Reaffirming its resolution [70/1](#) of 25 September 2015, entitled “Transforming our world: the 2030 Agenda for Sustainable Development”, in which it adopted a comprehensive, far-reaching and people-centred set of universal and transformative Sustainable Development Goals and targets, its commitment to working tirelessly for the full implementation of the Agenda by 2030, its recognition that eradicating poverty in all its forms and dimensions, including extreme poverty, is the greatest global challenge and an indispensable requirement for sustainable development, its commitment to achieving sustainable development in its three dimensions – economic, social and environmental – in a balanced and integrated manner, and to building upon the achievements of the Millennium Development Goals and seeking to address their unfinished business,

Reaffirming also its resolution [69/313](#) of 27 July 2015 on the Addis Ababa Action Agenda of the Third International Conference on Financing for Development, which is an integral part of the 2030 Agenda for Sustainable Development, supports and complements it, helps to contextualize its means of implementation targets with concrete policies and actions, and reaffirms the strong political commitment to address the challenge of financing and creating an enabling environment at all levels for sustainable development in the spirit of global partnership and solidarity,

Reaffirming further its resolution [72/279](#) of 31 May 2018 on the repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system, as well as its resolution [75/233](#) of 21 December 2020 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system and the general guidelines and principles contained therein, and welcoming the efforts of the Secretary-General to better position the United Nations operational activities for development to support countries in their efforts to implement the 2030 Agenda for Sustainable Development,

Recalling the objectives of the 2030 Agenda for Sustainable Development and the Addis Ababa Action Agenda, in particular with regard to developing partnerships through the provision of greater opportunities to the private sector, non-governmental organizations and civil society in general so as to enable them to contribute to the realization of the goals and programmes of the Organization, in particular in the pursuit of sustainable development and the eradication of poverty,

Welcoming, therefore, the contribution of all relevant stakeholders, including the private sector, civil society, non-governmental organizations, philanthropic organizations, scientific and technological communities and academia, that respect

and support, as appropriate, the core values and principles of the United Nations, to the realization of the Sustainable Development Goals and other internationally agreed development goals,

Emphasizing that cooperation between the United Nations and all relevant partners, in particular the private sector, can further contribute to addressing the obstacles confronted in particular by developing countries through responsible business practices, such as respecting the principles of the United Nations Global Compact and taking action, including by mobilizing the resources needed to finance sustainable development, and to realizing the internationally agreed development goals in developing countries,

Noting that the relevant stakeholders, including private sector entities, need information about and understanding of the nature and the scope of the Sustainable Development Goals and of the modalities by which they can engage with the Goals, and that, in this regard, decisive action is also imperative for raising awareness of the Goals at all levels,

Recognizing that, while progress is being made on the global engagement of the private sector regarding the Sustainable Development Goals at the level of perception and awareness as well as the inclusion of sustainability in their business models by some companies, the immense potential of support for the Goals, in particular by small and medium-sized enterprises, still represents a largely unutilized source for the full implementation of the Goals,

Recognizing also the unique position of the United Nations as a builder of bridges among countries and all stakeholders, and the progress achieved in the work of the United Nations on partnerships, notably in the framework of various United Nations organizations, agencies, funds, programmes, task forces, commissions and initiatives, and noting the establishment of partnerships at the field level entered into by various United Nations agencies, non-public partners and Member States, as well as multi-stakeholder partnerships,

Underlining the fact that cooperation between the United Nations and all relevant partners, including the private sector, and all partnerships using the United Nations name or emblem shall serve the purposes and principles embodied in the Charter of the United Nations and shall be undertaken in a manner that maintains and promotes the integrity, impartiality and independence of the Organization,

Welcoming the efforts and encouraging further efforts by all relevant partners, including the private sector, to engage as reliable and consistent partners in the development process and to take into account not only the economic and financial but also the development, social, human rights, gender and environmental implications of their undertakings, and, in general, towards implementing corporate social and environmental responsibility, that is, bringing such values and responsibilities to bear on their conduct and policies premised on profit incentives, in conformity with national laws and regulations,

Emphasizing that multi-stakeholder partnerships in particular and the resources, knowledge and ingenuity of all relevant stakeholders will be important in mobilizing and sharing knowledge, expertise, technology and financial resources, complementing the efforts of Governments and supporting the achievement of the Sustainable Development Goals, in particular in developing countries,

Welcoming, in the context of enhanced cooperation between the United Nations and all its relevant partners, including through multi-stakeholder partnerships, efforts to step up international cooperation and collaboration in science, research, technology and innovation on the basis of common interest and mutual benefit, focusing on the

needs of developing countries and the achievement of the 2030 Agenda for Sustainable Development,

Recalling the Guidelines on a Principle-based Approach to the Cooperation between the United Nations and the Business Sector and their alignment with the Guiding Principles on Business and Human Rights: Implementing the United Nations “Protect, Respect and Remedy” Framework,¹

Recalling also that the 2030 Agenda for Sustainable Development acknowledges that the implementation of sustainable development will depend on the active engagement of both the public and private sectors, and recognizing that the active participation of the private sector can contribute to the achievement of sustainable development, as well as recognizing the roles and contributions of civil society, the scientific and technological communities, non-governmental organizations and other relevant international organizations, including international financial institutions and multilateral development banks, in advancing sustainable development,

Recognizing the contributions of all relevant partners, including the private sector, in fostering stability and supporting recovery by creating job opportunities, advancing economic development, as well as infrastructure development, and, as appropriate, contributing to trust, reconciliation and security,

Noting that financial and economic crises demonstrate the need for values and principles in business, including for sustainable business practices, gender equality, social protection floors and the promotion of full and productive employment and decent work for all,

Reaffirming the principles of sustainable development, and underlining the global consensus reached on the key values and principles that will promote sustainable, fair, equitable and sustained economic development and that corporate social and environmental responsibility are important elements of that consensus,

Recognizing the continued efforts by the Development Cooperation Forum of the Economic and Social Council and other relevant forums to strengthen partnerships with the private sector and other stakeholders,

Encouraging the private sector in the context of enhanced cooperation between the United Nations and all its relevant partners to enhance its involvement in combating climate change, and welcoming the commitments to leadership on climate action already made by relevant stakeholders,

Recalling that the high-level political forum on sustainable development has a central role in overseeing the follow-up and review of the 2030 Agenda for Sustainable Development at the global level, including with regard to partnerships,

Stressing the importance of the high-level political forum on sustainable development in supporting the participation in follow-up and review processes by the major groups and other relevant stakeholders pursuant to resolution [75/290](#) B of 25 June 2021, and calling upon those actors to report on their contribution to the implementation of the 2030 Agenda for Sustainable Development,

Recognizing the vital role that the United Nations Global Compact Office continues to play with regard to strengthening the capacity of the United Nations to partner strategically with the private sector, in accordance with its mandate from the General Assembly, to advance United Nations values and responsible business practices within the United Nations system and among the global business

Noting with great concern the severe negative impact on human health, safety and well-being caused by the coronavirus disease (COVID-19) pandemic, as well as the severe disruption to societies and economies and the devastating impact on lives and livelihoods, and that the poorest and most vulnerable are the hardest hit by the pandemic, reaffirming the ambition to get back on track to achieve the Sustainable Development Goals by designing and implementing sustainable and inclusive recovery strategies to accelerate progress towards the full implementation of the 2030 Agenda for Sustainable Development and to help to reduce the risk of and build resilience to future shocks, crises and pandemics, including by strengthening health systems and achieving universal health coverage, and recognizing that equitable and timely access for all to safe, quality, effective and affordable COVID-19 vaccines, therapeutics and diagnostics are an essential part of a global response based on unity, solidarity, renewed multilateral cooperation and the principle of leaving no one behind,

Recognizing the critical importance of optimizing the potential of partnerships across the United Nations system and beyond, in particular in the context of sustainable, resilient and inclusive recovery from the COVID-19 pandemic, and acknowledging the lessons learned from embracing new technologies and shortening timelines when partnering in response to COVID-19, which helped to enable greater inclusivity, speed, scale and impact with the participation of stakeholders, including civil society, academia and the private sector,
