

General Assembly

Distr. GENERAL

A/49/717 28 November 1994

ORIGINAL: ENGLISH

Forty-ninth session Agenda item 132 (a)

ADMINISTRATIVE AND BUDGETARY ASPECTS OF THE FINANCING OF THE UNITED NATIONS PEACE-KEEPING OPERATIONS: FINANCING OF THE UNITED NATIONS PEACE-KEEPING OPERATIONS

Support account for peace-keeping operations

Report of the Secretary-General

EXECUTIVE SUMMARY

In 1994 there were 18 peace-keeping operations. The total cost of these operations amounted to \$3,538 million. It would be safe to assume that the Organization will continue to be involved in peace-keeping.

The backstopping of peace-keeping operations can be defined, in general terms, as the overall direction, assistance and guidance given by departments/offices and other units, at Headquarters, for ensuring the effective planning, implementation and liquidation of peace-keeping operations. Backstopping consists of "core" and "non-core" functions.

The Organization must have a permanent capability to assume its responsibilities for the planning and orderly and timely launching of peace-keeping operations, even if no ongoing peace-keeping operation exists. This permanent capability will ensure the carrying out of the core functions associated with the management of key policy issues and organizational performance, strategic planning and start-up capacity. These core functions represent the fixed costs to the Organization and must be funded by the regular budget.

Backstopping functions that fluctuate with the number and size of peace-keeping operations, representing the variable costs to the Organization, would continue to be funded by the support account.

94-46803 (E) 301194

/...

> The total number of posts required in the support account to backstop peace-keeping operations effectively is estimated to be about 630. However, based on the current funding of the support account, which receives income calculated at 8.5 per cent of the civilian component costs of peace-keeping operations (equivalent to less than 1 per cent of the total cost of peacekeeping operations), it is not possible to finance this level of posts in 1995.

Accordingly, in light of the anticipated level of the support account, it is proposed that 431 posts, including the conversion of 65 posts currently under general temporary assistance and a request for an additional 24 posts, be funded from the support account in 1995. In this connection it should be noted that some Member States have provided personnel, mostly at no cost to the Organization, to meet part of the essential workload of backstopping peace-keeping operations.

The total projected expenditure for 1995 is approximately \$35.3 million, including non-staff costs of \$626,500.

I. INTRODUCTION

1. The General Assembly, having considered the report of the Secretary-General on the support account for peace-keeping operations (A/48/470/Add.1) and the related report of the Advisory Committee on Administrative and Budgetary Questions (A/48/955), adopted resolution 48/226 C of 29 July 1994 in which, inter alia, it:

(a) Endorsed the observations and recommendations contained in the report of the Advisory Committee, subject to the provisions of its resolution;

(b) Requested the Secretary-General to submit a report to the Assembly at its forty-ninth session pursuant to the recommendation contained in paragraph 21 of the report of the Advisory Committee.

2. The Advisory Committee, in that paragraph of its report, had requested the Secretary-General to clarify, in a comprehensive manner, the issues raised in connection with the rationale, scope, and funding of backstopping of peace-keeping operations, as well as the question of the threshold for establishing core posts to be funded from the regular budget and temporary posts to be funded from the support account.

3. The present report provides further clarification on the criteria for deciding which support activities should be funded from the regular budget and which from the support account, the extent to which the regular budget is already providing support and the threshold for establishing core posts to be funded from the regular budget.

4. The present report also presents the financial status of the support account from its inception on 1 May 1990 to 31 December 1994, as at 30 September 1994, in accordance with the reporting schedule proposed by the Secretary-General in paragraph 18 of his report of 18 September 1990 (A/45/493).

5. Figure I below shows comparative data on the total number of peace-keeping operations during the period from 1990 to 1994. Figure II below provides comparative costs of peace-keeping operations during the same period.

Figure I

Cost of peace-keeping operations

(Millions of United States dollars)

II. BACKSTOPPING OF PEACE-KEEPING OPERATIONS

As indicated in the report of the Secretary-General on the effective 6. planning, budgeting and administration of peace-keeping operations (A/48/945 and Corr.1), the scope of mission mandates has expanded from cease-fire monitoring and truce observation to include provision of electoral support, human rights monitoring, civilian police monitoring and training, military demobilization, mine clearance, even limited nation building and humanitarian support. То address this evolution of peace-keeping activities and enhance the Organization's capacity to plan, manage and direct them, the Department of Peace-keeping Operations was established in 1992. (For further information, see the report of the Secretary-General on the restructuring of the United Nations Secretariat (A/49/336)). Backstopping functions are also performed by other departments or offices in the political, humanitarian, legal, financial, personnel, logistical and other administrative areas. All these offices, with clear and distinct responsibilities, contribute to the common effort in a collective manner. Details of the responsibilities of these offices appear in the previous report of the Secretary-General on the support account (A/48/470/Add.1, paras. 5-13). A well-coordinated, timely and effective response to mandates for the implementation of peace-keeping operations requires an adequate and constant level of resources for those Secretariat units.

7. The backstopping of peace-keeping operations can be defined, in general terms, as the overall direction, assistance and guidance given by departments/offices and other units, at Headquarters, for ensuring the effective planning, implementation and liquidation of peace-keeping operations. This backstopping covers operational, political, military, humanitarian, legal, logistical, financial, personnel and other administrative aspects of peace-keeping operations. Backstopping is required for all peace-keeping operations and the larger the number of operations the greater the demands placed on the Secretariat to provide effective direction and ensure a well-coordinated and timely response to the mandates established by the Security Council.

8. The fact that peace-keeping operations have become increasingly complex and multifaceted is one that is not disputed. What is also not disputed is the need for the Secretariat to have the capacity to direct and support its peace-keeping operations world wide and around the clock, in a timely and effective manner.

9. The regular budget has always provided resources in support of the managerial, legal and administrative backstopping of peace-keeping operations, even when they were few and far between. As the number of peace-keeping operations increased, the additional requirements for backstopping, in terms of supplementary staff, or "overload posts", were financed from the various peace-keeping budgets. Following the more recent dramatic increase in the number of peace-keeping operations (see figure I), the support account was established in 1990 as a single mechanism for the distribution of costs among the various peace-keeping operations, to respond to, <u>inter alia</u>, the additional burden in the administrative and other areas as a result of the establishment of the various individual peace-keeping operations, and to meet the requirements associated with the pre-implementation phase, as pointed out by the Advisory Committee in paragraph 15 of its report (A/48/955). In light of the increased number and complexity of peace-keeping operations, the reliance on the support

account to supplement the resources provided under the regular budget became greater (see figure III below).

10. Whether or not there are peace-keeping operations, the Secretariat must have a capability, a permanent infrastructure, for carrying out the functions that are central or "core" to peace-keeping if it is to meet the demands and expectations of the international community. It is the view of the Secretary-General that these permanent "core functions" should be financed from the regular budget, representing the fixed costs to the Organization. Backstopping functions that fluctuate with the number and size of peace-keeping operations would continue to be financed from the support account, representing the variable costs to the Organization.

11. The subject of debate is the level of the demand that is being placed on the Secretariat for backstopping peace-keeping operations, and the extent to which that level can be distributed between the functions, financed by the regular budget, that remain permanent or "core", irrespective of the number and size of operations, and the functions, financed by the support account, that fluctuate with the increase or decrease in the number and size of the operations.

Figure III

Movement in the number of posts provided from the support account

III. CORE FUNCTIONS

Permanent capability for peace-keeping, including minimum start-up capacity, even if no ongoing peace-keeping operation exists

12. It would be safe to assume that the Organization will continue to be involved in peace-keeping. Therefore, it needs to have a permanent capability for peace-keeping, including a minimum start-up capacity, even if no ongoing peace-keeping operation exists.

13. This permanent capability to address peace-keeping issues and to respond quickly, efficiently and effectively to situations where the Organization has been called upon by the international community to act as peace-keeper, implies the performance of core functions which are ongoing, regardless of the number or size of peace-keeping operations. In order to achieve its objective of maintaining international peace and security, in accordance with the Charter of the United Nations, the Organization must be in a state of readiness and have at its disposal, on a permanent basis, the means necessary to assume its responsibilities for the planning, and the orderly and timely launching, of peace-keeping operations. This permanent capability must be funded from the regular budget.

14. The core functions can be defined as those associated with the management of key policy issues and organizational performance, strategic planning and start-up capacity, summarized as follows:

(a) <u>Executive direction</u>. Overall management, direction and coordination of all peace-keeping activities, including those related to the planning, implementation and liquidation of peace-keeping operations; and management of organizational performance;

(b) <u>Policy formulation and guidance</u>. Formulation of policies and procedures for peace-keeping activities, including those related to the conduct of peace-keeping operations (legal, financial, budgetary, personnel, logistics, communications, procurement); development of guidelines, manuals, training material and directives for different components of peace-keeping operations; and provision of guidance and technical advice for carrying out backstopping activities at Headquarters and for conduct of peace-keeping operations in the field;

(c) <u>Data collection, research and analysis</u>. Collection of data and conduct of research on emergent policy questions; conduct of needs-assessment and fact-finding missions; monitoring and analysis of developments; collection of data and information on local conditions, events and trends in the peacekeeping operations and on activities undertaken by organizations in the area of peace-keeping; maintenance and updating of databases on all aspects of peacekeeping (legal, financial, budgetary, personnel, logistics, communications, procurement); and evaluation and analysis of all aspects of peace-keeping

operations in order to draw lessons for improved planning, implementation and liquidation;

(d) Liaison with Member States and intergovernmental, regional and non-governmental bodies and coordination within the United Nations system. Maintenance of contacts with parties to the conflicts and Member States on the discharge of a mandate; servicing intergovernmental bodies; liaison with intergovernmental, regional and non-governmental bodies; and coordination within the United Nations system to ensure collaborative effort, consistent with policies and procedures;

(e) <u>Operational planning</u>. Translation of policies into operational plans and procedures for implementation; development and updates of basic criteria and parameters for determining and preparing for all operational requirements, including financial, personnel, equipment and services, for peace-keeping operations; monitoring developments and trends in order to address potential problems and changing needs; coordination with relevant offices of the Secretariat; examination of implications of changes in the mandates of existing operations; conduct of needs-assessment or fact-finding missions; organization and conduct of training programmes; and identification of strengths and weaknesses of procedures in order to improve future application;

(f) <u>Administrative planning</u>. Translation of policies into plans and procedures for implementation in the areas of finance, budget, personnel and procurement; development and updates of basic parameters for preparing budget estimates for peace-keeping operations; monitoring developments and trends in order to address potential problems and changing needs; examination of implications of changes in the mandates of existing operations; participation in needs-assessment or fact-finding missions; organization and conduct of training programmes; and identification of strengths and weaknesses of procedures in order to improve future application;

(g) <u>Start-up capacity</u>. Maintenance of minimum capacity for preparedness and readiness (legal, operational, financial, budgetary, personnel, logistics, communications and procurement); elaboration and maintenance of start-up capacity and standby arrangements with Governments; maintenance and coordination of availability of resources to ensure timely initial response; and maintenance of capability to mobilize the elements necessary to activate survey and start-up teams.

IV. CRITERIA FOR DECIDING WHICH SUPPORT ACTIVITIES SHOULD BE FUNDED FROM THE REGULAR BUDGET AND WHICH FROM THE SUPPORT ACCOUNT

Core functions must be funded from the regular budget

Activities arising from the increased volume of work related to the number and size of peace-keeping operations would be funded from the support account

15. The activities necessary to perform the core functions, as defined in paragraph 14 above, should be funded from the regular budget. All other activities arising from the increased volume of work related to the number and size of peace-keeping operations would be funded from the support account. The application of these criteria is discussed below.

16. As indicated in the previous report of the Secretary-General on the support account, backstopping functions are provided by a number of units within the Secretariat, namely, the Department of Peace-keeping Operations, the Department of Political Affairs, the Department of Humanitarian Affairs, the Office of Legal Affairs, the Department of Administration and Management and the Office of Internal Oversight Services; these backstopping functions include core functions which, in all cases except the Peace-keeping Financing Division of the Office of Programme Planning, Budget and Accounts in the Department of Administration and Management, are already being financed, to some extent, by the regular budget.

17. The Secretary-General, in paragraphs 4 to 14 of his previous report on the support account, described the three different categories of offices with backstopping responsibilities for peace-keeping operations, namely, (a) offices that have direct responsibilities exclusively for backstopping peace-keeping operations (Department of Peace-keeping Operations, the Peace-keeping Financing Division of the Office for Programme Planning, Budget and Accounts, and the Field Missions Procurement Section of the Office of Conference and Support Services); (b) offices that have direct but not exclusive responsibilities for backstopping peace-keeping operations (legal, accounts, treasury, human resources, buildings management, internal oversight); and (c) offices whose programmes may be affected, but to a much lesser degree, by additional work required in support of certain elements of peace-keeping operations.

18. It is the view of the Secretary-General that the offices that have direct responsibilities exclusively for backstopping peace-keeping operations (category (a)), should be provided with sufficient regular budget resources to finance the requisite number of posts for core functions.

A. Offices that have direct responsibilities exclusively for backstopping peace-keeping operations (category (a))

1. <u>Department of Peace-keeping Operations</u>

19. The core functions of the Department are:

(a) Executive direction (see para. 14 (a) above);

(b) Formulation of policies and procedures for operational aspects of peace-keeping activities, particularly as they relate to logistics and communications; development of guidelines, manuals, training material and directives for different components of peace-keeping operations; and provision of operational guidance and technical advice for carrying out backstopping functions at Headquarters and for the conduct of peace-keeping operations in the field;

(c) Collection of data and conduct of research on emergent policy questions; conduct of needs-assessment and fact-finding missions; monitoring and analysis of developments; collection of data and information on local conditions, events and trends in the peace-keeping operations and on activities undertaken by organizations in the area of peace-keeping; maintenance and updating of databases; and evaluation and analysis of operational aspects of peace-keeping operations in order to draw lessons for improved planning, implementation and liquidation;

(d) Liaison with Member States and intergovernmental, regional and non-governmental bodies; and coordination within the United Nations system (see para. 14 (d) above);

- (e) Operational planning (see para. 14 (e) above);
- (f) Maintaining start-up capacity (see para. 14 (g) above).

20. The number of posts estimated to be needed to perform these core functions is shown in paragraph 30 below. Some core functions are also currently being funded by the support account (see A/48/470/Add.1, paras. 8-47). It is the intention of the Secretary-General to submit his proposals for additional posts to be financed by the regular budget in the context of his proposed programme budget for the biennium 1996-1997.

21. On the basis of the distinction made for the two kinds of backstopping functions, the support account would continue to be used for activities arising from the increased volume of work related to the number and size of peace-keeping operations.

2. <u>Peace-keeping Financing Division, Office of Programme</u> <u>Planning, Budget and Accounts</u>

22. The core functions of this Division are:

(a) Formulation of policies and procedures for financial and budgetary aspects of peace-keeping activities; developing uniform budgetary techniques; providing policy guidelines in budgetary process and methodology for estimating costs and reporting to legislative organs; and determining policies related to budgetary control;

(b) Maintenance and updating of databases on financial and budgetary aspects of peace-keeping operations; and evaluation and analysis of these aspects in order to draw lessons for improved budgetary estimation and justification;

(c) Liaison with Member States and intergovernmental bodies (see para. 14 (d) above);

(d) Translation of policies into plans and procedures for implementation in the areas of finance and budget; development and updates of basic parameters for determining and preparing cost estimates for operational requirements; monitoring budget implementation and trends in order to address potential problems and changing needs; examination of implications of changes in the mandates of existing operations; participation in needs-assessment and factfinding missions; conduct of training programmes; and identification of strengths and weaknesses of procedures in order to improve future application;

(e) Maintaining start-up capacity (see para. 14 (g) above).

23. Currently, all core functions of this Division are financed by the support account. The number of posts estimated to be needed to perform these core functions is shown in paragraph 30 below. It is the intention of the Secretary-General to submit his proposal for regular budget posts in the context of the proposed programme budget for the biennium 1996-1997. On the basis of the distinction made for the two kinds of backstopping functions, the support account would be used for backstopping activities arising from the increased volume of work related to the number and size of peace-keeping operations.

3. <u>Field Mission Procurement Section, Office of Conference</u> and Support Services

24. The core functions of this Section are:

(a) Formulation of policies and procedures for procurement aspects of peace-keeping activities;

(b) Maintenance and enhancement of the procurement system; collection of data and information on market conditions; development of a market (goods and services) database; and evaluation and analysis of these aspects in order to draw lessons for improved procurement planning and implementation;

(c) Liaison with Member States and intergovernmental bodies (see para. 14 (d) above);

(d) Translation of policies into plans and procedures for implementation in the area of procurement; development and updates of basic parameters for determining and preparing procurement proposals for submission to the Committee on Contracts; monitoring developments and trends in order to address potential problems and changing procurement needs; examination of implications of procurement changes in the mandates of existing operations; participation in needs-assessment and fact-finding missions; conduct of training programmes; and identification of strengths and weaknesses of procedures in order to improve future application;

(e) Maintaining start-up capacity (see para. 14 (g) above).

25. The number of posts estimated to be needed to perform these functions is indicated in paragraph 30 below. On the basis of the distinction made for the two kinds of backstopping functions, the support account would be used for backstopping activities arising from the increased volume of work related to the number and size of peace-keeping operations.

B. Offices that have direct but not exclusive responsibilities for backstopping operations (category (b))

26. In category (b), the offices are provided with resources under the regular budget for carrying out functions falling within their respective areas of responsibility. As an integral part of their institutional responsibilities, the offices also undertake backstopping functions, including core functions, of peace-keeping operations. Based on the peace-keeping backstopping workload as a ratio of the total workload of the offices concerned, it has been estimated that the regular budget is absorbing an equivalent number of work months to the number of posts indicated in table 1 below.

27. The Secretary-General reiterates that for category (b), the support account would be used for backstopping activities arising from the increased volume of work related to the number and size of peace-keeping operations.

Table 1.Support for peace-keeping operations provided
from the regular budget

 $\underline{a}/$ Based on the ratio of peace-keeping activities workload to total workload of the Office; equivalent number of work months to the number of posts.

C. Offices whose programmes may be affected (category (c))

28. In this category, which includes offices whose work programmes have been affected but to a much lesser degree, the support account would be used for backstopping activities when their absorptive capacity cannot bear the additional workload resulting from the overall demand for backstopping activities.

D. <u>Threshold for establishing core posts</u>

29. In considering the threshold to be used for establishing core posts for category (a) above to be funded from the regular budget, as opposed to temporary posts funded from the support account, the following was borne in mind:

(a) The Organization has been involved in peace-keeping operations since 1948;

(b) It would be safe to assume from the unprecedented increase in the number of peace-keeping operations in recent years that the Organization will continue to be involved in peace-keeping operations;

(c) The nature and scope of the core functions, including a minimum startup capacity (see para. 14 above);

(d) The organizational structure necessary to perform the functions;

(e) The workload associated with the functions.

30. The review that was conducted, having taken into account all of the above considerations indicated that at the present time the number of core posts for category (a) would be about 88 (52 Professional and 36 General Service), for the Organization to have a basic and permanent capability to address peace-keeping issues, including a minimum start-up capacity, even if no ongoing operation exists. That number is broken down as follows:

 (a) Department of Peace-keeping Operations: 46 Professional, 28 General Service (34 and 20 respectively in the programme budget for the biennium 1994-1995);

(b) Peace-keeping Financing Division: 4 Professional, 3 General Service (none in the programme budget for the biennium 1994-1995);

(c) Field Missions Procurement Section: 2 Professional, 5 General Service (available in the programme budget for the biennium 1994-1995).

31. The estimated additional requirements will be proposed in the context of the Secretary-General's proposed programme budget for the biennium 1996-1997.

32. The table above provides information on the extent to which the regular budget is currently supporting peace-keeping operations.

V. RESOURCE REQUIREMENTS

8.5 per cent for the support account is equivalent to less than 1 per cent of the total cost of peace-keeping operations

33. The current methodology for the support account provides for 8.5 per cent of the actual costs of the civilian component in each mission to be credited to the support account. This methodology is equivalent to less than 1 per cent of the total cost of peace-keeping operations.

34. Under the terms of resolution 48/226 C, the General Assembly authorized, <u>inter alia</u>, 65 of the 92 posts requested by the Secretary-General, in paragraph 36 of his previous report, to be funded under general temporary assistance. This brought the total number of posts financed from the support account to 407 (see annex I). To cover the costs of the 65 posts, the Assembly authorized the amount of \$1 million for the six-month period from 1 July to 31 December 1994, as well as provisions for general temporary assistance (\$167,700), overtime (\$80,000), travel (\$140,000), training (\$480,000) and specialized equipment for the Situation Centre (\$592,000).

35. With regard to the 65 posts that were approved and funded under general temporary assistance for the period from 1 July to 31 December 1994, experience has so far shown that there are serious constraints in attracting suitably qualified, professional level personnel on as wide a geographical basis as possible under the conditions imposed by the very limited period of the general temporary assistance provided until 31 December 1994. Accordingly, the Secretary-General proposes the regularization of those posts, as shown in annex I. Detailed justifications for these posts appear in the previous report of the Secretary-General and the report of the Advisory Committee thereon.

36. It will be recalled that the Secretary-General, in paragraph 35 of his previous report, presented to the Member States a plan concerning an adequate backstopping capacity to manage peace-keeping operations effectively. At that time, the total number of posts required for effectively backstopping peace-keeping operations was considered to be about 630.

37. However, as long as the current funding methodology for calculating the income of the support account is maintained at 8.5 per cent of the actual civilian component costs, and as long as the consequent resource constraints continue, the Secretary-General will have to rely on Member States to provide personnel, mostly at no cost to the Organization, to meet part of the essential workload of peace-keeping backstopping functions. 1/ Unless this assistance from Member States is substantially increased, the Organization's backstopping capacity will continue to be insufficient to meet all the demands placed on it.

38. A further review of the backstopping capacity, conducted in preparing the resource requirements for 1995, has reaffirmed that 630 posts are necessary for backstopping. However, it is currently projected, based on the current funding methodology for the support account, that the level of resources in 1995 will be limited. Consequently, the Secretary-General is requesting no more than

24 additional posts, as indicated below and in annex II. Together with the proposed regularization of the 65 posts currently funded under general temporary assistance, as discussed in paragraph 35 above, the Secretary-General will have a total of 431 posts for the calendar year 1995, as indicated in annex III. Detailed justification for the 24 additional posts is provided in annex IV.

39. Information on staff resources, from all sources of funds, available to the departments and offices receiving posts from the support account is provided in annex V.

40. In addition to posts, the amount of \$483,500 is required for general temporary assistance, \$210,000 for overtime, \$120,000 for travel and \$506,500 for training. Detailed information is provided in paragraphs 23 to 25 of annex IV. The total projected expenditure for 1995 is approximately \$35.2 million, as summarized in annex VII, against projected income of \$35.8 million, which includes the estimated 1994 unencumbered balance of approximately \$9.2 million, as shown in annex VI.

VI. FINANCIAL STATUS OF THE SUPPORT ACCOUNT FROM INCEPTION TO 31 DECEMBER 1994, AS AT 30 SEPTEMBER 1994

41. The income credited to the account since it became operational, from 1 May 1990 to 31 December 1993, amounted to \$53,564,499, including interest income in the amount of \$1,237,932. Total expenditures for the same period amounted to \$38,632,177. In addition, an operating reserve in the amount of \$4,898,631 was maintained for 1993. The net unencumbered balance in the account as at 31 December 1993 was \$10,033,691.

42. For 1994, the amount of \$22,855,087 had been credited to the account as at 30 September 1994, including interest income in the amount of \$294,460. Projected income for the period from 1 October to 31 December 1994 is some \$4,298,000, giving a total estimated income of \$27,153,087. These figures are expected to change as the amounts contributed by individual peace-keeping budgets are adjusted to reflect actual levels of expenditure on civilian staff costs. An adjustment in the amount of \$531,986 will bring the operating reserve to \$5,430,617 for the year. Together with the unencumbered balance of \$10,033,691 from 1993, as mentioned above, the estimated total amount available for allotment for 1994 amounts to \$36,654,792. The estimated total expenditure for 1994 is in the amount of \$27,498,967 resulting in a projected balance of \$9,155,825. Annex VI provides a summary of income and expenditure for the period from 1 May 1990 to 31 December 1993 and for the period from 1 January to 31 December 1994, as well as projections for 1995.

VII. ACTION TO BE TAKEN BY THE GENERAL ASSEMBLY

43. The General Assembly, at its forty-ninth session, may wish to:

(a) Take note of the criteria for deciding which support activities (that is, core activities) are to be funded by the regular budget and which from the support account;

(b) Authorize the resource requirements proposed for 1995 (paragraphs 38 and 40 above) from the support account.

Notes

 $\underline{1}/$ There were 116 military officers in the Department of Peace-keeping Operations as of 16 November 1994. Of these, 93 were on loan from their Governments at no cost to the United Nations, 20 were on United Nations contracts and 3 were on temporary assignment from field missions.

ANNEX IV

Justification of resource requirements

1. The additional resource requirements for the period from 1 January to 31 December 1995, referred to in paragraph 38 of the main report, for each of the departments/offices that provides backstopping to peace-keeping operations are indicated below. Annex V to the present document provides information on total staff resources in each department/office, workload indicators and the organizational structure.

A. <u>Post requirements</u>

1. Department of Peace-keeping Operations

2. For 1995, 12 additional posts (1 D-1, 4 P-5, 1 P-4 and 6 General Service) are proposed for the Department of Peace-keeping Operations. This would bring the overall number of posts funded from the support account in the Department to 266. The additional posts are distributed among the various units indicated below:

(a) Office of the Under-Secretary-General

Executive Office

3. The Executive Office is responsible for the administration of the Department, which includes all budgetary, financial and personnel matters. Especially in the present phase of expansion and reorganization, the Executive Office, which was established only in June 1993, is seriously under-resourced. Consisting at present of one P-5 (general temporary assistance), two P-4, one P-3, one General Service (principal level) and three General Service (other level) staff, \underline{a} / it is proposed to increase its staffing complement by one General Service post to assist with personnel matters.

Policy and Analysis Unit

4. It is proposed to strengthen the Unit (comprised of one P-4 and one General Service staff member) by the addition of one P-5 and one General Service post. This Unit provides in-depth research and analysis of emergent policy questions and gathers information on related activities undertaken by intergovernmental, regional and non-governmental organizations, as well as research institutions. The Unit will be responsible for the preparation of pre-session documentation for the Special Committee on Peace-keeping and also for its technical and substantive servicing, and provides related services during the sessions of the

 $[\]underline{a}$ / It should be noted that one P-4 and one General Service staff are to provide electronic data-processing support for the Department. The two incumbents were previously assigned to the Military Adviser's office.

Special Political Committee of the General Assembly as well as for various other ad hoc intergovernmental committees on issues relating to peace-keeping.

5. The Department has tried to proceed on the basis of the Committee's recommendation that such activities could be carried out by the Department as a whole and coordinated by a single professional. This has proved difficult because there is no spare capacity in the functional areas of the Department to engage in the sustained reflection necessary for the sort of ongoing, in-depth analysis of peace-keeping experience required to formulate or revise doctrine. The concept of a coordinator for policy and analysis can only work if those who are to be coordinated are in a position to do substantial additional work beyond their current assignments. As it is, the Department is already severely overstretched.

(b) Office of Operations

Asia and Middle East Division

6. This Division is responsible for the United Nations Military Observer Group in India and Pakistan, the United Nations Iraq-Kuwait Observation Mission, the United Nations Truce Supervision Organization in Palestine, the United Nations Disengagement Observer Force, the United Nations Interim Force in Lebanon and the United Nations Peace-keeping Force in Cyprus. One additional P-4 post for a military Mission Officer is proposed to provide much-needed relief for the two other military staff of the Division. These officers provide the attention to military operational matters required for the effective exercise of the Department's responsibilities for command and control of the operations in the field. The Division currently has 10 posts comprising one D-1, one P-5, three P-4 (two of whom are military officers), two P-3 and four General Service staff. In view of the six existing missions and the possibility of one or two new ones, the current staffing is insufficient.

(c) Office of Planning and Support

7. The Office of the Assistant Secretary-General for Planning and Support is supported by one P-5 and one P-2 post, but does not have the required General Service staff. It is therefore proposed that two General Service posts be provided.

Civilian Police Unit

8. In order to enhance the current role of the Unit and respond to the present and future demands placed on it, and bearing in mind the various missions in which United Nations Civilian Police are currently involved, it is proposed that the Unit be strengthened by the provision of one D-1 post, for a Chief of Unit, and one General Service post. The Unit acts as a focal point for ensuring the availability for deployment of adequately trained civilian police and has the following functions:

(a) To provide advice and develop guidelines for the utilization, training and administration of civilian police in peace-keeping operations;

(b) To maintain contact with Governments concerning the provision of police for service with the United Nations;

(c) To advise appropriate Department of Peace-keeping Operations officers and field missions on operational police matters;

(d) To establish stand-by arrangements for mobilization and rotation of civilian police.

Field Administration and Logistics Division (formerly Field Operations Division)

Finance Management and Support Service

Office of the Chief

9. The P-5 post formerly incumbered by the Service Chief has been redeployed to accommodate a Chief of the Review and Analysis Section. One additional P-5 post is requested for the Office of the Chief to provide for a Deputy Chief of Service. The Service Chief spends 70 per cent of his time in preparing for and attending meetings of the Advisory Committee on Administrative and Budgetary Questions and providing additional information to the Advisory Committee, and devotes an average of 15 per cent of his time to the Fifth Committee, high-level meetings in the Department of Peace-keeping Operations, and meetings with representatives of contributing countries. The Deputy will be responsible for the day-to-day management of the Service. Functions include those related to internal control, coordination, mission support, staffing and training matters.

10. In addition, the Deputy Chief will act as Chief of the Financial Planning Section. The Section identifies requirements for all new field operations as well as expansions of existing operations, and coordinates requirements of missions in progress. In formulating resource requirements, the Section works in close collaboration with the Office of Operations, the Military Adviser's Office, the Personnel Management and Support Service and the Logistics and Communications Service, as well as with the special representatives of the Secretary-General and heads of administration in the field. In addition, the Section coordinates inputs of other departments, including the Department of Political Affairs, the Department of Humanitarian Affairs and the Department of Public Information and analyses the information contained in the reports of technical survey missions.

Logistics and Communications Service

Transport Section

11. This Section handles all support matters related to transportation, including aircraft and ship leasing, rental of transportation equipment, movement of personnel or equipment and safety of charted aircraft. The Section consists at present of two P-4, two P-3, one P-2 and seven General Service staff. One additional P-5 post is proposed for the Chief of Section. The incumbent will supervise the following units:

(a) The Air Safety Unit, which is responsible for ensuring that aviation safety measures are implemented in the field missions;

(b) The Air and Sea Transport Unit, which is responsible for preparation and analysis of bids and managing contracts for air and sea transport to and from field missions, as well as for chartering of aircraft. The Unit is also responsible for deployment of personnel and equipment to and from field missions and rotation and withdrawal of military contingents. The Unit will ensure that immediate demands for air and sea transport are met, that requirements are reviewed and contracts amended accordingly, and that troop rotations are expeditiously arranged as required;

(c) The Surface Transport Unit, which is charged with evaluating requirements emanating from established missions; preparation and analysis of bids, preparation of a short-list of suppliers, representing the Field Administration and Logistics Division at the Committee on Contracts, and managing contracts for surface transport.

Personnel Management and Support Service

Administration and Records Section

12. Three additional posts, one P-5 for the Chief of Section as well as two General Service posts, are proposed. The complexity of administering some 8,000 civilian personnel on mission is due, in large measure, to three variable operational requirements. One variable is the life-cycle of mission operations; the second is associated with the variety of local circumstances; and the third is related to the different types of contracts that govern the services of mission personnel. The Section accomplishes the following tasks:

(a) In administration, the processing and administering of entitlements, allowances, benefits, leave requests, extension and termination of appointments, performance appraisals, and numerous other personnel matters;

(b) In records management, the compilation, maintenance and updating of data for the thousands of civilian personnel serving in field missions in an accurate, reliable and timely fashion.

13. Workload indicators for the Service show that the Administration and Records Section will process approximately 3,457 personnel actions in 1994 as opposed to 1,753 in 1993, which represents an increase of 97 per cent. It is projected that the Section will process 427 personnel payroll clearance actions in 1994, compared to 67 in 1991, representing an increase of 537 per cent.

14. The Staffing Support Section expects to process 7,373 travel authorizations in 1994, as opposed to 1,097 in 1991, which signifies a 572 per cent increase.

15. The Service projects that it will process 1,144 requests for reimbursement of travel expenses in 1994, compared to 368 in 1991, which represents an increase of 211 per cent.

2. Department of Administration and Management

(a) Office of Programme Planning, Budget and Accounts

Peace-keeping Financing Division

16. Four additional posts (one P-5, one P-3 and two General Service) are proposed for 1995. The first two posts, one P-5 and one principal level General Service, are required to strengthen the Policy and Standardization Section. The incumbent of the P-5 post would be responsible for policy review, formulation and coordination with other offices on issues pertaining to budgetary matters specific to peace-keeping operations; streamlining and standardizing budgeting techniques and procedures; review and improvement of budget formats; and establishment of an integrated budget performance information system consisting of obligations and expenditures recorded at Headquarters and in the field and maintenance of local-area-network-based standard costing reference tables. The incumbent of the principal level General Service post would provide the necessary assistance.

17. The P-3 post is required to strengthen the section covering the Europe and Latin America region and would be responsible for the overall financial management of one mission. This would allow the senior officer heading the section to concentrate on the provision of proper supervision and training to the officers and support staff of the section and on the continuous improvement of the quality, accuracy and timeliness of the Secretary-General's budget proposals and performance reports.

18. Annex V, table 6 (a) provides information on the resources available to the Division as well as workload statistics.

Accounts Division

19. Four additional posts (one P-3 and three General Service) are proposed for this Division. The P-3 and two General Service posts are required to strengthen the Peace-keeping Missions Unit in the Operational Accounts Section. The staff of this Unit review and prepare vouchers for all cash remittance requests and imprest accounts, process large numbers of inter-office vouchers from around the world, approve all obligations at Headquarters for recording in the accounts and process the growing volume of reimbursement for troop-costs to Member States. Furthermore, the Unit is responsible for reviewing the accounts for each mission and prepares financial statements for each mandate period as well as responding to audit queries.

20. One additional General Service post is requested for the Insurance Section to strengthen its capacity to handle the growing volume of direct services required by personnel of peace-keeping missions. These involve the administration of the United Nations health and life insurance coverage for the aforementioned personnel as well as for their replacements. The Section's second responsibility involves arranging for third-party liability coverage for the vehicles, aircraft and other facilities utilized in the field, including war-risk insurance and general liability coverage for third parties such as journalists. Information on the total resources available to the Division is provided in annex V, table 6 (b).

(b) Office of Human Resources Management

21. One additional P-5 post is proposed for the head of the Field Missions Unit of the Recruitment and Placement Division. This strengthening is urgently required to enhance the Unit's capacity to provide peace-keeping missions with qualified personnel. Apart from supervisory responsibilities, the incumbent is also responsible for policy formulation and direction in the recruitment of staff for peace-keeping operations; maintains liaison with the Field Administration and Logistics Division of the Department of Peace-keeping Operations on personnel requirements; serves as the focal point for the recruitment of personnel for major missions, including the identification and evaluation of internal and external candidates; and represents the Division in various working groups and task forces relating to the staffing of peace-keeping operations.

22. Annex V, table 8 provides information on the resources available to the Division as well as workload statistics. The statistical information shows that 43.7 per cent of all recruitment and placement in 1993 related to peace-keeping operations, while only 16.4 per cent of the Unit's posts were funded from the support account. In the first nine months of 1994, 48.45 per cent of all recruitment and placement related to peace-keeping.

3. Office of Internal Oversight Services

23. Three additional posts, one P-4 and two P-3, are proposed to strengthen the Audit and Management Control Division. This would enable the Division to carry out the required audit coverage of all transactions relating to peace-keeping operations at Headquarters as well as in the field. Annex V to the present document provides information on the total resources available to the Division (table 4) as well as on workload statistics (table 4 (a)).

B. <u>Non-post resource requirements</u>

<u>General temporary assistance</u>

24. Estimated requirements in the amount of \$483,500 will be required in 1995 to provide for periods of peak workload and temporary replacement of staff on leave (\$130,000 for the Department of Peace-keeping Operations and \$130,000 for the Department of Administration and Management) and for special requirements (\$223,500) in the Executive Office of the Secretary-General.

Overtime

25. The estimated amount of \$210,000 would cover the cost of overtime work (\$120,000 for the Department of Peace-keeping Operations and \$90,000 for the Department of Administration and Management). Overtime work continues to be unavoidable owing to the need to meet deadlines inherent to the nature of the work of the units supporting peace-keeping operations at Headquarters.

Travel on official business

26. The amount of \$120,000 is proposed to enable the Department of Peacekeeping Operations to undertake mission planning activities and stand-by forces negotiations (\$80,000) and to allow up to eight Finance Officers from the Peacekeeping Financing Division to undertake in 1995 field visits to eight peacekeeping operations to assess financing requirements (\$40,000).

Training

27. The estimated requirements in the amount of \$546,300 would enable the Department of Peace-keeping Operations to undertake in 1995 the activities specified in paragraph 27 below. Member States will provide the actual military training, while the Department will promote and coordinate these training activities. The Department will continue to develop common peace-keeping doctrine and related operational manuals, including performance goals, and to publicize teaching aids, hold promotional briefings and organize multinational command and staff exercises. The manuals will explain United Nations operating tactics and staff procedures and how the various units should be trained. Upon request, the Department will assist Member States in validating their training, as well as in training national trainers.

28. The following specific activities are planned for 1995:

(a) To coordinate the training policy of all troop-contributing States in order to standardize and improve peace-keeping training;

(b) To provide technical support and advice to 45 national or regional peace-keeping training institutions;

(c) To convene three regional workshops with the leaders of existing peace-keeping training centres in order to share methods and coordinate a common United Nations peace-keeping doctrine;

(d) To provide technical assistance and advice to well over 70 troopcontributing countries;

(e) To prepare six United Nations teams to assist in the development of specialized training programmes of Member States;

(f) To follow up peace-keeping training in ongoing operations and transfer experience to other operations;

(g) To maintain close contacts with institutes and non-governmental organizations in order to follow new developments in the field of peace-keeping training and other related matters;

(h) The \$546,300 mentioned above would provide for the three workshops and four courses indicated below (\$409,300) as well as for the preparation and printing of training materials (\$107,000) and for preparatory travel for consultations (\$30,000).
