II. Information received from Member States

Morocco

[Original: French]

[24 January 2022]

Suborbital flights should be regarded as a practical case that warrants the definition and delimitation of outer space.

Philippines

[Original: English]

[26 January 2022]

An international definition and delimitation of outer space may help in future legislation regarding commercial human spaceflight (e.g. space tourism), including in relation to the licensing of operators, safety regulations and the protection of consumer rights.
