Austria

[Original: English]
[31 January 2017]

The Austrian Aviation Rules were revised in 2014 (see Austrian Federal Law Gazette II No. 297/2014). The definition of the Austrian Upper State Boundary, which is now in section 3 (5), remained unchanged and continues to read as follows: “Upper State Boundary — USB: the altitude at which aircraft can no longer move by aerodynamic lift but only according to Kepler’s force”.¹
