Committee for Programme and Coordination

Fifty-fourth session

Organizational session, 24 April 2014

Substantive session, 2-27 June 2014

Item 4 (b) of the provisional agenda*

**Coordination questions: New Partnership for
Africa's Development**

United Nations system support for the New Partnership for Africa's Development

Report of the Secretary-General

Summary

The present report provides an overview of activities undertaken by the United Nations system in support of the New Partnership for Africa's Development (NEPAD) since June 2013. It is organized around the nine clusters established under the Regional Coordination Mechanism of the United Nations agencies working in Africa, convened by the Economic Commission for Africa.

The need for the United Nations to provide more focused and coordinated support to African countries to implement the recommendations made in the outcome document of the United Nations Conference on Sustainable Development is reiterated in the report, as is the need to ensure that Africa's priorities are reflected in the formulation and implementation of the post-2015 development agenda. United Nations entities are called upon to align their support with the priorities defined in the African Union Commission Strategic Plan 2014-2017 and the NEPAD Strategic Framework 2014-2017, as well as for the formulation and implementation of the African Union Agenda 2063.

* [E/AC.51/2014/1](#).

I. Introduction

1. At its forty-fifth session, the Committee for Programme and Coordination recommended that the General Assembly request the Secretary-General to report to the Committee at its forty-sixth session, and annually thereafter, on the support provided by the United Nations system to the New Partnership for Africa's Development (NEPAD), a programme of the African Union (see [A/60/16](#), para. 237). The request was endorsed by the Assembly in its resolution [68/20](#).

II. Support for the implementation of the New Partnership for Africa's Development

2. The present report describes activities undertaken by the United Nations system in support of NEPAD since June 2013, organized around nine thematic clusters corresponding to the priorities of NEPAD. It was prepared on the basis of inputs received from the organizations, funds, programmes and specialized agencies of the United Nations system as well as departments of the Secretariat in response to the request of the Office of the Special Adviser on Africa for contributions regarding key activities, programmes and projects implemented in the period 2013-2014, highlighting results and impact in both qualitative and quantitative terms.

A. Infrastructure development

3. The infrastructure cluster coordinated by the Economic Commission for Africa (ECA) comprises four subclusters: energy; information and communications technology; transport; and water and sanitation.

4. During the review period, the United Nations system continued to support the implementation of the Programme for Infrastructure Development in Africa. In preparation for the forthcoming Dakar Financing Summit for Africa's Infrastructure, to be held in June 2014, ECA convened a meeting of global experts in finance, planning and infrastructure in October 2013 in Lusaka. The meeting set the pace for quantum and incremental financing for implementation of the Programme and validated 16 regional infrastructure projects that will be featured at the summit.

5. In respect of energy, cluster members supported the development and mainstreaming of a gender-sensitive bioenergy framework and policy guidelines for Africa to scale up the sustainable use of bioenergy. The resulting African Bioenergy Framework and Policy Guidelines were launched in September 2013, to promote local employment in bioenergy.

6. The World Bank, a co-chair of the Sustainable Energy for All initiative of the Secretary-General, continued to provide technical assistance to countries. The World Bank provided \$1.2 billion to support Africa's energy sector and funded regional projects such as the Rusumo Falls hydroelectric and multipurpose project serving Burundi, Rwanda and the United Republic of Tanzania. The International Finance Corporation developed a number of vehicles, including specialized equity funds, to attract institutional investors and channel resources to projects, particularly in infrastructure.

7. The United Nations Development Programme (UNDP) collaborated with the NEPAD Planning and Coordinating Agency to operationalize the Africa Platform for Development Effectiveness in the area of sustainable energy. With the support of the African Union Commission and the African Development Bank, they convened three consultations that resulted in the development of three interconnected frameworks to guide the implementation of the Sustainable Energy for All initiative in Africa. UNDP also supported the NEPAD Planning and Coordinating Agency and the African Union Commission in the establishment of the African Sustainable Energy for All hub and the implementation of the strategy for decentralized energy solutions complemented by a joint resource mobilization initiative.

8. The United Nations Industrial Development Organization (UNIDO) and the Economic Community of West African States (ECOWAS) collaborated to establish regional centres for renewable energy and energy efficiency, in order to increase access to modern energy services and improve energy security in West Africa. UNIDO also provided electricity to several rural areas in Africa. For instance, over 25,000 people in Zambia were provided access to electricity through the realization of three renewable energy mini-grids.

9. In the information and communications technology (ICT) sector, through a project on harmonizing ICT policies in sub-Saharan Africa, the International Telecommunication Union (ITU) supported the efforts of countries to incorporate subregional model laws into national legislation and assisted in updating laws and policies to reflect the current technological environment.

10. In respect of water and sanitation, the World Bank provided \$1.1 billion for water management through the Senegal River Basin water resources project, benefiting Guinea, Mali, Mauritania and Senegal. UNDP, the Global Environment Fund and the International Atomic Energy Agency (IAEA) collaborated to assist African countries in building capacity in integrated water resource management using nuclear and isotopic techniques. These efforts resulted in a regional agreement among Chad, Egypt, Libya and the Sudan on joint management of a shared aquifer.

11. In respect of transport, ECA spearheaded the establishment of the Africa Corridor Management Alliance, which brings together major corridor management organizations in Africa, including the northern corridor, Walvis Bay corridor, Maputo corridor, Abidjan-Lagos corridor and the Ports Management Association for Eastern and Southern Africa. The Alliance contributed to strengthening transport corridors.

12. Cluster members focused their activities on road safety and transport facilitation, and on the development of the Trans-African Highway. ECA collaborated with the Office of the High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States, the World Bank and the African Union Commission to formulate the Intergovernmental Agreement on the Trans-African Highway, in order to improve the access of landlocked developing countries to seaports and trade and to harmonize transport flows among African countries.

B. Governance

13. The governance cluster, coordinated by UNDP, comprises four subclusters: democracy and governance; economic and corporate governance; human rights; and public service and administration.

14. During the review period, the cluster supported the African Governance Architecture and Platform by providing technical assistance to election management bodies and observation processes. Cluster members also supported the implementation of the Human Rights Strategy for Africa and the African Peer Review Mechanism. The cluster further supported the formulation of Agenda 2063, the African Union's 50-year vision and the pan-African global strategy to optimize use of Africa's resources for the benefit of all Africans, by organizing three dialogue forums and preparing a regional report and policy briefs.

15. Following the decision of the African Union to include various health indicators in the African Peer Review Mechanism, including indicators on AIDS, tuberculosis, malaria, and maternal, new born and child health, the Joint United Nations Programme on HIV/AIDS (UNAIDS) and UNDP supported the African Union Commission in organizing a regional meeting. The meeting culminated in an agreement to include four core indicators related to access to HIV treatment and to combating violence against women, in the global AIDS response progress reporting guidelines.

16. The United Nations Democracy Fund provided financial support to 18 new projects during the review period, the majority of which were implemented by local civil society organizations. UNDEF enhanced the civic participation of non-governmental organizations in elections and politics in Cabo Verde, strengthened women and youth participation in local government in Benin and Kenya, and fostered dialogue between leaders and citizens in rural communities in Madagascar. UNDEF also enhanced the capacity of community groups in Nigeria to utilize the Freedom of Information Act and supported improved access to social services for people with disabilities in Rwanda.

17. Throughout 2013, cluster members supported activities to commemorate the tenth anniversary of the African Peer Review Mechanism. ECA published a report entitled "Capturing the twenty-first century: APRM best practices and lessons learned" and "The APRM and land reforms in Africa: enhancing good governance in land management". ECA also initiated a forum on promoting the APRM codes and standards on corporate governance in southern Africa, at which the implementation of corporate governance instruments, frameworks and mechanisms were reviewed.

18. The Office of the Special Adviser on Africa, the Department of Public Information and the secretariat of the African Peer Review Mechanism engaged leaders of the African diaspora and civil society organizations in a dialogue held at United Nations Headquarters in October 2013 on the perspectives on transformative governance and the African Agenda 2063. The dialogue raised awareness about the Mechanism as the unique governance flagship of the African Union and led to policy recommendations for improving popular participation in transformative governance on the continent vis-à-vis Agenda 2063.

19. The United Nations Office on Drugs and Crime (UNODC) supported the implementation of the ECOWAS regional action plan against illicit drug trafficking,

organized crime and drug abuse. Through the West Africa Coast Initiative, UNODC worked with the Department of Peacekeeping Operations, the Department of Political Affairs and the International Criminal Police Organization (INTERPOL) to improve national capacities, cooperation and intelligence-gathering in Liberia, Guinea-Bissau and Sierra Leone. UNODC collaborated with the World Customs Organization to support eight West African countries in the installation of joint airport interdiction task forces at priority international airports in Benin, Cabo Verde, Côte d'Ivoire, Ghana, Mali, Nigeria, Senegal and Togo, where they have been instrumental in making drug seizures.

20. Through its Maritime Crime Programme, UNODC supported Kenya, Mauritius and Seychelles in prosecuting and detaining suspected pirates and in developing anti-piracy communication strategies. UNODC also supported prison reform that led to the development of a comprehensive strategy on alternatives to imprisonment in Kenya.

21. UNODC, together with the Southern African Development Community (SADC), supported the implementation of a regional project that strengthened the capacity of eight member States to implement the United Nations Convention against Transnational Organized Crime and the Protocol to Prevent, Suppress and Punish Trafficking in Persons, Especially Women and Children, supplementing the Convention.

22. The United Nations Conference on Trade and Development (UNCTAD) provided technical assistance to Burundi, Djibouti, Kenya, Lesotho, Nigeria, Rwanda and Zambia in the implementation of their investment policy review recommendations. UNCTAD activities led to the creation of an investment promotion agency in Burundi and the Presidential Council on Investment in Burkina Faso. UNCTAD also contributed to the modernization of Kenya's Investment Promotion Act and the use of a model bilateral investment treaty in Sierra Leone.

23. In Egypt, the global compact local network identified small and medium enterprises as crucial business actors in need of greater capacity-building with regard to anti-corruption efforts. The project developed a guidance manual for such enterprises to assist them in formulating anti-corruption policies and practices. In addition, an integrity pledge for those enterprises and multinational enterprises was developed to aid in measuring and demonstrating the commitment of small and medium enterprises to preventing corruption.

24. In November 2013, UNCTAD also organized the 16th Africa Oil, Gas and Minerals, Trade and Finance Conference and Exhibition in the Niger. The conference provided a platform to discuss issues of transparency and accountability in the management of extractive industries, resulting in the adoption of a resolution calling for targeted actions to implement the Africa Mining Vision on governance, capacity and local content development, and the empowerment of women in the extractive industries.

C. Peace and security

25. The peace and security cluster, co-chaired by the United Nations Office to the African Union, on behalf of the Department of Political Affairs and the African Union Peace and Security Council, comprises four subclusters: the African Peace

and Security Architecture; post-conflict reconstruction and development; emergency preparedness and response; and transitional justice.

26. The United Nations Office to the African Union supported the strategic partnership of the United Nations with the African Union in peace and security through continued implementation of the joint United Nations-African Union workplan on the operationalization of the African Peace and Security Architecture, especially the African Standby Force. The Office provided support for developing and refining African Union policies and guidelines for conflict prevention and peace support operations, including disarmament, demobilization and reintegration, and security sector reform guidelines, standard operating procedures for basic operating security standards, the African Union Mine Action Strategic Framework, assessment of the African Standby Force doctrine, and protection of civilian guidelines for the Lord's Resistance Army initiative. At operational levels, the Office provided technical assistance and mission support to African Union engagements in the Central African Republic and in Mali and participated in the joint review of the African Union Mission in Somalia.

27. In 2013, the United Nations Children's Fund (UNICEF) collaborated with the Special Representative of the Secretary-General for Children and Armed Conflict to deploy child protection specialists in peace support operations and align domestic legislation with child protection and child rights instruments.

28. The Office for the Coordination of Humanitarian Affairs provided support to strengthen the capacity of regional economic communities to coordinate humanitarian assistance, fundraise and manage funds. In particular, the Office shared best practices and provided guidance in developing disaster management policies; facilitated training on humanitarian civil-military coordination; and assisted in establishing systems for rapid response funds and other disaster management resources. In 2013, the Office conducted civil-military coordination assessment and support missions in the Central African Republic and the Democratic Republic of the Congo, and training courses in Kenya and Uganda. The Office also assisted the regional vulnerability assessment committee of SADC in shaping a unified approach to assessing urban vulnerability.

29. In October 2013, on the margins of the high-level thematic debate of the General Assembly on the promotion of investment in Africa and its catalytic role in achieving Africa's development objectives, including those of NEPAD, the Office of the Special Adviser on Africa collaborated with the Office for the Coordination of Humanitarian Affairs and the African Union Commission to organize a briefing by regional economic communities to Member States on building the resilience and capacity of African countries, regional and subregional institutions to pre-empt and respond to humanitarian crises and disasters. The briefing enabled participants to identify relevant capacity needs for strengthening resilience and responding to humanitarian crises in Africa.

30. The Office of the United Nations High Commissioner for Refugees (UNHCR) strengthened its regional response capacity in Senegal and its field presence and coordination capacity in Burkina Faso and the Niger, greatly improving the protection and assistance provided to Malian refugees. UNHCR also strengthened its operational capacity in Mali, South Sudan and in countries receiving refugees from the eastern Democratic Republic of the Congo, facilitating improved access to and distribution of emergency assistance.

31. The International Maritime Organization (IMO) continued its collaboration with UNODC to counter piracy off the coast of Somalia and in the Gulf of Aden. More than 300 trainees benefited from a skill-based training programme on coast guard functions, including operational, technical and logistical functions. Similar collaborative efforts are ongoing in west and central Africa.

D. Agriculture, food security and rural development

32. The agriculture, food security and rural development cluster is co-chaired by the African Union Commission and the Food and Agriculture Organization of the United Nations (FAO).

33. During the reporting period, the cluster achieved substantial results in implementing the Comprehensive Africa Agriculture Development Programme (CAADP) and supporting Africa's agricultural sector, including by strengthening country ownership and leadership, mobilizing political, financial and technical support and engaging diverse regional and national actors.

34. The provision by FAO of technical support to implement the Comprehensive Africa Agriculture Development Programme assisted countries in signing compacts and in preparing CAADP national agricultural and food security investment plans. It also supported countries in applying for funding for such plans from the Global Agriculture and Food Security Programme. Of the 16 countries that were supported, 15 successfully obtained a combined total of \$563 million from the Global Agriculture and Food Security Programme. Through the Renewed Efforts Against Child Hunger initiative, FAO, the World Food Programme (WFP), the World Health Organization (WHO) and UNICEF provided technical and financial support to African countries in respect of the CAADP nutrition capacity development initiative for mainstreaming nutrition in CAADP investment plans and processes.

35. In support of the Comprehensive Africa Agriculture Development Programme, the World Bank's lending for agriculture, food security and rural development amounted to \$786 million in addition to the \$63 million provided under the CAADP multi-donor trust funds. These included \$60 million additional financing for Mali under the West Africa Agricultural Productivity Programme and \$122 million for the regional pastoral livelihoods recovery and resilience project covering Kenya, Uganda and the Intergovernmental Authority on Development. In 2013, CAADP multi-donor trust fund grants were awarded to ECOWAS and SADC and for the development and launch of the African Union/NEPAD initiative on sustaining CAADP momentum.

36. In July 2013, FAO partnered with the African Union Commission to organize a high-level meeting on the theme "Towards African renaissance: renewed partnership for unified approach to end hunger in Africa by 2025 within the CAADP framework", to galvanize agreement on principles and concrete actions to end hunger and malnutrition in Africa, including through engagement of public and private actors. As a result of the meeting, African Union leaders endorsed a declaration to end hunger by 2025.

37. In July 2013, UNICEF supported the organization of the fifth meeting of the African Task Force on Food and Nutrition Development that reviewed the African regional nutrition strategy and produced a nutrition scorecard. The African Union,

the European Union and WHO collaboratively supported capacity development on food and hygiene inspection for more than 29 African countries. WHO also worked with FAO and the African Union Commission to establish an African food safety coordination mechanism and a rapid alert system for food and feed.

38. In October 2013, in advance of the African Union's Year of Agriculture and Food Security in Africa, WFP joined partners to celebrate the 2013 Africa Food and Nutrition Security Day in Niamey. The theme of the celebration was "Towards African renaissance: achieving the right to adequate food and nutrition" and focused on a study on the cost of hunger in Africa. The celebration yielded a series of recommendations, including better coordination of nutrition systems and programmes; multisectoral approaches; supporting nutrition-sensitive action; and putting in place the multiple building blocks of food security, from land rights to agricultural extension services and social protection schemes.

39. In order to help the Sudan and Ethiopia to diversify their traditional agricultural commodity exports, the Common Fund for Commodities facilitated the production, marketing and export of organic bananas. As a result, the Sudan is now exporting organically-grown bananas and Ethiopia is restoring its banana export sector.

E. Industry, trade and market access

40. The cluster, co-chaired by the African Union Commission and UNIDO, supported African regional and subregional organizations in building productive capacity for trade, market access and continent-wide sustainable industrialization.

41. UNIDO continued to work with the African Union Commission, the regional economic communities and African countries to implement the action plan for accelerating the industrial development of Africa, a strategy aimed at mobilizing financial and non-financial resources to increase Africa's competitiveness. Within the framework of the Africa/Accelerated Agribusiness and Agro-industries Development Initiative, UNIDO, FAO and the International Fund for Agricultural Development (IFAD) enhanced the comparative advantages of African countries in developing competitive agro-value chains, including for red meat and cow peas in the Niger, bananas in Uganda and cashew nuts in the United Republic of Tanzania.

42. In the Democratic Republic of the Congo, UNIDO implemented a project to develop the agro-processing sector for livelihoods recovery and job diversification, enabling local populations, particularly women and youth, to gain marketable skills in food processing and food hygiene. In addition, the project established a new electrical cabin at the processing centre, enabling 800 people in surrounding villages to access electricity.

43. With regard to trade, the World Trade Organization (WTO) trained over 650 candidates from Africa in various WTO subjects. WTO continued to increase its support for the Group of African States in Geneva, including by supporting the preparations of African positions for the ninth Ministerial Conference of the World Trade Organization. The Conference resulted in a successful outcome and galvanized the preparation of a post-Bali work programme on the remaining Doha Development Agenda issues.

44. Under the Enhanced Integrated Framework for Trade-Related Technical Assistance for Least Developed Countries, 23 of the 33 African countries covered under the Framework have mainstreamed trade in their national development plans. By early 2014, the number of tier 1 projects increased to 46, with a focus on addressing trade constraints, economic growth and institutional capacity-building.

45. The number of tier 2 approved projects increased by 10, bringing the total to 24 projects. Projects included promoting the Arabic gum sector in Chad; improving the export competitiveness of vanilla, ylang ylang and cloves in the Comoros; commercializing and adding value to mango and mango products in Guinea; and improving the competitiveness of the hides and skins value chain in the Niger.

46. In July 2013, the fourth Global Review on Aid for Trade on the theme “Connecting to value chains” provided an opportunity to examine strategies for African countries and least developed countries to connect and move up in international value chains. As a result, WTO ministers reaffirmed their commitment to the concept of aid for trade, noting that the new aid for trade work programme should be framed by the post-2015 development agenda, with a focus on trade facilitation, trade finance, labour skills, investment environment and infrastructure.

47. In collaboration with the Maghreb Economic Forum, ECA brought together African senior professionals in banking and stock markets, investors and academics to promote the role of the private sector in regional integration. The initiative resulted in the establishment of a Maghreb investment fund and a platform for exchange on upgrading and aligning national financial systems with international standards.

48. Through the Enhancing Arab Capacity for Trade programme, the International Trade Centre (ITC) worked with local organizations in Algeria, Egypt, Morocco and Tunisia to strengthen the international competitiveness of small and medium enterprises and contribute to job creation. For instance, in order to promote South-South trade in Egypt, the programme served to strengthen the skills of businesses in the halal market sector, leading to a fourfold increase of processed food exports to Malaysia.

49. The UNCTAD Automated System for Customs Data strengthened its presence in Africa, reaching 41 countries. In the field of customs automation, the System has reduced costs and clearance times, increased revenue collection and provided accurate and timely international trade statistics. In 2013, Rwanda implemented the Rwanda Electronic Single Window, using the latest System technology that connects 20 other governmental agencies, commercial banks, customs agents and transporters using the Internet.

50. Through its programme for building African capacity for trade (PACT II), ITC supported regional integration in the Common Market for Eastern and Southern Africa, the Economic Community of Central African States and ECOWAS. ITC assisted 3,157 African small and medium enterprises and microproducers in improving their export capacity, strengthening market linkages and increasing export revenues in high-potential sectors such as mango, leather and coffee.

51. A joint project of ITC and the Organisation internationale de la Francophonie increased trade between 14 African countries and 3 Mekong countries, namely, Viet Nam, Cambodia and the Lao People’s Democratic Republic. Achievements in 2013 included the conclusion of technology transfer agreements between Viet Nam and

Burkina Faso in the cashew nut sector, and the establishment of direct cooperation between banks in the two regions, which will significantly reduce transaction time and costs.

F. Environment, population and urbanization

52. The cluster continued to address challenges relating to environmental degradation, population growth and migration, the rapid growth of cities and the lack of demographic statistics.

53. During the review period, the cluster supported African countries in the follow-up and implementation of the outcomes of the United Nations Conference on Sustainable Development held in Rio de Janeiro, Brazil, in June 2012, the ongoing deliberations on the post-2015 development agenda and the preparation of conferences on climate change and desertification.

54. In April 2013, the Department of Economic and Social Affairs coordinated a thematic debate, jointly organized by the General Assembly and the Economic and Social Council, on the role of partnerships in the implementation of the post-2015 development agenda. The debate raised awareness and strengthened capacity in respect of the role of sustainable energy, transportation and food security in boosting Africa's productive capacity and industrial transformation.

55. The Office of the Special Adviser on Africa collaborated with ECA, the United Nations Population Fund, UNIDO, the African Union Commission and the NEPAD Planning and Coordinating Agency to organize a series of high-level panel discussions for the African group at the United Nations Headquarters on the post-2015 development agenda and the implementation of the outcome document of the United Nations Conference on Sustainable Development entitled "The future we want". As a result, the Group of African States strengthened its coherence and coordination capacities needed to formulate a unified position on African priorities and to develop strategies to ensure its incorporation in the post-2015 development agenda and in the implementation of the outcome document, including the sustainable development goals.

56. In November 2013, the Office of the Special Adviser on Africa worked closely with ECA, UNDP, the African Union Commission and the African Development Bank to support African countries in preparing the outcome document of the African regional consultation on the sustainable development goals. The effort contributed to the African common position on the post-2015 development agenda, which was adopted by African leaders in January 2014.

57. The United Nations Environment Programme (UNEP), in its capacity as the secretariat of the African Ministerial Conference on the Environment, together with NEPAD and the African Union Commission, organized a consultative meeting of African ministers of environment in November 2013 in Poland, prior to the high-level segment of the nineteenth Conference of the Parties to the United Nations Framework Convention on Climate Change. The meeting enabled African ministers to refine their strategy for negotiation and for engagement with other relevant parties during the high-level segment.

58. The United Nations Convention to Combat Desertification, the African Union Commission, the NEPAD Planning and Coordinating Agency, SADC, the African

Forest Forum and UNEP jointly organized the African regional preparatory meeting for the eleventh session of the Conference of the Parties, enabling African parties to strengthen their capacities to negotiate effectively in support of the African common position.

59. The Forum on Forests strengthened sustainable forest management in Africa through a project on facilitating financing for sustainable forest management in Africa and least developed countries. The project produced a common forest financing strategy for Africa, least developed countries, small island developing States and low forest cover countries, as well as a series of policy briefs on forest financing in Africa and fact sheets on forest financing in Tunisia, Uganda and the United Republic of Tanzania.

60. During the reporting period, the World Bank provided \$1.3 billion for environment, population and urbanization, including continued support for the Great Green Wall Initiative. World Bank assistance to TerrAfrica provided a more efficient and effective response to country demand for sustainable land and water management.

61. The United Nations World Tourism Organization organized an international conference on African tourism in Tunisia, enabling African countries to explore ways and means to enhance their tourism sectors, including by addressing visa facilitation, air connectivity and technology. The organization also organized a capacity-building workshop on tourism policy and strategy in Côte d'Ivoire and offered policy and strategic guidance for tourism development to the Governments of Togo and Uganda.

62. Through the sustainable tourism master plan of the Intergovernmental Authority on Development, ECA provided a blueprint for further development and implementation of tourism strategies within the member States of the Authority. The master plan will strengthen domestic and regional tourism, contributing to economic growth and regional integration.

63. UNFPA collaborated with ECA, the African Union Commission and Statistics South Africa to support the ISibalo capacity-building programme in developing the capacity of young African statisticians in census data production and dissemination using new technologies. The support enhanced the capacity of experts to successfully implement the 2010 and 2020 rounds of the population and housing census, integrate statistics into decision-making and promote the use of timely quality data for sustainable development.

64. In October 2013, UNFPA, ECA, the African Union Commission and UNICEF jointly organized the African Regional Conference on Population and Development in Addis Ababa, which was attended by African ministers in charge of planning/development, health, gender and population, and representatives from civil society, youth and the regional economic communities. The Conference culminated in the adoption of the Addis Ababa Declaration on Population and Development in Africa Beyond 2014, inculcating an African common position on the International Conference on Population and Development beyond 2014.

65. Through its Africa Capacity Building Centre, the International Organization for Migration (IOM) enhanced regional collaboration on cross-border mobility and migration. IOM trained 300 border officials, refurbished 10 border points and provided power supplies for 15 others. The border improvements included the

installation of migration information and data analysis systems along the borders of several African countries, the establishment of standard operating procedures, the pilot operationalization of one-stop border posts, and the training of 25 senior immigration officials.

G. Social and human development

66. The social and human development cluster continued to align its programme of work with NEPAD priorities.

67. The Campaign on Accelerated Reduction of Maternal Mortality in Africa, launched by the African Union Commission with the support of UNFPA, has been implemented by many African countries at the national, district and State levels. As a result, Cameroon is opening eight midwifery schools, with over 200 midwives completing training, and Sierra Leone has introduced free medical services for pregnant women and their babies.

68. Lending by the World Bank for social and human development during the review period amounted to \$1.9 billion. This included \$675 million for education, \$395 million for health, \$484 million for social protection and \$320 million for skills, youth employment and community development projects. In addition, \$140 million was provided to support regional centres of excellence in West Africa, and \$10 million was provided for disease surveillance in ECOWAS countries.

69. Through its entrepreneurship curriculum programme, which aims to strengthen entrepreneurial and commercial skills among youth, UNIDO trained more than 1 million young Africans and approximately 7,000 teachers in Angola, Cabo Verde, Côte d'Ivoire, Mozambique, Namibia, Rwanda, Sierra Leone, Uganda and the United Republic of Tanzania.

70. IAEA offered regional and national training courses and workshops, conducted expert missions, facilitated scientific visits and placed national candidates in specialized institutions to build human resources capacity in the areas of human health, food and agriculture, water resources management, environmental protection, sustainable energy development and uranium mining. From May 2013 to January 2014, IAEA awarded 334 fellowships and facilitated 90 scientific visits, delivering more than 1,780 person-months of training. IAEA also offered 54 training courses, training 707 participants from Africa.

71. In 2013, UNDP partnered with the NEPAD Planning and Coordinating Agency to provide technical support to the African medicines regulatory harmonization project, including through reviewing and redrafting the African Union draft preliminary model law on medicines regulation harmonization to revise and incorporate relevant intellectual property language.

72. At the Special Summit on HIV/AIDS, Tuberculosis and Malaria held in Abuja in 2013, UNAIDS, WHO and the African Union Commission collaborated with other stakeholders to launch the Treatment 2015 Initiative, which aims to accelerate and scale-up anti-retroviral therapy to outpace the HIV epidemic.

H. Science and technology

73. The science and technology cluster focuses on the implementation of Africa's Science and Technology Consolidated Plan of Action, which is a NEPAD plan built on the three interrelated pillars of capacity-building, knowledge production and technological innovation.

74. During the reporting period, ITU collaborated with the African Union Commission to implement the African Observatory of Science, Technology and Innovation. ITU completed a feasibility study for the initiative's data-collection platform and network design to enhance the use of science, technology and innovation and improve the well-being of the African community.

75. ITU continued to support the NEPAD e-schools initiative by strengthening the ICT skills of African teachers and school managers and by imparting ICT skills and knowledge to primary and secondary school students, in order to facilitate their future functionality in an information society and knowledge economy.

76. Under the Connect School Connect Community initiative, ITU worked with various African Governments to connect schools in remote, rural and underserved areas to broadband Internet services and to foster community ICT centres, enabling schoolchildren and local communities to access ICT and computing devices. ITU also implemented a network of centres of excellence in Africa to promote the use of ICT in education.

77. The World Intellectual Property Organization (WIPO) supported innovation in research and development through technical support for the establishment of technology and innovation support centres in African countries, resulting in the establishment of such centres in Burkina Faso, Cameroon, the Congo, Côte d'Ivoire, Ghana, Kenya, the Niger, Sao Tomé and Príncipe, Senegal and the United Republic of Tanzania, to address technological needs in the agro-foods sectors. In Egypt, WIPO and the Academy of Scientific Research and Technology completed modules for the training of trainers, and five key trainers from the Academy obtained masters degrees on intellectual property from the University of Turin. As a result, Egypt was included in the Global Network of Intellectual Property Academies.

I. Communication, advocacy and outreach

78. The advocacy and communications cluster, co-chaired by the African Union Commission and the Office of the Special Adviser on Africa, continued to undertake advocacy and promote public information for NEPAD.

79. In April 2013, the Office of the Special Adviser on Africa collaborated with ECA, the Department of Public Information and the African Union Commission to launch the *Economic Report on Africa 2013: Making the Most of Africa's Commodities — Industrializing for Growth, Jobs and Economic Transformation* at United Nations Headquarters. The event increased global awareness of the industrialization and value addition dimensions of Africa's transformative agenda. The UNCTAD *Economic Development in Africa Report 2013: Intra-African Trade — Unlocking Private Sector Dynamism* provided insights on how to strengthen Africa's private sector to boost intra-African trade.

80. In September 2013, the Office of the Special Adviser on Africa partnered with the private sector to organize the annual African Heads of State and Government investment working lunch to promote Africa as an investment destination. The event was attended by the President of Uganda, the Vice President of South Sudan, the Chair of the African Union Commission and ministers from Ghana, Nigeria and Rwanda, who raised awareness on African investment opportunities, with a view to supporting the African Union's domestic resource mobilization strategy.

81. In October 2013, the Office of the Special Adviser on Africa spearheaded the organization of the annual Africa Week, in collaboration with NEPAD, the Department of Public Information, ECA, the African Union, the NEPAD Planning and Coordinating Agency and the secretariat of the African Peer Review Mechanism. The week featured a series of events, including a high-level panel discussion to commemorate the tenth anniversary of the Mechanism, a briefing to Member States and the United Nations system and a dialogue with non-governmental organizations, academia, the African diaspora, media, and youth and women's groups. The Department of Public Information organized a press briefing and media interviews for the Chief Executive Officer of the NEPAD Planning and Coordinating Agency, the Special Adviser to the Secretary-General on Africa and senior officials of the Mechanism. The Department of Public Information also published and distributed joint press releases and media advisories with the Agency. The week raised awareness about Africa's development and governance agendas at the global level. The General Assembly in its high-level thematic debate on the promotion of investment in Africa renewed international commitments to support NEPAD and the Mechanism.

82. The Department of Public Information actively used social media networks, including Facebook and Twitter, to promote Africa's economic development agenda. By the end of January 2014, its English-language Twitter account had more than 45,400 followers, and its French version gathered 19,000 followers. In 2013 alone, 55 *Africa Renewal* magazine articles were recirculated more than 1,240 times in media outlets in Africa and elsewhere. In February 2014, the Department published a special edition of *Africa Renewal* to commemorate the tenth anniversary of the Comprehensive Africa Agriculture Development Programme and the African Union declaration of 2014 as the Year of Agriculture and Food Security in Africa.

83. ECA provided advocacy support to the NEPAD Coordinating and Planning Agency through the production and dissemination of *NEPAD Today*, a weekly electronic newsletter published in English and French and disseminated widely to over 10,000 readers in Africa and globally. The newsletter generates public support for NEPAD by aggregating stories from dozens of news sources, and focusing on priority areas of the African Union and its NEPAD programme.

84. The President of the World Bank joined the Secretary-General in visiting the Great Lakes and Sahel regions to underscore the importance of development in promoting peace, security and stability. During both visits, the development community pledged financial resources to improve such areas as health, education, nutrition, access to energy, social protection and job training, including \$1 billion for the Great Lakes region and approximately \$8.25 billion for the Sahel region for social safety nets to help families weather economic adversity and natural disasters, improve infrastructure and create opportunities in rural areas.

85. To commemorate the 2013 Africa Industrialization Day, UNIDO coordinated worldwide activities in Vienna, New York, Geneva, Brussels and all 20 UNIDO Africa field offices, creating a platform for the private sector, policymakers and donors to exchange best practices and local experiences in order to enhance labour markets and business environments in Africa. At United Nations Headquarters, UNIDO collaborated with the Office of the Special Adviser on Africa and the African Union Commission to organize a high-level event on the theme “Job creation and entrepreneurship development: a means to accelerate industrialization in Africa”.

III. Policy issues in the implementation of the New Partnership

A. Strengthening of the cluster system and enhanced United Nations-African Union cooperation

86. During the reporting period, the United Nations system strengthened its support for the implementation of NEPAD and the 10-year capacity-building programme for the African Union. The Regional Coordination Mechanism was strengthened through improved information-sharing increased intracluster activities and frequent cluster meetings that enhanced the level and quality of the cooperation. The mainstreaming of cross-cutting issues within the clusters, particularly gender and youth issues, was also enhanced significantly. All nine thematic clusters of the Mechanism developed demand-driven business plans and work programmes based on the key priorities of the African Union and its NEPAD programme. As a result, the Mechanism has been leveraged as a veritable tool for supporting Africa’s agenda, including in respect of global and continental processes on the negotiations in respect of the United Nations Conference on Sustainable Development, climate change, the post-2015 development agenda and Agenda 2063.

87. The Regional Coordination Mechanism decided to hold its future sessions back-to-back with the annual ECA Conference of African Ministers of Finance, Planning and Economic Development in order to provide a platform for United Nations leadership to engage directly and effectively with African ministers and gain further perspectives on Africa’s development aspirations.

88. The second triennial review of the 10-year capacity-building programme for the African Union and the initiative on a regional development cooperation framework will among others bolster resource mobilization in support of the Regional Coordination Mechanism.

B. Support for the mobilization of financial resources for the implementation of NEPAD

89. During the review period, UNDP collaborated with the NEPAD Planning and Coordinating Agency and ECA to produce a report on domestic resource mobilization, which will form the background document to the forthcoming financing summit for Africa’s infrastructure development, to be held in Dakar. ECA, serving as the secretariat of the High-level Panel on Illicit Financial Flows from Africa, also commissioned background studies on the status of such flows in Africa.

90. The Office of the Special Adviser on Africa, as a co-organizer of the fifth Tokyo International Conference on African Development with Japan, UNDP, the World Bank and the African Union Commission, provided substantive inputs into the various preparatory and outcome documents of the Conference, as well as support for leveraging the Commission's bargaining powers. The outcome of the Conference was a commitment of \$32 billion from Japan for Africa's development over the next five years.

91. In January 2014, the United Nations Educational, Scientific and Cultural Organization (UNESCO) organized a fundraising event for the African World Heritage Fund, raising \$3 million in pledges to support the promotion of Africa's rich natural and cultural heritage for economic growth.

92. Of the 18 active extended credit facilities of IMF, 13 active extended credit facilities arrangements are benefiting African countries with an allocation of about \$1.6 billion. Poverty Reduction and Growth Trust disbursements for sub-Saharan African countries reached a total of \$707 million in 2013, representing 58 per cent of the Trust's disbursements.

93. IOM allocated a total of \$5.8 million to projects directly or indirectly supporting NEPAD. The financial support was directed at facilitating migration through the infrastructure improvement and development of integrated border management systems to facilitate cross-border mobility, boost intra-Africa trade and investment and improve regional integration.

94. The World Bank, in its continued support for the Programme for Infrastructure Development in Africa, provided \$3.3 billion for infrastructure in sub-Saharan Africa, including \$1.2 billion for energy, \$799 million for transport, \$187 million for ICT and \$1.1 billion for water.

95. Further information on United Nations system resources in support of NEPAD is set out in the annex to the report.

C. Cross-cutting issues

96. In 2013, the gender and development subcluster supported a gender audit of the agriculture, food security and rural development cluster, which volunteered to undergo a participatory gender audit process.

97. The United Nations Entity for Gender Equality and the Empowerment of Women (UN-Women) and UNFPA provided financial and technical support for the secretariat of the Africa UNiTE to End Violence against Women campaign, including the secondment of a technical expert. The collaboration increased awareness of the Protocol to the African Charter on Human and Peoples' Rights on the Rights of Women in Africa and contributed to the adoption of a road map for the implementation of the African Women's Decade at the national level.

98. To support gender equality and the integration of women in the maritime industry, IMO assisted in the establishment of the Association of Women Managers in the Maritime Sector in East and Southern Africa and facilitated the establishment of a similar association for the West and Central Africa subregions called the Women's International Shipping and Trading Association.

99. In March 2014, the Office of the Special Adviser on Africa and UNDP jointly organized a high-level event on the margins of the fifty-eighth session of the Commission on the Status of Women on the theme “Towards 2015 for African women and girls: accelerating implementation of the Millennium Development Goals and defining the post-2015 development agenda and the African Agenda 2063”. At the event, African ministers for gender issues called for acceleration on achievement of the Millennium Development Goals as well as commitments towards gender equality, women’s empowerment and women’s rights in the post-2015 development agenda, the sustainable development goals and the African Agenda 2063. Key messages from the event have been compiled and are being utilized in ongoing advocacy and outreach work.

100. In facilitating the implementation of the African Agenda 2063, ECA, through its African Institute for Economic Development and Planning, convened a capacity development session for directors of national planning from all 54 African countries to incorporate elements of Agenda 2063 into their respective national strategies.

101. UNDP provided support for operationalizing the African Union/NEPAD Capacity Development Strategic Framework. As part of the process, UNDP prepared capacity development profiles and supported country dialogues on capacity development in 12 countries. UNDP also supported the development of the Africa Capacity Development Outlook, which aims to strengthen institutional capacities to translate good policies into good results.

D. Institutional support

102. ECA seconded two senior advisers to the secretariat of the African Peer Review Mechanism and the NEPAD Planning and Coordinating Agency to provide direct technical support and advisory services. It also seconded two technical experts to the Agency to assist in implementing the recommendations of the ECA/NEPAD Planning and Coordinating Agency study on domestic resource mobilization and the Capacity Development Strategic Framework.

103. UNDP seconded a senior economist to the NEPAD Planning and Coordinating Agency and supported the Agency through its network of senior economists in the 46 sub-Saharan UNDP country offices, providing technical advice in a number of areas, including in capacity development, energy and environment and climate change.

104. UNIDO provided technical assistance to the African Union Commission to organize the Twentieth African Union Conference of African Ministers of Industry on the theme “Accelerating industrialization in Africa within the post-2015 development agenda”, in which 43 ministers agreed to prioritize the financing and resource mobilization features of the Strategy for the Implementation of the Plan of Action for the Accelerated Industrial Development of Africa.

105. UNFPA is working with the Gender Unit of the NEPAD Planning and Coordinating Agency to support the scaling up of its programmes, particularly on gender equality. In addition, UNFPA is working to strengthen the advocacy role of regional economic communities in support of Governments as they fulfil their national, regional and international commitments on gender equality.

106. FAO continued to provide experts and consultants to support the NEPAD Planning and Coordinating Agency and the Department of Rural Economy and Agriculture of the African Union Commission in guiding and coordinating the implementation of the Comprehensive Africa Agriculture Development Programme. FAO seconded a food security information analyst and a fisheries expert to the Agency, and financed two technical experts at the Department of Rural Economy and Agriculture of the African Union Commission to support the Programme and African Union Commission programmes. FAO provided experts and consultants to support ECOWAS in establishing and operationalizing the Regional Agency for Agriculture and Food, which supports countries in financing and implementing the investment plans of the Programme. FAO also continued to provide analytical support, technical assistance and capacity development.

107. IOM, in collaboration with the African Union Commission, UNDP, and the United Nations Office for Disaster Risk Reduction, embarked on a strategy to mainstream disaster risk reduction in African Union/NEPAD policies and programmes. The Office supported the African Union Commission in the implementation of the Hyogo Framework for Action 2005-2015: Building the Resilience of Nations and Communities to Disasters and the Africa Regional Strategy for Disaster Risk Reduction. The primary focus of assistance from the Office is to develop Africa's contribution to the post-2015 framework for disaster risk reduction. The final African contribution to the post-2015 framework for disaster risk reduction will be adopted through a ministerial declaration at the fifth Africa regional platform for disaster risk reduction, to be held in Nigeria in May 2014.

108. In collaboration with the African Union Commission, IMO developed the 2050 Africa Integrated Maritime Strategy, which was adopted by African leaders in January 2014. The strategy will enable African countries to take full control of their maritime domains, including the exploration and exploitation of resources.

E. Challenges and constraints

109. Despite good progress in using demand-driven business plans and joint-programming to provide coordinated support to the African Union Commission and the NEPAD Planning and Coordinating Agency, the Regional Coordination Mechanism, at its fourteenth session, noted key remaining challenges, including limited dedicated financial and human resources for the implementation of the clusters work programmes, and limited communication and coordination within and between clusters.

110. The joint Regional Coordination Mechanism secretariat needs to be well resourced in order to strengthen the effectiveness of its substantive support to the clusters, foster subregional coordination and improve United Nations cooperation and coordination with the African Union.

111. Furthermore, the ownership and awareness of the Regional Coordination Mechanism by the African Union Commission, the NEPAD Planning and Coordinating Agency and the regional economic communities need to be strengthened.

IV. Conclusions and recommendations

112. The United Nations system continues to provide substantial support to the priority areas of NEPAD, at both the global and regional levels, through the nine clusters of the Regional Coordination Mechanism and through the funding of programmes and projects, capacity- and institution-building activities, policy advisory services, resource mobilization, advocacy and humanitarian assistance.

113. The United Nations system made progress in strengthening United Nations support for agriculture and food security, infrastructure development, peace and stability, the participation of women and young people and the 10-year capacity-building programme for the African Union, as well as for efforts to ensure that NEPAD priorities are fully reflected in the implementation of the outcome document of the United Nations Conference on Sustainable Development held in Rio de Janeiro in 2012 and the formulation of the post-2015 development agenda.

114. The United Nations system should align their respective work programmes with the priorities and timelines of the strategic plans of the African Union Commission and the NEPAD Planning and Coordinating Agency. This will further strengthen coordination and coherence, and ensure greater complementarity of United Nations system support with actions taken by the Commission and the Agency. In particular, United Nations entities should bolster their support for the priorities of NEPAD. As encapsulated in the NEPAD Strategic Framework 2014-2017, the priorities include promoting skills development in science and technology, boosting intra-African trade through the implementation of a continental free trade area, developing infrastructure, strengthening regional integration and mobilizing resources to finance development.

115. Given that the present report coincides with the tenth anniversary of the Comprehensive Africa Agriculture Development Programme, the Year of Agriculture and Food Security in Africa and the International Year of Family Farming, it is crucial that the United Nations system enhance its efforts to assist African Member States in achieving their vision of an agrarian revolution that will promote agriculture-led economic growth. Specifically, this will entail assisting African countries in meeting the targets of the 2003 Declaration on Agriculture and Food Security in Africa.

116. As the deadline for the Millennium Development Goals fast approaches, the United Nations system should redouble its efforts towards accelerating the Goals process in Africa. In addition, the United Nations system should work to ensure that the post-2015 development agenda reflects the priorities highlighted in the African common position on the post-2015 development agenda. The priorities include: (a) structural economic transformation and inclusive growth, including industrialization; (b) science, technology and innovation; (c) people-centred development, including education, health care, gender equality and women's empowerment, and harnessing Africa's youth population; (d) environmental sustainability, natural resources and disaster risk management; (e) peace and security; and (f) finance and partnerships.

117. Likewise, in the context of the implementation of the outcome document of the United Nations Conference on Sustainable Development and ongoing global consultations on the sustainable development goals, the United Nations system should continue to articulate and support the inclusion of Africa's sustainable

development vision, priorities and aspirations. This calls, inter alia, for reflection of the priorities highlighted in the outcome document of the Africa Regional Consultative Meeting on the Sustainable Development Goals, including economic development, social development, environment and natural resources, institutions and governance, means of implementation and promoting an integrated approach to sustainable development.

118. Since 2015 also marks the twentieth anniversary of the Beijing Declaration and of the Platform for Action and the review of its implementation, as well as the midpoint for the African Women's Decade, the United Nations system should accelerate the support it provides to the African Union and NEPAD in implementing their gender equality and women's empowerment agendas under the framework of the African Union Gender Architecture. In particular, the United Nations system should support the African Union, the NEPAD Planning and Coordinating Agency, the regional economic communities and national ministries of gender and women's affairs in the review and appraisal processes of both the Beijing Declaration and the African Women's Decade at the national, regional and continental levels.

119. The United Nations system should support the finalization and implementation of Agenda 2063, Africa's ambitious 50-year transformative development vision. The United Nations system should adopt a concrete and coordinated approach for supporting the implementation of Agenda 2063 throughout its work and ensure the integration of its priorities in all global development agendas.

Annex

United Nations system support for Africa: financial and staff resources devoted to Africa, 2011-2013

Entity	Type of support	Resources (thousands of United States dollars)			Africa's share of resources (percentage)		
		2011	2012	2013 ^a	2011	2012	2013
Common Fund for Commodities	Project commitments	12 098	8 416	24 727

Source: Organizations, funds, programmes and specialized agencies of the United Nations system and departments of the Secretariat.

Note: Data were included in the table on the basis of available information received from the United Nations system.

^a Figures are estimates or provisional, as indicated by relevant agencies.

^b Since 2011, International Atomic Energy Agency programmes have been budgeted in euros. The euro/United States dollar conversion rate applied is 0.774 for 2011; 0.754 for 2012; and 0.724 for 2013.

^c Includes interim assistance and/or disbursement at completion point.

^d The relative drop in assistance provided by the International Trade Centre to Africa for 2012 relative to 2011 is because the Programme for Building African Capacity for Trade, funded by the Canadian International Development Agency, is ending. The figures are expected to go up in 2013-2014 as soon as the PACT successor programme is operational.

^e United Nations Foundation spending channelled to agencies of the United Nations system through the United Nations Fund for International Partnerships, which is part of the United Nations Office for Partnerships.
