

Appeal to the producing countries and to  
FAO for bringing down the prices of  
Cereal Experts

The Economic Commission for Asia and the Far East,  
RECOGNISING that shortage of foreign exchange resources  
is a hindrance to the fulfilment of the reconstruction  
and development programmes of the countries of Asia and  
the Far East and that an undue drain on these resources  
for the purchase of foodstuffs is detrimental to the  
economy of these countries, and  
CONSIDERING that the prices charged for cereals by produ-  
cing countries should be kept at as low a level as possible,  
RESOLVES that an appeal should be made to the producing  
countries concerned and to F.A.O. to consider measures  
jointly and severally for bringing down to a reasonable  
level the prices of cereals exported to the territories  
within the geographical scope of this Commission where  
such prices appear to be excessive.
