Commission on Narcotic Drugs

Reconvened fifty-third session

Vienna, 2 December 2010

Agenda item 5

Improving the collection, reporting and analysis of data to monitor the implementation of the Political Declaration and Plan of Action on International Cooperation towards an Integrated and Balanced Strategy to Counter the World Drug Problem

Annual report questionnaire: Part Four. Extent and patterns of and trends in drug crop cultivation and drug manufacture and trafficking**

Note by the Secretariat

Pursuant to Commission on Narcotic Drugs resolution 52/12, a meeting of the expert group on data collection was held in Vienna from 12 to 15 January 2010 to review the current data collection tools and collection, collation, analysis and reporting processes. Pursuant to Commission decision 53/2, the Secretariat produced a revised version of the draft annual report questionnaire; the expert group held a meeting in Vienna from 11 to 13 October 2010 to finalize the questionnaire so that the Commission could adopt it at its reconvened fifty-third session. The Secretariat hereby transmits part four of the questionnaire; parts one, two and three will be made available in separate documents (E/CN.7/2010/19, E/CN.7/2010/20 and E/CN.7/2010/21).

* Reissued for technical reasons on 30 January 2012.

** The present document was submitted after the date required by the 10-week rule as the meeting of the expert group on data collection was held from 11 to 13 October 2010.

Annual report questionnaire

Part Four. Extent and patterns of and trends in drug crop cultivation and drug manufacture and trafficking

Report of the Government of _____

Reporting year _____

Completed on (date) _____

Please return completed questionnaire to: arq@unodc.org

The completed annual report questionnaire is due on: [date].

[list]			

Note

This is a printable version of the annual report questionnaire, which is in the form of an Excel spreadsheet and is designed to be completed electronically. In this printable version, definitions of key terms used in the questionnaire are provided in the footnotes, whenever relevant; in the electronic version, these definitions (and additional instructions) are repeated throughout the questionnaire through the “Comments” function in Excel. The Excel spreadsheet also uses drop-down lists for some questions, allowing respondents to simply select from a list the answer that is most appropriate for their country.

Instructions

The annual report questionnaire consists of the following four parts:

- Part One. Legislative and institutional framework
- Part Two. Comprehensive approach to drug demand and supply reduction
- Part Three. Extent and patterns of and trends in drug use
- Part Four. Extent and patterns of and trends in drug crop cultivation and drug manufacture and trafficking

This is part four of the annual report questionnaire.

Respondents are asked to complete all questions. Where no data are available, this should be indicated by inserting two dashes (--) or writing "not known" in the appropriate cell. All questions refer to the reporting year, unless otherwise indicated.

Respondents

Countries are invited to identify a single focal point for reporting data on drugs. In exceptional and duly justified cases, respondents may identify technical contacts who may contribute to completing the questionnaire, indicating, if possible, which responses they contributed to.

Metadata

Respondents may refer to multiple sources in completing the annual report questionnaire. These sources may include published reports and/or data sets not in the public domain, including routinely collected data from treatment, law enforcement or other agencies. All sources referred to during the completion of the questionnaire should be listed in the section on metadata, which can be found at the end of each section of the questionnaire. This information helps UNODC to understand the information provided.

About the questions

In recognition of the fact that not all countries have detailed data on all the topics covered in the questionnaire, part four of the annual report questionnaire contains questions designed primarily to elicit quantitative information. When such quantitative information is not available, information on trends and situations may be provided, together with the source of that information.

Quantitative data or estimates

The questions are designed to elicit quantitative data or estimates. The annual report questionnaire includes standardized response categories but, should the data available not conform to those categories, they can still be included. Simply indicate the categories used (e.g. age range, drug category) in the space provided. Quantitative data or estimates should be provided for the reporting year. The year in which data were collected should always be specified. When such quantitative data or estimates are not available, the most recent figures may be provided.

Several questions relate to classes or types of drugs. Whenever applicable, it is important that the information requested be about individual drugs. Although care

has been taken to include all major drugs, the pre-coded lists might not fully match the needs of every country. Therefore, in each list the opportunity has been provided to add other classes or types of drugs. These open categories can also be used to insert alternative groups of drugs. For example, some questions list “heroin” and “other illicit opioids”; if the only information available is on opioids in general (no types are specified), “any opioids” should be listed under “other drugs”.

Technical notes

Prescription drugs (containing substances under international control)

Below are some examples of substances that fall within a certain category of prescription drugs that contain controlled substances and can be diverted or counterfeit. A full list of prescription drugs within each category, providing both the chemical and the most common proprietary names, is available from www.unodc.org.

Category of prescription drugs	Examples
Pharmaceutical opioids	Buprenorphine (e.g. Subutex), codeine, dextropropoxyphene, fentanyl, hydrocodone (e.g. Vicodin), hydromorphone, methadone, morphine, oxycodone (e.g. Oxycontin), pethidine and suboxone.
Prescription stimulants	Amfepramone, fenetylline, methylphenidate, pemoline, phenmetrazine and phentermine.
Benzodiazepines	Alprazolam (e.g. Xanax), clonazepam (e.g. Rivantril and Rivotril), diazepam (e.g. Valium), flunitrazepam (e.g. Rohypnol) and temazepam.
Barbiturates	Allobarbitol, barbitol, phenobarbitol, pentobarbitol and secbutabarbitol.

Classes and types of drugs under international control (narcotic drugs and psychotropic substances)

Listed below are the classes and types of drugs included in the annual report questionnaire. In some cases, examples of particular drug types are provided, but the lists of these examples are not exhaustive.

Class of drug	Type of drug
Any illicit drug	
Cannabis	Marijuana (herb) ^a Hashish (resin) ^b Plants Oil Seeds Other types of cannabis
Opioids	Heroin Opium Illicit morphine Poppy plants Poppy seeds Diverted/counterfeit pharmaceutical drugs containing opioids under international control Other illicit opioids (e.g. “homebake”)
Cocaine	Salts (cocaine hydrochloride (HCl), powder cocaine) “Crack” Coca leaf Other types of cocaine (e.g. coca paste, cocaine paste, cocaine base, <i>basuco</i> , <i>paco</i> and <i>merla</i>)
Amphetamine-type stimulants^c	Amphetamine Methamphetamine “Ecstasy”-type substances (e.g. MDMA, MDA, MDE/MDEA) ^d Diverted/counterfeit prescription drugs containing amphetamine-type stimulants Other stimulants (e.g. Captagon, methcathinone, 4-MTA, 2C-B, MDBD)
Sedatives and tranquillizers	Diverted/counterfeit prescription drugs containing benzodiazepines Diverted/counterfeit prescription drugs containing barbiturates Methaqualone <i>Gamma</i> -hydroxybutyric acid (GHB) Other sedatives and tranquillizers
Hallucinogens	Lysergic acid diethylamide (LSD) Other hallucinogens (e.g. phencyclidine (PCP), mushrooms with psychoactive properties, tryptamines)
Drugs under national but not international control	Including <i>gamma</i> -butyrolactone (GBL), khat, piperazines (e.g. <i>N</i> -benzylpiperazine (BZP)), tramadol and ketamine, depending on national legislation.

^a The flowering or fruiting tops of the cannabis plant (excluding the seeds and leaves when not accompanied by the tops) from which the resin has not been extracted.

^b The separated resin, whether crude or purified, obtained from the cannabis plant.

^c Stimulants placed under international control in the Convention on Psychotropic Substances of 1971 (United Nations, *Treaty Series*, vol. 1019, No. 14956).

^d MDA=methylenedioxyamphetamine; MDEA=3,4-methylenedioxyethylamphetamine; MDMA=methylenedioxymethamphetamine.

Respondents*Instructions*

Provide details of the focal point for reporting of drug data in your country. In the exceptional cases in which technical contacts have been identified, you may wish to list them in the table entitled “additional technical contacts”, indicating, if possible, which responses they have contributed to.

Focal point

Name	Position	Agency	Phone	Fax	E-mail

Additional technical contacts (optional)

	Name	Position	Agency	Telephone	Fax	E-mail	Questions contributed to 6-9 and 10-13
<i>Example</i>	<i>Mr. John Smith</i>	<i>Chief Statistician</i>	<i>Office of Drug Control</i>	<i>+44 221 6573</i>	<i>+44 221 6001</i>	<i>j.smith@odc.gov</i>

Trafficking

Class and type of drugs	Question				
	1		2		3
	What was the total quantity of drugs seized in your country in the reporting year? ^a			What was the total number of drug seizures carried out in the reporting year? ^{c, d}	What definition of “drug seizures” was used in answering questions 1 and 2?
	Preferred unit: kilograms Preferred time frame: reporting year Time frame used:		Other unit of quantity ^b		
	Quantity	Unit	Number of units	Type of unit	
Example	112.5	kilograms	10,000	tablets	279

Cannabis

Marijuana (herb)
Hashish (resin)
Plant
Oil
Seeds

Other types of cannabis (specify)

Illicit opioids

Heroin
Opium (raw and prepared)
Illicit morphine
Diverted/counterfeit pharmaceutical drugs containing opioids under international control (specify)

Other illicit opioids (specify)

Cocaine

Salts (cocaine HCl, powder cocaine)
“Crack”
Coca leaf
Other types of cocaine (specify)

Amphetamine-type stimulants (total)^e

Amphetamine
Methamphetamine
“Ecstasy”-type substances
Diverted/counterfeit prescription amphetamine-type stimulants
Other stimulants (specify)

Sedatives and tranquillizers (total)^e

Diverted/counterfeit prescription drugs containing benzodiazepines
Diverted/counterfeit prescription drugs containing barbiturates
Methaqualone
GHB
Other sedatives and tranquillizers (specify)

Hallucinogens (total)^e						
LSD						
Other hallucinogens (specify)						
Drugs under national but not international control (specify)						
Other (specify)						
All drugs (grand total)						

^a Include both retail and wholesale seizures. Each seizure should be counted only once.

^b A unit can be a tablet, a capsule, an ampoule, a tab etc.

^c A seizure case involving more than one drug type should be counted under each specific drug type involved. When available, the totals per drug class (cannabis, opioids, cocaine etc.) should be provided, as well as the grand total (in the cell for "all drugs").

^d Where applicable and if possible, please include seizures made outside the territory of your country by law enforcement agencies of your country (such as seizures in international waters), but only the seizures that have not been entrusted to, retained by or otherwise disposed of by agencies of another country.

^e Data for each drug type are preferable. If data are not available for each drug type, provide aggregate data for each class of drug (e.g. amphetamine-type stimulants, hallucinogens).

What sources of information (published and unpublished) were referred to in answering these questions?

V.10-57499

^a "Stable" refers to an estimated variation of under 10 per cent; "some increase" and "some decrease" refer to an estimated variation of between 10 and 25 per cent, "large increase" and "large decrease" refer to an estimated variation of more than 25 per cent.

^b Raw weights may be provided instead of percentages.

What sources of information (published and unpublished) were referred to in answering these questions?

Trafficking

9. In cases for which there was a significant change in drug trafficking trends (see question 7) or in drug seizures (see question 1) in the reporting year, provide details on those trends and state the suspected reasons. Also include any other information relevant to trafficking in your country. Remember to always specify the name of the drug or drugs involved.

--

10. Were there any significant changes in the methods of transportation or the origin, routes or final destinations of drugs trafficked in your country during the past year? If yes, briefly describe these changes for the classes of drugs listed below and state the suspected reasons.

Cannabis	Opioids	Cocaine	Amphetamine-type stimulants

Price and purity

11. Does your country have a system in place to monitor the price of illicit drugs?

At the retail level ¹	At the wholesale level ²
☐ Yes, on a routine basis. Specify frequency: ³ _____. ☐ Yes, on an ad hoc basis. Specify circumstances under which this occurs: _____. ☐ Yes, on some other basis. Specify: _____. ☐ No	☐ Yes, on a routine basis. Specify frequency: ³ _____. ☐ Yes, on an ad hoc basis. Specify circumstances under which this occurs: _____. ☐ Yes, on some other basis. Specify: _____. ☐ No
If the answer is yes, please describe in detail the methodology used to monitor the price of illicit drugs at the retail level.	If the answer is yes, please describe in detail the methodology used to monitor the price of illicit drugs at the wholesale level.

12. (a) Do authorities in your country have access to laboratory services for analysing narcotic drugs and psychotropic substances seized by law enforcement agencies?

- ☐ Yes, they have access to laboratory facilities in the country
☐ Yes, they have access to laboratory facilities in other countries for some samples
☐ Yes, they have access to laboratory facilities in other countries for all samples
☐ No

(b) Are the following services provided?

Identification of seized drugs

☐ Yes ☐ No

¹ The level of an illicit drug market at which the drug is provided to consumers (users).

² The level of an illicit drug market at which the drug is sold in bulk, to be sold on to consumers at a later stage.

³ For example, monthly, quarterly, annual.

Quantification of seized drugs (determination of purity) ☐ Yes ☐ No

Characterization/chemical profiling of seized drugs to determine their origin or for linking samples ("forensic drugs intelligence") ☐ Yes ☐ No

Analysis of precursor chemicals ☐ Yes ☐ No

Investigation of clandestine laboratories ☐ Yes ☐ No

Other (please specify)

_____ ☐ Yes ☐ No

_____ ☐ Yes ☐ No

(c) Under what circumstances are seized illicit drugs subjected to forensic analysis in your country?

☐ Seized illicit drugs are never subjected to forensic analysis

☐ Seized illicit drugs are routinely subjected to forensic analysis

☐ Seized illicit drugs are subjected to forensic analysis upon request from law enforcement or judicial authorities

☐ Seized illicit drugs are subjected to forensic analysis on some other basis. Specify:

Note: Answer questions 13 and 14 only if illicit drug crops are cultivated in your country.

Class and type of drugs	Question 13				
Farm-gate price ^a					
Indicate the average farm-gate price and common range of farm-gate prices for illicit plant-based drugs in your country					Indicate moisture content/purity (whichever is applicable) for the price provided
Currency used: _____					
	Average	Common range ^b		Unit	
		From	To		
<i>Example</i>	<i>\$1 500</i>	<i>\$1 000</i>	<i>\$2 000</i>	<i>1 kilogram</i>	<i>40% moisture</i>
Opium					
Opium (wet)					
Opium (dry)					
Coca type					
Coca leaf					
Coca paste					
Cocaine base					
Other plant-based drugs (specify)					

^a The farm-gate price is the price paid to the grower or producer of the plant or drug prior to processing or manufacture. It is the price of the first sale in the distribution chain.

^b The common range is the range observed most of the time. For example, if the price is between \$1,200 and \$1,800 most of the time, that is the common range.

14. Was there any significant change in the farm-gate price of plant-based drugs in your country during the past year, compared to the previous year? Specify the drug or drugs and provide an explanation.

Price and purity

Drug class and type	Question															
	15				16				17				18			
	Price at wholesale level ^a				Purity at wholesale level ^a				Price at retail (street) level ^d				Purity at retail (street) level ^d			
	Indicate the typical wholesale price ^b and the common range ^c of prices of drugs trafficked in your country				Indicate the typical purity ^b and the common range ^c of purity levels of drugs trafficked in your country				Indicate the typical retail price ^b and the common range ^c of prices of drugs sold in your country				Indicate the typical retail purity ^b and the common range ^c of purity levels of drugs sold in your country			
	Currency used: _____				Common range				Common range				Common range			
	Typical	From	To	Unit	Typical	From	To	Typical	From	To	Typical	From	To	Typical	From	To
Example	150 000	100 000	200 000	kg	35%	30%	50%	250	150	350	15%	5%	40%			
Cannabis^e																
Marijuana (herb)																
Hashish (resin)																
Oil																
Other (specify)																
Opioids																
Heroin (specify) ^f																
Opium^g																
Illicit morphine																
Other (specify)																
Cocaine																
Salts (cocaine HCl, powder cocaine)																
Cocaine base																
"Crack"																
Other (specify)																
Amphetamine-type stimulants																
Amphetamine powder																
Amphetamine tablet ^h (mg per tablet)																

^a The wholesale level is the level of an illicit drug market at which the drug is sold in bulk, to be sold on to consumers at a later stage.
^b Report the most common values for prices and purities.
^c The common range is the range observed most of the time. For example, if the price is between \$1,200 and \$1,800 most of the time, that is the common range.
^d The retail level is the level of an illicit drug market at which the drug is provided to consumers (users).
^e For cannabis products, purity refers to tetrahydrocannabinol (THC) content. If your country does not routinely measure the THC content in cannabis seizures, leave the cannabis purity questions blank.
^f For example, brown or white heroin, heroin No. 3, heroin No. 4 etc.
^g For opium products, purity refers to morphine content.
^h For amphetamine-type stimulants in tablet form, please report the weight (in mg) of the quantity of controlled substance per tablet (for example, 30 mg).

19. What definition of “wholesale” have you used in answering these questions? If different definitions were used for different drugs, please provide each definition separately, indicating which drugs they refer to. Where applicable, please indicate whether the purity measurements include the salt part of the substance or not (in other words, whether the weight of the anion is included or not. For example, “heroin hydrochloride” instead of “heroin”). If they do include the salt part of the substance, please specify the salt (HCl, sulfate etc.).

20. What definition of “retail” have you used in answering these questions? If different definitions were used for different drugs, please provide each definition separately, indicating which drugs they refer to. Where applicable, please indicate whether the purity measurements include the salt part of the substance or not (in other words, whether the weight of the anion is included or not. For example, “heroin hydrochloride” instead of “heroin”). If they do include the salt part of the substance, please specify the salt (hydrochloride, sulfate etc.).

Metadata

What sources of information (published and unpublished) were referred to in answering these questions?

Price and purity

21. If you provided information about purity in answering the questions above, please explain the methodology used.

--

22. Was there any significant change in the price or purity of any drug trafficked or sold in your country during the past year compared with the previous year? Please explain the reasons for the change. Remember to always specify the name of the drug or drugs involved.

--

23. What diluents, cutting agents, adulterants and other psychoactive substances are generally found in the different types of drugs seized in your country?

Class and type of drugs	Diluents ^a /cutting agents	Adulterants ^b /other psychoactive drugs
<i>Example</i>	<i>Lactose</i>	<i>Caffeine, ketamine</i>
Opioids		
Heroin		
Other (specify)		
Cocaine		
Salts (cocaine HCl, powder cocaine)		
Cocaine base		
“Crack”		
Other (specify)		
Illicit amphetamine-type stimulants		
Amphetamine		
Methamphetamine		
“Ecstasy”-type substances		
Other (specify)		
Sedatives and tranquillizers (specify)		

Hallucinogens

LSD		
Other (specify)		
Drugs under national but not international control (specify)		
Other (specify)		

^a A diluent is a cutting agent used to increase the volume and decrease the purity of a substance.

^b An adulterant is a psychoactive substance other than the named substance that can be added intentionally, occur as a contaminant or result as a by-product during manufacture.

Metadata

What sources of information (published and unpublished) were referred to in answering these questions?

Illicit drug market overview

24. Please provide an overall contextual description for each of the drug markets of concern in your country. Include information on all aspects, from illicit cultivation, manufacture and trafficking to retail. You may wish to consider the emerging patterns and trends in price, purity, demand and supply, and whether illicit drug markets interact or overlap. Remember to always indicate which drug or drugs are being referred to and the time frame of observed trends.

Cocaine										
Illicit amphetamine-type stimulants										
Hallucinogens										
Drugs under national but not international control (specify)										

Other (specify)										

^a Persons brought into formal contact with the police and/or the criminal justice system may include persons suspected, arrested or cautioned at the national level (United Nations Survey of Crime Trends and Operations of Criminal Justice Systems, 2009). The definition used should be specified in questions 27 and 28. Further information on the type of data recorded should be given in question 29.

^b Personal drug offences are drug offences related to the use or the possession of drugs for personal consumption (see art. 3, para. 2, of the United Nations Convention against Illicit Traffic in Narcotic Drugs and Psychotropic Substances of 1988).

^c Drug trafficking refers to drug offences committed not in connection with the use or possession of drugs for personal consumption (see art. 3, para. 1, of the 1988 Convention).

Question		
27	28	29
To which of the following do the data reported in question 25 correspond?	To which of the following do the data reported in question 26 correspond?	At which of the following stages of the criminal justice system are data collected to arrive at the data reported in questions 25 and 26?
☐ Number of persons suspected ☐ Number of persons arrested ☐ Number of persons cautioned ☐ Other (specify)	☐ Number of persons suspected ☐ Number of persons arrested ☐ Number of persons cautioned ☐ Other (specify)	☐ When the offence is reported to the police ("input" statistics) ☐ After the report to the police but before investigation ☐ After investigation ("output" statistics) ☐ Uncertain
Number of personal drug offences^a recorded in the reporting year		Number of drug trafficking^b offences recorded in the reporting year

^a Personal drug offences are drug offences related to the use or the possession of drugs for personal consumption (see art. 3, para. 2, of the 1988 Convention).

^b Drug trafficking refers to drug offences committed not in connection with the use or possession of drugs for personal consumption (see art. 3, para. 1, of the 1988 Convention).

Class and type of drugs		Question										
		30										
		List the 10 most common citizenships of people recorded for drug trafficking in your country, from most common to least common. For each drug, report the number of persons of that citizenship recorded for drug trafficking.										
		Own country	Most common	Second most common	Third most common	Fourth most common	Fifth most common	Sixth most common	Seventh most common	Eighth most common	Ninth most common	Tenth most common
All illicit drugs	Citizenship											
	Number											
Cannabis	Citizenship											
	Number											
Illicit opioids	Citizenship

Illicit cultivation and production

		Question						38							
32		33		34		35	36	37		What has been the trend with regard to illicit drug crop cultivation in your country during the reporting year? ^b					
Were illicit drug crops cultivated in your country during the reporting year?		What was the total estimated area under illicit drug crop cultivation ^a in your country?		What was the total area eradicated during the reporting year?		What was the total number of plants eradicated during the reporting year?	What was the total number of sites eradicated during the reporting year?	What was the total area under illicit drug crop cultivation after eradication?							
Yes	No	Area	Unit	Area	Unit	Number	Number	Area	Unit	Large increase	Some increase	Stable	Some decrease	Large decrease	Not known
☒	☐	500	hectares	200	hectares	200 000	200	300	hectares	☐	☐	☐	☒	☐	☐
☐	☐									☐	☐	☐	☐	☐	☐
☐	☐									☐	☐	☐	☐	☐	☐
☐	☐									☐	☐	☐	☐	☐	☐
☐	☐									☐	☐	☐	☐	☐	☐
☐	☐									☐	☐	☐	☐	☐	☐
☐	☐									☐	☐	☐	☐	☐	☐
☐	☐									☐	☐	☐	☐	☐	☐
☐	☐									☐	☐	☐	☐	☐	☐

^a "Illicit drug crop cultivation" refers to the cultivation of crops used in the production of narcotic drugs and psychotropic substances.

^b "Stable" refers to an estimated variation of under 10 per cent; "some increase" and "some decrease" refer to an estimated variation of between 10 and 25 per cent; "large increase" and "large decrease" refer to an estimated variation of more than 25 per cent.

^c Plants that are not under international control but that are of national concern, such as khat, ephedra and hallucinogenic mushrooms.

Question									
39			40	41		42			43
What was the estimated yield per harvest?		What is the typical number of harvests per year?		What was the estimated total annual production?		Do the estimates in questions 39 and 41 refer to dry weight or fresh weight? If possible, please give average moisture content.			What has been the trend in plant-based drug production in your country during the past year? ^a
Amount	Yield			Weight	Unit	Fresh	Dried	Average moisture content	
50	kg/ha	2		30 000	kg	☐	☒	10%	☐ Large increase ☐ Some increase ☐ Stable ☒ Some decrease ☐ Large decrease ☐ Not known
<i>Example 1</i>									
Opium						☐	☐		☐
Coca leaf						☐	☐		☐
Cannabis herb (marijuana) (outdoors)						☐	☐		☐
Cannabis resin (hashish) ^b (outdoors)						☐	☐		☐
Cannabis herb (marijuana) (indoors)						☐	☐		☐
Other ^c (specify)						☐	☐		☐
						☐	☐		☐
						☐	☐		☐

^a "Stable" refers to an estimated variation of under 10 per cent; "some increase" and "some decrease" refer to an estimated variation of between 10 and 25 per cent; "large increase" and "large decrease" refer to an estimated variation of more than 25 per cent.

^b As defined in article 1 (d) of the Single Convention on Narcotic Drugs of 1961 and that Convention as amended by the 1972 Protocol, "cannabis resin" means the separated or partially separated resin, whether crude or purified, of the cannabis plant.

^c Plants that are not under international control but that are of national concern, such as khat, ephedra and hallucinogenic mushrooms.

Metadata

What sources of information (published and unpublished) were referred to in answering these questions? Please provide a detailed description of the methodology you used for the annual production estimates.

Illicit cultivation and production

44. For those narcotics for which a strong increase or decrease in cultivation or production was observed in the past year, briefly state the reasons for the increase or decrease. Also report any other relevant information on illicit drug crop cultivation and drug production that relates to the past year. Specify the name of the plant and/or drug involved.

	Question
	45
	Name the administrative areas where illicit drug crop cultivation takes place. Specify separately areas of wild growth. Provide a percentage breakdown of cultivation per administrative area (e.g. area A: 20 per cent, area B: 80 per cent). Also specify the main growing season, if relevant.
Illicit drug crop	Percentage of area under cultivation
Opium poppy	
Coca bush	
Cannabis (outdoors)	
Cannabis (indoors)	
Other (specify) ^a	

^a Plants that are not under international control but that are of national concern, such as khat, ephedra and hallucinogenic mushrooms.

Question								
46				47				
Were the following methods used during the reporting year to detect the cultivation of illicit drug crops (including wild growth)?				What are the main methods used to destroy illicit drug crops (including wild growth)?				
Drug plant	Methods	Yes	No	Drug plant	Methods	Frequency ^a		
						Never	Some-times	Often
Opium poppy	Remote sensing ^b	☐	☐	Opium poppy	Aerial spraying with herbicide	☐	☐	☐
	Ground survey ^c	☐	☐		Other use of herbicides	☐	☐	☐
	Other method (specify)	☐	☐		Burning	☐	☐	☐
	_____	☐	☐		Manual destruction	☐	☐	☐
	_____	☐	☐		Other method (specify)	☐	☐	☐
					_____	☐	☐	☐
Coca bush	Remote sensing ^b	☐	☐	Coca bush	Aerial spraying with herbicide	☐	☐	☐
	Ground survey ^c	☐	☐		Other use of herbicides	☐	☐	☐
	Other method (specify)	☐	☐		Burning	☐	☐	☐
	_____	☐	☐		Manual destruction	☐	☐	☐
	_____	☐	☐		Other method (specify)	☐	☐	☐
					_____	☐	☐	☐
Cannabis plant	Remote sensing ^b	☐	☐	Cannabis plant	Aerial spraying with herbicide	☐	☐	☐
	Ground survey ^c	☐	☐		Other use of herbicides	☐	☐	☐
	Other method (specify)	☐	☐		Burning	☐	☐	☐
	_____	☐	☐		Manual destruction	☐	☐	☐
	_____	☐	☐		Other method (specify)	☐	☐	☐
					_____	☐	☐	☐
Other (specify)	Remote sensing ^b	☐	☐	Other (specify)	Aerial spraying with herbicide	☐	☐	☐
	Ground survey ^c	☐	☐		Other use of herbicides	☐	☐	☐
	Other method (specify)	☐	☐		Burning	☐	☐	☐
	_____	☐	☐		Manual destruction	☐	☐	☐
	_____	☐	☐		Other method (specify)	☐	☐	☐
					_____	☐	☐	☐

^a The term "often" means more than 50 per cent of the time; "sometimes" less than 50 per cent of the time (but not never).

^b Remote sensing includes observations by means of aerial or satellite images.

^c Ground survey refers to the detection of illicit drug crop cultivation by conducting field visits.

Metadata

What sources of information (published and unpublished) were referred to in answering these questions?

48. How many clandestine laboratories were detected during the reporting year (regardless of the drug manufactured in the laboratories)?

^a Include laboratories at any phase of the manufacturing process. If no illicit drug manufacture occurred in your country during the reporting year, write "none" in the first cell.

^b At the "laboratory operational phase" drugs are being manufactured.

^c "Stable" refers to an estimated variation of under 10 per cent; "some increase" and "some decrease" refer to an estimated variation of between 10 and 25 per cent; "large increase" and "large decrease" refer to an estimated variation of more than 25 per cent.

^d At "synthesis laboratories" (also known as "powder laboratories"), synthetic drugs, drug intermediates and precursor chemicals in any form are manufactured from precursor and other chemicals. Such laboratories may or may not be operational at the time of discovery. Laboratories dedicated to refining, tableting, cutting and packaging are where drugs are processed but where no evidence of synthesis exists. MDMA powder is pressed into tablets.

tablets, powder or liquid methamphetamine is refined into the crystal form, drug powders are diluted (“cut”) to increase bulk and maximize profits and materials temporarily disguised for trafficking purposes are recovered (e.g. for cocaine conversion). There is no evidence of drug synthesis at the location.

f At sites where equipment or chemicals are stored there may be some or even all the components needed to manufacture drugs, but there is no evidence that drug synthesis or any other operation is taking place.

g Dumping sites are locations where equipment, packaging or chemical waste from synthesis laboratories have been discarded. However, no evidence exists that drug synthesis is taking place at such locations.

h In “kitchen laboratories” only basic equipment and simple procedures are used. Typically, those operating in such laboratories have a limited or non-existent knowledge of chemistry and simply follow instructions. Usually, there are no significant stores of precursors and the amount of drugs or other substances manufactured is for personal use (a typical manufacture cycle for amphetamine-type stimulants would yield less than 50 grams of the substance).

i People operating in other small-scale laboratories have advanced chemical knowledge. At such laboratories, more complex amphetamine-type stimulants may be manufactured. They may be of similar size to “kitchen laboratories” but frequently employ non-improvised equipment. They may also include experimental laboratories. The amount manufactured is typically for personal use or for use by a limited number of close associates (a typical manufacture cycle for amphetamine-type stimulants would yield less than 500 grams of the substance).

j Medium-to-large-scale laboratories use commercially available standard equipment and glassware (in some cases, custom-made equipment) and may operate for longer periods of time. They are not very mobile, making it possible to recover precursor chemicals and equipment in many cases (it is these types of laboratories for which production estimates are the most viable and reliable). The amount manufactured at such sites is primarily for illicit economic gain (a typical manufacture cycle for amphetamine-type stimulants would yield between 0.5 kg and 50 kg of the substance).

k Industrial-scale laboratories use oversized equipment and glassware that is either custom-made or purchased from industrial processing sources. Such industrial operations produce significant amounts of amphetamine-type stimulants in very short periods of time, the amount being limited only by access to precursors, reagents and consumables in adequate quantities and the logistics and manpower to handle large amounts of drugs or chemicals and process them into the next step (a typical manufacture cycle for amphetamine-type stimulants would yield 50 kg or more).

55			Question		56
What are the main types of clandestine laboratory that were detected in the reporting year?					Where are clandestine laboratories mainly located? Specify administrative areas and general location (e.g. north, south, centre) where manufacture takes place.
Substance manufactured	Type of laboratory	Frequency ^a	Never	Some- times	Often
_____	Mobile laboratory	☐	☐	☐	☐

What sources of information (published and unpublished) were referred to in answering these questions?

Clandestine laboratories

57. In the space provided below, provide information about no more than eight seizures carried out at clandestine laboratories during the reporting period. If the number of seizures that took place in your country is more than eight, provide information about seizures that illustrate common practices or that highlight emerging trends in illicit drug production and manufacture.

For each seizure, provide at least the following information, if available:

- Name of drug or end product manufactured
- Type of laboratory (e.g. if for processing, manufacture, tableting etc.)
- Volume and extent of drug manufacture (e.g. period of operation, amount manufactured during the period of operation, estimated production capacity)
- Methods, processes, routes of illicit manufacture
- For tableting laboratories: please describe any tablet marks or logos used and estimate the capacity of the tableting equipment
- Operational status of laboratory at the time of seizure (e.g. active, abandoned)
