Myanmar

[Original: English]
[30 December 2022]

As the national satellite project is ongoing, the Republic of the Union of Myanmar is still arranging and has not yet formed the appropriate national space law and regulations and national regulatory frameworks. After completion of the approval of national legislation for the space system, the report's end information will be submitted to the Office for Outer Space Affairs of the Secretariat, as requested.

Myanmar also agreed with the Legal Subcommittee of the Committee on the Peaceful Uses of Outer Space that national legislation is important to development not only in the area of national space activities but also in the process of building up the secure and peaceful exploration and use of outer space.
