encourages* States to respond to the needs of today's peacekeepers to operate in new threat environments involving improvised explosive devices, including providing, in consultation with the Department of Peacekeeping Operations of the Secretariat, the appropriate training, capabilities, information and knowledge management and technology that is required to counter improvised explosive devices, and to ensure that adequate financial resources are allocated to meet such needs;

9. *Recognizes* that improvised explosive devices are used in terrorist activities, takes note of the work of the Counter-Terrorism Implementation Task Force, and urges its further attention to the issue of improvised explosive devices in line with the mandates of its associated entities;

10. *Urges* Member States to fully comply with all relevant United Nations resolutions, including those related to the prevention of the use and access by terrorist groups of materials that can be used in the making of improvised explosive devices;⁷

11. *Stresses* the need for States to take appropriate measures to strengthen their own national ammunition stockpile management in order to prevent the diversion of materials for making improvised explosive devices to illicit markets, to illegal armed groups, terrorists and other unauthorized recipients, and encourages the application of the International Ammunition Technical Guidelines for the safer and more secure management of ammunition stockpiles, while also recognizing the importance of capacity-building in this regard;⁸

12. *Encourages* States and relevant international and regional organizations and non-governmental organizations to continue to build upon existing awareness and risk education campaigns regarding the urgent threat of improvised explosive devices;

13. *Also encourages* States and relevant international and regional organizations to engage, as appropriate, business entities in discussions and initiatives on countering improvised explosive devices, including on issues such as accountability for dual-use components, improving the regulation of explosive precursors, where possible and as appropriate, strengthening security for the transport of explosives and at explosive facilities, as well as enhancing the vetting procedures for personnel with access to explosives, while avoiding undue restrictions on the legitimate use of and access to such materials;

14. *Strongly encourages* States to share information on a voluntary basis on the diversion of commercial-grade explosives and commercially available detonators to the illicit trade, and transfers to illegal armed groups, terrorists and other unauthorized recipients;

15. *Takes into account* the existing initiatives at the international, regional and national levels to counter improvised explosive devices, and encourages the engagement by States in an open and inclusive dialogue on steps forward to harmonize diverse ongoing efforts;

16. *Requests* the Secretary-General, within existing resources, to prepare a report on the issue of improvised explosive devices in the light of the present resolution, acknowledging and taking into account existing efforts already being undertaken and seeking the views of Member States, and to provide in his report initial building blocks and recommendations for ways forward on this issue for consideration by the General Assembly at its seventy-first session;

17. *Decides* to include in the provisional agenda of its seventy-first session, under the item entitled “General and complete disarmament”, a sub-item entitled “Countering the threat posed by improvised explosive devices”.

⁷ Including Security Council resolutions 1373 (2001), 2160 (2014), 2161 (2014) and 2199 (2015).

⁸ The General Assembly, in its resolution 66/42, welcomed the completion of the International Ammunition Technical Guidelines and the establishment of the “SaferGuard” knowledge resource management programme for the stockpile management of conventional ammunition.
