

## Security Council

Distr.: General  
10 June 2021

Original: English

---

### Note by the President of the Security Council

At its 7488th meeting, held on 20 July 2015 in connection with the item entitled “Non-proliferation”, the Security Council adopted resolution [2231 \(2015\)](#).

In paragraph 4 of the resolution, the Security Council requested the Director General of the International Atomic Energy Agency to provide regular updates to the Council on the implementation by the Islamic Republic of Iran of its commitments under the Joint Comprehensive Plan of Action and to report at any time any issue of concern directly affecting the fulfilment of those commitments.

Accordingly, the President herewith circulates the report of the Director General dated 17 April 2021 (see annex).

**Annex**

**Letter dated 17 April 2021 from the Director General of the International Atomic Energy Agency addressed to the President of the Security Council**

I have the honour to enclose herewith a document submitted to the Board of Governors of the International Atomic Energy Agency (see enclosure).

I should be grateful if you would bring the present letter and the document to the attention of all members of the Security Council.

*(Signed)* Rafael Mariano **Grossi**

## Enclosure

[Original: Arabic, Chinese, English, French, Russian and Spanish]

# **Verification and monitoring in the Islamic Republic of Iran in light of United Nations Security Council resolution 2231 (2015)\***

## **Report by the Director General**

1. This report of the Director General to the Board of Governors and, in parallel, to the United Nations Security Council (Security Council), is on the Islamic Republic of Iran's (Iran's) implementation of its nuclear-related commitments under the Joint Comprehensive Plan of Action (JCPOA) in relation to its enrichment-related activities. It provides an update on developments since the Director General's previous reports.<sup>1</sup>

## **Activities Related to Enrichment**

2. As previously reported, on 13 April 2021, Iran informed the Agency that it intended to start producing UF<sub>6</sub> enriched up to 60% U-235<sup>2</sup> at the Pilot Fuel Enrichment Plant (PFEP) at Natanz,<sup>3</sup> and on 14 April 2021, the Agency verified that Iran had almost completed preparations to start feeding UF<sub>6</sub> enriched up to 5% U-235 into the cascade of IR-6 centrifuges in research and development (R&D) line 6 for the production of UF<sub>6</sub> enriched up to 60% U-235.<sup>4</sup> The tails produced from the cascade of IR-6 centrifuges were to be fed into the cascade of IR-4 centrifuges in R&D line 4 for the production of UF<sub>6</sub> enriched up to 20% U-235.<sup>5</sup>

3. On 17 April 2021, the Agency verified at PFEP that Iran was using a different mode for the production of UF<sub>6</sub> enriched up to 60% U-235 to the one being prepared for on 14 April 2021 as described in paragraph 2 above. On 17 April 2021, the Agency also verified that Iran had begun the production of UF<sub>6</sub> enriched up to 60% U-235 by feeding UF<sub>6</sub> enriched up to 5% U-235 simultaneously into the two cascades of IR-4 centrifuges and IR-6 centrifuges in R&D lines 4 and 6, respectively.<sup>6</sup> According to Iran's declaration to the Agency, the enrichment level of the UF<sub>6</sub> produced at PFEP was 55.3% U-235. The Agency took a sample of the produced UF<sub>6</sub> for destructive analysis to independently verify the enrichment level declared by Iran. The results of this analysis will be reported by the Agency in due course.
