**Committee on the Peaceful
Uses of Outer Space**

**Information furnished in conformity with the Convention
on Registration of Objects Launched into Outer Space**

**Note verbale dated 27 March 2017 from the Permanent
Mission of France to the United Nations (Vienna) addressed
to the Secretary-General**

The Permanent Mission of France to the United Nations (Vienna), in accordance with the provisions of the Convention on Registration of Objects Launched into Outer Space, adopted on 12 November 1974, and of General Assembly resolution 62/101, adopted on 17 December 2007, has the honour to submit the following information on space objects registered by France in 2016.

In 2016, France registered 17 space objects (three satellites, of which two were registered on behalf of the European Telecommunications Satellite Organization (Eutelsat), and 14 launcher elements) in the French National Register of Objects Launched into Outer Space, which is maintained by the National Centre for Space Studies (CNES) on behalf of the State, in accordance with articles 12 and 28 of Law No. 2008-518 of 3 June 2008, pertaining to space operations, articles 14-1 to 14-6 of Decree No. 84-510 of 28 June 1984, pertaining to CNES, and the provisions of the order of 12 August 2011 establishing the list of information needed to identify a space object.

The Permanent Mission of France has the honour to note that the following information is provided in the annexes to the present note:

- Pursuant to article IV, paragraph 1, of the Registration Convention, a list of satellites registered by France (annex I, table 1), a list of space objects launched into orbit and registered by France (annex I, table 2) and a list of satellites launched from French territory on behalf of foreign operators (annex I, table 3)
- Pursuant to article IV, paragraph 3, of the Registration Convention, a list of objects registered by France that have re-entered the atmosphere (annex II)
- Pursuant to article IV, paragraph 2, of the Convention, additional information from the French National Register of Objects Launched into Outer Space relating to satellites operating in low Earth orbit (annex III, table 1), satellites operating in geostationary orbit (annex III, table 2) and satellites that remain in orbit but are no longer operational (annex III, table 3).

As at 31 December 2016, the French National Register contained 354 space objects, of which 127 were satellites (66 were operational) and 207 were component

parts of launchers (launcher stages and carrier structures). It should also be noted that, of the above-mentioned 127 satellites:

- Forty-five are listed as Eutelsat satellites, in accordance with an agreement that remains in force between France and Eutelsat-IGO under which the satellites of Eutelsat are registered by France (19 satellites were launched between 1983 and mid-2001, of which 4 are still operated by Eutelsat S.A.)
- The second-generation Globalstar satellites, of which there are currently 24, are now registered by France, in accordance with article 9 of the Order of 29 August 2011
- The Eutelsat 70D satellite registered by France, launched on 21 August 2002, was decommissioned on 7 August 2016
- The SPOT 7 satellite, initially registered by France in 2016, was transferred to and registered by Azerbaijan in December 2016 and was therefore removed from the French National Register.

The Permanent Mission of France has the further honour to note that registration data as at 31 December 2015 are also attached (see annexes IV-VI) for the information of the Office for Outer Space Affairs and to update the information contained in the Registry provided for under article III of the Registration Convention, which the Office maintains on behalf of the Secretary-General of the United Nations.
